COLUMBIA COLLEGE BULLETIN

2020-2021 | Columbia College | Founded 1754

2020-2021 ACADEMIC YEAR

In order to allow for the de-densification of campus and to offer the maximum amount of flexibility in course offerings, the 2020-2021 academic year will be comprised of three semesters of equal length: Fall 2020, Spring 2021, and Summer 2021. Students are not required to enroll in Summer 2021 but may wish to spread their academic-year coursework over the three semesters.

Modifications to Academic Policies for Spring 2021

As in Fall 2021, students now taking a fully, or mostly, online semester are in a system of learning that is less than familiar to them — one that continues to require them to develop and practice new types of engagement in class, new strategies for learning with online materials, and new habits for work in remote locations. It is also a system of learning that can suffer interference from a variety of technical difficulties or limitations. In recognition of these current challenges, the CC-GS Committee on Instruction (COI) has approved some temporary modifications to certain academic policies for the Spring 2021 semester:

- Students will be able to elect the Pass/D/Fail option for one class this semester without restriction — i.e., the course chosen for this grading option can fulfill a requirement for the Core Curriculum; a requirement for a major, concentration, or special concentration; or an elective.
- The deadline for declaring the Pass/D/Fail option for a course will be extended to the last day of classes for the term: February 22 for Spring A courses; April 15 for full Spring and Spring B courses.
- The deadline to withdraw from a course will also be extended to the last day of classes for the term: February 22 for Spring A courses; April 15 for full Spring and Spring B courses.

The usual policy for lifting a “P” to uncover a grade will continue. Students will be able to see their assigned grade for the course in question in SSOL and decide by the end of the second week of the Fall 2021 semester (by September 17) whether to uncover the grade or let the “P” remain on the transcript permanently.

It is important to note that there are situations in which it may not be desirable or beneficial for students to use the Pass/D/Fail option for particular courses of study. The notation of a “P” on a transcript can be read differently by different audiences (within a department or program, within a school, by admissions programs of graduate and professional programs, by employers), and it is important for students to consider future plans when considering a decision that will affect their educational records. **Students are therefore strongly encouraged to speak with their academic advisers and their Directors of Undergraduate Studies before making the decision to use the Pass/D/Fail option, particularly for a class within a major or concentration or for a class that is required or may be important for graduate study.**

Modifications to Academic Policies for Fall 2020

After an abrupt and brief introduction to online courses in Spring 2020, students now taking a fully online semester are in a system of learning that is still less than familiar to them — one that continues to require them to develop and practice new types of engagement in class, new strategies for learning with online materials, and new habits for work in remote locations. It is also a system of learning that can suffer interference from a variety of technical difficulties or limitations. In recognition of these current challenges, the CC-GS Committee on Instruction (COI) has approved some temporary modifications to certain academic policies for the Fall 2020 semester:

- Students will be able to elect the Pass/D/Fail option for one class this semester without restriction — i.e., the course chosen for this grading option can fulfill a requirement for the Core Curriculum; a requirement for a major, concentration, or special concentration; or an elective.
- The deadline for declaring the Pass/D/Fail option for a course will be extended to the last day of classes for the term (December 14).
- Students who completed an immersive course in the “Fall A” term can choose to retroactively apply the Pass/D/Fail option to that course as their one Pass/D/Fail course for Fall 2020.
- The deadline to withdraw from a course will also be extended to the last day of classes for the term (December 14).

The usual policy for lifting a “P” to uncover a grade will continue. Students will be able to see their assigned grade for the course in question in SSOL and decide by the end of the second week of the Spring 2021 semester (by January 22) whether to uncover the grade or let the “P” remain on the transcript permanently.

It is important to note that there are situations in which it may not be desirable or beneficial for students to use the Pass/D/Fail option for particular courses of study. The notation of a “P” on a transcript can be read differently by different

audiences (within a department or program, within a school, by admissions programs of graduate and professional programs, by employers), and it is important for students to consider future plans when considering a decision that will affect their educational records. **Students are therefore strongly encouraged to speak with their academic advisers and their Directors of Undergraduate Studies before making the decision to use the Pass/D/Fail option, particularly for a class within a major or concentration or for a class that is required or may be important for graduate study.**

2020-2021 Academic Calendar

The dates for the three semesters are as follows:

Fall Term (September 8 - December 23)

Spring Term (January 11 - April 26)

Summer Term (Summer A: May 3 - June 18; Summer B: June 28 - Aug. 16)

(Students are not required to enroll in Summer 2021 but may wish to spread their academic-year coursework over the three semesters.)

Commencement will be held the last week of April.

Modality of Courses offered in 2020-2021 Academic Year

Courses offered in Fall 2020, Spring 2021, or Summer 2021 may be offered in one of three modalities: in-person only, online only, or a hybrid of the two. These modalities are further defined below:

In-person: Courses that utilize a traditional, face-to-face format, with no or minimal digital content (up to 20% of contact hours). In this format, both the instructor and the students are in the classroom. For Fall 2020, this modality is available only to courses with fewer than 50 students. The class needs a physical classroom that will have the capacity to accommodate all enrolled students with the required physical distancing. In-person classes should be prepared to allow students to join remotely since some students will not be able to return and there may be more than the usual number of absences (e.g. students who are in isolation or quarantine, or who are late arriving on campus because of visa delays).

Online: Courses that are primarily digital/online -- 80% or more of contact hours are online using practices that effectively engage learners, faculty, peers and content.

Hybrid: Courses that include both teaching in-person and teaching on-line as part of the fundamental course design. As a general guide, digital content can range between 20% and 80% of the course contact hours. Faculty members planning to offer a hybrid course should add to

the syllabus the kinds and rough frequency of in-person and on-line course components students can expect.

There are several kinds of courses that fall into the hybrid category. Among other models, these include the following types of courses:

- In-person attendance will always be less than the full enrollment to enable required physical distancing, with all other students participating remotely in real time, enabled by appropriate classroom technology.
- Classes will be on-line for some sessions, but with in-person meetings for subsets of students at other times--e.g., a lecture with some meetings in-person and some on-line or a lecture that is fully on-line but the discussion sections are offered in-person.
- HyFlex: Courses that are hybrid flexible or "HyFlex" are courses that combine in-person and online learning with each class session offered in-person, synchronously online, and asynchronously online. In order for this modality to be utilized, classrooms must be equipped with the appropriate technology.

The modality of a course is noted on the course page in the online Directory of Courses.

Subterms and Immersive Block Courses

Most of the undergraduate curriculum will continue to be offered as semester-long courses. However, departments have also developed immersive "block" courses that take place over half a semester, or 7 weeks. An immersive course will cover a semester's worth of material in half the time, with twice as many hours of class meetings per week to allow for more sustained focus on the course topic and more regular contact between faculty and students. The 7-week period is considered a subterm of a semester--i.e., the subterm "Fall A" takes place during the first half of the full Fall semester, and the subterm "Fall B" takes place during the second half of the full Fall semester. The Spring semester will also offer subterms, Spring A and Spring B, and the Summer semester will offer full 14-week courses as well as subterms Summer A and Summer B.

If a course is being offered in an immersive block structure, the subterm in which it will be offered is noted on the course page in the online Directory of Courses. If students are interested in immersive courses in both subterms -- e.g., enrolling in a Fall A course and then enrolling in a Fall B course -- they should add both courses to their academic programs during the change-of-program period in the first two weeks of the full semester. While changes to Fall B courses can be accommodated at a later date if necessary, the Fall B course must be noted in the full semester plan in order to reflect the number of credits that a student is pursuing during the full semester.

Credits

Students who enroll for the academic year must enroll in a minimum of 12 credits in the Fall and in the Spring. This constitutes full-time status and will also ensure successful progression towards completion of your degree requirements. As is usually the case, students may take up to a maximum of 18 credits in the Fall and in the Spring.

Fall and Spring will have the normal tuition structure. Furthermore, for students enrolled full-time in Fall and Spring, Summer courses will be offered at no additional tuition cost, up to a maximum of 40 credits spread across the three semesters. Students are not required to enroll in Summer 2021 but may wish to spread their academic-year coursework over the three semesters. Academic departments and programs have adjusted their curricular offerings across the Fall, Spring, and Summer terms to allow students greater flexibility in fulfilling their requirements and making progress to their degrees. This expanded three-term structure then gives students flexibility to either spread their full set of courses over three terms and/or to pursue additional courses towards a minor and exploring wider interests across the academic year.

Academic Support Services

Berick Center for Student Advising (CSA) advisers are available to help students navigate the multiple opportunities in the 2020-2021 academic year. Given that most classes will be taught entirely or partially online, please read these tips for online learning. Advisers will be checking in regularly with their student advisees once the school year commences, to offer support and discuss strategies for success. Throughout the summer, students can also make an appointment with their CSA adviser. Please also check the CSA website for updates about the upcoming academic year.

ACADEMIC CALENDAR

2020-2021 ACADEMIC YEAR

In order to allow for the de-densification of campus and to offer the maximum amount of flexibility in course offerings, the 2020-2021 academic year will be comprised of three semesters of equal length: Fall 2020, Spring 2021, and Summer 2021. Students are not required to enroll in Summer 2021 but may wish to spread their academic-year coursework over the three semesters.

Columbia University reserves the right to revise or amend this academic calendar, in whole or in part, at any time. Registration and Change of Program period dates are tentative, and students should consult their registration materials or speak with their advising dean in the [Berick Center for Student Advising](#) to confirm up-to-date deadlines. Updated calendar information is also available from the [Registrar](#).

SUMMER REGISTRATION DATES FOR FALL 2020

June	8-12	Monday-Friday. Online registration for Fall 2020 via Student Services Online (SSOL) appointment: continuing students only.
	15-19	Monday-Friday. Online registration for Fall 2020 via Student Services Online (SSOL) appointment: continuing students only.
August	3-7	Monday-Friday. Online registration for Fall 2020 via Student Services Online (SSOL) appointment: continuing students only.
	10-14	Monday-Friday. Online registration for Fall 2020 via Student Services Online (SSOL) appointment: continuing students only.
	25-27	Tuesday-Thursday. Online registration for Fall 2020 via Student Services Online (SSOL) appointment: continuing and transfer students only.

FALL TERM 2020

July	31	Friday. Last day for new students entering in Fall 2020 to submit vaccination documentation for measles, mumps, and rubella; and to certify meningitis decision via secure.health.columbia.edu . Vaccination documentation is due 30 days prior to registration; students are not permitted to register for classes without this documentation.
August	31	Monday. New Student Orientation Program begins for new students entering in Fall 2020.
September	1	Tuesday. Last day to apply or reapply for the B.A. degree to be awarded in October 2020. Applications received after this date are automatically applied to the next conferral date.
	4-5	Friday-Saturday. Fall 2020 online registration for first-year students via Student Services Online (SSOL) appointment.
	5	Saturday. Fall 2020 online registration for continuing and transfer students via Student Services Online (SSOL) appointment.
	7	Monday. Labor Day. University holiday.
	8	Tuesday. Last day to submit Student Health History form using the Columbia Health Portal.
	8	Tuesday. First day of classes for Fall and Fall A courses (on a Tuesday schedule) for the 267th academic year.
	8-18	Weekdays only. Fall 2020 Change of Program period by online appointment via Student Services Online (SSOL): all students.
	11; 14	Friday; Monday. Deferred examination dates.
	11	Friday. Last day to add a Fall A class. Last day to join a Fall A class off the Wait List via Student Services Online (SSOL). The Wait List tool will close at 9:30 p.m.

	18	Friday. End of Change of Program period. Students must be registered for a minimum of 12 points. Last day to add Fall or Fall B courses. Last day to join a Fall B class off of the Wait List via Student Services Online (SSOL). The Wait List tool will close at 9:30 p.m. Last day to drop a Core Curriculum course. Last day to uncover grade for a Summer 2020 course taken Pass/D/Fail.
	21– October 8	Weekdays only. Post Change of Program Add/Drop period by online appointment via Student Services Online (SSOL).
	22	Tuesday. Deadline to drop Fall A courses.
	30	Wednesday. Last day to confirm, enroll dependents, or request a waiver (domestic students only) from the Columbia Student Health Insurance Plan.
October	8	Thursday. Last day for students to drop Fall full-term courses via Student Services (SSOL). Last day to choose P/D/Fail for Fall A courses. Deadline to withdraw from a Fall A course.
	20–23	Tuesday-Friday. Reading and final exam period for Fall A courses.
	21	Wednesday. Award of October degrees.
	22	Thursday. Midterm Date.
	26	Monday. First day of Fall B courses.
November	1	Sunday. Last day to apply or reapply for the B.A. degree to be awarded in February. Applications received after this date are automatically applied to the next conferral date.
	2	Monday. Academic holiday.
	3	Tuesday. Election Day. University holiday.
	9	Monday. Deadline to drop Fall B courses.
	25	Wednesday. Academic holiday. No classes held. Administrative offices open.
	26–29	Thursday–Sunday. Thanksgiving holidays.
December	1	Tuesday. Last day to apply or reapply for the B.A. degree to be awarded in May. Applications received after this date are automatically applied to the next conferral date.

	1–4	Tuesday–Friday. Online registration for Spring 2021, Spring A, and Spring B courses via Student Services Online (SSOL) appointment: continuing students only.
	4	Friday. Last day for new Spring 2021 students to submit vaccination documentation for measles, mumps, and rubella; and to certify meningitis decision online. Vaccination documentation is due 30 days prior to registration; students are not permitted to register for classes without this documentation.
	7–11	Monday-Friday. Online registration for Spring 2021 via Student Services Online (SSOL) appointment: continuing students only.
	14	Monday. Last day of classes. Last day for students to register for R credit. Last day to change a regular course to a Pass/D/Fail course or a Pass/D/Fail course to a regular course for Fall and Fall B courses. Last day to withdraw from an individual course and receive a notation of “W” on the transcript in place of a letter grade.
	15–16	Tuesday–Wednesday. Study days.
	17–23	Thursday–Wednesday. Final examinations.
	23	Wednesday. Fall term ends.
	23	Wednesday, December 23, 2020– Sunday, January 10, 2020. Winter holidays.

SPRING TERM 2021

January	1	Friday. Last day for applicants to the Class of 2025 to apply for admission.
	4–8	Monday-Friday. Online registration for Spring 2021 via Student Services Online (SSOL) appointment: continuing and transfer students only.
	11	Monday. Classes begin for Spring full-term and Spring A courses (on a Monday schedule).
	11	Monday. Last day for new Spring 2021 students to submit Student Health History form using the Columbia Health Patient Portal.
	11–22	Weekdays only. Change of Program period by online appointment via Student Services Online (SSOL).

	15	Friday. Last day to join a Spring A class off the Wait List via Student Services Online (SSOL). The Wait List tool will close at 9:30 p.m.
	18	Monday. Martin Luther King, Jr. Day. University holiday.
	22; 25	Friday; Monday. Deferred examination dates.
	22	Friday. End of Change of Program period. Students must be registered for a minimum of 12 points. Last day to add Spring or Spring B courses. Last day to drop a Core Curriculum course. Last day to uncover grade for Fall 2020 course taken Pass/D/Fail.
	25	Monday. Last day to drop a Spring A course.
February	10	Wednesday. Award of February 2021 degrees.
	16	Tuesday. Last day for students to drop individual full term courses via Student Services (SSOL).
	22	Monday. Last day to declare P/D/Fail option for Spring A course. Deadline to withdraw from a Spring A course.
	23-26	Tuesday-Friday. Reading and final exam period for Spring A courses
March	1-5	Monday–Friday. Spring recess.
	2	Monday. Midterm date. Date to be confirmed.
	8	Monday. First day of Spring B classes.
	8-12	Monday-Friday. Online registration for SUMMER 2021 via Student Services Online (SSOL) appointment.
	16-19	Tuesday-Friday. Major Declaration.
	22	Monday. Deadline to drop a Spring B course.
March-April	29-2	Monday-Friday. Online registration for SUMMER 2021 via Student Services Online (SSOL) appointment.
April	5-9	Monday-Friday. Online registration for FALL 2021 via Student Services Online (SSOL) appointment: continuing students only.
	15	Thursday. Last day of classes. Last day for students to register for R credit. Last day to change a regular course to a Pass/D/Fail course or a Pass/D/Fail course to a regular course for Spring and Spring B courses. Last day to withdraw from an individual course and receive a notation of “W” on the transcript in place of a letter grade.

	16-19	Friday-Monday. Study days.
	20-23	Tuesday–Friday. Final examinations.
	26	Monday. Spring term ends.
	26-30	Monday-Friday. Online registration for SUMMER 2021 via Student Services Online (SSOL) appointment.
May	5	Wednesday. Deadline for continuing students to apply for financial aid for 2021–2022.

COMMENCEMENT

April	26-30	Monday-Friday. Academic Awards and Prizes Ceremony and Phi Beta Kappa Induction Ceremony to take place this week (specific dates to be announced).
	28	Wednesday. Columbia College Class Day.
	30	Friday. Award of May 2021 degrees. University Commencement.

SUMMER A TERM

May	3	Monday. First day of classes for Summer full-term and Summer A courses.
	3	Monday. Last day for new Summer 2021 students to submit Student Health History Form using the Columbia Health Patient Portal.
	3-7	Weekdays only. Summer A and Summer full-term Change of Program Period.
	7	Friday. Deadline to add Summer A and Summer full-term courses.
	17	Monday. Deadline to drop a Summer A course.
	19	Wednesday. Degree conferral date.
	31	Monday. Memorial Day. University holiday. No classes.
June	7	Monday. Deadline to declare the pass/d/fail option for, or to withdraw from, Summer A courses.
	8	Tuesday. Deadline to drop a Summer full-term course.
	14	Monday. last day of classes for Summer A term.
	15	Tuesday. Reading day for Summer A classes.
	16-18	Wednesday-Friday. Final exam period for Summer A courses
	21-25	Monday-Friday. Summer recess.

SUMMER B TERM

June	28	Monday. Classes of Summer B term begin.
------	----	---

	28-July 2	Weekdays only. Summer B Change of Program Period.
	30	Wednesday. Degree conferral date
July	5	Monday. Independence day holiday. No classes.
	12	Monday. Deadline to drop a Summer B course.
	22	Thursday. Deadline to declare the pass/d/fail option for Summer full-term courses.
	30	Friday. Deadline to withdraw from Summer B and Summer full-term courses. Deadline to declare the pass/d/fail option for Summer B courses.
August	6	Friday. Last day of classes for Summer full-term and Summer B classes.
	9-10	Monday-Tuesday. Reading period for Summer full-term and Summer B courses.
	11-16	Wednesday - Monday. Final exam period for Summer full-term and Summer B courses.

SUMMER REGISTRATION DATES FOR FALL 2021

June	7-11	Monday-Friday. Online registration for Fall 2021 via Student Services Online (SSOL) appointment: continuing students only.
	14-18	Monday-Friday. Online registration for Fall 2021 via Student Services Online (SSOL) appointment: continuing students only.
July	26-30	Monday-Friday. Online registration for Fall 2021 via Student Services Online (SSOL) appointment.
August	2-6	Monday-Friday. Online registration for Fall 2021 via Student Services Online (SSOL) appointment: continuing students only.
	25-27	Tuesday-Thursday. Online registration for Fall 2021 via Student Services Online (SSOL) appointment: continuing and transfer students only.

Rachel E. Adams

Professor of English and Comparative Literature
B.A., University of California, Berkeley, 1990; M.A., University of Michigan, 1992; Ph.D., University of California, Santa Barbara, 1997

Hassan Afrouzi Khosroshahi

Assistant Professor of Economics
B.S., Sharif University of Technology (Iran), 2011; M.S., University of Texas at Austin, 2013; Ph.D., 2017

Vanessa Agard-Jones

Assistant Professor of Anthropology
B.A., Yale University, 2000; M.A., Columbia University, 2006; Ph.D., New York University, 2013

Amol Aggarwal

Assistant Professor of Mathematics
S.B., Massachusetts Institute of Technology, 2015; Ph.D., Harvard University, 2020

Marcel A. Agüeros

Associate Professor of Astronomy
B.A., Columbia University, 1996; M.Phil., University of Cambridge, 1998; M.S., University of Washington, 2002; Ph.D., 2006

Francisca Aguiló Mora

Lecturer in Latin American and Iberian Cultures
B.A., University of Barcelona, 2002; M.A., University of the Balearic Islands (Spain), 2009; Ph.D., University of Miami, 2016

Aftab Ahmad

Senior Lecturer in Middle Eastern, South Asian, and African Studies

B.A., Aligarh Muslim University (India), 1990; M.A., Jawahar Lal Nehru University (India), 1993; M.Phil., 1996; Ph.D., 2000

May E. Ahmar

Senior Lecturer in Middle Eastern, South Asian, and African Studies
B.A., American University of Beirut, 1995; M.A., 2001

Manan Ahmed

Associate Professor of History
B.Sc., University of Punjab (Pakistan), 1991; B.A., Miami University, 1997; Ph.D., University of Chicago, 2008

Alfred V. Aho

Lawrence Gussman Professor of Computer Science
B.A., University of Toronto, 1963; M.A., Princeton University, 1965; Ph.D., 1967

Joseph Albernaz

Assistant Professor of English and Comparative Literature
B.A., University of North Carolina at Chapel Hill, 2012; Ph.D., University of California, Berkeley, 2018

David Z. Albert

Frederick E. Woodbridge Professor of Philosophy
B.S., Columbia University, 1976; Ph.D., Rockefeller University, 1981

Igor L. Aleiner

Professor of Physics
Ph.D., University of Minnesota, 1996

Zeynep Çelik Alexander

Associate Professor of Art History and Archaeology
Ph.D., Massachusetts Institute of Technology, 2007

Peter K. Allen

Professor of Computer Science
B.A., Brown University, 1971; M.A., University of Oregon, 1976; Ph.D., University of Pennsylvania, 1985

Douglas V. Almond

Professor of Economics and of International and Public Affairs
B.A., Carleton University, 1993; Ph.D., University of California, Berkeley, 2002

Muhsin Jassim Al-Musawi

Professor of Middle Eastern, South Asian, and African Studies
B.A., University of Baghdad, 1966; M.A., Dalhousie University (Canada), 1975; Ph.D., 1978

Carlos J. Alonso

Morris A. and Alma Schapiro Professor in the Humanities
B.A., Cornell University, 1975; M.A., Yale University, 1977; Ph.D., 1983

Irasema Alonso

Lecturer in Economics

B.A., Universidad Complutense de Madrid (Spain), 1981; M.A., Universitat Autònoma de Barcelona (Spain), 1986; Ph.D., University of Minnesota, 1992

Irene Alonso-Aparicio

Lecturer in Latin American and Iberian Cultures

B.A., University of Granada (Spain), 2001; M.A., Open University of Spain, 2005; Ph.D., University of Granada (Spain) and University of Aachen (Germany), 2011

Hilton Als

Associate Professor of Writing in the Faculty of the Arts

Boris Altshuler

Professor of Physics

B.A., Leningrad State University (Russia), 1976; Ph.D., Leningrad Institute for Nuclear Physics (Russia), 1979

Maria Jose Alves De Abreu

Assistant Professor of Anthropology

B.A., University of Coimbra (Portugal), 1998; M.A., SOAS, University of London, 1999; Ph.D., University of Amsterdam, 2009

Mariam Aly

Assistant Professor of Psychology

H.B.Sc., University of Toronto, 2008; M.A., University of California, Davis, 2010; Ph.D., 2013

Tarik Amar

Associate Professor of History

B.A., University of Oxford, 1995; M.Sc., London School of Economics, 1997; Ph.D., Princeton University, 2006

Gregory A. Amenoff

Eve and Herman Gelman Professor of Professional Practice of the Visual Arts in the Faculty of the Arts

B.A., Beloit College, 1970

Dima Amso

Professor of Psychology

B.S., Tufts University, 1999; Ph.D., New York University, 2005

Paul J. Anderer

Fred and Fannie Mack Professor of Humanities

B.A., University of Michigan, 1971; M.A., University of Chicago, 1972; Ph.D., Yale University, 1979

Mark M. Anderson

Professor of Germanic Languages

B.A., Wesleyan University, 1978; M.A., Johns Hopkins University, 1981, 1982; Ph.D., 1985

Peter Andolfatto

Professor of Biological Sciences

B.Sc., Simon Fraser University (Canada), 1992; Ph.D., University of Chicago, 1999

Alexandr Andoni

Associate Professor of Computer Science

B.S., Massachusetts Institute of Technology, 2004; M.Eng., 2005; Ph.D., 2009

Stefan Andriopoulos

Professor of Germanic Languages

B.A., University of Regensburg (Germany), 1990; M.A., University of Hamburg, 1994; Ph.D., 1998

Gil Anidjar

Professor of Religion

B.A., Hebrew University of Jerusalem, 1988; M.A., Graduate Theological Union, 1994; Ph.D., University of California, Berkeley, 1998

Bogdan George Apetri

Assistant Professor of Film in the Faculty of Arts

M.F.A., Columbia University, 2006

James H. Applegate

Professor of Astronomy

B.S., Michigan State University, 1976; M.S., Stony Brook University - SUNY, 1978; Ph.D., 1980

Elena Aprile

Professor of Physics

Laurea, Università degli Studi (Italy), 1978; Ph.D., University of Geneva, 1982

Branka Arsic

Charles and Lynn Zhang Professor of English and Comparative Literature

B.A., University of Belgrade, 1990; M.A., 1995; Ph.D., 1999

Vincent S. Aurora

Senior Lecturer in French and Romance Philology

B.S., Georgetown University, 1989; M.A., Columbia University, 1991; M.Phil., 1993; Ph.D., 1998

Jacqueline Austermann

Assistant Professor in Earth and Environmental Sciences

B.Sc., Technische Universität Darmstadt (Germany), 2009; M.Sc., Ludwig Maximilians Universität München (Germany), 2011; Ph.D., Harvard University, 2016

Marco Andres Avella Medina

Assistant Professor of Statistics

B.A., University of Geneva, 2009; M.A., 2011; Ph.D., 2016

Luis A. Avila

Senior Lecturer in Chemistry

M.S., Babes-Bolyai University (Romania), 1982; M.S., Columbia University, Teachers College, 2004; Ph.D., 2006

Richard Axel

University Professor

B.A., Columbia University, 1967; M.D., Johns Hopkins University, 1970

B

Ramin Bahrani

Professor of Professional Practice in Film

B.A., Columbia University, 1997

Zainab Bahrani

Edith Porada Professor of Ancient and Near Eastern Art History and Archaeology

B.A., Indiana University, 1981; M.A., New York University, 1984; Ph.D., 1989

Jushan Bai

Professor of Economics

B.S., Nankai University (China), 1982; M.A., 1985; M.A., Pennsylvania State University, 1988; Ph.D., University of California, Berkeley, 1992

Christopher Baldassano

Assistant Professor of Psychology

B.S.E., Princeton University, 2009; Ph.D., Stanford University, 2015

Étienne R. Balibar

Professor of French and Romance Philology

B.A., École Normale Supérieure (France), 1962; M.A., 1963; Ph.D., Katholieke Universiteit Nijmegen (Netherlands), 1987; Habilitation, Université Paris I, 1993

Dolores Barbazán-Capeáns

Lecturer in Spanish

B.A., University of Santiago de Compostela (Spain), 2005; Ph.D., University of Barcelona (Spain), 2014

Elazar Barkan

Professor of International and Public Affairs

Ph.D., Brandeis University, 1988

Erin Barnhart

Assistant Professor Biological Sciences

A.B., Harvard University, 2003; Ph.D., Stanford University, 2010

Teodolinda Barolini

Lorenzo Da Ponte Professor of Italian

B.A., Sarah Lawrence College, 1972; M.A., Columbia University, 1973; Ph.D., 1978

Lorena Garcia Barroso

Lecturer in Spanish

B.A., University of Seville (Spain), 2004; B.A., University of Huelva (Spain), 2007; M.Phil., Menéndez Pelayo International University and Cervantes Institute (Spain), 2008; M.A., Complutense University of Madrid (Spain), 2009; B.A., Universidad Complutense de Madrid (Spain), 2011; Ph.D., Graduate Center - CUNY, 2017

Scott Barrett

Lenfest-Earth Institute Professor of Natural Resource Economics

B.A., University of Massachusetts, 1979; M.A., University of British Columbia, 1983; Ph.D., London School of Economics, 1989

Dmitri N. Basov

Higgins Professor of Physics

M.S., Moscow Engineering Physics Institute, 1988; Ph.D., Lebedev Physics Institute, Academy of Sciences of Russia, 1991

Nicholas Baumbach

Associate Professor of Film in the Faculty of the Arts

B.A., Brown University, 1998; Ph.D., Duke University, 2009

Frederique Baumgartner

Lecturer in Art History and Archaeology

B.A., École du Louvre (France), 1997; M.A., Columbia University, 2003; Ph.D., Harvard University, 2011

Banu Baydil

Lecturer in Statistics

B.S., Bogazici University (Turkey), 1999; M.S., Sabanci University (Turkey), 2002; M.A., Indiana University-Bloomington, 2005; M.S., Rensselaer Polytechnic Institute, 2010; Ph.D., 2010

Peter Shawn Bearman

Jonathan R. Cole Professor of Sociology

B.A., Brown University, 1978; A.M., Harvard University, 1982; Ph.D., 1986

Paul Beatty

Associate Professor of Professional Practice of Writing in the Faculty of the Arts

B.A., Boston University, 1984; M.A., Boston University, 1987; M.F.A., Brooklyn College - CUNY, 1989

Carol Becker

Professor of the Arts

B.A., University at Buffalo - SUNY, 1968; Ph.D., University of California, San Diego, 1975

Peter N. Belhumeur

Professor of Computer Science

B.S., Brown University, 1985; S.M., Harvard University, 1991; Ph.D., 1993

Steven M. Bellovin

Professor of Computer Science

B.A., Columbia University, 1972; M.S., University of North Carolina at Chapel Hill, 1977; Ph.D., 1982

Andrei M. Beloborodov

Professor of Physics

M.Sc., Moscow Institute of Physics and Technology (Russia), 1991; Ph.D., Lebedev Physical Institute (Russia), 1995

Felice Italo Beneduce

Senior Lecturer in Italian

M.A., University of Connecticut, 2003; Ph.D., 2012

Naor H. Ben-Yehoyada*Assistant Professor of Anthropology*

M.A., Tel Aviv University, 2005; Ph.D., Harvard University, 2011

Courtney J. Bender*Professor of Religion*

B.A., Swarthmore College, 1991; Ph.D., Princeton University, 1997

Andres Bendesky*Assistant Professor of Ecology, Evolution, and Environmental Biology*

M.D., Universidad Nacional Autónoma de México, 2006; Ph.D., Rockefeller University, 2011

Barry George Bergdoll*Meyer Schapiro Professor of Art History and Archaeology*

B.A., Columbia University, 1977; B.A., University of Cambridge, 1979; M.A., 1982; Ph.D., Columbia University, 1986

Volker Berghahn*Seth Low Professor Emeritus of History*

M.A., University of North Carolina at Chapel Hill, 1961; Ph.D., University of London, 1964; Habilitation, University of Mannheim (Germany), 1970

Bruce J. Berne*Higgins Professor of Chemistry and Professor of Chemical Engineering*

B.S., Brooklyn College - CUNY, 1961; Ph.D., University of Chicago, 1964

Susan Bernofsky*Associate Professor of Writing in the Faculty of the Arts*

B.A., Johns Hopkins University, 1987; M.F.A., Washington University in St. Louis, 1990; Ph.D., Princeton University, 1998

Michael Carlos Best*Assistant Professor of Economics*

B.Sc., London School of Economics, 2006; M.Phil., University of Oxford, 2008; Ph.D., London School of Economics, 2014

Rym Bettaieb*Lecturer in Middle Eastern, South Asian, and African Studies*

M.A., College of Staten Island, 1999; M.Phil., Drew University, 2007; Ph.D., 2013

Richard K. Betts*Leo A. Schiffrin Professor of War and Peace Studies and Arnold A. Saltzman Professor of War and Peace Studies*

A.B., Harvard University, 1969; A.M., 1971; Ph.D., 1975

Jagdish N. Bhagwati*University Professor*

B.Com., Bombay University, 1954; Ph.D., Massachusetts Institute of Technology, 1967

Leyre Alejaldre Biel*Lecturer, Department of Latin American and Iberian Cultures*

B.A., University of Zaragoza (Spain), 2002; M.A., Universität Oberta de Catalunya (Spain), 2008; M.A., University de Pablo Olavide (Spain), 2012; Ph.D., 2016

Andrew S. Bienen*Associate Professor of Professional Practice in Film in the Faculty of the Arts*

M.F.A., Columbia University, 1996

Akeel Bilgrami*Sidney Morgenbesser Professor of Philosophy*

B.A., Bombay University, 1970; B.A., University of Oxford, 1974; Ph.D., University of Chicago, 1983

Richard A. Billows*Professor of History*

B.A., University of Oxford, 1978; M.A., King's College London, 1979; Ph.D., University of California, Berkeley, 1985

Sarah Rabea Yeslam Bintyeer*Assistant Professor of Middle Eastern, South Asian, and African Studies*

Ph.D., SOAS, University of London, 2010

Alison Breton Bishop*Assistant Professor of Computer Science*

A.B., Princeton University, 2006; Ph.D., The University of Texas at Austin, 2012

Sandra Black*Professor of Economics*

B.A., University of California, Berkeley, 1991; Ph.D., Harvard University, 1997

Elizabeth S. Blackmar*Professor of History*

B.A., Smith College, 1972; Ph.D., Harvard University, 1981

Allan Blaer*Professor Emeritus of Physics*

Ph.D. Columbia University, 1977

Casey N. Blake*Mendelson Family Professor of American Studies*

B.A., Wesleyan University, 1978; M.A., University of Rochester, 1981; Ph.D., 1987

Jose Blanchet Mancilla*Professor of Industrial Engineering and Operations Research and of Statistics*

B.Sc., The Instituto Tecnológico Autónomo de México, 2000; M.S., Stanford University, 2001; Ph.D., 2004

David M. Blei*Professor of Statistics and of Computer Science*

B.S., Brown University, 1997; Ph.D., University of California, Berkeley, 2004

Walter J. Bock*Professor Emeritus of Biological Sciences*

B.S., Cornell University, 1955; A.M., Harvard University, 1957; Ph.D., 1959

Diane Bodart

David Rosand Associate Professor of Italian Renaissance Art History

B.A./M.A., Università la Sapienza (Italy), 1994; Ph.D., École des Hautes Études en Sciences Sociales (France), 2003

Anne D. Bogart

Professor of Theatre Arts in the Faculty of the Arts

M.A., New York University, 1977

Niall P. Bolger

Professor of Psychology

B.A., Trinity College Dublin, 1980; M.S., Cornell University, 1984; Ph.D., 1987

Patrick Bolton

Barbara and David Zalaznick Professor of Business and Professor of Economics

B.A., Institut d'Etudes Politiques de Paris, 1979; B.A., University of Cambridge, 1982; M.Sc., London School of Economics, 1983; Ph.D., 1986

Jason E. Bordoff

Professor of Professional Practice in the Faculty of International and Public Affairs

B.A., Brown University, 1994; M.Litt., University of Oxford, 1998; J.D., Harvard University, 2004

Alexandra Borer

Lecturer in French and Romance Philology

M.A., New York University, 2003; M.Phil., 2007; Ph.D., 2001

Aleksandar Boskovic

Lecturer in Slavic Languages

B.A., University of Belgrade (Serbia), 2003; M.A., 2006; Ph.D., University of Michigan, 2013

Bruno G. Bosteels

Professor of Latin American and Iberian Cultures

B.A., Katholieke Universiteit Leuven, Belgium, 1989; Ph.D., University of Pennsylvania, 1995

Clémence Boulouque

Carl and Bernice Witten Assistant Professor of Jewish and Israel Studies

Ph.D., New York University, 2014

Susan Leslie Boynton

Professor of Music

B.A., Yale University, 1988; M.A., 1991; Diplôme d'études médiévales avec grande distinction, Université Catholique de Louvain (Belgium), 1992; Ph.D., Brandeis University, 1997

Travis E. Bradford

Professor of Professional Practice in the Faculty of International and Public Affairs

B.A., Georgia State University, 1992; M.B.A., New York University, 1996; M.P.A., Harvard University, 2006

Lisbeth Kim Brandt

Associate Professor of East Asian Languages and Cultures

B.A., Smith College, 1984; Ph.D., Columbia University, 1996

Claudia Breger

Villard Professor of German and Comparative Literature

Ph.D., Humboldt University, 1996

Simon A. Brendle

Professor of Mathematics

Diplom., University of Tübingen (Germany), 1999; Ph.D., 2001

Gustaaf H. Brooijmans

Professor of Physics

B.S., Universite Catholique de Louvain (Belgium), 1991; M.S., 1994; Ph.D., 1998

Hilary Brougher

Associate Professor of Professional Practice in Film in the Faculty of the Arts

B.A., School of the Visual Arts, 1990

Christopher L. Brown

Professor of History

B.A., Yale University, 1990; D.Phil., University of Oxford, 1994

Louis E. Brus

Samuel Latham Mitchell Professor of Chemistry and Professor of Chemical Engineering

B.S., Rice University, 1965; Ph.D., Columbia University, 1969

Greg L. Bryan

Professor of Astronomy

B.Sc., University of Calgary (Canada), 1989; Ph.D., University of Illinois at Urbana-Champaign, 1996

Matthew E. Buckingham

Associate Professor of Professional Practice in Visual Arts in the Faculty of the Arts

B.A., University of Iowa, 1988; M.F.A., Bard College, 1996

J. Chloë Bulinski

Professor of Biological Sciences and of Pathology and Cell Biology

B.A., University of Colorado, 1973; Ph.D., University of Wisconsin, 1980

Richard W. Bulliet

Professor Emeritus of History

A.B., Harvard University, 1962; A.M., 1964; Ph.D., 1967

Harmen J. Bussemaker

Professor of Biological Sciences and Systems Biology

B.A., Utrecht University (Netherlands), 1989; M.Sc., 1991; Ph.D., 1995

C

Angelo Cacciuto*Associate Professor of Chemistry*

B.S., University of Cagliari (Italy), 1996; M.S., Syracuse University, 2000; Ph.D., 2002

Christopher J. Caes*Lecturer in Slavic Languages*

B.A., Ohio State University, 1993; M.A., 1997; Ph.D., University of California, Berkeley, 2004

James Calleri*Associate Professor of Professional Practice in Theatre Arts in the Faculty of the Arts*

B.A., Trinity University; M.F.A., University of California, Irvine, 1990

Charles W. Calomiris*Henry Kaufman Professor of Financial Institutions in the Faculty of Business and Professor of International and Public Affairs*

Ph.D., Stanford University, 1985

Guillermo A. Calvo*Professor of International and Public Affairs*

M.A., Yale University, 1965; M.Phil., 1967; Ph.D., 1974

Euan Cameron*Professor of Religion*

B.A., University of Oxford, 1979; D.Phil., 1982

Luis M. Campos*Associate Professor of Chemistry*

Ph.D., University of California, Los Angeles, 2006

Elisheva Carlebach*Salo Wittmayer Baron Professor of Jewish History, Culture, and Society*

B.A., Brooklyn College - CUNY, 1976; M.Phil., Columbia University, 1980; Ph.D., 1986

Luca Carloni*Associate Professor of Computer Science*

B.S., University of Bologna (Italy), 1995; M.S., University of California, Berkeley, 1997; Ph.D., 2004

Allison Jean Carnegie*Associate Professor of Political Science*

B.A., University of Southern California, 2006; M.Phil., Yale University, 2011; Ph.D., 2014

Alessandra M. Casella*Professor of Economics and Political Science*

B.A., Bocconi University (Italy), 1983; Ph.D., Massachusetts Institute of Technology, 1988

Jose A. Castellanoes-Pazos*Senior Lecturer in Latin American and Iberian Cultures*

M.D., Universidad Veracruzana (Mexico), 1982; M.A., State University of New York at Albany, 1996; M.Phil., New York University, 2007

Jo Ann Cavallo*Professor of Italian*

B.A., Rutgers University, 1981; M.A., Yale University, 1984; Ph.D., 1987

Steven E. Chaikelson*Professor of Professional Practice in the Theatre Arts in the Faculty of the Arts*

J.D., Columbia University, 1993

Augustin Chaintreau*Associate Professor of Computer Science*

B.Sc., École Normale Supérieure (France), 2001; M.S., Université Pierre-et-Marie-Curie (France), 2002; Ph.D., INRIA-École Normale Supérieure (France), 2006

Martin Chalfie*University Professor*

A.B., Harvard University, 1969; Ph.D., 1976

Douglas A. Chalmers*Professor Emeritus of Political Science*

B.A., Bowdoin College, 1953; M.A., Yale University, 1958; Ph.D., 1962

Paul Thomas Chamberlin*Associate Professor of History*

B.A., Indiana University, 2002; M.A., Ohio State University, 2005; Ph.D., 2009

Shih-Fu Chang*Richard Dicker Professor of Telecommunications and Professor of Computer Science*

B.S., National Taiwan University (Taiwan), 1985; M.S., University of California, Berkeley, 1991; Ph.D., 1993

Lawrence A. Chasin*William R. Kenan, Jr. Professor of Biological Sciences*

B.S., Brown University, 1962; Ph.D., Massachusetts Institute of Technology, 1967

Partha Chatterjee*Professor of Anthropology and of Middle Eastern, South Asian, and African Studies*

B.A., University of Calcutta (India), 1967; M.A., University of Rochester, 1970; Ph.D., 1971

George A. Chauncey*DeWitt Clinton Professor of American History*

B.A., Yale University, 1977; Ph.D., 1989

Hannah R. Chazin*Assistant Professor of Anthropology*

B.A., University of Chicago, 2008; M.A., 2011; Ph.D., 2016

Amy Chazkel*Bernard Hirschhorn Associate Professor of Urban Studies*

B.A., George Washington University, 1991; M.A., Yale University, 1996; Ph.D., 2002

Yeon-Koo Che

Kelvin J. Lancaster Professor of Economic Theory

B. Economics, Seoul National University, 1984; M.A., University of Toronto, 1986; Ph.D., Stanford University, 1991

Xi Chen

Associate Professor of Computer Science

B.S., Tsinghua University (China), 2003; Ph.D., 2007

Pierre-André Chiappori

E. Rowan and Barbara Steinschneider Professor of Economics

M.A., University of Paris, 1975; D.E.A., 1978; Ph.D., 1981

Graciela Chichilnisky

Professor of Economics

M.A., University of California, Berkeley, 1970; Ph.D., 1971; Ph.D., 1976

Lydia B. Chilton

Assistant Professor of Computer Science

S.B., Massachusetts Institute of Technology, 2007; M.Eng., 2009; Ph.D., University of Washington, 2015

Norman H. Christ

Ephraim Gildor Professor of Computational Theoretical Physics

B.A., Columbia University, 1965; Ph.D., 1966

Nicholas Christie-Blick

Professor of Earth and Environmental Sciences

B.A., University of Cambridge, 1974; M.A., 1978; Ph.D., University of California, Santa Barbara, 1979

Nicholas J. Christopher

Professor of Professional Practice in Writing in the Faculty of the Arts

A.B., Harvard University, 1973

Eunice Chung

Lecturer in East Asian Languages and Cultures

B.A., Korea University, 2006; M.A., Columbia University, 2011

Alessandra Ciucci

Assistant Professor of Music

Diploma in Music, Brooklyn Conservatory of Music, 1998; B.A., Columbia University, 1995; Ph.D., Graduate Center - CUNY, 2008

Richard H. Clarida

C. Lowell Harriss Professor of Economics and Professor of International and Public Affairs

B.S., University of Illinois, 1979; S.M., Harvard University, 1983; Ph.D., 1983

Justin Clarke Doane

Associate Professor of Philosophy

B.A., New College of Florida, 2005; Ph.D., New York University, 2011

John H. Coatsworth

Professor of International Affairs and Public Affairs and of History

B.A., Wesleyan University, 1963; M.A., University of Wisconsin-Madison, 1967; Ph.D., 1972

Edward Coffman

Professor Emeritus of Electrical Engineering and Computer Science

Ph.D., University of California, Los Angeles, 1966

Jean Louise Cohen

Nell and Herbert M. Singer Professor of Contemporary Civilization in the Core Curriculum

B.A., Boston University, 1968; M.A., New School for Social Research, 1972; Ph.D., 1979

Joel E. Cohen

Professor of Earth and Environmental Sciences and of International and Public Affairs

Ph.D., Harvard University, 1970

Myron L. Cohen

Professor of Anthropology

B.A., Columbia University, 1958; M.A., 1963; Ph.D., 1967

Steven Alan Cohen

Professor of Professional Practice in the Faculty of International and Public Affairs

Ph.D., University at Buffalo - SUNY, 1979

Yinon Cohen

Yosef Hayim Yerushalmi Professor of Israel and Jewish Studies

B.A., Hebrew University of Jerusalem, 1978; M.A., Stony Brook - SUNY, 1980; Ph.D., 1983

Zuleyha Colak

Lecturer in Middle Eastern, South Asian, and African Studies

B.A., Istanbul University (Turkey), 1998; M.A., Marmara University (Turkey), 2000; M.A., Indiana University, 2004; Ph.D., 2010

Brian A. Cole

Professor of Physics

B.S., Massachusetts Institute of Technology, 1985; Ph.D., 1992

Jonathan R. Cole

John Mitchell Mason Professor of the University

Ph.D., Columbia University, 1969

Michael Cole

Howard McP. Davis Professor of Art History

B.A., Williams College, 1991; M.A., Princeton University, 1995; Ph.D., 1999

Sarah Cole

Parr Professor of English and Comparative Literature

B.A., Williams College, 1989; Ph.D., University of California, Berkeley, 1997

Charly J. Coleman

Associate Professor of History

B.A., Trinity University, 1998; Ph.D., Stanford University, 2005

John D. Collins

Associate Professor of Philosophy

B.A., University of Sydney (Australia), 1982; Ph.D., Princeton University, 1991

Michael J. Collins

Vikram S. Pandit Professor of Computer Science

B.A., University of Cambridge, 1992; M.Phil., 1993; Ph.D., University of Pennsylvania, 1999

Juan Pablo Cominguez

Lecturer in Latin American and Iberian Cultures

B.A., Universidad Nacional de Buenos Aires (Argentina), 2005; M.A., Rutgers University, 2012; Ph.D., 2016

Roisin Commane

Assistant Professor of Earth and Environmental Sciences

B.Sc. University College Dublin, 2003; Ph.D., University of Leeds (U.K.), 2009

Michael I. Como

Toshu Fukami Associate Professor of Shinto Studies

A.B., Harvard University, 1985; Ph.D., Stanford University, 2000

Antoine Marcel Compagnon

Blanche W. Knopf Professor of French and Comparative Literature

Docteur ès Lettres, Paris Diderot University, 1985

Matthew J. Connelly

Professor of History

B.A., Columbia University, 1990; Ph.D., Yale University, 1997

Kathleen McKeown Cooper

Henry and Gertrude Rothschild Professor of Computer Science

Ph.D., University of Pennsylvania, 1982

Marina Cords

Professor of Ecology, Evolution, and Environmental Biology and of Anthropology

B.S., Yale University, 1978; Ph.D., University of California, Berkeley, 1984

Virginia W. Cornish

Helena Rubinstein Professor of Chemistry

B.A., Columbia University, 1991; Ph.D., University of California, Berkeley, 1996

Daniel M. Corstange

Associate Professor of Political Science and of International and Public Affairs

B.A., Northwestern University, 2000; Ph.D., University of Michigan, 2008

Ivan Z. Corwin

Professor of Mathematics

A.B., Harvard University, 2006; Ph.D., Courant Institute, New York University, 2011

Angelina Craig-Florez

Senior Lecturer in Latin American and Iberian Cultures

B.A., Fordham University, 1989; M.A., Columbia University, 1991; M.Phil., 1995; Ph.D., 2002

Jonathan K. Crary

Meyer Schapiro Professor of Modern Art and Theory

B.A., Columbia University, 1975; M.A., 1978; Ph.D., 1987

Julie A. Crawford

Mark Van Doren Professor of Humanities; Paul Brooke

Program Chair for Literature and Humanities

B.A., McGill University (Canada), 1990; Ph.D., University of Pennsylvania, 1998

Pascale F. Crepon

Lecturer in French and Romance Philology

M.A., University of Lausanne (Switzerland), 1998; M.A., University of Minnesota, 2002; Ph.D., 2009

Zoë Crossland

Associate Professor of Anthropology

B.A., University of Cambridge, 1993; M.A., Michigan State University, 1995; Ph.D., University of Michigan, 2001

Denise Cruz

Associate Professor of English and Comparative Literature

Ph.D., University of California, Los Angeles, 2007

John P. Cunningham

Associate Professor of Statistics

B.A., Dartmouth College, 2002; M.S., Stanford University, 2006; Ph.D., 2009

Gerald Leon Curtis

Burgess Professor of Political Science

B.A., University of New Mexico, 1962; M.A., Columbia University, 1964; Ph.D., 1969

D

Hamid Dabashi

Hagop Kevorkian Professor of Iranian Studies

B.A., University of Tehran, 1976; M.A., University of Pennsylvania, 1981; Ph.D., 1984

Patricia A. Dailey

Associate Professor of English and Comparative Literature

B.A., Sarah Lawrence College, 1988; M.A., University of California, Irvine, 1993; Ph.D., 2002

Terence N. D'Altroy

Loubat Professor of American Archaeology

B.A., University of Michigan, 1972; M.A., University of California, Los Angeles, 1975; Ph.D., 1981

Lisa Allyn Dale

Lecturer in the Discipline of Ecology, Evolution and Environmental Biology

B.A., Cornell University, 1991; M.A., Regis University, 1997; Ph.D., Colorado State University, 2003

Sarah Zukerman Daly

Assistant Professor of Political Science

B.A., Stanford University, 2002; M.S., London School of Economics, 2004; Ph.D., Massachusetts Institute of Technology, 2011

Nicholas J. Dames

Theodore Kahan Professor of Humanities

B.A., Washington University in St. Louis, 1992; Ph.D., Harvard University, 1998

Tri Vi Dang

Lecturer in Economics

B.A., University of Frankfurt (Germany), 1996; M.A., 1998; Ph.D., University of Mannheim (Germany), 2005

E. Valentine Daniel

Professor of Anthropology

B.A., Amherst College, 1971; M.A., University of Chicago, 1973; Ph.D., 1979

Samuel J. Danishefsky

Centennial Professor Emeritus of Chemistry

B.S., Yeshiva University, 1956; Ph.D., Harvard University, 1962

Panagiota Daskalopoulos

Professor of Mathematics

B.A., National and Kapodistrian University of Athens, 1986; Ph.D., University of Chicago, 1992

Jeremy A. Dauber

Atran Professor of Yiddish Language, Literature, and Culture

A.B., Harvard University, 1995; Ph.D., University of Oxford, 1999

Lila Davachi

Professor of Psychology

B.A., Barnard College, 1992; Ph.D., Yale University, 1999

Jenny M. Davidson

Professor of English and Comparative Literature

B.A., Radcliffe College, 1993; Ph.D., Yale University, 1999

Donald R. Davis

Ragnar Nurske Professor of Economics

B.A., University of California, Berkeley, 1981; M.A., Columbia University, 1989; Ph.D., 1992

Richard A. Davis

Howard Levene Professor of Statistics

B.A., University of California, San Diego, 1974; Ph.D., 1979

Francesco de Angelis

Professor of Art History and Archaeology

Ph.D., Scuola Normale Superiore (Italy), 2003

Victoria De Grazia

Moore Collegiate Professor of History

B.A., Smith College, 1968; Ph.D., Columbia University, 1976

Aise Johan de Jong

Professor of Mathematics

B.S., Leiden University (Netherlands), 1987; Ph.D., Radboud University Nijmegen (Netherlands), 1992

Rodolfo O. de la Garza

Eaton Professor of Administrative Law and Municipal Science and Professor of International and Public Affairs

B.S., University of Arizona, 1964; B.F.T., American Institute of Foreign Trade, 1965; M.A., University of Arizona, 1967; Ph.D., 1972

Victor H. de la Peña

Professor of Statistics

B.S., University of Texas at El Paso, 1981; M.A., University of California, Berkeley, 1984; Ph.D., 1988

Cory R. Dean

Associate Professor of Physics

B.Sc., Queen's University (Canada), 2000; B.Sc., 2001; M.Sc., 2004; Ph.D., McGill University (Canada), 2009

Mark Dean

Associate Professor of Economics

B.A., University of Cambridge, 1999; M.Sc., University College London, 2000; Ph.D., New York University, 2009

Ruth S. DeFries

University Professor

B.A., Washington University in St. Louis, 1976; Ph.D., Johns Hopkins University, 1980

Wijnie E. De Groot

Senior Lecturer in Germanic Languages

M.A., University of Amsterdam (Netherlands), 1982; M.A., 1985

Vidya J. Dehejia

Barbara Stoler Miller Professor of Indian and South Asian Art in the Department of Art History and Archaeology

B.A., St. Xavier's College, Bombay University, 1961; B.A., University of Cambridge, 1963; M.A., 1967; Ph.D., 1967

Andrew Delbanco

Alexander Hamilton Professor of American Studies and Julian

Clarence Levi Professor in the Humanities

A.B., Harvard University, 1973; A.M., 1976; Ph.D., 1980

Milan Delor

Assistant Professor of Chemistry

Ph.D., University of Sheffield (England), 2014

Peter B. deMenocal

Thomas Alva Edison/Con Edison Professor of Earth and Environmental Sciences

B.S., St. Lawrence University, 1982; M.S., University of Rhode Island, 1986; Ph.D., Columbia University, 1991

Frederik M. Denef

Professor of Physics

Ph.D., KU Leuven (Belgium), 1999

Glenn L. Denning

Professor of Professional Practice in the Faculty of International and Public Affairs

Ph.D., University of Reading (Berkshire), 1985

Padma B. Desai

Gladys and Roland Harriman Professor Emerita of Comparative Economic Systems

B.A., University of Bombay, 1951; M.A., 1953; Ph.D., Harvard University, 1960

Ira J. Deutchman

Professor of Professional Practice in Film in the Faculty of the Arts

B.S., Northwestern University, 1975

Phoebus J. Dhrymes

Edwin P. Rickert Professor Emeritus of Economics

B.A., University of Texas, 1957; Ph.D., Massachusetts Institute of Technology, 1961

Sophia C. Di Castri

Francis Goelet Assistant Professor of Music Composition

M.A., Columbia University, 2010; D.M.A., 2014

Souleymane Bachir Diagne

Professor of French and Romance Philology

B.A., University of Sorbonne, Paris, 1977; Ph.D., 1988

Margaret K. Dieckmann

Professor of Professional Practice in Film in the Faculty of the Arts

M.A., New York University, 1986

Lars Dietrich

Associate Professor of Biological Sciences

B.A., University of Konstanz (Germany), 2000; Ph.D., Heidelberg University (Germany), 2004

Mamadou Diouf

Leitner Family Professor of African Studies

B.A., University of Paris-Sorbonne, 1975; Ph.D., 1981

Thomas A. DiPrete

Giddings Professor of Sociology

B.S., Massachusetts Institute of Technology, 1972; M.A., Columbia University, 1975; Ph.D., 1978

Maria Diuk-Wasser

Professor of Ecology, Evolution, and Environmental Biology

B.A., Universidad de Buenos Aires, 1996; Ph.D., University of California, Los Angeles, 2003

Madeleine Dobie

Professor of French and Romance Philology

B.A., University of Oxford, 1988; M.A., Yale University, 1991; Ph.D., 1994

Jeremy R. Dodd

Senior Lecturer in Physics

B.S., University of Edinburgh (United Kingdom), 1985; Ph.D., University College London, 1990

Thomas W. Dodman

Assistant Professor of French and Romance Philology

B.A., University College London, 2001; M.A., 2002; Ph.D., University of Chicago, 2011

Julia Doe

Assistant Professor of Music

B.A., Whitman College, 2006; M.A., Yale University, 2010; Ph.D., 2013

Timothy B. Donnelly

Professor of Writing in the Faculty of the Arts

M.F.A., Columbia University, 1998

Gary Dorrien

Professor of Religion

Ph.D., Union Graduate School, 1989

Michael W. Doyle

University Professor

A.B., Harvard University, 1970; Ph.D., 1977

Geraldine Downey

Niven Professor of Human Letters

B.S., University College Dublin, 1979; M.A., Cornell University, 1983; Ph.D., 1986

Andres Pablo Drenik

Assistant Professor of Economics

B.A., Universidad de San Andrés, 2006; M.A., 2007; Ph.D., Stanford University, 2016

Jerónimo Duarte-Riascos

Assistant Professor of Latin American and Iberian Studies

B.Sc., Universidad de los Andes (Columbia), 2009; B.A., 2009; M.A., 2010; M.A., Harvard University, 2012; Ph.D., 2018

Julien Dubedat

Associate Professor of Mathematics

Ph.D., University of Paris-Sud, 2004

Joseph P. Dubiel

Professor of Music

A.B., Princeton University, 1974; M.F.A., 1976; Ph.D., 1980

Hugh W. Ducklow

Professor of Earth and Environmental Sciences

A.B., Harvard University, 1972; S.M., 1974; Ph.D., 1977

Prajit Kumar Dutta

Professor of Economics

B.A., St. Stephen's College (India), 1980; M.A., Delhi School of Economics, 1982; M.A., Cornell University, 1985; Ph.D., 1987

Laura Duvall

Assistant Professor of Biological Sciences

B.A., University of Pennsylvania, 2007; Ph.D., Washington University in St. Louis, 2012

Sonya T. Dyhrman

Professor of Earth and Environmental Sciences

B.A., Dartmouth College, 1994; Ph.D., University of California, San Diego, 1999

E

Deren Eaton

Assistant Professor of Ecology, Evolution, and Environmental Biology

B.Sc., University of Minnesota, 2007; Ph.D., University of Chicago, 2014

Kathy Hannah Eden

Chavkin Family Professor of English Literature and Professor of Classics

B.A., Smith College, 1974; Ph.D., Stanford University, 1980

Lena Edlund

Associate Professor of Economics

B.A., Stockholm School of Economics, 1989; Ph.D., 1996

Brent Hayes Edwards

Peng Family Professor of English and Comparative Literature

B.A., Yale University, 1990; M.A., Columbia University, 1992; Ph.D., 1998

Stephen A. Edwards

Associate Professor of Computer Science

B.S., California Institute of Technology, 1992; M.S., University of California, Berkeley, 1994; Ph.D., 1997

Naoki Egami

Assistant Professor of Political Science

B.A., University of Tokyo (Japan), 2015; Ph.D., Princeton University, 2020

Shigeru Eguchi

Senior Lecturer in East Asian Languages and Cultures

B.A., Ibaraki University (Japan), 1989; M.A., University of Iowa, 1994

William B. Eimicke

Professor of Professional Practice in the Faculty of International and Public Affairs

Ph.D., Syracuse University, 1973

Gregory M. Eirich

Lecturer in Sociology

B.A., Fordham University, 2000; M.A., Columbia University, 2005; M.Phil., 2006; Ph.D., 2010

Deborah E. Eisenberg

Professor of Writing in the Faculty of the Arts

B.A., Marlboro College, 1969

Peter M. Eisenberger

Professor of Earth and Environmental Sciences

A.B., Princeton University, 1963; Ph.D., Harvard University, 1967

Goran Ekstrom

Professor of Earth and Environmental Sciences

B.A., Swarthmore College, 1981; Ph.D., Harvard University, 1987

Wafaa El-Sadr

University Professor

M.D., Cairo University, 1974; M.P.H., Columbia University, 1991; M.P.A., Harvard University, 1996

Noam M. Elcott

Associate Professor of Art History and Archaeology; Jonathan Sobel & Marcia Dunn Program Chair for Art Humanities

B.A., Columbia University, 2000; M.A., Princeton University, 2004; Ph.D., 2008

William A. Ellis

Professor of Professional Practice in Film in the Faculty of the Arts

B.A., Stanford University, 1984

Susan Elmes

Andrew Barth Senior Lecturer in the Discipline of Economics

B.A., New York University, 1984; Ph.D., Princeton University, 1991

Marwa Elshakry

Associate Professor of History

B.A., Rutgers University, 1995; M.A., Princeton University, 1997; Ph.D., 2003

Jon Elster

Robert K. Merton Professor of the Social Sciences

M.A., University of Oslo, 1966; Ph.D., University of Paris, 1972

Matthew Engelke

Professor of Religion

Ph.D., University of Virginia, 2002

Seyhan Erden

Lecturer in Economics

B.A., Bogazici University (Turkey), 1984; M.B.A., New Hampshire College, 1985; M.A., University of Wisconsin-Milwaukee, 1988; Ph.D., 1993

Robert S. Erikson

Professor of Political Science

B.A., Lake Forest College, 1963; M.A., University of Illinois, 1966; Ph.D., 1969

Yaniv Erlich

Assistant Professor of Computer Science

B.S., Tel Aviv University, 2006; Ph.D., Cold Spring Harbor Laboratory, 2010

Catherine Evtuhov

Professor of History

A.B., Harvard University, 1981; D.E.A., Institut d'Etudes Politiques, Paris, 1983; M.A., University of California, Berkeley, 1985; Ph.D., 1991

Katherine Ewing

Professor of Religion

B.A., Tufts University, 1971; M.A., Boston University, 1973; Ph.D., University of Chicago, 1980

Gil Eyal

Professor of Sociology

B.A., Tel Aviv University, 1989; M.A., 1991; M.A., University of California, Los Angeles, 1992; Ph.D., 1997

F

Laura Fair

Professor of Middle Eastern, South Asian and African Studies

B.A., Northern Illinois University, 1985; M.A., University of Wisconsin-Madison, 1988; Ph.D., University of Minnesota, 1994

Reem Faraj-Kanjawi

Lecturer in Middle Eastern, South Asian, and African Studies

B.A., Damascus University (Syria), 1993; M.A., Montclair State University, 2006

Hannah A. Farber

Assistant Professor of History

B.A., Yale University, 2005; M.A., University of California, Berkeley, 2010; Ph.D., 2014

Bernard R. Faure

Kao Professor of Japanese Religions

Ph.D., University of Paris, 1984

Steven K. Feiner

Professor of Computer Science

B.A., Brown University, 1973; Ph.D., 1987

Kevin A. Fellezs

Associate Professor of Music and of African American and African Diaspora Studies

B.A., San Francisco State, 1998; M.A., 2000; Ph.D., University of California, Santa Cruz, 2004

Maria Q. Feng

Rewick Professor of Civil Engineering

B.S., Southeast University (China), 1982; M.S., University of Electro-Communications (Japan), 1987; Ph.D., University of Tokyo (Japan), 1992

Catherine Fennell

Associate Professor of Anthropology

B.S., Georgetown University, 1999; M.A., University of Chicago, 2003; Ph.D., 2009

Priscilla P. Ferguson

Professor Emerita of Sociology

B.A., Mount Holyoke College, 1962; M.A., Columbia University, 1964; Ph.D., 1967

Peter Jay Fernandez

Assistant Professor of Theatre Arts in the Faculty of the Arts

B.F.A., Boston University

Ana M. Fernandez-Cebrian

Assistant Professor of Latin American and Iberian Cultures

B.A., Universidad de Zaragoza (Spain), 2000; M.A., Princeton University, 2013; Ph.D., 2017

Barbara J. Fields

Professor of History

A.B., Harvard University, 1968; A.M., Yale University, 1972; Ph.D., 1978

Ronald E. Findlay

Ragnar Nurkse Professor Emeritus of Economics

B.A., University of Rangoon (Burma), 1954; Ph.D., Massachusetts Institute of Technology, 1960

Arlene Fiore

Professor of Earth and Environmental Sciences

A.B., Harvard University, 1997; Ph.D., 2003

Stuart J. Firestein

Professor of Biological Sciences

B.S., San Francisco State University, 1983; Ph.D., University of California, Berkeley, 1988

Albert Fishlow

Professor Emeritus of International and Public Affairs

Ph.D., Harvard University, 1963

George W. Flynn

Higgins Professor Emeritus of Chemistry and Professor

Emeritus of Chemical Engineering

B.S., Yale University, 1960; A.M., Harvard University, 1962, Ph.D., 1965

Marcus Folch

Associate Professor of Classics

B.A., Cornell University, 2000; Ph.D., Stanford University, 2006

Eric Foner

DeWitt Clinton Professor of History

B.A., Columbia University, 1963; B.A., University of Oxford, 1965; Ph.D., Columbia University, 1969

Pierre Force

Professor of French and Romance Philology
Ph.D., University of Paris-Sorbonne, 1987

Richard C. Ford

Emmanuel Roman and Barrie Sardoff Roman Professor of the Humanities
B.A., Michigan State University, 1966; M.F.A., University of California, Irvine, 1970

V. Page Fortna

Harold Brown Professor of U.S. Foreign and Security Policy
B.A., Wesleyan University, 1990; A.M., Harvard University, 1995; Ph.D., 1998

Aaron Andrew Fox

Associate Professor of Music
A.B., Harvard University, 1988; Ph.D., University of Texas at Austin, 1995

Katherine T. Fox-Glassman

Lecturer in Psychology
B.A., Harvard University, 2005; M.A., M.Phil., Columbia University, 2012; Ph.D., 2015

Joachim Frank

Professor of Biochemistry and Molecular Biophysics and of Biological Sciences
Ph.D., Technische Universität München (Germany), 1970

Carmela V. Franklin

Professor of Classics
B.A., Radcliffe College, 1971; Ph.D., Harvard University, 1977

Federica Franze

Senior Lecturer in Italian
B.A., University of Urbino (Italy), 1999; M.A., Rutgers University, 2003; M.A., 2009; Ph.D., 2009

David A. Freedberg

Pierre Matisse Professor of Art History
B.A., Yale University, 1969; Ph.D., University of Oxford, 1973

Robert David Friedman

Professor of Mathematics
A.B., Harvard University, 1976; Ph.D., 1981

Richard A. Friesner

William P. Schweitzer Professor of Chemistry
B.S., University of Chicago, 1973; Ph.D., University of California, Berkeley, 1979

Walter M. Frisch

H. Harold Gumm/Harry and Albert von Tilzer Professor of Music
B.A., Yale University, 1973; M.A., University of California, Berkeley, 1977; Ph.D., 1981

Timothy M. Frye

Marshall D. Shulman Professor of Post-Soviet Foreign Policy
B.A., Middlebury College, 1986; M.I.A., Columbia University, 1991; Ph.D., 1997

Ester Fuchs

Professor of International and Public Affairs
Ph.D., University of Chicago, 1984

Melissa Fusco

Assistant Professor of Philosophy
B.A., Stanford University, 2006; Ph.D., University of California, Berkeley, 2015

G

Aubrey Gabel

Associate Professor of French and Romance Philology
M.A., University of Colorado Boulder, 2009; Ph.D., University of California, Berkeley, 2016

Haim Gaifman

Professor of Philosophy
M.Sc., Hebrew University of Jerusalem, 1958; Ph.D., University of California, Berkeley, 1962

Jane M. Gaines

Professor of Film in the Faculty of the Arts
B.S., Northwestern University, 1975; M.A., 1977, Ph.D., 1982

Meredith Jane Gamer

Assistant Professor of Art History and Archaeology
Ph.D., Yale University, 2015

Bradford G. Garton

Professor of Music
B.S., Purdue University, 1979; M.F.A., Princeton University, 1985; Ph.D., 1989

Tamrat Gashaw

Lecturer in the Discipline of Economics
B.S., Alemaya University (Ethiopia), 1999; M.A., Addis Ababa University (Ethiopia), 2005; M.A., Western Michigan University, 2008; Ph.D., 2012

Roxana Geambasu

Associate Professor of Computer Science
B.S., Polytechnic University of Bucharest (Romania), 2005; M.S., University of Washington, 2007; Ph.D., 2011

Andrew E. Gelman

Higgins Professor of Statistics and Professor of Political Science
S.B., Massachusetts Institute of Technology, 1986; A.M., Harvard University, 1987; Ph.D., 1990

Pierre Gentine

Professor of Earth and Environmental Engineering and of Earth and Environmental Sciences

M.Eng., French National Aeronautical and Space Engineering School, Toulouse, France, 2002; M.Sc., Massachusetts Institute of Technology, 2006; Ph.D., 2010

Giuseppe Gerbino

Associate Professor of Music

M.A., Duke University, 1996; Ph.D., 2001

Anna Ghurbanyan

Associate in Chemistry

B.S., Northern Arizona University, 2004; M.S., 2007

Carol Gluck

George Sansom Professor of History and Professor of East Asian Languages and Cultures

B.A., Wellesley College, 1962; M.A., Columbia University, 1970; Ph.D., 1977

Lydia D. Goehr

Professor of Philosophy

B.A., Manchester University (U.K.), 1982; Ph.D., University of Cambridge, 1987

Dorian Goldfeld

Professor of Mathematics

B.S., Columbia University, 1967; Ph.D., 1969

Steven L. Goldstein

Higgins Professor of Earth and Environmental Sciences

B.A., Columbia University, 1976; A.M., Harvard University, 1978; M.Phil., Columbia University, 1981; Ph.D., 1986

Michael Bernhard Golston

Professor of English and Comparative Literature

B.A., University of New Mexico, 1979; M.A., University of California, Berkeley, 1989; Ph.D., Stanford University, 1998

Mattieu Gomez

Assistant Professor of Economics

B.S., École Polytechnique (France), 2010; M.Sc. Paris School of Economics and ENSAE, 2011; Ph.D., Princeton University, 2017

Adela J. Gondek

Lecturer in the Discipline of Ecology, Evolution and Environmental Biology

B.A., Goucher College, 1970; Ph.D., Harvard University, 1981

Ruben L. Gonzalez

Professor of Chemistry

B.S., Florida International University, 1995; Ph.D., University of California, Berkeley, 2000

Robert J. Gooding-Williams

M. Moran Weston/Black Alumni Council Professor of African-American Studies

B.A., Yale University, 1975; Ph.D., 1982

Arnold L. Gordon

Professor of Earth and Environmental Sciences

B.A., Herbert Lehman College - CUNY, 1961; Ph.D., Columbia University, 1965

Bette R. Gordon

Professor of Professional Practice in Film in the Faculty of the Arts

M.F.A., University of Wisconsin-Madison, 1976

Emilien Gouin-Bonenfant

Assistant Professor Economics

B.Sc., Université de Montréal, 2013; M.A., University of California San Diego, 2019; Ph.D., University of California San Diego, 2019

Stathis Gourgouris

Professor of Classics and of English and Comparative Literature

B.A., University of California, Los Angeles, 1981; M.A., 1984; Ph.D., 1990

Maria Luisa Gozzi

Senior Lecturer in Italian

B.A., University of Florence (Italy), 1986; Ph.D., Rutgers University, 1996; M.A., Columbia University, 2012

Norma V. Graham

Centennial Professor of Psychology

B.S., Stanford University, 1966; Ph.D., University of Pennsylvania, 1970

Thomas Austin Graham

Associate Professor of English and Comparative Literature

B.A., University of Virginia, 2000; Ph.D., University of California, Los Angeles, 2010

Luis A. Gravano

Professor of Computer Science

B.S., National University of Lujan (Argentina), 1990; M.S., Stanford University, 1994; Ph.D., 1997

Erik I. Gray

Professor of English and Comparative Literature

B.A., University of Cambridge, 1994; M.A., Princeton University, 1997; Ph.D., 2000

Donald P. Green

Burgess Professor of Political Science

B.A., University of California, Los Angeles, 1983; M.A., University of California, Berkeley, 1984; Ph.D., 1988

R. Kent Greenawalt

University Professor

A.B., Swarthmore College, 1958; B.Phil., University of Oxford, 1960; LL.B., Columbia University, 1963

Brian Greene

Professor of Mathematics and of Physics

A.B., Harvard University, 1984; D.Phil., University of Oxford, 1987

Iva Greenwald

Professor of Biochemistry and Molecular Biophysics and Genetics and Development
Ph.D., Massachusetts Institute of Technology, 1982

Steven Gregory

Professor of Anthropology
B.F.A., Pratt Institute, 1976; M.S., 1978; M.A., New School for Social Research, 1982; Ph.D., 1986

Patricia E. Grieve

Nancy and Jeffrey Marcus Professor of the Humanities
B.A., Purdue University, 1975; M.A., 1977; Ph.D., Princeton University, 1983

Farah Jasmine Griffin

William B. Ransford Professor of English and Comparative Literature and African-American Studies
A.B., Harvard University, 1985; Ph.D., Yale University, 1992

Kevin L. Griffin

Professor of Earth and Environmental Sciences and of Ecology, Evolution, and Environmental Biology
B.A., Whittier College, 1985; M.E.S., Yale University, 1987; Ph.D., Duke University, 1994

Eitan Grinspun

Associate Professor of Computer Science
B.A., University of Toronto, 1997; M.S., California Institute of Technology, 2000; Ph.D., 2003

Jonathan L. Gross

Professor of Computer Science and of Statistics
B.S., Massachusetts Institute of Technology, 1964; M.A., Dartmouth College, 1966; Ph.D., 1968

Sunil K. Gulati

Michael K. Dakolias Senior Lecturer in the Discipline of Economics
B.A., Bucknell University, 1981; M.A., Columbia University, 1983

Frank A. Guridy

Associate Professor of History
B.A., Syracuse University, 1993; M.A., University of Illinois at Chicago, 1996; Ph.D., University of Michigan, Ann Arbor, 2002

Miklos Gyulassy

Professor of Physics
B.A., University of California, Berkeley, 1970; Ph.D., 1974

H

Georg Friedrich Haas

Mac Dowell Professor of Music
Diploma in Composition, Hochschule für Musik (Austria), 1979

Charles J. Hailey

Pupin Professor of Physics

B.A., Cornell University, 1977; Ph.D., Columbia University, 1983

Zoltan Haiman

Professor of Astronomy
B.S., Massachusetts Institute of Technology, 1993; A.M., Harvard University, 1994; Ph.D., 1998

Jack Halberstam

Professor of English and Comparative Literature
B.A., University of California, Berkeley, 1985; M.A., University of Minnesota, 1989; Ph.D., University of Minnesota, 1991

Wael Hallaq

Avalon Foundation Professor in the Humanities
B.A., University of Haifa (Israel), 1978; M.A., University of Washington, 1979; Ph.D., 1983

Hilary Anne Hallett

Associate Professor of History
B.F.A., New York University, 1990; Ph.D., Graduate Center - CUNY, 2005

Alexander Halliday

Professor of Earth and Environmental Sciences
Ph.D., Newcastle University (U.K.), 1977

Jules Paul Halpern

Professor of Astronomy
S.B., Massachusetts Institute of Technology, 1976; A.M., Harvard University, 1978; Ph.D., 1982

Richard S. Hamilton

Davies Professor of Mathematics
B.A., Yale University, 1963; Ph.D., Princeton University, 1966

Sarah Hansen

Senior Lecturer in Chemistry
B.A., Earlham College, 2001; M.A., Columbia University, 2009; Ph.D., 2014

Naama Harel

Senior Lecturer in Middle Eastern, South Asian, and African Studies
B.A., Tel Aviv University (Israel), 1999; M.A., 2004; Ph.D., University of Haifa (Israel), 2010

Fredrick C. Harris

Professor of Political Science
B.A., University of Georgia, 1985; M.A., Northwestern University, 1988; Ph.D., 1994

Michael Harris

Professor of Mathematics
A.B., Princeton University, 1973; A.M., Harvard University, 1976; Ph.D., 1977

Phyllis Harris

Associate Professor of Professional Practice in the Faculty of the Arts

B.A., Bennington College, 1961

Robert E. Harrist, Jr.

Jane and Leopold Swergold Professor of Chinese Art History

B.S., Indiana University, 1975; M.A., 1978; M.A., Columbia University, 1980; Ph.D., Princeton University, 1989

Carl Hart

Dirk Ziff Professor of Psychology (in Psychiatry)

B.S., University of Maryland, 1991; M.S., University of Wyoming, 1994; Ph.D., 1996

Matthew Hart

Associate Professor of English and Comparative Literature

M.A. (Hons.), University of Edinburgh (U.K.), 1996; M.A., University of Sussex (U.K.), 1997; Ph.D., University of Pennsylvania, 2004

Saidiya V. Hartman

Professor of English and Comparative Literature

B.A., Wesleyan University, 1984; Ph.D., Yale University, 1992

Christopher W. Harwood

Lecturer in Slavic Languages

B.A., Columbia University, 1990; M.A., 1992; M.Phil., 1995; Ph.D., 2000

Tulle I. Hazelrigg

Professor of Biological Sciences

B.A., Oberlin College, 1971; Ph.D., Indiana University, 1982

Claire Elise Hazen

Senior Lecturer in Biological Sciences

B.A., Colorado College, 1967

Geoffrey M. Heal

Donald C. Waitte III Professor of Social Enterprise in the Faculty of Business and Professor of International and Public Affairs

B.A., University of Cambridge, 1966; M.A., 1968; Ph.D., 1968

Alice Heicklen

Senior Lecturer in Biological Sciences

B.A., Penn State University, 1988; M.S., Tel Aviv University (Israel), 1991; Ph.D., Weizmann Institute of Science (Israel), 2000

Larisa A. Heiphetz

Assistant Professor of Psychology

B.A., Pennsylvania State University, 2008; A.M., Harvard University, 2010; Ph.D., 2013

David John Helfand

Professor of Astronomy

B.A., Amherst College, 1973; M.S., University of Massachusetts, 1973; Ph.D., 1977

Sidney R. Hemming

Professor of Earth and Environmental Sciences

B.S., Midwestern University, 1983; M.S., Tulane University, 1986; Ph.D., Stony Brook University - SUNY, 1994

Wayne A. Hendrickson

University Professor

B.A., University of Wisconsin-River Falls, 1963; Ph.D., Johns Hopkins University, 1968

Alexander W. Hertel-Fernandez

Assistant Professor of International and Public Affairs

B.A., Northwestern University, 2008; Ph.D., Harvard University, 2016

Henry S. Hess

Professor of Biomedical Engineering

B.S., Technische Universität Clausthal (Germany), 1993; M.S., Technische Universität Berlin, 1996; Ph.D., Freie Universität Berlin, 1999

E. Tory Higgins

Stanley Schachter Professor of Psychology and Professor of Business

B.A., McGill University (Canada), 1967; M.A., London School of Economics and Political Science, 1968; Ph.D., Columbia University, 1973

Takako Hikotani

Gerald L. Curtis Associate Professor of Modern Japanese Politics and Foreign Policy in the Department of Political Science

A.M., Stanford University, 1992; Ph.D., Columbia University, 2014

Elizabeth M.C. Hillman

Associate Professor of Biomedical Engineering and of Radiology (Physics)

M.Sc., University College London, 1998; Ph.D., 2002

Shigeo Hirano

Professor of Political Science

A.B., Harvard University, 1994; Ph.D., 2003

Marianne Hirsch

William Peterfield Trent Professor of English

B.A., Brown University, 1970; Ph.D., 1975

Julia Bell Hirschberg

Percy K. and Vida L. W. Hudson Professor of Computer Science

B.A., Eckert College, 1968; Ph.D., University of Michigan, Ann Arbor, 1976; MSEE, University of Pennsylvania, 1982; Ph.D., 1985

Ellie M. Hisama

Professor of Music

B.A., University of Chicago, 1987; M.A., Graduate Center - CUNY, 1992; Ph.D., 1996

Oliver Hobert

Professor of Biological Sciences and Systems Biology

Ph.D. Planck Institute (Germany) 1995

Gil Hochberg

Ransford Professor of Hebrew, Comparative Literature and Middle Eastern Studies

Ph.D., University of California, Berkeley, 2002

Baerbel Hoenisch

Professor of Earth and Environmental Sciences

Vordipl., Bielefeld University (Germany), 1995; Dipl., University of Bremen (Germany), 1999; Ph.D., 2002

Heidi L. Holst-Knudsen

Senior Lecturer in French and Romance Philology

B.A., Connecticut College, 1987; M.A., Columbia University, 1993; Ph.D., 2001

Saeed Honarmand

Senior Lecturer in Middle Eastern, South Asian, and African Studies

B.A., University of Isfahan (Iran), 1980; M.A., Ohio State University, 2004; Ph.D., 2011

Harrison G. Hong

John R. Eckel Jr. Professor of Financial Economics

B.A., University of California, Berkeley, 1992; Ph.D., Massachusetts Institute of Technology, 1997

Axel Honneth

Jack B. Weinstein Professor of the Humanities

Ph.D., Freie Universität Berlin, 1982

Donald C. Hood

James F. Bender Professor in Psychology and Professor of Ophthalmic Sciences (in Ophthalmology)

B.A., Harpur College of Arts and Sciences - SUNY, 1965; M.S., Brown University, 1968; Ph.D., 1970

Jean E. Howard

George Delacorte Professor in the Humanities

B.A., Brown University, 1970; M.Phil., University of London, 1972; Ph.D., Yale University, 1975

Martha C. Howell

Miriam Champion Professor of History

B.S., Georgetown University, 1966; M.A., Columbia University, 1974; Ph.D., 1979

Joseph A. Howley

Associate Professor of Classics

B.A., University of Maryland, Baltimore County, 2006; M.Litt., University of St. Andrews (Scotland), 2007; Ph.D., 2011

Daniel J. Hsu

Assistant Professor of Computer Science

B.S., University of California, Berkeley, 2004; M.S., University of California, San Diego, 2007; Ph.D., 2010

Lingjun Hu

Senior Lecturer in East Asian Languages and Cultures

B.A., Xi'an Foreign Language University (China), 2000; M.A., Ohio State University, 2003; M.A., Columbia University, 2018

Ana Paula da Silva Huback

Lecturer in Latin American and Iberian Cultures

B.A., Faculdade de Filosofia Santa Doroteia (Brazil), 1997; M.A., Universidade Federal de Minas Gerais (Brazil), 2003; Ph.D., Universidade Federal de Minas Gerais and University of New Mexico, 2007

Robert Glenn Hubbard

Russell L. Carson Professor of Finance and Professor of Economics

B.A., University of Central Florida, 1979; B.S., 1979; A.M., Harvard University, 1981; Ph.D., 1983

John D. Huber

Professor of Political Science

B.A., Lawrence University, 1984; M.A., University of Rochester, 1989; Ph.D., 1991

Pascale Hubert-Leibler

Senior Lecturer in French and Romance Philology

B.A., University of Paris III (France), 1979; M.A., 1980; Ph.D., 1984

Emlyn W. Hughes

Professor of Physics

B.S., Stanford University, 1982; M.A., Columbia University, 1984; Ph.D., 1987

Ivana Nikolic Hughes

Senior Lecturer in Chemistry

B.S., California Institute of Technology, 1999; M.S., Stanford University, 2000; Ph.D., 2005

Theodore Q. Hughes

The Korea Foundation Professor of Korean Studies in the Humanities in the Department of East Asian Languages and Cultures

B.A., University of California, San Diego, 1990; M.A., University of California, Los Angeles, 1997; Ph.D., 2000

Lam Hui

Professor of Physics

B.A., University of California, Berkeley, 1990; Ph.D., Massachusetts Institute of Technology, 1996

Macartan N. Humphreys

Professor of Political Science

B.A., Trinity College Dublin, 1994; M.Phil., University of Oxford, 2000; Ph.D., Harvard University, 2003

Amy Hungerford

Professor of English and Comparative Literature

B.A./M.A., Johns Hopkins University, 1992; M.A., 1993; Ph.D., 1999

John F. Hunt

Professor of Biological Sciences

A.B., Harvard University, 1982; Ph.D., Yale, 1993

David H. Hwang

Associate Professor of Theatre Arts in the Faculty of the Arts
B.A., Stanford University, 1979

Robert P. Hymes

Horace Walpole Carpentier Professor of Oriental Studies
B.A., Columbia University, 1972; M.A., University of Pennsylvania, 1976; Ph.D., 1979

I

Annette Insdorf

Professor of Film
B.A., Queens College - CUNY, 1972; Ph.D., Yale University, 1975

Elizabeth K. Irwin

Associate Professor of Classics
B.A., Columbia University, 1991; M.A., University of Oxford, 1994; Ph.D., University of Cambridge, 1999

N. Turkuler Isiksel

James P. Shenton Associate Professor of the Core Curriculum
M.A., University of Edinburgh, 2003; M.A., Yale University, 2004; M.Phil., 2006; Ph.D., 2010

Jenann Ismael

Professor of Philosophy
B.A., Reed College, 1989; M.A., Princeton University, 1994; Ph.D., 1997

Takatoshi Ito

Professor of International and Public Affairs
Ph.D., Harvard University, 1979

Marilyn J. Ivy

Associate Professor of Anthropology
B.A., University of Oklahoma, 1975; M.A., University of Hawaii, 1979; M.A., Cornell University, 1982; Ph.D., 1988

Valentina B. Izmirlieva

Professor of Slavic Languages
B.A., Sofia University, 1986; M.A., 1987; M.A., Ohio State University; Ph.D., University of Chicago, 1999

J

Karl H. Jacoby

Allan Nevins Professor of American Economic History
A.B., Brown University, 1987; M.A., Yale University, 1992; Ph.D., 1997

Dhananjay Jagannathan

Assistant Professor of Philosophy
B.A., University of Texas at Austin, 2009; M.Phil., University of Cambridge, 2011; Ph.D., University of Chicago, 2017

Leslie Jamison

Assistant Professor of Writing in the Faculty of the Arts

A.B., Harvard University, 2004; M.F.A., University of Iowa, 2006; M.A., Yale University, 2012

Suman Jana

Assistant Professor of Computer Science
B.E., Jadavpur University (India), 2003; M.S., University of Utah, 2009; Ph.D., University of Texas at Austin, 2014

Merit E. Janow

Professor of Professional Practice in the Faculty of International and Public Affairs
J.D., Columbia University, 1988

Tony Jebara

Associate Professor of Computer Science
B.S., McGill University (Canada), 1996; M.S., Massachusetts Institute of Technology, 1998; Ph.D., 2002

Margo L. Jefferson

Professor of Professional Practice in Writing in the Faculty of the Arts
M.S., Columbia University, 1971

Robert L. Jervis

Adlai E. Stevenson Professor and Professor of International and Public Affairs
B.A., Oberlin College, 1962; M.A., University of California, Berkeley, 1963; Ph.D., 1968

Songtao Jia

Associate Professor of Biological Sciences
B.S., Nankai University (China), 1994; Ph.D., University of California, Los Angeles, 2003

Junyan Jiang

Assistant Professor of Political Science
B.A., University of Hong Kong, 2009; M.A., University of Chicago, 2011; Ph.D., 2016

Juan P. Jimenez

Lecturer in Latin American and Iberian Cultures
B.A., Universidad del Valle (Colombia), 1996; M.A., Washington State University, 2001

Bradley R. Johnson

Assistant Professor of Physics
B.S. Bethel College, 1996; M.S. University of Minnesota, 1998; Ph.D. University of Minnesota, 2004

Eleanor B. Johnson

Associate Professor of English and Comparative Literature
B.A., Yale University, 2001; M.A., University of California, Berkeley, 2006; Ph.D., 2009

David C. Johnston

Professor of Political Science
B.A., Swarthmore College, 1972; Ph.D., Princeton University, 1981

Kathryn V. Johnston

Professor of Astronomy

B.A., University of Cambridge, 1991; M.S., University of California, Santa Cruz, 1996; Ph.D., 1996

Kellie E. Jones

Hans Hofmann Professor of Modern Art
Ph.D., Yale University, 1999

Matthew L. Jones

James R. Barker Professor of Contemporary Civilization
A.B., Harvard University, 1994; M.Phil., University of Cambridge, 1995; Ph.D., Harvard University, 2000

Troels Jorgensen

Professor Emeritus of Mathematics
Ph.D., University of Copenhagen, 1970

Branden W. Joseph

Frank Gallipoli Professor of Modern and Contemporary Art
B.A., Stanford University, 1989; A.M., Harvard University, 1993; Ph.D., 1999

Jamal Joseph

Professor of Professional Practice in Film in the Faculty of the Arts
B.A., University of Kansas, 1987

Marko Jovanovic

Assistant Professor of Biological Sciences
M.Sc., University of Vienna, 2004; Ph.D., University of Zurich, 2010

Reka Juhasz

Assistant Professor of Economics
M.A., Corvinus University of Budapest Rajk László College for Advanced Studies, 2009; M.Sc. London School of Economics, 2010; Ph.D., 2015

Heidi S. Julavits

Associate Professor of Professional Practice in Writing in the Faculty of the Arts
M.F.A., Columbia University, 1996

Ji-Young Jung

Lecturer in Korean
B.A., Kyungpook National University (South Korea), 1996; M.A., Columbia University, Teachers College, 2001; Ed.M., 2002; Ed.D., 2009

K

Gail E. Kaiser

Professor of Computer Science
B.S., Massachusetts Institute of Technology, 1979; M.S., Carnegie Mellon University, 1980; Ph.D., 1985

Nikolas P. Kakkoufa

Lecturer in Classics
B.A., University of Cyprus, 2008; M.A., 2010; Ph.D., King's College London, 2015

Daniel D. Kalderon

Professor of Biological Sciences

B.A., University of Cambridge, 1980; M.A., 1984; Ph.D., University of London, 1984

Thomas S. Kalin

Professor of Professional Practice of Film in the Faculty of the Arts
M.F.A., Art Institute of Chicago, 1986

Eric R. Kandel

University Professor
A.B., Harvard University, 1952; M.D., New York University, 1956

Georgia Stelios Karagiorgi

Assistant Professor of Physics
B.Sc., Florida Institute of Technology, 2004; M.A., Columbia University, 2007; Ph.D., Massachusetts Institute of Technology, 2010

Charry Karamanoukian

Lecturer in Middle Eastern, South Asian, and African Studies
B.A., Concordia University (Canada), 1996; M.A., McGill University (Canada), 1998; Ph.D., 2001

Ioannis Karatzas

Higgins Professor of Applied Probability and Professor of Statistics
M.S., Columbia University, 1976; M.Phil., 1979; Ph.D., 1980

Navin Kartik

Professor of Economics
B.A., Brandeis University, 1999; Ph.D., Stanford University, 2004

Kimuli K. Kasara

Associate Professor of Political Science
B.A., University of Oxford, 1999; Ph.D., Stanford University, 2006

Ira I. Katznelson

Ruggles Professor of Political Science and History
B.A., Columbia University, 1966; Ph.D., University of Cambridge, 1969

Laura J. Kaufman

Professor of Chemistry
B.A., Columbia University, 1997; Ph.D., University of California, Berkeley, 2002

Sudipta Kaviraj

Professor of Middle Eastern, South Asian, and African Studies
B.A., Presidency University (India), 1966; M.A., University of Calcutta (India), 1969; Ph.D., Jawaharlal Nehru University (India), 1979

Peter B. Kelemen

Arthur D. Storke Memorial Professor of Earth and Environmental Sciences

A.B., Dartmouth College, 1980; M.S., University of Washington, 1985; Ph.D., 1987

Darcy B. Kelley

Harold Weintraub Professor of Biological Sciences

B.A., Barnard College, 1970; Ph.D., Rockefeller University, 1975

John R. Kender

Professor of Computer Science

B.S., University of Detroit, 1970; M.S., University of Michigan, 1972; Ph.D., Carnegie Mellon University, 1980

Jon Kessler

Professor of Visual Arts

B.F.A., Purchase College - SUNY, 1980

Alice Kessler-Harris

R. Gordon Hoxie Professor of American History in Honor of Dwight D. Eisenhower

B.A., Goucher College, 1961; M.A., Rutgers University, 1963; Ph.D., 1968

Kerry William Key

Associate Professor of Earth and Environmental Sciences

B.S., University of California, San Diego, 1998; Ph.D., 2003

Rashid Khalidi

Edward Said Professor of Modern Arab Studies and Literature

B.A., Yale University, 1970; D.Phil., University of Oxford, 1974

Shamus Khan

Professor of Sociology

B.A., Haverford College, 2000; M.S., University of Wisconsin-Madison, 2004; Ph.D., 2008

Mikhail G. Khovanov

Professor of Mathematics

B.S., Moscow State University (Russia), 1991; Ph.D., Yale University, 1997

Mana Kia

Associate Professor of Middle Eastern, South Asian, and African Studies

B.A., Vassar College, 1997; M.A., New York University, 2001; Ph.D., Harvard University, 2011

Jungwon Kim

King Sejong Assistant Professor of Korean Studies

A.M., Harvard University, 2001; Ph.D., 2007

Martha A. Kim

Associate Professor of Computer Science

A.B., Harvard University, 2002; M.S., University of Washington, 2005; Ph.D., 2008

Seong Uk Kim

Il Hwan and Soon Ja Cho Assistant Professor of Korean Culture and Religion

B.A., Sogang University (South Korea), 1996; M.A., University of Georgia, 2007; Ph.D., University of California, Los Angeles, 2013

Seth R. Kimmel

Associate Professor of Latin American and Iberian Cultures

B.A., Columbia University, 2001; Ph.D., University of California, Berkeley, 2010

Robert J. King

Professor of Film

B.A., University of Oxford, 1997; Ph.D., University of California, Los Angeles, 2004

Jonathan Kingslake

Assistant Professor of Earth and Environmental Sciences

Ph.D. University of Sheffield (U.K.), 2013

David Kipping

Assistant Professor of Astronomy

M.A., University of Cambridge, 2006; M.Sc., 2007; Ph.D., 2011

Binnie Kirshenbaum

Professor of Professional Practice in Writing in the Faculty of the Arts

M.F.A., Brooklyn College - CUNY, 1984

Patricia Kitcher

Roberta and William Campbell Professor of the Humanities; Carnoy Family Program Chair for Contemporary Civilization

B.A., Wellesley College, 1970; Ph.D., Princeton University, 1974

David A. Klass

Assistant Professor of Professional Practice in Film in the Faculty of the Arts

B.A., Yale University, 1982; M.A., University of Southern California, 1988

Alexandra G. Kleeman

Assistant Professor of Writing in the Faculty of the Arts

A.B., Brown University, 2007; M.A., University of California, Berkeley, 2008; M.F.A., Columbia University, 2012

Holger A. Klein

Lisa and Bernard Selz Professor of Medieval Art History in the Department of Art History and Archaeology

M.A., Courtauld Institute, 1994; Ph.D., University of Bonn (Germany), 2000

Liza Knapp

Professor of Slavic Languages

A.B., Harvard University, 1977; Ph.D., Columbia University, 1985

Jeffrey T. Koberstein

Percy K. and Vida L.W. Hudson Professor of Chemical Engineering

B.S., University of Wisconsin, 1974; Ph.D., University of Massachusetts, 1979

Rebecca A. Kobrin

Russell and Bettina Knapp Associate Professor of American Jewish History

B.A., Yale University, 1994; Ph.D., University of Pennsylvania, 2002

Bruce M. Kogut

Sanford C. Bernstein & Co. Professor of Leadership and Ethics

B.A., University of California, Berkeley, 1975; M.I.A., Columbia University, 1978; Ph.D., Massachusetts Institute of Technology, 1983

Wojciech Kopczuk

Professor of Economics and of International and Public Affairs

B.A., University of Warsaw, 1996; M.Sc., 1996; M.A., University of Michigan, 1998; Ph.D., 2001

Adam J. Kosto

Professor of History

B.A., Yale University, 1989; Ph.D., Harvard University, 1996

Mariusz S. Kozak

Associate Professor of Music

B.M., University of New Mexico, 2006; M.M., Eastman School of Music, 2002; M.M., University of New Mexico, 2006; Ph.D., University of Chicago, 2012

Samory Kpotufe

Associate Professor of Statistics

B.A., University of Denver, 1999; Ph.D., University of California, San Diego, 2010

Rosalind E. Krauss

University Professor

Ph.D., Harvard University, 1969

Janet L. Kraynak

Senior Lecturer in Art History and Archaeology

B.A., Vassar College, 1987; Ph.D., The Graduate Center, City University of New York, 1993; Ph.D., Massachusetts Institute of Technology, 2001

Paul B. Kreitman

Assistant Professor of East Asian Languages and Cultures

B.A., University of Oxford, 2006; Ph.D., Princeton University, 2015

Igor M. Krichever

Adrain Professor of Mathematics

Ph.D., Moscow State University (Russia), 1972

Nikolaus Kriegeskorte

Professor of Psychology

M.A., Universität zu Köln (Germany), 1999; Ph.D., Universiteit Maastricht (Netherlands), 2004

Sara Mae Kross

Lecturer in the Discipline of Ecology, Evolution and Environmental Biology

B.Sc., Cornell University, 2005; Ph.D. University of Canterbury (New Zealand), 2012

Brian H. Kulick

Professor of Professional Practice in the Faculty of the Arts

M.F.A., Carnegie Mellon University, 1987

Nataliya Kun

Lecturer in Slavic Languages

A.M., Harvard University, 2010

L

Elisabeth A. Ladenson

Professor of French and Romance Philology

B.A., University of Pennsylvania, 1982; M.A., Columbia University, 1988; Ph.D., 1994

Paul F. Lagunes

Assistant Professor of International and Public Affairs

Ph.D., Yale University, 2012

Meredith Landman

Lecturer in Slavic Languages

B.A., University of California, Santa Cruz, 1997; Ph.D., University of Massachusetts Amherst, 2006

Tamar Lando

Associate Professor of Philosophy

B.A., Stanford University, 2002; M.A., University of California, Berkeley, 2008; Ph.D., 2012

Jennifer La'O

Associate Professor of Economics

S.B., Massachusetts Institute of Technology, 2005; Ph.D., 2010

Laura Landwebber

Professor of Biochemistry and Molecular Biophysics and of Biological Sciences (in Systems Biology)

A.B., Princeton University, 1989; M.A., Harvard University, 1991; Ph.D., 1993

Dorothea S. Lasky

Associate Professor of Writing in the Faculty of the Arts

B.A., Washington University in St. Louis, 2000; M.F.A., University of Massachusetts-Amherst, 2004; M.E.D., Harvard University, 2006; E.D.D., University of Pennsylvania, 2012

Victor D. Lavalley

Associate Professor of Practice in Writing in the Faculty of the Arts

M.F.A., Columbia University, 1998

Jeffrey R. Lax

Professor of Political Science

B.A., Yale University, 1995; M.A., New York University, 1996; Ph.D., 2001

Elizabeth Leake

Professor of Italian

B.A., University of California, Berkeley, 1989; M.A., 1993;
Ph.D., 1998

Eugenia Y. Lean*Professor of East Asian Languages and Cultures*

B.A., Stanford University, 1990; M.A., University of
California, Los Angeles, 1996; Ph.D., 2001

Jack Lechner*Associate Professor of Professional Practice in Film in the
Faculty of the Arts*

B.A. Yale University, 1984

Ana Paulina Lee*Assistant Professor of Latin American and Iberian Cultures*

B.A., Binghamton University - SUNY, 2001; M.A., New York
University, 2007; Ph.D., University of Southern California,
2014

Beom Lee*Lecturer in East Asian Languages and Cultures*

B.A., Hanyang University (Korea), 1988; M.A., 1990; M.A.,
Columbia University, 2002; M.Ed., 2005

Jennifer Lee*Julian Clarence Levi Professor of Social Sciences*

B.A., Columbia University, 1990; M.A., 1995; Ph.D., 1998

Sokbae Lee*Professor of Economics*

B.A., Seoul National University, 1996; M.A., 1998; Ph.D.,
University of Iowa, 2002

Adam Leeds*Assistant Professor of Slavic Languages*

B.A., University of Chicago, 2005; Ph.D., University of
Pennsylvania, 2016

Agnieszka Legutko*Lecturer in Germanic Languages*

M.A., Jagiellonian University (Poland), 2002; M.A., Columbia
University, 2006; M.Phil., 2008; Ph.D., 2012

James L. Leighton*Professor of Chemistry*

B.S., Yale University, 1987; Ph.D., Harvard University, 1994

Yuri Levin*Professor of Physics*

B.Sc., University of Melbourne (Australia), 1993; Ph.D.,
California Institute of Technology, 1999

George E. Lewis*Edwin H. Case Professor of Music*

B.A., Yale University, 1974

Allison B. Lewko*Assistant Professor of Computer Science*

A.B., Princeton University, 2006; Ph.D., University of Texas at
Austin, 2012

Chao Li*Associate Professor of Mathematics*

B.S., Tsinghua University (China), 2010; Ph.D., Harvard
University, 2015

Feng Li*Professor of East Asian Languages and Cultures*

M.A., Institute of Archaeology (China), 1986; Ph.D., University
of Chicago, 2000

Natasha J. Lightfoot*Associate Professor of History*

B.A., Yale University, 1999; M.A., New York University,
2002; Ph.D., 2007

Mark Lilla*Professor of the Humanities*

B.A., University of Michigan, 1978; M.P.P., Harvard
University, 1980; Ph.D., 1990

Francesco Lin*Assistant Professor of Mathematics*

B.Sc., Università di Pisa (Italy), 2012; M.Sc., 2012; Ph.D.,
Massachusetts Institute of Technology, 2016

Mark E. Lincicome*Associate Professor of East Asian Languages and Cultures*

B.A. Bowdoin College, 1976; Ph.D. University of Chicago,
1985

Patricia G. Lindemann*Lecturer in Psychology*

B.A., Wesleyan University, 1987; Ph.D., Columbia University,
2000

Elliot Lipnowski*Assistant Professor of Economics*

B.Math., University of Waterloo (Canada), 2010; M.A., New
York University, 2014; Ph.D., 2016

Mark Lipovetsky (Liederman)*Professor of Slavic Languages*

B.A. /M.A., Ural State University (Russia), 1986; Ph.D., Ural
State University (Russia), 1989; D.Sc., Ural State Pedagogical
University (Russia), 1996

Samuel P. Lipsyte*Associate Professor of Professional Practice in the Faculty of
the Arts*

B.A., Brown University, 1990

Chiu-Chu Melissa Liu*Professor of Mathematics*

B.S., National Taiwan University, 1996; Ph.D., Harvard
University, 2002

Jingchen Liu*Professor of Statistics*

B.S., Peking University (China), 2003; Ph.D., Harvard University, 2008

Lening Liu

Professor of East Asian Languages and Cultures

B.A., Shaanxi Normal University (China), 1982; M.A., 1985; Ph.D. University of Florida, 1996

Lydia H. Liu

Wun Tsun Tam Professor in the Humanities

B.A., Northwestern Normal University (China), 1979; M.A., Shandong University (China), 1983; Ph.D., Harvard University, 1990

Qingmin Liu

Professor of Economics

B.A., Peking University (China), 2002; Ph.D., Stanford University, 2007

Reyes Llopis-Garcia

Senior Lecturer in Latin American and Iberian Cultures

B.A., Universidad Nebrija (Spain), 2002; M.A., 2002; Ph.D., 2009

Shaw-Hwa Lo

Professor of Statistics and of Biostatistics

B.S., National Taiwan University, 1975; M.A., University of California, Santa Barbara, 1978; Ph.D., University of California, Berkeley, 1981

Richard Locke

Professor of Professional Practice in the Faculty of the Arts

B.A., Columbia University, 1962; B.A., University of Cambridge, 1964

Kyoko Loetscher

Lecturer in East Asian Languages and Cultures

B.A., Aoyama Gakuin University (Japan), 1987; M.A., Ohio State University, 1993

Po-Ling Loh

Associate Professor of Statistics

B.S., California Institute of Technology, 2009; M.S., University of California, Berkeley, 2013; Ph.D., 2014

Claudio W. Lomnitz

Campbell Family Professor of Anthropology

B.A., Universidad Autónoma Metropolitana Iztapalapa (Mexico), 1978; M.A., Stanford University, 1979; Ph.D., 1987

Austin Long

Associate Professor of International and Public Affairs

B.S., Georgia Institute of Technology, 1998; M.S., 2002; Ph.D., Massachusetts Institute of Technology, 2010

Phillip Lopate

Professor of Professional Practice in the Faculty of the Arts and in the Graduate School of Journalism

B.A., Columbia University, 1964; Ph.D., Union Graduate School, 1979

Nicola G. López

Associate Professor of Professional Practice in Visual Arts in the Faculty of the Arts

B.A., Columbia University, 1998; M.F.A., 2004

Yao Lu

Associate Professor of Sociology

B.A., Fudan University (China), 2003; M.A., University of California, Los Angeles, 2005; Ph.D., 2008

Edward Luck

Professor of Professional Practice in the Faculty of International and Public Affairs

Ph.D. Columbia University, 2001

David B. Lurie

Associate Professor of East Asian Languages and Cultures

A.B., Harvard University, 1993; M.A., Columbia University, 1996; Ph.D., 2001

M

John Ma

Professor of Classics

B.A., University of Oxford, 1991; M.A., Princeton University, 1992; D.Phil., University of Oxford, 1997

W. Bentley MacLeod

Sami Mnaymneh Professor of Economics and Professor of International and Public Affairs

B.A., Queen's University (Canada), 1975; M.Sc., 1979; Ph.D., University of British Columbia (Canada), 1984

Mohammad Ali Arian Maleki

Associate Professor of Statistics

M.S., Stanford University, 2010; Ph.D., 2010

Tal G. Malkin

Associate Professor of Computer Science

Ph.D., Massachusetts Institute of Technology, 2000

Mahmood Mamdani

Herbert Lehman Professor of Government and Professor of Anthropology

B.A., University of Pittsburgh, 1967; M.A., Fletcher School of Law, 1968; M.A.L.D., 1969; Ph.D., Harvard University, 1974

Sita Mani

Lecturer in the Discipline of Theatre Arts in the Faculty of the Arts

James L. Manley

Julian Clarence Levi Professor of the Life Sciences

B.S., Columbia University, 1971; Ph.D., Stony Brook University - SUNY, 1976

Gregory Mann

Professor of History

B.A., University of Georgia, 1993; Ph.D., Northwestern University, 2000

Wolfgang Rainer Mann*Professor of Philosophy*

A.B., Princeton University, 1978; Ph.D., 1987

Karuna Mantena*Professor of Political Science*

B.S.c, London School of Economics, 1995; M.A., University of Essex, 1996; Ph.D., Harvard University, 2004

Ellen L. Marakowitz*Senior Lecturer in Anthropology*

B.A., Michigan State University, 1980; M.A., Columbia University, 1987; Ph.D., 1993

Benjamin M. Marcus*Professor of Writing in the Faculty of the Arts*

M.F.A., Brown University, 1991

Sharon Marcus*Orlando Harriman Professor of English*

B.A., Brown University, 1986; Ph.D., Johns Hopkins University, 1995

Szabolcs Marka*Walter O. LeCroy, Jr. Associate Professor of Physics*

Diploma, Lajos Kossuth University (Hungary), 1993; Ph.D., Vanderbilt University, 1999

Bianca Jones Marlin*Assistant Professor of Psychology*

B.S., St. John's University, 2009; Ph.D., New York University, 2015

John Marshall*Assistant Professor of Political Science*

B.A., University of Oxford, St. Anne's College, 2008; M.Sc., University of Oxford, 2010; Ph.D., Harvard University, 2016

Paraskevi Martzavou*Lecturer in Classics*

B.A., Aristotle University of Thessaloniki (Greece), 1992; M.A., École Pratique des Hautes Études (France), 1998; Ph.D., 2008

Caroline Marvin*Lecturer in Psychology*

B.A., Yale University, 2001; M.A., Courtauld Institute of Art (United Kingdom), 2002; Ph.D., Columbia University, 2016

Miya J. Masaoka*Assistant Professor of Professional Practice in Visual Arts in the Faculty of the Arts*

B.A., San Francisco State University, 1991; M.A., Mills College, 1994

Joseph A. Massad*Professor of Middle Eastern, South Asian, and African Studies*

B.A., University of New Mexico, 1987; M.A., 1989; M.Phil., Columbia University, 1994; Ph.D., 1998

Eric Matheis*Lecturer in French*

B.A., University of Kansas, 1989; M.A., Columbia University, 2001; Ph.D., 2014

Robert D. Mawhinney*Professor of Physics*

B.S., University of South Florida, 1980; A.M., Harvard University, 1982; Ph.D., 1987

Mark A. Mazower*Ira D. Wallach Professor of History*

B.A., University of Oxford, 1981; M.A., Johns Hopkins University, 1983; Ph.D., University of Oxford, 1988

Malgorzata Mazurek*Associate Professor of Polish Studies*

M.A., University of Warsaw, 2004; Ph.D., 2008

Shane A. McCrae*Assistant Professor of Writing in the Faculty of the Arts*

B.A., Linfield College, 2002; M.F.A., University of Iowa, 2004; J.D., Harvard University, 2007; M.A., University of Iowa, 2012

Stephanie McCurry*R. Gordon Hoxie Professor of American History in Honor of Dwight D. Eisenhower*

B.A., University of Western Ontario, 1981; M.A., University of Rochester, 1983; Ph.D., Binghamton University - SUNY, 1988

Ann E. McDermott*Esther and Ronald Breslow Professor of Biological Chemistry and Professor of Biological Sciences and of Chemical Engineering*

B.S., Harvey Mudd College, 1981; M.A., 1985; Ph.D., University of California, Berkeley, 1987

Matthew P. McKelway*Takeo and Itsuko Atsumi Professor of Japanese Art History*

B.A., Amherst College, 1989; M.A., Columbia University, 1991; M.Phil., 1997; Ph.D., 1999

Galen A. McKinley*Professor of Earth and Environmental Sciences*

B.S., Rice University, 1995; Ph.D., Massachusetts Institute of Technology, 2002

Jerry F. McManus*Professor of Earth and Environmental Sciences*

B.A., Columbia University, 1989; M.A., 1992; M.Phil., 1996; Ph.D., 1997

V. Faye McNeill*Professor of Chemical Engineering and of Earth and Environmental Sciences*

B.S., California Institute of Technology, 1999; M.S., 2001; Massachusetts Institute of Technology; Ph.D., 2005

John H. McWhorter*Associate Professor of Slavic Languages*

B.A., Rutgers University, 1985; M.A., New York University, 1987; Ph.D., Stanford University, 1993

Tey Meadow

Associate Professor of Sociology

B.A., Barnard College, 1999; J.D., Fordham University School of Law; Ph.D., New York University, 2011

Alberto Medina

Professor of Latin American and Iberian Cultures

B.A., University of Salamanca (Spain), 1991; M.A., University of Southern California, 1994; Ph.D., New York University, 2000

Francisco J. Meizoso

Lecturer in Latin American and Iberian Cultures

B.A., University of La Coruña (Spain), 1999; M.A. University of Santiago de Compostela (Spain), 2000; M.A., University of Memphis, 2005; M.A., University of Massachusetts Amherst, 2009; Ph.D., 2015

Elizaveta V. Meksin

Associate Professor of Professional Practice in Visual Arts in the Faculty of the Arts

B.A., University of Chicago, 2000; M.A., 2000; B.F.A., School of the Art Institute of Chicago, 2005; M.F.A., Yale University, 2007

Eric R. Mendelsohn

Professor of Professional Practice in Film

B.F.A., Purchase College - SUNY, 1986

Susan E. Mendelsohn

Lecturer in English and Comparative Literature

B.A., American University, 1996; M.A., University of Texas at Austin, 1998; Ph.D., 2012

Edward Mendelson

Lionel Trilling Professor in the Humanities

B.A., University of Rochester, 1966; M.A., Johns Hopkins University, 1968; Ph.D., 1969

Yuan-Yuan Meng

Senior Lecturer in East Asian Languages and Cultures

B.A., National Taiwan Normal University (Taiwan), 1988; M.A., Columbia University, 1992; M.A., 2013; M.Ed., 2018

Duncan N. L. Menge

Associate Professor of Ecology, Evolution, and Environmental Biology

Ph.D., Princeton University, 2008

William H. Menke

Professor of Earth and Environmental Sciences

B.S., Massachusetts Institute of Technology, 1976; M.S., 1976; Ph.D., Columbia University, 1982

Maria Ignacia Mercadal Alborno

Assistant Professor of International and Public Affairs

Ph.D., University of Chicago, 2016

Christia Mercer

Gustave M. Berne Professor of Philosophy

B.A., Brooklyn College - CUNY, 1974; M.A., Rutgers University, 1978; M.A., Princeton University, 1984; Ph.D., 1989

Jessica E. Merrill

Assistant Professor of Slavic Languages

B.A., Northwestern University, 2003; M.A., University of California, Berkeley, 2007; Ph.D., 2012

Brinkley M. Messick

Professor of Anthropology and of Middle Eastern, South Asian, and African Studies

B.A., University of Pennsylvania, 1969; M.A., Princeton University, 1974; Ph.D., 1978

Janet A. Metcalfe

Professor of Psychology

B.Sc., University of Toronto, 1975; M.A., 1977; Ph.D., 1982

Brian D. Metzger

Professor of Physics

B.S., University of Iowa, 2003; M.A., University of California, Berkeley, 2005; Ph.D., 2009

Jeffery F. Milarsky

Senior Lecturer in Music

B.M., The Julliard School, 1988; M.M., 1990

Elizabeth A. Miller

Associate Professor of Biological Sciences

B.Sc. (Hons), University of Melbourne (Australia), 1993; Ph.D., La Trobe University (Australia), 1999

Ronald I. Miller

Lecturer in Economics

B.S., University of Toronto (Canada), 1987; M.A., Princeton University, 1989; Ph.D., 1994

Andrew J. Millis

Professor of Physics

A.B., Harvard University, 1982; Ph.D., Massachusetts Institute of Technology, 1986

Wei Min

Professor of Chemistry

B.S., Peking University (China), 2003; Ph.D., Harvard University, 2008

Vishal Misra

Professor of Computer Science

B.S., Indian Institute of Technology, Bombay, 1992; M.S., University of Massachusetts, 1996; Ph.D., 2000

Denise Milstein

Lecturer in Sociology

B.A., Brown University, 1997; M.A., Columbia University, 2002; M.Phil., 2003; Ph.D., 2007

Timothy P. Mitchell

William B. Ransford Professor of Middle Eastern, South Asian, and African Studies and Professor of International and Public Affairs

B.A., University of Cambridge, 1977; M.A., Princeton University, 1979; Ph.D., 1984

Henri C. Mitterand

Professor Emeritus of French and Romance Philology
Docteur ès Lettres, Ecole normale supérieure (France), 1969

Graciela R. Montaldo

Professor of Latin American and Iberian Cultures
B.A., Universidad de Buenos Aires, 1984; Ph.D., 1990

Jose L. Montiel Olea

Assistant Professor of Economics
B.A., The Instituto Tecnológico Autónomo de México, 2006; M.A., 2008; Ph.D., Harvard University, 2013

Michele M. Moody-Adams

Joseph Straus Professor of Political Philosophy and Legal Theory
B.A., Wellesley College, 1978; B.A., University of Oxford, 1980; A.M., Harvard University, 1986; Ph.D., 1986

Rosalind C. Morris

Professor of Anthropology
B.A., University of British Columbia (Canada), 1986; M.A., York University (Canada), 1989; Ph.D., University of Chicago, 1994

Yves Mousallam

Assistant Professor of Earth and Environmental Sciences
B.Sc., University of Ottawa, 2008; M.Sc., 2010; Ph.D., University of Cambridge, 2013

Alfred H. Mueller

Enrico Fermi Professor of Physics
B.S., Iowa State University, 1961; Ph.D., Massachusetts Institute of Technology, 1965

Debashree Mukherjee

Assistant Professor of Middle Eastern, South Asian and African Studies
Ph.D. New York University, 2015

Sumit Mukherjee

Associate Professor of Statistics
B.A., Indian Statistical Institute (India), 2007; M.A., 2009; Ph.D., Stanford University, 2014

Dipali Mukhopadhyay

Assistant Professor of International and Public Affairs
B.A., Yale University, 2002; M.A., Tufts University, 2005; Ph.D., 2010

Robert A. Mundell

University Professor Emeritus
Ph.D., Massachusetts Institute of Technology, 1956

Tristan Murail

Francis Goelet Professor of Music Composition
Licence, University of Paris, 1967

Maria Victoria Murillo

Professor of Political Science and of International and Public Affairs
B.A., University of Buenos Aires, 1991; A.M., Harvard University, 1994; Ph.D., 1997

Mary Pollard Murray

Associate Professor of English and Comparative Literature
B.A., Columbia University, 1994; M.Phil., University of Cambridge, 1996; Ph.D., Yale University, 2004

Stephen D. Murray

Lisa and Bernard Selz Professor of Medieval Art History in the Department of Art History and Archaeology
B.A., University of Oxford, 1967; M.A., University of London, 1969; Ph.D., 1973

John C. Mutter

Professor of Earth and Environmental Sciences and of International and Public Affairs
B.S., University of Melbourne (Australia), 1969; M.S., University of Sydney (Australia), 1978; Ph.D., Columbia University, 1982

Ioannis Mylonopoulos

Associate Professor of Art History and Archaeology
B.A., National and Kapodistrian University of Athens, 1991; Ph.D., Heidelberg University (Germany), 2001

N

Shahid Naeem

Professor of Ecology, Evolution, and Environmental Biology
B.A., University of California, Berkeley, 1979; M.A., 1984; Ph.D., 1988

Suresh Naidu

Professor of International and Public Affairs and of Economics
M.A., University of Massachusetts Amherst, 2004; Ph.D., University of California, Berkeley, 2010

Abdul Nanji

Senior Lecturer in Middle Eastern, South Asian, and African Studies
A.A., Corning Community College, 1966; B.A., State University of New York, College at New Paltz, 1969; M.A., 1975

Abhay Pasupathy Narayan

Professor of Physics
Ph.D., Cornell University, 2004

Andrew J. Nathan

Class of 1919 Professor of Political Science
A.B., Harvard University, 1963; A.M., 1965; Ph.D., 1971

Gerald Navratil

Thomas Alva Edison Professor

B.S., California Institute of Technology, 1973; M.S., University of Wisconsin-Madison, 1974; Ph.D., 1976

Shree K. Nayar

T.C. Chang Professor of Computer Science

B.S., Birla Institute of Technology (India), 1984; M.S., North Carolina State University, 1986; Ph.D., Carnegie Mellon University, 1990

Fumiko Nazikian

Senior Lecturer in East Asian Languages and Cultures

B.A., Iwate University (Japan), 1979; M.A., Tokyo Gakugei (Japan), 1984; M.A., Australian National University, 1986; Ph.D., University of Sydney, 1994

Ronald Charles Neath

Lecturer in Statistics

B.S., University of California, Davis, 1991; M.S., 1992; Ph.D., University of Minnesota, 2006

Frances Negrón-Muntaner

Professor of English and Comparative Literature

B.S., University of Puerto Rico, 1986; M.A., Temple University, 1991; Ph.D., Rutgers University, 2000

Melissa Kay Ness

Assistant Professor of Astronomy

B.E., University of Queensland (Australia), 2000; Ph.D., Australian National University, Research School of Astronomy and Astrophysics, 2013

Joao Nemi Neto

Senior Lecturer in Latin American and Iberian Cultures

B.A., University of São Paulo (Brazil), 2000; M.A., 2007; M.Phil., The Graduate Center, City University of New York, 2012; Ph.D., 2015

Lara J. Nettelfield

Senior Lecturer in Political Science

B.A., University of California, 1995; M.A., Columbia University, 1999; M.Phil., 2001; Ph.D., 2006

Meredith K. Nettles

Professor of Earth and Environmental Sciences

A.B., Harvard University, 1995; M.S., University of Arizona, 2000; Ph.D., Harvard University, 2005

Fay W. Ng

Senior Lecturer in Chemistry

B.S., University of California, 1992; M.A., Yale University, 1993; Ph.D., Columbia University, 1997

Serena Ng

Edwin W. Rickert Professor of Economics

B.A., University of Western Ontario (Canada), 1980; M.A., 1982; M.A., Princeton University, 1992; Ph.D., 1993

Mae Ngai

Lung Family Professor of Asian American Studies and Professor of History

B.A., Empire State College - SUNY, 1992; M.A., Columbia University, 1993; M.A., 1995; Ph.D., 1998

Lien-Hang Nguyen

Dorothy Borg Associate Professor of the History of American-East Asian Relations

B.A., University of Pennsylvania, 1996; Ph.D., Yale University, 2008

Phuong Chung Nguyen

Lecturer in Vietnamese

B.A., Hanoi University, 2000; M.A., Hanoi National University, 2007

Alberto Nicolis

Associate Professor of Physics

Laurea, Pisa University (Italy), 1999; Diploma, Scuola Normale Superiore, Pisa (Italy), 1999; Ph.D., 2003

Jason Nieh

Professor of Computer Science

B.S., Massachusetts Institute of Technology, 1989; M.S., Stanford University, 1990; Ph.D., 1999

Lars T. Nielsen

Senior Lecturer in Mathematics

M.A., University of Copenhagen (Denmark), 1980; Ph.D., Harvard University, 1985

Aliza K. Nisenbaum

Assistant Professor of Professional Practice in Visual Arts in the Faculty of the Arts

B.F.A., School of the Art Institute of Chicago, 2001; M.F.A., 2005

Miharu Nittono

Senior Lecturer in East Asian Languages and Cultures

B.A., Waseda University (Japan), 1980; M.A., 1983; M.A., Columbia University, 1991; M.Ed., 2001; Ed.D., 2003

Jack R. Norton

Professor of Chemistry

A.B., Harvard University, 1967; Ph.D., Stanford University, 1972

Lynn I. Nottage

Associate Professor of Theatre Arts in the Faculty of the Arts

B.A., Brown University, 1986; M.F.A., Yale University, 1989

Youssef Nouhi

Senior Lecturer in Middle Eastern, South Asian, and African Studies

M.A., University of Ottawa (Canada), 1996; M.A., University of Southern California, 2003

Steven M. Nowick

Professor of Computer Science and of Electrical Engineering

B.A., Yale University, 1976; M.A., Columbia University, 1979; Ph.D., Stanford University, 1993

Colin P. Nuckolls

Sheldon and Dorothy Buckler Professor of Material Science in the Department of Chemistry

B.S., University of Texas at Austin, 1993; Ph.D., Columbia University, 1998

Michael Nutter

David N. Dinkins Professor of Professional Practice and Public Affairs

B.S. University of Pennsylvania, 1979

Marcel Nutz

Professor of Statistics

Diploma Mathematics, ETH Zurich (Switzerland), 2007; Ph.D., 2010

O

Jose A. Ocampo

Professor of Professional Practice in the Faculty of International and Public Affairs

B.A., University of Notre Dame, 1972; Ph.D., Yale University, 1976

Ana Maria Ochoa

Professor of Music

B.A., University of British Columbia (Canada), 1987; M.A., Indiana University, Bloomington, 1993; Ph.D., 1996

Kevin N. Ochsner

Professor of Psychology

B.A., University of Illinois, 1991; A.M., Harvard University, 1995; Ph.D., 1998

Brendan Andrew O'Flaherty

Professor of Economics

A.B., Harvard University, 1973; A.M., 1977; Ph.D., 1980

Sharyn L. O'Halloran

George Blumenthal Professor of Political Economy and Professor of International and Public Affairs

B.A., University of California, San Diego, 1985; M.A., 1988; Ph.D., 1991

Keiko Okamoto

Lecturer in East Asian Languages and Cultures

B.A., International Christian University (Japan), 1970; MA., Columbia University, 1999

Andrei Okounkov

Samuel Eilenberg Professor of Mathematics

B.S., Moscow State University (Russia), 1993; Ph.D., 1995

Paul E. Olsen

Arthur D. Storke Memorial Professor of Earth and Environmental Sciences

B.A., Yale University, 1978; Ph.D., 1983

Robert G. O'Meally

Zora Neale Hurston Professor of English and Comparative Literature

A.B., Stanford University, 1970; A.M., Harvard University, 1971; Ph.D., 1975

Benjamin S. Orlove

Professor of International and Public Affairs

Ph.D., University of California, Berkeley, 1975

Jonathan S. Owen

Associate Professor of Chemistry

B.S., University of Wisconsin-Madison, 2000; Ph.D., California Institute of Technology, 2005

P

Frederik B. Paerels

Professor of Astronomy

M.S., Utrecht University (Netherlands), 1984; Ph.D., 1987

Matthew I. Palmer

Senior Lecturer in the Discipline of Ecology, Evolution and Environmental Biology

B.S., Cornell University, 1996; Ph.D., Rutgers University, 2005

Patrizia Palumbo

Senior Lecturer in Italian

B.A., University of Turin (Italy), 1988; M.A., Columbia University, 1990; M.Phil., 1992; Ph.D., 1996

Orhan Pamuk

Robert Yik-Fong Tam Professor in the Humanities

B.A., University of Istanbul, 1976

Arvind Panagariya

Jagdish N. Bhagwati Professor of Indian Political Economy

Ph.D., Princeton University, 1978

Liam Paninski

Professor of Neuroscience and of Statistics

B.Sc., Brown University, 1999; Ph.D., New York University, 2003

Christos H. Papadimitriou

Donovan Family Professor of Computer Science

B.S. Athens Polytechnic, 1972; M.S., Princeton University, 1974; Ph.D., 1976

Deborah A. Paredes

Associate Professor of Professional Practice in Writing in the Faculty of the Arts

B.A., Trinity University, 1993; Ph.D., Northwestern University, 2002

Ah-Hyung Park

Lenfest Earth Institute Associate Professor of Climate Change

B.A.S., University of British Columbia (Canada), 1998; M.A.S., 2000; Ph.D., Ohio State University, 2005

Jisuk Park

Lecturer in East Asian Languages and Cultures

B.A., University of Aichi (Japan). 2000; M.A., University of Wisconsin-Madison, 2002

Edward C. Parker

Professor of Professional Practice in Theatre Arts in the Faculty of the Arts

M.F.A., Columbia University, 1998

Gerard F. Parkin

Professor of Chemistry

B.A., University of Oxford, 1981; Ph.D., 1985

Michael D. Parrott

Lecturer in Political Science

B.A., University of Texas; M.A., Fordham University; Ph.D., University of Maryland, College Park, 2016

John A. Parsons

Professor of Physics

B.S., McMaster University (Canada), 1985; M.S., University of Toronto, 1986; Ph.D., 1990

Michael J. Passaro

Associate Professor of Professional Practice in Theatre Arts in the Faculty of the Arts

B.A., New York University, 1984; M.A., 1988

Esther Pasztory

Lisa and Bernard Selz Professor Emerita of Pre-Columbian Art History and Archaeology

B.A., Barnard College, 1965; M.A., Columbia University, 1967; Ph.D., 1971

Joseph Patterson

Professor of Astronomy

A.B., Harvard University, 1969; Ph.D., University of Texas at Austin, 1979

Christopher A.B. Peacocke

Johnsonian Professor of Philosophy

B. Phil., University of Oxford, 1974; M.A., 1971; Ph.D., 1979

Susan G. Pedersen

Gouvernor Morris Professor of History

A.B., Harvard University, 1982; Ph.D., 1989

Itshack G. Pe'er

Associate Professor of Computer Science

B.S., Tel Aviv University, 1991; M.S., 1995; Ph.D., 2002

John Pemberton, IV

Associate Professor of Anthropology

B.A., Wesleyan University, 1970; M.A., 1972; M.A., Cornell University, 1981; Ph.D., 1989

Richard Peña

Professor of Professional Practice in the Faculty of the Arts

M.S., Massachusetts Institute of Technology, 1978

Feniosky A. Pena-Mora

Edwin Howard Armstrong Professor of Civil Engineering and Engineering Mechanics, Professor of Earth and Environmental Engineering, and of Computer Science

M.S., Massachusetts Institute of Technology, 1991; Med.Sc.D., 1994

Gustavo F. Pérez-Firmat

David Feinson Professor of Humanities

B.A., University of Miami, 1970; M.A., 1972;

Ph.D., University of Michigan, 1979

Julie S. Peters

M. Gordon Garbedian Professor of English and Comparative Literature

A.B., Yale University, 1981; Ph.D., Princeton University, 1986

Anne Pfeifer

Assistant Professor of Germanic Languages

B.A., Columbia University, 2004; M.A., University of Toronto, 2008; Ph.D., Yale University, 2015

Gregory M. Pflugfelder

Associate Professor of East Asian Languages and Cultures

A.B., Harvard University, 1981; M.A., Waseda University (Japan), 1984; Ph.D., Stanford University, 1996

John D. Phan

Assistant Professor of East Asian Languages and Cultures

B.A., Saint Olaf College, 2002; M.A., Columbia University, 2005; Ph.D., Cornell University, 2012

Edmund S. Phelps

McVickar Professor of Political Economy

B.A., Amherst College, 1955; M.A., Yale University, 1956; Ph.D., 1959

Justin H. Phillips

Professor of Political Science

B.A., Lewis and Clark College, 1998; Ph.D., University of California, San Diego, 2005

Karen E.S. Phillips

Senior Lecturer in Chemistry

A.A., Miami-Dade Community College, 1990; B.S., Barry University, 1995; M.A., Columbia University, 1996; M.Phil., 2000; Ph.D., 2001

Duong Hong Phong

Professor of Mathematics

A.B., Princeton University, 1973; M.A., 1974; Ph.D., 1976

Pablo A. Piccato

Professor of History

B.A., Universidad Nacional Autónoma de México, 1990; Ph.D., University of Texas at Austin, 1997

Aron Pinczuk

Professor of Applied Physics and of Physics

Licenciado, University of Buenos Aires, 1962; Ph.D., University of Pennsylvania, 1969

Henry C. Pinkham*Professor of Mathematics*

A.B., Harvard University, 1970; Ph.D., 1974

Eleonora Pistis*Assistant Professor of Art History and Archaeology*

Ph.D., Università Iuav di Venezia (Italy), 2011

Caterina L. Pizzigoni*Associate Professor of History*

Laurea, University of Milano (Italy), 1996; Ph.D., King's College London, 2002

Terry A. Plank*Arthur D. Storke Memorial Professor of Earth and Environmental Sciences*

A.B., Dartmouth College, 1985; M.A., Columbia University, 1987; M.Phil., 1991; Ph.D., 1993

Pawel Polack*Assistant Professor of Statistics*

Ph.D. Swiss Finance Institute, 2014

Robert E. Pollack*Professor of Biological Sciences*

B.A., Columbia University, 1961; Ph.D., Brandeis University, 1966

Sheldon Pollock*Arvind Raghunathan Professor of South Asian Studies*

A.B., Harvard University, 1971; A.M., 1973; Ph.D., 1975

Lorenzo M. Polvani*Professor of Applied Physics and Applied Mathematics and of Earth and Environmental Sciences*

B.Sc., McGill University (Canada), 1981; M.S., 1982; Ph.D., Massachusetts Institute of Technology, 1988

Cristian Pop-Eleches*Associate Professor of International and Public Affairs*

A.B., Harvard University, 1998; A.M., 2000; Ph.D., 2003

Cathy Popkin*Jesse and George Siegel Professor in the Humanities*

B.A., Wesleyan University, 1976; Ph.D., Stanford University, 1985

Ross Posnock*Anna S. Garbedian Professor of the Humanities*

B.A., Kenyon College, 1974; M.A., Johns Hopkins University, 1976; Ph.D., 1980

Elizabeth Povinelli*Franz Boas Professor of Anthropology*

B.A., St. John's College, 1984; M.Phil., Yale University, 1988; Ph.D., 1991

Andrea Prat*Richard Paul Richman Professor of Business and Professor of Economics*

Ph.D., Stanford University, 1997

Carlo Prato*Assistant Professor of Political Science*

B.A., Bocconi University, 2004; M.S., 2006; Ph.D., Northwestern University, 2012

Kenneth Prewitt*Carnegie Professor of Public Affairs*

Ph.D., Yale University, 1968

Mary Ann Price*Lecturer in Biological Sciences*

B.S., University of Montevallo, 1987; Ph.D., John Hopkins University, 1992

Frances Pritchett*Professor Emerita of Middle Eastern, South Asian, and African Studies*

B.A., Radcliff College, 1969; M.A., University of California, Berkeley, 1973; Ph.D., University of Chicago, 1981

Carol L. Prives*Da Costa Professor of Biology*

B.Sc., McGill University (Canada), 1962; Ph.D., 1968

Philip E. Protter*Professor of Statistics*

B.A., Yale University, 1971; Ph.D., University of California, San Diego, 1975

Ron M. Prywes*Professor of Biological Sciences*

B.A., University of Pennsylvania, 1979; Ph.D., Massachusetts Institute of Technology, 1984

Molly F. Przeworski*Professor of Biological Sciences and Systems Biology*

A.B., Princeton University, 1994; Ph.D., University of Chicago, 2000

Valerie J. Purdie-Vaughns*Associate Professor of Psychology*

B.A., Columbia University, 1993; Ph.D., Stanford University, 2005

G. Michael Purdy*Professor of Earth and Environmental Sciences*

B.S., Imperial College London, 1969; M.S., 1970; Ph.D., University of Cambridge, 1974

Mary E. Putman*Professor of Astronomy*

B.S., University of Wisconsin, 1996; Ph.D., 2001

Q**Shaoyan Qi***Lecturer in East Asian Languages and Cultures*

B.A., Huazhong University of Science and Technology (China), 1999; M.A., State University of New York, 2002; M.A., Villanova University, 2004

Ying Qian

Assistant Professor of East Asian Languages and Cultures
Ph.D. Harvard University, 2013

Sophie C. Queuniet

Senior Lecturer in French and Romance Philology
M.A., Université Sorbonne Nouvelle (France), 1991; M.A., Yale University, 1993; M.Phil., 1993; Ph.D., 1999

Austin E. Quigley

Brander Matthews Professor of Dramatic Literature
B.A., University of Nottingham (U.K.), 1967; M.A., University of Birmingham (U.K.), 1969; Ph.D., University of California, Santa Cruz, 1971

R

Daniel Rabinowitz

Professor of Statistics
B.A., University of California, Santa Cruz, 1985; Ph.D., Stanford University, 1991

Sailakshmi Ramgopal

Assistant Professor of History
B.A., Northwestern University, 2006; Ph.D., University of Chicago, 2016

Rakesh Ranjan

Senior Lecturer in Middle Eastern, South Asian, and African Studies
M.A., University of Delhi (India), 1985; M.Phil., 1988; Ph.D., 1997

Maureen Elizabeth Raymo

G. Unger Vetlesen Professor of Earth and Climate Science
Sc.B., Brown University, 1982; M.A., Columbia University, 1985; M.Phil., 1988; Ph.D., 1989

Adam D. Reich

Associate Professor of Sociology
B.A., Brown University, 2004; M.A., University of California, Berkeley, 2007; Ph.D., 2012

David R. Reichman

Centennial Professor of Chemistry
B.A., University of Chicago, 1992; Ph.D., Massachusetts Institute of Technology, 1997

Ricardo Reis

Professor of Economics
B.Sc., London School of Economics, 1999; Ph.D., Harvard University, 2004

Rodrigo Reis Soares

Lemann Professor of Brazilian Public Policy and International and Public Affairs

B.A., Federal University of Minas Gerais (Brazil), 1994; M.A., Pontifical Catholic University of Rio de Janeiro, 1997; Ph.D., University of Chicago, 2002

Irina Reyfman

Professor of Slavic Languages
Diploma, University of Tartu (Estonia), 1973; Ph.D., Stanford University, 1986

Aaron J. Ritzenberg

Senior Lecturer in English and Comparative Literature
B.A., Haverford College, 1998; M.A., Brandeis University, 2003; Ph.D., 2006

Richard G. Robb

Professor of Professional Practice in the Faculty of International and Public Affairs
Ph.D., University of Chicago, 1985

Bruce William Robbins

Old Dominion Foundation Professor in the Humanities
A.B., Harvard University, 1971; A.M., 1976; Ph.D., 1980

Joyce Trina Robbins

Lecturer in Statistics
B.S.E., Princeton University, 1989; M.A., Tel Aviv University (Israel), 1994; Ph.D., Columbia University, 2002

Camille Robcis

Associate Professor of French and Romance Philology and History
B.A., Brown University, 1999; Ph.D., Cornell University, 2007

Samuel K. Roberts

Associate Professor of History and of Sociomedical Sciences
A.B., University of Virginia, 1995; M.A., Princeton University, 1997; Ph.D., 2001

Lauren Robertson

Assistant Professor of English and Comparative Literature
B.A., St. John's College, 2008; Ph.D., Washington University in St. Louis, 2016

Ailsa A. Roell

Professor of International and Public Affairs
Ph.D., Johns Hopkins University, 1983

Diana P. Romero

Lecturer in Latin American and Iberian Cultures
B.A., Universidad de Los Andes (Colombia), 1994; M.A., University of Maryland, 1998; Ph.D., 2009

Francisco Rosales-Varo

Senior Lecturer in Latin American and Iberian Cultures
M.A., University of Granada (Spain), 1991; Ph.D., 1998

Rachel A. Rosen

Associate Professor of Physics
B.S., Brown University, 2003; Ph.D., New York University, 2009

David K. Rosner

Ronald H. Lauterstein Professor of Sociomedical Sciences and Professor of History

B.A., City College of New York - CUNY, 1968; M.A., University of Massachusetts Boston, 1972; Ph.D., Harvard University, 1978

Alan Ross

Assistant Attending of Classics

B.A., University College London, 2005; M.St., University of Oxford, 2006; Ph.D., 2011

Carol Howe Rounds

Senior Lecturer in Italian

B.A., Columbia University, 1984; M.A., 1986; Ph.D., 1992

Kenneth A. Ross

Professor of Computer Science

B.S., University of Melbourne (Australia), 1986; Ph.D., Stanford University, 1991

David J. Rothman

Bernard Schoenberg Professor of Social Medicine and Professor of History

B.A., Columbia University, 1958; A.M., Harvard University, 1959; Ph.D., 1964

Carol Rovane

Professor of Philosophy

Ph.D., University of Chicago, 1983

Tomislav Rovis

Samuel Latham Mitchill Professor of Chemistry

B.Sc., University of Toronto, 1990; Ph.D., 1998

Xavier S. Roy

Associate Professor of Chemistry

Ph.D., University of British Columbia (Canada), 2011

Daniel S. Rubenstein

Associate Professor of Computer Science

Ph.D., University of Massachusetts Amherst, 2000

Dustin R. Rubenstein

Associate Professor of Ecology, Evolution, and Environmental Biology

B.A., Dartmouth College, 1999; Ph.D., Cornell University, 2006

Malvin A. Ruderman

Centennial Professor of Physics and Professor of Applied Physics

B.A., Columbia University, 1945; M.S., California Institute of Technology, 1947; Ph.D., 1951

Jose P. Ruiz Campillo

Senior Lecturer in Latin American and Iberian Cultures

B.A., University of Granada (Spain), 1987; M.A., 1993; Ph.D., 1999

Guadalupe Ruiz-Fajardo

Senior Lecturer in Latin American and Iberian Cultures

B.A., University of Granada (Spain), 1984; M.A., 1986; Ph.D., 1992

Cynthia G. Rush

Assistant Professor of Statistics

B.S., University of North Carolina at Chapel Hill, 2010; M.A., Yale University, 2011; Ph.D., 2016

Alessandra Russo

Associate Professor of Latin American and Iberian Cultures

Laurea, University of Bologna (Italy), 1996; M.A., École des Hautes Études en Sciences Sociales (France), 1997; Ph.D., 2006

Maureen Ryan

Associate Professor of Professional Practice of Film in the Faculty of the Arts

M.F.A., Columbia University, 1992

S**Emmanuelle M. Saada**

Professor of French and Romance Philology

Ph.D., École des Hautes Études en Sciences Sociales (France), 2001

Giulia Sacca

Assistant Professor of Mathematics

B.S., Sapienza Università di Roma (Italy), 2006; M.S., 2008; Ph.D., Princeton University, 2013

Jeffrey D. Sachs

University Professor

A.B., Harvard University, 1976; A.M., 1978; Ph.D., 1980

Evan D. Sadler

Assistant Professor of Economics

B.A., Princeton University, 2009; Ph.D., New York University, 2015

Abolfazl Safikhani

Assistant Professor of Statistics

Ph.D. Michigan State University, 2015

Alessandra Saggin

Senior Lecturer in Italian

M.A., University of Pisa (Italy), 1990

Ozgur Sahin

Associate Professor of Biological Sciences and of Physics

B.S., Bilkent University (Turkey), 2001; M.S., Stanford University, 2003; Ph.D., 2005

Xavier Sala-i-Martin

Jerome H. and Matthew S. Grossman Professor of Development Economics

Licenciao Ciencias Economicas, Universitat Autònoma de Barcelona (Spain), 1985; A.M., Harvard University, 1987; Ph.D., 1990

Bernard Salanié

Professor of Economics

B.A., École Polytechnique (France), 1984; M.A., École Nationale de la Statistique et de l'Administration Economique (France), 1986; Ph.D., École des Hautes Études en Sciences Sociales (France), 1992

Dalibor Sames

Associate Professor of Chemistry

B.S., Charles University (Czech Republic), 1990; Ph.D., University of Arizona, 1996

Saskia Sassen

Robert S. Lynd Professor of Sociology

M.A., Notre Dame University, 1971; Ph.D., 1974

Vasile Ovidiu Savin

Professor of Mathematics

M.S., University of Pittsburgh, 1999; Ph.D., University of Texas at Austin, 2003

Will Sawin

Assistant Professor of Mathematics

B.S., Yale University, 2011; Ph.D., Princeton University, 2016

Simon M. Schama

University Professor

M.A., University of Cambridge, 1969

James A. Schamus

Professor of Professional Practice in Film in the Faculty of the Arts

A.B., University of California, Berkeley, 1982; M.F.A., 1987; Ph.D., 2003

Jose A. Scheinkman

Charles and Lynn Zhang Professor of Economics

B.A., Universidade Federal do Rio de Janeiro (Brazil), 1969; M.S., Instituto de Matemática Pura e Aplicada (Brazil), 1970; M.A., Rochester University, 1973; Ph.D., 1974

David Schiminovich

Professor of Astronomy

B.Sc., Yale University, 1989; Ph.D., Columbia University, 1998

Wolfram Schlenker

Associate Professor of International and Public Affairs and Economics

Ph.D., University of California, Berkeley, 2003

Jutta Schmiers-Heller

Senior Lecturer in Germanic Languages

B.A., Westfälische Wilhelms-Universität Münster (Germany), 1996; M.A., 1996; M.A., Montclair State University, 2009

Stephanie Schmitt-Grohé

Professor of Economics

Vordiplom, Westfälische Wilhelms-Universität Münster (Germany), 1987; M.B.A., Baruch College - CUNY, 1989; Ph.D., University of Chicago, 1994

Christopher H. Scholz

Professor of Applied Physics and Applied Mathematics and of Earth and Environmental Sciences

B.S., University of Nevada, 1964; Ph.D., Massachusetts Institute of Technology, 1967

Henning G. Schulzrinne

Julian Clarence Levi Professor of Mathematical Methods and Computer Science and Professor of Electrical Engineering

B.S., Technische Universität Darmstadt (Germany), 1984; M.S., University of Cincinnati, 1987; Ph.D., University of Massachusetts Amherst, 1992

Seth R. Schwartz

Lucius N. Littauer Professor of Classical Jewish Civilization

B.A., Yeshiva University, 1979; M.A., Columbia University, 1981; M.Phil., 1982; Ph.D., 1985

David A. Scott

Ruth and William Lubic Professor of Anthropology

B.S., University of West Indies (Jamaica), 1980; M.A., New School for Social Research, 1983; Ph.D., 1989

Guy Sella

Associate Professor of Biological Sciences

B.S., Tel Aviv University, 1993; M.S., Hebrew University, 1997; Ph.D., Tel Aviv University, 2001

Ahmet Tunç Şen

Assistant Professor of History

B.A., Sabancı University (Turkey), 2006; M.A., 2008; M.A., University of Chicago, 2010; Ph.D., 2016

Bodhisattva Sen

Professor of Statistics

B.Stat., Indian Statistical Institute (India), 2002; M.Stat., 2004; M.S., University of Michigan, 2007; Ph.D., 2008

Neslihan Senocak

Associate Professor of History

B.A., Middle East Technical (Turkey), 1994; Ph.D., Bilkent University (Turkey), 2002

Rocco A. Servedio

Professor of Computer Science

A.B., Harvard University, 1993; S.M., 1997; Ph.D., 2001

Stephen R. Sestanovich

Kathryn and Shelby Cullom Davis Professor for the Practice of International Diplomacy

Ph.D., Harvard University, 1978

Lakshminarasimhan Kahil Sethumadhavan

Associate Professor of Computer Science

Ph.D., University of Texas at Austin, 2007

Michael H. Shaevitz

Professor of Physics

B.S., Ohio State University, 1969; M.S., 1971; Ph.D., 1975

Neel Shah

Assistant Professor of Chemistry
B.S., New York University, 2008; Ph.D., Rockefeller University, 2013

Avinoam Shalem

Riggio Professor of Art History
Ph.D., University of Edinburgh, 1995

Wei Shang

Wm. Theodore and Fanny Brett de Bary and Class of 1941 Collegiate Professor of Asian Humanities, and Du Family Professor of Chinese Culture
B.A., Peking University (China), 1982; M.A., 1984; Ph.D., Harvard University, 1994

James Shapiro

Larry Miller Professor of English and Comparative Literature
B.A., Columbia University, 1977; M.A., University of Chicago, 1978; Ph.D., 1982

Jill S. Shapiro

Senior Lecturer in the Discipline of Ecology, Evolution and Environmental Biology
B.A., Barnard College, 1980; M.A., Columbia University, 1982; Ph.D., 1995

Robert Y. Shapiro

Wallace S. Sayre Professor of Government and Professor of International and Public Affairs
B.S., Massachusetts Institute of Technology, 1974; M.A., University of Chicago, 1977; Ph.D., 1982

Teresa Christine Sharpe

Lecturer in Sociology
B.A., University of California, Berkeley, 1994; M.A., 2001; Ph.D., 2010

Michael P. Sheetz

Professor Emeritus of Cell Biology
B.A., Albion College, 1968; Ph.D., California Institute of Technology, 1972

Yuri I. Shevchuk

Lecturer in Slavic Languages
M.A., Kyiv State University (Ukraine), 1983; Ph.D., 1987; M.A., The New School, 1996

Zhongqi Shi

Senior Lecturer in East Asian Languages and Cultures
B.A., Beijing Language and Culture University (China), 2002; M.A., 2005; Ph.D., Columbia University, 2018

Haruo Shirane

Shincho Professor of Japanese Literature
B.A., Columbia University, 1974; M.A., University of Michigan, 1977; Ph.D., Columbia University, 1983

Daphna Shohamy

Professor of Psychology

B.A., Tel Aviv University, 1996; Ph.D., Rutgers University, 2003

Gary Shteyngart

Associate Professor of Writing in the Faculty of the Arts
B.A., Oberlin College, 1995; M.F.A., Hunter College - CUNY, 2001

David Sidorsky

Professor Emeritus of Philosophy
B.A., New York University, 1948; M.A., 1952; Ph.D., Columbia University, 1962

Shelly A. Silver

Associate Professor of Professional Practice
B.F.A., Cornell University, 1980

Joshua Simon

Assistant Professor of Political Science
B.A., Reed College, 2005; Ph.D., Yale University, 2012

Oliver Simons

Professor of Germanic Languages
M.A., Humboldt-University (Germany), 1999; Ph.D., 2005

Audra Simpson

Professor of Anthropology
B.A., Concordia University (Canada), 1993; M.A., McGill University (Canada), 1996; Ph.D., 2004

Lorenzo Sironi

Assistant Professor of Astronomy
Ph.D., Princeton University, 2011

Elaine R. Sisman

Anne Parsons Bender Professor of Music
B.A., Cornell University, 1972; M.F.A., Princeton University, 1974; Ph.D., 1978

Michael Skelly

Associate in Music Performance
B.A. Columbia University, 1997

Samuel Skippon

Lecturer in French and Romance Philology
M.Phil., Sorbonne University (France), 1994; M.A., New York University, 2002

Joseph R. Slaughter

Associate Professor of English and Comparative Literature
B.A., University of Florida, 1989; M.A., University of Texas at Austin, 1994; Ph.D., 1998

Mikhail Smirnov

Senior Lecturer in Mathematics
B.S., M.S., Moscow University (Russia), 1989; M.A., Princeton University, 1992; Ph.D., 1995

Pamela H. Smith

Seth Low Professor of History

B.A., University of Wollongong (Australia), 1979; Ph.D., Johns Hopkins University, 1991

Sable Smith

Assistant Professor of Visual Arts

Alla A. Smyslova

Senior Lecturer in Slavic Languages

M.A., Moscow State Pedagogical Institute of Foreign Languages (Russia); M.A., Indiana University at Bloomington; Ph.D., Bryn Mawr College

Jack L. Snyder

Robert and Renee Belfer Professor of International Relations

A.B., Harvard University, 1973; Ph.D., Columbia University, 1981

Adam H. Sobel

Professor of Applied Physics and Applied Mathematics and of Earth and Environmental Sciences

B.A., Wesleyan University, 1989; M.A., Massachusetts Institute of Technology, 1997; Ph.D., 1998

Michael E. Sobel

Professor of Statistics

B.A., Florida State University, 1972; M.S., University of Wisconsin-Madison, 1975; M.A., 1978; Ph.D., 1980

Sean C. Solomon

William B. Ransford Professor of Earth and Planetary Science

B.S., California Institute of Technology, 1966; Ph.D., Massachusetts Institute of Technology, 1971

Josef Sorett

Professor of Religion and of African American and African Diaspora Studies

B.S., Oral Roberts University, 1996; M.Div., Boston University, 2000; Ph.D., Harvard University, 2008

Naoko Sourial

Assistant Professor, Department of Political Science

B.A., University of Tokyo (Japan), 2015; Ph.D. Princeton University, 2020

Alfredo Spanga

Lecturer in the Discipline of Psychology

B.A., Sapienza, University of Rome (Italy), 2006; M.A., 2010; Ph.D., 2013

Edward A. Spiegel

Rutherford Professor of Astronomy

B.A., University of California, Los Angeles, 1952; M.S., University of Michigan, 1954; Ph.D., 1958

Maura Spiegel

Senior Lecturer in English and Comparative Literature

B.A., Bennington College, 1976; Ph.D., Columbia University, 1993

Marc W. Spiegelman

Arthur D. Storke Memorial Professor of Earth and Environmental Sciences and Professor of Applied Physics and Applied Mathematics

A.B., Harvard University, 1985; Ph.D., University of Cambridge, 1989

Barbara Spinelli

Senior Lecturer in Italian

B.A., University of Perugia (Italy), 1989; M.A., University of Venice (Italy), 2001

Gayatri Chakravorty Spivak

University Professor

B.A., University of Calcutta (India), 1959; M.A., Cornell University, 1962; Ph.D., 1967

James Stafford

Assistant Professor of History

B.A., University of Oxford, 2010; M.Phil., University of Cambridge, 2012; Ph.D., 2016

Joanna R. Stalnaker

Professor of French and Romance Philology

Ph.D., New York University, 2002

Michael F. Stanislawski

Nathan J. Miller Professor of Jewish History

A.B., Harvard University, 1973; A.M., 1975; Ph.D., 1979

Amy A. Starecheski

Lecturer in Sociology

B.A. Columbia University, 1999; M.A., 2005; Ph.D., City University of New York, 2014

David C. Stark

Arthur Lehman Professor of Sociology and International Affairs

A.B., Princeton University, 1972; A.M., Harvard University, 1977; Ph.D., 1982

Ursula M. Staudinger

Robert N. Butler Professor

M.A., Friedrich-Alexander University of Erlangen-Numberg (Germany), 1984; Ph.D., Freie Universität Berlin, 1988

Benjamin A. Steege

Associate Professor of Music

B.A., Columbia University, 2000; Ph.D., Harvard University, 2007

Clifford S. Stein

Professor of Industrial Engineering and Operations Research and of Computer Science

Ph.D., Massachusetts Institute of Technology, 1992

Deborah T. Steiner

Jay Professor of Greek and Latin Languages

A.B., Harvard University, 1982; M.Litt., University of Oxford, 1984; Ph.D., University of California, Berkeley, 1991

Alma Steingart

Assistant Professor of History

B.A., Columbia University, 2006; Ph.D., Massachusetts Institute of Technology, 2013

Alfred Stepan

Wallace S. Sayre Professor Emeritus of Government, Professor Emeritus of Political Science, and Dean Emeritus of the Faculty of International and Public Affairs

B.A., Notre Dame University, 1958; B.A., Balliol College (U.K.), 1960; M.A., 1960; Ph.D., Columbia University, 1969

Nancy Leys Stepan

Professor Emeritus of History

Ph.D., University of California, Los Angeles, 1971

Anders G. Stephanson

Andrew and Virginia Rudd Family Foundation Professor of History

B.A., University of Gothenburg (Sweden), 1975; B.Phil., University of Oxford, 1977; Ph.D., Columbia University, 1986

Rhiannon Stephens

Associate Professor of History

B.A., University of London, 2000; M.A., Northwestern University, 2002; Ph.D., 2007

Magdalena A. Stern Baczewska

Lecturer in Music

B.M., The New School, 2001; M.M., 2003; DMA., Manhattan College of Music, 2008

Alan G. Stewart

Professor of English and Comparative Literature

B.A., University of Cambridge, 1988; Ph.D., 1993

Dustin D. Stewart

Assistant Professor of English and Comparative Literature

B.A., Baylor University, 2001; M.A., 2004; Ph.D., University of Texas, 2013

Joseph E. Stiglitz

University Professor

B.A., Amherst College, 1964; Ph.D., Massachusetts Institute of Technology, 1967

Brent R. Stockwell

Professor of Biological Sciences and of Chemistry

B.A., Cornell University, 1994; Ph.D., Harvard University, 1999

Salvatore J. Stolfo

Professor of Computer Science

B.S., Brooklyn College - CUNY, 1974; M.S., New York University, 1976; Ph.D., 1979

Paul Strohm

Anna S. Garbedian Professor Emeritus of the Humanities

B.A., Amherst College, 1960; M.A., University of California, Berkeley, 1962; Ph.D., 1966

Zoë S. Strother*Riggio Professor of African Art*

B.A., Bryn Mawr College, 1982; M.A., Yale University, 1984; M.A., 1987; Ph.D., 1992

Joowon Suh

Senior Lecturer in East Asian Languages and Cultures

B.A., Sogang University (Korea), 1990; M.A., 1993; M.A., Columbia University, 1998; M.Ed., 2000; Ed.D., 2007

Chiara Superti

Lecturer in Political Science

B.A., University of Bologna (Italy), 2006; M.P.I.A., University of California, 2009; Ph.D., Harvard University, 2015

Peter M. Susser

Senior Lecturer in Music

B.A., Bennington College, 1981; M.M., Manhattan School of Music, 1984; DMA, Columbia University, 1994

Tomi Suzuki

Professor of East Asian Languages and Cultures

B.A., University of Tokyo, 1974; M.A., 1977; Ph.D., Yale University, 1988

Jan Svejnar

James T. Shotwell Professor of Global Political Economy

B.S., Cornell University, 1974; M.A., Princeton University, 1976; Ph.D., 1979

Mariame I. Sy

Lecturer in Middle Eastern, South Asian, and African Studies

M.A., East Stroudsburg University, 1996; M.A., University of California, Los Angeles, 2003; Ph.D., 2007

Sarah M. Sze

Professor of Visual Arts in the Faculty of the Arts

B.A., Yale University, 1991; M.F.A., School of Visual Arts, 1997

T**Naofumi Tatsumi**

Lecturer in East Asian Languages and Cultures

B.A., Ritsumeikan University (Japan), 2001; M.A., University of Southern Mississippi, 2004; Ph.D., Purdue University, 2012

Simon Tavaré

Professor of Statistics and of Biological Sciences

B.Sc., University of Sheffield (U.K.), 1974; M.S., 1975; Ph.D., 1979

Mark C. Taylor

Professor of Religion

B.A., Wesleyan University, 1968; Ph.D., Harvard University, 1973; Doktorgrad, University of Copenhagen, 1981

Dennis Tenen

Associate Professor of English and Comparative Literature

B.A., University of Michigan, 2001; Ph.D., Harvard University, 2011

Herbert S. Terrace*Professor of Psychology*

B.A., Cornell University, 1957; M.A., 1958; Ph.D., Harvard University, 1961

Michael Thaddeus*Professor of Mathematics*

A.B., Harvard University, 1988; D.Phil., University of Oxford, 1992

Yannik Thiem*Associate Professor of Religion*

B.A., University of Tuebingen (Germany), 1998; M.A., 2002; Th.D., 2004; M.A., University of California, Berkeley, 2004; Ph.D., 2009

Jiang Tianqi*Lecturer in East Asian Languages and Cultures*

B.A., Northwestern University, 2010; M.A., Beijing Language and Culture University (China), 2013; Ph.D., 2019

Michael M. Ting*Professor of International and Public Affairs and of Political Science*

S.B., Massachusetts Institute of Technology, 1992; A.M., Harvard University, 1995; Ph.D., Stanford University, 1999

Rirkrit Tiravanija*Professor of Professional Practice in Visual Arts in the Faculty of the Arts*

B.A., Ontario College of Art (Canada), 1984; M.A., School of the Art Institute of Chicago, 1986

T. Colm Toibin*Irene and Sidney B. Silverman Professor of the Humanities*

B.A., University College Dublin, 1975

Maya Tolstoy*Professor of Earth and Environmental Sciences*

B.Sc., University of Edinburgh, 1988; Ph.D., University of California, San Diego, 1994

Raju Tomer*Assistant Professor of Biological Sciences*

B. Tech - M. Tech Dual Degree, Indian Institute of Technology, Delhi, 2004; Ph.D., European Molecular Biology Laboratory, 2010

Pier Mattia Tommasino*Associate Professor of Italian*

B.A., Università degli Studi, Pisa (Italy), 2002; M.A., Università degli Studi, Urbino (Italy), 2003; Ph.D., Scuole Normale Superiore, Pisa (Italy), 2009

Liang Tong*William R. Kenan, Jr. Professor of Biological Sciences*

B.S., Peking University (China), 1983; Ph.D., University of California, Berkeley, 1989

Adam Tooze*Kathryn and Shelby Cullom Davis Professor of History;**Director of the European Institute*

Ph.D., London School of Economics, 1996

Gerard Torrats-Espinosa*Assistant Professor of Sociology*

B.S., Polytechnic University of Catalonia (Spain), 2004; MPP, Harvard University, 2014; Ph.D., New York University, 2019

Maria Tosches*Assistant Professor Biological Sciences*

Ph.D., Scuola Normale Superiore (Italy), 2012

Nim Tottenham*Professor of Psychology*

B.A., Barnard College, 1996; Ph.D., University of Minnesota, 2005

Lisa Trever*Lisa and Bernard Selz Associate Professor of Pre-Columbian Art History and Archaeology*

B.A., Yale University, 2000; M.A., University of Maryland, 2005; A.M., Harvard University, 2007; Ph.D., 2013

Sonam Tsering*Lecturer in East Asian Languages and Cultures*

B.A., University of London (United Kingdom), 2005

Takuya Tsunoda*Assistant Professor of Japanese Visual Culture*

B.A., Waseda University, 2002; M.A., Columbia University, 2005; M.A., 2008; Ph.D., Yale University, 2015

Philip Michael Tuts*Professor of Physics*

B.S., Massachusetts Institute of Technology, 1974; Ph.D., Stony Brook University - SUNY, 1979

Gray Tuttle*Leila Hadley Luce Associate Professor of Modern Tibetan Studies*

Ph.D., Harvard University, 2002

U**Elsa Ubeda***Lecturer in Latin American and Iberian Cultures*

B.A., University of Barcelona (Spain), 2002; Menéndez Pelayo International University (Spain), 2009

Yasutomo Uemura*Professor of Physics*

B.S., University of Tokyo, 1977; M.S., 1979; D.Sc., 1982

Joseph C. Ulichny*Associate in Chemistry*

B.S., University of Scranton, 2006; M.A., Columbia University, 2008

Eric Jean-Paul Urban*Professor of Mathematics*

Ph.D., University of Paris-Sud, 1994

Nadia Urbinati

Kyriakos Tsakopoulos Professor of Political Theory and Hellenic Studies

Laurea, University of Bologna (Italy), 1977; Master, University of Parma (Italy), 1980; Ph.D., European University Institute of Florence (Italy), 1989

Maria Uriarte

Professor of Ecology, Evolution, and Environmental Biology

B.A., University at Albany - SUNY, 1986; M.A., Yale University, 1995; Ph.D., Cornell University, 2002

Martin Uribe

Professor of Economics

B.A., Universidad Nacional de Córdoba (Argentina), 1987; M.A., University of Centro de Estudios Macroeconómicos de Argentina, 1989; Ph.D., University of Chicago, 1994

Miguel S. Urquiola

Professor of Economics and of International and Public Affairs

B.A., Swarthmore College, 1992; Ph.D., University of California, Berkeley, 2000

V

James J. Valentini

Henry L. and Lucy G. Moses Professor

B.S., University of Pittsburgh, 1972; M.S., University of Chicago, 1973; Ph.D., University of California, Berkeley, 1976

Paolo Valesio

Guisepppe Ungaretti Professor Emeritus of Italian Literature

Ph.D., University of Bologna (Italy), 1969

Marc Van De Mierop

Professor of History

B.A., Katholieke Universiteit Leuven (Belgium), 1978; M.A., Yale University, 1980; Ph.D., 1983

Anne Margrete Nicolien van Delft

Assistant Professor of Statistics

B.Sc., Maastricht University (Netherlands), 2011; M.Sc., 2012; Ph.D., 2016

Karen R. Van Dyck

Kimón A. Doukas Professor of Hellenic Studies

B.A., Wesleyan University, 1983; M.A., Aristotelian University (Greece), 1985; D.Phil., University of Oxford, 1990

Jacqueline H. van Gorkom

Rutherford Professor of Astronomy

Doctorale, University of Groningen (Netherlands), 1975; Ph.D., 1980

Vladimir Vapnik

Professor of Computer Science

Ph.D., Institute of Control Sciences (Russia), 1964

Achille C. Varzi

Professor of Philosophy

Laurea Hons., University of Trento (Italy), 1982; M.A., University of Toronto, 1983; Ph.D., 1994

Thibault Vatter

Assistant Professor of Statistics

B.Sc., Swiss Federal Institute of Technology, 2010; M.Sc., 2012; Ph.D., HEC Lausanne, 2016

Diane Vaughan

Professor of Sociology and of International and Public Affairs

B.A., Ohio State University, 1973; M.A., 1974; Ph.D., 1979

Yamil Velez

Assistant Professor of Political Science

B.A., Florida State University, 2010; M.A., Stony Brook University, 2012; Ph.D., 2015

Latha Venkataraman

Professor of Applied Physics and Chemistry

B.S., Massachusetts Institute of Technology, 1993; M.S., Harvard University, 1997; Ph.D., 1999

Venkat Venkatasubramanian

Samuel Ruben-Peter G. Viele Professor of Engineering

Ph.D., Cornell University, 1984

Sudhir A. Venkatesh

William B. Ransford Professor of Sociology

B.A., University of California, San Diego, 1988; M.A., University of Chicago, 1992; Ph.D., 1997

Wouter Vergote

Lecturer in Economics

M.A., Ku Leuven (Belgium), 1999; M. Phil., Columbia University, 2003; Ph.D., 2005

Eric A. Verhoogen

Professor of International and Public Affairs and of Economics

A.B., Harvard University, 1991; M.A., University of Massachusetts Amherst, 1998; Ph.D., University of California, Berkeley, 2004

Gauri Viswanathan

Class of 1933 Professor of English and Comparative Literature

B.A., University of Delhi (India), 1971; M.Ed., Columbia University, 1984; Ph.D., 1985

Katja Vogt

Professor of Philosophy

B.A., University of Munich (Germany), 1990; M.A., 1992; Ph.D., 1996

Katharina Volk

Professor of Classics

M.A., University of Munich (Germany), 1994; M.A., Princeton University, 1996; Ph.D., 1999

Dorothea von Mücke

Gebhard Professor of German Language and Literature

Staatsexamen Germanistik, University of Mannheim (Germany), 1981; M.A., Stanford University, 1983; Ph.D., 1988

Tomas Vu-Daniel

LeRoy Neiman Professor of Professional Practice in Visual Arts in the Faculty of the Arts

B.F.A., University of Texas at El Paso, 1988; M.F.A., Yale University, 1990

Gordana Vunjak-Novakovic

University Professor

Ph.D., University of Belgrade, 1980

W

David Walker

Higgins Professor of Earth and Environmental Sciences

B.A., Oberlin College, 1968; A.M., Harvard University, 1970; Ph.D., 1972

Nicole B. Wallack

Senior Lecturer in English and Comparative Literature

B.A., McGill University (Canada), 1988; M.A., University of Edinburgh (United Kingdom), 1989; Ph.D., New York University, 2004

Wendy S. Walters

Associate Professor of Writing

B.A., University of Michigan, 1992; M.F.A., Cornell University, 1995; M.A., 1997; Ph.D., 2000

Hailong Wang

Lecturer in East Asian Languages and Cultures

B.A., Jiangsu Normal University (China); M.A., Shanghai Normal University (China); M.A., Columbia University, 1993

Mu-Tao Wang

Professor of Mathematics

M.S., National Taiwan University, 1992; Ph.D., Harvard University, 1998

Zhirong Wang

Senior Lecturer in East Asian Languages and Cultures

B.A., Peking University (China), 1987; Ph.D., University of Wisconsin-Madison, 2003

Christopher J. Washburne

Professor of Music

B.A., University of Wisconsin, 1986; M.A., Columbia University, 1992; Ph.D., 1999

Michael J. Waters

Assistant Professor of Art History and Archaeology

B.F.A., University of Illinois at Urbana-Champaign, 2005; M. Arch. History, University of Virginia, 2007; Ph.D., Institute of Fine Arts, New York University, 2015

Gregory J. Wawro

Professor of Political Science

B.A., Pennsylvania State, 1990; Ph.D., Cornell University, 1997

Elke U. Weber

Jerome A. Chazen Professor of International Business and Professor of Psychology

B.A., York University (Canada), 1980; Ph.D., Harvard University, 1984

Silja Weber

Lecturer in German

B.A., Rheinische Friedrich-Wilhelms-Universität (Germany), 1999; M.Sc., 1999; M.A., Indiana University, 2012; Ph.D., 2018

Hannah Weaver

Associate Research Scholar in the Department of English and Comparative Literature

B.A., Boston University, 2009; M.A., University of Toronto (Canada), 2014; A.M., Harvard University, 2015; Ph.D., 2019

Lance D. Weiler

Associate Professor of Professional Practice in Film in the Faculty of Arts

Erick J. Weinberg

Professor of Physics

B.S., Manhattan College, 1968; A.M., Harvard University, 1969; Ph.D., 1973

David E. Weinstein

Carl Sumner Shoup Professor of Japanese Economics

B.A., Yale University, 1985; M.A., University of Michigan, 1988; Ph.D., 1991

Michael I. Weinstein

Professor of Applied Mathematics and of Mathematics

Ph.D., New York University, 1982

Omri Weinstein

Assistant Professor of Computer Science

B.Sc., Tel Aviv University, 2010; Ph.D., Princeton University, 2015

Renata Maria Wentzcovitch

Professor of Material Science and Applied Physics, and Earth and Environmental Science

B.S., University of São Paulo, 1980; M.S., 1982; Ph.D., University of California, Berkeley, 1988

Jennifer Ann Wenzel

Associate Professor of English and Comparative Literature and of Middle Eastern, South Asian, and African Studies

B.A., University of Texas at Austin, 1990; M.A., Indiana University, 1992; Ph.D., University of Texas, Austin, 1998

Bruce Western

Bryce Professor of Sociology and Social Justice

B.A., University of Queensland (Australia), 1987; M.A., University of California, Los Angeles, 1990; Ph.D., 1993

Harrison C. White*Giddings Professor Emeritus of Sociology*

B.Sc., Massachusetts Institute of Technology, 1950; Ph.D., 1955; Ph.D., Princeton University, 1960

Joshua D. Whitford*Associate Professor of Sociology*

B.A., University of Wisconsin-Madison, 1993; M.S., 1997; Ph.D., 2003

Sebastian Will*Assistant Professor of Physics*

Diplom., Johannes Gutenberg University Mainz 2006; Ph.D., 2011

Gareth D. Williams*Anthon Professor of Latin Language and Literature*

B.A., University of Cambridge, 1986; Ph.D., 1990

Jack J. Willis*Assistant Professor of Economics*

B.A., University of Cambridge, 2006; M.A., Paris School of Economics, Université Paris I, 2009; Ph.D., Harvard University, 2017

Mabel O. Wilson*Nancy and George Rupp Professor of Architecture, Planning and Preservation; Professor of African American and African Diaspora Studies*

B.S., University of Virginia, 1985; M.Arch, Columbia University, 1991; Ph.D., New York University, 2007

Andreas Wimmer*Lieber Professor of Political Philosophy*

M.A., University of Zurich, 1989; D.Phil., 1992

Jason M. Wingard*Professor of Professional Studies*

B.A., Stanford University, 1995; M.A., Emory University, 1996; Ed.M., Harvard University, 1997; Ph.D., University of Pennsylvania, 2000

Inga T. Winkler*Lecturer in Political Science*

Ph.D., Heinrich Heine University (Germany), 2010

Emma L. Winter*Assistant Professor of History*

B.A., University of Cambridge, 1998; M.A., 2001; M.Phil., 1999; Ph.D., 2005

Peter G. Woit*Senior Lecturer in Mathematics*

A.B., M.A., Harvard University, 1979; Ph.D., Princeton University, 1985

Michael Woodford*John Bates Clark Professor of Political Economy*

A.B., University of Chicago, 1977; J.D., Yale University, 1980; Ph.D., Massachusetts Institute of Technology, 1983

Sarah Woolley*Professor of Psychology*

B.A., University of Colorado, 1991; Ph.D., University of Washington, 1999

Henryk Wozniakowski*Professor Emeritus of Computer Science*

M.S., University of Warsaw, 1969; Ph.D., 1972

Chen Wu*Lecturer in East Asian Languages and Cultures*

B.A., Fudan University (China), 2006; M.A., 2009; M.A., University of Wisconsin-Madison, 2011; Ph.D., 2016

Eugene Wu*Assistant Professor of Computer Science*

Ph.D., Massachusetts Institute of Technology, 2014

X**Jia Xu***Lecturer in East Asian Languages and Cultures*

B.A., Beijing Language and Culture University, 2005; M.Ed., 2009

Y**Lili Yamasaki***Lecturer in Biological Sciences*

B.S., University of Michigan, 1982; Ph.D., University of Texas at San Antonio, 1991

Ling Yan*Senior Lecturer in East Asian Languages and Cultures*

B.A., Northwest University, 1986; M.A., Northwestern Polytechnical University (China), 1996; Ph.D., University of Kansas, 2005

Jian Yang*Professor of Biological Sciences*

M.S., Academia Sinica (Taiwan), 1985; Ph.D., University of Washington, 1991

Junfeng Yang*Associate Professor of Computer Science*

B.S., Tsinghua University (China), 2000; M.S., Stanford University, 2002; Ph.D., 2008

Zhaohua Yang*Sheng Yen Assistant Professor of Chinese Buddhism*

Ph.D., Stanford University, 2013

Mihalis Yannakakis*Percy K. and Vida L.W. Hudson Professor of Computer Science*

Dipl., National Technical University of Athens, 1975; M.S., Ph.D., Princeton University, 1979

Keren Yarhi-Milo*Arnold A. Saltzman Professor of War and Peace Studies;**Professor of Political Science and of International and Public Affairs*

B.A., Columbia University, 2003; Ph.D., University of Pennsylvania, 2010

Tuncel M. Yegulalp

Professor Emeritus of Mining in the Department of Earth and Environmental Engineering
Eng.Sc.D., Columbia University, 1968

David M. Yerkes

Professor of English and Comparative Literature
B.A., Yale University, 1971; B.A., University of Oxford, 1973; D.Phil., 1976

Hyunkyung Yi

Lecturer in East Asian Languages and Cultures
B.A., Yonsei University (Korea), 1982; M.A., 1987

Zhiliang Ying

Professor of Statistics
B.S., Fudan University (China), 1982; M.A., Columbia University, 1984; Ph.D., 1987

Gabriel J. Young

Lecturer in Statistics
B.S., Metropolitan State University of Denver, 2009; M.S., Colorado State University, 2012; Ph.D., 2016

Chun-Fang Yu

Sheng Yen Professor Emerita of Chinese Buddhism and Professor Emerita of East Asian Languages and Cultures
Ph.D., Columbia University, 1973

Ming Yuan

Professor of Statistics
B.S., University of Science and Technology of China, 1997; M.S., 2000; M.S., University of Wisconsin-Madison, 2003; Ph.D., 2004

Rafael Yuste

Professor of Biological Sciences and of Neuroscience
M.D., Aut6noma de Madrid, 1987; Ph.D., Rockefeller University, 1992

Z

William A. Zajc

I.I. Rabi Professor of Physics
B.S., California Institute of Technology, 1975; Ph.D., University of California, Berkeley, 1982

Konstantina Zanolu

Assistant Professor of Italian
B.A., National School of Dramatic Art, Greece, 1997; B.A., National and Kapodistrian University of Athens, 2000; M.A., Birkbeck College, University of London, 2002; Ph.D., University of Pisa (Italy), 2007; European Doctorate, École Normale Supérieure (France), 2008

Elleni Zeleke

Assistant Professor of Middle Eastern, South Asian, and African Studies

Ph.D., York University (Canada), 2016

Tanya Zelevinsky

Professor of Physics
S.B., Massachusetts Institute of Technology, 1999; A.M., Harvard University, 2001; Ph.D., 2004

Madeleine H. Zelin

Dean Lung Professor of Chinese Studies
B.A., Cornell University, 1970; Ph.D., University of California, Berkeley, 1979

James E.G. Zetzel

Anthony Professor Emeritus of the Latin Language and Literature
A.B., Harvard University, 1968; A.M., 1970; Ph.D., 1973

Changxi Zheng

Assistant Professor of Computer Science
M.S., Cornell University, 2010; Ph.D., 2012

Tian Zheng

Professor of Statistics
B.Sc., Tsinghua University (China), 1998; M.A., Columbia University, 2000; Ph.D., 2002

Xiaoyang Zhu

Howard Family Professor of Nanoscience in the Department of Chemistry
B.S., Fudan University (China), 1984; Ph.D., University of Texas at Austin, 1989

Alan Ziegler

Professor of Professional Practice
B.A., Union College, 1970; M.A., City College of New York - CUNY, 1974

Eliza Zingesser

Associate Professor of French and Romance Philology
B.A., Smith College, 2005; M.A., Princeton University, 2008; Ph.D., 2012

BOARD OF VISITORS 2020–21

Thomas W. Cornacchia '85, P: '17, '19, Chair
Nairi C. Balian '88, P: '16, '22, '23, Vice Chair
Dean James J. Valentini

Michael I. Barry '89, P: '21
Jonathan D. Bram '87, P: '14, '17
Leslie Gittess Brodsky '88, P: '23
Joyce Chang '86
Douglas A. Cifu, Esq. '87, LAW'90
James H. Dignan '91
Michele A. Esposito '96

OFFICERS OF COLUMBIA COLLEGE 2020–2021

James J. Valentini
Dean of Columbia College and Vice President for Undergraduate Education
 B.S., University of Pittsburgh, 1972; M.S., University of Chicago, 1973; Ph.D., University of California, Berkeley, 1976

Corey S. Aronstam
Senior Associate Dean for Columbia College Development and Deputy Vice President for Development, Columbia College and Arts and Sciences
 B.A., Nazareth College, 1998; M.B.A., Wagner College, 2001

Susan Chang-Kim
Vice Dean and Chief Administrative Officer of Columbia College
 B.A., University of Maryland, 1993; M.A., Teachers College, Columbia University, 2005

Lisa Hollibaugh
Dean of Academic Affairs
 B.A., Rice University, 1990; M.A., Columbia University, 1996; Ph.D., 2005

Jessica Marinaccio
Dean of Undergraduate Admissions and Financial Aid
 A.B., Harvard University, 1991; M.Ed., 1994

Shannon P. Marquez
Dean of Undergraduate Global Engagement

B.S., Prairie View A&M University, 1992; M.Eng., Texas A&M University, 1993; Ph.D., University of North Carolina at Chapel Hill, 1998

James T. McMenamin, Jr.
Senior Associate Dean for Columbia College Development and Senior Director of Principal Gifts, Office of Alumni and Development
 B.A., Johns Hopkins University, 1971

Andrew Plaa
Dean of Advising, James H. and Christine Turk Berick Center for Student Advising
 B.A., McGill University (Canada), 1983; M.A., Columbia University, 1986; M.Phil., 1987; Ph.D., 1994

Cristen Scully Kromm
Dean of Undergraduate Student Life
 B.A., Wheaton College, 1995; M.S.W., New York University, 1998

Kavita Sharma
Dean of Career Education
 B.Sc., University of Southampton, 1989; M.Sc., London School of Economics, 1991; M.A., Teachers College, Columbia University, 2012

Bernice Tsai
Chief of Communications and Marketing Officer
 B.A., Columbia University, 1996; M.B.A., Northwestern University, 2001

Melinda Aquino
Associate Dean of Multicultural Affairs, Undergraduate Student Life

Chanda Bennett
Advising Dean, James H. and Christine Turk Berick Center for Student Advising
 B.S., Cornell University, 1996; M.A., Columbia University, 2001; M.Phil., 2004; Ph.D., 2007

Jillian Burdziak
Advising Dean, James H. and Christine Turk Berick Center for Student Advising
 B.A., Boston College, 2010; M.A., Teachers College, Columbia University, 2013

Marcela D. Calidonio
Advising Dean, James H. and Christine Turk Berick Center for Student Advising
 B.A., Columbia University, 2006

Scott W. Carpenter
Associate Dean of Global Education and Fellowships

B.A., Dickinson College, 1995; M.A., New York University, 1996; M.Phil., 1999

Angie Carrillo

Associate Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., University of California, Los Angeles, 1999; M.A., Teachers College, Columbia University, 2000; Ed.M., 2007

Cindy Cogdill

Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.S., Southeast Missouri State University, 1983; M.S.Ed., Southern Illinois University, 1988

Jason Collado

Assistant Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., University at Albany, SUNY, 1997; M.S., 2000

Daveena Colwell

Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Rutgers University, 2009; Ed.M., 2013

Manoushka Constant

Senior Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., St. John's University, 2000; M.S., 2003

Niki Cunningham

Senior Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Brown University, 1990; M.A., University of Wisconsin, 1994; M.P.H., Columbia University, 2017

Amanda Daugherty

Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.S., Indiana State University, 2006; M.P.H. Indiana University Bloomington, 2008

Jessica Dzaman

Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Brown University, 2006; M.A., Columbia University, 2008; Ph.D., 2015

Darius V. Echeverría

Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Rutgers University, 1999; M.A., Temple University, 2003; Ph.D., 2006

A. Alexander España

Associate Dean, James H. and Christine Turk Berick Center for Student Advising

B.S., Southwestern Adventist University, 1994; M.A., Andrews University, 1997

Aileen Forbes

Senior Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Columbia University, 1993; M.A., Princeton University, 1999; Ph.D., 2004

Joshua Gaynor

Advising Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Marist College, 1996; M.A., New York University, 1999

Chad Gifford

Assistant Dean, James H. and Christine Turk Berick Center for Student Advising

B.A., Brown University, 1990; M.A., Columbia University, 1995; Ph.D., 2003

Michael Hall

FEES, EXPENSES, AND FINANCIAL AID

ESTIMATED EXPENSES FOR THE ACADEMIC YEAR

An itemized estimate of the cost of attending Columbia College for the **2020–2021 academic year** of nine months is as follows:

Tuition*	\$58,920
Mandatory Fees	\$2,751
Average Room and Board Cost	\$15,130
Books and Personal Expenses	\$3,538
Travel	varies
Total	\$80,339 + Travel

*Undergraduate tuition has been set at \$60,098 less \$1,178 for a final 2020-2021 undergraduate tuition rate of \$58,920 which is flat to last year's value.

There is an additional charge of \$365 for new students who are required to attend Orientation.

Information on planning and managing educational expenses is contained at <https://sfs.columbia.edu/>

FEES

The following fees, prescribed by statute for each Fall or Spring term, are subject to change at any time at the discretion of the Trustees. The fees shown are those in effect during the 2020–2021 academic year.

University charges, such as tuition and fees, residence halls, and dining plans, are due and payable in full by the date announced before the beginning of each term. To check on an account balance, log in to [Student Services Online \(SSOL\)](#) or call 212-854-4400. A late payment penalty is assessed on payments received after the due date.

It is the policy of the University to withhold all University services, including registration, diplomas, and official transcripts, until all financial obligations have been met.

Tuition 2020–2021

There is a flat tuition charge for all Columbia College students, including visitors, regardless of the number of credits a student is taking. Students who are enrolled for eight terms must pay the flat tuition, regardless of the number of credits they are taking. The charge for 2020–2021 is \$30,049 a term.

Postgraduate special students and degree candidates enrolled for a ninth term are billed according to the per-point system; the per-point cost is \$2,008.

Late Registration Fee

Students who register after the scheduled period (see *Academic Calendar*) are charged a late registration fee of \$100.

Mandatory Fees*

Student Life Fee*	\$1531
Columbia Health and Related Services Fee	\$1,220
Total	\$2751

*On-Campus students registered in Columbia College (Fall Term): \$623; Remote students registered in Columbia College (Fall Term): \$501; Students registered in Columbia College (Spring Term): \$908

Document Fee

All first-time registrants at Columbia University are charged a one-time document fee of \$105, which thereafter allows them to order transcripts and enrollment and degree certifications, and to receive the mailing of the original diploma at no additional charge. This fee appears on the first Student Account Statement of the Fall term.

International Services Charge

All students holding a non-resident visa are charged an international services charge of \$100 each term, totaling \$200 for academic year 2020-2021. This fee supports the University's services to international students.

Columbia Health and Related Services Fee and Student Health Insurance Premiums

Columbia Health and Related Services Fee

Columbia Health programs and services are supported by the Columbia Health and Related Services Fee. Students who pay the fee can access the on-campus services provided by the five units of Columbia Health:

- Alice! Health Promotion, including the Gay Health Advocacy Project (GHAP)
- Counseling and Psychological Services
- Disability Services
- Medical Services
- Sexual Violence Response (students who do not pay the fee can also access these services)

All full-time students and international students are required to pay the Columbia Health and Related Services Fee. Half-time or part-time students may elect to pay the fee to have access to

the full range of on-campus programs and services. Students who pay the Health and Related Services Fee pay no additional charges for most on-campus services.

The Columbia Health and Related Services Fee is billed separately for each term. The periods of coverage and fees for 2020–2021 are as follows:

Fall Term	August 15, 2020– December 31, 2020	\$610
Spring Term	January 1, 2021– August 14, 2021	\$610

Student Health Insurance Premiums

The University policy requires all full-time students and all international students to have acceptable health insurance coverage, in addition to on-campus programs and services provided by Columbia Health. Columbia University offers the Student Health Insurance Plan (Columbia Plan), administered and underwritten by Aetna Student Health.

As with all health insurance programs, there are limits and restrictions to the coverage provided by the Columbia Plan. Please visit the Columbia Health Insurance website for rates and plan details: <http://health.columbia.edu/insurance>.

Domestic students who already have an alternate insurance plan that meets established criteria set by the University may request a waiver from enrollment through [Student Services Online \(SSOL\)](#) before the deadline (September 30 for Fall enrollment; February 15 for new Spring enrollment; or June 15 for new Summer enrollment). All waiver requests are considered, but approval is not guaranteed.

Students must make an enrollment/waiver request on SSOL **each year**. For the current dates of the open enrollment period, visit <http://health.columbia.edu/insurance>.

Domestic students who do not confirm enrollment into the Columbia Plan and drop below full-time status during the [Change of Program period](#) will have their Health and Related Services Fee refunded.

International Students

Navigating the U.S. health care system can be complex. To help ensure that international students have access to the highest quality of care on- and off-campus **Columbia University requires all international students to enroll in the Columbia Student Health Insurance Plan**. Please contact the Student Health Insurance Team with any questions. They can be reached via studentinsurance@columbia.edu, 212-854-3286, or by visiting the office on the 3rd Floor of John Jay Hall.

For detailed information about Columbia Health, the Student Health Insurance Plan, or submitting a waiver request (domestic students only), visit <http://health.columbia.edu/insurance> or call 212-854-3286.

Withdrawal and Adjustment of Fees

Withdrawal is defined as the dropping of one's entire program in a given term as opposed to dropping a portion of one's program (see *Academic Regulations*). Any student withdrawing from the College must notify the [Center for Student Advising](#) in writing; **notification to instructors or failure to attend classes does not constitute an official withdrawal from the College and will result in failing grades in all courses.**

A student who withdraws is charged a withdrawal fee of \$75. In addition, students will be charged a housing fee once they leave a university residence. All application fees, late fees, and other special fees are not refundable if the student withdraws after the first 30 days of classes, and any coverage remains in effect until the end of the term. The Columbia Health and Related Services Fee is non-refundable and the Student Health Insurance Plan premium will be refunded in accordance with the Columbia Health Insurance Office insurance eligibility withdrawal policy: <http://health.columbia.edu/student-insurance/eligibility>.

Medical Leave

Students who are on an approved medical leave of absence are eligible to remain on the Columbia Student Health Insurance Plan for a cumulative maximum of two semesters during the course of the student's entire enrollment within a particular school at Columbia, regardless of the length of program.

Medical leaves must be approved by the student's academic unit and reflected in the Student Information System. Upon written notification from the academic unit granting medical leave, the Columbia Health Insurance Office will contact the student via their Columbia email address to determine whether the student wishes to remain enrolled in the Columbia Student Health Insurance Plan.

Students who do not reply within 14 days will be automatically terminated from the plan, effective at the end of the month in which the Columbia Health Insurance Office is notified or at the conclusion of the semester, whichever comes first.

Any adjustment to the tuition that the student has paid is determined by the date of withdrawal. Students receiving financial aid are not entitled to any portion of a refund until all Title IV financial aid programs are credited and all outstanding charges have been paid.

Each term, students are required to register for a full program of courses (minimum of 12 points), by the end of the [Change of Program period](#), i.e., by the end of the second week of classes. Students who are not registered for at least 12 points by the end of the Change of Program period will be withdrawn from Columbia College.

Fall and Spring Term Tuition Refund Schedule

For the purposes of tuition proration, a week is defined as beginning on Monday and ending on Sunday. Also note that the official Change of Program period normally ends on a Friday.

Description	Charge Assessed
No Registration	\$0
1st and 2nd week	Document fee for new students only , plus \$75 Withdrawal fee
3rd week	10% tuition, fees, plus \$75 Withdrawal fee
4th week	20% tuition, fees, plus \$75 Withdrawal fee
5th week	30% tuition, fees, plus \$75 Withdrawal fee
6th week	40% tuition, fees, plus \$75 Withdrawal fee
7th week	50% tuition, fees, plus \$75 Withdrawal fee
8th week	60% tuition, fees, plus \$75 Withdrawal fee
9th week and after	100% tuition, fees, plus \$75 Withdrawal fee

There is no difference in the proration schedule of a school or program charging per-point or flat rate tuition.

Columbia is committed to meeting the full demonstrated financial need for all applicants admitted as first-year students or transfer students pursuing their first degree. Financial aid is available for all four undergraduate years, provided that students continue to demonstrate financial need.

All applicants who are citizens or permanent residents of the United States, who are students granted refugee visas by the United States, or who are undocumented students in the United States, are considered for admission in a need-blind manner.

International students who did not apply for financial aid in their first year are not eligible to apply for financial aid in any subsequent years. Foreign transfer candidates applying for aid must understand that such aid is awarded on an extremely limited basis. Columbia does not give any scholarships for academic, athletic, or artistic merit.

The following listing of named scholarship funds have been generously donated by alumni, parents, and friends of Columbia College and are the cornerstone of the College's need-based and full need financial aid program. More than fifty percent of Columbia College students receive a Columbia Grant toward their demonstrated need and are eligible to receive named scholarship. The commitment of the Columbia College community enables the College to maintain an economically, ethnically, and racially diverse student body.

For more information on how to support the named scholarship program at Columbia College, please contact:

ACADEMIC REQUIREMENTS

In order to graduate from Columbia College with a Bachelor of Arts degree, all students must successfully complete the following:

- 124 points of academic credit,
- an overall GPA of 2.0 or higher,
- all the Core Curriculum courses and requirements, and
- one major or concentration.

POINTS OF CREDIT

Every student must complete 124 points of academic credit. The last two semesters must be taken while enrolled in the College for study on this campus or on one of the [Columbia-sponsored international programs](#).

Courses may not be repeated for credit. If a student takes a course for a second time for some reason, both attempts will be reflected on the student's transcript, but only the grade received for the first attempt will be awarded credit (unless the grade for the first attempt was an F), and be factored into the student's overall GPA as measured by their degree audit. Credit cannot be earned for courses taken in subjects and at the same level for which Advanced Standing credit (AP, IB, GCE, etc.) has been granted. For more information, see *Academic Regulations—Placement and Advanced Standing*.

Students also cannot receive credit for courses taken previously, at Columbia or elsewhere, in which the content has been substantially duplicated by more recent courses taken at Columbia. For example, credit cannot be earned for two first-term calculus courses, even if one is more theoretical in approach than the other; similarly, credit cannot be earned for two comparable terms of a science or foreign language even if one has a Barnard course number and the other a Columbia course number. In some courses, only partial credit may be counted toward the degree.

Courses not listed in this Bulletin as eligible for credit for Columbia College students must be approved by the appropriate person or committee in the [Berick Center for Student Advising](#), since such courses might not bear College credit (e.g., MATH UN1003 College Algebra and Analytic Geometry). Students who have questions about whether degree credit may be earned in a course should consult with their advising deans in the [Berick Center for Student Advising](#).

THE CORE CURRICULUM

The following required courses constitute the [Columbia College Core Curriculum](#) (p. 91). They include general education requirements in major disciplines and, except for Physical

Education, must be taken for a letter grade (*i.e.*, the Pass/D/Fail option may not be applied):

Literature Humanities

HUMA CC1001 - HUMA CC1002	Masterpieces of Western Literature and Philosophy I and Masterpieces of Western Literature and Philosophy II
------------------------------	--

Frontiers of Science

SCNC CC1000	FRONTIERS OF SCIENCE
-------------	----------------------

University Writing

ENGL CC1010	University Writing
-------------	--------------------

Contemporary Civilization

COCI CC1101 - COCI CC1102	Introduction To Contemporary Civilization in the West I and CONTEMP WESTRN CIVILIZATION II
------------------------------	--

Art Humanities

HUMA UN1121	MASTERPIECES OF WESTERN ART, Masterpieces of Western Art
-------------	--

Music Humanities

HUMA UN1123	Masterpieces of Western Music
-------------	-------------------------------

Science Requirement

Two courses from the list of approved courses

Global Core Requirement

Two courses from the list of approved courses

Foreign Language Requirement

Four courses and the successful completion of the intermediate II level in a single language or the equivalent
--

Physical Education

Two courses and a swimming test

Students are required to complete *Literature Humanities*, *University Writing*, and *Frontiers of Science* in the first year. Failure to complete these courses in the first year will result in the student being placed on academic probation.

Additionally, the College expects students to complete *Contemporary Civilization* in their sophomore year, and *Art Humanities* and *Music Humanities* by the end of junior year. For pedagogical reasons, the College considers *Literature Humanities* to be a pre-requisite for *Contemporary Civilization*; therefore, all Columbia College students must complete *Literature Humanities* before taking *Contemporary Civilization*. (Columbia Engineering students have been given an exception to this rule because of the structure of their curriculum.)

Courses in fulfillment of the Core Curriculum must be taken in Columbia College, with the exception of the Foreign Language Requirement, which, in some instances and as determined by the relevant academic department at Columbia, may be satisfied at Barnard College. In general, students must fulfill the Global Core and Science Requirements with courses noted on the list of approved courses and may not petition for other courses taught at Columbia or Barnard to fulfill either requirement. Students may be able to petition the Committee on the Global

Core for courses taken at a study abroad program to count toward the Global Core Requirement, after first meeting with their advising dean in the [Berick Center for Student Advising](#).

THE DEPARTMENTAL MAJOR OR CONCENTRATION

All Columbia College students must complete either a major or a concentration as described in the departmental sections of this Bulletin. The purpose of the major or concentration requirement is to give each student the experience of doing sustained and advanced work, typically including individual research, in a field of special interest. A concentration consists of intensive study in one academic program achieved by fulfilling a series of requirements; a major typically provides even more depth through additional requirements and possibly a senior capstone experience such as a thesis.

Neither the concentration nor the major is designed to produce professionally trained specialists for one profession or another, and students often pursue a career that is not dependent on the specific content of a concentration or major. Rather, a Columbia College liberal arts education - through the breadth of the Core Curriculum and the depth of the concentration or major - will provide students with the knowledge and skills that will serve them well throughout their professional and personal lives.

The choice of a concentration versus a major depends on the particular aims and needs of a student, as well as on the offerings of the particular department in which a student wishes to study. The faculty members of each academic department determine the requirements for a concentration or a major. It is the students' responsibility to ensure that they complete the concentration or major requirements that are in effect as of their sophomore year. Each department has one or more [directors of undergraduate studies \(DUS\)](#) to whom questions regarding the concentration or major should be directed.

All courses used to meet the requirements of a concentration or major, including related courses, must be taken for a letter grade—*i.e.*, the Pass/D/Fail option may not be used for such courses. Some academic departments permit an exception to this policy, allowing the first one-term course taken by the student in his or her eventual major to be taken for a mark of "Pass." Students should check with the relevant academic department for both the minimum and maximum points allowed for a concentration or a major, as well as for any restrictions on courses in which a student earns a grade of D or a mark of "Pass."

Some concentrations and majors require that certain introductory courses be completed before the start of the junior year. Students should carefully read the requirements for their proposed concentration or major and direct questions to the relevant [director of undergraduate studies \(DUS\)](#).

In the first and sophomore years, students should confer with faculty members in the department, advising deans

in the [Berick Center for Student Advising](#), and advisers in the [Center for Career Education](#) while considering their choice of concentration or major. All students declare a concentration or major in their fourth term. Information about the process for declaring a concentration or major is sent to students in the spring of the sophomore year by the [Berick Center for Student Advising](#).

Interdisciplinary and Interdepartmental Majors and Concentrations

Interdisciplinary and interdepartmental concentrations and majors combine coursework in two or more areas of study. Interdisciplinary concentrations and majors are linked to the interdisciplinary programs (see *Departments of Instruction*).

Independent majors or concentrations are not permitted for Columbia College students.

Special Concentrations

In certain cases, a program of study has been designated a "special concentration." While a special concentration may require a similar number of courses or points of credit as a departmental concentration does, a "special concentration" does not fulfill a degree requirement. Therefore, a special concentration can only be pursued as a second program of study, in addition to a concentration or major.

Double Concentrations/Majors

Most Columbia College students graduate with a single program of study — *i.e.*, one concentration or major. It is possible to declare a maximum of two programs of study — *e.g.*, two concentrations, two majors, a concentration and a major, a concentration and a special concentration, or a major and a special concentration.

Students must complete their degree requirements within eight semesters (including the terms that transfer students spent at other institutions), and students will not be awarded additional semesters for the purposes of completing an additional concentration or major.

If a student decides to pursue two programs of study, they may not both be owned by the same offering unit (department, institute, or center). For example, a student may not declare programs in Russian Language and Culture and in Slavic Studies, both of which are owned by the Department of Slavic Languages; similarly, a student may not declare programs in Mathematics and in Applied Mathematics, both of which are owned by the Department of Mathematics. All joint majors (*e.g.*, Economics-Political Science) will be considered as owned by both offering units, so that a student may not, for example, major in both Political Science and Economics-Political Science.

If a student chooses to declare two programs of study, the student can, in certain situations, apply a single course to both programs ("double-counting"). There are three conditions under

which students may apply a single course to two programs, and depending on the two programs declared, some or all of these conditions may apply:

1. If two programs both require the same coursework to teach fundamental skills needed for the field, those courses may be applied to both programs. The Committee on Instruction has defined that coursework as the following:

- (1) elementary and intermediate foreign language courses;
- (2) the calculus sequence (I through IV, or Honors A and B);
- (3) introductory courses in Statistics (STAT UN1101 or 1201);
- (4) the introductory course in computer programming (COMS W1004).

If faculty members feel that other courses should be included in this category, those courses would need to be approved for such purpose by the Committee on Instruction.

2. In addition to double-counting any fundamental courses enumerated above, a student pursuing two programs of study may apply a maximum of two classes to both programs, if applicable. Offering departments, institutes, or centers may choose to restrict the double-counting of particular courses, and such restrictions cannot be appealed.

3. In addition to those courses that can be double-counted as noted above, a maximum of two courses taken to fulfill the Global Core, Science or Foreign Language Requirements can also be counted toward the requirements of a program of study (major, concentration, special concentration), if applicable. Literature Humanities, Contemporary Civilization, Frontiers of Science, Art Humanities, Music Humanities, and University Writing may not be double-counted for any major, concentration or special concentration. Offering departments, institutes, or centers may choose to restrict the double-counting of courses taken to fulfill core requirements, and such restrictions cannot be appealed.

SUPERVISED INDEPENDENT STUDY

Supervised individual work on a special topic is available to qualified students as an alternative or as a supplement to courses and seminars in the field of specialization. Students must develop a plan of study with a faculty adviser and then obtain the approval of the department. Progress reports are submitted as required. From one to six points of credit may be awarded for this work; the exact number of points is to be determined in consultation with the department.

Approval depends on the quality of the proposal, the student's qualifications, and the availability of an appropriate faculty adviser.

REQUIREMENTS FOR TRANSFER STUDENTS

Columbia College offers transfer students the opportunity to experience a wide-ranging liberal arts education that includes its Core Curriculum and a broad range of majors and concentrations. To graduate from Columbia College, all transfer students must successfully complete the following:

- 124 points in academic credit,
- an overall GPA of 2.0 or higher,
- all Core Curriculum courses and requirements, and
- one major or concentration.

Upon admission to Columbia College, transfer students should familiarize themselves with the regulations pertaining to their special status (see *Academic Regulations—Regulations for Transfer Students*).

PLANNING AN ACADEMIC PROGRAM

When planning their academic program, all students are expected to consult with their advising deans in the Berick Center for Student Advising as well as with their departmental advisers. Advising deans in the Berick Center for Student Advising serve as the primary advisers for all general graduation requirements and monitor students' progress toward completing the Core Curriculum. Directors of Undergraduate Studies (DUS), and other faculty representatives of the academic departments, serve as the primary advisers for completing the requirements for concentrations, majors, and/or special concentrations.

Advising deans in the James H. and Christine Turk Berick Center for Student Advising (CSA), located in 403 Lerner, guide and support undergraduates at Columbia College and Columbia Engineering as they navigate their academic and co-curricular lives at Columbia University. Students are assigned an advising dean in the summer before matriculation. Productive advising is built on a partnership in which the student and the adviser work together: the spirit of an ideal advising partnership is one of mutual engagement, responsiveness, and dedication. Regular advising conversations - the fundamental building blocks of the partnership - enable an adviser to serve as a knowledgeable resource, reliable guide, and a source for referrals, so that students may make the most of all the opportunities available to them inside and outside the classroom during their time at the College. Students can make appointments with their advising deans using the online appointment system.

While students have assigned advising deans, students may make appointments with any of the advisers in the Berick Center for Student Advising. Students who wish to change assigned advising deans are encouraged to make an

appointment with Andrew Plaa, dean of advising, who can make new adviser assignments.

To ensure successful planning, students should familiarize themselves with the requirements of any academic programs in which they may be interested. In particular, students should note that some concentrations and majors require that certain introductory courses be completed before the start of the junior year. Similarly, study abroad, professional programs, and graduate schools have a range of requirements that must be successfully completed at prescribed times during the undergraduate career.

In particular, students considering a concentration or major in the sciences should focus on required introductory science courses in their first two years, in addition to Core requirements. Students considering a concentration or major in the humanities and social sciences should try to take, in their first two years, a combination of Core requirements and introductory level courses in the department(s) in which they are interested in majoring.

Under no circumstances will students be granted more than 8 semesters to complete an additional concentration or major.

In addition, all students should do the following:

1. become thoroughly familiar with the requirements for the degree and with the College regulations, including deadlines;
2. plan to complete *University Writing* (ENGL CC1010), *Frontiers of Science* (SCNC CC1000), *Masterpieces of Western Literature and Philosophy I & II* (HUMA CC1001-HUMA CC1002) during the first year, as well as *Introduction to Contemporary Civilization in the West* (COCI CC1101 -COCI CC1102) by the end of the sophomore year; and
3. choose a major or concentration in their fourth term.

Students will declare a concentration or major either through an online declaration process or by the submission of a paper declaration form to the [Berick Center for Student Advising](#), 403 Lerner. Some concentrations and majors require departmental review, and students can only declare these concentrations or majors after receiving approval by the department. A concentration or major may be changed at any time as long as the requisite departmental approval is received, the requirements have been or can be fulfilled, and students can still graduate by the end of their eighth semester. If a change of concentration or major is decided upon, a new declaration form must be filed online or in hard copy with the advising dean in the [Berick Center for Student Advising](#).

ADVISING FOR FIRST-YEAR STUDENTS

In the summer, each incoming student receives the *Academic Planning Guide for New Students*, which is designed to assist

incoming students in planning and creating their academic programs. Incoming students should read the *Academic Planning Guide for New Students* prior to their first advising appointment. Students will receive information by email about opportunities to connect with their advising deans in the summer.

Each first-year student is preregistered for *Literature Humanities* as well as for *Frontiers of Science* or *University Writing*. (First-year students are pre-registered for either *Frontiers of Science* or *University Writing* in the Fall term and take the other course in the Spring term.)

All incoming students are expected to meet with their advising deans in the [Berick Center for Student Advising](#) during the summer (in person or by phone/internet), during the New Student Orientation Program (NSOP), and/or in the first two weeks of the term (Change-of-Program period) in order to discuss their fall course selections, their transition to college, their short- and long-term goals, and to learn about other advising resources and offices available to them at Columbia.

Students are expected to stay in touch regularly with their advising deans in the [Berick Center for Student Advising](#) throughout their time at Columbia.

Approval depends on the quality of the proposal, the student's qualifications, and the availability of an appropriate faculty adviser.

CORE CURRICULUM

The Center for the Core Curriculum

202 Hamilton
212-854-2453
core-curriculum@columbia.edu

The Core Curriculum is the cornerstone of the Columbia College education. The central intellectual mission of the Core is to provide all students with wide-ranging perspectives on significant ideas and achievements in literature, philosophy, history, music, art, and science.

Contemporary Civilization began in 1919 as a course on war and peace issues, and the creation of *Literature Humanities* followed in 1937. By 1947, *Art Humanities* and *Music Humanities* had been added, and a new course in *Asian Humanities* was introduced. The Global Core requirement, formerly Major Cultures, joined the Core in 1990, and *Frontiers of Science* in 2004. Though celebrated for their content, Core Curriculum courses are equally important for their small class format. Taught in seminars of approximately twenty-two students, these courses ensure that education at Columbia begins with an emphasis on active intellectual engagement. The small class sizes provide students with opportunities to develop intellectual relationships with faculty early on in their College career and to participate in a shared process of intellectual inquiry. In the Core Curriculum, the pursuit of better questions is every bit as important as the pursuit of better answers. The skills and habits honed by the Core—careful observation, close analysis, effective argument, imaginative comparison, and respect for a variety of ideas—provide a rigorous preparation for life as an engaged citizen in today's complex and changing world.

Literature Humanities Website

HUMA CC1001-HUMA CC1002 Masterpieces of Western Literature and Philosophy II, popularly known as “Literature Humanities” or “Lit Hum,” is a year-long course that offers Columbia College students the opportunity to engage in intensive study and discussion of some of the most significant texts of Western culture. The course is not a survey, but a series of careful readings of literary works that reward both first encounters and long study. Whether classwork focuses on the importance of the text to literary history or on its significance to our contemporary culture, the goal is to consider particular conceptions of what it means to be human as well as the place of such conceptions in the development of critical thought.

The principal objectives of *Literature Humanities* are to teach students to analyze literary texts and to construct well-reasoned arguments. An interdepartmental staff of professorial and preceptorial faculty meets with groups of approximately twenty-two students for four hours a week in order to discuss texts by Claudia Rankine, Homer, Sappho, Aeschylus, Sophocles, Suzan-Lori Parks, Aristophanes, Plato, Virgil, Ovid, Augustine, Dante, Montaigne, Shakespeare, Cervantes, Milton, Austen, Dostoevsky, Woolf, and Morrison, as well as Hebrew Scriptures and New Testament writings.

REGISTRATION PROCEDURE

All information concerning registration in *HUMA CC1001-HUMA CC1002 Masterpieces of Western Literature and Philosophy II* is included in the registration materials sent to students. All first-year students are preregistered in *Literature Humanities*.

All Core Curriculum courses, including *Literature Humanities*, must be taken for a letter grade. Students may not drop or withdraw from *Literature Humanities* after the Core drop deadline, which is also the end of the Change-of-Program period (p. 6). For more information, see *Registration—Dropping Core Courses*.

COURSES OF INSTRUCTION

HUMA CC1001 Masterpieces of Western Literature and Philosophy I. 4 points.

Taught by members of the Departments of Classics; English and Comparative Literature; French; German; Italian; Middle Eastern, South Asian, and African Studies; Philosophy;

Religion; Slavic Languages; and Latin American and Iberian Cultures; as well as members of the Society of Fellows. Major works by over twenty authors, ranging in time, theme, and genre, from Homer to Virginia Woolf. Students are expected to write at least two papers, to complete two examinations each semester, and to participate actively in class discussions.

CONTEMPORARY CIVILIZATION

Chair for Contemporary Civilization

Prof. Emmanuelle M Saada

516 Philosophy

212-854-3691

es2593@columbia.edu

Contemporary Civilization Website

The central purpose of *COCI CC1101-COCI CC1102 CONTEMP WESTRN CIVILIZATION II*, also known as “*Contemporary Civilization*” or “CC”, is to introduce students to a range of issues concerning the kinds of communities—political, social, moral, and religious—that human beings construct for themselves and the values that inform and define such communities, in order to prepare students to become active and informed citizens. Founded in 1919 as a course on war and peace issues, *Contemporary Civilization* has evolved continuously while remaining a constant and essential element of the Columbia College curriculum. The course asks students to read closely texts in various traditions of argument and to construct arguments of their own, both in speech and in writing, about some of the explicit and implicit issues that these texts raise.

Both the form and the content of the course contribute to the achievement of its aims. The discussion format is intended to respond in a palpable way to the existence, in these traditions, of different and often conflicting points of view; to embody the possibility of reasoned discourse among people who hold disparate convictions; and to help students sharpen their own skills of thought and argument about matters of current personal and civic concern through participating in and extending the debates of the past. The *Contemporary Civilization* syllabus introduces students to a set of ideas and arguments that has played a formative role in the political and cultural history of our time, alerts them to ideas that have not held an influential role in that history, and acquaints them with some exemplars of critical thinking about alternative cultures, institutions, and practices.

Because *Contemporary Civilization* is a year-long course, readings are necessarily selective. While these readings change from time to time, the factors that lead to adoption of a text always include historical influence, the presentation of ideas of enduring importance, and the demonstrated ability of a text to provoke productive discussion. Among the readings currently required in the course are the Bible, *The Qur'an*, and

works by Plato, Aristotle, Augustine, Machiavelli, Descartes, Hobbes, Locke, Rousseau, Smith, Kant, Burke, Wollstonecraft, Tocqueville, Mill, Marx, Darwin, Nietzsche, DuBois, Gandhi, Arendt, Fanon, Foucault, and Patricia J. Williams.

REGISTRATION PROCEDURE

All information concerning registration in *COCI CC1101-COCI CC1102 CONTEMP WESTRN CIVILIZATION II* is included in the registration materials sent to students. Students normally take Contemporary Civilization in their second year at Columbia.

All Core Curriculum courses, including *Contemporary Civilization*, must be taken for a letter grade. Students may not drop or withdraw from *Contemporary Civilization* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 6)). For more information, see *Registration—Dropping Core Courses*.

COURSES OF INSTRUCTION

COCI CC1101 Introduction To Contemporary Civilization in the West I. 4 points.

Taught by members of the Departments of Anthropology, Classics, English and Comparative Literature, French, German, History, Middle Eastern, South Asian, and African Studies, Philosophy, Political Science, Religion, Slavic Languages, and Sociology; and members of the Society of Fellows. A study in their historical context of major contributions to the intellectual traditions that underpin contemporary civilization. Emphasis is on the history of political, social, and philosophical thought. Students are expected to write at least three papers to complete two examinations, and to participate actively in class discussions.

COCI CC1102 CONTEMP WESTRN CIVILIZATION II.

4.00 points.

Taught by members of the Departments of Anthropology, Classics, English and Comparative Literature, French, German, History, Middle East and Asian Languages and Cultures, Philosophy, Political Science, Religion, Slavic Languages, and Sociology; and members of the Society of Fellows. A study in their historical context of major contributions to the intellectual traditions that underpin contemporary civilization. Emphasis is on the history of political, social, and philosophical thought. Students are expected to write at least three papers to complete two examinations, and to participate actively in class discussions

nme2106@columbia.edu

Art Humanities Website

HUMA UN1121 MASTERPIECES OF WESTERN ART, Masterpieces of Western Art, or “*Art Humanities*”, has been a degree requirement for all College students and an integral part of the Core Curriculum since 1947. It teaches students how to look at, think about, and engage in critical discussion of the visual arts. It is not a historical survey, but an analytical study of a limited number of monuments and artists. The course focuses on the formal structure of works of architecture, sculpture, painting, and other media, as well as the historical contexts in which these works were made and understood. Among the topics on the syllabus are the Parthenon, Amiens Cathedral, and works by Raphael, Sophonisba, Michelangelo, Bernini, Luisa Roldán, Rembrandt, Clara Peeters, David, Angelika Kauffman, Goya, Monet, Manet, Cassatt, Morisot, Picasso, Bearden, Wright, Le Corbusier, Warhol, Basquiat, and Cindy Sherman. In addition to discussion-based class meetings, all sections of Art Humanities make extensive use of the vast resources of New York City through field trips to museums, buildings, and monuments.

REGISTRATION PROCEDURE

All information concerning registration in HUMA UN1121 MASTERPIECES OF WESTERN ART, Masterpieces of Western Art is included in the registration materials sent to students. It is the expectation of the College that all students complete *Art Humanities* by the end of their third year.

All Core Curriculum courses, including *Art Humanities*, must be taken for a letter grade. Students may not drop or withdraw

from *Art Humanities* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 6)). For more information, see *Registration—Dropping Core Courses*.

COURSES OF INSTRUCTION

HUMA UN1121 MASTERPIECES OF WESTERN ART, Masterpieces of Western Art. 3.00, 3 points.

Discussion and analysis of the artistic qualities and significance of selected works of painting, sculpture, and architecture from the Parthenon in Athens to works of the 20th century.

MUSIC HUMANITIES

Chair of Music Humanities

Prof. Elaine Sisman
604 Dodge Hall
212-854-7728

es53@columbia.edu (gg2024@columbia.edu)

Music Humanities Website

The focus of Music Humanities is on the many forms of the Western musical imagination in art music, through works studied in their historical and cultural contexts. The specific goals of the course are to awaken and encourage active, critical, and comparative listening practices, to provide tools to

respond verbally to a variety of musical idioms, and to create engagement with the debates about the character and purposes of music that have occupied composers and musical thinkers since ancient times. The extraordinary richness of musical life in New York is an integral part of the course.

The course moves chronologically from the Middle Ages to the present, examining the choices and assumptions of composers, their patrons, audiences, and performers, and exploring what we can and can't know about how music of the past may have sounded. Students' critical perceptions and articulate responses to the music, and to the source readings that are a hallmark of the Core, will be a vital part of the class.

REGISTRATION PROCEDURE

All information concerning registration in HUMA UN1123 Masterpieces of Western Music is included in the registration materials sent to students. It is the expectation of the College that all students complete *Music Humanities* by the end of their third year.

All Core Curriculum courses, including *Music Humanities*, must be taken for a letter grade. Students may not drop or withdraw from *Music Humanities* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 6)). For more information, see *Registration—Dropping Core Courses*.

COURSES OF INSTRUCTION

HUMA UN1123 Masterpieces of Western Music. 3 points.

Analysis and discussion of representative works from the Middle Ages to the present.

EXEMPTION FROM MUSIC HUMANITIES

Although all Columbia students are expected to take *Music Humanities*, there are some students who enter with exceptional musical backgrounds that may qualify them for exemption. Exemption from *Music Humanities* may be obtained by passing an Exemption Exam. In the case of transfer students, exemption may also be obtained by filing a course substitution request.

Exemption Exam

The Exemption Exam is offered on the first Friday of the fall semester by the Music Department (621 Dodge Hall). Students who matriculate in the spring semester should take the exam in the following fall term. Students may take the exam only once during their first year at Columbia. If they do not pass the exam, they must enroll in a section of *Music Humanities*.

Course Substitution

In addition to the Exemption Exam, students with approved transfer credit have the option of requesting exemption on the basis of a similar music course passed with a grade of B or higher at another college or university. This exemption must be requested during the student's first semester at Columbia. Petitions submitted in subsequent semesters will not be considered by the Center for the Core Curriculum.

FRONTIERS OF SCIENCE

Chair of Frontiers of Science

Prof. David J. Helfand

1020 Pupin Hall

212-854-6876

djh@astro.columbia.edu

Frontiers of Science Website

SCNC CC1000 FRONTIERS OF SCIENCE and *SCNC CC1100 FRONTIERS OF SCIENCE-DISC* is a one-semester course that integrates modern science into the Core Curriculum. The course includes lectures and seminar sections. On Mondays throughout the semester, each of Columbia's leading scientists present a mini-series of lectures. During the rest of the week, senior faculty and Columbia post-doctoral science fellows (research scientists selected for their teaching abilities) lead seminar sections limited to twenty-two students to discuss the lecture and its associated readings, and to debate the implications of the most recent scientific discoveries. *Frontiers of Science* satisfies one of the three required courses of the science requirement for Columbia College.

REGISTRATION PROCEDURE

All information concerning registration in *SCNC CC1000 FRONTIERS OF SCIENCE* is included in the registration materials sent to students. All first-year students are preregistered in *Frontiers of Science*. Prospective science majors may petition the Committee on Science Instruction to be allowed to postpone taking *Frontiers of Science* until their sophomore year, if they are enrolled in the following courses during their first-year in the College:

1. Literature Humanities (HUMA CC1001);
2. A mathematics course;
3. A language course at the elementary II level or above;
4. One of the following science major sequences:

CHEM UN2045	INTENSIVE ORGANIC
- CHEM UN2046	CHEMISTRY
	and Intensive Organic
	Chemistry II (Lecture) (formerly
	CHEM W3045-CHEM W3046)

PHYS UN1601	Physics, I: Mechanics and
- PHYS UN1602	Relativity
	and Physics, II:
	Thermodynamics, Electricity,
	and Magnetism

PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

Students wishing to petition to postpone should do so in the Berick Center for Student Advising located in 403 Lerner.

All Core Curriculum courses, including *Frontiers of Science*, must be taken for a letter grade. Students may not

drop or withdraw from *Frontiers of Science* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 6)). For more information, see *Registration—Dropping Core Courses*.

COURSES OF INSTRUCTION

SCNC CC1000 FRONTIERS OF SCIENCE. 4.00 points.

Corequisites: SCNC CC1100

Corequisites: SCNC CC1100 The principal objectives of Frontiers of Science are to engage students in the process of discovery by exploring topics at the forefront of science and to inculcate or reinforce the specific habits of mind that inform a scientific perspective on the world. Sample topics include the brain and behavior, global climate change, relativity, and biodiversity, among others. Taught by members of natural science departments and Columbia Science Fellows

Undergraduate Writing Website

ENGL CC1010 University Writing is designed to help undergraduates read and write essays in order to participate in the academic conversations that form Columbia's intellectual community. The course gives special attention to close reading, rhetorical analysis, research, collaboration, and substantive revision. By writing multiple drafts of essays typically ranging from three to ten pages, students will learn that writing is a process of forming and refining their ideas and their prose. Rather than approaching writing as an innate talent, the course teaches writing as a skill that can be practiced and developed. Each section of University Writing has a theme. None presume that students will arrive with any background in that area.

COURSES OF INSTRUCTION

ENGL CC1010 University Writing. 3 points.

University Writing helps undergraduates engage in the conversations that form our intellectual community. By reading and writing about scholarly and popular essays, students learn that writing is a process of continual refinement of ideas. Rather than approaching writing as an innate talent, this course teaches writing as a learned skill. We give special attention to textual analysis, research, and revision practices. *University Writing* offers the following themed sections, all of which welcome students with no prior experience studying the theme. Students interested in a particular theme should register for the section within the specified range of section numbers. *UW: Contemporary Essays (sections below 100)*. Features contemporary essays from a variety of fields. *UW: Readings in American Studies (sections in the 100s)*. Features essays that explore the culture, history, and politics that form American identity. *UW: Readings in Women's and Gender Studies (sections in the 200s)*. Features essays that examine relationships among sex, gender, sexuality, race, class, and other forms of identity. *UW: Readings in Sustainable Development (sections in the 300s)*. Features essays that ask how we can develop global communities that meet people's needs now without diminishing the ability of people in the future to do the same. *UW: Readings in Human Rights (sections in the 400s)*. Features essays that investigate the ethics of belonging to a community and issues of personhood, identity, representation, and action. *UW: Readings in Data Sciences (sections in the 500s)*. Features essays that study how our data-saturated society challenges conceptions of cognition, autonomy, identity, and privacy. *University Writing for International Students (sections in the 900s)*. Open only to international students, these sections emphasize the transition to American academic writing cultures through the study of contemporary essays from a variety of fields. For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>.

WRITING CENTER

The Undergraduate Writing Program sponsors The Writing Center in 310 Philosophy, which offers individual writing instruction and consultations to undergraduate and graduate students enrolled in Columbia University courses. Students may visit the center to work on any writing project, academic or non-academic, and at any stage in the writing process. Students

may use the Writing Center's online scheduling system to make appointments and view drop-in hours.

FOREIGN LANGUAGE REQUIREMENT

General Information:

Academic Affairs
202 Hamilton
212-851-9814
cc-academic@columbia.edu

The Foreign Language Requirement Website

The foreign language requirement forms part of Columbia College's mission to prepare students to be tomorrow's conscientious and informed citizens. Knowledge of another's language and literature is the most important way to begin to know a country and people. The study of a foreign language:

1. Introduces students to world cultures, also making them aware of their own culture within that context;
2. Informs students of the differences in structure, grammar, and syntax that distinguish languages from each other, and clarifies the intimate links between language and cultural meaning;
3. Contributes to the development of students' critical, analytical, and writing skills.

The requirement may be satisfied in one of the following ways:

1. Satisfactory completion of the second term of an intermediate language sequence.
2. Demonstration of an equivalent competence through the appropriate score on the SAT II Subject Test or Advanced Placement Tests.
3. Demonstration of an equivalent competence through the College's own placement tests (consult the department through which the language is offered).
4. The successful completion of an advanced level foreign language or literature course that requires 2102 or the equivalent as a prerequisite. This course must be taken for a letter grade.
5. Students whose native language is not English are not required to take an additional foreign language or an achievement test if they have completed the secondary school requirement in the native language.

Because success in learning a foreign language is dependent on the full engagement of the students enrolled in a language course, all terms of language instruction/conversation courses, whether being used toward fulfillment of the foreign language requirement or not, must be taken in order and for a letter grade. These courses may not be taken for a grade of Pass/D/Fail.

Students wishing to satisfy the requirement in any other language should consult with their advising dean. In some instances, equivalent language courses offered at Barnard College and in the School of General Studies may be used to satisfy the requirement, however, students should speak with the Columbia department to ensure that courses from these schools are approved for the requirement.

Any student who wishes to submit a language course taken at another institution in fulfillment of the language requirement must pass a departmental placement examination.

In order to ensure that students achieve foreign-language proficiency without a significant break in progress, this requirement must be completed before a student can be eligible to study abroad, even if the language of instruction of the study-abroad program is English. For students seeking to study abroad in other languages, more advanced foreign-language study is usually required (see *Special Programs*).

The following languages are offered in the College toward satisfaction of the requirement:

- **Akkadian**
Language Resource Center
- **Arabic**
Middle Eastern, South Asian, and African Studies
- **Armenian**
Middle Eastern, South Asian, and African Studies

cc-academic@columbia.edu

Global Core Requirement Website

The Global Core requirement asks students to engage directly with the variety of civilizations and the diversity of traditions that, along with the West, have formed the world and continue to interact in it today. Courses in the Global Core typically explore the cultures of Africa, Asia, the Americas, and the Middle East in an historical context. These courses are organized around a set of primary materials produced in these traditions and may draw from texts or other forms of media, as well as from oral sources or performance, broadly defined.

Global Core courses fall into two categories, and can be, on occasion, a hybrid of the two types: those with a comparative, multidisciplinary, or interdisciplinary focus on specific cultures or civilizations, tracing their existence across a significant span of time, and may include Europe and/or the U.S.; and those that address a common theme or set of analytic questions comparatively (and may include Europe and the U.S.). The Global Core requirement consists of courses that examine areas not the primary focus of Literature Humanities and Contemporary Civilization and that, like other Core courses, are broadly introductory, interdisciplinary, and temporally and/or spatially expansive.

Students must complete two courses from the approved list of Global Core courses for a letter grade.

SUMMER 2021 APPROVED COURSES

As Summer 2021 schedules become available, more courses will be added to this list. Please check back for additional updates. Last updated on March 8, 2021.

THTR UN3154 Theatre Traditions in a Global Context (formerly THTR UN3000)

Urban Studies

URBS UN3351 URBAN ELSEWHERE: EXPLORING A WORLD OF CITIES (Effective beginning Spring 2021)

ALL APPROVED COURSES: OFFERED ABROAD

Not all courses are taught each academic year. Below is the full list of all courses offered abroad through Columbia-sponsored programs that are approved for the Global Core Requirement, regardless of semester offered. For more information, consult the [Office of Global Programs](#). Last updated on December 17, 2020.

Center for the Study of Ethnicity and Race

CSER OC3928 Colonization/Decolonization (Effective beginning Summer 2017; taught in Mexico City)

Columbia in Amman and Paris: Middle Eastern and North African Studies (MENA) Program

MENA OC4100 Migration, Displacement and Diaspora in the French and North African Context (taught in Paris, effective beginning Summer 2017) (formerly Maghreb-Mashrek: East and West)

Columbia in Amman and Tunis: Middle Eastern and North African Studies

MENA OC4101 Culture/ History Seminar of the Middle East- North Africa Summer Program in Amman & Tunis (Effective beginning Summer 2019)

Columbia Global Seminar in Istanbul

Not offered during the Spring 2018 semester

CLGM OC3920 The World Responds to the Greeks: Modernity, Postmodernity, Globality (Effective beginning Spring 2015; taught in Istanbul)

Columbia in London- Queen Mary University

CLEN OC3500 LONDON IN POSTCOLONIAL FICTION: 'WE ARE HERE BECAUSE YOU WERE THERE' ((Effective beginning Fall 2018))

Latin American and Caribbean Studies (Global Scholars Program)

LCRS OC3501 Latin American Cities (Effective beginning Summer 2017)

Columbia Summer Program in Tunis and Istanbul: Democracy and Constitutional Engineering

Not offered during the Spring 2018 semester

POLS OC3545 Comparative Democratic Processes (Effective beginning Summer 2015; taught in Istanbul)

Slavic Languages - Office of Global Programs

Not offered during the Spring 2018 semester

CLSL OC4001 The Muslim and the Christian in Balkan Narratives ((Effective beginning Summer 2016; taught in Istanbul))

Reid Hall in Paris

AHIS OC4652 The Black Voices of Black Model: New Perspectives for the Histories of Art (Effective beginning Summer 2019)

CLEN OC3245 Black Americans and the City of Light: A Seminar (effective Summer 2020)

FILM OC4225 Arab & African Filmmaking (Effective beginning Summer 2019)

FREN OC3719 Violence by and against Women (Effective beginning Spring 2019)

FREN OC3817 Black Paris (Effective Spring 2017; taught in Paris)

CLFR OC3821 CITY DIPLOMACY (Effective beginning Spring 2021)

FREN OC3821 "Blackness" in French: from Harlem to Paris and Beyond ((Effective beginning Summer 2018))

WMST OC3550 WOMEN # SOCIETY - SEX-TRADE ECONOMY (Effective Spring 2016, will not be offered Spring 2018; taught in Paris)

SCIENCE REQUIREMENT

General Information:

Academic Affairs
202 Hamilton
212-851-9814
cc-academic@columbia.edu

Science Requirement Website

The objective of the science component of Columbia College's Core Curriculum is identical to that of its humanities and social science counterparts, namely to help students "to understand the civilization of their own day and to participate effectively in it." The science component is intended specifically to provide students with the opportunity to learn what kinds of questions are asked about nature, how hypotheses are tested against experimental or observational evidence, how results of tests are evaluated, and what knowledge has been accumulated about the workings of the natural world.

Three courses bearing at least 3 points each (for a total of at least 10 points) must be completed to meet this portion of the Core Curriculum. All courses used to satisfy the science requirement must be taken for a letter grade.

Students normally take *SCNC CC1000 FRONTIERS OF SCIENCE* in their first year in the term in which they are not taking *ENGL CC1010 University Writing*.

For the remainder of the requirement, students may choose any two courses from the list of approved courses below. These courses may be taken in the same department or in different departments. However, at least one course must be taken in the Departments of Astronomy; Biological Sciences; Chemistry; Earth and Environmental Sciences; Ecology, Evolution, and Environmental Biology; Physics; or Psychology.

Students who wish to request an exception to these policies must petition the Committee on Science Instruction (202 Hamilton) **prior** to their final term at the College.

GUIDELINES FOR COURSES APPROVED FOR THE SCIENCE REQUIREMENT

Unless otherwise indicated, students may not use Barnard College courses to fulfill the Columbia College science requirement.

Students who wish to have a course not included on the lists below count toward fulfilling the science requirement must petition the Committee on Science Instruction (202 Hamilton) **prior** to registration for the term in which they intend to take the course.

Students should pay careful attention to the prerequisites and instructor approvals required for certain courses. Prerequisite and instructor approval requirements can be found in the course descriptions for each course located in specific departments' sections of this bulletin.

While students are not required to complete a two-term sequence, students may choose to do so. For this reason, the Committee on Science Instruction has indicated recommended sequences below. Unless otherwise noted, the first course in the sequence must be taken before the second course in the sequence.

COURSES DESIGNED FOR NONSCIENCE MAJORS

Astronomy

ASTR UN1234	The Universal Timekeeper: Reconstructing History Atom by Atom
ASTR UN1403	Earth, Moon and Planets (Lecture)
ASTR UN1404	STARS, GALAXIES # COSMOLOGY
ASTR UN1420	Galaxies and Cosmology
ASTR UN1404 - ASTR BC1753	STARS, GALAXIES # COSMOLOGY and LIFE IN THE UNIVERSE
ASTR UN1453	Another Earth
ASTR UN1610	THEOR-UNIVERS:BABYLON-BIG BANG
ASTR BC1753	LIFE IN THE UNIVERSE
ASTR BC1754	Stars, Galaxies, and Cosmology
ASTR UN1836	Stars and Atoms

Recommended Sequences:

ASTR UN1403 - ASTR UN1404	Earth, Moon and Planets (Lecture) and STARS, GALAXIES # COSMOLOGY
ASTR UN1403 - ASTR UN1420	Earth, Moon and Planets (Lecture) and Galaxies and Cosmology
ASTR UN1403 - ASTR UN1836	Earth, Moon and Planets (Lecture) and Stars and Atoms

ASTR BC1753 - ASTR UN1404	LIFE IN THE UNIVERSE and STARS, GALAXIES # COSMOLOGY
------------------------------	--

ASTR BC1753 - ASTR BC1754	LIFE IN THE UNIVERSE and Stars, Galaxies, and Cosmology
------------------------------	---

Biology

BIOL UN1002	Theory and Practice of Science: Biology
-------------	--

BIOL UN1130	Genes and Development
-------------	-----------------------

Computer Science

COMS W1001	Introduction to Information Science
------------	--

COMS W1002	Computing in Context
------------	----------------------

Earth and Environmental Engineering

EAEE E2100	A better planet by design
------------	---------------------------

Earth and Environmental Sciences

EESC UN1001	Dinosaurs and the History of Life: Lectures and Lab <small>students will only receive credit for one of these courses: 1001, 1004, 1401</small>
-------------	--

EESC UN1003	Climate and Society: Case Studies
-------------	-----------------------------------

EESC S1004	Dinosaurs and the History of Life <small>students will only receive credit for one of these courses: 1001, 1004, 1401</small>
------------	--

EESC UN1011	Earth: Origin, Evolution, Processes, Future <small>students will only receive credit for one of these courses: 1011, 1411</small>
-------------	--

EESC UN1030	OCEANOGRAPHY
-------------	--------------

EESC UN1053	Planet Earth
-------------	--------------

EESC UN1201	Environmental Risks and Disasters
-------------	-----------------------------------

EESC UN1401	Dinosaurs and the History of Life: Lectures <small>students will only receive credit for one of these courses: 1001, 1004, 1401</small>
-------------	--

EESC UN1411	Earth: Origin, Evolution, Processes, Future: Lectures <small>students will only receive credit for one of these courses: 1011, 1411</small>
-------------	--

EESC UN1600	Earth Resources and Sustainable Development
-------------	--

Ecology, Evolution, and Environmental Biology

EEEB UN1001	Biodiversity
-------------	--------------

EEEB UN1011	Behavioral Biology of the Living Primates
-------------	--

EEEB UN1010	Human Origins and Evolution
-------------	-----------------------------

EEEB S1115Q	The Life Aquatic
-------------	------------------

Recommended Sequences:

EEEB UN1001 - EEEB UN3087	Biodiversity and Conservation Biology (see Additional Courses Approved for the Sequence Requirement)
------------------------------	---

EEEB UN1010 - EEEB UN1011	Human Origins and Evolution and Behavioral Biology of the Living Primates
------------------------------	---

Electrical Engineering

ELEN E1101	The digital information age
------------	-----------------------------

Food Studies

FSEB UN1020	Food and the Body (This course is offered through the Ecology, Evolution, and Environmental Biology Department)
-------------	--

FSPH UN1100	FOOD, PUBLIC HEALTH & PUBLIC POLICY

ADDITIONAL COURSES APPROVED FOR THE SCIENCE REQUIREMENT

Most of the following courses have required prerequisites and/or require instructor approval. Prerequisite and instructor approval requirements can be found in the course descriptions for each course located in specific departments' sections of the on-line bulletin.

Unless otherwise indicated, students may not use Barnard College courses to fulfill the Columbia College science requirement.

Astronomy

Any 3-point ASTR course numbered 2000 or higher

Biology

Any 3-point BIOL course numbered 2000 or higher

Chemistry

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
CHEM UN1404	General Chemistry II (Lecture)
CHEM UN1500	General Chemistry Laboratory
CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN1507	Intensive General Chemistry Laboratory
Any CHEM course numbered 3000 or higher	

Computer Science

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
ENGI E1006	Introduction to Computing for Engineers and Applied Scientists (Effective beginning Spring 2017)
COMS W1007	Honors Introduction to Computer Science
Any 3-point COMS course numbered 3000 or higher	

Earth and Environmental Sciences

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT
Any EESC course numbered 3000 or higher	

Ecology, Evolution, and Environmental Biology

EEEB UN2001	Environmental Biology I: Elements to Organisms
EEEB UN2002	Environmental Biology II: Organisms to the Biosphere
EEEB UN3087	Conservation Biology
Any EEEB course numbered 3000 or higher except 4321 and 4700	

History - Applied Math HSAM

HSAM UN2901	Data: Past, Present, and Future (Effective beginning Spring 2018)
-------------	---

Mathematics

Any 3-point MATH course numbered 1100 or higher	
CSPH GU4801	MATH LOGIC:COMPLETENESS RESULT
CSPH GU4802	Math Logic II: Incompleteness

Physics

PHYS UN1201	General Physics I
PHYS UN1202	General Physics II
PHYS UN1401	Introduction To Mechanics and Thermodynamics
PHYS UN1402	INTRO ELEC/MAGNETISM # OPTCS

PHYS UN1403	Introduction to Classical and Quantum Waves
PHYS UN1601	Physics, I: Mechanics and Relativity
PHYS UN1602	Physics, II: Thermodynamics, Electricity, and Magnetism
Any 3-point PHYS course numbered 2000 or higher	

Psychology

With prior departmental approval, 3- and 4-point courses numbered in the 22xx, 24xx, 32xx, 34xx, 42xx, and 44xx, as well as some additional courses, may partially fulfill the Science Requirement.

Statistics

Any 3-point STAT course except STAT 3997

SPECIAL SUMMER PROGRAM

The following special program fulfills two of the three terms of the science requirement.

Earth Institute Center for Environmental Sustainability EICES

Summer Ecosystem Experiences for Undergraduates (SEE-U). Locations change yearly and there is rolling admissions.
*

* Please check with EICES for details: <http://eices.columbia.edu/education-training/see-u/>

SUMMER SESSION COURSES

Students who wish to take summer courses may do so through the Summer Session offered by the School of Continuing Education. For policies regarding summer study, see the [Academic Regulations—Summer Study](#) section of this Bulletin. For a list of summer courses approved for the science requirement, students should consult the annually updated [List of Approved Summer Courses](#).

PHYSICAL EDUCATION REQUIREMENT**General Information**

Physical Education Department
Dodge Physical Fitness Center
212-854-3439

[Physical Education Website](#)

Successful completion of two physical education courses is required for the degree. All students are also required to pass a swim test or take beginning swimming for one term to fulfill the swim requirement. A waiver of the swim test requirement may be granted if a student has a disability certified by Columbia Health that precludes swimming. Students may also request waivers and accommodations on the grounds of religious observance or gender identity/expression. All requests

for waivers and accommodations are reviewed by the director of physical education.

Students may not register for more than one section of physical education each term.

To pass the course, students must fulfill the attendance and participation requirements outlined by each section and available on the physical education website. **Students who are absent more than the permissible number of times are given a mark of W (Withdrawal), unless they complete and file a drop form by the official deadline to drop a course.**

No more than 4 points of physical education courses may be counted toward the degree. One course of the physical education requirement may be a Barnard Physical Education course. Two courses of the physical education requirement may be a Barnard Dance/ Studio Technique course.

A student who intends to participate in an intercollegiate sport should register for the appropriate section of PHED UN1005 Intercollegiate Athletics. Intercollegiate athletes who attend regularly receive 1 point of credit up to a maximum of 4. Student athletes who leave the team in mid-term but still wish to receive academic credit must notify the Physical Education Office and be placed in another physical education course to complete the attendance requirement. Student athletes are also responsible for fulfilling the swim requirement.

ELIGIBILITY FOR INTERCOLLEGIATE ATHLETICS

Any student in the College who is pursuing the undergraduate program or a combined program toward a first degree is eligible for intercollegiate athletics. To be eligible for athletic activities, the student must make appropriate progress toward the degree as defined by the NCAA, the Ivy League, and Columbia University. These criteria are monitored by the Center for Student Advising and certified by the Office of the Registrar.

Questions about athletic eligibility should be referred to the appropriate advising dean or the compliance office in the Department of Intercollegiate Athletics and Physical Education.

For more information, visit www.gocolumbiaions.com.

ACADEMIC REGULATIONS

POINTS PER TERM

A full-time courseload for a Columbia College student is defined as an academic program carrying 12-18 points per semester. The average load for a Columbia College student is 15–16 points per term.

All Columbia College students are expected to be full-time students and must therefore be registered for a minimum of 12 points of credit per term. Students may not enroll in more than 18 points of credit unless they petition and receive permission to do so. First-year students and new transfer students may not petition to register for more than 18 points in their first semester.

Columbia College students are not permitted to enroll as part-time students, and any student who has not registered for at least 12 points of credit by the end of the [Change of Program period](#) may be withdrawn from Columbia College. Students in their final term who need fewer than 12 points of credit to complete their degree requirements may petition the Committee on Academic Standing to register for fewer than 12 points and should consult with their advising deans in the [Berick Center for Student Advising](#). If they are approved to take fewer than 12 points of credit, they will still be considered full-time students of Columbia College and be responsible for all relevant tuition and fees.

ATTENDANCE

Students are expected to attend all class meetings, laboratory periods and other required events for each course in which they are registered. Instructors may take attendance into account in assessing a student's performance, and if students accumulate multiple absences, it is possible that they may not pass a course that has certain attendance requirements. Students are accountable for absences that result from enrolling a course after the semester begins. For related information about attendance, see [Columbia University Policies—Religious Holidays](#).

LENGTH OF CANDIDACY

Students are normally permitted eight Fall and Spring semesters in which to earn the Bachelor of Arts (B.A.) degree at Columbia College. Students may continue to work for the degree past the eighth semester only with permission from the Committee on Academic Standing, after first discussing such requests with their advising deans in the [Berick Center for Student Advising](#). Study beyond the eighth term is only granted for students who have found themselves in emergent circumstances beyond their control which have prevented

them from completing the degree in eight terms. Study beyond the eighth term is not granted for the purposes of changing or adding a major or concentration.

REGULATIONS FOR TRANSFER STUDENTS

Regulations on Transfer Credit

In order to receive the Columbia College degree, transfer students must complete a minimum of 60 points while enrolled in the College (including credits earned on Columbia-sponsored study abroad programs). Transfer students may apply a maximum of 64 points taken elsewhere toward advanced standing at the College. Credit granted on the basis of Advanced Placement, International Baccalaureate and other standardized examinations is counted toward the 64-point maximum, as are credits earned on study-abroad programs outside of Columbia. Credit is not granted for college courses taken while in high school.

Credit Toward the Degree and Core/Major Requirements

Transfer students receive credit for non-Columbia courses that are substantially similar to Columbia College courses only when the grades received are C- or better. Transfer students must supply course descriptions and syllabi for all courses to be considered for transfer credit. Once a transfer student is admitted, a credit review is conducted by the [Berick Center for Student Advising](#) and a tentative credit evaluation is sent to the student. A final credit evaluation is conducted once the student has matriculated at Columbia College and has submitted a final official transcript for coursework taken elsewhere, as well as course descriptions and syllabi, to their advising deans in the [Berick Center for Student Advising](#), where all appropriate approvals will be coordinated with the relevant academic departments.

Degree Completion

Transfer students are expected to graduate in eight Fall and Spring semesters, including terms completed before entering Columbia. Transfer students cannot petition for extended time to complete the degree. Study beyond the eighth term is not granted for the purposes of changing or adding a major or concentration. Therefore, transfer students should be especially careful when planning their academic schedules and are strongly urged to do so with the guidance of their advising deans in the [Berick Center for Student Advising](#) and the relevant departmental [directors of undergraduate studies](#).

Some majors may be difficult for transfer students to complete due to the number of credits required, the specific course sequencing, and the number of terms remaining for transfer students to complete all Core and major requirements. There is no guarantee that a transfer student can complete every major and concentration offered, and all transfer students must declare

a major or concentration that they are capable of completing in the time available to them while at Columbia College.

PROGRESS TOWARD THE DEGREE

At the end of each Fall and Spring semester, the Committee on Academic Standing reviews the records of all students enrolled in Columbia College to determine student standing, and to determine whether academic action is warranted—including academic warning, academic probation, suspension and dismissal.

Academic Probation

Students may be placed on academic probation for the following reasons: completing fewer than the required minimum of 12 points of credit in a term; earning a term or cumulative grade point average below 2.0; failing a Core Curriculum class; failing to complete Literature Humanities, University Writing, or Frontiers of Science in their first year, or failing to make satisfactory progress toward the degree (i.e., taking less than an average of 15.5 points per term).

Students who do not make adequate progress toward the degree will be placed on academic probation. Adequate progress toward the degree is defined according to cumulative earned credits, as noted in the following chart:

Semester	Points for typical progress	Threshold for academic probation
1	12	<12
2	31	<24
3	46	<38
4	62	<52
5	77	<70
6	93	<88
7	108	<106
8	124	

Students are expected to complete their degrees in eight semesters. Students who fall short of the number of credits listed in the column titled “Threshold for Academic Probation” above will be placed on academic probation. The advising deans in the [Berick Center for Student Advising](#) offer support to help students on academic action return to good standing.

Students and parents/guardians are notified when students are placed on academic probation or suspension. The advising deans in the [Berick Center for Student Advising](#) are available to provide support to help students on academic action return to good standing.

Students may not appeal the actions of academic warning or academic probation. The action of academic warning does not remain on a student’s record. The action of academic probation

remains on a student’s record for internal use only. The status of Academic Probation is not noted on students’ transcripts.

Students who are on academic probation are not eligible to study abroad.

Academic Suspension/Dismissal

Students who fail to improve after being on academic probation, as well as students with extremely poor records during a single term, may be suspended and required to withdraw from Columbia College for at least one year. Conditions for readmission are specified at the time of suspension. If a student is readmitted after having been suspended and again fails to achieve satisfactory grades or to make normal progress toward the degree, the student may be dismissed from the College.

Students are notified by email and express mail of the actions of suspension or dismissal, and they will have a limited time in which to appeal the decision. The decision of the appeals committee is final.

The actions of academic suspension or academic dismissal remain on students’ records and are recorded on the students’ transcripts. Parents and/or guardians are notified when students are suspended or dismissed for academic reasons.

International students with F-1 or J-1 status are not allowed to remain in the United States while suspended or dismissed from the University. Any international student who is dismissed or suspended should immediately contact the [International Students and Scholars Office \(ISSO\)](#) to discuss available options.

EXAMINATIONS

Midterm Examinations

Midterm examinations are scheduled by each instructor, based on the pedagogical structure of a course. Therefore, while many midterm exams may be scheduled around the mid-point of a term (e.g., late October or mid-March), midterm exams may also fall earlier or later in the term, and a course may require multiple exams during the course of the semester. Students should pay attention to the syllabus of each course in which they are registered for the schedule of required midterm exams.

Final Examinations

Final examinations are given at the end of each term.

The definitive schedule of final examinations is usually available in early November for the Fall term and early April for the Spring term. Exams are scheduled according to a University-wide [Final Exam Schedule](#) available shortly after midterms. Prior to its availability, students and faculty should consult the [Projected Exam Schedule](#). Students may access their individual exam schedule in SSOL by clicking on “Schedule,” then “My Exam Schedule.”

Students who have trouble locating a class on either list should contact the instructor to make sure the class has an exam.

Rescheduling Exams

Examinations are not rescheduled in order to accommodate students' travel plans. Students should not make travel plans for holidays or breaks until they are certain that they will be present for all required exams.

Under certain rare circumstances, it may be necessary for an instructor to reschedule a final exam. Any day or time changed to the Master University Examination Schedule final exam times must be agreed upon with members of the class. All students unable to take the exam at the new agreed-upon time must be given a make-up exam at a time that they are able to attend.

Student Examination Conflicts

Students may request a change of schedule for a final exam under either of the following two circumstances:

1. if a student is enrolled in two or more classes whose final exams are scheduled by the Master University Examination Schedule to be held at the same time;
2. if a student has three exams scheduled on any given calendar day (*i.e.*, between 9:00 a.m. and 10:00 p.m. on the same calendar date).

Students in either circumstance should meet with their advising deans in the [Berick Center for Student Advising](#) ***no later than two weeks after the final exam schedule is published*** in order to initiate the process for arranging a make-up exam.

Failure to Complete a Final Exam

If a student does not take a final exam, or begins but does not complete a final exam, a grade of zero or F may be factored for that portion of the final grade. Make-up examinations are not guaranteed for any student who does not take or does not finish a final exam.

Incompletes

Students facing grave medical, personal, or family emergencies at the time of a final exam may petition the Committee on Academic Standing for permission to complete the final exam or paper at a later date. Students will receive a temporary mark of IN (Incomplete) until the work is completed. For more information, see the [Grades](#) section of this Bulletin.

GRADES

Columbia College uses the following system of grading: A, excellent; B, good; C, fair; D, poor but passing; F, failure (a final grade, not subject to reexamination). The grades of A, B, and C may be modified by a plus or minus. Pass (P) is awarded when students receive a C- or higher in a course which they

have elected to take on a Pass/D/Fail basis, or when they have passed a course that is offered only on a Pass/Fail basis.

The Committee on Instruction of Columbia College has instructed the Registrar to calculate a cumulative grade point average for external purposes, such as official transcripts. The Registrar also calculates term and cumulative grade point averages for internal purposes, such as determining eligibility for the Dean's List.

When the Registrar computes a student's Columbia College grade point average, only grades earned while enrolled in Columbia College in the Fall and Spring terms (including Columbia-owned study abroad programs), and in the Columbia School of Professional Studies in the Summer Sessions, are counted. Courses are weighted according to the number of credits.

The following scale is used:

Grade	GPA Equivalent
A+	4.33
A	4.0
A-	3.67
B+	3.33
B	3.0
B-	2.67
C+	2.33
C	2.0
C-	1.67
D	1.0
F	0

The Pass/D/Fail Option

The purposes of the Pass/D/Fail option are to encourage students to take courses of interest to them outside of their field of specialization and to permit those who have not decided upon a major to test their talents in a particular field that may be of interest. Instructors are not informed if a student in their classes elect to use the Pass/D/Fail option.

In recognition of the challenges of the exceptional 2020-2021 academic year, the CC-GS Committee on Instruction (COI) has approved some temporary modifications to certain academic policies: Students will be able to elect the Pass/D/Fail option for one class in Fall 2020 and one class in Spring 2021 without restriction — *i.e.*, the course chosen for this grading option can fulfill a requirement for the Core Curriculum; a requirement for a major, concentration, or special concentration; or an elective.

For the 2020-2021 academic year, the deadline for declaring the Pass/D/Fail option for a course will be extended to the last day of classes for the term: December 14 for Fall courses; February 22 for Spring A courses; April 15 for full Spring and Spring B courses.

In order to encourage students to engage more fully in the courses they elect to take for a grade of Pass/D/Fail, students are allowed to uncover a grade of Pass in SSOL until the end of the Change of Program period of the following semester. Students have until the end of the Change of Program period in the Spring semester to uncover the grade of a course taken in the previous Fall term, and until the end of the change of program period in the Fall semester to uncover the grade of a course taken in the previous Spring or Summer term. Seniors who graduate in May have until June 1 to uncover the grade of a course taken in their final Spring semester. Students who wish to uncover a grade of Pass can do so in Student Services Online (SSOL).

The grade of Pass is not included in the calculation of grade point averages; the grades of D and Fail are included in the calculation of grade point averages.

The Grade of D

No more than six points of credit earned with the grade of D may be credited toward the degree in any academic year, and no more than a cumulative total of 12 points of credit earned with the grade of D may be credited toward the 124 credits required for the degree credit. The grade of D is awarded only for courses listed in this Bulletin and for other courses taken while the student is enrolled in Columbia College. The decision as to whether or not a D may be used to satisfy the requirements for a major or concentration is made in each relevant academic department. In any given semester, the grade of D precludes the attainment of Dean's List status (see *Academic Honors, Prizes, and Fellowships—Dean's List*).

The Mark of W (Withdrawal)

In recognition of the challenges of the exceptional 2020-2021 academic year, the CC-GS Committee on Instruction (COI) has approved some temporary modifications to certain academic policies: The deadline to withdraw from a course was extended to the last day of classes for the term: December 14 for Fall courses; February 22 for Spring A courses; April 15 for full Spring and Spring B courses.

If a student withdraws from a course, the transcript will show a mark of W, indicating official withdrawal from that course. This is a permanent mark and will remain on the transcript even if the student repeats the course. Students will earn no points of academic credit for classes in which they receive the mark of W. In any given semester, the mark of W precludes the attainment of Dean's List status (see *Academic Honors, Prizes, and Fellowships—Dean's List*).

When considering the option to withdraw from a course, students should be aware that, in order to remain in good academic standing, they must successfully complete no fewer than 12 points in a given term. Students who do not earn at least 12 points per term may face academic probation, suspension, or dismissal. Students who do not make adequate progress toward

the degree (an average of 15.5 points per term) may also face academic probation, suspension, or dismissal.

To withdraw from a class, students must first meet with their advising deans in the Berick Center for Student Advising, 403 Lerner, to discuss their plans and then submit a Columbia College Acknowledgment of Course Withdrawal form to their advising deans.

Failure to attend classes or unofficial notification to the instructor does not constitute dropping or withdrawing from a course. Students who stop attending classes without dropping or officially withdrawing are assigned the letter grade earned by factoring a zero or F for any missing work.

The Mark of AR (Administrative Referral)

A mark of AR is given to students as a temporary mark when students face extenuating circumstances, such that an instructor needs to consult advising deans and/or other administrators before assigning a final course grade. The mark of AR is designed to allow an instructor a temporary submission until an appropriate permanent grade can be submitted. A grade of AR will alert the appropriate advising dean in the Berick Center for Student Advising, who will follow up with the instructor to help determine what final grade is appropriate. Ultimately, the instructor of a course has authority over the final grade awarded.

A mark of AR is also used when a student applies for an Incomplete. If the Incomplete is approved, the instructor will submit a mark of AR for the student, which will subsequently be altered to an IN by the Berick Center for Student Advising.

The Mark of IN (Incomplete)

An IN is a temporary grade designation granted by the Committee on Academic Standing for students who, due to extenuating circumstances, cannot complete their coursework or are unable to take a final examination. The only reasons for which an IN will be granted are incapacitating illness (as certified by a healthcare practitioner or by Columbia Health), grave personal or family emergencies, or circumstances of comparable gravity.

In order to receive the mark of IN, students must first speak with their advising deans and then file a petition with the Committee on Academic Standing. Petition forms are available in the Berick Center for Student Advising. For classes that require a final paper or project, petitions must be submitted no later than the last day of classes. For classes that require a final examination, petitions must be submitted no later than the day before the exam.

To be granted an IN, students should have completed all work for the relevant class with the exception of the final paper, project or exam. If a student has additional uncompleted work in the class in addition to the final paper, project or exam, an IN will not be granted.

Students may not arrange unofficial incompletes or extended deadlines merely through consultation with their instructors; any incomplete must be officially approved by the Committee on Academic Standing. If an instructor is willing to entertain an incomplete, pending approval by the Committee on Academic Standing, the instructor should submit a temporary mark of AR, along with a contingency grade that the student should be given if the assignments still outstanding are not completed in the time allotted for an approved incomplete.

Students who are granted an IN are assigned a deadline for completion of the incomplete paper or project or a date by which a deferred examination must be taken. Those who fail to meet the assigned deadline or who miss the deferred examination will receive the contingency grade indicated by the instructor. All other marks of IN that remain unresolved by the end of one calendar year will be converted to the contingency grade. Questions about incompletes may be directed to the advising deans in the [Berick Center for Student Advising](#).

Students who receive the grade of IN, *approved in advance* by the Committee on Academic Standing, may be considered for Dean's List only after all IN grades are changed to letter grades (see *Academic Honors, Prizes, and Fellowships—Dean's List*).

The Mark of R (Registration Credit)

The R credit option is available only to Columbia College seniors. Students who wish to audit a class can request permission from the Committee on Academic Standing in the [Berick Center for Student Advising](#) to take a course for R credit. No point credit is given for R credit, and the GPA is unaffected by the mark of R. Students who take a course for R credit must have the permission of the instructor, in addition to that of the Committee on Academic Standing. Students may be required to complete certain work as specified by that instructor. The exact nature of the work should be determined by the instructor when the student petitions for an R for the course. An instructor may fail a student who has not completed assigned work. The deadline for registering for R credit is the same deadline to elect the Pass/D/Fail option for a class, as specified on the *Academic Calendar* in this Bulletin. Registering for R credit is allowed only when:

1. the courses are in excess of the 124 points required for the B.A. degree;
2. the courses are taken in the last two terms of the student's attendance in Columbia College;
3. the courses are not used to fulfill a requirement for the B.A. degree;
4. the student has the permission of the Committee on Academic Standing and the instructor.

The Mark of YC (Year Course)

A mark of YC is given at the end of the first term of a course in which the full year's work must be completed before a qualitative grade is assigned. The grade given at the end of the

second term is the grade for the entire course; when the final grade is assigned at the end of the second term, the YC will be replaced by the same grade for the first term. In any given semester, the mark of YC precludes the attainment of Dean's List status until the grade for the entire year's coursework is awarded (see *Academic Honors, Prizes, and Fellowships—Dean's List*).

Report of Grades

Grades are available on [Student Services Online \(SSOL\)](#) on the first business day after they are submitted by the instructor. Paper and electronic transcripts may be ordered by currently enrolled students via SSOL. Students who find discrepancies in, or have questions about, their records should contact their academic advisor.

LANGUAGE PLACEMENT EXAMINATIONS

First-year students can select appropriate levels in French, German, Hebrew, Italian, Japanese, Korean, Latin, or Spanish on the basis of scores on SAT II: Subject Tests or Advanced Placement examinations (please note: this information will be confirmed for students entering Fall 2020). All students who have not taken one of these tests **must** take a Columbia placement exam in order to enroll in language study beyond the beginning elementary level. The exact exam times and dates are provided in the New Student Orientation Program (NSOP) schedule distributed to incoming students when they arrive on campus. Returning students who are not participating in NSOP should contact departments before the beginning of each term to inquire about placement exam options other than those provided during NSOP.

ADVANCED STANDING

Entering first-year students are subject to all rules for first-year students, regardless of the number of credits earned from approved advanced standing programs.

The College grants up to one semester (16 points) of college-level work completed before matriculation at Columbia College. This work may be done under the College Board Advanced Placement (AP) Program, GCE Advanced Level Examinations, International Baccalaureate Examination, or other national systems.

Advanced credit is awarded upon completion of the first year at Columbia. The actual determination of advanced credit is made after students matriculate in accordance with College and departmental policies. Students wishing to arrange such credit must meet with their advising dean in the [Berick Center for Student Advising](#) and provide the relevant transcript/certificate.

Entering first-year students are not granted credit for courses taken at other colleges or universities before their graduation from secondary school. Students may receive a maximum of 6 points of credit for college courses taken after graduation from

secondary school and prior to matriculation at Columbia. In order to receive this credit, students must submit an official university or college transcript and the syllabus for each relevant course taken elsewhere to their advising deans in the [Berick Center for Student Advising](#). Final determination will be made by the dean of advising.

Students who wish to receive advanced credit or exemption for the language requirement may not take courses at Columbia that cover similar or more basic material than the advanced work already completed. Nor may students receive credit for two exams that cover the same material (e.g., Calculus AP and Mathematics GCE Advanced Level Exam). In some cases, credit is awarded only when students successfully complete a higher-level course in the same field of study.

For information about advanced standing for transfer students, see [Academic Regulations—Regulations for Transfer Students](#).

ADVANCED PLACEMENT (AP) EXAMINATIONS

Students can earn a maximum of 16 points of credit earned through college-level coursework taken as part of a high school curriculum prior to matriculation at Columbia.

College Board Advanced Placement (AP) scores cannot be used toward exemption from any of the Core Curriculum courses, the Global Core Requirement, or the Science Requirement; however, scores may be used toward satisfying the Foreign Language Requirement (see [The Core Curriculum—Foreign Language Requirement](#)). Each year, individual departments review the College Board AP curriculum and determine appropriate placements, credit, and/or exemptions.

Students entering in the 2020–2021 academic year may be awarded AP credit for the following subjects (please note: this list will be confirmed) and should refer to the relevant department sections in this Bulletin for specific information on credit granted, placement, and exemptions:

Subject	Department
Biology	Biological Sciences
Chemistry	Chemistry
Computer Science	Computer Science
Economics	Economics
English	English and Comparative Literature
French	French and Romance Philology
German	German Languages
Government and Politics	Political Science
History	History
Italian	Italian
Latin	Classics
Mathematics	Mathematics
Physics	Physics

Psychology	Psychology
Spanish	Latin American and Iberian Cultures
Statistics	Statistics

International Baccalaureate

Students can earn a maximum of 16 points of credit earned through college-level coursework taken as part of a high school curriculum prior to matriculation at Columbia (this information is correct as of July 2020 and will be confirmed).

Entering students are granted six points of credit for each score of six or seven in International Baccalaureate (IB) Higher Level examinations, if taken in disciplines offered as undergraduate programs at Columbia College.

Students who wish to receive advanced credit or exemption for the language requirement may not take courses at Columbia that cover similar or more basic material than the advanced work already completed. For further information, students should consult with their advising dean in the [Berick Center for Student Advising](#).

BRITISH ADVANCED LEVEL EXAMINATIONS

Students can earn a maximum of 16 points of credit earned through college-level coursework taken as part of a high school curriculum prior to matriculation at Columbia.

Entering students are granted six points of credit for each grade of A or B on British Advanced Level examinations, if taken in disciplines offered as undergraduate programs at Columbia College.

Students who wish to receive advanced credit or exemption for the language requirement may not take courses at Columbia that cover similar or more basic material than the advanced work already completed. For further information, students should consult with their advising deans in the [Berick Center for Student Advising](#).

OTHER NATIONAL SYSTEMS

Students can earn a maximum of 16 points of credit earned through college-level coursework taken as part of a high school curriculum prior to matriculation at Columbia.

Pending review by the appropriate academic department at Columbia, students who complete secondary school work in other national systems may be granted credit in certain disciplines for sufficiently high scores. For further information, students should consult with their advising deans in the [Berick Center for Student Advising](#).

COURSES TAKEN IN OTHER COLUMBIA UNDERGRADUATE SCHOOLS

None of the courses listed in this Bulletin or in the bulletins or course catalogues of Barnard College and the School of General Studies require any special approval for enrollment, unless so indicated in various program descriptions and course descriptions.

A maximum of four courses offered by the Fu Foundation School of Engineering and Applied Science may be taken by Columbia College students on a space-available basis. The four-course limit does not apply to students in the 3-2 Combined Plan program. This limit also does not apply to courses offered by the Computer Science Department.

COURSES TAKEN IN THE GRADUATE SCHOOL OF ARTS AND SCIENCES

Courses offered by the Graduate School of Arts and Sciences may be taken by qualified undergraduates with the permission of the instructor of the course and in consultation with the director of undergraduate studies in the department in which the course is taught. If students would like to take such graduate-level courses in fulfillment of a requirement for a major or concentration, then they should also consult with the director of undergraduate studies in the department of their major or concentration.

COURSES TAKEN IN OTHER DIVISIONS OF THE UNIVERSITY

Students have available to them a number of courses offered by some professional schools of the University and may take a maximum of four courses for elective credit counted toward the 124 points necessary for their degree.

Students who wish to take such a course outside of the 124 points necessary for their degree must receive the permission of their advising deans from the Berick Center for Student Advising. In either instance, students must follow the policies established by the various professional schools, must have the permission of the instructor of the course they wish to take, and in some instances, must have the permission of the school in which the course is offered.

Following is a list of schools and programs that allow undergraduates to register for courses, with their policies regarding the enrollment of Columbia College students. Students who wish to take a course in a Columbia school not listed below should first consult with their advising deans in the Berick Center for Student Advising.

Graduate School of Architecture, Planning and Preservation

Lectures offered by the Graduate School of Architecture, Planning and Preservation may be taken by qualified undergraduates on a space-available basis. Undergraduates are not permitted to enroll in any seminars or studio courses.

School of the Arts

Graduate courses offered by the School of the Arts may be taken by qualified undergraduates on a space-available basis.

Graduate School of Business

Courses offered by the Graduate School of Business that are designed specifically for undergraduates can be found in *Departments, Programs, and Courses—Business*. Other Business School courses may only be taken by seniors who have completed the required prerequisites on a space-available basis. Students must follow the cross-registration guidelines of the Business School. Please note that registration deadlines for these classes are often earlier than the College registration and Change of Program periods.

School of Professional Studies

Columbia College students are not permitted to enroll during the academic year—*i.e.*, Fall and Spring terms—in courses offered through the School of Professional Studies. The School of Professional Studies sponsors the Summer Session at Columbia. For additional information on taking courses at Columbia during the summer, please see the Summer Study section. Some of the courses offered by the School of Professional Studies in the Summer Session will not count towards the 124 credits needed to complete the Columbia College degree. Students interested in summer courses offered by the School of Professional Studies should consult with their advising deans in the Berick Center for Student Advising before completing their enrollment.

School of International and Public Affairs

SIPA Open Enrollment Courses offered by the School of International and Public Affairs are open to all Columbia students on a space-available basis. Students interested in registering for a SIPA Open Enrollment Course may receive permission to enroll by completing a Registration and Drop/Add form and submitting it to the SIPA Registration site on the 6th floor of the International Affairs Building. If the class is not full, approval will be granted.

School of Journalism

Courses offered by the School of Journalism may be taken on a space-available basis. Students must have signed permission from the School of Journalism's Office of the Associate Dean for Faculty and Academic Affairs, Pulitzer Hall.

Law School

Normally, students are not allowed to enroll in courses offered through the Law School. Exceptions to this policy may be granted under the following circumstances:

1. Law School courses may be taken by students in the Accelerated Interdisciplinary Legal Education (AILE) program. Students must have signed permission from the Law School Office of the Assistant Dean of Academic Services, 500 William and June Warren Hall.
2. A small number of seniors are permitted to enroll in one or two seminars, selected by Law School faculty. Information about such opportunities will be shared with students as it becomes available.

Mailman School of Public Health

Courses designed by the Mailman School of Public Health for undergraduates are noted in the course listings for the Special Concentration in Public Health. Other courses offered by the Mailman School of Public Health may be taken by qualified undergraduates on a space-available basis with the permission of the department in which the course is taught. Students must complete the Public Health Cross Registration Application Form and receive signed permission from the department, as well as from the School of Public Health's Office of Student Affairs, 722 West 168 Street, Suite 1014. Once School of Public Health permissions are secured, students must also receive signed permission from the Berick Center for Student Advising, 403 Lerner, before proceeding to register for the course at the Registrar's Office, 205 Kent.

School of Social Work

Courses offered by the School of Social Work may be taken on a space-available basis.

Teachers College

Normally, students are not allowed to enroll in courses offered by Teachers College. Exceptions to this policy may be granted under the following circumstances:

1. Courses that are not offered at Columbia but are deemed by the student's faculty adviser as essential to a student's undergraduate program of study. Students should submit a petition to the associate dean of Academic Affairs, Core Curriculum, and Undergraduate Programs of Columbia College, 202 Hamilton.
2. Instrumental music instruction course (e.g., piano). In this instance, students are charged per credit for the course over and above their Columbia tuition. Students should submit a petition to Andrew Plaa, Dean of Advising in the Berick Center for Student Advising, 403 Lerner.

SUMMER STUDY

Columbia Summer Session

Normally, credit for summer school is given to College students only for courses taken in the Columbia Summer Session. Students may apply a maximum of 16 points of credit earned during any Summer Session to the 124 credits needed for the degree, and students cannot take more than eight points in any Summer Session period or in overlapping periods.

All students registered in Columbia College during the regular academic year may elect one course each semester during the regular academic year on a Pass/D/Fail basis (in addition to any courses that are given only on a Pass/D/Fail basis). Students who do not utilize both Pass/D/Fail options during the academic year may elect, in the summer immediately following, to take one Summer Session course on a Pass/D/Fail basis. For additional information on and restrictions governing Pass/D/Fail credit, see the Academic Regulations—Exams and Grades section of this Bulletin.

Students who plan to take any summer courses toward their major or concentration must consult with the director of undergraduate studies of their major department. **Not all courses offered in the Summer Session are accepted by Columbia College for credit.** Students should also consult the annually updated List of Approved Summer Courses.

Summer School Classes Taken Outside Columbia

Students are not normally permitted to earn credit toward their degrees outside of Columbia except in the case of approved study abroad programs. **Students who nevertheless wish to request permission to receive credit for summer school courses taken outside Columbia must:**

1. Obtain a copy of Columbia College's Pre-Approval for a Course Taken at Another U.S. Institution form, available in the Berick Center for Student Advising, 403 Lerner.
2. Carefully read the following procedures to apply for such credit. Please note that permission to take classes outside of Columbia is normally given only when a student has fallen behind in credits, when the student wishes to take a language course, or when the summer course is a prerequisite for a course that must be taken in the fall for the student's major or concentration. Students should note that introductory and intermediate language courses are only approved pending the successful completion of the departmental placement test into the next higher level language course. Students are responsible for arranging departmental testing upon return to campus in the Fall. If students do not place into the next level of the language course, credit will not be granted. Students who elect to discontinue study of the language or do not take the relevant departmental placement test will not be granted credit for the summer courses taken.

3. Discuss study plans with their advising deans in the [Berick Center for Student Advising](#).
 4. Complete the approval request form, outlining their reasons for taking summer courses and listing the specific courses in which they wish to enroll. Once submitted to students' advising deans in the [Berick Center for Student Advising](#), requests are then reviewed by the Committee on Academic Standing, who determine whether or not summer school courses are approved for credit. Students are strongly advised to secure pre-approval prior to enrolling in courses at other institutions, to avoid the loss of time and expense of enrolling in a course that is ultimately not approved.
 5. Students may not receive credits for study abroad during the summer except in Columbia-sponsored programs or approved foreign-language, archaeology, and field-studies programs. Students seeking summer study abroad credits must receive permission from the [Office of Global Programs](#), 606 Kent.
 6. Students applying for summer school credit for courses that they wish to use in partial fulfillment of the science or Global Core requirements **must** submit the relevant course approval petition to their advising dean in the [Berick Center for Student Advising](#) for approval by the appropriate faculty committee, prior to taking the course. Note that students can only petition to have non-Columbia study abroad courses count towards fulfilling the Global Core requirement. Approval to receive College credit for summer school courses does **not** ensure approval of the course to fulfill one of these requirements.
1. The work must be in excess of the 124 points required for the B.A. degree.
 2. The student must obtain the approval of both the graduate department(s) offering the course(s) and the undergraduate department in which they are majoring or concentrating.
 3. A course used to fulfill a requirement for the B.A. degree may not be counted toward graduate credit.
 4. The maximum amount of graduate credit that an undergraduate can earn toward the M.A. degree requirement in the Graduate School of Arts & Sciences is 0.50 Residence Unit. For more information on the Residence Units for graduate programs, please consult the website [Student Guide of the Graduate School of Arts and Sciences](#).
 5. Courses that a student completes while registered in the Columbia Summer Session may not be credited toward the completion of degree requirements in the Graduate School of Arts and Sciences.

STUDY OUTSIDE COLUMBIA UNIVERSITY

Permission to study at another school for a term or a year is granted only for study at institutions outside of the United States, as part of an [approved study abroad program](#), or for study in an [approved exchange programs](#). Exceptions may be granted for study during the summer. See the [Summer Study](#) section for more information.

Students who matriculate into degree programs at other institutions will not be eligible to continue study at Columbia. Columbia College students who matriculate at another post-secondary institution and/or are considered a degree-seeking student at a college or university other than Columbia College will be withdrawn from Columbia with no opportunity to return and complete the Columbia College degree.

COURSES TAKEN FOR GRADUATE SCHOOL CREDIT

An undergraduate in the College may take graduate courses at Columbia and apply the earned credit toward a Columbia M.A. or Ph.D. degree, assuming admission to the Graduate School of Arts and Sciences, under the following conditions:

LEAVES OF ABSENCE AND WITHDRAWALS FROM COLUMBIA COLLEGE

Students can request a leave of absence prior to the start of a term or during the term. When a student takes a leave of absence during a term, this action is also considered a withdrawal, defined as the dropping of one's entire academic program in a given term after the first day of classes of the term and, as a result, withdrawing from Columbia College.

Withdrawing from Columbia College after the start of the semester can have implications for financial aid, and students are strongly advised to talk with their advising deans and with the Office of Financial Aid about any financial consequences of a necessary withdrawal. Any student withdrawing from Columbia College **must** notify the [Berick Center for Student Advising](#) in writing; it is not sufficient for a withdrawal to notify instructors of plans to withdraw or to stop attending classes. Absence from classes without officially withdrawing from Columbia College can result in failing grades in all courses.

VOLUNTARY MEDICAL LEAVE OF ABSENCE

A medical leave is granted to a student whose health condition interferes with successful full-time study. A leave can be granted for a minimum of one term and a maximum of two years.

Unless a student is granted an exception due to extenuating circumstances, a student will be permanently withdrawn after the maximum time period of two years.

Students must consult with their advising deans in the [Berick Center for Student Advising](#) to initiate a leave, and then provide medical documentation to support the request. Medical leaves

must be accompanied by an individualized assessment of students' individual healthcare needs.

While on leave, students must be actively engaged in a course of medical treatment that leads to recovery. In addition, students are required to continue to access their Columbia email, which is the official means of communication by the University.

When applying for readmission to Columbia College, students must provide medical documentation supporting their readmission. Normally, students may only return in the Fall or Spring term. Only in rare circumstances will students be readmitted from medical leave to enroll in courses for the Columbia Summer Session.

All questions about medical leaves should be addressed to the students' advising deans in the [Berick Center for Student Advising](#).

Academic Standing and Transcript Notations

Students who take a leave while in good academic standing will return in good academic standing; students who take a leave while on academic action will return on academic action. When a leave begins when a term is already in session, the student's transcript will reflect the action of withdrawal and the date of withdrawal for the semester in question. If the date of withdrawal for a medical leave is on or before the Columbia College withdrawal deadline (noted on the academic calendar), the student's transcript will not reflect the individual courses attempted during the term. If the date of withdrawal for a leave begins after the Columbia College withdrawal deadline, individual courses will remain on the transcript.

Ordinarily, Columbia College students who are authorized to withdraw for medical reasons after the withdrawal deadline will receive a mark of W for each of their courses for the term. These notations indicate an authorized withdrawal from the courses. In rare cases, when a student must leave for medical reasons beyond the relevant deadline, a student and advising dean in the [Berick Center for Student Advising](#) can work together with the faculty to determine whether an Incomplete would be a more appropriate notation on the transcript. In order to be eligible for an Incomplete, the student must have completed all work for the course except the final paper, exam, or project. The student must also obtain the approval of the relevant advising dean(s) in the [Berick Center for Student Advising](#) as well as the appropriate faculty member(s). Students should consult with their advising deans in the [Berick Center for Student Advising](#) for more details.

Students who have been approved for authorized Incompletes in the last semester before their medical leave must complete the work of each course upon their return to campus by the end of the Change of Program period. If the work is not completed by the end of the Change of Program period of the term in which the student returns, the grade may convert to the contingency grade or to an F. Due dates for incomplete work should be

determined in consultation with the advising dean in the Berick Center for Student Advising upon notification of readmission.

When students begin a leave after the Columbia College withdrawal deadline, they should be aware of the points of credit necessary to remain in good academic standing in future semesters. Students should keep in mind that Columbia College students should complete an average of 15.5 points per term to remain in good academic standing. Students should consult with their advising deans in the [Berick Center for Student Advising](#) to learn whether or not they will fall below the low points threshold (see section on Academic Standing) established for Columbia College students and, if so, work with their advising deans and departments to create a reasonable academic plan to ensure the timely completion of their degree.

Students are not permitted to earn transferable credits toward the degree while on medical leave from the University, as the purpose of the leave is to regain full health in order to return and resume full-time study. In some cases, healthcare practitioners may recommend that students take courses at home institutions as part of the recovery process. It is recommended that students follow the advice of their healthcare practitioners; however, they should make their decisions knowing that coursework taken elsewhere while on medical leave will not be transferred back to Columbia to count towards their degree.

If a student matriculates at another institution in a degree program while on leave from Columbia, the student will be considered to have transferred to another institution and will be permanently withdrawn from Columbia College.

READMISSION FROM MEDICAL LEAVE OF ABSENCE

Students must complete all parts of the following readmission procedures by the following deadlines (please note: these dates are determined as of July 2020, and are subject to change):

- Fall term readmission – June 1
- Spring term readmission – November 1
- Summer term readmission – not permitted

In order to begin the readmission process, students must first discuss their plans with their advising deans in the [Berick Center for Student Advising](#) and then submit the following letters to their advising deans by email or fax:

1. Request for readmission: This letter should review the circumstances that led to the leave, describe in detail any activities pursued while away, explain why studies can now be successfully resumed, and outline a plan for continued support. The letter should also indicate whether or not campus housing will be required.
2. Letter from medical practitioner supporting readmission: This letter should describe the treatment prescribed for the student and progress made by the student, provide an

evaluation of the student's readiness to return to full-time study at Columbia, and outline the recommended continued care plan upon readmission.

The Medical Leave Readmission Committee, comprised of representatives of Columbia Health, the Berick Center for Student Advising, and other key offices of the College and the University meets in June and November to consider readmission requests for the Fall and Spring terms, respectively. Committee review is not guaranteed if documentation is submitted after the stated deadlines. Students will receive notification regarding one of the following three outcomes of the committee's assessment of readmission requests:

1. Applicants are approved for an interview by a Columbia Health practitioner for an interview. Pending the results of the interview, a student may be officially readmitted or denied readmission and will be notified of a decision by the Berick Center for Student Advising by letter and email.
2. Additional information is requested.
3. Readmission is denied. Students may reapply the following semester for readmission.

Once officially readmitted, students will be provided an online registration appointment in order to enroll for the coming term. Normally, students will be able to register in late August for the Fall and in mid-January for the Spring term. In addition, students who are guaranteed housing upon readmission may submit a housing application by following the instructions in their readmission letter. Students on leave cannot participate in housing lotteries before being formally readmitted.

Students must address all financial or other obligations to the University that may still be outstanding from the beginning of their leave. If holds have been placed on their account, these holds must be cleared before they can enroll in classes or move into housing. If, after being readmitted for the following semester, a student cannot register by the end of the Change of Program period of that semester, then the student will be placed on another leave of absence.

Students are urged to meet with their advising deans in the [Berick Center for Student Advising](#) and, if they live in campus housing, a Residential Life staff member, during the first two weeks of their return to campus, to ensure a smooth transition back to the campus community.

VOLUNTARY PERSONAL LEAVE OF ABSENCE (NON-MEDICAL)

A voluntary leave of absence may be granted by the Committee on Academic Standing to undergraduate students who request a temporary withdrawal from Columbia College for a nonmedical reason. Students considering a voluntary leave must discuss this option in advance with their advising deans in the [Berick Center for Student Advising](#).

Voluntary leaves are granted for a period of one to four semesters. Students must be in good academic standing at the

time of the leave, and must be able to complete their degree in a total of eight semesters.

When a leave begins after a term is in session, the student's transcript will reflect the action of withdrawal and the date of withdrawal. If the date of withdrawal for a personal leave is on or before the Columbia College withdrawal deadline (noted on the academic calendar), the student's transcript will not reflect the individual courses attempted during the term.

Normally, if a voluntary leave of absence begins after the Columbia College withdrawal deadline, the student's transcript will include all courses attempted, with each course receiving a mark of W (indicating authorized withdrawal). In certain circumstances, a student may qualify for an Incomplete for a course, and the remaining work for the course would have to be completed by the end of the Change of Program period of the semester in which the student returns to Columbia. If the Incomplete is not completed by that time, the contingency grade or a W will be inserted as the final grade.

Students may not take courses for transferable credit while on leave. If a student matriculates at another institution in a degree program while on leave from Columbia, the student will be considered to have transferred to another institution and will be permanently withdrawn from Columbia College. Students who choose to take voluntary leaves are not guaranteed housing upon return to the University. International students should contact the [International Students and Scholars Office](#) to ensure that a leave will not jeopardize their ability to return to Columbia College.

To return to Columbia College, students must notify the [Berick Center of Student Advising](#) by June 1 for the Fall term or November 1 for the Spring term, (please note: these dates are determined as of July 2020, and are subject to change). Students must request readmission in writing and submit a statement describing their readiness to return.

FAMILY EMERGENCY LEAVE OF ABSENCE

Columbia College students who must leave the university for urgent family reasons that necessitate a semester-long absence (e.g., family death or serious illness in the family) may request an emergency family leave of absence. Documentation of the serious nature of the emergency must be provided. Students must request an emergency family leave of absence from their advising deans in the [Berick Center for Student Advising](#).

When an emergency family leave begins after a term is in session, the student's transcript will reflect the action of withdrawal and the date of withdrawal. If the date of withdrawal for an emergency family leave of absence is on or before the Columbia College withdrawal deadline (noted on the academic calendar), the student's transcript will not reflect the individual courses attempted during the term. Normally, if an emergency family leave begins after the Columbia College withdrawal deadline, the student's transcript will include all

courses attempted, with each course receiving a mark of W (indicating authorized withdrawal). In certain circumstances, a student may qualify for an Incomplete for a course, and the remaining work for the course would have to be completed by the end of the Change of Program period of the semester in which the student returns to Columbia. If the Incomplete is not completed by that time, the contingency grade or a W will be inserted as the final grade.

To return to Columbia College, students must notify the Berick Center of Student Advising by June 1 for the Fall term or November 1 for the Spring term, (please note: these dates are determined as of July 2020, and are subject to change). Students must request readmission in writing and submit a statement describing their readiness to return. Once readmission is granted, housing will be guaranteed.

FAILURE TO GRADUATE

Students who fail to graduate and who have been withdrawn from the College must apply for readmission within a two-year period in order to have an opportunity to complete the degree. If they do not complete their degree within two years, then they may be permanently withdrawn. To apply for readmission, students must have successfully completed no fewer than 90 points of academic credit and earned a GPA of no less than 2.0. Students must fulfill the degree and major or concentration requirements in place at the point of original matriculation. Readmission will be predicated upon the assessment of the student's ability to successfully complete the degree within one calendar year. Inquiries regarding readmission should be directed to the Berick Center for Student Advising.

READMISSION

In general, students seeking readmission to Columbia College must submit evidence that they have achieved the purposes for which they left. Consequently, specific readmission procedures are determined by the reasons for the withdrawal. Policy statements outlining the readmission procedures for voluntary or medical leaves of absences are available in the Berick Center for Student Advising. Students should consult their advising deans for further information.

Students applying for readmission should complete all parts of the appropriate readmission procedures by June 1 for the Fall term or November 1 for the Spring term (please note: these dates are determined as of July 2020, and are subject to change). Once an international student with F-1 or J-1 status is readmitted, the student should contact the International Students and Scholars Office to obtain a new visa certificate (form I-20 or form DS-2019).

Students may not take courses for transferable credit while on leave. If a student matriculates at another institution in a degree program while on leave from Columbia, the student will be considered to have transferred to another institution and will be permanently withdrawn from Columbia College.

DEGREE REQUIREMENTS

The faculty Committee on Instruction of Columbia College reviews Columbia College degree requirements and curricular matters each year. This Bulletin reflects all faculty recommendations and curricular changes in its annual publication. Columbia College policy requires students to fulfill the general degree requirements that are stated in the Bulletin of the first year of their matriculation at Columbia College.

MODIFICATION OF REQUIREMENTS

The requirements for the degree may be modified or waived in individual and rare cases only by with the approval of the Dean of Academic Affairs of Columbia College, acting on behalf of the faculty Committee on Instruction of Columbia College. Students wishing to petition for a modification of degree requirements are advised to discuss their requests with their advising deans in the Berick Center for Student Advising.

THE COLUMBIA COLLEGE COMMITTEE ON ACADEMIC STANDING

The Columbia College Committee on Academic Standing implements academic policies and regulations for Columbia College students as set forth by the faculty Committee on Instruction, the University Senate or the faculty as a whole. The Committee on Academic Standing is expected to uphold the policies and regulations of the Committee on Instruction.

The Committee on Academic Standing is composed of advising deans, an associate dean of advising, and the dean of advising of the Berick Center for Student Advising.

REGISTRATION

Student Service Center

205 Kent

212-854-4400

registrar@columbia.edu

REGISTRATION AND ENROLLMENT

Registration is the systematic process that reserves seats in particular classes for eligible students. It is accomplished by following the procedures announced in advance of each term's registration period.

Enrollment is the completion of the registration process and affords the full rights and privileges of student status. It is accomplished by the payment or other satisfaction of tuition and fees and by the satisfaction of other obligations to the University.

Registration alone does not guarantee enrollment, nor does registration alone guarantee the right to participate in a class. In some cases, students need to obtain the approval of the instructor or of a representative of the department offering the course. In other cases, students may be required to attend the first few class sessions prior to official registration or to confirm official registration. Please check the course information in the *Departments, Programs, and Courses* section of this Bulletin and the registration instructions contained in the Directory of Classes for all of the approvals required.

To comply with current and anticipated Internal Revenue Service mandates, the University requires all students to report their Social Security numbers at the time of admission. **Newly admitted students who do not have Social Security numbers should obtain one well in advance of first registration.** International students should consult with the [International Students and Scholars Office](#), located at 524 Riverside Drive (+1-212-854-3587) for more information.

According to University regulations, each person who completes registration is considered a student of the University during the term for which they register, unless the student's connection with the University is officially severed by withdrawal or otherwise. No student registered or enrolled in any school/college of the University shall at the same time be registered or enrolled in any other school/college, either of the University or of any other institution, without specific authorization from the dean/director of the school/college in which the student is first registered.

The privileges of the University are not available to any student until they have completed registration. Typically, a student who is not officially registered for a University course may not attend the course; however, some courses may require students

to attend the first few class sessions prior to official registration. Students are expected to register for courses during the time periods explicitly identified by the Office of the Registrar, and may be required to obtain written consent of a faculty member or of the [Committee on Academic Standing](#) to register at any time during an academic term.

Students are held accountable for absences incurred owing to late enrollment. The University reserves the right to withhold the privilege of registration or any other University privilege from any person with an unpaid debt to the University.

All Columbia College students must be registered for a minimum of 12 points of credit in any given semester. Each Columbia College student must be registered for at least 12 points of credit by the close of the Change of Program period, and those students who are registered for fewer than 12 points by this time will be withdrawn from the College. Graduating seniors who need fewer than 12 points of credit to complete their degree can petition the Committee on Academic Standing for permission to register for fewer than 12 points of credit, with the understanding that they will still be required to enroll as full-time students paying full-time tuition. Questions about registration should be directed to the [Berick Center for Student Advising](#).

Registration and Change of Program Instructions

Registration instructions are announced in advance of each registration period. Students' individual registration times are listed in [Student Services Online \(SSOL\)](#) and registration dates are listed on the [Academic Calendar](#). Students should also consult the [Registrar's website](#) for additional information.

REGISTERING FOR CLASSES

Registration for classes is by appointment online via [Student Services Online \(SSOL\)](#). Some classes may be blocked for online registration and require written approval; students should check the Directory of Classes for approval information. Courses blocked from online registration require a completed Registration Adjustment Form, with all necessary approvals confirmed. A student cannot use the Registration Adjustment Form to register for a course if the course is not blocked from online registration or if the student is eligible to join the course waitlist.

Students otherwise unable to register through SSOL must submit a completed Registration Adjustment form to the [Berick Center for Student Advising](#), with all necessary approvals confirmed.

Students are allowed to register for a maximum of 18 points of credit in any given semester. Students may not register for courses whose meeting times overlap. Students are responsible for ensuring that their academic programs are in accordance with these policies. If students are accepted into courses through the waitlist mechanism so that their programs contain

more than 18 points and/or overlapping courses, students are required to bring their enrollments into compliance with these registration policies by the end of the Change of Program period, either by reducing their course registrations to 18 points or fewer, and/or by dropping courses that overlap with others.

The Committee on Academic Standing in the Berick Center for Student Advising is tasked with upholding the academic policies of the College and will make changes to students' registration if the students fail to ensure that their academic programs comply with these policies set by the faculty.

DROPPING COURSES

In recognition of challenges students face in this exceptional academic year, the CC-GS Committee on Instruction (COI) has approved some temporary modifications to certain academic policies for the Fall 2020 and Spring 2021 semesters: The deadline to withdraw from a course was extended to the last day of classes for the term (December 14 for Fall; February 22 for Spring A courses; April 15 for Spring full term and Spring B courses).

To withdraw from a class, students must first meet with their advising dean in the Berick Center for Student Advising, 403 Lerner, to discuss their plans. They must then submit a Columbia College Acknowledgment of Course Withdrawal form to their advising dean in the Berick Center for Student Advising.

Students may not withdraw from any course after the course withdrawal deadline. After that point, students can only receive the letter grade earned in the course.

When considering the option to drop or withdraw from a course, students should be aware that, in order to remain in good academic standing, they must successfully complete no fewer than 12 points in a given semester. Students who do not earn at least 12 points per term will be placed on academic probation, or be suspended or dismissed. Students who do not make adequate progress to the degree (an average of 15.5 points per term) will also face academic probation, suspension, or dismissal.

Neither failure to attend classes nor giving unofficial notification to the instructor will constitute dropping or withdrawing from a course. Students who stop attending classes without dropping or officially withdrawing are assigned the letter grade earned by factoring a zero or F for any missing work.

DROPPING OR WITHDRAWING FROM CORE CURRICULUM COURSES

In recognition of challenges students face in this exceptional academic year, the CC-GS Committee on Instruction (COI) has approved some temporary modifications to certain academic policies for the Fall 2020 and Spring 2021 semesters: The

deadline to withdraw from a Core Curriculum course (i.e., Literature Humanities, Frontiers of Science, Contemporary Civilization, Art Humanities, Music Humanities, and University Writing) course was extended to the last day of classes for the term (December 14 for Fall 2020; February 22 for Spring A courses; April 15 for Spring full term and Spring B courses).

Students can be placed on academic probation if they fail to complete certain Core classes in their first year. Students considering dropping a Core class should consult their advising deans before taking any action.

CHANGING GRADING OPTIONS

Students may elect to change their course grading options from letter grading to Pass/D/Fail or from Pass/D/Fail to letter grading. The deadline for declaring the Pass/D/Fail option for a course was extended to the last day of classes for the term in this exceptional academic year: December 14 for Fall courses; February 22 for Spring A courses; April 15 for full Spring and Spring B courses. Students should refer to *Academic Regulations*—Exams and Grades listed in this Bulletin for more information regarding this grading option.

STUDY ABROAD

GLOBAL ENGAGEMENT

Spring 2021 Study Abroad Update

Based on ongoing worldwide public health concerns, the Center for Undergraduate Global Engagement (UGE) is suspending student participation in all programs offered by partner institutions and organizations (Columbia-approved), as well as incoming and outgoing exchanges.

Suspension of Fall 2020 study abroad

Given the ongoing COVID-19 pandemic and its impact on worldwide travel and global health risks, the Center for Undergraduate Global Engagement (UGE) is suspending undergraduate student participation in study abroad programs for Fall 2020.

The Columbia University Center for Undergraduate Global Engagement (UGE) develops, coordinates, implements, and collaborates with other units at Columbia to support academic and co-curricular opportunities—including study abroad, global internships, global service-learning, global research and global courses on campus and abroad—for global learning and engagement for all undergraduates during their Columbia University journey; and works closely with faculty in their global research and teaching to ensure visibility and access to opportunities that build global awareness and the accomplishment of global competencies. UGE enhances access and support for undergraduates to global opportunities and brings students and faculty together in a central location that creates a hub of global activity at Columbia, allowing students to better connect and learn about potential programs; faculty and staff to share their global and regional expertise and advice; and for the collaborative development, implementation and assessment of new and existing undergraduate global programs and opportunities for global engagement across Columbia and around the world.

Center for Undergraduate Global Engagement

606 Kent

212-854-2559

uge@columbia.edu

Studying in a foreign country for a semester, a full year, or sometimes a summer, represents a significant enhancement to the Columbia College education. Study abroad expands the walls of the institution and offers students the opportunity to gain first-hand experience of the larger global community of which we are all members. Students engaged in international study discover insights into other cultures, develop new perspectives, and learn to reflect on how their own culture has shaped their understanding of the world. Students interested in studying abroad should visit the [Center for Undergraduate Global Engagement](#), 606 Kent, as early as possible to discuss

their academic goals and to develop a plan for integrating international study into their curriculum.

ELIGIBILITY

The College maintains the authority over students' participation in study abroad programs and upholds standards for all potential candidates. To be eligible for participation in a Columbia-approved study abroad program, students must meet the following criteria:

- Have a minimum GPA of 3.0;
- Make progress toward finishing the Core Curriculum;
- Complete the Core foreign language requirement (i.e., satisfactory completion of the intermediate sequence). Some programs require one or two courses beyond this level, so students may also need to complete advanced language prerequisites;
- Demonstrate academic interest by completing at least one course pertaining to the country or region where the student intends to study;
- Maintain good academic standing. A review of each student's academic and disciplinary records is conducted as part of the required clearance process. Students on academic or disciplinary probation are not permitted to study abroad during the term of their probation.

It is generally possible to arrange for study in most foreign countries through programs sponsored by Columbia or by other American institutions, or through direct application to foreign universities. Such studies may be approved for one to two terms in the junior year or during any summer term.

CREDIT AND GRADING

Students who enroll in the following Columbia-sponsored programs receive direct Columbia credit for their courses. The grades earned in their studies are reflected on their official transcripts and cumulative GPA:

- Columbia in Paris
- The Berlin Consortium for German Studies
- The Kyoto Center for Japanese Studies
- Columbia in Kenya
- Columbia in London
- Consortium for Advanced Studies in Cuba

Credit from outside approved programs is certified as transfer credit toward the degree when the student returns to the College and upon receipt of appropriate transcripts and other supporting materials. Grades earned during participation in outside approved programs are not reflected on the transcript or the cumulative GPA. College transfer students should note that they are permitted no more than 60 points of outside credit (see *Academic Regulations*—Regulations for Transfer Students).

All students are reminded that the final 30 credits required for the degree must be taken while enrolled in the College for study on Columbia's New York campus or on one of the Columbia-sponsored programs abroad. Any exceptions require special permission from the Committee on Academic Standing.

In addition, the following conditions apply for study abroad:

1. No credit is granted for courses in business, education, journalism, or other subjects that, at Columbia, are typically taught in professional schools.
2. Transfer credit is not awarded for courses taken on a Pass/Fail basis in outside programs. The minimum grade necessary for transfer of credit is C-.

STUDY ABROAD CLEARANCE

Students must be cleared to study on approved programs by the Center for Undergraduate Global Engagement, 606 Kent, by October 1 for the spring semester and by March 1 for the fall semester/academic year. Students must register with this office before November 15 for the spring semester and April 15 for the fall semester/academic year.

UNDERGRADUATE INTERNATIONAL TRAVEL POLICY

All matriculated undergraduates who wish to participate in Columbia-Led, Columbia-Facilitated and/or Recognized international travel must first be cleared to participate in such program and are then *required* to obtain School Sponsorship at least 4 weeks prior to departure, in accordance with the Undergraduate International Travel Policy.

TUITION AND FINANCES

While abroad, students remain enrolled at the College; tuition is paid to Columbia. Columbia, in turn, pays the academic costs of the overseas program. Students are financially responsible for room, board, and any other miscellaneous costs. Students receiving financial aid at Columbia remain eligible for aid when they study abroad with Columbia's approval.

Students may direct financial aid and study abroad inquiries to the Financial Aid and Educational Financing, 618 Lerner; 212-854-3711; ugrad-finaid@columbia.edu.

Spring 2021 Study Abroad Update

Based on ongoing worldwide public health concerns, the Center for Undergraduate Global Engagement (UGE) is suspending student participation in all programs offered by partner institutions and organizations (Columbia-approved), as well as incoming and outgoing exchanges.

Suspension of Fall 2020 study abroad

Given the ongoing COVID-19 pandemic and its impact on worldwide travel and global health risks, the Center for Undergraduate Global Engagement (UGE) is suspending

undergraduate student participation in study abroad programs for Fall 2020.

Columbia College students who enroll in the Columbia-sponsored programs listed below have the same access to the financial aid they would have if they were enrolled in classes in New York. Students who plan to apply should consult with the Center for Undergraduate Global Engagement, 606 Kent; 212-854-2559; uge@columbia.edu (ogp@columbia.edu).

AFRICA

Kenya: Columbia in Kenya Program

In partnership with Princeton University, Columbia has developed a field semester abroad program in Kenya on Tropical Biology and Sustainability. Operating during the spring semester, this global immersion experience gives students the opportunity to study ecology, evolutionary biology, conservation biology, environmental engineering, and sustainable development in the environmental hub of East Africa. Based at Princeton's Mpala Research Centre in central Kenya, and with support from Columbia's Global Center Africa in Nairobi, students also travel across Kenya to places such as the forested slopes of Mt. Kenya, the wildlife-rich savannas of Laikipia, and the coffee and tea plantations of western Kenya. Students take four three-week course modules taught by Princeton and Columbia faculty who work in Kenya and other parts of East Africa.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

EAST ASIA

Japan: The Kyoto Consortium for Japanese Studies

The Kyoto Consortium for Japanese Studies (KCJS) offers an intensive, two-semester academic program primarily for undergraduates who wish to do advanced work in Japanese language and Japanese studies. The program is open to qualified students who have completed two or more years of college-level Japanese at the time of enrollment. A limited number of students may be admitted for single semester study in the fall or spring.

The KCJS curriculum provides intensive Japanese language study and the opportunity to choose from a broad spectrum of social sciences and humanities courses on premodern and contemporary Japan. The program takes advantage of the numerous social and cultural resources of Kyoto by incorporating into the curriculum field trips, guest speakers, and research projects based on local field work.

For program information, students may consult <http://www.kcjs.columbia.edu> and email uge@columbia.edu (ogp@columbia.edu). Students are also advised to consult with

the director of undergraduate studies in the Department of East Asian Languages and Cultures.

EUROPE

France: Columbia in Paris

Established in 1966, the Columbia-Penn Program in Paris at Reid Hall offers semester, academic-year, and summer study-abroad options that challenge students to step outside the boundaries of a traditional French language program and use French as a means to further their understanding of their own area of study. Students with a good command of the French language refine their speaking and writing skills through intensive language training and by taking selected disciplinary courses taught in French specifically for the program at Reid Hall and in the French university system at partner institutions: Institut d'Etudes Politiques (Sciences Po), University of Paris I (Panthéon Sorbonne), University of Paris IV (Sorbonne), and University of Paris VII (Denis Diderot). Opportunities for participating in joint honors seminars and directed research are also available.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Germany: The Berlin Consortium for German Studies

The Berlin Consortium for German Studies (BCGS) provides students with the opportunity to enroll in courses at the Freie Universität Berlin (FU Berlin) for the fall semester or a full academic year. The program begins with a six-week intensive language practicum which, in conjunction with a month-long homestay, prepares students for study at the FU Berlin. Upon completion of the practicum, students enroll in one course taught by the BCGS directors on a topic such as cultures, politics, history, literature, theater, or cinema; and for at least two, possibly more, FU Berlin courses for which they meet the prerequisites.

The FU Berlin offers a wide range of courses in the humanities, social sciences, and natural sciences. Students majoring in a variety of disciplines may choose from an array of appropriate courses.

For program information, students may consult <http://www.bcgscolumbia.edu> and email uge@columbia.edu (ogp@columbia.edu). Students are also advised to consult with the director of undergraduate studies in the Department of Germanic Languages.

Italy: Columbia in Venice

The Columbia in Venice program allows students to take up to two Columbia-taught interdisciplinary courses: a Global Core course *Nobility and Civility*, and an Italian Studies course *Boiardo and Ariosto*. The remaining courses that comprise

the program include Italian language and one or two Venetian themed courses taught in English at Ca' Foscari University.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (reidhall@columbia.edu).

United Kingdom : Columbia in London Program

The Columbia in London Program operates under the direction of Columbia's Department of English and Comparative Literature, in partnership with Queen Mary University of London (QMUL), one of the UK's most prestigious academic institutions.

The program's Global Seminar, *London as Literature*, studies major works of English and Anglophone literature from all periods and genres in a London context. Each fall, the program will be led by one Columbia faculty member whose research directly engages the literary culture of London. That faculty member will offer a version of the global seminar that will enable participating students to study literary texts in their immediate geographical and cultural settings, transforming their relationship to their objects of study and encouraging them to develop a wider range of reading practices and research methodologies. In addition to regular class meetings, the Global Seminar will involve regular outings to urban sites, designed to complement and enhance the readings and classroom discussions. Destinations will include the British Library, the British Museum, the Victoria and Albert Museum, the Tate Museums, the Globe Theater, and a host of other London cultural institutions.

In addition to the Global Seminar, students will also enroll alongside local students in courses offered by the host institution. QMUL offers programs across a broad range of disciplines, including physical and natural sciences, business and management, engineering, humanities, and social sciences.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (reidhall@columbia.edu).

United Kingdom: The Oxford/Cambridge Scholars Program

Columbia students interested in spending their junior year at Oxford or Cambridge should apply for admission to the Oxford/Cambridge Scholars Program during the first term of their sophomore year. Application to the program is made through the Center for Undergraduate Global Engagement, where a preliminary selection of candidates is made. Designated candidates for admissions then apply to one of the participating colleges of Oxford or Cambridge. Criteria for admission include a very strong academic record at Columbia, as well as commitment to a chosen field of study. Application through the

Columbia Oxford/Cambridge Scholars Program is the only way the College authorizes study at either university.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

LATIN AMERICA AND THE CARIBBEAN

Cuba: The Consortium for Advanced Studies in Cuba

The Consortium for Advanced Studies Abroad (CASA) program in Cuba is a collaborative initiative involving eight U.S. universities: Brown, Columbia, Cornell, Dartmouth, Johns Hopkins, Northwestern, University of Pennsylvania, and Vanderbilt University. CASA-Cuba provides students with a unique opportunity to have direct access to Cuba's leading institution of higher learning, the University of Havana, and to Casa de Las Américas, the Cuban government's premier research institution on Caribbean and Latin American studies, Cuban culture, and the arts. Comprehensive student services support the academic and social experience. The program runs in both fall and spring semesters.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Spring 2021 Study Abroad Update

Based on ongoing worldwide public health concerns, the Center for Undergraduate Global Engagement (UGE) is suspending student participation in all programs offered by partner institutions and organizations (Columbia-approved), as well as incoming and outgoing exchanges.

Suspension of Fall 2020 study abroad

Given the ongoing COVID-19 pandemic and its impact on worldwide travel and global health risks, the Center for Undergraduate Global Engagement (UGE) is suspending undergraduate student participation in study abroad programs for Fall 2020.

Summer study abroad provides a meaningful complement to the College curriculum and can help students prepare for semester- or year-long overseas programs.

Columbia College students who enroll in the Columbia-sponsored summer programs listed below earn direct credit for their courses.

AFRICA AND THE MIDDLE EAST

Jordan/Tunisia: The Middle Eastern and North African Studies Program in Amman and Tunis

This nine-week program allows students to strengthen their skills in Modern Standard Arabic while being introduced to the history in the intersecting regions of the Maghreb and the Middle East. Students take the equivalent of a year of Modern Standard Arabic and receive training in the dialects of the Mashrek and the Maghreb. The language program is complemented by a cultural and historical seminar featuring lectures by prominent specialists from Columbia University and partner institutions in the Middle East and North Africa.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

EAST ASIA

China: Columbia Summer in Beijing: Business Chinese

This ten-week program is based at Peking University and offers advanced Chinese language students an opportunity to gain firsthand experience in the language, culture, and customs that drive the economic development of the world's most populated nation. Students enroll in six weeks of intensive, personalized instruction in business Chinese language classes and four weeks of language practicum placements in Beijing offices of local/multinational companies.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

China: Columbia Summer in Beijing: Chinese Language

This nine-week program immerses students in Beijing and offers four levels of intensive Chinese language studies from first through fourth year. Reading, writing, speaking and listening are emphasized in the classroom, in drill sections, and through private tutorials. Group excursions in and around Beijing and a week-long travel break give students insight into Chinese society and provide a variety of environments in which to practice language skills.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

China: Global Scholars Program: Adaptation to Changing Climates

The Global Scholars Program (GSP) in China consists of a spring course at Columbia, *Principles of Animal Behavior*,

followed by a three-week field study course in China, *Behavioral Adaptation to Changing Climates*. Throughout the program, students will understand how animals cope with and adapt to changing environments. The program explores a broad range of topics in behavioral ecology, teaches hands-on research skills, and allows students to interact with government officials and students in China.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Japan: The Kyoto Consortium for Japanese Studies Program in Advanced and Classical Japanese

This six- or eight-week program offers intensive training in modern and classical Japanese for students who have completed at least one year or three years of Japanese, or the equivalent.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

EUROPE

France: Columbia Summer in Paris

The six-week program offers modules at several levels designed to allow students to work together in small classes to integrate language and cultural studies and to progress in French while using Paris as a learning lab for language, culture, and extracurricular activities.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

France : Columbia Summer Core in Paris: Art Humanities and Music Humanities

This six-week program enables students to complete two Core Curriculum courses, *Art Humanities* and *Music Humanities*, in Paris. The program emphasizes the musical and visual cultures of Paris. Day trips to important sites in the region, such as Chartres and Giverny, will complement the excursions to monuments and musical performances within Paris.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

France : Columbia Summer Undergraduate Math Research Program in Paris

This six-week program provides for intensive mathematical research with students and faculty from Columbia and the Université Denis Diderot in Paris.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Germany : Columbia Summer Core in Berlin: Art Humanities and Music Humanities

This six-week program enables students to complete two Core Curriculum courses, *Art Humanities* and *Music Humanities*, in Berlin. The program emphasizes the musical and visual cultures of German. Two overnight excursions to important sites in Germany will compliment the excursions to monuments and musical performances within Berlin.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Greece: Columbia Summer in Greece: Athens Curatorial Project

This five-week program takes place in various locations in Greece and consists of an intensive curatorial workshop grounded in a seminar highlighting historical, anthropological, and literary approaches to aspects of Greek history and culture. It examines these through the organization of an art exhibition under the general theme of the environment.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Italy: Columbia Summer in Italy: Archaeological Fieldwork

This four-week program provides students with the unique opportunity to excavate at Hadrian's Villa, a UNESCO World Heritage site near Rome and the most important of Roman imperial villas. Students learn archaeological techniques at all levels and think critically about how excavation work allows for deeper insight into the social, political, economic, architectural and artistic history of classical antiquity.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

Italy: Columbia Summer in Venice

This six-week program is based at Ca' Foscari University in Venice and uses an interdisciplinary approach to understanding Italian culture and society through study of its language, literature/film, art history and conservation, and economy. Students are given the opportunity to gain a deeper appreciation of the rich Venetian culture, traditions, and history.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

LATIN AMERICA

Mexico: Columbia Summer in Mexico City: Colonization and Decolonization

This four-week program in Mexico City gives students the opportunity to study the dynamics of civilizational contact, exchange, and conflict in the Americas. It offers the Center for the Study of Ethnicity and Race course "Colonization and Decolonization" in a moveable classroom setting to allow students access to sites of historical and architectural significance, including museums, archives, as well as meetings with local scholars and non-governmental organizations.

For program information, students may consult <https://global.undergrad.columbia.edu/> and email uge@columbia.edu (ogp@columbia.edu).

SUMMER STUDY ABROAD APPROVAL

Students seeking to study abroad during the summer must be approved by the Center for Undergraduate Global Engagement, 606 Kent. Transfer credit for summer classes taken abroad on outside programs is awarded only for foreign-language courses under these conditions:

- Credits for language study at the elementary and intermediate levels are awarded after the student takes a placement exam to determine his/her progress in the language. Advanced foreign-language instruction courses are accepted for academic credit upon review by the appropriate language department.
- The only non-language instruction courses eligible for credit are courses which will satisfy the major or concentration. The courses must be taken abroad in a foreign language and must receive departmental approval to satisfy major or concentration requirements.

Limited exceptions can be made for awarding credit for summer courses taught in English. College credit can be granted provided that the course offers a unique experience, such as a field-studies program or archaeological dig, where the study-abroad site functions as a constituent part of the course, and the program must be approved by the Center for Undergraduate Global Engagement. Departmental approval is required and the course must satisfy major or concentration requirements.

Spring 2021 Study Abroad Update

Based on ongoing worldwide public health concerns, the Center for Undergraduate Global Engagement (UGE) is suspending student participation in all programs offered by partner institutions and organizations (Columbia-approved), as well as incoming and outgoing exchanges.

Suspension of Fall 2020 study abroad

Given the ongoing COVID-19 pandemic and its impact on worldwide travel and global health risks, the Center for

Undergraduate Global Engagement (UGE) is suspending undergraduate student participation in study abroad programs for Fall 2020.

In order to provide the richest and most immersive experience possible to its students, Columbia has established a network of exchange agreements with international institutions. With an exchange agreement, Columbia students may study at a partner institution; in exchange, students from the foreign institution may study at Columbia. Students take regular courses alongside local students, live in campus housing, have an academic adviser, and have access to all university facilities and resources.

EXCHANGE PROGRAMS

Currently, Columbia has undergraduate exchanges with the following institutions:

- Bocconi University
- Boğaziçi University
- Hong Kong University of Science and Technology
- University College London
- University of Hong Kong
- Waseda University

Students who plan to apply to these programs should consult with the Center for Undergraduate Global Engagement, 606 Kent; 212-854-2559; uge@columbia.edu (ogp@columbia.edu).

CREDIT AND GRADING

As with other types of study abroad programs, all academic work completed abroad counts toward the Columbia degree, and students may take classes toward the major with the department's approval.

TUITION AND FINANCES

Columbia College students who attend these exchange programs have the same access to financial aid they would have if they were enrolled in classes on Columbia's New York campus. Columbia students pay their usual Columbia tuition and are responsible for non-academic costs abroad.

Students may direct financial aid and study abroad inquiries to the Financial Aid and Educational Financing, 618 Lerner; 212-854-3711; ugrad-finaid@columbia.edu.

SPECIAL PROGRAMS

Preprofessional Advising

Berick Center for Student Advising
403 Lerner
212-854-6378
preprofessional@columbia.edu

Medical, dental, and other health professional schools prefer that undergraduates complete a four-year program of study toward the bachelor's degree. All health professional schools require prerequisite coursework, but the specific coursework can vary somewhat from program to program and school to school. This coursework can be completed during the undergraduate years along with the Core Curriculum and the major or concentration.

CONCENTRATIONS AND MAJORS

There is no concentration or major preferred by medical school admissions committees. Students are encouraged to pursue a concentration or major in any field that appeals to them. Students concentrating in a non-science area may wish to take one or two extra science courses to demonstrate their interest and aptitude in the sciences. Students should work closely with their advising deans and preprofessional advisers from the Berick Center for Student Advising, as well as their departmental major adviser in planning a program that meets their interests.

PREMEDICAL REQUIREMENTS

It is very important to note that each medical school in the United States and Canada individually determines its own entrance requirements, including prerequisite coursework or expected competencies. Each medical school also sets its own rules regarding acceptable courses or course equivalents. It is therefore essential that students confirm the premedical requirements for those schools to which they intend to apply.

In addition to medical school course requirements, all medical schools currently require applicants to sit for the Medical College Admissions Test (MCAT). The recommended preparation for this exam is:

- 1 year of General Chemistry and General Chemistry Lab;
- 1 year of Organic Chemistry and Organic Chemistry Labs;
- 1 year of Introductory Biology and Biology Lab;
- 1 year of General Physics and Physics Labs;
- 1 semester of Introductory Psychology

At Columbia, the following courses correspond to the above requirements:

Chemistry

Select one of the following three options:

Option 1:

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
------------------------------	---

CHEM UN1500	General Chemistry Laboratory
-------------	------------------------------

Option 2: for students who place into the accelerated track:

CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
-------------	----------------------------------

CHEM UN1507	Intensive General Chemistry Laboratory
-------------	---

or CHEM UN1500	General Chemistry Laboratory
----------------	------------------------------

Option 3: available to students depending on results of placement exam:

CHEM UN1507	Intensive General Chemistry Laboratory
-------------	---

CHEM UN2045 - CHEM UN2046	INTENSIVE ORGANIC CHEMISTRY and Intensive Organic Chemistry II (Lecture) (formerly CHEM W3045-W3046)
------------------------------	--

CHEM UN2545	Intensive Organic Chemistry Laboratory
-------------	---

Organic Chemistry

CHEM UN2443 - CHEM UN2444	Organic Chemistry I (Lecture) and ORGANIC CHEMISTRY II-LECTURES (formerly CHEM W3443-W3444)
------------------------------	--

CHEM UN2493 - CHEM UN2494	Organic Chemistry Laboratory I (Techniques) and ORGANIC CHEM. LAB II SYNTHESIS
------------------------------	---

Biology

BIOL UN2005 - BIOL UN2006	Introductory Biology I: Biochemistry, Genetics & Molecular Biology and INTRO BIO II:CELL BIO,DEV/PHYS
------------------------------	---

BIOL UN2501	Contemporary Biology Laboratory (or other Biology laboratory approved by premedical adviser)
-------------	--

Physics

Select one of the following three options:

Option 1:

PHYS UN1201 - PHYS UN1202	General Physics I and General Physics II
------------------------------	---

PHYS UN1291 - PHYS UN1292	General Physics Laboratory and General Physics Laboratory II
------------------------------	---

Option 2:

PHYS UN1401 - PHYS UN1402	Introduction To Mechanics and Thermodynamics and INTRO ELEC/MAGNETISM # OPTCS
------------------------------	--

Or

PHYS UN1601 - PHYS UN1602	Physics, I: Mechanics and Relativity and Physics, II: Thermodynamics, Electricity, and Magnetism
------------------------------	---

Also select one of the following laboratories:

PHYS UN1291 - PHYS UN1292	General Physics Laboratory and General Physics Laboratory II
------------------------------	---

PHYS UN1493	Introduction to Experimental Physics
-------------	--------------------------------------

PHYS UN1494	Introduction to Experimental Physics
-------------	--------------------------------------

PHYS UN2699	Experiments in Classical and Modern Physics
-------------	---

PHYS UN3081	Intermediate Laboratory Work
-------------	------------------------------

Option 3:

PHYS UN2801 - PHYS UN2802	Accelerated Physics I and Accelerated Physics II
------------------------------	---

Also select one of the following laboratories:

PHYS UN1493	Introduction to Experimental Physics
-------------	--------------------------------------

PHYS UN1494	Introduction to Experimental Physics
-------------	--------------------------------------

PHYS UN2699	Experiments in Classical and Modern Physics
-------------	---

PHYS UN3081	Intermediate Laboratory Work
-------------	------------------------------

Psychology

PSYC UN1001	The Science of Psychology
-------------	---------------------------

While these courses are recommended for MCAT preparation, students should note the following additional information:

- **English:** Most medical schools require one year of English, emphasizing skill acquisition in writing. Columbia College students fulfill this requirement with University Writing (ENGL CC1010) and *Masterpieces of Western Literature and Philosophy (Literature Humanities)* (HUMA CC1001-HUMA CC1002).
- **Mathematics:** Although not required by most medical schools, calculus is required for Columbia chemistry sequences and therefore all premedical students should have successfully completed the equivalent of one semester of Calculus. Medical schools that do have a mathematics requirement typically expect one semester of calculus and one semester of statistics. Any Columbia calculus and statistics classes will meet the requirement and it is sometimes possible to use AP credit toward this requirement.
- **Biochemistry:** An increasing number of medical schools require one semester of biochemistry. While Columbia's introductory biology sequence covers many foundational concepts of biochemistry, which may prepare students for the MCAT, many medical schools will require a course in Biochemistry prior to matriculation.
- **Advanced Biology:** A small number of schools require more than one year of introductory biology and many of these recommend specific advanced level classes.

- **Social and Behavioral Science:** A number of schools have begun to add social and behavioral science courses into their requirements, including, but not limited to, psychology and sociology.

Students should note that medical schools' stated prerequisites are subject to change from year to year and it is the responsibility of students to confirm the prerequisite requirements for the medical schools to which they intend to apply. Most medical schools list their requirements in greater detail on their individual websites. More information can also be found from the [Association of American Medical Colleges \(AAMC\)](#).

BARNARD COURSES

While it is preferred that students complete their premedical requirements with Columbia College courses, students may take premedical requirements at Barnard if course prerequisites have been satisfied in advance. However, students should keep in mind that the Columbia Biology and Chemistry Departments may not accept Barnard courses toward the concentration and major. Students should consult their departmental advisers before registering for a Barnard course.

STUDENTS WITH ADVANCED PLACEMENT

Advanced Placement (AP) credit is accepted by some schools, but not all. Students are responsible for monitoring the requirements of each school to which they intend to apply.

Generally, students with AP credit are strongly advised to take further courses in the field in which they have received such credit.

APPLICATION TO HEALTH PROFESSION PROGRAMS

Students must apply for admission to health profession schools more than one year in advance of the entry date. Students who are interested in going directly on to health profession schools following graduation should complete all prerequisite courses required for the Medical College Admissions Test (MCAT) by the end of the junior year. It is entirely acceptable — and often preferred — for students to take time between undergraduate and health profession school and thus to wait to apply to these schools for one or more years.

Students planning to apply to medical or dental school should be evaluated by the Premedical Advisory Committee in the [Berick Center for Student Advising](#) prior to application. A Premedical Advisory Committee application is made available each year in December. For more information regarding this process, please consult with a [preprofessional adviser](#) in the [Berick Center for Student Advising](#), 403 Lerner preprofessional@columbia.edu.

CLINICAL AND RESEARCH EXPOSURE

Preprofessional Advising maintains an online list of many different clinical volunteer and research opportunities across New York City and beyond. These opportunities can offer students the chance to explore the health profession careers and to interact with patients, and these experiences are viewed by many medical schools as essential preparation. Students are therefore strongly encouraged to spend time volunteering or working in clinical and research environments before applying to medical school.

ENGINEERING

The Combined Plan (3-2) Program

The Combined Plan (3-2) Program provides students with the opportunity to earn both the B.A. degree at Columbia College and the B.S. degree at The Fu Foundation School of Engineering and Applied Science in five years. Columbia College students must apply in their junior year to The Fu Foundation School of Engineering and Applied Science. In order to apply, students must have completed or be in the process of completing the pre-engineering courses including:

Mathematics

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
MATH UN1202	CALCULUS IV

Chemistry

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES (at a minimum)
-------------	---

Physics

Select one of the following three sequences:

PHYS UN1401	Introduction To Mechanics and Thermodynamics
- PHYS UN1402	and INTRO ELEC/MAGNETISM # OPTCS
PHYS UN1601	Physics, I: Mechanics and Relativity
- PHYS UN1602	and Physics, II: Thermodynamics, Electricity, and Magnetism
PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

Some programs require a third semester of Physics

Computer Science

Select one of the following four courses, depending on program:

ENGI E1006	Introduction to Computing for Engineers and Applied Scientists
COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB

COMS W1007	Honors Introduction to Computer Science
------------	---

Economics

ECON UN1105	Principles of Economics
-------------	-------------------------

Laboratory Requirement (choose one of the following)*:

PHYS UN1493	Introduction to Experimental Physics
PHYS UN1494	Introduction to Experimental Physics
CHEM UN1500	General Chemistry Laboratory

*Note that some majors require a specific lab in either Chemistry or Physics, or both

Students must also complete the requirements for a Columbia College major or concentration, as well as any additional pre-curricular requirements for the specific engineering major (see specific requirements on the [Undergraduate Admissions](#) website). In the fourth and fifth years of study, to be completed at The Fu Foundation School of Engineering and Applied Science, requirements for the major at The Fu Foundation School of Engineering and Applied Science must be completed in consultation with the major adviser there. Students with more than 35 transfer credits are not eligible for the program. Housing and financial aid will be continued.

Each fall, Undergraduate Admissions conducts information sessions in which students meet with the Combined Plan Program administrator. For more information, students should contact their advising deans in the [Berick Center for Student Advising](#), 403 Lerner, or email combinedplan@columbia.edu.

The 4-1 Program at Columbia College

The 4-1 Program provides students in The Fu Foundation School of Engineering and Applied Science (SEAS) the opportunity to obtain a B.A. degree from Columbia College with one additional year of study after completion of four years of study and fulfillment of all requirements for the B.S. degree in engineering. SEAS students who are interested in the 4-1 Program must declare their interest in the spring of their sophomore year and plan their next three years of study with the program adviser. The fifth year of study commences in the fall semester and students are required to conclude their studies after two full-time semesters of enrollment. Students are expected to earn 31 credits while enrolled at Columbia College.

The program is selective, and admission is based on the following factors:

1. granting of the B.S. at SEAS at the end of the fourth year;
2. the fulfillment of all Columbia College [Core Curriculum](#) requirements by the end of the fourth year at SEAS;
3. maintaining a minimum GPA of 3.0 in Columbia College Core courses as well as those courses counting toward the Columbia College major;

4. creating a plan to complete a Columbia College major or concentration by the end of their fifth year that is approved by the appropriate director of undergraduate studies.

For more information, students may contact their advising dean in the Berick Center for Student Advising, 403 Lerner.

THE INTERNATIONAL AFFAIRS FIVE-YEAR PROGRAM

The International Affairs Five-Year Program offers Columbia College students the opportunity to earn both B.A. and M.I.A. degrees in five years. Students apply to the program during their junior year through the School of International and Public Affairs Admissions Office in the School of International and Public Affairs (SIPA). Once admitted to the joint program, students complete their senior year at Columbia College, starting in the fall semester, but the bulk of courses taken are graduate-level ones acceptable to SIPA. Admission to the joint program does not constitute admission to SIPA.

To be eligible for the program, students must have been enrolled in Columbia College for at least four semesters by the end of the junior year; have completed a minimum of 93 credits; achieved competence in a modern foreign language; completed all Columbia College Core Curriculum requirements; and satisfied all major/concentration requirements, with the exception of six to eight credits, or two courses. These two courses toward the major or concentration may be taken during the senior year while completing the 24 points required by SIPA. Three points of SIPA requirements may be taken in the junior year. Summer courses between the junior and senior year may be considered. Students must receive the B.A. with a satisfactory GPA. Upon formal admission to SIPA after their senior year, students may apply for housing and financial aid.

For more information, students may contact their advising deans in the Berick Center for Student Advising, 403 Lerner.

THE JULLIARD SCHOOL

Exceptionally talented Columbia College students have access to instrumental, composition, and voice instruction at The Juilliard School through two distinct programs:

The Cross-Registration Program

Students can be invited to cross-register for weekly instrumental (classical and jazz), composition, and vocal instruction with the Juilliard faculty, after completing the formal application and successfully auditioning at Juilliard. Annual juries are held at the end of each academic year, which determine eligibility to continue in the program. Other types of ensembles or classes at Juilliard are generally not available for cross-registration.

Applicants to the cross-registration program may be first-year applicants or current students within Columbia College. Students in the cross-registration program may participate

in the program for up to four years of study and have the option of applying to the joint program in their junior year. Columbia College students interested in this program must submit a Juilliard Application for Admission, including pre-screening materials.

The Joint BA/MM Program

Columbia College students already in the cross-registration program can apply to participate in the joint program that offers students the opportunity to earn a B.A. degree from Columbia and an M.M. degree from Juilliard in five years. (Voice candidates may need six years of study to complete the program depending on preparation). It is recommended that students interested in the program complement their cross-registration instruction with music classes and participation in ensembles at Columbia. However, cross-registration participants do not have any specific course requirements at Columbia in order to qualify for admission to the M.M. at Juilliard.

If admitted to begin the M.M. program at Juilliard during their senior year at Columbia College, students normally spend two subsequent years (three for voice majors) primarily at Juilliard, while finishing any remaining undergraduate requirements at Columbia College. Students receiving Columbia financial aid are subject to Juilliard's financial aid policies during their time at Juilliard, and are not eligible for aid from Columbia.

To plan accordingly, students who wish to pursue the joint program should consult with Alex España, Associate Dean, in the Berick Center for Student Advising. To apply, Columbia College students must have completed 94 points of coursework, including the Core Curriculum requirements and major or concentration requirements for the B.A. within three years, and have participated in the cross-registration program for at least one year.

Cross-registration participants interested in applying for the program must submit the Juilliard Application for Admission by the appropriate deadline. The pre-screening (if applicable) is waived. Live auditions are held at The Juilliard School in early March.

ACCELERATED INTERDISCIPLINARY LEGAL EDUCATION PROGRAM

The Accelerated Interdisciplinary Legal Education (AILE) Program provides Columbia College students with outstanding records the opportunity to earn both B.A. and J.D. degrees in six years. Selected students matriculate at the Law School after their junior year, having completed the required 93 points including the Columbia College Core Curriculum requirements and a concentration. Interested students must submit an application in the spring of their junior year to the Office of Preprofessional Advising in the Berick Center for Student Advising.

Columbia College may nominate one or two juniors each year for consideration; the final admission determination is made by

the Law School Admissions Committee. Transfer students and students with fewer than six semesters of study as Columbia College students on Columbia's New York campus (not abroad) before entering the Law School are not eligible for the program.

Prospective participants in this program must take the Law School Admission Test (LSAT) or Graduate Record Examination (GRE) no later than the February administration of the year of intended enrollment. After formal admission to the Law School, the students are withdrawn from the College. In the student's second and third years at the Law School, 12 points of coursework taken only at the Graduate School of Arts and Sciences must be completed. The courses must be approved beforehand by the student's preprofessional adviser. AILE candidates are required to apply for the B.A. degree the term before they expect to graduate.

Students should inform their advising deans in the Berick Center for Student Advising of their plans to graduate in order to be considered for honors and Phi Beta Kappa. AILE students receive Columbia College and Law School degrees at the same time. Once admitted to the Law School, students interested in financial aid and housing should apply through the Law School.

For more information, students may contact Preprofessional Advising, 403 Lerner, 212-854-6378; preprofessional@columbia.edu.

PUBLIC POLICY AND ADMINISTRATION FIVE-YEAR PROGRAM

The Graduate Program in Public Policy and Administration provides Columbia College students with the opportunity to earn both B.A. and M.P.A. degrees in five years. Students apply to the program during their junior year through the School of International and Public Affairs Admissions Office. Once admitted to the joint program, students complete their senior year at Columbia College, starting in the Fall semester, but the bulk of courses taken are graduate-level ones acceptable to SIPA. Admission to the joint program does not constitute admission to SIPA.

To be eligible for the program, students must have been enrolled in Columbia College for at least four semesters by the end of the junior year; completed a minimum of 93 credits; achieved competence in a modern foreign language; completed all College Core Curriculum requirements; and satisfied all major/concentration requirements, with the exception of 6 to 8 credits, or two courses. These two courses toward the major or concentration may be taken during the senior year while completing the 24 points required by SIPA. Three points of SIPA requirements may be taken in the junior year. Summer courses between the junior and senior year may be considered. Students must receive the B.A. with a satisfactory GPA. Upon formal admission to SIPA after their senior year, students may apply for housing and financial aid.

For more information, students may contact their advising dean in the Berick Center for Student Advising, 403 Lerner.

COLUMBIA-HOWARD EXCHANGE PROGRAM

Columbia College offers students the opportunity to participate in a domestic exchange program with one of the most prominent historically black universities: Howard University in Washington, D.C. The program permits Columbia students to spend a semester or academic year at Howard. In exchange, it allows Howard students to spend a semester or academic year at Columbia.

Columbia students who participate in the program pay tuition to Columbia College and pay room and board expenses directly to Howard University.

Courses taken at Howard are treated as transfer credit. Transfer credit may be earned for approved courses in which students receive a letter grade of C- or higher. However, grades are not calculated into a student's grade point average. Courses taken to satisfy major requirements must be approved by the appropriate academic department.

To be eligible for participation, students should be in good standing with the College and have a cumulative GPA of 2.8 or higher. Interested students should submit applications by the March 15 for the fall semester and by November 1 for the spring semester. Please note: these dates were determined in July 2020 and are subject to change.

Applications and additional information may be obtained from the Berick Center for Student Advising, 403 Lerner; 212-854-6378; csa@columbia.edu.

ACADEMIC HONORS, PRIZES, AND FELLOWSHIPS

DEAN'S LIST

During each academic term, students who have earned a minimum GPA of 3.6 or better in 12 or more points of letter credit in the preceding term are placed on the Dean's List.

The grade P is considered neutral when the averages are figured, and the dividing factor is reduced by the number of points taken for Pass credit. Students who have received grades of D, F, W (or UW pre-Spring 2014) during the term are not eligible for consideration. In any given semester, the mark of YC (year course) precludes the attainment of Dean's List status until the grade for the entire year's coursework is awarded. Students who receive the grade of IN (incomplete), **approved in advance** by the Committee on Academic Standing, are eligible for Dean's List only after all IN grades are changed to letter grades. Students who have been found responsible by the Office of Student Conduct and Community Standards for a violation of academic integrity will not be eligible for the Dean's List during the term of the sanction.

COLLEGE (LATIN) HONORS

The Bachelor of Arts degree will be awarded with honors in three categories (*cum laude*, *magna cum laude*, *summa cum laude*) to the top 25 percent of the graduating class. Honors are determined by an undergraduate student's cumulative GPA for all work at Columbia, with the top 5 percent of the graduating class being awarded *summa cum laude*, the next 10 percent being awarded *magna cum laude*, and the remaining 10 percent awarded *cum laude*.

College honors are the highest academic recognition awarded by the College. There is no separate consideration of honors for October or February graduates. The honor is officially noted on the diploma and transcript of students who have graduated. October and February graduates may ask the Registrar to add an honors notation to an already issued diploma.

The Committee on Honors, Awards, and Prizes considers both academic standing and disciplinary standing within the College when awarding College honors.

VALEDICTORIAN AND SALUTATORIAN

The Committee on Honors, Awards, and Prizes reviews the academic records of the most exceptional students nominated by the faculty for Valedictorian and Salutatorian. Selection is based not on GPA alone, but on the breadth, depth, rigor

of academic program, high quality of academic achievement, departmental recommendations, and outstanding academic work beyond that which is required for the degree.

The Committee on Honors, Awards, and Prizes considers both academic standing and disciplinary standing within the College when awarding Valedictorian and Salutatorian.

DEPARTMENTAL HONORS

Departmental honors may be established and awarded by any Columbia College department or academic program, and is recorded on a student's final transcript. Students should consult with their director of undergraduate studies no later than the beginning of the first term of their senior year if they wish to be considered for departmental honors. Students who are awarded departmental honors are notified by their department in mid-May. Not all departments and programs offer departmental honors.

College guidelines for departmental honors include the following four criteria:

Departmental honors are awarded to no more than 10%, or, in small departments, one member, of the graduating majors (including all October, February, and May degrees);

A grade point average (GPA) of at least 3.6 in major courses is expected for a student to be considered for departmental honors;

An honors thesis or equivalent project of high quality should be required by each department or academic program in order to receive departmental honors;

Academic departments and programs consider both academic standing and disciplinary standing within the College when awarding departmental honors.

PHI BETA KAPPA

This academic society was founded in 1776 to recognize and celebrate friendship, morality, and learning. The Columbia College Delta chapter was formed in 1869. Each year, 10% of the senior class are inducted into Phi Beta Kappa by faculty who are members of the society. Two percent are elected in November and the other eight percent are elected in the spring. Selection is based not only on academic achievement, but also on evidence of intellectual promise, character, and achievement outside the classroom. Academic achievement is measured by strength and rigor of program, as well as by grades and faculty recommendations. Students may not apply for Phi Beta Kappa nor may they solicit faculty for recommendations.

As with graduation honors, October and February graduates are considered along with May graduates. Election to Phi Beta Kappa is noted on a student's transcript.

The faculty Phi Beta Kappa selection committee considers both academic standing and disciplinary standing within the College when electing new members to the society.

While prizes are typically awarded annually, they are done so at the discretion of the respective selection committees. Hence, should a selection committee decide, in a particular year, that there are no suitable candidates; the prize will not be awarded. Unless otherwise noted, these prizes are awarded to Columbia College students only.

GENERAL PRIZES

ALUMNI ASSOCIATION ACHIEVEMENT AWARD

(1947) A trophy, in the form of a Columbia lion, awarded annually to the member of the senior class who is judged to be most outstanding for qualities of mind, character, and service to the College.

ALUMNI PRIZE

(1858) Awarded annually by the Alumni Association to the senior judged by classmates to be the most faithful and deserving.

CHARLES H. BJORKWALL PRIZE

(1937) Established by Ottilie Emma Bjorkwall in memory of her brother, Dr. Charles H. Bjorkwall. Awarded annually to a member of the senior class for unselfish service to the College community.

EDWARD SUTLIFF BRAINARD MEMORIAL PRIZE

(1920) Established by Miss Phebe Sutliff in memory of her nephew, Edward Brainard Sutliff, CC'21. Awarded annually to the member of the graduating class who is judged by classmates to be most worthy of distinction for qualities of mind and character.

JAMES CHRISTOPHER CARALEY MEMORIAL PRIZE

(1984) Established in memory of James Christopher Caraley, 1959–1979, CC'81, by his family and friends. Awarded annually to that member of the junior class who has demonstrated the greatest commitment to the value of preservation of the natural environment or of world peace and order.

ROBERT LINCOLN CAREY MEMORIAL PRIZE

(1967) A trophy, in the form of a lion, awarded annually by the Alumni Association to the senior who, through a combination of leadership qualities as exercised in the non-athletic extracurricular program of Columbia College and outstanding achievement in the academic program of the College, best exemplifies the ideals that Robert Lincoln Carey sought to engender in the students of Columbia College.

STANLEY I. FISHEL/ZETA BETA TAU PRIZE

Established in honor of Stanley I. Fishel, CC'34, who was president of ZBT while at Columbia and later national president, and who believed in the important role fraternities can play in the development of undergraduates. Awarded to an undergraduate fraternity member who has demonstrated

leadership, academic achievement, and participation in athletics or other campus activities.

RICHARD H. FOX MEMORIAL PRIZE

(1927) Established by Mr. and Mrs. Leon S. Fox in memory of their son, Richard H. Fox, CC'21. Awarded to the senior who, in the judgment of the King's Crown Advisory Committee, has shown to the College the greatest interest and helpfulness. The student must have participated in some nonathletic activities and must be one who combines intelligence with a kindly interest in his or her fellows.

ROBERT SHELLAW GERDY PRIZE

(1969) Established by Mr. and Mrs. Irving Gerdy in memory of their son, Robert Shellaw Gerdy, CC'39. Awarded to that member of the graduating class who, throughout the undergraduate years, has made a significant contribution as a member of the staff of one or more College student publications, especially Jester, Columbia Review, and Spectator.

ROBERT HARRON AWARD

(1972) Established by his friends in memory of Robert Harron. Awarded annually to a member of the junior class for qualities of grace and generosity.

KING'S CROWN AWARD

(1916) Gold and silver insignia in the form of King's Crowns, each distinguished by a device symbolic of a particular activity, awarded annually by the King's Crown Advisory Committee in recognition of significant participation in any activity under its jurisdiction. Conferred each spring on the basis of written nominations solicited from the governing board of each eligible organization.

MILCH PRIZE

(1948) Established by Dr. and Mrs. Henry Milch. Awarded annually to the member of the junior class who, by leadership in extracurricular as well as scholastic activities, has, in the judgment of teachers and classmates, done the most to enhance the reputation of Columbia College.

LEONARD A. PULLMAN MEMORIAL PRIZE

(1965) A certificate and the inscription of the student's name on a plaque in Alfred Lerner Hall, awarded annually to a member of the senior class who displays those qualities of outstanding scholarship and significant service to the College exemplified in the life of Leonard Pullman, CC'62. The recipient must occupy a position of responsibility in a nonathletic Columbia College activity.

CHARLES M. ROLKER, JR. PRIZE

(1909) Established by Mrs. C. M. Rolker in memory of her son, Charles M. Rolker, Jr., CC 1907. Awarded annually to the member of the graduating class who is judged by classmates to be most worthy of special distinction because of scholarship, participation in student activities, or in any combination thereof.

VAN AM PRIZE

(1925) Established by the Class of 1898 on the occasion of its twenty-fifth anniversary. Awarded to the member of the sophomore class who is most distinguished for service, character, and courtesy in relations with faculty members, fellow students, and visitors. A donation is presented to the student activity of the winner's choice.

GENERAL ACADEMIC PRIZES

ALBERT ASHER GREEN MEMORIAL PRIZE

(1913) Established by Mr. and Mrs. Asher Green in memory of their son, Albert Asher Green, CC 1914. Awarded to the senior who has been a student in good standing in the College for at least three years and who has made the best record of scholarship.

DAVID B. TRUMAN ALUMNI AWARD

(1970) Established in honor of David B. Truman, former Dean of the College. A lion trophy donated annually by the Alumni Association to the Columbia College student who has made the most distinguished contribution to the academic affairs of the College.

PRIZES IN THE CORE CURRICULUM

JOSHUA A. FEIGENBAUM PRIZE IN LITERATURE HUMANITIES

(2004) Established by Joshua Feigenbaum and awarded to a student who is judged by the faculty to have exhibited excellence in Literature Humanities.

WALLACE A. GRAY PRIZE IN LITERATURE HUMANITIES

(2004) Established in memory of the late Professor Wallace Gray and awarded annually to the Columbia College undergraduate who is judged by the faculty to have written the best essay in Literature Humanities.

DEAN HAWKES MEMORIAL PRIZE IN THE HUMANITIES

(1943) Established by a committee of the Class of 1943 in memory of Dean Herbert E. Hawkes. Awarded annually to the member of the junior class who is judged to be the most deserving on the basis of work in the humanities.

JONATHAN THRONE KOPIT PRIZE IN LOGIC AND RHETORIC

(1997) Established by Mrs. Ina Cohen in memory of her husband, Jonathan Throne Kopit, CC'68. Awarded annually to the Columbia College student who, in the opinion of the departmental committee, has made the most significant progress in University Writing.

JAMES P. SHENTON PRIZE IN CONTEMPORARY CIVILIZATION

(2004) Established by the Committee on the Core and the Office of the Dean of the College in memory of Professor James P. Shenton, CC'49 and GSAS'55. Awarded annually to the Columbia College undergraduate who is judged by

the faculty to have written the best essay in Contemporary Civilization.

PRIZES IN THE HUMANITIES

DINO BIGONGIARI PRIZE

(1954) Established by the former students and friends of Professor Dino Bigongiari, awarded annually to the senior who has written an outstanding essay on Italian civilization or whose work in the regular Italian courses is judged most worthy of distinction.

BUNNER PRIZE

(1896) Established by friends of the late Henry Cuyler Bunner. Awarded to the candidate for a degree in Columbia University who has submitted the best essay on a topic dealing with American literature. The topic to be selected in connection with course or seminar work in American literature and approved by the chairman of the Bunner Prize Committee.

DOUGLAS GARDNER CAVERLY PRIZE

(1994) Established in memory of Douglas Gardner Caverly, CC'68, by his family and friends, and awarded for outstanding performance by a graduating major in Classics.

DEUTSCHER VEREIN PRIZE IN GERMAN

(1917) Awarded annually to the junior or senior who submits the winning essay on a prescribed topic in German literature.

EARLE PRIZE IN CLASSICS

(1907) Established in memory of Mortimer Lamson Earle, CC 1886, lecturer and professor in the Department of Classics. Awarded for excellence in sight translation of passages of Greek and Latin. Only candidates for the degree of Bachelor of Arts may compete.

JAMES GUTMANN PRIZE IN PHILOSOPHY

(1987) Established in honor of James Gutmann, this prize is awarded to a graduating Columbia College senior in Philosophy who plans to pursue graduate work in the field.

ADAM LEROY JONES PRIZE IN LOGIC

(1934) Established by Mrs. Adam Leroy Jones in memory of her husband, who was Associate Professor of Philosophy and Director of University Admissions, 1909–1934. Awarded to a student in the College for the best essay on any topic in the philosophy of science or in the foundation of logic. It may be either a topic connected with seminar work in the Department of Philosophy or one approved by the Jones Prize Committee.

HELEN AND HOWARD R. MARRARO PRIZE

(1972) Established in honor of Professor Howard R. Marraro. Awarded to an undergraduate of high academic distinction and promise in an area of study concerned with Italian culture, including art, music, comparative literature, history, economics, government, or in any other academic discipline.

BENJAMIN F. ROMAINE PRIZE FUND

(1922) Gift of Benjamin F. Romaine to provide an annual prize for proficiency in Greek language and literature.

ERNEST STADLER PRIZE FOR THE EXCELLENCE IN THE STUDY OF CLASSICAL ANTIQUITY

(2006) Established by Dr. Richard A. Brooks, CC'53, and Dr. Eva Stadler Brooks, BC'53, in memory of Dr. Stadler Brooks' father, Ernest Stadler, who had a life-long commitment to the study of classical antiquity. The prize may be awarded annually to a graduating senior of Columbia College who is judged by the faculty to have demonstrated academic excellence through course work and the writing of a senior essay on some aspect of the history or culture of the classical world.

PRIZES IN THE SOCIAL SCIENCES

CHARLES A. BEARD PRIZE IN POLITICAL SCIENCE

(1963) Established by the Honorable Albert Levitt. Awarded to the student who writes the best paper in political science during the academic year.

CARL B. BOYER MEMORIAL PRIZE

(1978) Established by Mrs. Carl B. Boyer in memory of her husband. Awarded annually to the Columbia undergraduate who writes the best essay on any topic in the history of science or mathematics as judged by a faculty committee.

SHANLEY & CHAMBERLAIN PRIZE

(2019) Annual award for best undergraduate essay in the areas of the American presidency, Congress, or public policy.

CHANLER HISTORICAL PRIZE

(1877) Established at the bequest of J. Winthrop Chanler, CC 1847. Awarded to the senior who submits the best essay on a topic dealing with the history of civil government in America. The topic to be selected in conjunction with seminar work in one of the social science departments and approved by the chairperson of the Chanler Prize Committee.

TARAKNATH DAS FOUNDATION AWARD

(1957) Awarded annually to a student in Columbia College, the School of General Studies, or Barnard College for excellence in Asian studies, particularly in the history and culture of India.

ALBERT MARION ELSBERG PRIZE

(1912) Established by Mrs. Albert Elsberg in memory of her son, Albert Marion Elsberg. Awarded to a student with sophomore, junior, or senior standing who has demonstrated excellence in modern history.

SANFORD S. PARKER PRIZE

(1980) Funded by the family and friends in memory of Sanford S. Parker, CC'37. Awarded to a Columbia College senior going on to graduate study in economics who shows promise of doing original work and has already demonstrated boldness of thought and a commitment to excellence, whose interests are wide, heart kind, and spirit generous.

CAROLINE PHELPS STOKES PRIZE

(1910) Established at the bequest of Caroline Phelps Stokes. Awarded to a student who has been a degree candidate for at least one academic year at Columbia College or Barnard College, and who has written the best essay on any topic concerning the rights of man. The topic to be selected in connection with course or seminar work and approved by the Stokes Prize Committee.

ALAN J. WILLEN MEMORIAL PRIZE

(1968) Established by classmates and friends of Alan J. Willen, CC'64, in his memory. Awarded to the Columbia College student who writes the best seminar paper on a contemporary American political problem. The selection is made jointly by representatives of the Departments of History and Political Science.

MYRA KRAFT PRIZE FOR SUPERIOR ACADEMIC ACHIEVEMENT IN THE STUDY OF HUMAN RIGHTS

(2013) Established to honor the memory of Myra Kraft, beloved wife of Robert Kraft, CC'63 and Trustee Emeritus, this prize is awarded to the Columbia College student majoring in Human Rights who has the highest grade point average and a superior record of academic achievement in Human Rights.

PRIZES IN THE NATURAL AND PHYSICAL SCIENCES

ALFRED MORITZ MICHAELIS PRIZE

(1926) Established by Mrs. Jeanette Michaelis in memory of her son, Alfred Moritz Michaelis, CC 1920. Awarded to the member of the graduating class who has completed with the most proficiency the sequence of courses in physics that corresponds most nearly to the sequence given by the late Professor George V. Wendell.

PROFESSOR VAN AMRINGE MATHEMATICAL PRIZE

(1910) Established by George G. DeWitt, CC 1867. Awarded to three College students (a first-year, a sophomore, and a junior) who are deemed most proficient in the mathematical subjects designated during the year of the award.

JOHN DASH VAN BUREN, JR. PRIZE IN MATHEMATICS

(1906) Established by Mrs. Louise T. Hoyt in memory of her nephew, John Dash Van Buren, Jr., CC 1905. Awarded to the degree candidate who writes the best examination on subjects prescribed by the Department of Mathematics.

PRIZES IN THE CREATIVE AND PERFORMING ARTS

SEYMOUR BRICK MEMORIAL PRIZE

(1969) Established by Mrs. Seymour Brick and her son, Richard, in honor of their husband and father, Seymour Brick, CC'34. Awarded to the Columbia College student who submits the best one-act or full-length play as judged by the Department of English and Comparative Literature.

KAREN OSNEY BROWNSTEIN WRITING PRIZE

(1991) Established by Neill H. Brownstein, CC'66, in memory of Karen Osney Brownstein. Awarded to a graduating senior in Columbia College who has written a single piece or a body of work so distinguished in its originality of concept and excellence of execution that it fairly demands the award, support, and recognition the prize intends.

GEORGE WILLIAM CURTIS PRIZE

(1902) Established by the late Samuel Putnam Avery, CC 1896, an associate of George William Curtis. Awarded to students in the College for excellence in the public delivery of English orations.

ROBERT W. GOLDSBY FUND

(2019) Awarded to the Columbia College student who demonstrates excellence in the dramatic arts.

PHIOLEXIAN CENTENNIAL WASHINGTON PRIZE

(1902) Gift of J. Ackerman Coles, CC 1864. Awarded once every four years to the student in the college who shall be deemed most worthy, upon delivery of an original address on a subject concerning public affairs.

PHIOLEXIAN PRIZE FUND

(1904) A gift of the Philolexian Society, the income from which shall be used for prizes in Columbia College for debating, essays, short stories, and poetry.

AUSTIN E. QUIGLEY PRIZE

(2010) The Austin E. Quigley prize for outstanding artistic and intellectual achievement may be awarded to a Columbia College senior majoring in Drama and Theatre Arts. Named in honor of Columbia College's dean from 1995-2009, the prize is funded by Nobel Laureate Richard Axel, CC'67 and University Professor of Biochemistry and Molecular Biophysics.

THE LOUIS SUDLER PRIZE IN THE ARTS

(1983) Awarded annually to a senior who, in the opinion of the Faculty, has demonstrated excellence of the highest standards of proficiency in performance or execution or in the field of composition in one of the following general areas of performing and creative arts: music, theatre, painting, sculpture, design, architecture, film or dance.

VAN RENSSELAER PRIZE

(1926) Gift of Maximilian Foster. Awarded to the candidate for a degree in Columbia University who is the author of the best example of English lyric verse. Material must be submitted to the Department of English and Comparative Literature by April 1.

GEORGE EDWARD WOODBERRY PRIZE

(1935) Established by the Woodberry Society of New York. Awarded every second year to an undergraduate student in Columbia University for the best original poem.

JARVIS AND CONSTANCE DOCTOROW FELLOWSHIP

(2005) Established by the Jarvis and Constance Doctorow Foundation, this fellowship is awarded annually to a Columbia College senior for one year of study at St. Edmund Hall, Oxford University.

HENRY EVANS TRAVELLING FELLOWSHIP

(1928) Established by Mrs. Henry Evans in memory of her husband, Henry Evans CC 1881, this fellowship is awarded annually to graduating seniors at Columbia College who are planning to undertake a research project of a creative nature that requires travel rather than formal graduate study.

HOLTHUSEN-SCHINDLER ENDOWMENT FUND

(2000) Established through a bequest from the estate of Lenore S. Holthusen GS'51, the widow of Hen Holthusen CC 1915, LAW 1917, this scholarship is awarded to graduates of Columbia College who continue their education at Columbia Law School.

EURETTA J. KELLETT FELLOWSHIPS

(1932) Established through a bequest from the estate of Eurette Jane Schlegel, this fellowship is awarded to Columbia College seniors who have shown exceptional proficiency in the study of liberal arts for one or two consecutive years of study at Oxford University or Cambridge University.

SPECIAL UNDERGRADUATE FELLOWSHIPS**COLUMBIA COLLEGE SCIENCE SCHOLARSHIP**

(2018) Awarded to outstanding undergraduate sophomores majoring in biology, chemistry, chemical physics, biophysics,

or neuroscience and behavior for summer undergraduate research in one of the labs of the Columbia College Science Scholars faculty.

BEESEN GLOBAL EXPERIENCE TRAVEL FELLOWSHIPS

(2015) Established by Charles F. Beesen LS'58, this fellowship is awarded annually to undergraduate students of Columbia College and Barnard who are not native speakers of French for summer study abroad in Paris.

THE CLASS OF 1939 SUMMER RESEARCH FELLOWSHIP

(1989) Established by the Class of 1939 in honor of the 50th anniversary of their graduation, this fellowship grants students the opportunity to pursue their intellectual goals, gain valuable research experience, and cultivate stronger relationships with faculty members.

HARVEY KRUEGER GLOBAL EXPERIENCE FELLOWSHIP

Established by Harvey M. Krueger CC'51, LAW'53, this fellowship is awarded to Columbia College students for study abroad or independent research projects in Israel or Poland.

HERBERT DERESIEWICZ SUMMER RESEARCH FELLOWSHIP

(2011) Established by Robert Leslie Deresiewicz CC'79, P: CC'13, CC'16, in memory of his father Herbert Deresiewicz SEAS'48, SEAS'52, P: CC'79, CC'85, BC'78, GSAS'90, GSAS'93, GSAS'98, JRN'87, PT'79, a long time SEAS faculty member and department chairman who held a deep and abiding love for undergraduate teaching. This fellowship is awarded to a Columbia College or SEAS student for full-time laboratory research on the Morningside Heights campus in biological sciences, biomedical engineering, chemistry or chemical engineering.

INTERNATIONAL AFFAIRS FELLOWSHIP FUND

(2019) Established by an anonymous donor, this fellowship is awarded to Columbia College juniors majoring in political science proposing summer research focusing on international relations, human rights, or regional studies.

SOLOMON AND SEYMOUR FISHER CIVIL LIBERTIES FELLOWSHIP

(1989) Established by Solomon Fisher, CC'36, LAW'38, P: CC'62, GSAS'68 and Seymour Fisher, CC'45, this fellowship is awarded annually to a Columbia College student for work during the summer at the Legal Department of the American Civil Liberties Union National Office in New York City.

KLUGE FELLOWS SUMMER RESEARCH GRANT

(1988) Established by John Kluge, CC'37, P: CC'05 this fellowship. Administered by the Columbia University Scholars Program (CUSP) Summer Enhancement Fellowships, grants are awarded competitively to students from underrepresented groups for independent research project during the summer

under the sponsorship of a faculty member. The application process includes a series of seminars and workshops.

RICHARD LEWIS KOHN TRAVELLING FELLOWSHIP

(1959) Established in memory of Richard Lewis Kohn CC'60 from gifts of various donors, this fellowship is awarded annually to a Columbia College student for study during the junior year in Great Britain.

MYRA KRAFT PRIZE FOR EXCEPTIONAL PRACTICAL EXPERIENCE IN HUMAN RIGHTS ADVOCACY

(2013) Established by Robert Kraft CC'63, P: CC'94, in memory of his wife Myra Kraft P: CC'94, this prize is awarded to the rising Columbia College senior majoring in human rights for a summer or one-term human rights internship.

NICHOLAS LUBAR AND FAMILY PRIZE

(2019) Established by Nicholas R. Lubar CC'73, this prize is awarded to Columbia College students for summer research in the field of Latin American politics or policy-making related to economic development and improved standards of living within Latin America and the Caribbean nations.

MELLON MAYS UNDERGRADUATE FELLOWSHIP

(1996) Awarded in the spring semester of the sophomore year to minority students, and other undergraduates with a demonstrated commitment to racial diversity, who wish to pursue a Ph.D. and whose intellectual and social commitments embody those of the late Dr. Benjamin Mays. The fellowship is for a two-year academic enhancement program funded by the Andrew W. Mellon Foundation.

NOBUHISA AND MARCIA ISHIZUKA GLOBAL FELLOWSHIP IN EAST ASIAN STUDIES

(2015) Established by Nobuhisa Ishizuka CC'82, LAW'86 this fellowship is awarded annual to a Columbia College student for an international experience studying Japanese language and culture.

PRESIDENTIAL GLOBAL FELLOWSHIP

(2014) Established by President Lee C. Bollinger, the fellowship is awarded to first-year undergraduates (CC, SEAS, GS) for participation in global engagement opportunities.

SANFORD S. PARKER PRIZE SUMMER FELLOWSHIPS

(1980) Funded by the family and friends of Sanford S. Parker CC'37. Awarded to Columbia College juniors in order to conduct summer research projects. Recipients will show promise of doing original work, and demonstrate boldness of thought and a commitment to excellence.

RICHARD AND BROOKE KAMIN RAPAPORT SUMMER MUSIC PERFORMANCE FELLOWSHIP

(1993) Established by Brooke Kamin Rapaport and Richard A. Rapaport CC'69, P: CC'22, this music fellowship is awarded to Columbia College students who are particularly gifted in musical performance, composition or conducting.

EDWIN ROBBINS ACADEMIC RESEARCH AND PUBLIC SERVICE FELLOWSHIP

(1991) Established by Edwin Robbins, CC'53, LAW'55, P: LAW'88, this fellowship is awarded each summer to four Columbia College students majoring in political science or history who intend to conduct research into important political or policy making matters, or who will be working as interns, without compensation, in a governmental office, agency, or other public service organization.

ARTHUR ROSE TEACHING ASSISTANTSHIP

(1958) Established by Mr. and Mrs. Bennett Rose in memory of their son, Arthur Rose. Awarded to a senior in Columbia College who is to assist the work of a member of the faculty in one of the departments that contribute to the courses in Contemporary Civilization and the Humanities.

THE PHYLLIS STEVENS SHARP FELLOWSHIP IN AMERICAN POLITICS

(2005) Established by John Stevens Sharp CC'79, GSAS'80, GSAS'82, this fellowship is awarded to Columbia College students majoring in political science for research in American politics or policy making or uncompensated internships in a government office, agency, or other organization serving the public.

SUMMER UNDERGRADUATE RESEARCH FELLOWSHIP

Awarded to undergraduate students for hands-on biology related laboratory research on either the Morningside campus or in the biomedical labs at Columbia's Health Sciences. The fellowship provides for one summer of fulltime research.

RICHMOND B. WILLIAMS TRAVELLING FELLOWSHIP

(1988) Established through a bequest from the estate of Richmond B. Williams, CC'25, JRN'25, this fellowship is awarded to Columbia College juniors majoring in English for a summer research project requiring foreign travel.

YATRAKIS SUMMER RESEARCH FELLOWSHIP

(2019) Established in honor of Kathryn B. Yatrakis GSAS'76, GSAS'81, P: CC'94, CC'96, CC'05 by her family, this fellowship is awarded to Columbia College students for summer research in urban studies.

SPECIAL ENDOWMENTS

CLASS OF 1954 URBAN NEW YORK PROGRAM ENDOWMENT

(1981) Established by the Class of 1954, this fund enables students and faculty to jointly experience cultural events through the Urban New York Program.

ARNOLD I. KISCH, M.D., AND VICTORIA L. J. DAUBERT, PH.D FUND FOR STUDENTS TO EXPERIENCE OPERA IN N.Y.C.

(1993) Created for students to experience opera in New York City within the Urban New York Program.

STANDARDS AND DISCIPLINE

As members of the Columbia University community, all Columbia College students are expected to uphold the highest standards of integrity, civility, and respect. Students are therefore expected to conduct themselves in an honest, civil, and respectful manner in all aspects of their lives. Students who violate these standards of behavior interfere with their ability, and the ability of others, to take advantage of the full complement of University life, and are subject to Dean's Discipline.

The continuance of each student upon the rolls of the University, the receipt of academic credits, the confirmation of graduation, and the conferral of any degree or the granting of any certificate are strictly subject to the disciplinary powers of the University. Ultimate authority on matters of students' discipline is vested in the Trustees of the University, which is delegated to the Dean of Columbia College and his staff, who establish standards of behavior for Columbia College students beyond the regulations included in the Statutes of the University, and who define procedures by which discipline will be administered.

A full list of behavioral and academic violations can be found through [Student Conduct and Community Standards](#).

BEHAVIORAL VIOLATIONS

Behavioral violations of University policy have been identified for the purposes of maintaining a safe and healthy educational environment. Prohibited conduct includes, but is not limited to, the following:

- Access/Egress, Unauthorized
- Alcohol, Prohibited use of
- Collusion
- Columbia University Identification Card, Prohibited use of
- Columbia Identity (or affiliated organizations), Unauthorized use of
- Copying and/or Distribution, Unauthorized
- Disruptive Behavior
- Endangerment
- Failure to Comply
- Falsification
- Federal, State or Local laws, Violation of
- Fire Safety Policies, Violation of
- Harassment
- Hazing
- Illegal Drugs Policy, Violation of
- Information Technologies Policies, Violation of

- Retaliation
- Smoking Policy, Violation of University
- Surveillance/Photography, Unauthorized
- Theft
- University Policies, Violation of
- Vandalism/Damage to Property
- Weapons

ACADEMIC INTEGRITY

A Columbia College education has two complementary elements: the intellectual development of bodies of knowledge and habits of mind, and the overall development of moral character and personal ethics. These elements are supported by a commitment to academic integrity.

Academic integrity defines an intellectual community and its educational mission. As members of the intellectual community of Columbia College, students are expected to respect and acknowledge the intellectual work of others and denote clearly how their own work relates to that of others.

Violating the standards of academic integrity severely inhibits a student's opportunity to mature academically, professionally, and socially. Consequently, a violation of academic integrity is one of the most serious offenses a student can commit at the University.

Violations of academic integrity may be intentional or unintentional and can include, but are not limited, to:

- Academic Dishonesty, Facilitation of
- Assistance, Unauthorized
- Bribery
- Cheating
- Collaboration, Unauthorized
- Dishonesty
- Ethics, Honor Codes, and Professional Standards, Violation of
- Failing to Safeguard Work
- Giving or Taking Academic Materials, Unauthorized
- Obtaining Advanced Knowledge
- Plagiarism
- Sabotage
- Self-Plagiarism
- Test Conditions, Violation of

ACADEMIC INTEGRITY IN THE VIRTUAL AND HYBRID CLASS ENVIRONMENT

The Columbia undergraduate classroom, whether real or virtual, is a vital and dynamic space for learning, sustained by the expectation that the class experience is shared only by participants in the course. The free and respectful exchange of

ideas is the foundation of teaching and learning and can occur only if all course participants agree as a matter of academic integrity (subject to standard penalties) to respect the guidelines established below.

To support and sustain the class experience, the Columbia undergraduate Committee on Instruction sets forth the following expectations, pertaining both to course materials and to course meetings:

- Course materials, including handouts, readings, slides, and attendant materials must not be broadly shared, distributed, or sold outside the course environment (including on social media) without permission of the instructor. They must be understood as the product of instructors' intellectual work, and treated as their property.
- The contents of class discussion and breakout rooms may not be circulated outside the classroom, in whole or in part, for non-educational purposes (e.g., on social media) or outside the Columbia community. Students are expected to respect the complex dynamics of class discussion and use discretion when repeating the ideas of others outside of the classroom. The audio and visual recordings of class discussion and breakout rooms belong to the course participants and must be understood in the context of the course. This is especially crucial to protect the identity of speakers; in certain circumstances, failure to do so could be a form of bullying and could endanger course participants.
- Recordings of class sessions must not be shared, in whole or in part, with those outside the class. Students are not permitted to record any portion of class sessions without the explicit consent of the instructor.

comprehensive list of policies and expectations available on the [Student Conduct and Community Standards](#) website.

DEAN'S DISCIPLINE OVERVIEW

It is expected that all students act in an honest way and respect the rights of others at all times. Dean's Discipline is the process utilized by Columbia College to investigate and respond to allegations of behavioral or academic misconduct. The Dean's Discipline process aims to educate students about the impact their behavior may have on their own lives as well as on the greater community and, as a result, is not meant to be an adversarial or legal process.

The process is initiated when an allegation is reported that a student has violated Columbia College or University policies. Students may be subject to Dean's Discipline for any activity that occurs on or off campus that impinges on the rights of other students and community members. This also includes violations of local, State, or Federal laws.

[Student Conduct and Community Standards](#) is responsible for all disciplinary affairs concerning Columbia College students that are not reserved to some other body.

Columbia College students are expected to familiarize themselves with *Standards and Discipline* and the

COLUMBIA UNIVERSITY POLICIES

Since policies and procedures are subject to change, please check the [Columbia University website](#) for the most current information.

RESERVATION OF UNIVERSITY RIGHTS

This Bulletin is intended for the guidance of persons applying for or considering application for admission to Columbia College of Columbia University and for the guidance of Columbia students and faculty.

In general, the Bulletin sets forth the manner in which the University intends to proceed with respect to the matters set forth herein, but the University reserves the right to depart without notice from the terms of this Bulletin. The Bulletin is not intended to be, and should not be, regarded as a contract between the University and any student or other person.

Valuable information to help students, faculty, and staff understand some of the policies and regulations of the University can now be found in [Essential Policies for the Columbia Community](#), which includes information on the following:

- Policy on Access to Student Records under the Federal Family Educational Rights and Privacy Act (FERPA) of 1974, as Amended
- Social Security Number Reporting
- University Regulations (Including Rules of University Conduct)
- Student Email Communication Policy
- Information Technology Policies
- International Travel Planning Policy
- Policies on Alcohol and Drugs
- Policies and Procedures on Nondiscrimination and Harassment
- Gender-Based Misconduct Policies for Students
- Protection of Minors
- Non-Retaliation Policy
- University Event Policies
- Policy on Partisan Political Activity
- Crime Definitions in Accordance with the Federal Bureau of Investigation's Uniform Crime Reporting Program
- Use of Hoverboards on University Campus and Property

- Use of Unmanned Aircraft Systems on University Campus and Property
- Voluntary Leave of Absence Policy
- Involuntary Leave of Absence Policy
- Military Leave of Absence Policy
- Essential Resources:
 - Campus Safety and Security
 - Disability Services
 - Ombuds Office
 - Transcripts and Certifications
- Central Administration of the University's Academic Programs
- Consumer Information
- Additional Policy Sources for the Columbia Community

IMMUNIZATION REQUIREMENTS

Measles, Mumps, and Rubella (MMR)

New York State Public Health Law 2165 and Columbia University policy requires that all students provide documentation of immunization for measles, mumps, and rubella (MMR) before registering for classes in their first term of study. For all accepted types of documentation, visit <https://health.columbia.edu/content/immunization-requirements>.

Documentation of immunity must be completed and submitted to the [Columbia Health Immunization Compliance Office](#) upon acceptance to a program of study at Columbia, no later than 30 days before the registration of classes (see the specific term deadline listed on the [Academic Calendar](#) in this Bulletin). Columbia cannot expedite processing of forms. As such, any delays in submitting will result in registration delays.

Immunization documentation and health forms can be submitted via direct upload on secure.health.columbia.edu; faxed to 212-854-5078; or emailed to immunizationcompliance@columbia.edu. While the Immunization Compliance Office accepts documentation via email, note that Columbia University cannot guarantee that the information and records submitted via unencrypted email will not be intercepted and read by other parties besides the University. Students may also submit in-person or by mail to Immunization Compliance Office, John Jay Hall 3rd Floor, MC 3601, 519 W. 114th St., New York, NY 10027.

Students that have paid the Columbia Health and Related Services Fee may obtain the blood test and MMR immunizations from [Columbia Health Medical Services](#).

For information about these requirements visit the [Columbia Health Insurance and Immunization Compliance website](#), 212-854-7210, or email immunizationcompliance@columbia.edu.

Meningococcal Meningitis Decision

New York State Public Health Law 2167 and Columbia University Policy require that students receive information from their institutions about meningococcal meningitis and the vaccine that protects against most strains of the disease that can occur on university campuses.

Columbia students must make an informed decision about being vaccinated and certify their decision online. The process takes two to three minutes to complete. Students must formally indicate their decision about being vaccinated before they are permitted to register for classes.

Immunizations Recommendations

Columbia Health recommends that students receive all routine childhood vaccinations, an updated tetanus booster, vaccination for Hepatitis B (three-dose series), and varicella (chicken pox). These vaccines are available at Columbia Health Medical Services.

Students who have paid the Columbia Health & Related Services Fee are not charged for the following vaccines when administered at Columbia Health Medical Services:

1. Measles, Mumps and Rubella (MMR);
2. Hepatitis A;
3. Hepatitis B;
4. Hepatitis Combination A and B;
5. Influenza;
6. Meningococcal Meningitis;
7. Pneumococcal (if clinically indicated);
8. Tetanus-Diphtheria;
9. Tetanus-Diphtheria-Pertussis;
10. Varicella

For all other vaccinations, students are charged for the cost of the vaccine. Vaccinations are available to students who have not paid the Columbia Health & Related Services Fee for a minimal cost.

For more information, visit the Columbia Health website or email immunizationcompliance@columbia.edu.

UNDERGRADUATE INTERNATIONAL TRAVEL POLICY

All matriculated undergraduates participating in Columbia-Led, Columbia-Facilitated and/or Recognized international travel **will be required to obtain School Sponsorship** at least 4 weeks prior to departure.

Application for School Sponsorship is comprised of the following steps. All steps must be completed prior to travel departure:

1. Complete and Submit a **School Sponsorship Request Form** - including all travel destinations and side trips while abroad.
2. Complete **Pre-Departure Orientation**.
3. Abide by all University requirements, including:
 - a. Register all travel with the University's international travel assistance services – International SOS (ISOS).
 - b. Maintain a health insurance policy that will also provide coverage outside the U.S. for routine, urgent, and emergent care (such as the Columbia Student Health Insurance Plan).
4. Complete the **Assumption of Risk, Waiver and Release Form**, which must be signed by the undergraduate.
5. Complete or adhere to any additional safety protocol measures recommended by the Undergraduate Travel Review Committee.

Undergraduates are expected to begin the application for School Sponsorship **as soon as an opportunity that would require international travel has been secured, and submit a completed application no later than 4 weeks prior to departure.**

Once School Sponsorship is approved and issued, undergraduates may continue their work with a sponsoring unit/program to begin/continue their preparation for a specific Columbia-Led, Columbia-Facilitated and/or Recognized travel program.

Undergraduates are required to immediately notify the Undergraduate Travel Review Committee should any changes to their location occur during the duration of their travel so their School Sponsorship file may be updated.

The undergraduate schools reserve the right to revoke sponsorship, support and funding if any step of the School Sponsorship process is not completed or acknowledged prior to departure and/or if the Undergraduate Travel Review Committee determines after review that the travel would be imprudent, based on assessment of the risk variables involved and/or the particular facts of the application. The purchase of travel protection insurance is strongly recommended to potentially mitigate financial loss in case of trip cancellation or interruption.

If a country or region is placed on the medium, high, or extreme risk list during travel, the Undergraduate Travel Review Committee will assess the risks of remaining in or departure from the country or region. Undergraduates will be advised of the risks and, if necessary, provided a recommended course of action. The undergraduate schools reserve the right to revoke sponsorship, support and funding should the undergraduate not follow the recommendations of the Undergraduate Travel Review Committee.

Link to the full policy: <https://www.cc-seas.columbia.edu/travelpolicy/policy>.

RELIGIOUS HOLIDAYS

It is the policy of the University to respect its members' religious beliefs. In compliance with New York State law, each student who is absent from school because of his or her religious beliefs will be given an equivalent opportunity to register for classes or make up any examination, study, or work requirements that he or she may have missed because of such absence on any particular day or days.

No student will be penalized for absence due to religious beliefs, and alternative means will be sought for satisfying the academic requirements involved.

Officers of Administration and of Instruction responsible for scheduling of academic activities or essential services are expected to avoid conflict with religious holidays as much as possible. If a suitable arrangement cannot be worked out between the student and the instructor involved, they should consult the appropriate dean or director. If an additional appeal is needed, it may be taken to the Provost.

GRADUATION

The B.A. degree is awarded three times during the year: in February, May, and October. There is one University Commencement ceremony in May (see *Academic Calendar*).

Application or Renewal of Application for the Degree

The Application for the Degree is available on the Registrar's website. Students may complete the [degree application form](#) electronically and submit it to diplomas@columbia.edu. Alternative instructions for submitting the application for the degree are on the form itself.

General deadlines for applying for graduation are September 1 for October degrees; November 1 for February degrees; and December 1 for May degrees. When a deadline falls on a weekend or holiday, the deadline moves to the next business day. Students who fail to earn the degree by the conferral date for which they applied must file another application for a later conferral date.

Diplomas

There is no charge for the preparation and conferral of an original diploma. Students' names will be printed exactly as they appear on their transcript. Students are advised to check their transcript, and if errors are found, they may email the Office of the University Registrar at registrar@columbia.edu.

If students wish to change their name, they must submit the [Name Change Affidavit](#). The affidavit must be notarized and filed by the application deadline.

If a graduate's Columbia diploma is lost or damaged, there will be a charge of \$100 for a replacement diploma. Note that replacement diplomas carry the signatures of current University officials. Applications for replacement diplomas are available through the [Office of the University Registrar](#).

POLICY ON ACADEMIC CONCERNS, COMPLAINTS, AND GRIEVANCES

Columbia University is committed to fostering intellectual inquiry in a climate of academic freedom and integrity. Its members, students, and faculty alike, are expected to uphold these principles and exhibit tolerance and respect for others. The following procedures are part of a process to ensure that student concerns about experiences in the classroom or with faculty are addressed in an informed and appropriate manner.

This policy is meant to address any potential concerns about a faculty member's professional conduct and behavior toward students in the classroom or in other instructional settings. Potential concerns about grades awarded by a faculty member are covered by a separate policy, which can be found on the College's website under "Academics".

When a student believes that a faculty member has failed to meet his or her obligations in an instructional setting, the student has two principal sources of immediate assistance: the University's [Ombuds Office](#) and the professional staff of the school in which the student is enrolled.

The [Ombuds Office](#) is available to help students find solutions to a wide range of problems arising in the context of their association with the University, including those which involve faculty misconduct in an instructional setting. Students may wish to consult with the [Ombuds Office](#) before taking their concerns to the school, or they may wish to consult with the [Ombuds Office](#) at any time in the course of their discussions with school officials or, eventually, with members of the Vice President's Grievance Committee.

Like the [Ombuds Office](#), Columbia College has a professional staff ready to help students with concerns and complaints of many kinds, including those which involve faculty misconduct in an instructional setting. The staff works with students and faculty to resolve such issues, but should resolution not be possible, students may avail themselves of the school's grievance procedures. Experience has shown that most student concerns are best resolved in a collaborative way at the school level, starting with the student's advising dean. Columbia

College students can learn more about how to initiate a concern, complaint, or grievance on the [Columbia College website](#).

If the instructor at issue is a member of the Arts and Sciences faculty, the student may also consult grievance procedures available through the office of the Vice President for Arts and Sciences. These grievance procedures are intended to complement, not substitute for, the procedures available in each of the schools, and they treat a considerably more limited range of issues. They are designed to address only those cases involving professional misconduct by a faculty member of Arts and Sciences in an instructional setting in which there were significant irregularities or errors in applying school procedures (and do not include questions about grades awarded by a faculty member, which are handled through the academic departments and the relevant schools). Information on this process can be found on the [Faculty of the Arts and Sciences website](#).

If the instructor at issue is not a member of the Arts and Sciences faculty, the student should consult the instructor's particular school for its procedures.

Time Frame for Proceedings

A student should ordinarily bring any concern or complaint within 30 days of the end of the term in which the offending conduct occurred or by the beginning of the following term. The school process will ordinarily take 30 days.

Confidentiality

At every level, those involved recognize and respect a student's need for confidentiality when addressing certain kinds of concerns. If the student wishes complete confidentiality, concerns may be raised with the University's Ombuds Office, a neutral office that can receive complaints of any kind for the University and that offers a range of options and communication channels. Students, however, must be aware that the [Ombuds Office](#) has no authority to adjudicate a complaint; it is there as a confidential resource to students, faculty, and administrators to advise on various avenues of redress and to mediate disputes, if both parties agree.

NOTICE OF NON-DISCRIMINATION

Columbia University is committed to providing a learning, living, and working environment free from unlawful discrimination and to fostering a nurturing and vibrant community founded upon the fundamental dignity and worth of all of its members. Consistent with this commitment, and with all applicable laws, it is the policy of the University not to tolerate unlawful discrimination in any form and to provide persons who feel that they are victims of discrimination with mechanisms for seeking redress.

The University prohibits any form of discrimination against any person on the basis of race, color, sex, gender, pregnancy, religion, creed, marital status, partnership status, age, sexual orientation, gender identity, gender expression, national origin, disability, military status, or any other legally protected status

in the administration of its educational policies, admissions policies, employment, scholarship and loan programs, and athletic and other University-administered programs.

Nothing in this policy shall abridge academic freedom or the University's educational mission. Prohibitions against discrimination and discriminatory harassment do not extend to statements or written materials that are relevant and appropriately related to the subject matter of courses.

Inquiries or complaints regarding any form of discrimination or harassment may be directed to:

VETERANS BENEFITS AND TRANSITION ACT OF 2018

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent nor delay the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources available to other students who have satisfied their tuition and fee bills to the institution, including but not limited to access to classes, libraries, or other institutional facilities.

However, to qualify for this provision, such students may be required to:

- Produce the Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

STUDENT POLICIES AND PROCEDURES ON DISCRIMINATION AND HARASSMENT, GENDER-BASED MISCONDUCT POLICIES FOR STUDENTS AND CONSENSUAL ROMANTIC AND SEXUAL RELATIONSHIPS

Columbia University is committed to providing a learning, living, and working environment free from discrimination, harassment and gender-based and sexual misconduct. Consistent with this commitment and with applicable laws, the University does not tolerate discrimination, harassment, or gender-based sexual misconduct in any form and it provides students who believe that they have been subjected to conduct or behavior of this kind with mechanisms for seeking redress. All members of the University community are expected to adhere to the applicable policies, to cooperate with the procedures for responding to complaints of discrimination, harassment and gender-based and sexual misconduct, and to report conduct or behavior they believe to be in violation of these policies to the [Office of Equal Opportunity and Affirmative Action](#) or the [Gender-Based Misconduct Office](#) within Student Conduct and Community Standards. For additional information on these issues, policies, and resources, please visit the [Sexual Respect website](#).

Complaints against students for gender-based misconduct are processed in accord with the [Gender-Based Misconduct Policies for Students](#). Students who attend Barnard College and Teachers College as well as Columbia University are covered by these policies. The use of the term “gender-based misconduct” includes sexual assault, sexual harassment, gender-based harassment, stalking, and intimate partner violence. Columbia University’s [Sexual Respect Online](#) provides additional information and resources for students, faculty, and staff.

Complaints against students for other forms of discrimination and harassment are processed in accord with the [Student Policies and Procedures on Discrimination and Harassment](#) and should be filed with the Dean of Students of the school in which the accused student is enrolled.

Complaints against employees and third parties affiliated with the University for discrimination and harassment are processed in accord with the [Employment Policies and Procedures on Discrimination, Harassment, Sexual Assault, Domestic Violence, and Stalking](#). The use of the term “discrimination and harassment” includes discrimination, discriminatory harassment, gender-based harassment, stalking, intimate partner violence, sexual harassment, and sexual assault.

Columbia University maintains policies regarding consensual romantic and sexual relationships between faculty and students, and staff and students.

The [Policy on Romantic and Sexual Relationships between Faculty/Staff and Undergraduate Students](#) states that no faculty or staff member shall initiate or accept sexual or romantic advances or engage in a romantic or sexual relationship with any undergraduate student enrolled in Columbia College, the Fu Foundation School of Engineering and Applied Science, the School of General Studies, or Barnard College or other affiliate of Columbia, regardless of whether the faculty member has a supervisory role over the student.

DEPARTMENTS, PROGRAMS, AND COURSES

This section contains a description of the curriculum of each department in the College, along with information regarding degree requirements for majors and concentrators, including course descriptions, registration information, elective courses, and suggestions about courses and programs in related fields.

Columbia College students should use the school Bulletin for academic planning purposes, as not all courses listed on the University-wide *Directory of Classes* and *Vergil* are open to Columbia College students.

The College reserves the right to withdraw or modify the courses of instruction or to change the instructors at any time.

AFRICAN AMERICAN AND AFRICAN DIASPORA STUDIES

African American and African Diaspora Studies: 758
Schermerhorn Extension; 212-854-7080; <https://afamstudies.columbia.edu/>

Institute for Research in African-American Studies:
758 Schermerhorn Extension; 212-854-7080; <http://iraas.columbia.edu/>

Chair, African American and African Diaspora

Studies: Prof. Farah J. Griffin; 758 Schermerhorn Extension; fjg8@columbia.edu

Director of Undergraduate Studies: Prof. Kevin Fellezs; 816A Dodge; 212-854-6689; kf2362@columbia.edu

Director of Academic Administration and

Finance: Shawn Mendoza; 758 Schermerhorn Extension; 212-854-8789; sm322@columbia.edu

Administrative Assistant: Sharon Harris; 758 Schermerhorn Extension; 212-854-7080; sh2004@columbia.edu

The Institute for Research in African-American Studies was established at Columbia in 1993, expanding the University's commitment to this field of study. The African-American studies curriculum explores the historical, cultural, social, and intellectual contours of the development of people of African descent. The curriculum enables students to master the basic foundations of interdisciplinary knowledge in the humanities and social sciences in the black American, Caribbean, and sub-Saharan experience.

Courses examine the cultural character of the African diaspora; its social institutions and political movements; its diversity in thought, belief systems, and spiritual expressions; and the factors behind the continuing burden of racial inequality. During their junior and senior years of study, students focus their research within a specific discipline or regional study relevant to the African diaspora.

Students should consider a major in African American and African Diaspora studies if they are interested in careers where strong liberal arts preparation is needed, such as fields in the business, social service, or government sectors. Depending on one's area of focus within the major, the African American and African Diaspora studies program can also prepare individuals for career fields like journalism, politics, public relations, and other lines of work that involve investigative skills and working with diverse groups. A major in African American and African Diaspora studies can also train students in graduate research skills and methods, such as archival research, and is very useful for individuals who are considering an advanced graduate degree such as the Ph.D.

DEPARTMENTAL HONORS

The requirements for departmental honors in African American and African Diaspora studies are as follows:

1. All requirements for major must be completed by graduation date;
2. Minimum GPA of 3.6 in the major;
3. Completion of senior thesis—due to the director of undergraduate studies on the first Monday in April.

A successful thesis for departmental honors must be selected as the most outstanding paper of all papers reviewed by the thesis committee in a particular year. The Thesis Evaluation

Committee is comprised of department faculty and led by the director of undergraduate studies. The thesis should be of superior quality, clearly demonstrating originality and excellent scholarship, as determined by the committee. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

THE AFRICAN AMERICAN AND AFRICAN DIASPORA STUDIES DEPARTMENT THESIS

Although the senior thesis is a prerequisite for consideration for departmental honors, all African American and African Diaspora studies majors are strongly encouraged to consider undertaking thesis work even if they are ineligible or do not wish to be considered for departmental honors. The senior thesis gives undergraduate majors the opportunity to engage in rigorous, independent, and original research on a specific topic of their choosing, the result of which is a paper of 35-60 pages in length.

The senior thesis must be written under the supervision of at least one faculty member. Should the thesis writer elect to have more than one thesis adviser (either from the outset or added on during the early stages of research), these faculty in the aggregate comprise the Thesis Committee, of which one faculty member must be designated chair. In either case, it is incumbent upon the thesis writer to establish with the thesis chair and committee a reasonable schedule of deadlines for submission of outlines, chapters, bibliographies, drafts, etc.

In many cases, thesis writers may find that the most optimal way in which to complete a thesis is to formally enroll in an AFAS independent study course with their thesis adviser as the instructor. **All third year students interested in writing a thesis should notify the director of undergraduate studies and submit the name of the faculty adviser ideally by October 1, but certainly no later than the end of the fall semester of their junior year.** In close consultation with the thesis adviser, students develop a viable topic, schedule of meetings, bibliography, and timeline for completion (including schedule of drafts and outlines).

DEPARTMENTAL PRIZES

Ralph Johnson Bunche Award for Leadership and Service

The Bunche Award recognizes an undergraduate who has demonstrated a tremendous capacity for leadership and provided distinguished service to the Institute for Research in African American Studies.

The award is named in honor of Ralph Johnson Bunche (1901-1971), the highest American official in the United Nations. For his conduct of negotiations leading to an armistice in the First Arab-Israeli War, he received the Nobel Peace Prize in 1950; he was the first African American recipient of this honor.

Ella Baker Award for Outstanding Academic Achievement

The Ella Baker Prize is awarded annually to an undergraduate who has demonstrated academic excellence, intellectual commitment to the field of African American Studies and who has written a thesis that advances our understanding of the African American experience.

The award is named for the brilliant activist, organizer, leader and Harlem resident, Ella Baker. Baker served as a field secretary for the NAACP before organizing the Southern Christian Leadership Conference under the leadership of Dr. Martin Luther King. Following her departure from SCLC she helped student activists organize the Student Non-violent Coordinating Committee. She would serve as an important mentor to these young people throughout the rest of her life.

SENIOR FACULTY

Kevin Fellezs (Music)
Robert Gooding-Williams (Philosophy)
Steven Gregory (Anthropology)
Farah J. Griffin (English and Comparative Literature)
Frank Guridy (History)
Kellie E. Jones (Art History and Archaeology)
Samuel K. Roberts (History)
Josef Sorett (Religion)
Sudhir A. Venkatesh (Sociology)
Mabel Wilson (Architecture, Planning and Preservation)

RESEARCH FELLOWS

Vanessa Argard-Jones (Anthropology)
Fredrick C. Harris (Political Science)
Carl Hart (Psychology)
Obery Hendricks (Religion/African-American Studies)
Colin Wayne Leach (Psychology and Africana Studies, Barnard College)
Natasha Lightfoot (History)
Mignon Moore (Sociology - Barnard)

AFFILIATED FACULTY

Belinda Archibong (Economics)
Christopher Brown (History)
Maguette Camara (Dance - Barnard)
Tina Campt (Africana & Womens Studies - Barnard College)
Mamadou Diouf (Middle Eastern, South Asian, and African Studies)
Ann Douglas (English and Comparative Literature)
Barbara Fields (History)
Eric Foner (History)
Saidiya Hartman (English and Comparative Literature)
Ousmane Kane (School of International and Public Affairs)
Rashid Khalidid (History)
George E. Lewis (Music)
Mahmood Mamdani (Anthropology)
Gregory Mann (History)

Alondra Nelson (Sociology/Women's and Gender Studies)
Robert O'Meally (English and Comparative Literature)
David Scott (Anthropology)
Susan Strum (Law School)

IN MEMORIUM

Marcellus Blount
Manning Marable, founder of IRAAS

GUIDELINES FOR ALL MAJORS AND CONCENTRATORS

Governed Electives

The "governed electives" category must include courses from at least three different departments, providing an interdisciplinary background in the field of African-American Studies. (Note: you cannot count one of your governed electives within your designated area of study).

Designated Area of Study

A Designated Area of Study, preferably within a distinct discipline (for example, history, politics, sociology, literature, anthropology, psychology, etc.). Students may also select courses within a particular geographical area or region or an interdisciplinary field of study.

Any of the departmental disciplines (history, political science; sociology, anthropology, literature, art history; psychology, religion, music, etc.)

Any of the pertinent area studies (African Studies; Caribbean/Latin American; Gender Studies; etc.).

Please note that the major/concentrator is not allowed to "create" or "make up" a designated area of study without the direct approval of the Director of Undergraduate Studies, and that such approval must be sought before the student has embarked on the course of designated area of study, and that such approval will be granted only in very rare and exceptional cases. Under no circumstances should the major/concentrator hope to take a series of courses only later to "create" a Designated Area of Study around these courses.

MAJOR IN AFRICAN AMERICAN AND AFRICAN DIASPORA STUDIES

A minimum of twenty-seven (27) points is required for the completion of the major. The major should be arranged in consultation with the director of undergraduate studies. Students interested in majoring should plan their course of study no later than the end of their sophomore year.

Core Requirements

All majors must complete to satisfaction the core required courses. The core requirements are:

- (1) Introduction to African-American Studies - 4 Points
- (2) Major Debates in African-American Studies - 4 Points
- (3) Governed Elective - 4 Points

- (4) Governed Elective - 4 Points
- (5) Senior Seminar - 4 Points
- (6) Designated Area of Study Course (DAS) - 3 Points
- (7) DAS or Senior Pro Seminar - 4 Points

CONCENTRATION IN AFRICAN AMERICAN AND AFRICAN DIASPORA STUDIES

A minimum nineteen (19) points is required for the completion of the concentration.

Core Requirements

All concentrators must complete to satisfaction the core required courses. The core requirements are:

- (1) Introduction to African-American Studies - 4 Points
- (2) Governed Elective - 4 Points
- (3) Governed Elective - 4 Points
- (4) Senior Seminar - 4 Points
- (5) Designated Area of Study Course (DAS) - 3-4 Points

AFAS UN1001 INTRO TO AFRICAN-AMER STUDIES. 4.00 points.

Prerequisites: Students need to register for a section of AFAS UN1010, the required discussion section for this course.

Prerequisites: Students need to register for a section of AFAS UN1010, the required discussion section for this course.

From the arrival of enslaved Africans to the recent election of President Barack Obama, black people have been central to the story of the United States, and the Americas, more broadly. African Americans have been both contributors to, and victims of, this “New World” democratic experiment. To capture the complexities of this ongoing saga, this course offers an inter-disciplinary exploration of the development of African-American cultural and political life in the U.S. but also in relationship to the different African diasporic outposts of the Atlantic world. The course will be organized both chronologically and thematically, moving from the “middle passage” to the present so-called “post-racial” moment—drawing on a range of classical texts, primary sources, and more recent secondary literature—to grapple with key questions, concerns, and problems (i.e. agency, resistance, culture, etc.) that have preoccupied scholars of African-American history, culture, and politics. Students will be introduced to a range of disciplinary methods and theoretical approaches (spanning the humanities and social sciences), while also attending to the critical tension between intellectual work and everyday life, which are central to the formation of African-American Studies as an academic field. This course will engage specific social formations (i.e. migration, urbanization, globalization, etc.), significant cultural/political developments (i.e. uplift ideologies, nationalism, feminism, Pan-Africanism, religion/spirituality, etc.), and hallmark moments/movements (i.e. Harlem Renaissance, Civil Rights movement, etc.). By the end of the semester, students will be expected to possess a working knowledge of major themes/figures/traditions,

alongside a range of cultural/political practices and institutional arrangements, in African-American Studies.

Fall 2020: AFAS UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AFAS 1001	001/14380	M W 10:10am - 11:25am Online Only	Josef Sorett	4.00	125/175

AFAS UN1002 Major Debates in African-American Studies. 4 points.

Prerequisites: Students must register for discussion section, AFAS UN1003.

This course will focus on the major debates in African-American Studies from the role of education to the political uses of art. The class will follow these debates historically with attention to the ways in which earlier discussions on migration and emigration, for example, were engaged with the specific historical conjuncture in which they took place as well as in the myriad ways in which earlier debates continue to resonate today. There will be a mix of primary documents and secondary sources and commentary.

Spring 2021: AFAS UN1002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AFAS 1002	001/12945	Th 10:10am - 12:00pm Online Only	Frank Guridy	4	14/15

AFAS UN1003 DISC SEC Major Debates. 0 points.

Required discussion section for AFAS UN1002, Major Debates in African-American Studies.

AFAS UN3030 African-American Music. 3 points.

This course focuses on a central question: how do we define “African-American music”? In attempting to answer this question, we will be thinking through concepts such as authenticity, representation, recognition, cultural ownership, appropriation, and origin(s). These concepts have structured the ways in which critics, musicians and audiences have addressed the various social, political and aesthetic contexts in which African-American music has been composed (produced), performed (re-produced) and heard (consumed).

AFAS UN3943 Senior Pro Seminar. 4 points.

This course is a seminar for seniors to either write a formal proposal for a capstone project or to begin the research process for a Senior Thesis, which will be written in the Spring semester. This interdisciplinary course provides the necessary structure needed to complete either goal. This will be an

interactive class in which students are required to participate and actively engage in each meeting.

AFAS UN3936 Black Intellectuals Seminar. 4 points.

AFAM Major/Concentrator required course

This undergraduate seminar examines a diverse group of black intellectuals' formulations of ideologies and theories relative to racial, economic and gender oppression within the context of dominant intellectual trends. The intellectuals featured in the course each contributed to the evolution of black political thought, and posited social criticisms designed to undermine racial and gender oppression, and labor exploitation around the world. This group of black intellectuals' work will be analyzed, paying close attention to the way that each intellectual inverts dominant intellectual trends, and/or uses emerging social scientific disciplines to counter racism, sexism, and classism. This seminar is designed to facilitate an understanding of the black intellectual tradition that has emerged as a result of African-American thinkers' attempts to develop a unified response to an understanding of the black condition. This course explores of a wide range of primary and secondary sources from several different periods, offering students opportunity to explore the lives and works of some of the most important black intellectuals. We will also consider the way that period-specific intellectual phenomenon-such as Modernism, Marxism, Pan-Africanism, and Feminism-combined with a host of social realities.

AFAS UN3940 Senior Thesis Seminar. 4 points.

The Senior Seminar will afford thesis writers the chance to workshop their idea, conduct research and/or interviews, work with the IRB protocols (if necessary), learn to work with archival materials, and perform other research activities prior to writing the thesis. Students who choose to write a capstone paper or conduct a capstone project can choose an elective course the following semester.

The Thesis Seminar, conducted in the spring semester, is a workshop-oriented course for Senior Thesis writers organized around honing their writing skills while providing guidance to students in their field/disciplinary-specific projects. For example, a student may choose to write a historical biography of an artist while another may pursue a sociological study of the effects of mass incarceration on voting rights. The instructor of the Thesis Seminar, working with a faculty adviser (dependent on the specific field of inquiry in the thesis), will provide feedback and supervise the writing schedule of the students.

Spring 2021: AFAS UN3940

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AFAS 3940	001/12961	T 12:10pm - 2:00pm Online Only	Marsha Jean-Charles	4	2/10

AFAS GU4031 Protest Music and Popular Culture. 3 points.

Open to graduate students and limited advanced undergraduates.

This course will examine the relationship between popular music and popular movements. We will be taking a historical, as well as a thematic, approach to our investigation as a way to trace various legacies within popular music that fall under the rubric of "protest music" as well as to think about the ways in which popular music has assisted various communities to speak truth to power. We will also consider the ways in which the impact of the music industry has either lessened or enhanced popular music's ability to articulate "protest" or "resistance" to hegemonic power.

AFAS GU4035 Criminal Justice and the Carceral State in the 20th Century United States. 4 points.

To apply for course enrollment, please contact Prof. Samuel Roberts (skroberts@columbia.edu).

This course provides an introduction to historical and contemporary concepts and issues in the U.S. criminal justice system, including state violence; the evolution of modern policing; inequality and criminal justice policy; drug policy as urban policy; and the development of mass incarceration and the "carceral continuum." The writing component to this course is a 20-25 page research paper on a topic to be developed in consultation with the instructor. This course has been approved for inclusion in the African-American Studies and History undergraduate curricula.

AFAS GU4037 Third World Studies. 4 points.

Introduction to third world studies; an introduction to the methods and theories that inform the field of third world studies (aka ethnic studies), including imperialism, colonialism, third world liberation movements, subjectivities, and racial and social formation theories;

AFAS GU4080 Topics in The Black Experience. 4 points.

Please refer to the African American and African Diaspora Studies Department <https://afamstudies.columbia.edu/courses> for section-by-section course descriptions.

AFAS GU4520 Race and the Articulation of Difference. 4 points.

This seminar examines the intersection of race, gender, and nation in the formation of hierarchical social systems and their legitimating ideologies. A leading premise of this course is that racial ideologies are, foundationally, claims about the heritability of socially produced and imagined differences—claims that muster, mimic, and articulate notions of differences associated with a variety of social distinctions, including sex/gender, class, and nation-based identities. This seminar will situate the process of racialization within the wider problematic of political subjectivity and direct attention to the symbolic and structural organization of modern, hierarchical social systems.

Spring 2021: AFAS GU4520

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AFAS 4520	001/19424	Th 4:10pm - 6:00pm Online Only	Steven Gregory	4	4/12

ENGL GU4621 Harlem Renaissance. 3 points.

(Lecture). This course will focus on the arts of the Harlem Renaissance as experiments in cultural modernity and as forms of incipient political empowerment. What was the Harlem Renaissance? Where and when did it take place? Who were its major players? What difference did it make to everyday Harlemites? What were its outposts beyond Harlem itself? Was there a rural HR? An international HR? As we wonder about these problems of definition, we will upset the usual literary/historical framework with considerations of music and painting of the period. How to fit Bessie Smith into a frame

with W.E.B. Du Bois? Ellington with Zora Neale Hurston? Aaron Douglas with Langston Hughes? Where is Harlem today? Does it survive as more than a memory, a trace? Is it doomed to be "black no more?" How does Harlem function in "our" "national"/international imagination? Has the Harlem Renaissance's moment come and gone? What continuities might we detect? What institutions from the early twentieth century have endured?

ENGL GU4622 African-American Literature II. 3 points.

(Lecture). This survey of African American literature focuses on language, history, and culture. What are the contours of African American literary history? How do race, gender, class, and sexuality intersect within the politics of African American culture? What can we expect to learn from these literary works? Why does our literature matter to student of social change? This lecture course will attempt to provide answers to these questions, as we begin with Zora Neale Hurston's *Their Eyes Were Watching God* (1937) and Richard Wright's *Native Son* (1940) and end with Melvin Dixon's *Love's Instruments* (1995) with many stops along the way. We will discuss poetry, fiction, drama, and non-fictional prose. Other authors include Ralph Ellison, James Baldwin, Gwendolyn Brooks, Malcolm X, Ntozake Shange, Audre Lorde, and Toni Morrison. There are no prerequisites for this course. The formal assignments are two five-page essays and a final examination. Class participation will be graded.

Spring 2021: ENGL GU4622

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

AMERICAN STUDIES

Program Office: 319-321 Hamilton; 212-854-6698
<http://www.columbia.edu/cu/amstudies/>

Director: Prof. Casey N. Blake, 321 Hamilton; 212-854-6698;
cb460@columbia.edu

Associate Director: Prof. Robert Amdur, 311 Hamilton;
 212-854-4049; rla2@columbia.edu

Assistant Director: Angela Darling, 319 Hamilton;
 212-854-6698; amd44@columbia.edu

Administrative Assistant: Laken King, 319 Hamilton;
 212-854-6698; lk2639@columbia.edu

American Studies offers students the opportunity to explore the experience and values of the people of the United States as embodied in their history, literature, politics, art, and other enduring forms of cultural expression. The program seeks to prepare students to confront with historical awareness the pressing problems that face our society. The program takes advantage of Columbia's location by involving students with the life of the city—working with community service organizations such as the Double Discovery Center, which serves New York City high school students; and by inviting leading figures in the local political and cultural scene to participate in colloquia, public conferences, and classroom discussions. It is an interdisciplinary program designed to be open and

flexible while taking seriously the challenge of striving for a liberal education that helps prepare students for responsible citizenship.

ADVISING

Each American Studies major or concentrator is assigned an academic adviser who monitors their progress through graduation. With at least ten advisers for each academic year, students are assured of individual attention and guidance. Advisers meet with students at least twice a semester.

DEPARTMENTAL HONORS

Students with a 3.6 minimum GPA in the major and an outstanding senior project are considered for honors. Normally no more than 10% of graduating majors receive departmental honors in a given year.

GUIDELINES FOR ALL AMERICAN STUDIES MAJORS AND CONCENTRATORS

Declaring the Major or Concentration

Although students generally declare their major or concentration in the spring of their sophomore year, students may want to take electives early on in areas that interest them but that later connect with the American studies major.

Grading

A grade lower than C- cannot be counted toward the major or concentration in American studies. A grade of C- can be counted only with the approval of the director or associate director. Pass/D/Fail courses do not count toward the major or concentration unless the course was taken before the student declared the major or concentration.

MAJOR IN AMERICAN STUDIES

A minimum of nine courses is required to complete the major. Please note that as of January 2018 Major requirements have changed, beginning with the Class of 2020. Please consult with the department if there are any questions.

Two American Studies Core courses.

The following two courses are ordinarily required:

AMST UN1010	Introduction to American Studies
HIST UN2478	US INTELLECTUAL HIST 1865-PRES
or AMST UN3930	

Please note, the AMST UN3930 section MUST be Freedom and Citizenship in the U.S. to count towards the core course requirement

Two seminars in American Studies

AMST UN3930	
AMST UN3931	Topics in American Studies

Additional Courses

Four courses drawn from at least two departments, one of which must be in History and one of which must deal primarily with some aspect of American experience before 1900. (A course in U.S. History before 1900 would fulfill both requirements.)

Senior Research Project

The final requirement for the major in American Studies is completion of a senior essay, to be submitted in the spring of senior year. Alternatively, students may fulfill this requirement by taking an additional seminar in which a major paper is required or by writing an independent essay under the supervision of a faculty member. Seniors who wish to do a senior research project are required to take the Senior Project Colloquium AMST UN3920 in the fall of the senior year.

CONCENTRATION IN AMERICAN STUDIES

A minimum of 7 courses is required to complete the concentration. Please note that as of January 2018 Concentration requirements have changed, beginning with the Class of 2020. Please consult with the department if there are any questions.

Two American Studies Core courses.

The following are ordinarily required:

AMST UN1010	Introduction to American Studies
HIST UN2478	US INTELLECTUAL HIST 1865-PRES
or AMST UN3930	

Please note, the AMST UN3930 section MUST be Freedom and Citizenship in the U.S. to count towards the core course requirement

Additional Courses

Select five additional courses drawn from at least two departments, one of which must be in History, and one of which must deal with the period before 1900.

AMERICAN STUDIES

AMST UN1010 Introduction to American Studies. 4 points.

This course is an interdisciplinary exploration of the values and cultural expressions of the people of the United States since the late nineteenth century. We will examine a variety of works in literature, history, cultural and social criticism, music, the visual arts and the built environment with an eye to understanding how Americans of different backgrounds, living at different times and in different locations, have understood and argued about the meaning and significance of American national identity. Our goal is to make connections between different genres of expression and consider how different cultural forms have served as opportunities to ponder the meaning of modern life in the United States. Lectures and readings will give particular attention to the sites—real and imagined—where Americans have identified the promise and perils of American life. Discussion section required: AMST UN1011

Spring 2021: AMST UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AMST 1010	001/10378	M W 10:10am - 11:25am Online Only	Maura Spiegel, Roosevelt Montas	4	38/80

AMST UN1011 Disc. Sec. Intro. to American Studies. 0 points.

Corequisites: AMST UN1010

This is the required discussion section for AMST UN1010 Intro to American Studies

AMST UN3920 American Studies Senior Project Colloquium. 1 point.

Required for American studies students who intend to do a senior research project

This course is for American studies majors planning to complete senior projects in the spring. The course is designed to help students clarify their research agenda, sharpen their questions, and locate their primary and secondary sources. Through class discussions and a "workshop" peer review process, each member of the course will enter spring semester with a completed bibliography that will provide an excellent foundation for the work of actually writing the senior essay. The colloquium will meet every other week and is required for everyone planning to do a senior research project. Application due June 15. See American Studies website.

AMST UN3990 SENIOR RESEARCH SEMINAR. 4.00 points.

Open to American Studies seniors doing a research project.

Prerequisites: AMST UN3920

Prerequisites: AMST UN3920 A seminar devoted to the research and writing, under the instructors supervision, of a substantial paper on a topic in American studies. Class discussions of issues in research, interpretation, and writing

Spring 2021: AMST UN3990

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AMST 3990	001/10380		Casey Blake	4.00	6/10

AMST UN3997 Supervised Individual Research. 1-4 points.

For students who want to do independent study of topics not covered by normal program offerings, or for senior American studies majors working on the Senior Honors Project independent of 3990y. The student must find a faculty sponsor and work out a plan of study; a copy of this plan should be submitted to the program director.

HIST UN2478 US INTELLECTUAL HIST 1865-PRES. 4.00 points.

This course examines major themes in U.S. intellectual history since the Civil War. Among other topics, we will examine the public role of intellectuals; the modern liberal-progressive tradition and its radical and conservative critics; the uneasy status of religion in a secular culture; cultural radicalism and feminism; critiques of corporate capitalism and consumer culture; the response of intellectuals to hot and cold wars, the Great Depression, and the upheavals of the 1960s. Fields(s): US

ANCIENT STUDIES

Program Office: 617 Hamilton; 212-854-3902;
classics@columbia.edu
<http://www.columbia.edu/cu/classics/>

Director of Undergraduate Studies: Prof. Gareth Williams,
 615 Hamilton Hall; 212-854-2850; gdw5@columbia.edu

Director of Academic Administration and Finance: Juliana
 Driever, 617 Hamilton; 212-854-2726; jd2185@columbia.edu

The purpose of this program is to enable the student to explore the cultural context of the ancient Mediterranean as a whole while concentrating on one specific Mediterranean or Mesopotamian culture. Central to the concept of the program is its interdisciplinary approach, in which the student brings the perspectives and methodologies of at least three different disciplines to bear on his or her area of specialization.

Faculty participating in the program are scholars specializing in all aspects of ancient culture and civilization from the Departments of Anthropology; Art History and Archaeology; Classics; History; Middle Eastern, South Asian, and African Studies; Philosophy; and Religion, ensuring that a wide variety of approaches are available.

Course offerings vary year to year. Students are required to discuss their program prior to or during registration. The culmination of the ancient studies major comes in the senior year, when students with different areas of specialization come together to share their ideas in the senior seminar and then to write a substantial piece of original research. Students should think about topics for their senior paper during the junior year and find a faculty adviser at the beginning of the fall term of their senior year, after consulting with the director of undergraduate studies.

In the senior year, students register for ANCS UN3995 during the fall, and ANCS UN3998 Directed Research In Ancient Studies is usually taken during the spring. Sections should be arranged directly with the academic departmental administrator after finding a faculty adviser.

GUIDELINES FOR ALL ANCIENT STUDIES MAJORS

Grading

Advanced placement credits and courses passed with a grade of D may not be counted toward the major.

Courses

In an interdisciplinary program, courses that are available may on occasion have a substantial overlap in content. Since credit cannot be given twice for the same work, no courses may

be counted toward the major that overlap significantly with courses already taken or in progress.

It is the student's responsibility to discuss his or her program with the director of undergraduate studies well in advance and to provide him or her with all the necessary information on the courses concerned, since failure to do so may result in a course not being counted after it has already been taken.

Any course in the Department of Classics may be credited toward the major.

MAJOR IN ANCIENT STUDIES

The major in ancient studies requires 12 courses (a minimum of 36 points), two of which must be:

Major Seminar

ANCS UN3995	The Major Seminar
-------------	-------------------

Senior Thesis

ANCS UN3998	Directed Research In Ancient Studies
-------------	--------------------------------------

The selected program of study for the major must collectively satisfy the following criteria:

Language Study *

Select two courses of an ancient language at or above the intermediate level, i.e., 1200-level or above.

Fundamental Breadth **

Select two introductory courses on some aspect of the ancient Mediterranean. Some examples include:

HIST UN1010	The Ancient Greeks 800-146 B.C.E.
AHIS UN3248	Greek Art and Architecture
AHIS UN3250	Roman Art and Architecture
PHIL UN2101	The History of Philosophy I: Presocratics to Augustine
CLLT UN3132	Classical Myth

Advanced Study

Select two advanced courses on the ancient Mediterranean, typically at the 3000- or 4000-level.

Cultural Concentration

Select four courses on the culture of the language chosen, including one history course.

- * The minimum language requirement must be completed by the end of the first semester of the student's senior year, so that the student is equipped to use sources in the original language in their thesis. Students are strongly urged to begin study of an ancient language as soon as possible and to complete more than the minimum requirements, since the best way to gain an understanding of a culture is through the actual words of its people. Those considering graduate work on the ancient world should also be aware that most graduate schools require more than two years of undergraduate language training for admission. The language offered in fulfillment of this requirement should generally match the student's area of cultural concentration; special arrangements are available with other universities for students whose cultural concentration require languages not normally taught at Columbia. Students entering with expertise in their chosen languages are placed in advanced courses as appropriate but are still required to complete at least two semesters of language courses at Columbia; exceptions to this policy may be made in the case of languages not normally taught at Columbia. Language courses at the 1100-level may not be counted toward the major. Language courses, including those at the 1100-level, must be taken for a letter grade.
- ** Relevant introductory courses are offered by the Department of Classics or from offerings in the Programs or Departments of Ancient Studies, Art History and Archaeology, History, Philosophy, or Religion. Students should confirm a course's relevance with the director of undergraduate studies as soon as possible.

Biological/Physical Anthropology: Prof. Ralph Holloway, 856 Schermerhorn Extension; 212-854-4570; rlh2@columbia.edu

Anthropology at Columbia is the oldest department of anthropology in the United States. Founded by Franz Boas in 1896 as a site of academic inquiry inspired by the uniqueness of cultures and their histories, the department fosters an expansiveness of thought and independence of intellectual pursuit.

Cross-cultural interpretation, global socio-political considerations, a markedly interdisciplinary approach, and a willingness to think otherwise have formed the spirit of anthropology at Columbia. Boas himself wrote widely on pre-modern cultures and modern assumptions, on language, race, art, dance, religion, politics, and much else, as did his graduate students including, most notably, Ruth Benedict and Margaret Mead.

In these current times of increasing global awareness, this same spirit of mindful interconnectedness guides the department. Professors of anthropology at Columbia today write widely on colonialism and postcolonialism; on matters of gender, theories of history, knowledge, and power; on language, law, magic, mass-mediated cultures, modernity, and flows of capital and desire; on nationalism, ethnic imaginations, and political contestations; on material cultures and environmental conditions; on ritual, performance, and the arts; and on linguistics, symbolism, and questions of representation. Additionally, they write across worlds of similarities and differences concerning the Middle East, China, Africa, the Caribbean, Japan, Latin America, South Asia, Europe, Southeast Asia, North America, and other increasingly transnational and technologically virtual conditions of being.

The Department of Anthropology traditionally offered courses and majors in three main areas: sociocultural anthropology, archaeology, and biological/physical anthropology. While the sociocultural anthropology program now comprises the largest part of the department and accounts for the majority of faculty and course offerings, archaeology is also a vibrant program within anthropology whose interests overlap significantly with those of sociocultural anthropology. Biological/physical anthropology has shifted its program to the Department of Ecology, Evolution, and Environmental Biology. The Anthropology Department enthusiastically encourages cross-disciplinary dialogue across disciplines as well as participation in study abroad programs.

SOCIOCULTURAL ANTHROPOLOGY

At the heart of sociocultural anthropology is an exploration of the possibilities of difference and the craft of writing. Sociocultural anthropology at Columbia has emerged as a particularly compelling undergraduate liberal arts major. Recently, the number of majors in sociocultural anthropology has more than tripled.

Students come to sociocultural anthropology with a wide variety of interests, often pursuing overlapping interests in, for example, performance, religion, writing, law, ethnicity, mass-media, teaching, language, literature, history, human rights, art, linguistics, environment, medicine, film, and many other fields, including geographical areas of interest and engagement. Such interests can be brought together into provocative and productive conversation with a major or concentration in sociocultural anthropology. The requirements for a major in sociocultural anthropology reflect this intellectual expansiveness and interdisciplinary spirit.

ARCHAEOLOGY

Archaeologists study the ways in which human relations are mediated through material conditions, both past and present. Particular emphases in the program include the development of ancient states and empires, especially in the indigenous Americas; the impact of colonial encounters on communities in the American Southwest, the Levant and Africa; and human-animal relations in prehistory, religion and ritual, and the archaeology of the dead.

Themes in our teaching include the political, economic, social, and ideological foundations of complex societies; and archaeological theory and its relationship to broader debates in social theory, technology studies, and philosophy. Faculty members also teach and research on questions of museum representations, archaeological knowledge practices, and the socio-politics of archaeology. The program includes the possibility of student internships in New York City museums and archaeological fieldwork in the Americas and elsewhere.

ADVISING

Majors and concentrators should consult the director of undergraduate studies when entering the department and devising programs of study. Students may also seek academic advice from any anthropology faculty member, as many faculty members hold degrees in several fields or positions in other departments and programs at Columbia. All faculty in the department are committed to an expansiveness of thought and an independence of intellectual pursuit and advise accordingly.

SENIOR THESIS

Anthropology majors with a minimum GPA of 3.6 in the major who wish to write an honors thesis for departmental honors consideration may enroll in ANTH UN3999 The Senior Thesis Seminar in Anthropology. Students should have a preliminary concept for their thesis prior to course enrollment. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

ADJUNCT RESEARCH SCHOLAR GUIDELINES FOR ALL ANTHROPOLOGY MAJORS AND CONCENTRATORS

Grading

No course with a grade of D or lower can count toward the major or concentration. Only the first course that is to count toward the major or concentration can be taken Pass/D/Fail.

Courses

Courses offered in other departments count toward the major and concentration only when taught by a member of the Department of Anthropology. Courses from other departments not taught by anthropology faculty must have the approval of the director of undergraduate studies in order to count toward the major or concentration.

MAJOR IN ANTHROPOLOGY

The requirements for this program were modified on January 29, 2016.

The program of study should be planned as early as possible in consultation with the director of undergraduate studies.

The anthropology major requires 30 points in the Department of Anthropology.

Sociocultural Focus

Students interested in studying sociocultural anthropology are required to take the following courses:

ANTH UN1002	The Interpretation of Culture
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ANTH UN2005	THE ETHNOGRAPHIC IMAGINATION

Archaeology Focus

Students interested in studying archaeological anthropology are required to take the following courses:

ANTH UN1002	The Interpretation of Culture
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ACLG UN2028	Pasts, Presents & Futures: An Introduction to 21st Century Archaeology

NOTE: Students wishing to pursue an interdisciplinary major in archaeology should see the *Archaeology* section of this Bulletin.

Biological/Physical Focus

Students interested in studying this field should refer to the major in evolutionary biology of the human species in the Department of Ecology, Evolution, and Environmental Biology.

CONCENTRATION IN ANTHROPOLOGY

The anthropology concentration requires 20 points in the Department of Anthropology.

Sociocultural Focus

Students interested in studying sociocultural anthropology are required to take the following course:

ANTH UN1002	The Interpretation of Culture
-------------	-------------------------------

Archaeology Focus

Students interested in studying archaeological anthropology are required to take the following course:

ACLG UN2028	Pasts, Presents & Futures: An Introduction to 21st Century Archaeology
-------------	--

Biological/Physical Focus

Students interested in pursuing study in this field should refer to the concentration in evolutionary biology of the human species in the Department of Ecology, Evolution, and Environmental Biology.

FALL 2020 SOCIOCULTURAL ANTHROPOLOGY

ANTH UN1002 The Interpretation of Culture. 3 points.

The anthropological approach to the study of culture and human society. Case studies from ethnography are used in exploring the universality of cultural categories (social organization, economy, law, belief system, art, etc.) and the range of variation among human societies.

Fall 2020: ANTH UN1002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 1002	001/00423	M W 2:40pm - 3:55pm Room TBA	Paige West	3	82/120

ANTH UN1007 The Origins of Human Society. 3 points.

Mandatory recitation sections will be announced first week of classes.

An archaeological perspective on the evolution of human social life from the first bipedal step of our ape ancestors to the establishment of large sedentary villages. While traversing six million years and six continents, our explorations will lead us to consider such major issues as the development of human sexuality, the origin of language, the birth of “art” and religion, the domestication of plants and animals, and the foundations of social inequality. Designed for anyone who happens to be human.

ANTH 1007	001/00424	M W 11:40am - 12:55pm Room TBA	Camilla Sturm	3	101

ANTH UN2004 INTRO TO SOC # CULTURAL THEORY. 3.00 points.

This course presents students with crucial theories of society, paying particular attention at the outset to classic social theory of the early 20th century. It traces a trajectory of writings essential for an understanding of the social: from Saussure, Durkheim, Mauss, Weber, and Marx, on to the structuralist ethnographic elaboration of Claude Levi-Strauss and the historiographic reflections on modernity of Michel Foucault. We revisit periodically, writings from Franz Boas, founder of anthropology in the United States (and of Anthropology at Columbia), for a sense of origins, an early anthropological critique of racism and cultural chauvinism, and a prescient denunciation of fascism. We turn as well, also with ever-renewed interest in these times, to the expansive critical thought of W. E. B. Du Bois. We conclude with Kathleen Stewart’s *A Space on the Side of the Road*--an ethnography of late-twentieth-century Appalachia and the haunted remains of coal-mining country--with its depictions of an uncanny otherness within dominant American narratives

Fall 2020: ANTH UN2004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 2004	001/10790	M W 1:10pm - 2:25pm Online Only	John Pemberton	3.00	43/60

ANTH UN2017 Mafias and Other Dangerous Affiliations. 3 points.

Regimes of various shapes and sizes tend to criminalize associations, organizations, and social relations that these ruling powers see as anathema to the social order on which their power depends: witches, officers of toppled political orders, alleged conspirators (rebels, traitors, terrorists, and dissidents), gangsters and mafiosi, or corrupt officers and magnates. Our main goal will be to understand how and under what conditions do those with the power to do so define, investigate, criminalize and prosecute those kinds of social relations that are cast as

enemies of public order. We will also pay close attention to questions of knowledge – legal, investigative, political, journalistic, and public – how doubt, certainty, suspicion and surprise shape the struggle over the relationship between the state and society.

The main part of the course is organized around six criminal investigations on mafia-related affairs that took place from the 1950s to the present (two are undergoing appeal these days) in western Sicily. After the introductory section, we will spend two weeks (four meetings) on every one of these cases. We will follow attempts to understand the Mafia and similarly criminalized organizations, and procure evidence about it. We will then expand our inquiry from Sicily to cases from all over the world, to examine questions about social relations, law, the uses of culture, and political imagination.

*Although this is a social anthropology course, no previous knowledge of anthropology is required or presumed. Classroom lectures will provide necessary disciplinary background.

ANTH UN3040 Anthropological Theory I. 4 points.

Open to majors; all others with instructor's permission.

Prerequisites: an introductory course in anthropology. Institutions of social life. Kinship and locality in the structuring of society. Monographs dealing with both literate and nonliterate societies will be discussed in the context of anthropological fieldwork methods. Required of all Anthropology majors (and tracks) within the Barnard Department. As of Fall, 2018, UN 3040 replaces the two semester sequence of 3040/4041 Anthropological Theory I/II). Intended only for Barnard majors and minors.

ANTH UN3151 Living with Animals: Anthropological Perspective. 4 points.

This course examines how humans and animals shape each other’s lives. We’ll explore the astounding diversity of human-animal relationships in time and space, tracing the ways animals have made their impact on human societies (and vice-versa). Using contemporary ethnographic, historical, and archaeological examples from a variety of geographical regions and chronological periods, this class will consider how humans and animals live and make things, and the ways in which humans have found animals “good to think with”. In this course, we will also discuss how knowledge about human-

animal relationships in the past might change contemporary and future approaches to living with animals.

ANTH UN3160 Body and Society. 4 points. **Not offered during 2020-21 academic year.**

Prerequisites: A 1000 level course in anthropology is strongly recommended but not required as a prerequisite

As an introduction to the field of medical anthropology, this seminar addresses themes of health, affliction, and healing across sociocultural domains. Concerns include critiques of biomedical, epidemiological and other models of disease and suffering; the entwinement of religion and healing; technocratic interventions in healthcare; and the sociomoral underpinnings of human life, death, and survival. A 1000 level course in Anthropology is recommended as a prerequisite, although not required.

ANTH BC3234 Indigenous Place-Thought. 4.00 points.

This seminar considers what it means to be of a place and to think with and be committed to that place—environmentally, politically, and spiritually. After locating ourselves in our own particular places and place-based commitments, our attention turns to the Indigenous traditions of North America, to accounts of tribal emergence and pre-colonial being, to colonial histories of land dispossession, to ongoing struggles to protect ecological health and land-based sovereignty, to the epistemological and moral systems that have developed over the course of many millennia of living with and for the land, and to the contributions such systems might make to our collective future. The seminar's title is borrowed from an essay on "Indigenous place-thought" by Mohawk/Anishinaabe scholar Vanessa Watts

ANTH UN3663 The Ancient Table: Archaeology of Cooking and Cuisine. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: None

Humans don't just eat to live. The ways we prepare, eat, and share our food is a complex reflection of our histories, environments, and ideologies. Whether we prefer coffee or

tea, cornbread or challah, chicken breast or chicken feet, our tastes are expressive of social ties and social boundaries, and are linked to ideas of family and of foreignness.

How did eating become such a profoundly cultural experience? This seminar takes an archaeological approach to two broad issues central to eating: First, what drives human food choices both today and in the past? Second, how have social forces shaped practices of food acquisition, preparation, and consumption (and how, in turn, has food shaped society)? We will explore these questions from various evolutionary, physiological, and cultural viewpoints, highlighted by information from the best archaeological and historic case studies. Topics that will be covered include the nature of the first cooking, beer-brewing and feasting, writing of the early recipes, gender roles and 'domestic' life, and how a national cuisine takes shape. Through the course of the semester we will explore food practices from Pleistocene Spain to historic Monticello, with particular emphasis on the earliest cuisines of China, Mesoamerica, and the Mediterranean.

ANTH UN3664 FIELDWORK AT EDGE OF THE VIDEO FRAME. 4.00 points.

Today, we have entered a dramatically transformed world where unexpected pivot events, globalized supply chain economics, and unraveling social formations are moving people and community into a fully online world. The field of Anthropology now faces the idea of "fieldwork" that is not located in a geographic space. Anthropologists have started conducting ethnography of online spaces such as digital gaming and hacker communities. This course examines moving image as a space where fieldwork can be done, by working with materials stored online, in archives, and shared on physical media. The practitioners in this field are outside the academy—filmmakers, installation artists, performers, online vloggers, social media influencers—who work with archives created by others. We will examine evolving forms of visual culture, in museums, streaming media, mobile devices, zoomcasting, etc., and practitioners who rework found footage to build new meanings. Anthropology has a tradition of parsing moving image, especially because pioneering ethnographic films cannot be screened today without contextualization. We will consider the concept of "edge of frame," whereby materials captured by a journalist decades ago are chosen for new meanings by an artist in a radically different context. We will trace a history of human tendency toward media remix, in the context of rapid technology changes, new historical conjunctures, changing conceptions of social forms, and new forms of public gathering, as mediated by anthropology. We will read accounts from film studies, anthropology, and history, interspersed with viewing

films, browsing documentations of art installations, and zoom sessions with practicing filmmakers and artists.

ANTH BC3726 Gender, Sexuality # Kinship: Difference and Relatedness. 4.00 points.

This seminar addresses the anthropological study of gender, sexuality, and kinship. These three topics are classic themes in anthropology, and also sites of some of the most important radical interventions in social sciences in the 20th century, as occasions on which to (re)think fundamental models of difference, identity, and relatedness, and to consider how these concepts articulate with each other. In this course, we consider gender, sex, and kinship/relatedness as simultaneously extremely personal and irreducibly social aspects of human life. Classic and new readings in cultural, linguistic, feminist, and medical anthropology present and model analysis of ethnographic data from groups of people living in the urban US, Japan, Papua New Guinea, the Sahara, and elsewhere. In short collaborative weekly ethnographic exercises, we apply some of the methods of anthropological inquiry to our experience of everyday life and publicly available media. Drawing on these exercises, the readings, and the modes of analysis developed in seminar, each student produces a short work of new media for a popular audience, contributing an original intervention about the specificity of the (themselves diverse, and perhaps conflicting) current models of genders and sexualities at play in our everyday lives

ANTH UN3823 Archaeology Engaged: The Past in the Public Eye. 4 points.

Enrollment limited to 15. Enrollment Priorities: Seniors and Juniors in ARCH or ANTH

This course provides a panoramic, but intensive, inquiry into the ways that archaeology and its methods for understanding the world have been marshaled for debate in issues of public interest. It is designed to examine claims to knowledge of the past through the lenses of alternative epistemologies and a series of case-based problems that range from the academic to the political, legal, cultural, romantic, and fraudulent.

ANTH UN3832 Economic Imaginaries. 4 points.

Spanish American republics were born in the context of Atlantic Revolutions. Jacobin ideas with regard to popular rule and popular emancipation have been on the horizon since independence. This undergraduate seminar explores the economic imagination of the Spanish American left since times of independence. Has there been innovation in economic ideas and ideals in the left? What different sorts of economic agendas have developed in the continent over two centuries since independence? Has failure been recognized? Has success been acknowledged? The course is at once an intellectual history of Latin American economic thought, and a political history of revolutionary aspirations. It can serve as an introduction to modern Spanish American history, and does not presuppose prior courses on the subject. Having taken the university core courses in Lit-Hum and Contemporary Civilization is a prerequisite for any undergraduate enrolling in this seminar.

ANTH UN3862 Together or Not?: Discontents of Collective Life. 4.00 points.

This interdisciplinary course examines fault lines of contemporary collective life from a theoretical and ethnographic perspective. We will explore theoretical approaches to 'the social' and how different theorists envision it to come into being. Drawing from political anthropology, urban studies, sociology and cultural studies, we will interrogate what is at stake when terms like the collective, community and solidarity are invoked and trace changes over time and across geographical places and political formations. As a microcosm of society, cities are a crucial site of analysis in this course. We will be attuned to the way social difference structures visions of collective life and ideas of who can and who cannot belong. The course emphasizes the political relevance of emotions: emotions both reflect and transform social relations. This appears particularly important as we are observing a shift from liberal democracy towards more authoritarian forms of government in many places of the world. Public spheres saturated with intense emotional states figure prominently in this context. We will examine a range of feelings (including hate, anger, contempt, and fear) and ask how they (re)structure the relation between the individual and the collective and of collective life more broadly. Which modes of social interaction do they give rise to and which do they foreclose?

ANTH 3871	002/00681		J.C. Salyer	4	1/1

ANTH UN3888 Ecocriticism for the End Times. 4 points.

Prerequisites: the instructor's permission.

This seminar aims to show what an anthropologically informed, ecocritical cultural studies can offer in this moment of intensifying ecological calamity. The course will not only engage significant works in anthropology, ecocriticism, philosophy, literature, politics, and aesthetics to think about the environment, it will also bring these works into engaged reflection on "living in the end times" (borrowing cultural critic Slavoj Žižek's phrase). The seminar will thus locate critical perspectives on the environment within the contemporary worldwide ecological crisis, emphasizing the ethnographic realities of global warming, debates on nuclear power and energy, and the place of nature. Drawing on the professor's long experience in Japan and current research on the aftermath of the Fukushima Daiichi nuclear power plant disaster, the seminar will also take care to unpack the notion of "end times," with its apocalyptic implications, through close considerations of works that take on the question of ecocatastrophe in our times. North American and European perspectives, as well as international ones (particularly ones drawn from East Asia), will give the course a global reach.

ANTH UN3933 ARABIA IMAGINED. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

As the site of the 7th century revelation of the Quran and the present day location of the sacred precincts of Islam, Arabia is the direction of prayer for Muslims worldwide and the main destination for pilgrimage. Arabia also provides a frame for diverse modes of thought and practice and for cultural expression ranging from the venerable literature of the 1001 Nights to the academic disciplines of Islam and contemporary social media, such as Twitter. We thus will approach Arabia as a global phenomenon, as a matter of both geographic relations and the imagination. While offering an introduction to contemporary anthropological research, the course will engage in a critical review of related western conceptions, starting with an opening discussion of racism and Islamophobia. In the format of a Global Core course, the weekly assignments are organized around English translations of Arabic texts, read in conjunction with recent studies by anthropologists

ANTH UN3997 Supervised Individual Research Course In Anthropology. 2-6 points.

Prerequisite: the written permission of the staff member under whose supervision the research will be conducted.

ANTH UN3999 The Senior Thesis Seminar in Anthropology. 4 points.

Enrollment limited to 15. Open to CC and GS majors in Anthropology only.

Prerequisites: The instructor's permission. Students must have declared a major in Anthropology prior to registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students must communicate/meet with thesis instructor in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. This two-term course is a combination of a seminar and a workshop that will help you conduct research, write, and present an original senior thesis in anthropology. Students who write theses are eligible to be considered for departmental honors. The first term of this course introduces a variety of approaches used to produce anthropological knowledge and writing; encourages students to think critically about the approaches they take to researching and writing by studying model texts with an eye to the ethics, constraints, and potentials of anthropological research and writing; and gives students practice in the seminar and workshop formats that are key to collegial exchange and refinement of ideas. During the first term, students complete a few short exercises that will culminate in a substantial draft of one discrete section of their

senior project (18-20 pages) plus a detailed outline of the expected work that remains to be done (5 pages).,

The spring sequence of the anthropology thesis seminar is a writing intensive continuation of the fall semester, in which students will have designed the research questions, prepared a full thesis proposal that will serve as a guide for the completion of the thesis and written a draft of one chapter. Only those students who expect to have completed the fall semester portion of the course are allowed to register for the spring; final enrollment is contingent upon successful completion of first semester requirements.,

In spring semester, weekly meetings will be devoted to the collaborative refinement of drafts, as well as working through issues of writing (evidence, voice, authority etc.). All enrolled students are required to present their project at a symposium in the late spring, and the final grade is based primarily on successful completion of the thesis/ capstone project.,

Note: The senior thesis seminar is open to CC and GS majors in Anthropology only. It requires the instructor's permission for registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students should communicate with the thesis instructor and the director of undergraduate study in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. Enrollment limit is 15.,

Requirements: Students must have completed the requirements of the first semester of the sequence and seek instructor approval to enroll in the second.

ARCHAEOLOGY

ANTH UN1007 The Origins of Human Society. 3 points.

Mandatory recitation sections will be announced first week of classes.

An archaeological perspective on the evolution of human social life from the first bipedal step of our ape ancestors to the establishment of large sedentary villages. While traversing six million years and six continents, our explorations will lead us to consider such major issues as the development of human

sexuality, the origin of language, the birth of “art” and religion, the domestication of plants and animals, and the foundations of social inequality. Designed for anyone who happens to be human.

ANHS GU4001 THE ANCIENT EMPIRES. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The principal goal of this course is to examine the nature and histories of a range of early empires in a comparative context. In the process, we will examine influential theories that have been proposed to account for the emergence and trajectories of those empires. Among the theories are the core-periphery, world-systems, territorial-hegemonic, tributary-capitalist, network, and IEMP approaches. Five regions of the world have

been chosen, from the many that could provide candidates: Rome (the classic empire), New Kingdom Egypt, Qin China, Aztec Mesoamerica, and Inka South America. These empires have been chosen because they represent a cross-section of polities ranging from relatively simple and early expansionist societies to the grand empires of the Classical World, and the most powerful states of the indigenous Americas. There are no prerequisites for this course, although students who have no background in Anthropology, Archaeology, History, or Classics may find the course material somewhat more challenging than students with some knowledge of the study of early societies. There will be two lectures per week, given by the professor

Fall 2020: ANHS GU4001

ANTH GU4175 WRITING ARCHAEOLOGY. 3.00 points.

Prerequisites: the instructor's permission.

Like fiction archaeology allows us to visit other worlds and to come back home again. In this class we'll explore different genres of archaeological texts. How do writers contribute to the development of narratives about the past, what are the narrative tricks used by archaeologists, novelists and poets to evoke other worlds and to draw in the reader? What is lost in the translation from the earth to text, and what is gained? There is an intimacy to archaeological excavation, an intimacy that is rarely captured in archaeological narratives. What enlivening techniques might we learn from fictional accounts, and where might we find narrative space to include emotion and affect, as well as the texture and grain of encounters with the traces of the past? How does archaeological evidence evoke a particular response, and how do novels and poems work to do the same thing? What is the role of the reader in bringing a text to life?

Enrollment limit is 15. Priority: Anthropology graduate students, archaeology senior thesis students.

ANTH GU4345 Neanderthal Alterities. 3 points.

Enrollment priorities: Graduate students, and 3rd & 4th year undergraduates only

Using "The Neanderthals" partly as a metaphorical device, this course considers the anthropological, philosophical and ethical implications of sharing the world with another human species. Beginning from a solid grounding in the archaeological, biological and genetic evidence, we will reflect critically on why Neanderthals are rarely afforded the same reflexive capacities, qualities and attributes - agency- as anatomically modern humans, and why they are often regarded as "lesser" or nonhuman animals despite clear evidence for

both sophisticated material and social engagement with the world and its resources. Readings/materials are drawn from anthropology, philosophy, ethics, gender studies, race and genetics studies, literature and film.

SPRING 2021

SOCIOCULTURAL ANTHROPOLOGY

ANTH UN1002 The Interpretation of Culture. 3 points.

The anthropological approach to the study of culture and human society. Case studies from ethnography are used in exploring the universality of cultural categories (social organization, economy, law, belief system, art, etc.) and the range of variation among human societies.

Fall 2020: ANTH UN1002

ANTH UN2005 THE ETHNOGRAPHIC IMAGINATION. 3.00 points.

Introduction to the theory and practice of "ethnography"—the intensive study of peoples' lives as shaped by social relations, cultural images, and historical forces. Considers through critical reading of various kinds of texts (classic ethnographies, histories, journalism, novels, films) the ways in which understanding, interpreting, and representing the lived words of people—at home or abroad, in one place or transnationally,

in the past or the present—can be accomplished. Discussion section required

ANTH BC2427 ANTHROPOLOGY OF CLIMATE CHANGE. 3.00 points.

This course focuses on some of the present, and possible future, socio-ecological conditions of life on planet earth. In particular we will work to understand the historic, economic, political, and socio-cultural forces that created the conditions we call climate change. With this we will take a particular interest in the question of how race, ethnicity, Indigeneity, class, and gender articulate with the material effects of climate change. The course also focuses on how we, as scholars, citizens, and activists can work to alter these current conditions in ways that foster social and ecological justice for all living beings. Although we will ground our scholarship in anthropology, to encourage interdisciplinary and even transdisciplinary thought, weekly readings will be drawn from across scholarly and activist canons. While becoming familiar with scholarly and activist conversations about space and place, risk and vulnerability, and ontology and epistemology, we will work through a series of recent events as case studies to understand causes, effects, affects, and potential solutions

ANTH UN3665 The Politics of Care. 4.00 points.

What are the consequences of entrenched inequalities in the context of care? How might we (re)imagine associated practices as political projects? Wherein lie the origins of utopic and dystopic visions of daily survival? How might we track associated promises and failures as they travel across social hierarchies, nationalities, and geographies of care? And what do we mean when we speak of “care”? These questions define the scaffolding for this course. Our primary goals throughout this semester are threefold. First, we begin by interrogating the meaning of “care” and its potential relevance as a political project in medical and other domains. Second, we will track care’s associated meanings and consequences across a range of contents, including urban and rural America, an Amazonia borderland, South Africa, France, and Mexico. Third, we will address temporal dimensions of care, as envisioned and experienced in the here-and-now, historically, and in a futuristic world of science fiction. Finally, and most importantly, we will remain alert to the relevance of domains of difference relevant to care, most notably race, gender, class, and species. Upper level seminar; 4 points

ANTH UN3831 Cultures and Economies: Explorations in Economic Anthropology. 4 points.

Enrollment limited to 15. Priority given to juniors and seniors

This class explores the intersection of economy, culture, and society from a comparative, anthropological perspective. What have anthropologists learned about the different economic systems of the societies they study? How do economic practices and processes interact with the broader sociocultural worlds in which they are pursued and elaborated? What kind of concepts and methods do anthropologists draw on in their ethnographic (and archeological) researches into the diversity of human economic life? By reading classic and contemporary works in the field of economic anthropology, this class introduce students to longstanding discussions and debates about: economic rationality as a social form; the application of economic principles and methods to non-marketized societies; the nature of exchange and value; the sociocultural dimensions of monetarization and marketization; the role of gender and class in economic production; and the paradoxes of private property in everyday lives. Anthropology and economics have maintained a long and productive, if often combative, relationship with one another, and one of the aims of the course is to explore that relationship from a number of critical perspectives.

ANTH UN3880 LISTENINGS: AN ETHNOG OF SOUND. 4.00 points.

Prerequisites: the instructor's permission.

We explore the possibilities of an ethnography of sound through a range of listening encounters: in resonant urban soundscapes of the city and in natural soundscapes of acoustic ecology; from audible pasts and echoes of the present; through repetitive listening in the age of electronic reproduction, and mindful listening that retraces an uncanniness inherent in sound. Silence, noise, voice, chambers, reverberation, sound in its myriad manifestations and transmissions. From the captured souls of Edison's phonography, to everyday acoustical adventures, the course turns away from the screen and dominant epistemologies of the visual for an extended moment, and does so in pursuit of sonorous objects. How is it that sound so moves us as we move within its world, and who or what then might the listening subject be?

ANTH UN3893 THE BOMB. 4.00 points.

This course investigates the social history of nuclear arms in the context of World War II and the Cold War, exploring their ramifications for subjects and societies. We consider historical, ethnographic, medical and psychiatric accounts of the bomb's invention and fallout, including the unknowable bodily injuries caused by radiation and the ecological contamination inflicted on indigenous communities where atomic weapons were tested. Throughout the course, we investigate government propaganda designed to produce political subjects who both endorse and fear nuclear imperatives; who support expanding militarization and funding for weapons development; and who abide escalating political rhetorics of nuclear aggression

ANTH BC3932 Climate Change, Global Migration, and Human Rights in the Anthropocene. 4 points.

While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third,

the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific. *Human Rights elective.*

ANTH UN3933 ARABIA IMAGINED. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

As the site of the 7th century revelation of the Quran and the present day location of the sacred precincts of Islam, Arabia is the direction of prayer for Muslims worldwide and the main destination for pilgrimage. Arabia also provides a frame for diverse modes of thought and practice and for cultural expression ranging from the venerable literature of the 1001 Nights to the academic disciplines of Islam and contemporary social media, such as Twitter. We thus will approach Arabia as a global phenomenon, as a matter of both geographic relations and the imagination. While offering an introduction to contemporary anthropological research, the course will engage in a critical review of related western conceptions, starting with an opening discussion of racism and Islamophobia. In the format of a Global Core course, the weekly assignments are organized around English translations of Arabic texts, read in conjunction with recent studies by anthropologists

ANTH UN3939 ANIME EFFECT: JAPANESE MEDIA. 4.00 points.

Culture, technology, and media in contemporary Japan. Theoretical and ethnographic engagements with forms of mass mediation, including anime, manga, video, and cell-phone novels. Considers larger global economic and political contexts, including post-Fukushima transformations. Prerequisites: the instructor's permission

ANTH UN3999 The Senior Thesis Seminar in Anthropology. 4 points.

Enrollment limited to 15. Open to CC and GS majors in Anthropology only.

Prerequisites: The instructor's permission. Students must have declared a major in Anthropology prior to registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students must communicate/meet with thesis instructor in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. This two-term course is a combination of a seminar and a workshop that will help you conduct research, write, and present an original senior thesis in anthropology. Students

who write theses are eligible to be considered for departmental honors. The first term of this course introduces a variety of approaches used to produce anthropological knowledge and writing; encourages students to think critically about the approaches they take to researching and writing by studying model texts with an eye to the ethics, constraints, and potentials of anthropological research and writing; and gives students practice in the seminar and workshop formats that are key to collegial exchange and refinement of ideas. During the first term, students complete a few short exercises that will culminate in a substantial draft of one discrete section of their senior project (18-20 pages) plus a detailed outline of the expected work that remains to be done (5 pages).,

The spring sequence of the anthropology thesis seminar is a writing intensive continuation of the fall semester, in which students will have designed the research questions, prepared a full thesis proposal that will serve as a guide for the completion of the thesis and written a draft of one chapter. Only those students who expect to have completed the fall semester portion of the course are allowed to register for the spring; final enrollment is contingent upon successful completion of first semester requirements.,

In spring semester, weekly meetings will be devoted to the collaborative refinement of drafts, as well as working through issues of writing (evidence, voice, authority etc.). All enrolled students are required to present their project at a symposium in the late spring, and the final grade is based primarily on successful completion of the thesis/ capstone project.,

Note: The senior thesis seminar is open to CC and GS majors in Anthropology only. It requires the instructor's permission for registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students should communicate with the thesis instructor and the director of undergraduate study in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. Enrollment limit is 15.,

Requirements: Students must have completed the requirements of the first semester of the sequence and seek instructor approval to enroll in the second.

ANTH GU4052 Post/Socialist Bodies. 4.00 points.

This upper-level online seminar examines the cultures and politics of the body in socialist and postsocialist countries. As we will engage with embodied aspects of living under post/socialism, we will treat bodies as sites of political contestation, as well as makers and breakers of cultural worlds. Drawing on anthropological and historical scholarship, we will explore several thematic clusters: corporeal anchors of post/socialist political regimes and ideological formations, variability and commonality of bodily regimes across different post/socialist contexts, and the effects of the creation and dissolution of the Soviet Union on the viability, mortality, and vibrancy of life. We will develop an understanding of post/socialism as a political reality populated by a wide diversity of bodies: laboring and idle, cared and uncared for, gendered and racialized, craving and satiated, disabled and enhanced, among others. This course offers an account on post/socialist idiosyncrasies of the medicalization, politicization, economization, and moralization of the body

ANTH GU4116 Sympathy, Librism, # Conduct of Care. 3.00 points.

. This seminar examines the distribution and obligations of care under late liberalism. We work from classical approaches to human sentiment (e.g. Hume, Adam Smith) to explore the relationship of forms of care {management, empathy} to different modes of statecraft. In particular we examine links between imperial colonialism and liberal democracy in terms of different techniques of administering social difference (e.g. race, multiculturalism, class, population, ...). We critically investigate the role of the discipline of anthropology within this rubric and read several ethnographies that dwell on the interrelation of care and vulnerability. Across the course, we scrutinize what types of subjects care, for whom, and to what effect

ANTH GU4143 ACCUSATION. 3.00 points.

This course examines the politics and practices of collective accusation in comparative perspective. It treats these phenomena in their relation to processes of political and economic transition, to discourses of crisis, and to the practices of rule by which the idea of exception is made the grounds for extreme claims on and for the social body—usually, but not exclusively, enacted through forms of expulsion. We will consider the various theoretical perspectives through which forms of collective accusation have been addressed, focusing on psychoanalytic, structural functional, and poststructuralist

readings. In doing so, we will also investigate the difference and possible continuities between the forms and logics of accusation that operate in totalitarian as well as liberal regimes. Course readings will include both literary and critical texts

ANTH GU4145 Zora. 3.00 points.

Zora Neale Hurston—Barnard College '28 and a once-graduate student in Columbia's department of Anthropology—was a pioneering chronicler of Black folklore, a student of Black expression, and a creative imaginer of Black worlds via her novels, short stories, plays and poetry. From her travels throughout the U.S. South, to Haiti, Jamaica, and beyond, Hurston took as her mission a diasporic articulation of Black life in the Americas. In this seminar, we ask what a deep reading of Hurston's oeuvre can teach us about the history of Anthropology, about the blurry borders between fiction and ethnography, and about the legacies that her work leaves—in communities of scholarly practice and beyond

ANTH GU4349 Shades of the Political: Anthropological Investigations of Everyday Life in Turkey. 3.00 points.

This course aims to investigate the contemporary outlines of political anthropology, as well as its potentialities, through the lenses of the studies on Turkey. Since its original formulation in Aristotle, the political has been conceived at the nexus of life, goodness, and craft, each one continuously implicating the others, waving the webs of meaning in human communities to create a good life. Pushing this insight forward, we will combine ethnographic and theoretical works on political questions with a variety of fieldworks on Turkey, paying specific attention to meanings, signs, imaginaries, and practices as enacted in the daily lives of ordinary people. We will study specificities of political discourses, state practices and social movements in order to complicate and expand our understanding of ideology, hegemony, class, and power. We will be asking questions such as: How do specific histories emerge in people's political imaginaries? What are the social and political practices that sustain such histories while erasing others? Is the state an entity that people encounter in their daily lives or an imaginary assemblage that is being used to make sense of power relations in modern societies? How do the power relations that circulate within bureaucratic institutions interact with people's sexual practices? Can we observe the ideologies and workings of world markets in local settings? Are there any intersection points where ordinary people relate questions of wealth to questions of political order? Focusing on ethnographic works on Turkey, this course asks these and other

questions as part of a broader effort to understand the origins, developments, and possibilities of the modern political world

ARCHAEOLOGY

ANTH UN1008 The Rise of Civilization. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Mandatory recitation sections will be announced first week of classes. \$25.00 laboratory fee.

Corequisites: ANTH V1008

The rise of major civilization in prehistory and protohistory throughout the world, from the initial appearance of sedentism, agriculture, and social stratification through the emergence of the archaic empires. Description and analysis of a range of regions that were centers of significant cultural development: Mesopotamia, Egypt, the Indus River Valley, China, North America, and Mesoamerica. **DO NOT REGISTER FOR A RECITATION SECTION IF YOU ARE NOT OFFICIALLY REGISTERED FOR THE COURSE.**

ANTH UN2028 Think Like an Archaeologist: Introduction to Method & Theory. 4 points.

\$25 mandatory lab fee.

This course provides a comprehensive introduction to methods and theory in archaeology – by exploring how archaeologists work to create narratives about the past (and the present) on the basis on the material remains of the past. The course begins with a consideration of how archaeologists deal with the remains of the past in the present: What are archaeological sites and how do we ‘discover’ them? How do archaeologists ‘read’ or analyze sites and artifacts? From there, we will turn to the question of how archaeologists interpret these materials traces, in order to create narratives about life in the past. After a review of the historical development of theoretical approaches in archaeological interpretation, the course will consider contemporary approaches to interpreting the past.

ANTH BC2888 How China Became Chinese. 3.00 points.

As a modern nation, China is proud of its deep cultural roots, often referencing its ‘5,000 years of continuous history’ as a point of pride in a world of much younger polities. Why only 5,000 years of history? Why was 3,000 BC the ‘beginning’ of China? What happened before then? This course introduces students to the ancient Chinese world before it was the Middle Kingdom. We will draw on archaeological evidence from the

Upper Paleolithic to the Qin period to give voice to a complex social, political, and economic past unknown or unrecorded by the court historians of first dynasties. Finally, we will turn our attention to the present to examine how the study of Chinese prehistory has contributed to modern notions of a uniquely ‘Chinese’ culture – and how the notion of Chineseness has evolved through time

ANTH UN3007 ARCHAEOLOGY BEFORE THE BIBLE. 3.00 points.

Please note that this is not a class on “biblical archaeology”. It is a course about the politics of archaeology in the context of Israel/Palestine, and the wider southwest Asia region. This course provides a critical overview of prehistoric archaeology in southwest Asia (or the Levant - the geographical area from Lebanon in the north to the Sinai in the south, and from the middle Euphrates in Syria to southern Jordan). It has been designed to appeal to anthropologists, historians, and students interested in the Ancient Mediterranean and Middle Eastern Studies. The course is divided into two parts. First, a social and political history of archaeology, emphasizing how the nature of current theoretical and practical knowledge has been shaped and defined by previous research traditions and, second, how the current political situation in the region impinges upon archaeological practice. Themes include: the dominance of “biblical archaeology” and the implications for Palestinian archaeology, Islamic archaeology, the impact of European contact from the Crusades onwards, and the development of prehistory

ANTH BC3223 Gender Archaeology. 3.00 points.

This seminar critically reexamines the ancient world from the perspective of gender archaeology. Though the seedlings of gender archaeology were first sown by of feminist archaeologists during the 70’s and 80’s, this approach involves far more than simply ‘womanizing’ androcentric narratives of past. Rather, gender archaeology criticizes interpretations of the past that transplant contemporary social roles onto the archaeological past, casting the divisions and inequalities of today as both timeless and natural. This class challenges the idea of a singular past, instead championing a turn towards multiple, rich, messy, intersectional pasts. The ‘x’ in ‘archaeology’ is an explicit signal of our focus on this diversity of pasts and a call for a more inclusive field of practice today

ARCHAEOLOGY

The Columbia Center for Archaeology: 965 Schermerhorn Extension

Director of Undergraduate Studies: Prof. Hannah Chazin, hc2986@columbia.edu

Archaeology is the study of the material conditions inhabited and acted upon by people in the past and present. Investigation of the past through the study of material remains is entangled with historiography, politics, and individual and collective memory, and is implicated in the production of present-day identities. Archaeology has come to mean many things to different generations of scholars, yet all approaches share in common a focus on the physical remains of the past and on the interpretive acts that enliven these remains and are challenged by them.

At Columbia, archaeology is a multidisciplinary field practiced by faculty and students in the humanities, social sciences, and natural sciences. At present, there are faculty in the Departments of Anthropology; Art History and Archaeology; Classics; East Asian Languages and Cultures; Historic Preservation; History; Middle Eastern, South Asian, and African Studies; as well as in the Center for Environmental Research and Conservation, the Institute for Research on Women and Gender, and the Lamont-Doherty Earth Observatory, all of whom conduct research on prehistory, ancient society, or historical archaeology.

Among locations in which students and faculty are conducting or participating in field programs are Argentina, Peru, Central America, the North American Southwest, New York City, upstate New York, the UK, France, Italy, Greece, Turkey, Egypt, Yemen, Israel, Palestine, and Madagascar. Archaeologists at Columbia also work with professionals at a wide range of institutions in New York. Among the institutions at which students in particular programs may conduct research, or work on internships, are the American Museum of Natural History, the Brooklyn Museum, the Metropolitan Museum of Art, the Museum of the City of New York, the National Museum of the American Indian, the New York Botanical Garden, and the South Street Seaport Museum.

DEPARTMENTAL HONORS

For the requirements for departmental honors, please check with the program advisers. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

PROFESSORS

Zainab Bahrani

ON LEAVE

GUIDELINES FOR ALL ARCHAEOLOGY MAJORS AND CONCENTRATORS

Courses

It is recommended that archaeology students consider introductory courses in Earth and environmental sciences, environmental biology, and/or chemistry for their Core Curriculum science requirement.

For information on upper-level graduate courses and courses in historic preservation, please see the program advisers. Decisions about upper-level, related, or seminar courses that are not on this list and their applicability to the major or concentration in archaeology should be made in consultation with the program advisers.

Graduate Study

Students intending to pursue graduate degrees in archaeology should be aware that a reading knowledge of two languages is often required as part of graduate study. Further, although language courses do not count toward the major or concentration, students are encouraged to acquire language training that is relevant to their particular interests in archaeology.

MAJOR IN ARCHAEOLOGY

Please read *Guidelines for all Archaeology Majors and Concentrators* above.

The program of study should be planned as early as possible with the program advisers, preferably before the end of the sophomore year and no later than the beginning of the junior year. The major in archaeology requires a total of 30 points within the major and 9 points of related courses as follows:

Two introductory courses:

ANTH UN2028	Think Like an Archaeologist: Introduction to Method & Theory
ANTH UN1008 or ANTH UN1007	The Rise of Civilization The Origins of Human Society

Select two upper-level courses from different regions of the world, in addition to three other upper-level courses, planned in consultation with the program advisers.

Participation of four to six weeks in field projects with which Columbia University is affiliated, independent study in excavation or other field projects, or relevant museum internship and/or lab work.

Select one laboratory course in archaeology or its equivalent in the field, as approved by the program advisers.

The capstone seminar in archaeology:

ANTH UN3993	World Archaeologies/Global Perspectives
-------------	---

Select 9 points of related courses, planned with the program advisers in accordance with the student's interests.

A senior thesis is recommended for students planning to pursue a graduate degree. ***

- * The field, school, project, or internship must be approved in advance by the program advisers, and arrangements should be made in advance with the director of undergraduate studies for credits to be accepted as part of the degree. For more information, see the [Center for Archaeology](#) website.
- ** Taught alternate years, preferably taken in the junior or senior year, or a substitute seminar to be decided with the advance approval of the director of undergraduate studies. Students who are writing a thesis may substitute a thesis seminar for this requirement.
- *** Topics should be discussed with a faculty adviser during the junior year, allowing time for planning, research, and travel during the following summer. In the senior year, students may register for two semesters of senior thesis study with their adviser, e.g., ANTH UN3997 Supervised Individual Research Course In Anthropology or ANTH UN3999 The Senior Thesis Seminar in Anthropology, to cover the writing of the thesis. The final draft of the thesis must be submitted by March 25. (See the [Center for Archaeology](#) webpages for more information.)

CONCENTRATION IN ARCHAEOLOGY

Please read *Guidelines for all Archaeology Majors and Concentrators* above.

The program of study should be planned with the program advisers. The concentration in archaeology requires a total of 21 points from within anthropology, art history and archaeology, and other approved departments, with no more than four courses being taken within any single department. Requirements for the concentration are as follows:

Select one of the following introductory courses:

ANTH UN1007	The Origins of Human Society
ANTH UN1008	The Rise of Civilization
ANTH UN2028	Think Like an Archaeologist: Introduction to Method & Theory

Select one seminar or colloquium in the Departments of Anthropology, Art History and Archaeology, Classics, or History, as approved by the program advisers.

Select three upper-level courses, including at least one from two different regions of the world.

Select one related course, planned with the program advisers in accordance with the student's interests.

ANTH UN2028 Think Like an Archaeologist: Introduction to Method & Theory. 4 points.

\$25 mandatory lab fee.

This course provides a comprehensive introduction to methods and theory in archaeology – by exploring how archaeologists work to create narratives about the past (and the present) on the basis on the material remains of the past. The course begins with a consideration of how archaeologists deal with the remains of the past in the present: What are archaeological sites and how do we ‘discover’ them? How do archaeologists ‘read’ or analyze sites and artifacts? From there, we will turn to the question of how archaeologists interpret these materials traces, in order to create narratives about life in the past. After a review of the historical development of theoretical approaches in archaeological interpretation, the course will consider contemporary approaches to interpreting the past.

Spring 2021: ANTH UN2028

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THE DEPARTMENT OF ARCHITECTURE

Mission

The Architecture major establishes an intellectual context for students to interpret the relation of form, space, program,

materials and media to human life and thought. Through the Architecture curriculum, students participate in the ongoing shaping of knowledge about the built environment and learn to see architecture as one among many forms of cultural production. At the same time, the major stresses the necessity of learning disciplinary-specific tools, methods, terms and critiques. Thus, work in the studio, lecture or seminar asks that students treat architecture as a form of research and speculation which complement the liberal arts mission of expansive thinking.

Undergraduate Study in Architecture

Studying Architecture at Barnard College, Columbia College, and General Studies leads to a liberal arts degree – a Bachelor of Arts with a major in Architecture, and Barnard College is the administrative location for all undergraduate architecture studies at Columbia University and its partner institutions. A liberal arts education in architecture holds a unique position in academia and in relation to the discipline. If the goal of a professional education in architecture is to enable students to participate directly in the world as an architect – a liberal arts education asks that students consider the broader and myriad conditions in which architecture is conceived and practiced and, in turn, to understand how architecture inevitably alters those conditions. Students are asked to confront and interpret the complex social, cultural, political, and environmental processes that weave through architectural design and urbanism. The purpose of an undergraduate liberal arts degree in architecture is to educate students to think about the world through architecture.

The Architecture curriculum introduces design at a variety of scales, acknowledging that integrated design thinking is effective for problem solving at any scale and in any discipline. Students will experiment with full-scale installations and devices and make small-scale models of urban conditions from which they extract, interpret and invent new possibilities of inhabitation and use. The curriculum intentionally balances the traditions of handcrafted representation with evolving digital technologies of architectural design and communication.

The Architecture major complements, and makes great use of its University setting. With access to superb libraries, research centers, graduate programs, and abundant intellectual resources, our students have the opportunity to follow their creative instincts to great depth and breadth – and they do. The major depends on New York City as more than a convenient site for many design and research projects and frames the City as one of the key social and architectural, and thus didactic, markers of Modernity. Architecture students study with peers from countries around the world in one of the most diverse cities in the world. A large majority of the Architecture students expand their education by interning in Architecture or a related field during their undergraduate studies. Alumni of the Department are leaders in architecture and design fields around the world. The faculty teaching in the undergraduate program are dedicated teachers who are also at the forefront of practice

and research and are similarly drawn to New York City as a nexus of global design thinking.

Students interested in obtaining a professional degree in Architecture continue on to graduate programs after their undergraduate degree, and students from the Barnard Columbia program have enjoyed enormous success in their admissions to the most competitive graduate programs in the country. Students who study Architecture as undergraduates have also pursued graduate degrees in a variety of disciplines including Urban Planning, Law, and Media and Communications.

Student Learning Outcomes

Students in the Architecture Majors who fully engage with the curriculum should be able to complete the following outcomes:

- Apply integrated design thinking to specific problems in and beyond the discipline;
- Visually communicate architectural concepts and research using discipline-specific techniques in multiple media;
- Verbally present independent, group or assigned research, in multiple media formats;
- Organize and concisely write in a variety of formats including reports, case studies, synthetic overviews, etc.;
- Understand and critically interpret major buildings and themes of Architectural history and theory;
- Be intellectually prepared for graduate studies in architecture and related disciplines.

Departmental Honors

Senior requirements (a portfolio and research paper from a previous architecture course) are used to award departmental honors. Students must have a grade point average of at least 3.6 in classes for the major. Normally no more than 10% of the graduating majors in the department each year receive departmental honors.

ADVISING APPOINTMENTS

Current students as well as prospective students with questions about our courses and programs of study are encouraged to meet with our full-time faculty members. [Faculty advising appointments](#) are open to anyone who is interested in learning more about our department. During the summer break, all current and prospective students are instead invited to submit their questions by email to architecture@barnard.edu.

OUR PROGRAMS OF STUDY

THE MAJOR IN ARCHITECTURE (p. 192)

THE MAJOR IN THE HISTORY AND THEORY OF ARCHITECTURE

THE MINOR IN ARCHITECTURE

THE MAJOR IN ARCHITECTURE

The major in architecture is open to Barnard College students, Columbia College students, and General Studies students. The required classes are broken down into four categories: studio, lectures seminars and workshops, senior courses, and the specialization:

Studio Courses

Four studio courses, to be taken one per semester (studio courses have limited enrollment and priority is given to Architecture majors):

ARCH UN2101	ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS
ARCH UN2103	ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS
ARCH UN3201	ADVANCED ARCHITECTURAL DESIGN I
ARCH UN3202	ADVANCED ARCHITECTURAL DESIGN II

Lecture, Seminar, and Workshop Courses *

Five courses following the distribution requirement below:

ARCH UN3117 Modern Architecture in the World

Architectural Elective: History

Architectural Elective: Society, Environment, and the Global

Architectural Elective: Design, Media, and Technology

Architectural Elective

Senior Courses *

ARCH UN3901 Senior Seminar

Elective Architecture seminar (another Senior Seminar in the Department, Advanced Architectural Research and Design, or Independent Research)

Specialization Courses

All majors are asked to complement their work with a thematic unit (three courses) called the "specialization." Each student develops a specific specialization that broadens their architectural studies in one of the following areas or combination of areas: History, Society, Environment, Global, Design, Media, and Technology. Courses may be taken from across various departments. All majors, in consultation with their advisers, will develop a short (100 word) description of their specialization and advisers will approve their course selections. Students can request and develop other areas of specialization with adviser approval.

Graduation Requirements

The major also requires that students submit a portfolio and a writing sample before graduation. The design portfolio includes representative work from all design studios and the writing sample is a paper or essay from a senior level architecture or architecture-related course. Final submissions are archived in the department, the portfolios are displayed at the end of the year show, and both are used to award graduation honors.

* These are courses offered by the architecture department or other applicable departments offered within the University. Students should consult the program office for a list of applicable courses each semester.

ACADEMIC YEAR 2020-2021 COURSES

For the 2020-2021 academic year, in addition to semester-long (14-week) course offerings, the Architecture Department will also offer 7-week "immersive courses." These courses will cover a semester's worth of material in a shorter period of time and will meet for twice as many hours per week, allowing more contact between faculty and students and more sustained focus on the class content. They will be offered in either the first half of a semester (e.g., Fall A, Spring A, Summer A) or in the second half of a semester (e.g., Fall B, Spring B, Summer B). Please contact us with any questions you may have: architecture@barnard.edu.

FALL A COURSES (p. 193)

FALL B COURSES (p. 193)

FALL FULL-TERM COURSES (p. 194)

SPRING A COURSES (p. 195)

SPRING B COURSES (p. 196)

SPRING FULL-TERM COURSES (p. 197)

SUMMER A COURSES (p. 198)

SUMMER B COURSES (p. 199)

FALL 2020 COURSES

The course schedule listed below may be subject to change. You are welcome contact us with any questions you may have: architecture@barnard.edu.

FALL A IMMERSIVE COURSES

Fall A immersive courses will run during the first half of the semester: Tues., Sept. 8, 2020 – Fri., Oct. 23, 2020.

ARCH UN1010 Design Futures: New York City. 3 points.

How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design in contemporary culture -- from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences.

Fall 2020: ARCH UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 1010	001/00651	W F 1:10pm - 3:55pm Room TBA	Hua Tang	3	23/100

Spring 2021: ARCH UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 1010	001/00570	W F 1:10pm - 3:55pm Room TBA	Richard Rouhe	3	14/20
ARCH 1010	002/00571	W F 1:10pm - 3:55pm Room TBA	Virginia Black	3	14/20

ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS. 4 points.

This architectural design studio explores material assemblies, techniques of fabrication, and systems of organization. These explorations will be understood as catalysts for architectural analysis and design experimentation.

Both designed objects and the very act of making are always embedded within a culture, as they reflect changing material preferences, diverse approaches to durability and obsolescence, varied understandings of comfort, different concerns with economy and ecology. They depend on multiple resources and mobilize varied technological innovations. Consequently, we will consider that making always involves making a society, for it constitutes a response to its values and a position regarding its technical and material resources. Within this understanding, this studio will consider different cultures of making through a number of exercises rehearse design operations at different scales—from objects to infrastructures.

Fall 2020: ARCH UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2101	001/00658	M W 9:00am - 11:50am Room TBA	Diana Cristobal Olave	4	16/100
ARCH 2101	001/00658	F 9:00am - 12:50pm Room TBA	Diana Cristobal Olave	4	16/100

Spring 2021: ARCH UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2101	001/00573	M W 9:00am - 11:50am Room TBA	Richard Rouhe	4	16/16
ARCH 2101	001/00573	F 9:00am - 12:50pm Room TBA	Richard Rouhe	4	16/16

ARCH UN2103 ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS. 4 points.

This architectural design studio course explores modes of visualization, technologies of mediation and environmental transformations. These explorations will be used as catalysts for architectural analysis and design experimentation.

Introducing design methodologies that allow us to see and to shape environmental interactions in new ways, the studio will focus on how architecture may operate as a mediator – an intermediary that negotiates, alters or redirects multiple forces in our world: physical, cultural, social, technological, political etc. The semester will progress through three projects that examine unique atmospheric, spatial and urban conditions with the aid of multimedia visual techniques; and that employ design to develop creative interventions at the scales of an interface, space and city.

Fall 2020: ARCH UN2103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ARCH 2103	001/00660	F 10:00am - 1:50pm Room TBA	Madeline Schwartzman	4	13/100

Spring 2021: ARCH UN2103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2103	001/00574	M W 9:00am - 11:50am 404 Diana Center	Ignacio Gonzalez Galan	4	14/16
ARCH 2103	001/00574	F 9:00am - 12:50pm 404 Diana Center	Ignacio Gonzalez Galan	4	14/16

FALL B IMMERSIVE COURSES

Fall B immersive courses will run during the second half of the semester: Mon., Oct. 26, 2020 – Wed., Dec. 23, 2020.

ARCH UN1020 Introduction To Architectural Design and Visual Culture. 3 points.

Introductory design studio to introduce students to architectural design through readings and studio design projects. Intended to develop analytic skills to critique existing media and spaces. Process of analysis used as a generative tool for the students' own design work. Must apply for placement in course. Priority to upperclass students. Class capped at 16.

Fall 2020: ARCH UN1020

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 1020	001/00656	T Th 2:40pm - 5:25pm Room TBA	Richard Rouhe	3	9/100

ARCH 1020	001/00572	M W 10:00am - 12:50pm Room TBA	Madeline Schwartzman	3	14/16

ARCH UN3201 ADVANCED ARCHITECTURAL DESIGN I. 4 points.

Prerequisites: ARCH V3101 and ARCH V3103. Open to architecture majors or with permission of instructor.

Prerequisites: ARCH UN2101 and ARCH UN2103. Advanced Architectural Design I explores the role of architecture and design in relationship to climate, community, and the environment through a series of design projects requiring drawings and models. Field trips, lectures, and discussions are organized in relation to studio exercises. A portfolio of design work from the prerequisite courses ARCH UN2101 and ARCH UN2103 will be reviewed the first week of classes.

Fall 2020: ARCH UN3201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 3201	001/00662	M W 9:00am - 11:50am Room TBA	Joeb Moore, Irina Verona, Ignacio Gonzalez Galan	4	35/100
ARCH 3201	001/00662	F 9:00am - 12:50pm Room TBA	Joeb Moore, Irina Verona, Ignacio Gonzalez Galan	4	35/100

ARCH UN3502 URBANIZING CHINA. 4 points.

This course investigates the dramatic urban transformation that has taken place in mainland China over the last four decades. The speed and scale of this transformation have produced emergent new lifeways, settlement patterns, and land uses that increasingly blur the distinction between urban and rural areas. At the same time, Chinese society is still characterized by rigid, administrative divisions between the nation's urban and rural sectors, with profound consequences for people's lives and

livelihoods. The course therefore examines the intersection between the rapid transformation of China's built environment and the glacial transformation of its administrative categories. We will take an interdisciplinary approach to this investigation, using perspectives from architecture, history, geography, political science, anthropology, urban planning, and cultural studies, among other disciplines.

The course is divided into two parts: Over the first five weeks, we will consider the historical context of China's urbanization and its urban-rural relations, including the imperial, colonial, and socialist periods, as well as the current period of reform. In the remainder of the semester, we will turn our focus to contemporary processes of urbanization, with a particular emphasis on the complex interrelationship between urban and rural China. This portion of the semester is organized into three two-week units on land and planning, housing and demolition, and citizenship and personhood.

Fall 2020: ARCH UN3502

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 3502	001/00684	M T W Th 1:10pm - 2:25pm Room TBA	Nick Smith	4	36/60

ARCH UN3290 Curating Architecture. 3 points.

This class will examine curating practices in relation to architectural exhibitions and publications. We will look at exhibitions, pavilions, installations, magazines, journals, boogazines, websites, and blogs (among other platforms) not only as mechanisms for presenting and distributing information but also as sites that serve as an integral part of architectural theory and practice.

Fall 2020: ARCH UN3290

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 3290	001/00664	M W 2:40pm - 3:55pm Room TBA	Ignacio Gonzalez Galan	3	16/100

ARCH 3997	005/00752		Nick Smith	2-4	1/1

ARCH GU4250 COLONIAL PRACTICES. 4 points.

In this seminar, we will consider colonial practices through architectures, institutions, infrastructures, and territories. Material architectures of extraction, settlement, occupation, and development have been used to occupy territories—and thus take on a special character in deserts, oceans, and jungles, which resist colonial mapping—just as conceptual architectures have produced forms of “coloniality,” following Maldonado-Torres, occupying the mind and spirit as well as the physical world. The seminar asks students to explore colonial practices in institutional structures, cultural production, built architecture, settlement, and ecologies—as sites with which to feel and think.

Students will lead discussion of shared readings, making presentations on concrete studies of the construction, destruction, maintenance, and use of architecture, infrastructure, and territories: for example, examining the figuration of Chiapas by the Zapatista movement, the colonization of space via launch sites in the Algerian desert, or the settlement of Indian coasts by abolitionist missionaries. Students are invited to bring their own historical objects of interest into the course,

and should expect to follow deep inquiry into an independent research question. The thematic arrangement of empirical studies is intended to frame open questions, structuring a debate on colonial practices as a theoretical framework that takes seriously the im/possibility of decolonizing architectural history. Our discussions will be propelled by the work of artists and architects, scholarly histories of architecture, space, and territory, and critical as well as radical indigenous, black and brown consciousness, feminist, and anticolonial and decolonial theory. Using actual places as intellectual problems—around which colonial maps have been constructed, across which nomads and migrants have moved, and within which insurgents have configured—this course attempts to offer strategic positions from which to sense, write, and think with architecture.

Fall 2020: ARCH GU4250

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 4250	001/00766	W 4:10pm - 6:00pm Room TBA	Anooradha Siddiqi	4	15/100

SPRING 2021 COURSES

The course schedule listed below may be subject to change. Please revisit this page and the online Directory of Classes in November 2020 to confirm our spring 2021 course information. You are also welcome contact us with any questions you may have: architecture@barnard.edu.

SPRING A IMMERSIVE COURSES

Spring A immersive courses will run during the first half of the semester: Mon., Jan. 11, 2021 – Fri., Feb. 26, 2021.

ARCH UN1010 Design Futures: New York City. 3 points.

How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design in contemporary culture -- from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences.

Fall 2020: ARCH UN1010

ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS. 4 points.

This architectural design studio explores material assemblies, techniques of fabrication, and systems of organization. These explorations will be understood as catalysts for architectural analysis and design experimentation.

Both designed objects and the very act of making are always embedded within a culture, as they reflect changing material preferences, diverse approaches to durability and obsolescence, varied understandings of comfort, different concerns with economy and ecology. They depend on multiple resources and mobilize varied technological innovations. Consequently, we will consider that making always involves making a society, for it constitutes a response to its values and a position regarding its technical and material resources. Within this understanding, this studio will consider different cultures of making through a number of exercises rehearse design operations at different scales—from objects to infrastructures.

Fall 2020: ARCH UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ARCH UN2103 ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS. 4 points.

This architectural design studio course explores modes of visualization, technologies of mediation and environmental transformations. These explorations will be used as catalysts for architectural analysis and design experimentation.

Introducing design methodologies that allow us to see and to shape environmental interactions in new ways, the studio will focus on how architecture may operate as a mediator – an intermediary that negotiates, alters or redirects multiple forces in our world: physical, cultural, social, technological, political etc. The semester will progress through three projects that examine unique atmospheric, spatial and urban conditions with the aid of multimedia visual techniques; and that employ design to develop creative interventions at the scales of an interface, space and city.

SPRING B IMMERSIVE COURSES

Spring B immersive courses will run during the second half of the semester: Mon., Mar. 8, 2021 – Mon., Apr. 26, 2021.

ARCH UN1020 Introduction To Architectural Design and Visual Culture. 3 points.

Introductory design studio to introduce students to architectural design through readings and studio design projects. Intended to develop analytic skills to critique existing media and spaces. Process of analysis used as a generative tool for the students' own design work. Must apply for placement in course. Priority to upperclass students. Class capped at 16.

Fall 2020: ARCH UN1020

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ARCH UN3202 ADVANCED ARCHITECTURAL DESIGN II. 4.50 points.

Prerequisites: ARCH V3201. Open to architecture majors or with permission of instructor.

Prerequisite: ARCH UN3201. Advanced Architectural Design II culminates the required studio sequence in the major.

Students are encouraged to consider it as a synthetic studio where they advance concepts, research methodologies and representational skills learned in all previous studios towards a semester-long design project. Field trips, lectures, and discussions are organized in relation to studio exercises

SPRING FULL-TERM COURSES

Spring full-term courses will run the full 14-week semester: Mon., Jan. 11, 2021 – Mon., Apr. 26, 2021.

ARCH UN3117 Modern Architecture in the World. 3 points.

Prerequisites: Designed for but not limited to sophomores; enrollment beyond 60 at the discretion of the instructor.

How has architecture been “modern”? This course will introduce students to things, practices, figures, and ideas behind this contentious and contradictory concept, emerging in multiple locations around the world. Students in this course will learn about architecture as it was practiced, taught, thought, and experienced across landscapes of social and cultural difference during the past two centuries. Learning about the past through historical consciousness around architecture and investigating the history of architecture as a discursive field are fundamental to liberal arts thinking generally, and important for students in

architecture, the history and theory of architecture, art history, and urban studies. Students in this course will be introduced to:

Architecture as enmeshed with other forms of cultural production

Culturally-specific intellectual and public debates around the architectural and urban

Makers, thinkers, and organizers of the designed or built environment

Geographies, territories, and mobilities associated with architecture as an end or means for material extraction, refinement, trade, labor, and construction

Sites, institutions, media, events, and practices which have come to hold meaning

Modernity, modernism, and modernization in relation to each other, as social, cultural, and technological drivers holding stakes for past events as well their histories.

In this course, we will ask questions about ideas and practices within disparate socially-and culturally-constructed worlds, and across other asymmetries. For example, can we draw a coherent historical thread through Lisbon in 1755, Bombay in 1854, Moscow in 1917, the moon in 1969, and al-Za’atari refugee camp in 2016? Are such narratives of coherence themselves the trace of the modernist impulse in architectural history? In this course, we will study modern architecture’s references to an art of building as well the metaphors it gives rise to. Embedded in this examination are social and cultural questions of who made and thought modern architecture, and aesthetic and historical questions around the figure of the architect.

ART HISTORY AND ARCHAEOLOGY

Departmental Office: 826 Schermerhorn; 212-854-4505
<http://www.columbia.edu/cu/arthistory/>

Director of Undergraduate Studies: Prof. Barry Bergdoll, 918 Schermerhorn; 212-854-5425; bgb1@columbia.edu

Director of Art Humanities: Prof. Noam Elcott, 907 Schermerhorn; 212-854-7968; nme2106@columbia.edu

Coordinator for Undergraduate Programs: Emily Benjamin, 826 Schermerhorn; 212-854-4505; eb3061@columbia.edu

The goal of the major in the Department of Art History and Archaeology is to explore the history of art, architecture, and archaeology across a broad historical, cultural, geographic, and methodological spectrum.

Department courses take advantage of the extraordinary cultural resources of New York City and often involve museum assignments and trips to local monuments. The department offers a major and concentration in art history and in the history and theory of architecture, and a combined major in art history and visual arts.

At the heart of the major is AHIS UN3000 INTRO LIT/ METHODS OF ART HIST, which introduces students to different methodological approaches to art history and critical texts that have shaped the discipline. The colloquium also prepares students for the independent research required in seminars and advanced lecture courses, and should be taken during the junior year.

Surveys and advanced lecture courses offered by Barnard and Columbia cover the spectrum of art history from antiquity to the present and introduce students to a wide range of materials and methodologies. Limited-enrollment seminars have a narrower focus and offer intensive instruction in research and writing. The opportunity for advanced research with a senior thesis is available to students who qualify.

The major readily accommodates students who wish to study abroad during junior year. Courses taken at accredited programs can generally count as transfer credits toward the major, but students must gain the approval of the director of undergraduate studies. Similarly, any transfer credit for the major must be approved by the director of undergraduate studies. Generally no more than 12 points of transfer credit are applicable to the major. The form to petition for transfer credit can be found on the [department website](#). Eligible Art History courses taken at Reid Hall and through the Berlin Consortium are counted as Columbia courses, not transfer courses.

All newly declared majors and concentrators should visit the department office and speak with the undergraduate

program coordinator about the requirements and their planned curriculum.

The director of undergraduate studies regularly communicates with majors by e-mail to announce departmental events, museum internships, and other news. **Students who do not receive these messages should email the undergraduate program coordinator.** The director of undergraduate studies is also available to talk to students about their professional goals and plans to study abroad.

COURSE INFORMATION

Lectures

Attendance at the first class meeting is recommended.

Colloquia

For information about enrollment in the required colloquium *AHIS UN3000 INTRO LIT/METHODS OF ART HIST*, students should consult the department during the registration period in the semester prior to the one in which the course is offered. Interested students must sign up using an online form; majors will be informed of the sign-up dates and deadline via the majors mailing list. Enrollment is limited and admission is at the discretion of the instructor. It is recommended that students sign up for the colloquium in their junior year.

Seminars

Seminars require an application which is due in the departmental office in 826 Schermerhorn before the registration period in the semester prior to the one in which the course is offered (April for fall courses, November for spring courses). The required application form is available in PDF format on the [department website](#). Students should wait list the seminars to which they apply on SSOL.

Bridge Seminars

Bridge seminars are open to graduate and undergraduate students. As with other seminars, they require an application, which are due in the semester prior to the semester in which the course is offered (August for fall courses, December for spring courses). The required application form is available in PDF format on the [department website](#).

Bridge Lectures

Bridge lectures are open to graduate and advanced undergraduate students. They do not require an application.

Travel Seminar

In the spring, one or more undergraduate seminars in the Department of Art History and Archaeology may be designated as a travel seminar. Travel seminars receive funding to sponsor travel over the spring break to a distant site related to the subject matter of the seminar.

STUDY ABROAD

Reid Hall, Paris

For information about the Columbia University in Paris Art History Program at Reid Hall, including summer session courses, visit the [Office of Global Programs](#) website.

Summer Program in Italy: Archaeological Fieldwork at Hadrian's Villa

Columbia University offers a four-week summer program that provides undergraduate and graduate students with the opportunity to excavate and learn together at Hadrian's Villa, a UNESCO World Heritage site near Rome and the most important Roman villa. It synthesizes Roman, Greek, and Egyptian architectural and artistic traditions and has attracted scholarly attention for centuries. For more information, visit the [program website](#).

Columbia Summer Program in Venice

The Department of Art History and Archaeology and the Department of Italian offer a summer program based at Co' Foscari University in Venice. The program uses an interdisciplinary approach to understanding Italian culture through study of its language, literature/film, architecture, art history and conservation, and economy. Students have the opportunity to gain a deeper appreciation of the rich Venetian culture, traditions and history. The program is open to qualified undergraduate and graduate students from the U.S. and Italy. For more information, visit the [program website](#).

Columbia Summer Program in Greece

The Department of Art History and Archaeology and the Program in Hellenic Studies offer a new summer program in Athens. "Curating the Histories of the Greek Present" examines aspects of Greek history and culture through the organization of an art exhibition under the general theme of the environment. The project is structured around classroom seminars, museum and site visits, walking tours, and workshop sessions in which students will learn about and gain experience in all stages of curating an exhibition. For more information, visit the [program website](#).

DEPARTMENTAL HONORS

In order to qualify for departmental honors, students must write a senior thesis and have a GPA of at least 3.7 in the major. The faculty of the Department of Art History and Archaeology submits recommendations to the College Committee on Honors, Awards, and Prizes for confirmation. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

SENIOR THESIS PRIZE

A prize is awarded each year to the best senior honors thesis written in the Department of Art History and Archaeology.

GUIDELINES FOR ALL ART HISTORY AND ARCHAEOLOGY MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Courses

HUMA UN1121 MASTERPIECES OF WESTERN ART, *Masterpieces of Western Art* (Art Humanities) does not count toward the majors or concentrations, and no credit is given for Advanced Placement exams.

Grading

Courses in which a grade of D has been received do not count toward the major or concentration requirements.

Only the first course a student takes in the department may be taken for a grade of Pass/D/Fail. Classes taken in the Architecture or Visual Arts departments to fulfill the studio requirement may be taken for a grade of Pass/D/Fail.

Senior Thesis

The senior thesis project consists of a research paper 35-45 pages in length. It is a year-long project, and students writing a thesis must register for *AHIS UN3002 Senior Thesis* for the fall and spring terms. Much of the fall semester is devoted to research, and the spring semester to writing.

All thesis writers are required to participate in class and, on alternate weeks, meet as a group or individually with the instructor. Group meetings are designed as a series of research and writing workshops geared toward students' research projects. Students receive a total of six credits for successful completion of the thesis and class.

In order to apply, students follow a selection process similar to the one currently used for seminars. Students must identify a thesis topic and secure a faculty adviser in the Department of Art History and Archaeology. Applications must indicate the subject of the thesis, a short annotated bibliography, and the name and the signature of the adviser, followed by a one-page statement (400 words) outlining the topic, goals, and methodology of the thesis.

The application deadline is set for August before the senior year. Please check the [department website](#) for exact dates. Applications may be delivered in person or emailed to the coordinator for undergraduate programs. The director of undergraduate studies, in consultation with the thesis adviser, reviews the applications.

Students who intend to write a thesis should begin formulating a research topic and approaching potential faculty sponsors during the spring of the junior year. Currently, the department offers the Summer Research Travel Grant fellowship, which supports thesis-related research and travel during the summer. Additional senior thesis research funding during the academic year is administered through Columbia College and General Studies.

Senior thesis applications may be found at: <http://www.columbia.edu/cu/arhistory/undergraduate/forms.html>

Summer Research Travel Grant

The department offers the Summer Research Travel Grant, which may be used for travel to museums, building sites, libraries, archives, and other places of interest relevant to the thesis project. Students normally use these funds to conduct research during the summer before senior year.

Travel grant applications require a carefully edited thesis proposal, itemized budget, and supporting letter from a faculty sponsor. Applications are due in April of the student's junior year. Students will be notified of deadlines as they become available. Please contact the coordinator for undergraduate programs with any questions.

MAJOR IN ART HISTORY

Please read *Guidelines for all for Art History and Archaeology Majors, Concentrators, and Interdepartmental Majors* above.

The year-long senior thesis project (for qualified students; see below) *AHIS UN3002 Senior Thesis* may substitute for one elective lecture course. Seminars may substitute for lecture courses and may count toward fulfillment of the distribution requirements. Barnard Art History courses count toward the majors and concentration requirements.

The requirements for the major are as follows:

AHIS UN3000	INTRO LIT/METHODS OF ART HIST
-------------	-------------------------------

Seven 3-point lecture courses in Art History:

At least one course in three of four historical periods, listed below

An additional two courses in two different world regions, listed below

Two additional lectures of the student's choice

Two seminars in art history

A studio course taken in the Visual Arts or Architecture departments (which may be taken Pass/D/Fail)

Historical Periods

- Ancient (pre-400 CE/AD)
- 400-1400
- 1400-1700
- 1700-Present

World Regions

- Africa
- Asia
- Europe/North America/Australia
- Latin America
- Middle East

NOTE: These chronological divisions are approximate. In case of ambiguities, please contact the director of undergraduate studies.

MAJOR IN HISTORY AND THEORY OF ARCHITECTURE

Please read *Guidelines for all for Art History and Archaeology Majors, Concentrators, and Interdepartmental Majors* above.

Majors can take advantage of one of the strengths of the department by focusing on architectural history. This track combines an introductory studio in architectural design with a slightly modified program in art history. Major requirements were updated in February 2019; please contact the director of undergraduate studies with any questions.

The requirements for the major are as follows:

AHIS UN3000	INTRO LIT/METHODS OF ART HIST
-------------	-------------------------------

Seven lecture courses in art history, one of which must be AHIS UN1007 Introduction to Architecture, and three of which must focus on architectural history. Courses must cover four of five general areas:

Ancient Mediterranean

Medieval Europe

Renaissance and Baroque

18th-20th century

Non-Western

At least two seminars in art history or architectural history

Architectural Studio:

ARCH UN1020	Introduction To Architectural Design and Visual Culture
-------------	---

NOTE: These chronological divisions are approximate. In case of ambiguities, please contact the director of undergraduate studies.

MAJOR IN ART HISTORY AND VISUAL ARTS

Please read *Guidelines for all for Art History and Archaeology Majors, Concentrators, and Interdepartmental Majors* above.

Students interested in the combined major should contact the coordinator for undergraduate programs in the Art History department, as well as the director of undergraduate studies in the Visual Arts department.

Up to two 3-point courses in art history may be replaced by a related course in another department, with approval of the adviser. The combined major requires the completion of sixteen or seventeen courses. It is recommended that students interested in this major begin working toward the requirements in their sophomore year.

The requirements for the major are as follows:

AHIS UN3000	INTRO LIT/METHODS OF ART HIST
-------------	-------------------------------

Seven 3-point lecture courses in art history:

At least one course in three of four historical periods, as listed below

An additional two courses in two different world regions, as listed below

Two additional lectures of the student's choice

21 points in Visual Arts covering:

VIAR UN1000	BASIC DRAWING
-------------	---------------

VIAR UN2300	Sculpture I
or VIAR UN2200	Ceramics I

Five additional VIAR 3-point studio courses (15 points)

In the senior year, students must complete either a seminar in the Department of Art History and Archaeology or a senior project in visual arts (pending approval by the Visual Arts Department).

NOTE: These chronological divisions are approximate. In case of ambiguities, please contact the director of undergraduate studies.

Historical Periods

- Ancient (pre-400 CE/AD)
- 400-1400
- 1400-1700
- 1700-present

World Regions

- Africa
- Asia
- Europe/North America/Australia
- Latin America
- Middle East

CONCENTRATION IN ART HISTORY

Please read *Guidelines for all for Art History and Archaeology Majors, Concentrators, and Interdepartmental Majors* above.

The requirements for the concentration are as follows:

Seven 3-point lecture courses in art history:

At least one course in three of four historical periods, listed below

An additional two courses in two different world regions, listed below

Two additional lectures of the student's choice

NOTE: These chronological divisions are approximate. In case of ambiguities, please contact the director of undergraduate studies.

Historical Periods

- Ancient (pre-400 CE/AD)
- 400-1400
- 1400-1700
- 1700-present

World Regions

- Africa
- Asia
- Europe/North America/Australia
- Latin America
- Middle East

Concentrators are not required to take the majors colloquium, a seminar, or a studio course.

CONCENTRATION IN HISTORY AND THEORY OF ARCHITECTURE

Please read *Guidelines for all for Art History and Archaeology Majors, Concentrators, and Interdepartmental Majors* above.

The requirements for the concentration are as follows:

AHIS UN1007	Introduction to the History of Architecture
-------------	---

Seven lecture courses in art history, one of which must be AHIS UN1007 Introduction to the History of Architecture, and three of which must focus on architectural history. Courses must cover four of five general areas:

Ancient Mediterranean

Medieval Europe

Renaissance and Baroque

18th-20th century

Non-Western

Concentrators are not required to take the majors colloquium, a seminar, or a studio course.

FALL 2020 UNDERGRADUATE LECTURES AND BRIDGE LECTURES

UNDERGRADUATE LECTURES: 2000-level courses.

Attendance at first class meeting is strongly recommended.

BRIDGE LECTURES: 4000-level courses. Bridge lectures are open to graduate and advanced undergraduate students.

They do not require an application. Attendance at first class is strongly recommended.

AHIS UN1007 Introduction to the History of Architecture. 4 points.

This course is required for architectural history and theory majors, but is also open to students interested in a general introduction to the history of architecture, considered on a global scale. Architecture is analyzed through in-depth case studies of key works of sacred, secular, public, and domestic architecture from both the Western canon and cultures of the ancient Americas and of the Hindu, Buddhist, and Islamic faiths. The time frame ranges from ancient Mesopotamia to the modern era. Discussion section is required.

AHIS UN2105 Greek Myths Seen Through Ancient Greek and Roman Art. 3 points.

The lecture course will explore the rich world of Greek mythology as seen through Greek and Roman art. An important focus will be the understanding of the significant discrepancies between the literary and artistic dissemination of ancient myths. The course will illuminate the ways in which ancient artists visualized Greek myths and demonstrate that art did not simply illustrate stories but helped shape them significantly while creating very often imaginative alternatives.

Fall 2020: AHIS UN2105

AHIS UN2309 Early Modern Architecture (1550-1799). 3 points.

This course examines the history of early modern architecture from a European perspective outward. It starts with the time of Michelangelo and Palladio and ends in the late eighteenth century. It addresses a number of transhistorical principal issues and analytical approaches while focusing on to a series of roughly chronological thematic studies. Travelling across courts, academies, streets, and buildings devoted to new institutions, this course examines the cultural, material, urban, social, and political dimensions of architecture, as well as temporal and geographic migrations of architectural knowledge. Topics will also include: the resurgence of interest in antiquity; the longue durée history of monuments; changes in building typology; the patronage and politics of architecture; technological developments and building practice; architectural theory, books, and the culture of print; the growth of capital cities; the creation of urban space and landscape; the formalization of architectural education; and the changing status of the architect.

AHIS GU4045 Collecting. 4 points.

Collecting is among the most universal of human social phenomena. The course begins by studying the universality of collecting, exploring its range and hierarchies. Following a study of social, psychological, and anthropological theories of collecting, the course traces the history of collecting at its highest levels, from Renaissance princely collections to modern public art museums. The course is mostly about European and American collecting, but includes discussion of how art from all over the world has been collected. Special attention will be paid to preserved collections and art about collecting.

FALL 2020 UNDERGRADUATE SEMINARS AND BRIDGE SEMINARS

UNDERGRADUATE SEMINARS: 3000-level courses open to undergraduate students only. Interested students must fill out and submit an online application form in the semester prior to when the course will be offered (April deadline for fall courses, November deadline for spring courses). Please visit the "Courses" page on the department website and select the upcoming semester to find a list of undergraduate seminar descriptions and links to seminar application forms.

BRIDGE SEMINARS: 4500-level courses open to advanced undergraduates and graduate students. Applications are due in August for fall courses, and January for spring courses. Please visit the "Courses" page on the department website and select

the upcoming semester to find a list of undergraduate seminar descriptions and links to seminar application forms.

AHIS UN3101 The Public Monument in the Ancient Near East. 4 points.

This seminar will focus on the invention of the public monument as a commemorative genre, and the related concepts of time, memory and history in the ancient Near East and Egypt. Public monuments will be studied in conjunction with readings from ancient texts (in translation), as well as historical criticism, archaeological and art historical theories.

Fall 2020: AHIS UN3101

AHIS UN3327 Building Before Industrialization. 4 points.

Architectural historians have long been interested in how changes in building materials, construction technologies, and methods of design and production shaped architecture from eighteenth century onward. By exploring how these shifts were tied to broader developments in society, from the so-called "Industrial Revolution" to the "Digital Revolution", this work has transformed the way we look at the modern built environment. Yet this interest in the meaning embedded in building processes has less commonly reached back to architecture produced before industrialization. In response to this lacuna, this seminar will examine the social, cultural, economic, technological history of construction from antiquity to the sixteenth century. More than just a survey of practice, the course will attempt to understand how issues of technology, production, and facture equally shaped architecture with particular focus on Old Kingdom Egypt, Classical Greece, Imperial Rome, Byzantine Constantinople, Gothic France, fifteenth-century Florence, and sixteenth-century Rome. In doing so, we will examine how buildings were built, the acquisition and transformation of materials, the organization of labor, the economics of construction, structural innovation, technological change and mechanization, natural philosophy, processes of design, and the role of builders and architects.

Fall 2020: AHIS UN3327

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

AHIS UN3417 Medieval Revival: Collecting, Copying, and Co-opting the Past. 4 points.

From the mid-eighteenth century through the early twentieth century, a fascination with the medieval world and its aesthetics would influence architecture, art collecting, and art movements like the Pre-Raphaelite Brotherhood and the Arts and Crafts movement in Britain and the United States. Taking an interdisciplinary approach, this course explores works of art and architecture inspired by the vogue for medieval revival, theorizing them in relation to Romanticism, nationalism, and anti-modernism. This course will simultaneously explore the way that the discipline of medieval art history and the history of collecting has been shaped by these narratives.

Fall 2020: AHIS UN3417

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3417	001/15287	M 12:10pm - 2:00pm Online Only	Olivia Clemens	4	10/12

AHIS UN3453 Women Artists in Eighteenth-Century Europe. 4 points.

This seminar will examine the career and artistic production of women artists in the long eighteenth century in Europe, with a specific focus on Italy, France and Britain. Recent research has shown that many women managed to become professional artists during this period. But how successful were they? And what did their work consist of? To date, the historical recovery of data about their career and oeuvre remains a work in progress. In contrast, the few women artists who reached international fame in the eighteenth-century – in part because they were members of otherwise overwhelmingly male art academies – have received significant scholarly attention by art historians that include Angela Rosenthal and Mary Sheriff, among others, and have been the subject of important monographic exhibitions in the past two decades. In light of this state of the research, we will study the cases of canonical artists, such as Angelica Kauffman (1741-1807), as well as the cases of still understudied (yet sufficiently documented) artists, such as Marie Geneviève Bouliar (1763-1825). Our primary task will be to examine the different ways in which women who became artists navigated the eighteenth-century social order – an order where the terms “woman” and “professional artist” were commonly understood as contradictory – and analyze their art with a critical understanding of the expectations, aesthetic and otherwise, that they were held to. Topics of discussion will include: training; the hierarchy of genres; women artists and media, including miniature, engraving and sculpture; self-portraiture and gender expectations; women artists and art criticism; and emulation and authorship.

AHIS UN3503 Contemporary Arts of Africa. 4 points.

This course takes up a question posed by Terry Smith and applies it to Africa: “Who gets to say what counts as contemporary art?” It will investigate the impact of modernity, modernism, and increasing globalism on artistic practices with a special focus on three of the major centers for contemporary art in sub-Saharan Africa: Senegal, South Africa, Nigeria.

Some of the topics covered will be: the emergence of new media (such as photography or cinema), the creation of “national” cultures, experiments in Pan-Africanism, diasporic consciousness, and the rise of curators as international culture-brokers. The course will examine the enthusiastic embrace by African artists of the biennial platform as a site for the production of contemporary art. What differential impact has French vs. British colonialism left on the arts? How are contemporary artists responding to calls for restitution on African cultural heritage?

AHIS UN3708 Beyond El Dorado: Materials, Values, and Aesthetics in Pre-Columbian Art History. 4 points.

In this seminar, we will investigate ancient and indigenous art, materials, and aesthetics from areas of what is today Latin America. Taking advantage of New York’s unrivaled museum collections, we will research Pre-Columbian gold and silver work, as well as equally precious stone, shell, textile, and feather works created by artists of ancient Mexico, Central America, and Andean South America. We will also study latter-day histories of collecting, reception, display, appropriation, and activism that shape contemporary understandings of Pre-Columbian art.

AHIS 3708	001/11340	T 2:10pm - 4:00pm Online Only	Lisa Trever	4	11/12

AHIS GU4646 Foucault and the Arts. 4 points.

Michel Foucault was a great historian and critic who helped change the ways research and criticism are done today – a new ‘archivist’. At the same time, he was a philosopher. His research and criticism formed part of an attempt to work out a new picture of what it is to think, and think critically, in relation to Knowledge, Power, and Processes of Subjectivization. What was this picture of thought? How did the arts, in particular the visual arts, figure in it? How might they in turn give a new

image of Foucault's kind of critical thinking for us today? In this course, we explore these questions, in the company of Deleuze, Agamben, Rancière and others thinkers and in relation to questions of media, document and archive in the current 'regime of information'. The Seminar is open to students in all disciplines concerned with these issues.

Fall 2020: AHIS GU4646

AHIS GU4948 American Government Architecture: Governance and Governmentality. 4 points.

How do dynamics of governance shape architecture, like states' rights in America's federal system? And how do government centers through form, space, and symbol shape citizens' identities and consent to be governed, aspects of governmentality theorized by Foucault and subject to resistance and reform? Focused upon modern American architecture and urbanism this seminar is open to students' explorations in other media, places, and times. If feasible, field trips will go to local and/or regional sites. No prerequisites are necessary for this class.

SPRING 2021 UNDERGRADUATE LECTURES AND BRIDGE LECTURES

UNDERGRADUATE LECTURES: 2000-level courses.

Attendance at first class meeting is strongly recommended.

BRIDGE LECTURES: 4000-level courses. Bridge lectures are open to graduate and advanced undergraduate students. They do not require an application. Attendance at first class is strongly recommended.

AHIS UN2119 Rome Beyond Rome: Roman Art and Architecture in a Global Perspective. 4 points.

This course will approach the art of the Roman empire from two vantage points. In its first half, it will consider it from the inside. Through a regional survey of the art and architecture produced in the provinces of the Roman empire between the 2nd c. BCE and the 4th c. CE, it will focus on the mechanisms

by which models emanating from Rome were received and adapted in local contexts (so-called “Romanization”), as well as on the creative responses that the provincials’ incorporation into the empire elicited. The second half of the course will consider the art of the Roman empire from the outside, i.e., from the perspective of its neighbors in the Middle East and in Africa, as well as its self-proclaimed successors and imitators. On the one hand, we will see how ancient states such as the kingdom of Meroë and the Parthian empire, or regions such as the Gandhara, interacted with the visual culture of Rome and its empire. On the other, we will explore the degree to which the classical roots of the modern colonial empires in Asia, Africa, and the Americas both managed and failed to shape the visual cultures that these empires developed.

Spring 2021: AHIS UN2119

AHIS UN2305 RENAISSANCE IN IMPERIAL SPAIN. 3.00 points.

Prerequisites: Required discussion section AHIS UN2306
The course will survey Renaissance art in Hapsburg Spain, considered in the wide geographical context of the extended and dispersed dominions of the different crowns of the Spanish monarchy, which connected the Iberian Peninsula with Italy, Flanders and the New World. It will concern visual art in its various media, mainly painting, sculpture and architecture, but also tapestries, prints, armor, goldsmithery and ephemeral decoration, among others. Works of the main artists of the period will be introduced and analyzed, giving attention to the historical and cultural context of their production and reception. The course will particularly focus on the movement of artists, works and models within the Spanish Hapsburg territories, in order to understand to what extent visual arts contributed to shaping the political identity of this culturally composite empire

AHIS UN2400 NINETEENTH-CENTURY ART. 4.00 points.

How do you represent a revolution? What does it mean to picture the world as it “really” is? Who may be figured as a subject or citizen, and who not? Should art improve society, or critique it? Can it do both? These are some of the many questions that the artists of nineteenth-century Europe grappled with, and that we will explore together in this course. This was an era of rapid and dramatic political, economic, and cultural change, marked by wars at home and colonial expansion abroad; the rise of industrialization and urbanization; and the invention of myriad new technologies, from photography to the railway. The arts played an integral and complex role in all

of these developments: they both shaped and were shaped by them. Lectures will address a variety media, from painting and sculpture to the graphic and decorative arts, across a range of geographic contexts, from Paris, London, Berlin, and Madrid to St. Petersburg, Cairo, Haiti, and New Zealand. Artists discussed will include Jacques-Louis David, Francisco Goya, Théodore Géricault, J.M.W. Turner, Adolph Menzel, Ilya Repin, Edouard Manet, Claude Monet, Mary Cassatt, James McNeill Whistler, C. F. Goldie, Victor Horta, and Paul Cézanne

AHIS UN2405 Twentieth-Century Art. 3 points.

The course will examine a variety of figures, movements, and practices within the entire range of 20th-century art—from Expressionism to Abstract Expressionism, Constructivism to Pop Art, Surrealism to Minimalism, and beyond—situating them within the social, political, economic, and historical contexts in which they arose. The history of these artistic developments will be traced through the development and mutual interaction of two predominant strains of artistic culture: the modernist and the avant-garde, examining in particular their confrontation with and development of the particular vicissitudes of the century’s ongoing modernization. Discussion section complement class lectures.

AHIS UN2612 A History of China in 27 Objects. 3 points.

This course introduces twenty-seven significant monuments and objects comprising a selective overview of 4000 years of traditional Chinese culture. Through these twenty-seven objects, we will think about historical currents, consider materials (clay, stone, bronze, lacquer, paper, silk, ink, and wood), how things were made, how these objects were used among the living, and why some of them were buried with the dead. Because analogy and metaphor is fundamental to Chinese language, we will examine visual symbols, auspicious imagery and rhetoric of resistance that had their origins in literature. The goal of the course is to raise awareness of visual clues in Chinese art and to establish basic visual literacy. After successfully completing this course you will be better able to articulate a research question, read more critically, write a visual analysis, and impress friends and family as you name a painting used in restaurant décor.

AHIS UN2702 Pre-Columbian Art and Architecture. 3 points.

The Western Hemisphere was a setting for outstanding accomplishments in the visual arts for millennia before Europeans set foot in the so-called “New World.” This course explores the early indigenous artistic traditions of what is now

Latin America, from early monuments of the formative periods (e.g., Olmec and Chavín), through acclaimed eras of aesthetic and technological achievement (e.g., Maya and Moche), to the later Inca and Aztec imperial periods. Our subject will encompass diverse genre including painting and sculpture, textiles and metalwork, architecture and performance. Attention will focus on the two cultural areas that traditionally have received the most attention from researchers: Mesoamerica (including what is today Mexico, Guatemala, Belize, El Salvador, and Honduras) and the Central Andes (including Ecuador, Peru, and Bolivia). We will also critically consider the drawing of those boundaries—both spatial and temporal—that have defined “Pre-Columbian” art history to date. More than a survey of periods, styles, and monuments, we will critically assess the varieties of evidence—archaeological, epigraphic, historical, ethnographic, and scientific—available for interpretations of ancient Latin American art and culture.

AHUM UN2901 Masterpieces of Indian Art and Architecture. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Introduction to 2000 years of art on the Indian subcontinent. The course covers the early art of Buddhism, rock-cut architecture of the Buddhists and Hindus, the development of the Hindu temple, Mughal and Rajput painting and architecture, art of the colonial period, and the emergence of the Modern.

SPRING 2021 UNDERGRADUATE SEMINARS AND BRIDGE SEMINARS

UNDERGRADUATE SEMINARS: 3000-level courses open to undergraduate students only. Interested students must fill out and submit an online application form in the semester prior to when the course will be offered (April deadline for fall courses, November deadline for spring courses). Please visit the ["Courses" page on the department website](#) and select the upcoming semester to find a list of undergraduate seminar descriptions and links to seminar application forms.
BRIDGE SEMINARS: 4500-level courses open to advanced

undergraduates and graduate students. Applications are due in August for fall courses, and January for spring courses. Please visit the "Courses" page on the department website and select the upcoming semester to find a list of undergraduate seminar descriptions and links to seminar application forms.

AHIS UN3410 Approaches to Contemporary Art. 3 points.

This course examines the critical approaches to contemporary art from the 1970s to the present. It will address a range of historical and theoretical issues around the notion of "the contemporary" (e.g. globalization, participation, relational art, ambivalence, immaterial labor) as it has developed in the era after the postmodernism of the 1970s and 1980s.

Spring 2021: AHIS UN3410

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3410	001/12539	T 2:10pm - 4:00pm Online Only	Branden Joseph	3	11/12

AHIS UN3444 Reflexivity in Art and Film. 4 points.

This seminar will explore a range of individual works of Western art from the 16th century to late 20th century in which the tension between illusionism and reflexivity is foregrounded. It will focus on well-known paintings and films in which forms of realism and verisimilitude coexist with features that affirm the artificial or fictive nature of the work or which dramatize the material, social and ideological conditions of the work's construction. Topics will include art by Durer, Holbein, Velazquez, Watteau, Courbet, Morisot, Vertov, Deren, Godard, Varda, Hitchcock and others. Readings will include texts by Auerbach, Gombrich, Brecht, Jameson, Barthes, Didi-Huberman, Bazin, Lukacs, Mulvey, and Daney

Spring 2021: AHIS UN3444

AHIS UN3316 Mediterranean Maps. 4.00 points.

How do maps construct, rather than represent, territories, identities, pathways, and temporalities? From esoteric personifications of the continents to portolan nautical charts, this seminar investigates maps of the Mediterranean Sea and its borderlands from 1300-1700. We will probe cartographic visualization systems to understand what kinds of perspectives and orientations specific maps presumed, invited, or denied. Topics include port city commerce, wayfinding and navigation, the rise of Mercator's projection, and mapping shifting boundaries. At the heart of this course is the Mediterranean itself, which we will trace west with colonial expeditions beyond the present-day strait of Gibraltar

Spring 2021: AHIS UN3316

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3316	001/12538	W 12:10pm - 2:00pm Online Only	Diana Mellon	4.00	5/12

AHIS UN3433 Enlightenment and Archaeology. 4 points.

In this seminar, we will study the emergence of the disciplines of Near Eastern and Classical archaeology, antiquarian interests and collecting practices in eighteenth and nineteenth century Europe. This European scientific interest was centered around the ancient past of lands under the Ottoman empire in the Near East and the Eastern Mediterranean. Students will learn about antiquarianism and the development of the scientific discipline of archaeology, how it defined itself and set itself apart from its predecessor, focusing on the earliest collecting and documentation of antiquities, the start of organised excavations, the origins of the modern museum and early archaeological photography.

Spring 2021: AHIS UN3433

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3433	001/12560	Th 2:10pm - 4:00pm Online Only	Zainab Bahrani	4	5/12

AHIS GU4521 Sin and Sodomy. 4.00 points.

For the unrepentant sins of their inhabitants God had Sodom and Gomorrah, the ignominious twin cities from Genesis, shattered to smithereens. Throughout the Middle Ages, the tale was invoked to justify harsh judgment of mortal sins of the flesh and "unnatural" sex acts, in particular those occurring between members of the same sex. This bridge seminar focuses on the church's desire to control the potential of human sexuality to subvert its order of "natural" law. Through historical texts and artworks from the period, we will analyze the wide diversity of medieval attitudes toward non-normative sex and eroticism in a variety of contexts, from the construction of the phenomenon of sodomy in early and high medieval exegesis, the eradication of pre-Christian fertility rituals in northern and eastern Europe, the playful undermining of gender roles in secular medieval romances, to illicit accounts of public sex in pleasure gardens and bath houses, and monumental hellscapes rendered with graphic visualizations of sexual violence. Moving chronologically through the Middle Ages, we will end by addressing modern questions surrounding the sexuality of Jean the Duke of Berry and Albrecht Dürer, and Hieronymus Bosch's fixation with butt play. Discussion will be informed by critical readings in queer theory, feminism, and gender studies by Jack Halberstam, David Halperin, Susan Stryker, to name a few, and by medievalists employing these methods, such as Roland Betancourt, Caroline Walker Bynum, Michael Camille, Dyan Elliott, and Robert Mills

AHIS GU4760 Great Waves: Arts of the Floating World. 4.00 points.

"Pictures of the Floating World" (Ukiyo-e) constitute one of the most significant developments in the history of Japanese

art, and one that would have a profound impact on the history of art in Europe and the west in the early modern period. These images were created on all pictorial formats, from scroll paintings and painted fans to woodblock prints, wooden posters, lanterns, and kites. Because these images pervaded so many different media, Ukiyo-e images offer a unique lens through which to examine the role art in an early modern society as well as the very nature of that society. Our course will focus primarily on the woodblock print, a popular pictorial form that was accessible to broad sectors of society, and will focus on woodblock prints created in the city of Edo between 1700 and 1860. The course will be shaped around three approaches: brief weekly lectures to introduce prominent images and themes; discussion of readings that offer critical perspectives; and if possible, direct examination of works of art in the collections of Columbia University and other institutions and collections in New York

ASTRONOMY

Departmental Office: 1328 Pupin; 212-854-3278

<http://www.astro.columbia.edu>

Director of Undergraduate Studies:

Prof. Frederik B.S. Paerels, 1022 Pupin;
212-854-0181; frits@astro.columbia.edu

Astronomy is, at once, the oldest science and one of the most vibrant fields of modern research. Its goal is to construct testable, quantitative, coherent models of the universe (the UNity of the diVERSE) and its contents—galaxies, stars, and planets. The department offers two majors, both of which require a solid grounding in the mathematics and physics necessary for the pursuit of the discipline.

The astrophysics major is designed as preparation for graduate study and consists of a standard physics major sequence; a yearlong introduction to astrophysics (typically taken in the sophomore year, but open to first-years with adequate preparation in calculus and physics); and two required courses covering advanced topics in astronomy. Research, in the form of summer internships and/or term-time independent projects, which can lead to a senior thesis, is strongly encouraged. For a research thesis, students should enroll in the parallel, two-semester sequence *ASTR UN3997-ASTR UN3998 Independent Research*, preferably in their senior year. Students begin the research project in the fall and complete the written thesis in the spring. *ASTR UN3997* and *ASTR UN3998* cannot be repeated for credit.

The astronomy major provides a basis for further study in the field, but is also designed to be compatible with liberal arts students who pursue other careers and those wishing to

combine astronomy with related sciences other than physics, such as chemistry or geology. It requires only two physics courses beyond the introductory sequence and can be completed easily if begun in the sophomore year.

The department offers numerous introductory astronomy courses at the 1000-level that do not have prerequisites. The calculus-based *ASTR UN2001 Introduction To Astrophysics*, *I-ASTR UN2002 INTRO TO ASTROPHYSICS II* sequence is recommended for astronomy majors and concentrators and is required for astrophysics majors.

Most 3000-level courses, as well as *ASTR GU4260 Modeling the Universe*, are offered every other year. Students should inquire with the director of undergraduate studies if they have specific questions on the course schedule. *ASTR UN3996 Current Research in Astrophysics* is a one-point course offered in the fall, designed to introduce majors to research methods and topics. It requires students to attend the department colloquia and a seminar designed to help students understand the colloquium topic. The 3000-level courses need not be taken in any particular order.

GUIDELINES FOR ALL ASTRONOMY MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Courses in which the grade of D has been received do not count toward the major or concentration requirements.

MAJOR IN ASTRONOMY

The major requirements, to be planned with the director of undergraduate studies, are as follows:

Mathematics

Calculus sequence through MATH UN1202 Calculus IV or MATH UN1208 Honors Mathematics IV

Astronomy

Select one of the following options:

Option 1:

Two 3-point 1000-level astronomy courses
12 points in astronomy at the 2000-level or above

Option 2:

ASTR UN2001	Introduction To Astrophysics, I
- ASTR UN2002	and INTRO TO ASTROPHYSICS II

9 points in astronomy at the 3000-level or above

Physics

Select one of the following physics sequences:

Sequence 1:

PHYS UN1401	Introduction To Mechanics and
- PHYS UN1402	Thermodynamics
- PHYS UN1403	and INTRO ELEC/MAGNETISM # OPTCS
	and Introduction to Classical and Quantum Waves

Sequence 2:

PHYS UN1601	Physics, I: Mechanics and
- PHYS UN1602	Relativity
- PHYS UN2601	and Physics, II: Thermodynamics, Electricity, and Magnetism
	and Physics, III: Classical and Quantum Waves

Sequence 3:

PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

Additional Physics Courses

Two physics courses at the 3000-level or above

Students contemplating graduate study are advised to include at least two of these physics courses:

PHYS UN3003	Mechanics
PHYS UN3007	Electricity and Magnetism

PHYS GU4021	Quantum Mechanics I
- PHYS GU4022	and Quantum Mechanics II

One of these may be substituted for 3 points of astronomy.

MAJOR IN ASTROPHYSICS

Students considering an Astrophysics major are encouraged to meet with the director of undergraduate studies. If possible, it is useful to start the physics sequence in the first year.

Mathematics

Calculus sequence through MATH UN1202 Calculus IV or MATH UN1208 Honors Mathematics IV

Astronomy

ASTR UN2001	Introduction To Astrophysics, I
- ASTR UN2002	and INTRO TO ASTROPHYSICS II

6 points in astronomy at the 3000-level or above

Physics

Select one of the following physics sequences:

Sequence 1:

PHYS UN1401	Introduction To Mechanics and
- PHYS UN1402	Thermodynamics
- PHYS UN1403	and INTRO ELEC/MAGNETISM # OPTCS
	and Introduction to Classical and Quantum Waves

Sequence 2:

PHYS UN1601	Physics, I: Mechanics and
- PHYS UN1602	Relativity
- PHYS UN2601	and Physics, II: Thermodynamics, Electricity, and Magnetism
	and Physics, III: Classical and Quantum Waves

Sequence 3:

PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

Additional Physics Courses

PHYS UN3003	Mechanics
PHYS UN3007	Electricity and Magnetism
PHYS UN3008	Electromagnetic Waves and Optics

PHYS GU4021	Quantum Mechanics I
- PHYS GU4022	and Quantum Mechanics II

OR

PHYS BC3006	Quantum Physics
- PHYS GU4023	and Thermal and Statistical Physics

CONCENTRATION IN ASTRONOMY

An extra 3 points of physics can substitute for 3 points of astronomy, as long as the course submitted is at the equivalent or higher level. The concentration requirements are as follows:

Mathematics

9 points of mathematics

Astronomy

15 points of astronomy, nine of which must be at or above the 2000-level

Physics

9 points of physics

FALL 2020**ASTR UN1403 Earth, Moon and Planets (Lecture). 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond. This course is similar to ASTR BC 1753. You cannot enroll in both courses and receive credit for both.

Fall 2020: ASTR UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1403	001/12064	T Th 1:10pm - 2:25pm Online Only	James Applegate	3	54/75

Spring 2021: ASTR UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1403	001/11739	T Th 1:10pm - 2:25pm Online Only	James Applegate	3	69/75

ASTR UN1404 STARS, GALAXIES & COSMOLOGY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Distances to, and fundamental properties of, nearby stars; nucleosynthesis and stellar evolution; novae and supernovae; galaxies; the structure of the universe and theories concerning its origin, evolution, and ultimate fate. You can only receive credit for ASTR UN1404 if you have not taken ASTR BC1754, ASTR UN1420 or ASTR UN1836

Fall 2020: ASTR UN1404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1404	001/12065	M W 2:40pm - 3:55pm Online Only	Lorenzo Sironi	3.00	73/75

ASTR UN1453 Another Earth. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

This course cannot be taken for credit if BC1753 has been taken.

This course will explore the unique properties of Earth, compared to other planets in the Solar System, and the possibility of Earth-like planets around other stars. The basics of the Solar System, gravity, and light will be covered, as well as the geology and atmospheres of the terrestrial planets. The

properties of Earth that allowed life to develop and whether life can develop on other planets will be discussed. Finally, the discovery of planets beyond our Solar System and the likelihood of another Earth will be a key component of the course.

Fall 2020: ASTR UN1453

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1453	001/20950	T Th 2:40pm - 3:55pm Online Only	Mary Putman	3	67/75

ASTR 1453	001/11740	M W 2:40pm - 3:55pm Online Only	Mary Putman	3	68/75

ASTR UN1836 Stars and Atoms. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

Fall 2020: ASTR UN1836

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1836	001/12067	M W 10:10am - 11:25am Online Only	Frederik Paerels	3	84/75

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1836	001/11741	M W 1:10pm - 2:25pm Online Only	Marcel Agueros	3	34/40

ASTR UN2001 Introduction To Astrophysics, I. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a working knowledge of calculus.

Corequisites: a course in calculus-based general physics.

First term of a two-term calculus-based introduction to astronomy and astrophysics. Topics include the physics of stellar interiors, stellar atmospheres and spectral classifications, stellar energy generation and nucleosynthesis, supernovae, neutron stars, white dwarfs, and interacting binary stars.

Fall 2020: ASTR UN2001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

ASTR 2001 001/12068 M W 10:10am - Greg Bryan 3 38/45
11:25am
Online Only

ASTR UN2900 Frontiers of Astrophysics. 1 point.

Several members of the faculty each offer a brief series of talks providing context for a current research topic in the field and then present results of their ongoing research. Opportunities for future student research collaboration are offered. Grading is Pass/Fail.

Fall 2020: ASTR UN2900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2900	001/12069	F 10:10am - 11:25am Online Only	Caleb Scharf	1	48/50

ASTR UN3101 Modern Stellar Astrophysics II. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. Introductory astronomy is not required, but some exposure to astronomy is preferable. In the first half of the course, we will examine the physics of stellar interiors in detail, leading us to develop models of stellar structure and consider how stars evolve. In the second half of the course, we will discuss special topics, such as pre-main sequence evolution, the late stages of stellar evolution, and supernovae and compact objects.

Fall 2020: ASTR UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3101	001/12070	M W 1:10pm - 2:25pm Online Only	Marcel Agueros	3	14/20

ASTR UN3105 Extrasolar Planets and Astrobiology. 3 points.

Prerequisites: One year of calculus-based physics. The emerging field of extrasolar planets and astrobiology will be covered at a quantitative level, with a major emphasis on astrophysical phenomena and techniques. The subject will be introduced through an investigation of current planetary formation theories and approaches to planet detection, including what we currently know about extrasolar planets and detailed reference to state-of-the-art studies. An astronomer's view of the origin of life and extreme biology will be developed and applied to questions of cosmo-chemistry, observable life-signatures, habitable zones and other astrophysical constraints on the development of organisms.

Fall 2020: ASTR UN3105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3105	001/12071	T Th 1:10pm - 2:25pm Online Only	Caleb Scharf	3	33/35

ASTR UN3646 Observational Astronomy. 3 points.

Prerequisites: one year of general astronomy

Introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on 'ground-based' methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs. In research projects, students also work on the analysis of data obtained at National Observatories.

ASTR UN3997 Independent Research. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration. A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Senior majors in astronomy or astrophysics wishing to do a senior thesis should make arrangements in May of their junior year and sign up for a total of 6 points over their final two terms. Both a substantial written document and an oral presentation of thesis results are required.

Fall 2020: ASTR UN3997

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3997	001/20806		David Kipping	3	2/10

ASTR GR6003 Galaxies. 3 points.

An introduction to the study of galaxies, from both observational and theoretical perspectives. The course will review our current understanding of the formation and evolution of galaxies through descriptions of: their structure and dynamics; the gas and stellar populations they contain; and what we know about the distribution of dark matter within them.

Fall 2020: ASTR GR6003

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ASTR BC1754 Stars, Galaxies, and Cosmology. 3 points.

BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Prerequisites: Recommended preparation: A working knowledge of high school algebra.

Corequisites: Suggested parallel laboratory course: ASTR C 1904y.

Examines the properties of stars, star formation, stellar evolution and nucleosynthesis, the Milky Way and other galaxies, and the cosmological origin and evolution of the universe. Students may not receive credit for both ASTR BC 1754 and ASTR C1404.

Spring 2021: ASTR BC1754

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1754	001/00484	M W 10:10am - 11:25am 903 Altschul Hall	David Helfand	3	55

ASTR UN1836 Stars and Atoms. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

Fall 2020: ASTR UN1836

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ASTR UN2002 INTRO TO ASTROPHYSICS II. 3.00 points.

Prerequisites: a working knowledge of calculus.

Corequisites: the second term of a course in calculus-based general physics.

Prerequisites: a working knowledge of calculus. Corequisites: the second term of a course in calculus-based general physics. Continuation of ASTR UN2001; these two courses constitute a full year of calculus-based introduction to astrophysics. Topics include the structure of our galaxy, the interstellar medium, star clusters, properties of external galaxies, clusters of galaxies, active galactic nuclei, and cosmology

Spring 2021: ASTR UN2002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2002 001/11742		M W 8:40am - 9:55am Online Only	Frederik Paerels	3.00	30/45

ASTR UN3103 GALAXIES. 3.00 points.

Prerequisites: one year of calculus-based general physics.

Prerequisites: one year of calculus-based general physics.

Galaxies fill the universe with structure. They are bound objects that harbor stars, gas, dust and dark matter. This course will discuss the content and structure of galaxies. It will start with the Milky Way, a rotating spiral galaxy, with a particular emphasis on the properties of the interstellar medium. Dwarf galaxies, the building blocks of larger galaxies, will subsequently be discussed, followed by spiral, elliptical and irregular galaxies. The formation and evolution of these different galaxy types will be an important focus of the course, as well as the environment in which the galaxies reside. We will intersperse reviews of current papers on galaxies throughout the semester

ASTR UN3998 Independent Research. 3 points.

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration.

A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Senior majors in astronomy or astrophysics wishing to do a senior thesis should make arrangements in May of their junior year and sign up for a total of 6 points over their final two terms. Both a substantial written document and an oral presentation of thesis results are required.

ASTR GU4242 Order of Magnitude Astrophysics. 3 points.

Prerequisites: one year of calculus-based general physics. No previous astronomy background required.,

Estimation is an essential skill for astronomy and life in general. This course will introduce to order of magnitude calculations, the practice of solving problems approximately, within a factor of 10. The course will cover examples from planets, stars, compact objects, galaxies and cosmology.

Spring 2021: ASTR GU4242

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 4242 001/11745		T Th 10:10am - 11:25am 307 Pupin Laboratories	Lorenzo Sironi	3	12/25

ASTR GU4303 Astrostatistics. 3 points.

Astronomers live in era of "big data". Whilst astronomers of a century ago collected a handful of photographic plates each night, modern astronomers collect thousands of images encoded by millions of pixels in the same time. Both the volume of data and the ever present desire to dig deeper into data sets has led to a growing interest in the use of statistical methods to interpret observations. This class will provide an introduction to the methods commonly used in understanding astronomical data sets, both in terms of theory and application. It is one six classes the department offers every fourth semester.

ALL COURSES (INCLUDING THOSE NOT OFFERED IN ACADEMIC YEAR 2020-2021)

ASTR UN1234 The Universal Timekeeper: Reconstructing History Atom by Atom. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school algebra and latent curiosity are assumed.

The goal of the course is to illustrate — and perhaps even inculcate — quantitative and scientific reasoning skills. The subject material employed in this task is the study of atoms and their nuclei which, through a wide variety of physical and chemical techniques, can be used to reconstruct quantitatively the past. Following an introduction to atoms, light, and energy, we will explore topics including the detection of art forgeries, the precise dating of archeological sites, a reconstruction of the development of agriculture and the history of the human diet, the history of past climate (and its implications for the future), the history and age of the Earth, and the history of the Universe. The course has no required text. Readings of relevant articles and use of on-line simulations will be required.

ASTR S1403D Earth, Moon, and Planets. 3 points.

Prerequisites: Recommended preparation: a working knowledge of high school algebra.

May be counted toward the science requirement for most Columbia University undergraduate students. The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond.

ASTR UN1403 Earth, Moon and Planets (Lecture). 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond. This course is similar to ASTR BC 1753. You cannot enroll in both courses and receive credit for both.

Fall 2020: ASTR UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1403	001/12064	T Th 1:10pm - 2:25pm Online Only	James Applegate	3	54/75

ASTR UN1404 STARS, GALAXIES & COSMOLOGY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Distances to, and fundamental properties of, nearby stars; nucleosynthesis and stellar evolution; novae and supernovae; galaxies; the structure of the universe and theories concerning its origin, evolution, and ultimate fate. You can only receive credit for ASTR UN1404 if you have not taken ASTR BC1754, ASTR UN1420 or ASTR UN1836

Fall 2020: ASTR UN1404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1404	001/12065	M W 2:40pm - 3:55pm Online Only	Lorenzo Sironi	3.00	73/75

ASTR UN1453 Another Earth. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

This course cannot be taken for credit if BC1753 has been taken.

This course will explore the unique properties of Earth, compared to other planets in the Solar System, and the possibility of Earth-like planets around other stars. The basics of the Solar System, gravity, and light will be covered, as well as the geology and atmospheres of the terrestrial planets. The properties of Earth that allowed life to develop and whether life can develop on other planets will be discussed. Finally, the discovery of planets beyond our Solar System and the

likelihood of another Earth will be a key component of the course.

Fall 2020: ASTR UN1453

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1453	001/20950	T Th 2:40pm - 3:55pm Online Only	Mary Putman	3	67/75

ASTR UN1420 Galaxies and Cosmology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Galaxies contain stars, gas dust, and (usually) super-massive black holes. They are found throughout the Universe, traveling through space and occasionally crashing into each other. This course will look at how these magnificent systems form and evolve, and what they can tell us about the formation and evolution of the Universe itself. You cannot enroll in ASTR UN1420 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

ASTR UN1610 THEOR-UNIVERS:BABYLON-BIG BANG. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Milestones in the science of cosmology over the past 6000 years. Skylore and observation in ancient cultures. The twin revolutions of the Greeks: Pythagoras and Ptolemy; and Aristotle, Aquinas, and the Great Chain of Being. The scientific revolution: the impersonal and deterministic world-order of Newton, Laplace, and Kelvin. The erosion of that world-order by mathematics and experiment in the 20th century (relativity, quantum physics, dark matter, and the expanding universe). Today's searches for a new grand order in the Universe, which can cope - or maybe not - with these blows to yesterday's comfortable wisdom

ASTR BC1753 LIFE IN THE UNIVERSE. 3.00 points.

An introductory course intended primarily for nonscience majors. This interdisciplinary course focuses on the subject of Life in the Universe. We will study historical astronomy, gravitation and planetary orbits, the origin of the chemical elements, the discoveries of extrasolar planets, the origin of life on Earth, the evolution and exploration of the Solar System, global climate change on Venus, Mars and Earth, and the Search for Extraterrestrial Life (SETI). You cannot receive credit for this course and for ASTR UN1403 or ASTR UN1453. Can be paired with the optional Lab class ASTR UN1903

ASTR BC1754 Stars, Galaxies, and Cosmology. 3 points.

BC: Fulfillment of General Education Requirement:
Quantitative and Deductive Reasoning (QUA).

Prerequisites: Recommended preparation: A working knowledge of high school algebra.

Corequisites: Suggested parallel laboratory course: ASTR C 1904y.

Examines the properties of stars, star formation, stellar evolution and nucleosynthesis, the Milky Way and other galaxies, and the cosmological origin and evolution of the universe. Students may not receive credit for both ASTR BC 1754 and ASTR C1404.

Spring 2021: ASTR BC1754

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1754	001/00484	M W 10:10am - 11:25am 903 Altschul Hall	David Helfand	3	55

ASTR UN1836 Stars and Atoms. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. ASTR UN3101 Modern Stellar Astrophysics II. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.

Introductory astronomy is not required, but some exposure to astronomy is preferable. In the first half of the course, we will examine the physics of stellar interiors in detail, leading us to develop models of stellar structure and consider how stars evolve. In the second half of the course, we will discuss special topics, such as pre-main sequence evolution, the late stages of stellar evolution, and supernovae and compact objects.

Fall 2020: ASTR UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3101	001/12070	M W 1:10pm - 2:25pm Online Only	Marcel Agueros	3	14/20

ASTR UN3102 Planetary Dynamics and Physics of the Solar System. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based Physics.

The physics and astrophysics of planets, comets, asteroids, natural and artificial satellites, and pretty much anything in the Solar System - including the Sun. Detailed study of the Earth's atmosphere and oceans: circulations, climate, and weather. Orbital dynamics. The emerging science of extrasolar planets. The origin, evolution, and eventual fate of planets.

ASTR UN3103 GALAXIES. 3.00 points.

Prerequisites: one year of calculus-based general physics.

Prerequisites: one year of calculus-based general physics.

Galaxies fill the universe with structure. They are bound objects that harbor stars, gas, dust and dark matter. This course will discuss the content and structure of galaxies. It will start with the Milky Way, a rotating spiral galaxy, with a particular emphasis on the properties of the interstellar medium. Dwarf galaxies, the building blocks of larger galaxies, will subsequently be discussed, followed by spiral, elliptical and irregular galaxies. The formation and evolution of these different galaxy types will be an important focus of the course, as well as the environment in which the galaxies reside. We will intersperse reviews of current papers on galaxies throughout the semester

ASTR UN3105 Extrasolar Planets and Astrobiology. 3 points.

Prerequisites: One year of calculus-based physics.

The emerging field of extrasolar planets and astrobiology will be covered at a quantitative level, with a major emphasis on astrophysical phenomena and techniques. The subject will be introduced through an investigation of current planetary formation theories and approaches to planet detection, including what we currently know about extrasolar planets and detailed reference to state-of-the-art studies. An astronomer's view of the origin of life and extreme biology will be developed and applied to questions of cosmo-chemistry, observable life-signatures, habitable zones and other astrophysical constraints on the development of organisms.

Fall 2020: ASTR UN3105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3105	001/12071	T Th 1:10pm - 2:25pm Online Only	Caleb Scharf	3	33/35

ASTR UN3106 The Science of Space Exploration. 3 points. CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one semester course in introductory astronomy or astrophysics (e.g., ASTR UN1403, ASTR UN1404, ASTR UN1420, ASTR UN1836, ASTR UN2001, ASTR UN2002, ASTR BC1753, ASTR BC1754). Ability in mathematics up to and including calculus is strongly urged.

How and why do humans explore space? Why does it require such extraordinary effort? What have we found by exploring our Solar System? We investigate the physics and biological basis of space exploration, and the technologies and science issues that determine what we can accomplish. What has been accomplished in the past, what is being explored now, and what can we expect in the future? How do space scientists explore the Solar System and answer science questions in practice? What do we know about solar systems beyond our own?

ASTR UN3273 High Energy Astrophysics. 3 points. CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. No previous astronomy background required.

A survey of the most energetic and explosive objects in the Universe and their radiation. Topics include: techniques of X-ray and gamma-ray astronomy; observations of neutron stars (pulsars) and black holes; accretion disks and relativistic jets; supernovae, supernova remnants, gamma-ray bursts, quasars and active galactic nuclei; clusters of galaxies; cosmic rays and neutrinos.

ASTR UN3602 Physical Cosmology and Extragalactic Astronomy. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. The standard hot big bang cosmological model and modern observational results that test it. Topics include the Friedmann equations and the expansion of the universe, dark matter, dark energy, inflation, primordial nucleosynthesis, the cosmic

microwave background, the formation of large-scale cosmic structures, and modern cosmological observations.

ASTR UN3646 Observational Astronomy. 3 points.

Prerequisites: one year of general astronomy
Introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on 'ground-based' methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs. In research projects, students also work on the analysis of data obtained at National Observatories.

ASTR UN3985 Statistics and the Universe (Seminar). 3 points.

Prerequisites: First year calculus required, introductory physics or astronomy

Essential statistical methods will be applied in a series of case studies and research projects taken from the latest advances in cosmology, astronomy and physics. Statistics of measurement and detection, fundamentals of hypothesis testing, classifications, data modeling, time-series analysis, correlation and clustering will be explored through hands-on investigation using data from recent experiments and surveys.

ASTR UN3996 Current Research in Astrophysics. 1 point.

Prerequisites: two semesters of astronomy classes and two semesters of physics classes.

The goal of this course is to introduce astronomy and astrophysics majors to the methods and topics of current astronomical research. The course will also help with the development of critical thinking skills. Each week, the topic of the course will be centered on the subject of the Astronomy department colloquium; this may include research on planets, stars, galaxies or cosmology. There will be two required meetings per week: the first will be to discuss papers related to the colloquium (time TBD), and the second will be the colloquium itself (at 4:15 pm each Wednesday). Grading is Pass/Fail.

ASTR UN3997 Independent Research. 3 points. CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration. A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Senior majors in astronomy or astrophysics wishing to do a senior thesis should make arrangements in May of their junior year and sign up for a total

of 6 points over their final two terms. Both a substantial written document and an oral presentation of thesis results are required.

ASTR GU4260 Modeling the Universe. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. The goal of this course is to provide a basic hands-on introduction to the practice and theory of scientific computing with applications in astronomy and astrophysics. The course will include an introduction to programming, as well as a sampling of methods and tools from the field of scientific computing. The course will include a hands-on project in which students use numerical methods to solve a research problem. Students who are interested in participating in research projects are strongly encouraged to take the course in their sophomore or junior year.

ASTR GU4302 General Relativity, Black Holes, and Cosmology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. Einstein's General Theory of Relativity replaced Newtonian gravity with an elegant theory of curved spacetime. Einstein's theory led to unforeseen and unnerving predictions of singularities and cosmological instabilities. Nearly a century later, these mathematical oddities have been confirmed astrophysically in the existence of black holes, an expanding universe, and a big bang. The course will cover Einstein's

General Theory, beginning with special relativity, with an emphasis on black holes and the big bang.

ASTR GU4303 Astrostatistics. 3 points.

Astronomers live in era of "big data". Whilst astronomers of a century ago collected a handful of photographic plates each night, modern astronomers collect thousands of images encoded by millions of pixels in the same time. Both the volume of data and the ever present desire to dig deeper into data sets has led to a growing interest in the use of statistical methods to interpret observations. This class will provide an introduction to the methods commonly used in understanding astronomical data sets, both in terms of theory and application. It is one six classes the department offers every fourth semester.

Spring 2021: ASTR GU4303

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 4303	001/11746	M W 2:40pm - 3:55pm 214 Pupin Laboratories	David Kipping	3	22/25

ASTR GR6001 Radiative Processes. 3 points.

Prerequisites: 3000-level electromagnetic theory and quantum mechanics.

Radiation mechanisms and interaction of radiation with matter. Applications of classical and semiclassical radiation theory and atomic physics to astrophysical settings. Radiative transfer, polarization, scattering, line radiation, special relativity, bremsstrahlung, synchrotron radiation, inverse compton scattering, ionization losses, shocks and particle acceleration, plasma processes, atomic structure and spectroscopic terms, radiative transitions and oscillator strengths, curve of growth, molecular spectra.

ASTR GR6003 Galaxies. 3 points.

An introduction to the study of galaxies, from both observational and theoretical perspectives. The course will review our current understanding of the formation and evolution of galaxies through descriptions of: their structure and dynamics; the gas and stellar populations they contain; and what we know about the distribution of dark matter within them.

Fall 2020: ASTR GR6003

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 6003	001/12073	M W 8:40am - 9:55am 402 Chandler	Kathryn Johnston	3	13/20

ASTR GR6005 PHYSICAL COSMOLOGY. 3 points.

Fall 2020: ASTR GR6005

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 6005	001/12074	M W 1:10pm - 2:25pm 428 Pupin Laboratories	Zoltan Haiman	3	13/20

FAQs for first-year students: <http://www.columbia.edu/cu/biology/ug/advice/faqs/firstyr.html>

FAQs for prospective majors: <http://www.columbia.edu/cu/biology/ug/advice/faqs/major.html>

Checklist of major requirements: <http://biology.columbia.edu/programs/major-requirements>

Additional course information: <http://biology.columbia.edu/courses>

For the first term of their introductory biology sequence, students may take either BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology, which has a

prerequisite of chemistry, or EEEB UN2001 Environmental Biology I: Elements to Organisms, which does not require chemistry. EEEB UN2001 Environmental Biology I: Elements to Organisms may be taken in the first year.

BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology should be taken later, after general chemistry. For more details, see *Introductory Courses* under *Requirements*—Major in Biology. All students interested in biology are encouraged to take BIOL UN1908 First-Year Seminar in Modern Biology in the fall semester of their first year.

Premedical students should consult with their advising dean or the preprofessional office for relevant details of medical school requirements. Students interested in graduate school should consult the biology career adviser, Dr. Molly Przeworski

Nonscience majors who wish to take a biology course to fulfill the science requirement are encouraged to take BIOL UN1130 Genes and Development. They may also take, with the instructor's permission, BIOL UN3208 Introduction to Evolutionary Biology or EEEB UN2001 Environmental Biology I: Elements to Organisms.

Interested students should consult listings in other departments for courses related to biology. For courses in environmental studies, see listings for Earth and environmental sciences or for ecology, evolution, and environmental biology. For courses in human evolution, see listings for anthropology or for ecology, evolution, and environmental biology. For courses in the history of evolution, see listings for history and for philosophy of science. For a list of courses in computational biology and genomics, visit <http://systemsbiology.columbia.edu/courses>.

ADVANCED PLACEMENT

The department grants 3 credits for a score of 5 on the AP Biology exam. Placement is determined by the department. Students with a 5 on the AP are encouraged to take BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology and BIOL UN2006 INTRO BIO II: CELL BIO, DEV/PHYS, but are not required to do so. For details, visit <http://www.columbia.edu/cu/biology/ug/faqs.html>.

TRANSFER CREDIT ADVISING

Current and prospective biology majors and concentrators whose last names begin with A-H should consult with Prof. Kalderon. Students whose last names begin with I-P should consult with Prof. Hecklen. Students whose last names begin with Q-Z should consult with Prof. Bussemaker. Current and prospective biochemistry majors should consult with Prof. Stockwell for biology course advising and Prof. Cornish for chemistry course advising. Current and prospective biophysics majors should consult with Prof. Sahin. Students who cannot contact their adviser should consult with Prof. Mowshowitz.

For additional information, including office hours, please visit <http://biology.columbia.edu/programs/advisors>.

SUMMER UNDERGRADUATE RESEARCH FELLOWSHIP (SURF) PROGRAM

First-year students, sophomores, and juniors are eligible for the department's paid internship program (SURF). This program is competitive; the department cannot assure every eligible student a place in any given summer.

Students apply to the program early in the spring term. A faculty committee headed by Dr. Alice Heicklen then matches selected students to appropriate labs. The deadline for SURF applications is at the beginning of the spring semester.

SURF students must submit a report on their work at the end of the summer session and participate in the following year's annual Undergraduate Research Symposium. Although it does not carry any academic credit, SURF can be used toward the lab requirement for majors and toward graduation with honors. For detailed information on all summer research programs and how to apply, please visit the SURF [website](#).

Current detailed descriptions of the SURF program and the application procedure are available at SURF's website, <http://www.columbia.edu/cu/biology/ug/surf/>. For more information on the Amgen Scholarship Program, please visit <http://www.columbia.edu/cu/biology/ug/amgen/>. Applications to all of these programs are through SURF.

DEPARTMENTAL HONORS

Students must apply for departmental honors. Applications are due no later than one day after spring break of their senior year. For details, please visit the departmental website at <http://biology.columbia.edu/programs/honors-biological-sciences>.

GUIDELINES FOR ALL BIOLOGICAL SCIENCES MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Returning students should check the departmental website for any last-minute changes and/or additional information. See especially undergraduate updates and list of department courses. All major and concentration requirements are detailed on the website and links provided below.

Exceptions to Requirements

Students must get written permission in advance for any exceptions to the requirements listed below. For the exceptions to be applied toward graduation, the student must notify the biology department in one of the following two ways:

1. The student can file a completed paper planning form, signed by a faculty adviser, in the biology department office at 600 Fairchild;
2. The faculty member approving the exception can send an e-mail explaining the exceptions to mes2314@columbia.edu.

Grade Requirements for the Major

A grade of C- or higher must be earned and revealed on your transcript for any course – including the first – to be counted toward the major or concentration requirements. The grade of P is not acceptable. A course that was taken Pass/D/Fail may be counted if and only if the P is uncovered by the Registrar's deadline.

Courses

Courses with the subject code *HPSC* or *SCNC* do not count toward the majors or concentrations.

MAJOR IN BIOLOGY

General Information

The requirements for the biology major include courses in biology, chemistry, physics, and mathematics.

The required biology courses are one year of introductory biology, two core courses in biology or biochemistry, two 3-point electives in biology or biochemistry, and an appropriate lab experience. See below for details.

The required courses outside the biology department are chemistry through organic (plus labs), one year of college-level physics (plus lab), and the completion of one year of college-level mathematics (usually calculus).

Alternative sequences to the above may be arranged in special circumstances, but only with the permission of the director of undergraduate studies or a departmental adviser obtained in advance; for example, certain courses listed in the *Summer*

Term Bulletin, the *School of General Studies Bulletin*, and the *Barnard College Bulletin* may be applied toward the major. In addition, selected courses at the Columbia-Presbyterian Medical Center are open to advanced undergraduates. Credit toward the major for courses not listed in the *Columbia College Bulletin* must be discussed in advance with the director of undergraduate studies or a departmental adviser. Students are responsible for notifying the department of all exceptions either in writing or by e-mail as explained above.

Alternative programs must be arranged in advance with the director of undergraduate studies. Students planning graduate work in biology should keep in mind that physical chemistry and statistics are important for many graduate programs.

Introductory Courses

The usual one-year introductory biology sequence is BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS, taken in the sophomore year, or EEEB UN2001 Environmental Biology I: Elements to Organisms-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS, which may be taken in the first year.

Other sequences require permission in advance from the director of undergraduate studies or departmental advisers. Students with a strong background in chemistry or molecular biology may take BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS in their first year; the permission of one of the instructors is required.

Premedical students usually take BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS after a year of general chemistry; premedical students interested in the environmental sciences may take *EEEB UN2001 Environmental Biology I: Elements to Organisms* followed by BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS.

Students with advanced placement in biology are expected but not required to take EEEB UN2001 Environmental Biology I: Elements to Organisms or BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology as their initial biology course, because BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS is taught at a level of detail and depth not found in most advanced placement courses.

Students who wish to skip BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology and start with a higher-level biology course may do so, but they must obtain permission in advance from the director of undergraduate studies. For additional information, see FAQs for first-year students at <http://www.columbia.edu/cu/biology/ug/advice/faqs/firstyr.html>.

Core Courses

Two out of the following five departmental core courses are required:

BIOL UN3022	Developmental Biology
BIOL UN3031	Genetics
BIOL UN3041	Cell Biology
BIOC GU4501	Biochemistry: Structure and Metabolism
or BIOC UN3300	Biochemistry
BIOC UN3512	Molecular Biology

Laboratory Courses

A laboratory experience in biology is required. It may be fulfilled by completing any one of the following options:

Option 1:

Select one of the following 5-point laboratory courses:

BIOL UN3050	Project Laboratory In Protein Biochemistry
BIOL UN3052	Project Laboratory in Molecular Genetics
BIOL UN3058	Project Laboratory in Microbiology

Option 2:

BIOL UN2501 Contemporary Biology Laboratory

Select an additional 3-point lab such as BIOL UN3040 or a Barnard lab.

Option 3:

Two terms of BIOL UN3500 taken for a letter grade, including the submission of a satisfactory research report at the end of each semester

Option 4:

Completion of all the requirements for one session of the Summer Undergraduate Research Fellowship (SURF). An additional semester of BIOL UN3500 in the same research lab is recommended but not required. Summer lab work under other auspices may not be substituted for the SURF Program.

The laboratory fee (\$150) partially covers the cost of nonreturnable items. This fee is charged for all lab courses, including BIOL UN3500 Independent Biological Research.

Upper-Level Elective Courses

Select two additional courses, carrying at least 3 points each, from any of the 3000- or 4000- level lecture courses. BIOL UN3500 Independent Biological Research cannot be used as one of the courses to satisfy the upper-level elective course requirement.

Chemistry

All majors must take chemistry through organic including labs. One of the following three groups of chemistry courses is required:

Option 1:

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
CHEM UN1500 - CHEM UN1501	General Chemistry Laboratory and General Chemistry Laboratory Lecture
CHEM UN2443 - CHEM UN2444	Organic Chemistry I (Lecture) and ORGANIC CHEMISTRY II- LECTURES
CHEM UN2493 - CHEM UN2494	Organic Chemistry Laboratory I (Techniques) and ORGANIC CHEM. LAB II SYNTHESIS

Option 2:

For students who qualify for intensive chemistry

CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN1507	Intensive General Chemistry Laboratory
CHEM UN2444 - CHEM UN2443	ORGANIC CHEMISTRY II- LECTURES and Organic Chemistry I (Lecture)
CHEM UN2495 - CHEM UN2496	Organic Chem. Laboratory I and Organic Chem. Laboratory II

Option 3:

For students who qualify for first year organic chemistry

CHEM UN1507	Intensive General Chemistry Laboratory
CHEM UN2045 - CHEM UN2046	INTENSIVE ORGANIC CHEMISTRY and Intensive Organic Chemistry II (Lecture)
CHEM UN2495 - CHEM UN2496 or CHEM UN2545	Organic Chem. Laboratory I and Organic Chem. Laboratory II Intensive Organic Chemistry Laboratory

Physics

Students must take two terms of physics including the accompanying labs. The usual choices are PHYS UN1201-PHYS UN1202 General Physics II and PHYS UN1291-PHYS UN1292 General Physics Laboratory II. Higher-level physics sequences are also acceptable. The 1400-level sequence is recommended for students who plan to take three terms of physics.

Mathematics

Two semesters of calculus or honors mathematics are required. Students may substitute one semester of statistics for one semester of calculus with an adviser's permission. For students with AP credit, completion of MATH UN1102 CALCULUS II, MATH UN1201 Calculus III, or MATH UN1207 Honors Mathematics A is sufficient. However, students with AP credit are encouraged to take additional courses in mathematics or statistics at Columbia.

For more details on the biology major requirements, visit <http://biology.columbia.edu/pages/biology-major-requirements>.

MAJOR IN BIOCHEMISTRY

The required basic courses for the biochemistry major are chemistry through organic, including laboratory, and one year each of physical chemistry, physics, calculus, biology, and biochemistry/molecular biology.

The required additional courses are three lecture courses chosen from mathematics, chemistry, and biology, and two upper-level laboratory courses.

For more details, see the *Chemistry* section in this Bulletin.

For additional information visit the Department of Biological Sciences website: <http://biology.columbia.edu/pages/biochemistry-major-requirements>.

MAJOR IN BIOPHYSICS

The requirements for the biophysics major are as follows:

One year of introductory biology:

BIOL UN2005 - BIOL UN2006	Introductory Biology I: Biochemistry, Genetics & Molecular Biology and INTRO BIO II:CELL BIO,DEV/PHYS
------------------------------	---

Select at least one of the following laboratory courses:

BIOL UN3050	Project Laboratory In Protein Biochemistry
BIOL UN3052	Project Laboratory in Molecular Genetics
BIOL UN3058	Project Laboratory in Microbiology
BIOL UN3500	Independent Biological Research

One course in biochemistry or molecular biology:

BCHM GU4501	BIOCHEM I-STRUCTURE/ METABOLISM
or BIOC UN3512	Molecular Biology
or BIOC UN3300	Biochemistry

Select one of the following options:

Option 1 - Genetics:

BIOL UN3031	Genetics
-------------	----------

Option 2 - Neurobiology:

BIOL UN3004	Neurobiology I: Cellular and Molecular Neurobiology
or BIOL UN3005	Neurobiology II: Development & Systems

Option 3 - Developmental Biology:

BIOL UN3022	Developmental Biology
-------------	-----------------------

Select one of the following sequences to be completed at the end of sophomore year:

PHYS UN1401 - PHYS UN1402 - PHYS UN1403 - PHYS UN1494	Introduction To Mechanics and Thermodynamics and INTRO ELEC/MAGNETISM # OPTCS and Introduction to Classical and Quantum Waves and Introduction to Experimental Physics
PHYS UN1601 - PHYS UN1602 - PHYS UN2601 - PHYS UN2699	Physics, I: Mechanics and Relativity and Physics, II: Thermodynamics, Electricity, and Magnetism and Physics, III: Classical and Quantum Waves and Experiments in Classical and Modern Physics
PHYS UN2801 - PHYS UN2802 - PHYS UN3081	Accelerated Physics I and Accelerated Physics II and Intermediate Laboratory Work

Select any two physics courses at the 3000-level or above, chosen in consultation with the adviser.

Calculus through MATH UN1202 or MATH UN1208

MATH UN3027 Ordinary Differential Equations

Chemistry through organic including labs; see biology major for options

Select one additional course at the 3000- or 4000-level, including BIOL GU4002, BIOC GU4323, and BIOC GU4324, in either physics or biology.

For more details, see the *Physics* section in this Bulletin or visit the Department of Biological Sciences website: <http://biology.columbia.edu/pages/biophysics-major-requirements>.

MAJOR IN NEUROSCIENCE AND BEHAVIOR

In addition to one year of general chemistry, ten courses are required to complete the major in neuroscience and behavior—five in biology and five in psychology.

For more details, see the *Psychology* section in this Bulletin or visit <http://biology.columbia.edu/pages/neuroscience-and-behavior-major-requirements>.

BIOLOGY COURSES

One year of introductory biology.

BIOL UN2005 - BIOL UN2006	Introductory Biology I: Biochemistry, Genetics & Molecular Biology and INTRO BIO II: CELL BIO,DEV/PHYS
------------------------------	--

One year of Neurobiology

BIOL UN3004 - BIOL UN3005	Neurobiology I: Cellular and Molecular Neurobiology and Neurobiology II: Development & Systems
------------------------------	--

One additional 3000 or 4000 level biology lecture course from the following:

BIOL UN3006	PHYSIOLOGY
BIOL UN3022	Developmental Biology
BIOL UN3025	Neurogenetics
BIOL UN3031	Genetics
BIOL UN3799	Molecular Biology of Cancer
BIOL UN3041	Cell Biology
BIOL UN3073	Cellular and Molecular Immunology
BIOL UN3193	Stem Cell Biology and Applications
BIOC UN3300	Biochemistry
BIOC UN3501	Biochemistry: Structure and Metabolism
BIOL UN3310	Virology
BIOL UN3404	Seminar on the Global Threat of Antimicrobial Resistance
BIOC UN3512	Molecular Biology
BIOL GU4008	The Cellular Physiology of Disease
BIOL GU4034	Biotechnology
BIOL GU4082	Theoretical Foundations and Applications of Biophysical Methods
BIOL GU4300	Drugs and Disease
BIOL GU4510	Genomics of Gene Regulation
BIOL GU4560	Evolution in the age of genomics
BIOL GU4035	Seminar in Epigenetics
BIOL GU4070	The Biology and Physics of Single Molecules
BIOL GU4075	Biology at Physical Extremes
BIOL GU4080	The Ancient and Modern RNA Worlds
BIOL GU4260	Proteomics Laboratory
BIOL GU4290	Biological Microscopy
BIOL GU4305	Seminar in Biotechnology
BCHM GU4501	BIOCHEM I-STRUCTURE/METABOLISM

PSYCHOLOGY COURSES

PSYC UN1001	The Science of Psychology
PSYC UN2430	COGNITIVE NEUROSCIENCE (Students who have previously taken PSYC UN1010 Mind, Brain and Behavior may use that course to fulfill this requirement.)
or PSYC UN2450	Behavioral Neuroscience

One lab or statistics course from the following:

PSYC S2210Q	Cognition: Basic Processes ^{STAT} UN1001 does not count towards the Neuroscience & Behavior Major.
or PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR
or PSYC UN1450	RESEARCH METHODS - SOCIAL COGNITION # EMOTION
or PSYC UN1490	RESEARCH METHODS - COGNITION/DECISION MAKING

or PSYC UN1610	Introductory Statistics for Behavioral Scientists
or PSYC UN1660	Advanced Statistical Inference
or STAT UN1101	Introduction to Statistics
or STAT UN1201	Calculus-Based Introduction to Statistics

One additional 2000 or 3000 level psychology course from a list approved by the Psychology Departmental adviser to the program.

PSYC S2215D	Cognition and the Brain
or PSYC S2215D	Cognition and the Brain
PSYC UN2220	Cognition: Memory and Stress
PSYC W2225	Attention and Perception
PSYC W2230	Perception and Sensory Processes
PSYC UN2235	THINKING AND DECISION MAKING
or PSYC S2235Q	Thinking and Decision Making
PSYC UN2250	Evolution of Cognition
PSYC UN2280	Introduction to Developmental Psychology
PSYC UN2420	Animal Behavior
or PSYC UN2430	COGNITIVE NEUROSCIENCE
PSYC W2440	Language and the Brain
PSYC S2450Q	Behavioral Neuroscience
or PSYC UN2450	Behavioral Neuroscience
PSYC UN2460	Drugs and Behavior
PSYC W2480	The Developing Brain
PSYC UN2620	Abnormal Behavior
or PSYC S2620Q	Abnormal Behavior

One advanced psychology seminar from a list approved by the Psychology Department adviser to the program

PSYC W3225	The Wandering Mind: Psychological Approaches to Distraction
PSYC W3250	Seminar in Space Perception (Seminar)
or PSYC G4230	Sensation and Perception (Seminar)
PSYC W3255	Modern Classics in Visual Perception, Visual Science and Visual Neuroscience (Seminar)
or PSYC G4255	Modern Classics in Visual Perception, Visual Science and Visual Neuroscience (Seminar)
PSYC W3265	Auditory Perception (Seminar)
PSYC UN3270	Computational Approaches to Human Vision (Seminar)
PSYC W3280	Seminar In Infant Development
or PSYC S3280D	Seminar in Infant Development
PSYC S3285D	The Psychology of Disaster Preparedness
PSYC UN3290	Self: A Cognitive Exploration (Seminar)
PSYC G4220	Cognition and Psychopathology (Seminar)
PSYC GU4222	The Cognitive Neuroscience of Aging (Seminar)

PSYC GU4223	Memory and Executive Function Thru the Lifespan
PSYC GU4225	Consciousness and Attention (Seminar)
PSYC GU4229	Attention and Perception
PSYC G4230	Sensation and Perception (Seminar)
PSYC GU4232	Production and Perception of Language
PSYC GU4235	Special Topics in Vision (Seminar)
PSYC GU4239	Cognitive neuroscience of narrative and film

PSYC GU4690	Social Factors and Psychopathology (Seminar)

CONCENTRATION IN BIOLOGY

Students who wish to concentrate in biology must design their programs in advance with the director of undergraduate studies or a departmental adviser.

The requirement for the concentration is 22 points in biology or biochemistry, with at least five courses chosen from the courses listed in the Biological Sciences section of the Bulletin. Additional courses in physics, chemistry, and mathematics are required as detailed below.

A project laboratory and BIOL UN2501 Contemporary Biology Laboratory may **not** both be counted toward the 22-point total. See the biology major requirements for additional information.

The requirements for the concentration in biology are as follows:

BIOL UN2005	Introductory Biology I: Biochemistry, Genetics & Molecular Biology
or EEEB UN2001	Environmental Biology I: Elements to Organisms
BIOL UN2006	INTRO BIO II:CELL BIO,DEV/PHYS
Select at least one of the following core courses:	
BIOL UN3022	Developmental Biology

BIOL UN3031	Genetics
BIOL UN3041	Cell Biology
BIOL UN3501	Biochemistry: Structure and Metabolism
or BIOC UN3300	Biochemistry
BIOL UN3512	Molecular Biology

Beginning Fall 2018, no biology lab is required for the concentration. All other requirements remain the same, including enough electives to reach at least 22 points. Either UN2501 or a five-point lab course, but not both, may count towards the 22 point total.

Chemistry through organic including labs; see biology major for options

One year of physics, including laboratory; see biology major for options

One year of college-level mathematics (ordinarily this should be calculus); see biology major for options

For more details, visit <http://biology.columbia.edu/pages/biology-concentration-requirements>.

MAJOR IN ENVIRONMENTAL BIOLOGY

The Environmental Biology major resides in the Department of Ecology, Evolution, and Environmental Biology. For a description of the major, see the *Ecology, Evolution, and Environmental Biology* section in this Bulletin.

FALL 2020

BIOL UN1908	First-Year Seminar in Modern Biology
BIOL UN2005	Introductory Biology I: Biochemistry, Genetics & Molecular Biology
BIOL UN2401	Contemporary Biology I: Biochemistry, Genetics & Molecular Biology
BIOL UN2501	Contemporary Biology Laboratory
BIOL UN3004	Neurobiology I: Cellular and Molecular Neurobiology
BIOL UN3006	PHYSIOLOGY
BIOL UN3022	Developmental Biology
BIOL UN3041	Cell Biology
BIOL UN3073	Cellular and Molecular Immunology
BIOL UN3300	Biochemistry
BIOL UN3404	Seminar on the Global Threat of Antimicrobial Resistance
BIOL UN3500	Independent Biological Research
BIOL UN3700	Independent Clinical Research
BIOL GU4034	Biotechnology
BIOL GU4260	Proteomics Laboratory
BIOL GU4300	Drugs and Disease
BIOL GU4323	Biophysical Chemistry I

BCHM GU4501	BIOCHEM I-STRUCTURE/ METABOLISM (Previously listed under BCHM UN3501)
BIOL GU4600	Cell Signaling

SPRING 2021

BIOL UN1130	Genes and Development
BIOL UN2006	INTRO BIO II:CELL BIO,DEV/ PHYS
BIOL UN2402	Contemporary Biology II: Cell Biology, Development & Physiology
BIOL UN2502	Foundations for Lab Biology
BIOL UN3005	Neurobiology II: Development & Systems
BIOL UN3031	Genetics
BIOL UN3193	Stem Cell Biology and Applications
BIOC UN3300	Biochemistry
BIOL UN3500	Independent Biological Research
BIOL UN3799	Molecular Biology of Cancer
BIOL UN3995	Topics in Biology
BIOL GU4001	Advanced Genetic Analysis
BIOL GU4002	Macromolecular Structure & Interactions
BIOL GU4080	The Ancient and Modern RNA Worlds
BIOL GU4290	Biological Microscopy
BIOL GU4305	Seminar in Biotechnology
BIOL GU4310	Virology
BIOC GU4512	Molecular Biology

ALL COURSES

BIOC UN3300 Biochemistry. 3 points.

Prerequisites: one year each of Introductory Biology and General Chemistry. Corequisites: Organic Chemistry. Primarily aimed at nontraditional students and undergraduates who have course conflicts with BIOC UN3501.

Biochemistry is the study of the chemical processes within organisms that give rise to the immense complexity of life. This complexity emerges from a highly regulated and coordinated flow of chemical energy from one biomolecule to another.

This course serves to familiarize students with the spectrum of biomolecules (carbohydrates, lipids, amino acids, nucleic acids, etc.) as well as the fundamental chemical processes (glycolysis, citric acid cycle, fatty acid metabolism, etc.) that allow life to happen. In particular, this course will employ active learning techniques and critical thinking problem-solving to engage students in answering the question: how is the complexity of life possible? NOTE: While Organic Chemistry is listed as a corequisite, it is highly recommended that you take Organic Chemistry beforehand.

Spring 2021: BIOC UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
------------------	------------------------	----------------	------------	--------	------------

BIOC 3300 001/13412 T 7:00pm - 9:30pm Danny Ho 3 45/100
Online Only

BIOC UN3501 Biochemistry: Structure and Metabolism. 4 points.

Prerequisites: one year of BIOL UN2005 and BIOL UN2006 and one year of organic chemistry.

Lecture and recitation. Students wishing to cover the full range of modern biochemistry should take both *BIOC UN3501* and *BIOC UN3512*. *UN3501* covers subject matters in modern biochemistry, including chemical biology and structural biology, discussing the structure and function of both proteins and small molecules in biological systems. Proteins are the primary class of biological macromolecules and serve to carry out most cellular functions. Small organic molecules function in energy production and creating building blocks for the components of cells and can also be used to perturb the functions of proteins directly. The first half of the course covers protein structure, enzyme kinetics and enzyme mechanism. The second half of the course explores how small molecules are used endogenously by living systems in metabolic and catabolic pathways; this part of the course focuses on mechanistic organic chemistry involved in metabolic pathways.

BIOC UN3512 Molecular Biology. 3 points.

Prerequisites: one year of biology. Recommended but not required: BIOC UN3501.

This is a lecture course designed for advanced undergraduates and graduate students. The focus is on understanding at the molecular level how genetic information is stored within the cell and how it is regulated. Topics covered include genome organization, DNA replication, transcription, RNA processing, and translation. This course will also emphasize the critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOC GU4323 Biophysical Chemistry I. 4 points.

This course provides a rigorous introduction to the theory underlying widely used biophysical methods, which will be illustrated by practical applications to contemporary biomedical research problems. The course has two equally important goals. The first goal is to explicate the fundamental approaches used by physical chemists to understand the behavior of molecules and to develop related analytical tools. The second goal is to prepare students to apply these methods themselves to their own research projects. The course will be divided into seven modules: (i) solution thermodynamics; (ii) hydrodynamic methods; (iii) statistical analysis of experimental data; (iv) basic quantum mechanics; (v) optical spectroscopy with an emphasis on fluorescence; (vi) nuclear magnetic resonance spectroscopy; and (vii) light-scattering and diffraction methods.

The first three modules will be covered during the fall term. In each module, the underlying physical theories and models will be presented and used to derive the mathematical equations applied to the analysis of experimental data. Weekly recitations will emphasize the analysis of real experimental data and understanding the applications of biophysical experimentation in published research papers.

BIOC GU4324 Biophysical Chemistry II. 4 points.

This course provides a rigorous introduction to the theory underlying widely used biophysical methods, which will be illustrated by practical applications to contemporary biomedical research problems. The course has two equally important goals. The first goal is to explicate the fundamental approaches used by physical chemists to understand the behavior of molecules and to develop related analytical tools. The second goal is to prepare students to apply these methods themselves to their own research projects. The course will be divided into seven modules: (i) solution thermodynamics; (ii) hydrodynamic methods; (iii) statistical analysis of experimental data; (iv) basic quantum mechanics; (v) optical spectroscopy with an emphasis on fluorescence; (vi) nuclear magnetic resonance spectroscopy; and (vii) light-scattering and diffraction methods. Weekly recitations will emphasize the analysis of real experimental data and understanding the applications of biophysical experimentation in published research papers.

BIOC GU4501 Biochemistry: Structure and Metabolism. 4 points.

Undergraduates should register for *BIOC C3501*.

Prerequisites: one year of *BIOL C2005* and *BIOL C2006* and one year of organic chemistry.

Lecture and recitation. Students wishing to cover the full range of modern biochemistry should take both *BIOC C3501* and *C3512*. *C3501* covers subject matters in modern biochemistry, including chemical biology and structural biology, discussing the structure and function of both proteins and small molecules in biological systems. Proteins are the primary class of biological macromolecules and serve to carry out most cellular functions. Small organic molecules function in energy production and creating building blocks for the components of cells and can also be used to perturb the functions of proteins directly. The first half of the course covers protein structure, enzyme kinetics and enzyme mechanism. The second half of the course explores how small molecules are used endogenously by living systems in metabolic and catabolic pathways; this part of the course focuses on mechanistic organic chemistry involved in metabolic pathways.

BIOC GU4512 Molecular Biology. 3 points.

Prerequisites: one year of biology. Recommended but not required: *BIOC UN3501*

This is a lecture course designed for advanced undergraduates and graduate students. The focus is on understanding at the

molecular level how genetic information is stored within the cell and how it is regulated. Topics covered include genome organization, DNA replication, transcription, RNA processing, and translation. This course will also emphasize the critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2021: BIOC GU4512

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOC 4512	001/13339	M W 2:40pm - 3:55pm Online Only	James Manley, Alice Hecklen	3	30/50

BIOL UN1002 Theory and Practice of Science: Biology. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: either *BIOL UN1015* or AP biology, or the instructor's permission.

Lecture and recitation. By analysis and example from the primary literature of evolution and genetics, examines how scientific theories are invented and how they come to be accepted, verified, and in some cases rejected. Papers begin with Darwin and Mendel and end with Watson. Ordinarily does not fulfill biology major or concentration requirements. Normally may not be taken for credit by any student who has previously completed any biology course numbered 2000 or above. *BIOL UN1015* should be taken first then *BIOL UN1002* for nonscience majors.

BIOL UN1130 Genes and Development. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of high school or college biology.

This course covers selected topics in genetics and developmental biology, with special emphasis on issues that are relevant to contemporary society. Lectures and readings will cover the basic principles of genetics, how genes are expressed and regulated, the role of genes in normal development, and how alterations in genes lead to abnormal development and disease. We will also examine how genes can be manipulated in the laboratory, and look at the contributions of these manipulations to basic science and medicine, as well as some practical applications of these technologies. Interspersed student-run workshops will allow students to research and discuss the ethical and societal impacts of specific topics (e.g. *in vitro* fertilization, uses and misuses of genetic information, genetically modified organisms, steroid use, and cloning). SCE and TC students may register for this course, but they must first

obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOL UN2016 INTRO BIO II:CELL BIO,DEV/PHYS. 0 points.

Prerequisites: Prerequisites: Course does not fulfill Biology major requirements or premedical requirements. Enrollment in laboratory limited to 16 students per section.

Corequisites: BIOL UN2006

Prerequisites: Course does not fulfill Biology major requirements or premedical requirements. Enrollment in laboratory limited to 16 students per section. Exploration of the major discoveries and ideas that have revolutionized the way we view organisms and understand life. The basic concepts of cell biology, anatomy and physiology, genetics, evolution, and ecology will be traced from seminal discoveries to the modern era. The laboratory will develop these concepts and analyze biological diversity through a combined experimental and observational approach.

BIOL UN2502 Foundations for Lab Biology. 3.00 points.

Due to COVID-19 related restrictions on in-person laboratory work, this course acts as a replacement for BIOL UN2501. This course will act as a virtual introduction to the practice of contemporary biology, with an emphasis on common laboratory methods, online tools, statistical analysis, styles of scientific reasoning, and science communication. Students will be expected to watch a weekly lecture, either in-person or via recording. Lab activities are designed to be highly interactive and collaborative to reflect the realities of biological

research. Small groups of students will work together on in-class activities, as well as on a long-term student-designed biological research project

BIOL UN2700 Past and future of the human genome. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

We can now determine the genetic makeup of any person in a matter of days and at a cost already within reach for many millions of people. For the past few years a movement has emerged to provide detailed genetic information directly to ordinary people, in some cases with the explicit aim of helping prospective parents to “eliminate preventable genetic disease” or, as one newspaper put it, to promote “genetically flawless babies.”

But our technical capacity to both interrogate and manipulate the human genome has raced far ahead of serious consideration of the societal implications of doing so. This course will provide students with the background necessary to understand what has and will be done with the human genome and ultimately to help society formulate appropriate policies for wise stewardship of the human genome.

To help illustrate the information available in the human genome and how it may influence individuals' lives, the instructors' will share and discuss their own and other public genomes in ways both molecular and personal.

BIOL UN3004 Neurobiology I: Cellular and Molecular Neurobiology. 4 points.

Discussion Section Required

Prerequisites: one year of biology; a course in physics is highly recommended.

Lecture and recitation. This is an advanced course intended for majors providing an in depth survey of the cellular and molecular aspects of nerve cell function. Topics include: the cell biology and biochemistry of neurons, ionic and molecular basis of electrical signals, synaptic transmission and its modulation, function of sensory receptors. Although not required, it is intended to be followed by Neurobiology II (see below). The recitation meets once per week in smaller groups and emphasizes readings from the primary literature.

Fall 2020: BIOL UN3004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3004	001/11560	T Th 10:10am - 11:25am Online Only	Stuart Firestein	4	109/120

BIOL UN3005 Neurobiology II: Development & Systems. 4 points.

Prerequisites: BIOL UN3004, one year of biology, or the instructor's permission.

This course is the "capstone" course for the Neurobiology and Behavior undergraduate major at Columbia University and will be taught by the faculty of the Kavli Institute of Brain Science: <http://www.kavli.columbia.edu/> Science: <http://www.kavli.columbia.edu/>. It is designed for advanced undergraduate and graduate students. Knowledge of Cellular Neuroscience (how an action potential is generated and how a synapse works) will be assumed. It is strongly recommended that students take *BIOL UN3004* Neurobiology I: Molecular and Cellular Neuroscience, or a similar course, before enrolling in *BIOL UN3005*. Students unsure about their backgrounds should check a representative syllabus of *BIOL UN3004* on the *BIOL UN3004* website (<http://www.columbia.edu/cu/biology/courses/w3004/>). Website for *BIOL UN3005*: <http://www.columbia.edu/cu/biology/courses/w3005/index.html>

Spring 2021: BIOL UN3005

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3005	001/13627	T Th 4:10pm - 5:25pm Online Only	Darcy Kelley	4	77/100
BIOL 3005	002/17519	M W 10:10am - 11:25am Online Only	Darcy Kelley	4	17/30

BIOL UN3006 PHYSIOLOGY. 3.00 points.

Prerequisites: (BIOL UN2005 and BIOL UN2006) or (BIOL UN2401 and BIOL UN2402) or the instructor's permission. Major physiological systems of vertebrates (circulatory, digestive, hormonal, etc.) with emphasis on cellular and molecular mechanisms and regulation. Readings include research articles from the scientific literature. SCE and TC

students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Fall 2020: BIOL UN3006

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3006	001/11934	T Th 4:10pm - 5:25pm Online Only	Mary Ann Price	3.00	24/72

BIOL UN3008 The Cellular Physiology of Disease. 3 points.

Prerequisites: one 3000-level course in Cell Biology or Biochemistry, or the instructor's permission.

This course will present a quantitative description of the cellular physiology of excitable cells (mostly nerve and muscle). While the course will focus on examining basic mechanisms in cell physiology, there will be a thread of discussion of disease mechanisms throughout. The end of each lecture will include a discussion of the molecular mechanisms of selected diseases that relate to the topics covered in the lecture. The course will consist of two lectures per week. This course will be of interest to advanced (3000-4000 level) undergraduates that aim to pursue careers in medicine as well as those that will pursue careers in biomedical research. This course will also be of interest to graduate students desiring an introduction to the cellular physiology of nerve and muscle.

BIOL UN3022 Developmental Biology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: BIOL UN2005 and BIOL UN2006 or equivalent. Come discover how the union of egg and sperm triggers the complex cellular interactions that specify the diverse variety of cells present in multicellular organisms. Cellular and molecular aspects of sex determination, gametogenesis, genomic imprinting, X-chromosome inactivation, telomerase as the biological clock, stem cells, cloning, the pill and cell interactions will be explored, with an emphasis on humans. Original research articles will be discussed to further examine current research in developmental biology. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Fall 2020: BIOL UN3022

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3022	001/12182	T Th 1:10pm - 2:25pm Online Only	Alice Hecklen	3	43/70

BIOL UN3025 Neurogenetics. 3 points.

Prerequisites: (BIOL UN2005 and BIOL UN2006)

This course provides an introduction to Neurogenetics, which studies the role of genetics in the development and function of the nervous system (<https://en.wikipedia.org/wiki/Neurogenetics>). The course will be focused on teaching classic and contemporary concepts in genetics and neuroscience, rather than cataloguing mere facts. The course will emphasize the discovery processes, historical figures involved in these processes and methodologies of discovery. Primary research papers will be discussed in detail. A central organizational theme of the course is the presence of a common thread and narrative throughout the course. The common thread is an invertebrate model system, the roundworm *Caenorhabditis elegans*, which serves as a paradigm to show how simple genetic model systems have informed our view on the genetics of nervous system development and function. The ultimate goal of this course is to gain an understanding of the underlying principles of how the nervous system of one specific animal species forms, from beginning to end. The course is intended for neuroscience-inclined students (e.g. neuroscience majors) who want to learn about how genetic approaches have informed our understanding of brain development and function and, vice versa, for students with an interest in molecular biology and genetics, who want to learn about key problems in neuroscience and how genetic approaches can address them.

BIOL UN3031 Genetics. 3 points.

Students may receive credit for *BIOL W3031* or *BIOL C3032*, but not both due to overlap in course content.

Prerequisites: BIOL UN2005 and BIOL UN2006 or the equivalent.

General genetics course focused on basic principles of transmission genetics and the application of genetic approaches to the study of biological function. Principles will be illustrated using classical and contemporary examples from prokaryote and eukaryote organisms, and the experimental discoveries at their foundation will be featured. Applications will include genetic approaches to studying animal development and human diseases. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2021: BIOL UN3031

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3031	001/11722	T Th 10:10am - 11:25am Online Only	Iva Greenwald, Michelle Attner	3	56/75

BIOL UN3034 Biotechnology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

For upper-level undergraduates.

Prerequisites: genetics or molecular biology.

The course covers techniques currently used to explore and manipulate gene function and their applications in medicine and the environment. Part I covers key laboratory manipulations, including DNA cloning, gene characterization, association of genes with disease, and methods for studying gene regulation and activities of gene products. Part II also covers commercial applications, and includes animal cell culture, production of recombinant proteins, novel diagnostics, high throughput screening, and environmental biosensors. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOL UN3040 Lab in Molecular Biology. 3 points.

Enrollment limited to 12. Lab fee: \$150.

Prerequisites: one year of biology (BIOL UN2005 and BIOL UN2006) and Contemporary Biology Laboratory (BIOL UN2501).

Prerequisites: one year of biology (*UN2005-UN2006*) and Contemporary Biology Laboratory (*UN2501*). This lab will explore various molecular biology techniques frequently utilized in modern molecular biology laboratories. The lab will consist of four modules: 1) Molecular verification of genetically modified organisms (GMOs); 2) Site-directed mutagenesis; 3) gDNA extraction, PCR amplification, sequencing and GenBank analysis of the COI genes from diverse fish species and 4) protein gel analysis of fish muscle components. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at: <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOL UN3041 Cell Biology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of biology, normally BIOL UN2005-BIOL UN2006, or the equivalent.

Cell Biology 3041/4041 is an upper-division course that covers in depth all organelles of cells, how they make up tissues, secrete substances important for the organism, generate and adapt to their working environment in the body, move throughout development, and signal to each other. Because these topics were introduced in the Intro Course (taught by Mowshowitz and Chasin), this course or its equivalent is a prerequisite for W3041/4041. Students for whom this course is useful include biology, biochem or biomedical engineering majors, those preparing to apply for medical school or graduate school, and those doing or planning to start doing research in a biology or biomedical lab. SCE and TC students may register

for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOL UN3050 Project Laboratory In Protein Biochemistry. 5 points.

Prerequisites: one year of biology (UN2005- UN2006) plus one upper-level course recommended. Enrollment is not restricted as long as total is no more than 14. Seniors will be given preference in the unlikely event that restriction is necessary. Students with specific questions should e-mail the instructor (jfh21@columbia.edu).

This course provides an intensive introduction to professional biomedical laboratory research. Students conduct a portion of an ongoing biochemical research project and write-up their results in a format suitable for publication in a peer-reviewed scientific research journal. Techniques in molecular biology and protein biochemistry are used to address a problem in mechanistic biochemistry or molecular pharmacology. Students are exposed to the full spectrum of techniques used in contemporary protein biochemistry, including molecular sequence analysis of genomic databases, molecular cloning and manipulation of recombinant DNA, protein expression in *E. coli*, protein purification, and biophysical characterization (typically including crystallization for x-ray structure determination). The course emphasizes the use of critical thinking skills in scientific research while giving students the opportunity to apply the basic knowledge learned in a wide variety of biology and chemistry lecture courses to a real research project. Examples of past projects can be found on the course website: <https://www1.columbia.edu/sec/cu/biology/courses/w3050/class/index.html> (cunix account required to login).

BIOL UN3052 Project Laboratory in Molecular Genetics. 5 points.

Enrollment limited to approximately 12. Fee: \$150.

Prerequisites: one year of introductory biology and the instructor's permission.

Project laboratory on the manipulation of nucleic acids in prokaryotes, including DNA isolation, restriction mapping, and transformation. The first part of the laboratory involves learning of techniques to be used subsequently in independent research projects suggested by the professor.

BIOL UN3058 Project Laboratory in Microbiology. 5 points.

Lab fee: \$150.

Prerequisites: one year of Intro Bio. An introductory biology or chemistry lab is recommended.

Bacteria are not just unicellular germs. This lab course will broaden your awareness of the amazing world of microbiology and the diverse capabilities of microbes. The focus will be on

bacterial multicellularity, pigment production, and intercellular signaling. Pigment-producing bacteria will be isolated from the wild (i.e. Morningside Campus or your skin), and characterized using standard genetic tools (PCR, DNA gel electrophoresis, transformation, screen) and microbiology techniques (isolation of bacteria and growth of bacterial colonies, media preparation, enrichment techniques for pigments). These techniques will also be applied in the study of bacterial multicellularity and signaling in the standard lab strain *Pseudomonas aeruginosa*. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOL UN3073 Cellular and Molecular Immunology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: two semesters of a rigorous, molecularly-oriented introductory biology course (such as UN2005 and UN2006), or the instructor's permission.

This course will cover the basic concepts underlying the mechanisms of innate and adaptive immunity, as well as key experimental methods currently used in the field. To keep it real, the course will include clinical correlates in such areas as infectious diseases, autoimmune diseases, cancer immunotherapy and transplantation. Taking this course won't turn you into an immunologist, but it may make you want to become one, as was the case for several students last year. After taking the course, you should be able to read the literature intelligently in this rapidly advancing field. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Fall 2020: BIOL UN3073

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3073	001/11573	M W 2:40pm - 3:55pm Online Only	Christian Schindler	3	63/100

BIOL UN3190 STEM CELLS: BIOL,ETHICS,APPLIC. 3.00 points.

BIOL UN3193 Stem Cell Biology and Applications. 3 points.

Prerequisites: three semesters of Biology or the instructor's permission.

The course examines current knowledge and potential medical applications of pluripotent stem cells (embryonic stem cells and induced pluripotent stem cells), direct conversions between cell types and adult, tissue-specific stem cells (concentrating mainly

on hematopoietic and gut stem cells as leading paradigms). A basic lecture format will be supplemented by presentations and discussions of research papers. Recent reviews and research papers, together with extensive instructor notes, will be used in place of a textbook. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2021: BIOL UN3193

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3193	001/16134	T Th 4:10pm - 5:25pm Online Only	Daniel Kalderon	3	9/25

BIOL UN3208 Introduction to Evolutionary Biology. 3 points.

Prerequisites: recommended preparation: an introductory course in college biology.

Introduction to principles of general evolutionary theory, both nomological and historical; causes and processes of evolution; phylogenetic evolution; species concept and speciation; adaptation and macroevolution; concepts of phylogeny and classification.

BIOL UN3310 Virology. 3 points.

Prerequisites: two semesters of a rigorous, molecularly-oriented introductory biology course (such as BIOL UN2005), or the instructor's permission.

The course will emphasize the common reactions that must be completed by all viruses for successful reproduction within a host cell and survival and spread within a host population. The molecular basis of alternative reproductive cycles, the interactions of viruses with host organisms, and how these lead to disease are presented with examples drawn from a set of representative animal and human viruses.

BIOL UN3387 BIOLOGY TEST. 3 points.

ABCDE

BIOL UN3404 Seminar on the Global Threat of Antimicrobial Resistance. 3 points.

Prerequisites: (biol un2005 and biol un2006) or (biol un2401 and biol un2402)

The goal of this seminar is to provide an in-depth analysis of the ongoing threat of antimicrobial resistance. Discussions will include the molecular mechanisms, diverse epidemiology of transmission, the consequences of antimicrobial resistance and efforts to reduce the further emergence and spread of these pathogens both in the community and in healthcare settings. In the process, you learn a fair amount of medical microbiology.

Online Only Lowy

BIOL UN3500 Independent Biological Research. 2 points.
Fee: \$150. Students must register for a recitation section, *BIOL W3510*.

Fee: Lab Fee - 150

Prerequisites: Concurrent with registering for this course, a student must register with the department and provide a written invitation from a mentor; details of this procedure are available at <http://www.columbia.edu/cu/biology/courses/w3500/index.htm>. Students must register for recitations UN3510 or consult the instructor.

Corequisites: BIOL UN3510

The course involves independent study, faculty-supervised laboratory projects in contemporary biology. Concurrent with registering for this course, a student must register with the department, provide a written invitation from a mentor and submit a research proposal; details of this procedure are available at <http://www.columbia.edu/cu/biology/courses/w3500/index.htm>. A paper summarizing results of the work is required by the last day of finals for a letter grade; no late papers will be accepted. See the course web site (above) for more details. Students can take anywhere from 2-4 points for this course.

Fall 2020: BIOL UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3500	001/11650		Ron Prywes	2	22/100

Spring 2021: BIOL UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3500	001/12484		Ron Prywes	2	31/70

BIOL UN3560 Evolution in the age of genomics. 4 points.

Prerequisites: Introductory Biology I and II, or the instructors permission.

This course introduces basic concepts in evolutionary biology, from speciation to natural selection. While the lectures incorporate a historical perspective, the main goal of the class is to familiarize students with topics and tools of evolutionary genetics as practiced today, in the era of genomics. Thus, the focus will be on evidence from molecular evolution and genetics and exercises will assume a basic background in genetics. Examples will be drawn from across the tree of life, but with a primary focus on humans.

BIOL UN3700 Independent Clinical Research. 2-4 points.

Prerequisites: concurrent with registering for this course, a student must register with the department, provide a written invitation from a mentor, and submit a research proposal. *BIOL 3700* will provide an opportunity for students interested in independent research work in a hospital or hospice setting. In these settings, where patients and their needs are paramount, and where IRB rules and basic medical ethics make "wet-lab biology research" inappropriate, undergraduates may well find a way nevertheless, to assist and participate in ongoing

clinical research. Such students, once they have identified a mentor willing to provide support, participation, and advising, may apply to the faculty member in charge of the course for 2-4 points/semester in *BIOL W3700*. This course will closely follow procedures already in place for *BIOL 3500*, but will ask potential mentors to provide evidence that students will gain hands-on experience in a clinical setting, while participating in a hospital- or hospice-based research agenda. A paper summarizing results of the work is required by the last day of finals for a letter grade; no late papers will be accepted.

BIOL UN3799 Molecular Biology of Cancer. 3 points.

Prerequisites: three terms of biology (genetics and cell biology recommended).

Cancer is one of the most dreaded common diseases. Yet it is also one of the great intellectual challenges in biology today. How does a cell become cancerous? What are the agents that cause this to occur? How do current findings about genes, cells, and organisms ranging from yeast cells to humans inform us about cancer? How do findings about cancer teach us new biological concepts? Over the past few years there have been great inroads into answering these questions which have led to new ways to diagnose and treat cancer. This course will discuss cancer from the point of view of basic biological research. We will cover topics in genetics, molecular and cell biology that are relevant to understanding the differences between normal and cancer cells. These will include tumor viruses, oncogenes, tumor suppressor genes, cell cycle regulation, programmed cell death and cell senescence. We will also study some current physiological concepts related to cancer including angiogenesis, tumor immunology, cancer stem cells, metastasis and new approaches to treatment that are built on recent discoveries in cancer biology. The text book for this course is "The Biology of Cancer Second Edition by Robert A Weinberg (Garland Science). Additional and complementary readings will be assigned. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2021: BIOL UN3799

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3799	001/12412	T Th 2:40pm - 3:55pm Online Only	Carol Prives	3	24/50

BIOL UN3995 (Section 1) Topics in Biology: Crossroads in Bioethics. 1-2 points.

Prerequisites: at least one introductory course in biology or chemistry.

This two credit multidisciplinary and interactive course will focus on contemporary issues in bioethics. Each topic will cover both the underlying science of new biotechnologies and the subsequent bioethical issues that emerge from these

technologies. Classroom time will be devoted to student discussions, case presentations, and role playing. Topics include human trafficking, stem cell research, human reproductive cloning, neuroethics, genetic screening, human-animal chimeras, synthetic biology, bioterrorism, and neuroimaging.

BIOL UN3995 Topics in Biology. 1 point.

Enrollment limited to 18.

Prerequisites: Introductory Biology or equivalent.

Topics in Biology: Radiographic Anatomy and Select Pathology (Section 007 Fall semester)

Radiographic Anatomy and Selective Pathology is a survey course intended for undergraduate students. This course is not limited to science majors and would be of value to any student that may have an interest in studying the anatomy of the human body.

The course is a systematic approach to the study of the human body utilizing medical imaging. We will be studying neuro-anatomy, anatomy of the thorax, abdomen, and pelvis.

Vascular and musculoskeletal imaging will be addressed as well. Modalities will include CT, MRI, PET/CT, and Ultrasound. Cross sectional imaging will be supplemented with pathology demonstrated on appropriate cross sectional imaging.

The class size will be limited to 15 students. The lecture will be offered Wednesday evenings from 6:10-7:00 pm. This will be a 1 credit course offered only during the fall semesters.

Topics in Biology: Crossroads in Bioethics (Section 001 Spring semester)

This two credit multidisciplinary and interactive course will focus on contemporary issues in bioethics and medical ethics. Each topic will cover both the underlying science of new biotechnologies and the subsequent bioethical issues that emerge from these technologies. Each topic will introduce a bioethical principle that will be explored using case studies. Students are expected to prepare for each class based on the assignment so that classroom time will be devoted to discussion, case presentations, and role playing rather than merely lectures. Topics include stem cell research, human reproductive cloning, bioterrorism, neuroethics, genetic screening, medical stem cell tourism, patents and science, forensic science and the interface of science and culture/religion.

Spring 2021: BIOL UN3995

BIOL GU4001 Advanced Genetic Analysis. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Enrollment limited to 25.

Prerequisites: for undergraduates: Introductory Genetics (*W3031*) and the instructor's permission.

This seminar course provides a detailed presentation of areas in classical and molecular genetics for advanced undergraduates and beginning graduate students. Topics include transmission genetics, gain and loss of function mutations, genetic redundancy, suppressors, enhancers, epistasis, expression patterns, using transposons, and genome analysis. The course is a mixture of lectures, student presentations, seminar discussions, and readings from the original literature.

BIOL GU4002 Macromolecular Structure & Interactions. 4 points.

Open to PhD candidates in the biomedical and chemical sciences, and to other qualified graduate, undergraduate, and continuing education students with the instructor's permission.

This course has three interrelated goals: (i) to develop an intuitive understanding of the thermodynamic forces that control the structure of biological macromolecules and the evolution of life, (ii) to learn how to apply that understanding to experimental analyses of macromolecular interactions, and (iii) to master the use of molecular graphics software for understanding and interpreting macromolecular structures and interactions. The lectures develop the essential thermodynamic theory from the ground up, starting from a review of the relevant physical forces (Newton's and Coulomb's Laws) and culminating with an intuitive explanation of how complex biological organisms can evolve spontaneously, in a universe in which all natural processes are driven by increasing randomness or entropy, as specified by the 2nd Law of Thermodynamics. Subsequent lectures elaborate how these thermodynamic principles govern the formation and interaction of macromolecular structures, which represent the physical foundation for the evolution of life, and how the same principles are applied to analyze related experimental data. The problem sets for the course focus on practical applications of these principles to the analysis of data from common experiments used by molecular biologists to characterize macromolecular interactions. Extensive use is made of molecular graphics software throughout the semester, including in the problem sets, based on instruction provided in both the lectures and recitation sections. The course is designed to develop a deep understanding of the physical mechanisms controlling macromolecular interactions while simultaneously empowering students to critically read related literature and rigorously design and analyze related experiments themselves.

Spring 2021: BIOL GU4002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

BIOL GU4004 Neurobiology I: Cellular and Molecular Neurobiology. 4 points.

Discussion Section Required

Prerequisites: one year of biology; a course in physics is highly recommended.

Lecture and recitation. This is an advanced course intended for majors providing an in depth survey of the cellular and molecular aspects of nerve cell function. Topics include the cell biology and biochemistry of neurons, ionic and molecular basis of electrical signals, synaptic transmission and its modulation, function of sensory receptors. Although not required, it is intended to be followed by Neurobiology II (see below). The recitation meets once per week in smaller groups and emphasizes readings from the primary literature.

Fall 2020: BIOL GU4004

BIOL GU4008 The Cellular Physiology of Disease. 3 points.

Prerequisites: one 3000-level course in Cell Biology or Biochemistry or the instructor's permission.

Corequisites: BIOL GU4009

This course will present a quantitative description of the cellular physiology of excitable cells (mostly nerve and muscle). While the course will focus on examining basic mechanisms in cell physiology, there will be a thread of discussion of disease mechanisms throughout. The end of each lecture will include a discussion of the molecular mechanisms of selected diseases that relate to the topics covered in the lecture. The course will consist of two lectures per week. This course will be of interest to advanced (3000-4000 level) undergraduates that aim to pursue careers in medicine as well as those that will pursue careers in biomedical research. This course will also be of interest to graduate students desiring an introduction to the cellular physiology of nerve and muscle.

BIOL GU4009 Cellular Physiology of Diseases Laboratory. 1 point.

See department for details

BIOL GU4022 Developmental Biology. 3 points.

Prerequisites: *BIOL C2005-C2006* or equivalent.

Come discover how the union of egg and sperm triggers the complex cellular interactions that specify the diverse variety of cells present in multicellular organisms. Cellular and molecular aspects of sex determination, gametogenesis, genomic imprinting, X-chromosome inactivation, telomerase

as the biological clock, stem cells, cloning, the pill and cell interactions will be explored, with an emphasis on humans. Original research articles will be discussed to further examine current research in developmental biology. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Fall 2020: BIOL GU4022

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4022	001/12183	T Th 1:10pm - 2:25pm 601 Fairchild Life Sciences Bldg	Alice Heicklen	3	2/10

BIOL GU4031 Genetics. 3 points.

Open to Biotech M.A. students and other graduate students.

Corequisites: Recommended: one term of organic chemistry.

Prerequisites: BIOL UN2005 and BIOL UN2006 or the equivalent. General genetics course focused on basic principles of transmission genetics and the application of genetic approaches to the study of biological function. Principles will be illustrated using classical and contemporary examples from prokaryote and eukaryote organisms, and the experimental discoveries at their foundation will be featured. Applications will include genetic approaches to studying animal development and human diseases. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOL GU4034 Biotechnology. 3 points.

Prerequisites: genetics or molecular biology.

The course covers techniques currently used to explore and manipulate gene function and their applications in medicine and the environment. Part I covers key laboratory manipulations, including DNA cloning, gene characterization, association of genes with disease, and methods for studying gene regulation and activities of gene products. Part II also covers commercial applications, and includes animal cell culture, production of recombinant proteins, novel diagnostics, high throughput screening, and environmental biosensors.

Fall 2020: BIOL GU4034

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4034	001/11572	M W 4:10pm - 5:25pm Online Only	Lawrence Chasin,	3	27/50

Kalderon

BIOL GU4035 Seminar in Epigenetics. 3 points.

Prerequisites: Genetics (3032/4032) or Molecular Biology (3512/4512), and the instructor's permission.

This is a combined lecture/seminar course designed for advanced undergraduates and graduate students. The focus is on understanding the mechanisms underlying epigenetic phenomena: the heritable inheritance of genetic states without change in DNA sequence. Epigenetic mechanisms play important roles during normal animal development and oncogenesis. It is an area under intensive scientific investigation and the course will focus on recent advances in understanding these phenomena. In each class, students will present and discuss in detail recent papers and background material concerning each individual topic, followed by an introductory lecture on the following week's topic. This course will emphasize critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally.

BIOL GU4065 Molecular Biology of Disease. 3 points.

Enrollment limited to 30.

Prerequisites: open to advanced undergraduates with the instructor's permission. Completion of a 3000-level course in at least one of the following, with completion of two or more preferred: genetics, biochemistry, cell biology. Molecular and cellular basis of infectious diseases and inherited propensities. Mechanisms of disease examined in discussions based on current research papers. Lectures, discussions, and student presentations. Essay required in lieu of final examination.

BIOL GU4070 The Biology and Physics of Single Molecules. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: calculus, chemistry, physics, one year of biology, or the instructor's permission.

This course will examine the fundamental mechanisms underlying the behavior of biological molecules, at the single molecule level. The course will cover the methods used to track single molecules: optical tweezers, single molecule AFM, Magnetic tweezers, Optical techniques and Fluorescence energy transfer (FRET) probes. The course will cover the mechanism of action of mechanical motors, such as myosin dynein, kinesin. It will cover the action of DNA binding enzymes such as topoisomerases, helicases, etc. We will also discuss the function of large motors such as the ATP Synthase and the bacterial AAA ATPases. We will discuss the mechanical properties of DNA, RNA, and proteins. The course will consist mainly of reviewing classical experiments in each category, and developing the background physical theories to promote a deep understanding of biological mechanisms at the mesoscopic level.

BIOL GU4075 Biology at Physical Extremes. 3 points.

Prerequisites: one year each of biology and physics, or the instructor's permission.

This is a combined lecture/seminar course designed for graduate students and advanced undergraduates. The course will cover a series of cases where biological systems take advantage of physical phenomena in counter intuitive and surprising ways to accomplish their functions. In each of these cases, we will discuss different physical mechanisms at work. We will limit our discussions to simple, qualitative arguments. We will also discuss experimental methods enabling the study of these biological systems. Overall, the course will expose students to a wide range of physical concepts involved in biological processes.

BIOL GU4080 The Ancient and Modern RNA Worlds. 3 points.

Prerequisites: BIOC UN3512

RNA has recently taken center stage with the discovery that RNA molecules sculpt the landscape and information contained within our genomes. Furthermore, some ancient RNA molecules combine the roles of both genotype and phenotype into a single molecule. These multi-tasking RNAs offering a possible solution to the paradox of which came first: DNA or proteins. This seminar explores the link between modern RNA, metabolism, and insights into a prebiotic RNA world that existed some 3.8 billion years ago. Topics include the origin of life, replication, and the origin of the genetic code; conventional, new, and bizarre forms of RNA processing; and structure, function and evolution of key RNA molecules, including the ribosome. The format will be weekly seminar discussions with presentations. Readings will be taken from the primary literature, emphasizing seminal and recent literature. Requirements will be student presentations, class participation, and a final paper.

Spring 2021: BIOL GU4080

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4080	001/11727	T 2:10pm - 4:00pm Online Only	Laura Landweber	3	13/23

BIOL GU4082 Theoretical Foundations and Applications of Biophysical Methods. 4 points.

Prerequisites: at least one year of coursework in single-variable calculus and not being freaked-out by multivariable calculus. Physics coursework through a calculus-based treatment of classical mechanics and electromagnetism. One year of general chemistry (either AP Chemistry or a college course). One year of college coursework in molecular/cellular biology and biochemistry equivalent to Biology C2005-2006 at Columbia. Rigorous introduction to the theory underlying biophysical methods, which are illustrated by practical applications to biomedical research. Emphasizes the approach used by physical chemists to understand and analyze the behavior of molecules, while also preparing students to apply these methods in their own research. Course modules cover: (i) statistical analysis of data; (ii) solution thermodynamics; (iii) hydrodynamic

methods; (iv) light-scattering methods; and (v) spectroscopic methods, especially fluorescence. Recitations focus on curve-fitting analyses of experimental data.

BIOL GU4193 Stem Cell Biology and Applications. 3 points.

Prerequisites: Three semesters of Biology or instructor permission.

The course examines current knowledge and potential medical applications of pluripotent stem cells (embryonic stem cells and induced pluripotent stem cells), direct conversions between cell types and adult, tissue-specific stem cells (concentrating mainly on hematopoietic and gut stem cells as leading paradigms). A basic lecture format will be supplemented by presentations and discussions of research papers. Recent reviews and research papers together with extensive instructor notes will be used in place of a textbook.

BIOL GU4260 Proteomics Laboratory. 3 points.

Lab Fee: \$150.

This course deals with the proteome: the expressed protein complement of a cell, organelle, matrix, tissue, organ or organism. The study of the proteome (proteomics) is broadly applicable to life sciences research, and is increasingly important in academic, government and industrial research through extension of the impact of advances in genomics. These techniques are being applied to basic research, exploratory studies of cancer and other diseases, drug discovery and many other topics. Emphasis will be on mastery of practical techniques of sample preparation, liquid chromatography/mass spectrometry (LC/MS) with electrospray ionization. Database searching and interpretation for identification of proteins will be intensively studied, and practiced supported by background tutorials and exercises covering other techniques used in proteomics. Open to students in M.A. in Biotechnology Program (points can be counted against laboratory requirement for that program), Ph.D. and advanced undergraduate students with background in genetics or molecular biology. Students should be comfortable with basic biotechnology laboratory techniques as well as being interested in doing computational work in a Windows environment.

Fall 2020: BIOL GU4260

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4260	001/11647	T 12:30pm - 3:30pm Online Only	Lewis Brown	3	7/20

BIOL GU4290 Biological Microscopy. 3 points.

Prerequisites: (biol un2005 or biol un2401) or BIOL UN2005 or BIOL UN2401 or equivalent

This is an advanced microscopy course aimed at graduates and advanced undergraduate students, who are interested in learning about the foundational principles of microscopy approaches and their applications in life sciences. The course will introduce the fundamentals of optics, light-matter interaction and in-depth view of most commonly used advanced microscopy

methods, explore important practical imaging parameters, and also introduce digital images and their analysis.

Spring 2021: BIOL GU4290

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4290	001/11003	T Th 11:40am - 12:55pm 601 Fairchild Life Sciences Bldg	Raju Tomer	3	13/30

BIOL GU4300 Drugs and Disease. 3 points.

Prerequisites: four semesters of biology with a firm foundation in molecular and cellular biology.

Introduces students to the current understanding of human diseases, novel therapeutic approaches and drug development process. Selected topics will be covered in order to give students a feeling of the field of biotechnology in health science. This course also aims to strengthen students' skills in literature comprehension and critical thinking.

Fall 2020: BIOL GU4300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4300	001/11933	M W 2:40pm - 3:55pm 601 Fairchild Life Sciences Bldg	Lili Yamasaki	3	30/70

BIOL GU4305 Seminar in Biotechnology. 3 points.

Prerequisites: *BIOL W4300* or the instructor's permission.

A weekly seminar and discussion course focusing on the most recent development in biotechnology. Professionals of the pharmaceutical, biotechnology, and related industries will be invited to present and lead discussions.

Spring 2021: BIOL GU4305

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4305	001/11303	W 2:10pm - 4:00pm 601 Fairchild Life Sciences Bldg	Lili Yamasaki	3	29/40

BIOL GU4310 Virology. 3 points.

The basic thesis of the course is that all viruses adopt a common strategy. The strategy is simple:

1. Viral genomes are contained in metastable particles.
2. Genomes encode gene products that promote an infectious cycle (mechanisms for genomes to enter cells, replicate, and exit in particles).
3. Infection patterns range from benign to lethal; infections can overcome or co-exist with host defenses.

Despite the apparent simplicity, the tactics evolved by particular virus families to survive and prosper are remarkable. This rich set of solutions to common problems in host/parasite interactions provides significant insight and powerful research tools. Virology has enabled a more detailed understanding of the structure and function of molecules, cells and organisms and

has provided fundamental understanding of disease and virus evolution.

The course will emphasize the common reactions that must be completed by all viruses for successful reproduction within a host cell and survival and spread within a host population. The molecular basis of alternative reproductive cycles, the interactions of viruses with host organisms, and how these lead to disease are presented with examples drawn from a set of representative animal and human viruses, although selected bacterial viruses will be discussed.

Spring 2021: BIOL GU4310

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4310	001/10923	M W 4:10pm - 5:25pm Online Only	Vincent Racaniello	3	131/150

BIOL GU4510 Genomics of Gene Regulation. 4 points.

Prerequisites: one year of Biology, Chemistry, and Physics. Courses taken at CU are recommended, but AP courses may be sufficient with the instructor's permission.

This course will provide students with a quantitative understanding of the ways in which molecular interactions between nucleotides and proteins give rise to the behavior of gene regulatory networks. The key high-throughput genomics technologies for probing the cell at different levels using microarrays and next-generation sequencing will be discussed. Strategies for interpreting and integrating these data using statistics, biophysics, and genetics will be introduced. In computer exercises, student will learn the basics of the R language, and use it to perform analyses of genomics data sets. No prior computer programming experience is assumed. This highly interdisciplinary course is intended for advanced undergraduates as well as beginning graduate students in Biology, Chemistry, Physics, Engineering, and Computer Science. Offered in previous years as CHBC W4510.

BIOL GU4560 Evolution in the age of genomics. 4 points.

Prerequisites: introductory genetics or the instructor's permission.

This course introduces basic concepts in evolutionary biology, from speciation to natural selection. While the lectures incorporate a historical perspective, the main goal of the class is to familiarize students with topics and tools of evolutionary genetics as practiced today, in the era of genomics. Thus, the focus will be on evidence from molecular evolution and genetics and exercises will assume a basic background in genetics. Examples will be drawn from across the tree of life, but with a primary focus on humans.

BIOL GU4600 Cell Signaling. 3 points.

Prerequisites: A strong background in molecular and cellular biology. Generally students with four or more courses are accepted.

Cell Signaling is a graduate course for Ph.D. students open to advanced undergraduate and masters students. The basic molecular mechanism of signal transduction pathways will be

discussed related to cell growth and stress systems. There will be an emphasis on specific categories of signaling components. Students will read the literature and give presentations. Topics include the pathways by which cells respond to extracellular signals such as growth factors and the mechanisms by which extracellular signals are translated into alterations in the cell cycle, morphology, differentiation state, and motility of the responding cells. For stress pathways we will discuss how cells respond to survive the stress or induce their own death. In many cases these pathways will be related to human diseases.

Fall 2020: BIOL GU4600

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4600	001/11734	T 4:10pm - 6:00pm Online Only	Ron Prywes	3	21/25

BIOL GU4799 Readings In the Molecular Biology of Cancer. 3 points.

Tracing the discovery of the role of DNA tumor viruses in cancerous transformation. Oncogenes and tumor suppressors are analyzed with respect to their function in normal cell cycle, growth control, and human cancers. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOT GU4160 Biotechnology Law. 3 points.

Priority given to Biotechnology Program students.

Prerequisites: at least 4 college-level biology or biotechnology courses.

This course will introduce students to the interrelated fields of patent law, regulatory law, and contract law that are vital to the biotech and biopharmaceutical sectors. The course will present core concepts in a way that permits students to use them throughout their corporate, academic, and government careers. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

BIOT GU4161 ETHICS IN BIOPHARM PAT/REG LAW. 3.00 points.

Prerequisites: BIOT GU4160 BIOTECHNOLOGY LAW (BIOT W4160)

This course – the first of its kind at Columbia – introduces students to a vital subfield of ethics focusing on patent and regulatory law in the biotech and pharmaceutical sectors. The course combines lectures, structured debate, and research to best present this fascinating and nuanced subject. Properly exploring this branch of bioethics requires an in-depth understanding of biotech and pharmaceutical patent and regulatory law. Students can gain this understanding by first completing Biotechnology Law (BIOT GU4160), formerly the prerequisite for this course. Now, they can also gain it by reading the appropriate chapters of *Biotechnology Law: A Primer for Scientists* (the textbook for BIOT GU4160 published earlier this year) prior to each class. A number of students in the biotechnology fields (such as those in biotechnology, biomedical engineering, and bioethics programs) have shown a keen interest over the years in taking this course, yet were unable to do so because they hadn't taken BIOT GU4160. Given the recent publication of *Biotechnology Law* and the desirability of making BIOT GU4161 accessible to more students having the appropriate science background, BIOT GU4160 has been removed as a prerequisite

Spring 2021: BIOT GU4161

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOT 4161	001/12471	W 6:10pm - 8:00pm Online Only	Alan Morrison	3.00	16/20

BIOT GU4200 Biopharmaceutical Development & Regulation. 3 points.

The program aims to provide current life sciences students with an understanding of what drives the regulatory strategies that surround the development decision making process, and how the regulatory professional may best contribute to the goals of product development and approval. To effect this, we will examine operational, strategic, and commercial aspects of the regulatory approval process for new drug, biologic, and biotechnology products both in the United States and worldwide. The topics are designed to provide a chronological review of the requirements needed to obtain marketing approval. Regulatory strategic, operational, and marketing considerations will be addressed throughout the course. We will examine and analyze the regulatory process as a product candidates are advanced from Research and Development, through pre-clinical and clinical testing, to marketing approval, product launch and the post-marketing phase. The goal of this course is to introduce and familiarize students with the terminology, timelines, and actual steps followed by Regulatory Affairs professionals employed in the pharmaceutical or biotechnology industry. Worked examples will be explored

to illustrate complex topics and illustrate interpretation of regulations.

Fall 2020: BIOT GU4200

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOT 4200	001/11935	Th 4:10pm - 6:00pm Online Only	Ron Guido	3	114/90

BIOT GU4201 Seminar in Biotechnology Development and Regulation. 3 points.

Prerequisites: *BIOT W4200* (OK without prerequisite).

This course will provide a practical definition of the current role of the Regulatory Professional in pharmaceutical development, approval and post-approval actions. This will be illustrated by exploration, and interactive discussion of regulatory history, its evolution, current standards, and associated processes. The course will seek to clarify the role of Regulatory in development and lifecycle opportunities, demonstrating the value Regulatory adds by participation on research, development and commercial teams. The course will utilize weekly case studies and guest lecturers to provide color to current topical events related to the areas.

Spring 2021: BIOT GU4201

BUSINESS

Program Managers: Rachel Horton and Katherine Bucaccio;

email contact address: MendelsonCenter@gsb.columbia.edu

<http://www8.gsb.columbia.edu/mendelson>

The collaboration between the faculty of Arts and Sciences and Columbia Business School offers students access to the ideas and expertise of the faculty of a top-ranked professional school recognized for its excellence in graduate business education through a series of elective courses. These courses, designed by Business School faculty specifically for undergraduates, build upon the strong liberal arts education at Columbia. Students learn how finance is directly connected to the fundamental principles of economics; that marketing utilizes concepts from psychology; and how management depends upon principles developed in psychology and sociology.

Students can take advantage of the opportunity to enhance their experience by participating in co-curricular activities, such as Business School faculty lecture series, industry panels, informal mentoring/networking activities with MBA students and alumni, in addition to research opportunities with Business School faculty.

This curricular and co-curricular programming capitalizes on the Business School's ability to connect academic theory with real-world practice, providing students with the opportunity to develop key leadership skills, an entrepreneurial mindset, and the ability to innovate.

Eligibility:

- To be eligible to earn a Special Concentration in Business Management, students must apply to the program in the spring semester of their sophomore or junior years, and they must be accepted through a process governed by the Columbia Business School. Beginning with the Special Concentration cohort of 2017-2018 (i.e., students accepted via the application process of Spring 2017), the program will accept up to 45 qualified candidates each year. The size of the program may be reviewed from time to time by Columbia College and Columbia Business School and adjusted, if desired by both schools.
- For students who entered Columbia College or General Studies in, or before, Fall 2016: Students who have not been accepted into the Special Concentration program may have the option to "shadow" the Special Concentration in Business Management by taking the required courses if space is available in those courses. Students who "shadow" the program will not be given priority registration in any courses that count toward the Special Concentration. If a student is able to take all of the courses and earns a 3.0 or higher grade-point average in the prerequisite, core, and elective courses, she or he will be allowed to declare retroactively the Special Concentration and have the program noted on their transcript.
- The shadowing option is no longer available for students who entered Columbia College or General Studies in, or after, Fall 2017.

APPLICATION REQUIREMENTS

To apply for the special concentration in business management, students must meet these three requirements:

1. Sophomore or junior standing;
2. Have a cumulative GPA of 3.4 or higher;
3. Have received a B+ or better in at least one, but preferably two, of the following three prerequisite courses, i.e. in statistics, economics, and psychology. Students who completed only one prerequisite at the time of application must be currently enrolled in at least one other; acceptance is conditional on achieving a grade of B+ or higher in the second course.

Statistics Prerequisite

Select one of the following:

STAT UN1001	INTRO TO STATISTICAL REASONING
-------------	--------------------------------

STAT UN1101	Introduction to Statistics
-------------	----------------------------

STAT UN1201	Calculus-Based Introduction to Statistics
-------------	---

PSYC UN1610	Introductory Statistics for Behavioral Scientists
-------------	---

SOCI UN3020	Social Statistics
-------------	-------------------

Economics Prerequisite

ECON UN1105	Principles of Economics
-------------	-------------------------

Psychology/Sociology Prerequisite

Select one of the following:

PSYC UN1001	The Science of Psychology
-------------	---------------------------

PSYC UN1010	Mind, Brain and Behavior
-------------	--------------------------

SOCI UN1000	THE SOCIAL WORLD
-------------	------------------

Application Components

1. Application form
2. Current class schedule, including a brief description of how all concentration requirements will be completed
3. Official transcript
4. Resume

Benefits for Admitted Students

The following benefits are available to students admitted through the application process:

1. Guaranteed enrollment in popular undergraduate business courses (must reserve in advance through program manager);
2. Access to special guest speaker presentations at the Business School, including business leader or faculty presentations exclusively for admitted students;
3. Formal and informal networking opportunities with Business School students, faculty, and alumni.

CURRENT FACULTY

AFFILIATED FACULTY

GUIDELINES FOR ALL BUSINESS MANAGEMENT SPECIAL CONCENTRATORS

The business management special concentration is not a stand-alone concentration: it is intended to complement the disciplinary specialization and methodological training inherent in a major. In addition to the special concentration requirements, students must complete a major or a full concentration.

Students who matriculated at Columbia in Fall 2012 and beyond must earn a minimum GPA of 3.0 in prerequisite, core, and elective courses. Students who matriculated before Fall 2012 must either adhere to the above requirement or previous requirement of B+ or better in at least two of the prerequisites and a minimum GPA of 3.0 in core and elective classes.

Students who do not meet course prerequisites or who do not receive a passing grade do not receive credit for that course towards the special concentration. All courses must be taken for a letter grade. Only prerequisites may be double counted for other majors or concentrations. The core classes **cannot** be double counted. Electives may be double counted if a student's major allows double counting.

For information about this special concentration, including the application process, visit <http://www8.gsb.columbia.edu/mendelson>.

SPECIAL CONCENTRATION IN BUSINESS MANAGEMENT

Please read *Guidelines for all Business Management Special Concentrators* above.

The requirements for the special concentration in business management are as follows:

Prerequisites

Select one of the following Statistics courses:

STAT UN1001	INTRO TO STATISTICAL REASONING
STAT UN1101	Introduction to Statistics
STAT UN1201	Calculus-Based Introduction to Statistics
PSYC UN1610	Introductory Statistics for Behavioral Scientists
SOCI UN3020	Social Statistics

Select the following Economics course:

ECON UN1105	Principles of Economics
-------------	-------------------------

Select one of the following Psychology/Sociology courses:

PSYC UN1001	The Science of Psychology
-------------	---------------------------

PSYC UN1010	Mind, Brain and Behavior
SOCI UN1000	THE SOCIAL WORLD

Core

Select one of the following Financial Core courses:

ECON GU4280	Corporate Finance
BUSI UN3013	Financial Accounting

Select two of the following Managerial Core courses:

BUSI UN3701	STRATEGY FORMULATION
BUSI UN3021	Marketing Management
BUSI UN3703	Leadership in Organizations

Electives

Select two of the following courses:

BUSI UN3702	Venturing to Change the World
BUSI UN3704	Making History Through Venturing
ECON UN2257	Global Economy
ECON UN3025	Financial Economics
ECON UN3265	MONEY AND BANKING
ECON GU4415	Game Theory
ECON BC2010	The Economics of Gender
ECON BC3013	Economic History of the United States
POLS V3615	Globalization and International Politics
PSYC UN2235	THINKING AND DECISION MAKING
PSYC UN2630	Social Psychology
PSYC UN2640	INTRO TO SOCIAL COGNITION
PSYC UN2650	Introduction to Cultural Psychology
PSYC BC1136	Social Psychology
PSYC BC1138	Social Psychology
PSYC BC2151	Organizational Psychology
SOCI UN2240	Economy and Society
SOCI UN3000	Social Theory
SOCI UN3265	MINORITIES/ETHNIC GP-AMER LIFE
SOCI UN3490	Mistake, Misconduct, Disaster
SOCI W3670	Culture, Markets, and Consumption
SOCI UN3677	The Organization of Diversity
SOCI S3675Q	Organizing Innovation
SOCI G4032	Sociology of Labor Markets
BIOT GU4201	Seminar in Biotechnology Development and Regulation
HIST BC2101	History of Capitalism
MATH UN3050	Discrete Time Models in Finance
SDEV UN2320	Economic and Financial Methods for Sustainable Development
URBS UN3550	Community Building and Economic Development

NOTE: Students may not receive credit for two or more of PSYC BC1136 Social Psychology, *PSYC BC1138 Social Psychology*, and PSYC UN2630 Social Psychology.

BUSI UN3013 Financial Accounting. 3 points.

Enables students to become informed users of financial information by understanding the language of accounting and financial reporting. Focuses on the three major financial statements that companies prepare for use of management and external parties—the balance sheet, the income statement, and the statement of cash flows. Examines the underlying concepts that go into the preparation of these financial statements as well as specific accounting rules that apply when preparing financial statements. Also looks at approaches to analyze the financial strength and operations of an entity. Uses actual financial statements to understand how financial information is presented and to apply analysis techniques.

BUSI UN3021 Marketing Management. 3 points.

Designed to provide students with an understanding of the fundamental marketing concepts and their application by business and non-business organizations. The goal is to expose students to these concepts as they are used in a wide variety of settings, including consumer goods firms, manufacturing and service industries, and small and large businesses. The course gives an overview of marketing strategy issues, elements of a market (company, customers, and competition), as well as the fundamental elements of the marketing mix (product, price, placement/distribution, and promotion).

BUSI UN3701 STRATEGY FORMULATION. 3.00 points.

This class is an introduction to strategic management and the decisions that firms make in their historical context. We look at the growth of the large multi-product firm in almost all countries in the world and the process by which they internationalized their activities and, very often, were

also forced to retreat from their international positions. We treat strategies as relation to two broad goals of the class: to understand why some companies are financially much more successful than others; and to analyze how managers can devise a set of actions (the strategy) and design processes and structures that allow their company to obtain a competitive advantage. You will learn the analytical tools developed in universities, in consulting and industrial firms, and even in the military. These tools include what companies do to outperform their rivals; to analyze the competitive moves of rival firms by game-theoretic concepts; and when it makes sense for companies to diversify and globalize their business. Applications will be to Walmart and Apple, European firms and to Asian firms, and developing country firms

Spring 2021: BUSI UN3701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3701	001/13437	W 8:40am - 11:25am Online Only	Bruce Kogut	3.00	49/70

BUSI UN3702 Venturing to Change the World. 3 points.

How do founders and their new ventures change the world? Changes in technology and society are increasing the power of small teams to impact everything. Startups, large corporations, social groups and governments are increasingly focused on the power of innovation to solve the world's hardest problems. The ideas and patterns driving this recent form of change-making build on frameworks defining the development of modern civilizations since the Renaissance.

Venturing to Change the World introduces the intellectual foundations and practical aspects of founding a new venture. We explore the entrepreneurial mindset, team formation, idea selection, how ideas become products with markets, and the key steps in building a venture. Our scope is commercial as well as social ventures, and the course is appropriate not only for prospective founders but anyone who will operate in a society increasingly animated by entrepreneurial activity.

Fall 2020: BUSI UN3702

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3702	001/14335	F 9:00am - 12:00pm Online Only	Damon Phillips, Betsy Morgan	3	62/74

BUSI UN3703 Leadership in Organizations. 3 points.

Initially, the emphasis is on understanding the challenges confronting leaders and developing skills to effectively deal with these obstacles. Beyond intelligence and technical know-how, what separates effective leaders from other team members is a set of social skills (e.g. impression management, self-awareness). This course identifies these critical leadership skills and provides ideas and tools for improving them. Then, the course considers how social intelligence skills fit the needs of managers at different stages of their careers. In early stages, managers need to achieve a good person-job fit, find mentors,

and build an effective social network. At the mid-career stage, managers need to lead an effective unit with increasing complexity and responsibilities. Finally, the course examines challenges managers face at later career stages as they become partners, CFOs, CEOs, etc.

Fall 2020: BUSI UN3703

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3703	001/13645	W 9:00am - 12:00pm Online Only	Rachel McDonald	3	52/60

BUSI UN3704 Making History Through Venturing. 3 points.

Prerequisites: BUSI UN3702 BUSI UN3702 or equivalent
This course is about making history. Advanced topics in creating successful organizations. In the age of accelerating change, innovation is moving from an accidental, artisanal process to a large-scale societal machinery. Building on Venturing to Change the World's overview, this course delves into the philosophy, economics, history, sociology, engineering, finance and management topics that animate powerful commercial and social ventures. Technology trends: Deep consideration of two major forces in technology for the next decade (synthetic biology, artificial intelligence). Management strategies for building and leading, as well as personal productivity and conduct. Accessing and managing financial markets and resources. Product creation: Conceptualizing and delivering innovation and products through design and engineering teams. Finance and fundraising: Designing the business model, understanding the economics, and the social science of the financing markets. Keywords: science, technology, innovation, management, finance, fundraising, operations research, organizational behavior, ethics, social impact, leadership, philosophy.

ECON GU4280 Corporate Finance. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

An introduction to the economics principles underlying the financial decisions of firms. The topics covered include bond and stock valuations, capital budgeting, dividend policy, market efficiency, risk valuation, and risk management. For information regarding REGISTRATION for this course, go to: <http://econ.columbia.edu/registration-information>.

Fall 2020: ECON GU4280

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4280	001/11178	M W 4:10pm - 5:25pm Online Only	Ethan Namvar	3	49/75
ECON 4280	002/10563	T Th 4:10pm - 5:25pm Online Only	Tri Vi Dang	3	95/100

Spring 2021: ECON GU4280

CHEMISTRY

Undergraduate Office: 340 Havemeyer; 212-854-2163

Departmental Office: 344 Havemeyer; 212-854-2202
<https://chem.columbia.edu/>

Director of Undergraduate Studies: Prof. Karen Phillips, 422 Havemeyer; 212-851-7534; kep12@columbia.edu (kep12@chem.columbia.edu)

Program Manager for Undergraduate Studies:
Dr. Vesna Gasperov, 355 Chandler; 212-854-2017; vg2231@columbia.edu

Biochemistry Advisers:

Biology: Prof. Brent Stockwell, 1208 Northwest Corner Building; 212-854-2919; stockwell@biology.columbia.edu

Chemistry, the study of molecules, is a central science interesting for its own sake but also necessary as an intellectual link to the other sciences of biology, physics, and environmental science. Faculty find the various disciplines of chemistry fascinating because they establish intellectual bridges between the macroscopic or human-scale world that we see, smell, and touch, and the microscopic world that affects every aspect of our lives. The study of chemistry begins on the microscopic scale and extends to engage a variety of different macroscopic contexts.

Chemistry is currently making its largest impact on society at the nexus between chemistry and biology and the nexus between chemistry and engineering, particularly where new materials are being developed. A typical chemistry laboratory now has more computers than test tubes and no longer smells of rotten eggs.

The chemistry department majors are designed to help students focus on these new developments and to understand the factors influencing the nature of the discipline. Because the science is constantly changing, courses change as well, and while organic and physical chemistry remain the bedrock courses, they too differ greatly from the same courses 40 years ago. Many consider biochemistry to be a foundation course as well. Although different paths within the chemistry major take different trajectories, there is a core that provides the essential foundation students need regardless of the path they choose. Students should consider majoring in chemistry if they share or can develop a fascination with the explanatory power that comes with an advanced understanding of the nature and influence of the microscopic world of molecules.

Students who choose to major in chemistry may elect to continue graduate study in this field and obtain a Ph.D. which is a solid basis for a career in research, either in the industry

or in a university. A major in chemistry also provides students with an astonishing range of career choices such as working in the chemical or pharmaceutical industries or in many other businesses where a technical background is highly desirable. Other options include becoming a financial analyst for a technical company, a science writer, a high school chemistry teacher, a patent attorney, an environmental consultant, or a hospital laboratory manager, among others. The choices are both numerous and various as well as intellectually exciting and personally fulfilling.

ADVANCED PLACEMENT

The department grants advanced placement (AP) credit for a score of 4 or 5 or the equivalent. The amount of credit granted is based on the results of the department placement exam and completion of the requisite course. Students who are placed into CHEM UN1604 2ND TERM GEN CHEM (INTENSIVE) are granted 3 points of credit; students who are placed into CHEM UN2045 INTENSIVE ORGANIC CHEMISTRY-CHEM UN2046 Intensive Organic Chemistry II (Lecture) are granted 6 points of credit. In either case, credit is granted only upon completion of the course with a grade of C or better. Students must complete a department placement exam prior to registering for either of these courses.

PROGRAMS OF STUDY

The Department of Chemistry offers four distinct academic major programs for undergraduates interested in professional-level training and education in the chemical sciences: chemistry, chemical physics, biochemistry and environmental chemistry. For students interested in a program of less extensive study and coursework, the department offers a concentration in chemistry.

COURSE INFORMATION

The results of the placement exam are used to advise students which track to pursue. The Department of Chemistry offers three different tracks. Students who wish to take Track 2 or 3 classes must take the placement exam. Students who wish to pursue Track 1 classes do not need to take the placement exam.

TRACK INFORMATION

In the first year, Track 1 students with one year of high school chemistry take a one-year course in general chemistry, and the one-term laboratory course that accompanies it. In the second year, students study organic chemistry, and take organic chemistry laboratory.

Students who qualify by prior examination during orientation week can place into the advanced tracks. There are two options. Track 2 students take, in the fall term, a special one-term intensive course in general chemistry in place of the one-year course. In the second year, students study organic chemistry and take organic chemistry laboratory. Track 3 students take a one-year course in organic chemistry for first-year students and the one-term intensive general chemistry laboratory course. In

the second year, students enroll in physical chemistry and the organic chemistry laboratory course.

Additional information on the tracks can be found in the *Requirements* section.

ADDITIONAL COURSES

First-year students may also elect to take CHEM UN2408. This seminar focuses on topics in modern chemistry, and is offered to all students who have taken at least one semester of college chemistry and have an interest in chemical research.

Biochemistry (BIOC GU4501, BIOC GU4512) is recommended for students interested in the biomedical sciences.

Physical chemistry (CHEM UN3079-CHEM UN3080), a one-year program, requires prior preparation in mathematics and physics. The accompanying laboratory is CHEM UN3085-CHEM UN3086.

Also offered are a senior seminar (CHEM UN3920); advanced courses in biochemistry, inorganic, organic, and physical chemistry; and an introduction to research (CHEM UN3098).

SAMPLE PROGRAMS

Some *typical* programs are shown below. Programs are crafted by the student and the Director of Undergraduate Studies and Program Manager to meet individual needs and interests.

Track 1

First Year

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
CHEM UN1404	General Chemistry II (Lecture)
CHEM UN1500	General Chemistry Laboratory
CHEM UN2408	First-Year Seminar in Chemical Research

Calculus and physics as required.

Second Year

CHEM UN2443	Organic Chemistry I (Lecture)
CHEM UN2444	ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493	Organic Chemistry Laboratory I (Techniques)
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

Calculus and physics as required.

Third Year

CHEM UN3079	Physical Chemistry I
CHEM UN3080	Physical Chemistry II
BIOC GU4501	Biochemistry: Structure and Metabolism

CHEM UN3546	Advanced Organic Chemistry Laboratory
CHEM UN3098	Supervised Independent Research
Fourth Year	
CHEM UN3085	Physical and Analytical Chemistry Laboratory I
CHEM UN3086	Physical and Analytical Chemistry Laboratory II
CHEM UN3920	Senior Seminar in Chemical Research
CHEM GU4071	Inorganic Chemistry
Advanced courses (4000-level or higher)	

Track 2

First Year

CHEM UN1507	Intensive General Chemistry Laboratory
CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN2408	First-Year Seminar in Chemical Research

Calculus and physics as required.

Second Year

CHEM UN2443	Organic Chemistry I (Lecture)
CHEM UN2444	ORGANIC CHEMISTRY II- LECTURES
CHEM UN2493	Organic Chemistry Laboratory I (Techniques)
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

Calculus and physics as required.

Third Year

CHEM UN3079	Physical Chemistry I
CHEM UN3080	Physical Chemistry II
BIOC GU4501	Biochemistry: Structure and Metabolism
CHEM UN3546	Advanced Organic Chemistry Laboratory
CHEM UN3098	Supervised Independent Research

Fourth Year

CHEM UN3085	Physical and Analytical Chemistry Laboratory I
CHEM UN3086	Physical and Analytical Chemistry Laboratory II
CHEM UN3920	Senior Seminar in Chemical Research
CHEM GU4071	Inorganic Chemistry
Advanced courses (4000- level or higher)	

Track 3

First Year

CHEM UN1507	Intensive General Chemistry Laboratory
CHEM UN2045	INTENSIVE ORGANIC CHEMISTRY
CHEM UN2046	Intensive Organic Chemistry II (Lecture)
CHEM UN2408	First-Year Seminar in Chemical Research

Calculus and Physics as required.

Second Year

CHEM UN3079	Physical Chemistry I
CHEM UN3080	Physical Chemistry II
CHEM UN2545	Intensive Organic Chemistry Laboratory
CHEM UN3546	Advanced Organic Chemistry Laboratory

Calculus and physics as required.

Third Year

BIOC GU4501	Biochemistry: Structure and Metabolism
CHEM UN3085	Physical and Analytical Chemistry Laboratory I
CHEM UN3086	Physical and Analytical Chemistry Laboratory II
CHEM UN3098	Supervised Independent Research
CHEM GU4071	Inorganic Chemistry

Fourth Year

CHEM UN3920	Senior Seminar in Chemical Research
Advanced courses (4000-level or higher)	

PROFESSORS

GUIDELINES FOR ALL CHEMISTRY MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Students majoring in chemistry or in one of the interdepartmental majors in chemistry should go to the director of undergraduate studies or the undergraduate program manager in the Department of Chemistry to discuss their program of study. Chemistry majors and interdepartmental majors usually postpone part of the Core Curriculum beyond the sophomore year.

Chemistry Tracks

All students who wish to start with Track 2 or 3 courses must take a placement exam. The results of the placement exam are used to advise students which track to pursue. Unless otherwise specified below, all students must complete one of the following tracks:

Track 1

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
CHEM UN1404	General Chemistry II (Lecture)
CHEM UN1500	General Chemistry Laboratory
CHEM UN2443	Organic Chemistry I (Lecture)
CHEM UN2444	ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493	Organic Chemistry Laboratory I (Techniques)
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

Track 2

CHEM UN1500 or CHEM UN1507	General Chemistry Laboratory Intensive General Chemistry Laboratory
CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN2443	Organic Chemistry I (Lecture)
CHEM UN2444	ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493	Organic Chemistry Laboratory I (Techniques)
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

Track 3

CHEM UN1507	Intensive General Chemistry Laboratory
CHEM UN2045	INTENSIVE ORGANIC CHEMISTRY
CHEM UN2046	Intensive Organic Chemistry II (Lecture)
CHEM UN2545	Intensive Organic Chemistry Laboratory

Physics Sequences

Unless otherwise specified below, all students must complete one of the following sequences:

Sequence A

For students with limited background in high school physics:

PHYS UN1401	Introduction To Mechanics and Thermodynamics
PHYS UN1402	INTRO ELEC/MAGNETISM # OPTCS
PHYS UN1403	Introduction to Classical and Quantum Waves

For chemistry majors, the following laboratory courses are recommended, NOT required. For chemical physics majors, the following laboratory courses are required:

PHYS UN1494	Introduction to Experimental Physics
-------------	--------------------------------------

PHYS UN2699	Experiments in Classical and Modern Physics
PHYS UN3081	Intermediate Laboratory Work

Sequence B

PHYS UN1601	Physics, I: Mechanics and Relativity
PHYS UN1602	Physics, II: Thermodynamics, Electricity, and Magnetism
PHYS UN2601	Physics, III: Classical and Quantum Waves
or PHYS UN3081	Intermediate Laboratory Work

For chemistry majors, the following laboratory courses are recommended NOT required. For chemical physics majors, the following laboratory courses are required:

PHYS UN2699	Experiments in Classical and Modern Physics
-------------	---

Sequence C

For students with advanced preparation in physics and mathematics:

PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

For chemistry majors, the following laboratory courses are recommended NOT required. For chemical physics majors, the following laboratory courses are required:

PHYS UN2699	Experiments in Classical and Modern Physics
or PHYS UN3081	Intermediate Laboratory Work

MAJOR IN CHEMISTRY

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

Chemistry

Select one of the chemistry tracks outlined above.

CHEM UN2408	First-Year Seminar in Chemical Research (Recommended NOT required)
CHEM UN3079	Physical Chemistry I
CHEM UN3080	Physical Chemistry II
CHEM UN3085	Physical and Analytical Chemistry Laboratory I
CHEM UN3086	Physical and Analytical Chemistry Laboratory II
CHEM UN3546	Advanced Organic Chemistry Laboratory
CHEM UN3920	Senior Seminar in Chemical Research
CHEM GU4071	Inorganic Chemistry
Select one course from the following:	
CHEM UN3098	Supervised Independent Research

OR Chemistry courses numbered CHEM GU4000 or above

Physics

Select one of the physics sequences outlined above in the Guidelines section.

Mathematics

Select one of the following sequences:

Four semesters of calculus:

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN1202	and CALCULUS IV

Two semesters of honors mathematics:

MATH UN1207	Honors Mathematics A
- MATH UN1208	and HONORS MATHEMATICS B

MAJOR IN BIOCHEMISTRY

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

Chemistry

Select one of the chemistry tracks outlined above.

CHEM UN2408	First-Year Seminar in Chemical Research (Recommended NOT required)
CHEM UN3079	Physical Chemistry I
CHEM UN3080	Physical Chemistry II

Biology

BIOL UN1908	First-Year Seminar in Modern Biology (Recommended NOT required)
BIOL UN2005	Introductory Biology I: Biochemistry, Genetics & Molecular Biology
BIOL UN2006	INTRO BIO II: CELL BIO, DEV/PHYS
BIOC UN3501	Biochemistry: Structure and Metabolism
BIOC UN3512	Molecular Biology

Physics

Select one of the following physics sequences:

Sequence A:

PHYS UN1201	General Physics I
- PHYS UN1202	and General Physics II

Sequence B:

PHYS UN1401	Introduction To Mechanics and Thermodynamics
- PHYS UN1402	and INTRO ELEC/MAGNETISM
- PHYS UN1403	# OPTCS and Introduction to Classical and Quantum Waves (PHYS UN1403 is recommended NOT required)

Sequence C:

PHYS UN1601 Physics, I: Mechanics and
 - PHYS UN1602 Relativity
 - PHYS UN2601 and Physics, II: Thermodynamics,
 Electricity, and Magnetism
 and Physics, III: Classical and
 Quantum Waves (PHYS UN2601
 is recommended but not required)

Sequence D:

PHYS UN2801 Accelerated Physics I
 - PHYS UN2802 and Accelerated Physics II

Mathematics

Select one of the following sequences:

Two semesters of calculus:

MATH UN1101 CALCULUS I
 - MATH UN1102 and CALCULUS II
 - MATH UN1201 and Calculus III
 - MATH UN1202 and CALCULUS IV

Two semesters of honors mathematics:

MATH UN1207 Honors Mathematics A
 - MATH UN1208 and HONORS MATHEMATICS
 B

AP credit and one term of calculus (Calculus II or higher)

Additional Courses

Select two of the following upper level laboratory courses
 (one should be a Biology lab):

BIOL UN3040 Lab in Molecular Biology
 - BIOL UN2501 and Contemporary Biology
 Laboratory

BIOL UN3050 Project Laboratory In Protein
 Biochemistry

BIOL UN3052 Project Laboratory in Molecular
 Genetics

BIOL UN3500 Independent Biological Research

CHEM UN3085 Physical and Analytical Chemistry
 Laboratory I

CHEM UN3086 Physical and Analytical Chemistry
 Laboratory II

CHEM UN3098 Supervised Independent Research

CHEM UN3546 Advanced Organic Chemistry
 Laboratory

Select any three courses from the following:

CHEM GU4071 Inorganic Chemistry

CHEM GU4102 Chemistry for the Brain

CHEM GU4147 Advanced Organic Chemistry

BIOC GU4323 Biophysical Chemistry I

BIOC GU4324 Biophysical Chemistry II

MATH UN3027 Ordinary Differential Equations
 or MATH UN2030 ORDINARY DIFFERENTIAL
 EQUATION

One additional semester of calculus

One additional semester of honors math:

MATH UN1207 Honors Mathematics A
 or MATH UN1208 HONORS MATHEMATICS B

Any biology course at the 3000/4000 level for 3 or more
 points. The following are recommended:

BIOL UN3004 Neurobiology I: Cellular and
 Molecular Neurobiology

 or BIOL UN3005 Neurobiology II: Development & Systems

BIOL UN3008 The Cellular Physiology of
 Disease

BIOL UN3022 Developmental Biology

BIOL UN3034 Biotechnology

BIOL UN3041 Cell Biology

BIOL UN3073 Cellular and Molecular
 Immunology

BIOL GU4065 Molecular Biology of Disease

BIOL GU4300 Drugs and Disease

MAJOR IN CHEMICAL PHYSICS

Select one of the tracks outlined above in *Guidelines for all
 Chemistry Majors, Concentrators, and Interdepartmental
 Majors* and complete the following lectures and labs.

Chemistry

Select one of the chemistry tracks outlined above.

CHEM UN3079 Physical Chemistry I

CHEM UN3080 Physical Chemistry II

CHEM UN3085 Physical and Analytical Chemistry
 Laboratory I

CHEM UN3086 Physical and Analytical Chemistry
 Laboratory II

CHEM UN3098 Supervised Independent Research

CHEM UN3920 Senior Seminar in Chemical
 Research

CHEM GU4221 Quantum Chemistry

 or PHYS GU4021 Quantum Mechanics I

Physics

Select one of the physics sequences outlined above in
*Guidelines for all Chemistry Majors, Concentrators and
 Interdepartmental Majors*. For the chemical physics major,
 one lab **MUST** be completed for the sequence chosen.

Complete the following lectures:

PHYS UN3003 Mechanics

PHYS UN3007 Electricity and Magnetism

PHYS UN3008 Electromagnetic Waves and
 Optics

Mathematics

Select one of the following sequences:

Four semesters of calculus:

MATH UN1101 CALCULUS I

- MATH UN1102 and CALCULUS II

- MATH UN1201 and Calculus III

- MATH UN1202 and CALCULUS IV

Two semesters of honors mathematics:

MATH UN1207 Honors Mathematics A

- MATH UN1208 and HONORS MATHEMATICS
 B

- MATH UN3027 and Ordinary Differential
 Equations

Two semesters of advanced calculus:

MATH UN1202	CALCULUS IV
- MATH UN3027	and Ordinary Differential Equations

MAJOR IN ENVIRONMENTAL CHEMISTRY

The requirements for this program were modified on February 1, 2016. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

Chemistry

Select one of the chemistry tracks outlined above. A second semester of Organic Chemistry lecture is recommended NOT required.

CHEM UN3079	Physical Chemistry I
CHEM GU4071	Inorganic Chemistry

The following courses are recommended NOT required:

CHEM UN2408	First-Year Seminar in Chemical Research
CHEM UN3920	Senior Seminar in Chemical Research

Earth and Environmental Science

Select two of the following three courses:

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System

Additional course required:

EESC UN3101	Geochemistry for a Habitable Planet
-------------	-------------------------------------

Select one of the following labs:

EESC BC3016	Environmental Measurements
CHEM UN3085	Physical and Analytical Chemistry Laboratory I

Select one option for Independent Research in Environmental Chemistry:

EESC BC3800	Senior Research Seminar
- EESC BC3801	and Senior Research Seminar
CHEM UN3098	Supervised Independent Research (It is strongly recommended to take CHEM UN3920 if taking CHEM UN3098)

Physics

Select one of the following physics sequences:

Sequence A:

PHYS UN1201	General Physics I
- PHYS UN1202	and General Physics II

Sequence B:

PHYS UN1401	Introduction To Mechanics and Thermodynamics
- PHYS UN1402	and INTRO ELEC/MAGNETISM
- PHYS UN1403	# OPTCS and Introduction to Classical and Quantum Waves (Recommended NOT required)

Sequence C:

PHYS UN1601	Physics, I: Mechanics and Relativity
- PHYS UN1602	and Physics, II: Thermodynamics, Electricity, and Magnetism
- PHYS UN2601	and Physics, III: Classical and Quantum Waves (Recommended, not required)

Sequence D:

PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

Mathematics

Two semesters of calculus:

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	Calculus III
MATH UN1202	CALCULUS IV

Additional Courses

Select any two of the following:

Chemistry:

CHEM UN3080	Physical Chemistry II
CHEM GU4103	Organometallic Chemistry
CHEM GU4147	Advanced Organic Chemistry

Earth and Environmental Science:

EESC BC3017	Environmental Data Analysis
EESC BC3025	Hydrology
EESC GU4008	Introduction to Atmospheric Science
EESC GU4009	Chemical Geology
EESC GU4040	CLIM THERMODYN/ENERGY TRANSFER
EESC GU4050	Global Assessment and Monitoring Using Remote Sensing
EESC GU4600	Earth Resources and Sustainable Development
EESC GU4835	Wetlands and Climate Change
EESC GU4885	The Chemistry of Continental Waters
EESC GU4888	Stable Isotope Geochemistry
EESC GU4924	Introduction to Atmospheric Chemistry
EESC GU4925	Principles of Physical Oceanography
EESC GU4926	Principles of Chemical Oceanography

Earth and Environmental Engineering:

EAEE E4001	Industrial ecology of earth resources
------------	---------------------------------------

EAAE E4003 Aquatic chemistry

Mathematics:

One additional semester of calculus

CONCENTRATION IN CHEMISTRY

No more than four points of CHEM UN3098 Supervised Independent Research may be counted toward the concentration.

Select one of the three chemistry tracks listed below.

PHYS UN1201 General Physics I
- PHYS UN1202 and General Physics II

Two semesters of calculus

Chemistry Tracks

Track 1

CHEM UN1403 GENERAL CHEMISTRY I-LECTURES
CHEM UN1404 General Chemistry II (Lecture)
CHEM UN1500 General Chemistry Laboratory

Select 22 points of chemistry at the 2000-level or higher (excluding CHEM UN2408).

Track 2

CHEM UN1500 General Chemistry Laboratory
or CHEM UN1507 Intensive General Chemistry Laboratory
CHEM UN1604 2ND TERM GEN CHEM (INTENSIVE)

Select 22 points of chemistry at the 2000-level or higher (excluding CHEM UN2408).

Track 3

CHEM UN1507 Intensive General Chemistry Laboratory
CHEM UN2045 INTENSIVE ORGANIC CHEMISTRY
CHEM UN2046 Intensive Organic Chemistry II (Lecture)

Select 18 points of chemistry at the 2000-level or higher (excluding CHEM UN2408).

FALL 2020

CHEM UN1403 GENERAL CHEMISTRY I-LECTURES. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Corequisites: MATH UN1101

Corequisites: MATH UN1101 Preparation equivalent to one year of high school chemistry is assumed. Students lacking such preparation should plan independent study of chemistry over the summer or take CHEM UN0001 before taking CHEM UN1403. Topics include stoichiometry, states of matter, nuclear properties, electronic structures of atoms, periodic properties, chemical bonding, molecular geometry, introduction

to quantum mechanics and atomic theory, introduction to organic and biological chemistry, solid state and materials science, polymer science and macromolecular structures and coordination chemistry. Although CHEM UN1403 and CHEM UN1404 are separate courses, students are expected to take both terms sequentially. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure they register for the recitation that corresponds to the lecture section. When registering, please add your name to the wait list for the recitation corresponding to the lecture section (1405 for lecture sec 001; 1407 for lecture sec 002; 1409 for lecture sec 003; 1411 for lecture sec 004). Information about recitation registration will be sent out before classes begin. DO NOT EMAIL THE INSTRUCTOR. Please check the Directory of Classes for details

Fall 2020: CHEM UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1403	001/10910	M W 10:10am - 11:25am Online Only	Gerard Parkin	4.00	243/240
CHEM 1403	002/10835	T Th 10:10am - 11:25am Online Only	Xavier Roy	4.00	194/200
CHEM 1403	003/10832	T Th 6:10pm - 7:25pm Online Only	Ruben Savizky	4.00	189/200

Spring 2021: CHEM UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1403	001/10692	W 6:10pm - 7:25pm Online Only	Robert Beer	4.00	140/140

CHEM UN1500 General Chemistry Laboratory. 3 points.
CC/GS: Partial Fulfillment of Science Requirement
Lab Fee: \$140.

Corequisites: CHEM UN1403, CHEM UN1404

An introduction to basic lab techniques of modern experimental chemistry, including quantitative procedures and chemical analysis. Students must register for a Lab Lecture section for this course (*CHEM UN1501*). Please check the Directory of Classes for details. Please note that *CHEM UN1500* is offered in the fall and spring semesters. Mandatory lab check-in will be held during the first week of classes in both the fall and spring semesters.

Fall 2020: CHEM UN1500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1500	001/10911	T 1:10pm - 4:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	18/20
CHEM 1500	002/10912	T 6:10pm - 9:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	28/33
CHEM 1500	003/10913	W 1:10pm - 4:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	29/33

CHEM 1500	004/10914	Th 8:40am - 12:25pm Online Only	Joseph Ulichny, Sarah Hansen	3	10/20
-----------	-----------	------------------------------------	---------------------------------	---	-------

Spring 2021: CHEM UN1500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1500	001/11844	T 6:10pm - 9:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	41/40
CHEM 1500	002/11845	W 8:40am - 12:25pm Online Only	Joseph Ulichny, Sarah Hansen	3	27/30
CHEM 1500	003/11850	W 1:10pm - 4:50pm Online Only	Sarah Hansen, Joseph Ulichny	3	31/30
CHEM 1500	004/11849	W 6:10pm - 9:50pm Online Only	Sarah Hansen, Joseph Ulichny	3	16/30
CHEM 1500	005/12133	Th 1:10pm - 4:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	44/40
CHEM 1500	006/11846	Th 6:10pm - 9:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	43/40
CHEM 1500	007/11847	F 8:40am - 12:25pm Online Only	Joseph Ulichny, Sarah Hansen	3	20/30
CHEM 1500	008/11848	F 1:10pm - 4:50pm Online Only	Joseph Ulichny, Sarah Hansen	3	44/40

CHEM UN1507 Intensive General Chemistry Laboratory. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Lab Fee: \$140.

Prerequisites: CHEM UN1604 or CHEM UN2045
Corequisites: CHEM UN2045

A student-centered experimental course intended for students who are taking or have completed CHEM UN1604 (Second Semester General Chemistry Intensive Lecture offered in Fall), CHEM UN2045 (Intensive Organic Chemistry offered in Fall), or CHEM UN2046 (Intensive Organic Chemistry Lecture offered in Spring). The course will provide an introduction to theory and practice of modern experimental chemistry in a contextual, student-centered collaborative learning environment. This course differs from CHEM UN1500 in its pedagogy and its emphasis on instrumentation and methods. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details. Please note that CHEM UN1507 is offered in the fall and spring semesters.

Fall 2020: CHEM UN1507

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

CHEM 1507	001/10926	M 1:00pm - 6:00pm Online Only	Luis Avila	3	8/18
CHEM 1507	002/10927	F 1:00pm - 6:00pm Online Only	Luis Avila	3	12/18

Spring 2021: CHEM UN1507

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1507	001/11245	M 1:00pm - 6:00pm Online Only	Luis Avila	3	14/18
CHEM 1507	002/11246	F 1:00pm - 6:00pm Online Only	Luis Avila	3	19/18

CHEM UN1604 2ND TERM GEN CHEM (INTENSIVE). 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Acceptable performance on the Department placement exam during orientation week AND either a grade of "B" or better in CHEM UN1403 or AP chemistry or the equivalent.

Corequisites: MATH UN1102

Prerequisites: Acceptable performance on the Department placement exam during orientation week AND either a grade of "B" or better in CHEM UN1403 or AP chemistry or the equivalent. Please contact Vesna Gasperov (vg2231@columbia.edu) or your academic advisor at CSA for further information. Corequisites: MATH UN1102
Topics include chemical kinetics, thermodynamics and chemical bonding. Students must register simultaneously for a corresponding recitation section. Please check Courseworks or contact the instructor or departmental adviser for additional details. When registering, be sure to add your name to the wait list for the recitation corresponding to the lecture section (CHEM UN1606). Information about registration for the required recitation will be sent out before classes begin. Please expect to also be available for review sessions on Fridays from 8:10am-9:55am

Fall 2020: CHEM UN1604

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1604	001/12207	T Th 11:40am - 12:55pm Online Only	Ann McDermott	4.00	99/120

CHEM UN2443 Organic Chemistry I (Lecture). 4 points.

Prerequisites: (CHEM UN1403 and CHEM UN1404) or CHEM UN1604

The principles of organic chemistry. The structure and reactivity of organic molecules are examined from the standpoint of modern theories of chemistry. Topics include stereochemistry, reactions of organic molecules, mechanisms of organic reactions, syntheses and degradations of organic molecules, and spectroscopic techniques of structure determination. Although CHEM UN2443 and CHEM UN2444 are separate courses, students are expected to take both terms sequentially. Students must ensure they register for the recitation which corresponds to the lecture section. Please check the Directory of Classes for details.

Fall 2020: CHEM UN2443

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2443	001/11032	M W 11:40am - 12:55pm Online Only	Karen Phillips	4	183/190
CHEM 2443	003/11033	M W 6:10pm - 7:25pm Online Only	Charles Doubleday	4	158/190

Spring 2021: CHEM UN2443

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2443	001/11243	T Th 1:10pm - 2:25pm Online Only	Luis Campos	4	31/70

CHEM UN2493 Organic Chemistry Laboratory I (Techniques). 0 points.

Lab Fee: \$63.00

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) and (CHEM UN1500 or CHEM UN1507)
Corequisites: CHEM UN2443

Techniques of experimental organic chemistry, with emphasis on understanding fundamental principles underlying the experiments in methodology of solving laboratory problems involving organic molecules. Attendance at the first lab lecture and laboratory session is mandatory. Please note that CHEM UN2493 is the first part of a full year organic chemistry laboratory course. Students must register for the lab lecture section (CHEM UN2495) which corresponds to their lab section. Students must attend ONE lab lecture and ONE lab section every other week. Please contact your advisers for further information.

Fall 2020: CHEM UN2493

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2493	004/11879	W 1:10pm - 5:00pm Online Only	Anna Ghurbanyan	0	46/30
CHEM 2493	005/12533	Th 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0	39/30
CHEM 2493	006/12534	F 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0	49/30
CHEM 2493	010/11883	W 1:10pm - 5:00pm Online Only	Anna Ghurbanyan	0	45/40
CHEM 2493	011/12535	Th 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0	46/40
CHEM 2493	012/12536	F 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0	43/40

CHEM UN2495 Organic Chem. Laboratory I. 1.5 point.

Corequisites: CHEM UN2493

The course is the lab lecture which accompanies the Organic Chemistry Laboratory I (Techniques) course.

Fall 2020: CHEM UN2495

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2495	002/11886	M 4:10pm - 5:25pm Online Only	Anna Ghurbanyan	1.5	134/110

CHEM 2495	004/11888	M 4:10pm - 5:25pm Online Only	Anna Ghurbanyan	1.5	134/140
-----------	-----------	----------------------------------	-----------------	-----	---------

CHEM UN2545 Intensive Organic Chemistry Laboratory. 3 points.

Lab Fee: \$125.

Prerequisites: (CHEM UN2045 and CHEM UN2046) and CHEM UN1507

The lab is intended for students who have taken Intensive Organic Chemistry, CHEM UN2045 - CHEM UN2046 and who intend to major in Chemistry, Biochemistry, Chemical Physics, or Environmental Chemistry.

Fall 2020: CHEM UN2545

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2545	001/10932	M 1:00pm - 6:00pm Online Only	Fay Ng	3	7/10
CHEM 2545	002/10933	T 1:00pm - 6:00pm Online Only	Fay Ng	3	6/10

CHEM UN3079 Physical Chemistry I. 4 points.

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046) and (MATH UN1101 and MATH UN1102) or (MATH UN1207 and MATH UN1208) and (PHYS UN1401 and PHYS UN1402) PHYS UN1201 - PHYS UN1202 is acceptable; PHYS UN1401 - PHYS UN1402 or the equivalent is HIGHLY recommended.

Corequisites: CHEM UN3085

Elementary, but comprehensive, treatment of the fundamental laws governing the behavior of individual atoms and molecules and collections of them. CHEM UN3079 covers the thermodynamics of chemical systems at equilibrium and the chemical kinetics of nonequilibrium systems. Although CHEM UN3079 and CHEM UN3080 are separate courses, students are expected to take both terms sequentially. A recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course.

Fall 2020: CHEM UN3079

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3079	001/11073	M W 10:10am - 11:25am Online Only	Timothy Berkelbach	4	35/60

CHEM UN3085 Physical and Analytical Chemistry Laboratory I. 4 points.

Lab Fee: \$125 per term.

Corequisites: CHEM UN3079

A student-centered experimental course intended for students who are co-registered or have completed CHEM UN3079 and CHEM UN3080. The course emphasizes techniques of experimental physical chemistry and instrumental analysis, including vibrational, electronic, and laser spectroscopy; electroanalytical methods; calorimetry; reaction kinetics; hydrodynamic methods; scanning probe microscopy; applications of computers to reduce experimental data; and

computational chemistry. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details.

Fall 2020: CHEM UN3085

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3085	001/10928	T 12:00pm - 6:00pm Online Only	Luis Avila	4	10/15

CHEM UN3098 Supervised Independent Research. 4 points.

Lab Fee: \$105 per term.

Prerequisites: the instructor's permission for entrance, and the departmental representative's permission for aggregate points in excess of 12 or less than 4.

This course may be repeated for credit (see major and concentration requirements). Individual research under the supervision of a member of the staff. Research areas include organic, physical, inorganic, analytical, and biological chemistry. Please note that *CHEM UN3098* is offered in the fall and spring semesters.

Fall 2020: CHEM UN3098

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3098	001/10929		Vesna Gasperov	4	5/25

Spring 2021: CHEM UN3098

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3098	001/11239		Vesna Gasperov	4	7/25

BIOC UN3300 Biochemistry. 3 points.

Prerequisites: one year each of Introductory Biology and General Chemistry. Corequisites: Organic Chemistry. Primarily aimed at nontraditional students and undergraduates who have course conflicts with BIOC UN3501.

Biochemistry is the study of the chemical processes within organisms that give rise to the immense complexity of life. This complexity emerges from a highly regulated and coordinated flow of chemical energy from one biomolecule to another.

This course serves to familiarize students with the spectrum of biomolecules (carbohydrates, lipids, amino acids, nucleic acids, etc.) as well as the fundamental chemical processes (glycolysis, citric acid cycle, fatty acid metabolism, etc.) that allow life to happen. In particular, this course will employ active learning techniques and critical thinking problem-solving to engage students in answering the question: how is the complexity of life possible? NOTE: While Organic Chemistry is listed as a corequisite, it is highly recommended that you take Organic Chemistry beforehand.

Spring 2021: BIOC UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOC 3300	001/13412	T 7:00pm - 9:30pm Online Only	Danny Ho	3	45/100

CHEM UN3920 Senior Seminar in Chemical Research. 2 points.

Pass/Fail credit only.

Open to senior chemistry, biochemistry, environmental chemistry, and chemical physics majors; senior chemistry concentrators; and students who have taken or are currently enrolled in *CHEM UN3098*. Senior seminar provides direct access to modern chemical research through selected studies by the students from active fields of chemical research. Topics to be presented and discussed draw from the current scientific literature and/or *UN3098* research.

Fall 2020: CHEM UN3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3920	001/10931	F 2:10pm - 4:00pm Online Only	Karen Phillips	2	11/40

BIOC GU4501 Biochemistry: Structure and Metabolism. 4 points.

Undergraduates should register for *BIOC C3501*.

Prerequisites: one year of *BIOL C2005* and *BIOL C2006* and one year of organic chemistry.

Lecture and recitation. Students wishing to cover the full range of modern biochemistry should take both *BIOC C3501* and *C3512*. *C3501* covers subject matters in modern biochemistry, including chemical biology and structural biology, discussing the structure and function of both proteins and small molecules in biological systems. Proteins are the primary class of biological macromolecules and serve to carry out most cellular functions. Small organic molecules function in energy production and creating building blocks for the components of cells and can also be used to perturb the functions of proteins directly. The first half of the course covers protein structure, enzyme kinetics and enzyme mechanism. The second half of the course explores how small molecules are used endogenously by living systems in metabolic and catabolic pathways; this part of the course focuses on mechanistic organic chemistry involved in metabolic pathways.

CHEM GU4071 Inorganic Chemistry. 4.5 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046), or the equivalent.

Principles governing the structure and reactivity of inorganic compounds surveyed from experimental and theoretical viewpoints. Topics include inorganic solids, aqueous and nonaqueous solutions, the chemistry of selected main group elements, transition metal chemistry, metal clusters, metal carbonyls, and organometallic chemistry, bonding and resonance, symmetry and molecular orbitals, and spectroscopy.

Spring 2021: CHEM GU4071

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

CHEM 4071	001/11233	M W 11:40am - 12:55pm Online Only	Jonathan Owen	4.5	21/40
-----------	-----------	--------------------------------------	---------------	-----	-------

CHEM GU4147 Advanced Organic Chemistry. 4.5 points.

Prerequisites: elementary organic and physical chemistry. The mechanisms of organic reactions, structure of organic molecules, and theories of reactivity. How reactive intermediates are recognized and mechanisms are deduced using kinetics, stereochemistry, isotopes, and physical measurements.

Fall 2020: CHEM GU4147

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4147	001/11027	M W 8:40am - 9:55am 417 Mathematics Building	Jack Norton	4.5	12/42

CHEM GU4148 Synthetic Methods in Organic Chemistry I. 4.5 points.

Prerequisites: Organic chemistry. This course is intended for graduate students and advanced undergraduate students. The main purpose of the course is to introduce students to modern synthetic chemistry via the selected series of topics (synthetic planning and the logic of organic assembly, classical and new reactions/methods and their use in complex target synthesis). Mechanistic underpinning of the discussed reaction processes will also be briefly discussed. For each module (see the content below), specific examples of syntheses of natural products and/or synthetic materials will be provided. In addition to lectures, students will select and present relevant papers in the class (the number of student symposia will depend on the final enrollment in this course). The basic knowledge of transition metal chemistry is recommended for the cross-coupling reactions (i.e., structure, electron counting, and elemental reaction types of transition metals).

Fall 2020: CHEM GU4148

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4148	001/11028	T Th 10:10am - 11:25am 417 Mathematics Building	Dalibor Sames, Tomislav Rovis	4.5	13/42

CHEM GU4221 Quantum Chemistry. 4.5 points.

Prerequisites: elementary physical chemistry. Basic quantum mechanics: the Schrodinger equation and its interpretation, exact solutions in simple cases, methods or approximation, angular Momentum and electronic spin, and an introduction to atomic and molecular structure.

Fall 2020: CHEM GU4221

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4221	001/11029	M W 11:40am - 12:55pm Online Only	Milan Delor	4.5	14/42

CHEM GU4230 Statistical Mechanics. 4.5 points.

Prerequisites: elementary physical chemistry.

Corequisites: *CHEM G4221*.

Topics include the classical and quantum statistical mechanics of gases, liquids, and solids.

Fall 2020: CHEM GU4230

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4230	001/11030	T Th 11:40am - 12:55pm Online Only	Bruce Berne	4.5	11/42

CHEM GU4312 Chemical Biology. 4 points.

Prerequisites: (CHEM UN2443 and CHEM UN2444) and (CHEM UN3079 and CHEM UN3080) and (BIOC UN3501), or the equivalent.

Development and application of chemical methods for understanding the molecular mechanisms of cellular processes. Review of the biosynthesis, chemical synthesis, and structure and function of proteins and nucleic acids. Application of chemical methods--including structural biology, enzymology, chemical genetics, and the synthesis of modified biological molecules--to the study of cellular processes--including transcription, translation, and signal transduction.

Fall 2020: CHEM GU4312

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4312	001/11840	M W 1:10pm - 2:25pm 401 Chandler	Virginia Cornish	4	11/42

BIOC GU4323 Biophysical Chemistry I. 4 points.

This course provides a rigorous introduction to the theory underlying widely used biophysical methods, which will be illustrated by practical applications to contemporary biomedical research problems. The course has two equally important goals. The first goal is to explicate the fundamental approaches used by physical chemists to understand the behavior of molecules and to develop related analytical tools. The second goal is to prepare students to apply these methods themselves to their own research projects. The course will be divided into seven modules: (i) solution thermodynamics; (ii) hydrodynamic methods; (iii) statistical analysis of experimental data; (iv) basic quantum mechanics; (v) optical spectroscopy with an emphasis on fluorescence; (vi) nuclear magnetic resonance spectroscopy; and (vii) light-scattering and diffraction methods.

The first three modules will be covered during the fall term. In each module, the underlying physical theories and models will be presented and used to derive the mathematical equations applied to the analysis of experimental data. Weekly recitations will emphasize the analysis of real experimental data and understanding the applications of biophysical experimentation in published research papers.

SPRING 2021

Please note that some lab fees have increased. You may consult the [Directory of Classes](#) for the most up to date fees.

CHEM UN1403 GENERAL CHEMISTRY I-LECTURES. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Corequisites: MATH UN1101

Corequisites: MATH UN1101 Preparation equivalent to one year of high school chemistry is assumed. Students lacking such preparation should plan independent study of chemistry over the summer or take CHEM UN0001 before taking CHEM UN1403. Topics include stoichiometry, states of matter, nuclear properties, electronic structures of atoms, periodic properties, chemical bonding, molecular geometry, introduction to quantum mechanics and atomic theory, introduction to organic and biological chemistry, solid state and materials science, polymer science and macromolecular structures and coordination chemistry. Although CHEM UN1403 and CHEM UN1404 are separate courses, students are expected to take both terms sequentially. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure they register for the recitation that corresponds to the lecture section. When registering, please add your name to the wait list for the recitation corresponding to the lecture section (1405 for lecture sec 001; 1407 for lecture sec 002; 1409 for lecture sec 003; 1411 for lecture sec 004). Information about recitation registration will be sent out before classes begin. DO NOT EMAIL THE INSTRUCTOR. Please check the Directory of Classes for details

Fall 2020: CHEM UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

CHEM UN1404 General Chemistry II (Lecture). 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: CHEM UN1403

Although CHEM UN1403 and CHEM UN 1404 are separate courses, students are expected to take both terms sequentially. Topics include gases, kinetic theory of gases, states of matter: liquids and solids, chemical equilibria, applications of equilibria, acids and bases, chemical thermodynamics, energy, enthalpy, entropy, free energy, periodic properties, chemical

kinetics, and electrochemistry. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure they register for the recitation that corresponds to the lecture section. Please check the Directory of Classes for details.

CHEM UN1500 General Chemistry Laboratory. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Lab Fee: \$140.

Corequisites: CHEM UN1403, CHEM UN1404

An introduction to basic lab techniques of modern experimental chemistry, including quantitative procedures and chemical analysis. Students must register for a Lab Lecture section for this course (*CHEM UN1501*). Please check the Directory of Classes for details. Please note that *CHEM UN1500* is offered in the fall and spring semesters. Mandatory lab check-in will be held during the first week of classes in both the fall and spring semesters.

CHEM UN1507 Intensive General Chemistry Laboratory. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Lab Fee: \$140.

Prerequisites: CHEM UN1604 or CHEM UN2045

Corequisites: CHEM UN2045

A student-centered experimental course intended for students who are taking or have completed CHEM UN1604 (Second Semester General Chemistry Intensive Lecture offered in Fall), CHEM UN2045 (Intensive Organic Chemistry offered in Fall), or CHEM UN2046 (Intensive Organic Chemistry Lecture offered in Spring). The course will provide an introduction to theory and practice of modern experimental chemistry in a contextual, student-centered collaborative learning environment. This course differs from CHEM UN1500 in its pedagogy and its emphasis on instrumentation and methods. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details. Please note that CHEM UN1507 is offered in the fall and spring semesters.

Fall 2020: CHEM UN1507

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1507	001/10926	M 1:00pm - 6:00pm Online Only	Luis Avila	3	8/18
CHEM 1507	002/10927	F 1:00pm - 6:00pm Online Only	Luis Avila	3	12/18

Spring 2021: CHEM UN1507

CHEM UN2408 First-Year Seminar in Chemical Research. 1 point.

Prerequisites: CHEM UN1403 or CHEM UN1604 or CHEM UN2045 or the instructor's permission.

A one-hour weekly lecture, discussion, and critical analysis of topics that reflect problems in modern chemistry, with emphasis on current areas of active chemical research.

Spring 2021: CHEM UN2408

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2408	001/11250	F 12:00pm - 12:50pm Online Only	Vesna Gasperov	1	35/80

CHEM UN2045 INTENSIVE ORGANIC CHEMISTRY. 4.00 points.

Prerequisites: A grade of 5 on the Chemistry Advanced Placement exam and an acceptable grade on the Department placement exam or an acceptable grade in CHEM UN1604.
Corequisites: CHEM UN1507

Prerequisites: A grade of 5 on the Chemistry Advanced Placement exam and an acceptable grade on the Department placement exam. Corequisites: CHEM UN1507 Premedical students may take CHEM UN2045, CHEM UN2046, CHEM UN1507 and CHEM UN2545 to meet the minimum requirements for admission to medical school. This course covers the same material as CHEM UN2443-CHEM UN2444, but is intended for students who have learned the principles of general chemistry in high school OR have completed CHEM UN1604 in their first year at Columbia. First year students enrolled in CHEM UN2045-CHEM UN2046 are expected to enroll concurrently in CHEM UN1507. Although CHEM UN2045 and CHEM UN2046 are separate courses, students are expected to take both terms sequentially. A recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course

Spring 2021: CHEM UN2045

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2045	001/11244	T Th 11:40am - 12:55pm 402 Chandler	James Leighton	4.00	38/45

CHEM UN2443 Organic Chemistry I (Lecture). 4 points.

Prerequisites: (CHEM UN1403 and CHEM UN1404) or CHEM UN1604

The principles of organic chemistry. The structure and reactivity of organic molecules are examined from the standpoint of modern theories of chemistry. Topics include stereochemistry, reactions of organic molecules, mechanisms of organic reactions, syntheses and degradations of organic molecules, and spectroscopic techniques of structure determination. Although CHEM UN2443 and CHEM UN2444 are separate courses, students are expected to take both terms sequentially. Students must ensure they register for the recitation which corresponds to the lecture section. Please check the Directory of Classes for details.

Fall 2020: CHEM UN2443

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2443	001/11032	M W 11:40am - 12:55pm Online Only	Karen Phillips	4	183/190
CHEM 2443	003/11033	M W 6:10pm - 7:25pm Online Only	Charles Doubleday	4	158/190

Spring 2021: CHEM UN2443

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2443	001/11243	T Th 1:10pm - 2:25pm Online Only	Luis Campos	4	31/70

CHEM UN2444 ORGANIC CHEMISTRY II-LECTURES.**4.00 points.**

Prerequisites: CHEM UN1404 or CHEM UN1604 and CHEM UN1500 and CHEM UN2443

Prerequisites: CHEM UN1404 or CHEM UN1604, CHEM UN1500 and CHEM UN2443. The principles of organic chemistry. The structure and reactivity of organic molecules are examined from the standpoint of modern theories of chemistry. Topics include stereochemistry, reactions of organic molecules, mechanisms of organic reactions, syntheses and degradations of organic molecules, and spectroscopic techniques of structure determination. Although CHEM UN2443 and CHEM UN2444 are separate courses, students are expected to take both terms sequentially. Students must ensure they register for the recitation which corresponds to the lecture section. Please check the Directory of Classes for details

Spring 2021: CHEM UN2444

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2444	001/11261	M W 11:40am - 12:55pm Online Only	Karen Phillips	4.00	147/180
CHEM 2444	002/11260	M W 6:10pm - 7:25pm Online Only	Charles Doubleday	4.00	147/180

CHEM UN2494 ORGANIC CHEM. LAB II SYNTHESIS.**0.00 points.**

Lab Fee: \$62.00

Prerequisites: (CHEM UN1403 and CHEM UN1404) and CHEM UN1500 and CHEM UN2493

Corequisites: CHEM UN2444

Prerequisites: CHEM W1403-CHEM W1404; CHEM W1500; CHEM W2493. Corequisites: CHEM W2444. Please note that you must complete CHEM W2493 before you register for CHEM W2494. This lab introduces students to experimental design and trains students in the execution and evaluation of scientific data. The technique experiments in the first half of the course (CHEM W2493) teach students to develop and master the required experimental skills to perform the challenging synthesis experiments in the second semester. The learning outcomes for this lab are the knowledge and experimental skills associated with the most important synthetic routes widely used in industrial and research environments. Attendance at the first

lab lecture and laboratory session is mandatory. Please note that CHEM W2494 is the second part of a full year organic chemistry laboratory course. Students must register for the lab lecture section (CHEM W2496) which corresponds to their lab section. Students must attend ONE lab lecture and ONE lab section every other week. Please contact your advisors for further information.

Spring 2021: CHEM UN2494

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2494	004/11335	W 1:10pm - 5:00pm Online Only	Anna Ghurbanyan	0.00	43/45
CHEM 2494	005/11336	Th 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0.00	45/45
CHEM 2494	006/11337	F 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0.00	46/45
CHEM 2494	010/11338	W 1:10pm - 5:00pm Online Only	Anna Ghurbanyan	0.00	34/45
CHEM 2494	011/11339	Th 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0.00	41/45
CHEM 2494	012/11340	F 12:00pm - 3:50pm Online Only	Anna Ghurbanyan	0.00	43/45

CHEM UN2496 Organic Chem. Laboratory II . 1.5 point.

Corequisites: CHEM UN2494

The course is the lab lecture which accompanies the Organic Chemistry Laboratory II (Synthesis) course.

Spring 2021: CHEM UN2496

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2496	002/11341	M 4:10pm - 5:25pm Online Only	Anna Ghurbanyan	1.5	134/140
CHEM 2496	004/11342	M 4:10pm - 5:25pm Online Only	Anna Ghurbanyan	1.5	118/140

CHEM UN3080 Physical Chemistry II. 4 points.

Prerequisites: CHEM UN3079

Corequisites: CHEM UN3086

CHEM UN3080 covers the quantum mechanics of atoms and molecules, the quantum statistical mechanics of chemical systems, and the connection of statistical mechanics to thermodynamics. Although CHEM UN3079 and CHEM UN3080 are separate courses, students are expected to take both terms sequentially. A recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course

Spring 2021: CHEM UN3080

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3080	001/11237	M W 10:10am - 11:25am Online Only	Xiaoyang Zhu	4	28/60

CHEM UN3086 Physical and Analytical Chemistry Laboratory II. 4 points.

Lab Fee: \$125 per term.

Prerequisites: CHEM UN3085 , CHEM UN3080 is acceptable corequisite for CHEM UN3086.

A student-centered experimental course intended for students who are co-registered or have complete CHEM UN3079 and CHEM UN3080. The course emphasizes techniques of experimental physical chemistry and instrumental analysis, including vibrational, electronic, and laser spectroscopy; electroanalytical methods; calorimetry; reaction kinetics; hydrodynamic methods; scanning probe microscopy; applications of computers to reduce experimental data; and computational chemistry. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details.

Spring 2021: CHEM UN3086

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3086	001/11238	T 12:00pm - 6:00pm Online Only	Luis Avila	4	10/15

CHEM UN3098 Supervised Independent Research. 4 points.

Lab Fee: \$105 per term.

Prerequisites: the instructor's permission for entrance, and the departmental representative's permission for aggregate points in excess of 12 or less than 4.

This course may be repeated for credit (see major and concentration requirements). Individual research under the supervision of a member of the staff. Research areas include organic, physical, inorganic, analytical, and biological chemistry. Please note that *CHEM UN3098* is offered in the fall and spring semesters.

Fall 2020: CHEM UN3098

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

CHEM UN3546 Advanced Organic Chemistry Laboratory. 3 points.

Laboratory Fee: \$125.

Prerequisites: CHEM UN2493 and CHEM UN2494 , or the equivalent.

A project laboratory with emphasis on complex synthesis and advanced techniques including qualitative organic analysis and instrumentation.

Spring 2021: CHEM UN3546

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3546	001/10972	M 1:00pm - 6:00pm 202b Havemeyer Hall	Fay Ng	3	4/10
CHEM 3546	002/10993	T 1:00pm - 6:00pm	Fay Ng	3	4/10

202b Havemeyer Hall

CHEM GU4102 Chemistry for the Brain. 4.5 points.

This course was upgraded from 2.5 to 4.5 and assigned a new number.

Prerequisites: Organic chemistry and biology courses, neuroscience or neurobiology recommended, but not required. The study of the brain is one of the most exciting frontiers in science and medicine today. Although neuroscience is by nature a multi-disciplinary effort, chemistry has played many critical roles in the development of modern neuroscience, neuropharmacology, and brain imaging. Chemistry, and the chemical probes it generates, such as molecular modulators, therapeutics, imaging agents, sensors, or actuators, will continue to impact neuroscience on both preclinical and clinical levels. In this course, two major themes will be discussed. In the first one, titled "Imaging brain function with chemical tools," we will discuss molecular designs and functional parameters of widely used fluorescent sensors in neuroscience (calcium, voltage, and neurotransmitter sensors), their impact on neuroscience, pros and cons of genetically encoded sensors versus chemical probes, and translatability of these approaches to the human brain. In the second major theme, titled "Perturbation of the brain function with chemical tools," we will examine psychoactive substances, the basics of medicinal chemistry, brain receptor activation mechanisms and coupled signaling pathways, and their effects on circuit and brain function. We will also discuss recent approaches, failures and successes in the treatment of neurodegenerative and psychiatric disorders. Recent advances in precise brain function perturbation by light (optogenetics and photopharmacology) will also be introduced. In the context of both themes we will discuss the current and future possibilities for the design of novel materials, drawing on the wide molecular structural space (small molecules, proteins, polymers, nanomaterials), aimed at monitoring, modulating, and repairing human brain function. This course is intended for students (undergraduate and graduate) from the science, engineering and medical departments.

BIOC GU4512 Molecular Biology. 3 points.

Prerequisites: one year of biology. Recommended but not required: BIOC UN3501

This is a lecture course designed for advanced undergraduates and graduate students. The focus is on understanding at the molecular level how genetic information is stored within the cell and how it is regulated. Topics covered include genome organization, DNA replication, transcription, RNA processing, and translation. This course will also emphasize the critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2021: BIOC GU4512

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOC 4512	001/13339	M W 2:40pm - 3:55pm Online Only	James Manley, Alice Heicklen	3	30/50

CHEM GU4071 Inorganic Chemistry. 4.5 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046) , or the equivalent.

Principles governing the structure and reactivity of inorganic compounds surveyed from experimental and theoretical viewpoints. Topics include inorganic solids, aqueous and nonaqueous solutions, the chemistry of selected main group elements, transition metal chemistry, metal clusters, metal carbonyls, and organometallic chemistry, bonding and resonance, symmetry and molecular orbitals, and spectroscopy.

Spring 2021: CHEM GU4071

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4071	001/11233	M W 11:40am - 12:55pm Online Only	Jonathan Owen	4.5	21/40

COURSES OFFERED IN ALTERNATE YEARS

Please contact the Undergraduate Program Manager, Vesna Gasperov (vg2231@columbia.edu), for further information.

CHEM GU4103 Organometallic Chemistry. 4.5 points.

Prerequisites: (CHEM UN2443 and CHEM UN2444) , or the equivalent. Some background in inorganic and physical chemistry is helpful but not required.

Main group and transition metal organometallic chemistry: bonding, structure, reactions, kinetics, and mechanisms.

CHEM GU4104 Structural Methods in Inorganic Chemistry. 2 points.

The determination of structures by diffraction methods, focusing on single crystal X-ray diffraction, is described. Emphasis is placed on a critical evaluation of published data.

Spring 2021: CHEM GU4104

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4104	001/11234	M W 8:40am - 9:55am 209 Havemeyer Hall	Gerard Parkin	2	9/42

CHEM GU4111 Applications of NMR Spectroscopy To Inorganic Chemistry. 2 points.

The use of multinuclear NMR spectroscopy in the determination of the structures of inorganic molecules and the use of dynamic NMR spectroscopy (variable temperature NMR and magnetization transfer techniques) to provide information concerned with reaction mechanisms.

CHEM GU4154 Chemical Characterization for Synthetic Chemists. 3 points.

Prerequisites: Columbia University's laboratory safety certification is required. One year each of (i) general chemistry lecture/lab; (ii) organic or inorganic chemistry lecture/lab; and (iii) research experience in a chemistry lab are recommended. This course will teach synthetic chemists to use mass spectrometry, analytical chromatography, and single-crystal X-ray diffraction as tools for research in synthetic chemistry. The teaching approach will be practical with an emphasis on hands-on experience. Students will gain: (1) A user-level understanding of the theory of these analytical methods. (2) Hands-on proficiency with a variety of instruments available at Columbia. (3) An introduction to advanced instrument capabilities and an awareness of their applications. (4) Proficiency in processing and interpreting data.

CHEM GU4210 Writing Workshop for Chemists. 1 point.

Prerequisites: recommended for undergraduate students to have taken at least one semester of independent research. This course offers undergraduate and graduate students an introduction to scientific writing and provides an opportunity for them to become more familiar with the skill and craft of communicating complex scientific research. This course will provide students with the basic grammatical, stylistic and practical skills required to write effective academic journal articles, theses, or research proposals. In addition, through an innovative partnership with Columbia University Libraries' Digital Science Center, students will learn how to apply these basic skills to their writing through the use of state-of-the-

art software and on-line resources. Regular opportunities to write, peer edit and revise throughout the semester will allow students to put what they are learning into immediate practice. It is recommended that undergraduates have taken at least one semester of research for credit before taking this course. Undergraduates should plan to take this course after taking the required Core course University Writing.

CHEM GR6168 Materials Chemistry IIA. 2.5 points.

Prerequisites: CHEM UN2443 , or the equivalent.

This is an introductory course to the emerging field of macromolecular materials chemistry. The general topics will be based on the chemistry, self-assembly, and performance of block copolymers and conjugated polymers. Particular emphasis will be devoted to the demands required to drive materials from scientific curiosity to commercialization.

At the fundamental level, the course will cover topics on polymerization techniques, electronic structure of organic semiconductors, characterization strategies, nanostructures and self-assembly.

CHEM GR6169 Materials Chemistry IIB. 2.5 points.

Prerequisites: CHEM UN2443 , or the equivalent.

This is an introductory course to the field of inorganic nanomaterials chemistry. The course will cover the synthesis, the structural, electronic and magnetic characterization, and the physical properties of zero-, one- and two-dimensional inorganic nanomaterials. Particular emphasis will be devoted to the design of building blocks that can organize into functional assemblies and to the emergence of collective physical properties. The course will also explore the recent and developing electronic and optoelectronic applications of these materials.

CHEM GR6222 Quantum Chemistry II. 2.5 points.

Prerequisites: CHEM GU4221

Atomic and molecular quantum mechanics: fundamentals of electronic structure, many-body wave functions and operators, Hartree-Fock and density functional theory, the Dirac equation.

CHEM GR6231 Intermediate Statistical Mechanics. 2.5 points.

Prerequisites: CHEM GU4221 and CHEM GU4230

Phase transitions and critical phenomena; renormalization group methods; classical theory of fluids.

CHEM GR8106 Kinetics. 2.5 points.

Not offered during 2020-21 academic year.

Kinetics and mechanisms of inorganic reactions.

Spring 2021: CHEM GR8106

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 8106	001/11458	M W 10:10am - 11:25am 401 Chandler	Jack Norton	2.5	4/42

CHEM GR8120 Polymers in Nanotechnology. 2.5 points.

Polymeric materials have long been ubiquitous items and played important roles in revolutionizing the way we live. Due to the advent of modern polymerization fabrication strategies, polymers are rapidly gaining interest for the development of next generation devices and medical treatment. This course will focus on the chemistry polymers and their use as nanostructured materials created by self-assembly and top-down fabrication techniques. Specifically, the class will be divided into two sections describing the uses of organic nanostructures on a) surfaces and b) as particles. Patterned surfaces will be described in terms of photo-, imprint-, and block copolymer lithography. The preparation of nanoparticles through polymer synthesis, dendrimers, and mechanical manipulation will be the second part.

CHEM GR8223 Quantum Chemistry, III. 2.5 points.

Not offered during 2020-21 academic year.

Prerequisites: CHEM G6222.

Nonlinear spectroscopy: second harmonic and vibrational sum frequency generation; applications to surface and colloidal nano-microparticle interfaces; nonradiative molecular processes.

CHEM GR8232 Advanced Statistical Mechanics. 2.5 points.

Prerequisites: CHEM GU4221 and CHEM GU4230 , or their equivalents.

Stochastic processes; Brownian motion; Langevin equations and fluctuation-dissipation theorems; reaction rate theory; time correlation functions and linear response theory.

CHEM GR8349 Research Ethics & Philosophy. 2.5 points.

This lecture course aims to address philosophical and ethical questions in scientific research. What are the most important traits of successful scientists whose discoveries have greatly benefited humanity (and led to Nobel Prizes)? What distinguishes great science from mediocre or pathological "science"? What are the ethical standards of scientific research? How do we identify scientific misconduct or fraud?

Why are ethical standards so critical to the integrity of the research enterprise? The course requires extensive participation of students in the form of discussions and debates. Grades will be based on participation, writing assignments, and one oral presentation.

CLASSICS

Departmental Office: 617 Hamilton; 212-854-3902;

classics@columbia.edu

<http://www.columbia.edu/cu/classics/>

Director of Undergraduate Studies (Classics): Prof. Gareth Williams; 212-854-7856; gdw5@columbia.edu

Director of Undergraduate Studies (Modern Greek Studies): Prof. Nikolas Kakkoufa; 212-854-3902; nk2776@columbia.edu

Director of Academic Administration and Finance: Juliana Driever; 212-854-2726; jd2185@columbia.edu

When one visits Rome or Athens, they also visit the many layers of physical, historical, and cultural development that have contributed to the complex evolution of those cities. When one tours the Roman Forum or the Greek Parthenon, they set foot on monuments whose physical impressiveness symbolizes political strength and historical importance; in a very physical way they experience the past. When one studies Latin and Greek language and culture, they embark on a tour of an alternative kind, making their way through texts and other cultural forms—such as paintings, sculptures, and philosophical ideas—that bring them directly into contact with the Greco-Roman past. Literature, philosophy, history, art and architecture, linguistics, papyrology, religion: all (and more) are branches of investigation to which the modern student of classics/classical studies has access through the surviving literary and material evidence.

But when one studies in the original language Virgil's *Aeneid*, say, or Plato's philosophical writings, they find that ancient Greek or Latin literature deals with issues and ideas that are, for us, of central contemporary importance: e.g., How can I be happy? What is the best political constitution for our (or any) state? What responsibilities do I have to the society in which I live? What national significance is served or owed by literature?

The study of Greek and Latin language and culture concentrates in one main area (ancient Greece and Rome) and on many of the questions that are of direct pertinence to the ways in which modern lives are shaped and lived; at the same time, Greco-Roman literature and philosophy, so fundamental to the later development of the Western tradition, boast works of great intrinsic worth and interest. While all Columbia students get an introduction to classical texts in *Literature Humanities* and *Contemporary Civilization*, classics/classical studies provides a more advanced study of ancient cultural issues and habits of mind already sampled in the Core.

Study abroad in Greece or Italy offers a variety of educational experiences that are continuous with those of the major, enriching both linguistic expertise and cultural awareness. Students in classics have the opportunity to take part in archaeological digs abroad and, on occasion, to assist faculty in research projects that require, for example, bibliographical collection or the checking of research data.

Many majors pursue graduate study in classics and classical studies. Upon earning their graduate degrees, they often embark on teaching careers in universities, colleges, and high schools. Many graduating majors also enter a number of other professional fields, among them law, banking, accountancy, publishing, and museum-work. Employers tend to find that

students in classics are articulate on paper, as well as orally; are organized of mind; and have good skills in general reasoning, an ability developed by the study of Greek and Latin language. In effect, the study of classics opens up a wide array of options, both in education and in the wider world.

The program of the department aims for a comprehensive understanding of classical literature and culture, and the mastery of Greek and Latin on which such understanding depends. Careful study of the language occupies the largest part of the first-year courses and is not omitted in the more advanced courses. Although literature becomes the chief subject only in the advanced courses, important authors like Homer, Plato, and Virgil are studied as literary texts already in the intermediate courses. A wide variety of courses are offered in translation.

Through a joint program with Barnard, the department offers a broad range of subjects. The department annually offers four advanced courses in each language (at the 3000- or 4000-level), the content of which changes each year in order to provide a curricular range and to balance authors and genres over a two-year period.

Opportunities for individual projects of reading and research are available. Students are also permitted to take graduate courses if they are sufficiently prepared. Additionally, they can supplement their studies within the department through work in other departments, such as art history and archaeology, history, philosophy, and the other departments of languages and literature.

It is not necessary to have previously studied either language in order to major in it. A student starting Greek or Latin at Columbia can meet all the requirements of a major within an ordinary undergraduate program.

IN FULFILLMENT OF THE LANGUAGE REQUIREMENT

Students beginning the study of Greek or Latin at Columbia must take four terms of either of the following two-year sequences:

Greek

GREK UN1101 - GREK UN1102	Elementary Greek I and Elementary Greek II
GREK UN2101 - GREK UN2102	Intermediate Greek I Attic Prose and Intermediate Greek II: Homer

Latin

LATN UN1101 - LATN UN1102	Elementary Latin I and Elementary Latin II
LATN UN2101 - LATN UN2102	Intermediate Latin I and INTERMEDIATE LATIN II

With the permission of the director of undergraduate studies, GREK UN2102 Intermediate Greek II: Homer may be taken before GREK UN2101 Intermediate Greek I Attic Prose.

The intensive elementary courses GREK UN1121 Intensive Elementary Greek and LATN UN1121 Intensive Elementary Latin may be substituted for the two-term *UN1101-UN1102* sequence. The intensive intermediate courses GREK S2121Q Intensive Intermediate Greek: Poetry and Prose and LATN S2121Q Intensive Intermediate Latin: Poetry and Prose may be substituted for the two-term *UN2101-UN2102* sequence.

LATN UN2101 Intermediate Latin I should be taken before LATN UN2102 INTERMEDIATE LATIN II.

For students with secondary-school training in Greek or Latin, the director of undergraduate studies determines, on the basis of records and test scores, what further work is needed to fulfill the language requirement.

ADVANCED PLACEMENT

The department grants 3 credits for a score of 5 on the Latin AP exam, which also satisfies the foreign language requirement, upon successful completion (with a grade of B or higher) of a Latin class at the 3000-level or higher.

MAJOR PROGRAM

The department offers a major in classics and a major track in classical studies. The major in classics involves the intensive study of both Greek and Latin, as well as their cultural matrix; the track in classical studies offers a more interdisciplinary approach. The major in classics is recommended for students planning to continue the study of classics in graduate school. The department also participates in the interdepartmental ancient studies program and offers a concentration in classics; these are all described below.

The major in classics and the track in classical studies are designed in part to build on the experience of the ancient world that undergraduates have acquired at Columbia in the Core Curriculum (especially in *Literature Humanities*). The major in classics is structured on the principle of gradual and closely monitored linguistic progress from the elementary (1100-level) to the advanced (3000- and 4000-levels) and ultimately to the literature survey courses (*GU4105-GU4106*) in Greek and/or Latin.

Those majors intending to embark on graduate study in classics are especially encouraged to undertake, in their senior year, an independent research project (*UN3998*). This option is designed to allow students to personalize their experience in the major by conducting advanced study in a specialized area under the guidance of the specializing faculty member of their choice.

UN3998 is required in the classical studies track. Otherwise, students in classical studies are not required to take advanced courses beyond *UN3996 The Major Seminar*, but are expected

to follow a coherent plan of study by taking a sequence of cognate courses in different but related departments (e.g., art history and archaeology, history, etc.).

The director of undergraduate studies is responsible for overseeing the path of study followed by each student in classics or classical studies. Through close interaction with the director of undergraduate studies, as well as with other faculty members where appropriate, each major is strongly encouraged to debate the strengths and weaknesses of his or her own trajectory of study even as the requirements for the major are being completed.

Students should contact the director of undergraduate studies with any questions about the classics majors and course offerings. The director of undergraduate studies can provide students with a worksheet to help in planning their progress toward major requirements.

MAJOR IN CLASSICS

The major in classics involves a program in both Greek and Latin languages and literatures, and in Greek and Roman civilization. Students generally emphasize the study of one of

the languages (the primary language), but significant study of the other (secondary) language is required as well.

The major requires the completion of 11 courses (a minimum of 34 points) and must include the following:

1. In a primary language:
 - Four courses at or above the UN2100-level;
 - *The Major Seminar UN3996*;
 - Two courses from the following four advanced options: GU4105, GU4106, GU4139, UN3998 (any others may count toward the four upper level requirement).
2. In a secondary language:
 - Two courses at or above the UN2100-level.
3. Two ancient culture courses, including:
 - One course in the culture of the primary language;
 - One course in any aspect of ancient history or culture (*HIST, AHIS, PHIL, CLLT, CLCV*). All substitutions must be approved by the director of undergraduate studies.

The classical languages follow a standard track of elementary (1100-level) and intermediate (2100-level) levels, followed by 3000- and 4000-level classes that may generally be taken in any order.

Although it is easier to complete the major if at least one classical language is begun no later than the first year, it is possible to begin one classical language in the sophomore year and the other in the junior year and still complete the major.

Those planning to go on to graduate study in classics are urged to take both terms of GU4105-GU4106 if possible, to write a senior research thesis, and to acquire a reading knowledge of German and preferably also of French (Italian is also useful).

To be eligible for departmental honors and prizes, students must take UN3998.

MAJOR TRACK IN CLASSICAL STUDIES

The major track in classical studies requires the completion of 11 courses (a minimum of 35 points) and must include the following:

1. Five courses, at or above the UN1102-level, in either or both Latin and Greek;
2. *The Major Seminar UN3996*;
3. Four classes in Ancient History, Art, Philosophy, Religion, and Civilization. Note that certain courses may be 6 credits, e.g., ICCS's *City of Rome* course, and may count as two courses towards this requirement. Students in doubt about a course's relevance should confirm it with the director of undergraduate studies as soon as possible;

4. *Senior Thesis UN3998*, completed on a chosen aspect of Greek or Roman civilization under the direction of a faculty member (3 points).

Summer courses 1221/1221 are counted as four credits for the purposes of major requirements.

MAJOR IN ANCIENT STUDIES

Students interested in a major in ancient studies should see the *Ancient Studies* section in this Bulletin.

CONCENTRATION IN CLASSICS

Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The concentration in classics is designed for those who cannot fit the complete major into their undergraduate schedule, but still wish to take a substantial program in Greek and Latin.

The concentration requires the completion of seven courses (a minimum of 21 points) and must include the following:

1. In a primary language, six courses distributed as follows:
 - Five courses above the 1100-level, three of which must be 3000- or 4000-level;
 - One course from the following three advanced options: GU4105, GU4106, GU4139.
2. One course in Ancient History or Classical Civilization (3 points).

SPECIAL CONCENTRATION IN HELLENIC STUDIES

The courses in the Hellenic Studies program are designed to develop the student's proficiency in aspects of Modern Greek culture, language, and history. The minimum credit requirement for the Hellenic Studies Concentration is 21 credits and includes:

1. Modern Greek language and culture courses (Elementary, Intermediate, Advanced, Conversation I & II, Reading in Greek; minimum 8 credits). Students will work with undergraduate advisor to determine their level of the language,
2. Modern Greek Studies interdepartmental courses (CLGM, CSGM, HSGM; minimum 12 credits). The program of study should be planned as early as possible with the Director of Undergraduate Studies. Students meet with the Director of Undergraduate Studies each semester in order to obtain program approval. Opportunities exist for study abroad in Greece, Cyprus and Turkey for the summer or an academic term for credit. Students work closely with the concentration

advisor on the selection of the foreign schools and the transfer of credit.

Students may also wish to write a Senior Thesis which will substitute one Modern Greek Studies interdepartmental seminar. While not required for graduation, the thesis enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the student's junior year. Interested students should identify a potential faculty advisor.

LATIN

LATN UN1101 Elementary Latin I. 4 points.

For students who have never studied Latin. An intensive study of grammar with reading of simple prose and poetry.

Fall 2020: LATN UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 1101	001/11639	M W F 10:10am - 11:25am Online Only	Emma Ianni	4	12/12
LATN 1101	002/11640	M W 6:10pm - 8:00pm Online Only	Shenda Kuang	4	9/12

LATN UN2102 INTERMEDIATE LATIN II. 4.00 points.

Prerequisites: *LATN UN2101* or the equivalent.

This course condenses the second semester of Intermediate Latin (2102) into a sixweek summer session. Its goal is to further develop reading and interpretation skills in Classical Latin through engagement with Roman authors while continuing to review the essentials of Latin grammar. In the first half of the course, we cover selections from Ovid's epic poem, the *Metamorphoses*; in the second, we take up the prose writings of Seneca the Younger including selections from his *Epistulae Morales* and the philosophical dialogue *De vita beata*. Prerequisites: *LATN UN2101* or the equivalent. Selections from Ovid's *Metamorphoses* and from Sallust, Livy, Seneca, or Pliny

Fall 2020: LATN UN2102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

LATN UN3033 MEDIEVAL LANGUAGE # LITERATURE. 3.00 points.

Prerequisites: four semesters of college Latin or the instructor's permission.

Prerequisites: four semesters of college Latin or the instructors permission. This course offers an introduction to medieval Latin literature in conversation with its two most important traditions, classical literature and early Christian culture. Illustrative passages from the principal authors and genres of the Latin Middle Ages will be read, including Augustine and biblical exegesis; Ambrose and poetry; Bede and history and hagiography; Abelard and Heloise and the 12th century Renaissance. The course is suitable both for students of Latin and of the Middle Ages

Fall 2020: LATN UN3033

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3033	001/11646	T Th 2:40pm - 3:55pm Online Only	Carmela Franklin	3.00	5/20

LATN UN3035 Poetry as Neurosis: Lucan's Bellum Civile. 3 points.

This course is an intensive study of Lucan's revolutionary and enigmatic Bellum Civile, the epic masterpiece of the Neronian age, which was admired and imitated all through the history of Western culture by authors such as Dante, Montaigne, Milton, Voltaire, Goethe, Shelley, and Baudelaire among others. The course will examine major controversies concerning the form and meaning of the poem, with special emphasis on the poetic tension created by the narrator's neurotic personality. The narration of the 49 BCE civil war between Caesar and Pompey is for Lucan the pretext for an original and intensely personal reflection on themes such as political oppression, the role of the individual in society, nihilism, self-destructiveness, mental disorder, and artistic creation. The poem will be analyzed from various critical perspectives that include rhetoric, intertextuality, deconstruction, reception theory, and psychoanalysis; no previous knowledge of any of these methodologies is required. Although an acceptable knowledge of Latin (intermediate or above) is assumed, the primary focus of this course is literary and sociological interpretation rather than linguistic competence. In addition to the Latin reading assignments, the poem will also be read entirely in English translation, allowing students to comprehend the whole while they engage with particular sections in the original language. The assignment for each class will include: (1) approximately five hundred lines to be read in English translation; (2) translation of short Latin passages, whose size may be adapted to the level of the class/student; (3) secondary readings.

LATN UN3309 LATIN LITERATURE SELECTIONS. 3 points.

Prerequisites: LATN UN2102 or the equivalent.

Since the content of this course changes from year to year, it may be repeated for credit.

Fall 2020: LATN UN3309

LATN UN3320 Intensive Reading Course. 3 points.

Prerequisites: LATN UN2101-UN2102 or the equivalent.

This course is limited to students in the Postbaccalaureate program. The intensive reading of a series of Latin texts, both prose and verse, with special emphasis on detailed stylistic and grammatical analysis of the language.

LATN UN3980 Post-Baccalaureate Seminar. 3 points.

Open only to students enrolled in the post-baccalaureate certificate program in Classics.

This seminar aims to provide students in the post-baccalaureate certificate program with opportunities 1) to (re-)familiarize themselves with a selection of major texts from classical antiquity, which will be read in English, 2) to become acquainted with scholarship on these texts and with scholarly writing in general, 3) to write analytically about these texts and the interpretations posed about them in contemporary scholarship, and 4) to read in the original language selected passages of one of the texts in small tutorial groups, which will meet every week for an additional hour with members of the faculty.

LATN UN3013 Classical Latin Prose. 3 points.

Prerequisites: LATN W1202 or equivalent

This course is intended to complement *Latin V3012: Augustan Poetry* in providing students a transition between the elementary, grammatical study of Latin texts to a more fluent understanding of complex literary style. *Latin V3013* will largely concentrate on different styles of writing, particularly narrative, invective, and argument. Text will be drawn primarily from Cicero's orations, with some readings from his rhetorical works.

CLASSICAL CIVILIZATION**CLCV UN2441 Egypt in the Classical World. 4 points.**

This class traces Egypt's evolving integration into the Classical World from the Saite Dynasty (c. 685 BCE) to the suppression of paganism by the Coptic church. We'll pay close attention to the flashpoints that created conflicts between pagan Egyptians, Greeks, Jews, and Christians and also to integrative aspects of society.

CLCV UN3059 WORLDS OF ALEXANDER THE GREAT. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This seminar looks at the narrative and the historical context for an extraordinary event: the conquest of the Persian empire by Alexander III of Macedonia, conventionally known as "Alexander the Great". We will explore the different worlds Alexander grew out of, confronted, and affected: the old Greek world, the Persian empire, the ancient near-east (Egypt, Levant, Babylonia, Iran), and the worlds beyond, namely pre-Islamic (and pre-Silk Road) Central Asia, the Afghan borderlands, and the Indus valley. The first part of the course will establish context, before laying out a narrative framework; the second part of the course will explore a series of themes, especially the tension between military conquest, political negotiation, and social interactions. Overall, the course will serve as an exercise in historical methodology (with particular attention to ancient sources and to interpretation), an introduction to the geography and the history of the ancient world (classical and near-eastern), and the exploration of a complex test case located at the contact point between several worlds, and at a watershed of world history.

CLCV UN3060 Worlds of Alexander the Great Discussion. 0 points.

Corequisites: CLCV UN3059

Discussion section to accompany CLCV 3059, "The Worlds of Alexander the Great": examination of sources, interpretation and historiography; broad discussion as well as close reading of texts.

CLCV UN3111 PLATO&CONFUCIUS: COMP ANC PHIL. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: completion of first semester of CC recommended.
Prerequisites: completion of first semester of CC recommended.
Although separated by a distance of nearly 5,000 miles, Classical Greece and China witnessed the near-simultaneous emergence of complex, centralized city-states, intensive agricultural cultivation, urbanization, the growth of imperial administrations, and scientific and technological revolutions. Each also witnessed the emergence of competing schools of philosophy. This course surveys principal works of Classical Greek and Chinese philosophy (where possible in their totality). Our goals are both contextualist and comparativist. Alternating between philosophical traditions, we shall read, discuss, and analyze several works of ancient Greek philosophy and Classical Chinese philosophy within their unique historical contexts and in comparison to one another.

CLCV UN3220 War, reality and truth in Thucydides. 4 points.

Between 431 and 404 BCE, a world war pitted the sea empire of democratic Athens against the land-based hegemony of Sparta, the culmination of decades of cold war, uneasy coexistence and open conflict between the two powers. The

first twenty years of this major event in ancient history are painstakingly recorded in a monumental work, the *War of the Peloponnesians and Athenians* by the Athenian Thucydides, a participant in the conflict. This remarkable and highly crafted text combines a hyperreal narrative season by season, analyses of causality, character and motivation, and competing ethical and practical interpretations. We will approach Thucydides' *War* in four different ways: as a piece of historiography; as set of political or social scientifically oriented demonstrations; as a philosophical meditation on justice and power in the world; and as a historical document for a richly interesting period. Are these four approaches mutually compatible and reinforcing? The close reading of the text (for reasons of time, we will look at Books 1-5, 8 will be completed by engagement with secondary literature (four monographs and articles) and with contemporary documents (inscriptions), the latter offering a fragmentary counterpoint to Thucydidean narrative. After reading the text, we will spend time on thematic debates involving the narrative and contextual material. The aim of this close work is to produce a Thucydides beyond the clichés of contemporary punditry ("the Thucydides trap"), closely fitting within Columbia undergraduate training (where Thucydides has vanished from the Core), and bridging the gap between contextualizing and modernizing readings.

CLCV UN3321 War, reality and truth in Thucydides - Discussion. 0 points.

Between 431 and 404 BCE, a world war pitted the sea empire of democratic Athens against the land-based hegemony of Sparta, the culmination of decades of cold war, uneasy coexistence and open conflict between the two powers. The first twenty years of this major event in ancient history are painstakingly recorded in a monumental work, the *War of the Peloponnesians and Athenians* by the Athenian Thucydides, a participant in the conflict. This remarkable and highly crafted text combines a hyperreal narrative season by season, analyses of causality, character and motivation, and competing ethical and practical interpretations. We will approach Thucydides' *War* in four different ways: as a piece of historiography; as set of political or social scientifically oriented demonstrations; as a philosophical meditation on justice and power in the world; and as a historical document for a richly interesting period. Are these four approaches mutually compatible and reinforcing? The close reading of the text (for reasons of time, we will look at Books 1-5, 8 will be completed by engagement with secondary literature (four monographs and articles) and with contemporary documents (inscriptions), the latter offering a fragmentary counterpoint to Thucydidean narrative. After reading the text, we will spend time on thematic debates involving the narrative and contextual material. The aim of this close work is to produce a Thucydides beyond the clichés of contemporary punditry ("the Thucydides trap"), closely fitting within Columbia undergraduate training (where Thucydides has vanished from the Core), and bridging the gap between contextualizing and modernizing readings.

CLCV V3230 Classics and Film. 3 points.

Considers cinematic representations of the ancient Mediterranean world, from early silent films to movies from the present day. Explores films that purport to represent historical events (such as *Gladiator*) and cinematic versions of ancient texts (Pasolini's *Medea*). Readings include ancient literature and modern criticism.

CLCV GU4106 Religions of the Roman world. 3 points.

The goal of this course is to convey an important amount of knowledge on the religious history of the Roman empire focusing both on paganism, Christianity and Judaism and their interaction. We will study the religious space, the agents of cults and religions, rituals and networks and dynamics of power. The course will also face the challenge to reconsider the points of view from which to think the religious history of the Roman Empire and therefore it will be an invitation to revise our intellectual tools and questions towards an awareness to what is at stake when an object of religious debate emerges.

CLCV GU4110 Gender and Sexuality In Ancient Greece. 3 points.

Prerequisites: sophomore standing or the instructor's permission.

Examination of the ways in which gender and sexuality are constructed in ancient Greek society and represented in literature and art, with attention to scientific theory, ritual practice, and philosophical speculation. Topics include conceptions of the body, erotic and homoerotic literature and practice, legal constraints, pornography, rape, and prostitution.

CLCV UN3008 The Age of Augustus. 3 points.

The reign of the first Roman emperor, Augustus (27bce-14ce), has been seen as a Roman revolution, both political and cultural. Rome had for centuries been governed as a Republic, but a series of increasingly divisive civil wars allowed Augustus to create a new political system in which he exercised sole rule as the 'first citizen' within a 'Restored Republic'. Augustus' reign lasted more than 40 years, and established a model of autocratic rule that would last for four centuries. During this time there were profound changes in the political, social, and cultural structures of Rome. In this course, you will examine the nature of these changes, Augustus' political strategies, military activities, and religious initiatives through his own writing, the accounts of (often hostile) historians and a range of literary and archaeological sources, including Roman poetry. Ultimately, we will address the question: how did Augustus achieve the seemingly paradoxical feat of becoming a monarch within a republican system?

CLCV UN3070 Polis: the Biography of the Ancient Greek City-State 650 BCE-350 CE. 4.00 points.

This course explores the history of the Greek city-state, first as a long narrative story from the obscure leap to stately forms in the Aegean basin during the early seventh century BCE, to the end of municipal forms in the late Roman empire in the fourth century CE. Is there a single polis form that develops and endures during this century? This is the concern of the first half of the course. The second half explores implications of the polis as a social and political organism: as ideas, ideology and institutions; as self-interest; and as a site and a tool of domination. The possible consequences for the politics of living together will be examined throughout the course, which balances between history and political philosophy

CLCV UN3015 Race and Ethnicity in the Greco-Roman World - Discussion. 0 points.

This course provides an introduction to ancient attitudes towards race and ethnicity. Students will be challenged to consider how categories of race and ethnicity are presented in the literature and artistic works of Greece and Rome, and how ancient thinking remains current and influential today. We will consider texts from antiquity including epic, history, medical texts, ethnographies, dramas, and novels, as well as material evidence intended to represent 'foreignness'. Our case studies pay particular attention to concepts including notions of racial formation and racial origins, ancient theories of ethnic superiority, and linguistic, religious and cultural differentiation as a basis for ethnic differentiation. We will also examine ancient racism through the prism of a variety of social processes in antiquity, such as slavery, trade and colonization, migrations, imperialism, assimilation, native revolts, and

genocide. By the end of the course, students will have gained a richer understanding of the intellectual and cultural history of the ancient world, and will be able to engage in discussions of identity construction in a comparative manner.

CLCV BC3601 Priestess, Queen, Goddess: The Divine Feminine in the Kingdom of Kush. 4.00 points.

The prominence of powerful goddesses (Hathor, Mut, and Isis), the reverence awarded to the queen mothers of Kush, and a series of sole-ruling queens (one of whom led her army in battle against the invading Romans), highlight the unusually high status of women in this ancient African society and serve as a fitting focus for the study of female power in the ancient world. This course will examine more closely the queens, priestesses, and mothers who formed an essential societal component in ancient Nubia and its complex systems of goddess worship, sacred sexualities, and family lineages, both royal and non-royal. Examining the rich funerary traditions and goods found in royal burials, and temple and tomb imagery, we will explore how ancient Africans of the Nile Valley understood female power and presence to be an essential enlivening element in maintaining Maat, the balance of male and female energies, in order to cultivate "divine right order" in the world and in the cosmos. In this six-week immersive seminar, we'll examine the history of Kushite queens who served as powerful complements to their husband the king, as the central figure in the coronation ceremonies for their son as he assumed the kingship, and as rulers in their own right during a time when this level of power was unavailable to women anywhere else in the world. After surveying the earlier phases of the ancient African kingdom of Kush: Kerma (2600-1500 BCE) and Napata (900-300 BCE), we will focus on the last phase of the Kingdom of Kush – Meroe (300 BCE – 300 CE) where women truly came into their power

CLASSICAL LITERATURE**CLLT UN3125 Book Histories and the Classics. 3 points.**

Prerequisites: HUMA CC1001 or HUMA GS1001COCI CC1101 ,HUMA CC1001 or HUMA GS1001 or COCI CC1101
This seminar will introduce students of classical literature to the history of the Western book, and to the relationship between book history and the transmission and reception history of the literature of ancient Greece and Rome. Students will also learn

how to make use of rare books materials including manuscripts and early printed books.....

CLLT UN3127 Hercules: Hero, Murderer, Philosopher, Buffoon. 3 points.

Hercules is one of the most ancient, widespread, and enduring figures to emerge from the ancient Mediterranean. He is a figure of multiples: myriad labors, multiple wives, multiple fathers, and multiple identities. Together we will discover a broad range of literature on this hero and-like ancient writers and thinkers-we will use Hercules to explore mortality, divinity, masculinity, madness, and contradiction. We will read Hercules in different ancient genres, with a particular emphasis on Tragedy, Comedy, and Philosophy. The final units of our course will explore contemporary "heros," including the Hulk, "The Rock," and Disney's Hercules.

CLLT UN3128 THE ARTIST AND THE DICTATOR: ROMAN WRITERS UNDER NERO. 3 points.

This course aims at highlighting both the most important general features and the most important peculiarities of the literary masterpieces produced in the age of Nero. The basic question we will be addressing in class is what it means to be a literary artist under the rule of a despot. In order to fulfill Nero's megalomaniac need for exaltation, cope with his absolute power and, at the same time, maintain their personal identity and ethical values as writers, Seneca, Petronius and Lucan strove to balance in their works the emperor's expectations and their own artistic designs. These artists were not free to write what they wanted to write for present and future generations, but they tried to write it nevertheless. In this course, we will examine the extent of freedom of expression under Nero; the rhetorical techniques Neronian writers resorted to in order to express tactful modes of oblique commentary and criticism; the difficulties of the individual's liberty in a climate of dictatorial oppression; the ways in which literature helps us discover more about the society of a given time; and, ultimately, the universal and eternal desire for artists to be themselves and express their own views in spite of mortal dangers. Such issues are all the more pertinent in the present day: in 1989, the novelist Salman Rushdie was sentenced to death by the ayatollah Khomeyni after the publication of *The Satanic Verses* and fled to the United Kingdom; in 2011, the visual artist Ai Weiwei, whose most recent installation is currently exhibited in New York City, at Washington Square Park, served 81 days in a Chinese prison because of his artwork against dictatorial regimes. He eventually left China and settled in Berlin. No knowledge of Latin is required, as the focus of this course is literary, historical and sociological interpretation rather than linguistic competence.

CLLT UN3129 An Odyssey of Odysseys: Reception of Homer's Odyssey from Antiquity to the 21st Century. 3.00 points.

Homer's Odyssey, likely composed around the 9th or 8th century BCE, has had an enduring legacy. Our journey this

semester will bring us into contact with a varied selection of artistic endeavors, spanning different cultures, times, and media, that draw on the Odyssey for material or inspiration. A guiding set of broadly-formulated questions will steer our course: Can we find in the Odyssey some of the same meaning, today, that it held for its original audience and that it held, subsequently, for later Greeks? Do receptions of the Odyssey try to recapture it, reframe it, refashion it, or become something independent? (Are these mutually exclusive options?) How do we read these works in light of the Odyssey, and also how do we re-visit and re-read the Odyssey in light of its receptions? It is no secret that the present bears the enduring weight of the past, but is the past changed as a result?

MODERN GREEK

GRKM UN1101 Elementary Modern Greek I. 4 points.

This is the first semester of a year-long course designed for students wishing to learn Greek as it is written and spoken in Greece today. As well as learning the skills necessary to read texts of moderate difficulty and converse on a wide range of topics, students explore Modern Greece's cultural landscape from "parea" to poetry to politics. Special attention will be paid to Greek New York. How do "our", "American", "Greek-American" definitions of language and culture differ from "their", "Greek" ones?

Fall 2020: GRKM UN1101

GRKM UN2101 Intermediate Modern Greek I. 4 points.

Prerequisites: GRKM UN1101 and GRKM UN1102 or the equivalent.

Corequisites: GRKM UN2111

This course is designed for students who are already familiar with the basic grammar and syntax of modern Greek language and can communicate at an elementary level. Using films, newspapers, and popular songs, students engage the finer points of Greek grammar and syntax and enrich their vocabulary. Emphasis is given to writing, whether in the form of film and book reviews or essays on particular topics taken from a selection of second year textbooks.

Fall 2020: GRKM UN2101

GRKM UN3001 Advanced Modern Greek I. 3 points.

Prerequisites: GRKM V2101 or the equivalent.

This semester we will continue to build language skills but with particular attention to speaking and writing Greek at the university level. We will focus on such topics as diaspora, history, politics, and identity. We will use materials from literature, critical essays, historiography, film, and mass media as a way to advance knowledge in Modern Greek literature and culture. In addition we will explore the diversity of Greek language as it is spoken in different regions and gain understanding of its evolution through time. Materials include: essays (Seferis, Theotokas); newspaper articles; television interviews (Flessa and Papanikolaou); advertisement; stand-up-comedy (Lazopoulos); music (art-song, *rebetika*, hip-hop);

theatre (Demetriades); literature (Roides, Papadiamantis, Kazantzakis, Lymberaki, Karapanou, Galanaki, Charalambides, Chatzopoulos, Chouliaras).

GRKM UN3003 Greece today: language, literature, and culture (in Greek). 3 points.

Prerequisites: GRKM un2102

This course builds on the elements of the language acquired in GRKM1101 through 2102, but new students may place into it, after special arrangement with the instructor. It introduces the students to a number of authentic multimodal materials drawn from a range of sources which include films, literary texts, media, music etc. in order to better understand Greece's current cultural, socio-economic, and political landscape. In doing so, it aims to foster transcultural understanding and intercultural competence, while further developing the four language skills: listening, speaking, reading and writing. Topics of discussion include language, gender equality, youth unemployment, education, queer identities, refugees, and the multilayered aspects of the crisis. *Pre-requisite for this class: GRKM 2102 or placement test. Instructor's permission required if the students have not taken GRKM2102 or equivalent.*

GRKM UN3935 Hellenism and the Topographical Imagination. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines the way particular spaces—cultural, urban, literary—serve as sites for the production and reproduction of cultural and political imaginaries. It places particular emphasis on the themes of the polis, the city, and the nation-state as well as on spatial representations of and responses to notions of the Hellenic across time. Students will consider a wide range of texts as spaces—complex sites constituted and complicated by a multiplicity of languages—and ask: To what extent is meaning and cultural identity, sitespecific? How central is the classical past in Western imagination? How have great metropolises such as Paris, Istanbul, and New York fashioned themselves in response to the allure of the classical and the advent of modern Greece? How has Greece as a specific site shaped the study of the Cold War, dictatorships, and crisis?

Fall 2020: GRKM UN3935

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

GRKM GU4135 Topics Through Greek Film. 3-4 points.

Optional 1-point bilingual guided reading.

This course explores issues of memory and trauma, public history and testimony, colonialism and biopolitics, neoliberalism and governmentality, and crisis and kinship, all through the medium of Greek film. It brings the Greek cinema canon (Angelopoulos, Gavras, Cacoyiannis, Koundouros, et al.) into conversation with the work of contemporary artists, documentary filmmakers, and the recent "weird wave" and asks: what kind of lens does film offer onto the study of a

society's history and contemporary predicament? The viewing and discussion of films is facilitated through a consideration of a wide range of materials, including novels, criticism, archival footage, and interviews with directors. The course does not assume any background knowledge and all films will have English subtitles. An additional 1-credit bilingual option (meeting once per week at a time TBD) is offered for students who wish to read, view, and discuss materials in Greek.

GRKM GU4460 Supervised Independent Research. 3 points.

All supervisors will be Columbia faculty who hold a PhD. Students are responsible for identifying their own supervisor and it is at the discretion of faculty whether they accept to supervise independent research.

Projects must be focused on Hellenic Studies and can be approached from any disciplinary background. Students are expected to develop their own reading list in consultation with their supervisor. In addition to completing assigned readings, the student must also write a Hellenic studies paper of 20 pages. Projects other than a research paper will be considered on a case-by-case basis.

Hellenic Studies is an interdisciplinary field that revolves around two main axes: space and time. Its teaching and research are focused on the study of post-classical Greece in various fields: Language, Literature, History, Politics, Anthropology, Art, Archaeology, and in various periods: Late Antique, Medieval, Byzantine, Modern Greek etc. Therefore, the range of topics that are acceptable as a Hellenic Studies seminar paper is broad. It is upon each supervisor to discuss the specific topic with the student.

The work submitted for this independent study course must be different from the work a student submits in other courses, including the Hellenic Studies Senior Research Seminar.

COMPARATIVE LITERATURE-GREEK MODERN

CLGM UN3005 Dictatorships and their Afterlives . 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

What does the investigation of a dictatorship entail and what are the challenges in such an endeavor? Why (and when) do particular societies turn to an examination of their non-democratic pasts? What does it mean for those who never experienced an authoritarian regime first-hand to remember it through television footage, popular culture, and family stories? This seminar examines dictatorships and the ways in which they are remembered, discussed, examined, and give rise to conflicting narratives in post-dictatorial environments. It takes as its point of departure the Greek military regime of 1967-1974, which is considered in relation to other dictatorships in South America, Asia, Africa, and Europe. We will be drawing on primary materials including Amnesty International reports, film, performance art, and architectural drawings as well as the works of Hannah Arendt and Günter Grass to engage in an interdisciplinary examination of the ways in which military dictatorships live on as ghosts, traumatic memories, urban warfare, litigation, and debates on the politics of comparison and the ethics of contemporary art.

CLGM UN3110 The Ottoman Past in the Greek Present . 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Almost a century after the dissolution of the Ottoman Empire, the Ottoman past lives on in contemporary Greece, often in unexpected sites. In the built environment it appears as mosques, baths, covered markets, and fountains adorned with Arabic inscriptions. It also manifests itself in music, food, and language. Yet Ottoman legacies also shape the European present in less obvious ways and generate vehement debates about identity, nation-building, human rights, and interstate relations. In this course, we will be drawing on history, politics, anthropology, and comparative literature as well as a broad range of primary materials to view the Ottoman past through the lens of the Greek present. What understandings of nation-building emerge as more Ottoman archives became accessible to scholars? How does Islamic Family Law—still in effect in Greece—confront the European legal system? How are Ottoman administrative structures re-assessed in the context of acute socio-economic crisis and migration?

CLGM UN3920 WORLD RESPONDS TO THE GREEKS. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines various literary, artistic, and cultural traditions that respond to some of the most recognizable Greek motifs in myth, theater, and politics, with the aim of understanding both what these motifs might be offering specifically to these traditions in particular social-historical contexts and, at the same time, what these traditions in turn bring to our conventional understanding of these motifs, how they reconceptualize them and how they alter them. The overall impetus is framed by a prismatic inquiry of how conditions of modernity, postcoloniality, and globality fashion themselves in engagement with certain persistent imaginaries of antiquity.

CLGM UN3921 The World Responds to the Greeks – Modernity, Postcoloniality, Globality- Discussion. 0 points.

This course examines various literary, artistic, and cultural traditions that respond to some of the most recognizable Greek motifs in myth, theater, and politics, with the aim of understanding both what these motifs might be offering specifically to these traditions in particular social-historical contexts and, at the same time, what these traditions in turn bring to our conventional understanding of these motifs, how they reconceptualize them and how they alter them. The overall impetus is framed by a prismatic inquiry of how conditions of modernity, postcoloniality, and globality fashion themselves in engagement with certain persistent imaginaries of antiquity.

CLGM GU4150 C.P. Cavafy and the poetics of desire. 4 points.

This course takes C. P. Cavafy's oeuvre as a departure point in order to discuss desire and the ways it is tied with a variety of topics. We will employ a number of methodological tools to examine key topics in Cavafy's work such as eros, power, history, and gender. How can we define desire and how is desire staged, thematized, or transmitted through poetry? How does a gay poet write about desired bodies at the beginning of the previous century? What is Cavafy's contribution to the formation of gay identities in the twentieth century? How do we understand the poet's desire for an *archive*? How important is the city for activating desire? How do we trace a poet's afterlife and how does the desire poetry transmits to readers transform through time? How does literature of the past address present concerns? These are some of the questions that we will examine during this course.

CLGM GU4450 How to do things with Homosexual #odies. 4 points.

Homosexuality, as a term, might be a relatively recent invention in Western culture but bodies that acted and appeared 'differently' existed long before that. This course will focus on acts, and not identities, in tracing the evolution of writing the homosexual body from antiquity until today. In doing so it will explore a number of multimodal materials – texts, vases, sculptures, paintings, movies etc. – in an effort to understand the evolution of the ways in which language (written, spoken

or visual) registers the homosexual body in literature and culture. When we bring the dimension of the body into the way we view the past, we find that new questions and new ways of approaching old questions emerge. What did the ancient actually write about the homosexual body? Did they actually create gender non-binary statues? Can we find biographies of the lives of saints in drag in Byzantium? How did the Victorians change the way in which we understand homosexual writing in Antiquity? How is the queer body registered in Modern Greek Literature and Culture? Can one write the history of homosexuality as a history of bodies? These are some of the questions that we will examine during the semester.

CLGM GU4300 Retranslation: Worlding C. P. Cavafy. 4 points.

Focusing on a canonical author is an immensely productive way to explore translation research and practice. The works of Sappho, Dante, Rilke, Césaire or Cavafy raise the question of reception in relation to many different critical approaches and illustrate many different strategies of translation and adaptation. The very issue of intertextuality that challenged the validity of author-centered courses after Roland Barthes's proclamation of the death of the author reinstates it if we are willing to engage the oeuvre as an on-going interpretive project. By examining the poetry of the Greek Diaspora poet C. P. Cavafy in all its permutations (as criticism, translation, adaptation), the Cavafy case becomes an experimental ground for thinking about how a canonical author can open up our theories and practices of translation. For the final project students will choose a work by an author with a considerable body of critical work and translations and, following the example of Cavafy and his translators, come up with their own retranslations. Among the materials considered are commentary by E. M. Forster, C. M. Bowra, and Roman Jakobson, translations by Edmund Keeley and Philip Sherrard, James Merrill, Marguerite Yourcenar, and Daniel Mendelsohn, poems by W.H. Auden, Lawrence Durrell, and Joseph Brodsky, and visual art by David Hockney, and Duane Michals

CLASSICS-GREEK MODERN

CSGM UN3567 Thessaloniki Down the Ages. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course will explore the fascinatingly layered and multicultural history of Thessaloniki, the great city of Northern Greece and the Balkans. We will examine texts, archaeological evidence, literature, songs, and movies and in general the materialities of the city. We will examine this material from the 6th century BCE down to the 21st cent. CE. We will notably think about the problems of history, identity, and

cultural interaction in reaction to recent work such as Mark Mazower's well known *Salonica, City of Ghosts* [2004].

HISTORY-CLASSICS

HSCL UN3000 The Persian Empire . 4 points.

This seminar studies the ancient Persian (Achaemenid) Empire which ruled the entire Middle East from the late 6th to the late 4th centuries BCE and was the first multi-ethnic empire in western Asian and Mediterranean history. We will investigate the empire using diverse sources, both textual and material, from the various constituent parts of the empire and study the different ways in which it interacted with its subject populations. This course is a seminar and students will be asked to submit a research paper at the end of the semester. Moreover, in each class meeting one student will present part of the readings.

Grading: participation (25%), class presentation (25%), paper (50%).

COMPARATIVE LITERATURE-ENGLISH

CLEN UN3720 Plato the Rhetorician. 4 points.

Prerequisites: Instructor's permission (Seminar). Although Socrates takes a notoriously dim view of persuasion and the art that produces it, the Platonic dialogues featuring him both theorize and practice a range of rhetorical strategies that become the nuts and bolts of persuasive argumentation. This seminar will read a number of these dialogues, including *Apology*, *Protagoras*, *Ion*, *Gorgias*, *Phaedrus*, *Menexenus* and *Republic*, followed by Aristotle's *Rhetoric*, the rhetorical manual of Plato's student that provides our earliest full treatment of the art. Application instructions: E-mail Prof. Eden (khe1@columbia.edu) with your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available.

COLLOQUIA, INTERDEPARTMENTAL SEMINARS, AND PROFESSIONAL SCHOOL OFFERINGS

Occasionally, and for a variety of reasons, faculty offer courses outside of the existing structure of Arts and Sciences academic departments. Such courses may be colloquia: team-taught interdisciplinary courses; interdepartmental seminars explicitly offered by two or more academic departments; or undergraduate-specific courses offered by faculty outside of the Arts and Sciences. All of these courses may be counted toward the undergraduate degree, but it is for the faculty of each department or program to determine whether or not they can count toward a major or concentration.

INTERDEPARTMENTAL SEMINARS

CNNS UN3900 Independent Research in Nuclear Nonproliferation Studies. *1 point.*

Points: 1-4

Prerequisites: The written permission of the faculty member is required. Points: 1-4

The opportunity to conduct an independent research project in nuclear nonproliferation studies is open to all majors. A product and detailed report is presented by the student when the project is completed.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: one semester of Contemporary Civilization or Literature Humanities, or an equivalent course, and the instructor's permission.

A team-taught multicultural, interdisciplinary course examining traditions of leadership and citizenship as they appear in the key texts of early Indian, Islamic, Far Eastern, and Western civilizations. One goal is to identify and examine common human values and issues evident in these texts while also recognizing key cultural differences

INSM W3950 Friendship in Asian and Western Civilization. *4 points.*

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 22.

The colloquium studies ideals and practices of friendship in East Asia and the West. How have two great civilizations understood exemplary friendship in changing historical settings? Literary, historical, and social science approaches. Students are expected to participate actively and to write a substantial paper, working closely with one or both instructors.

INSM C3940 Science Across Cultures. *4 points.*

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited. Open to seniors and some qualified juniors. Priority given to seniors. **Not offered during 2020-21 academic year.**

Development of scientific thought from various cultures and from antiquity till the time of the European Renaissance. Provides examples of the process by which scientific thinking has developed and illustrates that, although science may not have always developed in a linear fashion, the problems science was called upon to solve exhibited a continuity that crossed cultural, linguistic, and religious borders.

FSEB UN1020 Food and the Body. *3 points.*

CC/GS: Partial Fulfillment of Science Requirement

This course will use an evolutionary perspective to focus on what humans need to eat for survival and health. We will examine how and why sufficient and optimal diets can be obtained through a range of dietary patterns, and how those patterns were rooted in different geographic and cultural regions. We will also compare current patterns with those of humans from 200,000, 12,000 and 100 years ago, and where it is instructive, we will compare the food intake and food system

of other animals. Throughout the course, the environmental impact of a given dietary pattern will be considered, and where possible, the economic determinants of individual food intake will be reviewed. We will incorporate a lifespan perspective throughout the course.

FSPH UN1100 FOOD, PUBLIC HEALTH & PUBLIC POLICY. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

The course will provide an introduction to the science, policy, politics, and economics related to food as a critical element of public health. The course will have a primary focus on the US, but will include a global perspective. Students will learn and apply the fundamentals of public health scientific research methods and theoretical approaches to assessing the food landscape through a public health lens. In addition, the course will cover how nutrition – at first glance a matter of individual choice – is determined by an interconnected system of socio-economic-environmental influences, and is influenced by a multitude of stakeholders engaged in policymaking processes. The course will be structured into four “themes”: 1) Why food is a public health priority, 2) Evidence, causal inference and measurement and its role in understanding and designing public health research on food, 3) The food environment, and 4) Change agents and levers: individuals, policy, and politics in food and public health. The course will use a systems thinking approach and systems thinking tools to examine and understand the interconnectedness of the social, economic, environmental, political and economic influences and consequences that affect food and public health. This course partially fulfills the Science Requirement as a science course for non-science majors.

CGTH UN3401 Seminar in Global Thought: Inquiries into an Interconnected World. 4 points.

This course on global thought will consider the ways in which we think about, debate, and give meaning to the interconnected world in which we live. In thematically focused collaborative teams, students will examine how the flows of people, things and ideas across national borders both connect our world and create uneven consequences within and among communities.

We will locate ourselves in these processes, suggesting we need go no further than our closets, tables, and street corners to consider the meanings of globalization and our roles in the world today. This course has been approved to partially satisfy the Global Core requirement.

Fall 2020: CGTH UN3401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

CGTH UN3402 Topics in Global Thought: Global 20-Youth in an Interconnected World. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

What does it mean to be 20 years old in our rapidly changing, interconnected world? There are more youth (aged 15-25) in the world today than at any other time in history, with the majority living in the developing world. They approach adulthood as the world confronts seismic shifts in the geopolitical order, in the nature and future of work, and in the ways we connect with each other, express identity, engage politically, and create communities of meaning. What unique challenges and opportunities confront young people after decades of neoliberal globalization? What issues are most pressing in developing nations experiencing a “youth bulge” and how do they compare to developed nations with rapidly aging populations? How do young people envision their futures and the future of the world they are inheriting? This course will examine recent scholarship while engaging the young people in the class to define the agenda and questions of the course, and to conduct their own research. This course is part of the Global Core curriculum.

“Global 20” complements a new research project of the Committee on Global Thought, “Youth in a Changing World,” which investigates from the perspective of diverse participants and of young people themselves, the most pressing issues confronting young people in the changing world today. The course will serve as an undergraduate “lab” for the project, and among other involvements, students in the course will help conceive, plan, and take part in a NYC-wide “Youth Think-In” sponsored by the CGT during the Spring 2018 semester. Within the course, students will become “regional experts” and examine the primary themes of the class through the prism of specific areas or nations of their choosing. A final class project includes a “design session” that will consider how universities might better train and empower youth to confront the challenges and embrace the opportunities of our interconnected world of the 21st century.

PROFESSIONAL SCHOOL OFFERINGS

JOUR W3100 Journalism and Public Life. 3 points.

An introduction to the conventions, traditions, values, assumptions, and arguments that have shaped the institution of journalism and its central role in public life. Through close readings/viewings of current and classic works of journalism as well as secondary sources, we explore some of the Big Questions: What is journalism for? What is its role in public life, and how has that changed over time? Is objectivity dead—or should it be? How have new technologies affected our expectations? Is sensationalism bad for you? What is the future of journalism? The focus is on the American experience from the colonial era to the present day, though we will also draw comparisons with international developments.

PUBH UN3100 Fundamentals of Global Health. 3 points.

Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences, and humanities, students will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. The first unit of the class will focus on establishing the foundations for a public health approach to understanding the challenges of global health. This will involve exploration of the factors shaping the global distribution of disease and their connection with issues of social, economic, and political development, as reflected in the Millennium Development Goals. The second unit will explore in further detail a number of major health priorities. A significant goal of the class will be to identify common sources of vulnerability and challenge across health risks, and the consequent need for a systemic approach to their being addressed. The third and final unit builds upon this analysis to demonstrate the multi-disciplinary, multi-level approach required to effectively address global health priorities, and the political and organizational cooperation required to achieve this. The class concludes with an analysis of the major challenges and threats to global coordination regarding such threats as pandemic influenza and emerging health threats related to climate change. Offered in the spring.

PUBH UN3200 Introduction to Public Health. 3 points.

An introduction to and overview of public health. Through a series of sessions with leading public health experts, this course views the multifaceted nature of public health through a prismic lens addressing key concepts, approaches, and issues of historical and contemporary import: What is public health and how has public health evolved over time? What are the core methods of public health? What are the approaches to understanding and addressing both infectious and chronic, non-communicable diseases? What role do micro- and macro-level determinants (i.e., biology and social context) play in public health? What are the global trends in population health? How does the individual life course bear on population health? How do systems, policy, and population health mutually shape each other? How are public health programs designed and evaluated? What are the limits of public health?

PUBH GU4100 (Y)our Longer Life. 3 points.

People are living 30 years longer than we did 100 years ago. We have created a whole new stage of life. How do we prepare to benefit from our longer lives? What can you do in your own life? This course explores the personal, population, community, and societal dimensions of our now-longer lives, of aging itself, and the role of health and societal design in the experience of aging. The course examines the meaning of aging and the attendant expectations, myths, fears, and realities. The course examines an aging society as a public health success, the potential for building health futures, the health plan you want to be healthy in old age, and the potential for longer lives and how we unlock it. It addresses the roles public health currently plays and can play in shaping a society for an aging population. The course explores how a public health system—indeed, a society—optimized for an aging population stands to benefit all. The course also examines the physical, cognitive, and psychological aspects of aging, the exposures across our lives that affect these, the attributes and challenges of aging, keys to successful aging, and aging around the globe. The culminating project will design elements of our society that are needed to support the opportunity of having longer lives. This course comprises lectures, class discussions, individual assignments, in-class case activities, and a group project in which students shall take an active role. You will be responsible for regular preparatory assignments, writing assignments, one group project, and attending course sessions. Please note: GSAS students must receive permission from their department before registering for this course.

PUBH GU4200 Environment, Health, and Justice: Concepts and Practice. 3 points.

Please note: this class was designed as part of the Special Concentration in Public Health. It is open to undergraduates, as well as students in Public Health, and will be taught on the Morningside campus.

This course introduces key concepts on environmental health sciences and environmental justice and their application to address environmental health disparities affecting communities in New York City, across the United States and globally. The course will present theory and methods needed to characterize, understand and intervene on environmental health problems with a focus on methods that are particularly appropriate for environmental justice research and interventions. We will describe environmental health disciplines such as exposure sciences, environmental epidemiology, environmental biosciences and toxicology, as well as methods to assess expected environmental health impacts

Assistant Director: Sarah Monks, B-102 Heyman Center, East Campus; 212-854-8850; sm3373@columbia.edu

Established at Columbia in 1998, the Institute for Comparative Literature and Society (ICLS) promotes a global perspective in the study of literature and its social context. Committed to cross-disciplinary study of literary works, the Institute brings together the rich resources of Columbia in the various literatures of the world; in the social sciences; in art history, architecture, and media; and in the medical humanities.

The major programs at ICLS allow qualified students to study literature, culture, and society with reference to material from several national traditions, or in combination of literary study with comparative study in other disciplines in the humanities and social sciences. Under the guidance of the director of

undergraduate studies, students select courses offered by participating departments.

The program is designed for students whose interest and expertise in languages other than English permit them to work comparatively in several national or regional cultures. The course of study differs from that of traditional comparative literature programs, both in its cross-disciplinary nature and in its expanded geographic range, including not just European, but also Asian, Middle Eastern, African, and Latin American cultures.

The program includes course work in the social sciences, and several core courses are jointly taught by faculty from different disciplines. Students thus explore a variety of methodological and disciplinary approaches to cultural and literary artifacts in the broadest sense. The cross-disciplinary range of the program includes visual and media studies; law and the humanities; medicine and the humanities; and studies of space, cities, and architecture. As a major or concentration, this program can be said to flow naturally from Columbia's Core Curriculum, which combines literature, art, philosophy, and social thought, and consistently attracts some of Columbia's most ambitious and cosmopolitan students.

Students can choose to complete the major in Comparative Literature and Society (CLS) or the major in Medical Humanities (MedHum). Currently, the MedHum major is not available for the concentration.

Given the wide variety of geographic and disciplinary specializations possible within the majors and concentration, students construct their course sequence in close collaboration with the director of undergraduate studies. All students, however, share the experience of taking the course CPLS UN3900 INTRO TO ICLS in their sophomore year, as well as the required senior seminar in the fall of their last year in the program. The ICLS majors and concentration are designed for students interested in the cross-disciplinary and cross-cultural study of texts, traditions, media, and discourses in an increasingly transnational world.

Students planning to apply for admission to the CLS major, the MedHum major, or the CLS concentration should organize their course of study in order to complete the following prerequisites by the end of the sophomore year:

1. Preparation to undertake advanced work in one foreign language, to be demonstrated by completion of two introduction to literature courses, typically numbered 3333-3350.
2. Completion of at least four terms of study of a second foreign language or two terms in each of two foreign languages.
3. Enrollment in CPLS UN3900 INTRO TO ICLS in the spring semester of the sophomore year.

Information about admission requirements and application to the majors or concentration can be found at <https://>

icls.columbia.edu/undergraduate-program/admissions-to-the-majors-or-concentration/. Students are advised to meet with the director of undergraduate studies before submitting the statement of purpose for the required application. Applications are due in early January of the sophomore year.

DEPARTMENTAL HONORS

To be eligible for departmental honors, students must have a minimum grade point average of 3.6 for courses in the major. Departmental honors will be conferred only on students who have submitted a superior senior thesis that clearly demonstrates originality and excellent scholarship. Note that the senior thesis is not required for the major. For information on the honors program, see <http://icls.columbia.edu/programs/departmental-honors/>.

Executive Committee of ICLS L. Maria Bo (English and Comparative Literature) Bruno Bosteels (Latin American and Iberian Cultures) Souleymane Bachir Diagne (French and Romance Philology) Madeleine Dobie (French and Romance Philology) Brent Hayes Edwards (English and Comparative Literature, Jazz) Matthew Engelke (Religion) Stathis Gourgouris (Classics, English and Comparative Literature) Rishi Kumar Goyal (Emergency Medicine) Bernard Harcourt (Columbia Law School) Gil Hochberg (Middle Eastern, South Asian, and African Studies and IRWGS) Seth Kimmel (Latin American and Iberian Cultures) Lydia H. Liu (East Asian Languages and Cultures) David B. Lurie (East Asian Languages and Cultures) Anupama P Rao (History, Barnard) Felicity Scott (Architecture) Oliver Simons (Germanic Languages) Joseph Slaughter (English and Comparative Literature) Gayatri Chakravorty Spivak (University Professor of the Humanities) Dennis Tenen (English and Comparative Literature) Jesus R. Velasco (Latin American and Iberian Cultures)

GUIDELINES FOR ALL ICLS MAJORS AND CONCENTRATORS

Requirements for the major and concentration in Comparative Literature and Society were updated in February 2019; please contact the director of undergraduate studies with any questions. An application worksheet can be found on [our website](#). Applications are due in early January of a student's sophomore year. At the time of application, students interested in the major (including the major in Medical Humanities) or concentration must have met these requirements:

1. Foreign language 1: four semesters of language training (or equivalent) and two semesters of introductory literature courses, typically numbered 3330-3350;
2. (CLS Majors only) Foreign language 2: four semesters of one language or two semesters of two languages;
3. CPLS UN3900 INTRO TO ICLS, usually taken in the spring of the sophomore year;
4. A focus statement, 1-2 pages in length. The focus is a period, theme, problem, movement, etc., that is explored from an interdisciplinary and/or a comparative perspective.

Faculty understand that this statement is a work in progress, but that it serves as a useful guide to students' academic pursuits and course selection.

MAJOR IN COMPARATIVE LITERATURE AND SOCIETY

The major in Comparative Literature and Society consists of a minimum of 33 points or 11 courses, distributed as follows. Courses taken to fulfill the application requirements do not count toward the major. With the exception of courses taken to satisfy the global core requirement, double counting of courses to the CPLS major and another program or university requirement must be approved by the DUS. Requirements for the major and concentration in Comparative Literature and Society were updated in February 2019; please contact the director of undergraduate studies with any questions.

1. CPLS UN3900 INTRO TO ICLS, required for all majors and normally taken in the spring of the sophomore year (3 points)
2. Advanced courses as follows (please note that one course may be used to fulfill two of the advanced course requirements):
 - **Two courses** with a CPLS designator. CLxx courses, i.e. courses cross-listed between ICLS and other departments, may also be counted toward this requirement (6-8 points)
 - **Two seminars** in a humanities or social science discipline other than literature (e.g. Architecture, Anthropology, Art History, Economics, Gender & Sexuality Studies, History, Law, Linguistics, Music, Political Science, Race & Ethnicity Studies, Sociology...). The two courses must be grounded in the same disciplinary approach but don't have to be offered by the same department or program (6-8 points)
 - **Two courses** requiring readings in a language other than English. (The two courses don't have to be in the same foreign language) (6-8 points)
 - **Two courses** focusing on a specific national or regional literature or culture, chosen from any discipline (The two courses should focus on the same nation/region) (6-8 points)
 - **One elective course** reflecting the student's intellectual interests. The senior thesis may be counted toward this requirement. Additional foreign language study may also be counted with DUS approval (3-4 points)
3. CPLS UN3991 Senior Seminar in Comparative Literature and Society
4. Senior thesis (optional).

MAJOR IN MEDICAL HUMANITIES

The major in Medical Humanities requires 33 points (11 courses). Note that language courses taken to fulfill the

application requirements 1 above do not count toward the required points for the major. Students interested in the major are strongly encouraged to fulfill their science requirement with classes in human biology (e.g., *Human Species, Genes and Development*) or human psychology (e.g., *Mind, Brain, and Behavior*).

1. CPLS UN3900 INTRO TO ICLS, required for all ICLS majors and normally taken in the spring of the sophomore year.
2. Advanced courses as follows (please note that one course may be used to fulfill two of the advanced course requirements):

- **1 course with a CPLS or CL- course identifier: 3-4 points**

Students choose from among the wide range of courses sponsored by the Institute for Comparative Literature and Society or cross-listed between ICLS and other departments. These offerings change every semester and are listed on the ICLS website.

- **1 course with readings in a language other than English: 3-4 points**

Students may either take a course that is taught wholly or partially in a foreign language *or* a course taught in English for which they have received approval to do most of the reading in a foreign language.

- **3 courses that form the disciplinary/methodological nexus of the student's interests: 9-12 points**

Students will develop an individualized course of study at the nexus of health, society and the humanities in discussion with the DUS (Some example of prior constellations include but are not limited to: Literature and Medicine; Narrative Medicine; Medical Anthropology; History of Medicine; Comparative Public Health; Disability studies; Neuroscience; Biopolitics; Bioethics).

- **2 required core courses in Medical Humanities: 6 points**
- **2 courses in the biological or biochemical sciences: 6-8 points**

Students in the MedHum major should be versed in contemporary and classical debates and knowledge in the biological sciences. Students may take any two biology or biochemistry classes that relate to fundamental concepts in human biology.

3. Senior Seminar:

CPLS UN3991 Senior Seminar in Comparative Literature and Society

4. Senior thesis (optional).

CONCENTRATION IN COMPARATIVE LITERATURE AND SOCIETY

The concentration in Comparative Literature and Society consists of a minimum of 27 points or 9 courses, distributed as follows. Please note that courses taken to fulfill the application requirements do not count toward the major. With the exception of courses taken to satisfy the global core requirement, any double counting of courses to the CPLS major and another program or university requirement must be approved by the DUS. Requirements for the major and concentration in Comparative Literature and Society were updated in February 2019; please contact the director of undergraduate studies with any questions.

1. *CPLS UN3900 INTRO TO ICLS*, normally taken in the spring of the sophomore year;
2. Advanced courses as follows:
 - Two courses with a CPLS designator. CL-- courses, i.e. courses cross-listed between ICLS and other departments, may also be counted toward this requirement (6-8 points)
 - Two seminars in a humanities or social science discipline other than literature (e.g. Architecture, Anthropology, Art History, Economics, Gender & Sexuality Studies, History, Law, Linguistics, Music, Political Science, Race & Ethnicity Studies, Sociology...). The two courses must be grounded in the same disciplinary approach but don't have to be offered by the same department or program (6-8 points)
 - Two courses requiring readings in a language other than English (the two courses don't have to be in the same foreign language) (6-8 points)
 - One course focusing on a specific national or regional literature or culture, chosen from any discipline (3-8 points)
 - Senior Seminar in Comparative Literature and Society (CPLS V3991)

The senior seminar is taken in fall semester of the senior year. Students explore three areas of contemporary reflection in the field of comparative literature and society. Topics change yearly and are aligned with current ICLS research projects. Recent examples include: Bandung Humanism; Global Language Justice; A Safer Online Public Square

- (Optional) Senior Thesis (CPLS 3995) (3 points)

Students sign up for thesis credits (CPLS 3995) in the spring semester of the senior year but should begin to prepare in the fall semester. They work with an adviser from the Columbia/Barnard faculty who oversees the project and assigns the final grade. The DUS of ICLS is the second reader for all projects. The thesis must be a minimum of 35 pages double-spaced and must include footnotes and a bibliography. Translations, creative work and multi-media projects can be submitted with

the prior approval of the DUS. These must be accompanied by an introduction that situates the project intellectually. The thesis should be written in English unless a student receives permission from the DUS to write in another language. Note that the completed thesis is submitted before the end of the spring semester, usually by April 15. The thesis is considered as a 3-point course. It may be counted in lieu of a course taken to meet requirements 2, 3, 4, or 5.

Students should consult frequently with the DUS to ensure that their program of study develops in consonance with the intellectual project described in the focus statement that was presented as part of the admissions process. The faculty understands that this statement is itself a work in progress, but also that it serves as a useful guide to the student's academic pursuits and course selection.

Comparative Literature and Society concentration students should also consider the Barnard College course offerings in Comparative Literature. They are also strongly encouraged to avail themselves of the opportunity to study abroad.

SPRING 2021 COURSES

CLYD UN3000 Do you read Jewish? From Yiddish, to Yinglish, to Yiddler, in the US. 3.00 points.

Historically, Yiddish literature and culture was produced and consumed by people who were usually bi-lingual or multi-lingual, living in societies with a different majority language. Today, when only a small number of people read Yiddish fluently, most Yiddish literature and culture is consumed as translations or adaptations. Our course then, investigates, Yiddish literature and culture from the 20th and 21st centuries as a particularly fruitful site for thinking through questions of translation and adaptation theory by looking at writers such as I. B. Singer, and products of popular culture such as the musical *Fiddler on the Roof*/Fidler afn dakh or the movie *Yentl*. Through these readings we will investigate questions such as: What translation strategies were necessary for the world of Yiddish-speaking Europe to enter the realm of American-Jewish culture?

ITAL UN3665 "Against fiction?" Committed Narratives of the 21st Century. 3.00 points.

In the era of post-truth and fake news, has fiction become a luxury? How do cinema and literature adjust to what has been defined as the current "hunger for reality"? Can art reflect reality and promote social change? As phenomena of manipulation of information have changed the rhetorics of public discourse, narrative forms traditionally associated with fiction (novels, graphic novels or films) strive to appear objective, making use of documents, autobiographical accounts, testimonies and verifiable data, while non-fiction appropriates

the techniques of storytelling. This interdisciplinary course will explore the cross contamination of fiction and non-fiction with a special focus on hybrid narratives that make their meaning at the border between the literary and the journalistic, the imaginative and the factual. Considering the intersections among fictional narratives and other forms of expression and knowledge production (i.e. journalism, oral history, anthropology or documentary), we will look at contemporary works that experiment with new communicative forms to recount real events and to address socio-political issues. The course is suitable for students who have interests in all the humanities and social sciences. The use of narrative and storytelling in a wide array of fields, from medicine to human rights advocacy, has made it fundamental to reflect on how 'true' stories are created and on how they circulate. (No previous knowledge required. Taught in English.)

CPLS UN3995 SENIOR THESIS IN COMP LIT/SOC. 3.00 points.

This year-long, three-credit course is mandatory for students who will be writing their Senior Thesis in Comparative Literature and Society or in Medical Humanities. Students who wish to be considered for Departmental honors are required to submit a Senior Thesis. The thesis is a rigorous research work of approximately 40 pages, and it will include citations and a bibliographical apparatus. It may be written in English or, with the permission of the Director of Undergraduate Studies, in another language relevant to the students scholarly interests. Although modeled after an independent study, in which core elements of the structure, direction, and pace of the work are decided together by the student and their faculty thesis supervisor, students are nonetheless expected to complete certain major steps in the research and writing process according to the timeline outlined by the ICLS DUS

CPLS BC3997 Senior Seminar. 4 points.

Designed for students writing a senior thesis and doing advanced research on two central literary fields in the student's major. The course of study and reading material will be determined by the instructor(s) in consultation with students(s).

CLSL GU4009 Hegel: State, History, Freedom. 3.00 points.

This course is an advanced introduction to the reading of Hegel, via selections from his Lectures on the Philosophy of World History, The Phenomenology of Spirit, and The Philosophy of Right. The focus will be on Hegel's philosophy of history, his understanding of modernity and its particular kind of freedom, and the way that he saw that freedom to be actualized in the modern state. Prerequisite: undergraduates ought to have finished the core curriculum and taken at least one other philosophy class; at least one of PHIL 2201, 2301, or 3251 is highly recommended

CLPS GU4201 Post-Freud. 4 points.

This course examines psychoanalytic movements that are viewed either as post-Freudian in theory or as emerging after Freud's time. The course begins by considering the ways Freud's cultural and historical surround, as well as the wartime diaspora of the European psychoanalytic community, shaped Freudian and post-Freudian thought. It then focuses on significant schools and theories of psychoanalysis that were developed from the mid 20th century to the present. Through readings of key texts and selected case studies, it explores theorists' challenges to classical thought and technique, and their reconfigurations, modernizations, and total rejections of central Freudian ideas. The course concludes by looking at contemporary theorists' moves to integrate notions of culture,

concepts of trauma, and findings from neuroscience and attachment research into the psychoanalytic frame.

CPLS GU4315 Multilingual Technologies and Language Diversity. 4 points.

Innovations in digital technologies have shown their potential to be at times breathtakingly beneficial, and at others divisive or troubling. With regard to digital technologies' impact on the ecosystem of language diversity, evidence suggests that new technologies are one contributor to the decline and predicted extinction of 50-90% of the world's languages this century. Yet digital innovations supporting a growing number of languages also have the potential to bolster language diversity in ways unimaginable a few years ago. Will innovations in multilingual natural language processing bring about a renaissance of language diversity, as users no longer need to rely on English and other dominant languages? To address this question, this course will introduce a dual view on language diversity: 1) a typology of language vitality and endangerment and 2) a resource-centric typology (low-resource vs. high-resource) regarding the availability of data resources to develop computational models for language analysis. This course will address the challenge of scaling natural language processing technologies developed mostly for English to the rich diversity of human languages. The resource-centric typology will also contribute to the dialogue of what is "Data Science." Much research has been dedicated to the "Big Data" scenario; however "Small Data" poses equally challenging problems, which this course will highlight. This course brings data and computational literacy about multilingual technologies to humanities students, while also exposing computer science and data science students to ethical, cultural, business, and policy issues within the context of multilingual technologies.

CPLS GU4325 Abolition Medicine: Medical Racisms and Anti-Racisms. 3.00 points.

In 1935, WEB Dubois wrote about abolition democracy: an idea based not only on breaking down unjust systems, but on building up new, antiracist social structures. Scholar activists like Angela Davis, Ruth Gilmore and Mariame Kaba have long contended that the abolition of slavery was but one first step in ongoing abolitionist practices dismantling racialized systems of policing, surveillance and incarceration. The possibilities of prison and police abolition have recently come into the mainstream national consciousness during the 2020

resurgence of nationwide Black Lives Matters (BLM) protests. As we collectively imagine what nonpunitive and supportive community reinvestment in employment, education, childcare, mental health, and housing might look like, medicine must be a part of these conversations. Indeed, if racist violence is a public health emergency, and we are trying to bring forth a “public health approach to public safety” – what are medicine’s responsibilities to these social and institutional reinventions? Medicine has a long and fraught history of racial violence. It was, after all, medicine and pseudoscientific inquiry that helped establish what we know as the racial categorizations of today: ways of separating human beings based on things like skin color and hair texture that were used (and often continue to be used) to justify the enslavement, exclusion, or genocide of one group of people by another. Additionally, the history of the professionalization of U.S. medicine, through the formation of medical schools and professional organizations as well as and the certification of trained physicians, is a history of exclusion, with a solidification of the identity of “physician” around upper middle class white masculinity. Indeed, the 1910 Flexner Report, whose aim was to make consistent training across the country’s medical schools, was explicit in its racism. From practices of eugenic sterilization, to histories of experimentation upon bodies of color, medicine is unfortunately built upon racist, sexist and able-ist practices. This course is built on the premise that a socially just practice of medicine is a bioethical imperative. Such a practice cannot be achieved, however, without examining medicine’s histories of racism, as well as learning from and building upon histories of anti-racist health practice. The first half of the semester will be dedicated to learning about histories of medical racism: from eugenics and racist experimentation to public health xenophobic fear mongering. The second half of the semester will be dedicated to examining medical and grassroots anti-racist practices: from the free health clinics and hospital takeovers of the Black Panther and Young Lords Parties, to environmental activism in Flint and the Sioux Rock Reservation to antiracist AIDS and COVID activism

CLGR GU4420 Walter Benjamin. 3 points.

In recent years, Walter Benjamin has become one of the most quoted media theorists. His philosophy of technology is not as widely known as the concept of aura he developed in his essay *The Work of Art in the Age of Its Technological Reproducibility*. The contemporary relevance of his philosophy of technology lies in the fact that Benjamin establishes a connection between technology and different forms of habitation, and between the latter and the concept of habit (*Gewohnheit*), which is etymologically related to the concept of habitation (*Wohnen*). This enables a comparison of Benjamin’s approach with the philosophies of technology developed by Heidegger, Deleuze/Guattari, and Simondon, all of whom

associate technology with the shaping of environments and the problem of poesis. In our seminar, we will reconstruct Benjamin’s media anthropology of technology through a close reading of his diaries and essays and compare it to philosophies of technology very much being discussed today.

CLPS GU4510 Jacques Lacan: An introduction to his work . 4 points.

Jacques Lacan (1901 – 1981) was without any doubt the most influential psychoanalyst since Sigmund Freud. A meticulous yet inventive reader of the founder of psychoanalysis, he opened himself up to a panoply of sciences, philosophies, and other discourses as well as to political events and social phenomena in order to attune psychoanalysis not only to its own internal exigencies but also to those that he considered to be the ones of his time.

We will read Lacan according to this double exigency: to formalize anew its own logic, methodology, and construction of objects, which proceed “*sui generis*” as Freud said; and to put them in friction with some of the phenomena and structural determinants of what seems to impose itself on us today: the erosion of discourse as social bond in a time of an ever increasing number of displaced people; a radical change of the status of speech and the “letter”—as well as literature—in the hyper-digitalized world; the renewed enigma of sex and bodily enjoyment in the context of a tele-techno-medical science becoming increasingly autonomous; the status of “nature” as that what might survive only in being destroyed. In short: What concepts are needed to think the “unconscious” today?

The course will be proposed as an introduction to Lacan for which no previous acquaintance with his work is required. It will cover texts and seminars from all the periods of his work with a focus on the those from the 1970s.

CPLS GU4732 Matters of Life/Death. 3.00 points.

The imbricated crises of a global pandemic and the legacies of structural anti-Black racism necessitate reflection, at once political and philosophic. One might argue that they reframe twentieth century French traditions of thought as a sustained critical reflection on *le vivant* (life); the way society classifies and treats its dead, its “living dead” or excluded members; the political economy of death and life management; death sentences (both legal and literary.) In the twenty first century, Black feminist thought addresses the ecological catastrophe of the pandemic and the resultant unequal distribution of life and death, pressuring what is at stake under the philosopheme of the

“human.” This seminar is structured as a conversation between representative thinkers from each “tradition.” Yet neither tradition has discrete borders; twenty first century thinkers inherit from their French predecessors even as they contest and bring to light fraught presuppositions. We might also say, with Jacques Derrida, that the twentieth century French thinkers -Bergson, Canguilhem, Deleuze, Foucault- inherit from the future- from Hortense Spillers, Alexander Weheliye, Souleymane Bachir Diagne, Octavia Butler, Fred Moten. How might this urgent reframing and conversation enable a critical resistance?

CPLS GU4800 Advanced Topics in Medical Humanities. 3.00 points.

Not offered during 2020-21 academic year.

It is impossible to study Medical/Health Humanities now without emphasizing the COVID-19 pandemic and the social disparities it casts into relief. This class studies how the arts can provide access to voices and perspectives on illness and health disparities that might be overlooked in news coverage, historical and sociological research on the current pandemic. This class begins by introducing the field of Medical/Health Humanities and the critical questions and tools it provides. We will use these perspectives to study narrative and visual representations in different media that address the intersections of social inequity, biomedical pandemic, and aesthetic forms. Our study of representations will be divided into four parts. 1.The last great global pandemic. Representations of AIDS epidemic highlight the impact of social stigma on public health and medical care, as well as the use of art as an agent of activism and change. We will consider such works as Tony Kushner’s *Angels in America*, Charles Burns’s *Black Hole*, short stories, and the art produced within and in response to the ACT-UP movement. 2.Race and medical inequity. We study the racialization of genetic science, and its connection new forms of white supremacy and a history of racialized health disparities. Our readings include Rebecca Skloot’s *Immortal Life of Henrietta Lacks*, the poetry of Maya Angelou and Paul Lawrence Dunbar, and the speculative fiction of N.K. Jemison. 3.Fictional representations of pandemic that illuminate real life disparities in health and access to medical care will set the stage for our study of the current pandemic. We will read Emily St. John Mandel’s *Station Eleven* and Colson Whitehead’s zombie novel, *Zone One*. 4.Literary representations of COVID, as represented by the short stories in *The Decameron Project*, as well as short film and visual arts. Seminar style classes will emphasize student interests and direction. They will be heavily discussion-based with a combination of full class and smaller breakout formats. Assignments include an in-class presentation and short paper on one week’s materials; a

comparative narrative analysis, and an imaginative final project with a critical introduction

FALL 2020 COURSES

ENGL UN3648 Comics, Health, and Embodiment. 4 points.

Deformed, grotesque, super/transhuman and otherwise extraordinary bodies have always been a central feature of comics. However, the past ten years have seen a surge of graphic narratives that deal directly with experiences of health and illness, and that are recognized as having significant literary value. This course will focus on graphic narratives about healthcare, illness, and disability with particular attention to questions of embodied identities such as gender, sexuality, race, and age. Primary texts will include the work of Alison Bechdel, Roz Chast, CeCe Bell, David Small, Allie Brosch, and Ellen Fournery. We will study the vocabulary, conventions, and formal properties of graphic literature, asking how images and text work together to create narrative. We will consider whether graphic narrative might be especially well suited to representations of bodily difference; how illness/disability can disrupt conventional ideas about gender and sexuality; how experiences of the body as a source of pain, stigmatization, and shame intersect with the sexualized body; and how illness and disability queer conventional sexual arrangements, identities, and attachments. While studying the construction of character, narrative, framing, color, and relationship between visual and print material on the page, students will also produce their own graphic narratives.

ANTH UN3664 FIELDWORK AT EDGE OF THE VIDEO FRAME. 4.00 points.

Today, we have entered a dramatically transformed world where unexpected pivot events, globalized supply chain economics, and unraveling social formations are moving people and community into a fully online world. The field of Anthropology now faces the idea of “fieldwork” that is not located in a geographic space. Anthropologists have started conducting ethnography of online spaces such as digital gaming and hacker communities. This course examines moving image as a space where fieldwork can be done, by working with materials stored online, in archives, and shared on physical media. The practitioners in this field are outside the academy—filmmakers, installation artists, performers, online vloggers, social media influencers—who work with archives created by others. We will examine evolving forms of visual culture, in museums, streaming media, mobile devices, zoomcasting,

etc., and practitioners who rework found footage to build new meanings. Anthropology has a tradition of parsing moving image, especially because pioneering ethnographic films cannot be screened today without contextualization. We will consider the concept of “edge of frame,” whereby materials captured by a journalist decades ago are chosen for new meanings by an artist in a radically different context. We will trace a history of human tendency toward media remix, in the context of rapid technology changes, new historical conjunctures, changing conceptions of social forms, and new forms of public gathering, as mediated by anthropology. We will read accounts from film studies, anthropology, and history, interspersed with viewing films, browsing documentations of art installations, and zoom sessions with practicing filmmakers and artists.

Fall 2020: ANTH UN3664

HIST BC3825 RACE, CASTE, AND THE UNIVERSITY: B. R. AMBEDKAR AT COLUMBIA. 4 points.

B. R. Ambedkar is arguably one of Columbia University’s most illustrious alumni, and a democratic thinker and constitutional lawyer who had enormous impact in shaping India, the world’s largest democracy. As is well known, Ambedkar came to Columbia University in July 1913 to start a doctoral program in Political Science. He graduated in 1915 with a Masters degree, and got his doctorate from Columbia in 1927 after having studied with some of the great figures of interwar American thought including Edwin Seligman, James Shotwell, Harvey Robinson, and John Dewey.

This course follows the model of the Columbia University and Slavery course and draws extensively on the relevant holdings and resources of Columbia’s RBML, [Rare Books and Manuscript Library] Burke Library (Union Theological Seminar), and the Schomburg Center for Research in Black Culture among others to explore a set of relatively understudied links between Ambedkar, Columbia University, and the intellectual history of the interwar period. Themes include: the development of the disciplines at Columbia University and their relationship to new paradigms of social scientific study; the role of historical comparison between caste and race in producing new models of scholarship and political solidarity; links between figures such as Ambedkar, Lala Lajpat Rai, W. E. B. Du Bois and others who were shaped by the distinctive public and political culture of New York City, and more.

This is a hybrid course which aims to create a finding aid for B. R. Ambedkar that traverses RBML private papers. Students will engage in a number of activities towards that purpose. They will attend multiple instructional sessions at the RBML to train students in using archives; they will make public presentations on their topics, which will be archived in video form; and students will produce digital essays on a variety of themes and topics related to the course. Students will work collaboratively

in small groups and undertake focused archival research. This seminar inaugurates an on-going, multiyear effort to grapple with globalizing the reach and relevance of B. R. Ambedkar and to share our findings with the Columbia community and beyond. Working independently, students will define and pursue individual research projects. Working together, the class will create digital visualizations of these projects.

SPAN UN3887 The End of Monuments. 3.00 points.

What is the end of a monument, and when does it happen? On October 12th, 1992, on the quincennial anniversary of Christopher Columbus’ arrival in the Caribbean, the Organizacio#n Campesina Emiliano Zapata marched into the city of San Cristo#bal de Las Casas and knocked down the statue of Diego de Mazariegos. In subsequent reporting on the event, a participant named Mariano argued that the monument was a “symbol of the conquest, colonialism, exploitation, racism and plunder,” and that toppling the statue represented five centuries of popular, indigenous struggle against these forms of repression (cuartopoder.mx). Criticism of these spectacular instances of popular resistance often seize on their inability to destabilize the structural edifice underlying the material symbol, as if the monument were only the tip of the iceberg. As recent movements across Latin America and the US have rearticulated critiques of monuments as place markers for ideologies of settler colonialism, capitalism, anti-blackness and patriarchal notions of power, however, they have also intersected with movements against land theft, resource and labor rights, reproductive justice, abolition, and self-determination. In the process, these popular debates have engendered new ways of thinking about social space and other forms of monumentalism that claim to be reparative, critical, functional, or ephemeral in their engagement with local history, existing or destroyed monuments, and the built environment. In this seminar, we will explore historical and contemporary issues around space, place, memory, and belonging, in order to understand what forms of cultural practice emerge through monumentalism. We will also examine how community actors, activists, writers, artists, and political figures engage with the spatial politics of memory, and actualize, complicate or attempt to dismantle legacies of settler colonialism, white nationalism and resource extraction. We will take as our point of departure an understanding of monuments and their meaning on the Columbia/Barnard campus, and in the City of New York more broadly. Then, we will consider a range of theorizations and interventions on monuments in Buenos Aires, Brazil, Chiapas, Ciudad Jua#rez, France, Ibadan, Lof Campo Maripe, Nassau, and beyond. Later, we will question the problem of aesthetics and the role of art discourse in determining the character or qualities of a monument. Finally, we will discuss possible relationships between archives, memorials, and monumentality. Our work in this course will involve paying close attention to the objectives and outcomes of monument projects and designing our own interventions to understand their stakes and implications. Not only will we understand the intentions o f different monument forms, but we will learn how to manipulate them to our own ends. Students will build

substantive skills like community engagement, essay writing, editing, time management, research, publication design and distribution that are crucial to understanding (and working in) the cultural field. Moreover, students will practice diverse research methodologies including but not limited to close-reading, interview, community-based and archival research that they can leverage to produce scholarship accessible to our communities outside of the classroom

CLME UN3928 Arabic Prison Writing. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies the genealogy of the prison in Arab culture as manifested in memoirs, narratives, and poems. These cut across a vast temporal and spatial swathe, covering selections from the Quran, Sufi narratives from al-Hallaj oeuvre, poetry by prisoners of war: classical, medieval, and modern. It also studies modern narratives by women prisoners and political prisoners, and narratives that engage with these issues. Arabic prison writing is studied against other genealogies of this prism, especially in the West, to map out the birth of prison, its institutionalization, mechanism, and role. All readings for the course are in English translations.

CPLS UN3980 ABOLITION: A SOCIAL JUSTICE PRACTICUM. 3 points.

This course will explore the social justice road to punitive abolition—to the abolition of capital punishment and the dominant punitive punishment paradigm in the United States. It will investigate how abolition of the death penalty might be achieved in this country, but also what it might mean to imagine abolition in the context of policing, of the prison, and also of punishment more broadly.

The United States incarcerates more of its own than any other country in the world and than any other civilization in history. With over 2,600 inmates on death row, 2.2 million people behind bars, another 5 million people on probation or parole, and over 70 million people in the FBI's criminal record database, this country now operates a criminal justice system of unparalleled punitiveness. The burden of this system has fallen predominantly on poor communities of color. In fact, in some striking ways, this country's criminal justice system and reliance on mass incarceration have replaced chattel slavery. As Bryan Stevenson explains, "Slavery didn't end in 1865. It just evolved."

This course will explore how the country can move from a punitive paradigm to a new paradigm that favors instead education and well-being. It will investigate: (1) how to chart a social justice path toward abolition of the death penalty; (2) how to reimagine the criminal justice system so that it is no longer based on a punitive paradigm; and (3) what it would mean to imagine abolition more broadly of policing and punishment.

CPLS UN3991 Senior Seminar in Comparative Literature and Society. 3 points.

Prerequisites: CPLS UN3900

The senior seminar is a capstone course required of all CLS/MLA majors. The seminar provides students the opportunity to discuss selected topics in comparative literature and society and medical humanities in a cross-disciplinary, multilingual, and global perspective. Students undertake individual research projects while participating in directed readings and critical dialogues about theory and research methodologies, which may culminate in the senior thesis. Students review work in progress and share results through weekly oral reports and written reports.

CLIA GU4023 Travel Literature in and from the Mediterranean, 18th-19th centuries. 3 points.

This course will study various forms of travel writing within, from, and to the Mediterranean in the long nineteenth century. Throughout the semester, you will read a number of travel accounts to develop your understanding of these particular sources and reflect on the theoretical discussions and the themes framing them, namely orientalism, postcolonial studies, imaginative geographies, literature between fiction and reality, Romantic and autobiographical writing, gender, sexuality and the body, the rise of archeology, adventurism, mass migration and tourism. We will focus on Italian travel writers visiting the Ottoman Empire and the Americas (Cristina di Belgioioso, Gaetano Osculati, Edmondo de Amicis) and others visiting the Italian peninsula (Grand Tourists, Madame De Staël), and we will study the real or imaginary travels of French, British and American writers to the Eastern Mediterranean and to antique

and holy lands (Jean-Jacques Barthélemy, Count Marcellus, Austen Henry Layard, Lord Byron, Mark Twain), as well as Arabic travel writers to the West (Rif##ah R#fi# al-#ah##w#).

CLEN GU4199 Literature and Oil. 3 points.

This course will investigate the connections between literary/cultural production and petroleum as the substance that makes possible the world as we know it, both as an energy source and a component in the manufacture of everything from food to plastic. Our current awareness of oil's scarcity and its myriad costs (whether environmental, political, or social) provides a lens to read for the presence (or absence) of oil in texts in a variety of genres and national traditions. As we begin to imagine a world "beyond petroleum," this course will confront the ways in which oil shapes both the world we know and how we know and imagine the world. Oil will feature in this course in questions of theme (texts "about" oil), of literary form (are there common formal conventions of an "oil novel"?), of interpretive method (how to read for oil), of transnational circulation (how does "foreign oil" link US citizens to other spaces?), and of the materiality (or "oiliness") of literary culture (how does the production and circulation of texts, whether print or digital, rely on oil?).

CLPS GU4200 FREUD. 3.00 points.

Clinic, Culture, Cruelty: With these three terms one could indicate both the wide range of Freud's work and the specific force it kept addressing without shying away from the theoretical and practical consequences that came with it. In Civilization and its Discontent Freud develops—in part openly, in part secretly—a peculiar, paradoxical and abyssal logic in order to formalize how culture (or civilization) is in a mortal battle with itself. Even more so, culture is this battle; and civilization is the result of a violence the sole aim and source of which is the destruction of civilization. The determining factors of this logic form the proper object of psychoanalysis which had developed out of clinical concerns; and what occurs here as "violence," or "destruction," as it does in several texts whose themes are cultural, historical, or sociological, is given multiple other names in all of Freud's work or is linked to such names: the unconscious, the drive, libido, Eros, Thanatos, sexuality, narcissism, masochism, even hysteria, obsession and psychosis. All these terms mark instances of the same logic in which what we call the "sexual" and "language" are entangled with a "cruelty" that is neither the opposite of pleasure nor

can be derived from any supposedly natural ground. In this seminar, we will trace this logic as well as its material in its reiterations, displacements, and reinventions from Freud's clinical writings, through his constructions and theories of the "psyche," to his analyses and speculations in civilization and history. Freud's text will be read closely, with the attention to details that he himself performed as a virtue and a method. No previous acquaintance with Freud or psychoanalysis is required—only a mind as open as possible to the surprises over what they have to offer today

MATH GU4200 MATHEMATICS AND THE HUMANITIES. 4.00 points.

This course is being taught by two senior faculty members who are theorists and practitioners in disciplines as different as mathematics and literary criticism. The instructors believe that in today's world, the different ways in which theoretical mathematics and literary criticism mold the imaginations of students and scholars, should be brought together, so that the robust ethical imagination that is needed to combat the disintegration of our world can be produced. Except for the length of novels, the reading is no more than 100 pages a week. Our general approach is to keep alive the disciplinary differences between literary/philosophical (humanities) reading and mathematical writing. Some preliminary questions we have considered are: the survival skills of the logicist school over against the Foundational Crisis of the early 20th century; by way of Wittgenstein and others, we ask, Are mathematical objects real? Or are they linguistic conventions? We will consider the literary/philosophical use of mathematics, often by imaginative analogy; and the role of the digital imagination in the humanities: Can so-called creative work as well as mathematics be written by machines? Guest faculty from other departments will teach with us to help students and instructors understand various topics. We will close with how a novel animates "science" in prose, stepping out of the silo of disciplinary mathematics to the arena where mathematics is considered a code-name for science: Christine Brooke-Rose's novel Subscript

CLRS GU4213 Cold War Reason: Cybernetics and the Systems Sciences. 3.00 points.

The Cold War epoch saw broad transformations in science, technology, and politics. At their nexus a new knowledge was proclaimed, cybernetics, a putative universal science of communication and control. It has disappeared so completely

that most have forgotten that it ever existed. Its failure seems complete and final. Yet in another sense, cybernetics was so powerful and successful that the concepts, habits, and institutions born with it have become intrinsic parts of our world and how we make sense of it. Key cybernetic concepts of information, system, and feedback are now fundamental to our basic ways of understanding the mind, brain and computer, of grasping the economy and ecology, and finally of imagining the nature of human life itself. This course will trace the echoes of the cybernetic explosion from the wake of World War II to the onset of Silicon Valley euphoria

CLPS GU4251 Global Freud. 3 points.

Prerequisites: Prior study of Freudian theory and psychoanalysis.

While there is a general familiarity with the history of psychoanalysis's spread from Vienna throughout Europe, and from the European centers of psychoanalysis to the US, less is known about its broader internationalization. This course explores the globalization of Freudian theory, and the varying ways it has been read and deployed by intellectuals, artists, and political activists--among others--in various parts of the world. Whether its central appeal was to pre-Revolution Russian intellectuals, who wished to assert their cosmopolitanism and kinship with Europe; to Mexican judges, who employed it to analyze criminal defendants; or to Egyptian experts in dreams, who added this tool to their analytic toolkit, psychoanalysis lent itself to novel, and often contrasting, interpretations and uses.

In this class, we will examine how Freud's universal model of the mind and theory of the subject were refashioned and repurposed to address specific social problems and to advance particular political projects, and how they were revised to conform to local concepts of emotion and the self. We will consider how a system of thought grounded in secularity and individualism was adapted for faith-based and communitarian societies. In addition, we will look into the ways Freudian notions of the unconscious intersected with existing philosophical traditions, and how other cornerstones of psychoanalytic thought were blended with local interpretive practices. Finally, we will address a number of issues that have arisen in the global transmission of psychoanalysis, including problems in the translation of Freudian theory from the original German, and the formation and ongoing conflicts of the International Psychoanalytic Association.

CLGM GU4300 Retranslation: Worlding C. P. Cavafy. 4 points.

Focusing on a canonical author is an immensely productive way to explore translation research and practice. The works of Sappho, Dante, Rilke, Césaire or Cavafy raise the question of reception in relation to many different critical approaches and illustrate many different strategies of translation and adaptation. The very issue of intertextuality that challenged the validity of author-centered courses after Roland Barthes's proclamation of the death of the author reinstates it if we are willing to engage the oeuvre as an on-going interpretive project. By examining the poetry of the Greek Diaspora poet C. P. Cavafy in all its permutations (as criticism, translation, adaptation), the Cavafy case becomes an experimental ground for thinking about how a canonical author can open up our theories and practices of translation. For the final project students will choose a work by an author with a considerable body of critical work and translations and, following the example of Cavafy and his translators, come up with their own retranslations. Among the materials considered are commentary by E. M. Forster, C. M. Bowra, and Roman Jakobson, translations by Edmund Keeley and Philip Sherrard, James Merrill, Marguerite Yourcenar, and Daniel Mendelsohn, poems by W.H. Auden, Lawrence Durrell, and Joseph Brodsky, and visual art by David Hockney, and Duane Michals

CLFR GU4500 Pandemics in Francophone Literature and History. 3 points.

In this course we explore the history of epidemics and medical confinement in France and some of its colonies/former colonies, from the 1720 plague in Marseille to recent outbreaks of Ebola and COVID-19. We consider how disease, contagion, quarantine and confinement have been understood and represented, drawing on contemporary and later sources that include medical treatises, news media, personal accounts, fictional works, films and visual depictions such as paintings, illustrations and cartoons. Though we focus on disease and representation in the French and 'francophone' context, the course also has a comparative dimension: we turn to other historical contexts and texts associated with them when these connections are illuminating. The course is organized around a series of five case studies centering on different contagious diseases and their historical context. We will see that each of these pandemics raises its own moral, political, social and historiographical questions, though there are also connecting threads that traverse historical periods, including the linkage between epidemics and the othering of certain population groups; the intersection of colonialism, revolution and warfare with disease and the introduction of new medical protocols, and the gradual emergence of biopolitics as a framework for the relationship of individual to state.

Discourses about contagious disease have always had a 'literary' dimension, making regular use of metaphor and allegory. This course explores the intersections of history and literature, considering not only these recurrent tropes but also how writers and, to a lesser extent, film-makers have explored the experiential, ethical and political aspects of illness and contagion. Without making general claims about the specificity of literature, we approach literary texts as sites that condense and catalyze philosophical and political reflection and debate. The course examines chapters in the history of disease and medicine but it also has a historiographical component as we consider how representations of epidemics have changed over time and to what extent the historical study of illness, medicine and public health helps us to think about the present.

CLEN GU4550 Narrative and Human Rights. 3 points.

(Lecture). We can't talk about human rights without talking about the forms in which we talk about human rights.

This course will study the convergences of the thematics, philosophies, politics, practices, and formal properties of literature and human rights. In particular, it will examine how literary questions of narrative shape (and are shaped by) human rights concerns; how do the *forms* of stories enable and respond to forms of thought, forms of commitment, forms of being, forms of justice, and forms of violation? How does narrative help us to imagine an international order based on human dignity, rights, and equality? We will read classic literary texts and contemporary writing (both literary and non-literary) and view a number of films and other multimedia projects to think about the relationships between story forms and human rights problematics and practices. Likely literary authors: Roberto Bolaño, Miguel de Cervantes, Assia Djebar, Ariel Dorfman, Slavenka Drakulic, Nuruddin Farah, Janette Turner Hospital, Franz Kafka, Sahar Kalifeh, Sindiwe Magona, Maniza Naqvi, Michael Ondaatje, Alicia Partnoy, Ousmane Sembène, Mark Twain We will also read theoretical and historical pieces by authors such as Agamben, An-Na'im, Appiah, Arendt, Balibar, Bloch, Chakrabarty, Derrida, Douzinas, Habermas, Harlow, Ignatieff, Laclau and Mouffe, Levinas, Lyotard, Marx, Mutua, Nussbaum, Rorty, Said, Scarry, Soyinka, Spivak, Williams.

AHIS GU4646 Foucault and the Arts. 4 points.

Michel Foucault was a great historian and critic who helped change the ways research and criticism are done today – a

new 'archivist'. At the same time, he was a philosopher. His research and criticism formed part of an attempt to work out a new picture of what it is to think, and think critically, in relation to Knowledge, Power, and Processes of Subjectivization. What was this picture of thought? How did the arts, in particular the visual arts, figure in it? How might they in turn give a new image of Foucault's kind of critical thinking for us today? In this course, we explore these questions, in the company of Deleuze, Agamben, Rancière and others thinkers and in relation to questions of media, document and archive in the current 'regime of information'. The Seminar is open to students in all disciplines concerned with these issues.

CPLS GU4810 Theories of the Subject. 4 points.

This seminar will revisit some major texts and concerns in the theoretical humanities that develop genealogical, psychoanalytical or political theories of the subject, roughly from Marx until today. The goal is to come to a critical understanding of the centrality of this notion of the subject as one of the founding concepts of modernity, as well as to draw out all the consequences of its crisis in radical humanistic (or even so-called posthumanist) thought today. Thinkers to be discussed further include Freud, Foucault, Badiou, Butler, Althusser, Rozitchner, Žižek and Zupan#i#.

COMPUTER SCIENCE

Departmental Office: 450 Computer Science Building;
212-939-7000

<http://www.cs.columbia.edu/>

Director of Undergraduate Studies: Dr. Jae Woo Lee, 715
CEPSR; 212-939-7066; jae@cs.columbia.edu

The majors in the Department of Computer Science provide students with the appropriate computer science background necessary for graduate study or a professional career. Computers impact nearly all areas of human endeavor. Therefore, the department also offers courses for students who do not plan a computer science major or concentration. The computer science majors offer maximum flexibility by providing students with a range of options for program specialization. The department offers four majors: computer science; information science; data science; and computer science-mathematics, offered jointly with the Mathematics Department.

COMPUTER SCIENCE MAJOR

Students study a common core of fundamental topics, supplemented by a track that identifies specific areas for deeper study. The foundations track prepares students for advanced work in fundamental, theoretical, and mathematical aspects of computing, including analysis of algorithms, scientific computing, and security. The systems track prepares students for immediate employment in the computer industry as well as advanced study in software engineering, operating systems, computer-aided digital design, computer architecture, programming languages, and user interfaces. The intelligent systems track provides specialization for the student interested in natural language processing and systems capable of exhibiting “human-like” intelligence. The applications track is for students interested in the implementation of interactive multimedia content for the Internet and wireless applications. The vision, graphics, interaction, and robotics track exposes students to computer vision, graphics, human-computer interaction, and robotics.

A combination track is available to students who wish to pursue an interdisciplinary course of study combining computer science and another field in the arts, humanities, mathematics, natural sciences, or social sciences. A student planning a combination track should be aware that one additional course is required to complete this option.

INFORMATION SCIENCE MAJOR

Information science is an interdisciplinary major designed to provide a student with an understanding of how information is organized, accessed, stored, distributed, and processed in strategic segments of today’s society. Recent years have seen an explosive growth of on-line information, with people of all ages and all walks of life making use of the World Wide Web and other information in digital form.

This major puts students at the forefront of the information revolution, studying how on-line access touches on all disciplines and changing the very way people communicate. Organizations have large stores of in-house information that are crucial to their daily operation. Today’s systems must enable quick access to relevant information, must ensure that confidential information is secure, and must enable new

forms of communication among people and their access to information.

The information science major can choose a scientific focus on algorithms and systems for organizing, accessing, and processing information, or an interdisciplinary focus in order to develop an understanding of, and tools for, information modeling and use within an important sector of modern society such as economics or health.

ADVANCED PLACEMENT

The department grants 3 points for a score of 4 or 5 on the AP Computer Science exam along with exemption from COMS W1004 Introduction to Computer Science and Programming in Java. However, we still recommend that you take COMS W1004 or W1007 even if you have credits from the CS AP exam. COMS W1007 Honors Introduction to Computer Science is recommended if you scored 5 on the AP exam, and COMS W1004 is recommended if you scored 4.

PRE-INTRODUCTORY COURSES

COMS W1004 is the first course in the Computer Science major curriculum, and it does not require any previous computing experience. Before taking COMS W1004, however, students have an option to start with one of the pre-introductory courses: ENGI E1006 or COMS W1002.

ENGI E1006 Introduction to Computing for Engineers and Applied Scientist is a general introduction to computing for STEM students. ENGI E1006 is in fact a required course for all engineering students. COMS W1002 Computing In Context is a course primarily intended for humanities majors, but it also serves as a pre-introductory course for CS majors. ENGI E1006 and COMS W1002 do not count towards Computer Science major.

LABORATORY FACILITIES

The department has well-equipped lab areas for research in computer graphics, computer-aided digital design, computer vision, databases and digital libraries, data mining and knowledge discovery, distributed systems, mobile and wearable computing, natural language processing, networking, operating systems, programming systems, robotics, user interfaces, and real-time multimedia.

Research labs contain several large Linux and Solaris clusters; Puma 500 and IBM robotic arms; a UTAH-MIT dexterous hand; an Adept-1 robot; three mobile research robots; a real-time defocus range sensor; interactive 3-D graphics workstations with 3-D position and orientation trackers; prototype wearable computers, wall-sized stereo projection systems; see-through head-mounted displays; a networking testbed with three Cisco 7500 backbone routers, traffic generators; an IDS testbed with secured LAN, Cisco routers, EMC storage, and Linux servers; and a simulation testbed with several Sun servers and Cisco Catalyst routers. The department

uses a SIP IP phone system. The protocol was developed in the department.

The department's computers are connected via a switched 1Gb/s Ethernet network, which has direct connectivity to the campus OC-3 Internet and internet 2 gateways. The campus has 802.11b/g wireless LAN coverage.

The research facility is supported by a full-time staff of professional system administrators and programmers.

GUIDELINES FOR ALL COMPUTER SCIENCE MAJORS AND CONCENTRATORS

Courses

Students may receive credit for only one of the following two courses:

- COMS W1004 Introduction to Computer Science and Programming in Java
- COMS W1005 Introduction to Computer Science and Programming in MATLAB.

Students may receive credit for only one of the following three courses:

- COMS W3134 Data Structures in Java
- COMS W3136 Data Structures with C/C++
- COMS W3137 Honors Data Structures and Algorithms

However, COMS W1005 and COMS W3136 cannot be counted towards the Computer Science major, minor, and concentration.

Transfer Credit

As a rule, no more than 12 transfer credits are accepted toward the major.

Grading

A maximum of one course worth no more than 4 points passed with a grade of D may be counted toward the major or concentration.

MAJOR IN COMPUTER SCIENCE

Please read *Guidelines for all Computer Science Majors and Concentrators* above.

All majors should confer with their program adviser each term to plan their programs of study. Students considering a major in computer science are encouraged to talk to a program adviser during their first or second year. A typical program of study is as follows:

Program of Study

Computer Science Core (22-24 points)

For students who declare in Spring 2014 and beyond:

ENGI E1006	Introduction to Computing for Engineers and Applied Scientists (recommended but not required)
------------	---

First Year

COMS W1004	Introduction to Computer Science and Programming in Java
or COMS W1007	Honors Introduction to Computer Science

Sophomore Year

COMS W3134	Data Structures in Java
or COMS W3137	Honors Data Structures and Algorithms

COMS W3157	Advanced Programming
------------	----------------------

COMS W3203	DISCRETE MATHEMATICS
------------	----------------------

Junior and Senior Year

Select the remaining required core courses:

COMS W3261	Computer Science Theory
CSEE W3827	Fundamentals of Computer Systems

Select one of the following courses:

MATH UN2010	LINEAR ALGEBRA
-------------	----------------

APMA E2101	Introduction to Applied Mathematics
------------	-------------------------------------

APMA E3101	Linear Algebra
------------	----------------

STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS
-------------	--

For students who declared prior to Spring 2014:

First Year

COMS W1004	Introduction to Computer Science and Programming in Java
------------	--

Sophomore Year

COMS W1007	Honors Introduction to Computer Science
------------	---

COMS W3137	Honors Data Structures and Algorithms
------------	---------------------------------------

COMS W3157	Advanced Programming
------------	----------------------

COMS W3203	DISCRETE MATHEMATICS
------------	----------------------

Junior and Senior Year

COMS W3261	Computer Science Theory
CSEE W3827	Fundamentals of Computer Systems

In addition to the CS Core (22-24 points), all CS majors must complete the Calculus Requirement (3 points) and a Track Requirement (15 or 18 points). The CS major therefore requires 40-45 points total.

Mathematics (3 points)

Calculus II or Calculus III.

Note that Calculus III does NOT depend on Calculus II. You can take either Calculus II or III, but we recommend Calculus III, which covers topics that are a bit more relevant for upper-level Computer Science courses.

If you have received equivalent credits for Calculus I & II already (through a 4 or 5 on the AP Calculus exam for example), you are not required to take any more Calculus courses. But we recommend taking one more semester of Calculus, either Math UN1201 Calculus III or APAM E2000 Multivariate Calculus for Engineers and Scientists. APAM E2000 covers relevant topics from Calculus III and IV.

Track Requirement (15 or 18 points)

Students must select one of the following six upper-level tracks. Each track, except the combination track, requires five courses consisting of required, elective breadth, and elective track courses. The combination track requires a selection of six advanced courses: three 3000- or 4000-level computer science courses and three 3000- or 4000-level courses from another field. The elective breadth requirement in each track can be fulfilled with any 3-point computer science 3000-level or higher course that is not a computer science core course or a technical elective course in that track. In addition to the breadth elective, the track requirements are as follows:

Foundations Track (15 points)

For students interested in algorithms, computational complexity, and other areas of theoretical Computer Science.

Note: Students who declared their Computer Science major prior to Fall 2016 may also count COMS 4241, COMS 4205, COMS 4281, COMS 4444, COMS 4771, and COMS 4772 as track elective courses.

Required Courses

CSOR W4231	Analysis of Algorithms I
COMS W4236	Introduction to Computational Complexity

Track Electives

Select 2 from:

MATH UN3020	Number Theory and Cryptography
MATH UN3025	Making, Breaking Codes
COMS W4203	Graph Theory
MATH GU4032	Fourier Analysis
MATH GU4041	INTRO MODERN ALGEBRA I
MATH GU4042	INTRO MODERN ALGEBRA II
MATH GU4061	INTRO MODERN ANALYSIS I
MATH GU4155	Probability Theory
COMS W4252	Introduction to Computational Learning Theory
COMS W4261	Introduction to Cryptography
APMA E4300	Computational Math: Introduction to Numerical Methods
IEOR E4407	Game Theoretic Models of Operations
CSPH G4802	
COMS E6232	Analysis of Algorithms, II
MATH G6238	Enumerative Combinatorics
COMS E6253	Advanced Topics in Computational Learning Theory
COMS E6261	Advanced Cryptography
EEOR E6616	Convex optimization
IEOR E6613	Optimization, I
IEOR E6614	Optimization, II
IEOR E6711	Stochastic models, I
IEOR E6712	Stochastic models, II
ELEN E6717	Information theory

ELEN E6718	Error Correcting Codes: Classical and Modern
------------	--

Adviser Approved:	
COMS W3902	Undergraduate Thesis
COMS W3998	Undergraduate Projects in Computer Science
COMS W4901	Projects in Computer Science
COMS W4995	Special topics in computer science, I
COMS E6998	Topics in Computer Science

One Breadth Course

Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Software Systems Track (15 points)

For students interested in networks, programming languages, operating systems, software engineering, databases, security, and distributed systems.

Required Courses

COMS W4115	Programming Languages and Translators
COMS W4118	Operating Systems I
CSEE W4119	COMPUTER NETWORKS

Track Electives

Select 1 from:

Any COMS W41xx course

COMS W4444	Programming and Problem Solving
------------	---------------------------------

Any COMS W48xx course

Adviser Approved:	
COMS W3902	Undergraduate Thesis
COMS W3998	Undergraduate Projects in Computer Science
COMS W4901	Projects in Computer Science
COMS W4995	Special topics in computer science, I
COMS W4996	Special topics in computer science, II

Any COMS E68XX course

Any COMS E61XX course

One Breadth Course

Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Intelligent Systems Track (15 points)

For students interested in machine learning, robotics, and systems capable of exhibiting “human-like” intelligence.

Required Courses

Select two of the following courses:	
COMS W4701	Artificial Intelligence
COMS W4705	Natural Language Processing

COMS W4706	Spoken Language Processing
COMS W4731	Computer Vision I: First Principles
COMS W4733	Computational Aspects of Robotics
COMS W4771	Machine Learning

Track Electives

Select 2 from:

COMS W4252	Introduction to Computational Learning Theory
------------	---

Any COMS W47xx course

Any COMS E67XX course

Adviser Approved:

COMS W3902	Undergraduate Thesis
COMS W3998	Undergraduate Projects in Computer Science

COMS W4901	Projects in Computer Science
------------	------------------------------

COMS W4995	Special topics in computer science, I
------------	---------------------------------------

COMS E6998	Topics in Computer Science
------------	----------------------------

One Breadth Course

Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Applications Track (15 points)

For students interested in the implementation of interactive multimedia applications for the internet and wireless networks.

Required Courses

COMS W4115	Programming Languages and Translators
COMS W4170	User Interface Design

Track Electives

Select 2 from:

Any COMS W41xx course

Any COMS W47xx course

Adviser Approved:

COMS W3902	Undergraduate Thesis
COMS W3998	Undergraduate Projects in Computer Science

COMS W4901	Projects in Computer Science
------------	------------------------------

COMS W4995	Special topics in computer science, I
------------	---------------------------------------

Any COMS E69XX course

One Breadth Course

Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Vision, Graphics, Interaction, and Robotics Track (15 points)

For students in the vision, interaction, graphics, and robotics track. It focuses on visual information with topics in vision, graphics, human-computer interaction, robotics, modeling,

and learning. Students learn about fundamental ways in which visual information is captured, manipulated, and experienced.

Required Courses

Select two of the following courses:

COMS W4160	Computer Graphics
COMS W4167	Computer Animation
COMS W4731	Computer Vision I: First Principles

Track Electives

Select 2 from:

COMS W4162	Advanced Computer Graphics
COMS W4170	User Interface Design
COMS W4172	3D User Interfaces and Augmented Reality

COMS W4701	Artificial Intelligence
------------	-------------------------

COMS W4733	Computational Aspects of Robotics
------------	-----------------------------------

COMS W4735	Visual Interfaces to Computers
------------	--------------------------------

COMS W4771	Machine Learning
------------	------------------

Adviser Approved:

COMS W3902	Undergraduate Thesis
------------	----------------------

COMS W3998	Undergraduate Projects in Computer Science
------------	--

COMS W4901	Projects in Computer Science
------------	------------------------------

COMS W4995	Special topics in computer science, I
------------	---------------------------------------

Any COMS E69XX course

One Breadth Course

Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Combination Track (18 points)

For students who wish to combine computer science with another discipline in the arts, humanities, social or natural sciences. A coherent selection of six upper-level courses is required: three from computer science and three from another discipline.

The courses should be planned with and approved by the student's CS faculty advisor by the first semester of the junior year. The six courses are typically 4000-level elective courses that would count towards the individual majors. Moreover, the six courses should have a common theme. The combination track is not intended for those students who pursue double majors.

**MAJOR IN COMPUTER SCIENCE—
MATHEMATICS**

For a description of the joint major in computer science—mathematics, see the *Mathematics* section in this bulletin.

MAJOR IN INFORMATION SCIENCE

Please read *Guidelines for all Computer Science Majors and Concentrators* above.

The major in information science requires a minimum of 33 points including a core requirement of five courses.

The elective courses must be chosen with a faculty adviser to focus on the modeling and use of information within the context of a disciplinary theme. After discussing potential selections students prepare a proposal of study that must be approved by the faculty adviser. In all cases the six courses must be at the 3000-level or above with at least three courses chosen from computer science. Following are some example programs. For more examples or templates for the program proposal, see a faculty adviser.

Note: In most cases additional courses will be necessary as prerequisites in order to take some of the elective courses. This will depend on the student's proposed program of study.

Core Requirement

COMS W1001	Introduction to Information Science
or COMS W1002 Computing in Context	
COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1007	Honors Introduction to Computer Science
COMS W3134	Data Structures in Java
STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS

Following are some suggested programs of instruction:

Information Science and Contemporary Society

Students may focus on how humans use technology and how technology has changed society.

The requirements include:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4170	User Interface Design
COMS W4701	Artificial Intelligence
COMS W3410	Computers and Society
SOCI UN3010	Methods for Social Research
SOCI UN3960	Law, Science, and Society

Information Science and the Economy

Students may focus on understanding information modeling together with existing and emerging needs in economics and finance as well as algorithms and systems to address those needs.

The requirements include:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4701	Artificial Intelligence
COMS W4771	Machine Learning
ECON UN3412	Introduction To Econometrics
ECON UN3025	Financial Economics
ECON UN3265	MONEY AND BANKING

Information Science and Health Sciences

Students may focus on understanding information modeling together with existing and emerging needs in health sciences, as well as algorithms and systems to address those needs.

The requirements include:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4170	User Interface Design
COMS W4701	Artificial Intelligence
BINF G4001	
BIOL W4037	Bioinformatics of Gene Expression
ECBM E3060/E4060	Introduction to genomic information science and technology

MAJOR IN DATA SCIENCE

Please read *Guidelines for all Computer Science Majors and Concentrators* above.

In response to the ever growing importance of "big data" in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications at the interface between computer science and statistics. The statistics and computer science departments have responded with a joint-major that emphasizes the interface between the disciplines.

Prerequisites (15 points)

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	Calculus III
MATH UN2010	LINEAR ALGEBRA

This introductory Statistics course:

STAT UN1201	Calculus-Based Introduction to Statistics
-------------	---

Statistics (12 points)

STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
STAT GU4241	Statistical Machine Learning

or COMS W4771 Machine Learning

Computer Science (12 points)

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
COMS W1007	Honors Introduction to Computer Science
ENGI E1006	Introduction to Computing for Engineers and Applied Scientists
Select one of the following courses:	
COMS W3134	Data Structures in Java
COMS W3136	Data Structures with C/C++
COMS W3137	Honors Data Structures and Algorithms
Two required courses:	
COMS W3203	DISCRETE MATHEMATICS
CSOR W4231	Analysis of Algorithms I
Electives (15 points)	
Select two of the following courses:	
STAT UN3106	Applied Data Mining
STAT GU4206	Statistical Computing and Introduction to Data Science
STAT GU4224	BAYESIAN STATISTICS
STAT GU4243	Applied Data Science
STAT Q4242	Advanced Machine Learning
Select three of the following courses:	
COMS W3261	Computer Science Theory
COMS W4111	INTRODUCTION TO DATABASES
COMS W4130	Principles and Practice of Parallel Programming
COMS W4236	Introduction to Computational Complexity
COMS W4252	Introduction to Computational Learning Theory
Any COMS W47xx course EXCEPT W4771	

CONCENTRATION IN COMPUTER SCIENCE

Please read *Guidelines for all Computer Science Majors and Concentrators* above.

For students who declare in Spring 2014 and beyond:

The concentration in computer science requires a minimum of 22-24 points, as follows:

COMS W1004	Introduction to Computer Science and Programming in Java
or COMS W1007	Honors Introduction to Computer Science
COMS W3134	Data Structures in Java
or COMS W3137	Honors Data Structures and Algorithms
COMS W3157	Advanced Programming
COMS W3203	DISCRETE MATHEMATICS

COMS W3261	Computer Science Theory
CSEE W3827	Fundamentals of Computer Systems (or any 3 point 4000-level computer science course)
Select one of the following courses:	
MATH UN2010	LINEAR ALGEBRA
MATH V2020	Honors Linear Algebra
APMA E2101	Introduction to Applied Mathematics
APMA E3101	Linear Algebra
STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS
SIEO W3600	

For students who declared prior to Spring 2014:

The concentration requires a minimum of 23 points, as follows:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1007	Honors Introduction to Computer Science
COMS W3137	Honors Data Structures and Algorithms
COMS W3157	Advanced Programming
COMS W3261	Computer Science Theory
CSEE W3827	Fundamentals of Computer Systems (or any 3-point 4000-level computer science course)

COMPUTER SCIENCE

COMS W1001 Introduction to Information Science. 3 points.
Lect: 3.

Basic introduction to concepts and skills in Information Sciences: human-computer interfaces, representing information digitally, organizing and searching information on the internet, principles of algorithmic problem solving, introduction to database concepts, and introduction to programming in Python.

COMS W1002 Computing in Context. 4 points.
CC/GS: Partial Fulfillment of Science Requirement

Introduction to elementary computing concepts and Python programming with domain-specific applications. Shared CS concepts and Python programming lectures with track-specific sections. Track themes will vary but may include computing for the social sciences, computing for economics and finance, digital humanities, and more. Intended for nonmajors. Students may only receive credit for one of ENGI E1006 or COMS W1002.

Fall 2020: COMS W1002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS 001/11682 T Th 2:40pm - Adam 4 237/300
1002 3:55pm Cannon
Online Only

COMS W1004 Introduction to Computer Science and Programming in Java. 3 points.

Lect: 3.

A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: *1004* or *1005*.

Fall 2020: COMS W1004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1004	001/11692	T Th 4:10pm - 5:25pm Online Only	Adam Cannon	3	388/500

Spring 2021: COMS W1004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1004	001/11922	T Th 1:10pm - 2:25pm Online Only	Adam Cannon	3	198/250
COMS 1004	002/11923	T Th 8:10pm - 9:25pm Online Only	Adam Cannon	3	150/250

COMS W1005 Introduction to Computer Science and Programming in MATLAB. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

A general introduction to computer science concepts, algorithmic problem-solving capabilities, and programming skills in MATLAB. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: *W1004* or *W1005*.

COMS W1007 Honors Introduction to Computer Science. 3 points.

Lect: 3.

Prerequisites: AP Computer Science with a grade of 4 or 5 or similar experience.

An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.

COMS W1404 Emerging Scholars Program Seminar. 1 point.

Pass/Fail only.

Prerequisites: the instructor's permission. Corequisites: COMS W1002 or COMS W1004 or COMS W1007

Corequisites: COMS W1004, COMS W1007, COMS W1002

Peer-led weekly seminar intended for first and second year undergraduates considering a major in Computer Science. Pass/fail only. May not be used towards satisfying the major or SEAS credit requirements.

Fall 2020: COMS W1404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1404	001/24494	F 9:30am - 10:45am Online Only	Adam Cannon	1	12/12
COMS 1404	002/24495	F 11:00am - 12:15pm Online Only	Adam Cannon	1	8/12

COMS 1404	010/20141	F 3:15pm - 4:30pm Online Only	Adam Cannon	1	6/16

COMS W3101 Programming Languages. 1 point.

Lect: 1.

Prerequisites: Fluency in at least one programming language. Introduction to a programming language. Each section is devoted to a specific language. Intended only for those who are already fluent in at least one programming language. Sections may meet for one hour per week for the whole term, for three

hours per week for the first third of the term, or for two hours per week for the first six weeks. May be repeated for credit if different languages are involved.

COMS W3102 Development Technologies. 1-2 points.

Lect: 2. Lab: 0-2.

Prerequisites: Fluency in at least one programming language. Introduction to software development tools and environments. Each section devoted to a specific tool or environment. One-point sections meet for two hours each week for half a semester, and two point sections include an additional two-hour lab.

Fall 2020: COMS W3102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3102	001/24811		Paul Blaer	1-2	59/200

Spring 2021: COMS W3102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3102	001/19893		Paul Blaer	1-2	56/200

COMS W3107 Clean Object-Oriented Design. 3.00 points.

Prerequisites: Intro to Computer Science/Programming in Java (COMS W1004) or instructor's permission. May not take for credit if already received credit for COMS W1007.

Prerequisites: see notes re: points

A course in designing, documenting, coding, and testing robust computer software, according to object-oriented design patterns and clean coding practices. Taught in Java. Object-oriented design principles include: use cases; CRC; UML; javadoc; patterns (adapter, builder, command, composite, decorator, facade, factory, iterator, lazy evaluation, observer, singleton, strategy, template, visitor); design by contract; loop invariants; interfaces and inheritance hierarchies; anonymous classes and null objects; graphical widgets; events and listeners; Java's Object class; generic types; reflection; timers, threads, and locks

Fall 2020: COMS W3107

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3107	001/15932	M W 1:10pm - 2:25pm Online Only	John Kender	3.00	35/70

COMS W3134 Data Structures in Java. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W1004) or knowledge of Java. Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: *COMS W3134*, *COMS W3136*, *COMS W3137*.

Fall 2020: COMS W3134

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3134	001/10066	M W 5:40pm - 6:55pm Online Only	Paul Blaer	3	357/500

Spring 2021: COMS W3134

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3134	001/11924	M W 5:40pm - 6:55pm Online Only	Paul Blaer	3	327/400

COMS W3136 Data Structures with C/C++. 4 points.

Prerequisites: (COMS W1004) or (COMS W1005) or (COMS W1007) or (ENGI E1006)

A second programming course intended for nonmajors with at least one semester of introductory programming experience. Basic elements of programming in C and C++, arraybased data structures, heaps, linked lists, C programming in UNIX environment, object-oriented programming in C++, trees, graphs, generic programming, hash tables. Due to significant overlap, students may only receive credit for either COMS W3134, W3136, or W3137.

COMS W3137 Honors Data Structures and Algorithms. 4 points.

Prerequisites: (COMS W1004) or (COMS W1007)

Corequisites: COMS W3203

An honors introduction to data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Design and analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: *COMS W3134*, *W3136*, or *W3137*.

Spring 2021: COMS W3137

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3137	001/15971	T Th 4:10pm - 5:25pm Online Only	Paul Blaer	4	47/75

COMS W3157 Advanced Programming. 4 points.

Lect: 4.

Prerequisites: (COMS W3134) or (COMS W3137)
C programming language and Unix systems programming.
Also covers Git, Make, TCP/IP networking basics, C++ fundamentals.

Fall 2020: COMS W3157

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3157	001/10067	T Th 4:10pm - 5:25pm Online Only	Jae Lee	4	330/500

Spring 2021: COMS W3157

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS 3157	001/11925	T Th 4:10pm - 5:25pm Online Only	Jae Lee	4	270/500
COMS 3157	002/14850	F 2:10pm - 4:00pm 301 Pupin Laboratories	Jae Lee	4	41/75

COMS W3203 DISCRETE MATHEMATICS. 4.00 points.

Lect: 3.

Prerequisites: Any introductory course in computer programming.

Prerequisites: Any introductory course in computer programming. Logic and formal proofs, sequences and summation, mathematical induction, binomial coefficients, elements of finite probability, recurrence relations, equivalence relations and partial orderings, and topics in graph theory (including isomorphism, traversability, planarity, and colorings)

Fall 2020: COMS W3203

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3203	001/11672	T Th 10:10am - 11:25am Online Only	Ansaf Salleb-Aouissi	4.00	153/150
COMS 3203	002/11673	T Th 11:40am - 12:55pm Online Only	Ansaf Salleb-Aouissi	4.00	147/150

Spring 2021: COMS W3203

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3203	001/13030	M W 10:10am - 11:25am Online Only	Ansaf Salleb-Aouissi	4.00	160/165

COMS W3210 Scientific Computation. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: two terms of calculus.

Introduction to computation on digital computers. Design and analysis of numerical algorithms. Numerical solution of equations, integration, recurrences, chaos, differential equations. Introduction to Monte Carlo methods. Properties of floating point arithmetic. Applications to weather prediction, computational finance, computational science, and computational engineering.

COMS W3251 COMPUTATIONAL LINEAR ALGEBRA. 4.00 points.**Spring 2021: COMS W3251**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3251	001/13032	T Th 11:40am - 12:55pm Online Only	Tony Dear	4.00	199/230

COMS W3261 Computer Science Theory. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3203)

Corequisites: COMS W3134, COMS W3136, COMS W3137

Regular languages: deterministic and non-deterministic finite automata, regular expressions. Context-free languages: context-

free grammars, push-down automata. Turing machines, the Chomsky hierarchy, and the Church-Turing thesis. Introduction to Complexity Theory and NP-Completeness.

Fall 2020: COMS W3261

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3261	001/11666	T Th 8:40am - 9:55am Online Only	Tal Malkin	3	131/170
COMS 3261	002/11667	T Th 10:10am - 11:25am Online Only	Tal Malkin	3	152/185
COMS 3261	R01/22802	F 10:10am - 12:00pm Online Only	Tal Malkin	3	0/170
COMS 3261	R02/22803	F 12:10pm - 2:00pm Online Only	Tal Malkin	3	0/170

Spring 2021: COMS W3261

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3261	001/12483	M W 4:10pm - 5:25pm Online Only	Xi Chen	3	190/235

COMS W3410 Computers and Society. 3 points.

Lect: 3.

Broader impact of computers. Social networks and privacy. Employment, intellectual property, and the media. Science and engineering ethics. Suitable for nonmajors.

Fall 2020: COMS W3410

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3410	001/11022	T Th 4:10pm - 5:25pm Online Only	Ronald Baecker	3	43/60

COMS W3902 Undergraduate Thesis. 1-6 points.

Prerequisites: Agreement by a faculty member to serve as thesis adviser.

An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment.

COMS W3995 Special Topics in Computer Science. 3 points.

Lect: 3.

Prerequisites: the instructor's permission.

Consult the department for section assignment. Special topics arranged as the need and availability arise. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit.

COMS W3998 Undergraduate Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

COMS E3999 Fieldwork. 1 point.

Prerequisites: Obtained internship and approval from faculty advisor.

May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off-campus work experience as part of their approved program of study. Final report and letter of evaluation required. May not be used as a technical or non-technical elective. May not be taken for pass/fail credit or audited.

COMS W4111 INTRODUCTION TO DATABASES. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: COMS W3134, COMS W3136, or COMS W3137; or the instructor's permission.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137) or

Prerequisites: (COMS W3134) or (COMS W3137) or (COMS W3136) and fluency in Java); or the instructor's permission.

The fundamentals of database design and application development using databases: entity-relationship modeling, logical design of relational databases, relational data definition and manipulation languages, SQL, XML, query processing, physical database tuning, transaction processing, security. Programming projects are required

Fall 2020: COMS W4111

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4111	001/10069	T Th 1:10pm - 2:25pm Online Only	Luis Gravano	3.00	158/175

COMS 4111	V03/17897		Alexandros Biliris	3.00	21/99

COMS W4112 Database System Implementation. 3 points.

Lect: 2.5.

Prerequisites: (COMS W4111) and fluency in Java or C++.

CSEE W3827 is recommended.

The principles and practice of building large-scale database management systems. Storage methods and indexing, query processing and optimization, materialized views, transaction processing and recovery, object-relational databases, parallel and distributed databases, performance considerations. Programming projects are required.

COMS W4113 Fundamentals of Large-Scale Distributed Systems. 3 points.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119)

Design and implementation of large-scale distributed and cloud systems. Teaches abstractions, design and implementation techniques that enable the building of fast, scalable, fault-tolerant distributed systems. Topics include distributed communication models (e.g., sockets, remote procedure calls, distributed shared memory), distributed synchronization (clock synchronization, logical clocks, distributed mutex), distributed file systems, replication, consistency models, fault tolerance, distributed transactions, agreement and commitment, Paxos-based consensus, MapReduce infrastructures, scalable distributed databases. Combines concepts and algorithms with descriptions of real-world implementations at Google, Facebook, Yahoo, Microsoft, LinkedIn, etc.

Fall 2020: COMS W4113

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4113	001/11671	F 1:10pm - 3:40pm Online Only	Roxana Geambasu	3	161/200
COMS 4113	V01/21545		Roxana Geambasu	3	15/99

COMS W4115 Programming Languages and Translators. 3 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3261) and (CSEE W3827) or equivalent, or the instructor's permission.

Modern programming languages and compiler design. Imperative, object-oriented, declarative, functional, and scripting languages. Language syntax, control structures, data types, procedures and parameters, binding, scope, run-

time organization, and exception handling. Implementation of language translation tools including compilers and interpreters. Lexical, syntactic and semantic analysis; code generation; introduction to code optimization. Teams implement a language and its compiler.

Fall 2020: COMS W4115

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4115	001/10070	M W 1:10pm - 2:25pm Online Only	Baishakhi Ray	3	108/130

Spring 2021: COMS W4115

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4115	001/13902	M W 5:40pm - 6:55pm Online Only	Stephen Edwards	3	192/300
COMS 4115	V01/17792		Stephen Edwards	3	3/99

COMS W4117 Compilers and Interpreters. 3 points.

Lect: 3. Not offered during 2020-21 academic year.

Prerequisites: (COMS W4115) or instructor's permission. Continuation of *COMS W4115*, with broader and deeper investigation into the design and implementation of contemporary language translators, be they compilers or interpreters. Topics include parsing, semantic analysis, code generation and optimization, run-time environments, and compiler-compilers. A programming project is required.

COMS W4118 Operating Systems I. 3 points.

Lect: 3.

Prerequisites: (CSEE W3827) and knowledge of C and programming tools as covered in COMS W3136, W3157, or W3101, or the instructor's permission.

Design and implementation of operating systems. Topics include process management, process synchronization and interprocess communication, memory management, virtual memory, interrupt handling, processor scheduling, device management, I/O, and file systems. Case study of the UNIX operating system. A programming project is required.

Fall 2020: COMS W4118

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4118	001/10071	W 4:10pm - 6:40pm 309 Havemeyer Hall	Jae Lee	3	64/150

501 Northwest
Corner

COMS W4119 COMPUTER NETWORKS. 3.00 points.

COMS W4121 Computer Systems for Data Science. 3 points.

Prerequisites: background in Computer System Organization and good working knowledge of C/C++

Corequisites: CSOR W4246, STAT GU4203

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers.

COMS W4130 Principles and Practice of Parallel Programming. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3137 or COMS W3136 and experience in Java) and basic understanding of analysis of algorithms.

Principles of parallel software design. Topics include task and data decomposition, load-balancing, reasoning about correctness, determinacy, safety, and deadlock-freedom. Application of techniques through semester-long design project implementing performant, parallel application in a modern parallel programming language.

COMS W4156 Advanced Software Engineering. 3 points.

Lect: 3.

Prerequisites: (COMS W3157) or equivalent.

Software lifecycle using frameworks, libraries and services. Major emphasis on software testing. Centers on a team project.

Fall 2020: COMS W4156

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4156	001/10072	T Th 10:10am - 11:25am Online Only	Gail Kaiser	3	106/120
COMS 4156	V01/21552		Gail Kaiser	3	7/99

Spring 2021: COMS W4156

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4156	001/11929	T Th 8:40am - 9:55am Online Only	Junfeng Yang	3	119/120

COMS W4160 Computer Graphics. 3 points.

Lect: 3.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137) COMS W4156 is recommended. Strong programming

background and some mathematical familiarity including linear algebra is required.

Introduction to computer graphics. Topics include 3D viewing and projections, geometric modeling using spline curves, graphics systems such as OpenGL, lighting and shading, and global illumination. Significant implementation is required: the final project involves writing an interactive 3D video game in OpenGL.

Spring 2021: COMS W4160

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4160	001/15972	T Th 4:10pm - 5:25pm Online Only	Changxi Zheng	3	51/75
COMS 4160	V01/19157		Changxi Zheng	3	3/99

COMS W4162 Advanced Computer Graphics. 3 points.

Lect: 3.

Prerequisites: (COMS W4160) or equivalent, or the instructor's permission.

A second course in computer graphics covering more advanced topics including image and signal processing, geometric modeling with meshes, advanced image synthesis including ray tracing and global illumination, and other topics as time permits. Emphasis will be placed both on implementation of systems and important mathematical and geometric concepts such as Fourier analysis, mesh algorithms and subdivision, and Monte Carlo sampling for rendering. Note: Course will be taught every two years.

COMS W4167 Computer Animation. 3 points.

Lect: 3.

Prerequisites: Multivariable calculus, linear algebra, C++ programming proficiency. COMS W4156 recommended. Theory and practice of physics-based animation algorithms, including animated clothing, hair, smoke, water, collisions, impact, and kitchen sinks. Topics covered: Integration of ordinary differential equations, formulation of physical models, treatment of discontinuities including collisions/contact, animation control, constrained Lagrangian Mechanics, friction/dissipation, continuum mechanics, finite elements, rigid bodies, thin shells, discretization of Navier-Stokes equations. General education requirement: quantitative and deductive reasoning (QUA).

Fall 2020: COMS W4167

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4167	001/11388	T Th 5:40pm - 6:55pm 1024 Seeley W. Mudd Building	Changxi Zheng	3	38/70
COMS 4167	V01/22364		Changxi Zheng	3	3/99

COMS W4170 User Interface Design. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137)

Introduction to the theory and practice of computer user interface design, emphasizing the software design of graphical user interfaces. Topics include basic interaction devices and techniques, human factors, interaction styles, dialogue design, and software infrastructure. Design and programming projects are required.

Fall 2020: COMS W4170

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4170	001/10073	M W 2:40pm - 3:55pm 614 Schermerhorn Hall	Brian Smith	3	124/125

Spring 2021: COMS W4170

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4170	001/17520	M W 5:40pm - 6:55pm Online Only	Celeste Layne	3	75/80
COMS 4170	V01/17976		Celeste Layne	3	9/99

COMS W4172 3D User Interfaces and Augmented Reality. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W4160) or (COMS W4170) or the instructor's permission.

Design, development, and evaluation of 3D user interfaces. Interaction techniques and metaphors, from desktop to immersive. Selection and manipulation. Travel and navigation. Symbolic, menu, gestural, and multimodal interaction. Dialogue design. 3D software support. 3D interaction devices and displays. Virtual and augmented reality. Tangible user interfaces. Review of relevant 3D math.

Spring 2021: COMS W4172

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4172	001/11930	T Th 1:10pm - 2:25pm Online Only	Steven Feiner	3	33/40

COMS W4181 Security I. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: COMS W3157 or equivalent.

Introduction to security. Threat models. Operating system security features. Vulnerabilities and tools. Firewalls, virtual private networks, viruses. Mobile and app security. Usable security.

Fall 2020: COMS W4181

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4181	001/10074	T Th 1:10pm - 2:25pm Online Only	Steven Bellovin	3	82/200

COMS V01/21553 Steven 3 3/99
4181 Bellovin

COMS W4182 Security II. 3 points.
Not offered during 2020-21 academic year.

Prerequisites: COMS W4181, COMS W4118, COMS W4119
Advanced security. Centralized, distributed, and cloud system security. Cryptographic protocol design choices. Hardware and software security techniques. Security testing and fuzzing. Blockchain. Human security issues.

Spring 2021: COMS W4182

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4182	001/11931	T Th 1:10pm - 2:25pm Online Only	Suman Jana	3	15/60
COMS 4182	V01/17795		Suman Jana	3	1/99

COMS W4186 Malware Analysis and Reverse Engineering. 3 points.
Not offered during 2020-21 academic year.

Prerequisites: COMS W3157 or equivalent. COMS W3827
Hands-on analysis of malware. How hackers package and hide malware and viruses to evade analysis. Disassemblers, debuggers, and other tools for reverse engineering. Deep study of Windows Internals and x86 assembly.

Fall 2020: COMS W4186

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4186	001/22036	Th 4:10pm - 6:40pm 313 Fayerweather	Michael Sikorski	3	10/60

COMS W4203 Graph Theory. 3 points.
Lect: 3.

Prerequisites: (COMS W3203)
General introduction to graph theory. Isomorphism testing, algebraic specification, symmetries, spanning trees, traversability, planarity, drawings on higher-order surfaces, colorings, extremal graphs, random graphs, graphical measurement, directed graphs, Burnside-Polya counting, voltage graph theory.

COMS W4205 Combinatorial Theory. 3 points.
Lect: 3. **Not offered during 2020-21 academic year.**

Prerequisites: (COMS W3203) and course in calculus.
Sequences and recursions, calculus of finite differences and sums, elementary number theory, permutation group structures, binomial coefficients, Stirling numbers, harmonic numbers, generating functions.

COMS W4232 Advanced Algorithms. 3 points.
Prerequisite: Analysis of Algorithms (COMS W4231).

Prerequisites: see notes re: points

Introduces classic and modern algorithmic ideas that are central to many areas of Computer Science. The focus is on most powerful paradigms and techniques of how to design algorithms, and how to measure their efficiency. The intent is to be broad, covering a diversity of algorithmic techniques, rather than be deep. The covered topics have all been implemented and are widely used in industry. Topics include: hashing, sketching/streaming, nearest neighbor search, graph algorithms, spectral graph theory, linear programming, models for large-scale computation, and other related topics.

COMS W4236 Introduction to Computational Complexity. 3 points.
Lect: 3.

Prerequisites: (COMS W3261)
Develops a quantitative theory of the computational difficulty of problems in terms of the resources (e.g. time, space) needed to solve them. Classification of problems into complexity classes, reductions, and completeness. Power and limitations of different modes of computation such as nondeterminism, randomization, interaction, and parallelism.

Fall 2020: COMS W4236

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4236	001/11562	F 4:10pm - 6:40pm Online Only	Xi Chen	3	48/60
COMS 4236	V01/21554		Xi Chen	3	5/99

COMS W4241 Numerical Algorithms and Complexity. 3 points.
Lect: 3.

Prerequisites: Knowledge of a programming language. Some knowledge of scientific computation is desirable.
Modern theory and practice of computation on digital computers. Introduction to concepts of computational complexity. Design and analysis of numerical algorithms. Applications to computational finance, computational science, and computational engineering.

COMS W4242 Numerical Algorithms and Their Complexity II. 3 points.

Prerequisites: *COMS W4241*.
A continuation of *COMS W4241*.

COMS W4252 Introduction to Computational Learning Theory. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CSOR W4231) or (COMS W4236) or *COMS W3203* and the instructor's permission, or *COMS W3261* and the instructor's permission.
Possibilities and limitations of performing learning by computational agents. Topics include computational models of learning, polynomial time learnability, learning from examples and learning from queries to oracles. Computational and

statistical limitations of learning. Applications to Boolean functions, geometric functions, automata.

Spring 2021: COMS W4252

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4252	001/11932	M W 8:40am - 9:55am 309 Havemeyer Hall	Rocco Servedio	3	92/100
COMS 4252	V01/17948		Rocco Servedio	3	7/99

COMS W4261 Introduction to Cryptography. 3 points.

Lect: 2.5.

Prerequisites: Comfort with basic discrete math and probability. Recommended: COMS W3261 or CSOR W4231.

An introduction to modern cryptography, focusing on the complexity-theoretic foundations of secure computation and communication in adversarial environments; a rigorous approach, based on precise definitions and provably secure protocols. Topics include private and public key encryption schemes, digital signatures, authentication, pseudorandom generators and functions, one-way functions, trapdoor functions, number theory and computational hardness, identification and zero knowledge protocols.

COMS W4281 Introduction to Quantum Computing. 3 points.

Lect: 3.

Prerequisites: Knowledge of linear algebra. Prior knowledge of quantum mechanics is not required although helpful.

Introduction to quantum computing. Shor's factoring algorithm, Grover's database search algorithm, the quantum summation algorithm. Relationship between classical and quantum computing. Potential power of quantum computers.

Spring 2021: COMS W4281

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4281	001/13318	M W 2:40pm - 3:55pm Online Only	Henry Yuen	3	49/70
COMS 4281	V01/18002		Henry Yuen	3	8/99

COMS W4419 Internet Technology, Economics, and Policy. 3 points.

Not offered during 2020-21 academic year.

Technology, economic and policy aspects of the Internet. Summarizes how the Internet works technically, including protocols, standards, radio spectrum, global infrastructure and interconnection. Micro-economics with a focus on media and telecommunication economic concerns, including competition and monopolies, platforms, and behavioral economics. US constitution, freedom of speech, administrative procedures act and regulatory process, universal service, role of FCC. Not a

substitute for CSEE4119. Suitable for non-majors. May not be used as a track elective for the computer science major.

Fall 2020: COMS W4419

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4419	001/10075	F 1:10pm - 3:40pm Online Only	Henning Schulzrinne	3	27/80

COMS W4444 Programming and Problem Solving. 3 points. CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (CSEE W3827)

Hands-on introduction to solving open-ended computational problems. Emphasis on creativity, cooperation, and collaboration. Projects spanning a variety of areas within computer science, typically requiring the development of computer programs. Generalization of solutions to broader problems, and specialization of complex problems to make them manageable. Team-oriented projects, student presentations, and in-class participation required.

Fall 2020: COMS W4444

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4444	001/10315	M W 1:10pm - 2:25pm Online Only	Kenneth Ross	3	16/30

COMS W4460 Principles of Innovation and Entrepreneurship. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor's permission.

Team project centered course focused on principles of planning, creating, and growing a technology venture. Topics include: identifying and analyzing opportunities created by technology paradigm shifts, designing innovative products, protecting intellectual property, engineering innovative business models.

COMS W4560 Introduction to Computer Applications in Health Care and Biomedicine. 3 points.

Lect: 3.

Prerequisites: Experience with computers and a passing familiarity with medicine and biology. Undergraduates in their senior or junior years may take this course only if they have adequate background in mathematics and receive the instructor's permission.

An overview of the field of biomedical informatics, combining perspectives from medicine, computer science and social science. Use of computers and information in health care and the biomedical sciences, covering specific applications and general methods, current issues, capabilities and limitations of biomedical informatics. Biomedical Informatics studies the organization of medical information, the effective management of information using computer technology, and the impact of such technology on medical research, education, and patient

care. The field explores techniques for assessing current information practices, determining the information needs of health care providers and patients, developing interventions using computer technology, and evaluating the impact of those interventions.

COMS W4701 Artificial Intelligence. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and any course on probability. Prior knowledge of Python is recommended.

Provides a broad understanding of the basic techniques for building intelligent computer systems. Topics include state-space problem representations, problem reduction and and-or graphs, game playing and heuristic search, predicate calculus, and resolution theorem proving, AI systems and languages for knowledge representation, machine learning and concept formation and other topics such as natural language processing may be included as time permits.

Fall 2020: COMS W4701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4701	001/10076	M W 4:10pm - 6:40pm Online Only	Tony Dear	3	148/250

COMS W4705 Natural Language Processing. 3 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor's permission.

Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas.

Fall 2020: COMS W4705

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS W4706 Spoken Language Processing. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor's permission.

Computational approaches to speech generation and understanding. Topics include speech recognition and understanding, speech analysis for computational linguistics research, and speech synthesis. Speech applications including dialogue systems, data mining, summarization, and translation. Exercises involve data analysis and building a small text-to-speech system.

COMS W4725 Knowledge representation and reasoning. 3 points.

Lect: 3. **Not offered during 2020-21 academic year.**

Prerequisites: (COMS W4701)

General aspects of knowledge representation (KR). The two fundamental paradigms (semantic networks and frames) and illustrative systems. Topics include hybrid systems, time, action/plans, defaults, abduction, and case-based reasoning. Throughout the course particular attention is paid to design trade-offs between language expressiveness and reasoning complexity, and issues relating to the use of KR systems in larger applications.

COMS W4731 Computer Vision I: First Principles. 3.00 points.

Lect: 3.

Prerequisites: Fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.

Prerequisites: Fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course. Introductory course in computer vision. Topics include image formation and optics, image sensing, binary images, image processing and filtering, edge extraction and

boundary detection, region growing and segmentation, pattern classification methods, brightness and reflectance, shape from shading and photometric stereo, texture, binocular stereo, optical flow and motion, 2D and 3D object representation, object recognition, vision systems and applications

Spring 2021: COMS W4731

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4731	001/11953	M W 10:10am - 11:25am Online Only	Shree Nayar	3.00	92/100

COMS W4732 Computer Vision II: Learning. 3.00 points.

Advanced course in computer vision. Topics include convolutional networks and back-propagation, object and action recognition, self-supervised and few-shot learning, image synthesis and generative models, object tracking, vision and language, vision and audio, 3D representations, interpretability, and bias, ethics, and media deception

COMS W4733 Computational Aspects of Robotics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136/COMS W3137)

Introduction to robotics from a computer science perspective. Topics include coordinate frames and kinematics, computer architectures for robotics, integration and use of sensors, world modeling systems, design and use of robotic programming languages, and applications of artificial intelligence for planning, assembly, and manipulation.

Fall 2020: COMS W4733

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4733	001/10077	T Th 4:10pm - 5:25pm 833 Seeley W. Mudd Building	Shuran Song	3	72/80

Spring 2021: COMS W4733

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4733	001/16699	F 2:10pm - 4:40pm 309 Havemeyer Hall	Tony Dear	3	115/130
COMS 4733	V01/18034		Tony Dear	3	3/3

COMS W4735 Visual Interfaces to Computers. 3 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137)

Visual input as data and for control of computer systems. Survey and analysis of architecture, algorithms, and underlying assumptions of commercial and research systems that recognize and interpret human gestures, analyze imagery such as fingerprint or iris patterns, generate natural language descriptions of medical or map imagery. Explores foundations in human psychophysics, cognitive science, and artificial intelligence.

COMS W4737 Biometrics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a background at the sophomore level in computer science, engineering, or like discipline.

In this course, we will explore the latest advances in biometrics as well as the machine learning techniques behind them. Students will learn how these technologies work and how they are sometimes defeated. Grading will be based on homework assignments and a final project. There will be no midterm or final exam. This course shares lectures with *COMS E6737*. Students taking *COMS E6737* are required to complete additional homework problems and undertake a more rigorous final project. Students will only be allowed to earn credit for *COMS W4737* or *COMS E6737* and not both.

COMS W4762 Machine Learning for Functional Genomics. 3 points.

Prerequisites: Proficiency in a high-level programming language (Python/R/Julia). An introductory machine learning class (such as COMS 4771 Machine Learning) will be helpful but is not required.

Prerequisites: see notes re: points

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA ("chromatin") are active ("open") or bound by specific proteins.

COMS E4762 Machine Learning for Functional Genomics. 3.00 points.

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA ("chromatin") are active ("open") or bound by specific proteins

Spring 2021: COMS E4762

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4762	001/12573	M W 4:10pm - 5:25pm Online Only	David Knowles	3.00	59/100
COMS 4762	V01/17896		David Knowles	3.00	4/99

COMS W4771 Machine Learning. 3 points.

Lect: 3.

Prerequisites: Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence.

Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood,

exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov models. Algorithms implemented in MATLAB.

Fall 2020: COMS W4771

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4771	001/10078	T Th 1:10pm - 3:40pm Online Only	Nakul Verma	3	72/110

COMS 4771	001/11934	T Th 1:10pm - 2:25pm Online Only	Nakul Verma	3	95/110
COMS 4771	002/11935	T Th 2:40pm - 3:55pm Online Only	Nakul Verma	3	75/110
COMS 4771	V01/17804		Nakul Verma	3	7/99

COMS W4772 Advanced Machine Learning. 3 points.

Lect: 3.

Prerequisites: (COMS W4771) or instructor's permission; knowledge of linear algebra & introductory probability or statistics is required.

An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally? Topics include appearance-based models, principal and independent components analysis, dimensionality reduction, kernel methods, manifold learning, latent models, regression, classification, Bayesian methods, maximum entropy methods, real-time tracking, extended Kalman filters, time series prediction, hidden Markov models, factorial HMMs, input-output HMMs, Markov random fields, variational methods, dynamic Bayesian networks, and Gaussian/Dirichlet processes. Links to cognitive science.

COMS W4773 Machine Learning Theory. 3 points.

Prerequisites: Machine Learning (COMS W4771). Background in probability and statistics, linear algebra, and multivariate calculus. Ability to program in a high-level language, and familiarity with basic algorithm design and coding principles.

Prerequisites: see notes re: points

Core topics from unsupervised learning such as clustering, dimensionality reduction and density estimation will be studied in detail. Topics in clustering: k-means clustering,

hierarchical clustering, spectral clustering, clustering with various forms of feedback, good initialization techniques and convergence analysis of various clustering procedures. Topics in dimensionality reduction: linear techniques such as PCA, ICA, Factor Analysis, Random Projections, non-linear techniques such as LLE, IsoMap, Laplacian Eigenmaps, tSNE, and study of embeddings of general metric spaces, what sorts of theoretical guarantees can one provide about such techniques. Miscellaneous topics: design and analysis of data structures for fast Nearest Neighbor search such as Cover Trees and LSH. Algorithms will be implemented in either Matlab or Python.

COMS W4774 Unsupervised Learning. 3 points.

Prerequisites: Solid background in multivariate calculus, linear algebra, basic probability, and algorithms.

Prerequisites: see notes re: points

Theoretical study of algorithms for machine learning and high-dimensional data analysis. Topics include high-dimensional probability, theory of generalization and statistical learning, online learning and optimization, spectral analysis.

Fall 2020: COMS W4774

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4774	001/21884	T Th 1:10pm - 3:40pm Online Only	Nakul Verma	3	12/60

COMS W4775 Causal Inference. 3.00 points.

Prerequisites: Discrete Math, Calculus, Statistics (basic probability, modeling, experimental design), some programming experience.

Prerequisites: see notes re: points

Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML

Fall 2020: COMS W4775

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4775	001/21899	M W 4:10pm - 5:25pm 717 Hamilton Hall	Elias Bareinboim	3.00	27/60

COMS E4775 Causal Inference. 3 points.

Prerequisites: (COMS4711W) and Discrete Math, Calculus, Statistics (basic probability, modeling, experimental design), Some programming experience

Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-

calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML.

COMS W4776 Machine Learning for Data Science. 3 points.
Lect.: 3

Prerequisites: (STAT GU4001 or IEOR E4150) and linear algebra.

Introduction to machine learning, emphasis on data science.

Topics include least square methods, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models, hidden Markov models, support vector machines kernel methods. Emphasizes methods and problems relevant to big data. Students may not receive credit for both COMS W4771 and W4776.

COMS W4901 Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

Fall 2020: COMS W4901

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4901	078/25090		Henning Schulzrinne	1-3	1/1

COMS W4910 Curricular Practical Training. 1 point.

Prerequisites: obtained internship and approval from faculty advisor.

Only for M.S. students in the Computer Science department who need relevant work experience as part of their program of study. Final report required. This course may not be taken for pass/fail credit or audited.

COMS W4995 Special topics in computer science, I. 3 points.

Lect: 3.

Prerequisites: Instructor's permission.

Special topics arranged as the need and availability arises.

Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit. Consult the department for section assignment.

Fall 2020: COMS W4995

COMS W4996 Special topics in computer science, II. 3 points.

Lect: 3. Not offered during 2020-21 academic year.

Prerequisites: Instructor's permission.

A continuation of COMS W4995 when the special topic extends over two terms.

COMPUTER SCIENCE - ENGLISH COMPUTER SCIENCE - ELECTRICAL ENGINEERING

CSEE W3827 Fundamentals of Computer Systems. 3 points.
Lect: 3.

Prerequisites: an introductory programming course.
Fundamentals of computer organization and digital logic.
Boolean algebra, Karnaugh maps, basic gates and components, flipflops and latches, counters and state machines, basics of combinational and sequential digital design. Assembly language, instruction sets, ALU's, single-cycle and multi-cycle processor design, introduction to pipelined processors, caches, and virtual memory.

CSEE W4121 COMPUTER SYSTEMS FOR DATA SCIENCE. 3 points.

Prerequisites: Background in Computer System Organization and good working knowledge of C/C++. Corequisites: CSOR W4246 Algorithms for Data Science, STAT W4203 Probability Theory, or equivalent as approved by faculty advisor.

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers.

CSEE W4140 Networking Laboratory. 3 points.

Lect: 3.

Prerequisites: (CSEE W4119) or equivalent.
In this course, students will learn how to put "principles into practice," in a hands-on-networking lab course. The course will cover the technologies and protocols of the Internet using equipment currently available to large internet service providers such as CISCO routers and end systems. A set of laboratory experiments will provide hands-on experience with engineering wide-area networks and will familiarize students with the Internet Protocol (IP), Address Resolution Protocol (ARP), Internet Control Message Protocol (ICMP), User Datagram Protocol (UDP) and Transmission Control Protocol (TCP), the Domain Name System (DNS), routing protocols (RIP, OSPF, BGP), network management protocols (SNMP, and application-level protocols (FTP, TELNET, SMTP).

CSEE W4823 Advanced Logic Design. 3 points.

Lect: 3.

Prerequisites: (CSEE W3827) or a half semester introduction to digital logic, or the equivalent.

An introduction to modern digital system design. Advanced topics in digital logic: controller synthesis (Mealy and Moore machines); adders and multipliers; structured logic blocks (PLDs, PALs, ROMs); iterative circuits. Modern design methodology: register transfer level modelling (RTL); algorithmic state machines (ASMs); introduction to hardware

description languages (VHDL or Verilog); system-level modelling and simulation; design examples.

Fall 2020: CSEE W4823

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSEE 4823	001/10727	T Th 2:40pm - 3:55pm Online Only	Mingoo Seok	3	33/80

CSEE W4824 Computer Architecture. 3 points.

Lect: 3.

Prerequisites: (CSEE W3827) or equivalent.

Focuses on advanced topics in computer architecture, illustrated by case studies from classic and modern processors. Fundamentals of quantitative analysis. Pipelining. Memory hierarchy design. Instruction-level and thread-level parallelism. Data-level parallelism and graphics processing units. Multiprocessors. Cache coherence. Interconnection networks. Multi-core processors and systems-on-chip. Platform architectures for embedded, mobile, and cloud computing.

Fall 2020: CSEE W4824

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSEE 4824	001/10811	M W 2:40pm - 3:55pm Online Only	Simha Sethumadhavan	3	42/70
CSEE 4824	V01/21557		Simha Sethumadhavan	3	3/99

CSEE W4840 Embedded Systems. 3 points.

Lect: 3.

Prerequisites: (CSEE W4823)

Embedded system design and implementation combining hardware and software. I/O, interfacing, and peripherals. Weekly laboratory sessions and term project on design of a microprocessor-based embedded system including at least one custom peripheral. Knowledge of C programming and digital logic required.

CSEE W4868 System-on-chip platforms. 3 points.

Prerequisites: (COMS W3157) and (CSEE W3827)

Design and programming of System-on-Chip (SoC) platforms. Topics include: overview of technology and economic trends, methodologies and supporting CAD tools for system-level design, models of computation, the SystemC language, transaction-level modeling, software simulation and virtual platforms, hardware-software partitioning, high-level synthesis, system programming and device drivers, on-chip communication, memory organization, power management and optimization, integration of programmable processor cores and specialized accelerators. Case studies of modern SoC platforms for various classes of applications.

COMPUTER SCIENCE - BIOMEDICAL ENGINEERING

CBMF W4761 Computational Genomics. 3 points.

Lect: 3.

Prerequisites: Working knowledge of at least one programming language, and some background in probability and statistics. Computational techniques for analyzing genomic data including DNA, RNA, protein and gene expression data. Basic concepts in molecular biology relevant to these analyses. Emphasis on techniques from artificial intelligence and machine learning. String-matching algorithms, dynamic programming, hidden Markov models, expectation-maximization, neural networks, clustering algorithms, support vector machines. Students with life sciences backgrounds who satisfy the prerequisites are encouraged to enroll.

The Creative Writing Program in The School of the Arts combines intensive writing workshops with seminars that study literature from a writer's perspective. Students develop and hone their literary technique in workshops. The seminars (which explore literary technique and history) broaden their sense of possibility by exposing them to various ways that language has been used to make art. Related courses are drawn from departments such as English, comparative literature and society, philosophy, history, and anthropology, among others.

Students consult with faculty advisers to determine the related courses that best inform their creative work. For details on the major, see the Creative Writing website: <http://arts.columbia.edu/writing/undergraduate>.

MAJOR IN CREATIVE WRITING

The major in creative writing requires a minimum of 36 points: five workshops, four seminars, and three related courses.

Workshop Curriculum (15 points)

Students in the workshops produce original works of fiction, poetry, or nonfiction, and submit them to their classmates and instructor for a close critical analysis. Workshop critiques (which include detailed written reports and thorough line-edits) assess the mechanics and merits of the writing pieces. Individual instructor conferences distill the critiques into a direct plan of action to improve the work. Student writers develop by practicing the craft under the diligent critical attention of their peers and instructor, which guides them toward new levels of creative endeavor.

Creative writing majors select 15 points within the division in the following courses. One workshop must be in a genre other than the primary focus. For instance, a fiction writer might take four fiction workshops and one poetry workshop.

Beginning Workshop

Designed for students who have little or no previous experience writing literary texts in a particular genre.

WRIT UN1100	Beginning Fiction Workshop
WRIT UN1200	Beginning Nonfiction Workshop
WRIT UN1300	Beginning Poetry Workshop

Intermediate Workshop

Permission required. Admission by writing sample. Enrollment limited to 15. Course may be repeated in fulfillment of the major.

WRIT UN2100	Intermediate Fiction Workshop
WRIT UN2200	Intermediate Nonfiction Workshop
WRIT UN2300	Intermediate Poetry Workshop

Advanced Workshop

Permission required. Admission by writing sample.
Enrollment limited to 15. Course may be repeated in fulfillment of the major.

WRIT UN3100	Advanced Fiction Workshop
WRIT UN3200	Advanced Nonfiction Workshop
WRIT UN3300	Advanced Poetry Workshop

Senior Creative Writing Workshop

Seniors who are creative writing majors are given priority. Enrollment limited to 12, by instructor's permission. The senior workshop offers students the opportunity to work exclusively with classmates who are at the same high level of accomplishment in the major. This course is only offered by graduate faculty professors.

WRIT UN3101	Senior Fiction Workshop
WRIT UN3201	Senior Nonfiction Workshop
WRIT UN3301	Senior Poetry Workshop

Seminar Curriculum (12 points)

The creative writing seminars form the intellectual ballast of our program. Our seminars offer a close examination of literary techniques such as plot, point of view, tone, and voice.

They seek to inform and inspire students by exposing them to a wide variety of approaches in their chosen genre. Our curriculum, via these seminars, actively responds not only to historical literary concerns, but to contemporary ones as well.

Extensive readings are required, along with short critical papers and/or creative exercises. By closely analyzing diverse works of literature and participating in roundtable discussions, writers build the resources necessary to produce their own accomplished creative work.

Creative writing majors select 12 points within the division. Any 4 seminars will fulfill the requirement, no matter the student's chosen genre concentration. Below is a sampling of our seminars. The list of seminars currently being offered can be found in the "Courses" section.

These seminars offer close examination of literary techniques such as plot, point of view, tone, suspense, and narrative voice. Extensive readings are required, along with creative exercises.

FICTION

WRIT UN3121	Fiction Seminar: How To Build A Person
WRIT UN3117	Fiction Seminar: The Here & Now
WRIT UN3122	First Novels: How They Work
WRIT UN3120	Fiction Seminar: The Craft Of Writing Dialogue

NONFICTION

WRIT UN3213	Nonfiction Seminar: The Literary Reporter
WRIT UN3215	WRITING THE VISUAL
WRIT UN3216	Nonfiction Seminar: Truths & Facts
WRIT UN3217	Nonfiction Seminar: Science And Sensibility

POETRY

WRIT UN2311	Poetry Seminar: Traditions in Poetry
WRIT UN3313	Poetry Seminar: The Crisis of the I
WRIT UN3314	Poetry Seminar: 21st Century American Poetry and Its Concerns
WRIT GU4310	Poetry Seminar - Witness, Record, Document: Poetry & Testimony

CROSS GENRE

WRIT GU4011	Cross Genre Seminar: Imagining Berlin
WRIT GU4012	Cross Genre Seminar: Diva Voice, Diva Style, Diva Lyrics
WRIT UN3016	Cross Genre Seminar: Walking
WRIT UN3013	Cross-Genre Seminar: Process Writing & Writing Process

Related Courses (9 points)

Drawn from various departments, these courses provide concentrated intellectual and creative stimulation, as well as exposure to ideas that enrich students' artistic instincts. Courses may be different for each student writer. Students should consult with faculty advisers to determine the related courses that best inform their creative work.

FICTION WORKSHOPS

WRIT UN1100 Beginning Fiction Workshop. 3 points.

Prerequisites: No prerequisites. Department approval NOT required.

The beginning workshop in fiction is designed for students with little or no experience writing literary texts in fiction. Students are introduced to a range of technical and imaginative concerns through exercises and discussions, and they eventually produce their own writing for the critical analysis of the class. The focus of the course is on the rudiments of voice, character, setting, point of view, plot, and lyrical use of language. Students will begin to develop the critical skills that will allow them to read like writers and understand, on a technical level, how accomplished creative writing is produced. Outside readings of a wide range of fiction supplement and inform the exercises and longer written projects.

WRIT UN2100 Intermediate Fiction Workshop. 3 points.

Prerequisites: The department's permission required through writing sample. Please go to 609 Kent for submission schedule and registration guidelines or see <http://www.arts.columbia.edu/writing/undergraduate>.

Intermediate workshops are for students with some experience with creative writing, and whose prior work merits admission to the class (as judged by the professor). Intermediate workshops present a higher creative standard than beginning workshops, and increased expectations to produce finished work. By the end of the semester, each student will have produced at least seventy pages of original fiction. Students are additionally expected to write extensive critiques of the work of their peers.

Fall 2020: WRIT UN2100

WRIT UN3100 Advanced Fiction Workshop. 3 points.

Prerequisites: The department's permission required through writing sample. Please go to 609 Kent for submission schedule and registration guidelines or see <http://www.arts.columbia.edu/writing/undergraduate>.

Building on the work of the Intermediate Workshop, Advanced Workshops are reserved for the most accomplished creative writing students. A significant body of writing must be produced and revised. Particular attention will be paid to the components of fiction: voice, perspective, characterization, and form. Students will be expected to finish several short stories, executing a total artistic vision on a piece of writing. The critical focus of the class will include an examination of endings and formal wholeness, sustaining narrative arcs, compelling a reader's interest for the duration of the text, and generating a sense of urgency and drama in the work.

FICTION SEMINARS**WRIT UN2110 Fiction Seminar: Approaches to the Short Story. 3 points.**

Prerequisites: No prerequisites. Department approval NOT required.

The modern short story has gone through many transformations, and the innovations of its practitioners have often pointed the way for prose fiction as a whole. The short story has been seized upon and refreshed by diverse cultures and aesthetic affiliations, so that perhaps the only stable definition of the form remains the famous one advanced by Poe, one of its early masters, as a work of fiction that can be read in one sitting. Still, common elements of the form

have emerged over the last century and this course will study them, including Point of View, Plot, Character, Setting, and Theme. John Hawkes once famously called these last four elements the "enemies of the novel," and many short story writers have seen them as hindrances as well. Hawkes later recanted, though some writers would still agree with his earlier assessment, and this course will examine the successful strategies of great writers across the spectrum of short story practice, from traditional approaches to more radical solutions, keeping in mind how one period's revolution - Hemingway, for example - becomes a later era's mainstream or "common-sense" storytelling mode. By reading the work of major writers from a writer's perspective, we will examine the myriad techniques employed for what is finally a common goal: to make readers feel. Short writing exercises will help us explore the exhilarating subtleties of these elements and how the effects created by their manipulation or even outright absence power our most compelling fictions.

Spring 2021: WRIT UN2110

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

WRIT UN3120 Fiction Seminar: The Craft Of Writing Dialogue. 3 points.

Prerequisites: No prerequisites. Departmental approval NOT required.

Whether texting, chatting, conversing, speechifying, recounting, confiding, gossiping, tweeting, praying, interviewing, exhorting, pitching, scheming, lecturing, nagging or begging, humans love to talk, and readers love narratives that contain dialogue. Good dialogue makes characters and scenes feel real and alive. Great dialogue reveals characters' fears, desires and quirks, forwards the narrative's plot and dramatic tension, and often contains subtext. In this course, we'll read different kinds of novels and stories -- from noir to horror to sci-fi to realistic drama to comic romp -- that implement various types of dialogue effectively, and we'll study how to do it. We'll read essays by masters that explain techniques for writing great dialogue, and we'll practice writing different styles of dialogue ourselves. Coursework will consist of reading, in-class exercises, and two short creative assignments.

WRIT UN3127 Time Moves Both Ways. 3 points.

What is time travel, really? We can use a machine or walk through a secret door. Take a pill or fall asleep and wake up in the future. But when we talk about magic machines and slipstreams and Rip Van Winkle, we are also talking about memory, chronology, and narrative. In this seminar, we will approach time travel as a way of understanding "the Fourth Dimension" in fiction. Readings will range from the speculative

to the strange, to the realism of timelines, flashbacks, and shifts in perspective. Coursework will include short, bi-weekly writing assignments, a completed short story, and a time inflected adaptation.

Spring 2021: WRIT UN3127

NONFICTION SEMINARS**WRIT UN2211 Nonfiction Seminar: Traditions in Nonfiction. 3 points.**

Prerequisites: No prerequisites. Department approval NOT required.

The seminar provides exposure to the varieties of nonfiction with readings in its principal genres: reportage, criticism and commentary, biography and history, and memoir and the personal essay. A highly plastic medium, nonfiction allows authors to portray real events and experiences through narrative, analysis, polemic or any combination thereof. Free to invent everything but the facts, great practitioners of nonfiction are faithful to reality while writing with a voice and a vision distinctively their own. To show how nonfiction is conceived and constructed, class discussions will emphasize the relationship of content to form and style, techniques for creating plot and character under the factual constraints imposed by nonfiction, the defining characteristics of each author's voice, the author's subjectivity and presence, the role of imagination and emotion, the uses of humor, and the importance of speculation and attitude. Written assignments will be opportunities to experiment in several nonfiction genres and styles.

WRIT UN3219 Writing as Collecting. 3 points.

In **Writing as Collecting** we will examine how the concept of collecting provides a way to think through writing. We will read writing based from art, archives, and other collections, from antiquity to the contemporary, from the commonplace to the rarified. We will consider how writers have written distinctively through a collecting impulse or about specific collections. While our focus will be on works of nonfiction, we will also take forays into fiction, poetry, visual art, and the cinematic essay. Students will present on specific objects or collections, and two classes will take place in the Rare Book and Manuscript Library (located on the 6th floor of Butler Library): the first as an introduction and orientation to the collections with a discussion of how research can feed creative writing, and, the second, for an in-class exercise in writing creatively about a specific object or collection (a book, manuscript, archival box, etc.). Students will be encouraged to write about their own collections and to use the many public (or private) collections found throughout the city of New York.

Spring 2021: WRIT UN3219

POETRY WORKSHOPS**WRIT UN1300 Beginning Poetry Workshop. 3 points.**

Prerequisites: No prerequisites. Department approval NOT required.

The beginning poetry workshop is designed for students who have a serious interest in poetry writing but who lack a significant background in the rudiments of the craft and/or have had little or no previous poetry workshop experience. Students will be assigned weekly writing exercises emphasizing such aspects of verse composition as the poetic line, the image, rhyme and other sound devices, verse forms, repetition, tone, irony, and others. Students will also read an extensive variety of exemplary work in verse, submit brief critical analyses of poems, and critique each other's original work.

WRIT UN2300 Intermediate Poetry Workshop. 3 points.

Prerequisites: The department's permission required through writing sample. Please go to 609 Kent for submission schedule and registration guidelines or see <http://www.arts.columbia.edu/writing/undergraduate>.

Intermediate poetry workshops are for students with some prior instruction in the rudiments of poetry writing and prior poetry workshop experience. Intermediate poetry workshops pose greater challenges to students and maintain higher critical standards than beginning workshops. Students will be instructed in more complex aspects of the craft, including the poetic persona, the prose poem, the collage, open-field composition, and others. They will also be assigned more challenging verse forms such as the villanelle and also non-European verse forms such as the pantoum. They will read extensively, submit brief critical analyses, and put their instruction into regular practice by composing original work that will be critiqued by their peers. By the end of the semester each student will have assembled a substantial portfolio of finished work.

WRIT UN3301 Senior Poetry Workshop. 4 points.

Prerequisites: The department's permission required through writing sample. Please go to 609 Kent for submission schedule and registration guidelines or see <http://www.arts.columbia.edu/writing/undergraduate>.

Seniors who are majors in creative writing are given priority for this course. Enrollment is limited, and is by permission of the professor. The senior workshop offers students the opportunity to work exclusively with classmates who are at the same high level of accomplishment in the major. Students in the senior workshops will produce and revise a new and substantial body of work. In-class critiques and conferences with the professor will be tailored to needs of each student.

POETRY SEMINARS**WRIT UN2311 Poetry Seminar: Traditions in Poetry. 3 points.**

Prerequisites: No prerequisites. Department approval NOT required.

The avenues of poetic tradition open to today's poets are more numerous, more invigorating, and perhaps even more baffling than ever before. The routes we chose for our writing lead to destinations of our own making, and we take them at our own risk—necessarily so, as the pursuit of poetry asks each of us to light a pilgrim's candle and follow it into the moors and lowlands, through wastes and prairies, crossing waters as we go. Go after the marshlights, the will-o-wisps who call to you in a voice you've longed for your whole life. These routes have been forged by those who came before you, but for that reason, none of them can hope to keep you on it entirely. You must take your steps away, brick by brick, heading confidently into the hinterland of your own distinct achievement.

For the purpose of this class, we will walk these roads together, examining the works of classic and contemporary exemplars of the craft. By companioning poets from a large spread of time, we will be able to more diversely immerse ourselves in what a poetic "tradition" truly means. We will read works by Edmund Spencer, Dante, and Goethe, the Romantics—especially Keats—Dickinson, who is mother to us all, Modernists, and the great sweep of contemporary poetry that is too vast to individuate.

While it is the imperative of this class to equip you with the knowledge necessary to advance in the field of poetry, this task shall be done in a Columbian manner. Consider this class an initiation, of sorts, into the vocabulary which distinguishes the writers who work under our flag, each of us bound by this

language that must be passed on, and therefore changed, to you who inherit it. As I have learned the words, I have changed them, and I give them now to you so that you may pave your own way into your own ways, inspired with the first breath that brought you here, which may excite and—hopefully—frighten you. You must be troubled. This is essential.

WRIT UN3315 Poetry Seminar: Poetic Meter And Form. 3 points.

Prerequisites: No prerequisites. Department approval NOT required.

This course will investigate the uses of rhythmic order and disorder in English-language poetry, with a particular emphasis on 'formal' elements in 'free' verse. Through a close analysis of poems, we'll examine the possibilities of qualitative meter, and students will write original creative work within (and in response to) various formal traditions. Analytical texts and poetic manifestos will accompany our reading of exemplary poems. Each week, we'll study interesting examples of metrical writing, and I'll ask you to write in response to those examples. Our topics will include *stress meter*, *syllable-stress meter*, *double and triple meter*, *rising and falling rhythms*, *promotion*, *demotion*, *inversion*, *elision*, and *foot scansion*. Our study will include a great range of pre-modern and modern writers, from Keats to W.D. Snodgrass, Shakespeare to Denise Levertov, Blake to James Dickey, Whitman to Louise Gluck etc. As writers, we'll always be thinking about how the *formal choices* of a poem are appropriate or inappropriate for the poem's *content*. We'll also read prose by poets describing their metrical craft.

WRIT UN3320 Provocations in Twentieth-Century Poetics. 3.00 points.

This is a class about poetry and revolt. In a century of wars, unchecked proliferation of industrial and market systems in the continued legacy of settler-colonialism and the consolidation of state powers, does language still conduct with revolutionary possibilities? In this class, we will read manifestos, philosophical treatises, political tracts, literary polemics, poems, scores, and so on, as we consider poetry's long-standing commitment to visionary practices that seek to liberate consciousness from the many and various structures of oppression. The term "poetry" is not limited to itself but becomes, in our readings, an open invitation to all adjacent experiments with and in the language arts. As such, we will look at the emergence of the international avant-gardes as well as a few student movements that populate and complicate the

explorations of radical politics in the twentieth-century. In addition to our readings, students will be asked to produce creative responses for class discussion. Final projects will be provocations of their own design. Required Texts: Friedrich Nietzsche: *On the Genealogy of Morality* Karl Marx and Friedrich Engels: *The Communist Manifesto* Aimé Césaire: *Notebook of A Return to the Native Land* Hilda Hilst: *The Obscene Madame D* Marguerite Duras: *Hiroshima Mon Amour* Guy Debord: *Society of the Spectacle*

CROSS GENRE SEMINARS

WRIT UN3011 Translation Seminar. 3 points.

Prerequisites: No prerequisites. Students do not need to demonstrate bilingual ability to take this course. Department approval NOT needed.

Corequisites: This course is open to undergraduate & graduate students.

This course will explore broad-ranging questions pertaining to the historical, cultural, and political significance of translation while analyzing the various challenges confronted by the art's foremost practitioners. We will read and discuss texts by writers and theorists such as Benjamin, Derrida, Borges, Steiner, Dryden, Nabokov, Schleiermacher, Goethe, Spivak, Jakobson, and Venuti. As readers and practitioners of translation, we will train our ears to detect the visibility of invisibility of the translator's craft; through short writing experiments, we will discover how to identify and capture the nuances that traverse literary styles, historical periods and cultures. The course will culminate in a final project that may either be a critical analysis or an original translation accompanied by a translator's note of introduction.

WRIT 3011	001/16710	W 6:10pm - 8:00pm Online Only	Katrine Jensen	3	11/15

WRIT UN3014 Cross Genre Seminar: Structure and Style. 3 points.

Prerequisites: No prerequisites. Department approval NOT required.

This seminar explores fiction, nonfiction, poetry and drama as related disciplines. While each genre has its particular opportunities and demands, all can utilize such devices as narrative, dialogue, imagery, and description (scenes, objects, and thought processes). Through a wide variety of readings and writing exercises, we will examine and explore approaches to language, ways of telling a story (linear and nonlinear), and how pieces are constructed. Some student work will be briefly workshoped.

Fall 2020: WRIT UN3014

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3014	001/12936	Th 6:10pm - 8:00pm Online Only	Alan Ziegler	3	15/15

WRIT UN3015 Daily Life. 3 points.

Prerequisites: No prerequisites. Department approval NOT required.

In his poem *A Few Days*, James Schuyler reflects "A few days / are all we have. So count them as they pass. They pass too quickly / out of breath." Before we know it, as Schuyler says, "Today is tomorrow." This course will encourage us to slow down time and document today while it is still today. One of the course's main points is to pursue the ordinary, and to recognize that the ordinary -- whether presented as poems, essays, stories, fragments, etc. -- can become art. Assignments will provide broad examples of how to portray dailiness. Each week you will write a short piece (1-3 pages) that responds to these assignments while engaging your own daily life. The form is open. You could, for example, write a poem or story with a brief critical preface, or you could compose an essay that explores formal and/or thematic qualities. You can also create multimedia work. The important thing is to treat the materials we will read as springboards into your own artistic practice.

Spring 2021: WRIT UN3015

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3015	001/16711	Th 10:10am - 12:00pm Online Only	John Cotner	3	15/15

WRIT UN3016 Cross Genre Seminar: Walking. 3 points.

Prerequisites: No prerequisites. Department approval NOT required.

As Walter Benjamin notes in *The Arcades Project*: "Basic to flanerier, among other things, is the idea that the fruits of idleness are more precious than the fruits of labor. The flaneur, as is well known, makes 'studies'." This course will encourage you to make "studies" -- poems, essays, stories, or multimedia pieces -- based on your walks. We will read depictions of walking from multiple disciplines, including philosophy, poetry, history, religion, visual art, and urban planning. Occasionally we will walk together. An important point of the course is to develop mobile forms of writing. How can writing emerge from, and document, a walk's encounters, observations, and reflections? What advantages does mobility bring to our work? Each week you will write a short piece (1-3 pages) that engages your walks while responding to close readings of the assigned material.

Fall 2020: WRIT UN3016

WRIT UN3017 Incarcerated Yet Inspired: Exploring Criminal Justice Through Creative Writing. 3 points.

Welcome to the Incarcerated Yet Inspired, a cross-genre, creative writing seminar. Over the course of this semester, we will conduct a close reading of literary works that are based on the lives of individuals who have been ostracized, incarcerated, and isolated from their communities. While some of the writers we will study have been personally affected by the criminal justice system, others have drawn upon their research, observations, and experiences working in prisons to tell a compelling story. Through our weekly analysis and discussion, we will explore the thematic elements and artistic choices each writer employs in their work. We will also challenge our existing thoughts about prisons as an institution and develop a better understanding of how the prism of art and justice can be valuable to you as writers.

WRIT UN3018 Inhabiting Form: Writing the Body. 3 points.

The body is our most immediate encounter with the world, the vessel through which we experience our entire lives: pleasure, pain, beauty, horror, limitation, freedom, fragility and empowerment. In this course, we will pursue critical and creative inquiries into invocations and manifestations of the body in multiple genres of literature and in several capacities. We will look at how writers make space for—or take up space with—bodies in their work.

The etymology of the word “text” is from the Latin *textus*, meaning “tissue.” Along these lines, we will consider the text itself as a body. Discussions around body politics, race, gender, ability, illness, death, metamorphosis, monstrosity and pleasure will be parallel to the consideration of how a text might function itself as a body in space and time. We will consider such questions as: What is the connective tissue of a story or a poem? What is the nervous system of a lyric essay? How is formal constraint similar to societal ideals about beauty and acceptability of certain bodies? How do words and language function at the cellular level to build the body of a text? How can we make room to honor, in our writing, bodies that have otherwise been marginalized?

We will also consider non-human bodies (animals & organisms) and embodiments of the supernatural (ghosts, gods & specters) in our inquiries. Students will process and explore these ideas in both creative and analytical writings throughout the semester, deepening their understanding of embodiment both on and off the page.

Online Only

WRIT GU4310 Poetry Seminar - Witness, Record, Document: Poetry & Testimony. 3 points.

Prerequisites: No prerequisites. Department approval NOT required.

This seminar takes up the terms witness, record, and document as nouns and verbs. What is poetry of witness? Documentary poetry? Poetry as (revisionist) historical record? What labor and what ethical, political, and aesthetic considerations are required of poets who endeavor to witness, record, or document historical events or moments of trauma? How is this approach to poetry informed by or contributing to feminist theories, aesthetic innovation, and revisionist approaches to official histories? Course materials include: 1) essays that explore the poetics and politics of "poetry of witness" or "documentary poetry"; 2) a range of contemporary American Poetry that has been classified as or has productively challenged these categories; 3) and audio, video, and photographic projects on which poets have collaborated. Our encounters with this work will be guided by and grounded in conversations about ideas of "truth," "text," the power relations of "documentation," and issues of language and representation in poetry. We will also critically examine the formal (rhyme, rhythm, diction, form, genre, point of view, imagery, etc.) and philosophical components and interventions of the work we study and create.

DANCE

310 Barnard Hall
212-854-2995
dance@barnard.edu

Department Assistant: Diane Roe

THE DEPARTMENT OF DANCE

Mission

The Barnard College Department of Dance, located in a world dance capital, offers an interdisciplinary program that integrates the study of dance within a liberal arts setting of intellectual and creative exploration. The major builds upon studio courses, the Department's productions at Miller Theater, New York Live Arts, and other venues, as well as a rich array of dance studies courses, allowing students' creative work to develop in dialogue

with critical inquiry into the history, culture, theory and forms of western and non-western performance, typically enhanced by study in other disciplines. Students work with accomplished artists whose work enriches contemporary American dance; they also study with outstanding research scholars.

Making, thinking about, and writing about art are an essential part of the liberal arts education. For this reason, the Department of Dance offers technique courses for students of all levels of expertise, while opening its other courses to majors and non-majors alike, who may also audition for its productions. The Department partners with cultural institutions in New York City to connect students with the professional world.

Student Learning Outcomes for the Major and Concentration

Students graduating with a major in Dance should be able to attain the following outcomes:

- Apply critical thinking, reading, and writing skills to dance-related texts and choreography.
- Develop the knowledge and research skills to explore the dance past in writing, orally, and in performance.
- Present interpretations of dance-related texts orally, in writing, and in performance.
- Apply library, archival, and internet research skills to dance scholarship and choreography.
- Demonstrate improved efficiency and expressivity in dance technique.
- Demonstrate growing technical understanding and fluency in dance technique.
- Create original dances, dance/theater works or dance-based, mixed media works.
- Collaborate with an artist in the creation of original dance works.
- Participate in the creative process through the creation and interpretation of choreography.
- Apply interdisciplinary research methods to dance scholarship and choreography.
- Apply historical research methods to dance scholarship and choreography.
- Demonstrate conceptual and methodological approaches for studying world dance forms through research and writing.
- Demonstrate the ability to understand cultural and historical texts in relation to dance forms.
- Apply anatomical knowledge to movement and movement concepts.
- Evaluate the theoretical and artistic work of peers.
- Communicate with an audience in oral presentations and dance performance.
- Understand and interpret the language and form of an artist's choreography.

- Solve technical problems in dance movement.
- Apply musical knowledge to movement and choreography.
- Design choreographic movement and structures.

Dance Technique Courses

Level I courses, except for global and somatic courses, have no prerequisite and students receive a Pass/Fail grade. All other courses must be taken for a letter grade and require a placement audition (held at the first meeting of classes) or the permission of the instructor. These courses may be taken to fulfill the physical education requirement.

Ballet

Technique of classical ballet emphasizing proper alignment and graduated study of its vocabulary. Artistry of articulation, phrasing, dynamics, and nuance in the broad range of classical materials are addressed at each level.

Modern

The study of contemporary dance based on the work of the 20th and 21st century innovators. Aesthetic principles of modern dance will be taught with increased technical demands required at each successive level.

Global and Somatic Forms

The study of dance forms including classical Spanish, Jazz, Tap, West African, Afro-Cuban, and Indian.

Professor: Paul A. Scolieri (Chair & Director of Undergraduate Studies)

Professor of Professional Practice: Colleen Thomas-Young

Associate Professor of Professional Practice: Marjorie Folkman

Associate Professor of Professional Practice: Gabri Christa

Assistant Professor: Seth Williams

Senior Associate: Katie Glasner

Adjunct Faculty: Cynthia Anderson, Jennifer Archibald, Rebecca Bliss, Siobhan Burke, Maguette Camara, Antonio Carmena, Uttara Coolawala, Elisa Davis, Allison Easter, Caroline Fermin, Chisa Hidaka, Katiti King, Melinda Marquez, Jodi Melnick, Caitlin Trainor, Ashley Tuttle

Technical Director and Lighting Designer: Tricia Toliver

Music Director: Robert Boston

Senior Administrative Assistant: Diane Roe

MAJOR IN DANCE

Majors must complete eleven academic courses (six required, five elective) and a minimum of eight 1-point technique courses. All majors write a senior thesis as part of their coursework.

The required courses for the major in dance are distributed as follows:

Dance History

The following two courses in Dance History must be completed before the fall of the senior year:

DNCE BC2565	World Dance History	3
DNCE BC3001	Western Theatrical Dance from the Renaissance to the 1960s	3

Movement Science

Select one or more of the following:

DNCE BC2501	BIOMECHANICS FOR THE DANCER	3
DNCE BC2562	Movement Analysis	3

Composition

One course in Composition must be completed before the fall of the senior year.

DNCE BC2564	Dance Composition: Content	3
DNCE BC3565	Composition: Collaboration and the Creative Process	3
DNCE BC3566	Composition: Site Specific and Experimental Methods	3
DNCE BC2563	Dance Composition: Form	3

Senior Work

Seniors planning to write a combined thesis must request approval from both departments and notify the Registrar. All majors must complete two semesters of senior work. The following course, which culminates in a 25-30-page written thesis and an oral presentation to the Department at the end of the semester, is required of all seniors:

DNCE BC3591	Senior Seminar in Dance	4
-------------	-------------------------	---

In addition, all majors must take one of the following two courses, depending on whether the senior requirement is completed with a creative project or a two-semester written thesis:

DNCE BC3592	Senior Project: Research for Dance	4
DNCE BC3593	Senior Project: Repertory for Dance	3

Students who are double majors may request permission to write a two-semester combined thesis.

Electives

Five additional 3- or 4-point courses, chosen in consultation with the major advisor, are required. Electives may be chosen from among the departmental offerings listed above or below, including additional coursework in Composition, Movement Science, and/or Senior Work beyond the major requirement.

History/Criticism:		
DNCE BC2570	Dance in New York City	
DNCE BC2575	Choreography for the American Musical	
DNCE BC2580	Tap as an American Art Form	
DNCE BC3000	From Page to Stage: Interactions of Literature and Choreography	
DNCE BC3200	Dance in Film	
DNCE BC3567	Dance of India	
DNCE BC3570	Latin American and Caribbean Dance: Identities in Motion	

DNCE BC3575	George Balanchine and the Reinvention of Modern Ballet
DNCE BC3576	Dance Criticism
DNCE BC3577	Performing the Political: Embodying Change in American Performance
DNCE BC3578	Traditions of African-American Dance
DNCE BC3580	History of Social Dancing: Dance Crazes from the Waltz to Flash Mobs
DNCE BC3583	Gender and Historical Memory in American Dance of the 1930's to the Early 1960's
DNCE BC3980	Performing the Political: Embodying Change in American Performance
DNCE BC3981	Inventing American Modern Dance: Ruth St. Denis and Ted Shawn
DNCE BC3982	Diaghilev's Ballets Russes and Its World
Studio/Performance:	
DNCE BC2555	Ensemble Dance Repertory (Modern Dance)
DNCE BC2556	Ensemble Dance Repertory: Ballet
DNCE BC2557	Evolution of Spanish Dance Style
DNCE BC2558	Tap Ensemble
DNCE BC2567	Music for Dance
DNCE BC3571	Solo Repertory: Performance Styles
DNCE BC3601 - DNCE BC3604	Rehearsal and Performance in Dance and Rehearsal and Performance in Dance

Overview of Major Requirements (11 total, plus 8 technique courses)

- 1 Movement Science
- 1 Composition
- 2 History
- 1 Senior Seminar
- 1 Senior Project (Research in Dance or Repertory for Dance)
- 5 Electives
- 8 Technique Courses

MAJOR IN DANCE (for students declaring a major before Fall 2011)

Majors must fulfill an eleven-course requirement, including the DNCE BC3591 Senior Seminar in Dance and either Senior Project: Research in Dance (DNCE BC3592 Senior Project: Research for Dance) or DNCE BC3593 Senior Project:

Repertory for Dance, in addition to taking a minimum of eight 1-point technique courses.

To fulfill the distribution requirements, one course must be taken in each of the following four areas:

Movement Science

DNCE BC2501	BIOMECHANICS FOR THE DANCER	3
DNCE BC2562	Movement Analysis	3
ANAT BC2573	Human Anatomy and Movement	3

Composition

DNCE BC2563	Dance Composition: Form	3
DNCE BC2564	Dance Composition: Content	3
DNCE BC3565	Composition: Collaboration and the Creative Process	3
DNCE BC3566	Composition: Site Specific and Experimental Methods	3

History

DNCE BC2565	World Dance History	3
DNCE BC3001	Western Theatrical Dance from the Renaissance to the 1960s	3

Writing

DNCE BC2570	Dance in New York City	3
DNCE BC3570	Latin American and Caribbean Dance: Identities in Motion	3
DNCE BC3574	Inventing the Contemporary: Dance Since the 1960s	3
DNCE BC3576	Dance Criticism	3
DNCE BC3577	Performing the Political: Embodying Change in American Performance	3

Electives

In consultation with the major advisor, an additional five courses should be chosen from the courses listed above or below:

History/Criticism:

DNCE BC2575	Choreography for the American Musical
DNCE BC2580	Tap as an American Art Form
DNCE BC3000	From Page to Stage: Interactions of Literature and Choreography
DNCE BC3567	Dance of India
DNCE BC3575	George Balanchine and the Reinvention of Modern Ballet
DNCE BC3577	Performing the Political: Embodying Change in American Performance
DNCE BC3578	Traditions of African-American Dance
DNCE BC3980	Performing the Political: Embodying Change in American Performance
DNCE BC3982	Diaghilev's Ballets Russes and Its World

Studio/Performance:

DNCE BC2555	Ensemble Dance Repertory (Modern Dance)
DNCE BC2556	Ensemble Dance Repertory: Ballet
DNCE BC2558	Tap Ensemble
DNCE BC2567	Music for Dance
DNCE BC3571	Solo Repertory: Performance Styles
DNCE BC3572	Dance Production
DNCE BC3601 - DNCE BC3604	Rehearsal and Performance in Dance and Rehearsal and Performance in Dance

Senior Work

All dance majors must complete two semesters of senior work. DNCE BC3591 Senior Seminar in Dance given in the fall semesters, requires a 25-30 page written thesis and an oral presentation to the Department at the end of the semester. The second semester is usually a performance project for which the student registers in DNCE BC3593 Senior Project: Repertory for Dance. Students may also choose to do a two-semester thesis, registering in DNCE BC3592 Senior Project: Research for Dance. Students who are double majors may request permission to do a two-semester combined thesis.

Overview of Major Requirements (11 total, plus 8 technique classes)

- 1 Movement Science
- 1 Composition
- 1 History
- 1 Writing
- 1 Senior Seminar
- 1 Senior Project (Research in Dance or Repertory for Dance)
- 5 Electives
- 8 Technique Classes

CONCENTRATION IN DANCE

The concentration in dance is identical to the major except that only two electives are required.

For the major requirements, please see above.

Overview of Concentration Requirements (8 total, plus 8 technique classes)

- 1 Movement Science
- 1 Composition
- 2 History
- 1 Senior Seminar
- 1 Senior Project (Research in Dance or Repertory for Dance)

- 2 Electives
- 8 Technique Classes

DNCE BC2250 Hip Hop Dance and Culture. 1 point.

Prerequisites: Intermediate level of dance or permission of the instructor.

This Course introduces intermediate level students to urban dance styles, focusing on foundations and origins of hip-hop dance, street dance culture, and the physical vocabularies of hip-hop and freestyle dance. Classes are geared to condition the body for the rigors of hip-hop technique by developing strength, coordination, flexibility, stamina, and rhythmic awareness, while developing an appreciation of choreographic movement and structures. Compositional elements of hip-hop will be introduced and students may compose brief movement sequences. The course meets twice weekly and is held in the dance studio. Prerequisite: Intermediate level of a dance form or permission of the instructor.

DNCE BC3200 Dance in Film. 3 points.

Survey of theatrical dance in the 20th century specific to film production. Five kinds of dance films will be examined: musicals, non-musicals, documentaries, film essays and pure dance recording.

Fall 2020: DNCE BC3200

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3200	001/00744	M W 12:00pm - 2:30pm Room TBA	Gabri Christa	3	13/20

DNCE BC3240 Seeing the Body: Movement and Physicality in Modern Visual Culture. 3 points.

Prerequisites: Experience in any combination of Dance performance, Dance History, Art History (19th-20th C Europe/United States), and/or Urban Studies (19th-20th C Europe/United States) are helpful as foundations for this course, they are not prerequisites to take this class. This course does not supplant the Western Theatrical Dance History requirement for the Dance Major.

Seeing the Body: Movement and Physicality in Modern Visual Culture will examine how these concepts of movement, space, and time gained an outsized role in photographic and cinematic

experimentation, typography, interior design and exhibition, contributing a “choreographic voice” to the interwar age.

Our course will incorporate texts, images, and films connected to the fields of Dance History, Art History and Urban Studies. Beginning with a study of how nineteenth century industrialization and urbanization laid the foundations for the physical articulations of the early twentieth century, we will consider both avant-garde and popular visual phenomena to gain wider perception and a deeper understanding of interwar cultural expression. Finally, we will consider how visual expressions of physicality are reflected in our current digital age.

Fall 2020: DNCE BC3240

DNCE BC3567 Dance of India. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

A range of dance genres, from the traditional to the innovative, co-exist as representations of "Indianness" in India, and beyond. Identities onstage and in films, morph as colonial, national, and global contexts change. This course zooms from micro to macro views of twentieth century staged dances as culturally inflected discourse. We review how Indian classical dance aligns with the oldest of performance texts, and with lively discourses (rasa as a performance aesthetic, Orientalism, nationalism, global recirculations) through the ages, not only in India but also in Europe, Britain and America. Throughout the course, we ask:- How is culture embodied? How do historical texts configure dance today? How might they affect our thinking on mind-body, practice-theory, and traditional-contemporary divides? How does bodily patterning influence the ways that we experience our surroundings and vice versa?

Can cultural imaginaries instigate action? How is gender is performed? What are dance discourses?

Fall 2020: DNCE BC3567

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

DNCE BC2570 Dance in New York City. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Study of the cultural roots and historical contexts of specific communities using New York City's dance scene as a laboratory. Students observe the social environments in which various modes of dance works are created while researching the history of dance in New York City. Course includes attendance at weekly events, lecture-demonstrations, and performances.

DNCE BC2575 Choreography for the American Musical. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2020-21 academic year.

Prerequisites: Suggested DNCE BC2560, BC2566, BC2570
Explores the history and evolution of American Musical Theater dance, a uniquely American art form, with special focus on the period known as "The Golden Era." Analysis of the genre's most influential choreographers (including Balanchine, de Mille, Robbins), their systems, methodologies and fusion of high and low art on the commercial stages.

DNCE BC2580 Tap as an American Art Form. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Prerequisites: DNCE BC1446 or equivalent experience.
Studio/lecture format focuses on tap technique, repertory, improvisation, and the development of tap explored through American history, jazz music, films, videos, and biographies.

DNCE BC3001 Western Theatrical Dance from the Renaissance to the 1960s. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Focuses on the history of theatre dance forms originating in Europe and America from the Renaissance to the present. Includes reading, writing, viewing, and discussion of sources such as film, text, original documentation, demonstration, and performance.

Fall 2020: DNCE BC3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3001	001/00461	T Th 1:10pm - 2:25pm Room TBA	Seth Williams	3	25/30

DNCE BC3570 Latin American and Caribbean Dance: Identities in Motion. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2020-21 academic year.

Examines the history and choreographic features of Latin American and Caribbean dance forms. Dances are analyzed in

order to uncover the ways in which dancing shapes national, racial, and gender identities. Focuses on the globalization of these dances in New York City.

DNCE BC3574 Inventing the Contemporary: Dance Since the 1960s. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Explores modern/contemporary dance in the United States and Europe since the 1960's. Major units are devoted to the Judson Dance Theater and its postmodernist aftermath, Tanztheater and European dance revisionism, and African-American dance and the articulation of an aesthetic of cultural hybridity.

DNCE BC3578 Traditions of African-American Dance. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2020-21 academic year.

Traces the development of African-American dance, emphasizing the contribution of black artists and the influence of black traditions on American theatrical dance. Major themes include the emergence of African-American concert dance, the transfer of vernacular forms to the concert stage, and issues of appropriation, cultural self-identification, and artistic hybridity.

DNCE BC3583 Gender and Historical Memory in American Dance of the 1930's to the Early 1960's. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2020-21 academic year.

Prerequisites: One course in dance history/studies or permission of the instructor.

Explores the question of why so many women dancer/choreographers of the 1930's - to the early 1960's, including relatively well-known ones, have ended up as peripheral rather than central players in what has become the master narrative of a crucial era of the recent dance past.

DNCE BC3980 Performing the Political: Embodying Change in American Performance. 4 points.

Not offered during 2020-21 academic year.

Prerequisites: An introductory course in dance or theatre history or permission of instructor. Enrollment limited to 12 students.
Exploration into the politics of performance and the performance of politics through the lens of 20th-century American dance.

CROSS-LISTED COURSES - URBAN STUDIES**DNCE BC2570 Dance in New York City. 3 points.**

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Study of the cultural roots and historical contexts of specific communities using New York City's dance scene as a laboratory. Students observe the social environments in which various modes of dance works are created while researching the history of dance in New York City. Course includes attendance at weekly events, lecture-demonstrations, and performances.

DRAMA AND THEATRE ARTS

507 Milbank Hall

212-854-2080

212-280-8764 (fax)

Department Administrator: Coretta Grant

Faculty Department Assistant: Valerie Coates

The Barnard and Columbia undergraduate theatre program engages the disciplines of drama, theatre, and performance studies as a distinctive mode of intellectual and artistic inquiry. Majors take foundational coursework in the literary, cultural, and embodied traditions of western and nonwestern performance as well as in the practices of acting, directing, design, and playwriting. All majors then specialize in a specific area and undertake advanced thesis work, leading either to a formal essay of original research, or to an artistic project (in acting, design, directing, dramaturgy, playwriting, or solo performance) that combines the practices of research and artistic creation.

While Barnard and Columbia students fulfill the overall graduation requirements of their respective institutions, major requirements for the Barnard Major in Theatre/Columbia Major in Drama and Theatre Arts are identical, and the majority of required coursework is offered through the Barnard College Department of Theatre. Barnard and Columbia students receive their degrees from their respective colleges of Columbia University.

The Department's season of productions in the Minor Latham Playhouse and the Glicker-Milstein Black Box Theatre is a crucible of investigation: the place where professional directors and designers collaborate with undergraduates, using a wide range of classic and contemporary plays and performance practices to shape insights unique to theatrical inquiry today. Whether it's Shakespeare or Soyinka or Caryl Churchill, or the directing, solo performance, and playwriting theses in the Senior Thesis Festival, Department of Theatre productions are both a learning process and a scene of encounter, where perceptions are shaped for the attention and creative response of a larger public.

Students interested in majoring in Theatre should consider taking three or four of the required classes in their first two years of study: Western Theatre Traditions: Classic to Romantic, Western Theatre Traditions: Modern and/or a course fulfilling the "world theatre" requirement offered in

the Department of Theatre, and at least one class in acting, design, directing, or playwriting (preferably in the area you might choose as areas of specialization). Students thinking about a research focus might consider an additional dramatic literature, theatre studies, or performance studies class early in their studies; students thinking about an acting or design focus, for example, might consider additional classes in those areas in the second or third year of study.

STUDENT LEARNING OBJECTIVES

Upon completion of the major, successful students will be able to attain the following objectives:

- Assess critically the artistic ambitions of contemporary theatrical performance, and of literary, critical and theoretical issues involved in the interpretation of dramatic literature and theatrical performance;
- Create with proficiency in at least one area of creative work in the field: critical/research writing, acting, directing, design, playwriting, and dramaturgy.

Areas of Concentration

Drama and Theatre Studies Student Learning Objectives

Students successfully completing drama and theatre studies coursework, or concentrating in drama and theatre studies, should be able to attain the following objectives:

1. Write clearly about dramatic literature, and about performance, including where applicable film performance;
2. Synthesize and evaluate contemporary criticism and research scholarship in writing;
3. Know specific authors, movements, periods, styles, and ideological structures in the history of drama, theatre, and performance (i.e., Shakespeare, American drama, Performative Cultures of the Third Reich, Black Theatre);
4. Use critical, theoretical, and historical concepts in the analysis of drama and performance.

Acting Student Learning Objectives

Students successfully completing a concentration in acting should be able to attain the following objectives:

1. Analyze dramatic texts and apply the analysis to developing a performable role/character;
2. Synthesize external elements with external elements (social mores, environment, historical context, status relationship to others) and internal elements (center of gravity, personal rhythm, speed, tempo) toward the expression of a character's physicality and emotionality;
3. Recognize and apply the fundamental concepts of character development: objectives, obstacles, actions, given circumstances;
4. Develop vocal, physical and emotional awareness and imagination, and to explore techniques available to aid the

actor in applying these elements in a conscious way during rehearsal and performance.

Design Student Learning Objectives

Students successfully completing a concentration in design should be able to attain the following objectives:

1. Analyze dramatic texts and translate that analysis into documents used in the production process (breakdowns, plots, etc.);
2. Collect images and texts that provide insight into the developing design idea, and accurately communicate historical and stylistic choices;
3. Demonstrate fluency with the craft of a design field – e.g. sketching, model making, drafting, sound and lighting plots, and associated software;
4. Perform collaboratively, adapting and informing their designs with ideas generated through conversation with colleagues, classmates, and advisors.

Directing Student Learning Objectives

Students successfully completing a concentration in directing should be able to attain the following objectives:

1. Recognize the different demands of different configurations of stage space;
2. Apply compositional tools;
3. Define production style and its influence on performance choices;
4. Communicate effectively with actors;
5. Analyze the historical, social, and aesthetic elements of a dramatic text as the basis for a directorial conception.

Dramaturgy Student Learning Objectives

Students successfully completing a concentration in dramaturgy should be able to attain the following objectives:

1. Apply important critical and theoretical concepts to the analysis of dramatic writing and theatrical performance;
2. Synthesize and evaluate contemporary research scholarship and apply it to a specific production, including biographical, historical, and interpretive information;
3. Write clearly and effectively about the goals of a production, its critical contexts and purposes;
4. Communicate the critical stakes of a performance to a director and cast; to be able to work with a director in fashioning those stakes;
5. Edit dramatic scripts for production.

Playwriting Student Learning Objectives

Students successfully completing a concentration in playwriting should be able to attain the following objectives:

1. Create an individual theatrical voice in writing;
2. Construct dramatic and theatrical events onstage;

3. Communicate supportive critique to fellow writers;
4. Interpret plot and story, and to employ language and spectacle creatively;
5. Recognize dramatic structures, and be able to shape and hold an audience's attention.

Stage and Production Management Student Learning Objectives

Students successfully completing a concentration in stage and production management should be able to attain the following objectives:

1. Read and analyze a performance text from stage and production management perspectives;
2. Communicate with and coordinate the needs of all members of the production effectively;
3. Organize and manage the rehearsal process
4. Develop and update the production budget

Faculty:

Chair: W.B. Worthen (Alice Brady Pels Professor in the Arts, Co-Director of Undergraduate Studies, Drama and Theatre Arts)

Assistant Professor: Paige Johnson

Associate Professor: Hana Worthen

Professor of Professional Practice, Theatre, School of the Arts: Steven Chaikelson

Associate Professors of Professional Practice: Sandra Goldmark, Alice Reagan

Lecturers: Gisela Cardenas, Shayoni Mitra

Adjunct Lecturers: Mana Allen, Daniel Baker, Andy Bragen, Kyle deCamp, Crystal Finn, Sharon Fogarty, Shannon Sindelar, Wendy Waterman

Affiliated Faculty:

Associate Professor: Maja Horn (Spanish and Latin American Cultures)

Senior Lecturers: Pam Cobrin (English, Director, Writing Program), Patricia Denison (English, Co-Director of Undergraduate Studies, Drama and Theatre Arts)

Other officers of the University offering courses listed below:

Professors: Austin E. Quigley, Jean Howard, Rebecca Kastleman, Julie Stone Peters

Department Administrator: Coretta Grant

Technical Director: Greg Winkler

Production Manager: Michael Banta

Costume Shop Manager: Kara Feely

Faculty Department Assistant: Valerie Coates

REQUIREMENTS FOR THE MAJOR

Download the Theatre major self-audit form

Students intending to major in Theatre should consult with the Department Chair in their sophomore year or earlier to plan a program: this consultation is required for Barnard students and strongly recommended for Columbia students. Twelve courses and one senior thesis (in Performance or in Research) are required as follows:

Dramatic Literature and Theatre History

World theatre and performance histories:

Both required:

THTR UN3150	Western Theatre Traditions:Classic to Romantic
THTR UN3151	WESTRN THTR TRAD: MODERN

Select one of the following:

THTR UN3149	PERFORMANCE IN/OF SOUTH # SOUTHEAST ASIA	3.00
THTR UN3154	Theatre Traditions in a Global Context	
THTR UN3155	TRADITIONAL INDIAN PERFORMNCE	
THTR UN3156	MODERN ASIAN PERFORMANCE	

Select one course in Drama, Theatre, and Performance

Theory:

THTR UN3140	Performing Women
THTR UN3160	Queer Performance
THTR UN3165	THEORIES OF PERFORMANCE STUDIES
THTR UN3166	Drama, Theatre, and Theory
ENTA UN3701	Drama, Theatre, Theory

Select one course in Shakespeare, may be taken in Theatre or English departments.

Select Two courses in dramatic literature, theatre studies, and/or performance studies, taken in the Theatre Department or in another department with advisor's approval. One course must be a seminar.

Theatre Practice

Select one course each in 3 of the following 4 areas:

Acting

THTR UN3004	ACTING I	
THTR UN3005	ACTING II	3.00

Design

THTR UN3401	Sound Design
THTR UN3402	COSTUME DESIGN
THTR UN3403	LIGHTING DESIGN
THTR UN3404	SCENE DESIGN

THTR UN3405 PROBLEMS IN DESIGN

THTR UN 3203 Collaboration may be counted if not counted toward Directing

Directing

THTR UN3200 DIRECTING I

THTR UN3201 DIRECTING II

THTR UN 3203 Collaboration may be counted if not counted toward Design

Playwriting

THTR UN3300 Playwriting Workshop

THTR UN3301 PLAYWRITING LAB

Concentration

All majors must take an additional TWO courses in the field of the Senior Thesis. *See below.

Senior Thesis

All students must take either THTR UN3997 or THTR UN3998:

THTR UN3997	SENIOR THESIS IN PERFORMANCE (Acting, Design, Directing, Dramaturgy, Playwriting, Solo Performance) *
THTR UN3998	SENIOR THESIS IN RESEARCH **

* *Prior to completing the Senior Thesis: Performance, majors must take an additional two courses in the field of the thesis (acting, design, dramaturgy, directing, playwriting, solo performance). Courses in acting, design, and directing are offered through the Department of Theatre. Courses in playwriting are offered through the Department of Theatre and the Department of English; a student who takes one of the playwriting classes above as part of the Theatre Practice requirement may take a playwriting course in English as one of the two additional playwriting courses required for the thesis. For theses in directing, students must take a dramaturgy course prior to the thesis year. For theses in dramaturgy, students take two additional courses in dramatic literature, theatre studies, or performance studies research; these courses may be drawn from courses in dramatic literature, theatre studies, and global performance traditions offered in the Theatre department, or from dramatic literature courses offered in other departments with the adviser's approval. Dramaturgy thesis students may substitute one course in playwriting for one of the two additional courses. Students pursuing a solo performance thesis are required to have taken the Solo Performance course prior to the thesis semester (spring), among the three required courses in acting.

**** ****Prior to completing the Senior Thesis: Research, majors must take an additional two courses in drama, theatre, or performance research. These courses may be drawn from course in dramatic literature, theatre studies, and global performance traditions offered in the Theatre department, or from dramatic literature or performance studies courses offered in other departments with adviser's approval. These courses should be discussed with the student's major advisor, as well as with the sponsor of the thesis.

Production Crew

Theatre majors planning on completing a Senior Thesis in Performance (acting, design, directing, dramaturgy, playwriting, solo performance) are required to complete a run crew assignment and a crew head assignment prior to their final semester; to be in the strongest position for the thesis, ideally these assignments are completed during the junior year. Please see the section on [Production Crew](#) for more information.

Studio Courses

Please note that for Barnard students there is a limit on studio courses. Theatre majors may take 24 studio points in Theatre and an additional six in another discipline for a total of 30 studio points. Theatre Department studio courses are:

THTR UN2420	Technical Production	3
THTR UN3004	ACTING I	3
THTR UN3005	ACTING II	3
THTR UN3006	ADVANCED ACTING	3

Graduate Courses

Only under special circumstances, and with the permission of the instructor, can undergraduates take graduate classes.

THTR UN2005 Acting Workshop. 3 points.

When offered in Fall semester, open only to first-year students. **Not offered during 2020-21 academic year.**

Prerequisites: Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions.

Course develops the processes and tools an actor needs to approach the text of a play. Students develop their physical, vocal, and imaginative range and skills through voice and speech exercises, work on non-verbal behavior, improvisation, and character development. **IN THE FALL SEMESTER OPEN ONLY TO FIRST-YEAR STUDENTS.** Course encouraged for prospective BC Theatre and CU Drama and Theatre Arts majors.

THTR UN2022 PRACTICUM PERFORMANCE SHOW 1. 1.00-3.00 points.

Course can be taken for 1-3 points.

Course may be taken for 1-3 points. Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a departmental stage production register for this course; course emphasizes the collaborative nature of production, and appropriate research and reading required in addition to artistic assignments. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions. May be retaken for full credit.

Fall 2020: THTR UN2022

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2022	001/00014		Javier Gonzalez	1.00-3.00	1

Spring 2021: THTR UN2022

THTR 2022	001/00191		Alice Reagan	1.00-3.00	

THTR UN2023 Practicum Performance Show 2. 3 points.

Course may be taken for 1-3 points.

Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a departmental stage production register for this course; course emphasizes the collaborative nature of production, and appropriate research and reading required in addition to artistic assignments. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions. May be retaken for full credit.

Fall 2020: THTR UN2023

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2023	001/00167		Colette Robert	3	6

THTR UN2024 PRACTICUM PERFORMANCE THESIS 1. 1.00-3.00 points.

Course may be taken for 1-3 points. May be retaken for full credit. Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a Senior Thesis in Directing register for this course. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Spring 2021: THTR UN2024

THTR 2025	001/00193	M T W Th F 7:00pm - 11:00pm 207 Milbank Hall	Shannon Sindelar	1.00-3.00	

THTR UN2026 PRACTICUM PERFORMANCE THESIS**3. 1.00-3.00 points.**

Course may be taken for 1-3 points. May be retaken for full credit. Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a Senior Thesis in Directing register for this course. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Spring 2021: THTR UN2026

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2026	001/00194	M T W Th F 7:00pm - 11:00pm 323 Milbank Hall	Shannon Sindelar	1.00-3.00	

THTR UN2027 Practicum Performance Dramaturgy. 3 points.

Prerequisites: Student dramaturgs are selected as part of the production team; students interested in dramaturging a faculty-directed production should have taken the Dramaturgy course (THTR UN3167) and consult with the instructor. Students interested in dramaturging a senior thesis in directing should be listed by the thesis director as part of the production proposal and register for this course in the semester of the production. Students doing a senior thesis in dramaturgy do not register for this course, but register for THTR UN 3997: Senior Thesis in Performance: Dramaturgy.

THTR UN2140 History and Practice of Producing for the Theatre. 4 points.

Prerequisites: Preference given to students who have taken New York Theatre and/or are Theatre/Drama and Theatre Arts

majors. Permission of instructor given at first class meeting, required. Course limited to 12.

Explores the role and responsibilities of the producer in commercial and not-for-profit theatre; the relationship of the producer to the cast and creative team; the creative development of plays and musicals; the evolution of the role of the producer over the twentieth century; and the pioneering work of great producers of the past century. Students develop criteria to assess artistic and financial merits of theatrical work. Attendance at productions on and off Broadway, meetings with producers and other theatre artists.

Fall 2020: THTR UN2140

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2140	001/00015	Th 4:10pm - 11:00pm Room TBA	Steven Chaikelson	4	14/16

THTR UN2201 ACTING ENSEMBLE DIRECTING II. 1.00 point.

This course will examine the original vision a director can bring to a written text. We will explore and define different directorial styles in terms of acting, design, language, politics, relationship to the audience, and world-of-play. We will study five dramatists; students will make work in conversation with each figure and their particular political and artistic projects. Students will make a total of four fully-realized scenes; the two final pieces will each be presented twice, with time for rehearsal in between. Students will work with actors who come from both inside and outside the class pool. Students will have the opportunity to stage work for proscenium, in-the-round, and environmentally. There will be at least two outings to see productions in New York City. Students will write three short papers that engage with and analyze live performance. This course places equal weight on the dramatic language of a play text and a theatre practice guided by images. May be retaken for full credit.

Spring 2021: THTR UN2201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2201	001/00690	M W 12:10pm - 2:00pm 229 Milbank Hall		1.00	10

THTR UN2210 Theatre Workshop. 1 point.

Prerequisites: To be taken only for P/D/F. Auditions for this class are sometimes required; please check with Theatre Department in advance. If audition is required, auditions held 6pm on the first Tuesday and Wednesday class days of each semester. Class begins meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Various topics presented by visiting theatre scholars, artists, and practitioners in a lecture/seminar/workshop series that will meet for at least four sessions during each semester. Topics, times, and visiting instructors will be announced by the department. Students must attend all classes to receive credit for the course.

THTR UN2420 Technical Production. 3 points.

Prerequisites: Crew assignment optional. Enrollment limited to 10 students.

Introduction to the equipment, terms, and procedures employed in the creation of scenery, lighting, and sound for the stage.

Classroom exercises and field visits emphasize approaches to collaborative process and production management.

Fall 2020: THTR UN2420

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2420	001/00016	T Th 10:10am - 11:25am Room TBA	Gregory Winkler	3	7

THTR UN2421 Stage Management. 3 points.

Prerequisites: Permission of the instructor, given at first class meeting.

This course explores the role of the stage manager and production manager in theatrical production. Students undertake hands-on exercises to develop the practical and collaborative skills essential to working both as a stage manager and production manager--script analysis; production timeline and rehearsal management; technical rehearsal; budgeting; working with directors and designers; working with unions; health and safety codes; house management; box office.

THTR UN2422 PRACTICUM PROPS # PAINT. 1.00-3.00 points.

May be taken for 1-3 points.

Course may be taken for 1-3 points. May be retaken for full credit. Prerequisites: permission of Theatre Department Production Manager, Michael Banta (mbanta@barnard.edu). Training and practical props and/or scenic painting work on Departmental mainstage productions

Fall 2020: THTR UN2422

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THTR 2427	001/00204		Michael Banta	1.00-3.00	
THTR 2427	002/00205		Michael Banta	1.00-3.00	

THTR UN3004 ACTING I. 3.00 points.

Prerequisite: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required: auditions for acting classes and semester's stage productions held 6pm on the first Tuesday and Wednesday class days of the semester. Acting classes meet after auditions. Consult "Auditions" on the Barnard Theatre Department website: theatre.barnard.edu/auditions. Course develops physical, vocal, and imaginative range and skills needed to approach the text of a play: text analysis, speech exercises, non-verbal behavior, improvisation designed to enhance embodiment, movement, and projection. Fulfills one course in Acting for Theatre/Drama and Theatre Arts majors. In the Fall semester, at least one section reserved for first-semester students only. Gateway course to advanced courses; transfer students who have previous college-level course may be exempted with approval of Chair. May be retaken for full credit

Fall 2020: THTR UN3004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3004	001/00169	M W 12:10pm - 2:00pm Room TBA	Sharon Fogarty	3.00	7

---------------------	--	--------------	------	---

THTR UN3005 ACTING II. 3 points.

Prerequisite: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required: auditions for acting classes and semester's stage productions held 6pm on the first Tuesday and Wednesday class days of the semester. Acting classes meet after auditions. Consult "Auditions" on the Barnard Theatre Department website: theatre.barnard.edu/auditions. Students must have taken Acting I or equivalent to be eligible for Acting II sections. Acting II will offer several different sections, focusing on a specific range of conceptual, embodiment, and physical acting skills. Each course fulfills one course in Acting requirement for Theatre/Drama and Theatre Arts majors. Please check with the Theatre Department website for specific offerings and audition information. May be retaken for full credit.

THTR UN3006 ADVANCED ACTING. 3.00 points.
Not offered during 2020-21 academic year.

Prerequisites: Preference given to juniors and seniors; THTR UN 3004 or 3005 prerequisite. Enrollment limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult

"Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Prerequisites: Preference given to juniors and seniors; THTR UN 3004 or 3005 prerequisite. Enrollment limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semesters stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult Auditions on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions Special problems of performance. In-class scene work, extensive outside research, rehearsals, and reading. Fulfills additional coursework in Acting for Theatre/Drama and Theatre Arts majors. May be retaken for full credit

THTR UN3007 Scene Lab. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: Enrollment limited to 16 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions.

Provides an overview of the creative process of acting: text analysis, circumstance, establishment of place, pursuit of intention in coordination with exercises and improvisation designed to enhance concentration, imagination, resonance, movement, and projection. Rehearsal 2 hours per week outside class, participation in discussion of plays, playwrights, and performances required. Fulfills one course in Acting for Theatre/Drama Theatre Arts majors.

THTR UN3008 Performing Greek Tragedy on the Modern Stage. 3 points.

This course aims to explore performing Greek tragedy on the modern stage. It will include an introduction to original performance practices in ancient Greece (space, masking, choral performance, costume, acting techniques) and an examination of how artists from different contemporary theatrical traditions have adapted ancient texts in modern performances and new versions of the plays. The bulk of the course will be focused on the problems of acting, interpreting, and reinterpreting parts of three plays on the stage, Sophocles' *Antigone*, Euripides' *Medea*, and Sophocles' *Ajax* along with a new version by Ellen McLaughlin, who teaches playwriting at Barnard, *Ajax in Iraq*. Students will view all or parts of particularly interesting recent productions from various theatrical traditions, which will help them to tackle challenging issues such as choral performance and choral rhythms, masking, character work, dialogues and presenting formal political debates.

For contemporary actors training in Greek tragedy offers a unique opportunity to improve their performance on stage through ensemble work and representing character through speech. It enhances dramaturgical capacities that a contemporary theater practitioner must exercise in exploring theory in practice and vice versa.

This class is directed to students particularly interested in dramaturgy, directing, designing, translation, and Greek tragedy as well as acting.

THTR UN3140 Performing Women. 4 points.

Prerequisites: Enrollment limited to 16 students. This course examines the category of "woman" as it is mobilized in performance, considering both a variety of contemporary performances chosen from a wide range of genres and a diversity of critical/theoretical perspectives. Course may fill either the Theory requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both.

Fall 2020: THTR UN3140

THTR 3140	001/00025	W 12:10pm - 2:00pm Room TBA	Shayoni Mitra	4	9/16

THTR UN3141 Socialism/Communism in Performance. 4 points.

Not offered during 2020-21 academic year.

Prerequisites: Sophomore standing. Enrollment limited to 16 students.

Analyzes dramatic texts and performances under the Communist regimes behind the Iron Curtain before 1989. Principal focus is on Czech, Polish, and East German playwrights and their productions; we will consider their work in both legal and illegal contexts. In order to gain a wider understanding of the diversity of underground performative cultures, works from Hungary, Romania, and Slovenia will be considered as well. The seminar also attends to dissident performative activities in the framework of the 1980s revolutions, and reflects on works by western authors and emigrant/diasporic writers produced on stages behind the Iron Curtain. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

THTR UN3142 Bertolt Brecht: The Making of Theatre. 4 points.

Prerequisites: Enrollment limited to 16; permission of instructor given at first class meeting. Course is conducted in English and readings are in English; German majors and German-speaking students may do readings and papers in German.

This class provides a comprehensive overview of the drama, theatre, and theory of Bertolt Brecht, the most influential

European playwright and theorist of the twentieth century, in the context of their original historical contexts and subsequent legacies. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

THTR UN3144 Ecologies of Transmedia Performance. 4.00 points.

Exploring transmedia performance as both a medial interaction in the physical space of theatre and a multiplatform environment expanding and extending beyond it, Ecologies of Transmedia Performance engages the NYPL for the Performing Arts archive to create an environmentally and socially self-aware, virtual transmedia performance/experience. To strengthen academic and digital competencies, the course consists of a seminar (meets on Tuesday) and a lab (meets on Wednesday), integrating several activities: experiencing and studying transmedia performances; conceptualizing transmediality; conducting archival research into transmedia theatre; and designing a transmedia performance (the digital tools we will work with include Google Sites, Google Scripts, and Google Cloud AI). Course enrollment is limited to 12; permission of instructor given after first class meeting. Fulfills one of the two required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major

Spring 2021: THTR UN3144

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3144	001/00213	T 2:10pm - 4:00pm Room TBA	Hana Worthen	4.00	11/16
THTR 3144	001/00213	W 4:10pm - 6:00pm Room TBA	Hana Worthen	4.00	11/16

THTR UN3146 American Drama in the 1990s. 4 points. Not offered during 2020-21 academic year.

Prerequisites: Enrollment limited to 16.

Examines American drama in the period between the fall of the Berlin Wall in 1989 and the attack on the World Trade Center in New York in 2001, considering a range of aesthetic (epic theatre, performance art), social (AIDS), and political (Reaganomics) issues of the period. Fulfills one (of two) required courses dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

THTR UN3149 PERFORMANCE IN/OF SOUTH # SOUTHEAST ASIA. 3.00 points.

This course actively interrogates the region of Southeast Asia as it is mobilized in performance. It will investigate performance as a theoretical lens, artistic medium, and everyday practice across Southeast Asia. Research and writing will draw upon theatre, dance, performance art, and ritual, focusing on

the construction of national and personal identity through performance. The course examines themes of gender, sexuality, imperialism, and globalization. Through discussion, viewing, and weekly writing assignments, students hone their critical thinking skills and learn to formulate research questions and arguments that will culminate in one critical essay and two in-class exams. Course may fill either the Global Theatre requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

THTR UN3150 Western Theatre Traditions: Classic to Romantic. 3 points.

Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the classical theatre through the early modern period to early romanticism; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to classical Athens, medieval cycle drama, the professional theatre of early modern England, the rival theatres of seventeenth century France and Spain, and eighteenth-century theatre in England and Germany; topics include the sociology of theatre, the impact of print on conceptions of performance, representing gender and race, and the dynamics of court performance. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors.

Fall 2020: THTR UN3150

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3150	001/00028	M W 10:10am - 11:25am Room TBA	William Worthen	3	28/50

THTR UN3151 WESTRN THTR TRAD: MODERN. 3.00 points.

Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the late eighteenth century to today; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to the ideology of realism

and naturalism, the development of epic theatre, the theatre of cruelty, postcolonial performance, and the continuing invention of dramatic forms (theatre of the absurd, speechplays, postdramatic theatre), as well as to the political and theoretical impact of race, gender, sexuality in modern performance culture. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors

THTR UN3152 NAZISM IN PERFORMANCE. 4.00 points.

Prerequisites: Course enrollment limited to 16; permission of instructor given at first class meeting.

Prerequisites: Course enrollment limited to 16; permission of instructor given at first class meeting. Explores the cultivation of national and transnational performances as a significant force of National Socialism, at the same time as challenging the notion of "Nazi Theatre" as monolithic formation. The core of the course inquires into the dialectical analysis of artistic creations in diverse art genres, while working towards an understanding of the social dramaturgy of such events as staging the Führer and the racialized body of the privileged people. Nazism did not harbor ideologies without benefits for the allied nations. Thus, the dynamic performance of transnationalism among the "brothers in arms" will be included as well, in order to elucidate how works of art crossing into the Third Reich were reimagined, sometimes in ways challenging to the presumed values of the state stage. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major

Spring 2021: THTR UN3152

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THTR UN3154 Theatre Traditions in a Global Context. 3 points.

Prerequisites: Enrollment limited to 50 students.

Provides a broad introduction to several traditions of nonwestern drama and theatrical practice, often placing recent and contemporary writing in relation to established conventions. Taking up plays and performance traditions from Asia, South Asia, and various African traditions, it may also consider the relation between elite and popular culture (adaptations of Shakespeare, for example), and between drama, theatre, and film. Course may fulfill either the Global Theatre requirement, or one (of two) required courses dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both.

Fall 2020: THTR UN3154

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THTR UN3155 TRADITIONAL INDIAN PERFORMANCE. 4.00 points.

Course provides a perspective on traditional forms of Indian performance from classical theory to contemporary traditional practices. Course covers Sanskrit drama, Kathakali, Ramlila, and Chhau; extensive video of performances and guest practitioners. Course may fulfill either the Global Theatre requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

Spring 2021: THTR UN3155

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3155	001/00217	W 12:10pm - 2:00pm Room TBA	Shayoni Mitra	4.00	4/16

THTR UN3156 MODERN ASIAN PERFORMANCE. 4.00 points.

Prerequisites: Permission of instructor given at first class meeting; enrollment limited to 16. Corequisites: Fulfills one course in World Theatre requirement for Theatre/Drama and Theatre Arts majors. Course studies contemporary Asian performance with focus on modernity, covering most nations on the Asian continent; readings cover theoretical and aesthetic questions from performances of healing to revolutionary theatre to diasporic performance. Course may fulfill either the Global Theatre requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

THTR UN3157 POSTCOLONIAL DRAMA: THE CANON # ITS OTHER. 4.00 points.

This class is a close reading of postcolonial plays, both as they form a recognizable canon, and as counters to it. Through a grounding in postcolonial theory, students will explore how the colonial encounter leaves a lasting impact on language and performance. How do these playwrights tackle questions of authenticity, influence, inspiration and agency? What stories do they adapt, translate or reimagine? Also, we read in equal measure male and female playwrights, attending to the ways in which power and authority are negotiated by them. This class looks both at plays that are seminal to postcolonial writing and also newer ones that unsettle the position of the greats. Do we then understand postcolonialism as a historically bound literary trend or an ongoing process of exploration? Fundamentally we ask, in our efforts to decolonize the theatre, how do we find new ways of reading?

Room TBA

THTR UN3160 Queer Performance. 4 points.

This course surveys key theoretical and historical writings in the field of Queer Performance, both within and without Theatre and Performance Studies, as well as significant dramatic and performance works in the field. Beginning with an introduction to queer theory and questions surrounding gender and sexuality in performance, the course then moves into contemporary theories to examine works that use embodiment to question constructions of gender and sexuality onstage. Performances are regarded as provocations: what constitutes queer performance? Is sexuality all we mean by queer? What are the historical, aesthetic, and political aspects of queer performance? We will also pursue questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funding? Is queer performance inherently or even necessarily radical? The course explores crosscultural performances, as well as performances spanning from theatrical stages to ritual to everyday performance. Course may fill either the Theory requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both.

THTR UN3165 THEORIES OF PERFORMANCE STUDIES. 4.00 points.

Prerequisites: Enrollment limited to 16 students. Course surveys the wide range of genres and categories addressed by the practice of modern "performance studies"; it introduces a number of performance practices, as well as relevant interdisciplinary methodologies. Students consider live performances as well as a number of mediated works, learning to think critically and creatively about the relation between text, technology, and the body. Course may fill either the Theory requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

Spring 2021: THTR UN3165

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3165 001/00218		T 12:10pm - 2:00pm Room TBA	Shayoni Mitra	4.00	15/16

THTR UN3166 Drama, Theatre, and Theory. 4 points. Not offered during 2020-21 academic year.

Prerequisites: Enrollment limited to 16 students. Intensive immersion in fundamental principles and practices of world drama, theatre, and performance, past and present. Close readings of performances, plays, video, film, and digital media.

Assignments include presentations, performance projects, and critical writing. Fulfills one course in Drama, Theatre, and Theory requirement for Theatre/Drama and Theatre Arts majors.

THTR UN3167 Dramaturgy. 4 points.

Prerequisites: Permission of instructor, given at first class meeting; enrollment limited to 12. This course teaches the research skills and practices a production dramaturg develops as part of the conceptual work of theatrical production. Course is focused on a series of activities: analyzing dramatic text, comparing different versions of script, conducting archival and cultural research, and presenting it to the production team. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts majors. Required for students undertaking a senior thesis in dramaturgy. Required for students undertaking a senior thesis in directing prior to the thesis year.

Fall 2020: THTR UN3167

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THTR UN3201 DIRECTING II. 3.00 points.

Prerequisites: Students required to have taken THTR UN3200 Directing I or THTR UN3203 Collaboration: Directing and Design, or equivalent. Enrollment limited to 14 students. Permission of instructor given at first class meeting. Course focuses on developing an individual directorial style, placing emphasis on visual research, and the use of different staging environments: end-stage, in the round, environmental. Class is structured around scene-work and critique, and each student will direct at least three fully-realized scenes. Material typically drawn from European avant-garde. Fulfills additional coursework in Directing required for Theatre/Drama and Theatre Arts majors concentrating in Directing

Spring 2021: THTR UN3201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3201 001/00219		M W 12:10pm - 2:00pm 229 Milbank Hall	Alice Reagan	3.00	6

THTR UN3202 Advanced Directing. 4 points.

Prerequisites: Open to students who have taken at least one course in directing. Required for students approved for Directing thesis, but open to all qualified students. Permission of instructor given at first class meeting.

This course requires students to draw on all previous theatre training, synthesizing scholarship and research toward dynamic fully-realized scene work. Emphasis is on the director-actor relationship; students will direct at least three fully-realized scenes, typically drawn from Shakespeare, Chekhov, or other playwrights. Students may have the opportunity to make devised work, and will collaborate with students in the Advanced Acting class. Required for, but not limited to, students undertaking a senior thesis in directing. Fulfills additional directing coursework in Theatre/Drama and Theatre Arts major.

Fall 2020: THTR UN3202

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3202	001/00113	W F 12:10pm - 3:00pm Room TBA	Alice Reagan	4	5

THTR UN3203 COLLABORATION:DIRECTNG/DESIGN. 3.00 points.

Not offered during 2020-21 academic year.

Prerequisites: Permission of instructors given at first meeting; enrollment limited to 24. Course focuses on developing both technical and collaborative skills of directors and designers. Students are assigned to different roles in creative teams working on a series of at least three fully realized and designed scenes. Introduction to various design disciplines and directing practice. May be counted as one course in either directing or a design toward the three courses in performance fields for Theatre/Drama and Theatre Arts majors; counts as second or third course in either directing or design

Spring 2021: THTR UN3203

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THTR UN3211 Performance Lab. 4 points.

Not offered during 2020-21 academic year.

Prerequisites: Enrollment limited to 12 students. Course typically involves visiting critics/scholars/artists in developing experimental theatrical work.

THTR UN3300 Playwriting Workshop. 3 points.

Prerequisites: Permission of the instructor given at first class meeting. Students will create and workshop plays, with a focus on learning new approaches to language and structure. Recommended for students undertaking a senior thesis in playwriting. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: playwriting.

Fall 2020: THTR UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3300	001/00033	M W 2:10pm - 4:00pm Room TBA	Andrew Bragen	3	8

THTR UN3301 PLAYWRITING LAB. 3.00 points.

Students will develop original dramatic scripts. Students will also read drafts of writers currently produced on New York stages to understand why changes and rewrites were made. Recommended for students undertaking a senior thesis in playwriting. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: playwriting

THTR UN3401 Sound Design. 3 points.

Prerequisites: Permission of instructor given at first class meeting. Studies the art and practice of designing sound and scoring music for dramatic performance. Students study the relationship between concert and incidental music, and read plays toward the production of a score for live theatre. Students also read broadly in the fields of sound, music, acoustics, and the cultural analysis of sound as a component of performance. Background in music or composition not essential. . Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design.

Fall 2020: THTR UN3401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3401	001/00034	M F 1:10pm - 4:00pm Room TBA	Daniel Baker	3	12

THTR UN3402 COSTUME DESIGN. 3.00 points.

Prerequisites: Permission of instructor given at first class meeting. Studio course exploring designing costumes for the stage. Students become familiar with textual and character analysis, research, sketching and rendering, swatching and introductory costume history. Fulfills one course in Design for Theatre/Drama and Theatre Arts majors Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design

THTR UN3403 LIGHTING DESIGN. 3.00 points.

Prerequisites: Enrollment limited to 12 students. Permission of instructor given at first class meeting. Focuses on both the technical and creative aspects of theatrical lighting design. Students will learn the role of lighting within the larger design and performance collaboration through individual and group projects, readings, hands-on workshops, and critique of actual designs. Fulfills one course in Design for Theatre/Drama and Theatre Arts majors. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design

Spring 2021: THTR UN3403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

THTR UN3404 SCENE DESIGN. 3.00 points.

Prerequisites: Enrollment limited to 12 students. Permission of instructor given at first class meeting. Introduction to designing for the theatre. The course will focus on set design, developing skills in script analysis, sketching, model making, storyboarding and design presentation. Some investigation into theatre architecture, scenic techniques and materials, and costume and lighting design. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design

Fall 2020: THTR UN3404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3404	001/00703	M W F 12:10pm - 2:00pm Room TBA	Sandra Goldmark	3.00	5

THTR UN3405 PROBLEMS IN DESIGN. 3 points.

Prerequisites: Some design experience is helpful, though not required. Enrollment limited to 12 students. Studio-based course explores the main elements of theatrical design: sets, costumes, lighting, and sound through objects, materials, theatrical and non-theatrical environments. Students examine these design elements as both individual and interrelated components within a performance. Fulfills one course in Design requirement for Theatre/Drama and Theatre Arts majors. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design.

Fall 2020: THTR UN3405

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3405	001/00114	M W Th 2:10pm - 4:00pm Room TBA	Kara Feely	3	3

THTR UN3406 Media & Production Design. 3 points.

Uses analysis and design to explore how media and projections can be used to construct narrative in theatre and support non-narrative forms of performance. Digital and analog media are explored for their potentials and limitations. Students learn how the media is produced and transmitted will be discussed as part of creating a video design. Students will produce projection projects using different kinds of media during the course requiring work outside of class time. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design.

THTR UN3997 SENIOR THESIS IN PERFORMANCE. 4.00 points.

Prerequisites: Appropriate coursework and substantial production experience, including a major crew assignment in the junior year. Enrollment limited to senior Theatre majors. Combined and special majors may be considered under exceptional circumstances. Permission of the instructor required. Students register for this course to pursue approved theses in acting, design, directing, dramaturgy, solo performance, or stage and production management. Students will act in, direct, design, stage manage or dramaturg a play in the Barnard Department of Theatre season, or write a short

play or solo performance piece that will be produced (according to departmental guidelines) in the Senior Thesis Festival. Collaboration is expected and students will meet weekly with faculty and other seniors. A written proposal must be submitted in the spring of the junior year and be approved. In addition to the performance, an extensive written Casebook is required: see departmental guidelines

(aty2113@columbia.edu)

The undergraduate major in Earth and environmental sciences provides an understanding of the natural functioning of our planet and considers the consequences of human interactions with it. Our program for majors aims to convey an understanding of how the complex Earth system works at a level that encourages students to think creatively about the Earth system processes and how to address multidisciplinary environmental problems. The breadth of material covered provides an excellent background for those planning to enter the professions of law, business, diplomacy, public policy, teaching, journalism, etc. At the same time, the program

provides sufficient depth so that our graduates are prepared for graduate school in one of the Earth sciences. The program can be adjusted to accommodate students with particular career goals in mind.

The department's close affiliations with the Lamont-Doherty Earth Observatory, the American Museum of Natural History (AMNH), NASA's Goddard Institute for Space Studies (GISS), the Earth Institute at Columbia (EI), and several departments within the Fu Foundation School of Engineering and Applied Sciences afford opportunities for student participation in a wide variety of current research programs. Summer employment, research, and additional educational opportunities are available at Lamont and GISS. The department encourages majors to become involved in a research project by their junior year.

All majors and concentrators, when planning their programs of study, should regularly consult the directors of undergraduate studies and make themselves aware of the requirements for their particular program.

PROGRAMS OF STUDY

Environmental Science Major

The environmental science major curriculum provides an introduction to a variety of fields of study relevant to the environment. Environmental science majors are required to take three semesters of introductory courses and to develop a grounding in basic physics, chemistry, biology, and mathematics. Here, students may select courses depending on their interest. With this introduction to the Earth's environment and equipped with a knowledge of the basic sciences, students are prepared to choose a set of upper-level courses in consultation with an undergraduate adviser. All environmental science majors are required to complete a research project, providing a practical application of mastered course work. This research culminates in a senior thesis. The research and the thesis are usually done at Lamont-Doherty Earth Observatory with guidance from a faculty member or a research scientist. However, other options are also possible.

Environmental science majors have an option to complete the special concentration in environmental biology for environmental science majors.

Earth Science Major

The major in Earth science follows a similar rationale but is designed to allow students to pursue particular fields of the Earth sciences in greater depth. Compared with the environmental science major, one fewer introductory course is required, while one additional advanced course should be part of the plan of study. The Earth science major also offers the possibility of in-depth field experience through a six- to eight-week geology summer field course, arrangements for which are made through another university. The research and senior thesis capstone requirements are the same as for the environmental science major. The geology summer field course may be used

as an alternative means of fulfilling the capstone requirement in the Earth science major.

Concentrations

The program for concentrators serves students who want more exposure to Earth and environmental science than is provided by introductory-level courses. The program aims to provide concentrators with experience in data analysis and a thorough introduction to the Earth's systems.

The concentrations in environmental science and in Earth science are designed to give students an understanding of how the Earth works and an introduction to the methods used to investigate Earth processes, including their capabilities and limitations. Concentrators often join the social professions (e.g., business, law, medicine, etc.) and take with them a strong scientific background. They take the same introductory courses as the majors, but fewer basic science and upper-level courses are required.

In addition to the environmental science and Earth science concentrations, the department sponsors a special concentration which must be done in conjunction with the environmental biology major. Students should be aware that they must complete the environmental biology major in order to receive credit for the special concentration. There is also a special concentration in environmental biology for environmental science majors sponsored by the Department of Ecology, Evolution, and Environmental Biology.

DEPARTMENTAL HONORS

The Department of Earth and Environmental Science awards departmental honors to the major or majors in Earth science or environmental science judged to have the best overall academic record. The award is accorded to no more than 10% of the graduating class, or one student in the case of a class smaller than 10. A grade point average of at least 3.6 in the major and a senior thesis or equivalent research of high quality are required. Students who wish to be considered should contact the director of undergraduate studies early in their senior year.

GUIDELINES FOR ALL EARTH AND ENVIRONMENTAL SCIENCES MAJORS, CONCENTRATORS, AND SPECIAL CONCENTRATORS

Advising

All majors and concentrators, when planning their programs of study, should regularly consult the directors of undergraduate studies, who can be contacted through the department office on the fifth floor of Schermerhorn. The requirements are different for each major and concentration and must be met in conjunction with the general requirements for the bachelor's degree. Declaration of the major must be approved by the department and filed in the departmental office.

Substitutions and Exceptions

1. Higher-level courses may be used to satisfy supporting mathematics and science requirements for students with Advanced Placement preparation with the permission of the major adviser.
2. In addition to the courses listed for the depth, and breadth and related courses requirements, several graduate-level courses offered in the department as well as several advanced courses offered at Barnard may be substituted with the permission of the major adviser.
3. 1000-level courses in the Earth and Environmental Sciences Department can not be used toward meeting the requirements of any of the majors, concentrations, or special concentrations.
4. The following course is not suitable for undergraduates and can not be used toward meeting any of the requirements for the majors, concentrations, or special concentrations: EESC GU4930 Earth's Oceans and Atmosphere.

Grading

A grade of C- or better must be obtained for a course to count toward the majors, concentrations, or special concentrations. The grade of P is not acceptable, but a course taken Pass/D/Fail may be counted if and only if the P is uncovered by the Registrar's deadline.

MAJOR IN EARTH SCIENCE

Please read *Guidelines for all Earth and Environmental Sciences Majors, Concentrators, and Special Concentrators* above.

The major in Earth science requires a minimum of 45.5 points, distributed as follows:

Foundation Courses

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

Students who wish to take both EESC UN2100 Earth's Environmental Systems: The Climate System and EESC UN2300 Earth's Environmental Systems: The Life System can include one of these under breadth and related fields below.

Supporting Mathematics and Science Courses

One semester of Calculus at the level of Calculus I or higher (3 credits)

MATH UN1101	CALCULUS I
-------------	------------

Select one of the following three-course sequences:

CHEM UN1403 - CHEM UN1404 - PHYS UN1201	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture) and General Physics I
CHEM UN1403 - PHYS UN1201 - PHYS UN1202	GENERAL CHEMISTRY I- LECTURES and General Physics I and General Physics II

Capstone Experience

Select one of the following:

EESC BC3800 - EESC UN3901	Senior Research Seminar and Environmental Science Senior Seminar
EESC BC3801 - EESC UN3901	Senior Research Seminar and Environmental Science Senior Seminar
A six to eight week summer geology field course	

Breadth and Related Fields Requirement

A minimum of 6 points (two courses) chosen with the major adviser are required.

Breadth and related field courses are science courses relevant for an Earth science major that do not require an Earth science background. Several such courses are offered at the 2000-, 3000- and 4000-level in the department and at Barnard.

Examples include:

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2300	Earth's Environmental Systems: The Life System
EESC UN3010	Field Geology
EESC BC3017	Environmental Data Analysis
EESC GU4050	Global Assessment and Monitoring Using Remote Sensing
EESC GU4600	Earth Resources and Sustainable Development
EESC GU4917	Earth/Human Interactions
EAEE E2002	ALTERNATIVE ENERGY RESOURCES

Also included among breadth and related fields courses are science, mathematics, statistics, and engineering courses offered by other departments that count toward fulfilling degree requirements in those departments.

Depth Requirement

A minimum of 12 points (four courses) chosen with the major adviser to provide depth in the field of Earth science.

These courses build on the foundation and supporting courses listed above and provide a coherent focus in some area of Earth science. Students should include at least one of the following in their course of study:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	Solid Earth Dynamics

Areas of focus include one of the courses listed above and three or more additional courses. Students are not required to specialize in a focus area, but examples are given below for those who choose to do so.

Geological Science

EESC GU4090	Introduction to Geochronology and Thermochronology
EESC GU4113	INTRODUCTION TO MINERALOGY I
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4230	Crustal Deformation
EESC GU4701	Introduction to Igneous Petrology
EESC GU4887	Isotope Geology I
EESC GU4947	Plate Tectonics

It is strongly recommended that students focusing in geological science take the summer geology field course as their capstone experience.

Geochemistry	
EESC UN3015	The Earth's Carbon Cycle
EESC BC3016	Environmental Measurements
EESC BC3200	Ecotoxicology
EESC GU4090	Introduction to Geochronology and Thermochronology
EESC GU4113	INTRODUCTION TO MINERALOGY I
EESC GU4701	Introduction to Igneous Petrology
EESC GU4885	The Chemistry of Continental Waters
EESC GU4887	Isotope Geology I
EESC GU4926	Principles of Chemical Oceanography

It is recommended that students focusing in geochemistry take CHEM UN1403-CHEM UN1404 General Chemistry I and II, and PHYS UN1201 General Physics I as their supporting science sequence.

Atmosphere and Ocean Science

EESC GU4008	Introduction to Atmospheric Science
EESC GU4920	Paleoceanography
EESC GU4924	Introduction to Atmospheric Chemistry
EESC GU4925	Principles of Physical Oceanography
EESC GU4926	Principles of Chemical Oceanography

It is recommended that students focusing on atmosphere and ocean science also take a course in fluid dynamics and a course in differential equations.

Solid Earth Geophysics

EESC GU4230	Crustal Deformation
EESC GU4300	The Earth's Deep Interior
EESC GU4937	Cenozoic Paleogeography
EESC GU4947	Plate Tectonics
EESC GU4949	Introduction to Seismology

It is recommended that students focusing in solid Earth geophysics take PHYS UN1201-PHYS UN1202 General Physics I and II, and CHEM UN1403 General Chemistry I as their supporting science sequence and also take MATH UN1201 Calculus II.

Climate

EESC UN3015	The Earth's Carbon Cycle
EESC BC3025	Hydrology
EESC GU4008	Introduction to Atmospheric Science
EESC GU4330	Introduction to Terrestrial Paleoclimate
EESC GU4835	Wetlands and Climate Change
EESC GU4920	Paleoceanography
EESC GU4924	Introduction to Atmospheric Chemistry

EESC GU4925	Principles of Physical Oceanography
EESC GU4937	Cenozoic Paleooceanography
Paleontology	
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4550	Plant Ecophysiology
EESC GU4920	Paleoceanography
EESC GU4924	Introduction to Atmospheric Chemistry
EESC GU4937	Cenozoic Paleooceanography
It is recommended that students focusing in paleontology take EESC UN2300 Earth's Environmental Systems: The Life System, as one of their foundation courses.	

MAJOR IN ENVIRONMENTAL SCIENCE

Please read *Guidelines for all Earth and Environmental Sciences Majors, Concentrators, and Special Concentrators* above.

The major in environmental science requires a minimum of 47 points, distributed as follows:

Foundation Courses

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System

Supporting Mathematics and Science Courses

One semester of Calculus at the level of Calculus I or higher (3 credits)

MATH UN1101	CALCULUS I
-------------	------------

Select one of the following three-course sequences:

CHEM UN1403 - CHEM UN1404 - PHYS UN1201	GENERAL CHEMISTRY I-LECTURES and General Chemistry II (Lecture) and General Physics I
CHEM UN1403 - PHYS UN1201 - PHYS UN1202	GENERAL CHEMISTRY I-LECTURES and General Physics I and General Physics II
CHEM UN1403 - EEBB UN2001 - PHYS UN1201	GENERAL CHEMISTRY I-LECTURES and Environmental Biology I: Elements to Organisms and General Physics I

Capstone Experience

EESC BC3800	Senior Research Seminar
or EESC BC3801	Senior Research Seminar

EESC UN3901	Environmental Science Senior Seminar
-------------	--------------------------------------

Breadth and Related Fields Requirement

A minimum of 6 points (two courses) chosen with the major adviser are required.

Breadth and related field courses are science courses relevant for an environmental science major that do not require an environmental science background. Several such courses are offered at the 2000-, 3000- and 4000-level in the department and at Barnard. Examples include:

EESC BC3017	Environmental Data Analysis
EESC GU4050	Global Assessment and Monitoring Using Remote Sensing
EESC GU4600	Earth Resources and Sustainable Development
EESC GU4917	Earth/Human Interactions
EESC UN3010	Field Geology

Also included among breadth and related fields courses are science, mathematics, statistics, and engineering courses offered by other departments that count toward fulfilling degree requirements in those departments.

Depth Requirement

A minimum of 9 points (three courses) chosen with the major adviser to provide depth in the field of environmental science.

These courses build on the foundation and supporting courses listed above and provide a coherent focus in some area of environmental science. Students should include at least one of the following in their course of study:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	Solid Earth Dynamics

Areas of focus include one of the courses listed above and two or more additional courses. Students are not required to specialize in a focus area, but examples are given below for those who choose to do so.

Environmental Geology

EESC GU4076	Geologic Mapping
EESC GU4480	Paleobiology and Earth System History
EAEE E3221	Environmental geophysics

It is recommended that students focusing in environmental geology also take EESC W4050 Remote Sensing.

Environmental Geochemistry

EESC UN3015	The Earth's Carbon Cycle
EESC GU4885	The Chemistry of Continental Waters
EESC GU4887	Isotope Geology I
EESC GU4924	Introduction to Atmospheric Chemistry

EESC GU4888	Stable Isotope Geochemistry
EESC GU4926	Principles of Chemical Oceanography

Hydrology

EESC GU4076	Geologic Mapping
EESC GU4835	Wetlands and Climate Change
EESC GU4885	The Chemistry of Continental Waters
EESC BC3025	Hydrology
EAEE E3221	Environmental geophysics

Climate Change

EESC UN3015	The Earth's Carbon Cycle
EESC GU4008	Introduction to Atmospheric Science

EESC GU4330	Introduction to Terrestrial Paleoclimate
-------------	--

EESC GU4480	Paleobiology and Earth System History
-------------	---------------------------------------

EESC GU4835	Wetlands and Climate Change
-------------	-----------------------------

EESC GU4920	Paleoceanography
-------------	------------------

It is recommended that students focusing in environmental geology also take EESC GU4050 Remote Sensing.

Energy and Resources

EESC GU4076	Geologic Mapping
-------------	------------------

EESC GU4701	Introduction to Igneous Petrology
-------------	-----------------------------------

EAEE E2002	ALTERNATIVE ENERGY RESOURCES
------------	------------------------------

CONCENTRATION IN EARTH SCIENCE

Please read *Guidelines for all Earth and Environmental Sciences Majors, Concentrators, and Special Concentrators* above.

The concentration in Earth science requires a minimum of 25 points, distributed as follows:

Foundation Courses

EESC UN2100	Earth's Environmental Systems: The Climate System
or EESC UN2300	Earth's Environmental Systems: The Life System

EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
-------------	--

Supporting Mathematics and Science Courses

Two science or mathematics courses (6-7 points) selected from among those listed for the Earth science major above.

Depth and Breadth and Related Fields Requirements

A minimum of 10 points (typically three courses) is required as follows:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	Solid Earth Dynamics

One additional course chosen from those listed under Depth Requirement for the earth science major above.

The third course selected from those listed under either Depth Requirement or Breadth and Related Fields Requirement for the earth science major above.

CONCENTRATION IN ENVIRONMENTAL SCIENCE

Please read *Guidelines for all Earth and Environmental Sciences Majors, Concentrators, and Special Concentrators* above.

The concentration in environmental science requires a minimum of 25.5 points, distributed as follows:

Foundation Courses

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System

Supporting Mathematics and Science Courses

Two science or mathematics courses (6-7 points) selected from among those listed for the environmental science major above.

Depth and Breadth and Related Fields Requirements

A minimum of 6 points (two courses) is required as follows:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	Solid Earth Dynamics

One additional course selected from those listed under either Depth Requirement or Breadth and Related Fields Requirement for the environmental science major above.

SPECIAL CONCENTRATION IN ENVIRONMENTAL SCIENCE FOR MAJORS IN ENVIRONMENTAL BIOLOGY

Please read *Guidelines for all Earth and Environmental Sciences Majors, Concentrators, and Special Concentrators* above.

The Department of Earth and Environmental Sciences sponsors a special concentration which must be done in conjunction with the environmental biology major. Students should be aware that they must complete the environmental biology major in order to receive credit for the special concentration.

The special concentration in environmental science requires a minimum of 31.5 points, distributed as follows:

Introductory Environmental Science (13.5 points)

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System

Introductory Science (6 points)

Two courses in chemistry, physics, mathematics, or environmental biology from the supporting mathematics and science list for the environmental science major above.

Advanced Environmental Science (12 points)

Four courses at the 3000-level or above chosen from those recommended for the environmental science major above.

Advanced courses used to fulfill requirements in the environmental biology major cannot count toward requirements for the special concentration.

SPECIAL CONCENTRATION IN ENVIRONMENTAL BIOLOGY FOR MAJORS IN ENVIRONMENTAL SCIENCE

Please read *Guidelines for all Earth and Environmental Sciences Majors, Concentrators, and Special Concentrators* above.

The Department of Ecology, Evolution, and Environmental Biology sponsors a special concentration which must be done in conjunction with the environmental science major. Students should be aware that they must complete the environmental

science major in order to receive credit for the special concentration.

The special concentration in environmental biology requires a minimum of 39 points, distributed as follows:

Introductory Environmental Biology and Environmental Science (17 points)

EEEB UN2001	Environmental Biology I: Elements to Organisms
EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EEEB UN2002	Environmental Biology II: Organisms to the Biosphere

Introductory Science (13 points)

Select one of the following chemistry sequences:

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
CHEM UN1604 - CHEM UN2507	2ND TERM GEN CHEM (INTENSIVE) and Intensive General Chemistry Laboratory

One term of statistics such as the following:

STAT UN1101	Introduction to Statistics
STAT UN1201	Calculus-Based Introduction to Statistics
BIOL BC2286	Statistics and Research Design
EEEB UN3005	Introduction to Statistics for Ecology and Evolutionary Biology
EEEB UN3087	Conservation Biology

Advanced Environmental Biology (9 points)

Three additional advanced EEEB courses (3000-level and above), each chosen from a different curricular area (evolution/genetics, ecology/behavior/conservation, anatomy/physiology/diversity, biology laboratory courses).

Advanced courses used to fulfill requirements in the environmental science major cannot count toward requirements for the special concentration.

Sustainable Development

Students interested in sustainable development should refer to the *Sustainable Development* section in this Bulletin.

FALL 2020

EESC UN1001 Dinosaurs and the History of Life: Lectures and Lab. 4 points.

CC/GS: Partial Fulfillment of Science Requirement
Given in alternate years.

Prerequisites: Recommended preparation: basic high school science and math.

Lab is a hands-on introduction to geochronology, paleontology, and historical geology with field trips. (See W1401 for lectures only.) Dinosaurs: a spectacular example of a common, highly successful form of life, dominant for 135 million years. Where did they come from? Why were they so successful? Why did they die out? A basic introduction to interface between geology and biology.

Fall 2020: EESC UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 1001	001/12438	M W 1:10pm - 2:25pm Online Only	Paul Olsen	4	15/40
EESC 1001	001/12438	M 4:10pm - 7:00pm Online Only	Paul Olsen	4	15/40

EESC UN1201 Environmental Risks and Disasters. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Priority given to first-years and sophomores.

Prerequisites: high school science and math.

An introduction to risks and hazards in the environment.

Different types of hazards are analyzed and compared: natural disasters, such as tornados, earthquakes, and meteorite impacts; acute and chronic health effects caused by exposure to radiation and toxic substances such as radon, asbestos, and arsenic; long-term societal effects due to environmental change, such as sea level rise and global warming. Emphasizes the basic physical principles controlling the hazardous phenomena and develops simple quantitative methods for making scientifically reasoned assessments of the threats (to health and wealth) posed by various events, processes, and exposures. Discusses methods of risk mitigation and sociological, psychological, and economic aspects of risk control and management.

Fall 2020: EESC UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 1201	001/12439	M W 10:10am - 11:25am Online Only	Goran Ekstrom	3	51/100

EESC UN1401 Dinosaurs and the History of Life: Lectures. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Given in alternate years.

Prerequisites: Recommended preparation: basic high school science and math.

Dinosaurs: a spectacular example of a common, highly successful form of life, dominant for 135 million years. Where did they come from? Why were they so successful? Why did they die out? A basic introduction to the interface between geology and biology.

Fall 2020: EESC UN1401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

EESC 1401	001/12440	M W 1:10pm - 2:25pm Online Only	Paul Olsen	3	49/100
-----------	-----------	------------------------------------	------------	---	--------

EESC UN1600 Earth Resources and Sustainable Development. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: none; high school chemistry recommended. Survey of the origin and extent of mineral resources, fossil fuels, and industrial materials, that are non renewable, finite resources, and the environmental consequences of their extraction and use, using the textbook *Earth Resources and the Environment*, by James Craig, David Vaughan and Brian Skinner. This course will provide an overview, but will include focus on topics of current societal relevance, including estimated reserves and extraction costs for fossil fuels, geological storage of CO₂, sources and disposal methods for nuclear energy fuels, sources and future for luxury goods such as gold and diamonds, and special, rare materials used in consumer electronics (e.g., "Coltan", mostly from Congo) and in newly emerging technologies such as superconducting magnets and rechargeable batteries (e.g., heavy rare earth elements, mostly from China). Guest lectures from economists, commodity traders and resource geologists will provide "real world" input. Discussion Session Required.

Fall 2020: EESC UN1600

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 1600	001/12441	T Th 1:10pm - 2:25pm Online Only	Peter Kelemen	3	125/150

EESC UN2100 Earth's Environmental Systems: The Climate System. 4.5 points.

CC/GS: Partial Fulfillment of Science Requirement, BC: Partial Fulfillment of General Education Requirement: Laboratory Science (SCI)., BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA)., Lab Required

Priority given to Columbia and Barnard earth science, environmental science, and environmental biology majors should enrollment limits be reinstated.

Prerequisites: high school algebra. Recommended preparation: high school chemistry and physics; and one semester of college science.

Origin and development of the atmosphere and oceans, formation of winds, storms and ocean currents, reasons for changes through geologic time. Recent influence of human activity: the ozone hole, global warming, water pollution. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling. Students majoring in Earth and Environmental Sciences should plan to take EESC W2100 before their senior year to avoid conflicts with Senior Seminar.

Fall 2020: EESC UN2100

EESC UN2200 EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH. 4.50 points.

CC/GS: Partial Fulfillment of Science Requirement

Priority given to Columbia and Barnard earth science, environmental science, and environmental biology majors should enrollment limits be necessary.

Prerequisites: high school algebra and chemistry.

Recommended preparation: high school physics.

Prerequisites: high school algebra, chemistry, and physics.

Exploration of how the solid Earth works, today and in the past, focusing on Earth in the Solar system, continents and oceans, the Earth's history, mountain systems on land and sea, minerals and rocks, weathering and erosion, glaciers and ice sheets, the hydrological cycle and rivers, geochronology, plate tectonics, earthquakes, volcanoes, energy resources. Laboratory exploration of topics through examination of rock samples, experimentation, computer data analysis, field exercises, and modeling. Columbia and Barnard majors should plan to take W2200 before their senior year to avoid conflicts with the Senior Seminar

EESC UN2330 SCIENCE FOR SUSTAINABLE DEVPT. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

The course provides students with the natural science basis to appreciate co-dependencies of natural and human systems, which are central to understanding sustainable development. After completing the course, students should be able to incorporate scientific approaches into their research or policy decisions and be able to use scientific methods of data analysis. The semester will highlight the climate system and solutions from both physical and ecological perspectives; water resources; food production and the cycling of nutrients; and the role of biodiversity in sustainable development. The course emphasizes key scientific concepts such as uncertainty, experimental versus observational approaches, prediction and predictability, the use of models and other essential methodological aspects.

EESC UN3000 Tutorial Study in Earth and Environmental Sciences. 1-3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: declared major in Earth and environmental sciences and the department's permission. Students with particular interest in one of the many components of the Earth and environmental sciences should approach a director of undergraduate studies during the registration period so that tutorial-level exposure to the subject can be arranged. Each point requires two hours each week of readings, discussion, and research work under the close supervision of a member of the Department of Earth and Environmental Sciences, Lamont-Doherty Earth Observatory, American Museum of Natural History, or Goddard Institute for Space Studies. In consultation with the supervisor, the student selects a topic for intensive study and the time and place of the tutorial discussion sessions. May be repeated for credit up to a maximum of 12 points, with a maximum of 6 points with each staff member.

EESC UN3101 Geochemistry for a Habitable Planet. 3 points.

Prerequisites: Any 1000-level or 2000-level EESC course; MATH UN1101 Calculus I and CHEM UN1403 General Chemistry I or their equivalents.

The origin, evolution, and future of our planet, based on the book *How to Build a Habitable Planet* by Wallace S. Broecker. This course will focus on the geochemical processes that built Earth from solar material, led to its differentiation into continents and ocean, and have maintained its surface at a comfortable temperature. Students will participate in a hands-on geochemistry project at Lamont-Doherty Earth Observatory.

Fall 2020: EESC UN3101

EESC GU4050 Global Assessment and Monitoring Using Remote Sensing. 3 points.

CC/GS: Partial Fulfillment of Science Requirement, Lab Required

Enrollment limited to 24. Priority given to graduate students in the natural sciences and engineering.

Prerequisites: Course Cap 20 students. Priority given to graduate students in the natural sciences and engineering. Advanced level undergraduates may be admitted with the instructor's permission. Calculus I and Physics I & II are required for undergraduates who wish to take this course. General introduction to fundamentals of remote sensing; electromagnetic radiation, sensors, interpretation, quantitative image analysis and modeling. Example applications in the Earth and environmental sciences are explored through the analysis of remote sensing imagery in a state-of-the-art visualization laboratory.

EESC GU4330 Introduction to Terrestrial Paleoclimate. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Given in alternate years.

An overview of the archives in which evidence of terrestrial paleoclimate is preserved, the approaches to developing and applying proxies of climate from these archives, approaches for constraining the time represented by the information, and interpretations that have been developed from such archives. Important archives to be included are ice cores, caves, wetlands, lakes, trees, and moraines. The time interval covered will be mostly the last few tens of thousand years, and chronometers based on radiocarbon, U-series and surface exposure dating will be presented. The course will consist of a formal lecture on one day and a recitation on the second day which will emphasize examples and problem solving.

EESC GU4600 Earth Resources and Sustainable Development. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: none; high school chemistry recommended. Survey of the origin and extent of mineral resources, fossil fuels, and industrial materials, that are non renewable, finite resources, and the environmental consequences of their extraction and use, using the textbook *Earth Resources and the Environment*, by James Craig, David Vaughan and Brian Skinner. This course will provide an overview, but will include focus on topics of current societal relevance, including estimated reserves and extraction costs for fossil fuels, geological storage of CO₂, sources and disposal methods for nuclear energy fuels, sources and future for luxury goods such as gold and diamonds, and special, rare materials used in consumer electronics (e.g., “Coltan”, mostly from Congo) and in newly emerging technologies such as superconducting magnets and rechargeable batteries (e.g., heavy rare earth elements, mostly from China). Guest lectures from economists, commodity traders and resource geologists will provide “real world” input.

EESC GU4917 Earth/Human Interactions. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Enrollment limited to 20. Priority given to senior natural and social science majors, then graduate students.

Based upon the most current understanding of our planet and our impact on it and how we make decisions about the threats we face, a new knowledge-based “green” framework is developed for our relationship to our planet and to each other as well as its general implications for human stewardship of

our planet and meeting the needs of 8 billion humans. This new framework is explored using case studies, class participation, and term papers on specific current scientific and policy issues like global warming, renewable energy, carbon dioxide removal and their impact on the sustainability and resilience of our planet and ourselves

EESC UN3010 Field Geology. 3 points.

Fee: to be determined.

The centerpiece of this course is a field trip that will take place during Spring Break in Barbados. During the term-time the class will meet before the trip to prepare for it and after the trip to synthesize what was learned and to create a field guide. Subjects to be covered: Plate tectonics / convergent plate margins and accretionary prisms / Barbados geology; ice ages / Milankovitch cycles / sea level; introduction to coral reefs and fossil coral reef geology; Barbados terrestrial ecology; limestone caves / hydrology; dating methods; overview of Barbados history, economy, culture. In order to observe the modern day coral reef (the modern day live analog to the fossil coral reefs) the class will go snorkeling. In order to observe the effects of cave formation and water flow in limestone terrains the class will visit a cave. The class will also participate in an exercise in geological mapping of a series of coral reef terraces.

Priority is given to junior and senior majors and concentrators in the Department of Earth and Environmental Sciences at Columbia College and the School of General Studies, and Barnard Environmental Science majors and minors. Barnard students must receive permission from the Barnard Environmental Science department chair in order to receive the subsidy. All others require the instructor's permission. Interested sophomores planning to major or concentrate in Earth Sciences or Environmental Sciences are encouraged to contact the instructor. By necessity (number of van seats) the course is limited to 20 or 21 students.

EESC UN3201 Solid Earth Dynamics. 3 points.

Prerequisites: any 1000-level or 2000-level EESC course; MATH UN1101 Calculus I and PHYS UN1201 General Physics I or their equivalents. Concurrent enrollment in PHYS UN1201 is acceptable with the instructor's permission. Properties and processes affecting the evolution and behavior of the solid Earth. This course will focus on the geophysical processes that build mountains and ocean basins, drive plate tectonics, and otherwise lead to a dynamic planet. Topics include heat flow and mantle circulation, earthquakes and seismic waves, gravity, Earth's magnetic field, and flow of glaciers and ice sheets.

EESC GU4113 INTRODUCTION TO MINERALOGY I. 4.00 points.

Prerequisites: introductory geology or the equivalent, elementary college physics and chemistry, or the instructor's permission.

Prerequisites: introductory geology or the equivalent, elementary college physics and chemistry, or the instructors permission. Minerals come in dazzling colors, amazing shapes and with interesting optical effects. But mineralogy is also an essential tool for the understanding of Earth evolution. Minerals represent fundamental building blocks of the Earth system and planetary bodies. Minerals form through geological and biological processes such as igneous, metamorphic and sedimentary from high to low temperatures, from the deep interior to the Earth's surface and related to volcanism, tectonics, weathering, climate and life. Minerals are one of our most important sources of information on such processes through Earth's history. Minerals also represent important natural resources and are fundamental to the global economy and modern technology as we know it. The goal of this class is to (1) understand the physical and chemical properties of minerals, (2) learn techniques of mineral identification with an

emphasis on optical mineralogy, (3) understand the relationship between minerals and the broader geological context

EESC GU4210 Geophysical Fluid Dynamics. 3 points.

Required course for M.A./Ph.D. candidates focusing in physical oceanography and atmospheric sciences. Elective for undergraduate majors in the Department of Earth and Environmental Sciences.

Prerequisites: *APMA E3101*, *APMA E3201* or equivalents and *APPH E4200* or equivalent or the instructor's permission.

Fundamental concepts in the dynamics of rotating stratified flows. Geostrophic and hydrostatic balances, potential vorticity, f and beta plane approximations, gravity and Rossby waves, geostrophic adjustment and quasigeostrophy, baroclinic and barotropic instabilities.

EESC GU4220 Glaciology. 3 points.

Prerequisites: At least a year of calculus and physics; any 1000-level or 2000-level EESC course. Recommended: EESC2100 (Climate System), EESC2200 (Solid Earth), EESC3201 (Solid Earth Dynamics). Experience using MATLAB.

This course examines processes controlling how glaciers and ice sheets grow, retreat, modify their landscape and interact with the rest of the Earth system. We focus on what controls surface mass balance, the transformation from snow to ice, ice deformation, basal sliding, the temperature and age of ice, the flow of water through ice sheets and glaciers, and the two-way interactions between ice and the oceans, atmosphere and solid earth. Weekly lectures are accompanied by practical computer sessions that equip students with key numerical and data analysis skills used in research of glacial processes.

EESC GU4235 Sea level change. 3 points.

Prerequisites: At least a year of calculus and physics; any 1000-level or 2000-level EESC course; basic programming experience (e.g. EESC3400 - Introduction to Computational Earth Science). Recommended: EESC2100 (Climate System), EESC2200 (Solid Earth), EESC3201 (Solid Earth Dynamics). The course aims to explore sea level changes that take place over a wide variety of timescales and are the result of multiple solid Earth and climatic processes. The course will link a series of solid Earth processes such as mantle convection, viscoelastic deformation, and plate tectonics to the paleoclimate record and investigate how these processes contribute to our understanding of past and present changes in sea level and climate. The course will step chronologically through time starting with long term sea level changes over the Phanerozoic, followed by Plio-Pleistocene ice age sea level variations and lastly modern and future sea level change. This is a cross-disciplinary course, which is aimed at students with interests in geophysics, cryosphere evolution, ocean dynamics, sedimentology, paleogeography, and past and present climate

Spring 2021: EESC GU4235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4235	001/10409	T Th 11:40am - 12:55pm Online Only	Jacqueline Austermann	3	13/20

EESC GU4524 Biogeochemistry. 3.00 points.

Biogeochemistry considers how the basic chemical conditions of the Earth, from atmosphere to soil to seawater, have been and are being affected by the existence of life. Human activities in particular, from the rapid consumption of resources to the destruction of the rainforests and the expansion of smog-covered cities, are leading to rapid changes in the basic chemistry of the Earth. This course will examine biogeochemical processes in both terrestrial and aquatic ecosystems in Earth's Biosphere. We will cover the historical development and evolution of biogeochemical cycles and compare past biogeochemical systems on the planet to contemporary and future eco-biogeochemical systems that are increasingly perturbed and dominated by human activity

Spring 2021: EESC GU4524

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

EESC 4524	001/10410	T Th 2:40pm - 3:55pm Online Only	Hugh Ducklow	3.00	8/10
-----------	-----------	-------------------------------------	--------------	------	------

EESC GU4923 Biological Oceanography. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Given in alternate years. Enrollment limited to 24. Priority given to graduate students and then graduating seniors.

Prerequisites: introductory college-level biology and chemistry. An overview of the biology and ecology of the oceans with a focus on the interaction between marine organisms and the physics and chemistry of the oceans.

Fall 2020: EESC GU4923

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4923	001/15271	T Th 2:40pm - 3:55pm Online Only	Andrew Juhl	3	6/20

EESC GU4924 Introduction to Atmospheric Chemistry. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Physics UN1201, Chem UN1403, & Math UN1201 (Calc III), or their equivalents. Recommended: EESC UN2100 or EESC GU4008.

Physical and chemical processes determining atmospheric composition and the implications for climate and regional air pollution. Atmospheric evolution and human influence; basics of greenhouse effect, photolysis, reaction kinetics, atmospheric transport of trace species; stratospheric ozone chemistry; tropospheric hydrocarbon chemistry; oxidizing power; nitrogen, oxygen, sulfur cycles; chemistry-climate-biosphere interactions; aerosols, smog, acid rain.

Spring 2021: EESC GU4924

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4924	001/10411	T Th 10:10am - 11:25am Online Only	Arlene Fiore	3	12/40

EESC GU4926 Principles of Chemical Oceanography. 3 points.

Given in alternate years.

Prerequisites: Recommended preparation: one year of chemistry.

Factors controlling the concentration and distribution of dissolved chemical species within the sea. The physical chemistry of seawater, ocean circulation and mixing, gas exchange and biogeochemical processes interact to influence the distribution and fate of elements in the ocean. The course examines in some detail the two-way interaction between marine ecosystems and their chemical environment, and the implications of these interactions for distributions in the ocean of carbon, nutrients and trace metals.

Spring 2021: EESC GU4926

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4926	001/10412	T Th 1:10pm - 2:25pm Online Only	Robert Anderson	3	14/50

EESC GU4930 Earth's Oceans and Atmosphere. 3 points.

Prerequisites: Recommended preparation: a good background in the physical sciences.

Physical properties of water and air. Overview of the stratification and circulation of Earth's ocean and atmosphere and their governing processes; ocean-atmosphere interaction; resultant climate system; natural and anthropogenic forced climate change.

Spring 2021: EESC GU4930

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4930	001/10413	T Th 1:10pm - 2:25pm Online Only	Arnold Gordon	3	5/30

EESC GU4937 Cenozoic Paleocceanography. 3 points.

Given in alternate years. Enrollment limited to 20 students EESC (DEES) graduate students have priority..

Prerequisites: college-level geology helpful but not required. Introduces the physical, chemical and biological processes that govern how and where ocean sediments accumulate. Major topics addressed are: modes of biogenic, terrigenous and authigenic sedimentation, depositional environments, pore fluids and sediment geochemistry, diagenesis, as well as biostratigraphy and sediment stratigraphic principles and methods. Second half of the semester focuses on major events in Cenozoic paleocceanography and paleoclimatology including orbital control of climate, long-term carbon cycle, extreme climate regimes, causes of ice ages in Earth's history, human evolution, El Niño evolution, and long-term sea level history.

Spring 2021: EESC GU4937

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4937	001/10414	T Th 10:10am - 11:25am Online Only	Maureen Raymo, Baerbel Hoenisch	3	9/20

EAST ASIAN LANGUAGES AND CULTURES

Departmental Office: 407 Kent; 212-854-5027
ealac.columbia.edu/

Director of Undergraduate Studies: Prof. Jungwon Kim, 402 Kent; jk3638@columbia.edu

The program in East Asian studies offers a wide range of courses in a variety of disciplines, as well as training in the Chinese, Japanese, Korean, and Tibetan languages. The program is designed to provide a coherent curriculum for undergraduates wishing to major in East Asian studies, with disciplinary specialization in anthropology, art history, economics, history, literature, philosophy, political science, sociology, or religion. The department also offers a series of introductory and thematic courses especially designed for students seeking to acquire some knowledge of East Asia as part of their broader undergraduate experience.

ADMISSION TO LANGUAGE COURSES

All students wishing to enter the language program at another point besides the first term of the first level must pass a language placement test before registering. The language placement exams are held during the change of program period, the week before classes begin.

Students who have been absent from the campus for one term or more must take a placement test before enrolling in a language course beyond the first term of the first level.

Students who wish to place out of the Columbia College Foreign Language Requirement for a language taught in the department of East Asian Languages and Cultures must consult with the director of the relevant language program. The names of the directors, and additional information about East Asian language programs, can be accessed via the department website at <http://ealac.columbia.edu/program/language-programs/>.

LANGUAGE LABORATORY

An additional hour of study in the language laboratory is required in first-year Japanese (JPNS UN101 and JPNS UN1102).

JPNS UN1101	First-Year Japanese I
- JPNS UN1102	and First-Year Japanese II

Students taking these courses must attend all assigned language laboratory sessions. Grades for written and oral work in

the language laboratory and for additional work in oral drill sessions count as 10% of the final grade in the course. Assignments of laboratory hours are made during the first session of the regular classes.

COURSE NUMBERING

The following are general guidelines to the numbering of department courses open to undergraduates. Students with questions about the nature of a course should consult with the instructor or the director of undergraduate studies.

- *1000-level:* Introductory-level undergraduate courses and first-year language courses
- *2000-level:* Intermediate-level undergraduate courses and second-year language courses
- *3000-level:* Advanced-level undergraduate courses and third-year language courses
- *4000-level:* Advanced courses geared toward undergraduate students available to graduate students or geared toward both undergraduate and graduate students, fourth-year and above language courses

STUDY ABROAD

East Asian Studies majors or concentrators who opt to spend the spring semester of their junior year abroad should contact the director of undergraduate studies for information about course selection in the sophomore year.

Students planning to study abroad their junior year must take the required disciplinary and senior thesis-related courses in the spring of their sophomore year. Please contact the director of undergraduate studies for more details.

Through the Columbia University Center for Undergraduate Global Engagement (UGE), there are a few study abroad options available to students:

The Kyoto Consortium for Japanese Studies

The Kyoto Consortium offers Columbia students the opportunity to study in Japan with a program that offers intensive instruction in the Japanese language and courses that explore a wide range of topics in Japanese studies. The program is designed to strengthen your Japanese skills through intensive language training, cultural immersion, and regular interactions with the local community and/or your host family.

ACADEMIC YEAR/ SEMESTER STUDY

<https://global.undergrad.columbia.edu/program/kcjs-semester>

Students should have the equivalent of two semesters (fall departure) or three semesters (spring departure) of college-level Japanese completed by the time of their departure. The program is most appropriate for the junior year, but other arrangements are considered.

SUMMER STUDY

Modern Japanese track: <https://global.undergrad.columbia.edu/program/kcjs-summer-modern-japanese>

This program is open to students in good academic standing who have completed at least one year of college-level Japanese or the equivalent. Recent graduates may also apply.

Classical Japanese track: <https://global.undergrad.columbia.edu/program/kcjs-summer-classical-japanese>

This program is open to students in good academic standing who have completed three years of college-level Japanese or the equivalent

Columbia Summer in Beijing: Chinese Language Program

<https://global.undergrad.columbia.edu/program/columbia-summer-beijing>

The Columbia Summer in Beijing: Chinese Language program offers Columbia students of all language levels (beginner to advanced) the opportunity to study in Beijing and complete one academic year of Chinese in nine weeks through intensive courses, language exchange, drill sessions, and cultural activities.

Columbia Summer in Shanghai: Business Chinese

<https://global.undergrad.columbia.edu/program/columbia-summer-business-chinese>

The Columbia Summer in Shanghai: Business Chinese program offers Columbia students the opportunity to learn Business Chinese through an intensive course in which students can learn the cultural behaviors, jargon, and linguistic styles used in a professional environment as well as develop their resume and interview skills for multinational businesses. Students should have the equivalent of four semesters of college-level Chinese completed before their departure.

For further information about all of the East Asian programs offered through the Columbia University Center for Undergraduate Global Engagement (UGE), please contact [Jiyeon McHugh](#).

GRADING

Courses in which the grade of D or P has been received do not count toward the major or concentration requirements.

All language courses must be taken for a letter grade, without exception. Students may not take language courses for either R-Credit or Pass/Fail.

DEPARTMENTAL HONORS

Departmental honors are conferred only on East Asian Studies majors who have earned a grade point average of at least 3.6 for courses in the major, have pursued a rigorous and ambitious program of study, and have submitted senior theses of superior quality, clearly demonstrating originality and excellent scholarship. Qualified seniors are nominated by their thesis advisers. Normally no more than 10% of graduating majors receive departmental honors in a given academic year. Concentrators are not eligible for departmental honors.

MAJOR IN EAST ASIAN STUDIES

The requirements for this program were modified in the Spring 2017 semester. Students who declared an EAS major before this semester have the option of following the old or the new requirements. If you have any questions, please contact the Director of Undergraduate Studies.

Prerequisite

Students must meet the following prerequisite prior to declaring the East Asian Studies major: two years of Chinese, Japanese, Korean, Tibetan, Vietnamese, or the proficiency equivalent (to be demonstrated by placement examination).

Language Requirement

Third-year Chinese, Japanese, Korean, Tibetan, or Vietnamese (completion of the UN3005-UN3006 level in Chinese, Japanese, or Korean; TIBT UN3611-UN3612 level in Tibetan; VIET UN3101-UN3102), or the proficiency equivalent (to be demonstrated by placement examination). Students of Chinese may also complete UN3003-UN3004 to meet the third-year requirement.

One of the following sequences (in the target language):

CHNS UN3003	Third-Year Chinese I (N)
- CHNS UN3004	and Third-Year Chinese II (N)

Or, for heritage students:

CHNS UN3005	Third-Year Chinese I (W)
- CHNS UN3006	and Third-Year Chinese II (W)

JPNS UN3005	Third-Year Japanese I
- JPNS UN3006	and Third-Year Japanese II

KORN UN3005	Third-Year Korean I
- KORN UN3006	and Third-Year Korean II

TIBT UN3611	Third Year Modern Colloquial
- TIBT UN3612	Tibetan I
	and Third Year Modern Colloquial
	Tibetan II

VIET UN3101	Third Year Vietnamese I
-------------	-------------------------

Students who test out of three years or more of a language must take an additional year of that language or another East Asian language at Columbia in order to satisfy the language requirement.

Introductory Courses

Students are required to take:

AHUM UN1400	Colloquium on Major Texts: East Asia
-------------	--------------------------------------

Students must also select two of the following:

ASCE UN1359	Introduction to East Asian Civilizations: China
ASCE UN1361	INTRO EAST ASIAN CIV: JPN
ASCE UN1363	Introduction to East Asian Civilizations: Korea
ASCE UN1365	Introduction to East Asian Civilizations: Tibet
ASCE UN1367	Introduction to East Asian Civilizations: Vietnam

First-year students and sophomores, prior to declaring an East Asian studies major, are strongly urged to take one or more of the introductory courses.

Methodology Course

All majors must also take EAAS UN3990 Approaches to East Asian Studies which is offered every spring.

Elective Courses

Students must take four elective courses in East Asian studies, to be chosen in consultation with the DUS. Two of these courses must be EALAC or AMEC courses. Courses in a second East Asian language (one year minimum) or a classical East Asian language (one semester minimum) may be used to fulfill one elective course.

Senior Thesis Program

East Asian Studies majors who wish to write a senior thesis apply to the EALAC Senior Thesis Program at the end of their junior year. Students must have a minimum grade point average of 3.6 in courses taken in the major at the time of the application. Students interested in applying to the Senior Thesis Program should submit the EALAC Senior Thesis Program Application (see [Undergraduate Planning Sheets and Forms](#)). The deadline for submitting applications is usually in late April or early May. Please contact the Academic Coordinator for more information about the application process.

All potential thesis writers are required to enroll in the Senior Thesis Research Workshop (EAAS UN3999) in the fall of the senior year. Students who perform satisfactorily in this workshop, successfully complete a thesis proposal, and find a faculty adviser will then write the Senior Thesis itself in the spring semester under the direction of the adviser and a graduate student tutor (EAAS UN3901).

The senior thesis typically consists of about 30-35 pages of text (double-spaced, normal typeface and margins) and 5-8 pages of references. Under no circumstances should a thesis exceed

a total of 50 pages (including references), without the special permission of the faculty adviser.

Successful completion of the thesis by the April 1 deadline in the spring semester will be necessary but not sufficient for a student to receive departmental honors. Normally no more than 10% of graduating majors receive departmental honors in a given academic year; as such, not all thesis writers will receive honors.

CONCENTRATION IN EAST ASIAN STUDIES

Prerequisite

Students must meet the following prerequisite prior to declaring the East Asian Studies concentration: two years of Chinese, Japanese, Korean, Tibetan, Vietnamese, or the proficiency equivalent (to be demonstrated by placement examination).

Language Requirement

Third-year Chinese, Japanese, Korean, Tibetan, or Vietnamese (completion of the UN3005-UN3006 level in Chinese, Japanese, or Korean; TIBT UN3611-UN3612 level in Tibetan; VIET UN3101-UN3102), or the proficiency equivalent (to be demonstrated by placement examination). Students of Chinese may also complete UN3003-UN3004 to meet the third-year requirement.

One of the following sequences (in the target language):

CHNS UN3003	Third-Year Chinese I (N)
- CHNS UN3004	and Third-Year Chinese II (N)

Or, for heritage students:

CHNS UN3005	Third-Year Chinese I (W)
- CHNS UN3006	and Third-Year Chinese II (W)

JPNS UN3005	Third-Year Japanese I
- JPNS UN3006	and Third-Year Japanese II

KORN UN3005	Third-Year Korean I
- KORN UN3006	and Third-Year Korean II

TIBT UN3611	Third Year Modern Colloquial Tibetan I
- TIBT UN3612	and Third Year Modern Colloquial Tibetan II

VIET UN3101	Third Year Vietnamese I
-------------	-------------------------

Students who test out of a third-year level East Asian language must take either an additional year of the same language, one year of a classical East Asian language, one year of an additional East Asian language, or two electives.

Introductory Courses

AHUM UN1400	Colloquium on Major Texts: East Asia
-------------	--------------------------------------

Select one of the following:

ASCE UN1359	Introduction to East Asian Civilizations: China
-------------	---

ASCE UN1361	INTRO EAST ASIAN CIV: JPN
-------------	---------------------------

ASCE UN1363	Introduction to East Asian Civilizations: Korea
ASCE UN1365	Introduction to East Asian Civilizations: Tibet
ASCE UN1367	Introduction to East Asian Civilizations: Vietnam

Electives

Students must take two courses in East Asian Studies at Columbia or Barnard at the 3000- or 4000-level, subject to approval by the DUS. Concentrators may count Classical Chinese, Classical Japanese, or Classical Tibetan as one of the electives for this requirement.

Concentrators are not eligible for the Senior Thesis Program or for departmental honors.

NOTE: Courses without scheduling information are not offered during this current semester. Please also consult the [Directory of Classes](#) for course information before emailing the contact below.

For questions, please contact Amber Adams
(aa4617@columbia.edu)

CONTENT COURSES

ASCE UN1359 Introduction to East Asian Civilizations: China. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: NOTE: Students must register for a discussion section, ASCE UN1360

The evolution of Chinese civilization from ancient times to the 20th century, with emphasis on characteristic institutions and traditions.

Fall 2020: ASCE UN1359

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1359	001/10615	T Th 4:10pm - 5:25pm Online Only	Patrick Booz	4	59/90

Spring 2021: ASCE UN1359

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1359	003/00038	M W 10:10am - 11:25am Room TBA	Jue Guo	4	81/90

ASCE UN1361 INTRO EAST ASIAN CIV: JPN. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: NOTE: Students must register for a discussion section ASCE UN1371

Prerequisites: NOTE: Students must register for a discussion section ASCE UN1371 A survey of important events and individuals, prominent literary and artistic works, and recurring themes in the history of Japan, from prehistory to the 20th century

Fall 2020: ASCE UN1361

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1361	001/10617	M W 2:40pm - 3:55pm Online Only	Gregory Pflugfelder	4.00	63/90

Spring 2021: ASCE UN1361

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1361	001/10282	M W 4:10pm - 5:25pm Online Only	Paul Kreitman	4.00	92/90

ASCE UN1363 Introduction to East Asian Civilizations: Korea. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: NOTE: Students must register for a discussion section, ASCE UN1366

The evolution of Korean society and culture, with special attention to Korean values as reflected in thought, literature, and the arts.

Spring 2021: ASCE UN1363

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1363	001/10283	M W 11:40am - 12:55pm Online Only	Seong-Uk Kim	4	57/60

ASCE UN1365 Introduction to East Asian Civilizations: Tibet. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course seeks to introduce the sweep of Tibetan civilization and its history from its earliest recorded origins to the present. The course examines what civilizational forces shaped Tibet, especially the contributions of Indian Buddhism, sciences and literature, but also Chinese statecraft and sciences. Alongside the chronological history of Tibet, we will explore aspects of social life and culture.

Spring 2021: ASCE UN1365

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1365	001/10284	T Th 4:10pm - 5:25pm Online Only	Patrick Booz	4	57/60

ASCE UN1367 Introduction to East Asian Civilizations: Vietnam. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Corequisites: ASCE UN1377

This course provides a survey of Vietnamese civilization from prehistoric origins to the French colonization in the 19th century, with special emphasis on the rise and development of independent kingship over the 2nd millennium CE. We begin by exploring ethnolinguistic diversity of the Red River plain over the first millennium BCE, culminating in the material bronze culture known as the *Dong Son*. We then turn towards the introduction of high sinic culture, and the region's long

membership within successive Chinese empires. We pay special attention to the rise of an independent state out of the crumbling Tang Dynasty, and the specific nation-building effects of war with the Mongols and the Ming Dynasty, in the 14th and 15th centuries respectively. Our class ends with the French colonization of the region, and the dramatic cultural and intellectual transformations that were triggered as a result.

Our course will interrogate Vietnamese culture as a protean object, one that is defined and redefined at virtually every level, throughout a history marked by foreign interest, influence, and invasion.

Fall 2020: ASCE UN1367

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1367	001/10619	M W 2:40pm - 3:55pm Online Only	John Phan	4	62/90

AHUM UN1400 Colloquium on Major Texts: East Asia. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores the core classical literature in Chinese, Japanese and Korean Humanities. The main objective of the course is to discover the meanings that these literature offer, not just for the original audience or for the respective cultures, but for us. As such, it is not a survey or a lecture-based course. Rather than being taught what meanings are to be derived from the texts, we explore meanings together, informed by in-depth reading and thorough ongoing discussion.

Fall 2020: AHUM UN1400

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHUM 1400	002/10613	Th 2:10pm - 4:00pm Online Only	John Phan	4	23/22

EAAS UN2342 Mythology of East Asia. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through close readings of major myths of China, Japan, and Korea, this course provides a survey of significant themes

of East Asian culture. Inclusion of selected comparative readings also leads students to reconsider the nature of 'world mythology,' a field often constituted by juxtaposing Greek and Latin classics with oral texts collected during anthropological fieldwork. The core materials for this class are from ancient written traditions, but they speak with force and clarity to modern readers, as is underlined by our attention to latter-day reception and reconceptualization of these narratives. This is an introductory, discussion-based class intended for undergraduates. No prior knowledge of East Asian history or culture is required, and all course readings are in English. Satisfies the Global Core requirement.

EAAS UN3313 INTRODUCTION TO CHINESE CINEMAS. 3.00 points.

What is "cinema" in the Chinese-speaking world, and how have the aesthetics, politics and practice of cinema evolved over time? In what ways has cinema interacted with its sister arts, such as painting, photography, theatre, architecture, and music? And in what capacities has cinema represented and intervened into the social and political worlds of its production and reception? This course is an introductory course on Chinese cinemas from Mainland China, Taiwan and Hong Kong, featuring landmark films from the 1930s to the present, with emphasis on contemporary films produced in the past three decades. We cover major genres such as melodrama, historical epic, comedy, musical, martial arts and documentary films, and study works by film auteurs such as Hou Hsiao-hsien, Chen Kaige, Ann Hui and Jia Zhangke. Besides the questions mentioned above, topics also include cinema's approaches to history and memory, and its engagement with questions of gender, ethnicity, class and language politics

Spring 2021: EAAS UN3313

EAAS UN3322 East Asian Cinema. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces students to major works, genres and waves of East Asian cinema from the Silent era to the present, including films from Japan, Korea, Mainland China, Taiwan and Hong Kong. How has cinema participated in East Asian societies' distinct and shared experiences of industrial modernity, imperialism and (post)colonialism? How has cinema engaged with questions of class, gender, ethnic and language politics? In what ways has cinema facilitated transnational circulations and mobilizations of peoples and ideas, and how has it interacted with other art forms, such as theatre, painting, photography and music? In this class, we answer these questions by studying cinemas across the region side-by-side, understanding cinema as deeply embedded in the region's intertwining political, social and cultural histories and circulations of people and ideas. We cover a variety of genres such as melodrama, comedy, historical epic, sci-fi, martial arts and action, and prominent film auteurs such as Yasujiro Ozu, Akira Kurosawa, Yu Hyunmok, Chen Kaige, Hou Hsiao-hsien, and Ann Hui. As cinema is, among other things, a creative practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects. As a global core course, this class does not assume prior knowledge of East Asian culture or of film studies.

EAAS UN3338 CULTRL HIST-JAPANESE MONSTERS. 3.00 points.

Priority is given to EALAC and History majors, as well as to those who have done previous coursework on Japan.

From Godzilla to Pokemon (literally, pocket monster) toys, Japanese monsters have become a staple commodity of late-capitalist global pop culture. This course seeks to place this phenomenon within a longer historical, as well as a broader cross-cultural, context. Through an examination of texts and images spanning over thirteen centuries of Japanese history, along with comparable productions from other cultures, students will gain an understanding not only of different conceptions and representations of monsters, ghosts, and other supernatural creatures in Japan, but also of the role of the monstrous in the cultural imagination more generally. The course draws on various media and genres of representation, ranging from written works, both literary and scholarly, to the visual arts, material culture, drama, and cinema. Readings average 100-150 pages per week. Several film and video screenings are scheduled in addition to the regular class meetings. Seating is limited, with final admission based on a written essay and other information to be submitted to the instructor before the beginning of the semester

Spring 2021: EAAS UN3338

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

EAAS UN3343 JAPANESE CONTEMPORARY CINEMA # MEDIA CULTURE. 4.00 points.

The course will closely examine 1) the various traits of postmodern Japanese cinemas in the 1980s and the 1990s after the phase of global cinematic modernism, 2) contemporary media phenomena such as media convergence and the media ecologies of anime, 3) media activism after the 2011 Tohoku earthquake, and beyond. We will proceed through careful analysis of films, anime, and digital media, while also addressing larger questions of historiography in general

EAAS UN3423 Discovering Everyday Life in Modern China. 4 points.

This course introduces students to the everyday experiences of individuals, families, and communities in rural and urban China from the late Qing to the contemporary era. Based on extensive reading and discussion on academic literature, selected primary sources, and contemporary visual materials, the course will equip the students with the knowledge and skill to appreciate the dynamics and craft of history from the perspective of the everyday. There are no prerequisites to the course. All course materials are in English. Knowledge of Mandarin is useful but not required.

EAAS UN3435 Chinese Revolution, Asian Revolution, World Revolution: Revolution and Radicalism in the Long Twentieth Century. 4.00 points.

This course examines the Chinese Revolution as a global event, one that provided new possibilities for understanding the future not only of China, but Asia and the world. In doing so, it refuses any notion of the Chinese Revolution as a merely "Chinese" event and instead marks the ways in which diverse sets of activists and revolutionaries from across Asia not only contributed towards the formation of Chinese revolutionary politics but also responded on their own terms. The Chinese Revolution thereby emerges as a truly global event and one that transformed political imagination. The course focuses largely on the responses and trajectories of Asian revolutionaries, especially from Vietnam and Japan, whose intellectual and political paths intersected with those of Chinese activists. Students can expect to work through the diverse intellectual interventions of pan-Asian diasporic communities in Japan at the beginning of the twentieth century, read interwar proletarian fiction from Chinese and Japanese authors, compare Chinese and Vietnamese conceptualizations of "people's war" as an anti-colonial military strategy. They will emerge with a new

understanding of the porousness and complexity of basic categories such as China, Asia and revolution

HSEA UN3871 Modern Japan: Images and Words. 3 points.

This course relies primarily on visual materials to familiarize students with the history of Japan from the beginning of the nineteenth century through the present. It follows a chronological order, introducing students to various realms of Japanese visual culture—from woodblock prints to film, anime, and manga—along with the historical contexts that they were shaped by, and in turn helped shape. Special attention will be paid to the visual technologies of nation-building, war, and empire; to historical interactions between Japanese and Euro-American visual culture; to the operations of still versus moving images; and to the mass production of visual commodities for the global marketplace. Students who take the course will emerge not only with a better understanding of Japan's modern historical experience, but also with a more discerning eye for the ways that images convey meaning and offer access to the past.

EAAS UN3927 China in the Modern World. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The rise of China has impacted world politics and economy in significant ways. How did it happen? This course introduces some unique angles of self-understanding as suggested by Chinese writers, intellectuals, and artists who have participated in the making of modern China and provided illuminating and critical analyses of their own culture, history, and the world. Readings cover a wide selection of modern Chinese fiction and poetry, autobiographical writing, photography, documentary film, artworks, and music with emphasis on the interplays of art/literature, history, and politics. Close attention is paid to the role of storytelling, the mediating powers of technology, new forms of visibility and sense experience, and the emergence of critical consciousness in response to global modernity. In the course of the semester, a number of contemporary Chinese artists, filmmakers, and writers are invited to answer students' questions. This course draws on cross-disciplinary methods from art history, film studies, anthropology, and history in approaching texts and other works. The goal is to develop critical reading skills and gain in-depth understanding of modern China and its engagement with the modern world beyond the cold war rhetoric. Our topics of discussion include historical rupture, loss and melancholy, exile, freedom, migration, social bonding and identity, capitalism, nationalism, and the world revolution. All works are read in English translation.

EAAS GU4122 Japanese New Wave and Cinematic Modernism. 4 points.

This course will delve into an analytical reconsideration of postwar Japanese cinema specifically from the perspective of the Japanese New Wave. While we will aim to capture the exhilaration of the Japanese New Wave by closely analyzing existing studies on some of its key makers and their works, special attention will be given to what is left out of the category as it is conventionally understood, drawing on marginalized works and genres, such as educational and industrial films as well as pink films.

EAAS GU4160 CULTURES IN COLONIAL KOR. 4 points.

This course examines the processes of colonization that played a central role in locating Korea in an integrated world in the first half of the twentieth century. We will analyze the ways in which the intersections among an array of contemporary global issues and concerns (to name a few- social Darwinism, migration, urban space, gender, sexuality, militarism, race, liberalism, socialism, capitalism) shaped the modern experience in Korea under Japanese rule (1910-1945). Our approach will be multidisciplinary. We will look, for example, at art, architecture, literature, film, philosophy, religion, and historiography. Throughout, we will pay special attention to the place of Korea and Koreans in the expanding Japanese empire and, more broadly, in the global colonial context. Class will be held as a discussion seminar based on close reading of primary-source documents and recent scholarship.

Fall 2020: EAAS GU4160

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 4160	001/10665	W 4:10pm - 6:00pm Online Only	Theodore Hughes	4	16/15

EAAS GU4226 Gender, Class and Real Estate in Urbanizing China. 4 points.

This is a seminar for advanced undergraduates and master's degree students, which explores the socioeconomic consequences of China's development of a boom, urban residential real-estate market since the privatization of housing at the end of the 1990s. We will use the intersecting lenses of gender/sexuality, class and race/ethnicity to analyze the dramatic new inequalities created in arguably the largest and fastest accumulation of residential-real estate wealth in history. We will examine topics such as how skyrocketing home prices and state-led urbanization have created winners and losers based on gender, sexuality, class, race/ethnicity and location (*hukou*), as China strives to transform from a predominantly rural population to one that is 60 percent urban by 2020. We explore the vastly divergent effects of urban real-estate development on Chinese citizens, from the most marginalized communities in remote regions of Tibet and Xinjiang to hyper-wealthy investors in Manhattan. Although this course has no formal prerequisites, it assumes some basic knowledge of Chinese history. If you have never taken a course on China before, please ask me for guidance on whether or not this class is suitable for you. The syllabus is preliminary and subject to change based on breaking news events and the needs of the class.

Fall 2020: EAAS GU4226

HSEA GU4250 MADE IN CHINA: CRAFT AND INDUSTRY IN CHINESE HISTORY. 4.00 points.

This course examines Chinese history through a lens of objects made by its people, ranging from porcelain and silk in the late imperial period to virtually everything in the twenty-first century. These objects have circulated on a global scale with far-reaching economic consequences for Chinese society and beyond, and this course considers their production, circulation, and consumption in the larger historical context

of global China. In doing so, it attempts to revisit the facile boundaries between craft and industry (or the very definition of industrialization) and bring back the voices of the Chinese "makers," many of whom were the most underrepresented historical figures such as women, artisans, peasants, and factory workers

Spring 2021: HSEA GU4250

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HSEA 4250	001/11987	Th 12:10pm - 2:00pm Online Only	Yuan Yi	4.00	11/15

EARL GU4312 Tibetan Sacred Space (in Comparative Context). 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through interdisciplinary theoretical approaches (mostly in the fields of religion, anthropology, literature, and history), this course engages the genre of writing about sacred space in Tibetan Buddhist culture, addressing the micro (built environment) and macro (natural environment) levels of this important sphere of Tibetan literature. Through Tibetan pilgrimage accounts, place (monasteries, temples, etc) based guidebooks, geographically focused biographies, and pictorial representations of place, the class will consider questions about how place-writing overlaps with religious practice, politics, and history. For comparative purposes, we will read place based writing from Western and other Asian authors, for instance accounts of the guidebooks to and inscriptions at Christian churches, raising questions about the cultural relativity of what makes up sacred space.

Fall 2020: EARL GU4312

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EARL 4312	001/10673	Th 2:10pm - 4:00pm Online Only	Gray Tuttle	4	15/20

EARL GU4320 Buddhism and Korean Culture. 4 points.

Since Buddhism was introduced to Korea 1,600 years ago, the religion has had great impact on almost all aspects of the Korean society, making significant contributions to the distinct development of Korean culture. In this course, we will explore how Buddhism has influenced and interacted with various fields of Korean culture such as art, architecture, literature, philosophy, politics, religions, and popular culture. Buddhist scriptures, written in classical Chinese, with their colorful imaginations, have stimulated the development of Korean literature. Buddhist art, sculpture, and architecture have also catalyzed the Korean counterparts to bloom. The sophisticated philosophy and worldview of Buddhism, along with its diverse religious practices and rituals have added richness to the spiritual life of Korean people. Buddhism also attracted a significant number of followers, often playing important roles in politics. Throughout the course, we will not only investigate the influence of Buddhism on diverse aspects of Korean culture on their forms and at their depths, but also examine the interactions between Buddhism and other religions,

as well as politics. Students will learn how Korean people have formed and reformed Korean culture through the medium of Buddhism

Fall 2020: EARL GU4320

HSEA GU4712 Local History in Tibet. 4 points.

Tibetan culture covers an area roughly the size of Western Europe, yet most regions have not been the subject of sustained historical study. This course is designed for students interested in studying approaches to local history that attempt to ask large questions of relatively small places. Historiographic works from Tibetan studies (where they exist) will be examined in comparison with approaches drawn mainly from European and Chinese studies, as well as theories drawn from North/South American and Southeast Asian contexts. Given the centrality of Buddhist monasteries to Tibetan history (as “urban” centers, banks, governments, educational institutions, etc.) much of the course will deal with these.

Spring 2021: HSEA GU4712

EAAS GU4810 WOMEN AND LITERARY CULTURE IN JAPAN. 4.00 points.

Japan has a long tradition of highly sophisticated vernacular literature (poetry, prose fiction, essays and poetic memoirs) by aristocratic court women, particularly from the tenth- and eleventh-century, including The Tale of Genji, often considered the world's first psychological novel. Writings by women in the early period had a deep impact on subsequent cultural production, and these vernacular writings (as well as the figure of these early women writers) acquired a new, contested significance from the end of the nineteenth century as part of the process of modern nation-building. Gender became a major organizing category in constructing discourse on literature, literary language, and literary modernity, particularly with regard to the novel. This seminar engages in close readings and discussion of selected works from the eleventh-century to twentieth-century Japan with particular attention to the genealogy of women's writings and changing representations of women, gender, and social relations. Issues include: genre, media, intertextuality, and literary communities; body and sexuality; and in the modern period, the “woman question” and global feminisms as well as authorship and authority. All

readings are in English. Original texts will be provided for those who can read in the original

HSEA GU4813 EARLY TIBETAN HISTORY AND ITS RELATIONS WITH CHINA. 4.00 points.

This course compares popular narratives with historical evidence on early Tibetan history focusing on the Tibetan Empire (7th-9th c.) with an emphasis on its relations with China
Spring 2021: HSEA GU4813

HSEA GU4888 WOMEN & GENDER IN KOREAN. 4 points.

While the rise of women's history and feminist theory in the 1960s and 1970s fostered more general reevaluations of social and cultural history in the West, such progressions have been far more modest in Korean history. To introduce one of the larger challenges in current Korean historiography, this course explores the experiences, consciousness and representations of women Korea at home and abroad from premodern times

to the present. Historical studies of women and gender in Korea will be analyzed in conjunction with theories of Western women's history to encourage new methods of rethinking "patriarchy" within the Korean context. By tracing the lives of women from various socio-cultural aspects and examining the multiple interactions between the state, local community, family and individual, women's places in the family and in society, their relationships with one another and men, and the evolution of ideas about gender and sexuality throughout Korea's complicated past will be reexamined through concrete topics with historical specificity and as many primary sources as possible. With understanding dynamics of women's lives in Korean society, this class will build an important bridge to understand the construction of New Women in early twentieth-century Korea, when women from all walks of life had to accommodate their "old-style" predecessors and transform themselves to new women, as well as the lives of contemporary Korean women. This will be very much a reading-and-discussion course. Lectures will review the readings in historical perspective and supplement them. The period to be studied ranges from the pre-modern time up to the turn of twentieth century, with special attention to the early modern period.

CHINESE LANGUAGE COURSES

CHNS UN1010 INTRODUCTORY CHINESE A. 2.50 points.

The program is designed to develop basic skills in listening, speaking, reading and writing colloquial Chinese. This course is divided into two parts: Introductory Chinese A and Introductory Chinese B. The two parts together cover the same materials as CHNS UN1101 FIRST YEAR CHINESE I

Spring 2021: CHNS UN1010

CHNS W4904 Acquisition of Chinese as a Second Language. 4 points.

For more than forty years, second language acquisition (SLA) has been emerging as an independent field of inquiry with its own research agenda and theoretical paradigms. The study of SLA is inherently interdisciplinary, as it draws on scholarship from the fields of linguistics, psychology, education, and sociology. This course explores how Chinese is acquired by non-native speakers. Students will learn about general phenomena and patterns during the process of acquiring a new language. They will become familiar with important core concepts, theoretical frameworks, and research practices of the field of SLA, with Chinese as the linguistic focus.

JAPANESE LANGUAGE COURSES

JPNS UN1001 INTRODUCTORY JAPANESE A. 2.50 points.

Introductory Japanese A is an introduction to Japanese language and culture and is designed for students who have had little or no experience learning Japanese. The goal of this course is to develop four basic skills in modern Japanese with an emphasis on grammatical accuracy and socially appropriate language use. Upon successful completion of this course, students will be able to engage in basic daily conversations and to develop the ability to read and write hiragana as well as katakana. The sequence includes JPNS UN1001 Introductory Japanese A and JPNS UN1002 Introductory Japanese B. These courses combined (JPNS UN1001 and JPNS UN1002) are the equivalent to JPNS UN1101 First Year Japanese I and fulfills the requirement for admission to JPNS UN1102 First Year Japanese II

JPNS UN1002 Introductory Japanese B. 2.5 points.

Prerequisites: C+ or above in *JPNS W1001* or pass the placement test.

The sequence begins in the spring term. *JPNS W1001-W1002* is equivalent to *JPNS C1101* or *F1101* and fulfills the requirement for admission to *JPNS C1102* or *F1102*. Aims at the acquisition of basic Japanese grammar and Japanese culture with an emphasis on accurate communication in speaking and writing.

VIET 2102	001/10376	M W 1:10pm - 2:25pm 411 Kent Hall	Chung Nguyen	5	3/12

VIET UN3101 Third Year Vietnamese I. 3 points.

Prerequisites: VIET UN1101 and VIET UN1102 and VIET UN2101 and VIET UN2102 and This course is designed for students who have already completed First and Second Year Vietnamese (VIET 1101, VIET 1102, VIET 2101, and VIET 2102) or who possess the equivalent background of intermediate Vietnamese. Students with equivalent background should contact instructor for permission to enroll.

This course is designed for students who have completed fourth semester Vietnamese or have equivalent background of intermediate Vietnamese. The course is aimed at enhancing students' competence in reading and listening comprehension as well as the ability to present or show their knowledge of the language and various aspects of Vietnamese with the use of more advanced Vietnamese.

Fall 2020: VIET UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 3101	001/15303	M W 2:40pm - 3:55pm Online Only	Chung Nguyen	3	4/15

VIET UN3102 THIRD YEAR VIETNAMESE II. 3.00 points.

The course is aimed at enhancing students' competence in reading and listening comprehension as well as the ability to present or show their knowledge of the language and various aspects of Vietnamese with the use of more advanced Vietnamese

Spring 2021: VIET UN3102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 3102	002/11979	M W 2:40pm - 3:55pm 411 Kent Hall	Chung Nguyen	3.00	3/12

VIET GU4101 MIXED ADVANCED VIETNAMESE I. 4 points.

This course is designed for students who have completed six semesters of Vietnamese language class or have equivalent background of advance Vietnamese. It is aimed at developing more advance interpersonal communication skills in interpretive reading and listening as well as presentational speaking and writing at a superior level. Students are also prepared for academic, professional and literary proficiency suitable for post-secondary studies in the humanities and social sciences.

Fall 2020: VIET GU4101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

VIET 4101	001/13014	M W 4:10pm - 6:00pm Online Only	Vinh Nguyen	4	4/12
-----------	-----------	------------------------------------	-------------	---	------

VIET GU4102 MIXED ADVANCED VIETNAMESE II. 4.00 points.

This course is designed for students who have completed seven semesters of Vietnamese class or have equivalent background of advance Vietnamese. It is aimed at developing more advance interpersonal communication skills in interpretive reading and listening as well as presentational speaking and writing at a superior level. Students are also prepared for academic, professional and literary proficiency suitable for post-secondary studies in the humanities and social sciences

Spring 2021: VIET GU4102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 4102	001/11983	M W 4:10pm - 6:00pm Online Only	Vinh Nguyen	4.00	4/12

ECOLOGY, EVOLUTION, AND ENVIRONMENTAL BIOLOGY

Departmental Office: Schermerhorn Extension, 10th floor; 212-854-9987

<http://e3b.columbia.edu/>

Director of Undergraduate Studies: Dr. Matthew Palmer, 1010 Schermerhorn; 212-854-4767; mp2434@columbia.edu

Evolutionary Biology of the Human Species Adviser: Dr. Jill Shapiro, 1011 Schermerhorn Extension; 212-854-5819; jss19@columbia.edu

Director, Administration and Finance: Kyle Bukhari, 1014B Schermerhorn Extension; 212-854-8665; kb2337@columbia.edu (lg2019@columbia.edu)

The Department of Ecology, Evolution & Environmental Biology (E3B) at Columbia University was established in 2001. Although we are a relatively new department, we have grown rapidly in the past decade. We now have an internationally

diverse student body and a broad network of supporters at Columbia and throughout New York City. Our affiliated faculty members come from departments at Columbia as well as from the [American Museum of Natural History](#), the [New York Botanical Garden](#), the [Wildlife Conservation Society](#), and the [EcoHealth Alliance](#). Together, we provide an unparalleled breadth and depth of research opportunities for our students.

In creating E3B, Columbia University recognized that the fields of ecology, evolutionary biology, and environmental biology constitute a distinct subdivision of the biological sciences with its own set of intellectual foci, theoretical foundations, scales of analysis, and methodologies.

E3B's mission is to educate a new generation of scientists and practitioners in the theory and methods of ecology, evolution, and environmental biology. Our educational programs emphasize a multi-disciplinary perspective to understand life on Earth from the level of organisms to global processes that sustain humanity and all life.

To achieve this multi-disciplinary perspective, the department maintains close ties to over 70 faculty members beyond its central core. Thus, many faculty members who teach, advise, and train students in research are based in other departments on the Columbia campus or at the partner institutions. Through this collaboration, the department is able to tap into a broad array of scientific and intellectual resources in the greater New York City area. The academic staff covers the areas of plant and animal systematics; evolutionary and population genetics; ecosystem science; demography and population biology; behavioral and community ecology; and related fields of epidemiology, ethnobiology, public health, and environmental policy. Harnessing the expertise of this diverse faculty and the institutions of which they are a part, E3B covers a vast area of inquiry into the evolutionary, genetic, and ecological relationships among all living things.

FACILITIES AND COLLABORATIVE INSTITUTIONS

The Department of Ecology, Evolution, and Environmental Biology (E3B)

In addition to the off-campus facilities detailed below, the Columbia community offers academic excellence in a range of natural and social science disciplines that are directly related to biodiversity conservation including: evolution, systematics, genetics, behavioral ecology, public health, business, economics, political science, anthropology, and public and international policy. These disciplines are embodied in world-class departments, schools, and facilities at Columbia. The divisions that bring their resources to bear on issues most relevant to E3B's mission are: the Lamont-Doherty Earth Observatory, the School of International and Public Affairs, the Goddard Institute for Space Studies, the International Research Institute for Climate Prediction, the Black Rock Forest Reserve in New York State, the Rosenthal Center

for Alternative/Complementary Medicine, the Division of Environmental Health Sciences at the School of Public Health, and the Center for International Earth Science Information Network (CIESIN). Several of these units of the University are networked through the Earth Institute at Columbia, a division of the University that acts as an intramural network of environmental programs and supplies logistical support for constituent programs, through planning, research, seminars, and conferences. All of the above schools, centers, and institutes contribute to finding solutions for the world's environmental challenges.

The Earth Institute Center for Environmental Sustainability (EICES)

The Earth Institute Center for Environmental Sustainability (EICES), formerly known as the Center for Environmental Research and Conservation (CERC), is actively involved in protecting biodiversity and ecosystems. The Earth Institute Center for Environmental Sustainability is dedicated to the development of a rich, robust, and vibrant world within which we can secure a sustainable future. Through a diverse array of strategic partners in science, education, and outreach, the center builds unique programs that promote human well-being through the preservation, restoration, and management of biodiversity, and the services our ecosystems provide.

The Center for Environmental Research and Conservation (CERC), a leading provider of cutting-edge environmental research, education, and training, since its inception in 1994, has grown into two institutions—an Earth institute center and a Secretariat for a major environmental consortium. The center's new name is the Earth Institute Center for Environmental Sustainability (EICES, pronounced "i-sees"). EICES also continues, however, as the Secretariat for the Consortium for Environmental Research and Conservation, continuing 15 years of collaborations between the Earth Institute, the American Museum of Natural History, the New York Botanical Garden, The Wildlife Conservation Society, and EcoHealth Alliance on biodiversity conservation.

American Museum of Natural History

The American Museum of Natural History is one of the world's preeminent scientific, educational, and cultural institutions. Since its founding in 1869, the Museum has advanced its global mission to discover, interpret, and disseminate information about human cultures, the natural world, and the universe through a wide-reaching program of scientific research, education, and exhibitions. The institution comprises 45 permanent exhibition halls, state-of-the-art research laboratories, one of the largest natural history libraries in the Western Hemisphere, and a permanent collection of 32 million specimens and cultural artifacts. With a scientific staff of more than 200, the Museum supports research divisions in anthropology, paleontology, invertebrate and vertebrate zoology, and the physical sciences. The Museum's scientific staff pursues a broad agenda of advanced scientific research,

investigating the origins and evolution of life on Earth, the world's myriad species, the rich variety of human culture, and the complex processes that have formed and continue to shape planet Earth and the universe beyond.

The Museum's Center for Biodiversity and Conservation (CBC) was created in June 1993 to advance the use of scientific data to mitigate threats to biodiversity. CBC programs integrate research, education, and outreach so that people, a key force in the rapid loss of biodiversity, will become participants in its conservation. The CBC works with partners throughout the world to build professional and institutional capacities for biodiversity conservation and heightens public understanding and stewardship of biodiversity. CBC projects are under way in the Bahamas, Bolivia, Madagascar, Mexico, Vietnam, and the Metropolitan New York region.

The Museum's scientific facilities include: two molecular systematics laboratories equipped with modern high-throughput technology; the interdepartmental laboratories, which include a state-of-the-art imaging facility that provides analytical microscopy, energy dispersive spectrometry, science visualization, and image analysis to support the Museum's scientific activities; a powerful parallel-computing facility, including a cluster of the world's fastest computers, positioned to make significant contributions to bioinformatics; and a frozen tissue facility with the capacity to store one million DNA samples.

New York Botanical Garden

The New York Botanical Garden (NYBG), with its 7 million specimen herbarium, the largest in the Western Hemisphere, and its LuEsther T. Mertz Library, the largest botanical and horticultural reference collection on a single site in the Americas, comprises one of the very best locations in the world to study plant science. NYBG's systematic botanists discover, decipher, and describe the world's plant and fungal diversity; and its economic botanists study the varied links between plants and people. The Enid A. Haupt Conservatory, the largest Victorian glasshouse in the United States, features some 6,000 species in a newly installed "Plants of the World" exhibit. The new International Plant Science Center stores the Garden collection under state-of-the-art environmental conditions and has nine study rooms for visiting scholars. All specimens are available for on-site study or loan.

In recent years, NYBG has endeavored to grow and expand its research efforts, supporting international field projects in some two dozen different countries, ranging from Brazil to Indonesia. In 1994, AMNH and NYBG established the Lewis and Dorothy Cullman Program for Molecular Systematics Studies to promote the use of molecular techniques in phylogenetic studies of plant groups. This program offers many opportunities for research in conservation genetics. NYBG operates both the Institute for Economic Botany (IEB) and the Institute of Systematic Botany (ISB). The ISB builds on the Garden's long tradition of intensive and distinguished research in systematic

botany—the study of the kinds and diversity of plants and their relationships—to develop the knowledge and means for responding effectively to the biodiversity crisis.

The Garden has also established a molecular and anatomical laboratory program, which includes light and electron microscopes, and has made enormous advances in digitizing its collection. There is currently a searchable on-line library catalog and specimen database collection with some half million unique records. Field sites around the world provide numerous opportunities for work in important ecosystems of unique biodiversity.

Wildlife Conservation Society

The Wildlife Conservation Society (WCS), founded in 1895 as the New York Zoological Society, works to save wildlife and wild lands throughout the world. In addition to supporting the nation's largest system of zoological facilities—the Bronx Zoo; the New York Aquarium; the Wildlife Centers in Central Park, Prospect Park, and Flushing Meadow Park; and the Wildlife Survival Center on St. Catherine's Island, Georgia—WCS maintains a commitment to field-based conservation science. With 60 staff scientists and more than 100 research fellows, WCS has the largest professional field staff of any U.S.-based international conservation organization. Currently, WCS conducts nearly 300 field projects throughout the Americas, Asia, and Africa. The field program is supported by a staff of conservation scientists based in New York who also conduct their own research.

WCS's field-based programs complement the organization's expertise in veterinary medicine, captive breeding, animal care, genetics, and landscape ecology, most of which are based at the Bronx Zoo headquarters. WCS's Conservation Genetics program places an emphasis on a rigorous, logical foundation for the scientific paradigms used in conservation biology and is linked to a joint Conservation Genetics program with the American Museum of Natural History. The Wildlife Health Sciences division is responsible for the health care of more than 17,000 wild animals in the five New York parks and wildlife centers. The departments of Clinical Care, Pathology, Nutrition, and Field Veterinary Programs provide the highest quality of care to wildlife.

EcoHealth Alliance

EcoHealth Alliance is an international organization of scientists dedicated to the conservation of biodiversity. For more than 40 years, EcoHealth Alliance has focused its efforts on conservation. Today, they are known for innovative research on the intricate relationships between wildlife, ecosystems, and human health.

EcoHealth Alliance's work spans the U.S. and more than 20 countries in Central and South America, the Caribbean, Africa, and Asia to research ways for people and wildlife to share bioscapes for their mutual survival. Their strength is

built on innovations in research, education, and training and accessibility to international conservation partners.

Internationally, EHA programs support conservationists in over a dozen countries at the local level to save endangered species and their habitats, and to protect delicate ecosystems for the benefit of wildlife and humans.

ACADEMIC PROGRAMS

The Department of Ecology, Evolution, and Environmental Biology runs two undergraduate majors/concentrations. The primary major is in environmental biology and the second is evolutionary biology of the human species. The foci and requirements vary substantially and are intended for students with different academic interests.

The environmental biology major emphasizes those areas of biology and other disciplines essential for students who intend to pursue careers in the conservation of Earth's living resources. It is designed to prepare students for graduate study in ecology and evolutionary biology, conservation biology, environmental policy and related areas, or for direct entry into conservation-related or science teaching careers.

Interdisciplinary knowledge is paramount to solving environmental biology issues, and a wide breadth of courses is thus essential, as is exposure to current work. Conservation internships are available through partner institutions and serve as research experience leading to the development of the required senior thesis.

Declaration of the environmental biology major must be approved by the director of undergraduate studies and filed in the departmental office located on the 10th floor of Schermerhorn Extension.

The major in evolutionary biology of the human species provides students with a foundation in the interrelated spheres of behavior, ecology, genetics, evolution, morphology, patterns of growth, adaptation, and forensics. Using the framework of evolution and with attention to the interplay between biology and culture, research in these areas is applied to our own species and to our closest relatives to understand who we are and where we came from. This integrated biological study is also known as biological anthropology. As an interdisciplinary major, students are also encouraged to draw on courses in related fields including biology, anthropology, geology, and psychology as part of their studies.

GUIDELINES FOR ALL ECOLOGY, EVOLUTION, AND ENVIRONMENTAL BIOLOGY MAJORS AND CONCENTRATORS

The grade of D is not accepted for any course offered in fulfillment of the requirements toward the majors or concentrations.

MAJOR IN ENVIRONMENTAL BIOLOGY

The major in environmental biology requires 50 points, distributed as follows:

Lower Division Courses

Two terms of introductory or environmental biology such as the following:

EEEB UN2001 - EEEB UN2002	Environmental Biology I: Elements to Organisms and Environmental Biology II: Organisms to the Biosphere
------------------------------	--

Two terms of environmental science such as the following:

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

Two terms of chemistry such as the following:

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
------------------------------	---

One term of physics such as the following:

PHYS UN1201	General Physics I
-------------	-------------------

One term of statistics such as the following:

EEEB UN3005	Introduction to Statistics for Ecology and Evolutionary Biology
-------------	--

BIOL BC2286	Statistics and Research Design
-------------	--------------------------------

STAT UN1101	Introduction to Statistics
-------------	----------------------------

STAT UN1201	Calculus-Based Introduction to Statistics
-------------	--

One term of calculus such as the following:

MATH UN1101	CALCULUS I
-------------	------------

MATH UN1102	CALCULUS II
-------------	-------------

MATH UN1201	Calculus III
-------------	--------------

MATH UN1202	CALCULUS IV
-------------	-------------

Upper Division Courses

Students must complete five advanced elective courses (generally 3000-level or above) satisfying the following distribution. At least one of these courses must include a laboratory component. For more information and a list of appropriate courses, contact the director of undergraduate studies.

1. Ecology, behavior, or conservation biology;
2. Evolution or genetics;
3. Morphology, physiology, or diversity;
4. Policy or economics;
5. One additional course from the preceding four groups.

Students must also complete a senior thesis, which involves completing a research internship (generally in the summer before the senior year) and completing at least one semester of the thesis research seminar, EEEB UN3991- EEEB UN3992 Senior Seminar. Enrollment in both semesters of the seminar, starting in the spring of the junior year, is recommended.

Students planning on continuing into graduate studies in environmental biology or related fields are encouraged to take organic chemistry and genetics.

ECOLOGY AND EVOLUTION TRACK WITHIN THE ENVIRONMENTAL BIOLOGY MAJOR

The ecology and evolution track within the environmental biology major requires 50 points, distributed as follows:

Lower Division Courses

Two terms of introductory or environmental biology such as the following:

EEEB UN2001 - EEEB UN2002	Environmental Biology I: Elements to Organisms and Environmental Biology II: Organisms to the Biosphere
Two terms of chemistry such as the following:	
CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
Chemistry laboratory such as the following:	
CHEM UN1500	General Chemistry Laboratory
Two terms of physics such as the following:	
PHYS UN1201 - PHYS UN1202	General Physics I and General Physics II
One term of statistics such as the following:	
EEEB UN3005	Introduction to Statistics for Ecology and Evolutionary Biology
BIOL BC2286	Statistics and Research Design
STAT UN1101	Introduction to Statistics
STAT UN1201	Calculus-Based Introduction to Statistics
Two terms of calculus, or one term of calculus and second advanced course in math or statistics such as the following:	
MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	Calculus III
MATH UN1202	CALCULUS IV

Upper Division Courses

Students must complete five advanced elective courses (generally 3000-level or above) satisfying the following distribution. At least one of these courses must include a laboratory component. For more information and a list of appropriate courses, contact the director of undergraduate studies.

1. Three courses in ecology, evolution, conservation biology, or behavior;
2. One course in genetics. BIOL UN3031 Genetics or BIOL BC2100 Molecular and Mendelian Genetics is recommended;
3. One course in morphology, physiology, or diversity.

Students must also complete a senior thesis, which involves completing a research internship (generally in the summer before the senior year) and completing at least one semester of the thesis research seminar, EEEB UN3991-EEEB UN3992 Senior Seminar. Enrollment in both semesters of the seminar, starting in the spring of the junior year, is recommended.

Students planning on continuing into graduate studies in ecology or evolutionary biology are encouraged to take organic chemistry.

MAJOR IN EVOLUTIONARY BIOLOGY OF THE HUMAN SPECIES

The major in evolutionary biology of the human species requires 36 points, distributed as described below.

Students must take a minimum of 20 points from approved biological anthropology courses. The additional courses may be taken in other departments with adviser approval. These include up to 6 points of introductory biology/chemistry or calculus (in any combination). Please speak with the major adviser about the extended list of courses from related areas including Biology, Psychology, Archaeology, Anthropology, Earth and Environmental Science, and Statistics that count toward this program.

For example, students interested in focusing on paleoanthropology would complement the requirements with additional courses in human evolution and morphology, evolutionary biology and theory, archaeology, genetics, and statistics. Those interested in primate behavior would supplement the requirements with classes in behavioral biology, ecology, and statistics.

Required Courses

EEEB UN1010	Human Origins and Evolution
EEEB UN1011	Behavioral Biology of the Living Primates

****Alternate options may be possible for all courses other than EEEB UN1010 Human Origins and Evolution and EEEB UN1011 Behavioral Biology of the Living Primates. These will be considered on an individual basis in consultation with the major/concentration adviser.**

Conservation Course

EEEB UN3240	Challenges and Strategies of Primate Conservation (This is the recommended conservation course but this requirement can be fulfilled with other classes such as Conservation Biology, Zoo Conservation, Ecology, Behavior and Conservation of Mammals, SEE-U in Jordan or Brazil, or other relevant offerings.)
-------------	--

Theoretical Foundation from Archaeology

Select one course of the following: Nearly all archaeology courses (save for Rise of Civilization) can fulfill this requirement. Check with the advisor.

Archaeology

ANTH UN1007	The Origins of Human Society
ANTH UN2028	Think Like an Archaeologist: Introduction to Method & Theory

ANTH UN3064	Death and the Body
ANTH UN3823	Archaeology Engaged: The Past in the Public Eye

Breadth Requirement

Select a minimum of one course from each of the three sections (may overlap seminar requirement for majors):

Genetics/Human Variation

BIOL BC2100	Molecular and Mendelian Genetics
BIOL UN3031	Genetics
BIOL GU4560	Evolution in the age of genomics
ANTH UN3970	Biological Basis of Human Variation
EEEB GU4340	Human Adaptation
EEEB GU4700	Race: The Tangled History of a Biological Concept

Primate Behavioral Biology and Ecology

EEEB UN3940	Current Controversies in Primate Behavior and Ecology
BIOL BC2272	Ecology
BIOL BC2280	Animal Behavior
PSYC UN2420	Animal Behavior
PSYC BC1119	Systems and Behavioral Neuroscience
PSYC UN2450	Behavioral Neuroscience
PSYC BC3372	Comparative Cognition
PSYC UN3450	EVOL-INTELLIGENC/ CONSCIOUSNESS
PSYC UN3460	Evolution of Behavior (Seminar)
PSYC UN3470	Brain Evolution: Becoming Human (Seminar)
EEEB GU4010	The Evolutionary Basis of Human Behavior
EEEB GU4134	Behavioral Ecology
EEEB GU4201	Ecology, Behavior, and Conservation of Mammals (can count for either breadth requirement or conservation requirement, but not both)

Human Evolution/Morphology

EEEB UN3208	Explorations in Primate Anatomy
EEEB UN3215	Forensic Osteology
EEEB UN3220	The Evolution of Human Growth and Development
ANTH GU4147	Human Skeletal Biology I
ANTH GU4148	The Human Skeletal Biology II
EEEB UN3204	Dynamics of Human Evolution
EEEB UN3910	The Neandertals
ANTH GU4002	Controversial Topics in Human Evolution
ANTH GU4200	Fossil Evidence of Human Evolution
BIOL BC2278	Evolution

BIOL UN3208	Introduction to Evolutionary Biology
EEEB UN3030	The Biology, Systematics, and Evolutionary History of the 'Apes'
BIOL BC2262	Vertebrate Biology
BIOL UN3006	PHYSIOLOGY
BIOL BC3360	Physiology
EEEB GU4200	Natural History of the Mammals

Seminar

Selection at least one of the following seminars. May also count toward the breadth requirement.

EEEB UN3204	Dynamics of Human Evolution
EEEB UN3910	The Neandertals
EEEB UN3940	Current Controversies in Primate Behavior and Ecology
ANTH UN3970	Biological Basis of Human Variation
EEEB UN3993 - EEBB UN3994	EBHS Senior Seminar and EBHS SENIOR THESIS SEMINAR
EEEB GU4321	Human Nature: DNA, Race & Identity
ANTH GU4002	Controversial Topics in Human Evolution (Fulfills the seminar requirement for the major)

Additional courses in the student's area of focus to complete the required 36 points overall including a minimum of 20 points of approved biological anthropology courses.

Students intending to pursue graduate study in this field should broaden their foundation by taking an introductory biology course (optimally either EEBB UN2001 Environmental Biology I: Elements to Organisms or EEBB UN2002 Environmental Biology II: Organisms to the Biosphere) or an advanced evolution course, a genetics course, and a statistics course.

We recommend that those interested in either biological anthropology or bioarchaeology take a foundation cultural anthropology course such as ANTH UN1002 The Interpretation of Culture, ANTH UN2004 INTRO TO SOC # CULTURAL THEORY, ANTH UN2005 THE ETHNOGRAPHIC IMAGINATION, or ANTH UN3040 Anthropological Theory I. Students interested in forensic anthropology should take chemistry in lieu of of biology (though the latter is recommended as a foundation course for all students). The adviser makes additional recommendations dependent on the student's area of focus.

Approved Biological Anthropology Courses

Paleoanthropology and Morphology

EEEB UN1010	Human Origins and Evolution
EEEB UN3204	Dynamics of Human Evolution
EEEB UN3208	Explorations in Primate Anatomy
EEEB UN3215	Forensic Osteology

EEEB UN3220	The Evolution of Human Growth and Development
EEEB UN3910	The Neandertals
ANTH GU4147 - ANTH GU4148	Human Skeletal Biology I and The Human Skeletal Biology II
ANTH GU4200	Fossil Evidence of Human Evolution <small>taught intermittently</small>
Primate Behavioral Ecology and Evolution	
EEEB UN1011	Behavioral Biology of the Living Primates
EEEB UN3030	The Biology, Systematics, and Evolutionary History of the 'Apes'
EEEB UN3940	Current Controversies in Primate Behavior and Ecology
EEEB GU4010	The Evolutionary Basis of Human Behavior
Human Variation	
ANTH UN3970	Biological Basis of Human Variation
EEEB GU4340	Human Adaptation
EEEB GU4700	Race: The Tangled History of a Biological Concept
Additional Courses	
EEEB UN3240	Challenges and Strategies of Primate Conservation
EEEB UN3993 - EEEB UN3994	EBHS Senior Seminar and EBHS SENIOR THESIS SEMINAR

CONCENTRATION IN ENVIRONMENTAL BIOLOGY

The concentration in environmental biology differs from the major in omitting calculus and physics from the lower division, requiring three advanced electives rather than five, and omitting the senior seminar with thesis project. It requires 36 points, distributed as follows:

Lower Division Courses

Two terms of introductory or environmental biology such as the following:

EEEB UN2001 - EEEB UN2002	Environmental Biology I: Elements to Organisms and Environmental Biology II: Organisms to the Biosphere (or equivalents)
------------------------------	--

Two terms of environmental science such as the following:

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

Two terms of chemistry such as the following:

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
One term of statistics. Select one of the following:	
EEEB UN3005	Introduction to Statistics for Ecology and Evolutionary Biology
BIOL BC2286	Statistics and Research Design
STAT UN1101	Introduction to Statistics
STAT UN1201	Calculus-Based Introduction to Statistics

Upper Division Courses

EEEB UN3087	Conservation Biology
Two other 3000- or 4000- level courses from the advanced environmental biology courses listed for the major.	

CONCENTRATION IN EVOLUTIONARY BIOLOGY OF THE HUMAN SPECIES

The concentration in evolutionary biology of the human species requires 20 points including the required introductory courses EEEB UN1010 Human Origins and Evolution, EEEB UN1011 Behavioral Biology of the Living Primates, an approved conservation course (optimally Primate Conservation) , and three courses for the breadth distribution requirements as described for the major. Students must take a minimum of 15 points from approved biological anthropology courses as described for the major (the two introductory classes count toward that total). The additional courses may be taken in other departments with adviser approval.

Concentrators do not have to complete the theoretical foundation course from archaeology or a seminar.

SPECIAL CONCENTRATION IN ENVIRONMENTAL SCIENCE FOR ENVIRONMENTAL BIOLOGY MAJORS

The Department of Earth and Environmental Sciences sponsors a special concentration which must be done in conjunction with the environmental biology major. Students should be aware that they must complete the environmental biology major in order to receive credit for the special concentration.

The special concentration in environmental science requires a minimum of 31.5 points, distributed as follows:

Introductory Environmental Science (13.5 points)

EESC UN2100	Earth's Environmental Systems: The Climate System
-------------	---

EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System (equivalent to EEEB UN2002)

Introductory Science (6 points)

Two courses in chemistry, physics, mathematics, or environmental biology from the supporting mathematics and science list for the environmental science major.

Advanced Environmental Science (12 points)

Select four of the following:

EESC UN3015	The Earth's Carbon Cycle
EESC BC3017	Environmental Data Analysis
EESC BC3025	Hydrology
EESC GU4008	Introduction to Atmospheric Science
EESC GU4050	Global Assessment and Monitoring Using Remote Sensing
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4550	Plant Ecophysiology
EESC GU4835	Wetlands and Climate Change
EESC GU4885	The Chemistry of Continental Waters
EESC GU4917	Earth/Human Interactions
EESC GU4926	Principles of Chemical Oceanography

Advanced courses used to fulfill requirements in the environmental biology major cannot count toward requirements for the special concentration.

SPECIAL CONCENTRATION IN ENVIRONMENTAL BIOLOGY FOR ENVIRONMENTAL SCIENCE MAJORS

The Department of Ecology, Evolution, and Environmental Biology sponsors a special concentration which must be done in conjunction with the environmental science major. Students should be aware that they must complete the environmental science major in order to receive credit for the special concentration.

The special concentration in environmental biology requires a minimum of 39 points, distributed as follows:

Introductory Environmental Biology and Environmental Science (17 points)

EEEB UN2001	Environmental Biology I: Elements to Organisms
EEEB UN2002	Environmental Biology II: Organisms to the Biosphere (equivalent to EESC UN2300)

EESC UN2100	Earth's Environmental Systems: The Climate System
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

Introductory Science (13 points)

Select one of the following chemistry sequences:

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
CHEM UN1604 - CHEM UN2507	2ND TERM GEN CHEM (INTENSIVE) and Intensive General Chemistry Laboratory

One term of statistics such as the following:

EEEB UN3005	Introduction to Statistics for Ecology and Evolutionary Biology
BIOL BC2286	Statistics and Research Design
STAT UN1101	Introduction to Statistics
STAT UN1201	Calculus-Based Introduction to Statistics
EEEB UN3087	Conservation Biology

Advanced Environmental Biology (9 points)

Three additional advanced environmental biology courses (3000-level and above), each chosen from a different curricular area (evolution/genetics, ecology/behavior/conservation, anatomy/physiology/diversity, biology laboratory courses).

FALL 2020

EEEB UN1010 Human Origins and Evolution. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Lab fee: \$25. Taught every fall.

This is an introductory course in human evolution. Building on a foundation of evolutionary theory, students explore primate behavioral morphology and then trace the last 65 million years of primate evolution from the earliest Paleocene forms to the fossil remains of earliest humans and human relatives. Along with Behavioral Biology of the Living Primates this serves as a core required class for the EBHS program.

Fall 2020: EEEB UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 1010	001/13955	M W 11:40am - 12:55pm Online Only	Jill Shapiro	3	73/86

EEEB UN2001 Environmental Biology I: Elements to Organisms. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Introductory biology course for majors in biology or environmental biology, emphasizing the ecological and evolutionary context of modern biology.

Fall 2020: EEEB UN2001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 2001	001/13960	M W 1:10pm - 2:25pm Online Only	Shahid Naeem, Andres Bendesky	3	41/60

EEEEB UN3005 Introduction to Statistics for Ecology and Evolutionary Biology. 3 points.

Prerequisites: some background in ecology, evolutionary biology, and/or statistics is recommended.

An introduction to the theoretical principles and practical application of statistical methods in ecology and evolutionary biology. The course will cover the conceptual basis for a range of statistical techniques through a series of lectures using examples from the primary literature. The application of these techniques will be taught through the use of statistical software in computer-based laboratory sessions.

Fall 2020: EEEB UN3005

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 3005	001/13961	M 6:10pm - 7:25pm Online Only	Steffen Foerster	3	29/35

EEEEB UN3010 Molecular Ecology and Evolution. 3.00 points.

Molecular ecology is an exciting young field that takes advantage of the quick development of molecular techniques (especially nucleic acid sequencing), as well as advances in theoretical and statistical modelling, to address questions in ecology and evolutionary biology. This course will introduce key concepts and theory underlying molecular ecology and provide an overview of how molecular tools can be used to investigate research questions related to population genetics, phylogeography, behavioral ecology, conservation genetics, forensics, resource management, adaptation, and speciation

EEEEB UN3015 INTRO-STAT-ECOLGY/EVOL BIO-LAB. 0.00 points.

Required Lab for EEEB UN3005. An introduction to the theoretical principles and practical application of statistical methods in ecology and evolutionary biology. The course will cover the conceptual basis for a range of statistical techniques through a series of lectures using examples from the primary literature. The application of these techniques will be taught through the use of statistical software in computer-based laboratory sessions

Fall 2020: EEEB UN3015

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 3015	001/13962	M 7:40pm - 8:55pm Online Only	Steffen Foerster	0.00	19/30
EEEE 3015	002/13963	W 7:40pm - 8:55pm Online Only	Steffen Foerster	0.00	11/30

EEEEB UN3991 Senior Seminar. 3 points.

Open only to seniors.

Guided, independent, indepth research experience culminating in the senior essay. Weekly meetings are held to review work in progress, to share results through oral and written reports, and to consider career options for further work in this field.

Fall 2020: EEEB UN3991

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 3991	001/13964	Th 4:10pm - 6:00pm Online Only	Matthew Palmer, Suzanne Macey	3	4/35

EEEEB UN3993 EBHS Senior Seminar. 4 points.

Four points for the year-long course.

Prerequisites: the instructor's permission and senior standing as a major in The Evolutionary Biology of the Human Species (EBHS).

Year-long seminar in which senior EBHS majors develop a research project and write a senior thesis. Regular meetings are held to discuss research and writing strategies, review work in progress, and share results through oral and written reports.

Fall 2020: EEEB UN3993

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 3993	001/13965	Th 6:10pm - 8:00pm Online Only	Jill Shapiro	4	5/10

EEEEB UN3997 Independent Study. 1-3 points.

CC/GS: Partial Fulfillment of Science Requirement

Students conduct research in environmental biology under supervision of a faculty mentor. The topic and scope of the research project must be approved before the student registers for the course.

Fall 2020: EEEB UN3997

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 3997	001/14309		Matthew Palmer	1-3	2/10
EEEE 3997	002/14261		Jill Shapiro	1-3	0/10

EEEEB GU4100 FOREST ECOLOGY. 4 points.

Prerequisites: one year of college biology.

EEEEB GU4100 Forest Ecology focuses on interpreting and understanding pattern and process in forested ecosystems. These ecosystems include the assemblages of trees and the biological communities and environments in which they exist. The complex interactions among the organisms and the physical environment are a major focus of this course. The course involves lecture, literature discussion, and field laboratory components, with an emphasis on the analysis and interpretation of student-collected data. FRIDAY MEETINGS WILL RUN ALL DAY IN SEPTEMBER and OCTOBER

Fall 2020: EEEB GU4100

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4100	001/13966	T 2:10pm - 4:00pm Online Only	Matthew Palmer, Kevin Griffin	4	16/17
EEEB 4100	001/13966	F 9:00am - 10:50am Online Only	Matthew Palmer, Kevin Griffin	4	16/17

EEEB GU4140 Ornithology. 3 points.

Prerequisites: EEEB UN2001, EEEB UN2002, or equivalent. This basic ornithology class lays the foundation for more in-depth study as it presents an overview of avian evolution, ecology, and current conservation issues.

Fall 2020: EEEB GU4140

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4140	001/13971	Th 10:10am - 12:00pm Online Only	Felicity Arengo, Chad Seewagen	3	12/30

EEEB GU4201 Ecology, Behavior, and Conservation of Mammals . 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: A course in either organismal biology, evolution, ecology or permission of the instructor if G4200 was not taken. This course examines the wide ranging aspects of features of mammalian natural history, behavior and ecology, and considers the implications of these features on the conservation status of particular mammal taxa for the future. We will also explore particular conservation challenges for mammals such as bats, grazing mammals, and large carnivores in increasingly human-dominated landscapes. This course will be a combination of lecture and student led discussions related to the conservation issues facing mammals today.

Fall 2020: EEEB GU4201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4201	001/13975	Th 6:10pm - 8:00pm Online Only	Scott Silver	3	12/12

EEEB GU4260 Food, Ecology, and Globalization. 3 points.

Enrollment limited to 30.

Prerequisites: the instructor's permission.

This class examines the social, ecological, and political economic roles of what and how we eat from a global perspective.

Fall 2020: EEEB GU4260

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4260	001/13980	W 4:10pm - 6:00pm Online Only	Sharon Akabas, Eleanor	3	29/25

Sterling,
Sara Kross

EEEB GU4321 Human Nature: DNA, Race & Identity. 4 points.

The course focuses on human identity, beginning with the individual and progressing to communal and global viewpoints using a framework of perspectives from biology, genetics, medicine, psychiatry, religion and the law.

Fall 2020: EEEB GU4321

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4321	001/13983	W 2:10pm - 4:00pm Online Only	Robert Pollack, Marya Pollack	4	19/20

Spring 2021: EEEB GU4321

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4321	001/10448	W 2:10pm - 4:00pm Online Only	Robert Pollack, Marya Pollack	4	15/20

EEEB GU4350 Primate Sexuality. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (EEEB UN1010) or (EEEB UN1011)

In this course we take an integrative and comparative approach to understanding the sexual lives of primates. Focusing on mating and reproductive behavior with an explicitly evolutionary perspective, we will identify the fundamental principles of how and why selection has favored particular behaviors and morphologies in different primate species.

Fall 2020: EEEB GU4350

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4350	001/13985	T Th 11:40am - 12:55pm Online Only	Alba Lucia Morales Jimenez	3	15/20

SPRING 2021

EEEB UN1005 First Year Seminar in Ecology, Evolution and Environmental Biology. 1 point.

This course provides a brief introduction to ecology, evolution and environmental biology with an emphasis on key concepts, current research, and opportunities for undergraduates. The course is taught jointly by the faculty in the department of Ecology, Evolution and Environmental Biology (E3B), with each session covering a different aspect of research and/or teaching in the department. Students are expected to complete weekly readings and participate in discussion both in class and online.

Spring 2021: EEEB UN1005

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

EEEB 1005 001/10434 T 2:40pm - 3:55pm Jill Shapiro, 1 19/30
Online Only Matthew Palmer

EEEB UN1011 Behavioral Biology of the Living Primates. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Corequisite EEEB UN1111

Study of non-human primate behavior from the perspective of phylogeny, adaptation, physiology and anatomy, and life history. Focuses on the four main problems primates face: finding appropriate food, avoiding being eaten themselves, reproducing in the face of competition, and dealing with social partners. Along with **Human Origins & Evolution**, this serves as a core required class for the EBHS program.

Spring 2021: EEEB UN1011

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 1011	001/10435	M W 1:10pm - 2:25pm Online Only	Marina Cords	3	40/65

EEEB UN2002 Environmental Biology II: Organisms to the Biosphere. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: EEEB UN2001

Second semester of introductory biology sequence for majors in environmental biology and environmental science, emphasizing the ecological and evolutionary aspects of biology. Also intended for those interested in an introduction to the principles of ecology and evolutionary biology.

EESC UN2310 Earth's Environmental Systems: The Life System Required Lab: Sections 001, 002, 003, 004, 005. 0 points.

This three hour lab is required of all students who enroll in *EESC UN2300*. There are currently five lab sections.

Spring 2021: EESC UN2310

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 2310	001/10974	W 4:10pm - 7:00pm Online Only	Paul Olsen, 0 Matthew Palmer, Kevin Griffin	0	19/24

EESC 2310	003/11331	W 4:10pm - 7:00pm Online Only	Paul Olsen, 0 Matthew Palmer, Kevin Griffin	0	5/24
EESC 2310	004/13166	Th 4:10pm - 7:00pm Online Only	Paul Olsen, 0 Matthew Palmer, Kevin Griffin	0	16/24

EESC 2310 005/20112 Th 1:10pm - 4:00pm Paul Olsen, 0 5/24
Online Only Matthew Palmer,
Kevin Griffin

EESC 2310 006/20113 F 8:10am - 11:00am Paul Olsen, 0 8/24
Online Only Matthew Palmer,
Kevin Griffin

EEEB UN3011 Behavioral Biology of the Living Primates. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: introductory biology course in organismal biology and the instructor's permission. Corequisite EEEB UN3111

Survey of non-human primate behavior from the perspective of phylogeny, adaptation, physiology and anatomy, and life history. Focus on the four main problems primates face: finding appropriate food, avoid being eaten themselves, reproducing in the face of competition, and dealing with social partners.

Spring 2021: EEEB UN3011

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3011	001/10437	M W 1:10pm - 2:25pm Online Only	Marina Cords	3	6/10

EEEB UN3220 The Evolution of Human Growth and Development. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Taught intermittently. **Not offered during 2020-21 academic year.**

Prerequisites: EEEB UN1010 or ANTH UN1007 or the instructor's permission.

This course explores central issues in human growth and development from birth through senescence. Emphasis will be placed on the factors responsible for the variability in current human growth patterns as well as the evolutionary divergence of a uniquely human pattern from our closest living and fossil relatives.

Spring 2021: EEEB UN3220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3220	001/10438	T Th 11:40am - 12:55pm Online Only	Jessica Manser	3	11/13

EEEB UN3250 THEORY # METHOD IN BIOL ANTHRO. 4.00 points.

In this course, we examine the process of doing scientific research. Using topics selected from the three main foci of biological anthropology – paleoanthropology, primate behavioral biology, and human variation/adaptation – we will explore the process of developing research questions and the different methods used to investigate them. Through structured discussion and critical analysis of primary literature, you will

move beyond learning the facts of biological anthropology to critically interpreting studies and actively developing research

Spring 2021: EEEB UN3250

EEEB 3250	001/13664	Th 4:10pm - 6:00pm Online Only	James Fuller	4.00	8/12

EEEB UN3992 Senior Seminar. 3 points.

Open only to seniors.

Guided, independent, indepth research experience culminating in the senior essay. Weekly meetings are held to review work in progress, to share results through oral and written reports, and to consider career options for further work in this field.

Spring 2021: EEEB UN3992

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3992	001/10440	Th 4:10pm - 6:00pm Online Only	Matthew Palmer, Suzanne Macey	3	13/18

EEEB UN3994 EBHS SENIOR THESIS SEMINAR.

1.00-3.00 points.

Prerequisites: the instructors permission and senior standing as a major in The Evolutionary Biology of the Human Species (EBHS). Year-long seminar in which senior EBHS majors develop a research project and write a senior thesis. Regular meetings are held to discuss research and writing strategies, review work in progress, and share results through oral and written reports

Spring 2021: EEEB UN3994

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3994	001/10441	Th 6:10pm - 8:00pm Online Only	Jill Shapiro	1.00-3.00/8	

EEEB UN3998 Independent Study. 1-3 points.

CC/GS: Partial Fulfillment of Science Requirement

Students conduct research in environmental biology under supervision of a faculty mentor. The topic and scope of the research project must be approved before the student registers for the course.

Spring 2021: EEEB UN3998

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3998	001/17329		Matthew Palmer	1-3	2/10
EEEB 3998	002/17330		Jill Shapiro	1-3	0/10
EEEB 3998	003/17331		Kevin Griffin	1-3	1/5

Summer 2021: EEEB UN3998

EEEB 3998	001/11503		Jessica Manser	1-3	1/2

EEEB GU4050 Programming and Data Science Skills for Biologists. 3 points.

Prerequisites: One year of introductory biology or permission from the instructor

Programming and Data Science Skills for Biologists will introduce students to computational tools and concepts that are fundamental to working with large biological datasets. This will include learning core principles of a common programming language (Python, R), in addition to tools for collaboration and version control (git, github), reproducible science (jupyter, rstudio), accessing large databases (HDF5, dask), and manipulating and visualizing data. Programmatic approaches are commonly used in biology but few biologists receive formal training in applying programming languages to these tasks. This course offers a deeper understanding of computational techniques and algorithms as they apply to real biological datasets, with particular attention to genomic, spatial, and network analyses.

Spring 2021: EEEB GU4050

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4050	001/10442	M W 1:10pm - 2:25pm Online Only	Deren Eaton	3	17/21

EEEB GU4086 Ethnobotany: the Study of People and Plants. 3 points.

Priority given to students with backgrounds in ecology or plant systematics.

A survey of the relationships between people and plants in a variety of cultural settings. Sustainability of resource use, human nutrition, intellectual property rights, and field methodologies are investigated.

Spring 2021: EEEB GU4086

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4086	001/10443	W 2:10pm - 4:00pm Online Only	Michael Balick, Alex McAlvay	3	23/25

EEEB GU4150 Theoretical Ecology. 3 points.

Prerequisites: Calculus, Introductory Biology.

This course will provide an introduction to theoretical ecology. Topics will include population, community, ecosystem, disease, and evolutionary ecology. Lectures will cover classic and current concepts and mathematical approaches. The numerical analysis laboratory will cover computational tools for numerical and graphical analysis of the models we cover in lecture, using MATLAB. By the end of the course, students will be well versed in the basics of theretical ecology and will be able to read theoretical ecology literature, analyze and simulate mathematical models, and construct and analyze their own simple models.

Spring 2021: EEEB GU4150

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4150	001/10444	M W 10:10am - 11:25am Online Only	Duncan Menge	3	6/25

EEEB GU4192 INTRO TO LANDSCAPE ANALYSIS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *SDEV W3390* or *EESC W4050* or the instructor's permission.

Changes in land use and land cover underlie multiple environmental and sustainability concerns, including conservation of biodiversity, impacts of climate change, climate mitigation through terrestrial carbon storage, urbanization and watershed protection. This class provides basic theory in landscape analysis and training in methods for analyzing landscapes, focusing on interpretation of satellite images. The class covers approaches and definitions in landscape analysis, data sources, land cover classification, change detection, accuracy assessment, and techniques to interpret results of these analyses. Students will obtain hands-on experience working with data from a landscape related to his/her research or a landscape chosen by the instructors. The course will consist of one lecture a week and one lab session to implement the methods discussed in lecture. Students will become proficient in using Google Earth Engine as a platform for image analysis

Spring 2021: EEEB GU4192

EEEB GU4195 Marine Conservation Ecology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: EEEB GR6110, EEEB GR6112, or EEEB GR6990, basic statistics, or the instructor's permission. This course provides an overview of marine ecology, introducing processes and systems from which the marine environment is formed and the issues and challenges which surround its future conservation. Coursework will be evaluated using debates, oral presentations and more traditional metrics. Topics to be covered include fisheries, invasive species, habitat alteration, climate change. While we will focus on general threats there will be special emphasis placed on coral reef ecosystems.

Spring 2021: EEEB GU4195

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

EEEB GU4210 Herpetology. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: at least one course in Introductory Biology.

The course explores the science of herpetology in three parts:

- 1) the evolution and ecology of amphibians and reptiles;
- 2) their physiological adaptations; and 3) requirements for conservation, management, policy and monitoring.

Spring 2021: EEEB GU4210

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4210	001/10447	M W 10:10am - 11:25am Online Only	Matthew Palmer	3	12/20

EEEB GU4321 Human Nature: DNA, Race & Identity. 4 points.

The course focuses on human identity, beginning with the individual and progressing to communal and global viewpoints using a framework of perspectives from biology, genetics, medicine, psychiatry, religion and the law.

Fall 2020: EEEB GU4321

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

EEEB GU4655 Biodiversity Conservation and Social Change. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Environmental programs worldwide are fraught with disputes between groups of people over natural resources. Such conflict can be highly complex, may undermine or deter environmental conservation efforts, and may even foster violence. These conflicts often involve disagreements between different human parties that are divided by culture, social values, and perceptions about the ethics and appropriateness of how resources should be allocated or used. Combining specific case studies, ecological and social theory, and a complex systems approach, this course will enhance the proficiency of participants to understand, study, and manage natural resource-based conflicts. The course is designed for conservation scientists, environmental policymakers, rural development specialists, political ecologists, and conflict/peace workers.

Spring 2021: EEEB GU4655

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4655	001/14431	M W 4:10pm - 5:25pm Online Only	Alexandria Moore	3	10/15

EEEB GU4670 Introduction to Geographical Information Systems. 3.00 points.

Geographic information systems (GIS) are powerful tools for analyzing fundamental geographic questions. GIS involves generating, linking, manipulating, and analyzing different sorts of spatial data; creating outputs commonly visualized as two- and sometimes three- dimensional maps. This course will cover major topics in GIS with applications for the broad field of biology and natural sciences, using QGIS and R. The goal of this course is to teach students a level of GIS proficiency such that they will be self-sufficient in their further learning and use of GIS

Spring 2021: EEEB GU4670

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4670	001/14432	M 6:10pm - 8:00pm Online Only	Peter Galante	3.00	13/15

EEEB GU4700 Race: The Tangled History of a Biological Concept. 4 points.

Enrollment limited to 15. Priority given to EBHS majors/concentrators. **Not offered during 2020-21 academic year.**

From Aristotle to the 2020 US census, this course examines the history of race as a biological concept. It explores the complex relationship between the scientific study of biological differences-real, imagined, or invented and the historical and cultural factors involved in the development and expression of "racial ideas." Scientific background not required. [Additional hour for film screenings weekly in second half of the semester--attendance at films is mandatory.] Please note that this course DOES NOT fulfill the SC requirement at the College or GS.

Spring 2021: EEEB GU4700

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4700	001/10450	M W 4:10pm - 6:00pm Online Only	Jill Shapiro	4	13/12

COURSES TYPICALLY OFFERED, BUT NOT IN ACADEMIC YEAR 2020-2021

EEEB UN1001 Biodiversity. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

In this course we will use genetics, evolutionary biology, and ecology to address three simple questions: What is biological diversity? Where can we find it? How can we conserve it? No previous knowledge of science or mathematics is assumed.

EEEB UN1005 First Year Seminar in Ecology, Evolution and Environmental Biology. 1 point.

This course provides a brief introduction to ecology, evolution and environmental biology with an emphasis on key concepts, current research, and opportunities for undergraduates. The course is taught jointly by the faculty in the department of Ecology, Evolution and Environmental Biology (E3B), with each session covering a different aspect of research and/or

teaching in the department. Students are expected to complete weekly readings and participate in discussion both in class and online.

Spring 2021: EEEB UN1005

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 1005	001/10434	T 2:40pm - 3:55pm Online Only	Jill Shapiro, 1 Matthew Palmer		19/30

EEEB UN1011 Behavioral Biology of the Living Primates. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Corequisite EEEB UN1111

Study of non-human primate behavior from the perspective of phylogeny, adaptation, physiology and anatomy, and life history. Focuses on the four main problems primates face: finding appropriate food, avoiding being eaten themselves, reproducing in the face of competition, and dealing with social partners. Along with **Human Origins & Evolution**, this serves as a core required class for the EBHS program.

Spring 2021: EEEB UN1011

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 1011	001/10435	M W 1:10pm - 2:25pm Online Only	Marina Cords	3	40/65

EEEB UN2002 Environmental Biology II: Organisms to the Biosphere. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: EEEB UN2001

Second semester of introductory biology sequence for majors in environmental biology and environmental science, emphasizing the ecological and evolutionary aspects of biology. Also intended for those interested in an introduction to the principles of ecology and evolutionary biology.

EEEB UN3001 The Saga of Life. 4 points.

E3B's mission is to educate a new generation of scientists and practitioners in the theory and methods of ecology, evolution, and environmental biology. Our educational programs emphasize a multidisciplinary perspective to understand life on Earth from the level of organisms to global processes that sustain humanity and all life.

EEEB UN3011 Behavioral Biology of the Living Primates. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: introductory biology course in organismal biology and the instructor's permission. Corequisite EEEB UN3111

Survey of non-human primate behavior from the perspective of phylogeny, adaptation, physiology and anatomy, and life history. Focus on the four main problems primates face: finding

appropriate food, avoid being eaten themselves, reproducing in the face of competition, and dealing with social partners.

Spring 2021: EEEB UN3011

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3011	001/10437	M W 1:10pm - 2:25pm Online Only	Marina Cords	3	6/10

EEEB UN3087 Conservation Biology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: introductory organismal biology course, ideally EEEB UN2002.

Applications of biological principles to the conservation of biodiversity. Because conservation biology is a cross-disciplinary field, some of the social, philosophical, and economic dimensions of biological conservation are also addressed.

EEEB UN3204 Dynamics of Human Evolution. 4 points.

CC/GS: Partial Fulfillment of Science Requirement
Enrollment limited to 13. Priority is given to EBHS majors/concentrators.

Prerequisites: EEEB UN1010 Human Species/HO&E, ANTH UN1007 Origins of Human Society, or the equivalent.

Seminar focusing on recent advances in the study of human evolution. Topics include changing views of human evolution with respect to early hominin behavior, morphology, culture and evolution. [Either Dynamics of Human Evolution or Neandertals is taught every other year.]

EEEB UN3208 Explorations in Primate Anatomy. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Taught every other year. Enrollment limited to 14. **Not offered during 2020-21 academic year.**

Prerequisites: EEEB UN1010 or EEEB UN1011 or the instructor's permission.

Introductory laboratory course in primate skeletal anatomy. From tarsiers to talapoin, guenons to gibbons, through hands-on expertise students explore the amazing range and diversity of the living members of this order.

EEEB UN3215 Forensic Osteology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Taught every other year. Enrollment limited to 15. Priority given at first class session to EBHS majors/concentrators.

Prerequisites: no prior experience with skeletal anatomy required. Not appropriate for students who have already taken either EEEB GU4147 or EEEB GU4148.

An exploration of the hidden clues in your skeleton. Students learn the techniques of aging, sexing, assessing ancestry, and the effects of disease, trauma and culture on human bone.

EEEB UN3220 The Evolution of Human Growth and Development. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Taught intermittently. **Not offered during 2020-21 academic year.**

Prerequisites: EEEB UN1010 or ANTH UN1007 or the instructor's permission.

This course explores central issues in human growth and development from birth through senescence. Emphasis will be placed on the factors responsible for the variability in current human growth patterns as well as the evolutionary divergence of a uniquely human pattern from our closest living and fossil relatives.

Spring 2021: EEEB UN3220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3220	001/10438	T Th 11:40am - 12:55pm Online Only	Jessica Manser	3	11/13

EEEB UN3240 Challenges and Strategies of Primate Conservation. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Enrollment limited to 20. Priority given to EBHS students.

Prerequisites: EEEB UN1010 or EEEB UN1011 or the instructor's permission.

Throughout their range, numerous primate species are on the brink of extinction. This course examines the central issues relating to conservation of wild primates and explores strategies and solutions for preserving these endangered populations. Through the analysis of the ecological and social traits linked to vulnerability and the direct and indirect threats from human activities, students will gain a practical understanding of how to develop successful, sustainable, and practical conservation strategies.

EEEB UN3030 The Biology, Systematics, and Evolutionary History of the 'Apes'. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Usually taught every other year. Enrollment limited to 25. **Not offered during 2020-21 academic year.**

Prerequisites: open to undergraduates who have had EEEB UN1010, EEEB UN1011, or the equivalent. Other students who are interested should speak with the instructor.

This course focuses on our closest relatives, the extant apes of Africa and Asia. We will explore the nature and extent of the morphological, genetic, and behavioral variability within and among these forms. Using this framework, we will then analyze questions of systematics and trace the evolutionary development of the hominoids during the Miocene, the epoch that saw the last common ancestor of today's gibbons, orang utans, gorillas, chimpanzees and humans. Timing note: The course meets for 2 hours twice a week. Films are screened during the last 30 minute of each class and students must be able to stay for the entire time if they want to take the class.

EEEB UN3910 The Neandertals. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Offered every other year/rotating with Dynamics of Human Evolution. Enrollment limited to 13. Priority given at first class session to EBHS majors/concentrators. **Not offered during 2020-21 academic year.**

Prerequisites: EEEB UN1010 Human Species or ANTH UN1007.

One hundred and fifty years after discovery Neandertals remain one of the most enigmatic hominin taxa. What do we understand today about their biology, subsistence, culture, cognitive abilities and eventual fate? Are they simply extinct relatives or do their genes continue in many of us today? In this seminar students critically examine the primary research as we attempt to find answers to some of these questions.

EEEB UN3919 Trading Nature: A Conservation Biology Perspective. 4 points.

This course explores the scientific and theoretical conceptualization of nature as a market commodity, through the lens of conservation biology. Students will engage in critical analysis of the 'traditional' forms in which biodiversity has been appropriated as inputs into markets such as fisheries, resource extraction, bushmeat and medicine, as well as new market environmentalism.

EEEB OC3920 Biology of African Animals and Ecosystems. 4 points.

Course consists of 6 separate modules, offered in rotation of four, each worth 4 points. **Not offered during 2020-21 academic year.**

Prerequisites: EEEB W2001 and EEEB W2002 Environmental Biology I and II, or the instructor's permission.

This course offers a small group of students the unique opportunity to study the ecology, evolution, and behavior of African animals and ecosystems in one of the world's most biologically spectacular settings, the wildlife-rich savannas of Kenya. In addition to gaining sophisticated training in fieldwork, hypothesis-driven biological research, statistics, and scientific writing and presentation, the course gives participants many opportunities to observe and study a diversity of plants, animals and their interactions. Lectures include core topics in ecology and evolution with emphasis on the African animals and ecosystems that students will see in Kenya. **This course is part of a semester abroad program in Tropical Biology and Sustainability based in Kenya and cannot be taken separately on campus.**

EEEB OC3921 Agriculture and the Environment. 4 points.

Course consists of 6 separate modules, offered in rotation of four, each worth 4 points.

Prerequisites: EEEB W2001 and EEEB W2002 Environmental Biology I and II, or the instructor's permission.

Students will compare productivity, diversity, and ecological processes in the diverse farming systems of Kenya which include highland and lowland, large and small-scale systems, monoculture cereal crops, mixed farming with crops and

livestock, pastoral systems, diverse tree crop systems from plantations to multispecies agroforests, and intensive horticulture. Students spend their time in Kenya learning state of the art techniques for characterizing soils, agricultural landscapes, and ecosystem services. They will use these methods across the range of farming systems to develop projects comparing various aspects of these systems, and explore sustainability issues from the ecological, agricultural, and livelihood disciplines. **This course is part of a semester abroad program in Tropical Biology and Sustainability based in Kenya and cannot be taken separately on campus.**

EEEB OC3922 Water, Energy and Ecosystems. 4 points.

Course consists of 6 separate modules, offered in rotation of four, each worth 4 points. **Not offered during 2020-21 academic year.**

Prerequisites: EEEB W2001 and EEEB W2002 Environmental Biology I and II, or the instructor's permission.

The course will provide an introduction to the principles of hydrological sciences and their application to ecological sciences, with a focus on instrumentation methods for characterizing surface, subsurface, and biological hydrological dynamics in field settings. Lectures and field activities will address the theories of operation, design, and implementation of methods used to quantify hydrological patterns and processes with particular emphasis on characterizing the biological signature and ecological impact of landscape hydrological dynamics. Emphasis will be placed on applications of hydrological science to issues of sustainable landscape use, water resource conservation, and prevention/reversal of land degradation in dryland ecosystems. **This course is part of a semester abroad program in Tropical Biology and Sustainability based in Kenya and cannot be taken separately on campus.**

EEEB OC3923 Savanna Ecology and Conservation. 4 points.

Course consists of 6 separate modules, offered in rotation of four, each worth 4 points.

Prerequisites: EEEB W2001 and EEEB W2002 Environmental Biology I and II, or the instructor's permission.

Only six percent of Africa's land is protected, and these areas are rarely large enough to sustain wildlife populations. Mostly, wildlife must share land with people who also face survival challenges. This course will explore how wildlife and people interact in Kenya, where new approaches to conservation are being developed and implemented. Lectures will cover the ecology of tropical grasslands and first principles underlying conservation and management of these landscapes. Field trips and projects will examine the dynamics between human actions and biodiversity conservation. **This course is part of the study abroad program in Kenya on Tropical Biology and Sustainability and cannot be taken separately on campus.**

EEEB OC3924 Natural History of African Mammals. 4 points.

Course consists of 6 separate modules, offered in rotation of four, each worth 4 points.

Prerequisites: *EEEB W2001* and *EEEB W2002* Environmental Biology I and II, or the instructor's permission.
Introduction to concepts, methods, and material of comparative natural history, with African mammals as focal organisms. Perspectives include morphology, identification, evolution, ecology, behavior and conservation. Observations and experiments on a variety of species in different habitats and at a range of scales will provide insights into the adaptive value and underlying mechanistic function of mammalian adaptations. This course is based in Laikipia, but may travel to other sites across Kenya, which might include other conservancies and pastoral group ranches. **This course is part of a semester abroad program in Tropical Biology and Sustainability based in Kenya and cannot be taken separately on campus.**

EEEB OC3925 Sustainable Development in Practice. 4 points.

Course consists of 6 separate modules, offered in rotation of four, each worth 4 points.

Prerequisites: *EEEB W2001* and *EEEB W2002* Environmental Biology I and II, or the instructor's permission.
Students will study the theory and practical application of sustainable development, touching on urban and rural issues in Kenya and other diverse agro-ecological zones in East Africa. They will begin at the Columbia Global Centers/Africa in Nairobi by learning about the administrative and socio-political structures that govern Kenya and East Africa followed by an immersion in the history of the United Nation's Millennium Development Goals (MDGs). Students will then spend time studying agriculture, education, infrastructure, water, and health issues in other urban and rural areas in Kenya and East Africa to understand the need for an integrated approach to sustainable development. Discussions with communities, field work, practical problem solving, GIS tools, e-tools, modeling, and understanding of the local constraints will form the foundation for this course. **This course is part of a semester abroad program in Tropical Biology and Sustainability based in Kenya and cannot be taken separately on campus.**

EEEB OC3928 Terrestrial Paleoecology. 4 points.

Prerequisites: (EEEB UN2001) and EEEB UN2002) or permission from instructor

Terrestrial paleoecology is the study of vegetation and animals in ancient ecosystems. The paleoecology of eastern Africa is significant because it can shed light on the potential role that climate played in human evolution. This course aims to teach students the principles of paleoecology primarily through fieldwork, lab work, and research projects. In the first half of the course, students will be introduced to basic methods in the modern Mpala ecosystem. In the second, they will explore the rich record of human evolution in the Turkana Basin. Students

will study bones, teeth, plants, or soils to reconstruct modern and ancient ecosystems.

EEEB UN3940 Current Controversies in Primate Behavior and Ecology. 4 points.

CC/GS: Partial Fulfillment of Science Requirement
Taught every two years. Enrollment limited to 15.

Prerequisites: EEEB UN1011 or the equivalent.
Critical in-depth evaluation of selected issues in primate socioecology, including adaptationism, sociality, sexual competition, communication, kinship, dominance, cognition, and politics. Emphasizes readings from original literature.

EEEB UN3994 EBHS SENIOR THESIS SEMINAR. 1.00-3.00 points.

Prerequisites: the instructors permission and senior standing as a major in The Evolutionary Biology of the Human Species (EBHS). Year-long seminar in which senior EBHS majors develop a research project and write a senior thesis. Regular meetings are held to discuss research and writing strategies, review work in progress, and share results through oral and written reports

Spring 2021: EEEB UN3994

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3994	001/10441	Th 6:10pm - 8:00pm Online Only	Jill Shapiro	1.00-3.00/8	

EEEB UN3998 Independent Study. 1-3 points.

CC/GS: Partial Fulfillment of Science Requirement

Students conduct research in environmental biology under supervision of a faculty mentor. The topic and scope of the research project must be approved before the student registers for the course.

Spring 2021: EEEB UN3998

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3998	001/17329		Matthew Palmer	1-3	2/10
EEEB 3998	002/17330		Jill Shapiro	1-3	0/10
EEEB 3998	003/17331		Kevin Griffin	1-3	1/5

Summer 2021: EEEB UN3998

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3998	001/11503		Jessica Manser	1-3	1/2

EEEB GU4001 Society and Nature in the Amazon. 4 points.

The Amazon Basin is one of the largest equatorial forests on earth. Far from being an untouched bioma the Amazon has a rich and instigating sociobiodiversity that can be apprehended in its uniqueness since pre-colombian times. History, culture, politics correlated with hydrology, climate and ecology are elements for the understanding of contemporary dynamics in the Amazon. The course aims towards an interdisciplinary approach of the Amazon as a unique ecosystem in Latin America which reflects a myriad of questions crucial for the

understanding not only of South America but of nature and society in modern times.

EEEB GU4010 The Evolutionary Basis of Human Behavior. 3 points.

CC/GS: Partial Fulfillment of Science Requirement
Offered intermittently.

Prerequisites: introductory course in evolutionary biology, e.g., EEEB UN1010, EEEB UN1011 or EEEB UN2001, or the instructor's permission.

This course addresses the role of evolution in contemporary human social behavior, including such topics as kin selection, sexual selection, parenting, altruism, and conflict. Populations explored will include both industrialized and traditional societies, with an emphasis on the interaction between evolutionarily-influenced behavior and the local ecological context.

EEEB GU4110 Coastal and Estuarine Ecology. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Environmental Biology I or the equivalent.
Environments close to shore are hugely ecologically important, not least in terms of their contributions to biodiversity, primary and secondary productivity. Coastal and Estuarine Ecology introduces students to a range of nearshore habitats and biota, the processes that operate in these environments, and potential threats through, for example, habitat destruction and alteration, overfishing, and climate change. Field research makes up a large component of the course and its assessment, with students given the opportunity to build proficiency in field observation and enquiry through either several short field trips or a week-long trip to a dedicated marine station. The specific structure of the trip(s) will be determined during the fall, with more details and regular updates listed on the Courseworks site. Please note: occasional field trips on Fridays and Saturdays are required for this course.

EEEB GU4115 Historical Ecology. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *EEEB W2001* and *EEEB W2002* or the equivalent.

This will be an interdisciplinary course that seeks to understand how modern ecosystems have been altered over the recent past. Drawing on tools from history, archaeology, anthropology, paleontology, oceanography and ecology this class will focus on equipping students with the skills to adequately assess the factors which have influenced the present distribution and assembly of biodiversity in a particular area. We will apply these skills to understanding the historical ecology of the New York City region and beyond.

EEEB GU4126 Introduction to Conservation Genetics. 3 points.

Not offered during 2020-21 academic year.

In this course, we will use evolutionary genetic principles and population genetic models to describe the extent and distribution of genetic variation in populations and species, and determine ways to conserve it. A basic knowledge of genetics and mathematics is assumed.

EEEB GU4150 Theoretical Ecology. 3 points.

Prerequisites: Calculus, Introductory Biology.

This course will provide an introduction to theoretical ecology. Topics will include population, community, ecosystem, disease, and evolutionary ecology. Lectures will cover classic and current concepts and mathematical approaches. The numerical analysis laboratory will cover computational tools for numerical and graphical analysis of the models we cover in lecture, using MATLAB. By the end of the course, students will be well versed in the basics of theoretical ecology and will be able to read theoretical ecology literature, analyze and simulate mathematical models, and construct and analyze their own simple models.

Spring 2021: EEEB GU4150

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4150	001/10444	M W 10:10am - 11:25am Online Only	Duncan Menge	3	6/25

EEEB GU4210 Herpetology. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: at least one course in Introductory Biology.

The course explores the science of herpetology in three parts:

- 1) the evolution and ecology of amphibians and reptiles;
- 2) their physiological adaptations; and 3) requirements for conservation, management, policy and monitoring.

Spring 2021: EEEB GU4210

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4210	001/10447	M W 10:10am - 11:25am Online Only	Matthew Palmer	3	12/20

EEEB GU4645 CULTURAL & BIOLOGICAL DIVERSITY. 3 points.

Enrollment limited to 20.

Prerequisites: the instructor's permission.

Many areas of the world with high biological diversity also have high levels of linguistic diversity (a proxy for cultural diversity). These places are generally in parts of the world that have been, until quite recently, at the frontiers of resource extraction, human migration and resettlement, and capital expansion. Cultural, linguistic, and biological diversity are now imperiled by the same threats (including resource extraction, human migration and resettlement, and capital expansion). This course will explore how different fields have sought to understand and sustain the reciprocal, mutually influencing relationships between human societies and their environments. The term "biocultural diversity" – which

denotes the truism that human societies influence and are influenced by the environments of which they are a part – is relatively new (although increasingly in use). Students will be able to differentiate how different scholars and academic traditions define and apply biocultural diversity and will explore its application in biodiversity conservation and cultural revitalization through case studies.

EEEB GU4700 Race: The Tangled History of a Biological Concept. 4 points.

Enrollment limited to 15. Priority given to EBHS majors/concentrators. **Not offered during 2020-21 academic year.**

From Aristotle to the 2020 US census, this course examines the history of race as a biological concept. It explores the complex relationship between the scientific study of biological differences—real, imagined, or invented and the historical and cultural factors involved in the development and expression of "racial ideas." Scientific background not required. [Additional hour for film screenings weekly in second half of the semester—attendance at films is mandatory.] Please note that this course DOES NOT fulfill the SC requirement at the College or GS.

Spring 2021: EEEB GU4700

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4700	001/10450	M W 4:10pm - 6:00pm Online Only	Jill Shapiro	4	13/12

ECONOMICS

Departmental Office: 1022 International Affairs Building; 212-854-3680

<http://www.columbia.edu/cu/economics/>

Director of Undergraduate Studies: Dr. Susan Elmes, 1006 International Affairs Building; 212-854-9124; se5@columbia.edu

Director of Departmental Honors Program: Dr. Susan Elmes, 1006 International Affairs Building; 212-854-9124; se5@columbia.edu

Economics is the study of the ways in which society allocates its scarce resources among alternative uses and the consequences of these decisions. The areas of inquiry deal with a varied range of topics such as international trade, domestic and international financial systems, labor market analysis, and the study of less developed economies. Broadly speaking, the goal of an economics major is to train students to think analytically about social issues and, as such, provide a solid foundation for not only further study and careers in economics, but also for careers in law, public service, business, and related fields.

The Economics Department offers a general economics major in addition to five interdisciplinary majors structured to suit the interests and professional goals of a heterogeneous student body. All of these programs have different specific requirements but share the common structure of core theoretical courses that provide the foundation for higher-level elective courses culminating in a senior seminar. Students are urged to carefully look through the details of each of these programs and to contact an appropriate departmental adviser to discuss their particular interests.

ADVANCED PLACEMENT

Tests must be taken in **both** microeconomics and macroeconomics, with a score of 5 on one test and at least a 4 on the other. Provided that this is achieved, the department grants 4 credits for a score of 4 and 5 on the AP Economics exam along with exemption from *ECON UN1105 Principles of Economics*.

ADVISING

The Department of Economics offers a variety of advising resources to provide prospective and current undergraduate majors and concentrators with the information and support needed to successfully navigate through the program. These resources are described below.

Frequently Asked Questions

Please see: <http://econ.columbia.edu/frequently-asked-questions-0>

As a first step, students are encouraged to visit the department's FAQ page, which provides comprehensive information and answers to the most frequently asked questions about the departmental majors and requirements. This page also includes a section that answers specific questions of first-years, sophomores, and non-majors.

Graduate Student Advisers

For answers to the most common questions that students have about the majors, the department has graduate student advisers, who are available by e-mail at econ-advising@columbia.edu, or during weekly office hours to meet with students.

Students should direct all questions and concerns about their major to the graduate student advisers either in person or via e-mail. The graduate student advisers can discuss major requirements, scheduling, and major course selection, as well as review student checklists and discuss progress in the major. Occasionally, graduate student advisers may refer a student to someone else in the department (such as the director of undergraduate studies) or in the student's school for additional advising.

Contact information and office hours for the graduate student advisers are posted on the *Advisers* page of the [departmental website](#) in the week prior to the beginning of the semester. Students considering one of the interdepartmental majors should speak to both a graduate student adviser from the Economics Department and the adviser from the other department early in the sophomore year.

Faculty Advisers

Faculty advisers are available to discuss students' academic and career goals, both in terms of the undergraduate career and post-graduate degrees and research. Students wishing to discuss these types of substantive topics may request a faculty adviser by completing the form available on the *Advisers* page of the [departmental website](#) and depositing it in the mailbox of the director of undergraduate studies in the department's main office, 1022 International Affairs Building.

The department does its best to match students with faculty members that share similar academic interests. While faculty advisers do not discuss major requirements—that is the role of the graduate student advisers—they do provide guidance in course selection as it relates to meeting a student's intellectual goals and interests, as well as advise on career and research options. It is recommended that students who plan on attending a Ph.D. program in economics or are interested in pursuing economics research after graduation request a faculty adviser.

ON-LINE INFORMATION

Students can access useful information on-line, including: a comprehensive FAQ page; requirement changes to the major and concentration; sample programs and checklists; faculty office hours, contact information and fields of specialization; adviser information; teaching assistant information; research assistant opportunities; list of tutors; and Columbia-Barnard Economics Society information.

DEPARTMENTAL HONORS

Economics majors and economics joint majors who wish to be considered for departmental honors in economics must:

1. Have at least a 3.7 GPA in their major courses;
2. Take ECON GU4999 Senior Honors Thesis (a one-year course);
3. Receive at least a grade of A- in ECON GU4999 Senior Honors Thesis.

Students must consult and obtain the approval of the departmental undergraduate director in order to be admitted to the workshop. Please note that ECON GU4999 Senior Honors Thesis may be taken to fulfill the **seminar requirement** for the economics major and all economics joint majors. Students who wish to write a senior thesis (ECON GU4999 Senior Honors Thesis) must have completed the core major requirements. Normally no more than 10% of graduating majors receive departmental honors in a given academic year. Please see the *Honors Prizes* page on the department's website for more information.

UNDERGRADUATE PRIZES

All prize recipients are announced at the end of the spring semester each academic year.

Sanford S. Parker Prize

Established in 1980, this prize is awarded annually to a Columbia College graduating student who majored or concentrated in economics and plans on continuing his or her studies in an economics Ph.D. program within the two years following his or her graduation.

Romine Prize

Established in 1997, this prize is awarded annually to two students (Columbia College or General Studies) majoring in economics: one for the best honors thesis paper, and the other for the best economics seminar paper.

Parker Prize for Summer Research

The department provides financial support for five Columbia College undergraduates who take unpaid summer internships that focus on research.

GUIDELINES FOR ALL ECONOMICS MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Checklists and Requirement

Checklists and Requirement information are available on the [Department website](#).

Course List

Economics Core Courses

All of the core courses must be completed **no later than the spring semester** of the student's **junior year** and must be taken at Columbia. *Students who take any core course during the fall semester of their senior year must obtain written permission from the department's director of undergraduate studies.* Unless otherwise specified below, all students must complete the following core courses:

ECON UN1105	Principles of Economics
ECON UN3211	Intermediate Microeconomics
ECON UN3213	Intermediate Macroeconomics
ECON UN3412	Introduction To Econometrics

Prerequisites

Course prerequisites are strictly enforced. Prerequisites must be taken before the course, not after or concurrently.

Economics courses taken before the completion of any of its prerequisites, even with instructor approval, are **not** counted toward the major, concentration, or interdepartmental majors. Exemptions from a prerequisite requirement may only be made, in writing, by the department's director of undergraduate studies. Credits from a course taken *prior* to the completion of its prerequisites are **not** counted towards the major requirements. As a consequence, students are required to complete **additional**, specific courses in economics at the direction of the director of undergraduate studies.

The prerequisites for required courses are as follows:

Course	Prerequisites
ECON UN1105 Principles of Economics	None

ECPH GU4950 Economics and Philosophy Seminar	ECON UN3211 Intermediate Microeconomics ECON UN3213 Intermediate Macroeconomics ECON UN3412 Introduction To Econometrics
Barnard electives	See Barnard bulletin

It is **strongly recommended** that students take ECON UN3412 Introduction To Econometrics in the semester **immediately** following the completion of the statistics course.

Grading

No course with a grade of D or lower, including calculus and statistics courses, can count toward the major, concentration, or interdepartmental majors. Economics core courses with a grade of D or F must be retaken and completed with a grade of C- or better.

Students who receive a grade of D or F in a core course are permitted to take a higher-level elective course that has that core course as a prerequisite, so long as it is taken concurrently with the retaking of that core course. For example, if a student fails ECON UN3211 Intermediate Microeconomics, the student must retake it and, in the same semester, may enroll in an elective course for which it is a prerequisite, provided that all other prerequisites for the elective have been completed. The same rule applies to the required math and statistics courses. For example, if a student fails *MATH UN1201 Calculus III*, the student may retake calculus III concurrently with *Intermediate Microeconomics*. Students who must retake any core economics or math course may not retake it concurrently with a senior seminar; the economics core courses *ECON UN3211 Intermediate Microeconomics*, *ECON UN3213 Intermediate Macroeconomics*, and *ECON UN3412 Introduction To Econometrics* must be successfully completed before a student may enroll in a seminar.

A grade of W is not equivalent to a grade of D or F; it does not qualify a student to retake the course concurrently with a higher level course that lists the course as a prerequisite. Students who receive a grade of W in a core course must complete the course with a grade of C- or better before taking a course that lists it as a prerequisite.

Only ECON UN1105 Principles of Economics may be taken for a grade of Pass/D/Fail, and the student must receive a grade of P for it to count towards the requirements for the major, concentration, or interdepartmental majors.

Economics Electives

Only those courses identified in the Economics Department listings in this Bulletin may be taken for elective credit. All 3000-level or higher electives offered by the Economics Department have ECON UN3211 Intermediate Microeconomics and ECON UN3213 Intermediate Macroeconomics as prerequisites. However, some electives

have additional prerequisites and students should ensure that all prerequisites have been completed (see the table of prerequisites printed above). *Seminars do not count as electives.*

Seminars

Seminars can be taken only after all of the required core courses in economics have been successfully completed. Students may not take or re-take ECON UN3211 Intermediate Microeconomics, ECON UN3213 Intermediate Macroeconomics, or ECON UN3412 Introduction To Econometrics concurrently with any senior seminar. *Seminars do not count as electives.* Each seminar is limited to sixteen students, with priority given to seniors. For ECPH GU4921 Seminar In Political Economy and ECPH GU4950 Economics and Philosophy Seminar, priority is given to economics–political science and economics–philosophy majors, respectively.

For seminar registration details, read the information posted on the department's *Senior Seminar Registration* page: <http://econ.columbia.edu/senior-seminars-registration>.

Mathematics

Students must consult with the Mathematics Department for the appropriate placement in the calculus sequence. Students must complete one of the following sequences:

Select one of the following sequences:

MATH UN1101 - MATH UN1201	CALCULUS I and Calculus III
MATH UN1101 - MATH UN1205	CALCULUS I and Accelerated Multivariable Calculus
MATH UN1207 - MATH UN1208	Honors Mathematics A and HONORS MATHEMATICS B

In addition:

1. Students who receive a grade of D or F in MATH UN1201 Calculus III or MATH UN1205 must retake the course, but may enroll in ECON UN3211 Intermediate Microeconomics.
2. Students who receive a grade of D or F in MATH UN1207 Honors Mathematics A may either retake the course, or take MATH UN1201 Calculus III or MATH UN1205, and enroll in ECON UN3211 Intermediate Microeconomics concurrently.

Statistics

Unless otherwise specified below, all students must take STAT UN1201 Calculus-Based Introduction to Statistics, or a higher level course, such as STAT GU4204 Statistical Inference, or STAT GU4001.

Barnard Courses

A limited number of Barnard economics electives may count toward the major, concentration, and interdepartmental majors. Students should pay careful attention to the limit of Barnard electives indicated in their program requirements. Please see the *Transfer Credit* section below for information on the number of Barnard electives that may be taken to fulfill major requirements. In addition, students may receive credit for the major, concentration, and interdepartmental majors only for those Barnard economics courses listed in this Bulletin. However, students may not receive credit for two courses whose content overlaps. Barnard and Columbia economics electives with overlapping content include but are not limited to:

ECON BC3029 - ECON GU4321	Empirical Development Economics and Economic Development
ECON BC3038 - ECON GU4505	International Money and Finance and International Macroeconomics
ECON BC3019 - ECON GU4400	Labor Economics and Labor Economics
ECON BC3047 - ECON GU4500	International Trade and International Trade
ECON BC3039 - ECON GU4625	Environmental and Natural Resource Economics and Economics of the Environment
ECON BC3041 - ECON GU4235	Theoretical Foundations of Political Economy and HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes
ECON GU4400	Labor Economics
ECON GU4235	HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes

Students should always first consult with *econ-advising* to confirm that the Barnard elective they wish to take does not overlap with a Columbia elective that they have already taken or plan to take. Students may *not* take the Barnard core economics, math, statistics, or seminar courses for credit towards the completion of major requirements.

School of Professional Studies Courses

The Department of Economics does not accept *any* of the courses offered through the School of Professional Studies for credit towards the economics major, concentration, or interdepartmental majors with the exception of the courses offered by the Economics Department during the summer session at Columbia.

Other Department and School Courses

Please note that with the exception of the above Barnard courses and the specific courses listed below for the financial

economics major, no other courses offered through the different departments and schools at Columbia count toward the economics majors or concentration.

Transfer Credits

Students are required to take a minimum number of courses in the Columbia Economics Department. For all majors and interdepartmental majors, students must complete a minimum of *five* lecture courses in the Columbia department. Students may fulfill their remaining requirements for economics lecture courses through AP (or IB or GCE) credits, Barnard electives, transfer courses, and study abroad courses (the latter two are subject to the approval of the Economics Department). The following table summarizes the new rules:

Program	Number of required economics lecture courses	Minimum number which must be taken in the department	Maximum number of outside allowed
Economics major	9	5	4
Financial economics	8	5	3
Economics- mathematics	7	5	2
Economics- political science	7	5	2
Economics- statistics	7	5	2
Economics- philosophy	7	5	2
Economics concentration	7	4	3

- Lecture courses** do not include seminars, which must be taken in the Columbia Economics Department. The lecture course counts are counts of economics courses only and do **not** include math, statistics, or courses in other departments;
- At least two of the three 3000-level economics core courses must be taken in the department and no corresponding Barnard courses are accepted. ECON UN3025 Financial Economics and ECON UN3265 MONEY AND BANKING are counted as departmental courses regardless of the instructor;
- Outside courses** include AP (or IB or GCE) credits, transfer credits, Barnard 2000- and 3000-level elective courses and transfer credits from other universities. In the case where two or more courses taken outside of Columbia are used as the equivalent of ECON UN1105 Principles of Economics, those courses are counted as one transfer course.

Approval of transfer credits to fulfill economics requirements must be obtained in writing from the Department of Economics (see the [departmental website](#) or speak with your advising

dean for information regarding applications for transfer credit). Approval is granted only for courses that are considered to be comparable to those offered at Columbia.

Summer courses taken at other institutions must be approved in writing by the department's transfer credit adviser before the course is taken. The department does not accept transfer credits for any 3000 level core courses taken during a summer session outside of Columbia University. Summer courses taken from the department of economics at Columbia University do not need approval.

Guidelines and instructions on how to request transfer credit approval can be found in the *Transfer Credit Information* page of the [departmental website](#).

MAJOR IN ECONOMICS

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

The economics major requires a minimum of 35 points in economics, 6 points in mathematics, and 3 points in statistics, for a total of at least 44 points as follows:

Economics Core Courses

All economics core courses

Mathematics

Select a mathematics sequence

Statistics

Select a statistics course

Economics Electives

Select at least five electives, of which no more than one may be taken at the 2000-level (including Barnard courses)

Economics Seminar

Select one economics seminar course

CONCENTRATION IN ECONOMICS

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

The economics concentration requires a minimum of 25 points in economics, 6 points in mathematics, and 3 points in statistics, for a total of at least 34 points as follows:

Economics Core Courses

All economics core courses

Mathematics

Select a mathematics sequence

Statistics

Select a statistics course

Economics Electives

Select at least three electives, of which no more than one may be taken at the 2000-level (including Barnard courses)

MAJOR IN FINANCIAL ECONOMICS

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

The Department of Economics offers the major in financial economics, which provides an academic framework to explore the role of financial markets and intermediaries in the allocation (and misallocation) of capital. Among the topics studied in financial economics are financial markets, banks and other financial intermediaries, asset valuation, portfolio allocation, regulation and corporate governance.

The financial economics major requires 26 points in economics, 6 points in mathematics, 3 points in statistics, 3 points in business, and 12 points from a list of selected courses for a total minimum of 50 points as follows:

Economics Core Courses

All economics core courses

Finance Core Courses *

ECON UN3025	Financial Economics
ECON GU4280	Corporate Finance
BUSI UN3013	Financial Accounting

*NOTE: The department considers BUSI UN3013 and IEOR E2261 as overlapping courses. Students who take both courses shall be credited with one course only. Financial economics majors who are also in the Business Management concentration program (CNBUMG) must take an additional elective from either the financial economics prescribed elective list (below) or from the CNBUMB prescribed list.

Mathematics

Select a mathematics sequence

Statistics

Select a statistics course

Electives

Select four of the following, of which two must be from the Columbia or Barnard economics departments, or equivalent economics transfer credits:

ECON BC3014	Entrepreneurship
ECON BC3017	Economics of Business Organization
ECON UN3265	MONEY AND BANKING
ECON UN3952	Seminar in Macroeconomics and Formation of Expectations
ECON GU4020	Economics of Uncertainty and Information
ECON GU4213	Advanced Macroeconomics
ECON GU4251	Industrial Organization
ECON GU4260	Market Design
ECON GU4412	Advanced Econometrics
ECON GU4415	Game Theory
ECON GU4465	Public Economics
ECON GU4500	International Trade
ECON GU4505	International Macroeconomics
or ECON BC3038	International Money and Finance

ECON G4526	Transition Reforms, Globalization and Financial Crisis
ECON GU4700	Financial Crises
ECON GU4710	Finance and the Real Economy
ECON GU4840	Behavioral Economics
ECON GU4850	Cognitive Mechanisms and Economic Behavior
ECON GU4860	Behavioral Finance
BIOT GU4180	
BUSI UN3021	Marketing Management
BUSI UN3701	STRATEGY FORMULATION
BUSI UN3702	Venturing to Change the World
BUSI UN3703	Leadership in Organizations
BUSI UN3704	Making History Through Venturing
COMS W1002	Computing in Context
HIST W2904	History of Finance
IEOR E3106	Stochastic Systems and Applications
IEOR E4700	Introduction to Financial Engineering
MATH UN3050	Discrete Time Models in Finance
POLS UN3630	Politics of International Economic Relations
STAT W3201	Math Finance in Continuous Time
STAT GU4261	Statistical Methods in Finance
STAT GU4207	Elementary Stochastic Processes
STAT GU4262	Stochastic Processes for Finance

Seminar

The seminar must be chosen from a list of seminars eligible for the financial economics major. The department indicates which seminars are eligible for the major on the Senior Seminars page of the departmental website.

Students must have completed at least one of ECON UN3025 or ECON GU4280 prior to taking their senior seminar.

* Students must complete the finance core no later than fall of their senior year.

MAJOR IN ECONOMICS-MATHEMATICS

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

The major in economics and mathematics provides students with a grounding in economic theory comparable to that provided by the general economics major and exposes students to rigorous and extensive training in mathematics. The program is recommended for any student planning to do graduate work in economics.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Mathematics has an assigned adviser with

whom students may consult on mathematics requirements. The economics adviser can only advise on economics requirements; the mathematics adviser can only advise on mathematics requirements.

The economics-mathematics major requires a total of 52 or 56 points (depending on mathematics sequence) : 29 points in economics and 23-27 points in mathematics and statistics as follows:

Economics Core Courses

All economics core courses

Economics Electives

Select three electives at the 3000-level or above

Mathematics

Select one of the following sequences:

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1205	and Accelerated Multivariable Calculus
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1207	Honors Mathematics A
- MATH UN1208	and HONORS MATHEMATICS B

Note: Students who take MATH UN1205 may not receive credit for both MATH UN1201 and MATH UN1202.

Analysis requirement:

MATH UN2500	ANALYSIS AND OPTIMIZATION
-------------	---------------------------

Select three of the following:

MATH UN1202	CALCULUS IV
MATH UN2030	ORDINARY DIFFERENTIAL EQUATION

Any mathematics course at the 3000-level or above

Note: Students who take MATH UN1205 will not receive credit for MATH UN1202.

Statistics

Select one of the following sequences:

STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS
STAT GU4203	PROBABILITY THEORY
- STAT GU4204	and Statistical Inference

Economics Seminar

Select an economics seminar

NOTE:

1. Students who fulfill the statistics requirement with STAT GU4203 and STAT GU4204, may count STAT GU4203 or STAT GU4204 as one of the three required mathematics electives.

2. Students who choose the one year sequence (STAT GU4203/ STAT GU4204), must complete the year long sequence *prior* to taking ECON UN3412. Students receive elective credit for the probability course.

MAJOR IN ECONOMICS-PHILOSOPHY

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

Economics-philosophy is an interdisciplinary major that introduces students to basic methodologies of economics and philosophy and stresses areas of particular concern to both, e.g. rationality and decision making, justice and efficiency, freedom and collective choice, logic of empirical theories and testing. Many issues are dealt with historically. Classic texts of Plato, Kant, Mill, Marx, and Smith are reviewed.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Philosophy has an assigned adviser with whom students may consult on philosophy requirements. The economics adviser can only advise on economics requirements; the philosophy adviser can only advise on philosophy requirements.

The economics-philosophy major requires a total minimum of 54 points: 25 points in economics, 16 points in philosophy, 6 points in mathematics, 3 points in statistics, and 4 points in the interdisciplinary seminar as follows:

Economics Core Courses

ECON UN1105	Principles of Economics
ECON UN3211	Intermediate Microeconomics
ECON UN3213	Intermediate Macroeconomics
ECON UN3412	Introduction To Econometrics

Mathematics

Select a mathematics sequence

Statistics

Select a statistics course

Economics Electives

Three Electives are required; two must be selected from the below list, and the remaining elective may be any economics elective at the 3000-level or above.

ECON GU4020	Economics of Uncertainty and Information
ECON GU4211	Advanced Microeconomics
ECON GU4213	Advanced Macroeconomics
ECON GU4228	Urban Economics
ECON GU4230	Economics of New York City
ECON GU4235	HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes
ECON GU4301	ECONOMIC GROWTH # DEVELOPMNT I

ECON GU4321	Economic Development
or ECON BC3029	Empirical Development Economics
ECON GU4370	Political Economy
ECON GU4400	Labor Economics
ECON GU4415	Game Theory
ECON GU4438	Economics of Race in the U.S.
ECON GU4465	Public Economics
ECON GU4480	Gender and Applied Economics
ECON GU4500	International Trade
ECON W4615	Law and Economics
ECON GU4625	Economics of the Environment
or ECON BC3039	Environmental and Natural Resource Economics
ECON GU4750	Globalization and Its Risks
ECON GU4840	Behavioral Economics
ECON GU4850	Cognitive Mechanisms and Economic Behavior
ECON BC3011	Inequality and Poverty

Philosophy Courses

PHIL UN1010	METHDS/PROB OF PHILOS THOUGHT
PHIL UN3411	SYMBOLIC LOGIC
PHIL UN3701	ETHICS
PHIL UN3551	Philosophy of Science
or PHIL UN3960	EPISTEMOLOGY
PHIL GU4561	Probability and Decision Theory

Seminar

ECPH GU4950	Economics and Philosophy Seminar
-------------	----------------------------------

Students who declared before Spring 2014: The requirements for this program were modified in 2014. Students who declared this program before Spring 2014 should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

MAJOR IN ECONOMICS-POLITICAL SCIENCE

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

Political economy is an interdisciplinary major that introduces students to the methodologies of economics and political science and stresses areas of particular concern to both. This program is particularly beneficial to students planning to do graduate work in schools of public policy and international affairs.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Political Science has an assigned adviser with whom students may consult on political science requirements. The economics adviser can only advise on

economics requirements; the political science adviser can only advise on political science requirements.

The economics–political science major requires a total of 59 points: 22 points in economics, 17 points in political science, 6 points in mathematics, 6 points in statistical methods, 4 points in a political science seminar, and 4 points in the interdisciplinary seminar as follows.

The political science courses are grouped into four areas, i.e. subfields: (1) American Politics, (2) Comparative Politics, (3) International Relations, and (4) Political Theory. For the political science part of the major, students are required to select one area as a major subfield and one as a minor subfield. The corresponding introductory courses in both subfields must be taken, plus two electives in the major subfield, and one in the minor subfield.

Economics Core Courses

ECON UN1105	Principles of Economics
ECON UN3211	Intermediate Microeconomics
ECON UN3213	Intermediate Macroeconomics
ECON GU4370	Political Economy

Mathematics

Select a mathematics sequence

Statistical Methods

STAT UN1201	Calculus-Based Introduction to Statistics
-------------	---

Select one of the following:

ECON UN3412	Introduction To Econometrics
POLS GU4712	PRINC OF QUANT POL RESEARCH 2

Economics Electives

Select two electives (6 points) at the 3000-level or above

Political Science Courses

Students must choose a Primary Subfield and a Secondary Subfield to study. The subfields are as follows: American Politics (AP), Comparative Politics (CP), International Relations (IR), and Political Theory (PT).

Primary Subfield: Minimum three courses, one of which must be the subfield's introductory course.

Secondary Subfield: Minimum two courses, one of which must be the subfield's introductory course.

Seminars

Students must take the following two seminars:

ECPS GU4921 Seminar In Political Economy
and a Political Science Department seminar, in the student's Primary Subfield. Please select one of the following: *

POLS UN3911	SEMINAR IN POLITCAL THEORY
or POLS UN3912	Seminar in Political Theory
POLS UN3921	AMERICAN POLITICS SEMINAR
or POLS UN3922	AMERICAN POLITICS SEMINAR
POLS UN3951	Seminar in Comparative Politics
or POLS UN3952	Seminar in Comparative Politics

POLS UN3961	INTERNATIONAL POLITICS SEMINAR
or POLS UN3962	INTERNATIONAL POLITICS SEMINAR

- Students who wish to count toward the political science seminar requirement a course that is not in the above list of approved seminars must obtain permission from the political science Director of Undergraduate studies. Barnard colloquia can count for seminar credit only with the written permission of the Director of Undergraduate Studies. Note that admission to Barnard colloquia is by application to the Barnard political science department only.

MAJOR IN ECONOMICS-STATISTICS

Please read [Guidelines for all for Economics Majors, Concentrators, and Interdepartmental Majors](#) (p. 409) above.

The major in economics-statistics provides students with a grounding in economic theory comparable to that provided by the general economics major, but also exposes students to a significantly more rigorous and extensive statistics training than is provided by the general major. This program is recommended for students with strong quantitative skills and for those contemplating graduate studies in economics.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Statistics has an assigned adviser with whom students may consult on statistics requirements. The economics adviser can only advise on economics requirements; the statistics adviser can only advise on statistics requirements.

The economics-statistics major requires a total of 59 points: 29 in economics, 15 points in statistics, 12 points in mathematics, 3 points in computer science as follows:

Economics Core Courses

All economics core courses

Economics Electives

Select three electives at the 3000-level or above

Mathematics

Select one of the following sequences:

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN2010	and LINEAR ALGEBRA
MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1205	and Accelerated Multivariable Calculus
- MATH UN2010	and LINEAR ALGEBRA
MATH UN1207	Honors Mathematics A
- MATH UN1208	and HONORS MATHEMATICS B

Statistics

STAT UN1201 Calculus-Based Introduction to Statistics

STAT GU4203 PROBABILITY THEORY

STAT GU4204 Statistical Inference

STAT GU4205 Linear Regression Models

One elective in statistics from among courses numbered STAT GU 4206 through GU 4266.

Computer Science

Select one of the following:

COMS W1004 Introduction to Computer Science and Programming in Java

COMS W1005 Introduction to Computer Science and Programming in MATLAB

COMS W1007 Honors Introduction to Computer Science

ENGI E1006 Introduction to Computing for Engineers and Applied Scientists

STAT UN2102 Applied Statistical Computing

Economics Seminar

ECON GU4918 Seminar In Econometrics

Students who declared before Spring 2014: The requirements for this program were modified in 2014. Students who declared this program before Spring 2014 should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

ECONOMICS

ECON UN1105 Principles of Economics. 4 points.

Corequisites: ECON UN1155

How a market economy determines the relative prices of goods, factors of production, and the allocation of resources and the circumstances under which it does it efficiently. Why such an economy has fluctuations and how they may be controlled.

Fall 2020: ECON UN1105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 1105	001/10542	M W 8:40am - 9:55am Online Only	Sunil Gulati	4	300/300
ECON 1105	002/10541	M W 1:10pm - 2:25pm Online Only	Prajit Dutta	4	255/300

Spring 2021: ECON UN1105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 1105	001/12063	M W 8:40am - 9:55am 501 Schermerhorn Hall	Sunil Gulati	4	249/300

ECON UN1155 Disc Section: Principles of Economics. 0 points.

Required Discussion section for ECON UN1105 Principles of Economics

Fall 2020: ECON UN1155

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 1155	001/10543			0	525/800

Spring 2021: ECON UN1155

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 1155	001/12065			0	443/600

ECON UN2029 FED Challenge Workshop. 1 point.

Prerequisites: (ECON UN1105)

The workshop prepares students to compete in the annual College Fed Challenge sponsored by the Federal Reserve. Topics covered include macroeconomic and financial conditions, monetary policy, financial stability and the Federal Reserve System.

Fall 2020: ECON UN2029

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 2029	001/10544	M 6:10pm - 8:00pm Online Only	Tamrat Gashaw	1	15/50

ECON UN2105 The American Economy. 3 points.

Prerequisites: ECON UN1105

The course surveys issues of interest in the American economy, including economic measurement, well-being and income distribution, business cycles and recession, the labor and housing markets, saving and wealth, fiscal policy, banking and finance, and topics in central banking. We study historical issues, institutions, measurement, current performance and recent research.

Fall 2020: ECON UN2105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 2105	001/11912	T Th 11:40am - 12:55pm Online Only	Claudia Halbac	3	65/86

ECON UN2257 Global Economy. 3 points.

Prerequisites: ECON UN1105

Covers five areas within the general field of international economics: (i) microeconomic issues of why countries trade, how the gains from trade are distributed, and protectionism; (ii) macroeconomic issues such as exchange rates, balance of payments and open economy macroeconomic adjustment, (iii) the role of international institutions (World Bank, IMF, etc); (iv) economic development and (v) economies in transition.

Spring 2021: ECON UN2257

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 2257	001/12066	T Th 11:40am - 12:55pm	Ronald Miller	3	67/189

207 Mathematics
Building

ECON UN3025 Financial Economics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

Institutional nature and economic function of financial markets. Emphasis on both domestic and international markets (debt, stock, foreign exchange, eurobond, eurocurrency, futures, options, and others). Principles of security pricing and portfolio management; the Capital Asset Pricing Model and the Efficient Markets Hypothesis.

Fall 2020: ECON UN3025

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ECON UN3901 Economics of Education. 3 points.

Prerequisites: (econ un3211 and econ un3213 and econ un3412)
Course objective: This course has two objectives: (1) To develop students' skills in research and writing. Specifically, participants will work on: formulating a research question, placing it in the context of an existing literature and/or policy

area, and using economic and econometric tools to address it in writing. Specifically, in the first part of the class, readings, problem sets, and a midterm exam will build skills in these areas. In the second part, students will come up with a research question, and address it in a research proposal/report. While all the applications will be on the economics of education, these skills will be useful in students' subsequent careers, regardless of the area of economics they focus on. (2) To provide an introduction to key issues in the economics of education. Specifically, education is a significant industry every person entering this course will have already spent years in this industry as a customer, as a worker, as an input, or all of the above. The course will address questions like: What does economics have to say about how this industry is organized and what determines its output? Why do individuals invest in education? What determines the behavior, productivity, and reputation of firms in the industry? What role should government and public policy (if any) play in its operation?

Spring 2021: ECON UN3901

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3901	001/12078	W 10:10am - 12:00pm 522a Kent Hall	Miguel Urquiola	3	14/16

ECON UN3952 Seminar in Macroeconomics and Formation of Expectations. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

This course has two main objectives:

To introduce students to the process of writing a research paper. This includes identifying and formulating a research question, reviewing the previous literature and positioning the problem in that context, identifying the proper tools and data to answer the question, and finally writing the findings in the format of a research paper. An immediate goal is to prepare the students to undertake a senior thesis project.

To provide an introduction to selected topics and survey evidence in macroeconomics, with a focus on the expectation formation process of economic agents. We will start by going through some canonical models that are widely used for economic and policy analysis to understand the role of expectations in the decision making of households and firms. We will then go through a series of survey data and relate the empirical evidence to the theoretical predictions of those canonical models

ECON UN3981 Applied Econometrics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

The objective of this course is to develop students' research skills and to learn the process of writing an original research paper. The skills and process include the ability to identify a problem and state in a concise manner, literature review, data collection, model formulation and estimation, evaluation of the problem and writing up the findings in a format of a research

paper. An immediate and more specific goal is to prepare students to tackle a senior thesis project.

Towards this goal, this course will review or introduce the most widely used econometric techniques for empirical research. These include multiple regressions, probit and logit models, instrumental variables methods, panel data methods, regression discontinuity designs. This course will also introduce some time series methods such as vector autoregressive process, cointegration analysis, financial time series, and modeling of volatilities. Students will need to practice these methods with a computer software package (R or STATA) and with actual economic data sets.

ECON GU4020 Economics of Uncertainty and Information. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

Topics include behavior uncertainty, expected utility hypothesis, insurance, portfolio choice, principle agent problems, screening and signaling, and information theories of financial intermediation.

Fall 2020: ECON GU4020

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4020	001/10558	T Th 4:10pm - 5:25pm Online Only	Pierre-Andre Chiappori	3	28/50

ECON GU4211 Advanced Microeconomics. 4 points.

Prerequisites: ECON UN3211 and ECON UN3213 and MATH UN2010 Students must register for required discussion section. Corequisites: MATH UN2500, MATH GU4061

The course provides a rigorous introduction to microeconomics. Topics will vary with the instructor but will include consumer theory, producer theory, general equilibrium and welfare, social choice theory, game theory and information economics. This course is strongly recommended for students considering graduate work in economics. Discussion section required.

Spring 2021: ECON GU4211

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4211	001/12079	M W 1:10pm - 2:25pm 203 Mathematics Building	Susan Elmes	4	12/64

ECON GU4212 Discussion Section Advanced Microeconomics. 0 points.

Prerequisites: ECON UN3211 and ECON UN3213 and MATH UN2010 Students must register for lecture course ECON GU4211

Corequisites: MATH UN2500
MATH GU4061

Required discussion section for ECON GU4211 Advanced Microeconomics. The course provides a rigorous introduction to microeconomics. Topics will vary with the instructor but will include consumer theory, producer theory, general equilibrium

and welfare, social choice theory, game theory and information economics. This course is strongly recommended for students considering graduate work in economics. Discussion section required.

Spring 2021: ECON GU4212

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4212	001/12080			0	9/64

ECON GU4213 Advanced Macroeconomics. 4 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 Required discussion section ECON GU4214

An introduction to the dynamic models used in the study of modern macroeconomics. Applications of the models will include theoretical issues such as optimal lifetime consumption decisions and policy issues such as inflation targeting. This course is strongly recommended for students considering graduate work in economics.

Spring 2021: ECON GU4213

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4213	001/12081	T Th 11:40am - 12:55pm Online Only	Irasema Alonso	4	15/86

ECON GU4228 Urban Economics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

Congestion and other games, and the pricing of transit services. Location theory and land rents. Segregation and discrimination. The fiscal structure of American cities. Zoning and the taking issue. Abandonment and city-owned property. Economic development, abatements, subsidies, and eminent domain. Crime, deadweight losses, and the allocation of police services.

ECON GU4230 Economics of New York City. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

This course takes New York as our laboratory. Economics is about individual choice subject to constraints and the ways that choices sum up to something often much more than the parts. The fundamental feature of any city is the combination of those forces that bring people together and those that push them apart. Thus both physical and social space will be central to our discussions. The underlying theoretical and empirical analysis will touch on spatial aspects of urban economics, regional, and even international economics. We will aim to see these features in New York City taken as a whole, as well as in specific neighborhoods of the city. We will match these theoretical and empirical analyses with readings that reflect close observation of specific subjects. The close observation is meant to inspire you to probe deeply into a topic in order that the tools and approaches of economics may illuminate these issues in a fresh way.

Spring 2021: ECON GU4230

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4230	001/12083	M W 10:10am - 11:25am Online Only	Donald Davis	3	71/86

ECON GU4235 HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: ECON UN3211 and ECON UN3213

A survey of some of the major intellectual developments that have created the discipline of economics. Particular attention to the works of Adam Smith, Alfred Marshall, Irving Fisher, and J. M. Keynes.

ECON GU4251 Industrial Organization. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

The study of industrial behavior based on game-theoretic oligopoly models. Topics include pricing models, strategic aspects of business practice, vertical integration, and technological innovation.

Fall 2020: ECON GU4251

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4251	001/12227	M W 4:10pm - 5:25pm Online Only	Ingmar Nyman	3	43/100

ECON GU4260 Market Design. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

This course uses modern microeconomic tools for understanding markets for indivisible resources and exploring ways to improve their design in terms of stability, efficiency and incentives. Lessons of market design will be applied to developing internet platforms for intermediating exchanges, for auctions to allocate sponsored search advertising, to allocate property rights such as public lands, radio spectrums, fishing rights, for assigning students to public schools, and for developing efficient kidney exchanges for transplantation.

Spring 2021: ECON GU4260

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4260	001/12085	M W 11:40am - 12:55pm Online Only	Guillaume Haeringer	3	73/86

ECON GU4280 Corporate Finance. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

An introduction to the economics principles underlying the financial decisions of firms. The topics covered include bond and stock valuations, capital budgeting, dividend policy, market efficiency, risk valuation, and risk management. For information regarding REGISTRATION for this course, go to: <http://econ.columbia.edu/registration-information>.

Fall 2020: ECON GU4280

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4280	001/11178	M W 4:10pm - 5:25pm Online Only	Ethan Namvar	3	49/75

ECON GU4301 ECONOMIC GROWTH # DEVELOPMNT I. 3.00 points.

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213. Economic development is a complex and multifaceted process. Once considered a goal in itself, more recently it has become to be viewed as the fundamental means to world poverty alleviation. Today, about half of the world population still lives on less than \$2 /day. Why? What does it mean to be poor? What are the forces that prevent so many people from enjoying a higher standard of living? The course opens on some fundamental macroeconomic models of economic growth and the recent debate on the geographical or institutional nature of the ultimate causes of growth or arrested development. Then we will move into the most recent microeconomic literature that sheds light on the lives of the poor and on the forces - in particular the market distortions and the market failures - that keep billions in poverty. Among others, we will discuss interesting topics like nutrition and health, the cultural origins of corruption, the effect of global warming, and the design of effective anti-poverty programs

Fall 2020: ECON GU4301

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4301	001/10564	M W 8:40am - 9:55am Online Only	Xavier Sala-I-Martin	3.00	76/125

ECON GU4321 Economic Development. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

Historical comparative examination of the economic development problems of the less developed countries; the roles of social institutions and human resource development; the functions of urbanization, rural development, and international trade.

Spring 2021: ECON GU4321

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4321	001/12086	T Th 2:40pm - 3:55pm Online Only	Jack Willis	3	25/67

ECON GU4325 Economic Organization and Development of Japan. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: ECON UN3211 and ECON UN3213

The growth and structural changes of the post-World War II economy; its historical roots; interactions with cultural, social, and political institutions; economic relations with the rest of the world.

Fall 2020: ECON GU4325

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4325	001/10565	T Th 8:40am - 9:55am Online Only	David Weinstein	3	58/125

ECON GU4370 Political Economy. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 or POLS 4710 for those who declared prior to Spring 2014.

The objective of this course is to develop understanding of how political institutions and behavior shape economic outcomes, and vice versa. Starting from the micro level study of political behavior, we will build up to analyze the internal workings of institutions and ultimately macro level economic and political outcomes. During the course we will cover the following topics

- ,
 - Limits and potential of markets
- ,
 - Public goods provision
- ,
 - Voting
- ,
 - Redistribution

Fall 2020: ECON GU4370

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4370	001/10566	M W 10:10am - 11:25am Online Only	Alessandra Casella	3	49/100

ECON GU4400 Labor Economics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

The labor force and labor markets, educational and man power training, unions and collective bargaining, mobility and immobility, sex and race discrimination, unemployment.

ECON GU4412 Advanced Econometrics. 4 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 Students must register for required discussion section.

The linear regression model will be presented in matrix form and basic asymptotic theory will be introduced. The course will also introduce students to basic time series methods for forecasting and analyzing economic data. Students will be expected to apply the tools to real data.

Fall 2020: ECON GU4412

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4412	001/10568	T Th 10:10am - 11:25am Online Only	Serena Ng	4	15/54

ECON GU4413 Econometrics of Time Series and Forecasting. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

Corequisites: MATH UN2010

This course focuses on the application of econometric methods to time series data; such data is common in the testing of macro and financial economics models. It will focus on the application of these methods to data problems in macro and finance.

Spring 2021: ECON GU4413

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4413	001/12087	T Th 4:10pm - 5:25pm Online Only	Seyhan Erden	3	17/54

ECON GU4415 Game Theory. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

Introduction to the systematic treatment of game theory and its applications in economic analysis.

Fall 2020: ECON GU4415

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4415	001/11913	M W 1:10pm - 2:25pm Online Only	Guillaume Haeringer	3	77/125

Spring 2021: ECON GU4415

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4415	001/12088	M W 11:40am - 12:55pm Online Only	Qingmin Liu	3	80/110

ECON GU4438 Economics of Race in the U.S.. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 ECON GU4400 is strongly recommended.

What differences does race make in the U.S. economy? Why does it make these differences? Are these differences things we should be concerned about? If so, what should be done? The course examines labor markets, housing markets, capital markets, crime, education, and the links among these markets. Both empirical and theoretical contributions are studied.

Fall 2020: ECON GU4438

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4438	001/10569	T Th 2:40pm - 3:55pm Online Only	Brendan O'Flaherty	3	79/100

ECON GU4465 Public Economics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

Types of market failures and rationales for government intervention in the economy. Benefit-cost analysis and the theory of public goods. Positive and normative aspects of taxation. The U.S. tax structure.

Spring 2021: ECON GU4465

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4465	001/12089	M W 4:10pm - 5:25pm Online Only	Ceyhun Elgin	3	72/86

ECON GU4480 Gender and Applied Economics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

This course studies gender gaps, their extent, determinants and consequences. The focus will be on the allocation of rights in different cultures and over time, why women's rights have typically been more limited and why most societies have traditionally favored males in the allocation of resources.

ECON GU4500 International Trade. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

The theory of international trade, comparative advantage and the factor endowments explanation of trade, analysis of the theory and practice of commercial policy, economic integration. International mobility of capital and labor; the North-South debate.

Fall 2020: ECON GU4500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4500	001/11179	T Th 10:10am - 11:25am Online Only	Waseem Noor	3	35/100

Spring 2021: ECON GU4500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4500	001/12090	T Th 10:10am - 11:25am 702 Hamilton Hall	Waseem Noor	3	38/86

ECON GU4505 International Macroeconomics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

Introduction to monetary problems in international trade. Topics include macroeconomics of the open economy under fixed and flexible exchange rates, international adjustment under the gold standard, monetary problems of the interwar period, the Breton Woods agreement, transition to flexible exchange rates, planned reforms of the international monetary system and the Eurocurrency markets.

Spring 2021: ECON GU4505

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4505	001/12091	M W 8:40am - 9:55am Online Only	Stephanie Schmitt-Grohé	3	19/54

ECON GU4526 Transition Reforms, Globalization and Financial Crisis. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *ECON UN3211* and *UN3213*.

Covers reform issues in transition economies such as price liberalization, currency reform, asset privatization, macroeconomic stabilization, trade liberalization and exchange rate policies, and foreign resource flows with suitable examples from the experience of the transition economies of Russia, the post-Soviet states, East-central Europe, China and Vietnam.

ECON GU4615 Law and Economics. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *ECON UN3211* and *UN3213*.

The course is intended to provide an economic framework for understanding the law and legal institutions. Topics covered include property law, contract theory and torts.

ECON GU4625 Economics of the Environment. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *ECON UN3211* and *UN3213*.

Microeconomics is used to study who has an incentive to protect the environment. Government's possible and actual role in protecting the environment is explored. How do technological change, economic development, and free trade affect the environment? Emphasis on hypothesis testing and quantitative analysis of real-world policy issues.

ECON GU4700 Financial Crises. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

This course uses economic theory and empirical evidence to study the causes of financial crises and the effectiveness of policy responses to these crises. Particular attention will be given to some of the major economic and financial crises in the past century and to the crisis that began in August 2007.

ECON GU4710 Finance and the Real Economy. 3 points.

Prerequisites: (Econ UN3211) and (ECON UN3213) and (STAT UN1201)

This course uses economic theory and empirical evidence to study the links between financial markets and the real economy. We will consider questions such as: What is the welfare role of finance? How do financial markets affect consumers and firms? How do shocks to the financial system transmit to the real economy? How do financial markets impact inequality?

ECON GU4750 Globalization and Its Risks. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

The world is being transformed by dramatic increases in flows of people, goods and services across nations. Globalization has the potential for enormous gains but is also associated to serious risks. The gains are related to international commerce where the industrial countries dominate, while the risks involve the global environment, poverty and the satisfaction of basic needs that affect in great measure the developing nations. Both are linked to a historical division of the world into the North and the South—the industrial and the developing nations. Key to future evolution are (1) the creation of new markets that trade privately produced public goods, such as knowledge and greenhouse gas emissions, as in the Kyoto Protocol; (2) the updating of the Breton Woods Institutions, including the creation of a Knowledge Bank and an International Bank for Environmental Settlements.

Fall 2020: ECON GU4750

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4750	001/10573	M W 11:40am - 12:55pm Online Only	Graciela Chichilnisky	3	49/100

ECON GU4840 Behavioral Economics. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213

Within economics, the standard model of behavior is that of a perfectly rational, self interested utility maximizer with unlimited cognitive resources. In many cases, this provides a good approximation to the types of behavior that economists are interested in. However, over the past 30 years, experimental and behavioral economists have documented ways in which the standard model is not just wrong, but is wrong in ways that are important for economic outcomes. Understanding these behaviors, and their implications, is one of the most exciting areas of current economic inquiry. The aim of this course is to provide a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality and choice under risk and uncertainty. For each area we will study three things: 1. The evidence that indicates that the standard economic model is missing some important behavior 2. The models that have been developed to capture these behaviors 3. Applications of these models to (for example) finance, labor and development economics As well as the standard lectures, homework assignments, exams and so on, you will be asked to participate in economic experiments, the data from which will be used to illustrate some of the principals in the course. There will also be a certain small degree of classroom ‘flipping’, with a portion of many lectures given over to group problem solving. Finally, an integral part of the course will be a research proposal that you must complete by the end of the course, outlining a novel piece of research that you would be interested in doing.

ECON GU4850 Cognitive Mechanisms and Economic Behavior. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

Standard economic theory seeks to explain human behavior (especially in "economic" settings, such as markets) in terms of rational choice, which means that the choices that are made can be predicted on the basis of what would best serve some coherent objective, under an objectively correct understanding of the predictable consequences of alternative actions. Observed behavior often seems difficult to reconcile with a strong form of this theory, even if incentives clearly have some influence on behavior; and the course will discuss empirical evidence (both from laboratory experiments and observations "in the field") for some well-established "anomalies." But beyond simply cataloguing anomalies for the standard theory, the course will consider the extent to which departures from a strong version of rational choice theory can be understood as reflecting cognitive processes that are also evident in other domains such as sensory perception; examples from visual perception will receive particular attention. And in addition to describing what is known about how the underlying mechanisms work (something that is understood in more detail in sensory contexts than in the case of value-based decision making), the course will consider the extent to which such mechanisms --- while "suboptimal" from a normative standpoint that treats perfect knowledge of one's situation as costless and automatic --- might actually represent efficient uses of the limited information and bounded information-processing resources available to actual people (or other organisms). Thus the course will consider both ways in which the realism of economic analysis may be improved by taking into account cognitive processes, and ways in which understanding of cognitive processes might be advanced by considering the "economic" problem of efficient use of limited (cognitive) resources.

ECON GU4860 Behavioral Finance. 3 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

Neoclassical finance theory seeks to explain financial market valuations and fluctuations in terms of investors having rational expectations and being able to trade without costs. Under these assumptions, markets are efficient in that stocks and other assets are always priced just right. The efficient markets hypothesis (EMH) has had an enormous influence over the past 50 years on the financial industry, from pricing to financial innovations, and on policy makers, from how markets are regulated to how monetary policy is set. But there was very little in prevailing EMH models to suggest the instabilities associated with the Financial Crisis of 2008 and indeed with earlier crises in financial market history. This course seeks to develop a set of tools to build a more robust model of financial markets that can account for a wider range of outcomes. It is based on an ongoing research agenda loosely dubbed “Behavioral Finance”, which seeks to incorporate more realistic assumptions concerning human rationality and market imperfections into finance models. Broadly, we show in this course that limitations of human rationality can lead to bubbles and busts such as the Internet Bubble of the mid-1990s and the Housing Bubble of the mid-2000s; that imperfections of markets — such as the difficulty of short-

selling assets — can cause financial markets to undergo sudden and unpredictable crashes; and that agency problems or the problems of institutions can create instabilities in the financial system as recently occurred during the 2008 Financial Crisis. These instabilities in turn can have feedback effects to the performance of the real economy in the form of corporate investments.

ECON GU4999 Senior Honors Thesis. 6 points.

3 points per semester.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and the director of the departmental honors program's permission. Students must have a minimum GPA of 3.7 in all required major courses, including calculus and statistics, prior to enrollment.

The honors thesis seminar is a year-long course, beginning in the fall semester and ending in the spring semester. Students who have been approved to enter the workshop will be registered for both semesters by the department during the first two weeks of classes; 3 points are earned per semester. This workshop may only be taken by students applying for departmental honors, and it also fulfills the economics seminar requirement for the economics major and all joint majors. Students must see the director during mid-semester registration in the spring to discuss their proposed thesis topic, at which time they will be matched with appropriate faculty who will act as their thesis adviser. Students will meet their adviser over the course of the year at mutually agreed upon times. A rough draft of the thesis will be due during the first week of February in the spring semester, and the final draft will be due three weeks before the last day of classes. Please note that for those joint majors that require two seminars, one in economics and one in the other discipline (i.e., Political Science), the economics senior honors thesis seminar only fulfills the economics seminar requirement.

EDUCATION

335-336 Milbank Hall

212-854-7072

Department Assistant: Patricia Argueta-Medina

The Barnard Education Program is committed to strengthening public education and addressing issues of equity and social justice, particularly in urban schools. We offer three tracks in Education: Educational Studies, Urban Teaching-Elementary/Childhood Education, and Urban Teaching-Secondary/Adolescent Education. In these tracks, students develop a critical lens for looking at the issues facing public schooling and consider ways to promote fair and inclusive policies and practices for all children in our public system. The program is open to all undergraduates at Columbia (BC, SEAS, GS, CC) who are interested in becoming certified teachers, working with young people in human service agencies, or preparing for careers related to education.

Educational Studies Major: This major is an interdisciplinary program for students who wish to understand, critically analyze, and conduct research on the role of education in society. Students who pursue the major in Educational Studies learn to evaluate educational policy, practice, and research through a critical, equity-oriented lens. Our graduates are prepared to act creatively for peace, justice, and sustainability in a range of local and global educational contexts.

Currently, the major in Education Studies is open to Barnard College students only.

Urban Teaching Minors/Special Concentrations: Our goal is to prepare students to become skilled and reflective teachers who can effectively respond to the learning needs of diverse learners, and create supportive and intellectually stimulating classroom communities. Students learn to create innovative curriculum; gain experience observing, tutoring, and teaching a diverse range of children and young people; develop confidence in their role as teachers who can promote fair and inclusive school practices; and graduate with certification to teach in New York. (Note: we are part of an interstate agreement for reciprocal certification with many other states.)

This program is registered by the New York State Department of Education and accredited by the Association for Advancing Quality in Educator Preparation (AAQEP). These tracks prepare students to obtain a teaching position as a certified teacher upon graduation and/or to pursue graduate studies in education, public policy, sociology, youth studies, and other related fields.

Education Studies Minor/Special Concentration: This track prepares students to pursue graduate studies or positions in public policy, sociology, history, youth studies, philosophy, psychology, and other areas where K-12 education is frequently a focus of coursework and scholarship. Students learn to think

deeply and knowledgeably about the manner in which schools socialize as well as educate citizens, and examine how the interests of different stakeholders are privileged or neglected. The courses are linked by a focus on educational inequality and youth studies. This track does not lead to certification.

All three tracks are minors (BC) or special concentrations (CC, GS, SEAS) and are intended to complement a major's disciplinary specialization and methodological training. In addition to the requirements of the minor/special concentration, students must complete a major.

Student Learning Outcomes

1. **Knowledge of Self:** Students investigate how educational experiences in and out of school affect their vision for teaching and learning, use that knowledge to reflect upon and critique their practice, and set goals for continuing growth as equitable, multicultural educators.
2. **Knowledge of Students:** Students understand the importance of getting to know the children and youth in their classrooms; develop specific strategies that aid in understanding students' needs, capacities, interests, funds of knowledge, and social identities; and construct learning experiences that are responsive and relevant to their students.
3. **Knowledge of Content:** Students develop knowledge and skills to critique the social, political, cultural, and historical forces that construct traditional content knowledge and design academic content that is dynamic, inquiry-based, and encompasses multiple literacies, and cultural perspectives.
4. **Knowledge of Pedagogy:** Students experience, practice, evaluate, and reflect on a range of constructivist, inclusive, critical, collaborative, and authentic methods for engaging students in learning and in assessing learning outcomes
5. **Knowledge of Context:** Students investigate the complex ways in which social, political, cultural, and historical forces shape school contexts, including students' opportunities in schools, teacher empowerment, effective leadership, roles of parents and the community, and patterns of similarity and difference across schools.

The Education Program is accredited by Teacher Education Accreditation Council (TEAC) to recommend students who complete the program for Initial Certification in either Childhood Education (Grades 1-6) or Adolescent Education (Grades 7-12). Graduates of the program are also eligible for membership in the Interstate Certification Agreement, a reciprocal certification among forty-one states. We provide ongoing support to those who teach in the New York City area through our New Teacher Network.

To apply, visit our [website](#). Students are encouraged to apply for admission by March of the sophomore year but no later than the first Tuesday in September of the junior year. Those who plan to study abroad during junior year should apply by the spring of the freshman year, but no later than the first Tuesday in September of the sophomore year and take the Inclusive

Approaches and Multicultural Pedagogy courses in the fall and spring of sophomore year. Admission criteria include good academic standing; evidence of commitment to the field of education; interest in issues of social justice issues as they affect education, particularly in urban schools; and capacity for growth as an intellectually resourceful and reflective teacher. Enrollment is limited.

REQUIREMENTS FOR THE EDUCATIONAL STUDIES MAJOR

To complete the Major (BC) in Educational Studies, students must complete a minimum of 44 points of course work, listed below. *Please note that the Educational Studies major is currently being offered to Barnard College students only.*

The Education Studies track requires a minimum of eleven courses:

Requirement A - Foundational Coursework

EDUC BC1510	EDUCATIONAL FOUNDATIONS
URBS UN3310	Race, Space, and Urban Schools

Requirement B - Pedagogical Elective

Select one of the following:

EDUC BC3050	Science in the City
EDUC BC3052	Math and the City
EDUC BC3055	Arts and Humanities in the City: Critical Literacy and Digital Storytelling
EDUC BC3058	Science in the City II: Preparing Future Scientists Now
EDUC BC3030	Critical Pedagogies
SOCI UN3974	Sociology of Schools, Teaching and Learning

Requirement C - Concentration Courses

Select 6 of the following: At least 2 courses must be EDUC courses. Course selection to be determined with adviser.

EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY
EDUC BC3042	Gender, Sexuality, and Schooling
EDUC BC3045	Complicating Class: Education and the Limits of Equity
EDUC BC3040	Migration, Globalization, and Education
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY
EDUC BC3044	Education and Social Change in Comparative Global Contexts
EDUC BC3034	Families, Communities, and Schools
EDUC BC3030	Critical Pedagogies
PHIL UN2100	Philosophy of Education
SOCI UN3225	Sociology of Education
ECON BC3012	Economics of Education
PSYC BC2134	Educational Psychology
CSER UN3928	Colonization/Decolonization
HRTS UN3001	Introduction to Human Rights
Other Courses You may count other electives not listed here toward the Concentration Courses requirement. These courses must be reviewed with your adviser before enrollment.	

Requirement D - Senior Capstone

EDUC BC3088
EDUC BC3089

REQUIREMENTS FOR THE URBAN TEACHING MINORS/SPECIAL CONCENTRATIONS

Elementary/Childhood Education (To Teach Grades 1-6)

This program leads to New York State Initial Certification in Childhood Education (Grades 1- 6). In addition to the liberal arts major, students must complete a total of 26-28 credits as follows:

Requirement A - Educational Foundations For students who have already taken EDUC BC3032, PHIL UN2100, SOCI UN3225, or ECON BC3012 to fulfill Requirement A prior to Fall 2018 do not need to enroll in EDUC BC1510 to fulfill the requirement.

EDUC BC1510	EDUCATIONAL FOUNDATIONS	4
-------------	-------------------------	---

Requirement B - Psychology

Select one of the following: 3-4.5

PSYC BC1115	Cognitive Psychology
PSYC BC1129	Developmental Psychology
PSYC BC2134	Educational Psychology
PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR *

Requirement C - Pedagogical Elective

Select one of the following:

EDUC BC3050	Science in the City	
EDUC BC3052	Math and the City	
EDUC BC3055	Arts and Humanities in the City: Critical Literacy and Digital Storytelling	
EDUC BC3058	Science in the City II: Preparing Future Scientists Now	

Requirement D - Pedagogical Core

EDUC BC3025	Inclusive Approaches to Teaching Literacy: Theory and Practice	4
EDUC BC3053	Multicultural Elementary Pedagogy	4
EDUC BC3063	Elementary Student Teaching in Urban Schools	6
EDUC BC3064	Critical Inquiry in Urban Teaching	4
EDUC BC3061	Performance Assessment of Teaching	3

Requirement E - Liberal Arts and Sciences

Visit <https://education.barnard.edu/UrbanTeaching/LiberalArtsandSciencesRequirements> for more information.

Requirement F - Clinical Experiences

Visit <https://education.barnard.edu/UrbanTeaching/ClinicalExperiences> for more information.

* Courses offered at Columbia

Note: Senior year student teaching may conflict with other opportunities at Barnard (e.g., PSYC BC3465 Field Work # Research Seminar: Toddler Center, PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER). Students with these interests should arrange their schedules accordingly.

Secondary/Adolescent Education (To Teach Grades 7-12)

This program leads to the New York State Initial Certification in Adolescent Education (Grades 7-12) in the fields of English, Foreign and Ancient Languages, Mathematics, the Sciences, and Social Studies. Students must complete a total of 23-26 credits from the following course of study:

Requirement A - Educational Foundations For students who have already taken EDUC BC3032, PHIL UN2100, SOCI UN3225, or ECON BC3012 to fulfill Requirement A prior to Fall 2018 do not need to enroll in EDUC BC1510 to fulfill the requirement.

EDUC BC1510	EDUCATIONAL FOUNDATIONS	4
-------------	----------------------------	---

Requirement B - Psychology

Select one of the following: 3-4.5

PSYC BC1107	Psychology of Learning	
PSYC BC1115	Cognitive Psychology	
PSYC BC1129	Developmental Psychology	
PSYC BC2134	Educational Psychology	
PSYC BC3382	Adolescent Psychology	

PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR *
-------------	--

Requirement C - Pedagogical Elective

Select one of the following:

EDUC BC3050	Science in the City	
EDUC BC3052	Math and the City	
EDUC BC3055	Arts and Humanities in the City: Critical Literacy and Digital Storytelling	
EDUC BC3058	Science in the City II: Preparing Future Scientists Now	

Requirement D - Pedagogical Core

EDUC BC3025	Inclusive Approaches to Teaching Literacy: Theory and Practice	4
EDUC BC3054	Multicultural Secondary Pedagogy	4
EDUC BC3065	Secondary Student Teaching in Urban Schools	6
EDUC BC3064	Critical Inquiry in Urban Teaching	4
EDUC BC3061	Performance Assessment of Teaching	3

Requirement E - Liberal Arts and Sciences

Visit <https://education.barnard.edu/UrbanTeaching/LiberalArtsandSciencesRequirements> for more information.

Requirement F - Clinical Experiences

Visit <https://education.barnard.edu/UrbanTeaching/ClinicalExperiences> for more information.

Additional Urban Teaching Certification Requirements: Adolescent/Secondary

Students seeking certification in Adolescent Education must also complete 36 credits in the content area for which they seek certification. Typically, students major in the subject area for which they are seeking certification. Students must earn a grade of C or better for each course taken in the content core.

English:

A total of 36 credits of English.

Foreign Languages:

A total of 36 credits in French, German, Greek, Italian, Latin, or Spanish.

Mathematics:

A total of 36 credits of Mathematics.

Science:

A total of 36 credits in sciences including a minimum of 18 credits of collegiate-level study in the science or each of the sciences for which certification is sought: Biology, Chemistry, Physics, or Earth Science. Please note that psychology does not count as a science for NYS Teacher Certification. **

Social Studies:

A total of 36 credits, including 6 credits of American History; 6 credits of European or World History; 3 credits of non-Western study; and any other distribution to make 36 credits, chosen from credits in History, Political Science, Anthropology, Sociology, and Economics.

* Courses offered at Columbia

** Please note that some applied science courses will not be accepted.

Certification Requirements

The Urban Teaching program is accredited by AAQEP and approved by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (grades 1-6) or Adolescent Education (grades 7-12). New York State has reciprocity with most other states, allowing graduates of the program the ability to apply for certification in another state through our membership in the Interstate Certification Agreement.

Certification is based on demonstrated competency in both academic and field settings. Students are required to complete a minimum of 360 hours of educational based clinical experiences. 260+ hours must be supervised field based experiences. Students must pass the New York State Teacher Certification Examinations and the edTPA performance assessment. Also required are workshops in Child Abuse Identification; School Violence Intervention and Prevention; and the Dignity for All Students Act (DASA), offered at Teachers College.

REQUIREMENTS FOR THE EDUCATION STUDIES MINOR/SPECIAL CONCENTRATION

For Students Declaring the Education Studies Minor/Special Concentration Prior to Spring 2021

To complete the Minor (BC) or Special Concentration (CC/GS) in Education Studies, students must complete 20-24 points of course work, listed below.

The Education Studies track requires a minimum of six courses:

Requirement A - Educational Foundations

EDUC BC1510	EDUCATIONAL FOUNDATIONS	4
-------------	-------------------------	---

Requirement B - Educational Electives

Select two of the following: One Educational Elective course must be an EDUC course.

EDUC BC3030	Critical Pedagogies ***
EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY
EDUC BC3034	Families, Communities, and Schools
EDUC BC3040	Migration, Globalization, and Education
EDUC BC3042	Gender, Sexuality, and Schooling

EDUC BC3044	Education and Social Change in Comparative Global Contexts
EDUC BC3045	Complicating Class: Education and the Limits of Equity
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY
URBS UN3310	Race, Space, and Urban Schools
PHIL UN2100	Philosophy of Education
SOCI UN3225	Sociology of Education
SOCI UN3974	Sociology of Schools, Teaching and Learning *
ECON BC3012	Economics of Education
PSYC BC2134	Educational Psychology

Requirement C - Interdisciplinary Elective (formerly Educational Elective) **

Select one course with advanced approval from Education adviser. For a full list of courses that satisfy the Interdisciplinary Elective requirement, see <https://education.barnard.edu/EducationStudies/Requirements>. Advanced approval required for courses not listed on the website.

Requirement D - Pedagogical Elective

Select one of the following:

EDUC BC3030	Critical Pedagogies ***
EDUC BC3050	Science in the City
EDUC BC3052	Math and the City

Requirement E - Pedagogical Core

EDUC BC3051	Seminar in Urban Education	4
-------------	----------------------------	---

* Courses offered at Columbia

** Your final project or paper for the Educational Elective course should focus on educational issues and a copy of the project or paper must be submitted to the Education Program office for inclusion in your student file.

*** EDUC BC3030 *Critical Pedagogies* can count towards the Education Electives **or** the Pedagogical Elective requirement in Spring 2021 only.

For Students Declaring the Education Studies Minor/Special Concentration in Spring 2021 and Beyond

To complete the Minor (BC) or Special Concentration (CC/GS) in Education Studies, students must complete 20-24 points of course work, listed below.

The Education Studies track requires a minimum of six courses:

Requirement A - Educational Foundations

EDUC BC1510	EDUCATIONAL FOUNDATIONS	4
-------------	-------------------------	---

Requirement B - Educational Electives

Select three of the following: One Educational Elective course must be an EDUC course.

EDUC BC3030	Critical Pedagogies **
EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY
EDUC BC3034	Families, Communities, and Schools
EDUC BC3040	Migration, Globalization, and Education
EDUC BC3042	Gender, Sexuality, and Schooling
EDUC BC3044	Education and Social Change in Comparative Global Contexts
EDUC BC3045	Complicating Class: Education and the Limits of Equity
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY
URBS UN3310	Race, Space, and Urban Schools
AMST UN3931	Topics in American Studies (Sec. 002: Race, Poverty, and American Criminal Justice or Sec. 003: Equity in Higher Education)
CSER UN3928	Colonization/Decolonization
ECON BC3012	Economics of Education
PHIL UN2100	Philosophy of Education
PSYC BC2134	Educational Psychology
PSYC BC3363	Pedagogy for Higher Education in Psychology
PSYC BC3382	Adolescent Psychology
SOCI UN3225	Sociology of Education
SOCI W3923	Adolescent Society
SOCI UN3974	Sociology of Schools, Teaching and Learning *

Requirement C - Pedagogical Elective

Select one of the following:

EDUC BC3030	Critical Pedagogies **
EDUC BC3050	Science in the City
EDUC BC3052	Math and the City
EDUC BC3055	Arts and Humanities in the City: Critical Literacy and Digital Storytelling
EDUC BC3058	Science in the City II: Preparing Future Scientists Now

Requirement D - Pedagogical Core

EDUC BC3051	Seminar in Urban Education	4
-------------	----------------------------	---

* Courses offered at Columbia

** EDUC BC3030 *Critical Pedagogies* can count towards the Education Electives **or** the Pedagogical Elective requirement in Spring 2021 only.

REQUIREMENTS FOR THE URBAN TEACHING SPECIALIZATION

Urban Studies majors who wish to pursue certification should apply to the Education Program by the spring of their freshman year. We encourage students to plan carefully if they wish to pursue this option.

Urban Studies majors who have selected Urban Teaching as their area of specialization within the major should complete the following:

Requirement A - Educational Foundations

EDUC BC1510	EDUCATIONAL FOUNDATIONS	4
-------------	-------------------------	---

Requirement B - Psychology

Select one of the following:

PSYC BC1107	Psychology of Learning
PSYC BC1115	Cognitive Psychology
PSYC BC1129	Developmental Psychology
PSYC BC2134	Educational Psychology
PSYC BC3382	Adolescent Psychology
PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR *

Requirement C - Field Studies

Select one of the following:

EDUC BC3050	Science in the City
EDUC BC3052	Math and the City
EDUC BC3055	Arts and Humanities in the City: Critical Literacy and Digital Storytelling
EDUC BC3058	Science in the City II: Preparing Future Scientists Now
SOCI UN3974	Sociology of Schools, Teaching and Learning *

Requirement D - Pedagogical Core

EDUC BC3025	Inclusive Approaches to Teaching Literacy: Theory and Practice	4
EDUC BC3053	Multicultural Elementary Pedagogy	4
or EDUC BC3054	Multicultural Secondary Pedagogy	

* Courses offered at Columbia

REQUIREMENTS FOR THE URBAN EDUCATION SPECIALIZATION

Urban Studies majors who have selected Urban Education as their area of specialization within the major should complete the following:

Requirement A - Educational Foundations

EDUC BC1510	EDUCATIONAL FOUNDATIONS	4
-------------	-------------------------	---

Requirement B - Educational Electives

Select two of the following:

EDUC BC3030	Critical Pedagogies **
-------------	------------------------

EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY
EDUC BC3034	Families, Communities, and Schools
EDUC BC3040	Migration, Globalization, and Education
EDUC BC3042	Gender, Sexuality, and Schooling
EDUC BC3044	Education and Social Change in Comparative Global Contexts
EDUC BC3045	Complicating Class: Education and the Limits of Equity
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY
URBS UN3310	Race, Space, and Urban Schools

EDUC 1510	001/00355	T Th 4:10pm - 6:00pm Room TBA	Chandler Miranda	4.00	44/45

EDUC BC3045 Complicating Class: Education and the Limits of Equity. 4 points.

In this course, we start from the premise that a failure to understand what social class is and how social class matters in daily life stops us from having conversations about the possibilities and limitations of schooling and, as such, prevents us from doing what we can to improve the schooling experiences of poor and working-class students. Throughout the semester, we will work to “complicate class”, reconsidering what class is, why class matters, and how we can best think about the relationship between social class and schooling. You will develop a language for talking about class, considering the affordances and constraints of various conceptions of class. You will also leave with critical questions about the possibilities and limitations of relying on schools as a solution to social problems. Recognizing restraints, we will conclude by reflecting on how we might work toward creating more equitable learning environments for poor and working-class students.

Fall 2020: EDUC BC3045

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3045	001/00178	T Th 11:00am - 12:50pm Room TBA	Rachel Throop	4	22/24

EDUC BC3064 Critical Inquiry in Urban Teaching. 4 points.

Corequisites: *EDUC BC3063* or *EDUC BC3065*. Enrollment limited to student teachers enrolled in the Education Program. Designed to help student teachers develop as reflective practitioners who can think critically about issues facing urban schools, particularly how race, class and gender influence schooling; and to examine the challenges and possibilities for providing intellectually engaging, meaningful curriculum to all students in urban classrooms.

Fall 2020: EDUC BC3064

EDUC BC3025 Inclusive Approaches to Teaching Literacy: Theory and Practice. 4 points.

This seminar engages students in an exploration of how schools prepare students to be literate across multiple subject areas. Engaging students with theory and practice, we will look at how students learn to read and write, considering approaches for literacy instruction from early childhood through adolescence. Understanding that schools are required to meet the needs of diverse learners, we will explore literacy instruction for K-12 students with special needs, multilingual learners, and students from diverse cultural backgrounds.

Fall 2020: EDUC BC3025

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

EDUC BC3032 INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY. 4 points.

Prerequisites: The instructor's permission.

This course explores a broad continuum of educational policies, with a critical eye toward the impact these policies have on promoting equity and justice. Because no one course can do everything, our focus will be on educational policy in the United States. However, a major research assignment will be for you to do a critical analysis of one of these policies in the context of another country.

Fall 2020: EDUC BC3032

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3032	001/00180	M W 10:10am - 12:00pm Room TBA	Erika Kitzmiller	4	46/45

EDUC BC3040 Migration, Globalization, and Education. 4 points.

Globalization and mass migration are reconfiguring the modern world and reshaping the contours of nation-states. New technologies that facilitate the movement of information,

goods, and people across borders have made it easier for people to remain culturally, politically, economically and socially connected to the places from which they migrated. This seminar focuses on the experiences of the youngest members of these global migration patterns—children and youth—and asks: What do these global flows mean for educating young people to be members of the multiple communities to which they belong?

Fall 2020: EDUC BC3040

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3040	001/00706	M W 2:10pm - 4:00pm Room TBA	Thea Abu El-Haj	4	16/20

EDUC BC3050 Science in the City. 4 points.

Prerequisites: the instructor's permission.

In partnership with the American Museum of Natural History students investigate science, science pedagogical methods, and ways to use New York City as a resource for science teaching and learning. Sessions will be held at Barnard and the museum. Field trips and fieldwork required. Non-science majors pre-service elementary students and first year students, welcome. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective.

Fall 2020: EDUC BC3050

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3050	001/00172	T F 9:00am - 10:50am Room TBA	Althea Hoard	4	10/24

EDUC BC3051 Seminar in Urban Education. 4 points.

This seminar serves as the capstone course for students pursuing the Education Studies minor/special concentration or the Urban Studies major/concentration with an Urban Education Specialization.

The Seminar in Urban Education explores the historical, political and socio-cultural dynamics of urban education in the U.S. context. Over time, a range of social actors have intervened in the “problem” of urban education, attempting to reshape and reform urban schools. Others have disputed this “problem” focused approach, arguing that policy makers, teachers, and researchers should start from the strengths and capacities located in urban communities. Despite decades of wide ranging reform efforts, however, many urban schools still fail to provide their students with an adequate, equitable education. Seminar in Urban Education investigates this paradox by pursuing three central course questions: 1) How have various social actors tried to achieve equity in urban schools over time? 2) What are the range and variation of assets and challenges found in urban schools? and 3) Considering this history and context, what would effective reform in a global city like NYC look like? Students will engage these questions not only through course readings and seminar discussions, but through a 40-hour field placement in a New York City public

school classroom, extra-curricular program, or other education based site.

Fall 2020: EDUC BC3051

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

EDUC BC3063 Elementary Student Teaching in Urban Schools. 6 points.

Prerequisites: completion of *EDUC BC2052* or *EDUC BC2062* and *EDUC BC2055*, with grades of B or better. NYCDOE Fingerprinting.

Corequisites: EDUC BC3064. Enrollment limited.

Supervised student teaching in elementary schools includes creating lesson plans, involving students in active learning, using cooperative methods, developmentally appropriate assessment, and meeting the needs of diverse learners in urban schools. Teaching skills developed through weekly individual and/or group supervision meetings (to be scheduled at the beginning of the semester), conferences, and portfolio design. Requires 100 hours of teaching at two different grade levels, **full-time for one semester**. Note: Students are only permitted to leave their student teaching placements early twice a week, once for EDUC BC3064 and one other day for one additional course having a start time of 2 pm or later. Students are only permitted to take one additional course while enrolled in *EDUC BC3063* and *EDUC BC3064*.

Spring 2021: EDUC BC3063

Spring A Courses

EDUC BC3042 Gender, Sexuality, and Schooling . 4 points.

Broadly, this course explores the relationship between gender, sexuality, and schooling across national contexts. We begin by considering theoretical perspectives, exploring the ways in which gender and sexuality have been studied and understood in the interdisciplinary field of education. Next, we consider the ways in which the subjective experience of gender and sexuality in schools is often overlooked or inadequately theorized. Exploring the ways that race, class, citizenship, religion and other categories of identity intersect with gender and sexuality, we give primacy to the contention that subjectivity is historically complex, and does not adhere to the analytically distinct identity categories we might try to impose on it.

URBS UN3310 Race, Space, and Urban Schools. 3 points.

Many people don’t think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a “neighborhood school”? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory.

EDUC BC3030 Critical Pedagogies. 4.00 points.

This course explores education as a process through which critical consciousness and epistemic justice combat oppression in communities. Students will connect seminal work by critical pedagogues, such as Paulo Freire and bell hooks, to systemic educational challenges and lived experience. As a class, we will investigate power dynamics and structural inequalities at the systemic, institutional, interpersonal and individual levels. Students will problem-pose, dialogue and create pedagogical tools through praxis, by integrating the theory learned in the class to educational practice

EDUC 3030	001/00478	M W 10:10am - 12:00pm Room TBA	Jennifer Rosales	4.00	26/24

EDUC BC3034 Families, Communities, and Schools. 4.00 points.

This course seeks to examine the role families and communities play in P-12 public schools in the United States, with a focus on urban school systems. We will be using New York City as a case study, and comparing what we see happening in the nation's largest public school district to other districts around the country. While much of our focus will be on the NYC Department of Education, which serves approximately 1.3 million students each year, students will be asked to look close to home to examine the relationships between families, communities, educators and educational institutions in their own communities

EDUC BC3052 Math and the City. 4 points.

Prerequisites: the instructor's permission.

In partnership with NYC public school teachers, students will have opportunities to engage in mathematical learning, lesson study, curriculum development, and implementation, with a focus on using the City as a resource. Students will explore implications for working with diverse populations. Non-math majors, pre-service elementary students and first-year students welcome. Fieldwork and field trips required. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective.

EDUC BC3061 Performance Assessment of Teaching. 3 points.

Open to Urban Teaching students in the Education Program.

EDUC BC3250 EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY. 4 points.

The rise in political polarization and social inequality over the past few decades has challenged the ideals that public schools were founded on nearly two centuries ago. In the past few years, we have witnessed a surge in homophobic, racist, misogynist, and xenophobic rhetoric in our society and our schools. At the same time, teachers in classrooms across this country have been engaged in the difficult work of challenging oppression and injustice in their schools, communities, and nation. These teachers know that the future of our democracy is at stake. Using a historical and sociological framework, this course examines the past and present conditions that have led

to political polarization, escalating inequality, and persistent injustice. It seeks to examine the lineage of racism, sexism, nativism, and imperialism on our nation and its schools and to consider the extent to which these challenges are uniquely American or part of a more global phenomenon. It offers an introduction to the deep current of American social, political, and economic culture that many argue has produced the challenges that our nation faces today: personal and political gain marred by intolerance, derived from wealth, and rooted in the history of segregation, sexism, and exploitation. Instead of seeing these challenges as separate entities, the course acknowledges the intersectional nature of power and politics. Students will consider how these conditions affect their roles as educators and the lives of the youth and families in their schools and communities. They will leave the course with a deeper appreciation and understanding of the historical and sociological antecedents that have contributed to polarization, inequity, and injustice around the globe.

Cross-Listed Courses

ECON BC3012 Economics of Education. 3 points.

Prerequisites: ECON BC3035 and ECON BC2411 or permission of the instructor.

Analyzes education policies and education markets from an economic perspective. Examines challenges that arise when researchers attempt to identify the causal effects of inputs. Other topics: (1) education as an investment, (2) public school finance, (3) teacher labor markets, (4) testing/accountability programs, (5) school choice programs, and (6) urban public school reforms.

Fall 2020: ECON BC3012

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3012	001/00262	M T W Th 2:40pm - 3:55pm Room TBA	Randall Reback	3	35

PHIL UN2100 Philosophy of Education. 3 points.

Drawing on classical and contemporary sources, this course will introduce students to a variety of texts that address the philosophical consideration of education, including its role in the development of the individual and the development of a democratic society. Readings from Plato, Rousseau, Dewey, and others.

PSYC BC2134 Educational Psychology. 3 points.

Prerequisites: BC1001 or permission of the instructor.

Through a participative classroom model, the major theories of child and adolescent development and learning fundamental to the educative process are examined. Analysis of applications and implications of psychological knowledge for classroom teaching through observations and research in elementary and secondary school classes. Examines models of instruction and assessment; motivation, teaching, and learning strategies; and gender, economic, and racial issues.

PSYC BC3382 Adolescent Psychology. 4 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I)., BC: Fulfillment of General Education Requirement: Social Analysis (SOC II).

Prerequisites: BC1001 and BC1129 Developmental Psychology or permission of the instructor. Enrollment limited to 20 senior majors. Barnard students receive priority.

Examines adolescent development in theory and reality. Focuses on individual physiological, sexual, cognitive, and affective development and adolescent experiences in their social context of family, peers, school, and community. Critical perspectives of gender, race and ethnicity, sexuality, and "teen culture" explored.

URBS UN3310 Race, Space, and Urban Schools. 3 points.

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory.

Spring 2021: URBS UN3310

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
URBS 3310	001/00233	T Th 4:10pm - 6:00pm Room TBA	Chandler Miranda	3	48/50

ENGLISH AND COMPARATIVE LITERATURE

Departmental Office: 602 Philosophy; 212-854-3215

<http://www.english.columbia.edu>

Director of Undergraduate Studies: Prof. Molly Murray, 406 Philosophy; 212-854-4016; mpm7@columbia.edu

Departmental Adviser:

Prof. Molly Murray, 406 Philosophy; mpm7@columbia.edu

The program in English fosters the ability to read critically and imaginatively, to appreciate the power of language to shape thought and represent the world, and to be sensitive to the ways in which literature is created and achieves its effects. It has several points of departure, grounding the teaching of critical reading in focused attention to the most significant works of English literature, in the study of the historical and social conditions surrounding literary production and reception, and in theoretical reflection on the process of writing and reading and the nature of the literary work./p>

The courses the department offers draw on a broad range of methodologies and theoretical approaches, from the formalist to the political to the psychoanalytical (to mention just a few). Ranging from the medieval period to the 21st century, the department teaches major authors alongside popular culture, traditional literary genres alongside verbal forms that cut across media, and canonical British literature alongside postcolonial, global, and trans-Atlantic literatures.

At once recognizing traditional values in the discipline and reflecting its changing shape, the major points to three organizing principles for the study of literature—history, genre, and geography. Requiring students not only to take a wide variety of courses but also to arrange their thinking about literature on these very different grids, the major gives them broad exposure to the study of the past, an understanding of the range of forms that can shape literary meaning, and an encounter with the various geographical landscapes against which literature in English has been produced.

ADVISING

Students are not assigned specific advisers, but rather each year the faculty members serving on the department's Committee on Undergraduate Education (CUE) are designated undergraduate advisers (see above). Upon declaring a major or concentration in English, students should meet with the director of undergraduate studies or a delegated faculty adviser to discuss the program, especially to ensure that students understand the requirements.

Students must fill out a Major Requirements Worksheet early in the semester preceding graduation. The worksheet must be reviewed by an adviser and submitted to 602 Philosophy before the registration period for the final semester. The worksheet is available in the English Department or on-line at <http://english.columbia.edu/undergraduate/major-requirements>. It is this worksheet—not the Degree Audit Report (DAR)—that determines eligibility for graduation as an English major or concentrator.

COURSE INFORMATION

Lectures

Generally, lectures are addressed to a broad audience and do not assume previous course work in the area, unless prerequisites are noted in the description. The size of some lectures is limited. Senior majors have preference unless otherwise noted, followed by junior majors, followed by senior and junior non-majors. Students are responsible for checking for any special registration procedures on-line at <http://english.columbia.edu/courses>.

Seminars

The department regards seminars as opportunities for students to do advanced undergraduate work in fields in which they have already had some related course experience. With the exception of some *CLEN* classes (in which, as comparative courses, much material is read in translation), students' admission to a seminar presupposes their having taken ENGL UN3001 Literary Texts, Critical Methods. During the three weeks preceding the registration period, students should check <http://english.columbia.edu/courses> for application instructions for individual seminars. Applications to seminars are usually due by the end of the week preceding registration. Students should always assume that the instructor's permission is necessary; those who register without having secured the instructor's permission are not guaranteed admission.

DEPARTMENTAL HONORS

Writing a senior essay is a precondition, though not a guarantee, for the possible granting of departmental honors. After essays are submitted, faculty sponsors deliver a written report on the essay to the department's Committee on Undergraduate Education (CUE), with a grade for the independent study and, if merited, a recommendation for honors. CUE considers all the essays, including sponsor recommendations, reviews students' fall semester grades, and determines which students are to receive departmental honors. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

THE DEGREE AUDIT REPORTING SYSTEM (DARS)

The DAR is a useful tool for students to monitor their progress toward degree requirements, but it is not an official document for the major or concentration, nor should it replace consultation with departmental advisers. The department's director of undergraduate studies is the final authority on whether requirements for the major have been met. Furthermore, the DAR may be inaccurate or incomplete for any number of reasons—for example, courses taken elsewhere and approved for credit do not show up on the DAR report as fulfilling a specific requirement.

ONLINE INFORMATION

Other departmental information—faculty office hours, registration instructions, late changes, etc.—is available on the [departmental website](#).

GUIDELINES FOR ALL ENGLISH AND COMPARATIVE LITERATURE MAJORS AND CONCENTRATORS

Declaring a Major in English

Upon declaring a major in English, students should meet with either the director of undergraduate studies or a departmental adviser to discuss the program. Students declaring a major should obtain a Major Requirements Worksheet from 602 Philosophy or [on-line](#), which outlines the requirements.

Additional information, including events and deadlines of particular relevance to undergraduates, is provided at <http://english.columbia.edu/undergraduate>, the department's undergraduate homepage. The sidebar on this page provides links to pages with details about undergraduate advising, major and concentration requirements, course options and restrictions, registration procedures, the senior essay, and writing prizes, as well as links to downloadable worksheets for the major and concentration and to course distribution requirement lists, past and present. For detailed information about registration procedures, students should consult <http://english.columbia.edu/courses>, which explains the requirements and enables students to monitor their own progress.

Newly declared majors should contact the undergraduate assistant in 602 Philosophy Hall and request that their names be added to the department's electronic mailing list for English majors and concentrators. Because important information now routinely is disseminated through e-mail, it is crucial that students be on this list.

Literary Texts, Critical Methods

The introductory course ENGL UN3001 Literary Texts, Critical Methods, together with its companion seminar, ENGL UN3011 Literary Texts, Critical Methods seminar, is required for the English major and concentration. It should be taken by the end of the sophomore year. Fulfillment of this requirement is a factor in admission to seminars and to some lectures. This once-a-week faculty lecture, accompanied by a seminar led by an advanced graduate student in the department, is intended to introduce students to the study of literature. Students read works from the three major literary modes (lyric, drama, and narrative), drawn from premodern to contemporary literature, and learn interpretative techniques required by these various

modes or genres. This course does not fulfill any distribution requirements.

Senior Essay

The senior essay program is an opportunity for students to explore in depth some literary topic of special interest to them, involving extensive background reading and resulting in an essay (8,000–15,000 words) that constitutes a substantial and original critical or scholarly argument. Students submit proposals in September of their senior year, with acceptance contingent upon the quality of the proposal and the student's record in the major. Students who are accepted are assigned a faculty sponsor to supervise the project, from its development during the fall semester to its completion in the spring. It is for the spring semester, not the fall, that students officially register for the course, designated as ENGL UN3999 Senior Essay. Senior essays are due in early April.

Course Options and Restrictions

1. No course at the 1000-level may be counted toward the major.
2. Speech courses may not be counted toward the major.
3. Two writing courses or two upper-level literature courses taught in a foreign language, or one of each, may count toward the major, though neither type of course fulfills any distribution requirement. Writing courses that may be applied toward the major include those offered through Columbia's undergraduate Creative Writing Program and through Barnard College.
4. Comparative literature courses sponsored by the department (designated as **CLEN**) may count toward the major. **Those sponsored by other departments** (e.g. **CLFR** - Comp Lit French, **CPLS** - Comp Lit and Society) **are not counted toward the major without permission of the director of undergraduate studies**. Literature courses taught in English in language departments do not count toward the major.
5. No more than two courses taken during the summer session may be counted toward the major.
6. Courses offered through the Barnard English Department may count toward the major or concentration. Before taking Barnard courses, students should verify with the director of undergraduate studies whether and how such courses may count toward the major.
7. For courses taken abroad or at other American institutions to count toward the major, students must obtain approval of the director of undergraduate studies.
8. To register for more than 42 points (including advanced standing credit) in English and comparative literature, a student majoring in English must obtain permission of the director of undergraduate studies.
9. No more than five courses taken elsewhere may be applied to the major, four to the concentration.
10. One independent study (for at least 3 points) may count toward the major but cannot satisfy any distribution requirements; likewise, the *Senior Essay* may count toward the major but fulfills no requirements. Students **may not count both** an *Independent Study* and the *Senior Essay* toward the major.
11. Courses assigned a grade of D may not be counted toward the major.
12. Only the first course taken to count toward the major can be taken Pass/D/Fail.

MAJOR IN ENGLISH

Please read *Guidelines for all English and Comparative Literature Majors and Concentrators* above.

Ten departmental courses (for a minimum of 30 points) and, in the process, fulfillment of the following requirements. See course information above for details on fulfilling the distribution requirements.

1. ENGL UN3001 Literary Texts, Critical Methods and ENGL UN3011 Literary Texts, Critical Methods seminar
2. **Period distribution:** Three courses primarily dealing with periods before 1800, only one of which may be a course in Shakespeare
3. **Genre distribution:** One course in each of the following three generic categories:
 - Poetry
 - Prose fiction/narrative
 - Drama/film/new media
4. **Geography distribution:** One course in each of the following three geographical categories:
 - British
 - American
 - Comparative/global (comparative literature, postcolonial, global English, trans-Atlantic, diaspora)

Course Distribution Lists are available in the department and on-line at <http://english.columbia.edu/course-distribution-lists> to help students determine which courses fulfill which requirements. **A single course can satisfy more than one distribution requirement.** For example, a Shakespeare lecture satisfies three requirements at once: not only does it count as one of the three required pre-1800 courses it also, at the same time, fulfills both a genre and a geography distribution requirement (drama and British, respectively). Courses not on the distribution list may count toward the major requirements **only** with the permission of the director of undergraduate studies. Two writing courses or upper-level literature courses

taught in a foreign language, or one of each, may count toward the ten required courses.

CONCENTRATION IN ENGLISH

Please read *Guidelines for all English and Comparative Literature Majors and Concentrators* above.

Eight departmental courses and, in the process, fulfillment of the following requirements. See course information above for details on fulfilling the distribution requirements.

1. ENGL UN3001 Literary Texts, Critical Methods and ENGL UN3011 Literary Texts, Critical Methods seminar
2. **Period distribution:** Two courses dealing with periods before 1800, only one of which may be a course in Shakespeare
3. **Genre distribution:** Two courses, each chosen from a different genre category (see above)
4. **Geography distribution:** Two courses, each chosen from a different geography category (see above)

See the Course Distribution Lists, available in the department or on-line at <http://english.columbia.edu/course-distribution-lists>, to determine which courses fulfill which requirements. All of the restrictions outlined for the English major also apply for the concentration in English.

COMPARATIVE LITERATURE PROGRAM

Students who wish to major in comparative literature should consult the *Comparative Literature and Society* section of this Bulletin.

SPRING 2021

INTRODUCTION TO THE MAJOR

ENGL UN3001 Literary Texts, Critical Methods. 4 points.

Prerequisites: Students who register for ENGL UN3001 must also register for one of the sections of ENGL UN3011 Literary Texts, Critical Methods.

This course is intended to introduce students to the advanced study of literature. Students will read works from different genres (poetry, drama, and prose fiction), drawn from the medieval period to the present day, learning the different interpretative techniques required by each. The course also introduces students to a variety of critical schools and approaches, with the aim both of familiarizing them with these methodologies in the work of other critics and of encouraging them to make use of different methods in their own critical writing. This course (together with the companion seminar *ENGL UN3011*) is a requirement for the English Major and Concentration. It should be taken as early as possible in a student's career. Fulfillment of this requirement will be a factor in admission to seminars and to some lectures.

Fall 2020: ENGL UN3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ENGL UN3011 Literary Texts, Critical Methods seminar. 0 points.

Prerequisites: Students who register for ENGL UN3011 must also register for ENGL UN3001 Literary Texts, Critical Methods lecture.

This seminar, led by an advanced graduate student in the English doctoral program, accompanies the faculty lecture *ENGL UN3001*. The seminar both elaborates upon the topics taken up in the lecture and introduces other theories and methodologies. It also focuses on training students to integrate the terms, techniques, and critical approaches covered in both parts of the course into their own critical writing, building up from brief close readings to longer research papers.

MEDIEVAL

ENGL UN3048 British Literature to 1500. 3.00 points.

This course will introduce some of the most fascinating texts of the first eight hundred years of English literature, from the

period of Anglo-Saxon rule through the Hundred Years' War and beyond—roughly, 700–1500 CE. We'll hit on some texts you've heard of – Beowulf and selections from Chaucer's Canterbury Tales – while leaving time for some you may not have encountered – Marie de France's Lais and Margery of Kempe's Book. Along the way, we'll also hone skills of reading, writing, and oral expression crucial to appreciating and discussing literature in nuanced, supple ways. If you take this course, you'll discover how medieval literature is both a mirror and a foil to modern literature. You'll explore the plurilingual and cross-cultural nature of medieval literary production and improve (or acquire!) your knowledge of Middle English. Plus, you'll flex your writing muscles with two papers

Spring 2021: ENGL UN3048

ENGL 3048	001/11140	T Th 11:40am - 12:55pm Online Only	Hannah Weaver	3.00	45/54

ENGL GU4091 Introduction to Old English Language & Literature. 3 points.

(Lecture). This class is an introduction to the language and literature of England from around the 8th to the 11th centuries. Because this is predominantly a language class, we will spend much of our class time studying grammar as we learn to translate literary and non-literary texts. While this course provides a general historical framework for the period as it introduces you to the culture of Anglo-Saxon England, it will also take a close look at how each literary work contextualizes (or recontextualizes) relationships between human and divine, body and soul, individual and group, animal and human. We will be using Mitchell and Robinson's *An Introduction to Old English*, along with other supplements. We will be looking at recent scholarly work in the field and looking at different ways (theoretical, and other) of reading these medieval texts.

Requirements: Students will be expected to do assignments for each meeting. The course will involve a mid-term, a final exam, and a final presentation on a Riddle which will also be turned in.

Fall 2020: ENGL GU4091

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ENGL 4091	001/12423	T 8:10am - 10:00am Online Only	David Yerkes	3	16/18

ENGL GU4790 ADVANCED OLD ENGLISH. 4.00 points.

Prerequisites: Students must have previous knowledge of Old English -- minimum one semester.

The aim of this course is twofold: one, to provide an advanced-level course in Old English literature involving weekly translation; and two, to explore the shape and possibilities of what "Anglo-Saxon spirituality" might be. The primary texts

we will be translating will consist in homilies, poetry, treatises, sermons, hymns, prayers, penitentials, letters, and so called "secular" poetry like riddles. We will aim at covering selected materials from the four main manuscripts of Anglo-Saxon poetry (Vercelli, Junius, Nowell, and Exeter) to examine the extent to which they celebrate or veil theological interests. Part our time will involve assessing the prevalent distinction between secular and religious cultures, the relation between materiality and the spiritual, the role of affect in cultivating belief and piety, and the relation between Christian and non-Christian cultures and beliefs. Secondary theological materials will be read in translation including Paschasius Radbertus, Ratramnus, Hincmar, Alcuin, Aldhelm, Jerome, Gregory, and Augustine. Selections of Old Norse mythology and runic texts will also be included. The class will explore the role of the church in Anglo-Saxon England, debates about the impact of the Benedictine Reform, and the relation between art and theology.

RENAISSANCE

ENGL UN3026 RENAISSANCE ENGLAND AND THE POETRY OF EXPERIMENT. 4.00 points.

In this seminar, we will study English Renaissance poetry in light of the period's obsession with the experimental. Prior to the English Renaissance, "experiment" was simply a synonym for "experience." But in the mid-sixteenth century, the term begins a curious shift, taking on a new, far different meaning: an "experiment" becomes an active process, a way of creating new knowledge not by passively observing the world but by acting on it and studying the results. While best known today for its lasting influence on the study of science, this shift produced a culture of experimentation that pervaded England in the sixteenth and seventeenth centuries, provoking social and cultural experiments that tested and challenged political structures, religious practices and identities, and accepted knowledge about the natural world and humanity's place in it. At the same time, the culture of experiment extended into literature: Renaissance poets experimented, with dizzying frequency, with new forms, genres, techniques, and subjects to produce novel understandings about what a poem was and what sorts of things it could do; poetic experiments, in other words, became a way of responding to and influencing social and cultural experiments. Poets, like their scientific counterparts, did not limit themselves to observing and describing the world around them—they in turn experimented on it through their written work, testing new forms and new techniques of writing as methods for describing this new culture of experiment

ENGL GU4232 TRADE AND TRAFFIC WITH EARLY MODERN ENGLAND. 3 points.

This lecture course explores England's sense of itself in relation to the rest of the world in the late sixteenth and seventeenth centuries. It will examine the hopes and fears provoked by the trade and traffic between the English and other peoples, both inside and outside the country's borders, and raise questions of economics, race, ethnicity, religion, nationality, immigration, and slavery. The central materials are familiar and unfamiliar English plays, by William Shakespeare, Christopher Marlowe, Philip Massinger, John Fletcher, and others, which we will study alongside economic treatises, acts and proclamations, and travel narratives.

18TH AND 19TH CENTURY**ENGL UN3482 LIVES OF PROPERTY IN THE COLONIAL ATLANTIC WORLD. 4.00 points.**

In this course, we'll ask how colonial models of property and personhood shaped both the eighteenth-century Atlantic world and the world we continue to inhabit today. Drawing on critical work in Indigenous Studies, Black Studies, and Gender and Sexuality Studies, we'll examine the ways in which political and economic ideas associated with the Enlightenment helped to produce racialized and gendered subject positions that were coded as pathological and subordinate. Through readings of eighteenth-century fiction and poetry, political and philosophical treatises, and autobiographical narratives, we will explore how the notion of a "possessive individual" affected the lives of laborers, women, indigenous peoples, and enslaved Africans. In addition to our eighteenth-century texts, we'll turn to a number of more recent "texts" (including podcasts and contemporary new media) as a way of grappling with the ongoing reality of settler colonial histories. Throughout the class, we will look to find ways of moving beyond representations of violence and conquest. We will look for examples of personhood that emphasize porosity and

interconnection, rather than domination and separateness—for examples of freedom that involve communal practices of use and dwelling, rather than individual ownership

Spring 2021: ENGL UN3482

ENGL UN3691 DESIRE AND DISGUST IN THE EIGHTEENTH CENTURY. 4.00 points.

The literature of the eighteenth century is often imagined as a corpus of excessively long novels about excessively polite people writing love letters and fainting. But as often as you encounter refined sensibility, you are almost as likely to encounter nasty practical jokes, bodily fluids, pornography and streets flowing with sewage, sometimes all in the same text. This course aims to use two opposite emotions, desire and disgust, to unsettle popular understandings of eighteenth-century literature, and to try and understand what drew readers in, and what repelled them. What happens when the Age of Reason, or the Age of Politeness is not so reasonable or polite? In what ways did eighteenth-century authors understand attraction and aversion, and how did they narrate it? How were desire and disgust gendered, and how did these ideas inscribe themselves onto bodies? By asking these questions, we can start to understand not only what eighteenth-century readers found desirable or disgusting, but also what they found disgusting about sexuality, and what delighted them about disgust

ENGL UN3789 AMERICAN NATURE WRITING TO 1900. 4.00 points.

The course is a survey of canonical texts from the American Literary Canon, with emphasis on how these writers experienced the natural world. Some of them had to deal with extreme cold, others with tropical heat. Some of them encountered abundance, others sparsity and famine. They all encountered new life forms – from marine life to birds, reptiles and animals. They had to cope with frequent earthquakes and hurricanes, and classify newly discovered species of vegetal life. What they saw, however, was read not only through the lenses of natural history, but also theologically and politically. For some, the natural world was rich with signs sent by God for them to interpret, for others it was a political space that they organized according to the a theocratic or plantation logic. The class will therefore also pay special attention to politics, and investigate how the ecological spaces that the colonists encountered shaped their politics and ethics

ENGL GU4400 Romanticism. 3 points.

This course is designed as an overview of major texts (in poetry and prose), contexts, and themes in British Romanticism. The movement of Romanticism was born in the ferment of revolution, and developed alongside so many of the familiar features of the modern world—features for which Romanticism provides a vantage point for insight and critique. As we read authors including William Blake, Jane Austen, John Keats, Mary Shelley, and many others, we will situate our discussions around the following key issues: the development of individualism and new formations of community; industrialization and ecology (changes in nature and in the very conception of “nature”); and slavery and abolition.

ENGL GU4801 HISTORY OF ENGLISH NOVEL I. 3.00 points.

This course on the eighteenth-century emergence of the modern novel centers on a work that is only loosely a novel and may in fact be an anti-novel or a parody of novels: *The Life and Opinions of Tristram Shandy, Gentleman* (1759–67). Laurence Sterne wrote his brilliant, zany, and moving work of experimental fiction sporadically over a stretch of more than seven years, leaving its shape open and its conclusion unresolved. A story about life and also about the difficulty of telling a life story, the tale ends before it begins; it's postmodern way ahead of time. It eventually won the hearts of readers as different as Thomas Jefferson, Karl Marx, and Virginia Woolf. In its own day *Tristram Shandy* was published one or two volumes a time, so that Sterne could address in later parts of the story the reactions that his contemporaries—both the fans and the haters—voiced about earlier parts. We will try to replicate this reading experience over the span of the semester, working through the nine-volume text in its original installments. In the gaps in between, we will sample other works to establish a partial history of the novel's development both before Sterne and after him. Among our topics of recurring interest: reading and education, satire and emotion, selfhood and memory, religion and home, sex and marriage, race and captivity

20TH AND 21ST CENTURY

MDES UN3121 Literature and Cultures of Struggle in South Africa. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Generations of resistance have shaped contemporary life in South Africa -- in struggles against colonialism, segregation, the legislated racism known as apartheid, and the entrenched inequalities of the post-apartheid era. Two constants in this history of struggle have been youth as a vanguard of liberation movements and culture as a "weapon of struggle." As new generation of South African youth -- the "born frees" -- has now taken to the streets and social media to "decolonize" the university and claim their education as a meaningful right, this course traces the ways that generations of writers, artists, and activists have faced censorship, exile, and repression in an ongoing struggle to dismantle apartheid and to free the mind, "the most powerful weapon in the hands of the oppressor" according to Black Consciousness activist Steve Biko. This course traces the profoundly important roles that literature and other cultural production (music, photography, film, comics, Twitter hashtags like #rhodesmustfall and #feesmustfall) have played in struggle against apartheid and its lingering afterlife. Although many of our texts were originally written in English, we will also discuss the historical forces, including nineteenth-century Christian missions and Bantu Education, as well as South Africa's post-1994 commitment to being a multilingual democracy, that have shaped the linguistic texture of South African cultural life.

ENGL UN3232 COUNTERARCHIVES. 4.00 points.

While historical records have long been the source from which we draw our picture of the past, it is with literature and art that we attempt to speculatively work out that which falls between the cracks of conventional archival documentation, that which cannot be contained by historical record—emotion, gesture, the sensory, the sonic, the inner life, the afterlife, the neglected and erased. This course will examine how contemporary black writers have imagined and attempted to represent black life from the late 17th to the early 20th

centuries, asking what fiction can tell us about history. Reading these works as alternative archives, or “counterarchives,” which index the excess and fugitive material of black histories in the Americas, we will probe the uses, limits, and revelations of historical fictions, from the experimental and realist novel, to works of poetry and drama. Drawing on the work of various interdisciplinary scholars, we will use these historical fictions to explore and enter into urgent and ongoing conversations around black life # death, African-American history # memory, black aesthetics, and the problem of “The Archive.”

ENGL UN3626 Great Short Works of American Prose. 4 points.

The aim of this course is to read closely and slowly short prose masterworks written in the United States between the mid-19th century and the mid-20th century, and to consider them in disciplined discussion. Most of the assigned works are fiction, but some are public addresses or lyrical or polemical essays. We will read with attention to questions of audience and purpose: for whom were they written and with what aim in mind: to promote a cause, make a case for personal or political action, provoke pleasure, or some combination of all of these aims? We will consider the lives and times of the authors but will focus chiefly on the aesthetic and argumentative structure of the works themselves.

ENGL GU4622 African-American Literature II. 3 points.

(Lecture). This survey of African American literature focuses on language, history, and culture. What are the contours of African American literary history? How do race, gender, class, and sexuality intersect within the politics of African American culture? What can we expect to learn from these literary works? Why does our literature matter to student of social change? This lecture course will attempt to provide answers to these questions, as we begin with Zora Neale Hurston's *Their Eyes Were Watching God* (1937) and Richard Wright's *Native Son* (1940) and end with Melvin Dixon's *Love's Instruments* (1995) with many stops along the way. We will discuss poetry, fiction, drama, and non-fictional prose. Other authors include Ralph Ellison, James Baldwin, Gwendolyn Brooks, Malcolm X, Ntozake Shange, Audre Lorde, and Toni Morrison. There are no prerequisites for this course. The formal assignments are two five-page essays and a final examination. Class participation will be graded.

CLEN GU4741 Cultural Appropriation and World Literature. 4 points.

What does it mean to treat culture, literature, and identity as forms of property? This course will look at the current debates around cultural appropriation in relation to the expanding field of world literature. In many ways, the two discourses seem at odds: the ethno-proprietary claims that underpin most arguments against cultural appropriation seem to conflict with the more cosmopolitan pretenses of world literature. Nonetheless, both discourses rely on some basic premises that treat culture and cultural productions as forms of property and expressions of identity (itself often treated as a form of property). “Appropriation” is a particularly rich lens for looking at processes and conceptions of worlding and globalization, because some version of the idea is central to historical theories of labor, economic production, land claims, colonialism, authorship, literary translation, and language acquisition. This is not a course in “world literature” as such; we will examine a half dozen case studies of literary/cultural texts that have been chosen for the ways in which they open up different aspects of the problematics of reducing culture to an econometric logic of property relations in the world today.

CLEN GU4742 WORLD FICTION SINCE 1965. 3.00 points.

In the period since 1965, fiction has become global in a new sense and with a new intensity. Writers from different national traditions have been avidly reading each other, wherever they happen to come from, and they often resist national and regional labels altogether. If you ask the Somali writer Nuruddin Farah whether the precocious child of Maps was inspired by Salman Rushdie's *Midnight's Children*, he will answer (at least he did when I asked him) that he and Rushdie both were inspired by Sterne's *Tristram Shandy* and Grass's *The Tin Drum*. At the same time, the human experiences around which novelists organize their fiction are often themselves global, explicitly and powerfully but also mysteriously. Our critical language is in some ways just trying to catch up with innovative modes of storytelling that attempt to be responsible to the global scale of interconnectedness on which, as we only rarely manage to realize, we all live. Authors will include some of the following: Gabriel Garcia Márquez, Jamaica Kincaid, W.G. Sebald, Elena Ferrante, and Zadie Smith

CLEN GU4840 Jazz and the Literary Imagination. 3 points.

This course will focus on the interwoven nature of jazz and literature throughout the 20th and early 21st century. We will consider the ways that jazz has been a source of inspiration for a variety of twentieth-century literatures, from the poetry of the Harlem Renaissance to African American drama and contemporary fiction. Our readings and musical selections highlight creative ideas and practices generated through the formal and thematic convergences of jazz and literature, allowing us to explore questions such as: How do writers capture the sounds and feelings of different musical forms within fictional and non-fictional prose? In what ways might both music and literature (and/or their points of intersection) represent ideas of black identity and consciousness? How can certain musical concepts and terms of analysis (improvisation, rhythm, syncopation, harmony) be applied to practices of writing? How does music suggest modes of social interaction or political potential to be articulated in language?

SPECIAL TOPICS**ENGL UN3394 How Writers Think: Pedagogy and Practice. 4 points.**

Prerequisites: Permission of instructor.

(Seminar). This course uses contemporary philosophies of research and writing to train students to become writing center and library consultants. Readings will highlight major voices in rhetoric and composition research, with an emphasis on collaborative learning theory. We will ground our study in hands-on teaching experiences: students will shadow Columbia Writing Center consultants and research librarians and then practice strategies they learn in consultation with other students. Those who successfully complete this course will be eligible to apply for a peer writing consultant job in the Columbia Writing Center. This course is co-taught by the director of the Writing Center and the undergraduate services librarian.

CLEN W3906 Poetic Modernism. 0 points.

(Seminar). Modernism can find its roots anywhere from the fall of Constantinople in 1453 to the turn of the 20th century; and it finds them differently depending on whether one refers to "modernism" or "modernity." For the purposes of this class, modernism's beginning will be situated in about the middle of the nineteenth century, in Baudelaire's use of the neologism *modernité* to describe the new urban (and colonialist) sensibility that emerged in the Paris of the time, and more particularly in the seismic poetic shifts that then began to take place. And although many versions or trajectories of poetic modernism can be traced, we will attempt to follow a series of lines that tie the French version of it to the emergence of diverse American voices. Poets to be discussed will include Rimbaud, Apollinaire, Ponge, Crane, Hughes, Eliot, Moore, Stevens and Williams. **Application instructions:** E-mail Aaron Robertson (ar3488@columbia.edu) with your name, school, major, year of study, and relevant courses taken, along with a brief statement

about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available.

CPLS GU4800 Advanced Topics in Medical Humanities. 3.00 points.

Not offered during 2020-21 academic year.

It is impossible to study Medical/Health Humanities now without emphasizing the COVID-19 pandemic and the social disparities it casts into relief. This class studies how the arts can provide access to voices and perspectives on illness and health disparities that might be overlooked in news coverage, historical and sociological research on the current pandemic. This class begins by introducing the field of Medical/Health Humanities and the critical questions and tools it provides. We will use these perspectives to study narrative and visual representations in different media that address the intersections of social inequity, biomedical pandemic, and aesthetic forms. Our study of representations will be divided into four parts. 1. The last great global pandemic. Representations of AIDS epidemic highlight the impact of social stigma on public health and medical care, as well as the use of art as an agent of activism and change. We will consider such works as Tony Kushner's *Angels in America*, Charles Burns's *Black Hole*, short stories, and the art produced within and in response to the ACT-UP movement. 2. Race and medical inequity. We study the racialization of genetic science, and its connection new forms of white supremacy and a history of racialized health disparities. Our readings include Rebecca Skloot's *Immortal Life of Henrietta Lacks*, the poetry of Maya Angelou and Paul Lawrence Dunbar, and the speculative fiction of N.K. Jemison. 3. Fictional representations of pandemic that illuminate real life disparities in health and access to medical care will set the stage for our study of the current pandemic. We will read Emily St. John Mandel's *Station Eleven* and Colson Whitehead's zombie novel, *Zone One*. 4. Literary representations of COVID, as represented by the short stories in *The Decameron Project*, as well as short film and visual arts. Seminar style classes will emphasize student interests and direction. They will be heavily discussion-based with a combination of full class and smaller breakout formats. Assignments include an in-class presentation and short paper on one week's materials; a comparative narrative analysis, and an imaginative final project with a critical introduction

CLEN GU4892 Literature and International Law: Sovereignty and Other Fictions. 4 points.

The past decade has seen a steady increase in interdisciplinary scholarship interested in the relationships between literature and international law. Critical international legal scholars

often invoke literature (and literary terms) to supplement their analyses, while many comparative literature scholars have attempted to discover what Pascale Casanova calls the "international laws" of literature. However, much of this scholarship remains deeply rooted in the home disciplines of the scholars, who not only operate with the prevailing assumptions and methodologies of their disciplines, but also tend to treat the other discipline as stable and unproblematic. Moreover, most of that scholarship has failed to take account of colonialism and imperialism in the formation of disciplinary knowledge—and, especially, in the formation of both international law and world literature.

International law is always produced in what Mary Louise Pratt has called "the contact zone." Placing the history of colonialism at the center of inquiry, this course seeks to explore some of the many possible intersections between international law and comparative literature. We will examine some of the approaches that scholars have already taken, but we will also pursue new ways of thinking about how law and literature interact. The course focuses on a number of historical "events" to consider how literature and law both contribute to the logic of world-making and to the imagination of international orders.

ENGL GU4975 PRISON LITERATURE. 4.00 points.

Prison literature—poems, plays, memoirs, novels, and songs written in prison or about prison—constitute a significant part of American literature. Prisons expose many of the systemic inequalities of American life, above all those based on racism and the enduring legacies of slavery. Using the tools of critical race theory, feminism, and class analysis, this course will explore the forms of cultural expression that have emerged in relationship to the American prison experience. Though the course will touch on the rise of convict leasing, chain gangs, and work farms as part of the penal system under Jim Crow, the main focus will be on developments in the U.S. prison system and in prison literature since the 1960s, roughly from the prison writing of George Jackson, Angela Davis, and Malcolm X to the outpouring of contemporary fiction and poetry about prison life by Jesmyn Ward, Colin Whitehead, Rachel Kushner, and Reginald Betts. This is the era of what Michelle Alexander has called "the new Jim Crow," the rise of mass incarceration, the partial privatization of the penal system, and the growth of supermax facilities. Among the questions we will explore together are these: What tools and techniques do writers use to construct the prison experience? What are the affordances offered by various genres (drama, autobiography, poetry, the novel) for exploring the prison system and the systems of oppression that converge at that site? Does some literature of incarceration perpetuate damaging discourses about "felons," or does it revise and complicate stereotypes and narratives about incarcerated individuals? How do narratives involving change,

conversion, growing up, or being defeated operate in various genres of prison literature? What role do mourning, witnessing, testifying, and resistance play in such writing? What is the imagined audience of various genres of prison writing, that is, for whom is it written? What ethical and political demands does such writing make on us as readers, citizens, activists?

ENGL GU4931 NEW YORK INTELLECTUALS: MARY MCCARTHY, HANNAH ARENDT, SUSAN SONTAG. 4.00 points.

The nation's most distinguished homegrown network of thinkers and writers, the New York intellectuals, clustered in its major decades from the late thirties to the late sixties up and down Manhattan, centered mainly in and around Columbia University and the magazine *Partisan Review* on Astor Place. Although usually regarded as male dominated—Lionel Trilling, Clement Greenberg and Dwight Macdonald were among the leaders—more recently the three key women of the group have emerged as perhaps the boldest modernist thinkers most relevant for our own time. Arendt is a major political philosopher, McCarthy a distinguished novelist, memoirist, and critic, and Susan Sontag was the most famous public intellectual in the last quarter of the 20th century. This course will explore how this resolutely unsentimental trio—dubbed by one critic as “tough women” who insisted on the priority of reflection over feeling—were unafraid to court controversy and even outrage: Hannah Arendt's report on what she called the “banality” of Nazi evil in her report on the trial in Israel of Adolph Eichmann in 1963 remains incendiary; Mary McCarthy's satirical wit and unprecedented sexual frankness startled readers of her 1942 story collection *The Company She Keeps*; Susan Sontag's debut *Against Interpretation* (1966) turned against the suffocatingly elitist taste of the New York intellectuals and welcomed what she dubbed the “New Sensibility”—“happenings,” “camp,” experimental film and all manner of avant-garde production. In her later book *On Photography* (1977) she critiques the disturbing photography of Diane Arbus, whose images we will examine in tandem with Sontag's book

UNIVERSITY WRITING

ENGL CC1010 University Writing. 3 points.

University Writing helps undergraduates engage in the conversations that form our intellectual community. By reading and writing about scholarly and popular essays, students learn that writing is a process of continual refinement of ideas. Rather than approaching writing as an innate talent,

this course teaches writing as a learned skill. We give special attention to textual analysis, research, and revision practices. *University Writing* offers the following themed sections, all of which welcome students with no prior experience studying the theme. Students interested in a particular theme should register for the section within the specified range of section numbers. *UW: Contemporary Essays* (sections below 100). Features contemporary essays from a variety of fields. *UW: Readings in American Studies* (sections in the 100s). Features essays that explore the culture, history, and politics that form American identity. *UW: Readings in Women's and Gender Studies* (sections in the 200s). Features essays that examine relationships among sex, gender, sexuality, race, class, and other forms of identity. *UW: Readings in Sustainable Development* (sections in the 300s). Features essays that ask how we can develop global communities that meet people's needs now without diminishing the ability of people in the future to do the same. *UW: Readings in Human Rights* (sections in the 400s). Features essays that investigate the ethics of belonging to a community and issues of personhood, identity, representation, and action. *UW: Readings in Data Sciences* (sections in the 500s). Features essays that study how our data-saturated society challenges conceptions of cognition, autonomy, identity, and privacy. *University Writing for International Students* (sections in the 900s). Open only to international students, these sections emphasize the transition to American academic writing cultures through the study of contemporary essays from a variety of fields. For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>.

ENGL GS1010 University Writing. 3 points.

Prerequisites: Non-native English speakers must reach Level 10 in the American Language Program prior to registering for ENGL GS1010.

University Writing helps undergraduates engage in the conversations that form our intellectual community. By reading and writing about scholarly and popular essays, students learn that writing is a process of continual refinement of ideas. Rather than approaching writing as an innate talent, this course teaches writing as a learned skill. We give special attention to textual analysis, research, and revision practices. University Writing offers the following themed sections, all of which welcome students with no prior experience studying the theme. Students interested in a particular theme should register for the section within the specified range of section numbers. *UW:*

Contemporary Essays (sections from 001 to 069). Features contemporary essays from a variety of fields. *UW: Readings in American Studies (sections in the 100s).* Features essays that explore the culture, history, and politics that form American identity. *UW: Readings in Gender and Sexuality (sections in the 200s).* Features essays that examine relationships among sex, gender, sexuality, race, class, and other forms of identity. *UW: Readings in Film and Performing Arts (sections in the 300s).* Features essays that analyze a particular artistic medium (music, theater, film, photography...). *UW: Readings in Human Rights (sections in the 400s).* Features essays that investigate the ethics of belonging to a community and issues of personhood, identity, representation, and action. *UW: Readings in Data Sciences (sections in the 500s).* Features essays that study how our data-saturated society challenges conceptions of cognition, autonomy, identity, and privacy. *UW: Readings in Medical-Humanities (sections in the 600s).* Features essays that explore the disciplines of biomedical ethics and medical anthropology, to challenge our basic assumptions about medicine, care, sickness, and health. *University Writing for International Students (sections in the 900s).* Open only to international students, these sections emphasize the transition to American academic writing cultures through the study of contemporary essays from a variety of fields. For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>.

FALL 2020 - PLEASE SEE THE DEPARTMENT WEBSITE FOR CURRICULUM SUMMARY.

INTRODUCTION TO THE MAJOR

ENGL UN3001 Literary Texts, Critical Methods. 4 points.
 Prerequisites: Students who register for ENGL UN3001 must also register for one of the sections of ENGL UN3011 Literary Texts, Critical Methods.
 This course is intended to introduce students to the advanced study of literature. Students will read works from different

genres (poetry, drama, and prose fiction), drawn from the medieval period to the present day, learning the different interpretative techniques required by each. The course also introduces students to a variety of critical schools and approaches, with the aim both of familiarizing them with these methodologies in the work of other critics and of encouraging them to make use of different methods in their own critical writing. This course (together with the companion seminar *ENGL UN3011*) is a requirement for the English Major and Concentration. It should be taken as early as possible in a student's career. Fulfillment of this requirement will be a factor in admission to seminars and to some lectures.

Fall 2020: ENGL UN3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3001	001/10013	W 4:10pm - 5:25pm Online Only	Edward Mendelson	4	72/80

Spring 2021: ENGL UN3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3001	001/11045	W 4:10pm - 5:25pm Online Only	Jenny Davidson	4	77/80

ENGL UN3011 Literary Texts, Critical Methods seminar. 0 points.

Prerequisites: Students who register for ENGL UN3011 must also register for ENGL UN3001 Literary Texts, Critical Methods lecture.

This seminar, led by an advanced graduate student in the English doctoral program, accompanies the faculty lecture *ENGL UN3001*. The seminar both elaborates upon the topics taken up in the lecture and introduces other theories and methodologies. It also focuses on training students to integrate the terms, techniques, and critical approaches covered in both parts of the course into their own critical writing, building up from brief close readings to longer research papers.

Fall 2020: ENGL UN3011

MEDIEVAL**ENGL UN3018 DESPAIR AND APOCALYPSE IN MEDIEVAL LITERATURE. 4 points.**

The Middle Ages are perhaps not the first place we look for relief from despair. In popular culture, we tend to imagine them either as an idyllic time of pastoral, Shire-like simplicity, or a barbaric pre-modernity of endless plagues and crusades. But medieval European culture was acutely attuned to the problems of creeping meaninglessness and disaffection. In a society putatively organized around the theological virtues of faith, hope, and love, the opposite of hope—despair, the “noonday demon,” or “wanhope” as it is often called in Middle English—had to be guarded against at any cost. This course will mine the rich anti-despair resources of this earlier age, with special attention to the imaginative literature that gave those resources their most nuanced articulation. How do those works give voice to personal and sociopolitical despair, and how do they attempt—especially in their endings—to return their readers to the world with a recharged sense of its significance?

Our study will be divided into three sections: personal despair, sociopolitical despair (apocalypse), and hope. The first will center on isolated depictions of melancholy and mourning, including the dream vision Pearl and excerpts from the Prik of Conscience—the most widely circulated poetical work in Middle English, and yet one which has gone largely unstudied. The second section joins the Canterbury Tales pilgrims at the end of their strangely unravelling pilgrimage, then builds toward an apocalyptic reading of the politically incendiary poem Piers Plowman, where personal and societal collapse blur together in a harrowing vision of the end times. A final section on hope will highlight what is always adumbrated in medieval treatments of despair: the possibility of redemption, and the sacrifices it may demand.

ENGL GU4091 Introduction to Old English Language & Literature. 3 points.

(Lecture). This class is an introduction to the language and literature of England from around the 8th to the 11th centuries. Because this is predominantly a language class, we will spend much of our class time studying grammar as we learn to translate literary and non-literary texts. While this course provides a general historical framework for the period as it introduces you to the culture of Anglo-Saxon England, it will also take a close look at how each literary work contextualizes (or recontextualizes) relationships between human and divine, body and soul, individual and group, animal and human. We will be using Mitchell and Robinson's *An Introduction to Old English*, along with other supplements. We will be looking at recent scholarly work in the field and looking at different ways (theoretical, and other) of reading these medieval texts.

Requirements: Students will be expected to do assignments for each meeting. The course will involve a mid-term, a final exam, and a final presentation on a Riddle which will also be turned in.

ENGL GU4791 Visionary Drama. 3 points.

(Lecture). This class is designed to interrogate the genre-boundary that has traditionally separated visionary writings from dramatic ones in the study of English medieval literature. Although this separation has long existed in scholarship, it is deeply problematic, and produces an understanding of the relationship between private devotion and publically performed religious ritual that is untenable, and does considerable violence to our understanding of the medieval imagination. As we will see, notionally "private" visionary writings and notionally "public" dramatic writings have a great deal in common, not just in terms of their overt content, but also in terms of their formal construction, their poetic devices, their favorite rhetorical maneuvers, and their articulated relationship with history and English literature. The works we will read this term are all phenomenally strange, many of them extremely difficult because of their unfamiliarity. For this reason, we will divide the semester into three sections: the first will deal with the famous medieval cycle dramas, which narrate events from the New Testament. The second section will transition to examine three important visionary texts that were written between 1370 and 1430, contemporaneous with the efflorescence of dramatic composition and performance in England, and two late Antique visionary texts that inspired them. The final section of class will turn to examine the so-called "morality plays," which emerge

just slightly after the cycle dramas and after the visionary works we will have read. Since all of these works are linguistically challenging, we will work with translations in certain instances (*Piers Plowman*, Julian of Norwich, Margery Kempe). For all of the other works, we will be reading in Middle English, but you are welcome to consult translations, online summaries, or anything else that helps you get up to speed on what's going on in the plays. Bear in mind, however, that your midterm and final will be based on the Middle English texts, so you do need to make a serious effort to read them (except in the case of *Piers Plowman*, which will be in modern English).

ENGL GU4812 Conquests, Colonialism, and the Normans. 4 points.

The fearsome Normans, descended from the Viking Rollo, wrested territory from the king of France, established outposts in Sicily and Antioch, and – most famously – conquered England in 1066. This course asks questions about these Norman conquests, about the Normans' role as colonizers, and the persistence (or lack thereof) of the Norman identity over time. We will encounter familiar objects, like the Bayeux Tapestry, and texts more often talked about than read, like Wace's *Roman de Rou* and Orderic Vitalis's *Ecclesiastical History*. Many of our readings will fall under the category of historiography (=writing about history); another project of the course is the consideration of how to evaluate and analyze questionably literary texts. All required readings will be made available in modern English translation, though familiarity with French, Latin, and/or Arabic could be useful. If you take this course, you will learn not only about the Normans, but about the interactions between northern and southern Europe and the Mediterranean from the tenth to the early thirteenth century. Along the way, you'll also hone skills of writing, source evaluation, and oral communication.

RENAISSANCE**ENGL UN3262 English Literature 1500-1600. 3 points.**

(Lecture). This course aims to introduce you to a selection of sixteenth-century English verse and prose, from major works such as More's *Utopia*, Spenser's *Faerie Queene* and Sidney's *Defense of Poesie*, to more occasional but illuminating excerpts. Although the classes will range widely across social, political and historical concerns, the focus will be on close reading of the texts. [NB This course fulfills the poetry requirement]

ENGL UN3335 Shakespeare I. 3 points.

Enrollment is limited to 60.

(Lecture). This course will cover the histories, comedies, tragedies, and poetry of Shakespeare's early career. We will examine the cultural and historical conditions that informed Shakespeare's drama and poetry; in the case of drama, we will also consider the formal constraints and opportunities of the early modern English commercial theater. We will attend to Shakespeare's biography while considering his work in relation to that of his contemporaries. Ultimately, we will aim to situate the production of Shakespeare's early career within the highly collaborative, competitive, and experimental theatrical and literary cultures of late sixteenth-century England.

Fall 2020: ENGL UN3335

ENGL GU4211 MILTON IN CONTEXT. 3.00 points.

This course will look at the major works of the poet and revolutionary John Milton in the context of seventeenth-century English (and European) religious, political, and cultural events. In addition to reading Milton's shorter poems, major prose (including *Areopagitica*), and the full text of *Paradise Lost*, we will look at the authors and radicals whose activities and writings helped to provide the contexts for Milton's own: poets and polemicists, natural scientists and utopians, sectarians and prophets, revolutionaries and regicides. The course has one required textbook: *The Complete Poetry and Major Prose of John Milton*, eds. Kerrigan et al

18TH AND 19TH CENTURY

ENGL UN3032 Pope. 4.00 points.

We focus on—but do not limit ourselves to—the first book of Pope's translation of the *Iliad* (there are 24 books). We try to determine the source(s) of Pope's translation: i.e., what was before him when he translated? a Greek text? if so, which one? another translation or translations? if so, in what language(s), and which edition(s) of those translations did he use?—the first four weeks of class will be spent doing this. We compare Pope's *Iliad* with many other English translations—translations from both before and after Pope's time—the second four weeks of the class will be spent doing this. We compare Pope's *Iliad*

with many other of Pope's poems—the last weeks of the class will be spent doing this

ENGL UN3475 Aestheticism: Art and Life. 4 points.

A host of developments in the art cultures of nineteenth-century Europe and America prompted a widespread, manifold debate about the nature and function of art and aesthetic experience. Expanding access to art in great public collections and exhibitions, which offered newly immediate and arresting contact with artworks, left many viewers in a puritanical culture grappling with the sheer power of these works. What sort of satisfactions did these images afford? Were the pleasures they aroused in some way dangerous, at odds with conventional morality and belief, even with the values ostensibly inherent in the images they presented? How might those provocations be received by different portions of an increasingly large and variegated audience? Might their challenges to convention be a stimulus to new modes of organizing life and experience, both personal and social? Or was their cultivation a symptom of social decadence or decline?

These challenges were taken up in a wide and varied array of literature and art that has become known as "aestheticism." This seminar focuses on the development of aestheticism in England, with glances at France and America, over the period of roughly 1830-1900. We'll begin with early poetic musings on the moral burdens of art and the artist's relations to society, particularly in the works of Tennyson and Browning. These works also introduce a recurrent preoccupation of the course, the power of art and aesthetic pleasure to unsettle conventional norms of gender and sexuality. We'll then move to an array of critical reflection prompted by the new prominence of visual art in England, most notably John Ruskin—the single most influential of all English art critics—and Walter Pater, whose 1873 volume, *The Renaissance*, became the most important text of English aestheticism (Oscar Wilde called it "the Golden Book"; George Eliot pronounced it "poisonous"). We'll see these concerns further developed in mid-century painting, most notably the aesthetic movement known as "Pre-Raphaelitism," and a host of poetry associated with the movement (D.G. Rossetti was a major figure as both a painter and a poet). The work of Ruskin and William Morris directed aesthetic reflection towards reflection on labor and social reform, which flourished in the ideals attached to the "Arts & Crafts" movement near the end of the century. The career of Oscar Wilde captures the increasing visibility of aestheticism, both as it became affiliated with varieties of commodity culture, and as it aroused increasing hostility, some of it satiric, some of it deeply threatened by Wilde's moral provocations, above all his homosexuality. Finally we'll read two important novels

that register the impact of aestheticism, Wilde's *The Picture of Dorian Gray* and Henry James's *The Tragic Muse*.

ENGL UN3728 American Transcendentalism. 3.00 points.

The class is an intensive reading of the prose and poetry of Emerson, Thoreau, Whitman and Emily Dickinson. Through detailed analysis of Emerson's *Essays* we will try to understand his philosophy as an effort to radically reformulate traditional concepts of identity, thinking, and everyday living, and investigate the politics that guided his philosophical efforts, especially his stance on slavery and his activism against the Cherokee removals. But we will also be interested in his thinking on dreams, visions and mental transports and in order to ask how those experiences come to model his understanding of personal identity and bodily integrity. In Thoreau, we will look closely into ideas about the art of living and his theory of architecture, as well as quotidian practices of dwelling, eating or cooking, as ways to come to terms with one's own life. We will pay special attention to Thoreau's understanding of thinking as walking, as well as the question of space vs. time and we will spend a lot of time figuring his theory of living as mourning. With Whitman we will attend to his new poetics and investigate its relation to forms of American Democracy. We will also want to know how the Civil War affected Whitman's poetics both in terms of its formal strategies and its content. Finally, we will try to understand how ideas and values of transcendentalist philosophy fashion poetry of Emily Dickinson both in its form and its content. We will thus be looking at Dickinson's famous fascicles but also into such questions as loss, avian and vegetal life and the experience of the embodied more generally.

ENGL UN3855 Early American Ecologies. 4 points.

The course is a survey of the canonical texts of the Early Americas, with emphasis on how those writers experienced the natural world of their new country. Some of them had to cope with extreme cold, others with tropical heat. Some of them encountered abundance, others sparsity and famine. They all encountered new life forms – from marine life to birds, reptiles and animals. They had to cope with frequent earthquakes and hurricanes, and classify newly discovered species of vegetal life. What they saw, however, they read not only through the lenses of natural history, but also theologically and politically. For some, the natural world was rich with signs sent by God for them to interpret, for others it was a political space that they organized according to the logic either of a theocracy or

the plantation. Addressing the early natural histories of the Americas, the class will also pay special attention to their politics, and investigate how the ecological spaces that the colonist encountered shaped their politics and ethics.

ENGL GU4300 RELIGION AND THE ENGLISH NOVEL. 4.00 points.

Although the novel seems like a secular form, some of the earliest examples in English can be strangely religious. Authors of seventeenth- and eighteenth-century prose fiction often claimed to write from a religious perspective or at least to be in step with religious ideals, and many of them wrote about unabashedly religious topics. We will spend a little over half of this seminar reading and discussing early British novels, from Samuel Richardson's *Clarissa* through to Jane Austen's, that address the reality of evil, the nature of faith, the hope for an afterlife, the need for spiritual community, and the difficulty of religious pluralism. Among our particular concerns will be the role of place in representations of different religious traditions and the overlap between romance plots and conversion stories. Instead of treating such topics as exclusively things of the literary past, we will read our older novels alongside a few later Anglophone works, written between 1945 and today, that continue to use the novel form for the atypical purposes of portraying religious practice and religious identity and reassessing religion's role in modern life

20TH AND 21ST CENTURY

CLEN UN3942 J.M. Coetzee. 4 points.

Not offered during 2020-21 academic year.

Prerequisites: Instructor's permission.

(Seminar). J.M. Coetzee won the Nobel Prize for Literature in 2003 and is the only writer to have won the Booker Prize twice. Born and raised in South Africa, educated in England and the US, and now residing in Australia, Coetzee is a model citizen of what critic Pascale Casanova has called a 'world republic of letters.' As we'll see, his novels are profoundly concerned with questions of justice, inequality, suffering, sexuality, the human/animal divide, and our fragile capacity to represent these things to ourselves and to others. His work is deeply informed by European literary and philosophical traditions from realism to postmodernism, yet it also exposes troubling relationships between European ideas and the global exercise of European power during the age of imperialism and after. Widely acclaimed as a "writer's writer," Coetzee is also an incisive literary and cultural critic, and we'll sample some of his writing on topics ranging from Texas barbecue (he's vegetarian) to the use of torture in apartheid South Africa. **Application Instructions:** E-mail Professor Jennifer Wenzel (jw2947@columbia.edu) with the subject heading "African novel seminar." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available.

ENGL UN3520 Introduction To Asian American Literature and Culture. 3 points.

This course is a survey of Asian North American literature and its contexts. To focus our discussion, the course centers on examining recurring cycles of love and fear in Asian North American relations from the late nineteenth to the twenty-first centuries. We will first turn to what became known as "yellow peril," one effect of exclusion laws that monitored the entrance of Asians into the United States and Canada

during the late nineteenth and twentieth centuries, and the corresponding phenomenon of Orientalism, the fascination with a binary of Asia and the West. The second section of the course will focus on how Asian North American authors respond to later cycles of love and fear, ranging from the forgetting of Japanese internment in North America and the occupation of the Philippines; to the development of the model minority mythology during the Cold War. The final section will examine intimacies and exclusions in contemporary forms of migration, diaspora, and community communities.

ENGL UN3648 Comics, Health, and Embodiment. 4 points.

Deformed, grotesque, super/transhuman and otherwise extraordinary bodies have always been a central feature of comics. However, the past ten years have seen a surge of graphic narratives that deal directly with experiences of health and illness, and that are recognized as having significant literary value. This course will focus on graphic narratives about healthcare, illness, and disability with particular attention to questions of embodied identities such as gender, sexuality, race, and age. Primary texts will include the work of Alison Bechdel, Roz Chast, CeCe Bell, David Small, Allie Brosch, and Ellen Fournery. We will study the vocabulary, conventions, and formal properties of graphic literature, asking how images and text work together to create narrative. We will consider whether graphic narrative might be especially well suited to representations of bodily difference; how illness/disability can disrupt conventional ideas about gender and sexuality; how experiences of the body as a source of pain, stigmatization, and shame intersect with the sexualized body; and how illness and disability queer conventional sexual arrangements, identities, and attachments. While studying the construction of character, narrative, framing, color, and relationship between visual and print material on the page, students will also produce their own graphic narratives.

ENGL UN3714 Henry James and James Baldwin. 4 points.

Prerequisites: Instructor's permission.

(Seminar). Not well-known is the fact that in the mid-sixties James Baldwin hung a photograph of Henry James above his writing desk, a kind of tribute to the novelist whose writings about the "complex fate" of being an American in Europe deeply influenced Baldwin. *The Portrait of a Lady* and *The Ambassadors* were treasured books for Baldwin, who occasionally lectured about them to college audiences. This seminar will examine this initially improbable literary

kinship between these two great artists, exploring how a shared commitment to a literary art of complexity and multiple identity, to cultural critique and analysis (Baldwin greatly admired James's *The American Scene*, his on the ground evocation of early 20th century America) produced such distinctly different bodies of vital work. Baldwin's essays and his novel *Another Country* will be discussed, as well as the James texts mentioned above. **Application instructions:** E-mail Professor Ross Posnock (rp2045@columbia.edu) with the subject heading "James and Baldwin seminar." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course.

ENGL UN3734 American Literature and Corporate Culture. 4 points.

Prerequisites: the instructor's permission.
(Seminar). "It is not expected of critics as it is of poets that they should help us to make sense of our lives; they are bound only to attempt the lesser feat of making sense of the ways we try to make sense of our lives." - Frank Kermode
This seminar will focus on American literature during the rise of U.S. corporate power in the nineteenth and twentieth centuries. The legal and economic entity of the corporation established new social hierarchies and systems of power, changed the roles of government and families, and wrought new forms of relationships between individuals. American culture demonstrated both an enchantment with the possibilities of a growing economy and a looming anxiety about the systematization of personal relationships. Authors and critics grappled with an American society that seemed to offer unprecedented opportunity for social rise but only within a deeply threatening and impersonal structure. We'll examine the ways that literary and popular culture depicted corporations and the ways that corporate structure influenced literary aesthetics and form. **Application instructions:** E-mail Professor Aaron Ritzenberg (ajr2186@columbia.edu) with the subject heading "American Literature and Corporate Culture seminar". In your message, include basic information: name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they'll automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available.

ENGL UN3805 The Political Novel. 4.00 points.

Is the political novel a genre? It depends on your understanding both of politics and of the novel. If politics means parties, elections, and governing, then few novels of high quality would qualify. If on the other hand "the personal is the political," as the slogan of the women's movement has it, then almost everything the novel deals with is politics, and few novels would not qualify. This seminar will try to navigate between these extremes, focusing on novels that center on the question of how society is and ought to be constituted. Since this question is often posed ambitiously in so-called "genre fiction" like thrillers and sci-fi, which is not always honored as "literature," it will include some examples of those genres as well as uncontroversial works of the highest literary value like Melville's "Benito Cereno," Ellison's "Invisible Man," and Camus's "The Plague."

ENGL GU4604 American Modernism. 3 points.

(Lecture). This course surveys cultural responses to the historical, technological, intellectual, and political conditions of modernity in the United States. Spanning the period from the turn of the century to the onset of World War II, we will consider the relationship between key events (U.S. imperialism, immigration, World War I, the Jazz age, the Great Depression);

intellectual and scientific developments (the theory of relativity, the popularization of Freudian psychoanalysis, the anthropological concept of culture, the spread of consumer culture, Fordism, the automobile, the birth of cinema, the skyscraper); and cultural production. Assigned readings will include novels, short stories, and contemporary essays. Visual culture--paintings, illustrations, photography, and film--will also play an important role in our investigation of the period. Past [syllabus](#) (which will be somewhat revised).

ENGL GU4619 African-American Literature I. 3 points.

(Lecture). This lecture course is intended as the first half of the basic survey in African-American literature. By conducting close readings of selected song lyrics, slave narratives, fiction, poetry, and autobiography, we will focus on major writers in the context of cultural history. In so doing, we will explore the development of the African- American literary tradition. Writers include, but are not limited to, Wheatley, Equiano, Douglass, Jacobs, Harper, Dunbar, Chestnutt, Washington, Du Bois, and Larsen. Course requirements: class attendance, an in-class midterm exam, a five-page paper, and a final exam.

ENTA UN3701 Drama, Theatre, Theory. 4 points.

Prerequisites: Instructor's permission.

(Seminar). Theatre typically exceeds the claims of theory. What does this tell us about both theatre and theory? We will consider why theatre practitioners often provide the most influential theoretical perspectives, how the drama inquires into (among other things) the possibilities of theatre, and the various ways in which the social, spiritual, performative, political, and aesthetic elements of drama and theatre interact. Two papers, weekly responses, and a class presentation are required. Readings include Aristotle, Artaud, Bharata, Boal, Brecht, Brook, Castelvetro, Craig, Genet, Grotowski, Ibsen, Littlewood, Marlowe, Parks, Schechner, Shakespeare, Sowerby, Weiss, and Zeami. **Application Instructions:** E-mail Professor Austin Quigley (aeq1@columbia.edu) with the subject heading "Drama, Theatre, Theory seminar." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available.

CLEN UN3720 Plato the Rhetorician. 4 points.

Prerequisites: Instructor's permission

(Seminar). Although Socrates takes a notoriously dim view of persuasion and the art that produces it, the Platonic dialogues featuring him both theorize and practice a range of rhetorical strategies that become the nuts and bolts of persuasive argumentation. This seminar will read a number of these dialogues, including *Apology*, *Protagoras*, *Ion*, *Gorgias*, *Phaedrus*, *Menexenus* and *Republic*, followed by Aristotle's *Rhetoric*, the rhetorical manual of Plato's student that provides our earliest full treatment of the art. Application instructions: E-mail Prof. Eden (khe1@columbia.edu) with your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available.

ENGL UN3792 Film and Law. 4 points.

Prerequisites: the instructor's permission.

From its beginnings, film has been preoccupied with law: in cops and robbers silent films, courtroom drama, police procedural, judge reality show, or all the scenes that fill our media-saturated world. What do films and other audio-visual media tell us about what it's like to come before the law, or about such substantive issues as what counts as murder, war crimes, torture, sexual abuse? How do films model the techniques that lawyers use to sway the passions of their audiences? How do they model the symbolism of their gestures, icons, images? If films and other audio-visual media rewrite legal events, what is their effect: on law? on legal audiences? How is the experience of being a film spectator both like and unlike the experience of being a legal subject? This course investigates such questions by looking at representations of law in film and other audio-visual media. We will seek to understand, first, how film represents law, and, second, how film attempts to shape law (influencing legal norms, intervening in legal regimes). The seminar's principal texts will be the films themselves, but we will also read relevant legal cases and film theory in order to deepen our understanding of both legal and film regimes.

Fall 2020: ENGL UN3792

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3792	001/10039	Th 12:10pm - 2:00pm Online Only	Julie Peters	4	18/18

CLEN GU4199 Literature and Oil. 3 points.

This course will investigate the connections between literary/cultural production and petroleum as the substance that makes possible the world as we know it, both as an energy source and a component in the manufacture of everything from food to plastic. Our current awareness of oil's scarcity and its myriad costs (whether environmental, political, or social) provides a lens to read for the presence (or absence) of oil in texts in a variety of genres and national traditions. As we begin to imagine a world "beyond petroleum," this course will confront the ways in which oil shapes both the world we know and how we know and imagine the world. Oil will feature in this course in questions of theme (texts "about" oil), of literary form (are there common formal conventions of an "oil novel?"), of interpretive method (how to read for oil), of transnational circulation (how does "foreign oil" link US citizens to other spaces?), and of the materiality (or "oiliness") of literary culture (how does the production and circulation of texts, whether print or digital, rely on oil?).

CLEN GU4550 Narrative and Human Rights. 3 points.

(Lecture). We can't talk about human rights without talking about the forms in which we talk about human rights.

This course will study the convergences of the thematics, philosophies, politics, practices, and formal properties of literature and human rights. In particular, it will examine how literary questions of narrative shape (and are shaped by) human rights concerns; how do the *forms* of stories enable and respond to forms of thought, forms of commitment, forms of being, forms of justice, and forms of violation? How does narrative help us to imagine an international order based on human dignity, rights, and equality? We will read classic literary texts and contemporary writing (both literary and non-literary) and view a number of films and other multimedia projects to think about the relationships between story forms and human rights problematics and practices. Likely literary authors: Roberto Bolaño, Miguel de Cervantes, Assia Djebar, Ariel Dorfman, Slavenka Drakulic, Nuruddin Farah, Janette Turner Hospital, Franz Kafka, Sahar Kalifeh, Sindiwe Magona, Maniza Naqvi, Michael Ondaatje, Alicia Partnoy, Ousmane Sembène, Mark Twain We will also read theoretical and historical pieces by authors such as Agamben, An-Na'im, Appiah, Arendt, Balibar, Bloch, Chakrabarty, Derrida, Douzinas, Habermas, Harlow, Ignatieff, Laclau and Mouffe, Levinas, Lyotard, Marx, Mutua, Nussbaum, Rorty, Said, Scarry, Soyinka, Spivak, Williams.

ENGL GU4561 Children's Literature. 3 points.

This is a historical survey of literature written principally for children (primarily narrative), which will explore not only the pleasures of imagination but the varieties of narrative and lyric form, as well as the ways in which story-telling gives shape to individual and cultural identity. Drawing on anonymous folk tale from a range of cultures, as well as a variety of literary works produced from the late 17th century to the present, we'll attend to the ways in which changing forms of children's literature reflect changing understandings of children and childhood, while trying not to overlook psychological and formal structures that might persist across this history. Readings of the primary works will be supplemented by a variety of critical approaches—psychoanalytic, materialist, feminist, and structuralist—that scholars have employed to understand the variety and appeal of children's literature.

CLEN GU4560 Backgrounds to Contemporary Theory. 3 points.

Intended for both undergraduates and graduate students.

(Lecture). In chapter 4 of Hegel's *Phenomenology of Mind*, a story is told about a confrontation between a Lord (Herr) and a Bondsman (Knecht). The story conveys how consciousness is born. This story, subsequently better known as the confrontation between Master and Slave, has been appropriated and revised again and again in figures like Marx and Nietzsche, Sartre, De Beauvoir, and Fanon, Freud and Lacan, Emmanuel Levinas, Carl Schmitt, Slavoj Žižek, and Judith Butler. The premise of this course is that one can understand much of which is (and isn't) most significant and interesting in contemporary cultural theory by coming to an understanding Hegel's argument, and tracing the paths by which thinkers revise and return to it as well as some of the arguments around it. There are no prerequisites, but the material is strenuous, and students will clearly have an easier time if they start out with some idea of what the thinkers above are doing and why. Helpful preparatory readings might include Genevieve Lloyd, *The Man of Reason: "Male" and "Female" in Western Philosophy* and Judith Butler, *Gender Trouble*. Requirements: For undergraduates: two short papers (6-8 pages). For graduate students, either two short papers or one longer paper (12-15 pages).

CLEN GU4644 Revolution in/on the Caribbean . 4 points.

Although a geographically small area, the Caribbean has produced major revolutionary movements, and two globally influential revolutions: the Haitian Revolution (1791-1804) and the Cuban Revolution (1959-1976). It has also produced literature and poetic discourse that has sought to revolutionize politics through language. In this course, we will examine texts that reflect on revolution and/or attempt to revolutionize by writers such as Aimé Césaire, CLR James, Derek Walcott, Alejo Carpentier, Frantz Fanon, Reinaldo Arenas, Michelle Cliff, and V.S. Naipaul, among others.

We will also read essays by Hannah Arendt, André Breton, Paul Breslin, A. James Arnold, Phyllis Taoua, Robin D.G. Kelley, Brad Epps, Kimberle Lopez, Bruce King, Maria Elena Lima, Yoani Sánchez, and Audre Lorde. In addition, we will listen to a variety of music by Caribbean and African American musicians that take revolution as its theme in form and/or content.

UNIVERSITY WRITING

ENGL CC1010 University Writing. 3 points.

University Writing helps undergraduates engage in the conversations that form our intellectual community. By reading and writing about scholarly and popular essays, students learn that writing is a process of continual refinement of ideas. Rather than approaching writing as an innate talent, this course teaches writing as a learned skill. We give special attention to textual analysis, research, and revision practices. *University Writing* offers the following themed sections, all of which welcome students with no prior experience studying the theme. Students interested in a particular theme should register for the section within the specified range of section numbers. *UW: Contemporary Essays (sections below 100)*. Features contemporary essays from a variety of fields. *UW: Readings in American Studies (sections in the 100s)*. Features essays that explore the culture, history, and politics that form American identity. *UW: Readings in Women's and Gender Studies (sections in the 200s)*. Features essays that examine relationships among sex, gender, sexuality, race, class, and other forms of identity. *UW: Readings in Sustainable Development (sections in the 300s)*. Features essays that ask how we can develop global communities that meet people's needs now without diminishing the ability of people in the future to do the same. *UW: Readings in Human Rights (sections in the 400s)*. Features essays that investigate the ethics of belonging to a community and issues of personhood, identity, representation, and action. *UW: Readings in Data Sciences (sections in the 500s)*. Features essays that study how our data-saturated society challenges conceptions of cognition, autonomy, identity, and privacy. *University Writing for International Students (sections in the 900s)*. Open only to international students, these sections emphasize the transition to American academic writing cultures through the study of contemporary essays from a variety of fields. For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>.

ENGL GS1010 University Writing. 3 points.

Prerequisites: Non-native English speakers must reach Level 10 in the American Language Program prior to registering for ENGL GS1010.

University Writing helps undergraduates engage in the conversations that form our intellectual community. By reading and writing about scholarly and popular essays, students learn that writing is a process of continual refinement of ideas.

Rather than approaching writing as an innate talent, this course teaches writing as a learned skill. We give special attention to textual analysis, research, and revision practices. University Writing offers the following themed sections, all of which welcome students with no prior experience studying the theme. Students interested in a particular theme should register for the section within the specified range of section numbers. *UW: Contemporary Essays (sections from 001 to 069)*. Features contemporary essays from a variety of fields. *UW: Readings in American Studies (sections in the 100s)*. Features essays that explore the culture, history, and politics that form American identity. *UW: Readings in Gender and Sexuality (sections in the 200s)*. Features essays that examine relationships among sex, gender, sexuality, race, class, and other forms of identity. *UW: Readings in Film and Performing Arts (sections in the 300s)*. Features essays that analyze a particular artistic medium (music, theater, film, photography...). *UW: Readings in Human Rights (sections in the 400s)*. Features essays that investigate the ethics of belonging to a community and issues of personhood, identity, representation, and action. *UW: Readings in Data Sciences (sections in the 500s)*. Features essays that study how our data-saturated society challenges conceptions of cognition, autonomy, identity, and privacy. *UW: Readings in Medical-Humanities (sections in the 600s)*. Features essays that explore the disciplines of biomedical ethics and medical anthropology, to challenge our basic assumptions about medicine, care, sickness, and health. *University Writing for International Students (sections in the 900s)*. Open only to international students, these sections emphasize the transition to American academic writing cultures through the study of contemporary essays from a variety of fields. For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>.

ETHNICITY AND RACE STUDIES

Center for the Study of Ethnicity and Race: 420 Hamilton; 212-854-0507

Program Co-Directors: Professors Mae Ngai (mn53@columbia.edu) and Karl Jacoby (kj2305@columbia.edu) | 425 Hamilton | 212-854-2564

Director of Undergraduate Studies: Prof. Deborah Paredez, 425 Hamilton | 212-854-2564 | Office Hours: 1-3pm | [Online Appointment Scheduling](#) | d.paredez@columbia.edu

Assistant Director: Josephine Caputo | 424 Hamilton Hall | 212-854-0510 | jc2768@columbia.edu

Founded in 1999, the Center for the Study of Ethnicity and Race (CSER) is an interdisciplinary intellectual space whose mission is to advance the most innovative teaching, research, and public discussion about race and ethnicity. To promote its mission, the Center organizes conferences, seminars, exhibits, film screenings, and lectures that bring together faculty, undergraduates, and graduate students with diverse interests and backgrounds. Moreover, CSER partners with departments, centers, and institutes at Columbia, as well as with colleagues and organizations on and off campus, in order to reach new audiences and facilitate an exchange of knowledge.

PROGRAMS OF STUDY

Ethnicity and Race Studies major and concentration encompass a variety of fields and interdisciplinary approaches to the critical study of ethnicity and race. What makes CSER unique is its attention to the comparative study of racial and ethnic categories in the production of social identities, power relations, and forms of knowledge in a multiplicity of contexts including the arts, social sciences, natural sciences, and humanities. In addition to the major, CSER also offers a concentration in ethnicity and race studies.

In both the major and concentration, students have the opportunity to select from the following areas of specialization:

- Asian American studies
- Comparative ethnic studies
- Latino/a studies
- Native American/Indigenous studies
- Individualized courses of study

Faculty and students find this field exciting and important because it opens up new ways of thinking about two fundamental aspects of human social existence: race and ethnicity. Although various traditional disciplines such as history, sociology, anthropology, and literature, among others, offer valuable knowledge on race and ethnicity, ethnicity

and race studies provides a flexible interdisciplinary and comparative space to bring the insights of various conceptual frameworks and disciplines together in critical dialogue.

Overall, this program introduces students to the study of ethnicity and race, and the deep implications of the subject matter for thinking about human bodies, identity, culture, social hierarchy, and the formation of political communities. The major encourages students to consider the repercussions of racial and ethnic identifications to local and global politics, and how race and ethnicity relates to gender, sexuality, and social class, among other forms of hierarchical difference.

Students majoring in ethnicity and race studies may focus their work on specific groups, such as Asian Americans, Latino/a, or Native Americans/Indigenous; or a comparative study of how race and ethnicity are formed and how conceptions of race and ethnicity transform and change over time and place. Students also have the option of designing an individualized course of study, which may encompass a wide variety of themes. Among the most studied are those involving the relationship between race, ethnicity and law; health; human rights; urban spaces; cultural production; visual culture; and the environment.

Due to its rigorous curriculum, which trains students in theory, history, and a wide range of modes of inquiry, the major enables students to follow multiple directions after graduation. According to our internal surveys, nearly half of CSER students continue to Ph.D. programs in history, anthropology, and ethnic studies, among other areas. A second significant number of students continue on to professions most notably related to law, public policy, medicine, human rights, community organizing, journalism, and the environment.

STUDY ABROAD

Students are encouraged to participate in study abroad programs, as they represent an exciting opportunity to learn new languages and live in countries that are germane to their areas of study. In addition, traveling abroad can enrich every student's intellectual experience by providing an opportunity to learn about other perspectives on ethnicity and race.

In summer 2017 CSER, together with Columbia's Office of Global Programs (OGP) launched a pilot summer program in Mexico City in collaboration with the Centro de Investigación y Docencia Económicas--CIDE, a leading institution of higher education with a focus in the social sciences. The program consists of an intensive 5-week CSER core course, "Colonization-Decolonization," visits to various historical colonial sites and a field trip to Oaxaca. Professors Claudio Lomnitz and Manan Ahmed jointly taught the class. Eleven Columbia students participated in this exchange. For more information about the CSER 2018 Global Program in Mexico, please contact cser@columbia.edu

In the past, students have also participated in study abroad programs in Australia, Dominican Republic, Mexico, and South

Africa. To ensure that study abroad complements the major and integrates effectively with the requirements of the major, students are encouraged to consult with CSER's undergraduate adviser as early in their academic program as possible. The director of undergraduate studies can advise students on what may be exciting programs for their areas.

DEPARTMENTAL HONORS

CSER majors may choose to write and/or produce an honors project. The senior thesis gives undergraduate majors the opportunity to engage in rigorous, independent, and original research on a specific topic of their choosing. If a monograph, the honors thesis is expected to be 35-50 pages in length. Honors projects can also take other forms, such as video or websites. These projects also require a written component, but of a shorter length than the traditional thesis. During their senior year, honors students perform research as part of [CSER UN3990 Senior Project Seminar](#). Senior projects are due in early April. The Honors Thesis is an excellent option for any student interested in pursuing a Master's degree or Ph.D. Students should consult with their [director of undergraduate studies](#) no later than the beginning of the first term of their senior year if they wish to be considered for departmental honors. Students who are awarded departmental honors are notified by their department in mid-May.

In order to qualify for departmental honors, students must satisfy all the requirements for the major, maintain a GPA of at least 3.6 in the major, and complete a high quality honors project. In addition, each student is expected to meet periodically with his or her supervising project adviser and preceptor. Although the senior thesis is a prerequisite for consideration for departmental honors, all Ethnicity and Race studies majors are strongly encouraged to consider undertaking thesis work even if they do not wish to be considered for departmental honors.

CORE FACULTY AND EXECUTIVE COMMITTEE

Sayantani DasGupta (CSER, Professional Studies)
Jennifer Lee (Sociology)
Catherine Fennel (Anthropology)
Kevin Fellezs (Ethnomusicology and IRAAS)

Karl Jacoby CSER Co-Director (History)
Claudio Lomnitz (Anthropology)
Frances Negrón-Muntaner (English and Comparative Literature)
Mae Ngai CSER Co-Director (History)
Ana Maria Ochoa (Ethnomusicology)
Deborah Paredez (CSER and Professional Practice)
Audra Simpson (Anthropology)
Neferti Tadiar (Barnard, Women's Studies)

MAJOR IN ETHNICITY AND RACE STUDIES

The requirements for this program were modified on September 28, 2018. Students who declared this program before this date

should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The major in ethnicity and race studies consists of a minimum of 27 points. All majors are required to take three core courses as listed below:

		Points
Core Courses		
1.		
CSER UN1010	Introduction to Comparative Ethnic Studies (or)	4
OR		
CSER UN1040	CRIT APPRO-STUDY OF ETH # RACE	3.00
2.		
CSER UN3928	Colonization/Decolonization	4
OR		
CSER UN3942	Race and Racisms	4
3.		
CSER UN3919	Modes of Inquiry	4

Specialization

All majors will select one of the areas of specialization listed below from which to complete their remaining coursework:

- Asian American studies
- Comparative ethnic studies
- Latino/a studies
- Native American/Indigenous studies
- Individualized courses of study

Majors who elect NOT to follow the Honors track must complete at least five CSER elective courses, in consultation with their major adviser, within their area of specialization. At least one of these electives must be a writing-intensive seminar (3000 or above level courses must be chosen within the department). Majors who elect to follow the Honors track must complete at least four CSER elective courses, in consultation with their major adviser, within their area of specialization.

Honors

In lieu of a fifth elective, Honors majors are required to enroll in the following course in the spring semester of their senior year, during which they are required to write a thesis:

CSER UN3990	Senior Project Seminar	4
-------------	------------------------	---

Honors majors are required to present their senior essays at the annual undergraduate symposium in April. Students may fulfill this option in one of the following two ways:

1. By matriculating in the Senior Thesis course and writing the thesis under the supervision of the course faculty.
2. By taking an additional 4-point seminar where a major paper is required and further developing the paper into a thesis length work (minimum of 30 pages) under the supervision of a CSER faculty member.

Language Courses

- One of the following is highly recommended, although not required for the major:

- One course beyond the intermediate-level in language pertinent to the student's focus
- An introductory course in a language other than that used to fulfill the degree requirements, but that is pertinent to the student's focus
- A linguistics or other course that critically engages language
- An outside language and study abroad programs that include an emphasis on language acquisition

CONCENTRATION IN ETHNICITY AND RACE STUDIES

The requirements for this program were modified on September 28, 2018. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The concentration in ethnicity and race studies requires a minimum of 19 points. Students take two core courses (may choose between CSER UN1010 and CSER UN1040) and four elective courses, one of which must be a seminar:

Core Courses

The concentration in ethnicity and race studies requires a minimum of 19 points. All students who choose a concentration are required to take two core course as listed below:

1.			
CSER UN1010	Introduction to Comparative Ethnic Studies (or)	4	
OR			
CSER UN1040	CRIT APPRO-STUDY OF ETH # RACE	3	
2.			
CSER UN3928	Colonization/Decolonization	4	
OR			
CSER UN3942	Race and Racisms	4	

Specialization

Students must complete at least four courses, in consultation with their major adviser, in one of the following areas of specialization. At least one of the elective courses must be a seminar.

- Asian American studies
- Comparative ethnic studies
- Latino/a studies
- Native American/Indigenous studies
- Individualized courses of study

FALL 2020

Ethnicity and Race Studies

CSER UN1010 Introduction to Comparative Ethnic Studies. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Students MUST register for a Discussion Section.

Introduction to the field of comparative ethnic studies.

Fall 2020: CSER UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 1010	001/20893	M W 2:40pm - 3:55pm Online Only	Frances Negron-Muntaner	4	74/90

CSER UN3444 The Decolonial Appeal: Desiring Decolonization in Sites of Representation. 4.00 points.

Contemporary sites of representation - museums and institutions - operating in a readymade terrain of settler colonial public secrets, have increasingly been called upon, from within and without, to reckon with their own entanglements, to decolonize. Responses to this appeal reveal the difficulties of navigating in the wake of contradictions left by partial past attempts. As institutional moves risk recurrent denials of contemporaneity and slippages into neo-primitivism, manifesting as symptoms of the creation of museums as sites with a dependence on racialized territorial dispossession and foundational displacement, with the inheritance of collections, sites of containment, and conditions of display as legacies to uphold, how can we escape entrapment? In this course, through comparative analysis of texts, film screenings, and events of currency, augmented by site visits and interactions with visiting art world practitioners and cultural informants, we will create space to examine strategies in the age of contested progressivisms, to confront and evaluate risks and rewards of variant approaches, of art practice, advocacy and activism. This class offers an opportunity to address the tenability of methodologies and strategies arising from this appeal, to increase our ability to propose and enact speculative and effective models for engagement.

Fall 2020: CSER UN3444

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3444	001/15465	W 2:10pm - 4:00pm Online Only	Jackson Polys	4.00	11/18

CSER UN3490 Post 9/11 Immigration Policies. 4 points. Enrollment limited to 22.

Since September 11, 2001, there has been an avalanche of immigration enforcement policies and initiatives proposed or implemented under the guise of national security. This course will analyze the domino effect of the Patriot Act, the Absconder Initiative, Special Registration, the Real I.D. Act, border security including the building of the 700-mile fence along the U.S./Mexico border, Secured Communities Act-that requires the cooperation of state and local authorities in immigration enforcement, the challenge to birthright citizenship, and now the congressional hearings on Islamic radicalization. Have these policies been effective in combating the war on terrorism and promoting national security? Who stands to benefit from these enforcement strategies? Do immigrant communities feel safer in the U.S.? How have states joined the federal bandwagon of

immigration enforcement or created solutions to an inflexible, broken immigration system?

Fall 2020: CSER UN3490

CSER UN3904 Rumor and Racial Conflict. 4 points.

This course will take a transnational look at the strange ways that race and mass rumors have interacted. From the judicial and popular riots in the U.S. justified by recurrent rumors of African-American insurrection, to accusations that French Jews were players in the 'white slave trade,' to tales of white fat-stealing monsters among indigenous people of Bolivia and Peru, rumors play a key role in constructing, enforcing, and contesting regimes of racial identity and domination. In order to grasp rumor's importance for race, we will need to understand how it works, so our readings will cover both instances of racialized rumor-telling, conspiracy theories and mass panics, and some key approaches to how rumors work as a social phenomenon. The instructor will expect you to post a response to the reading on Courseworks each week and to engage actively in class discussion. There will be an in-class midterm exam, and you will be able to choose between writing an independent research project or doing a take-home exam.

Spring 2021: CSER UN3904

CSER UN3919 Modes of Inquiry. 4 points.

Corequisites: CSER UN3921

This class, a combination of a seminar and a workshop, will prepare students to conduct, write up, and present original research. It has several aims and goals. First, the course introduces students to a variety of ways of thinking about knowledge as well as to specific ways of knowing and making arguments key to humanistic and social science fields. Second, this seminar asks students to think critically about the approaches they employ in pursuing their research. The course will culminate in a semester project, not a fully executed research project, but rather an 8-10 page proposal for research that will articulate a question, provide basic background on the context that this question is situated in, sketch preliminary directions and plot out a detailed methodological plan for answering this question. Students will be strongly encouraged to think of this proposal as related to their thesis or senior project. Over the course of the semester, students will also produce several short exercises to experiment with research techniques and genres of writing.

CSER UN3922 Race and Representation in Asian American Cinema. 4 points.

Enrollment limited to 22.

This seminar focuses on the critical analysis of Asian representation and participation in Hollywood by taking a look at how mainstream American cinema continues to essentialize the Asian and how Asian American filmmakers have responded to Hollywood Orientalist stereotypes. We will analyze various issues confronting the Asian American, including yellowface, white patriarchy, male and female stereotypes, the "model minority" myth, depictions of "Chinatowns," panethnicity, the changing political interpretations of the term "Asian American" throughout American history, gender and sexuality, and cultural hegemonies and privileging within the Asian community.

CSER UN3923 LATINX & ASIAN AMER MEMOIR. 4 points.

In this class, we will explore Latino and Asian American memoir, focusing on themes of immigration and duality. How do we construct identity and homeland when we are multiple? How do we define ourselves and how do others define us? By reading some of the most challenging and exciting memoirs by Latino and Asian Americans, we will attempt to answer these questions and/or at least try to understand these transnational and multicultural experiences. This class combines the critical with the creative--students have to read and critic memoirs as well as write a final 10-page nonfiction creative writing piece. Students will also have the opportunity to speak to some Latino and Asian authors in class or via SKYPE. Students will be asked to prepare questions in advance for the author, whose work(s) we will have read and discussed. This usually arises interesting and thought-provoking conversations and debates. This Dialogue Series within the class exposes students to a wide-range of voices and offers them a deeper understanding of the complexity of duality.

CSER UN3926 Latin Music and Identity. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Latin music has had a historically strained relationship with mainstream music tastes, exploding in occasional 'boom' periods, and receding into invisibility in others. What if this were true because it is a space for hybrid construction of

identity that directly reflects a mixture of traditions across racial lines in Latin America? This course will investigate Latin music's transgression of binary views of race in Anglo-American society, even as it directly affects the development of pop music in America. From New Orleans jazz to Texas *corridos*, salsa, rock, and reggaeton, Latin music acts as both as a soundtrack and a structural blueprint for the 21st century's multicultural experiment. There will be a strong focus on studying Latin music's political economy, and investigating the story it tells about migration and globalization.

CSER UN3928 Colonization/Decolonization. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructor's permission. This course explores the centrality of colonialism in the making of the modern world, emphasizing cross-cultural and social contact, exchange, and relations of power; dynamics of conquest and resistance; and discourses of civilization, empire, freedom, nationalism, and human rights, from 1500 to 2000. Topics include pre-modern empires; European exploration, contact, and conquest in the new world; Atlantic-world slavery and emancipation; and European and Japanese colonialism in Asia, Africa, and the Middle East. The course ends with a section on decolonization and post-colonialism in the period after World War II. Intensive reading and discussion of primary documents.

CSER UN3932 US Latinx History. 4 points.

With a current presence of over fifty-five million people of Hispanic descent, Latina/o/xs have played a significant role in shaping U.S. history and national identity. This course is intended to introduce students to some of the major themes in U.S. Latinx history with particular attention to source material and methodologies in assigned readings. More broadly, we will explore the histories of the diverse Latina/o/x populations in the U.S. to understand how Latina/o/xs maintain cultural and political links within the diaspora and fit within shifting national projects of race and citizenship. To this end, we will

also discuss the incorporation of Latina/o/xs into society both as a broad demographic group and specifically within major immigrant groups: Mexicans, Cubans, Puerto Ricans, Dominicans, Central Americans, and South Americans.

CSER GU4000 INTRO TO AMERICAN STUDIES. 3

points.

See department for course description

CSER GU4040 Whiteness, Sentiment and Political Belonging. 4 points.

Scholars of gender, sexuality, ethnicity and race have long been preoccupied with the terms, categories, and processes through which the United States has excluded or qualified the citizenship of particular groups, including women, immigrants, indigenous nations, and descendants of enslaved Africans. Yet it has spent less time interrogating the unqualified content of Americanness, and the work that the imagination of a "default" American identity does in contemporary political life. This seminar introduces students to this problem through an unspoken racial dimension of American political belonging -- the presumed whiteness of ideal American citizens. Readings drawn from several disciplinary traditions, including anthropology, linguistics, sociology, history, and journalism, will ground students in the course's key concepts, including racial markedness, the history of racialization, and public sentiment. Students will mobilize these tools to analyze several cases that rendered white sentiment explicit in politically efficacious ways, including the "panic" incited by the destabilization of race-based residential segregation, the "paranoia" of conspiracy theorists, the "sympathy" associated with natural disasters, and the "resentment" or "rage" associated with the loss of racial privileges

In addition to this intellectual work, students will gain practice in the seminar format: a collegial development and exchange of ideas and arguments through discussion and writing.

CSER GU4361 Documenting Disaster. 4.00 points.

COURSE DESCRIPTION How have writers from across the Americas written into and from and through and beyond disaster? How can their work guide us through our current moment? Disaster simultaneously obliterates and generates language. The language of disaster is found in the silenced plea or the official decree that denies or ensures the disaster's spread. To speak toward and against the disaster is to speak in a stutter or a slash or a song. What labor and what ethical, political, and aesthetic considerations are required of and modelled by writers who document disaster? What can we learn from the techniques of point of view, form, voice, silence, sound, and shape used by these writers? What do their works teach us about the intersections among racial and class disparities,

gendered and sexual violence, homo-and trans-phobia, war, public health emergencies, disaster capitalism, environmental racism, authoritarian regimes, and militarized policing? Genres studied include poetry, lyric essays, fiction, graphic novels, memoir, and drama

SPRING 2021

Ethnicity and Race Studies

CSER UN1011 Introduction to Asian American Studies. 4 points.

This course provides an overview of Asian/ Pacific American history from the late 18th Century until the present day. The course surveys significant and interrelated topics -- including anti-Asian movements, immigration and exclusion, various forms of resistance, Orientalism, media representations, the model minority myth, the Asian American movement, identity, and racial, ethnic, and generational conflicts. Specifically it will explore historical and contemporary Asian American issues and rights.

CSER UN3304 Race and Aesthetics in Cinema. 4.00 points.

This course examines the intersection of race and aesthetics in cinema. Race, here, is used intersectionally to include not

only race and ethnicity, but also all of the affiliated lines of contact, including national identity, gender, and sexuality. While the study of race is typically associated with political questions and concerns, and aesthetics are frequently linked with artistic form, this course seeks to locate the intersection of those categories in cinema and to complicate the ways in which the terms operate in relation to one another. Films and readings are drawn from a diverse set of global cultures, artists, and authors, and span a broad historical horizon. Our discussions will include questions including (but not limited to): do certain forms of racial representation generate unique aesthetic form? For instance, can we trace a specific kind of aesthetics in the works produced by the L.A. Rebellion filmmakers? How do certain film movements align with and inspire one another, such as those between Black and Asian/Asian American filmmakers? How does analyzing a film's formal elements further our understandings of the thematic, political, cultural, and social forces that underpin the film? Together, we will think through these issues, informed by a range of theoretical frameworks including critical race theory, postcolonial theory, feminist theory, and queer theory

CSER UN3305 Provincializing Prohibition: The "War on Drugs" in the Americas. 4.00 points.

Despite being driven by an overarching rationale of zero tolerance, the War on Drugs across the Western Hemisphere encompasses a wide array of policies and interventions that have very different effects on manifold peoples and places. This course closely examines these interventions -- as well as their alternatives and various forms of resistance -- in places as diverse as Philadelphia and San Francisco, the "Tierra Caliente" of Michoacán and Guerrero (Mexico), the Afro-indigenous Moskitia region of Central America, and the Colombian and Peruvian Amazon and Andes regions. The course will put to the test the thesis that the War on Drugs is reproducing the conditions driving drug commerce, in large part by allowing for the emergence of interests which have the aim of extracting, producing, and subsidizing capital at various points of the punitive regime. Through detailed ethnographic and historical analyses of drug-related governmental intervention, the course probes the multifarious entanglement between drug control regimes and the social formations from which they emerge and upon which they act. We will engage scholarship on crop substitution and crop eradication programs in South America, regimes of coca regulation in the Andes, militarization and drug rehabilitation programs in Central America, and territorial reconfigurations in Tohono Indigenous land along the US-Mexico border, among others

CSER UN3701 US Latina/o Cultural Production. 4 points.
Enrollment limited to 22.

The course will investigate the possibility that hybrid constructions of identity among Latinos in the U.S. are the principal driving force behind the cultural production of Latinos in literature and film. There will be readings on the linguistic implications of “Spanglish” and the construction of Latino racial identity, followed by examples of literature, film, music, and other cultural production that provide evidence for bilingual/bicultural identity as a form of adaptation to the U.S. Examples will be drawn from different Latino ethnicities from the Caribbean, Mexico, and the rest of Latin America.

Spring 2021: CSER UN3701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3701	001/10911	T 4:10pm - 6:00pm Online Only	Edward Morales	4	13/15

CSER UN3913 Video as Inquiry. 4 points.

The goal of this course is to familiarize students with visual production, particularly video production, as a mode of inquiry to explore questions related to race, ethnicity, indigeneity, and other forms of social hierarchy and difference. The class will include readings in visual production as a mode of inquiry and on the basic craft of video production in various genres (fiction, documentary, and experimental). As part of the course, students will produce a video short and complete it by semester's end.

CSER UN3934 Black/Brown History of Rock and Roll. 4 points.

This course is designed to get students to think more deeply about the ethno-racial roots—and routes—of rock and roll music as a national, historical phenomenon. In this class, we'll conceive rock and roll broadly to include peripheral genres which are related to or derived from its origins, including rhythm and blues, jazz, soul, funk, boogaloo, salsa, disco, and hip-hop, to thread together and discuss the relationships between music, identity, and race in the United States. Latinxs and African Americans have played significant, if underrecognized, roles in shaping American popular music; the cultural connections and musical interactivity between these communities are lesser understood in popular narratives of postwar American music. To this end, this course will uncover a broad social, racial, national, and transnational history of rock and roll to understand how musicians of color innovated long-standing musical traditions in their communities; maintained

cultural and political links within the diaspora; and navigated regional racial schemas in the United States and Latin America.

Spring 2021: CSER UN3934

CSER UN3940 Comparative Study of Constitutional Challenges Affecting African, Latino, and Asian American Communities. 4 points.

This course will examine how the American legal system decided constitutional challenges affecting the empowerment of African, Latino, and Asian American communities from the 19th century to the present. Focus will be on the role that race, citizenship, capitalism/labor, property, and ownership played in the court decision in the context of the historical, social, and political conditions existing at the time. Topics include the denial of citizenship and naturalization to slaves and immigrants, government sanctioned segregation, the struggle for reparations for descendants of slavery, and Japanese Americans during World War II.

CSER UN3942 Race and Racisms. 4 points.

In this class we will approach race and racism from a variety of disciplinary and intellectual perspectives, including: critical race theory/philosophy, anthropology, history and history of science and medicine. We will focus on the development and deployment of the race concept since the mid-19th century. Students will come to understand the many ways in which race has been conceptualized, substantiated, classified, managed and observed in the (social) sciences, medicine, and public health. We will also explore the practices and effects of race (and race-making) in familiar and less familiar social and political worlds. In addition to the course's intellectual content, students will gain critical practice in the seminar format -- that is, a collegial, discussion-driven exchange of ideas.

Spring 2021: CSER UN3942

CSER UN3964 Maya Guatemala-Neoliberalism # Resistance. 4.00 points.

Guatemala's recurrent history of Indigenous genocide is closely linked to U.S. interventions. Meanwhile, Maya organizing in Guatemala has helped spearhead Indigenous political visibility globally. This course examines socio-historical dynamics that have shaped Indigenous Guatemala to better understand current crises like migration and postwar violence.

We study settler colonialism; Maya land dispossession and labor exploitation; U.S. corporate imperialism via banana republics; Maya autonomy efforts; Maya intellectuals, populist organizing, and the guerrilla revolutionary movement; racism and postwar multiculturalism; genocidal military counterinsurgency; sexual violence and femicide; the social impacts of Guatemalan and U.S. Catholicism and Evangelicalism; postwar neoliberal restructuring; and the rise of the narco-state and resource extraction on Indigenous territories. We will look at contemporary postwar issues of political disillusionment, militarized “war by other means,” conflicts between Indigenous communities and environmental conservationists, gender and the recovery of Indigenous law and anti-GMO organizing involving Native seed banks. We pay special attention to Indigenous political action as resistance to highly oppressive regimes of terror

CSER UN3970 Arab and Asian Diaspora in Literature and Film. 4.00 points.

This course explores contemporary Arab and Asian Diasporic cultures and history through literature and film produced by writers and filmmakers of these communities. As a starting historical point, the course explores the idea of Arabness and Asianness, and examines the Arab and Asian migration globally. By reading and viewing the most exciting and best-known literary works and films produced by these writers and filmmakers, students will attain an awareness of the richness and complexity of these societies. Additionally, students will read historical and critical works to help them have a deeper understanding of these creative works. This class combines the critical with the creative—students have to read and critic memoirs as well as write a final 10-page creative writing piece. Discussions revolve around styles and aesthetics as well as identity and cultural politics. Some of the writers and filmmakers the class will cover include, Wajdi Mouawad, Amin Maalouf, Tahar Ben Jelloun, Anthony Shadid, Hisham Matar, Kim Thúy, Jane Jeong Trenka, Nadine Labaki, Fatih Akin, Hong Khaos and so forth

CSER UN3990 Senior Project Seminar. 4 points.

The Senior Paper Colloquium will focus primarily on developing students' ideas for their research projects and discussing their written work. The course is designed to develop and hone the skills necessary to complete the senior paper. Students will receive guidance in researching for and writing an advanced academic paper. Conducted as a seminar, the colloquium provides the students a forum in which to

discuss their work with each other. The CSER preceptor, who facilitates the colloquium, will also provide students with additional academic support, supplementary to the advice they receive from their individual faculty sponsors. While most of the course will be devoted to the students' work, during the first weeks of the term, students will read and discuss several ethnic studies-oriented texts to gain insight into the kinds of research projects done in the field.

CSER GU4482 INDIGENOUS PEOPLES:MOVEMNT/RTS. 3.00 points.

Indigenous Peoples, numbering more than 370 million in some 90 countries and about 5000 groups and representing a great part of the world's human diversity and cultural heritage, continue to raise major controversies and to face threats to their physical and cultural existence. The main task of this course is to explore the complex historic circumstances and political actions that gave rise to the international Indigenous movement through the human rights agenda and thus also produced a global Indigenous identity on all continents, two intertwined and deeply significant phenomena over the past fifty years. We will analyze the achievements, challenges and potential of the dynamic interface between the Indigenous Peoples' movement—one of the strongest social movements of our times—and the international community, especially the United Nations system. Centered on the themes laid out in the United Nations Declaration on the Rights of Indigenous Peoples (2007), the course will examine how Indigenous Peoples have been contesting and reshaping norms, institutions and global debates in the past 50 years, re-shaping and gradually decolonizing international institutions and how they have contributed to some of the most important contemporary debates, including human rights, development, law, and specifically the concepts of self-determination, governance, group rights, interculturality and pluriculturality, gender, land, territories and natural resources, cultural rights, intellectual property, health, education, the environment and climate justice. The syllabus will draw on a variety of academic literature, case studies and documentation of Indigenous organizations, the UN and other intergovernmental organizations as well as States from different parts of the world. Students will also have the opportunity to meet with Indigenous leaders and representatives of international organizations and States and will be encouraged to attend the United Nations Permanent Forum on Indigenous Issues. Select short films will be shown and discussed in class

FILM AND MEDIA STUDIES

Departmental Office: 513 Dodge; 212-854-2815
<http://arts.columbia.edu/film>

Director of Undergraduate Studies: Prof. Robert King, Mondays 9-12, Dodge 601C or <https://columbiauniversity.zoom.us/j/2037291445>

The major in film studies is scholarly, international in scope, and writing-intensive. Students choose to major in film if they want to learn more about the art form, from technology to cultural significance; want to work in the film industry; or are interested in a major that combines arts and humanities.

Students usually declare the major toward the end of the second year by meeting with the departmental adviser; together, they create a program of twelve required courses within the major, often supplemented by courses outside the department. In the lecture classes and seminars, there tends to be a mixed population of undergraduate majors and graduate film students.

Students have the opportunity to gain additional experience by taking advantage of internship opportunities with film companies, working on graduate student films, and participating in the Columbia Undergraduate Film Productions (CUFP), an active, student-run organization that provides film-making experience to Columbia undergraduate producers and directors. In addition to careers in screenwriting, directing, and producing, alumni have gone on to work in film distribution, publicity, archives, and festivals, and to attend graduate school to become teachers and scholars.

The trajectory of the major is from introductory-level courses (three are required), to intermediate and advanced-level courses (two are required, plus seven electives). While film studies majors take workshops in screenwriting and film-making, the course of study is rooted in film history, theory, and culture.

The prerequisite for all classes is *Introduction to Film and Media Studies* (FILM UN1000) offered each term at Columbia as well as at Barnard, and open to first-year students. Subsequently, majors take a combination of history survey courses; workshops ("Labs"); and advanced classes in theory, genre study, national cinemas, auteur study, and screenwriting.

The educational goal is to provide film majors with a solid grounding in the history and theory of film; its relation to other forms of art; and its synthesis of visual storytelling, technology, economics, and sociopolitical context, as well as the means to begin writing a script and making a short film.

Students who wish to graduate with honors must take the Senior Seminar in Film Studies (FILM UN3900), writing a thesis that reflects mastery of cinematic criticism. The essay is submitted

after the winter break. Students decide upon the topic with the professor and develop the essay during the fall semester.

Since film courses tend to be popular, it is imperative that students attend the first class. Registration priority is usually given to film majors and seniors.

DEPARTMENTAL HONORS

In order to qualify for departmental honors, students must have a GPA of 3.75 in the major and distinction in their overall achievements in film study. Students who take FILM UN3900 Senior Seminar in Film Studies automatically enter consideration for honors; however, the class is not a requirement for honors.

MAJOR IN FILM STUDIES

The major in film studies requires a minimum of 36 points distributed as follows:

Introductory Courses

FILM UN1000	Introduction to Film and Media Studies
FILM GU4000	Film and Media Theory

History Courses

Select two of the following courses, one of which must either be FILM UN2010 or FILM UN2020:

FILM UN2010	Cinema History 1: Beginning-1930
FILM UN2020	Cinema History 2: 1930-60
FILM UN2030	Cinema History 3: 1960-90
FILM UN2040	Cinema History 4: after 1990

Laboratories

Select one of the following courses:

FILM UN2410	LAB IN WRITING FILM CRITICISM
FILM UN2510	Laboratory in Fiction Filmmaking
FILM UN2420	Laboratory in Screenwriting
FILM UN2520	Laboratory In Nonfiction Filmmaking

Electives

Select seven of the following electives, one of which must be an international course:

FILM UN1010	Genre Study
FILM UN2310	The Documentary Tradition

FILM UN1000 Introduction to Film and Media Studies. 3 points.

Lecture and discussion. Priority given to declared film majors. Fee: \$75.

Prerequisites: Discussion section FILM UN1001 is a required corequisite

This course serves as an introduction to the study of film and related visual media, examining fundamental issues of aesthetics (mise-en-scene, editing, sound), history (interaction of industrial, economic, and technological factors), theory (spectatorship, realism, and indexicality), and criticism (auteurist, feminist, and genre-based approaches). The course also investigates how digital media change has been productive of new frameworks for moving image culture in the present. FILM UN1001 is required discussion section for this course.

Fall 2020: FILM UN1000

FILM UN1010 Genre Study. 3 points.

Fee: Course Fee - 75

Prerequisites: This lecture course will have 3 discussion sections, capped at 20, listed as UN 1011 Genre Study - Disc. There will also be a film screening, scheduled immediately after one of the lecture sessions.

This course examines how globalization and the global success of American blockbuster films have affected Hollywood film production, stardom, distribution, and exhibition. The course will analyze blockbuster aesthetics, including aspects of special effects, 3-D, sound, narration, genre, and editing. We will also study the effects of new digital technologies on Hollywood

and the cross-pollination among Hollywood, art house, and other national cinemas. Finally, we will examine the effects of 9/11, the “war on terrorism,” climate change and other global concerns on marketing, aesthetics and other aspects of this cinema

FILM UN2010 Cinema History 1: Beginning-1930. 3 points.

This course rethinks the “birth of cinema” from the vantage of “when old media was new.” Following standard approaches, it moves from *actualities* to fiction, from the “cinema of attractions” to narrative, from the *cinématographe* to cinema, from cottage industry to studio system. Units in silent film music, early genres, film piracy and copyright, word and moving image, and restoration—the film archivist’s dilemma in the digital era. FILM W2011

FILM UN2020 Cinema History 2: 1930-60. 3 points.

Discussion Section Required

Priority given to film majors. Fee: \$75.

This course examines major developments and debates in the history of cinema between 1930 and 1960, from the consolidation of the classic Hollywood studio system in the early sound era to the articulation of emergent “new waves” and new critical discourses in the late 1950s. Our approach will be interdisciplinary in scope, albeit with an emphasis on social and cultural history – concerned not only with how movies have developed as a form of art and medium of entertainment, but also with cinema’s changing function as a social institution. FILM UN2040 Cinema History 4: after 1990. 3 points.

This course brings our survey of the development of the art, technology, and industry of motion images up to the present. During this era, most people no longer watched movies (perhaps the most neutral term) in theaters, and digital technology came to dominate every aspect of production, distribution, and exhibition. Highlighted filmmakers include Michael Haneke, Lars von Trier, Wong Kar-wei, and Steve McQueen. Topics range from contemporary horror to animation. Requirements: short (2-3 pages) papers on each film shown for the class and a final, take-home exam. FILM W2041

FILM UN2190 Topics in American Cinema. 3 points.

This course surveys the first century of the American Western film genre, and its relation to American imaginings and ideologies of the “frontier,” with in-depth readings of key precursor texts, including memoirs, histories, novels, and essays. We will consider the evolution of the genre and its changing place within the film industry, and study exemplary films that established and challenged the genre’s narrative, aesthetic, and ideological conventions. We will explore how films engage with the history and myth of the American West. We will also be analyzing the politics of the Western, in particular how films articulate configurations of race, class, nation, sexuality and gender. And we will study the way Western films and filmmakers themselves interrogate the analytic categories we use to study them -- categories such as “genre” and “auteur” -- with specific attention to the work and career of John Ford. Please note: the course requires sustained engagement with and analysis of written texts as well as films, so please be prepared for a bit more reading than what you might expect from a typical film survey course.

FILM W2291

FILM UN2292 Topics in World Cinema: China. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Fee: Course Fee - 75

The international revelation of Chinese cinema in the 1980s was one of the great events both for film studies and film production in the past fifty years: the depth and richness of the classic cinemas of the PRC, Hong Kong and Taiwan were complemented by the emergence of exciting new films and filmmakers from each of those film cultures. This course will trace the history and development of filmmaking in mainland China and Hong Kong, from the Shanghai cinema of the 1930s to recent examples of digital media production, examining changes in film style and technique within the context of ever-shifting political currents and production models. A special focus will be the ongoing dialogue between Chinese film and international trends ranging from realism to postmodernism.

FILM UN2294 World Cinema: Latin America. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An overview of the major developments in the art and industry of cinema in Latin America, ranging from its earliest days to the most recent works of the digital era. The interaction of Latin American filmmakers with international movements such as neorealism, modernism, *cinema vérité*, and postmodernism will be addressed. Among the filmmakers to be studied are Luis Buñuel, Glauber Rocha, Raúl Ruiz and Lucrecia Martel.

Students will discover the major industrial trends as well as artistic currents that have defined Latin American cinema, as well as have the chance to analyze a number of key works both

in terms of their varying approaches to filmmaking as well as their resonance with political/social/historical issues.

FILM UN2295 World Cinema: Latin America - Discussion Section. 0 points.

Not offered during 2020-21 academic year.

Discussion section lead by a Teaching Assistant to review lecture, reading and screening.

FILM UN2310 The Documentary Tradition. 3 points.

Film screening, lecture, and discussion. Fee: \$75.

This class offers an introduction to the history of documentary cinema and to the theoretical and philosophical questions opened up by the use of moving images to bear witness, persuade, archive the past, or inspire us to change the future.

How are documentaries different than fiction films? What is the role of aesthetics in relation to facts and evidence in different documentary traditions? How do documentaries negotiate appeals to emotions with rational argument? From the origins of cinema to our current "post-truth" digital age, we will look at the history of how cinema has attempted to shape our understanding of reality. FILM W2311

FILM UN2400 Script Analysis. 3 points.

Lecture and discussion. Fee: \$50.

The dramatic and cinematic principles of screen storytelling, including dramaturgy, character and plot development, use of camera, staging, casting, sound, editing, and music. Diverse narrative techniques, story patterns, dramatic structures, and artistic and genre forms are discussed, and students do screenwriting exercises. FILM UN2401 discussion section is required

FILM UN2410 LAB IN WRITING FILM CRITICISM. 3.00 points.

Priority is given to film majors.

Prerequisites: the instructor's permission. Applicants must submit a writing sample, approximately 3 pages long, to cj2374@columbia.edu for permission to register. Lab in Writing Film Criticism, Fall 2021 Prof. Caryn James This course will focus on writing fresh, original criticism, on developing an individual voice, and on creating strong arguments supporting your ideas (qualities that translate to many areas, from reviewing to pitching a film project). Screenings in and outside class, with an emphasis on recent films, will be followed by discussion and in-class writing exercises. How do you choose an effective critical approach? How do you make your opinions vivid and convincing

on the page? We will also analyze and evaluate recent criticism. Students will write short reviews and longer essays. Prerequisite: Instructor's permission. Submit a short sample to cj2374@columbia.edu . Note: because permission is required, on-line registration may say the course is full when it is not

FILM UN3010 AUTEUR STUDY. 3.00 points.

Fee: \$50.

This seminar in Auteur Study explores the cinematic work of the renowned Polish filmmaker Krzysztof Kieslowski, best known for such classics as Three Colors: Blue, White, Red and Decalogue. Special attention will be paid to the latter--ten 1-hour films loosely based on the 10 Commandments--considered a towering achievement of poetic style as well spiritual vision. Through in-class screenings, discussions, and readings, we will focus on the formal, political and thematic richness of his films. Requirements include weekly attendance, punctuality, classroom participation, a midterm paper (5 - 7 pages), and a final paper (10 - 12 pages)

Fee: \$75.

We will explore how films from a variety of countries--notably Germany, Poland, France, Italy and the U.S.--have attempted to grapple with the legacy of the Shoah. Through close reading of such motion pictures as *THE SHOP ON MAIN STREET*, *THE PAWNBROKER*, *SEVEN BEAUTIES*, *PARTISANS OF VILNA*, *KORCZAK* and *GENGHIS COHN*, we will discuss the possibilities and limitations of Holocaust representation onscreen.

FILM UN3900 Senior Seminar in Film Studies. 3 points.

Fee: \$30.

A seminar for senior film majors planning to write a research paper in film history/theory/culture. Course content changes yearly.

Fall 2020: FILM UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 3900	001/13399	Th 2:00pm - 5:30pm Online Only	Annette Insdorf	3	12/12

FILM UN3910 Senior Seminar in Filmmaking. 3 points.

Prerequisites: FILM UN2420 or FILM UN2510

An advanced directing workshop for senior film majors who have already completed *FILM UN2420* or *FILM UN2510*.

FILM UN3915 Advanced Film Production Practice. 3 points.

Prerequisites: FILM UN2510 or FILM UN2520

Advanced Film Production Practice is an advanced production and lecture course for students who wish to obtain a deeper understanding of the skills involved in screenwriting, directing and producing. Building on the fundamentals established in the Labs for Fiction and Non-Fiction Filmmaking, this seminar further develops each student's grasp of the concepts involved in filmmaking through advanced analytical and practical work to prepare Thesis film materials.

Short films are the gateway for any writer/director or producer seeking a career in film. From pitch to script to final film, students learn the importance of identifying and developing producible ideas and scripts that feature a strong directorial "voice." Starting with a close analysis of successful short films, students then apply those principles in writing, directing and producing their own Thesis short film. A study of the marketplace for short films (festivals and distribution) and the industry and academic options available to emerging filmmakers, enables students to develop an action plan for the completed Thesis short film.

FILM UN3920 Senior Seminar in Screenwriting. 3 points.

A seminar for senior film majors. Students will complete a step outline and minimum of 30 pages of their project, including revisions. Through reading/viewing and analyzing selected scripts/films, as well as lectures, exercises and weekly critiques, students will expand their understanding of dramatic writing

and narrative-making for film and TV, including adaptations. They will learn appropriate structure for each specific screenwriting form, and endeavor to apply their understanding of drama, character, theme, and structure to their chosen narrative project.

Fall 2020: FILM UN3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

FILM UN3925 Narrative Strategies in Screenwriting. 0-3 points.

Prerequisites: *FILM UN2420*.

This workshop is primarily a continuation of *Senior Seminar in Screenwriting*. Students will either continue developing the scripts they began in *Senior Seminar in Screenwriting*, or create new ones including a step outline and a minimum of 30 pages. Emphasis will be placed on character work, structure, theme, and employing dramatic devices. Weekly outlining and script writing, concurrent with script/story presentation and class critiques, will ensure that each student will be guided toward the completion of his or her narrative script project.

FILM UN3930 Seminar in International Film. 3 points.

Section 001 taught by Annette Insdorf Spring 2018. This is a course about Polish Cinema.

Section 002 taught by Edward Turk Fall 2018. Study of major films in the seven-decade career of Jeanne Moreau, the performing artist who is widely recognized as France's greatest actress of the post-World War II era and who has also been a pioneering female director. Topics include: the value for film criticism and history of conceptualizing the performer as a creative auteur; Moreau's manner(s) of film acting and role realization; the risks and the productive consequences of her serving as "muse" to such male directors as Louis Malle, François Truffaut, Orson Welles, Joseph Losey, Rainer Werner Fassbinder, and Paul Mazursky, and as a creative partner to such female directors as Marguerite Duras and Josée Dayan; her embodiments and projections of sexuality and sensuality and how they differ from those of other so-called "screen love goddesses" (Brigitte Bardot, Elizabeth Taylor, Sophia Loren, Simone Signoret, Catherine Deneuve); Moreau's own work as a director of feature-length films; the rewards and burdens of international stardom and the challenge of being expected to "represent" France and its cinema; growing old in the public eye and life-long strategies for career renewal and sustainability.

FILM UN3950 Seminar in Media: Seriality. 3 points.

From streaming to binge-viewing, *Serial to Breaking Bad*, seriality is a preeminent framework for the orchestration of contemporary media production and consumption. This course explores histories and theories of seriality as a recurrent trope of media cultures over the last century and more. To this end, the course adopts a comparative media perspective, exploring seriality in its varied textual manifestations across diverse media forms (the penny press, early cinema, television, podcasts, and social media). It also focuses on the range of functions that seriality has performed, as, e.g., a mode for the systematization of mass cultural reproduction, as a framework for the integration of fan networks and media systems, even as a vehicle for the creation of national and political communities.

FILM UN3960 Intro to Experimental Film & Video. 3 points.

This course provides an overview of experimental film and video since the early 20th century European art movements (abstract, Dada, Surrealism), including the emergence of American experimental film in the 1940s, post-World War II underground experimental films, structuralist films and early video art in the 1960s and 70s, post-1960s identitarian experimental work, the emergence of digital video in museums and online in the 1990s to the present. The course surveys and analyses a wide range of experimental work, including the artists Hans Richter, Luis Bunuel, Salvador Dali, Joseph Cornell, Maya Deren, Andy Warhol, Stan Brakhage, Michael Snow, Martha Rosler, Vito Acconci, Barbara Hammer, Su Friedrich, Julie Dash, Isaac Julien, Matthew Barney, Ryan Trecartin, and others. The course will study the structural, aesthetic and thematic links between mainstream and avant-garde cinema, theater, and art movements, and will place the films in their economic, social, and political contexts.

FILM GU4000 Film and Media Theory. 3 points.

Fee: \$50.

An introduction to some of the major texts in film theory, with particular attention to film theory's evolving relations to a number of philosophical issues: the nature of the aesthetic; the relation of symbolic forms to the construction of human subjectivities; narrative and the structure of experience; modernity, technology, popular culture, and the rise of mass political formations; and meaning, intention, and authorship. FILM Q4001

Fall 2020: FILM GU4000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 4000	001/13401	M 2:00pm - 5:45pm Online Only	Nico Baumbach	3	67/69

FILM GU4300 African American Film & Media. 3 points.

This seminar will offer a survey and critical assessment of African American film and visual cultures from the early 20th century to the contemporary moment, covering early race films, intersections with Hollywood, independent filmmaking, and popular television. In this seminar, we will explore Black

aesthetics and spectatorship, issues of representation, Black pain and suffering, the Black radical tradition, and intersections of race, gender and sexuality in media and visual culture.

FILM GU4310 Experimental Film and Media. 3 points.

This course provides an overview of experimental moving images from the European "city symphonies" and abstract films of the 1920s to the flowering of the American postwar avant-garde; from the advent of video art in the 1960s to the online viral videos and digital gallery installations of today. The class thus surveys the artists, institutions, and viewers that have fostered moving image art throughout the history of film, and asks students to consider the historical, social, and institutional forces that have engendered oppositional, political, and aesthetically radical cinemas. A central premise of the course is that technological developments such as video and new media are not historical ruptures, but part of an ongoing tradition of moving-image art making. Other core topics include the consideration of the meaning and use-value of the avant-garde, the issue of "artists' film and video" as opposed to "experimental film," and the thorny relationship between avant-garde and commercial filmmaking.

FILM GU4320 New Directions in Film and Philosophy. 0 points.**FILM GU4910 Seeing Narrative. 3 points.**

Prerequisites: the instructor's permission.

An advanced film theory "workshop" in which we shall avoid reading film theory in favor of a selection of other texts, taken mainly from the domains of art history, philosophy, and literature. Our central question will be: What can filmmakers and film theorists learn from discourses about vision and its relation to narrative that pre-date the cinema, or that consider the cinema only marginally?

FILM GU4940 Queer Cinema. 3 points.

This course examines themes and changes in the (self-)representation of lesbians, gay men, bisexuals, and transgender people in cinema from the early sound period to the present. It pays attention to both the formal qualities of film and filmmakers' use of cinematic strategies (mise-en-scene, editing, etc.) designed to elicit certain responses in viewers and to the distinctive possibilities and constraints of the classical Hollywood studio system, independent film, avant-garde cinema, and world cinema; the impact of various regimes of formal and informal censorship; the role of queer men and women as screenwriters, directors, actors, and designers; and the competing visions of gay, progay, and antigay filmmakers. Along with considering the formal properties of film and the historical forces that shaped it, the course explores what cultural analysts can learn from film. How can we treat film as evidence in historical analysis? We will consider the films we see as evidence that may shed new light on historical problems and periodization, and will also use the films to engage with recent queer theoretical work on queer subjectivity, affect, and culture.

Fall 2020: FILM GU4940

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

FILM GU4950 Visual Bodies: From Cinema to New Media. 3 points.

How is the human body, in its diversity, portrayed on screen? And how may filmic languages—from cinema to new media—be affected by the multifaceted experience of our embodied dimension? In this course we will examine the intricate relationship between cinema and the body as a paradigmatic way to study how moving images are seen, made, and experienced today. From a plurality of standpoints (historical, formal, theoretical) and across a wide range of corpus (documentary, fiction, experimental, new media, art cinema), we will ask ourselves how different filmic discourses are able to represent and explore the creative faculties but also the darker sides of the body, its gestures, desires, impulses or drives. We will investigate how they can account for the cognitive, gender, cultural, technological and political revolutions associated with the body throughout history, with a particular emphasis on contemporary contexts of new images, mediascapes, and practices. Focusing on several key-sites of the (post-)modern condition—cosmopolitan/metropolitan experiences, narrative technologies, pluralist (dis-)identifications, transmedial mobility, immanent temporalities—the course will offer rich critical opportunities to make sense of contemporary bodies via moving images, and *vice versa*.

Theoretical/critical works read in class will include texts by Bergson, Epstein, Pierce, Deleuze, Bellour, Elsaesser, Doane, Lastra...

The course is organized around lectures/seminars and film screenings. Students are expected to participate fully by carrying out assessed readings and writing assignments, actively involve in classroom discussions/viewings, and give scheduled oral presentations.

FILM GU4951 NEW MEDIA ART. 3 points.

The rapid democratization of technology has led to a new wave of immersive storytelling that spills off screens into the real world and back again. These works defy traditional constraints as they shift away from a one-to-many to a many-to-many paradigm, transforming those formerly known as the audience from passive viewers into storytellers in their own right. New opportunities and limitations offered by emergent technologies are augmenting the grammar of storytelling, as creators wrestle with an ever-shifting digital landscape.

New Media Art pulls back the curtain on transmedial works of fiction, non-fiction, and emergent forms that defy definition. Throughout the semester we'll explore projects that utilize Artificial Intelligence, Virtual Reality, Augmented Reality and the Internet of Things, alongside a heavy-hitting selection of new media thinkers, theorists, and critics.

The course will be co-taught as a dialogue between artistic practice and new media theory. Lance Weiler, a new media artist and founder of Columbia's Digital Storytelling Lab, selected the media artworks; Rob King, a film and media historian, selected the scholarly readings. It is in the interaction between these two perspectives that the course will explore the parameters of emerging frontiers in media art and the challenges these pose for existing critical vocabularies.

FRENCH AND ROMANCE PHILOLOGY

Departmental Office: 515 Philosophy; 212-854-2500 or 212-854-3208

<http://www.columbia.edu/cu/french/>

Director of Undergraduate Studies: Prof. Eliza Zingesser, 504 Philosophy; 212-854-3905; ez2135@columbia.edu

Director of the Language Program: Dr. Pascale Hubert-Leibler, 519 Philosophy; 212-854-4819; ph2028@columbia.edu

Director of Academic Administration and Finance: Isabelle Chagnon, 515 Philosophy; 212-854-7978; ic7@columbia.edu

The Department of French and Romance Philology offers a major and concentration in French, as well as a major and concentration in French and Francophone studies. Students who are primarily interested in French literature should consider the major in French. Students who are interested in French history and civilization, and in the literature and culture of the Francophone world, should consider the major in French and Francophone studies.

Major in French

The major in French gives students an in-depth familiarity with the language, culture, and literature of France and the French-speaking world. After completing the four-semester language requirement, students take courses in advanced grammar, and composition to refine their skills in reading, speaking, and writing French. In a required two-semester survey course (FREN UN3333-FREN UN3334), they receive a comprehensive overview of the development of French literature from the Middle Ages to the present day. After completing these core courses, French majors are encouraged to pursue individual interests; a wide range of language, literature, and cultural studies courses is available. Small classes and seminars allow for individual attention and enable students to work closely with faculty members. Advanced elective courses

on French literature, history, philosophy, and cinema allow students to explore intellectual interests, perfect critical reading skills, and master close reading techniques.

The capstone course is the senior seminar, in which students study a range of texts and critical approaches and are encouraged to synthesize their learning in previous courses. The optional senior essay, written under the direction of a faculty member, introduces students to scholarly research. To be considered for departmental honors, students must complete the senior essay.

Major in French and Francophone Studies

The major in French and Francophone studies provides an interdisciplinary framework for the study of the history, literature, and culture of France and parts of the world in which French is an important medium of culture. Students explore the history and contemporary applications of concepts such as citizenship, national unity, secularism, and human rights, and explore central issues including universalism/relativism, tradition/modernity, and religion/state as they have developed in France and its colonies/former colonies since the 18th century.

Students take a series of required courses that includes:

- French grammar and composition/stylistics, essential to achieving proficiency in French language;
- FREN UN3420 INTRO-FRANCOPHONE STUDIES I-FREN UN3421 Introduction To French and Francophone Studies II;
- FREN UN3995 Senior Seminar.

Having completed these courses, students take courses in related departments and programs, e.g., history, anthropology, political science, women's studies, human rights, art history, to fulfill the interdisciplinary portion of the major. To ensure methodological focus, three of these courses should be taken within a single field (e.g., history, music, anthropology, or political science), or in relation to a single issue or world region, e.g., West Africa.

IN FULFILLMENT OF THE LANGUAGE REQUIREMENT

Students beginning the study of French at Columbia must take four terms of the following two-year sequence:

Entering students are placed, or exempted, on the basis of their College Board Achievement or Advanced Placement scores, or their scores on the placement test administered by the Center for Student Advising, 403 Lerner. An SAT score of 780 or a score of 4 on the AP exam satisfies the language requirement.

The Barnard course, FREN BC1204 Intermediate II does **not** fulfill the undergraduate language requirement.

Language Proficiency Courses

Elementary and intermediate French courses help students develop an active command of the language. In FREN UN1101 Elementary French I and FREN UN1102 Elementary French II, the communicative approach is the main instructional method. In addition to practicing all four language skills—listening, speaking, reading, and writing—students are introduced to the cultural features of diverse French-speaking communities.

In intermediate courses FREN UN2101 INTERMEDIATE FRENCH I and FREN UN2102 Intermediate Course II, students develop linguistic competence through the study of short stories, films, novels, and plays. After completing the four-semester language sequence, students can discuss and write in fairly proficient French on complex topics.

At the third-year level, attention is focused on more sophisticated use of language, in grammar and composition courses, and on literary, historical, and philosophical questions.

Conversation Courses

Students looking for intensive French oral practice may take one of the 2-point conversation courses offered at intermediate and advanced levels. Conversation courses generally may not be counted toward the major. The exception is the special 3-point advanced conversation course, FREN UN3498, offered in the fall, designed to meet the needs of students planning to study abroad at Reid Hall.

ADVANCED PLACEMENT

- AP score of 4: The department grants 0 credits for a score of 4 on the AP French Language exam, but the foreign language requirement is satisfied.
- AP score of 5 or DELF: The department grants 3 credits for a score of 5 on the AP French Language exam, or for the completion of DELF (Diplôme d'Etudes en Langue Française). Students are awarded this credit after they take a 3000-level French course (taught in French, for at least 3 points) and obtain a grade of B or above in that course.
- DALF C1 level or IB HL score of 6 or 7: The department grants 6 credits for the C1 level of DALF (Diplôme Approfondi de Langue Française), or for a score of 6 or 7 on the International Baccalaureate (IB) Higher Level (HL) exam. Students have no obligation to take higher-level French courses in order to receive these 6 credits, but restrictions apply on the use of these credits toward the French major.

LANGUAGE LABORATORY AND ON-LINE MATERIALS

Language laboratories located in the International Affairs Building provide opportunities for intensive practice in French pronunciation and aural comprehension. French courses

typically make extensive use of on-line interactive materials that students can access from their own computer terminals.

MAISON FRANÇAISE

Students interested in French should acquaint themselves with the Maison Française, which houses a reading room of French newspapers, periodicals, books, and videos, and sponsors lectures/discussions by distinguished French visitors to New York City. With its weekly French film series, book club, café-conversation and other events, the Maison Française offers an excellent opportunity for students to perfect their language skills and enhance their knowledge of French and Francophone culture.

STUDY ABROAD

Because a direct experience of contemporary French society is an essential part of the program, majors and concentrators are strongly encouraged to spend either a semester or a year at Reid Hall-Columbia University in Paris, or at another French or Francophone university. During their time abroad, students take courses credited toward the major and, in some cases, also toward other majors (e.g. history, art history, political science).

For information on study abroad, visit the OGP website at www.ogp.columbia.edu, call 212-854-2559, or e-mail studyabroad@columbia.edu. For a list of approved study abroad programs, visit <http://www.ogp.columbia.edu/index.cfm?FuseAction=Programs.ListAll>.

Reid Hall, Paris

Located at 4 rue de Chevreuse, Paris, Reid Hall is administered by Columbia University. It offers semester and year-long programs of study, as well as summer courses.

Most students who study at Reid Hall take courses in the French university system (e.g., at the Sorbonne) and core courses offered at Reid Hall. In their first semester, students take a course in academic writing in French, enabling them to succeed at a high level in French university courses. Special opportunities include small topical seminars of Reid Hall students and French students.

For information on study abroad at Reid Hall, visit www.ogp.columbia.edu.

GRADING

Students who wish to use toward the major or concentration a course in which a grade of D has been received must consult with the director of undergraduate studies.

DEPARTMENTAL HONORS

Majors who wish to be considered for departmental honors should consult with the director of undergraduate studies. To be eligible, students must have a grade point average of at least 3.7 in major courses and have completed an approved senior thesis under the guidance of a faculty member at Columbia or Reid

Hall. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

UNDERGRADUATE PRIZES

The Department of French and Romance Philology awards the following prizes to students enrolled in courses in the department:

1. Prize for Excellence in French Studies: awarded to a highly promising student in an intermediate or advanced French course;
2. Senior French Prize: awarded to an outstanding graduating major.

Professors

- Madeleine Dobie
- Antoine Compagnon
- Souleymane Bachir Diagne
- Pierre Force
- Elisabeth Ladenson
- Camille Robcis
- Emmanuelle Saada
- Joanna Stalnaker

Associate Professors

- Peter Connor (Barnard)
- Eliza Zingesser

Assistant Professors

- Thomas Dodman
- Aubrey Gabel

Visiting Professors

- Etienne Balibar

Senior Lecturers

- Heidi Holst-Knudsen
- Pascale Hubert-Leibler
- Sophie Queuniet

Lecturers

- Alexandra Borer
- Pascale Crépon
- Samuel Skippon

Eric Matheis

MAJOR IN FRENCH

The program of study should be planned before the end of the sophomore year with the director of undergraduate studies.

The major in French requires a minimum of 33 points beyond completion of the language requirement (FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	THIRD-YEAR GRAMMAR # COMP
FREN UN3333 - FREN UN3334	Introduction to Literary Study I and Introduction to Literary Studies II
FREN UN3600	France, Past and Present. An Introduction to French Civilization.
FREN UN3995	Senior Seminar
Select one upper-level course on literature before 1800.	
Select one course in area of Francophone literature or culture, i.e., bearing on practices of French outside of France or on internal cultural diversity of France.	
The remaining four courses (12 points) are to be chosen from 3000-level offerings in French literature, linguistics, or civilization.	
One of the following advanced language classes can be counted as an elective: French for Diplomats; French Culture, Language and Society through...; Advanced Translation Workshop; and The Cultural Workshop.	

Note the following:

- FREN BC3006 Composition and Conversation is not applicable to either the French major or the concentration. Other Barnard French courses may be taken with the approval of the director of undergraduate studies;
- Heritage speakers are exempted from FREN UN3405 THIRD-YEAR GRAMMAR # COMP, but must replace the course by taking an advanced elective.

The following Columbia French courses are **not applicable** to the French major or concentration:

FREN UN1101	Elementary French I
FREN UN1102	Elementary French II
FREN UN1105	Accelerated Elementary French
FREN UN2101	INTERMEDIATE FRENCH I
FREN UN2102	Intermediate Course II
FREN UN2106	RAPID READING AND TRANSLATION
FREN UN2121	INTERMED CONVERSATN FRENCH I
FREN UN2122	INTERMED CONVERSATN FRENCH II
FREN UN3131	Third-Year Conversation I

FREN UN3132	THIRD-YEAR CONVERSATION FR II
-------------	-------------------------------

CONCENTRATION IN FRENCH

The requirements for this program were modified on March 1, 2016. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The concentration in French requires a minimum of 24 points beyond completion of the language requirement (FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	THIRD-YEAR GRAMMAR # COMP
FREN UN3333 - FREN UN3334	Introduction to Literary Study I and Introduction to Literary Studies II
FREN UN3600	France, Past and Present. An Introduction to French Civilization.

The remaining four courses (12 points) are to be chosen from 3000-level offerings in French literature, linguistics, or civilization.

One of the following advanced language classes can be counted as an elective: French for Diplomats; French Culture, Language and Society through...; Advanced Translation Workshop; and The Cultural Workshop.

MAJOR IN FRENCH AND FRANCOPHONE STUDIES

The requirements for this program were modified on February 14, 2014. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The program of study should be planned before the end of the sophomore year with the director of undergraduate studies.

The major in French and Francophone studies requires a minimum of 33 points beyond completion of the language requirement (FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	THIRD-YEAR GRAMMAR # COMP
FREN UN3420	INTRO-FRANCOPHONE STUDIES I
FREN UN3421	Introduction To French and Francophone Studies II
FREN UN3995	Senior Seminar

Select one course on Francophone/postcolonial French literature.

The remaining six courses (18 points) are to be chosen from upper-level offerings in French and other disciplines. Nine (9) of these points must be taken in a discipline other than French literature. To ensure focus, these interdisciplinary electives must fall within a single discipline of subject area. Courses must be pre-approved by the director of undergraduate studies. One of the advanced electives may be a senior essay written under the direction of a faculty member affiliated with the French and Francophone studies committee or teaching at Reid Hall. Majors who choose to write a senior essay at Columbia should register for the senior tutorial course in their adviser's home department.

Note the following:

- FREN BC3006 Composition and Conversation is not applicable to either the French and Francophone studies major or concentration. Other Barnard College French courses may be taken with the approval of the director of undergraduate studies;
- Heritage speakers can be exempted from FREN UN3405 THIRD-YEAR GRAMMAR # COMP, but must replace the course by taking an advanced elective.

The following Columbia French courses are not applicable to the French and Francophone studies major or concentration:

FREN UN1101	Elementary French I
FREN UN1102	Elementary French II
FREN UN1105	Accelerated Elementary French
FREN UN2101	INTERMEDIATE FRENCH I
FREN UN2102	Intermediate Course II
FREN UN2106	RAPID READING AND TRANSLATION
FREN UN2121	INTERMED CONVERSATN FRENCH I
FREN UN2122	INTERMED CONVERSATN FRENCH II
FREN UN3131	Third-Year Conversation I
FREN UN3132	THIRD-YEAR CONVERSATION FR II

CONCENTRATION IN FRENCH AND FRANCOPHONE STUDIES

The requirements for this program were modified on March 1, 2016. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The concentration in French and Francophone studies requires a minimum of 24 points beyond completion of the language requirement (FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	THIRD-YEAR GRAMMAR # COMP
-------------	---------------------------

FREN UN3420	INTRO-FRANCOPHONE STUDIES I
FREN UN3421	Introduction To French and Francophone Studies II

One course on Francophone/postcolonial French literature.

The remaining four courses (12 points) are to be chosen from upper-level offerings in French and other disciplines. Six (6) of these points must be taken in a discipline other than French literature. To ensure focus, these interdisciplinary elective courses must fall within a single discipline or subject area. Courses must be pre-approved by the director of undergraduate studies.

LANGUAGE

FREN UN1101 Elementary French I. 4 points.

The aim of the beginning French sequence (French 1101 and French 1102) is to help you to develop an active command of the language. Emphasis is placed on acquiring the four language skills--listening, speaking, reading and writing--within a cultural context, in order to achieve basic communicative proficiency.

FREN UN1105 Accelerated Elementary French. 8 points.

Prerequisites: The instructor's permission

This course covers in one semester the material normally presented in Elementary French I and II. This course is especially recommended for students who already know another Romance language.

FREN UN2101 INTERMEDIATE FRENCH I. 4 points.

This course will further your awareness and understanding of the French language, culture and literature, provide a comprehensive review of fundamental grammar points while introducing more advanced ones, as well as improve your mastery of oral, reading, and writing skills. By the end of the course, you will be able to read short to medium-length literary and non-literary texts, and analyze and comment on varied documents and topics, both orally and in writing.

FREN UN2121 INTERMED CONVERSATION FRENCH I. 2 points.

We will be working on pronunciation, vocabulary acquisition, listening comprehension, and oral expression. Activities will include listening comprehension exercises, skits, debates, and oral presentations, as well as discussions of films, songs, short films, plays, news, articles, short stories or other short written documents. Although *grammar* will not be the focus of the course, some exercises will occasionally aim at reviewing particular points. **The themes and topics covered will be chosen according to students' interests.**

FREN UN2122 INTERMED CONVERSATION FRENCH II. 2 points.

We will be working on pronunciation, vocabulary, listening comprehension, and oral expression. Activities will include listening comprehension exercises, skits, debates, and oral presentations, as well as discussions of films, songs, short films, news, articles, short stories or other short written documents. Although grammar will not be the focus of the course, some exercises will occasionally aim at reviewing particular points.

FREN UN3241 FRENCH LANGUAGE THRU THEATER. 3.00 points.

The course is taught in French and focuses on learning the French language via the study of theatre (through plays, scenes, theories, lecture/workshops by guests, as well as performing a series of activities). The course offers students the opportunity to have a better grasp of the variety of French theatres within the culture; and to perform the language through the body and mind. Its goal is to both introduce students to theatre and to explore how it challenges us physically and emotionally, as well as in intellectual, moral, and aesthetic ways. No previous acting experience is necessary but a desire to “get up and move” and possibly even go see plays as a class project is encouraged

FREN UN3405 THIRD-YEAR GRAMMAR # COMP. 3.00 points.

Enrollment limited to 15.

Prerequisites: *FREN UN3405* must be taken before *FREN UN3333/4* unless the student has an AP score of 5 or the director of undergraduate studies' permission.

Prerequisites: *FREN UN3405* must be taken before *FREN UN3333/4* unless the student has an AP score of 5 or the director of undergraduate studies permission. The goal of

FREN UN3405 is to help students improve their grammar and perfect their writing and reading skills, especially as a preparation for taking literature or civilization courses, or spending a semester in a francophone country. Through the study of two full-length works of literature and a number of short texts representative of different genres, periods, and styles, they will become more aware of stylistic nuances, and will be introduced to the vocabulary and methods of literary analysis. Working on the advanced grammar points covered in this course will further strengthen their mastery of French syntax. They will also be practicing writing through a variety of exercises, including pastiches and creative pieces, as well as typically French forms of academic writing such as “résumé,” “explication de texte,” and “dissertation

FREN UN3242 French Language, Culture, and Society through the Discovery of Paris. 3 points.

Prerequisites: 2 years of college French

Prerequisites: 2 years of college French Paris may be referred to as the capital of modernity, as the city of romance and pleasure, as the center of social and political powers, or as a privileged stage for crises and revolutions. Analyzing and researching the meanings of these diverse representations would expose students to key aspects of French and Francophone political, social, and cultural history. This is a proposal for a course intended for students who, having completed their language requirement in French, would like to better their knowledge of French language and society. It would offer students the opportunity to study representations of Paris over the centuries as a way to practice writing, reading, and conversation in French and as a way to deepen their understanding of French and Francophone cultures. Materials for the course would include major literary texts as well as paintings, movies and popular songs, but also museum websites, local newspapers and local ads, brochures from retail and food malls, restaurant menus, postcards... such variety can be utilitarian and intellectually compelling at the same time. It would allow students not only to study language registers and vocabulary

contextualization but also work on finding patterns and making connections.

FREN UN3921 Witches, Fairies and Female Vampires in French Literature and Art. 3.00 points.

A French inquisitor said in the 17th century: "To one wizard, ten thousand witches." The witches were seen, not only as "female wizards," but as qualitatively different from wizards and warlocks. There was something fundamentally female about their magic. At first sight, witches, fairies and female vampires differ greatly. Yet they all embody a certain female (supernatural or natural) power, that fearful men tried to restrain and stigmatize over the centuries. Daughters of both Eros and Thanatos, they share features that were frowned upon by political and religious institutions. Moreover, female vampires may be former witches, while witches are often given names actually referring to fairies: the borders between those categories, whether it is in medieval or romantic literature, are definitely not as rigid as they might initially seem. The struggle against or for female magic occurred within literature and art. This class aims at showing how the artistic and literary representation of those creatures evolved from medieval times until our own, oscillating between condemnation, ambiguous fascination, and mere rehabilitation. It questions the role of gender politics in the literary construction of witchcraft and other supernatural phenomena. An important place is given to female French writers, who, for obvious reasons, envisioned those topics in a peculiar way, frequently turning negative stereotypes into sources of empowerment. The final two weeks will be devoted to a comparative, French-American approach to the Salem trials. We will discuss literary excerpts, short stories and poems (mostly in French though a vast majority are accessible in translation) as well as paintings and movies. The class is taught in French. It is principally designed for French and Comparative Literature majors, or advances undergraduates with a good knowledge of French

CLFR GU4421 The Caribbean Digital. 3 points.

The Internet is analogous in important ways to the Caribbean itself as dynamic and fluid cultural space: it is generated from disparate places and by disparate peoples; it challenges fundamentally the geographical and physical barriers that disrupt or disallow connection; and it places others in relentless relation. This class will both introduce students to the digital humanities and to the French-speaking Caribbean as a generative geo-cultural space for exploring the potential of

the Internet to confront and disrupt many of the structures of dominance that have traditionally silenced marginalized voices. It will provide an introduction to several of the formats and tools that have facilitated such engagements, along with immediate critical reflection and discussion about their value to the academy. Since information technology has become one of the key ways in which the peoples of the French-speaking Caribbean and its diasporas both communicate with one another and gain access to global conversations, alongside this exploration of digital tools, in general, this class will consider how the Internet enables people in marginalized spaces to engage with crucial social problems and to express their intellectual and political perspectives.

FREN UN3503 Enlightenment/Counter-Enlightenment. 3 points.

Prerequisites: completion of *FREN UN3333* or *UN3334* and *UN3405*, or the director of undergraduate studies' permission. Taking modern definitions and critiques of Enlightenment as its starting point, this course will look at how the Enlightenment defined itself as a philosophical, cultural and literary movement, practiced self-criticism from within, and responded to dissension and critique from without. Authors will include Adorno, Horkheimer, Foucault and Israel for the modern critical context, and Voltaire, Diderot, Buffon, Rousseau, Sade and Kant for the eighteenth century material. The course will be given in French, but non-majors may write papers in English. This course fulfills the French Major requirement for a course on literature before 1800.

FREN UN3726 Sex, Class and Shame in 20th-21st Century French Literature. 3 points.

Prerequisites: Prerequisites: completion of *FREN UN3333* or *UN3334* and *UN3405*, or the director of undergraduate studies' permission.

The second half of the twentieth century in France saw a sudden explosion of literary works examining, with unprecedented explicitness, sexuality and social class and the relations between them. This course will provide an introduction to the literature of sexual and social abjection,

beginning with Genet and Violette Leduc and including works by Annie Ernaux, Christine Angot, Virginie Despentes, and Edouard Louis. We will also consider relevant sociological writings by Bourdieu, Eribon, and Goffman. Readings and discussion will be in French.

FREN W3515 Writing the Self Workshop. 3 points.

Corequisites: *FREN W3333-FREN W3334* or equivalent, or the director of undergraduate studies' permission.

In this course, we will read works spanning the history of French literature from the Renaissance to the present in which the problem of writing the self is posed. We will also engage in various writing exercises (pastiche, translation, personal narrative) and discuss the works on the syllabus in conjunction with our own attempts to write the self. Authors will include Montaigne, Rousseau, Roland, Sand, Colette, Barthes, Modiano, and NDiaye. This course fulfills the pre-1800 requirement.

FREN UN3517 Montaigne, Descartes, Pascal. 3 points.

Prerequisites: *FREN UN3333-UN3334* or the director of undergraduate studies' or the instructor's permission. A study of Montaigne's *Essais* and their rewriting by Descartes and Pascal, with a focus on the nature of intellectual and aesthetic innovation in a humanist context.

FREN W3520 The Avant-Gardes in France. From Baudelaire to Situationism.. 0 points.
Not offered during 2020-21 academic year.

In this course, we will study the main movements of 19th and 20th-century literary history: symbolism, modernism, dada, surrealism, existentialism, Nouveau Roman, situationism... We will pay particular attention to the emergence of the notion of avant-garde and to its theoretical implications. Although centered on literature, the course will also consider some musical and visual pieces (paintings, collages, sculptures, photographs, short films, etc.).

FREN UN3529 French Theater in Performance. 3 points.
Enrollment limited to 15. Not offered during 2020-21 academic year.

Prerequisites: Advanced coursework in French (*FREN UN3405*, *UN3333*, *UN3334* or the equivalent).

This course will combine reading, interpretation and performance of a small selection of short French plays from the eighteenth and nineteenth centuries, in preparation for a public performance at Columbia University's Maison Française at the end of the semester.

FREN W3544 French Lyric Poetry. 3 points.
Not offered during 2020-21 academic year.

Prerequisites: *FREN W3333-FREN W3334* or the director of undergraduate studies' or the instructor's permission.

A study of lyric poetry from the Middle-Ages to the Nineteenth Century, with a focus on the changing uses of poetic form.

Authors include Charles d'Orléans, Christine de Pizan, Voiture, Musset, Banville, Hugo.

FREN UN3600 France, Past and Present. An Introduction to French Civilization.. 3 points.

Prerequisites: FREN UN3333 or UN3334 and UN3405, or the director of undergraduate studies' permission.

Based on readings of short historical sources, the course will provide an overview of French political and cultural history since 1700.

Spring 2021: FREN UN3600

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FREN 3600	001/12695	T Th 1:10pm - 2:25pm Online Only	Molly Lindberg	3	12/15

FREN W3603 Sexual Enlightenment. 3 points.
Not offered during 2020-21 academic year.

Prerequisites: *FREN W3333-FREN W3334* or the instructor's permission.

This course explores the relationship between sex and knowledge in literary and philosophical works of the French Enlightenment. Authors include Montesquieu, Cr billon, Buffon, Condillac, Diderot, Bernardin de Saint-Pierre, Laclos and Sade. The course fulfills the pre-1800 requirement for the French major.

FREN UN3616 Paris, capitale du 19e siecle. 3 points.

Prerequisites: completion of FREN UN3333 or UN3334 and UN3405, or the director of undergraduate studies' permission.

In this course we will consider literary representations of Paris in French literature of the 19th century. The city that was in many ways the cultural capital not only of France, but of all of Europe, played a decisive role in the development of literary modernity. Reading authors such as Flaubert, Baudelaire, Balzac, Hugo, Rimbaud, Stendhal, we will pay particular attention to the the portrayal of the city of Paris's role in the upheavals of modernization.

FREN W3640 Poesie Francophone d'Afrique et des Antilles 1890-1970. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *FREN W3333-FREN W3334* or the director of undergraduate studies' or the instructor's permission.

This class is devoted to an understudied aspect of Francophone literature, namely the wide corpus of poetry written in French in Africa and the Caribbean, until (and including) decolonization. We will close-read poems, insisting on the basic tools required to do so and on the history of poetic forms (e.g. what are the differences between *vers libre*, *verset*, *po  me en prose*?), and we will explore notions such as exoticism, automatism, avant-garde or anthology. The ultimate goal is to reflect on the practice of writing and reading poetry in the context of a structural imbalance between center and periphery. The course is taught in French and the readings will be in French.

FREN W3666 Moliere. 3 points.

Prerequisites: completion of *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission. Study of Moli  re's major plays, including *Tartuffe*, *Dom Juan*, and *Le Misanthrope*, focusing on key concepts such as naturalness and convention, value and exchange, and the relationship between ethics and comedy. Special attention will be paid to the connections between critical approaches of the text and the various ways in which the plays can be staged.

FREN W3714 1914-2014 : un siecle de litteratures en francais. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: completion of *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission. This class is intended as a survey course on French literatures in the past 100 years. It will consider all major moments and movements of literature in French in the 20th century (surrealism, existentialism, negritude, Nouveau Roman...) until and including some of the most remarkable literary creations of the early 21st century. The course is taught in French and the readings will be in French.

FREN W3672 Surrealism. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *FREN W3333-FREN W3334* or the director of undergraduate studies' or the instructor's permission.

Study of one of the main movements of 20th-century literary history, and art history in general. We will pay particular attention to the evolution of surrealism and to its theoretical implications on such key notions as: the notion of author, of avant-garde, of automatism, of image or of work of art. Although centered on literature, the course will also consider some visual pieces (paintings, collages, sculptures, photographs, short films...).

FREN W3766 Transcribing/Writing Tales in Africa. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: *FREN W3333-FREN W3334* or the director of undergraduate studies' or the instructor's permission. The students are required to be able to read and discuss tales in French.

Transcribing, adapting, rewriting, reinventing in the French language African oral tales is an important literary genre in African francophone literature. The works of authors such as Amadou Hamp  t   B   from Mali, Bernard Dadi   from C  te d'Ivoire and Birago Diop from Senegal are among the classics of that genre. The course is a study of a certain number of "tales" written with talent and humor by B  , Dadi   and Diop; they are from the following books: *Il n'y a pas de petite querelle* (B  ), *Le pagne noir* (Dadi  ), *Les contes d'Amadou Koumba*, and *Les nouveaux contes d'Amadou Koumba* (Diop). This course is intended primarily for undergraduate students interested in French and in Francophone Studies majors,

concentrators, and those who speak French and want to study an important aspect of literature in French.

FREN W3726 Sex, Class and Shame in 20th-21th Century French Literature. 3 points.

Prerequisites: Prerequisites: completion of FREN W3333 or W3334 and W3405, or the director of undergraduate studies' permission.

The second half of the twentieth century in France saw a sudden explosion of literary works examining, with unprecedented explicitness, sexuality and social class and the relations between them. This course will provide an introduction to the literature of sexual and social abjection, beginning with Genet and Violette Leduc and including works by Annie Ernaux, Christine Angot, Virginie Despentes, and Edouard Louis. We will also consider relevant sociological writings by Bourdieu, Eribon, and Goffman. Readings and discussion will be in French.

CLFR UN3830 French Film. 3 points.

A study of landmarks of French cinema from its origins to the 1970s. We will pay particular attention to the relation between cinema and social and political events in France. We will study films by Jean Vigo, Jean Renoir, Rene Clair, Alain Resnais, Francois Truffaut and Jean-Luc Godard. In English.

SENIOR SEMINAR AND SENIOR THESIS

FREN UN3995 Senior Seminar. 3 points.

Prerequisites: completion of either *FREN UN3333-FREN UN3334* or *FREN UN3420-FREN UN3421*, and *FREN UN3405*, or the director of undergraduate studies' or the instructor's permission.

Required of all French and French & Francophone Studies majors. Usually taken by majors during the fall term of their senior year. Critical discussion of a few major literary works along with some classic commentaries on those works. Students critically assess and practice diverse methods of literary analysis.

Fall 2020: FREN UN3995

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

FREN GU4301 French Literature of the 17th Century. 3 points.

A one-semester survey of seventeenth-century French literature, with an emphasis on the relationship between literature and the major cultural, philosophical, and religious developments of the period.

GERMANIC LANGUAGES

Departmental Office: 415 Hamilton; 212-854-3202

<https://germanic.columbia.edu/>

Director of Undergraduate Studies: Prof. Mark Anderson, 405 Hamilton; 212-854-3666; mma2@columbia.edu

Language Instruction: Jutta Schmiere-Heller, 403A Hamilton; 212-854-4824; js2331@columbia.edu

The Department of Germanic Languages and Literatures is considered one of the very best in the country. Many of the faculty specialize in the study of German literature and culture from 1700 to the present. German majors acquire proficiency in examining literary, philosophical, and historical texts in the original, as well as critical understanding of modern German culture and society. Particular attention is given to German-speaking traditions within larger European and global contexts. Courses taught in translation build on Columbia's Core Curriculum, thereby allowing students to enroll in upper-level seminars before completing the language requirement.

All classes are taught as part of a living culture. Students have ample opportunities to study abroad, to work with visiting scholars, and to take part in the cultural programs at Deutsches Haus. In addition, the department encourages internships with German firms, museums, and government offices. This hands-on experience immerses students in both language and culture, preparing them for graduate study and professional careers.

Upon graduation, German majors compete successfully for Fulbright or DAAD scholarships for research in Germany or Austria beyond the B.A. degree. Our graduating seniors are highly qualified to pursue graduate studies in the humanities and social sciences, as well as professional careers. Former majors and concentrators have gone on to careers in teaching, law, journalism, banking and consulting, international affairs, and communications.

German literature and culture courses are taught as seminars integrating philosophical and social questions. Topics include romanticism, revolution, and national identity; German

intellectual history; minority literatures; Weimar cinema; German-Jewish culture and modernity; the Holocaust and memory; and the history and culture of Berlin. Classes are small, with enrollment ranging from 5 to 15 students.

The department regularly offers courses in German literature and culture in English for students who do not study the German language. The department also participates in Columbia's excellent program in comparative literature and society.

ADVANCED PLACEMENT

The department grants 3 credits for a score of 5 on the AP German Language exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3000-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in German. Courses taught in English may not be used for language AP credit. The department grants 0 credits for a score of 4 on the AP German Language exam, but the foreign language requirement is satisfied.

THE YIDDISH STUDIES PROGRAM

The Yiddish Studies Program at Columbia University, the global leader in Yiddish scholarship and teaching, focuses on the experiences and cultural efflorescence of Ashkenazic Jewry over a thousand years and five continents. It is a perfect exemplar of Columbia's interests in global and transnational study, weaving together language, literature, and culture in a way that echoes the best of Columbia's justly famed humanities programs.

The program in Yiddish studies offers both the undergraduate Major and Concentration, in addition to graduate studies leading to the Ph.D. In both the undergraduate and graduate program, emphasis is placed not merely on acquiring linguistic proficiency and textual study, but also viewing Yiddish literature in a larger cultural and interdisciplinary context. The graduate program, the only degree-granting Yiddish Studies Program in the United States, is considered one of the world's most important, with its graduates holding many of the major university positions in the field.

Students of Yiddish have ample opportunities to enhance their studies through a number of fellowships. The [Naomi Fellowship](#), a fully-subsidized Yiddish Study Abroad program allows students to explore Yiddish culture and history in Israel and Poland. The Irene Kronhill Pletka [YIVO Fellowship](#) enables students to expand on their archival research skills in New York. Upon graduation, our majors compete successfully for Fulbright and other prestigious scholarships, and are highly qualified to pursue careers in humanities, social sciences, as well as artistic and professional careers.

Students work with faculty in Germanic languages, Jewish studies, history, and Slavic studies to broaden their understanding of the literature, language, and culture of Eastern

European Jewry. The Yiddish Studies Program is also closely affiliated with the [Institute for Israel and Jewish Studies](#), which offers diverse programming and other fellowship opportunities. Classes are small, and instruction is individualized and carefully directed to ensure that students gain both a thorough general grounding and are able to pursue their own particular interests in a wide-spanning field. The program also offers classes taught in translation for students who do not study Yiddish. The Yiddish programming, such as lectures, monthly conversation hours, Meet a Yiddish Celebrity series, as well as the activities of the Yiddish Club of Columbia's Barnard/Hillel allows students to explore Yiddish culture outside the classroom.

THE GERMAN LANGUAGE PLACEMENT EXAM

The German Language Placement exam is offered periodically to those students who already speak the language, in order to determine to determine their proficiency level (A, B or C). For more information, and for the latest exam dates, please click [here](#).

THE GERMAN LANGUAGE PROGRAM

First- and second-year German language courses emphasize spoken and written communication, and provide a basic introduction to German culture. Goals include mastery of the structure of the language and enough cultural understanding to interact comfortably with native speakers.

After successfully completing the elementary German sequence, GERM UN1101 Elementary German Language Course, I-GERM UN1102 ELEMENTARY GERMAN II, students are able to provide information about themselves, their interests, and daily activities. They can participate in simple conversations, read edited texts, and understand the main ideas of authentic texts. By the end of GERM UN1102 ELEMENTARY GERMAN II, students are able to write descriptions, comparisons, and creative stories, and to discuss general information about the German-speaking countries.

The intermediate German sequence, GERM UN2101 Intermediate German I-GERM UN2102 Intermediate German II, increases the emphasis on reading and written communication skills, expands grammatical mastery, and focuses on German culture and literary texts. Students read short stories, a German drama, and increasingly complex texts. Regular exposure to video, recordings, the World Wide Web, and art exhibits heightens the cultural dimensions of the third and fourth semesters. Students create portfolios comprised of written and spoken work.

Upon completion of the second-year sequence, students are prepared to enter advanced courses in German language, culture, and literature at Columbia and/or at the Berlin Consortium for German Studies in Berlin. Advanced-level

courses focus on more sophisticated use of the language structure and composition (GERM UN3001 Advanced German, I-GERM UN3002 *Advanced German II: Vienna*); on specific cultural areas; and on literary, historical, and philosophical areas in literature-oriented courses (GERM UN3333 Introduction To German Literature [In German]).

IN FULFILLMENT OF THE LANGUAGE REQUIREMENT IN GERMAN

Students beginning the study of German at Columbia must take four terms of the following two-year sequence:

GERM UN1101 Elementary German Language Course, I

GERM UN1102 ELEMENTARY GERMAN II

GERM UN2101 Intermediate German I

GERM UN2102 Intermediate German II

Entering students are placed, or exempted, on the basis of their College Board Achievement or Advanced Placement scores, or their scores on the placement test administered by the departmental language director. Students who need to take GERM UN1101 Elementary German Language Course, I-GERM UN1102 ELEMENTARY GERMAN II may take GERM UN1125 Accelerated Elementary German I & II as preparation for GERM UN2101 Intermediate German I.

UNIVERSITY STUDY IN BERLIN

The Berlin Consortium for German Studies provides students with a study abroad program, administered by Columbia, which includes students from the other consortium member schools (Princeton, Yale, University of Pennsylvania, Johns Hopkins, and the University of Chicago). Under the guidance of a senior faculty member, the program offers a home stay with a German family, intensive language instruction, and study in regular German university courses at the Freie Universität Berlin.

For additional information on the Berlin Consortium, see the *Study Abroad—Sponsored Programs* section in this Bulletin, visit the [Center for Undergraduate Global Engagement](#), or consult the program's office in 606 Kent Hall; 212-854-2559; berlin@columbia.edu.

DEUTSCHES HAUS

Deutsches Haus, 420 West 116th Street, provides a center for German cultural activities on the Columbia campus. It sponsors lectures, film series, and informal gatherings that enrich the academic programs of the department. Frequent events throughout the fall and spring terms offer students opportunities to practice their language skills.

GRADING

Courses in which a grade of D has been received do not count toward the major or concentration requirements.

DEPARTMENTAL HONORS

Normally no more than 10% of graduating majors receive departmental honors in a given academic year. For the requirements for departmental honors, see the director of undergraduate studies.

PROFESSORS

Mark Anderson

MAJOR IN GERMAN LITERATURE AND CULTURAL HISTORY

The goal of the major is to provide students with reasonable proficiency in reading a variety of literary, philosophical, and historical texts in the original and, through this training, to facilitate a critical understanding of modern German-speaking cultures and societies. Students should plan their program of study with the director of undergraduate studies as early as possible. Competence in a second foreign language is strongly recommended, especially for those students planning to attend graduate school.

The major in German literature and cultural history requires a minimum of 30 points, distributed as follows:

GERM UN3001	Advanced German, I (can be waived and replaced by another 3000 level class upon consultation with the DUS)
or GERM UN3002	Advanced German II: Vienna
GERM UN3333	Introduction To German Literature [In German]

Select two of the following survey courses in German literature and culture (at least one of these must focus on pre-20th-century cultural history):

GERM UN3442	Survey of 18th Century German Lit: Enlightenment, Sturm und Drang [In German]
-------------	---

GERM UN3443	Romanticism, Revolution, Realism [In German]
GERM UN3444	SURVEY OF GERMAN LIT:20C
GERM UN3445	German Literature After 1945 [In German]

One course in German intellectual history

GERM UN3991 SENIOR SEMINAR

The remaining courses to be chosen from the 3000- or 4000-level offerings in German and Comparative Literature—German in consultation with the Director of Undergraduate Studies.

Senior Thesis

A senior thesis is not required for the major. Students interested in a senior thesis or research project may do so through independent study with a faculty member over one or two semesters.

MAJOR IN YIDDISH STUDIES

The program is designed as a combination of language and content courses. First- and second-year Yiddish language courses emphasize spoken and written communication, and provide a basic introduction to Eastern European Jewish culture. Goals include mastery of the structure of the language and enough cultural understanding to interact comfortably with native speakers.

After second-year Yiddish language courses are completed, students should feel sufficiently comfortable to begin to work with Yiddish literature in the original. Upper-level undergraduate/graduate courses are designed to accommodate students with a range of Yiddish language experience, and intensive language summer study abroad, such as the Naomi Praver Kadar International Yiddish Summer Program (the Yiddish Studies program at Columbia offers the fully-subsidized Naomi Fellowship for students of Yiddish), or other academic summer programs, is also encouraged for improvement in language acquisition and comprehension.

The goal is to provide students with reasonable proficiency in reading a variety of literary, philosophical, and historical texts in the original and, through this training, to provide them with a critical understanding of Yiddish-speaking culture and society.

The second pillar of the Yiddish program is an intimate exposure to the literature and culture of the Yiddish-speaking Jewry. That exposure is achieved through several courses in Yiddish literature, which, although they may cover a variety of subjects or proceed from a number of methodological and disciplinary orientations, share a rigorous commitment to analyzing and experiencing that literature within an overarching historical and cultural framework.

These courses in Yiddish literature, culture and Jewish history will provide students with a solid interdisciplinary foundation in Yiddish studies. Inevitably and necessary, these courses,

whether taught in Yiddish, English, or in a combination of the Yiddish text and English language instruction – cover the sweep of Yiddish literary history from the early modern period to today.

Students should plan their program of study with the director of undergraduate studies as early as possible. There is a prerequisite of two years of Yiddish, or equivalent to be demonstrated through testing.

The Major in Yiddish Studies requires a minimum of 30 points, distributed as follows:

1. **Two courses of advanced language study** (6 points); YIDD UN3101, YIDD UN3102
2. **Three courses in Yiddish literature** (9 points); e.g. YIDD UN3500, YIDD GU4420
3. **At least one course related to a senior thesis** (3 points);
4. **Four related courses, at least one of which is in medieval or modern Jewish history** (12 points); e.g. HIST UN4604, YIDD GU4113.

A senior thesis **is required** for the Major in Yiddish Studies. Students interested in a senior thesis or research project may do so through independent study with a faculty member over one or two semesters. Students must conduct original research, some of which must take place in the Yiddish language, and are required to submit a culminating paper, of no less than 35 pages.

Elective courses: Elective courses can be taken at Columbia as well as at affiliated institutions such as the Jewish Theological Seminary, Barnard College, New York University, etc. Columbia's arrangements with the joint degree appointing program at JTS, i.e. JTS and GS Joint program with List College, offers students exposure to a wide variety of courses on Yiddish and Yiddish-related topics taught by experts in the field of Yiddish and comparative Jewish literature such as Profs. David Roskies and Barbara Mann.

Thanks to the consortial arrangements with other universities in the New York area (Barnard, NYU, Yale, Penn, etc.) students both in Columbia College and General Studies, can take courses at these institutions for degree credit, which allows for student exposure to experts in twentieth-century Soviet Yiddish literature, Yiddish women's writing, Yiddish literature in Israel, and much more (Profs. Gennady Estraiikh, Kathryn Hellerstein, and Hannan Hever). These arrangements allow students to have, if they so choose, an even broader intellectual experience than the already broad interdisciplinary opportunities available to them via the courses offered by the faculty on the Interdisciplinary Committee on Yiddish at Columbia.

Language courses need to be taken at Columbia.

Honors options: Departmental Honors in Yiddish Studies can be granted to a total of 10% of the students graduating with the

Major in Yiddish Studies in a given year across both Columbia College and General Studies.

CONCENTRATION IN GERMAN LITERATURE AND CULTURAL HISTORY

The concentration in German literature and cultural history requires a minimum of 21 points in German courses.

GERM UN3333 Introduction To German Literature [In German]

At least one of the period survey courses in German literature and culture

GERM UN3442 Survey of 18th Century German Lit: Enlightenment, Sturm und Drang [In German]

GERM UN3443 Romanticism, Revolution, Realism [In German]

GERM UN3444 SURVEY OF GERMAN LIT:20C

GERM UN3445 German Literature After 1945 [In German]

GERM UN3991 SENIOR SEMINAR

The remaining courses to be chosen from the 3000- or 4000-level offerings in German and Comparative Literature in consultation with the Director of Undergraduate Studies

CONCENTRATION IN YIDDISH STUDIES

The concentration in Yiddish studies requires a minimum of 21 points, distributed as follows:

1. **Two courses of advanced language study** (6 points); YIDD UN3101, YIDD UN3102
2. **Two courses in Yiddish literature** (6 points); e.g. YIDD UN3500, YIDD GU4420
3. **Three related courses, at least one of which is in medieval or modern Jewish history** (9 points); e.g. HIST UN4604, YIDD GU4113.

SPECIAL CONCENTRATION IN GERMAN FOR COLUMBIA COLLEGE AND SCHOOL OF GENERAL STUDIES STUDENTS IN STEM FIELDS

The special concentration in German requires a minimum of 15 points.

GERM UN3333 Introduction To German Literature [In German]

At least one of the period survey courses in German Literature and Culture

GERM UN3442 Survey of 18th Century German Lit: Enlightenment, Sturm und Drang [In German]

GERM UN3443 Romanticism, Revolution, Realism [In German]

GERM UN3444 SURVEY OF GERMAN LIT:20C

GERM UN3445 German Literature After 1945 [In German]

GERM UN3991 SENIOR SEMINAR

Two courses to be chosen from the 3000- or 4000-level (taught in German or English) offerings in German and Comparative Literature German in consultation with the Director of Undergraduate Studies

COMPARATIVE LITERATURE-GERMAN

CLGR UN3000 Grimms' Fairy Tales: Power, Gender & Narrative. 3 points.

Although the first volume of the Grimms' Children Stories and Household Tales was published more than 200 years ago, their fairy tales continue to enchant readers. In this course we will not only study the Grimms' fairy tales themselves, but also examine their origins and their social, ideological, and political contexts in 19th-century Europe. We will work with fairy tale theory (narrative, psychoanalytic, historical) and discuss the function of the tales as folklore as well as their status as children's literature. Alongside the "original" Grimms' tales—a concept that we will discuss—a major portion of the course will engage the legacy of the fairy tales and the way they have been appropriated by others, particularly from a critical, feminist perspective.

Points of emphasis will include: how writers in the first half of the 20th century politicized the tales in the battle for social change during the time of the Weimar Republic and Nazi Germany; how the tales were reinterpreted in different national traditions and historical periods; how the fairy tale become a mass culture icon in Disney's film versions; and how contemporary writers like Margaret Atwood continue to employ tales in questioning and challenging traditional constructions of gender.

CLGR GU4420 Walter Benjamin. 3 points.

In recent years, Walter Benjamin has become one of the most quoted media theorists. His philosophy of technology is not as widely known as the concept of aura he developed in his essay *The Work of Art in the Age of Its Technological Reproducibility*. The contemporary relevance of his philosophy of technology lies in the fact that Benjamin establishes a connection between technology and different forms of habitation, and between the latter and the concept of habit (*Gewohnheit*), which is etymologically related to the concept of habitation (*Wohnen*). This enables a comparison of Benjamin's approach with the philosophies of technology developed by Heidegger, Deleuze/Guattari, and Simondon, all of whom associate technology with the shaping of environments and the problem of poesis. In our seminar, we will reconstruct Benjamin's media anthropology of technology through a close reading of his diaries and essays and compare it to philosophies of technology very much being discussed today.

CLGR GU4270 Paradigms of the European Novel. 3 points.

In the wealth of plots, characters, settings, descriptive details and narrative strategies it has generated over the course of three centuries, the European novel has proved to be one of the most inventive and resilient forms of Western literature. Nonetheless, certain paradigms have predominated from the beginning, two of which will form the center of this course: the illusion of a "true" story and the bourgeois family as an organizing narrative principle. This course will analyze seven strikingly diverse European novels from Spain, England, France and Austria in order to show the continuity through variation of these two paradigms. Students will read some of the major theorists of the novel (Auerbach, Watt, Bakhtin, Moretti), but the emphasis will be on developing a theory based on the novels themselves. All readings and discussions in English, though reference will frequently be made to the particular linguistic and historical circumstances of the original texts. Students will write weekly response papers to the literary and critical texts, do one in-class presentation, and write a final paper of 15 to 20 pages.

COMPARATIVE LITERATURE-YIDDISH

CLYD UN3000 Do you read Jewish? From Yiddish, to Yinglish, to Yiddler, in the US. 3.00 points.

Historically, Yiddish literature and culture was produced and consumed by people who were usually bi-lingual or multi-lingual, living in societies with a different majority language. Today, when only a small number of people read Yiddish fluently, most Yiddish literature and culture is consumed as translations or adaptations. Our course then, investigates, Yiddish literature and culture from the 20th and 21st centuries as a particularly fruitful site for thinking through questions of translation and adaptation theory by looking at writers such as I. B. Singer, and products of popular culture such as the musical *Fiddler on the Roof*/Fidler afn dakh or the movie *Yentl*. Through these readings we will investigate questions such as: What translation strategies were necessary for the world of Yiddish-speaking Europe to enter the realm of American-Jewish culture?

CLYD UN3500 READINGS IN JEWISH LITERATURE:**American Jewish Literature: A survey. 3.00 points.**

This year has been designated the three hundred and fiftieth anniversary of Jewish life in America. In examining the work of some of the greatest Jewish writers to live in America – writers in English, Hebrew, and Yiddish, some well known, some less so – this course hopes to answer several related questions. How are the changing fortunes of American Jews reflected in their literary creativity? How does Jewish multilingualism – not only seen in different works, but within the same work – affect modes and styles of Jewish writing? And, perhaps most importantly, how does one define American Jewish writing in an age of increasingly complex affiliations and identifications among American Jews?

GERM UN3442 Survey of 18th Century German Lit: Enlightenment, Sturm und Drang [In German]. 3 points.

Prerequisites: GERMUN3333

We will be studying the Enlightenment, Storm and Stress and the Culture of Sensibility and German Classicism in light of this period's reading cultures. (Goethe, Gessner, Schiller, Kant, Lichtenstein, Bürger, Lenz, Karsch, Klopstock, Hölderlin, Kleist). Readings and discussions in German.

GERM UN3443 Romanticism, Revolution, Realism [In German]. 3 points.

Prerequisites: GERM UN3333 or the director of undergraduate studies' or the instructor's permission.

This class will focus on 19th-century German literature (especially writers counted among the Romantics, the "Vormärz" and Realists) by analyzing changing concepts of art, music and literature during those times of great social and

political change. We will closely read poems, pamphlets and short stories by Wackenroder, Tieck, Kleist, Hölderlin, Novalis, Brentano, Eichendorff, Heine, Büchner, Möricke, Keller, Marx, Nietzsche and Fontane.

GERM UN3445 German Literature After 1945 [In German]. 3 points.

Prerequisites: *GERM W3333* or the director of undergraduate studies' or the instructor's permission.

A survey of major literary texts of postwar Germany, including the so-called "rubble" literature, Group 47, GDR, New Subjectivity, minority voices and Holocaust memory. Works by Celan, Sachs, Dürrenmatt, Böll, Bachmann, Th. Bernhard, Wolf, P. Schneider, Schlink, Sebald.

GERM UN3780 Berlin/Istanbul: Migration, Culture, Values (GER). 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An intensive seminar analyzing questions of migration, identity, (self-) representation, and values with regard to the Turkish minority living in Germany today. Starting with a historical description of the „guest worker“ program that brought hundreds of thousands of Turkish nationals to Germany in the 1960s and 1970s, the course will focus on the experiences and cultural production of the second and third generations of Turkish Germans, whose presence has profoundly transformed German society and culture. Primary materials include diaries, autobiographies, legal and historical documents, but the course will also analyze poetry, novels, theater plays and films. In German.

Spring 2021: GERM UN3780

GERM GU4000 Foreign Language Pedagogy. 3 points.

Registration is by permission of foreign language departments only. Designed to offer training in foreign language pedagogy to teaching assistants (TAs) in the foreign language departments.

GERM GU4221 20th- and 21st-century German Theater and Performance Histories (in German). 3 points.

This course introduces students to the rich histories of modern and contemporary German-language theater and performance. The turn of the 20th century marks the emergence of modernist production styles beyond classical text-based theater, and the beginnings of the “performative turns” that were to shape avant-garde, postmodern and contemporary practices, as well as cultural theory beyond the institution of theater as such. The course familiarizes students with the analytic lens of performance studies, and deploys it to study theater and performance as part of larger cultural histories from the German Kaiserreich to the “Berlin Republic.” Both within the institutional space of the theater and beyond, 20th and 21st-century performance practices allow us to trace changing concepts of art and activism, norms and collective identities. From a comparative media studies angle, the course further underlines how theater and performance have functioned at the crossroads of different media, from the literary text (the prime enemy of much 20th-century theater and performance theory) to film and video, competitors which have become integral elements of live theater culture in the 21st century. In addition to a range of readings (theory, drama/ performance texts, reviews, etc.), we will incorporate audiovisual materials as much as possible (performance documentation where available plus related film materials).

This course is taught in German.

GERM GU4350 German Film After 1945. 3 points.

Topic/Focus: Feelings

The course offers an introduction to German film since 1945 (in its European contexts) with a focus on ‘feelings.’ Methodologically highlighted by contemporary affect and emotion studies, feelings offer a lens for intersectional, multifaceted investigations of these cinematic histories. We will explore how feelings have been gendered and racialized; how they overlap with matters of sex (as closely associated with political revolt in Western Europe, while considered too private for public articulation in the socialist East, especially when queer); and how they foreground matters of nation and trauma (for example via the notions of German ‘coldness’ and inability to mourn the Holocaust). Simultaneously, the focus on feelings highlights questions of mediality (cinema as a prototypically affective medium?), genre and avant-garde aesthetics: in many films, ‘high-affect’ Hollywood cinema intriguingly meets ‘cold’ cinematic modernism. In pursuing these investigative

vectors through theoretical readings and close film analysis, the course connects affect, gender, queer, and cultural studies approaches with cinema studies methodologies. The films discussed span postwar and New German Cinema, East German DEFA productions, the 'Berlin School' of the 2000s, and contemporary transnational cinema.

The course is taught in English. All readings and films will be available in translation/with subtitles.

Fall 2020: GERM GU4350

GERM G6550 Postwar Austrian Literature [In German]. 3 points.

Not offered during 2020-21 academic year.

Major contemporary Austrian authors and their representations of fascism. Bachmann, Bernhard, Jelinek and others.

SWEDISH

SWED UN1101 Elementary Swedish I. 4 points.

The goal of this course is to introduce students to the Swedish language as it is spoken in Sweden today. The class will also introduce important aspects of contemporary Swedish culture, historical figures and events, and Swedish traditions. Upon the completion of the course, students who have attended class regularly have submitted all assignments and taken all tests and quizzes should be able to: provide basic information in Swedish about themselves, families, interests, food, likes and dislikes, daily activities; understand and participate in a simple conversation on everyday topics (e.g. occupation, school, meeting people, food, shopping, hobbies, etc.); read edited texts on familiar topics, understand the main ideas and identify the underlying themes; pick out important information from a variety of authentic texts (e.g. menus, signs, schedules, websites, as well as linguistically simple literary texts such as songs and rhymes); fill in forms requesting information, write letters, notes, postcards, or messages providing simple information; provide basic information about Sweden and the rest of the Nordic countries (e.g. languages spoken, capitals, etc); use and understand a range of essential vocabulary related to everyday life (e.g. days of the week, colors, numbers, months, seasons, telling time, foods, names of stores, family, common objects, transportation, basic adjectives etc.) pronounce Swedish well enough and produce Swedish with enough grammatical accuracy to be comprehensible to a Swedish speaker with experience in speaking with non-natives. use and understand basic vocabulary related to important aspects of contemporary Swedish culture and Swedish traditions (e.g. Christmas traditions, St. Lucia, etc.). Methodology The class will be taught in a communicative way. It will be conducted primarily, but not exclusively in Swedish. In-class activities and homework assignments will focus on

developing speaking, reading, writing, listening skills, and a basic understanding of Swedish culture through interaction. Authentic materials will be used whenever possible.

SWED UN2101 Intermediate Swedish I. 3 points.

The goal of this course is to further develop the speaking, reading, writing, and listening skills you have acquired in the first year Swedish courses and broaden your knowledge about the Swedish culture and history. Topics emphasize contemporary Swedish life and cross-cultural awareness. In addition to the main text, newspaper articles, shorter literary texts, film, and internet resources will be used. Class will be conducted almost exclusively in Swedish. To succeed in this course, you must actively participate. You will be expected to attend class regularly, prepare for class daily, and speak as much Swedish as possible. Methodology The class will be taught in a communicative way. It will be conducted primarily, but not exclusively in Swedish. In-class activities and homework assignments will focus on improving and developing speaking, reading, writing, listening skills, and deepening the students' understanding of Swedish culture through interaction and exposure to a broad range of authentic materials.

SWED UN2102 Intermediate Swedish II. 4 points.

The goal of this course is to further develop your speaking, reading, writing, and listening skills and broaden your knowledge about the Swedish culture, history and literature. Topics emphasize contemporary Swedish life and cross-cultural awareness. Topics to be covered include Sweden's regions, the party and political system, major historical and cultural figures, and the Swedish welfare state. In addition to the main text we will use a selection of short stories, newspaper articles, films and audio resources available on the internet. Class will be conducted almost exclusively in Swedish. To succeed in this course, you must actively participate. You will be expected to attend class regularly, prepare for class daily, and speak as much Swedish as possible. Methodology The class will be taught in a communicative way. It will be conducted primarily in Swedish. In-class activities and homework assignments will focus on improving and developing speaking, reading, writing, listening skills, and deepening the students' understanding of Swedish culture through interaction and exposure to a broad range of authentic materials.

YIDDISH**YIDD UN1101 Elementary Yiddish I. 4 points.**

This course offers an introduction to the language that has been spoken by the Ashkenazi Jews for more than a millennium, and an opportunity to discover a fabulous world of Yiddish literature, language and culture in a fun way. Using games, new media, and music, we will learn how to speak, read, listen and write in a language that is considered one of the richest languages in the world (in some aspects of vocabulary). We will also venture outside the classroom to explore the Yiddish world today: through field trips to Yiddish theater, Yiddish-speaking neighborhoods, Yiddish organizations, such as YIVO or Yiddish farm, and so on. We will also have Yiddish-speaking guests and do a few digital projects. At the end of the two-semester course, you will be able to converse in Yiddish on a

variety of everyday topics and read most Yiddish literary and non-literary texts. Welcome to Yiddishland!

YIDD UN2101 Intermediate Yiddish I. 4 points.

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission.

This year-long course is a continuation of Elementary Yiddish II. As part of the New Media in Jewish Studies Collaborative, this class will be using new media in order to explore and research the fabulous world of Yiddish literature, language, and culture, and to engage in project-oriented activities that will result in creating lasting multi-media online presentations. In addition to expanding the command of the language that has been spoken by the Ashkenazi Jews for more than a millennium, i.e. focusing on developing speaking, reading, writing and listening skills, and on the acquisition of more advanced grammatical concepts, students will also get some video and film editing training, and tutorials on archival research. The class will continue to read works of Yiddish literature in the original and will venture outside of the classroom to explore the Yiddish world today: through exciting field trips to Yiddish theater, Yiddish-speaking neighborhoods, YIVO, Yiddish Farm, and so on. And we will also have

the Yiddish native-speaker guest series. Welcome back to Yiddishland!

YIDD UN2102 Intermediate Yiddish II. 4 points.

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission.

YIDD UN3334 Advanced Yiddish. 3 points.

May be repeated for credit.

Prerequisites: YIDD UN2101- YIDD UN2102 or the instructor's permission.

Reading of contemporary authors. Stress on word usage and idiomatic expression, discussion.

YIDD GU4101 Introduction To Yiddish Studies. 3 points.

The study of Ashkenazic Jewish culture from its beginnings to the present day. Research tools; written and oral sources; trends in scholarship; scope of the field.

YIDD GU4675 Yiddish Life Writing: Autobiography, Memoir or Fiction" [in English]. 3 points.

This course will explore the borderlands between memoir, autobiography and fiction in life writing in Yiddish literature through the lens of the Eastern European Jewish experience. Employing gender and comparative approach as analytical lenses, we will read several autobiographical works and address the following questions: how to deal with problems of memory in personal narratives? How to distinguish between truth, self-fashioning, and fiction in autobiographical writing? What role does the immigrant experience play in Jewish autobiographical narratives? The texts and class discussion will be in English.

As part of the digital humanities initiative at Columbia, this course will contribute to the Mapping Yiddish New York (MYNY) project, a growing online archive documenting Yiddish cultural history of New York. Selected essays produced in this class will be featured on the MYNY website and

students will acquire skills in digital publishing and scholarly research.

HISTORY

Departmental Office: 413 Fayerweather; 212-854-4646

<http://www.history.columbia.edu>

Director of Undergraduate Studies: Prof. Neslihan #enocak , 324 Fayerweather; nsenocak@columbia.edu

Undergraduate Administrator: Michael Adan, undergraduate-history@columbia.edu

The history curriculum covers most areas of the world and most periods of history. It encourages students to develop historical understanding in the widest sense of the word: a thorough empirical grasp along with the kind of analytical skills that come with a genuinely historical sensibility. This is done through two types of courses: lectures and seminars. Lectures range from broad surveys of the history of a place or period to more thematically oriented courses. Seminars offer students the opportunity to work more closely with historical sources in smaller groups and to do more sophisticated written work. Because history courses usually have no prerequisites, there are no preordained sequences to follow. It is advisable, however, that students take a relevant lecture course in preparation for a seminar. Majors wishing to follow a more intensive program are advised to enroll in a historiography course and to undertake a senior thesis project. Historically, majors have pursued careers in a very wide range of areas including medicine, law, mass media, Wall Street, and academia.

ADVANCED PLACEMENT

Students may receive 3 credits toward the overall degree requirements for a score of 5 on the AP European History exam or the AP United States History exam. No points count toward or fulfill any requirements of the history major or concentration.

ADVISING

During their junior and senior years, majors and concentrators are advised by the faculty members of the Undergraduate Education Committee (UNDED). UNDED advisers also review and sign Plan of Study (POS) forms for majors and concentrators at least once per year. POS forms track students' progress toward completing all major and concentration requirements. New history majors and concentrators may see any member of UNDED. For the most up-to-date information on UNDED members, please see the undergraduate advising page of the [departmental website](#).

Majors and concentrators can also receive pure academic interest advising (non-requirement advising) from any faculty member and affiliated faculty member of the department.

First-years and sophomores considering a history major or concentration can seek advising from UNDED or any other faculty member.

For questions about requirements, courses, or the general program, majors and concentrators can also contact the undergraduate administrator.

DEPARTMENTAL HONORS

To be eligible for departmental honors, the student must have a GPA of at least 3.6 in courses for the major, an ambitious curriculum, and an outstanding senior thesis. Honors are awarded on the basis of a truly outstanding senior thesis. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

COURSE NUMBERING

Courses are numbered by *type*:

UN 1xxx - Introductory Survey Lectures

UN 2xxx - Undergraduate Lectures

UN 3xxx - Undergraduate Seminars

GU 4xxx - Joint Undergraduate/Graduate Seminars

and *field* (with some exceptions):

x000-x059: Ancient

x060-x099: Medieval

x100-x199: Early modern Europe

x200-x299: East Central Europe

x300-x399: Modern Western Europe

x400-x599: United States

x600-x659: Jewish

x660-x699: Latin America

x700-x759: Middle East

x760-x799: Africa

x800-x859: South Asia

x860-x899: East Asia

x900-x999: Research, historiography, and transnational

SEMINARS

Seminars are integral to the undergraduate major in history.

In these courses, students develop research and writing skills under the close supervision of a faculty member. Enrollment is normally limited to approximately 15 students. In order to maintain the small size of the courses, admission to most seminars is by instructor's permission or application.

In conjunction with the Barnard History Department and other departments in the University (particularly East Asian Languages and Cultures), the History Department offers about 25 seminars each semester that majors may use to meet their seminar requirements. While there are sufficient seminars offered to meet the needs of majors seeking to fulfill the two-seminar requirement, given the enrollment limits, students

may not always be able to enroll in a particular seminar.

Students should discuss with UNDED their various options for completing the seminar requirement.

The History Department has developed an on-line application system for some seminars. The department regularly provides declared majors and concentrators with information on upcoming application periods, which typically occur midway through the preceding semester. Students majoring in other fields, or students who have not yet declared a major, must inform themselves of the application procedures and deadlines by checking the undergraduate seminar page of the [departmental website](#).

GUIDELINES FOR ALL HISTORY MAJORS AND CONCENTRATORS

For detailed information about the history major or concentration, as well as the policies and procedures of the department, please refer to the *History at Columbia Undergraduate Handbook*, available for download on the [departmental website](#).

MAJOR IN HISTORY

Students must complete a minimum of *nine* courses in the department, of which *four* or more must be in an area of specialization chosen by the student and approved by a member of UNDED. Students must also fulfill a breadth requirement by taking three courses outside of their specialization. Two of the courses taken in the major must be seminars (including one seminar in the chosen specialization).

The requirements of the undergraduate program encourage students to do two things:

1. Develop a deeper knowledge of the history of a particular time and/or place. Students are required to complete a specialization by taking a number of courses in a single field of history of their own choosing. The field should be defined, in consultation with a member of UNDED, according to geographical, chronological, and/or thematic criteria. For example, a student might choose to specialize in 20th C. U.S. History, Medieval European History, Ancient Greek and Roman History, or Modern East Asian History. The specialization does not appear on the student's transcript, but provides an organizing principle for the program the student assembles in consultation with UNDED.
2. Gain a sense of the full scope of history as a discipline by taking a broad range of courses. Students must fulfill a breadth requirement by taking courses outside their own specialization -- at least one course removed in time and two removed in space.
 - a. Time: majors and concentrators must take at least one course removed in time from their specialization:
 - Students specializing in the modern period must take at least one course in the pre-modern period; students specializing in the pre-modern period must take at least one course in the modern period.
 - If the course proposed is in the same regional field as a student's specialization, special care must be taken

to ensure that it is as far removed as possible; please consult with UNDED to make sure a given course counts for the chronological breadth requirement.

b. Space: majors must take at least two additional courses in regional fields not their own:

- These two "removed in space" courses must also cover **two different** regions.
- For example, students specializing in some part of Europe must take two courses in Africa, East or South Asia, Latin America/Caribbean, Middle East, and/or the U.S.
- Some courses cover multiple geographic regions. If a course includes one of the regions within a student's specialization, that course cannot count towards the breadth requirement unless it is specifically approved by the Director of Undergraduate Studies. For example, if a student is specializing in 20th C. U.S. history and takes the class *World War II in Global Perspective*, the class is too close to the specialization and may not count as a regional breadth course.

All courses in the Barnard History Department as well as select courses in East Asian Languages and Cultures; Middle Eastern, South Asian, and African Studies; and other departments count toward the major. Eligible inter-departmental courses may include:

- African Civilizations (AFCV UN1020) (when taught by Professor Gregory Mann, Professor Rhiannon Stephens, or PhD students in the Columbia University Department of History; the course does NOT count for History when taught by anyone else)
- Primary Texts of Latin American Civilization (LACV UN1020) (when taught by Professor Pablo Piccato, Professor Caterina Pizzigoni, or PhD students in the Columbia University Department of History; the course does NOT count for History when taught by anyone else)
- Introduction to East Asian Civilizations: China (ASCE UN1359), INTRO EAST ASIAN CIV: JPN (ASCE UN1361), Introduction to East Asian Civilizations: Korea (ASCE UN1363) or other ASCE UN1xxx courses (when taught by Professors Charles Armstrong, Carol Gluck, Robert Hymes, Dorothy Ko, Eugenia Lean, Feng Li, David Lurie, Jungwon Kim, Paul Kreitman, Gregory Pflugfelder, Gray Tuttle, or Madeleine Zelin, and NOT when they are taught by anyone else)
- Please see the Courses section on the [departmental website](#) to see which of these might count in a given semester. Any courses not listed or linked on the departmental website, however historical in approach or content, do not count toward the history major or concentration, except with explicit written approval of the UNDED chair.
- If you suspect a History course has escaped being listed at the above link and want to confirm whether or not it counts

for History students, please contact the Undergraduate Administrator.

Thematic Specializations

Suitably focused thematic and cross-regional specializations are permitted and the breadth requirements for students interested in these topics are set in consultation with a member of UNDED. Classes are offered in fields including, but not limited to:

- Ancient history
- Medieval history
- Early modern European history
- Modern European history
- United States history
- Latin American and Caribbean history
- Middle Eastern history
- East Asian history
- South Asian history

Additionally, classes are offered in thematic and cross-regional fields which include, but are not limited to:

- Intellectual history
- Jewish history
- Women's history
- International history
- History of science

These fields are only examples. Students should work with a member of UNDED to craft a suitably focused specialization on the theme or field that interests them.

Thesis Requirements

Majors may elect to write a senior thesis, though this is not a graduation requirement. Only senior thesis writers are eligible to be considered for departmental honors. The senior thesis option is not available to concentrators.

The yearlong HIST UN3838-HIST UN3839 Senior Thesis Seminar carries 8 points, 4 of which typically count as a seminar in the specialization. For the most up-to-date information on the field designations for history courses, please see the Courses section of the [departmental website](#).

CONCENTRATION IN HISTORY

Effective February 2018, students must complete a minimum of *six* courses in history. At least *three* of the six courses must be in an area of specialization, *one* far removed in time, and *one* on a geographic region far removed in space. There is no seminar requirement for the concentration.

FALL 2020 HISTORY COURSES

HIST UN1002 Ancient History of Mesopotamia and Asia Minor. 4 points.

A survey of the political and cultural history of Mesopotamia, Anatolia, and Iran from prehistory to the disappearance of the cuneiform documentation, with special emphasis on Mesopotamia. *Groups(s): A*

Fall 2020: HIST UN1002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

HIST UN1768 European Intellectual History. 4 points.

This course provides an introduction to some of the major landmarks in European cultural and intellectual history, from the aftermath of the French Revolution to the 1970s. We will pay special attention to the relationship between texts (literature, anthropology, political theory, psychoanalysis, art, and film) and the various contexts in which they were produced. Among other themes, we will discuss the cultural impact of the Enlightenment, the French Revolution, industrialism, colonialism, modernism, the Russian Revolution, the two world wars, decolonization, feminism and gay liberation movements, structuralism and poststructuralism.

In conjunction, we will examine how modern ideologies (liberalism, conservatism, Marxism, imperialism, fascism, totalitarianism, neoliberalism) were developed and challenged over the course of the last two centuries.

Participation in weekly discussion sections staffed by TAs is mandatory. The discussion sections are 50 minutes per session. Students must register for the general discussion ("DISC") section, and will be assigned to a specific time and TA instructor once the course begins.

HIST UN2003 Empire # Nation-Building East Central Europe. 4.00 points.

This lecture course investigates nation-building as a process of decolonization of Europe's land empires (Ottoman, German, Russian, and Habsburg) from 18th century to present. It was a turbulent historical process: decolonization of European East's 'small peoples' paved the way to anti-imperial and anti-colonial movements outside Europe only to be crushed, in the mid-twentieth-century, by imperial politics of Hitler's Germany and the Soviet Union. We will study different ways in which culture – local languages, vernacular heritage, religion, and material culture – became politically weaponized to achieve goals of national self-determination and social revolution. Throughout the 19th and 20th century nation-building in the European East produced particular forms of non-Western modernity that found expression in built environments, visual arts, letters, music, public activism, and domestic sphere. We will study how resistance and enforced accommodation to Empire turned into spaces of cultural production, mass movements, economic upheaval, state-building, and last but not least, physical violence. Finally, we will investigate how ordinary Eastern Europeans experienced and gave meaning to the processes of nation-building. The course is intended for students interested in cultural, intellectual, social and gender history, histories of nationalism and communism, as well as local and transnational histories of Eastern European 'peoples' (Jewish, Muslim, Christian Slavic; German, Russian, Polish, Czech, Hungarian, Romanian, Bulgarian, Southern Slavic/Yugo-Slav, Greek, and Roma)

HIST UN2112 The Scientific Revolution in Western Europe: 1500-1750. 4 points.

Introduction to the cultural, social, and intellectual history of the upheavals of astronomy, anatomy, mathematics, alchemy from the Renaissance to the Enlightenment. *Field(s): EME*

Fall 2020: HIST UN2112

HIST UN2360 TWENTIETH CENTURY BRITAIN. 4.00 points.

This course surveys the main currents of British history from 1900 to the present, with particular attention to the changing place of Britain in the world and the changing shape of society and politics. Throughout this course, we will ask: Where is power located in Britain and its empire? What held Britain and the empire together, and what tore them apart? What was life like for Britons – young and old, men and women, rich and poor, Black and white – across the course of this century? When and how did social change happen? How did people respond?

We will tackle these questions by looking closely at some key periods of political conflict and resolution, by reading key texts from the time, and – for the latter part of the course – by viewing films and speeches. The course requirements include section participation, including regular posts (20%), a take-home midterm (20%), two short research assignments (20% each) and a take-home final (20%). **You must complete all assignments and exams to pass the course.** The research assignments are devised to help familiarize you with historians' practice, so that you can search for answers to historical questions on your own. The assignments are integrated into section discussion: due dates are (as a result) not flexible and section attendance is required. The films are an essential part of the course and will be discussed in section.

Readings for this course are drawn mostly from the rich primary materials available. They are supplemented by select articles chosen to bring out some of the key issues historians find significant about particular periods or events. My lectures constitute the main "textbook" for the course, but I am also recommending that you read selected chapters from a textbook that is available online: Stephanie Barczewski et al, *Britain since 1688*: <https://www-taylorfrancis-com.ezproxy.cul.columbia.edu/books/9781315748610>.

Most material is available online, but five books (asterisked below) will need to be ordered or bought from Book Culture (or, if you are not in the New York area, online). A timeline, a list of interesting web links, and a list of great British films can be found on the Courseworks page.

Course objectives

The course aims to provide students with (a) a good foundational knowledge of the course of British history and culture from 1900 to the present; (b) an understanding of how historians do research and basic research skills; (c) the ability to analyze historical materials (speeches, novels, memoirs,

government documents, films), placing them in context and deploying them to make analytical arguments about the past.

HIST 2360	001/12228	T Th 2:40pm - 3:55pm Online Only	Susan Pedersen	4.00	56/300

HIST BC2366 Climate & History: Intersecting Science Environment & Society. 3 points.

Climate change poses an imminent threat to the future of humanity and is a crucial feature of the Anthropocene, namely the age of anthropogenic transformations of the Earth's environments on a global scale. How did we get here? History is fundamental to answer this question. This course examines the relationship between climate, scientific knowledge, and human societies. The class will first survey the role of climate as an historical actor of global history, rather than as the backdrop of political, social and economic events. In the second part of the course, we will examine the history of weather and climate science, as well as climate change denialism. The class offers a wide range of case studies around the world of the tight relationship between climate and history. The instructor encourages all majors to register from the humanities, social sciences, and natural sciences.

HIST UN2523 History of Health Inequality in the Modern United States. 4 points.

Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics since the turn of the twentieth century. Topics to be examined will include, but will not be limited to, black women's health organization and care; HIV/AIDS politics, policy, and community response; "benign neglect"; urban renewal and gentrification; medical abuses and the legacy of Tuskegee; tuberculosis control; and environmental justice. There are no required qualifications for enrollment, although students will find the material more accessible if they have had previous coursework experience in United States history, pre-health professional (pre-med, pre-nursing, or pre-public health), African-American Studies, Women and Gender Studies, Ethnic Studies, or American Studies.

HIST UN2533 US Lesbian and Gay History. 4 points.

This course explores the social, cultural, and political history of lesbians, gay men, and other socially constituted sexual and gender minorities, primarily in the twentieth century. Since the production and regulation of queer life has always been intimately linked to the production and policing of "normal" sexuality and gender, we will also pay attention to the shifting boundaries of normative sexuality, especially heterosexuality, as well as other developments in American history that shaped gay life, such as the Second World War, Cold War, urbanization, and the minority rights revolution. Themes

include the emergence of homosexuality and heterosexuality as categories of experience and identity; the changing relationship between homosexuality and transgenderism; the development of diverse lesbian and gay subcultures and their representation in popular culture; the sources of antigay hostility; religion and sexual science; generational change and everyday life; AIDS; and gay, antigay, feminist, and queer movements.

HIST UN2565 American History at the Movies. 4 points.

This lecture explores major topics in modern American history through an examination of the American film industry and some of its most popular films and stars. It begins with the emergence of "Hollywood" as an industry and a place in the wake of WWI and ends with the rise of the so-called 'New Hollywood' in the 1970s and its treatment of the 1960s and the Vietnam War. For much of this period, Hollywood's films were not protected free speech, making movies and stars peculiarly reflective of, and vulnerable to, changes in broader cultural and political dynamics. Students will become familiar with Hollywood's institutional history over this half-century in order to understand the forces, both internal and external, that have shaped the presentation of what Americans do and don't see on screens and to become skilled interpreters of American history at the movies.

HIST UN3234 The Idea of Conspiracy in European Culture. 4 points.

What are conspiracy theories? Do conspiracies exist? How did historians, philosophers and political thinkers consider them? Is there such a thing as a “deep state”? When did conspiracy as a political enterprise give rise to the idea of conspiracy “theory”? What is the relationship, if any, between them? This class will survey past, recent and current thinking about conspiracies. The working premise of the class is that thinking about conspiracies has been a fundamental, if overlooked, driver in the development of Western political theory and the modern state. Recovering this long history is crucial if we want to understand the current role of conspiracy theories in politics and their ideological functions.

HIST BC3327 Consumer Culture in Modern Europe. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The development of the modern culture of consumption, with particular attention to the formation of the woman consumer. Topics include commerce and the urban landscape, changing attitudes toward shopping and spending, feminine fashion and conspicuous consumption, and the birth of advertising. Examination of novels, fashion magazines, and advertising images.

HIST UN3490 The Global Cold War. 4 points.

The superpower competition between the US and the USSR dominated international affairs during the second half of the twentieth century. Though this Cold War was born from ideological differences and initially focused on Europe, it soon became entangled with the concurrent global process of decolonization. In this way, the US-Soviet rivalry shaped events on every continent. This course will examine the intersection of the superpower competition and the emergence of the postcolonial world. Through course readings and class discussion, students will examine the global dimensions of the Cold war. Each student will prepare a research paper on a topic to be chosen in consultation with the instructor.

HIST UN3562 The Seven Years' War (1754-1763), Global Perspective: Europe, Asia, Africa, and Americas. 4 points.

Prerequisites: History Majors Preferred

This research seminar explores the causes, course, and consequences of the Seven Years' War, arguably the first world war in modern history. Topics include the origins of the conflict in North America and in Europe, the relationship between imperial rivalry in the American colonies and the contest for supremacy in central Europe, the impact of the war on trade and settlement in South Asia, the West Indies, the Philippines, and West Africa, and the legacies of the conflict for British imperial expansion in India, North America, Senegal, and the southern Caribbean. During the second half of the semester, members of the seminar will devote the majority of their time to the research and writing of a substantial paper.

HIST BC3870 Gender and Migration: A Global Perspective. 4 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I)., BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Social Analysis (SOC II).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Sophomore Standing. Explores migration as a gendered process and what factors account for migratory differences by gender across place and time; including labor markets, education demographic and family structure, gender ideologies, religion, government regulations and legal status, and intrinsic aspects of the migratory flow itself.

HIST UN3914 THE FUTURE AS HISTORY. 3.00 points.

This course explores how people have thought about their future and tried to change it. It examines the philosophical aspects of studying history and the future, and how they are related. It begins with the origins of future thinking in eschatology and millenarian movements, the enlightenment challenge to revelation and religious authority, and utopias and dystopias. Classic texts and scholarly studies will illuminate modern approaches to shaping the future, such as socialism, imperialism, risk analysis, and "modernization" theory, and areas where they have had a particular impact, including urban planning and eugenics

HIST UN3911 Medicine and Western Civilization. 4 points.

Priority given to majors and concentrators, seniors, and juniors, but other majors are welcome.

Prerequisites: the instructor's permission.

This seminar seeks to analyze the ways by which medicine and culture combine to shape our values and traditions. To this end, it will examine notable literary, medical, and social texts from classical antiquity to the present.

HIST GU4012 HISTORY OF THE CITY IN LATIN AMERICA. 4.00 points.

This course covers the historical development of cities in Latin America. Readings examine the concentration of people in commercial and political centers from the beginnings of European colonization in the sixteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; cities as sites of imperial power and their post-colonial role in nation-building; changing power dynamics in modern Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; the complexity and historical development of urban segregation; the rise of informal economies; and the constant tension between tradition and progress through which urban societies have formed. Reading knowledge of Spanish and/or Portuguese will be helpful but is not required. Open to both undergraduate and graduate students; graduate students will be given additional reading and writing assignments

Spring 2021: HIST GU4012

HIST GU4311 European Romanticism. 4 points.

Priority given to majors and concentrators, seniors, and juniors.

"...Romanticism is the largest recent movement to transform the lives and the thought of the Western world. It seems to me to be the greatest single shift in the consciousness of the West that has occurred, and all the other shifts which have occurred in the course of the nineteenth and twentieth centuries appear to me in comparison less important, and at any rate deeply influenced by it." (Isaiah Berlin, *The Roots of Romanticism*)

This seminar will introduce students to the manifold expressions of Romanticism in Europe from the late eighteenth century to the late nineteenth century. It is geared both at History majors, particularly but not exclusively those specializing in European Intellectual History, and at students interested in the literature and culture of Germany, France, and Great Britain. We will also take a brief look at Romantic writers in Eastern Europe. We will read primarily works written by philosophers and social thinkers, but also a good deal of literature, both prose and poetry. We will have two sessions devoted to the plastic arts – including a class trip to the Metropolitan Museum to view paintings and sculptures, and we will have one session devoted to Romantic music (a study of Beethoven's Ninth Symphony.) We will include readings

relating to the Romantic fascination with "the East," and devote one session to the crucial subject of Romanticism and gender.

Most of the readings will be primary sources either originally in or translated into English, as well as a selection of pertinent secondary sources.

Fall 2020: HIST GU4311

HIST GU4518 Research Seminar: Columbia and Slavery. 4 points.

In this course, students will write original, independent papers of around 25 pages, based on research in both primary and secondary sources, on an aspect of the relationship between Columbia College and its colonial predecessor King's College, with the institution of slavery.

HIST GU4743 MANUSCRIPTS OF THE MUSLIM WORLD. 4.00 points.

Prerequisites: Knowledge of a relevant research language (Arabic, Persian, or Ottoman Turkish) is required to be able to work on a particular manuscript to be chosen by the student. Students who lack the necessary skills of any of these languages but are interested in pre-modern book culture are still encouraged to contact the course instructor.

This course is designed to provide the foundations for exploring the rich and fascinating history of Islamic manuscripts from the 9th through the 19th century. Its structure is shaped mainly by thematic considerations in a notable chronological fashion. The meetings amount to a series of "cuts" through the topic and cover themes such as the paper revolution, authorship, scribal culture, technologies of book production, readers and their notes, libraries and book collections, or textual as well as extra-textual components of manuscripts. Over the semester, we will study key material, textual, and visual elements of Islamic book culture spanning many centuries and continents, and visit major historiographical questions on the millennium-long history of Islamic manuscript tradition before the widespread adoption of print technology

HIST GU4904 WRITING LIVES: A SURVEY OF HISTORICAL APPROACHES AND TECHNIQUES. 4 points.

Ranging from ancient chronicles and saints' lives to the emergence of modern subjectivity, the rise of the diary, the novel and the bureaucratic questionnaire, this course explores how historians across the ages have written about people's lives. It asks what has happened to the notion of a life as a moral example, the changing value of 'experience' and the 'ordinary person', and charts how democracy altered the sense

of what was worth recording and commemorating. It draws for its sources on a very wide range of cultures and epochs and concludes by asking the student to conduct their own life history research.

CSER UN3928 Colonization/Decolonization. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructor's permission. This course explores the centrality of colonialism in the making of the modern world, emphasizing cross-cultural and social contact, exchange, and relations of power; dynamics of conquest and resistance; and discourses of civilization, empire,

freedom, nationalism, and human rights, from 1500 to 2000. Topics include pre-modern empires; European exploration, contact, and conquest in the new world; Atlantic-world slavery and emancipation; and European and Japanese colonialism in Asia, Africa, and the Middle East. The course ends with a section on decolonization and post-colonialism in the period after World War II. Intensive reading and discussion of primary documents.

EAAS UN2342 Mythology of East Asia. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through close readings of major myths of China, Japan, and Korea, this course provides a survey of significant themes of East Asian culture. Inclusion of selected comparative readings also leads students to reconsider the nature of 'world mythology,' a field often constituted by juxtaposing Greek and Latin classics with oral texts collected during anthropological fieldwork. The core materials for this class are from ancient written traditions, but they speak with force and clarity to modern readers, as is underlined by our attention to latter-day reception and reconceptualization of these narratives. This is an introductory, discussion-based class intended for undergraduates. No prior knowledge of East Asian history or culture is required, and all course readings are in English. Satisfies the Global Core requirement.

Fall 2020: EAAS UN2342

EARL GU4312 Tibetan Sacred Space (in Comparative Context). 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through interdisciplinary theoretical approaches (mostly in the fields of religion, anthropology, literature, and history), this course engages the genre of writing about sacred space in Tibetan Buddhist culture, addressing the micro (built environment) and macro (natural environment) levels of this important sphere of Tibetan literature. Through Tibetan pilgrimage accounts, place (monasteries, temples, etc) based guidebooks, geographically focused biographies, and pictorial representations of place, the class will consider questions about how place-writing overlaps with religious practice, politics, and history. For comparative purposes, we will read place based writing from Western and other Asian authors, for instance accounts of the guidebooks to and inscriptions at Christian churches, raising questions about the cultural relativity of what makes up sacred space.

HSME UN2915 Africa Before Colonialism: From Prehistory to the Birth of the Atlantic World. 4 points.

This course is an interdisciplinary exploration of the precolonial history of the African continent. It investigates in-depth the political, social, cultural and economic developments of different Africa communities, covering various regions and periods, from prehistory to the formation of the Indian Ocean and Atlantic worlds. Its focus is the intersection of politics, economics, culture and society. Using world history and Africa's location in the production of history as key analytical frames, it pays special attention to social, political and cultural changes that shaped the various individual and collective experiences of African peoples and states and the historical discourses associated to them.

SPRING 2021 HISTORY COURSES**HIST UN1020 The Romans and Their World. 4 points.**

This course examines the history of the Roman Empire from the formation of the Roman monarchy in 753 BCE to the collapse of the Western Empire in 476 CE. At the heart of the class is a single question: how did the Roman Empire come to be, and why did it last for so long? We will trace the rise and fall of the Republic, the extension of its power beyond Italy, and the spread of Christianity. Epic poetry, annalistic accounts, coins, papyri, inscriptions, and sculpture will illuminate major figures like Cleopatra, and features of daily life like Roman law and religion. The destructive mechanics by which Rome sustained itself--war, slavery, and environmental degradation--will receive attention, too, with the aim of producing a holistic understanding this empire. Discussion Section Required.

HIST UN2215 MODERN RUSSIAN HISTORY. 4.00 points.

An introductory survey of the history of Russia, the Russian Empire, and the Soviet Union over the last two centuries. Russia's role on the European continent, intellectual movements, unfree labor and emancipation, economic growth and social change, and finally the great revolutions of 1905 and 1917 define the "long nineteenth century." The second half of the course turns to the tumultuous twentieth century: cultural experiments of the 1920s, Stalinism, World War II, and the new society of the Khrushchev and Brezhnev years. Finally, a look at very recent history since the East European revolutions of 1989-91. This is primarily a course on the domestic history of Russia and the USSR, but with some attention to foreign policy and Russia's role in the world

HIST UN2222 NATURE # POWER: ENV HIST NORTH AMERICA. 4.00 points.

Environmental history seeks to expand the customary framework of historical inquiry, challenging students to

construct narratives of the past that incorporate not only human beings but also the natural world with which human life is intimately intertwined. As a result, environmental history places at center stage a wide range of previously overlooked historical actors such as plants, animals, and diseases. Moreover, by locating nature within human history, environmental history encourages its practitioners to rethink some of the fundamental categories through which our understanding of the natural world is expressed: wilderness and civilization, wild and tame, natural and artificial. For those interested in the study of ethnicity, environmental history casts into particularly sharp relief the ways in which the natural world can serve both to undermine and to reinforce the divisions within human societies. Although all human beings share profound biological similarities, they have nonetheless enjoyed unequal access to natural resources and to healthy environments—differences that have all-too-frequently been justified by depicting such conditions as "natural."

HIST UN2305 WAR IN GERMANY 1618-2018. 4.00 points.

For much of modern history Germany was Europe's battlefield. Its soldiers wrote themselves into the annals of military history. But it was also a place where war was discussed, conceptualized and criticized with unparalleled vigor. Nowhere did the extreme violence of the seventeenth century and the early twentieth century leave a deeper mark than on Germany. Today, as we enter the twenty-first century, Germany is the nation that has perhaps come closest to drawing a final, concluding line under its military history. This course will chart the rise and fall of modern militarism in Germany. For those interested in military history per se, this course will not hold back from discussing battles, soldiers and weapons. But it will also offer an introduction to German history more generally. And through the German example we will address questions in political philosophy that haunted modern European history and continue to haunt America today. How is state violence justified? How can it be regulated and controlled? What is its future?

Spring 2021: HIST UN2305

HIST BC2366 Climate & History: Intersecting Science Environment & Society. 3 points.

Climate change poses an imminent threat to the future of humanity and is a crucial feature of the Anthropocene, namely the age of anthropogenic transformations of the Earth's environments on a global scale. How did we get here? History

is fundamental to answer this question. This course examines the relationship between climate, scientific knowledge, and human societies. The class will first survey the role of climate as an historical actor of global history, rather than as the backdrop of political, social and economic events. In the second part of the course, we will examine the history of weather and climate science, as well as climate change denialism. The class offers a wide range of case studies around the world of the tight relationship between climate and history. The instructor encourages all majors to register from the humanities, social sciences, and natural sciences.

HIST UN2398 The Politics of Terror: The French Revolution. 4 points.

This course examines the political culture of eighteenth-century France, from the final decades of the Bourbon monarchy to the rise of Napoleon Bonaparte. Among our primary aims will be to explore the origins of the Terror and its relationship to the Revolution as a whole. Other topics we will address include the erosion of the king's authority in the years leading up to 1789, the fall of the Bastille, the Constitutions of 1791 and 1793, civil war in the Vendée, the militarization of the Revolution, the dechristianization movement, attempts to establish a new Revolutionary calendar and civil religion, and the sweeping plans for moral regeneration led by Robespierre and his colleagues in 1793-1794.

HIST UN2491 US FOREIGN RELATIONS 1890-1990. 4.00 points.

This course has three purposes: (i) to examine the role and identity of the United States in the world, roughly between the 1890s and the late 20th century; (ii) to provide an empirical grasp of U.S. foreign relations during that period; and (iii) to subject to critical inquiry the historiographical views on the various periods and events which have come to make up that history. The lectures, on the whole, will be supplementary to the readings, not a commentary on them

HIST UN2565 American History at the Movies. 4 points.

This lecture explores major topics in modern American history through an examination of the American film industry and some of its most popular films and stars. It begins with the emergence of "Hollywood" as an industry and a place in the wake of WWI and ends with the rise of the so-called 'New

Hollywood' in the 1970s and its treatment of the 1960s and the Vietnam War. For much of this period, Hollywood's films were not protected free speech, making movies and stars peculiarly reflective of, and vulnerable to, changes in broader cultural and political dynamics. Students will become familiar with Hollywood's institutional history over this half-century in order to understand the forces, both internal and external, that have shaped the presentation of what Americans do and don't see on screens and to become skilled interpreters of American history at the movies.

HIST UN2661 LATIN AMERICAN CIVILIZATION II. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores major themes in Latin American history from the independence period (ca 1810) to the present. We will hone in on Latin America's "chronic" problems of social inequality, political polarization, authoritarianism, incomplete democratization, and troubled memory politics. The course covers economic, social, and cultural histories, and gives special weight to the transnational aspects of Latin American ideological struggles – from its dependency on Western capital to its ideological "inner Cold War" – and the way they influenced the subaltern strata of society. The section discussions are a crucial component of the course, and will focus on assigned historiography. While the lecture centers on constructing a cogent meta-narrative for Latin America's modern era, in the section we will explore not only the historical "facts," but will instead ask: how do historians know what they know about the past? What sources and analytic methods do they use to write history? And what ethical dilemmas do they confront when narrating politically-sensitive topics?

HIST UN2764 East African History. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

A survey of East African history over the past two millennia with a focus on political and social change. Themes include early religious and political ideas, the rise of states on the Swahili coast and between the Great Lakes, slavery, colonialism, and social and cultural developments in the 20th century. This course fulfills the Global Core requirement. *Discussion section required.*

HIST UN2701 Ottoman Empire. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course will cover the seven-century long history of the Ottoman Empire, which spanned Europe, Asia, and Africa as well as the medieval, early modern, and modern period. The many levels of continuity and change will be the focus, as will issues of identities and mentalities, confessional diversity, cultural and linguistic pluralism, and imperial governance and political belonging of the empire within larger regional and global perspectives over the centuries. The course also seeks to cultivate appreciation of the human experience through the multifarious experiences culled from the Ottoman past.

HIST UN2881 Vietnam in the World. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines the history of Vietnam in the World and serves as a follow-up to ASCE UN1367: Introduction to East Asian Civilizations, Vietnam (though it is not a prerequisite). This course will explore Vietnam's multifaceted relations with the wider world from the late 19th Century to present day as war – ranging from civil, imperial, global, decolonization, and superpower interventions – forged the modern imperial polity to the current nation-state.

HIST UN2987 Technology and US Politics. 4 points.

The course investigates the relation between politics and technology in the United States during the twentieth century. Following the telegraph, radio, the mainframe computer, the internet, and online platforms, the course asks how have Americans conceptualized the relation between technological developments and democratic ideals starting in the late nineteenth century? Are new technologies forms of control or of liberation? Do they enhance or curtail free speech? Has the public sphere been strengthened or weakened by new communication technologies? What has been the rule of government regulation in the adoption of these technologies? Students will be introduced to basic ideas and methodologies in the history of technology, while focusing on the relation between politics of technology.

HIST UN3269 From Oracles to Mathematics. 4.00 points.

This class looks at how European society tried to tame chance and comprehend its whims before and after the arrival of the mathematics of probability around 1650. How did people move from consulting oracles to developing the insurance business? One simple answer is the discovery of the mathematical calculation of risk. But insurance contracts appear well before the availability of that tool, and insurers continued to do their business without it after it became widely known. This class explores why chance did not become “more” accurate – an object of science and knowledge – with the arrival of the probability calculus. It examines risk as a historically shaped experience in various areas of its manifestations including oracles, gambling, insurance, philosophy, and theology. The semester groups the history of risk into four thematically and chronologically organized units of focus: (1) We will begin with a survey of how we can study risk as historical construct asking what components shape a society’s understanding and handling of risk. In order to gain insight into what risk meant before ca. 1350, we will analyze oracles and curses people used to cope with future events in antiquity. (2) We will then explore the world of gambling to understand how closely related its risks were to those found in business practices. (3) Turning to late medieval and early modern insurance, we will analyze contracts, laws and theories of insurance. Why was it that risk became a commodity – a thing separable from the merchandise it concerned – only by 1350? (4) The next and last unit takes us to theories of risk before and after the development of the mathematical theory of probability to challenge and refine the notion that mathematics “counted away” divine providence.

(Note: You do not need any prior mathematical skills for the class.)

HIST UN3384 Brazilian Slavery in its Global Context. 4.00 points.

What does Brazilian slavery have to teach the world? This course examines the history of slavery, as well as resistance to it, its abolition, the way it has been remembered and forgotten, in Latin America’s largest country in its hemispheric, Atlantic, and global context. In Brazil, the practice of enslaving Africans and their descendants lasted longer and involved more people than in any other place in the world. Our readings and in-class discussions broadly survey the entire sweep of Brazilian history from the sixteenth century to the present, demonstrating how the enslavement of people originally brought from Africa and their descendants is an inextricable part of the country’s history, and to the history of the African Diaspora, and is fundamental to understanding Brazil’s relationship to the rest of the world. No prior knowledge of Latin American or Brazilian history is required, and all required readings will be in English

HIST UN3437 Poisoned Worlds: Corporate Behavior and Public Health. 4 points.

Priority given to majors and concentrators, seniors, and juniors.

In the decades since the publication of *Silent Spring* and the rise of the environmental movement, public awareness of the impact of industrial products on human health has grown enormously. There is growing concern over BPA, lead, PCBs, asbestos, and synthetic materials that make up the world around us. This course will focus on environmental history, industrial and labor history as well as on how twentieth century consumer culture shapes popular and professional understanding of disease. Throughout the term the class will trace the historical

transformation of the origins of disease through primary sources such as documents gathered in lawsuits, and medical and public health literature. Students will be asked to evaluate historical debates about the causes of modern epidemics of cancer, heart disease, lead poisoning, asbestos-related illnesses and other chronic conditions. They will also consider where responsibility for these new concerns lies, particularly as they have emerged in law suits. Together, we will explore the rise of modern environmental movement in the last 75 years.

HIST BC3670 Seeking Asylum: History, Politics, and the Pursuit of Justice at the US-Mexico Border. 4 points.

Note: This course meets as a lecture but it is a seminar.

Prerequisites: NA

This seminar explores the roots of and responses to the contemporary refugee "crisis" at the U.S.-Mexico border. We examine the historical factors that are propelling people, including families and unaccompanied minors, to flee the so-called Northern Triangle of Central America (El Salvador, Honduras, Guatemala); the law and politics of asylum that those seeking refuge must negotiate in the U.S.; and the burgeoning system of immigration incarceration that detains ever-greater numbers of non-citizens. The course is organized around a collaboration with the Dilley Pro Bono Project, an organization that provides legal counsel to detainees at the country's largest immigration detention prison, in Dilley, Texas.

HIST UN3702 Russia's Silver Age, 1890-1920. 4.00 points.

The end of a century and the beginning of a new one can be a moment of self-consciousness, when people pause in their usual activities to reflect on the direction of their civilization and to wonder what the future might hold. Usually, the 1917 Revolution dominates our consciousness of the first decades of the 20th century in Russia. This course offers a chance to take an in-depth look at a different aspect of Russian life: the turbulent world of ideas and culture, in many ways shared with other European capitals, that we have come to know as the Silver Age. One of the great novels of the age, Andrei Bely's Petersburg (1913), will be our window into the artistic currents, philosophical discussions, apocalyptic moods and revolutionary stirrings of turn-of-the-century Russia. Since the creators of the Silver Age thought of themselves as drawing on the whole of Russian and world culture for inspiration, I also hope that our focus on these 30 years will propel us both backwards and forwards in time so we can discuss broad themes of Russian history and culture

HIST BC3770 African Communities in New York, 1900 to the Present. 4.00 points.

This class explores the history of voluntary migrations from Africa to the United States over the course of the 20th century. This course is designed as a historical research seminar that is open to students with prior coursework in African Studies, Africana Studies, Race and Ethnic Studies, or History. Thematically the course dwells at a point of intersection between African history, Black History, and Immigration History. As part of the Barnard Engages curriculum, this class is collaboratively designed with the Harlem-based non-profit organization, African Communities Together. The aim of this course is to support the mission of ACT by producing a historically grounded digital advocacy project. The mission of ACT is to empower immigrants from Africa and their families to integrate socially, advance economically, and engage civically. To advance this mission, ACT must confront the reality that in the current political moment new legal, political, and social barriers are being erected to the integration, advancement, and engagement of African immigrants on a daily basis. As immigrants, as Black people, as Africans, and often as women, low-income people, LGBT people, and Muslims, African immigrants experience multiple intersecting forms of marginalization. Now more than ever, it is critical that African

immigrants be empowered to tell their own stories—not just of persecution and suffering, but of resilience and resistance

HIST GU4012 HISTORY OF THE CITY IN LATIN AMERICA. 4.00 points.

This course covers the historical development of cities in Latin America. Readings examine the concentration of people in commercial and political centers from the beginnings of European colonization in the sixteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; cities as sites of imperial power and their post-colonial role in nation-building; changing power dynamics in modern Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; the complexity and historical development of urban segregation; the rise of informal economies; and the constant tension between tradition and progress through which urban societies have formed. Reading knowledge of Spanish and/or Portuguese will be helpful but is not required. Open to both

undergraduate and graduate students; graduate students will be given additional reading and writing assignments

HIST GU4029 Europe's Commercial Revolution, ca 1100-1800: Economic, Social, and Cultural Change . 4 points.

This course examines the profound changes wrought by the explosive growth of the European market economy during the late medieval and early modern centuries. Readings will be drawn both from theoretical literature examining the market and from studies documenting the practices of commercial people, the institutions that organized trade (guilds, merchant associations, law, and the nascent states of the period), and the cultural responses to commercial wealth.

HIST GU4509 PROBLEMS IN INT'L HISTORY. 4.00 points.

The object of this course is to illuminate how histories of the realm we think of as "international" are structured by means of key concepts, foundational concepts that form semantic fields of politics and policy. The seminar will chiefly be devoted to some ways of this in the empirical context of what is now being called the subfield of 'the U.S. in the World.'

HIST GU4588 Substance Abuse Politics in African-American History. 4 points.

Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor's permission.

Through a series of secondary- and primary-source readings and research writing assignments, students in this seminar course will explore one of the most politically controversial aspects in the history of public health in the United States as it has affected peoples of color: intoxicating substances. Course readings are primarily historical, but sociologists, anthropologists, and political scientists are also represented on the syllabus. The course's temporal focus - the twentieth

century - allows us to explore the historical political and social configurations of opium, alcohol, heroin, cocaine, medical maintenance (methadone), the War on Drugs, the carceral state and hyperpolicing, harm reduction and needle/syringe exchange. This semester's principal focus will be on the origins and evolution of the set of theories, philosophies, and practices which constitute harm reduction. The International Harm Reduction Association/Harm Reduction International offers a basic, though not entirely comprehensive, definition of harm reduction in its statement, "What is Harm Reduction?" (<http://www.ihra.net/what-is-harm-reduction>): "Harm reduction refers to policies, programmes and practices that aim to reduce the harms associated with the use of psychoactive drugs in people unable or unwilling to stop. The defining features are the focus on the prevention of harm, rather than on the prevention of drug use itself, and the focus on people who continue to use drugs." [1] Harm reduction in many U.S. communities of color, however, has come to connote a much wider range of activity and challenges to the status quo. In this course we will explore the development of harm reduction in the United States and trace its evolution in the political and economic context race, urban neoliberalism, and no-tolerance drug war. The course will feature site visits to harm reduction organizations in New York City, guest lectures, and research/oral history analysis. This course has been approved for inclusion in both the African-American Studies and History undergraduate curricula (majors and concentrators). HIST W4588 will be open to both undergraduate and masters students. To apply, please complete the Google form at https://docs.google.com/forms/d/1xaPFhQOzk11NHnIjQIen9h41iel2hXAdhV59D5wH8AQ/viewform?usp=send_form. Questions may be directed to skroberts@columbia.edu.

HIST GU4641 HOLOCAUST GENOCIDE-AMER CULTRE. 4.00 points.

When the Holocaust Museum in Washington, D.C. opened in 1993, some people asked why a "European" catastrophe was being memorialized alongside shrines to Washington, Jefferson, and Lincoln while there was still no museum documenting the experience of African slaves in the United States or the effort to exterminate the Native Americans on this continent. How American intellectuals have thought about the Nazi regime and the Holocaust in Europe since before the Second World War and in the latter half of the twentieth century is the focus on this course. The course will also compare the ways the United States narrates, conceptualizes and deals with the Holocaust as opposed to other genocidal events. This course is comparative at its core as it examines how intellectuals and institutions spanning from Hannah Arendt to the United Nations to the US Holocaust Museum have woven this event into American culture

HIST GU4713 Orientalism and the Historiography of the Other. 4 points.

This course will examine some of the problems inherent in Western historical writing on non-European cultures, as well as broad questions of what it means to write history across cultures. The course will touch on the relationship between knowledge and power, given that much of the knowledge we will be considering was produced at a time of the expansion of Western power over the rest of the world. By comparing some of the "others" which European historians constructed in the different non-western societies they depicted, and the ways other societies dealt with alterity and self, we may be able to derive a better sense of how the Western sense of self was constructed. *Group(s): C Field(s): ME*

HIST GU4727 The History of the End of the World. 4.00 points.

For thousands of years people have been getting ready for the end of the world, giving rise to millenarian movements that have sometimes changed history. More than once, large numbers of people have experienced events such as the Black Death, the Little Ice Age, colonial conquest, and "strategic" bombing that seemed very much like the end of their world. And over the last seventy-five years, governments and international organizations have made major investments in predicting and preparing for catastrophic threats. Efforts to manage or mitigate these dangers have had world-changing consequences, including "preventative" wars, and new forms of global governance. The very idea of the end of the world, in other words, has a long history, with a demonstrable impact, which provides instructive lessons as we contemplate things to come. This course will explore this history, beginning with

eschatology and millenarian movements. In part two, students will learn how different conceptual frameworks can be applied to assessing and managing risk, and understanding how people perceive or misperceive danger. They will learn how they can be applied to identify the most important challenges, drawing insights from different disciplinary approaches. The third and main part of the course will consist of comparative and connected analyses of the age-old apocalyptic threats -- war, pestilence, and famine -- in their modern forms, i.e. nuclear armageddon, pandemics, and ecological collapse. By examining them together, we can compare the magnitude and probability of each danger, and also explore their interconnections. We will see, for instance, how nuclear testing helped give rise to the environmental movement, and how modeling the aftereffects of nuclear exchanges helped advance understanding of climate change. Similarly, scenario exercises have shaped threat perceptions and disaster-preparedness for pandemics and bio-warfare as much as they did for nuclear war and terrorism. Readings and discussions will explore how planetary threats are interconnected, and not just in the techniques used to predict and plan for them. Applying nuclear power to the problem of global warming, for instance, could undermine longstanding efforts to stop nuclear proliferation. Climate change and mass migration, on the other hand, create new pandemic threats, as a more crowded and interconnected world becomes a single ecosystem. Yet billions spent on building up defenses have created more capacity and opportunity for bio-terrorism. Who would actually use a nuclear or biological weapon? Perhaps a millenarian group hoping to ride death, the fourth horse of the apocalypse, straight to heaven

HIST GU4844 Outlaws in Asian History. 4.00 points.

What kind of historical actors were outlaws? How did they interact with and in turn shape their societies, governments, and politics? In what ways did the outlaws' transgressions destabilize ideas about national boundary, state sovereignty, political legitimacy, and legality? Over the course of the semester, students will engage with debates over the characterization of outlaws as well as case studies delving into particular places and times. The case studies, which span much of Asia, focus on multiethnic smugglers in island

Southeast Asia, bandits on the Sino-Vietnamese border, revolutionary gangsters in Indonesia, nationalist yakuza in Japan, among others. In the process, we will compare and assess the theoretical and methodological approaches scholars have taken to study figures that often reside in the shadows

HIST GU4935 Science and Art in Early Modern Europe. 4 points.

This course will investigate the relations between science and art in early modern Europe, bringing together scholarly works by historians of science and art historians as well as original sources from the period. We tend to think today of science and art as polarized cultural domains, but in the early modern period the very definitions of the terms, as well as a range of other factors, created conditions for a much different configuration between the two. Organized chronologically, this course will focus on a range of representative moments in that developing configuration, from ca. 1500 to 1800. Topics include the nature of the spaces where artworks and natural specimens met, the circulation of tools, materials and techniques between the laboratory and the artist workshop, common norms and practices of representation, and shared aspirations to objective knowledge. The course is designed as a discussion seminar and is open to undergraduate and graduate students. No prior knowledge of the subject is required, but intense engagement with the material is expected.

HIST GU4984 HACKING THE ARCHIVE: LAB FOR COMP. HIST. 4.00 points.

This is a hands-on, project-driven, Laboratory Seminar that explores the frontiers of historical analysis in the information age. It harnesses the exponential growth in information resulting from the digitization of older materials and the explosion of “born digital” electronic records. Machine learning and natural language processing make it possible to answer traditional research questions with greater rigor, and tackle new kinds of projects that would once have been deemed impracticable. At the same time, scholars now have many more ways to communicate with one another and the broader public, and it is becoming both easier – and more necessary – to collaborate across disciplines. This course will create a laboratory organized around a common group of databases in 20th century international history. Students will begin by learning about earlier methodological transformations in literary, cultural, and historical analysis, and consider whether and how the “digital turn” might turn out differently. They will then explore new tools and techniques, including named-entity recognition, text classification, topic modeling, geographic information systems, social and citation network analysis, and data visualization. As we turn to specific projects, you will be able to either write a traditional history paper or try an alternative project, either working alone or as part of a team. Papers will entail applying one or more of the digital tools to a specific historical literature/debate or a novel historical topic. Projects might include assembling and “cleaning” a large dataset of documents, prototyping a new tool, launching a web-based exhibit, or drafting a grant application. You will be encouraged to seek out additional training as necessary, conduct experiments, and design ambitious projects that might extend beyond the life of the course. The seminar will meet every week, and start with a discussion of the readings. The second hour will be devoted to training in new tools for historical research, as well as individual and small group work. Students will also be encouraged to attend weekly lab meetings, and that will be a requirement of those undertaking alternative projects. The course is open to students with no training in statistics or computer programming, and no knowledge of international history. But all participants should be open to learning both historical and computational research skills, such as the critical reading of primary source documents and oral history interviewing on the one hand, and scraping websites, querying databases, and using data visualization tools on the other.

SPRING 2021 CROSS-LISTED COURSES

PLEASE READ: The passage below lists **all** sections being offered by a Columbia instructor for a given course, including

sections which **do not** count for History students. **NOT ALL** sections of the courses listed below count for History majors and concentrators. Particular sections **only** count towards the History degree if the section instructor is a History faculty member or an affiliate with the History Department. For additional information, please review the “Requirements” tab or consult Undergraduate Administrator at undergraduate-history@columbia.edu (sjm2206@columbia.edu). All courses from the Barnard History Department also count towards the History degree.

AFAS UN1002 Major Debates in African-American Studies. 4 points.

Prerequisites: Students must register for discussion section, AFAS UN1003.

This course will focus on the major debates in African-American Studies from the role of education to the political uses of art. The class will follow these debates historically with attention to the ways in which earlier discussions on migration and emigration, for example, were engaged with the specific historical conjuncture in which they took place as well as in the myriad ways in which earlier debates continue to resonate today. There will be a mix of primary documents and secondary sources and commentary.

AFRS BC3110 THE AFRICANA COLLOQUIUM. 4.00 points.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 18 students. Priority will be given to Africana majors and CCIS students (Africana Studies, American Studies and Women's Studies majors; minors in Race and Ethnic Studies).

In this colloquium we will examine the complexities of race, gender, ethnicity, class, sexuality, and nationality within Caribbean contexts. Some of the themes we will analyze include conceptions of home and nation; the use, creation, and politics of language; intergenerational relationships between women; the rites and rights of girlhood and womanhood; and intersecting identities. We will specifically address how Caribbean women scholars/activists/artists critique racism, sexism, classism, heterosexism, colonialism, neocolonialism, and tourism within Caribbean sociocultural landscapes. In addition, we will analyze how Caribbean women frame and interrogate the politics of slavery, emancipation, freedom, resistance, rebellion, and independence during different historical eras. The required readings for this course reflect a variety of disciplinary and interdisciplinary methodologies, as well as a range of genres.

CLST UN3030 Beyond City Limits: Considering the Countryside in the Ancient Roman World. 4.00 points.

Through an interdisciplinary study of ancient literary and archaeological evidence, as well as papyri, inscriptions, and artwork housed at Columbia and the Metropolitan Museum of Art, this research-driven seminar considers the cultural, social, and economic histories of rural populations across the empire. Beginning with the foundation of Rome, we will consider how its continued expansion through military conquest led to a crisis in the Italian countryside which helped stoke the flames of civil unrest in the 3rd-2nd centuries BCE. After surveying how the countryside was transformed into a metaphor of peace under the Roman emperors, we will then turn to several of Rome's provinces (including Egypt, North Africa, and Britain) as case studies for specific issues in rural history. By examining the Roman countryside in this way, we gain a deeper understanding of how its rural inhabitants affected, and were affected by, Roman rule. This course considers how a government, ruling from the decorated buildings of its city centers, used and abused its distant rural territories for economic and political gain, and contemplates the ways in which inhabitants responded and adapted

EAAS UN3338 CULTRL HIST-JAPANESE MONSTERS. 3.00 points.

Priority is given to EALAC and History majors, as well as to those who have done previous coursework on Japan.

From Godzilla to Pokemon (literally, pocket monster) toys, Japanese monsters have become a staple commodity of late-capitalist global pop culture. This course seeks to place this phenomenon within a longer historical, as well as a broader cross-cultural, context. Through an examination of texts and images spanning over thirteen centuries of Japanese history, along with comparable productions from other cultures, students will gain an understanding not only of different conceptions and representations of monsters, ghosts, and other supernatural creatures in Japan, but also of the role of the monstrous in the cultural imagination more generally. The course draws on various media and genres of representation, ranging from written works, both literary and scholarly, to the visual arts, material culture, drama, and cinema. Readings average 100-150 pages per week. Several film and video screenings are scheduled in addition to the regular class meetings. Seating is limited, with final admission based on a written essay and other information to be submitted to the instructor before the beginning of the semester

HSAM UN2901 Data: Past, Present, and Future. 3 points.

Lect: 1.5. Lab: 1.5.

Data-empowered algorithms are reshaping our professional, personal, and political realities, for good--and for bad. "Data: Past, Present, and Future" moves from the birth of statistics in the 18th century to the surveillance capitalism of the present day, covering racist eugenics, World War II cryptography, and creepy personalized advertising along the way. Rather than looking at ethics and history as separate from the science and engineering, the course integrates the teaching of algorithms and data manipulation with the political whirlwinds and ethical controversies from which those techniques emerged. We pair the introduction of technical developments with the shifting political and economic powers that encouraged and benefited from new capabilities. We couple primary and secondary readings on the history and ethics of data with computational work done largely with user-friendly Jupyter notebooks in Python.

Spring 2021: HSAM UN2901

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

HSEA GU4712 Local History in Tibet. 4 points.

Tibetan culture covers an area roughly the size of Western Europe, yet most regions have not been the subject of sustained historical study. This course is designed for students interested in studying approaches to local history that attempt to ask large questions of relatively small places. Historiographic works from Tibetan studies (where they exist) will be examined in comparison with approaches drawn mainly from European and Chinese studies, as well as theories drawn from North/South American and Southeast Asian contexts. Given the centrality of Buddhist monasteries to Tibetan history (as "urban" centers, banks, governments, educational institutions, etc.) much of the course will deal with these.

HSPB UN2950 Social History of American Public Health. 4 points.

The purpose of this course is to provide students with an historical understanding of the role public health has played in American history. The underlying assumptions are that disease, and the ways we define disease, are simultaneously reflections of social and cultural values, as well as important factors in shaping those values. Also, it is maintained that the environments that we build determine the ways we live and die. The dread infectious and acute diseases in the nineteenth century, the chronic, degenerative conditions of the twentieth and the new, vaguely understood conditions rooted

in a changing chemical and human-made environment are emblematic of the societies we created. Among the questions that will be addressed are: How does the health status of Americans reflect and shape our history? How do ideas about health reflect broader attitudes and values in American history and culture? How does the American experience with pain, disability, and disease affect our actions and lives? What are the responsibilities of the state and of the individual in preserving health? How have American institutions--from hospitals to unions to insurance companies--been shaped by changing longevity, experience with disability and death?

Spring 2021: HSPB UN2950

JWST UN3538 Jews in the City in the Islamic Middle East. 4.00 points.

As the vast majority of Jews in the Islamic Middle East and North Africa lived in various urban centers, this seminar takes up the city as a framework with which to study Jewish life and history in that region. Through intensive class discussions and engagement with primary sources of all kinds, we will explore how Jewish communities and their concerns shaped the cities they lived in, and how those cities, in turn, shaped those Jewish communities. We will also consider broader questions about minority-majority relations, social class, gender, modernization, natural disasters, memory, and more. Although we will touch on the High Middle Ages and Early Modern Times, this course will focus on the period post-1800, to this day. We will also focus on social history, but will discuss how basic approaches in anthropology, cultural studies, and especially urban studies, can help us understand the (Jewish) urban experience better. Finally, since Islamic civilization was an umbrella civilization, under which diverse communities lived and interacted, we will consider the comparative study of Jewish life: how does comparative analysis help us think about social groups, such as Jews, or social formations, such as cities? Does a comparative view of Jewish urban life help us understand this phenomenon better?

MDES UN3048 Pandemics: A Global History. 3.00 points.

With an interdisciplinary perspective, this course seeks to expand the understanding of past pandemic crises and recent, lived pandemics such as COVID-19. COVID-19 has brought up urgent questions about how we can understand and historicize pandemics and trace the changing relationship between disease and its vectors, humans and their environments. This course seeks to expand the understanding of past and recent pandemics through a historical lens that traces the deep seated racial and class disparities, social and cultural stigma, and political

responses and control that they were expressed and deployed during these historical crises. It seeks to understand and analyze pandemics as representing complex, disruptive and devastating crises that effect profound transformations in ideas, social and economic relations and challenge interdependent networks and cultures. Pandemics are balanced in a global-local flux between dramaturgic, proliferating, contagious outbreaks; and endemic, chronic infections that have prolonged periods of latency before again reemerging through new transmissions. They also serve as a crucial lens to analyze a range of historical connections, ensions and movements ranging from colonialism and the politics of borders, global capitalism and labor, migration and mobility, decolonization and development, and neoliberalism and global health politics

HISTORY AND PHILOSOPHY OF SCIENCE

The University offers a number of courses in the history and philosophy of science, although it does not, at this time, offer a major or concentration to undergraduates in Columbia College or General Studies. The course listings bring together a variety of courses from different disciplines, which should be of interest to anyone wishing to pursue work in the history and philosophy of science. The list is not intended to be all inclusive; students interested in the history and philosophy of science should speak to members of the committee.

HIST UN2523 History of Health Inequality in the Modern United States. 4 points.

Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics since the turn of the twentieth century. Topics to be examined will include, but will not be limited to, black women's health organization and care; HIV/AIDS politics, policy, and community response; "benign neglect"; urban renewal and gentrification; medical abuses and the legacy of Tuskegee; tuberculosis control; and environmental justice. There are no required qualifications for enrollment, although students will find the material more accessible if they have had previous coursework experience in United States history, pre-health professional (pre-med, pre-nursing, or pre-public health), African-American Studies, Women and Gender Studies, Ethnic Studies, or American Studies.

Fall 2020: HIST UN2523

HIST GU4588 Substance Abuse Politics in African-American History. 4 points.

Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor's permission.

Through a series of secondary- and primary-source readings and research writing assignments, students in this seminar course will explore one of the most politically controversial aspects in the history of public health in the United States as it has affected peoples of color: intoxicating substances. Course readings are primarily historical, but sociologists, anthropologists, and political scientists are also represented on the syllabus. The course's temporal focus - the twentieth century - allows us to explore the historical political and social configurations of opium, alcohol, heroin, cocaine, medical maintenance (methadone), the War on Drugs, the carceral state and hyperpolicing, harm reduction and needle/syringe exchange. This semester's principal focus will be on the origins and evolution of the set of theories, philosophies, and practices

which constitute harm reduction. The International Harm Reduction Association/Harm Reduction International offers a basic, though not entirely comprehensive, definition of harm reduction in its statement, "What is Harm Reduction?" (<http://www.ihra.net/what-is-harm-reduction>): "Harm reduction refers to policies, programmes and practices that aim to reduce the harms associated with the use of psychoactive drugs in people unable or unwilling to stop. The defining features are the focus on the prevention of harm, rather than on the prevention of drug use itself, and the focus on people who continue to use drugs." [1] Harm reduction in many U.S. communities of color, however, has come to connote a much wider range of activity and challenges to the status quo. In this course we will explore the development of harm reduction in the United States and trace its evolution in the political and economic context race, urban neoliberalism, and no-tolerance drug war. The course will feature site visits to harm reduction organizations in New York City, guest lectures, and research/oral history analysis. This course has been approved for inclusion in both the African-American Studies and History undergraduate curricula (majors and concentrators). HIST W4588 will be open to both undergraduate and masters students. To apply, please complete the Google form at https://docs.google.com/forms/d/1xaPFhQOzk11NHnIjQIen9h41iel2hXAdhV59D5wH8AQ/viewform?usp=send_form. Questions may be directed to skroberts@columbia.edu.

CPLS GU4320 Marginalization in Medicine: A Practical Understanding of the Social Implications of Race . 4 points.

There is a significant correlation between race and health in the United States. People of color and those from underserved populations have higher mortality rates and a greater burden of chronic disease than their white counterparts. Differences in health outcomes have been attributed to biological factors as race has been naturalized. In this class we will explore the history of the idea of “race” in the context of changing biomedical knowledge formations. We will then focus on the impact that social determinants like poverty, structural violence, racism and geography have on health. Ultimately, this course will address the social implications of race on health both within the classroom and beyond. In addition to the seminar, there will also be a significant service component. Students will be expected to volunteer at a community organization for a minimum of 3 hours a week. This volunteer work will open an avenue for students to go beyond the walls of their classrooms while learning from and positively impacting their community.

HIST UN3437 Poisoned Worlds: Corporate Behavior and Public Health. 4 points.

Priority given to majors and concentrators, seniors, and juniors.

In the decades since the publication of *Silent Spring* and the rise of the environmental movement, public awareness of the impact of industrial products on human health has grown enormously. There is growing concern over BPA, lead, PCBs, asbestos, and synthetic materials that make up the world around us. This course will focus on environmental history, industrial and labor history as well as on how twentieth century consumer culture shapes popular and professional understanding of disease. Throughout the term the class will trace the historical transformation of the origins of disease through primary sources such as documents gathered in lawsuits, and medical and public health literature. Students will be asked to evaluate historical debates about the causes of modern epidemics of cancer, heart disease, lead poisoning, asbestos-related illnesses and other chronic conditions. They will also consider where responsibility for these new concerns lies, particularly as they have emerged in law suits. Together, we will explore the rise of modern environmental movement in the last 75 years.

HIST 3437	001/12251	W 8:30am - 10:20am Online Only	David Rosner	4	13/15

INSM UN3921 Nobility and Civility II. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: one semester of Contemporary Civilization or Literature Humanities, or an equivalent course, and the instructor's permission.

A team-taught multicultural, interdisciplinary course examining traditions of leadership and citizenship as they appear in the key texts of early Indian, Islamic, Far Eastern, and Western

civilizations. One goal is to identify and examine common human values and issues evident in these texts while also recognizing key cultural differences

HIST GU4031 Transforming Texts: Textual Analysis, Literary Modeling, and Visualization . 4 points.

Designed for graduate and advanced undergraduate students in the social sciences, humanities, and computer science, this hybrid course is situated at the crossroads of historical exploration and computer sciences. Students will be exposed to digital literacy tools and computational skills through the lens of the Making and Knowing Project. The edition will draw on collaboration with and research done by the Making and Knowing Project <http://www.makingandknowing.org/> on an anonymous 16th-century French compilation of artistic and technical recipes (BnF Ms. Fr. 640). Students will work from the encoded English translation of the manuscript, prepared by the Spring 2017 course “*HIST GR8975 What is a Book in the 21st Century? Working with Historical Texts in a Digital Environment.*” This course will also utilize the concepts and prototypes developed by computer science students in the Spring 2018 “*COMS W4172: 3D User Interfaces and Augmented Reality (AR)*.” The skills students will learn over the course of the semester are widely applicable to other types of Digital Humanities projects, and indeed, in many fields outside of traditional academic study.

For the final project, students will collaborate to investigate linguistic features of Ms. Fr. 640 using natural language processing and text mining techniques. These projects will shed light on topics of interest within the manuscript and uncover connections within the textual data. By using the tools prototypes in a Spring 2018 *COMS W4172* course, and working alongside computer science students, the groups will learn to adapt and recode data sets, and to view them into a variety of visualizations.

HUMAN RIGHTS

Program Office: Institute for the Study of Human Rights; 475 Riverside Drive (Interchurch Center), 3rd floor; 646-745-8577; uhrp@columbia.edu

Departmental Website: <http://humanrightscolumbia.org/education/undergraduate>

Director of Undergraduate Studies: Prof. Inga Winkler, 475 Riverside Drive (Interchurch Center), 308C; 646-745-8524. Office hours: Wednesday: 9:30am - 11:30am and by appointment.

Human rights are central to contemporary understandings of justice and equality and have crucial bearing on the ability to assess and respond to emerging technological, economic, social, cultural, and political issues.

The Undergraduate Human Rights Program at the Institute for the Study of Human Rights engages students in this dynamic and evolving field and enhances their knowledge, skills, and commitment to human rights. The program offers a major and a concentration in human rights, provides students the opportunity to deepen their knowledge and explore their interests in human rights outside the classroom, and works to strengthen and support the undergraduate human rights community on campus. More information on academic and extracurricular events, opportunities, and resources for undergraduate human rights students is available on the program's website. For an advising appointment, please e-mail [humanrightsed \(humanrightsed@columbia.edu\)](mailto:humanrightsed@humanrightsed@columbia.edu) @columbia.edu (humanrightsed@columbia.edu).

DEPARTMENTAL HONORS

To be eligible for departmental honors, a student must satisfy all the requirements for the major, maintain a 3.6 GPA in the major, maintain an overall GPA of 3.6, and complete a thesis of sufficiently high quality to merit honors. A thesis is required for all students who wish to be considered for honors, but does not guarantee honors. Students who graduate in October,

February, or May of a given academic year are eligible for honors consideration in May. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

Students interested in writing a thesis for honors consideration complete a two semester course sequence during their final year of study. In the fall, students take HRTS UN3994 Human Rights Senior Seminar: Research Methods, which introduces students to various research methods and guides them through the proposal development process. In the spring, students take HRTS UN3996 Human Rights Thesis Seminar. This course will consist of group sessions, where students will present their work and participate in discussions, as well as individual meetings with their thesis supervisor, who is also the course instructor.

Students are encouraged to write a thesis, but they should not do so solely to be eligible for honors consideration. Rather, students should consider enrolling in the thesis seminar in order to demonstrate their capacity to produce a work of original research and develop more specialized knowledge of a human rights issue.

GUIDELINES FOR ALL HUMAN RIGHTS MAJORS, CONCENTRATORS, AND SPECIAL CONCENTRATORS

Student should also consult the general academic policies of their school.

Planning Forms

Major and concentration planning forms are available on the ISHR undergraduate program website. Prior to each semester, students should submit an [online course advising form](#). Students may also e-mail uhrp@columbia.edu to set up an advising appointment.

Grades

No course with a grade of D or lower is credited towards the major or concentration.

One course, with the exception of the three core courses required for the major, can be taken for Pass/D/Fail. The student must receive a grade of P for the course to count towards the requirements of the major. All other courses must be taken for a letter grade.

All seminar courses must be taken for a letter grade.

Transfer Credit/Study Abroad Credit

Human rights majors may transfer a maximum of three courses from other institutions. Human rights concentrators may transfer a maximum of two courses from other institutions. This includes study abroad credit. No more than one Advanced Placement course can be counted for the major or

concentration. The application of transferred courses to the major or concentration must be approved by the Director of Undergraduate Studies or the undergraduate adviser.

Students wishing to count transfer courses toward the major or concentration should email uhrp@columbia.edu with their Transfer Credit Report, the syllabi of the courses they want to count toward departmental requirements, and a statement of how they want to apply the transfer credits to the requirements.

Double-Counting

Students may double count major or concentration courses toward the fulfillment of degree requirements in accordance with the academic policies of their school.

Normally, courses for one program of study (i.e. major, concentration, special concentration, etc.) may not be used to satisfy the course requirements for another program of study. Students should consult the academic policies of their school for specific information.

MAJOR IN HUMAN RIGHTS

The major in human rights requires 10 courses for a minimum of 31 points as follows. One of the distributional or specialization courses must be a seminar.

Core Courses

HRTS UN3001	Introduction to Human Rights
HRTS UN3190	International Human Rights Law
HRTS UN3995	Human Rights Senior Seminar

Distributional Requirement *

Students take one course in three of these four categories (three courses), for a minimum of 9 credit points.

Politics and history

Culture and representation

Political theory and philosophy

Social and economic processes

Specialization Requirement **

Students fulfill the specialization requirement by focusing on a particular discipline, taking four courses for a minimum of 12 credit points offered by a single department or institute.

* Please see the ISHR [undergraduate course list](#) for the current list of courses that fulfill the distributional requirement of the major.

** The goal of the specialization requirement is to equip students with the tools of a specific discipline. Students should inform the human rights program of their intended specialization before taking courses to fulfill this requirement. As a general rule, fields of study listed as [academic programs](#) on the bulletin are approved for the specialization requirement if a free-standing major is offered. Courses approved for that major are generally approved for the human rights specialization. However, language acquisition and studio courses may not be taken to fulfill the specialization requirement. Students are encouraged to take any core and/or methodology courses required by a program when fulfilling their specialization requirement. Students are also encouraged to take courses within their chosen specialization that focus on human rights issues, but the specialization requirement can be fulfilled by taking any four courses within the same discipline. For example, if a student's specialization is Political Science, he or she can fulfill the specialization requirement by taking any four POLS courses.

CONCENTRATION IN HUMAN RIGHTS

The concentration in human rights requires 8 courses for a minimum of 24 points as follows:

HRTS UN3001	Introduction to Human Rights
Seven additional human rights courses, one of which must be a seminar.	

Please see the ISHR [undergraduate course list](#) for the current list of courses that fulfill the concentration requirements.

HRTS UN3001 Introduction to Human Rights. 3 points.

Evolution of the theory and content of human rights; the ideology and impact of human rights movements; national and international human rights law and institutions; their application with attention to universality within states, including the U.S., and internationally.

Spring 2021: HRTS UN3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3001	001/11513	M W 2:40pm - 3:55pm Online Only	Andrew Nathan	3	148/150

HRTS UN3190 International Human Rights Law. 3 points.

This course will introduce students to the international law of human rights, and give a basic orientation to fundamental issues and controversies. The course has two principal focal points: first, the "nuts and bolts" of how international law functions in the field of human rights, and second, the value and limitations of legal approaches to a variety of human rights issues. Throughout the course, both theoretical and practical questions will be addressed, including who bears legal duties and who can assert legal claims, how these

duties might be enforced, and accountability and remedy for violations. Attention will be given to how international law is made, what sorts of assumptions underlie various legal mechanisms, and how the law works in a variety of contexts.

Fall 2020: HRTS UN3190

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

HRTS UN3995 Human Rights Senior Seminar. 4 points.

The senior seminar is a capstone course required for the human rights major. The seminar provides students the opportunity to discuss human rights from a variety of disciplinary perspectives and to explore various theoretical approaches and research methodologies. Students undertake individual research projects while collectively examining human rights through directed readings and discussion.

HRTS UN3996 Human Rights Thesis Seminar. 3 points.

Priority given to human rights majors/concentrators.

Prerequisites: HRTS UN3995 Human Rights Senior Seminar. Additional information available at: <http://humanrightscolumbia.org/education/undergraduate>

This course is designed for human rights students who wish to write a honors-eligible thesis. The course will consist of group sessions, during which time students will present their work and participate in discussions, and individual meetings with the thesis supervisor. The course instructor is the thesis supervisor for each student.

HRTS GU4215 NGOs and the Human Rights Movement: Strategies, Successes and Challenges. 3 points.

This class takes a social movement perspective to analyze and understand the international human rights movement. The course will address the evolution of the international human rights movement and focus on the NGOs that drive the movement on the international, regional and domestic

levels. Sessions will highlight the experiences of major human rights NGOs and will address topics including strategy development, institutional representation, research methodologies, partnerships, networks, venues of engagement, campaigning, fundraising and, perhaps most importantly, the fraught and complex debates about adaptation to changing global circumstances, starting with the pre-Cold War period and including some of the most up-to-date issues and questions going on in this field today.

HRTS GU4230 Refugees, Forced Migration, and Displacement. 3 points.

Refugees, forced migration, and displacement: these subjects top the headlines of the world's newspapers, not to mention our social media feeds. Over a million refugees have reached Europe's shores in recent years, and conflicts in the Middle East and elsewhere continue to force people to flee their homes. In the aftermath of the financial crisis and 9/11, politicians in the Global North have focused on borders: who crosses them and how. Walls are being erected. Referendums are being held. We are consumed with thorny questions about who gets to join our political communities. Today there are over 65 million refugees, displaced persons, and stateless persons in the world, represented at last summer's Olympics by their own team for first the time, a testament to their increasing visibility on the world stage. Global forced displacement recently hit a historical high. And while numbers are increasing, solutions are still elusive. The modern refugee regime, the collection of laws and institutions designed to address the problems faced by refugees, has developed slowly over the course of the last 100 years, first in response to specific crises. That regime has been shaped by a changing geopolitical landscape. At the end of the Cold War, institutions in the field expanded their mandates and preferred solutions to the "problem" of refugees changed. And yet today many scholars and policy makers argue the regime is not fit for purpose. They point to the European refugee crisis as the latest case in point. Why? What went wrong and where? Can it be fixed? This course will largely focus on the issues of forced migration, displacement and refugees related to conflict, although this subject is inevitably intertwined with larger debates about citizenship and humanitarianism. Taking an interdisciplinary perspective, this course will address both scholarly and policy debates. Utilizing human rights scholarship, it will draw on work in history that charts the evolution of institutions; legal scholarship that outlines international and domestic laws; work in political science that seeks to understand responses in a comparative perspective, and anthropological studies that address how refugees understand these institutions and their experiences of exile and belonging. These topics are not only the purview of those in the academy, however. Investigative journalists have most recently provided

trenchant coverage of the world's refugees, especially the current European crisis, where many have reported from the shores of the Mediterranean Sea. Policy makers scramble to keep up with a crisis literally in motion. We will read their communiqués as well. While we will only begin to skim the surface of these issues, in this course you should expect to gain the following expertise: 1) Knowledge of the modern refugee regime and its origins 2) An analysis of actors and institutions who are tasked with responding to refugee crises and how their roles have changed 3) An understanding of a few critical historical case studies, both in the United States and abroad 4) Critical analysis of the current refugee crisis in Europe and the Middle East 5) Knowledge of the asylum process in the US and in comparative perspective 6) An understanding of the debates about conducting research with vulnerable populations such as refugees and displaced persons

HRTS GU4270 Social Media and Human Rights: Actors, Advocacy and Analytics. 3 points.

PRIORITY:HRSMA. GRAD & UNDERGRAD(3&4YR) ON 1ST DAY OF TERM

This course examines how changes in information and communications technology have, over the past two decades, fundamentally transformed the practices of civil society actors engaged with human rights issues. New communications tools such as Twitter, blogs, and Facebook have changed the ways that organizations communicate with their followers and seek to influence public debate. The increasing accessibility of analytic tools for researching and visualizing changing patterns of human rights abuse has empowered groups to better understand and respond more forcefully to these issues. Indeed, the use of social media as a communications tool has made it a data source for those monitoring and analyzing patterns of activity, in ways that draw increasingly on the techniques of big data analysis.

HRTS GU4500 SOCIO-ECONOMIC RIGHTS. 3 points.

Socio-economic rights have emerged from the margins into the mainstream of human rights. We will explore conceptual issues through the lens of specific rights which will help us ground these principles and ideas in concrete cases. We will discuss developments on socio-economic rights and examine their relevance in the United States as well as selected other countries, particularly those with progressive legislation, policies and jurisprudence.

HRTS GU4600 Human Rights in the Anthropocene. 3 points.

In August 2016, a working group of the International Geological Congress voted to acknowledge a new geological epoch, following 11,700 years of the Holocene, and that it would be called The Anthropocene. The announcement indicated a new era in the earth's chronology marked by the consequences of human activity on the planet's ecosystems. Closely related to discussions of sustainability, investigations into the Anthropocene tend to focus on environmental and ecological issues while ignoring its social justice dimensions. This course will investigate how Human Rights has and will be impacted by the Anthropocene, with special attention paid to the human dimensions and consequences of anthropogenic change. Do new and troubling revelations about anthropogenic mistreatment of the earth and its resources modify or amplify the kinds of responsibilities that govern activity between individuals and communities? How do we scale the human response from the urban, to the periurban, to the rural? How must the study of Human Rights evolve to address violence and mistreatment associated not just among humans but also amid human habitats? What sorts of juridical changes must occur to recognize and respond to new manifestations of social injustice that relate directly to consequences of anthropogenic changes to the Earth system? Topics will include discussions of the Environmental Justice movement, agribusiness, access to (and allocation of) natural resources, population growth; its global impact, advocacy for stronger and more accountability through environmental legal change, biodiversity in urban environments, and the growing category of environmental refugees.

HRTS GU4650 Children's Rights Advocacy. 3 points.

This course is designed to introduce contemporary children's rights issues and help students develop practical advocacy skills to protect and promote the rights of children. Students will explore case studies of advocacy campaigns addressing issues including juvenile justice, child labor, child marriage, the use of child soldiers, corporal punishment, migration and child refugees, female genital mutilation, and LGBT issues affecting children. Over the course of the semester, students will become familiar with international children's rights standards, as well as a variety of advocacy strategies and avenues, including use of the media, litigation, and advocacy with UN, legislative bodies, and the private sector. Written assignments will focus on practical advocacy tools, including advocacy letters, op-eds, submissions to UN mechanisms or treaty bodies, and the development of an overarching advocacy strategy, including the identification of goals and objectives, and appropriate advocacy targets and tactics.

HRTS GU4810 Religion and Human Rights. 3 points.

Priority given to human rights studies M.A. students. Open to 3rd and 4th year undergraduates on first day of term with the instructor's permission.

The resurgence of religion over the past three decades has had a transformative influence globally and within nations. Religious nationalism, fundamentalism, and communalism have arisen to forcefully compete with secular democracy. With the fall of the Soviet bloc and the bilateralism of the Cold War, ethnic particularism, often of a religious character, has emerged as the locus of identity for people on all continents. These rapid changes engendered by a new, often commanding, role for religion challenge the very concept of individual and universal human rights. They raise difficult theoretical and painfully practical questions as to the preservation of individual human rights, and the relationship of democracy to religion. At the same time, recent currents such as economic globalization, the triumph of the free market, and the communications revolution promote individual autonomy, a cornerstone of human rights. There can be no doubt that religion will occupy an increasingly salient role in the social and political life of nations during the course of the 21st century. The relevance of religion to human rights in our time cannot be undervalued. The course examines the relationship of religion to human rights from several standpoints, including religion's role in abetting intolerance, religious minorities as victims of human rights violations, and religion as a framer of human rights ideals which inspire action.

HRTS GU4900 UN HUMAN RIGHTS BODIES: IMPACT – REFORM – ADVOCACY. 4 points.

The course is part of the program's offerings in experiential learning. Students will engage in an applied research project with an NGO partner focused on the role of UN Special Rapporteurs and the strategies they employ. Students will become familiar with the intricacies of the UN human rights system, while also taking a bird's-eye view on the system, its challenges and the need for reform. The course seeks to combine critical reflection with practical application, including through the perspectives of practitioners and guest speakers who discuss their strategies for advocacy.

16/22

HRTS GU4915 Human Rights and Urban Public Space. 3 points.

Priority for 3rd & 4th yr CC/GS HUMR studs & to HRSMA studs

The course will explore the often-contested terrain of urban contexts, looking at cities from architectural, sociological, historical, and political positions. What do rights have to do with the city? Can the ancient idea of a "right to the city" tell us something fundamental about both rights and cities? Our notion of citizenship is based in the understanding of a city as a community, and yet today why do millions of people live in cities without citizenship? The course will be organized thematically in order to discuss such issues as the consequences of cities' developments in relation to their peripheries beginning with the normative idea of urban boundaries deriving from fortifying walls, debates around the public sphere, nomadic architecture and urbanism, informal settlements such as slums and shantytowns, surveillance and control in urban centers, refugees and the places they live, catastrophes natural and man-made and reconstruction, and sovereign areas within cities the United Nations, War Crimes Tribunals. At the heart of our inquiry will be an investigation of the ways in which rights within urban contexts are either granted or withheld.

HRTS GU4930 International Humanitarian Law and Human Rights. 4 points.

This seminar will cover various issues, debates, and concepts in the international law of armed conflict (known as international humanitarian law), particularly as it relates to the protection of non-combatants (civilians and prisoners of war). In doing so, we will examine how international humanitarian law and human rights law intersect. Both sets of legal norms are designed to protect the lives, well-being, and dignity of individuals. However, the condition of armed conflict provides a much wider set of options for governments and individuals to engage in violent, deadly action against others, including killing, forcibly detaining, and destroying the property of those designated as combatants. At the same time, the means of waging war are not unlimited, but rather are tightly regulated by both treaty and customary law. This course will examine how these regulations operate in theory and practice, focusing on the principles of distinction, proportionality, and military necessity.

HRTS GU4950 Human Rights and Human Wrongs. 3 points.

MAIL INSTR FOR PERM.PRIORITY:3&4YR HUMAN RIGHT & HRSMA

Prerequisites: the instructor's permission. Please e-mail the instructor at bc14@columbia.edu.

This course will examine the tension between two contradictory trends in world politics. On the one hand, we have emerged from a century that has seen some of the most brutal practices ever perpetrated by states against their populations in the form of genocide, systematic torture, mass murder and ethnic cleansing. Many of these abuses occurred after the Holocaust, even though the mantra "never again" was viewed by many as a pledge never to allow a repeat of these practices. Events in the new century suggest that these trends will not end anytime soon. At the same time, since the middle of the twentieth century, for the first time in human history there has been a growing global consensus that all individuals are entitled to at least some level of protection from abuse by their governments. This concept of human rights has been institutionalized through international law, diplomacy, international discourse, transnational activism, and the foreign policies of many states. Over the past two decades, international organizations, non-governmental organizations, and international tribunals have gone further than any institutions in human history to try to stem state abuses. This seminar will try to make sense of these contradictions.

HRTS GU4400 Sexual Orientation, Gender Identity, and Human Rights. 3 points.

PRIORITY: HRSMA. GRAD & UNDERGRAD (3&4YR) ON 1ST DAY OF TERM

Debates over the rights of lesbian, gay, bisexual and transgender people have never been more visible in the international arena. Advocates are beginning to have some success in putting sexual orientation and gender identity on the agenda for inclusion in human rights instruments. But in many local and regional contexts, state-sanctioned homophobia is on the rise, from the official anti-gay stance of Russia featured during the Sochi Winter Games to the passage of Mississippi's anti-gay bill and Uganda's anti-homosexuality act. This course examines these trends in relation to strategies pursued by grassroots activists and NGOs and the legal issues they raise, including marriage and family rights, discrimination, violence, torture, sex classification, and asylum. We will also focus on current debates about the relation between sexual rights and gender justice, tensions between universalist constructions of gay/trans identity and local formations of sexual and gender non-conformity, and legacies of colonialism.

-----------	-----------	-------------------	----------------	---	-------

HRTS GU4880 Human Rights in the United States. 3 points.

The United States sees itself as a country founded on the norms of equality under the law and inalienable rights but the modern reality is quite different. Police brutality in Ferguson, Executive Orders banning Muslims, protests at the Dakota Pipeline, the water crisis in Flint, Michigan, raids by Immigration and Customs Enforcement, high levels of domestic violence, wage stagnation, and the lack of a right to health care, all point to a human rights crisis at home. Some scholars have even argued that, for the majority of its citizens, the United States has the standards of a "third world" country.

In which areas are the most violations of human rights occurring and why? How have long term trends, including historical legacies, contributed to the current state of affairs? This survey course will provide an overview of contemporary human rights issues in the United States and will analyze them through the theoretical lenses of scholarship in the fields of comparative politics (including social movements) and law and society. It will outline the different actors in the human rights landscape, and focus on the various forms and strategies of mobilization around human rights issues with an eye to what has helped increase the enjoyment of rights.

Spring 2021: HRTS GU4880

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 4880	001/11525	T 2:10pm - 4:00pm Online Only	Lara Nettelfield	3	15/22

HRTS GU4340 Human Rights Accountability & Remedies. 3 points.

Not offered during 2020-21 academic year.

Effective remedies for violations of human rights is a core tenet of human rights law. Yet in practice, victims are rarely able to rely on formal accountability mechanisms to deliver remedies. This course examines how advocates combine political, legal and reputational accountability strategies to hold violators accountable where formal enforcement mechanisms are unavailable. The course will look beyond the international criminal legal system, and instead draw on case studies from contexts where the accountability gap is particularly stark: transnational actors who lack direct accountability relationships with rights-holders, including in international development, peacekeeping and corporate activities.

By delving into practical and tactical considerations, students will build an understanding of how various strategies work together to build a successful campaign for accountability that results in remedies for victims. Students will engage in simulated exercises in media advocacy, political lobbying, engaging with the UN human rights system, and public campaigning. Students will learn how to build empowering narratives that shape public opinion, center victims in their work, and nurture transnational partnerships to overcome power

differentials. Through discussions grounded in both theory and practice, students will also critically interrogate the practice of human rights advocacy.

HRTS UN3994 Human Rights Senior Seminar: Research Methods. 4 points.

This course aims to introduce students to human rights research methods, while providing them with practical research tools. The course will be tailored to students' interests, disciplinary backgrounds and research areas. The specific topics students will research and the methods they will employ will determine the substantive focus of readings.

During the course we will ask the following questions: 'what is human rights research?', 'how do you carry out research in an interdisciplinary field?', 'what distinguishes academic research from applied research and advocacy'? While answering these questions, you will become familiar with the literature on human rights methodologies, and you will engage in analysis and critical assessment of important human rights research literature.

In addition, the course gives a practical approach to research methodology. You will learn about a diverse set of methodologies, such as interviewing and focus groups, archival research, ethnographic and participant observation, interviewing focus groups, conducting online research; interpretive and non-empirical methods and basic quantitative methodologies to be employed in the study of human rights. As you learn about different methodological approaches, you will develop your own research project.

Scholars and practitioners in the field of human rights research will present their work and engage in discussions with students about their own research, challenges, successes and publication venues.

NB: This course is geared towards students who commit to writing a senior thesis. It is part of a two-course sequence: HRTS UN3994 Section 001 Human Rights Senior Seminar: Research Methods in the fall and HRTS UN3996 Human Rights Thesis Seminar in the spring. Students who do not intend to write a thesis should enroll in HRTS UN3995 section 001 Human Rights Senior Seminar, which is a one-semester course taught each semester focused on writing a seminar paper.

Fall 2020: HRTS UN3994

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3994	001/11122	W 2:10pm - 4:00pm Online Only	Tracey Holland	4	11/20

HRTS GU4185 Human Rights and Global Economic Justice. 3 points.

The world economy is a patchwork of competing and complementary interests among and between governments, corporations, and civil society. These stakeholders at times cooperate and also conflict over issues of global poverty, inequality, and sustainability. What role do human rights

play in coordinating the different interests that drive global economic governance? This seminar will introduce students to different structures of global governance for development, trade, labor, finance, the environment, migration, and intellectual property and investigate their relationship with human rights. Students will learn about public, private, and mixed forms of governance, analyze the ethical and strategic perspectives of the various stakeholders and relate them to existing human rights norms. The course will examine the work of multilateral organizations such as the United Nations and the International Financial Institutions, as well as international corporate and non-governmental initiatives.

Fall 2020: HRTS GU4185

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 4185	001/15659	M 6:10pm - 8:00pm Online Only	Rainer Braun	3	11/22

HRTS GU4195 Topics in History, Memory and Transitional Justice. 3 points.

How do societies address their "bad pasts" in order to create "good futures" in the aftermath of conflict, state-sponsored repression, dictatorship, and genocide? Transitional Justice has generated numerous strategic and tactical approaches for redressing often irreparable harms. These include: international criminal tribunals, national or local legal proceedings, truth commissions, restitution, the accurate revision of history, public apologies, the establishment of monuments and museums, and official commemorations.

The aim of this course is to examine and analyze from a historical perspective the characteristics and problems of transitions from non-democratic/dictatorial/totalitarian/criminal political regimes to the beginnings of democracy and civil society. We shall focus on concepts and comparative cases, and current and past transitional justice-related questions, including historical reconciliation. We will study, among others, the experience of Germany at and after the Nuremberg proceedings, transitional justice in Africa, post-Soviet efforts at coming to terms with its Communist past, the ICTY/ICTR/ICC, amnesty and amnesia, and the legacy and memory of genocide and mass political repression. Students will gain a substantive framework for understanding the questions and challenges related to transitional justice today.

ITALIAN

Departmental Office: 502 Hamilton; 212-854-2308
<http://italian.columbia.edu/>

Director of Undergraduate Studies: Assoc. Prof.
Pier Mattia Tommasino, 513 Hamilton; 212-854-0747;
pmt2114@columbia.edu

A major in Italian offers students the opportunity to study Italian literature and culture in an intimate, seminar setting with the close supervision of the department's faculty. In addition, the prerequisite and corequisite sequence of language courses is designed to give students a command of written and spoken Italian.

Majors must complete 30 points and concentrators must complete 24 points. All majors and concentrators are required to take two semesters of Advanced Italian (ITAL UN3335 Advanced Italian-ITAL UN3336 Advanced Italian II: Italian Language & Culture, ITAL UN3337 Advanced Italian Through Cinema, ITAL UN3338 Italiana. Introduction to Italian Culture, the High, the Low, and the In-between, ITAL UN3645 Grand Tour in Italy, or ITAL UN3232 Senza frontiere. Lingua e cultura italiane dall'Ottocento ad oggi tra emigrazione ...) as well as one of the following two sequences:

- *Introduction to Italian Literature I and II* (ITAL UN3333-ITAL UN3334) provides an overview of major authors and works in the Italian literary tradition from the Middle Ages to the present;
- *Italian Cultural Studies I and II* (ITAL GU4502-ITAL GU4503) is an interdisciplinary investigation into Italian culture and society from national unification in 1860 to the present.

In consultation with the director of undergraduate studies, majors select six additional courses (concentrators select four additional courses) from the department's 3000- or 4000-level offerings or from other humanities and social science departments with a focus on Italian culture. Students who have taken courses in Italian Literature, Italian History, and/or Italian Culture while abroad should consult with the Director of Undergraduate Studies to determine if the courses may be applicable to the major.

Highly motivated students have the opportunity to pursue a senior thesis under the guidance of a faculty adviser in an area of Italian literature or culture of their choosing. The senior thesis tutorial, ITAL UN3993 Senior Thesis/Tutorial, will count for 3 points.

Departmental courses taught entirely in English do not have linguistic prerequisites and students from other departments who have interests related to Italian culture are especially welcome to enroll.

Italian language instruction employs a communicative approach that integrates speaking, reading, writing, and listening. Courses make use of materials that help students to learn languages not just as abstract systems of grammar and vocabulary but as living cultures with specific content. Across the levels from elementary to advanced, a wide range of literary, cultural

and multimedia materials, including books, film, and opera, supplement the primary course text.

The sequence in elementary and intermediate Italian enables students to fulfill the College's foreign language requirement and thoroughly prepares them for advanced study of language and for literature courses taught in Italian. Specialized language courses allow students to develop their conversational skills.

For highly motivated students, the department offers intensive elementary and intensive intermediate Italian, both of which cover a full year of instruction in one semester. Courses in advanced Italian, although part of the requirements for a major or a concentration in Italian, are open to any qualified student whose main goal is to improve and perfect their competence in the language.

Outside the classroom, the Department of Italian organizes a weekly *Caffè e conversazione* where students at all levels can converse with fellow students and faculty members over Italian espresso and cookies. Students can also attend the *Serata al cinema*, Italian film viewings scheduled in the evening throughout the academic year, in which faculty and graduate students introduce each film and then conclude with a question and answer session. In addition, the student-run *Società Italiana* (culasocieta@gmail.com) organizes events such as pasta-making workshops, movie nights, and costume parties.

ADVANCED PLACEMENT

The department grants 3 credits for a score of 5 on the AP Italian Language exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3000-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in Italian. Courses taught in English may not be used for language AP credit. The department grants 0 credits for a score of 4 on the AP Italian Language exam, but the foreign language requirement is satisfied.

CASA ITALIANA

A wide range of cultural programs are sponsored by the Italian Academy for Advanced Studies in America, located in Casa Italiana. These programs, which include the activities of the *Columbia Seminar on Modern Italian Studies* and the *Italian Academy Film Festival*, enrich the learning experience of the student and offer opportunities to meet distinguished Italian and Italian-American visitors to the University. The Paterno book collection is housed in Butler Library and contains valuable resources on Italian literature and culture.

For inquiries into the department and its undergraduate and graduate degrees offered, please contact 212-854-2308 or italian@columbia.edu.

LANGUAGE RESOURCE CENTER

The Language Resource Center (LRC) provides resources for intensive practice in pronunciation, diction, and aural

comprehension of some twenty-five modern languages. LRC exercises are closely coordinated with the classroom's work.

Coordinated tape programs and on-line audio are available and mandatory for students registered in elementary and intermediate Italian language courses. Taped exercises in pronunciation and intonation, as well as tapes of selected literary works, are also available to all students in Italian courses.

ELECTRONIC CLASSROOMS

Language instruction courses meet at least once a week in a multimedia-equipped electronic classroom in order to facilitate exposure to Italian arts such as music, opera, and film, and for other pedagogical uses.

DEPARTMENTAL HONORS

Majors in Italian literature or Italian cultural studies who wish to be considered for departmental honors in Italian must: (1) have at least a 3.6 GPA in their courses for the major; and (2) complete a senior thesis or tutorial and receive a grade of at least A- within the context of the course ITAL UN3993 Senior Thesis/Tutorial. Normally no more than one graduating senior receives departmental honors in a given academic year.

GUIDELINES FOR ALL ITALIAN MAJORS AND CONCENTRATORS

The courses in the Department of Italian are designed to develop the student's proficiency in all the language skills and to present the literary and cultural traditions of Italy. The program of study is to be planned as early as possible with the

director of undergraduate studies. Students are advised to meet with the director of undergraduate studies each semester in order to obtain program approval.

For students with no knowledge of Italian, the required language course sequence is:

ITAL UN1101 - ITAL UN1102	Elementary Italian I and Elementary Italian II
ITAL UN2101 - ITAL UN2102	Intermediate Italian I and Intermediate Italian II

For students planning to enroll in Intensive Italian courses, a minimum of three semesters of Italian language instruction is required, such as:

ITAL UN1121 - ITAL UN2101 - ITAL UN2102	Intensive Elementary Italian and Intermediate Italian I and Intermediate Italian II
ITAL UN1101 - ITAL UN1102 - ITAL UN2121	Elementary Italian I and Elementary Italian II and INTENSIVE INTERMEDIATE ITALIAN
ITAL UN1121 - ITAL UN2121	Intensive Elementary Italian and INTENSIVE INTERMEDIATE ITALIAN

And one of the following courses:

ITAL UN3335	Advanced Italian
ITAL UN3336	Advanced Italian II: Italian Language & Culture
ITAL UN3337	Advanced Italian Through Cinema
ITAL UN3338	Italiana. Introduction to Italian Culture, the High, the Low, and the In-between
ITAL UN3339	Learning Italian in Class and Online: A Telecollaboration with Italy.
ITAL UN3232	Senza frontiere. Lingua e cultura italiane dall'Ottocento ad oggi tra emigrazione ...
ITAL UN3645	Grand Tour in Italy

Italian language proficiency equivalent to the elementary and intermediate sequence may be demonstrated by the departmental placement test, offered before the start of every semester; with a score of 4 or 5 on the Advanced Placement Examination; or with a score of 780 or higher on the SAT II Subject Test in Italian.

As noted above, courses given entirely in English do not have linguistic prerequisites; students planning a major in Italian may enroll in such courses before completing the language prerequisite for the major or concentration.

MAJOR IN ITALIAN

Please read *Guidelines for all Italian Majors and Concentrators* above.

Requirements

The major in Italian literature requires a minimum of 30 points in Italian courses numbered above the intermediate level, i.e., above ITAL UN2121, to include the following:

Two semesters of Advanced Italian

ITAL UN3335 - ITAL UN3336	Advanced Italian and Advanced Italian II: Italian Language & Culture
------------------------------	--

Two semesters of Italian Literature

ITAL UN3333 - ITAL UN3334	Introduction To Italian Literature, I and Introduction To Italian Literature, II
------------------------------	---

- OR -

Two Semesters of Italian Culture

ITAL GU4502 - ITAL GU4503	Italian Cultural Studies I: From Unification to World War I and Italian Cultural Studies II: From World War I to the Present
------------------------------	---

Additional Courses

Select at least two other courses from the department's GU4000-level courses.

In consultation with the director of undergraduate studies, the remaining courses may be selected from the department's 3000- or 4000-level offerings or from other humanities and social science departments with a focus on Italian literature or culture.

ITAL UN3993	Senior Thesis/Tutorial (or another course in Italian literature or culture)
-------------	---

Native speakers and students with superior proficiency (as demonstrated by a departmental exam) may replace the Advanced Italian sequence with six points of Italian literature courses of their choice.

Period Distribution

At least two courses that cover material before 1700 and two courses that cover material after 1700.

CONCENTRATION IN ITALIAN

Please read *Guidelines for all Italian Majors and Concentrators* above.

Requirements

The concentration in Italian literature requires a minimum of 24 points in Italian courses numbered above the intermediate level, i.e., above ITAL UN2121, to include the following:

Two semesters of Advanced Italian

ITAL UN3335 - ITAL UN3336	Advanced Italian and Advanced Italian II: Italian Language & Culture
------------------------------	--

or ITAL UN3337 or ITAL UN3338	Advanced Italian Through Cinema Italiana. Introduction to Italian Culture, the High, the Low, and the In-between
----------------------------------	--

Two semesters of Italian Literature

ITAL UN3333 - ITAL UN3334	Introduction To Italian Literature, I and Introduction To Italian Literature, II
------------------------------	---

- OR -

Two Semesters of Italian Culture

ITAL GU4502 - ITAL GU4503	Italian Cultural Studies I: From Unification to World War I and Italian Cultural Studies II: From World War I to the Present
------------------------------	---

Additional Courses

Select at least two other courses from the department's GU4000-level courses.

In consultation with the director of undergraduate studies, the remaining courses may be selected from the department's 3000- or 4000-level offerings or from other humanities and social science departments with a focus on Italian literature or culture.

ITAL UN1121 Intensive Elementary Italian. 6 points.

Limited enrollment.

An intensive course that covers two semesters of elementary Italian in one, and prepares students to move into Intermediate Italian. Students will develop their Italian communicative competence through listening, (interactive) speaking, reading and (interactive) writing. The Italian language will be used for real-world purposes and in meaningful contexts to promote intercultural understanding. This course is especially recommended for students who already know another Romance language. May be used toward fulfillment of the language requirement.

ITAL UN3311 Advanced Conversation. 2 points.

Prerequisites: *ITAL UN2222* or sufficient fluency to satisfy the instructor.

Corequisites: Recommended: *ITAL V3335x-V3336y*.

Conversation courses may not be used to satisfy the language requirement or fulfill major or concentration requirements. Practice in the spoken language through assigned topics on contemporary Italian culture.

ITAL UN1312 Advanced Conversation II. 2 points.

Prerequisites: *ITAL UN2102* or sufficient fluency to satisfy the instructor.

Conversation courses may not be used to satisfy the language requirement or fulfill major or concentration requirements. This course is designed for students who have attended four semesters of Italian language, mastered the grammatical structure of the language and are ready to expand and enlarge their language skills. A particular emphasis will be put on oral production, on listening and on reading: in class and at home the students will analyze various kinds of text and genres.

In-class time is dedicated to speaking and practicing Italian through a combination of group-based and individual activities, focusing on a wide range of contemporary cultural themes through the use of varied materials such as newspaper articles, advertising material and short film clips. We will focus also on grammatical structures, language functions and activities to expand the vocabulary

ITAL UN3333 Introduction To Italian Literature, I. 3 points.

Prerequisites: Intermediate Italian II *ITAL UN2102* or the equivalent.

UN3334x-UN3333y is the basic course in Italian literature.

UN3333: This course, entirely taught in Italian, introduces you to Medieval and early modern Italian literature. It will give you the opportunity to test your ability as a close-reader and discover unusual and fascinating texts that tell us about the polycentric richness of the Italian peninsula. We will read poems, tales, letters, fiction and non-fiction, travel writings and political pamphlets. The great “Three Crowns” - Dante, Petrarca and Boccaccio - as well as renowned Renaissance authors such as Ludovico Ariosto and Niccolò Machiavelli, will show us the main path to discover Italian masterpieces and understand the European Renaissance. But we will also explore China with Marco Polo and the secrets of the Medieval soul diving into the mystical poems by Jacopone da Todi. We will study parody and laughter through the “poesia giocosa” (parodic poetry) by Cecco Angiolieri and the legacy of Humanism through the letters of Poggio Bracciolini. This first overview will allow you to explore Italian literature from its complex and multicultural beginnings to its diffusion across Europe during the Renaissance.

ITAL UN3337 Advanced Italian Through Cinema. 3 points.

Prerequisites: *ITAL UN3335*

Students will develop advanced language competence while analyzing and discussing Italian film comedies and their reflection of changing Italian culture and society. Films by Monicelli, Germi, Moretti, Wertmuller, Soldini and others.

Fall 2020: ITAL UN3337

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ITAL UN3339 Learning Italian in Class and Online: A Telecollaboration with Italy. . 3 points.

Prerequisites: (*ITAL UN2102*) *ITAL UN2102* or the equivalent. If you did not take *Intermediate Italian* at Columbia in the semester preceding the current one, you must take the placement test, offered by the Italian Department at the beginning of each semester.

The aim of the course is the intensive practice in the spoken and written language, through topics on current cultural issues assigned for in class and online discussions. Students will learn about current events through a varied selection of written and visual texts such as newspaper articles, authentic videos and in-person interviews. There will be an extensive work on vocabulary and grammar review. The course will be integrated

by an online section, which will allow students to engage with the language and the topics selected, also outside of class. In particular, during the second half of the semester, we will partner with the students of a Master's program in "Teaching Italian to foreigners" at an Italian University, for an unique online exchange program.

At the end of the course, students will have acquired a deeper knowledge of Italian contemporary life and culture, and improved both their written and oral communication skills, within specific socio-pragmatic areas.

Italian is the language of instruction and the use of English is not permitted in class nor during the online lessons.

ITAL UN3642 Road Trips: Travel in Italian Cinema. 3 points.

Explores the representation of national identity in Italian cinema from the Facist era to the present. Examines how both geography and history are used to construct an image of Italy and the Italians. Special focus on the cinematic representation of travel and journeys between North and South. Films by major neo-realist directors (Rossellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Amelio).

ITAL UN3645 Grand Tour in Italy. 3 points.

Prerequisites: Note: Italian is the language of instruction.

Course Description

This course proposes a virtual tour of the country's most famous sites, looking at the ways in which what is local and peculiar, diverse and marginal, contributes its distinctive style and character to the overall unity and uniqueness of Italy.

Each week we consider a different aspect of Italy's richness and variety: from the evolution of its language/s and dialects to its humor; its art and landscapes; the music from ancient times to current pop songs; its cinema and web serials, its cuisine, the contributions of migrants, and much more.

The course is highly interdisciplinary and will assist students in the development of their linguistic and cultural skills, while tracing the origins of most mainstream Italian cultural phenomena, and imparting an awareness of modern Italy's multiculturalism.

CLIA GU3660 Mafia Movies: From Sicily to The Sopranos. 3 points.

Examines representations of the mafia in American and Italian film and literature. Special attention to questions of ethnic identity and immigration. Comparison of the different histories and myths of the mafia in the U.S. and Italy. Readings includes novels, historical studies, and film criticism. Limit 35

ITAL GU4019 TOPICS in MICROHISTORY. 3 points.

In the 1970s and 1980s a group of young Italian historians transformed the methods of historical inquiry and narrative. This class explores the origins, the diffusion, as well as the debate around Italian Microhistory across Europe and the United States. In particular, we will focus on "cultural" and "social" Microhistory and its evolution in Italy, France, and the US. We will read masterpieces such as Carlo Ginzburg's *The Cheese and the Worms*, as well as Nathalie Zemon Davis's *The Return of Martin Guerre*. Also, we will analyze the current application of microhistorical methods to contemporary global history and the genre of biography. Topics include pre-modern popular culture and literacy, minority and marginality, the Inquisition, individual and collective identities, and the relation between the pre-modern Mediterranean, Europe and the world. *In Italian*.

ITAL GU4022 The Qur'an in Europe. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Is the Qur'an translatable? Was the Qur'an translated? Are non Arabic-speaking Muslims allowed to translate the Qur'an? And what about non-Muslims? Did Muslims and non-Muslims collaborate in translating the text of the Qur'an into Latin and European vernaculars? This course focuses on the long history of the diffusion of the Qur'an, the Scripture of the Muslims, and one of the most important texts in the history of humanity. We will focus on reading and translation practices of the Qur'an in Europe and the Mediterranean, from the Middle Ages to the contemporary world. We will explore how European Muslims, such as Iberian *moriscos*, European Jews, as well as Orthodox, Protestants and Catholics read, copied, collected, translated and printed the Qur'an. We will also explore why the Qur'an was confuted, forbidden, burned and even eaten, drunk and worn along eight centuries of the history of Europe. This long excursus, based on a close reading of the Qur'an and on the discussion of the major themes this close reading proposes, will help us to understand the role of Islam and its revelation in the formation of European societies and cultures.

ITAL GU4043 Italian Renaissance Literature and Culture. 3 points.

This course on Italian Renaissance literature and culture will pay special attention to the crossing of boundaries, whether socio-cultural, religious, linguistic, gendered, ethnic, or strictly geographical, in a range of fourteenth- to early seventeenth-century texts in a variety of genres, including travelogue, chivalric epic poetry, comedy, dialogues, and the novella, as well as political, philosophical, and scientific writing. Authors covered include Marco Polo, Leonardo Bruni, Pico della Mirandola, Boiardo, Ariosto, Machiavelli Castiglione, Beolco, Giraldo Cinzio, Tasso, Moderata Fonte, Tarabotti, and Galileo. *In English.*

ITAL GU4055 Anthropology of Contemporary Italy: Pluralism, Creativity and Identity. 3 points.

This seminar examines ways in which Italy is understood and represented by Italians and non-Italians. It will analyze the formation of multiple discourses on Italy, how Italian culture and society are imagined, represented and/or distorted. Based on an anthropological perspective, this course will examine ways in which we can understand Italy through the intersections of pluralism, ethnicity, gender, and religion. The course will study how Italy strives for political and economic unity, while there is a concurrent push toward inequality, exclusion, and marginalization. Moreover, the course will analyze the revitalization of nationalism on one hand of regionalism on the

other, and will focus on the concepts of territory, identity, and tradition. Short videos that can be watched on computer and alternative readings for those fluent in Italian will be assigned. There are no pre-requisites for this course.

ITAL GU4185 The Making of Italy: The Risorgimento in Global Context. 3 points.

Prerequisites: Knowledge of Italian is necessary for this course. This course will examine the history of the Italian Risorgimento by following the major historiographical trends of the recent decades. First, it will approach the Risorgimento through the prism of cultural and intellectual history by investigating a series of topics, such as the discursive patterns of the 'Risorgimento canon', the gendered tropes of nationalism, the creation of a new public sphere through operas, festivals and plebiscites, the connection of nationalism with religion, and the relation of empire to nation and liberalism. Second, it will look at the Risorgimento through the eyes of local and regional history by examining local patriotisms, revolutions and civil wars and the division between North and South. Finally, it will offer a new topography of Italian history by placing the Risorgimento in its Mediterranean and global context and by exploring its international aspects: the global icons that it produced (i.e. Garibaldi, Mazzini); the networks of exiles in other Mediterranean and European countries; the war volunteers; and the connection of Italian patriots with the wave of liberalism and revolution that swept the globe from India to Latin America.

ITAL GU4057 ANTHROPOLOGY OF ITALIAN FOOD, FASHION, & DESIGN. 3 points.

Not offered during 2020-21 academic year.

This colloquium examines the many meanings of food, fashion, designs, trends, and style, especially in Italian culture and tradition; how values and peculiarities are transmitted, preserved, reinvented, and rethought through a *lens* that is internationally known as "Made in Italy"; how the symbolic meanings and ideological interpretations are connected to creation, production, and consumption of goods. Based on an anthropological perspective and framework, this interdisciplinary course will analyze ways in which we can understand the 'Italian style' through the intersections of many different levels: political, economic, aesthetic, symbolic, religious, etc. The course will study how fashion, food, and design can help us understand the ways in which tradition and innovation, creativity and technology, localism and globalization, identity and diversity, power and body, are elaborated and interpreted in contemporary Italian society, in relation to the European context and a globalized world.

Short videos that can be watched on the computer and alternative readings for those fluent in Italian will be assigned.

ITAL GU4086 Castiglione and the Italian Renaissance Court. 3 points.

Focus on Castiglione's Book of the Courtier as educational treatise, philosophical meditation, sociopolitical document,

and book of courtly manners; other courtly writings of the period, from Della Casa's *Galateo* to Ariosto's *Satires* to Bembo's *Asolani*. Lectures in English; text in Italian, although comparative literature students who can follow with the help of translations are welcome.

ITAL GU4109 Writing the Self: the Tradition of Autobiography in Italy, 19th-20th Centuries. 3 points.

Against the backdrop of the heated critical debate on the boundaries and limitations of the autobiographical genre, this course addresses the modern and contemporary tradition of autobiographical writings, focusing in particular (but not exclusively) on exploring and positing the potential difference between male and female autobiographers. More specifically, we will question the adequacy of the traditional model of autobiographical selfhood based on the assumption of unified, universal, exemplary and transcendent self to arrive at an understanding of women's autobiography. Topics to be addressed include: the crisis of the subject, "je est un autre", the "man" with a movie camera, strategies of concealment and disclosures. Authors to be studied include: D'Annunzio, Pirandello, Svevo, Fellini, Moretti, Ortese, Ginzburg, Manzini, Cialente, Ramondino. *In Italian*

ITAL GU4420 The Window On the World: Reassessing Italian Neorealism. 3 points.

Not offered during 2020-21 academic year.

Roberto Rossellini, Vittorio De Sica, Luchino Visconti and other Italian filmmakers challenged modes of film production in vogue in the 1940s and 1950s, both in theoretical and practical terms. This course will analyze both the feature films and the theoretical writings of such directors as those mentioned and others, in order to investigate the modes of representation of reality in the immediate postwar years, their relation to the identity of the newborn Italian Republic, and their significance in post-WWII filmmaking. All readings and lectures in English; Films in Italian or French, with English subtitles.

CLIA GU4021 The Age of Romanticism Across the Adriatic. 3 points.

Prerequisites: Knowledge of Italian desirable but not necessary. This interdisciplinary seminar will study Romanticism as a literary trend, as much as a historical phenomenon and a life attitude. Romanticism is viewed here as the sum of the different answers to the sense of insecurity, social alienation and loneliness, provoked by the changing and frail world of the end of the eighteenth and the beginning of the nineteenth century. We will investigate the Romantic ideology in relation to the trans-Adriatic world of Italy and Greece, an area that entered modernity with the particular lure and burden of antiquity, as well as through revolutionary upheaval. Students will be invited to read authors like Vittorio Alfieri, Ugo Foscolo, Silvio Pellico, Giacomo Leopardi, Alessandro Manzoni, Massimo d'Azeglio, and to reflect on themes such as Nostalgia and Nationalism, the Discovery of the Middle Ages, the Historical Novel, the Invention of Popular Tradition, the Fragmented Self, Autobiographical and Travel Writing, the Brigand Cult,

Hellenism, Philhellenism, Orientalism and Balkanism, and others.

ITAL GU4502 Italian Cultural Studies I: From Unification to World War I. 3 points.

An interdisciplinary investigation into Italian culture and society in the years between Unification in 1860 and the outbreak of World War I. Drawing on novels, historical analyses, and other sources including film and political cartoons, the course examines some of the key problems and trends in the cultural and political history of the period. Lectures, discussion and required readings will be in English. Students with a knowledge of Italian are encouraged to read the primary literature in Italian.

Fall 2020: ITAL GU4502

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ITAL 4502	001/00300	T Th 10:10am - 11:25am Room TBA	Nelson Moe	3	3/25

ITAL GU4503 Italian Cultural Studies II: From World War I to the Present. 3 points.

An interdisciplinary investigation into Italian culture and society in the years between World War I and the present. Drawing on historical analyses, literary texts, letters, film, cartoons, popular music, etc., the course examines some of the key problems and trends in the cultural and political history of the period. Lectures, discussion and required readings will be in English. Students with a knowledge of Italian are encouraged to read the primary literature in Italian.

HUNGARIAN COURSES

HNGR UN1101 Elementary Hungarian I. 4 points.

Introduction to the basic structures of the Hungarian language. Students with a schedule conflict should consult the instructor about the possibility of adjusting hours.

HNGR UN3340 Advanced Hungarian Grammar. 3 points.

Prerequisites: *HNGR UN2101* or the equivalent.

Advanced Hungarian Grammar focuses on the more complex syntactic/semantic constructions of Hungarian in addition to vocabulary enrichment. Readings in literature, oral presentations, translations, and essays serve to enhance the grammatical material.

HNGR UN3341 Advanced Hungarian II. 3 points.

Prerequisites: *HNGR UN2101 - HNGR UN2102* and *HNGR UN3340*, or the equivalent.

This course has an emphasis on rapid and comprehensive reading of academic materials. In addition to weekly readings, oral presentations and written essays serve to improve fluency in all aspects of Hungarian.

HNGR UN3343 Hungarian Descriptive Grammar. 3 points.

This course is designed for those curious about the structure of Hungarian - an unusual language with a complex grammar quite different from English, or, indeed, any Indo-European language. The study of Hungarian, a language of the Finno-Ugric family, offers the opportunity to learn about the phonology of vowel harmony, the syntax of topic-comment discourse, verb agreement with subjects and objects,

highly developed case systems and possessive nominal paradigms. In addition to its inflectional profile, Hungarian derivation possibilities are vast, combinatory, and playful. During the semester we will touch upon all the important grammatical aspects of Hungarian and discuss them in relation to general linguistic principles and discourse, and finally, through some text analysis, see them in action. Although the primary discussion will center on Hungarian, we will draw on comparisons to other Finno-Ugric languages, most notably Finnish and Komi; students are encouraged to draw on comparisons with their own languages of interest. No prerequisite. Counts as Core Linguistics.

JAZZ STUDIES

The Center for Jazz Studies: Prentis Hall, 4th floor (632 W. 125th Street); 212-851-9270

<http://www.columbia.edu/cu/cjs>

Jazz at Columbia:

<https://mpp.music.columbia.edu/louis-armstrong-jazz-performance-program>

Director: Prof. Robert G. O'Meally, 611 Philosophy; 212-851-9270; rgo1@columbia.edu

Director of Jazz Performance: Prof. Christopher Washburne, 619A Dodge; 212-854-9862; cjw5@columbia.edu

Program Administrator: Yulanda McKenzie, 602 Philosophy; 212-851-9270; ym189@columbia.edu

The special concentration in jazz studies is an interdisciplinary liberal arts course of study that uses jazz music—and the jazz culture from which the music emanated—as a prism through which to study jazz culture during what might be termed the long jazz century, the Sprawling 20's. The curriculum in this new field guides students in developing a firm grounding in the traditions and aesthetic motives of jazz music, viewed through the perspectives of music history and ethnomusicology as well as literary theory and cultural studies.

The program also explores in depth the development of jazz-oriented art works in the music's sister arts—literature, dance, painting, photography, and film. While a U.S. focus is highly appropriate, considering the many ways in which jazz is a definitive music of this nation, students also explore jazz's geographical history beyond these shorelines, including complex, ongoing interactions with Africa, the Caribbean, Europe, and Asia.

The special concentration in jazz studies is designed for music majors as well as for those majoring in other fields. The main difference between music majors and non-music majors is that while music majors take advanced courses in arranging, composition, and transcription, non-music majors are required to take an introduction to music fundamentals.

While there are some fields where the fit with jazz studies is very obvious—music, American studies, African-American studies, English, comparative literature, and history—special concentrators can major in any field whatsoever. Is there a jazz or improvisatory philosophy? What might be its relation to studies of aesthetics or American pragmatism? And what are jazz's implications for the student of law? How does one protect the intellectual property rights of an improvised jazz solo? What about business? What economic and political forces have shaped jazz? Who buys jazz? What is its audience? What is a jazz painting? A jazz novel? What is jazz poetry? What is jazz dance? What is a jazz film? What are the sources and meanings of art? What work does the music do for the whole community?

Along with problems of musical history, form, and definition, our special courses explore jazz as a culture. Students not only study individual jazz artists but also explore the immeasurably variegated worlds through which such artists moved, and which they helped to shape. As cultural historians-in-training—focused on questions of nationality, race, sexuality, gender, economics, and politics—students explore the extraordinarily complicated terrains of the New Orleans of Bunk Johnson, for example, or the Baltimore of Billie Holiday (born in Philadelphia, reared in Baltimore). They explore such artists' other geographical travels. What did their images, including mistaken conceptions of who they were, tell us about the cultures that mythologized them?

How did these jazz musicians influence not only musicians but other artists of their era and milieu: the poets and novelists, painters and sculptors, photographers and filmmakers, dancers and choreographers who regularly heard them play and often shared with them a sense of common project?

One thinks of Tito Puente, working with singers and dancers at the Palladium; Jackson Pollack dancing to the music as he spun drips of paints on canvasses placed on the studio floor; Langston Hughes writing detailed instructions to the musicians he hoped would accompany performance of his poetry; Romare Bearden's beautifully turned stage and costume designs for Alvin Ailey and Dianne McIntyre, whose improvisatory jazz dance workshop was called *Sound in Motion*; the drummer Jo Jones in an interview naming as key influences a series of tap dancers he admired; Stanley Crouch, stirring in his high-powered essays in a room where jazz drums stand at the center, the old dream-kit inspiration; Ralph Ellison, who kept in touch with his beginnings as a musician in Oklahoma City through hour-long conversations with his childhood friend, the singer Jimmy Rushing; Toni Morrison reading her magical prose to improvisations by Max Roach and the dancer Bill T. Jones;

and the pianist Jason Moran playing at the Studio Museum in Harlem, where he introduced his group as including Beauford Delany, whose paintings hung on the wall near the bandstand—vigorous all and recall across the art forms.

Perhaps above all, the special concentration in jazz studies is designed to prepare students to be well-prepared and flexible improvisers in a universe of change and possibility.

GUIDELINES FOR ALL JAZZ STUDIES SPECIAL CONCENTRATORS

Students interested in a special concentration in jazz studies should speak with the director no later than the fall semester of the sophomore year.

In addition to the requirements of the special concentration, students must complete a major or a full concentration. Students interested in declaring a special concentration in jazz studies will be assigned an adviser. The program of study is to be planned with the adviser as early as possible.

SPECIAL CONCENTRATION IN JAZZ STUDIES

Please read *Guidelines for all Jazz Studies Special Concentrators* above.

The special concentration in jazz studies requires a total of seven courses (22 points minimum), distributed as follows:

Requirements for Non-Music Majors/ Concentrators

ENGL GU4612	Jazz and American Culture
MUSI UN2016	Jazz
MUSI UN1002	FUNDAMENTALS OF MUSIC
Three interdisciplinary courses as approved by the director	
A senior independent study project	

Requirements for Music Majors/ Concentrators

ENGL GU4612	Jazz and American Culture
MUSI UN2016	Jazz
MUSI GU4505	Jazz Arranging and Composition
MUSI GU4500	Jazz Transcription and Analysis
MPP UN1541	Columbia University Jazz Ensemble

Private music lessons (strongly recommended but not required)

Three interdisciplinary courses as approved by the director

A senior independent study project

JAZZ GU4900 Jazz and the Literary Imagination. 3 points.

(Lecture). This course will focus on the ways that jazz has been a source of inspiration for a variety of twentieth-century literatures, from the blues poetry of the Harlem Renaissance to contemporary fiction. We will consider in detail the ways that writers have discovered or intuited formal models and political implications in black music. Rather than simply assume that influence only travels in one direction, we will also take up some literary efforts (including autobiography, poetry, historiography, and criticism) by musicians themselves. What are the links between musical form and literary innovation? How can terms of musical analysis (improvisation, rhythm, syncopation, harmony) be applied to the medium of writing? How does music suggest modes of social interaction or political potential to be articulated in language? How does one evaluate the performance of a poem (in an oral recitation or musical setting) in relation to its text? Materials may include writings and recordings by Jacques Attali, James Weldon Johnson, Langston Hughes, Louis Armstrong, Zora Neale Hurston, Sterling Brown, Kurt Schwitters, Ralph Ellison, Amiri Baraka, Ella Fitzgerald, William Melvin Kelley, Edward Kamau Brathwaite, Gayl Jones, Michael Ondaatje, Ed Pavlic, Joseph Jarman, Nathaniel Mackey, and Harryette Mullen, among others. Requirements: weekly response papers, a 5-7 pg. midterm paper and a 9-12 pg. final paper.

JAZZ GU4920 Jazz and Cinema. 3 points.

Because the beginnings of jazz and film both date to the last years of the nineteenth century, the two art forms essentially grew up together. The history of both is inseparable from the technological revolutions of the twentieth century,

and at least in the United States, from histories of racial representation. We will explore the racial issues raised by American films along with how filmmakers represent gender, American humor, discourses of art and the popular, and the conventions of narrative. We will pay special attention to how all of this changes dramatically throughout the twentieth and early twenty-first centuries. After establishing what is most American about jazz and cinema, we will move on to documentary films as well as to films from Europe where many of the dominant American myths about jazz are both perpetuated and transformed. The goal of the course is to understand jazz as a music as well as a cultural practice that has been in constant flux during the last 120 years. The representation of the music and its practitioners in cinema is crucial to an understanding of the music at each of its many cultural moments.

JEWISH STUDIES

Program Office: Institute for Israel and Jewish Studies, 617 Kent Hall; 212-854-2581; <http://www.iijs.columbia.edu/>

Program Director: Prof. Elisheva Carlebach, 505 Fayerweather; 212-854-5294; ec607@columbia.edu

Assistant Director: Dana Kresel, 619 Kent Hall; 212-854-4006; drk2106@columbia.edu

The academic discipline of Jewish studies is an interdisciplinary field centered on the analysis and investigation of Jewish history, religion, language, and literature. The discipline ranges from the study of Jews and Judaism in antiquity to the present day. It explores Judaism not only as a religion, but as a civilization and culture.

A special concentration in Jewish studies is available for undergraduates and allows students to draw upon classes in a wide range of departments across the University, including History; Sociology; Middle Eastern, South Asian, and African Studies; Germanic Languages and Literature; and Religion. The requirements for the special concentration are designed to provide students with the interdisciplinary knowledge necessary to study Jewish civilization both broadly and deeply.

The roots of Judaism lie deeper than one region, gender, language, or culture; and by studying the interconnectedness of these areas, the depth of understanding across a range of spheres and disciplines greatly increases. The special concentration in Jewish studies enhances the current scholarly programs, adding to current Jewish studies courses' vitality as students come to each course with a deeper understanding and background based on their complementary coursework.

Students wishing to complete a special concentration in Jewish studies work with a program adviser to decide upon course selection and sequencing. The program office provides and keeps on record a planning form to track the fulfillment of requirements for the special concentration.

AFFILIATED FACULTY

Beth Berkowitz (Religion, Barnard)
 Clemence Boulouque (Religion)
 Elisheva Carlebach (History)
 Yinon Cohen (Sociology)
 Jeremy Dauber (Germanic Languages)
 Rebecca Kobrin (History)
 Agnieszka Legutko (Germanic Languages)
 Seth Schwartz (History)
 Michael Stanislawski (History)

SPECIAL CONCENTRATION IN JEWISH STUDIES

In addition to the requirements of the special concentration, students must complete a major or a full concentration.

For a special concentration in Jewish studies, students are required to complete a minimum of 21 points. Please note:

- At least one course must be taken from each of three of the focus areas listed below.
- Credits for language courses may constitute at most 10 points, and one year of Hebrew or Yiddish language is strongly recommended.

- A minimum of 18 points must be taken at Columbia or as part of an approved study abroad program (unless equivalent courses are not offered at Columbia, as determined by the faculty adviser).

The focus areas and courses listed below are examples and do not include all the potential courses which may count. Additionally, as new courses are introduced, new focus areas may develop. Some courses may fall under multiple headings. Determination of a course's focus area is at the discretion of the faculty adviser.

Focus Areas

Bible and Rabbis/Ancient Judaism

RELI V3512	The Bible and Its Interpreters
RELI GU4637	Talmudic Narrative
RELI W4520	Patriarchal and Rabbinic Authority in Antiquity

LANGUAGE RESOURCE CENTER

Office: 353 International Affairs Building; 212-854-9224
<http://www.lrc.columbia.edu/>

Director: Dr. Stéphane Charitos, 353 International Affairs Building; 212-854-6341; sc758@columbia.edu

Associate Director: Piero di Porzio, 353 International Affairs Building; 212-854-3326; pdp@columbia.edu

Hours of Operation: Monday-Friday, 9 a.m.–5 p.m.

The Language Resource Center supports students throughout the course of their language study at Columbia. The LRC provides flexible physical and virtual spaces for language learning, facilitates access to resources, and connects students to language-related opportunities at Columbia and beyond. The LRC is also home to the Shared Course Initiative, which uses specialized distance classrooms for sharing several languages between Columbia, Cornell, and Yale universities. For more information on language learning at Columbia, visit lrc.columbia.edu.

AKKADIAN

All Akkadian courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

AKAD UN1101 Elementary Akkadian I. 3 points.

Introduction to cuneiform script and to the Akkadian language, with emphasis on grammatical structure.

AKAD OC1101 Elementary Akkadian I. 3 points.

Introduction to cuneiform script and to the Akkadian language, with emphasis on grammatical structure.

Fall 2020: AKAD OC1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AKAD 1101	001/13601	M 11:00am - 1:45pm Online Only	Ronald Wallenfels, Stephane Charitos	3	2/6

AKAD UN1102 Elementary Akkadian II. 3 points.

Introduction to cuneiform script and to the Akkadian language, with emphasis on grammatical structure.

AKAD OC1102 Elementary Akkadian II. 3 points.

Introduction to cuneiform script and to the Akkadian language, with emphasis on grammatical structure.

Spring 2021: AKAD OC1102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AKAD 1102	001/15045	M 11:00am - 1:45pm Online Only	Ronald Wallenfels, Stephane Charitos	3	1/5

AKAD UN2101 Intermediate Akkadian I. 3 points.

Prerequisites: AKAD UN1101 and AKAD UN1102 or the instructor's permission.
 Readings in Akkadian literature.

AKAD UN2102 Intermediate Akkadian II. 3 points.

Further readings in Akkadian literature

ANCIENT EGYPTIAN

All Ancient Egyptian courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

EGYP UN1102 INTRO-ANCIENT EGYPTIAN LANG II. 4 points.

Introduction to hieroglyphics; readings in ancient Egyptian texts.

EGYP UN2101 Advanced Ancient Egyptian I. 3 points.

Corequisites: *EGYP W1101-W1102* or the instructor's permission.

Advanced readings in ancient Egyptian texts.

EGYP UN2102 Advanced Ancient Egyptian II. 3 points.

Corequisites: *EGYP W1101-W1102* or the instructor's permission.

Advanced readings in ancient Egyptian texts.

ARAMAIC

All Aramaic courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

ARAM UN1101 Elementary Aramaic I: Biblical Aramaic. 3 points.

Prerequisites: one year of classical Hebrew or the equivalent. Introduction to the various phases of Aramaic. Readings are selected from early and imperial documents, including Elephantine and inscriptions.

ARAM UN1102 Elementary Aramaic II: Qumran Aramaic. 3 points.

Prerequisites: students are encouraged but not required to take *ARAM W1101* prior to enrolling in *ARAM W1102*.

Introduction to Aramaic documents found at Qumran and contemporary sites. This represents the intermediate phase of Aramaic and Bar Kokhba texts.

ARAM UN2101 Intermediate Aramaic I (Syriac Aramaic). 3 points.

Introduction to sources preserved by the early Christian communities of the ancient and medieval Near East in Syriac.

BENGALI**BENG UN1101 Elementary Bengali I. 4 points.**

Introductory courses to Bengali, a major language of northeast India and Bangladesh.

Fall 2020: BENG UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

CANTONESE

CANT UN1101 Elementary Cantonese I. 4 points.

This course introduces students to both the spoken and written Cantonese language, with achieving conversational proficiency being a primary goal. The course emphasizes oral expressions, listening comprehension, and grammar. It is designed to give beginning students a practical command of the language. Upon completion of the course, students can expect to converse in simple sentences, and recognize and write about 350 Chinese characters. Students with passable conversation ability or native speakers from Cantonese-speaking communities should not enroll in this course. **Note:** This course is part of the language exchange program with New York University (NYU). Classes will be held at NYU.

CANT OC1101 Elementary Cantonese I. 4 points.

This course introduces students to both the spoken and written Cantonese language, with achieving conversational proficiency being a primary goal. The course emphasizes oral expressions, listening comprehension, and grammar. It is designed to give beginning students a practical command of the language. Upon completion of the course, students can expect to converse in simple sentences, and recognize and write about 350 Chinese characters. IRISH

All Irish courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

IRSH UN1101 Elementary Irish I. 4 points.

This course introduces students to the rudiments of the Irish language, including phonemes and pronunciation, syntactical structure, and verbal conjugations. In addition, a history of the language is provided, as well as a general introduction to Irish culture, including discussions of family and place names. Students are encouraged to begin speaking with basic sentence structures, eventually expanding into more complex verbal conjugations while concentrating on idiomatic expressions. The accumulation of vocabulary is stressed and students are introduced to basic literature in Irish while developing beginning conversational fluency.

KHMER

KHMR UN1101 Elementary Khmer I. 4 points.

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Khmer, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

KHMR OC1101 Elementary Khmer I. 4 points.

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Khmer, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. KHMR UN2101 Intermediate Khmer I. 4 points.

Prerequisites: *KHMR W1101-W1102* or the instructor's permission.

In this course, learners will continue practicing all four language skills through every day dialogues, writing letters, and describing basic situations. In addition, they will be introduced to Khmer literature and learn how to read and comprehend basic Khmer texts, such as newspaper articles. Finally, they will be introduced to current affairs as well as social, artistic, and cultural events and issues in Cambodia. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by

videoconferencing from Cornell as part of the Shared Course Initiative.

KHMR UN2102 Intermediate Khmer II. 4 points.

This course focuses on learning Khmer (the national language of Cambodia) for students who have completed Intermediate Khmer I. Students will be able to communicate in every day conversation using complex questions/answers. The course focuses on reading, writing, speaking, and listening to Khmer words, long sentences, and texts. The course is also emphasized on grammar, sentence structure and their use in the right context. This course is applied to persons who want to continue to learn Khmer and want to pursue the language study in the future.

KREYOL

KREY UN1101 Elementary Haitian Kreyol I. 4 points.

This course introduces students to the language of Haitian Kreyòl, also called Creole, and is intended for students with little or no prior knowledge of the language. Haitian Kreyòl is spoken by Haiti's population of nine million and by about one million Haitians in the U.S. Including over 190,000 in the New York City area. In fact, New York City has the second largest population of Kreyòl Speakers after Port-au-Prince, Haiti's capital. Through this course, you will develop introductory speaking, reading, and writing skills. We use a communicative approach, balanced with grammatical and phonetic techniques. Classroom and textbook materials are complemented by work with film, radio, and especially music (konpa, rasin, twoubadou, rap, raga, levanjil, vodou tradisyonèl, etc.), as well as with visits to city museums and institutions related to Haiti. **Note:** This course is part of the language exchange program with New York University (NYU). Classes will be held at NYU.

QUECHUA

All Quechua courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

QUCH UN1101 Elementary Quechua I. 4 points.

Quechua is the most important and most widely-distributed indigenous language in South America, with over 10 million speakers living from the high mountains to the tropical lowlands in Colombia, Ecuador, Peru, Bolivia, Chile, and Argentina. Those who speak it call the language runa simi or runa shimi, "human speech." It was the principal language of the Inca empire and the key language of cultural interaction during the colonial era. Quechua has remained central to indigenous peoples' efforts to preserve their cultural autonomy. It has gained greater force in recent years, during which indigenous movements have swept Quechua speakers into national politics, where they have succeeded in transforming constitutions to recognize cultural diversity, making Quechua an official language of state, and successfully promoting schooling in the language. Students who satisfactorily complete Elementary Quechua I and II will be well-prepared for intensive summer study at one of many summer study abroad programs in Ecuador, Peru, and Bolivia that will put them in closer contact with the indigenous world.

QUCH OC1101 Elementary Quechua I. 4 points.

ROMANIAN

RMAN UN1102 Elementary Romanian II. 4 points.

Provides students with an introduction to the basic structures of the Romanian language.

RMAN UN2101 Intermediate Romanian I. 4 points.

Prerequisites: *RMAN W1101-W1102* or the instructor's permission.

Further explores the grammatical and linguistic structures of the Romanian language.

Fall 2020: RMAN UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RMAN 2101	001/12225		Mona Momescu	4	0/15

RMAN UN2102 Intermediate Romanian II. 4 points.

Prerequisites: *RMAN W1101-W1102* or the instructor's permission.

Further explores the grammatical and linguistic structures of the Romanian language.

RMAN GU4002 Romanian Culture, Identity and Complexes. 3 points.

This course addresses the main problems that contribute to the making of Romanian identity, as fragmented or as controversial as it may seem to those who study it. The aim is to become familiar with the deepest patterns of Romanian identity, as we encounter it today, either in history, political studies, fieldwork in sociology or, simply, when we interact with Romanians. By using readings and presentations produced by Romanian specialists, we aim to be able to see the culture with an "insider's eye", as much as we can. This perspective will enable us to develop mechanisms of understanding the Romanian culture and mentality independently, at a more profound level and to reason upon them.

RMAN GU4003 Byzantine and Post-Byzantine Elements of Romanian Culture. 3 points.

Prerequisites: Reading knowledge of Romanian and French ...The Byzantine as "post-Romantic", as "eclectic", "Oriental", in its version of localized, picturesque, intra-European Orientalism appears less explored and probably less considered of importance when trying to understand the intricacies of a culture and, by expanding it, of culture in general. Our explorations of Byzantine/Byzantinism will help us develop

a subtler understanding of the mechanisms of the cultural equation West/Orient and of the cultural hierarchies....

SINHALA

SINH UN1101 Elementary Sinhala I. 4 points.

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Sinhala, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video – both prepared and student-produced – and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

UZBEK

UZBK UN1101 Elementary Uzbek I. 4 points.

Not offered during 2020-21 academic year.

This course offers students an introduction to the basic structures of Uzbek, a major language of Central Asia.

UZBK UN1102 Elementary Uzbek II. 4 points.

Not offered during 2020-21 academic year.

This course offers students an introduction to the basic structures of Uzbek, a major language of Central Asia.

UZBK UN2101 Intermediate Uzbek I. 4 points.

Not offered during 2020-21 academic year.

Prerequisites: *UZBK W1101-W1102* or the instructor's permission.

This course further develops a student's knowledge of Uzbek, a major language of Central Asia.

UZBK UN2102 Intermediate Uzbek II. 4 points.

Not offered during 2020-21 academic year.

Prerequisites: *UZBK W1101-W1102* or the instructor's permission.

This course further develops a student's knowledge of Uzbek, a major language of Central Asia.

YORUBA

YORU UN1101 Elementary Yoruba I. 4 points.

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Yoruba, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video – both prepared and student-produced – and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

Fall 2020: YORU UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
YORU 1101	001/11972	M T W Th 10:10am - 11:00am Online Only	Stephane Charitos	4	4/15

YORU UN1102 Elementary Yoruba II. 4 points.

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Yoruba, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video – both prepared and student-produced – and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

YORU UN2101 Intermediate Yoruba I. 4 points.

Prerequisites: *YORU W1101-W1102* or the instructor's permission.

In this course, learners will continue practicing all four language skills through every day dialogues, writing letters, and describing basic situations. In addition, they will be introduced to Yoruba literature and learn how to read and comprehend basic Yoruba texts, such as newspaper articles. Finally, they will be introduced to current affairs as well as social, artistic and, cultural events and issues in Nigeria. The class uses a highly interactive classroom style, supplemented by extensive use of video – both prepared and student-produced – and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

Fall 2020: YORU UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
YORU 2101	001/11973	M T W Th 9:10am - 10:00am Online Only	Stephane Charitos	4	7/15

YORU UN2102 Intermediate Yoruba II. 4 points.

Prerequisites: *YORU W1101-W1102* or the instructor's permission.

In this course, learners will continue practicing all four language skills through every day dialogues, writing letters, and describing basic situations. In addition, they will be introduced

to Yoruba literature and learn how to read and comprehend basic Yoruba texts, such as newspaper articles. Finally, they will be introduced to current affairs as well as social, artistic and, cultural events and issues in Nigeria. The class uses a highly interactive classroom style, supplemented by extensive use of video – both prepared and student-produced – and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

ZULU

All Zulu courses are offered by video-conferencing from Yale as part of the Shared Course Initiative.

ZULU UN1101 Elementary Zulu I. 4 points.

Introduces students to the basic structures of Zulu, a Bantu language spoken in South Africa, especially in the Zululand area of KwaZulu/Natal province.

Fall 2020: ZULU UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ZULU 1101	001/11975	M T W Th 11:35am - 12:25pm Online Only	Stephane Charitos	4	0/15

ZULU UN1102 Elementary Zulu II. 4 points.

Prerequisites: *ZULU W1201-W1202* or the instructor's permission.

Introduces students to the basic structures of Zulu, a Bantu language spoken in South Africa, especially in the Zululand area of KwaZulu/Natal province.

Spring 2021: ZULU UN1102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ZULU 1102	001/12809	M T W Th 11:35am - 12:25pm Online Only	Stephane Charitos	4	0/12

ZULU UN2101 Intermediate Zulu I. 4 points.

Prerequisites: *ZULU W1201-W1202* or the instructor's permission.

Provides students with an in-depth review of the essentials of the Zulu grammar. Students are also able to practice their language skills in conversation.

Fall 2020: ZULU UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ZULU 2101	001/11976	M T W Th 9:25am - 10:15am Online Only	Stephane Charitos	4	1/15

ZULU UN2102 Intermediate Zulu II. 4 points.

Prerequisites: *ZULU W1201-W1202* or the instructor's permission.

Provides students with an in-depth review of the essentials of the Zulu grammar. Students are also able to practice their language skills in conversation.

Spring 2021: ZULU UN2102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ZULU 2102	001/12810	M T W Th 9:00am - 9:50am Online Only	Stephane Charitos	4	1/12

ZULU UN3101 Advanced Zulu I. 3 points.

Prerequisites: *ZULU W1201-W1202* or the instructor's permission.

This course allows students to practice advanced structures of the Zulu language. Please note this course is offered by videoconference from Yale through the Shared Course Initiative.

Fall 2020: ZULU UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ZULU 3101	001/11977			3	0/15

ZULU UN3102 Advanced Zulu II. 3 points.

Prerequisites: *ZULU W1201-W1202* or the instructor's permission.

This course allows students to practice advanced structures of the Zulu language. Please note this course is offered by videoconference from Yale through the Shared Course Initiative.

Spring 2021: ZULU UN3102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ZULU 3102	001/12811			3	0/12

LATIN AMERICAN AND CARIBBEAN STUDIES

The Institute of Latin American Studies: 8th Floor, International Affairs Building; 212-854-4643
<http://ilas.columbia.edu>

Program Director: Prof. M. Victoria Murillo, 832 International Affairs Building; mm2140@columbia.edu

Senior Manager of Business & Student Affairs: Eliza Kwon-Ahn, 827 International Affairs Building; ek2159@columbia.edu

The major in Latin American and Caribbean Studies stresses knowledge of a dynamic, historically deep and extensive region, but it also focuses on social, political, and cultural phenomena that transcend physical boundaries. The major thus reflects multidisciplinary dialogues that are transnational yet remain anchored in the common historical experience of Latin American societies. Thanks to the broad range of courses on Latin America offered in different departments of instruction and centers at Columbia, the major provides a multidisciplinary training on politics, history, culture, economy and society.

The Institute of Latin American Studies coordinates the major and offers access to research support, study abroad options, and linkages and credits toward the M.A. program in Latin American and Caribbean studies.

GUIDELINES FOR ALL LATIN AMERICAN AND CARIBBEAN STUDIES MAJORS AND CONCENTRATORS

Declaring the Major or Concentration

For additional information on Latin American and Caribbean Studies, please visit the Institute's [website](#) or contact Eliza Kwon-Ahn, Senior Manager of Business & Student Affairs, at ek2159@columbia.edu. Please note: major and concentration requirements were updated November, 2019.

MAJOR IN LATIN AMERICAN AND CARIBBEAN STUDIES

The major requires a minimum of 31 points as follows:

Select five of the following twelve courses:

HIST UN1786	History of the City in Latin America
HIST UN2618	The Modern Caribbean
HIST UN2660	Latin American Civilization I
HIST UN2661	LATIN AMERICAN CIVILIZATION II
HIST BC2664	Reproducing Inequalities: Families in Latin American History
HIST BC2676	Latin America: Migration, Race, and Ethnicity
HIST BC2681	Women and Gender in Latin America

LACV UN1020	Primary Texts of Latin American Civilization
POLS W3560	
POLS UN3565	Drugs and Politics in the Americas
POLS GU4461	Latin American Politics
SPAN UN3300	Advanced Language through Content [in Spanish]

***** The SPAN UN3300 section taken for the Major must focus on Latin America. Please contact the ILAS Student Affairs Coordinator for details.**

Language Requirement

Select one course on Spanish, Portuguese, or an indigenous language at the intermediate or advanced level; if students can demonstrate advance knowledge of one of these languages, they can replace this course with an area studies course.

Discipline of Choice

Select four courses in a discipline or theme of choice with substantive focus on Latin America. One of these courses must be a seminar. All students, however, need to take at least two courses in a discipline or theme outside of their specialization. The director of undergraduate studies advises students on areas of specialization and must approve courses with substantial Latin American or Caribbean contents not included in the list of eligible courses.

Up to 12 credits for Discipline of Choice requirement can be earned through study abroad. Students are encouraged to explore study abroad options before their junior year. Upon return, they should submit the syllabi and all coursework related to each course taken abroad for approval by the director of undergraduate studies.

CONCENTRATION IN LATIN AMERICAN AND CARIBBEAN STUDIES

The concentration requires a minimum of 18 points as follows:

Select three of the following twelve courses:

HIST UN1786	History of the City in Latin America
HIST UN2618	The Modern Caribbean
HIST UN2660	Latin American Civilization I
HIST UN2661	LATIN AMERICAN CIVILIZATION II
HIST BC2664	Reproducing Inequalities: Families in Latin American History
HIST BC2676	Latin America: Migration, Race, and Ethnicity
HIST BC2681	Women and Gender in Latin America
LACV UN1020	Primary Texts of Latin American Civilization
POLS W3560	
POLS UN3565	Drugs and Politics in the Americas

POLS GU4461	Latin American Politics
SPAN UN3300	Advanced Language through Content [in Spanish]

***** The SPAN UN3300 section taken for the Concentration must focus on Latin America. Please contact the ILAS Student Affairs Coordinator for details.**

Language Requirement

lba2133@columbia.edu

The Department of Latin American and Iberian Cultures (LAIC) at Columbia, located in the Casa Hispánica, has long enjoyed an international reputation as a center for Hispanic and Lusophone studies. The department provides linguistic preparation in Spanish, Portuguese, and Catalan, and offers a flexible program to study manifestations of the Hispanic and Lusophone worlds in all historical periods—from the medieval to the globalized present—and in a variety of cultural contexts: the Iberian Peninsula, Latin America, the former colonies of Portugal, and the United States.

Students can enter the program at any level of linguistic and cultural preparedness. The department offers a placement exam to determine the level at which students may either begin or continue study. Majors and concentrators in Hispanic studies and Portuguese studies are typically double majors who bring insights and methods from fields such as history, political science, women's studies, anthropology, economics, Latino studies, Latin American studies, etc., which fosters engaging discussions.

ACADEMIC PROGRAMS

The department offers two majors. The major in Hispanic studies gives students a well-rounded preparation in the history and culture of the Hispanic world. The second option, a major in Hispanic studies with specialization, allows students to study the Hispanic world through a number of fields, among them Latin American studies, gender studies, political science,

economics, history, and sociology. The department also offers two concentrations: Hispanic studies and Portuguese studies.

The language and major programs have also been designed in close consultation and cooperation with Barnard's Department of Spanish and Latin American Cultures. All courses taken in one program may be used to fulfill the requirements of the other. Hence, Columbia and Barnard students may move freely between departments of both institutions for courses that best fit their intellectual interests and schedules.

ADVANCED PLACEMENT

The department grants 3 credits for a score of 5 on the AP Spanish Language exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3300-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in Spanish. Courses taught in English may not be used for language AP credit.

The department grants 0 credits for a score of 4 on the AP Spanish Language exam, but the foreign language requirement is satisfied.

The department grants 3 credits for a score of 5 on the AP Spanish Literature exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3300-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in Spanish. Courses taught in English may not be used for language AP credit.

The department grants 0 credits for a score of 4 on the AP Spanish Literature exam, but the foreign language requirement is satisfied.

STUDY ABROAD

The department strongly recommends that all Hispanic and Portuguese studies majors/concentrators study abroad. Most courses taken abroad can be used to fulfill the requirements for the major and concentration, and with adequate planning, even some of the requirements for a second major or concentration. A maximum of four (4) courses taken abroad may be applied to the major, and a maximum of three (3) to the concentration in Hispanic or Portuguese studies.

All students are strongly advised to take either SPAN UN3349 Hispanic Cultures I: Islamic Spain through the Colonial Period or SPAN UN3350 Hispanic Cultures II: Enlightenment to the Present before studying abroad. Actual or potential majors and concentrators in Hispanic or Portuguese studies should seek tentative approval of their programs from the director of undergraduate studies before their departure.

INTERNSHIPS

The department maintains an updated list of internship resources and volunteer opportunities in New York City, the

United States, and abroad. No academic credit is given for internships.

THE HISPANIC INSTITUTE

The department hosts the Hispanic Institute at Columbia. Founded in 1920 as the Instituto de las Españas, the Institute sponsors and disseminates research on Hispanic and Luso-Brazilian culture. Since 1934, the Institute has published the *Revista Hispánica Moderna*, a distinguished journal in Hispanic criticism and theory.

IN FULFILLMENT OF THE LANGUAGE REQUIREMENT

For students with no knowledge of Spanish, Portuguese, or Catalan, at least four terms of the language are required: *UN1101-UN1102* (or *UN1120*) and *UN2101-UN2102* (or *UN2120*). **All courses must be taken for a letter grade to fulfill the language requirement.**

Students with prior knowledge of Spanish who plan to continue studying Spanish are required to take the department's on-line placement examination before registering for courses. Students with prior knowledge of Portuguese or Catalan should speak with the director of language programs.

Students may be exempted from the language requirement in one of four ways:

1. Present a score of 4 or 5 on the AP Spanish Language or Spanish Literature Exams. Students who receive a score of 5 in either exam are awarded 3 AP credits upon successful completion of a 3300-level (or above) course with a grade of B or higher. AP credit is not granted for a score of 4.
2. Present a score of 780 or above on the SAT Subject Test. Students with a score lower than 780 should take the department's on-line placement exam and follow the placement advice received.
3. Present a score of a 7, 6, or 5 on the International Baccalaureate Higher Level Exam in Spanish.
4. Obtain a score of 625 or higher in the department's on-line placement exam. If the score in the on-line test qualifies a student for exemption from the language requirement, they are required to take a written version of the placement exam during orientation (for entering students) or during the semester (for continuing students). This written exam is offered every year on the Thursday before the beginning of classes in the fall semester from 10:00 a.m.- 2:00 p.m. in Room 352 of the International Affairs Building (the Language Resource Center Computer Lab). Students do not need to make an appointment to take the exam.

DEPARTMENTAL HONORS

Beginning in Spring 2015, the department put in place a new timeline and training program for juniors, to assist students with planning and completing the Honors Thesis during their senior year. The Honors Thesis is an excellent option for any student

interested in pursuing a Master's degree or Ph.D.; but, above all, it is a highly formative research and writing experience—one that can bear unexpected fruits toward any path the student decides to take in the future.

All students pursuing a major through the department may apply to write an Honors Thesis. The department envisions the thesis as an intellectually challenging and rewarding experience that crowns four years of undergraduate studies with an original contribution in the field chosen by the student.

The department supports students in shaping their research topic and provides frequent advising throughout the research and writing process. The timeline is as follows:

- During the junior year, students take into consideration the possibility of writing an Honors Thesis in the following year. The topic of the Honors Thesis may likely originate in an advanced course taken during the junior year; students may also choose to develop ideas discussed or papers written in courses taken in previous years. Juniors schedule a meeting (or, if the student is studying abroad, a Skype conversation) with the director of undergraduate studies to discuss their proposed topic and faculty adviser.
- By May 15, juniors who have decided to write an Honors Thesis in their senior year send a formal proposal to the director of undergraduate studies, which includes:
 - A title and a one-page abstract;
 - The name of the proposed faculty adviser;
 - An application for departmental partial funding support (for those who would like to pursue research during the summer).
- By May 30, the Honors Thesis committee reviews the proposals and informs the students of its decision.
- In the fall of the senior year:
 - Seniors selected to write the Honors Thesis enroll in SPAN UN3998 Supervised Individual Research (Spring) with their faculty adviser and write the Honors Thesis during the entire senior year under the direction of their adviser. For the purposes of the major, this independent study counts as a 3-point course towards elective courses.
 - Faculty advisers organize Honors Thesis Workshops to discuss students' ongoing projects and provide advising on research tools, methodological and theoretical frames, and overall writing process.
- In the fall of the senior year, students enroll in a Senior Seminar.
- By April 15 of the senior year, students complete and present their Honors Thesis for consideration towards departmental honors and prizes. Students submit their thesis in hard copy, following the formatting specifications provided on the LAIC website.

To be considered for departmental honors, a student must write an Honors Thesis and maintain a GPA of at least 3.6 in major

courses. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

UNDERGRADUATE PRIZES

The faculty awards an undergraduate prize every year:

Susan Huntington Vernon Prize

Established in 1941 by a member of the noted family of New York Hispanophiles, it is given to the Columbia College senior major who has demonstrated excellence in the study of Spanish, Portuguese, and Latin American languages and cultures.

MAJOR IN HISPANIC STUDIES

Students who declared this program before March 2016 (when requirements changed) should contact the Director of Undergraduate Studies to confirm their correct course of study.

Students may only register once in each of the Core Courses (SPAN UN3300, SPAN UN3349 and SPAN UN3350).

The major in Hispanic studies requires 11 courses (minimum of 33 points) as follows:

Core Courses

SPAN UN3300	Advanced Language through Content [in Spanish]
SPAN UN3349	Hispanic Cultures I: Islamic Spain through the Colonial Period
SPAN UN3350	Hispanic Cultures II: Enlightenment to the Present

Elective Courses

Select seven elective courses (21 points): a minimum of three 3000- or 4000-level electives must be chosen within the department and up to three electives related to Hispanic Studies may be taken outside the department.

Senior Seminar

SPAN UN3991	SENIOR SEMINAR
-------------	----------------

MAJOR IN HISPANIC STUDIES WITH SPECIALIZATION

Students who declared this program before March 2016 (when requirements changed) should contact the Director of Undergraduate Studies to confirm their correct course of study.

Students may only register once in each of the Core Courses (SPAN UN3300, SPAN UN3349 and SPAN UN3350).

The major in Hispanic studies with specialization requires 14 courses (minimum of 42 points) as follows. Students should consult the director of undergraduate studies to plan their program and refer to the Hispanic Studies Major Worksheet.

Core Courses

SPAN UN3300	Advanced Language through Content [in Spanish]
SPAN UN3349	Hispanic Cultures I: Islamic Spain through the Colonial Period
SPAN UN3350	Hispanic Cultures II: Enlightenment to the Present

Elective Courses

Select ten elective courses (30 points): four of which must be chosen within the department and six of which must be in the field of specialization. Approved courses taken abroad may be counted as inside or outside the department for the specialization. A maximum of four courses taken abroad may be counted toward the major.

Senior Seminar *

SPAN UN3991	SENIOR SEMINAR
-------------	----------------

* In exceptional cases and with the director of undergraduate studies' approval, students may take a senior seminar in their area of specialization as a seventh course outside the department, if they have completed enough foundational courses to manage the demands of an advanced seminar. In such cases, the director of undergraduate studies must receive a letter or e-mail from the seminar instructor indicating approval of a student's membership in the course; the seminar project must be on a Hispanic topic; and a copy of the project must be turned in to the director of undergraduate studies for the student's file upon completion of the course. Students who complete the senior seminar in another department may also count it as the third elective course on a Hispanic topic outside the department, in which case they may take a fourth 3000- or 4000-level course in the department.

CONCENTRATION IN HISPANIC STUDIES

Students who declared this program before March 2016 (when requirements changed) should contact the Director of Undergraduate Studies to confirm their correct course of study.

Students may only register once in each of the Core Courses (SPAN UN3300, SPAN UN3349 and SPAN UN3350).

The concentration in Hispanic studies requires eight courses (minimum of 24 points) as follows:

Core Courses

SPAN UN3300	Advanced Language through Content [in Spanish]
SPAN UN3349	Hispanic Cultures I: Islamic Spain through the Colonial Period
SPAN UN3350	Hispanic Cultures II: Enlightenment to the Present

Elective Courses

Select five elective courses (15 points): a minimum of four 3000- or 4000-level courses must be chosen within the department and up to one elective related to Hispanic Studies may be taken outside the department. A maximum of three courses taken abroad may be counted toward the concentration. Students may only register once for SPAN UN3300.

CONCENTRATION IN PORTUGUESE STUDIES

The concentration in Portuguese studies requires eight courses (minimum 24 points) as follows:

Core Courses

PORT UN3101	Conversation about the Lusophone World
PORT UN3300	Advanced Language through Content
PORT UN3330	Introduction to Portuguese Studies
PORT UN3350	Lusophone Africa and Afro Brazilian Culture

Elective Courses

Select four elective courses (12 points): at least two must have a PORT designation and be chosen from the department's 3000-level offerings. Electives taken outside of the department must have the director of undergraduate studies' approval and be related to Portuguese studies. A maximum of two courses taught in English may be counted toward the concentration overall. Refer to the Portuguese Concentration Worksheet.

ACADEMIC YEAR 2020-21 SPANISH

SPAN UN1101 Elementary Spanish I. 4 points.

Prerequisites: a score of 0-279 in the department's Placement Examination.

An introduction to Spanish communicative competence, with stress on basic oral interaction, reading, writing, and cultural knowledge. Principal objectives are to understand and produce commonly used sentences to satisfy immediate needs; ask and answer questions about personal details such as where we live, people we know and things we have; interact in a simple manner with people who speak clearly, slowly and are ready to cooperate; and understand simple and short written and audiovisual texts in Spanish. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN1102 Elementary Spanish II. 4 points.

Prerequisites: SPAN UN1101 or a score of 280-379 in the department's Placement Examination.

An intensive introduction to Spanish language communicative competence, with stress on basic oral interaction, reading, writing and cultural knowledge as a continuation of SPAN UN1101. The principal objectives are to understand sentences

and frequently used expressions related to areas of immediate relevance; communicate in simple and routine tasks requiring a direct exchange of information on familiar matters; describe in simple terms aspects of our background and personal history; understand the main point, the basic content, and the plot of filmic as well as short written texts. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN1113 Spanish Rapid Reading and Translation. 3 points.

Open to graduate students in GSAS only.

This course, conducted in English, is designed to help graduate students from other departments gain proficiency in reading and translating Spanish texts for scholarly research. The course prepares students to take the Reading Proficiency Exam that most graduate departments demand to fulfill the foreign-language proficiency requirement in that language. Graduate students with any degree of knowledge of Spanish are welcome. A grade of A- or higher in this class will satisfy the GSAS foreign language proficiency requirement in Spanish.

SPAN UN1120 COMPREHENSIVE BEGINNING SPAN. 4.00 points.

Intensive, fast-paced elementary Spanish course for multilingual learners who have had little to no formal education

in Spanish. Replaces the sequence SPAN UN1101-SPAN UN1102. Prerequisites: Take the Department's Language Placement Examination. (It is only for diagnostic purposes, to assess your language learning skills, not your knowledge of Spanish). If you score approximately 330 OR MORE, you may qualify for this course if: - you have had little to no formal education in Spanish, AND - you identify with ONE of the following language learner profiles: Learners of Spanish as a 3rd language: fluent in a language other than English Informal learners of Spanish: English speakers who have "picked up" Spanish by interacting with Spanish speakers in informal settings "Receptive" Spanish heritage learners: English dominant, but you understand Spanish spoken by family and community members (The exam is only an initial assessment for diagnostic purposes. Your score might be high, even if you have never studied Spanish in a formal setting). You do not need my permission to register*. I will further assess your level during the Change of Program period. Feel free to contact me if you have any questions or if you are unsure about your placement in this course. *Students who do not have the necessary proficiency level may not remain in this course. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

SPAN UN2103 HEALTH-RELATED TOPICS IN THE SPANISH-SPEAKING WORLD. 4 points.

Prerequisites: SPAN UN2101 or a score of 380-449 on the Department's placement examination.

This is an intensive course in Spanish language communicative competence with an emphasis on oral interaction, reading, writing, and culture at an Intermediate II level with focus on health-related topics in the Spanish-speaking world.

In an increasingly interconnected world, and in multilingual global cities such as New York City, the study of a foreign language is fundamental not only in the field of the humanities but also in the natural sciences. This interdisciplinary course analyzes the intersection between these two disciplines through the study of health-related topics in Iberian and Latin American cultural expressions (literature, film, documentaries, among other sources) in order to explore new critical perspectives across both domains. Students will learn health-related vocabulary and usage-based grammar in Spanish. Students will develop a cultural understanding of medicine, illness, and treatment in the Spanish-speaking world. Finally, students will be able to carry out specific collaborative tasks in Spanish with the aim of integrating language, culture, and health.

* This course fulfills the last semester of the foreign language requirement. Therefore, students who have taken SPAN UN 2101 (Intermediate Spanish I), or have a score of 380-449 on the Department's placement exam, and are interested in health-related topics may proceed and enroll in SPAN UN 2103 (Intermediate Spanish II: Health-Related Topics in the Spanish-Speaking World). Pre-med and pre-health students, as well as those students majoring in the natural sciences—including biology, general chemistry, organic chemistry, biochemistry, and physics—will be given registration priority. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN2108 Spanish for Spanish-Speaking Students. 4 points.

Prerequisites: *heritage knowledge of Spanish*. Students intending to register for this course must take the department's on-line Placement Examination. You should take this course if your recommended placement on this test is *SPAN UN2102* (a score of 450-624). If you place below *SPAN UN2102* you should follow the placement recommendation received with your test results. If you place above *SPAN UN2102*, you should choose between *SPAN UN3300* and *SPAN UN4900*. If in doubt, please consult with the Director of the Language Programs. Designed for native and non-native Spanish-speaking students who have oral fluency beyond the intermediate level but have had no formal language training.

SPAN UN2120 Comprehensive Intermediate Spanish. 4 points.

Prerequisites: This course is an intensive and fast-paced coverage of both SPAN UN2101 and SPAN UN2102. Students MUST demonstrate a strong foundation in Spanish and meet the following REQUIREMENTS: a score ABOVE 480 on the Department's Placement Examination; or A- or higher in SPAN UN1120. If you fulfill the above requirements, you do not need the instructor's permission to register. HOWEVER, the instructor will additionally assess student proficiency during the Change of Program Period. Students who do not have the necessary proficiency level may not remain in this course. Replaces the sequence SPAN UN2101-SPAN UN2102. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN3300 Advanced Language through Content [in Spanish]. 3 points.

Prerequisites: SPAN UN2102 or AP score of 4 or 5; or SAT score.

An intensive exposure to advanced points of Spanish grammar and structure through written and oral practice, along with an introduction to the basic principles of academic composition in Spanish. Each section is based on the exploration of an ample theme that serves as the organizing principle for the work done in class (Please consult the [Directory of Classes](#) for the topic of each section.) This course is required for the major and the concentration in Hispanic Studies. Formerly SPAN W3200 and SPAN BC3004. If you have taken either of these courses before you cannot take SPAN UN3300. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN3350 Hispanic Cultures II: Enlightenment to the Present. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course surveys cultural production of Spain and Spanish America from the eighteenth to the twenty-first centuries. Students will acquire the knowledge needed for the study of the cultural manifestations of the Hispanic world in the context of modernity. Among the issues and events studied will be the Enlightenment as ideology and practice, the Napoleonic invasion of Spain, the wars of Spanish American independence, the fin-de-siècle and the cultural avant-gardes, the wars and revolutions of the twentieth century (Spanish Civil War, the Mexican and Cuban revolutions), neoliberalism, globalization, and the Hispanic presence in the United States. The goal of the course is to study some key moments of this trajectory through the analysis of representative texts, documents, and works of art. Class discussions will seek to situate the works studied within the political and cultural currents and debates of the time. All primary materials, class discussion, and assignments are in Spanish. *This course is required for the major and the concentration in Hispanic Studies.*

SPAN UN3991 SENIOR SEMINAR. 4.00 points.

Prerequisites: Seniors (major or concentrator status).

The course is a requirement for all the LAIC majors. In this seminar, students develop an individual research project and write an essay under the guidance of the course's instructor and in dialogue with the other participants' projects. After an introductory theoretical and methodological section, and a research session at the library, the syllabus is entirely constructed on the students' projects. Every participant is in charge of a weekly session. Essay outlines and drafts are discussed with the group throughout the semester. The final session is a public symposium with external respondents.

SPAN UN3315 New York as Theatre of Spanish Modernity. 3 points.

From the beginning of the XXth Century some of the key figures of Spanish contemporary culture, writers, filmmakers or architects, had a very close relationship to New York, sometimes as travelers, sometimes living in the city for long periods of time. That transatlantic contact, far from anecdotal, turned into an essential element of the self-understanding of those authors and a crucial presence in their work. The contact with New York modernity would be an unavoidable component in their own versions of modernity but their presence would also leave an important trace in the city. As yet more Spanish cultural travelers got in contact with the city a different phenomenon developed: from the 1950's, New York would be used as a privileged stage to project a certain institutional idea of Spain, to sell a refurbished image of the nation as sophisticated and modern after decades of international marginalization under Francoism. This course will develop a comparative study of both processes as seen in literary sources, film and architecture (García Lorca, Camba, Dalí, Tápies, Buñuel, Loriga, Sert, Calatrava...)

SPAN UN3366 Unseen Things: Fantastic Narratives in Contemporary Spain. 3 points.

This course is a survey of Spanish literature and cinema that offers a glimpse to the Spanish canon through the cultural topology of "Fantasy". By conceiving fantasy as a historically produced—and therefore historically changing—notion, we will travel across five centuries to examine how phenomena associated with the supernatural and the

paranormal were understood in their time and how they are understood today. Haunting memories and spaces, ghosts and imaginary representations, supernatural events, monsters, spiritistic practices, and phantasmagorias will parade before our eyes as we try to come up with a comprehensive account for what we could call the “Spanish uneven development”. The discussions over differential temporalities, social and political imaginaries, collective memories, the role of fiction and symbolic representations, and the connection between fantasy and the economic, political, and ideological practices in a determinate social formation will be interrogated in our seminar from different historical vantage points. Readings (most of them by major authors) will be the center of the discussion, whereas visual materials, documentary, art and movies will do their part to illustrate the readings. Several questions will be raised (and hopefully answered) along this journey: How can we explain proliferation of fantastic narratives in Contemporary Spain? And, finally, how can we examine the recent boom and success of Spanish fantastic, supernatural and horror pieces, particularly in film and in the novel? Is there such thing as a “Spanish fantastic” genre?

SPAN UN3731 Environment and Citizenship: Cultures of Nature in the Iberian Peninsula. 3 points.

This course examines the role of nature and the environment in both contemporary literature and the arts, and attempts to explore a conceptual framework for the definition of environment as a cultural and material production. Environmental peculiarities and historical discontinuities and continuities have created social and political conjunctures in the Iberian Peninsula in which questions concerning nature, space, landscape, and urban and rural experiences have become central to the cultural and the critical imagination in the 20th & 21st Centuries. From the debate over the privatization and erosion of communal rights and the environmental dispossession (and repossession) of the resources to the history of the constructions of nature(s) in literary and cinematic landscapes, the guiding question is how cultural and social practices interfere in the production of what Rob Nixon has called ‘slow violence’, that is, the incremental dynamics of environmental violence that intensify the vulnerability of populations and natural ecosystems. To address this issue, we will not only read a number of novels, essays, poems, short stories and theoretical production, but also engage in the study of artwork and new Iberian democratic experiences, and the development of the cultural environmental studies and ecocriticism in literature and the arts today. The class will be conducted in Spanish and all written assignments will also be in that language.

SPAN G4030 Spanish Pragmatics. 4 points.

In one sense, Pragmatics is concerned with how we use the language, why and how the speakers communicate in social interactions. The interpretation of meaning in context is probably the main field of study of this multidiscipline, considering the speaker-meaning as the central point of departure. The term Pragmatics refers to a broad perspective on different aspects of communication, including linguistics, but also cognitive psychology, cultural anthropology, philosophy, sociology and rhetoric among others. Through this course we will study chronologically and apply in specific cases of study of the Spanish language the most meaningful pragmatic theories, such as: Context, Deixis, Speech acts, Implicature, Cooperative Principle, Politeness, Relevance, Pragmatic markers, Metaphors and Cross-cultural pragmatics. Pragmatics, as we know, is a most helpful criterion in the interpretation of many different types of texts. As a course within our Department’s curriculum this instrument of rhetoric analysis is a basic tool in the comprehension of our students’ discourse in their literary, cultural, and critical papers. This discipline goes beyond the analysis of strictly forms or verbal utterances, hence its multidisciplinary applicability to a wide range of fields of studies in Spanish. Whichever the student’s field of study might be, Pragmatics provides a valuable and accurate vocabulary that can be applied to any textual interpretation. In this course, the pragmatic perspective is a starting point to delve into the processes of communication in Spanish. After this first approach, the student will gain an insight into new aspects of the linguistics of language use in general and the use of Spanish in particular.

CPLS GU4810 Theories of the Subject. 4 points.

This seminar will revisit some major texts and concerns in the theoretical humanities that develop genealogical, psychoanalytical or political theories of the subject, roughly from Marx until today. The goal is to come to a critical understanding of the centrality of this notion of the subject as one of the founding concepts of modernity, as well as to draw out all the consequences of its crisis in radical humanistic (or even so-called posthumanist) thought today. Thinkers to be discussed further include Freud, Foucault, Badiou, Butler, Althusser, Rozitchner, Žižek and Zupan#i#.

PORT UN3300 Advanced Language through Content. 3 points.

Corequisites: PORT UN1220

An intensive exposure to advanced points of Portuguese grammar and structure through written and oral practice, along with an introduction to the basic principles of academic composition in Portuguese. This course is required for the concentration in Portuguese Studies. "This course is intended to improve Portuguese language skills in grammar, comprehension, and critical thinking through an archive of texts from literature, film, music, newspapers, critical reception and more. To do so, we will work through Portuguese-speaking communities and cultures from Brazil, to Portugal and Angola, during the twentieth and twenty-first century, to consider the mode in which genre, gender and sexuality materialize and are codified, disoriented, made, unmade and refigured through cultural productions, bodies, nation and resistant vernaculars of aesthetics and performance, always attentive to the intersections of gender with class and racism.

ACADEMIC YEAR 2020-21 SPANISH

SPAN UN1101 Elementary Spanish I. 4 points.

Prerequisites: a score of 0-279 in the department's Placement Examination.

An introduction to Spanish communicative competence, with stress on basic oral interaction, reading, writing, and cultural knowledge. Principal objectives are to understand and produce commonly used sentences to satisfy immediate needs; ask and answer questions about personal details such as where we live, people we know and things we have; interact in a simple manner with people who speak clearly, slowly and are ready to cooperate; and understand simple and short written and audiovisual texts in Spanish. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN1102 Elementary Spanish II. 4 points.

Prerequisites: SPAN UN1101 or a score of 280-379 in the department's Placement Examination.

An intensive introduction to Spanish language communicative competence, with stress on basic oral interaction, reading, writing and cultural knowledge as a continuation of SPAN UN1101. The principal objectives are to understand sentences

and frequently used expressions related to areas of immediate relevance; communicate in simple and routine tasks requiring a direct exchange of information on familiar matters; describe in simple terms aspects of our background and personal history; understand the main point, the basic content, and the plot of filmic as well as short written texts. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN1113 Spanish Rapid Reading and Translation. 3 points.

Open to graduate students in GSAS only.

This course, conducted in English, is designed to help graduate students from other departments gain proficiency in reading and translating Spanish texts for scholarly research. The course prepares students to take the Reading Proficiency Exam that most graduate departments demand to fulfill the foreign-language proficiency requirement in that language. Graduate students with any degree of knowledge of Spanish are welcome. A grade of A- or higher in this class will satisfy the GSAS foreign language proficiency requirement in Spanish.

SPAN UN1120 COMPREHENSIVE BEGINNING SPAN. 4.00 points.

Intensive, fast-paced elementary Spanish course for multilingual learners who have had little to no formal education

in Spanish. Replaces the sequence SPAN UN1101-SPAN UN1102. Prerequisites: Take the Department's Language Placement Examination. (It is only for diagnostic purposes, to assess your language learning skills, not your knowledge of Spanish). If you score approximately 330 OR MORE, you may qualify for this course if: - you have had little to no formal education in Spanish, AND - you identify with ONE of the following language learner profiles: Learners of Spanish as a 3rd language: fluent in a language other than English Informal learners of Spanish: English speakers who have "picked up" Spanish by interacting with Spanish speakers in informal settings "Receptive" Spanish heritage learners: English dominant, but you understand Spanish spoken by family and community members (The exam is only an initial assessment for diagnostic purposes. Your score might be high, even if you have never studied Spanish in a formal setting). You do not need my permission to register*. I will further assess your level during the Change of Program period. Feel free to contact me if you have any questions or if you are unsure about your placement in this course. *Students who do not have the necessary proficiency level may not remain in this course. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

SPAN UN2103 HEALTH-RELATED TOPICS IN THE SPANISH-SPEAKING WORLD. 4 points.

Prerequisites: SPAN UN2101 or a score of 380-449 on the Department's placement examination.

This is an intensive course in Spanish language communicative competence with an emphasis on oral interaction, reading, writing, and culture at an Intermediate II level with focus on health-related topics in the Spanish-speaking world.

In an increasingly interconnected world, and in multilingual global cities such as New York City, the study of a foreign language is fundamental not only in the field of the humanities but also in the natural sciences. This interdisciplinary course analyzes the intersection between these two disciplines through the study of health-related topics in Iberian and Latin American cultural expressions (literature, film, documentaries, among other sources) in order to explore new critical perspectives across both domains. Students will learn health-related vocabulary and usage-based grammar in Spanish. Students will develop a cultural understanding of medicine, illness, and treatment in the Spanish-speaking world. Finally, students will be able to carry out specific collaborative tasks in Spanish with the aim of integrating language, culture, and health.

* This course fulfills the last semester of the foreign language requirement. Therefore, students who have taken SPAN UN 2101 (Intermediate Spanish I), or have a score of 380-449 on the Department's placement exam, and are interested in health-related topics may proceed and enroll in SPAN UN 2103 (Intermediate Spanish II: Health-Related Topics in the Spanish-Speaking World). Pre-med and pre-health students, as well as those students majoring in the natural sciences—including biology, general chemistry, organic chemistry, biochemistry, and physics—will be given registration priority. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

Fall 2020: SPAN UN2103

SPAN UN2120 Comprehensive Intermediate Spanish. 4 points.

Prerequisites: This course is an intensive and fast-paced coverage of both SPAN UN2101 and SPAN UN2102. Students MUST demonstrate a strong foundation in Spanish and meet the following REQUIREMENTS: a score ABOVE 480 on the Department's Placement Examination; or A- or higher in SPAN UN1120. If you fulfill the above requirements, you do not need the instructor's permission to register. HOWEVER, the instructor will additionally assess student proficiency during the Change of Program Period. Students who do not have the necessary proficiency level may not remain in this course. Replaces the sequence SPAN UN2101-SPAN UN2102. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN3300 Advanced Language through Content [in Spanish]. 3 points.

Prerequisites: SPAN UN2102 or AP score of 4 or 5; or SAT score.

An intensive exposure to advanced points of Spanish grammar and structure through written and oral practice, along with an introduction to the basic principles of academic composition in Spanish. Each section is based on the exploration of an ample

theme that serves as the organizing principle for the work done in class (Please consult the [Directory of Classes](#) for the topic of each section.) This course is required for the major and the concentration in Hispanic Studies. Formerly SPAN W3200 and SPAN BC3004. If you have taken either of these courses before you cannot take SPAN UN3300. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN3349 Hispanic Cultures I: Islamic Spain through the Colonial Period. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: L" course: enrollment limited to 15 students.

Completion of language requirement, third-year language sequence (W3300).

Provides students with an overview of the cultural history of the Hispanic world, from eighth-century Islamic and Christian Spain and the pre-Hispanic Americas through the late Middle Ages and Early Modern period until about 1700, covering texts and cultural artifacts from both Spain and the Americas.

SPAN UN3350 Hispanic Cultures II: Enlightenment to the Present. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course surveys cultural production of Spain and Spanish America from the eighteenth to the twenty-first centuries. Students will acquire the knowledge needed for the study of the cultural manifestations of the Hispanic world in the context of modernity. Among the issues and events studied will be the Enlightenment as ideology and practice, the Napoleonic invasion of Spain, the wars of Spanish American independence, the fin-de-siècle and the cultural avant-gardes, the wars and revolutions of the twentieth century (Spanish Civil War, the Mexican and Cuban revolutions), neoliberalism, globalization, and the Hispanic presence in the United States. The goal of the course is to study some key moments of this trajectory through the analysis of representative texts, documents, and works of art. Class discussions will seek to situate the works studied within the political and cultural currents and debates of the time. All primary materials, class discussion, and assignments are in Spanish. *This course is required for the major and the concentration in Hispanic Studies.*

SPAN UN3361 Artistic Humanity. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: This is an advanced class in Spanish.

Between the 15th and 17th centuries, in the context of the Iberian expansion, the presence and observation of unexpected artistic forms, media, and monuments triggered a new space of inquiry. Novel objects, surfaces, architectures, materials, and ideas about artistry were observed far and near—in the Americas, in Asia, in Africa, and in Europe. They traveled between continents in physical and textual forms: sent and offered as proofs of the new territories, desired and collected as unique treasures, but also described, compared and analyzed in letters, histories, or inventories. All around a sphere that could now be mentally embraced, missionaries, collectors, travelers, historians, and artists felt under the power of novel creations: body painting, gold byobu, intricate sculptures, but also turquoise masks, feather mosaics, painted manuscripts, fish-bone necklaces, ivory spoons, carved temples, monumental cities, and so on. These splendid artworks deeply challenged conceptual boundaries such as those between idol and image, beautiful and frightening, civilized and barbarian, center and periphery, classic and modern, and ancient and new. But most importantly, these artworks and their descriptions in chronicles, histories, and inventories contributed to define humanity as immanently creative—and to conceive artistic creation as a distinctive form of thought.

SPAN UN3462 Spanish Grammar: From Rules to Laws and Beyond. 3 points.

From a cognitive and operational point of view, this course aims to reflect on the theoretical and, mainly, *practical* limits of traditional grammar explanations, contributing with a new meaningful, experiential and representational understanding of Spanish as a human mean of communication. Within this framework, some of the most representative aspects of the grammar of Spanish will be studied from a fully practical perspective, favoring the comparison with the grammar of English. In each case, the reflection will lead to turn the traditional rules and their exceptions, into operational *laws* without exceptions, as well as to highlight the *natural logic* underlying every single grammar decision in the use of language.

SPAN UN3533 Women, Culture, Activism & Gender in Latin America. 3 points.

The course focuses on women, culture, and activism in contemporary Latin America through the discussion of manifestos, essays, visual works, films, literature, blogs, music, and new cultural experiences. We will approach two main demands of women on the streets: claims against violence (“femicidios”) and the expansion of rights.

Students will be introduced to theoretical writing on Latin American feminisms in different contexts (mainly Argentina, Brazil, Paraguay, Mexico, Chile, Peru). This course will provide students with an accurate understanding of some of the topics of contemporary Latin American feminism and activism related to new subjectivities, politics, and culture. The course develops a wide range of cultural practices and includes topics as practices of resistance, representation of violence, gender as spectacle, and new phenomena such as urban protests. We will also trace a relevant genealogy of women struggles in Latin America. The class will be conducted in Spanish and all written assignments will also be in that language.

SPAN UN3692 Labor Culture in Twentieth-Century Latin America. 3 points.

Industrial modernization often went hand-in-hand with the constitution of a new kind of national-popular culture during the twentieth century in Latin America. For many such projects, becoming a political subject meant being a worker. This course will interrogate the ways in which labor and culture informed and produced one another, from the Mexican muralists’ use of industrial materials and techniques in the 1920s in the constitution of a their spectators to the creation of the “credit card citizen; of consumption in the late 1990s. Class discussions and writing assignments will analyze novels, essays, short stories, chronicles, films and works of visual art in order to pose and answer some of the following questions: How is work imagined and represented at different historical moments and what ideological role might such representations play? How do artists and writers think about the nature, organization and political import of their work in relation to other kinds of intellectual and manual labor? In what ways and in what

contexts do labor and labor movements become the protagonists of radical political change? Alternatively, to what extent do the tactics of political revolution imply a laborious exercise of their own? How do such artists, writers and thinkers conceive of work before and after capitalism? Authors to be studied may include Diego Rivera, Alfaro Siqueiros, Jorge Luis Borges, Eduardo Coutinho, José Carlos Mariátegui and Ernesto Guevara, among others.

SPAN UN3998 Supervised Individual Research (Spring). 3 points.

Prerequisites: the director of undergraduate studies' permission. Students register in this course while they pursue independent study work under the supervision of a faculty member during the spring semester.

SPAN GU4011 Conversation in Spanish: Practice and Analysis. 3 points.

This is a course in Spanish conversation. Students will study and practice features of social interaction in Spanish that are crucial to participate in the new culture. This means the course has two learning objectives: One is learning to engage in regular conversations in Spanish; the other is to understand how conversation works. We will cover conversational issues such as gesture, narratives, intonation, opening and closing interactions, turn taking, etc., both in linguistics and social terms. Practice and analysis will be connected: Every week we will consider an aspect of oral interaction in Spanish. We will study those features in naturally occurring conversations among native speakers and we will practice in actual conversations inside and outside the classroom, by means of role play, simulation, film making, debates and interviews. We will use topics of conversation to provide a meaningful environment for the conversation practice.

PORTUGUESE**PORT UN1101 Elementary Portuguese I. 4 points.**

A beginning course designed for students who wish to start their study of Portuguese and have no proficiency in another Romance language. The four language skills: listening, speaking, reading, and writing are developed at the basic level.

PORT UN3300 Advanced Language through Content. 3 points.

Corequisites: PORT UN1220

An intensive exposure to advanced points of Portuguese grammar and structure through written and oral practice, along with an introduction to the basic principles of academic composition in Portuguese. This course is required for the concentration in Portuguese Studies. "This course is intended to improve Portuguese language skills in grammar, comprehension, and critical thinking through an archive of texts from literature, film, music, newspapers, critical reception and more. To do so, we will work through Portuguese-speaking communities and cultures from Brazil, to Portugal and Angola, during the twentieth and twenty-first century, to consider the mode in which genre, gender and sexuality materialize and are codified, disoriented, made, unmade and refigured through cultural productions, bodies, nation and resistant vernaculars of aesthetics and performance, always attentive to the intersections of gender with class and racism.

Fall 2020: PORT UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

PORT UN3301 Advanced Writing and Composition in Portuguese. 3 points.

Prerequisites: *PORT W1220*.

This course focuses on three elements: 1) the main elements of formal discourse in Portuguese (grammar, vocabulary, expressions, etc.); 2) discourse genres, based on the theoretical bases laid out by Textual Linguistics and Discourse Analysis; 3) cultural, economic, social, political themes related to the reality of Brazil or other Portuguese-speaking countries. However, students should be able to define their areas of interest and shape their experience in the course according to them. Such an approach takes advantage of the diversity in the classroom, stimulates participation, and promotes independent academic research. Therefore, students will start a weblog, where their writing activities will be posted, so that their colleagues may read and comment on them. The mandatory genres-forms for all students are in the modules of discourse genres and academic writing, and the corresponding forms, the pronominal system and semelfactives. Students will then choose one more genre among biographical texts (resumé, facebook, biography), lyrical texts (music, poetry), subjective texts (description, narrative, commentary, editorial), and journalistic texts, as well as the corresponding forms assigned to those modules: indirect speech, mandates, past verbal tenses, conjunctions, redundancy/repetition, and semelfactives (conditionals). Every student will study and practice all genres and forms, but they will be responsible for larger assignments (module notes, to be posted on their blogs) on the two mandatory modules and the optional one. At the beginning of the semester they will choose a thematic topic for the course (in their field of study or area of personal interest), and will select a literature list with the assistance of the instructor. All assignments in the course must be related to the chosen thematic topic and will involve research based on

the literature list. At the end of the semester, they will produce an essay on their thematic choice.

PORT UN3330 Introduction to Portuguese Studies. 3 points.

This course presents the students with the information and basic tools needed to interpret a broad range of topics and cultural production from the Portuguese-speaking world: literary, filmic, artistic, architectural, urban, etc. We will use a continuing cross-disciplinary dialogue to study everyday acts as a location of culture. This course will center on interpretation as an activity and as the principal operation through which culturally sited meaning is created and analyzed. Among the categories and topics discussed will be history, national and popular cultures, literature (high/low), cultural institutions, migration, and globalization. Students will also acquire the fundamental vocabulary for the analysis of cultural objects. This course is required for the concentration in Portuguese Studies.

Spring 2021: PORT UN3330

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PORT 3330	001/13371	T Th 11:40am - 12:55pm Online Only	Joao Nemi Neto	3	8/15

PORT UN3325 Slavery, Free Labor, and Cultural Memory. 0-3 points.

This course will examine the historical period of gradual emancipation to free labor in Brazil. Course readings include literary and cultural production as well as historical narratives and literary theory. We will question how ideas of racial labor transform alongside new notions of freedom and nation. By drawing mostly on literature, history, and film, this course investigates the issue of cultural memory as related to the history of slavery, racial formation, and national forgetting. Our course discussions will center on questions as, how is the history of slavery remembered or forgotten? How do we ethically remember a past that we can never understand completely? Is it possible to separate cultural representations of race, ethnicity, sexuality and gender from their political and economic contexts? How are "race," "liberty," "property" and "life" understood during slavery, and how do those ideas continue to influence the post-slavery nation? Although the course will focus heavily on the Brazilian historical context, we will also comparatively examine how these histories are remembered and forgotten in the U.S. and other parts of Latin America.

PORT UN3350 Lusophone Africa and Afro Brazilian Culture. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course focuses on Lusophone African and African Brazilian cultures and the relations, continuities, ruptures and influences between them. Brazil is the result of the miscegenation of Ameridians, African and Europeans, and this means that is also a cultural mélange of these groups. The African cultural contribution to Brazilian culture and grand-narrative is the primary focus of this course, however, to

understand Brazil one needs to understand the cultural diversity found in Lusophone Africa, with which Brazil has had a long relationship. The readings for this course include texts from different disciplines and genres. We will study texts, movies and other forms of visual arts from the following authors: José Eduardo Agualusa, Pepetela, Mia Couto, Jorge Amado, Achille, Mbembe, Hilton Costa, Jocélio Teles dos Santos, Livio Sansone, José Luis Cabaço, Benedita da Silva and Solano Trindade.

CATL UN3300 Advanced Catalan Through Content: Language and Identity in Contemporary Catalonia. 4 points.

An examination of the political, cultural, and artistic history in Modern and Contemporary Catalonia and its role in the building of its sociolinguistic identity. Material includes literary, academic, and media readings and audiovisual and online resources.

CATL W3330 Introduction to Catalan Culture. 3 points.

This is a content course covering topics regarding Catalan history, society, literature and visual arts. The objective of the course is to examine the main socio-cultural manifestations in the Catalan-speaking territories. Topics to be discussed include: bilingualism and language as the marker of "authentic" national identity; the influx of immigration and the constant redefinition of all things Catalan; the very locally rooted and at the same time very international outlook of the Catalan avant-garde from Foix to Tàpies; the protest song and the cultural manifestations during the Franco repression, and the crucial role of the city of Barcelona as a cultural focus and its impact on literature, film, and arts. By the end of the semester students will be familiar with the main social and cultural issues of the Catalan-speaking territories. The course will be taught in Spanish and counts as an elective towards the major in Hispanic Cultures. No previous knowledge of the Catalan language is required.

CATL UN3500 Literature in Catalan Cinema. 3 points.

Prerequisites: CATL UN3300 The course will be taught in Catalan.

The main goal of this course is to study the close relationship between Catalan literature and cinema during the 20th century. Through the reading and viewing of the selected works, the students will explore examples of Modern Catalan Literature and Film in the Catalan-speaking territories, while deepening

their understanding of the cultural, historical, and sociopolitical aspects of each period. At the end the course students will be able to analyze how literary procedures are translated into film, in addition to the formal and cultural implication of each particular work. The course will be taught in Catalan.

The objectives of the course are:

To acquire a basic knowledge of the history of modern Catalan cinema and literature and their cultural and historical contexts.

To be able to recognize and analyze the main literary procedures used in movies.

To analyze the influence of Catalan literature on Catalan cinema

To develop an awareness of critical and technical terminology for discussing literature and film

LINGUISTICS

Director of Undergraduate Studies: Prof. Meredith Landman, ml4263@columbia.edu

Program Director: Prof. John McWhorter, jm3156@columbia.edu

In any discussion of linguistics, in popular or academic contexts, the first question is always, what is linguistics, after all? This is remarkable. Language informs most of our mental and cultural activity, and linguistics is the just study of language.

Linguistics, especially since the 1960s, has become a highly multifarious, and even sprawling, field of inquiry. This requires that a major acquaint students with a number of subfields, all of which are crucial to understanding what modern linguistic analysis is about, and foster interdisciplinary inquiry as well. To wit, the person with a basic foundation in what constitutes linguistic study in our times (including realistic training for graduate study if desired) understands:

- a) the basics of grammatical analysis in terms of sounds and sentence structure
- b) how languages change over time
- c) the mechanics of how languages express meaning and implication
- d) the details and nuances of how language is used in social space
- e) the ways and extent to which the world's 7000 languages differ from one another
- f) the relationship between language and cognition writ large

STUDY ABROAD

Undergraduates have engaged in unique travel and research projects, including sign language in Nicaragua; language attitudes in Kyrgyzstan; colloquial Arabic in Cairo; summer internship at the Max Planck Institute for Evolutionary Biology; and study abroad in Spain, England, India, Hungary, and Ireland.

GRADUATE STUDY

Columbia's linguists have distinguished themselves with awards and plans after graduation, such as Fulbright Fellowships to France, Georgia, and Turkey; and graduate study of linguistics or psychology at Harvard, Stanford, UCSD, Northwestern, New York University, and SUNY Buffalo. Linguistics is also a natural background for the law, and our students have entered such law schools as Georgetown and Columbia.

There is no graduate program in linguistics at Columbia. Students interested in pursuing graduate study in linguistics in New York should investigate CUNY Graduate Center, New York University, or Teachers College (applied linguistics).

 Mariame Sy (Wolof; Pulaar; MESAAS)
 Herbert Terrace (Psychology)
 Alan Timberlake (Slavic Languages)
 Zhirong Wang (Chinese; East Asian Languages and Cultures)

MAJOR IN LINGUISTICS

The complete major requirement – totaling 38 points – is the following:

1. LING UN3101 Introduction to Linguistics (3pts.)

2. LING GU4376 Phonetics and Phonology (3pts.)

3. LING GU4903 Syntax (3pts.)

4. One course from four out of five themes (12 pts. total):

a) Language in time

Content: Historical linguistics, as in how grammars transform over time (such as the development of Modern from Old English) in terms of sounds, structures, and meaning

LING GU4108 Language History

ENGL GU4901 History of the English Language

CHNS GU4019 HISTORY OF CHINESE LANGUAGE

b) Language in context

Content: How language varies in structure and usage according to sociological factors such as gender, class, race, power and culture

LING GU4800 LANGUAGE # SOCIETY

LING UN3102 Endangered Languages in the Global City:

Lang, Culture, and Migration in Contemporary NYC

ANTH UN1009 Introduction to Language and Culture

ANTH GR6067 Language and Its Limits (graduate seminar open to undergraduates)

AMST UN3931 Topics in American Studies (Languages of America)

AMST UN3931 Topics in American Studies (Language Contact)

SPAN GU4010 LANGUAGE CROSSING IN LATINX CARIBBEAN CULTURAL PRODUCTION

SPAN BC3382 Languages in Contact: Sociolinguistic Aspects of U. S. Spanish (taught in Spanish)

PORT GU4033 Language # Queer Brazil (ENG)

c) Language diversity

Content: How languages differ from one another and in which ways; especially valuable in this module are a) Field Methods, eliciting the vocabulary and structure of a lesser documented language by questioning a native speaker, in the fashion of professional linguists, b) courses focusing on the structure of individual languages

LING GU4206 Advanced Grammar and Grammars

LING GU4120 Language Documentation and Field Methods

LING GU4171 Languages of Africa

HNGR UN3343 Descriptive Grammar Hungarian

d) Language and meaning

Content: semantics, philosophy of language, cognitive linguistics, natural language processing

LING GU4190 Discourse and Pragmatics

PHIL UN2685 Introduction to Philosophy of Language

SPAN GR5450 A COGNITIVE LINGUISTICS ACCOUNT OF LANGUAGE

SPAN GU4030 Spanish Pragmatics (taught in Spanish)

COMS W1002 Computing in Context

e) Psychology and biology of language

Content: psycholinguistics, neurolinguistics, language genesis. This is especially important given the burgeoning research on the actual structural representation of language in the brain, as well as increasingly influential proposals that ground language in larger thought processes (as opposed to the Chomskyan proposal that language is, to a considerable extent, generated via exclusive cognitive mechanisms).

LING UN3103 Language, Brain and Mind

PSYC BC3164 Perception and Language

PSYC GU4232 Production and Perception of Language

PSYC BC3369 Language Development

PSYC GU4242 Evolution of Language (Seminar) (graduate seminar open to undergraduates)

PSYC GU4272 Advanced Seminar in Language Development

4. One elective course (3 pts.) from either a) one of the themes, or b) a linguistics-related course from another department subject to approval from the program. This option will allow students to either sample more widely or specialize somewhat in a subarea of linguistics that has come to interest them.

5. Senior thesis (two semesters, 3 pts. per semester)

6. Two language courses at the intermediate level (8pts.), separate from the core curriculum foreign language requirement. The choice of language must be from those listed below, under "In Fulfillment of the Language Requirement for Linguistics, 'or upon consultation with the Director of Undergraduate Studies.

SPECIAL CONCENTRATION IN LINGUISTICS

The special concentration in linguistics is not sufficient for graduation in and of itself. It must be taken in conjunction with a major or a full concentration in another discipline.

Please note: the requirements for the special concentration in Linguistics were modified in the Fall 2019 semester. Students who entered Columbia before the Fall 2019 semester have the option of following the new or the old requirements. If you have any questions, please contact the Director of Undergraduate Studies.

For the new requirements, students must take 23 points in the linguistics program as specified below.

For the old requirements, students must take 18 points; the requirements are specified below, with the exception that the language requirement is one language course at the intermediate

level (4pts.), separate from the core curriculum foreign language requirement.

The requirements for the special concentration (23 points) are as follows:

1. Three core courses in linguistics chosen from:

LING UN3101 Introduction to Linguistics
 LING UN3102 Endangered Languages in the Global City:
 Lang, Culture, and Migration in Contemporary NYC
 LING UN3103 Language, Brain and Mind
 HNGR UN3343 Descriptive Grammar Hungarian
 LING GU4108 Language History
 LING GU4120 Language Documentation and Field Methods
 LING GU4171 Languages of Africa
 LING GU4190 Discourse and Pragmatics
 LING GU4206 Advanced Grammar and Grammars
 LING GU4376 Phonetics and Phonology
 LING GU4800 LANGUAGE # SOCIETY
 LING GU4903 Syntax

2. Two additional courses from either a) the core linguistics courses, or b) a linguistics-related course from another department subject to approval from the program. Course previously approved include those listed below:

Anthropology:

ANTH UN1009 Introduction to Language and Culture
 ANTH GU4042 Agent, Person, Subject, Self
 ANTH GR6067 Language and Its Limits
 ANTH GR6125 Language, Culture, and Power

Chinese:

CHNS GU4019 HISTORY OF CHINESE LANGUAGE

Computer Science:

COMS W1002 Computing in Context
 COMS W1012 Computational Linguistics
 COMS UN3261 Computer Science Theory
 COMS GU4705 Natural Language Processing
 COMS GU4706 Spoken Language Processing
 COMS GR6998 Topics in Computer Science

Comparative Literature & Society:

CPLS GU4111 World Philology

French:

FREN BC3011 History of the French Language

Philosophy:

PHIL UN2685 Introduction to Philosophy of Language
 PHIL UN3411 SYMBOLIC LOGIC
 PHIL UN3685 Philosophy of Language
 PHIL GU4490 LANGUAGE AND MIND

Psychology:

PSYC UN2215 Cognition and the Brain
 PSYC UN2440: Language and the Brain
 PSYC UN2450 Behavioral Neuroscience

PSYC BC3164 Perception and Language
 PSYC UN3265 Auditory Perception (Seminar)
 PSYC BC3369 Language Development
 PSYC GU4232 Production and Perception of Language
 PSYC GU4272 Advanced Seminar in Language Development

Spanish:

SPAN BC3382 Languages in Contact: Sociolinguistic Aspects
 of U. S. Spanish
 SPAN GU4010 LANGUAGE CROSSING IN LATINX
 CARIBBEAN CULTURAL PRODUCTION
 SPAN GU4030 Spanish Pragmatics
 SPAN GR5450 A COGNITIVE LINGUISTICS ACCOUNT
 OF LANGUAGE

Sociology:

SOCI GU4030 Sociology of Language

3. Two language courses at the intermediate level (8pts.), separate from the core curriculum foreign languages requirement. The choice of language must be from those listed below, under "In Fulfillment of the Language Requirements for Linguistics," or upon consultation with the Director of Undergraduate Studies.

IN FULFILLMENT OF THE LANGUAGE REQUIREMENT FOR LINGUISTICS

The language taken in fulfillment of the linguistics requirement can be either an ancient or modern language, but should neither be the student's native (or semi-native) language nor belong to one of the major groups of modern European languages (Germanic, Romance). In addition to the regularly taught courses listed under the Foreign Language Requirement, the following is a list of languages that have been offered at Columbia. See the list of languages offered through the Language Resource Center and consult with the Director of Undergraduate Studies about other languages to determine if they are acceptable for the linguistics language requirement.

Ancient Egyptian
 Anglo-Saxon
 Aramaic
 Bosnian/Croatian/Serbian
 Cantonese
 Chagatay
 Czech
 Finnish
 Georgian
 Hindi
 Hungarian
 Indonesian
 Irish
 Kannada
 Kazakh
 Korean
 Nahuatl
 Nepali
 Old Church Slavonic
 Quechua
 Persian
 Polish
 Pulaar
 Romanian
 Sumerian Swahili
 Syriac
 Tajik
 Tamil
 Telugu
 Ukrainian Uzbek
 Urdu
 Vietnamese
 Wolof
 Zulu

LINGUISTICS

LING UN3101 Introduction to Linguistics. 3 points.

An introduction to the study of language from a scientific perspective. The course is divided into three units: language as a system (sounds, morphology, syntax, and semantics), language in context (in space, time, and community), and language of the individual (psycholinguistics, errors, aphasia, neurology of language, and acquisition). Workload: lecture, weekly homework, and final examination.

Spring 2021: LING UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3101	001/10689	T Th 2:40pm - 3:55pm Online Only	John McWhorter	3	286/400

LING UN3102 Endangered Languages in the Global City: Lang, Culture, and Migration in Contemporary NYC. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Of the world's estimated 7,000 languages – representing migrations and historical developments thousands of years old – the majority are oral, little-documented, and increasingly endangered under the onslaught of global languages like English. This course will take the unprecedented, paradoxical linguistic capital of New York City as a lens for examining how immigrants form communities in a new land, how those communities are integrated into the wider society, and how they grapple with linguistic and cultural loss. Interdisciplinary with an experiential learning component, the course will focus on texts, materials, encounters, and fieldwork with three of the city's newest and least-studied indigenous immigrant communities (indigenous Latin Americans, Himalayans, and Central Asians).

Indigeneity, though often invisible or perceived as marginal in global cities like New York, is in fact pervasive and fundamental. Cities now constitute a crucial site for understanding migration and cultural change, with language a vehicle for culture. Studying cultures only in situ (i.e. in their homelands) risks missing a crucial dimension. Students will be immersed in stateless, oral, immigrant cultures while also gaining a hands-on critical understanding of language endangerment and urban sociolinguistic research, first through field experiences and guest speakers (Endangered Language Alliance partners) and then by going out together into communities to work on projects in small teams.

The Endangered Language Alliance (ELA), where the instructor is Co-Director, was formed as a non-profit research institute in 2010 as a forum for researchers, community members, activists, artists, and other New Yorkers to come together to support indigenous and minority languages. ELA's video recordings provide first-hand testimony of endangered languages in the global city – in indigenous languages with English translation – available in few other places. Those texts will be central to this course, supplemented by the new, first-ever, detailed language map of New York City being produced by ELA.

LING UN3103 Language, Brain and Mind. 3.00 points.

The ability to speak distinguishes humans from all other animals, including our closest relatives, the chimpanzees. Why is this so? What makes this possible? This course seeks to answer these questions. We will look at the neurological and psychological foundations of the human faculty of language. How did our brains change to allow language to evolve? Where in our brains are the components of language found? Are our minds specialized for learning language or is it part of our general cognitive abilities to learn? How are words and sentences produced and their meanings recognized? The structure of languages around the world varies greatly; does this have psychological effects for their speakers?

Fall 2020: LING UN3103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3103	001/20727	M W 2:40pm - 3:55pm Online Only	William Foley	3.00	21/80

LING UN3997 Supervised Individual Research. 2-4 points.**LING UN3998 Supervised Individual Research. 2-4 points.**

Supervised Individual Research

LING GU4108 Language History. 3 points.

Prerequisites: LING UN3101

Language, like all components of culture, is structured and conventional, yet can nevertheless change over time. This course examines how language changes, firstly as a self-contained system that changes organically and autonomously, and secondly as contextualized habits that change in time, in space, and in communities. Workload: readings & discussion, weekly problems, and final examination.

Fall 2020: LING GU4108

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4108	001/10233	T Th 1:10pm - 2:25pm Online Only	Meredith Landman	3	9/22

LING GU4120 Language Documentation and Field Methods. 3 points.

Prerequisites: LING UN3101

In light of the predicted loss of up to 90% of the world languages by the end of this century, it has become urgent that linguists take a more active role in documenting and conserving endangered languages. In this course, we will learn the essential skills and technology of language documentation through work with speakers of an endangered language.

Spring 2021: LING GU4120

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4120	001/10074	M W 2:40pm - 3:55pm Online Only	Meredith Landman	3	5/12

LING GU4171 Languages of Africa. 3 points.

The African continent is home not to simply a collection of similar "African dialects," but to at least 1000 distinct languages that belong to five language families, none of them any more closely related than English and its relatives are to Japanese. This includes the Semitic languages that emerged in the Middle East and are now most commonly associated with Arabic and Hebrew, the famous "click" languages of Southern Africa whose origins are still shrouded by mystery, and in the case of Malagasy on Madagascar, the Austronesian family of Southeast Asia and Oceania - the language traces to speakers who travelled over the ocean from Borneo to Africa. This course will examine languages in all of these families, with a focus on how they demonstrate a wide array of

linguistic processes and how they interact with social history, anthropology, and geography.

Fall 2020: LING GU4171

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4171	001/10213	M W 11:40am - 12:50pm Online Only	John McWhorter	3	19/45

LING GU4172 The Structure of Cambodian. 3 points.

Like every other language, Cambodian is totally unique in some respects (these are of interest only to the language learner), and a representative human language in others (these are of interest to all students of language). Thus, for example, like every written language, Cambodian will exhibit diglossia: the grammar and the vocabulary of the written language will differ from that of the spoken language. It is also a member of a language family, known as Austroasiatic, whose members are spoken from NE India through Malaysia, Myanmar, and Indochina. In addition, Cambodian is a structural representative of a given type of language spoken throughout mainland Southeast Asia. That is, in many respects, the structure of Cambodian is similar to those of Lao, Thai, Vietnamese, as well as Hmong. In the "Far West" of SE Asia, are spoken other languages, among them Burmese, Mon, and Karen, which are still similar, but less so. All of these languages are isolating, monosyllabic languages. Of the languages just listed, only Vietnamese and Mon are genetically related to Cambodian. Finally, in its orthography and lexicon, Cambodian has borrowed so extensively from Indic languages, that all literate speakers have a considerable background in practical etymology, and recognize borrowings from, say, Pali, as English speakers generally do not recognize borrowings from Norman French or Latin or Greek. Since the Indic languages belong to Indoeuropean, some unexpected words in Cambodian (e.g. *niam*, *smaeu*) will turn out to have English cognates (like *name*, *same*).

Your goal in this course is not to acquire a speaking knowledge of Khmer. (For that you would need a pedagogical grammar, a native-speaker instructor, and hours and hours of practice in the lab and in the classroom.) It is rather to understand from a linguist's point of view what it is that makes this language a typical language of this part of the world. We will be working through a reference grammar of the language together.

You are each also going to 'adopt' another mainland SE Asian language for purposes of comparison, to experience for yourself what it means for a language to be a member of a linguistic alliance or Sprachbund. You may select your own 'pet' language, and your assignment will then be to 'master' this language in the same way that you have 'mastered' Khmer.

LING GU4190 Discourse and Pragmatics. 3 points.

Prerequisites: LING UN3101

How discourse works; how language is used: oral vs. written modes of language; the structure of discourse; speech acts

and speech genres; the expression of power; authenticity; and solidarity in discourse, dialogicity, pragmatics, and mimesis.

LING GU4206 Advanced Grammar and Grammars. 3 points.

Prerequisites: LING UN3101 *LING W3101*.

An investigation of the possible *types* of grammatical phenomena (argument structure, tense/aspect/mood, relative clauses, classifiers, and deixis). This typological approach is enriched by the reading of actual grammars of languages from Asia, Africa, Australia, and the Americas in which grammatical descriptions are read with an eye to important notional concepts of grammar: reference and categorization, case and role of arguments with predicates (ergativity), tense/aspect/mood. Discussion of meaning is combined with attention to expression (that is, morphology), which yanks our attention towards language change (grammaticalization).

LING GU4376 Phonetics and Phonology. 3 points.

Prerequisites: LING UN3101

An investigation of the sounds of human language, from the perspective of phonetics (articulation and acoustics, including computer-aided acoustic analysis) and phonology (the distribution and function of sounds in individual languages).

Spring 2021: LING GU4376

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4376	001/10690	T Th 11:40am - 12:55pm Online Only	Meredith Landman	3	11/22

LING GU4800 LANGUAGE # SOCIETY. 3.00 points.

How language structure and usage varies according to societal factors such as social history and socioeconomic factors, illustrated with study modules on language contact, language standardization and literacy, quantitative sociolinguistic theory, language allegiance, language, and power

Fall 2020: LING GU4800

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4800	001/20725	T Th 2:40pm - 3:55pm Online Only	John McWhorter	3.00	23/60

LING GU4903 Syntax. 3 points.

Prerequisites: LING UN3101

Syntax - the combination of words - has been at the center of the Chomskyan revolution in Linguistics. This is a technical course which examines modern formal theories of syntax, focusing on later versions of generative syntax (Government and Binding) with secondary attention to alternative models (HPSG, Categorical Grammar).

Fall 2020: LING GU4903

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4903	001/10214	T Th 10:10am - 11:25am Online Only	Meredith Landman	3	15/22

bb2717@columbia.edu

The major in mathematics is an introduction to some of the highlights of the development of theoretical mathematics over the past four hundred years from a modern perspective. This study is also applied to many problems, both internal to mathematics and arising in other disciplines such as physics, cryptography, and finance.

Majors begin by taking either Honors mathematics or the calculus sequence. Students who do not take MATH UN1207 Honors Mathematics A and MATH UN1208 HONORS MATHEMATICS B normally take MATH UN2010 LINEAR ALGEBRA in the second year. Following this, majors begin to learn some aspects of the main branches of modern mathematics: algebra, analysis, and geometry; as well as some of their subdivisions and hybrids (e.g., number theory, differential geometry, and complex analysis). As the courses become more advanced, they also become more theoretical and proof-oriented and less computational.

Aside from the courses offered by the Mathematics Department, cognate courses in areas such as astronomy, chemistry, physics, probability, logic, economics, and computer science can be used toward the major. A cognate course must be a 2000-level (or higher) course and must be approved by

the director of undergraduate studies. In general, a course not taught by the Mathematics Department is a cognate course for the mathematics major if either (a) it has at least two semesters of calculus as a stated prerequisite, or (b) the subject matter in the course is mathematics beyond an elementary level, such as PHIL UN3411 SYMBOLIC LOGIC, in the Philosophy Department, or COMS W3203 DISCRETE MATHEMATICS, in the Computer Science Department.

Another requirement for majors is participation in an undergraduate seminar, usually in the junior or senior year. In these seminars, students gain experience in learning an advanced topic and lecturing on it. In order to be eligible for departmental honors, majors must write a senior thesis.

COURSES FOR FIRST-YEAR STUDENTS

The systematic study of mathematics begins with one of the following three alternative calculus and linear algebra sequences:

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN1202	and CALCULUS IV
- MATH UN2010	and LINEAR ALGEBRA
MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1205	and Accelerated Multivariable Calculus
- MATH UN2010	and LINEAR ALGEBRA
MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1207	and Honors Mathematics A
- MATH UN1208	and HONORS MATHEMATICS B

Credit is allowed for only one calculus and linear algebra sequence.

Calculus I, II is a standard course in single-variable differential and integral calculus; *Calculus III, IV* is a standard course in multivariable differential and integral calculus; *Accelerated Multivariable Calculus* is an accelerated course in multivariable differential and integral calculus.

While *Calculus II* is no longer a prerequisite for *Calculus III*, students are strongly urged to take it before taking *Calculus III*. In particular, students thinking of majoring or concentrating in mathematics or one of the joint majors involving mathematics should take *Calculus II* before taking *Calculus III*. Note that *Calculus II* is a prerequisite for Accelerated Multivariable Calculus, and both *Calculus II* and *Calculus III* are prerequisites for *Calculus IV*.

The third sequence, *Honors Mathematics A- B*, is for exceptionally well-qualified students who have strong Advanced Placement scores. It covers multivariable calculus (MATH UN1201 Calculus III- MATH UN1202 CALCULUS

IV) and linear algebra (MATH UN2010 LINEAR ALGEBRA), with an emphasis on theory.

MATH UN1003 College Algebra and Analytic Geometry does not count toward the degree. Students who take this course do not receive college credit.

ADVANCED PLACEMENT

The department grants 3 credits for a score of 4 or 5 on the AP Calculus AB exam provided students complete MATH UN1102 CALCULUS II or MATH UN1201 Calculus III with a grade of C or better. The department grants 3 credits for a score of 4 on the AP Calculus BC exam provided students complete MATH UN1102 CALCULUS II or MATH UN1201 Calculus III with a grade of C or better. The department grants 6 credits for a score of 5 on the AP Calculus BC exam provided students complete MATH UN1201 Calculus III or MATH UN1205 Accelerated Multivariable Calculus MATH UN1207 Honors Mathematics A with a grade of C or better. Students can receive credit for only one calculus sequence.

PLACEMENT IN THE CALCULUS SEQUENCES

Calculus I

Students who have essentially mastered a precalculus course and those who have a score of 3 or less on an Advanced Placement (AP) exam (either AB or BC) should begin their study of calculus with MATH UN1101 CALCULUS I.

Calculus II and III

Students with a score of 4 or 5 on the AB exam, 4 on the BC exam, or those with no AP score but with a grade of A in a full year of high school calculus may begin with either MATH UN1102 CALCULUS II or MATH UN1201 Calculus III. Note that such students who decide to start with *Calculus III* may still need to take *Calculus II* since it is a requirement or prerequisite for other courses. In particular, they MUST take *Calculus II* before going on to MATH UN1202 CALCULUS IV. Students with a score of 5 on the BC exam may begin with *Calculus III* and do not need to take *Calculus II*.

Those with a score of 4 or 5 on the AB exam or 4 on the BC exam may receive 3 points of AP credit upon completion of *Calculus II* with a grade of C or higher. Those students with a score of 5 on the BC exam may receive 6 points of AP credit upon completion of *Calculus III* with a grade of C or higher.

Accelerated Multivariable Calculus

Students with a score of 5 on the AP BC exam or 7 on the IB HL exam may begin with MATH UN1205 Accelerated Multivariable Calculus. Upon completion of this course with a grade of C or higher, they may receive 6 points of AP credit.

Honors Mathematics A

Students who want a proof-oriented theoretical sequence and have a score of 5 on the BC exam may begin with MATH UN1207 Honors Mathematics A, which is especially designed for mathematics majors. Upon completion of this course with a grade of C or higher, they may receive 6 points of AP credit.

TRANSFERS INSIDE THE CALCULUS SEQUENCES

Students who wish to transfer from one calculus course to another are allowed to do so beyond the date specified on the Academic Calendar. They are considered to be adjusting their level, not changing their program. However, students must obtain the approval of the new instructor and their advising dean prior to reporting to the Office of the Registrar.

GRADING

No course with a grade of D or lower can count toward the major, interdepartmental major, or concentration. Students who are doing a double major cannot double count courses for their majors.

DEPARTMENTAL HONORS

In order to be eligible for departmental honors, majors must write a senior thesis. To write a senior thesis, students must register for MATH UN3999 Senior Thesis in Mathematics in the fall semester of their senior year. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

PROFESSORS

- Mohammed Abouzaid

- Profs. de Jong, Florea, Harris, Khovanov, Savin, Sawin, Thaddeus (*Spring 2021*)

MAJOR IN MATHEMATICS

The major requires 40-42 points as follows:

Select one of the following three calculus and linear algebra sequences (13-15 points including Advanced Placement Credit):

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN1202	and CALCULUS IV
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1205	and Accelerated Multivariable Calculus
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1207	and Honors Mathematics A
- MATH UN1208	and HONORS MATHEMATICS B

15 points in the following required courses:

MATH UN3951	Undergraduate Seminars in Mathematics I
- MATH UN3952	and Undergraduate Seminars in Mathematics II (at least one term)

MATH GU4041	INTRO MODERN ALGEBRA I
- MATH GU4042	and INTRO MODERN ALGEBRA II

MATH GU4061	INTRO MODERN ANALYSIS I
- MATH GU4062	and INTRO MODERN ANALYSIS II

12 points in any combination of mathematics and cognate courses. **

* Students who are not contemplating graduate study in mathematics may replace one or both of the two terms of MATH GU4061- MATH GU4062 by one or two of the following courses: MATH UN2500 ANALYSIS AND OPTIMIZATION, MATH UN3007 Complex Variables, MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS, or MATH GU4032 Fourier Analysis.

** A course not taught by the Mathematics Department is a cognate course for the mathematics major if either (a) it has at least two semesters of calculus as a stated prerequisite and is a 2000-level (or higher) course, or (b) the subject matter in the course is mathematics beyond an elementary level, such as PHIL UN3411 SYMBOLIC LOGIC, in the Philosophy Department, or COMS W3203 DISCRETE MATHEMATICS, in the Computer Science Department. In exceptional cases, the director of undergraduate studies may approve the substitution of certain more advanced courses for those mentioned above.

The program of study should be planned with a departmental adviser before the end of the sophomore year. Majors who are planning on graduate studies in mathematics are urged to obtain

a reading knowledge of one of the following languages: French, German, or Russian.

Majors are offered the opportunity to write an honors senior thesis under the guidance of a faculty member. Interested students should contact the director of undergraduate studies.

MAJOR IN APPLIED MATHEMATICS

The major requires 38-40 points as follows:

Select one of the following three calculus and linear algebra sequences (13-15 points including Advanced Placement Credit):

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN1202	and CALCULUS IV
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1205	and Accelerated Multivariable Calculus
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1207	and Honors Mathematics A
- MATH UN1208	and HONORS MATHEMATICS B

Select one of the following three courses:

MATH UN2500	ANALYSIS AND OPTIMIZATION
-------------	---------------------------

MATH GU4032	Fourier Analysis
-------------	------------------

MATH GU4061	INTRO MODERN ANALYSIS I
-------------	-------------------------

APMA E4901	Seminar: Problem in Applied Mathematics (junior year)
------------	---

APMA E4903	Seminar: Problems in Applied Mathematics (senior year)
------------	--

18 points in electives, selected from the following (other courses may be used with the approval of the Applied Mathematics Committee):

MATH UN2500	ANALYSIS AND OPTIMIZATION
-------------	---------------------------

MATH UN3007	Complex Variables
or MATH GU4065	Honors Complex Variables
or APMA E4204	Functions of a Complex Variable

MATH UN3027	Ordinary Differential Equations
MATH UN3028	PARTIAL DIFFERENTIAL EQUATIONS

or APMA E4200	Partial Differential Equations
or APMA E6301	Analytic methods for partial differential equations

MATH GU4032	Fourier Analysis
-------------	------------------

APMA E4300	Computational Math: Introduction to Numerical Methods
------------	---

APMA E4101	Introduction to Dynamical Systems
------------	-----------------------------------

APMA E4150	Applied Functional Analysis
APMA E4400	Introduction to Biophysical Modeling

MAJOR IN COMPUTER SCIENCE–MATHEMATICS

The goal of this interdepartmental major is to provide substantial background in each of these two disciplines, focusing on some of the parts of each which are closest to the other. Students intending to pursue a Ph.D. program in either discipline are urged to take additional courses, in consultation with their advisers.

The major requires 20 points in computer science, 19–21 points in mathematics, and two 3-point electives in either computer science or mathematics.

Computer Science

COMS W1004	Introduction to Computer Science and Programming in Java
or COMS W1007	Honors Introduction to Computer Science
COMS W3134	Data Structures in Java
or COMS W3137	Honors Data Structures and Algorithms
COMS W3157	Advanced Programming
COMS W3203	DISCRETE MATHEMATICS
COMS W3261	Computer Science Theory
CSEE W3827	Fundamentals of Computer Systems

Mathematics

Select one of the following three calculus and linear algebra sequences (13–15 points including Advanced Placement Credit):

MATH UN1101 - MATH UN1102 - MATH UN1201 - MATH UN1202 - MATH UN2010	CALCULUS I and CALCULUS II and Calculus III and CALCULUS IV and LINEAR ALGEBRA
MATH UN1101 - MATH UN1102 - MATH UN1205 - MATH UN2010	CALCULUS I and CALCULUS II and Accelerated Multivariable Calculus and LINEAR ALGEBRA
MATH UN1101 - MATH UN1102 - MATH UN1207 - MATH UN1208	CALCULUS I and CALCULUS II and Honors Mathematics A and HONORS MATHEMATICS B
MATH UN3951	Undergraduate Seminars in Mathematics I
or MATH UN3952	Undergraduate Seminars in Mathematics II
MATH GU4041	INTRO MODERN ALGEBRA I

Electives

Select two of the following courses:

CSOR W4231	Analysis of Algorithms I
------------	--------------------------

COMS W4241	Numerical Algorithms and Complexity
MATH BC2006	Combinatorics
MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH UN3007	Complex Variables
MATH UN3020	Number Theory and Cryptography
MATH UN3386	Differential Geometry
MATH GU4051	Topology
MATH GU4061	INTRO MODERN ANALYSIS I

MAJOR IN ECONOMICS–MATHEMATICS

For a description of the joint major in economics-mathematics, see the *Economics* section of this bulletin.

MAJOR IN MATHEMATICS–STATISTICS

The program is designed to prepare the student for: (1) a career in industries such as finance and insurance that require a high level of mathematical sophistication and a substantial knowledge of probability and statistics, and (2) graduate study in quantitative disciplines. Students choose electives in finance, actuarial science, operations research, or other quantitative fields to complement requirements in mathematics, statistics, and computer science.

Mathematics

Select one of the following sequences:

MATH UN1101 - MATH UN1102 - MATH UN1201 - MATH UN2010 - MATH UN2500	CALCULUS I and CALCULUS II and Calculus III and LINEAR ALGEBRA and ANALYSIS AND OPTIMIZATION
MATH UN1101 - MATH UN1102 - MATH UN1205 - MATH UN2010 - MATH UN2500	CALCULUS I and CALCULUS II and Accelerated Multivariable Calculus and LINEAR ALGEBRA and ANALYSIS AND OPTIMIZATION
MATH UN1207 - MATH UN1208 - MATH UN2500	Honors Mathematics A and HONORS MATHEMATICS B and ANALYSIS AND OPTIMIZATION (with approval from the adviser)

Statistics

Introductory Course

STAT UN1201	Calculus-Based Introduction to Statistics
-------------	---

Required Courses

STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
Select one of the following courses:	
STAT GU4207	Elementary Stochastic Processes
STAT GU4262	Stochastic Processes for Finance
STAT GU4264	STOCHASTIC PROCESSES- APPLIC
STAT GU4265	Stochastic Methods in Finance

Computer Science

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
ENGI E1006	Introduction to Computing for Engineers and Applied Scientists
COMS W1007	Honors Introduction to Computer Science

or an advanced computer science offering in programming

Electives

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

Students interested in modeling applications are recommended to take MATH UN3027 Ordinary Differential Equations and MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS.

Students interested in finance are recommended to take MATH GR5010 Introduction to the Mathematics of Finance, STAT GU4261 Statistical Methods in Finance, and STAT GU4221 Time Series Analysis.

Students interested in graduate study in mathematics or in statistics are recommended to take MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 Linear Regression Models with STAT GU4282 Linear Regression and Time Series Methods , and to take among their electives STAT GU4281 Theory of Interest .

CONCENTRATION IN MATHEMATICS

The concentration requires the following:

Mathematics

Select one of the following three multivariable calculus and linear algebra sequences:

MATH UN1201 - MATH UN1202 - MATH UN2010	Calculus III and CALCULUS IV and LINEAR ALGEBRA
MATH UN1205 - MATH UN2010	Accelerated Multivariable Calculus and LINEAR ALGEBRA
MATH UN1207 - MATH UN1208	Honors Mathematics A and HONORS MATHEMATICS B

Additional Courses

Select at least 12 additional points from any of the courses offered by the department numbered 2000 or higher.

For mathematics courses taken in other departments, consult with the director of undergraduate studies.

MATH UN1101 CALCULUS I. 3.00 points.

Prerequisites: (see Courses for First-Year Students). Functions, limits, derivatives, introduction to integrals, or an understanding of pre-calculus will be assumed. (SC)

Fall 2020: MATH UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1101	002/11292	M W 10:10am - 11:25am Online Only	Daniele Alessandrini	3.00	28/116
MATH 1101	003/11293	M W 11:40am - 12:55pm Online Only	Daniele Alessandrini	3.00	40/116
MATH 1101	004/11294	M W 1:10pm - 2:25pm Online Only	Akash Sengupta	3.00	110/120
MATH 1101	005/11295	M W 2:40pm - 3:55pm Online Only	Akash Sengupta	3.00	114/120
MATH 1101	006/11296	M W 4:10pm - 5:25pm Online Only	Chung Hang Kwan	3.00	37/40
MATH 1101	007/11297	T Th 10:10am - 11:25am Online Only	George Dragomir	3.00	79/110
MATH 1101	008/11298	T Th 2:40pm - 3:55pm Online Only	Robin Zhang	3.00	33/40
MATH 1101	009/11299	T Th 1:10pm - 2:25pm Online Only	George Dragomir	3.00	89/120
MATH 1101	012/21307	T Th 11:40am - 12:55pm Online Only	Panagiota Daskalopoulos	3.00	69/100

Spring 2021: MATH UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1101	001/12308	M W 2:40pm - 3:55pm Online Only	Sayan Das	3.00	14/35
MATH 1101	002/12307	M W 4:10pm - 5:25pm Online Only	Kevin Smith	3.00	31/35
MATH 1101	003/12306	T Th 10:10am - 11:25am Online Only	Panagiota Daskalopoulos	3.00	62/100
MATH 1101	004/12305	T Th 11:40am - 12:55pm	George Dragomir	3.00	82/100

MATH 1101	005/12304	Online Only T Th 4:10pm - 5:25pm	Tobias Schaefer	3.00	20/40
MATH 1101	AU1/19222	Online Only	Sayan Das	3.00	1/5

MATH UN1102 CALCULUS II. 3.00 points.

Prerequisites: MATH UN1101 or the equivalent.

Prerequisites: MATH UN1101 or the equivalent. Methods of integration, applications of the integral, Taylors theorem, infinite series. (SC)

Fall 2020: MATH UN1102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1102	001/11302	M W 11:40am - 12:55pm Online Only	Maithreya Sitaraman	3.00	16/30
MATH 1102	002/11303	M W 2:40pm - 3:55pm Online Only	Zachary Sylvan	3.00	94/100
MATH 1102	003/11304	M W 4:10pm - 5:25pm Online Only	Zachary Sylvan	3.00	40/110
MATH 1102	005/00434	T Th 2:40pm - 3:55pm Room TBA	Lindsay Piechnik	3.00	95/100
MATH 1102	006/11306	T Th 6:10pm - 7:25pm Online Only	Elliott Stein	3.00	38/45

MATH 1102	004/12300	T Th 1:10pm - 2:25pm Online Only	Evgeni Dimitrov	3.00	54/100
MATH 1102	AU1/19280		Maithreya Sitaraman	3.00	1/5

MATH UN1201 Calculus III. 3 points.

Prerequisites: MATH UN1101 or the equivalent

Vectors in dimensions 2 and 3, complex numbers and the complex exponential function with applications to differential equations, Cramer's rule, vector-valued functions of one variable, scalar-valued functions of several variables, partial derivatives, gradients, surfaces, optimization, the method of Lagrange multipliers. (SC)

Fall 2020: MATH UN1201

MATH 1202	002/00085	T Th 1:10pm - 2:25pm Room TBA	Daniela De Silva	3.00	46/100
MATH 1202	AU2/19283		Daniela De Silva	3.00	1/5

MATH UN1205 Accelerated Multivariable Calculus. 4 points.

Prerequisites: (MATH UN1101 and MATH UN1102)

Vectors in dimensions 2 and 3, vector-valued functions of one variable, scalar-valued functions of several variables, partial derivatives, gradients, optimization, Lagrange multipliers, double and triple integrals, line and surface integrals, vector calculus. This course is an accelerated version of MATH UN1201 - MATH UN1202. Students taking this course may not receive credit for MATH UN1201 and MATH UN1202.

Fall 2020: MATH UN1205

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1205	001/11425	M W 8:40am - 9:55am Online Only	Guillaume Remy	4	57/65

Spring 2021: MATH UN1205

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1205	001/12295	T Th 1:10pm - 2:25pm Online Only	Kanstantsin Matetski	4	17/50

MATH UN1207 Honors Mathematics A. 4 points.

Prerequisites: (see Courses for First-Year Students). The second term of this course may not be taken without the first. Multivariable calculus and linear algebra from a rigorous point of view. Recommended for mathematics majors. Fulfills the linear algebra requirement for the major. (SC)

Fall 2020: MATH UN1207

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1207	001/11430	T Th 1:10pm - 2:25pm Online Only	Evan Warner	4	55/110

MATH UN1208 HONORS MATHEMATICS B. 4.00 points.

Prerequisites: (see Courses for First-Year Students).

Prerequisites: (see Courses for First-Year Students). The second term of this course may not be taken without the first. Multivariable calculus and linear algebra from a rigorous point of view. Recommended for mathematics majors. Fulfills the linear algebra requirement for the major. (SC)

Spring 2021: MATH UN1208

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1208	001/12294	T Th 1:10pm - 2:25pm Online Only	Evan Warner	4.00	41/100

MATH UN2000 INTRO TO HIGHER MATHEMATICS. 3.00 points.

Introduction to understanding and writing mathematical proofs. Emphasis on precise thinking and the presentation of mathematical results, both in oral and in written form. Intended for students who are considering majoring in mathematics but wish additional training. CC/GS: Partial Fulfillment of Science Requirement. BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA)

Fall 2020: MATH UN2000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2000	001/11446	M W 10:10am - 11:25am Online Only	Dusa McDuff	3.00	32/49

Spring 2021: MATH UN2000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2000	001/12293	M W 10:10am - 11:25am Online Only	Gus Schrader	3.00	28/100

MATH UN2010 LINEAR ALGEBRA. 3.00 points.

Prerequisites: MATH UN1201 or the equivalent.

Prerequisites: MATH UN1201 or the equivalent. Matrices, vector spaces, linear transformations, eigenvalues and eigenvectors, canonical forms, applications. (SC)

Fall 2020: MATH UN2010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2010	001/00117	T Th 8:40am - 9:55am Room TBA	David Bayer	3.00	22/100
MATH 2010	002/00118	T Th 10:10am - 11:25am Room TBA	David Bayer	3.00	34/100
MATH 2010	003/11450	M W 4:10pm - 5:25pm Online Only	Francesco Lin	3.00	75/100
MATH 2010	004/11453	M W 11:40am - 12:55pm Online Only	Kyle Hayden	3.00	90/100
MATH 2010	005/11455	M W 8:40am - 9:55am Online Only	Giulia Sacca	3.00	44/100

Spring 2021: MATH UN2010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2010	001/12292	M W 10:10am - 11:25am Online Only	Konstantin Aleshkin	3.00	22/100
MATH 2010	002/12291	M W 1:10pm - 2:25pm Online Only	Gus Schrader	3.00	84/120
MATH 2010	003/12290	T Th 11:40am - 12:55pm Online Only	Stephen Miller	3.00	75/100
MATH 2010	004/12289	T Th 1:10pm - 2:25pm Online Only	Andrew Ahn	3.00	19/100
MATH 2010	005/12288	T Th 6:10pm - 7:25pm Online Only	Elliott Stein	3.00	29/45

MATH AU/19231 Andrew 3.00 1/5
2010 Ahn

MATH UN2020 Honors Linear Algebra. 3 points.
Not offered during 2020-21 academic year.

Prerequisites: MATH UN1201. A more extensive treatment of the material in MATH UN2010, with increased emphasis on proof. Not to be taken in addition to MATH UN2010 or MATH UN1207-MATH UN1208.

MATH UN2030 ORDINARY DIFFERENTIAL EQUATION. 3.00 points.

Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent.

Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent. Special differential equations of order one. Linear differential equations with constant and variable coefficients. Systems of such equations. Transform and series solution techniques. Emphasis on applications

Fall 2020: MATH UN2030

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2030	001/11457	M W 1:10pm - 2:25pm Online Only	Florian Johne	3.00	48/116

MATH 2030	002/12286	T Th 10:10am - 11:25am Online Only	Aleksander Doan	3.00	48/100

MATH UN2500 ANALYSIS AND OPTIMIZATION. 3.00 points.

Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent and MATH UN2010.

Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent and MATH UN2010. Mathematical methods for economics. Quadratic forms, Hessian, implicit functions. Convex sets, convex functions. Optimization, constrained optimization, Kuhn-Tucker conditions. Elements of the calculus of variations and optimal control. (SC)

Fall 2020: MATH UN2500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2500	001/11464	T Th 1:10pm - 2:25pm Online Only	Kanstantsin Matetski	3.00	28/64

MATH UN3007 Complex Variables. 3 points.

Prerequisites: MATH UN1202 An elementary course in functions of a complex variable.

Fundamental properties of the complex numbers, differentiability, Cauchy-Riemann equations. Cauchy integral theorem. Taylor and Laurent series, poles, and essential singularities. Residue theorem and conformal mapping.(SC)

Fall 2020: MATH UN3007

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3007	001/11470	M W 2:40pm - 3:55pm Online Only	Nicholas Salter	3	57/64

MATH UN3020 Number Theory and Cryptography. 3 points.

Prerequisites: one year of calculus.

Prerequisite: One year of Calculus. Congruences. Primitive roots. Quadratic residues. Contemporary applications.

MATH UN3025 Making, Breaking Codes. 3 points.

Prerequisites: (MATH UN1101 and MATH UN1102 and MATH UN1201) and and MATH UN2010.

A concrete introduction to abstract algebra. Topics in abstract algebra used in cryptography and coding theory.

Fall 2020: MATH UN3025

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3025	001/11471	T Th 1:10pm - 2:25pm Online Only	Dorian Goldfeld	3	83/116

MATH UN3027 Ordinary Differential Equations. 3 points.

Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent.

Corequisites: MATH UN2010

Equations of order one; systems of linear equations. Second-order equations. Series solutions at regular and singular points. Boundary value problems. Selected applications.

Fall 2020: MATH UN3027

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3027	001/11478	T Th 11:40am - 12:55pm Online Only	Simon Brendle	3	32/116

MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS. 3.00 points.

Prerequisites: MATH UN3027 and MATH UN2010 or the equivalent

Prerequisites: MATH UN3027 and MATH UN2010 or the equivalent Introduction to partial differential equations. First-

order equations. Linear second-order equations; separation of variables, solution by series expansions. Boundary value problems

Spring 2021: MATH UN3028

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3028	001/12282	M W 1:10pm - 2:25pm Online Only	Florian John	3.00	45/100

MATH UN3050 Discrete Time Models in Finance. 3 points.

Prerequisites: (MATH UN1102 and MATH UN1201) or (MATH UN1101 and MATH UN1102 and MATH UN1201) and MATH UN2010 Recommended: MATH UN3027 (or MATH UN2030 and SIEO W3600).

Elementary discrete time methods for pricing financial instruments, such as options. Notions of arbitrage, risk-neutral valuation, hedging, term-structure of interest rates.

Spring 2021: MATH UN3050

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3050	001/13870	M W 6:10pm - 7:25pm 312 Mathematics Building	Mikhail Smirnov	3	55/60

MATH UN3386 Differential Geometry. 3 points.

Prerequisites: MATH UN1202 or the equivalent. Local and global differential geometry of submanifolds of Euclidean 3-space. Frenet formulas for curves. Various types of curvatures for curves and surfaces and their relations. The Gauss-Bonnet theorem.

Fall 2020: MATH UN3386

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3386	001/11484	T Th 11:40am - 12:55pm Online Only	Richard Hamilton	3	25/49

MATH UN3951 Undergraduate Seminars in Mathematics I. 3 points.

Prerequisites: Two years of calculus, at least one year of additional mathematics courses, and the director of undergraduate studies' permission.

The subject matter is announced at the start of registration and is different in each section. Each student prepares talks to be given to the seminar, under the supervision of a faculty member or senior teaching fellow.

Fall 2020: MATH UN3951

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3951	001/00120		Daniela De Silva	3	31/64
MATH 3951	002/00121	M W 6:10pm - 7:25pm Room TBA	Lindsay Piechnik	3	7/15

MATH UN3952 Undergraduate Seminars in Mathematics II. 3 points.

Prerequisites: two years of calculus, at least one year of additional mathematics courses, and the director of undergraduate studies' permission.

The subject matter is announced at the start of registration and is different in each section. Each student prepares talks to be given to the seminar, under the supervision of a faculty member or senior teaching fellow. Prerequisite: two years of calculus, at least one year of additional mathematics courses, and the director of undergraduate studies' permission.

Spring 2021: MATH UN3952

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3952	001/00688		David Bayer	3	41/60

MATH GU4007 Analytic Number Theory. 3 points.

Prerequisites: MATH UN3007

A one semester course covering the theory of modular forms, zeta functions, L-functions, and the Riemann hypothesis. Particular topics covered include the Riemann zeta function, the prime number theorem, Dirichlet characters, Dirichlet L-functions, Siegel zeros, prime number theorem for arithmetic progressions, SL(2, Z) and subgroups, quotients of the upper half-plane and cusps, modular forms, Fourier expansions of modular forms, Hecke operators, L-functions of modular forms.

Spring 2021: MATH GU4007

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4007	001/12281	T Th 11:40am - 12:55pm Online Only	Dorian Goldfeld	3	13/50

MATH GU4032 Fourier Analysis. 3 points.

Prerequisites: three terms of calculus and linear algebra or four terms of calculus.

Prerequisite: three terms of calculus and linear algebra or four terms of calculus. Fourier series and integrals, discrete analogues, inversion and Poisson summation formulae, convolution. Heisenberg uncertainty principle. Stress on the application of Fourier analysis to a wide range of disciplines.

MATH GU4041 INTRO MODERN ALGEBRA I. 3 points.

Prerequisites: MATH UN1102 and MATH UN1202 and MATH UN2010 or the equivalent

The second term of this course may not be taken without the first. Groups, homomorphisms, rings, ideals, fields, polynomials, field extensions, Galois theory.

Fall 2020: MATH GU4041

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4041	001/11487	M W 2:40pm - 3:55pm Online Only	Robert Friedman	3	65/110

Spring 2021: MATH GU4041

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

MATH 4041	001/12280	M W 10:10am - 11:25am Online Only	Daniele Alessandrini	3	34/100
MATH 4041	AU1/19290		Daniele Alessandrini	3	2/5

MATH GU4042 INTRO MODERN ALGEBRA II. 3 points.

Prerequisites: MATH UN1102 and MATH UN1202 and MATH UN2010 or the equivalent.

The second term of this course may not be taken without the first. Rings, homomorphisms, ideals, integral and Euclidean domains, the division algorithm, principal ideal and unique factorization domains, fields, algebraic and transcendental extensions, splitting fields, finite fields, Galois theory.

Fall 2020: MATH GU4042

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4042	001/11488	M W 1:10pm - 2:25pm Online Only	Mikhail Khovanov	3	12/35

Spring 2021: MATH GU4042

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4042	001/12279	M W 2:40pm - 3:55pm Online Only	Inbar Klang	3	42/100
MATH 4042	AU1/19291		Inbar Klang	3	1/5

MATH GU4043 Algebraic Number Theory. 3 points.

Prerequisites: MATH GU4041 and MATH GU4042 or the equivalent

Algebraic number fields, unique factorization of ideals in the ring of algebraic integers in the field into prime ideals. Dirichlet unit theorem, finiteness of the class number, ramification. If time permits, p-adic numbers and Dedekind zeta function.

MATH GU4044 Representations of Finite Groups. 3 points.

Prerequisites: MATH UN2010 and MATH GU4041 or the equivalent.

Finite groups acting on finite sets and finite dimensional vector spaces. Group characters. Relations with subgroups and factor groups. Arithmetic properties of character values. Applications to the theory of finite groups: Frobenius groups, Hall subgroups and solvable groups. Characters of the symmetric groups. Spherical functions on finite groups.

Fall 2020: MATH GU4044

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4044	001/11490	T Th 1:10pm - 2:25pm Online Only	Chao Li	3	10/19

MATH GU4045 Algebraic Curves. 3 points.

Prerequisites: (MATH GU4041 and MATH GU4042) and MATH UN3007

Plane curves, affine and projective varieties, singularities, normalization, Riemann surfaces, divisors, linear systems, Riemann-Roch theorem.

MATH GU4051 Topology. 3 points.

Prerequisites: (MATH UN1202 and MATH UN2010) and rudiments of group theory (e.g., MATH GU4041). MATH UN1208 or MATH GU4061 is recommended, but not required. Metric spaces, continuity, compactness, quotient spaces. The fundamental group of topological space. Examples from knot theory and surfaces. Covering spaces.

Fall 2020: MATH GU4051

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4051	001/11491	T Th 11:40am - 12:55pm Online Only	Stephen Miller	3	27/64

MATH GU4053 Introduction to Algebraic Topology. 3 points.

Prerequisites: MATH UN2010 and MATH GU4041 and MATH GU4051

The study of topological spaces from algebraic properties, including the essentials of homology and the fundamental group. The Brouwer fixed point theorem. The homology of surfaces. Covering spaces.

MATH GU4061 INTRO MODERN ANALYSIS I. 3 points.

Prerequisites: MATH UN1202 or the equivalent, and MATH UN2010. The second term of this course may not be taken without the first.

Prerequisites: MATH UN1202 or the equivalent, and MATH UN2010. The second term of this course may not be taken without the first. Real numbers, metric spaces, elements of general topology, sequences and series, continuity, differentiation, integration, uniform convergence, Ascoli-Arzelà theorem, Stone-Weierstrass theorem.

Fall 2020: MATH GU4061

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4061	001/11494	T Th 2:40pm - 3:55pm Online Only	Henri Roesch	3	34/100
MATH 4061	002/11495	T Th 4:10pm - 5:25pm Online Only	Henri Roesch	3	30/100

Spring 2021: MATH GU4061

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4061	001/12278	M W 1:10pm - 2:25pm Online Only	Hui Yu	3	39/100
MATH 4061	002/12277	M W 4:10pm - 5:25pm Online Only	Hui Yu	3	32/100

MATH GU4052 Introduction to Knot Theory. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: MATH GU4051 Topology and / or MATH GU4061 Introduction To Modern Analysis I (or equivalents). Recommended (can be taken concurrently): MATH UN2010 linear algebra, or equivalent.

The study of algebraic and geometric properties of knots in R^3 , including but not limited to knot projections and Reidemeister's theorem, Seifert surfaces, braids, tangles, knot polynomials, fundamental group of knot complements. Depending on time and student interest, we will discuss more advanced topics like knot concordance, relationship to 3-manifold topology, other algebraic knot invariants.

MATH GU4062 INTRO MODERN ANALYSIS II. 3.00 points.

Prerequisites: MATH UN1202 or the equivalent, and MATH UN2010. The second term of this course may not be taken without the first.

Prerequisites: MATH UN1202 or the equivalent, and MATH UN2010. The second term of this course may not be taken without the first. Power series, analytic functions, Implicit function theorem, Fubini theorem, change of variables formula, Lebesgue measure and integration, function spaces

Fall 2020: MATH GU4062

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MATH 4062	001/12276	T Th 4:10pm - 5:25pm Online Only	Henri Roesch	3.00	20/100

MATH GU4065 Honors Complex Variables. 3 points.

Prerequisites: (MATH UN1207 and MATH UN1208) or MATH GU4061

A theoretical introduction to analytic functions. Holomorphic functions, harmonic functions, power series, Cauchy-Riemann equations, Cauchy's integral formula, poles, Laurent series, residue theorem. Other topics as time permits: elliptic functions, the gamma and zeta function, the Riemann mapping theorem, Riemann surfaces, Nevanlinna theory.

Fall 2020: MATH GU4065

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4065	001/11503	T Th 10:10am - 11:25am Online Only	Julien Dubédat	3	16/45

MATH GU4081 Introduction to Differentiable Manifolds. 3 points.

Prerequisites: (MATH GU4051 or MATH GU4061) and MATH UN2010

Concept of a differentiable manifold. Tangent spaces and vector fields. The inverse function theorem. Transversality and Sard's theorem. Intersection theory. Orientations. Poincaré-Hopf theorem. Differential forms and Stokes' theorem.

Spring 2021: MATH GU4081

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

-----------	-----------	-----------------------------------	-------------	---	-------

MATH GU4155 Probability Theory. 3 points.

Prerequisites: MATH GU4061 or MATH UN3007

A rigorous introduction to the concepts and methods of mathematical probability starting with basic notions and making use of combinatorial and analytic techniques. Generating functions. Convergence in probability and in distribution. Discrete probability spaces, recurrence and transience of random walks. Infinite models, proof of the law of large numbers and the central limit theorem. Markov chains.

Spring 2021: MATH GU4155

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4155	001/12275	T Th 2:40pm - 3:55pm Online Only	Ioannis Karatzas	3	13/55

MATH GU4391 INTRO TO QUANTUM MECHANICS. 3 points.

This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as well as their physical motivations and consequences. It is meant to be accessible to students with no previous formal training in quantum theory. The role of symmetry, groups and representations will be stressed.

Fall 2020: MATH GU4391

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4391	001/14322	T Th 4:10pm - 5:25pm 203 Mathematics Building	Peter Woit	3	15/40

MATH GU4392 INTRO TO QUANTUM MECHANICS II. 3.00 points.

Not offered during 2020-21 academic year.

Continuation of GU4391. This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as well as their physical motivations and consequences. It is meant to be accessible to students with no previous formal training in quantum theory. The role of symmetry, groups and representations will be stressed

Spring 2021: MATH GU4392

MATH GR5010 Introduction to the Mathematics of Finance. 3 points.

Prerequisites: MATH UN1102 and MATH UN1201, or their equivalents.

Introduction to mathematical methods in pricing of options, futures and other derivative securities, risk management, portfolio management and investment strategies with an

emphasis of both theoretical and practical aspects. Topics include: Arithmetic and Geometric Brownian motion processes, Black-Scholes partial differential equation, Black-Scholes option pricing formula, Ornstein-Uhlenbeck processes, volatility models, risk models, value-at-risk and conditional value-at-risk, portfolio construction and optimization methods.

Fall 2020: MATH GR5010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MEDIEVAL AND RENAISSANCE STUDIES

Program Director: Prof. Adam Kosto, 404 Fayerweather Hall, ajkosto@columbia.edu

Program Administrator: To be announced, medren@columbia.edu

Medieval and Renaissance studies is an interdisciplinary program in which a student combines a concentration in medieval or Renaissance civilization with a major or concentration in one of the following departments:

- Art History and Archaeology
- Classics
- East Asian Languages and Cultures
- English and Comparative Literature
- French and Romance Philology
- Germanic Languages
- History
- Italian
- Latin American and Iberian Cultures

- Middle Eastern, South Asian, and African Studies
- Music
- Philosophy
- Religion
- Slavic Languages

For more information about the special concentration in medieval and Renaissance studies, visit <http://medren.columbia.edu/>.

EXECUTIVE COMMITTEE OF THE INTERDEPARTMENTAL COMMITTEE ON MEDIEVAL AND RENAISSANCE STUDIES

Christopher Baswell (English and Comparative Literature)
 Susan Boynton (Music; Program Director, Medieval and Renaissance Studies)
 Consuelo Dutschke (Rare Book and Manuscript Library)
 Rachel Eisendrath (Barnard Department of English, Barnard Medieval and Renaissance Studies)
 Carmela Franklin (Classics)
 Seth Kimmel (Latin American and Iberian Cultures)
 Adam Kosto (History)
 Pamela Smith (History)
 Alan Stewart (English and Comparative Literature)
 Jesus Rodriguez-Velasco (Latin American and Iberian Cultures)
 Michael Waters (Art History and Archaeology)
 Eliza Zingesser (French and Romance Philology)

Full Faculty List: <https://medren.columbia.edu/people>

SPECIAL CONCENTRATION IN MEDIEVAL AND RENAISSANCE STUDIES

Students considering the special concentration in medieval and Renaissance studies should consult with the director in advance of course registration to ensure that their selection of courses will count towards the special concentration.

Please note that requirements for the Special Concentration were revised November 2017.

In addition to fulfilling the requirements for a departmental major or concentration, students with this special concentration should plan on taking an additional four (4) courses in other departments of the program, to be chosen in consultation with an appropriate member of the committee.

Students must also demonstrate an ability to work with original language sources (other than in Early Modern English) from the medieval and/or Early Modern periods, either through language coursework focusing on the historical language (e.g., LATN UN3033 MEDIEVAL LANGUAGE # LITERATURE, MDES GU4214 Fourth Year Classical Arabic I) or through

research (e.g., a senior thesis or seminar paper with substantial use of original language sources). Any courses outside the major used to demonstrate the language requirement may also count toward the course requirement for the special concentration. Students should gain approval of the director of the program in advance for plans to fulfill this language requirement.

MRST GU4201 History of the Medieval Book: Manuscripts as Material Culture. 4 points.

This course will study the medieval book as a multimedia physical and cultural artifact. We will begin with a study of the technology of book production from Late Antiquity through the High Middle Ages, including the shift from roll to codex, the preparation of parchment, the development of inks and pigments, and techniques for decoration. Next, the class will turn to the various uses of books within both religious and secular contexts, as well as to the use of books as a medium of self-representation and the transfer and transformation of bodies of religious and scientific knowledge. Finally, the course will consider the use of the growing number of digital manuscript collections accessible on the internet for teaching and research.

MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES

Turkish: Zuleyha Colak, 412 Knox; 212-854-0473; zc2208@columbia.edu

The undergraduate program in Middle Eastern, South Asian, and African studies (MESAAS) offers students the opportunity to study in depth the cultures, ideas, histories, and politics of

several overlapping world regions. The program emphasizes a close engagement with intellectual traditions, creative movements, and political debates, drawing on a wide variety of historical and contemporary sources in literature, religion, political thought, law, the visual and performing arts, and new media. Courses also examine the historical and cultural contexts in which these traditions and debates have been produced.

MAJORS AND CONCENTRATIONS

Majors develop two closely related skills. The first is linguistic expertise. A minimum of two years of course work in one language is required, and further work (including intensive summer language study) is greatly encouraged, because the aim is to study a cultural field through its own texts and discourses. The Department of Middle Eastern, South Asian, and African Studies offers courses in Arabic, Persian, Turkish, Hebrew, Armenian, Sanskrit, Hindi/Urdu, Bengali, Tamil, Swahili, Wolof, and Zulu.

The second skill is learning how to think and write about complex cultural formations, drawing on a variety of methods and disciplinary approaches. The approaches vary according to the faculty members' expertise, incorporating methods from relevant fields in the humanities and social sciences, such as literary criticism, film studies, cultural studies, political theory, and intellectual history.

The only difference between the MESAAS major and the concentration is that the latter does not require language proficiency.

GUIDELINES FOR ALL MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES MAJORS AND CONCENTRATORS

Introduction to MESAAS

Majors and concentrators begin their work with an introductory course that emphasizes a particular area (the Middle East, South Asia, or Africa). For instance, students interested in the Middle East would take ASCM UN2003 Introduction to Islamic Civilization or ASCM UN2008 CONTEMP ISLAMIC CIVILIZATION. Students keen on learning more about South Asia would take ASCM UN2357 Introduction to Indian Civilization, HSME UN3810 History of South Asia I: al-Hind

to Hindustan, or HIST W3811 South Asia II: Empire and Its Aftermath. The introductory course generally recommended for students interested in Africa is MDES UN2030 Major Debates in the Study of Africa.

Required Core Courses

All majors must take two additional core courses. The first is a small seminar in which they explore some of the classic texts of the region, either AHUM UN1399 COLLOQUIUM ON MAJOR TEXTS (for those focusing on the Middle East and South Asia) or AFCV UN1020 African Civilizations (for those focusing on Africa).

With this background, students are ready to take MDES UN3000 Theory and Culture generally in the junior or senior year. This course examines critical approaches to the study of language, culture, and politics and encourages students to reflect on their own work from many different perspectives.

Additional Requirements

Fifteen additional points (generally five courses) are chosen in consultation with the director of undergraduate studies. These may include six points of coursework from other departments, subject to the director of undergraduate studies' approval. Although students may have a particular interest (e.g., Arab political thought, Urdu literature, Armenian history, Iranian cinema, or contemporary West Africa), they are encouraged to gain exposure to the fullest range of courses and approaches offered by the faculty, and to familiarize themselves with other regions beyond their core area.

In Fulfillment of the Language Requirement (for Majors)

Enrollment in language courses is in some cases determined by placement exams. For more information, see *Languages* on the [departmental website](#) and, if necessary, consult the relevant Coordinator listed on that page. The website includes separate pages for each language, describing the program of instruction, courses for heritage speakers, summer language programs, and more. Language courses must be taken for a letter grade. Pass/D/Fail or Registration credit (R) is not permitted. Those seeking to waive a language requirement must take a proficiency test.

Students who enter with language proficiency at only the second-year level must complete one additional year of language study and one additional MESAAS course. When students enter with language proficiency at the third year level (or in cases where only two years of a particular language are offered in MESAAS), they must substitute three additional MESAAS courses.

Advising

Newly declared majors and concentrators should meet with the director of undergraduate studies in order to plan a program of study. The goal is to strike a balance between courses that help

a student achieve depth in a particular area/discipline and those that foster a wider perspective.

Although students are encouraged to approach faculty in the department based on their specific interests, the director of undergraduate studies functions as an ad hoc adviser for all entering students, addressing issues of course requirements, credit, approval for courses in other departments or schools, study abroad, and, eventually, honors requirements (including the senior thesis). Students should not hesitate to contact the director of undergraduate studies to set up an appointment.

Grading

Courses in which the grade of D has been received do not count toward the major or concentration requirements, nor do those taken Pass/D/Fail, except for the first course taken toward the major or concentration.

Honors Program/Senior Thesis

Students may also wish to write a thesis. While not required for graduation, the thesis enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the student's junior year. Interested students should attend the relevant information sessions and identify a potential faculty adviser.

All students who wish to write a thesis must enroll in MDES UN3960 HONORS THESIS SEMINAR, a full year course consisting of a 1-point segment in the Fall semester and a 3-point segment in the Spring semester. Students work closely with their peers in a supportive environment to produce a substantial piece of research (in the range of 40 pages). The primary intellectual guidance is provided by the faculty adviser, whereas the director of undergraduate studies and the honors seminar teaching assistant oversee the general development of the project. Every year in April, MESAAS hosts a senior colloquium in which students present their research. For more information on the honors program, see *Frequently Asked Questions* on the [departmental website](#).

For additional guidelines, see *Departmental Honors* as outlined in the *Academic Honors, Prizes, and Fellowships* section of the Columbia College Bulletin.

MAJOR IN MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES

Students should obtain a [Major Declaration](#) form from their advising dean and bring it to the director of undergraduate studies for approval. The director of undergraduate studies meets with students as necessary in order to establish and approve their individual programs of study. The requirements for the major are as follows:

Select a one-term introductory culture course, to be approved by the director of undergraduate studies

AHUM UN1399	COLLOQUIUM ON MAJOR TEXTS
-------------	---------------------------

MDES UN3000	Theory and Culture
-------------	--------------------

Select two years of a language regularly taught in the department, or substitutional courses for students who test out of this requirement with the approval of the director of undergraduate studies

Select 15 points of coursework, which may include up to six points from other departments, selected in consultation with the director of undergraduate studies

The MESAAS Major and its 'tracks'

Students majoring in MESAAS are studying the languages, and central cultural and political aspects of the societies of the Middle East, South Asia, and Africa, in past and present. This can be done either with a focus on one of these three regions, i.e. the 'African Studies', the 'South Asian Studies', or the 'Middle Eastern Studies' track, or a comparative perspective on them, the 'combined track'.

The coursework for each of those 'tracks' is composed of the same five elements: 1. an approved Introductory course; 2. a seminar on texts from the region; 3. 'Theory and Culture'; 4. five approved elective courses; 5. the regional language requirement.

Note that some MESAAS courses are already comparative by design and connect more than one region: for example, *Societies and Cultures Across the Indian Ocean*, or *Postcolonial Thought*, or courses on Persianate culture that include North India, or Middle East courses that include North Africa. These may satisfy requirements for more than one track, subject to approval by the Director of Undergraduate Studies (DUS).

African Studies

1. MDES UN3130 Major Debates in the Study of Africa or another approved introductory lecture course.
2. CC1020 African Civilization
3. MDES UN3000 Theory and Culture
4. Five additional courses on Africa, such as: *South African Literature and Culture: Apartheid and After*; *East Africa and the Swahili Coast*; or *Pan Africanism* (see the [Courses](#) page for more options). You may include up to two courses from other departments, in fields such as African history, politics, and philosophy, the anthropology of Africa, and African art, subject to the approval of the Director of Undergraduate Studies. For a listing of courses in other departments, see [here](#).
5. Language: A minimum of two years of course work in Swahili, Arabic, Pular, or another African language. See the [MESAAS language programs](#) [here](#). Those already fluent in an African language may substitute other courses—see [FAQ](#). Not required for the concentration.

Middle Eastern Studies

1. ASCM UN2003 Islamic Civilization or another approved introductory lecture course.
2. Asian Humanities UN1399 Major Texts: Middle East/India
3. MDES UN3000 Theory and Culture
4. Five additional courses on the Middle East, such as: Arabic Self-Narratives; Central Questions in Islamic Law, Palestinian-Israeli Politics and Society, or Epics and Empires (see the Courses page for more options). You may include up to two courses from other departments, in fields such as Middle Eastern history, politics, and anthropology, or Islamic art, subject to the approval of the Director of Undergraduate Studies. Find a list of Middle East courses in other departments [here](#).
5. Language: A minimum of two years of coursework in Arabic, Hebrew, Persian, Turkish, or Armenian. See the MESAAS language programs [here](#). Those already fluent in a Middle Eastern language may substitute other courses—see [FAQ](#). Not required for the concentration.

South Asian Studies

1. MDES UN2357 Indian Civilization or another approved introductory lecture course.
2. Asian Humanities UN3399 Major Texts: Middle East/India
3. MDES UN3000 Theory and Culture
4. Five additional courses on South Asia, such as: Mughal India; Gandhi and his Interlocutors; or Cinemas of India (see the Courses page for more options). You may include up to six points of course work from other departments, in fields such as South Asian history, politics, and anthropology, or Indian art, subject to the approval of the Director of Undergraduate Studies. Find a list of South Asia courses in other departments [here](#).
5. Language: A minimum of two years of course work in Hindi/Urdu, Sanskrit, Persian, or other South Asian languages. See the MESAAS language programs [here](#). Those already fluent in a South Asian language may substitute other courses—see [FAQ](#). Not required for the concentration.

Combined

There is also a combined option. For this, you may satisfy the five requirements by choosing courses from any of the three tracks.

1. An approved introductory lecture course.
2. Asian Humanities UN1399 Major Texts: Middle East/India – OR: CC1020 African Civilization
3. MDES UN3000 Theory and Culture
4. Five additional courses, fitting one's course of study, to be approved by DUS
5. Language: A minimum of two years of course work in any of the regional MESAAS languages, to be approved by the DUS.

CONCENTRATION IN MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES

The requirements are identical with those for the major, except that there is no departmental language requirement. Fifteen points in department courses, selected with the approval of the director of undergraduate studies. These may not include elementary or intermediate language courses. Not more than two courses out of the general 15 points may be devoted to language study.

LECTURES AND SEMINARS

MDES UN1001 CRITICAL THEORY: A GLOBAL PERSPECTIVE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The purpose of this foundational course is to introduce Columbia undergraduate students, in the context of their Global Core curriculum, to the seminal field of critical theory. The historical domain of this course is within the last century and its geographical spectrum is global. European critical thinkers are included in this course but not privileged. Thinkers from Asia, Africa, Europe, North, South, and Latin America, are examined here in chronological order and in equal democratic footing with each other. This course as a result is decidedly cross-cultural, one step forward towards de-alienating critical thinkers from around the globe and the issues they address without pigeonholing them as something “other” or “different.” The course is designed and offered in the true spirit of the “Global Core.” The purpose of the course is to reach for the common denominator of serious critical thinking about the fate of our humanity and the health of our social relations in an increasingly fragile world—where the false binaries of “the West” and “the Rest” no longer hold. The roster of critical thinkers we will examine is by no means exhaustive but representative. Any number of other critical thinkers can be added to this roster but none of those we will examine can be excluded from them. The course is divided into thirteen successive weeks and for each week a number of seminal, original, and groundbreaking texts are identified. Each week we will examine selected passages from these texts. The course is designed as a lecture course, and my lectures are based on the totality of these texts but students will be assigned specific shorter passages to read

ASCM UN2003 Introduction to Islamic Civilization. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Lecture and recitation. Islamic civilization and its characteristic intellectual, political, social, and cultural traditions up through 1800. Note: Students must register for a discussion section, ASCM UN2113.

Fall 2020: ASCM UN2003

MDES UN2004 Conflicts: Race, Region, Religion. 4.00 points.

Prior to "conflict resolution," there is conflict. But what is conflict and how do we understand it? This introductory lecture course proposes to explore established objects in their presumed ties to the fact and concept of "conflict." We will inquire into the nature of conflict as well as into the kinds of conflicts that operate, or seem to operate, perhaps even to structure, the understanding of race, of region, and of religion. We will attend to the solidity and fragility of geographic divisions (regional and trans regional conflicts), their history (modern / premodern, colonial / pre- and post-colonial), the emergence of race (racial and ethnic conflicts), the pertinence of religions (religious strife and violence), their relation to political associations (religion and politics, religion and nationalism) and to other social and/or economic divisions (class, gender). We will interrogate the analytic and descriptive value of keywords like war, enmity, dispute, division, partition. We will also reflect on disciplinary tensions and divisions toward an understanding and perpetuation of conflict. Finally, we will think about the possibility and impossibility of "speaking with the enemy."

MDES UN2641 Cinemas of India. 3 points.

This course offers an expansive journey through the forms, pleasures, and meanings of Indian cinema. It explores the plural beginnings of popular film; the many competing cinemas produced across India; the diverse protagonists (from vamps to vigilantes) that populate the imagined entity named 'national cinema'; and the varied audiences addressed by these cinemas. Over the course of the semester, we will watch 15 of the most iconic narrative films produced in India, including *Diamond Queen* (1940), *Awara* (1951), *Deewar* (1975), *Roja* (1992), *Mahanagar* (1963), and *Bandit Queen* (1994). As we voyage with the dynamic, shifting codes and priorities of India's fiction filmmaking, we also shadow the emergence of the Indian nation and contestations of its coherence.

MDES UN2650 Gandhi and His Interlocutors. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Gandhi is in two senses an extraordinary figure: he was the most important leader of anti-imperialist movements in the twentieth century; yet, his ideas about modernity, the state, the industrial economy, technology, humanity's place in nature, the presence of God – were all highly idiosyncratic, sometimes at odds with the main trends of modern civilization. How did a man with such views come to have such an immense effect on history? In some ways, Gandhi is an excellent entry into the complex history of modern India – its contradictions, achievements, failures, possibilities. This course will be primarily a course on social theory, focusing on texts and discursive exchanges between various perceptions of modernity in India. It will have two parts: the first part will be based on reading Gandhi's own writings; the second, on the writings of his main interlocutors. It is hoped that through these exchanges students will get a vivid picture of the intellectual ferment in modern India, and the main lines of social and political thought that define its intellectual culture. The study in this course can be followed up by taking related courses in Indian political thought, or Indian politics or modern history. This course may not be taken as Pass/D/Fail.

HSME UN2915 Africa Before Colonialism: From Prehistory to the Birth of the Atlantic World. 4 points.

This course is an interdisciplinary exploration of the precolonial history of the African continent. It investigates in-depth the political, social, cultural and economic developments of different Africa communities, covering various regions and periods, from prehistory to the formation of the Indian Ocean and Atlantic worlds. Its focus is the intersection of politics, economics, culture and society. Using world history and Africa's location in the production of history as key analytical frames, it pays special attention to social, political and cultural changes that shaped the various individual and collective experiences of African peoples and states and the historical discourses associated to them.

MDES UN3047 MESAAS # History: Court Cultures 350-1750. 3.00 points.

The course provides a broad survey of court societies and cultures as they grew and spread their influence in premodern world, especially South Asia, Africa and the Middle East. We will study Indic, Persianate and Islamicate cultural formations in the courtly sphere and discuss the larger trends that facilitated their emergence. Rather than moving chronologically from 'early medieval', 'medieval' to 'early modern' periods we will move thematically looking at the ways in which the court functioned as an institution and enabled particular cultural and intellectual practices. One of the major sub-themes that we will discuss covers the idea of genres and recording practices. What were the modes of courtly expression of the past? How did such practices shape the idea of 'history' in the premodern world? We will locate the institution of the court within a network of relations with other political institutions – most importantly the Hindu, Islamic and Buddhist religious centers. Along with this, we will consider ways in which kings, queens, courtiers, courtesans, poets, scholars, concubines and religious persons contributed to the flourishing of 'court aesthetics' and laid the foundations of political style and governance in premodern South Asia, Africa and the Middle East. Among primary materials, we will study political poems, plays, prose chronicles and courtly manuals in understanding the nature of political rule. This is an introductory course and prior knowledge of South Asia, Africa and the Middle East – either its languages, geographies or histories – is not required

Spring 2021: MDES UN3047

MDES UN3048 Pandemics: A Global History. 3.00 points.

With an interdisciplinary perspective, this course seeks to expand the understanding of past pandemic crises and recent, lived pandemics such as COVID-19. COVID-19 has brought up urgent questions about how we can understand and historicize pandemics and trace the changing relationship between disease and its vectors, humans and their environments. This course seeks to expand the understanding of past and recent pandemics through a historical lens that traces the deep seated racial and class disparities, social and cultural stigma, and political responses and control that they were expressed and deployed during these historical crises. It seeks to understand and analyze pandemics as representing complex, disruptive and devastating crises that effect profound transformations in ideas, social and economic relations and challenge interdependent networks and

cultures. Pandemics are balanced in a global-local flux between dramaturgic, proliferating, contagious outbreaks; and endemic, chronic infections that have prolonged periods of latency before again remerging through new transmissions. They also serve as a crucial lens to analyze a range of historical connections, ensions and movements ranging from colonialism and the politics of borders, global capitalism and labor, migration and mobility, decolonization and development, and neoliberalism and global health politics

MDES UN3121 Literature and Cultures of Struggle in South Africa. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Generations of resistance have shaped contemporary life in South Africa -- in struggles against colonialism, segregation, the legislated racism known as apartheid, and the entrenched inequalities of the post-apartheid era. Two constants in this history of struggle have been youth as a vanguard of liberation movements and culture as a "weapon of struggle." As new generation of South African youth -- the "born frees" -- has now taken to the streets and social media to "decolonize" the university and claim their education as a meaningful right, this course traces the ways that generations of writers, artists, and activists have faced censorship, exile, and repression in an ongoing struggle to dismantle apartheid and to free the mind, "the most powerful weapon in the hands of the oppressor" according to Black Consciousness activist Steve Biko. This course traces the profoundly important roles that literature and other cultural production (music, photography, film, comics, Twitter hashtags like #rhodesmustfall and #feesmustfall) have played in struggle against apartheid and its lingering afterlife. Although many of our texts were originally written in English, we will also discuss the historical forces, including nineteenth-century Christian missions and Bantu Education, as well as South Africa's post-1994 commitment to being a multilingual democracy, that have shaped the linguistic texture of South African cultural life.

Spring 2021: MDES UN3121

CLME UN3221 Arabic Literature As World Literature. 4 points.

This seminar focuses on Arabic literature in the world, as World Literature. The focus will be on pre-modern and modern Arabic literary works that traveled and circulated and were adapted to and acquired individual meanings in different cultures. We will look at literary works that achieved

'worldliness' through either writing back to the center or through

international literary prizes. We will consider how literary works travel and circulate through their fusion with regional concepts, or even take on new meanings at different times and places. Admittedly, also, we will look into the strengths, weaknesses, and criticism surrounding World Literature.

MDES UN3260 Rethinking Middle East Politics. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines a set of questions that have shaped the study of the politics of the modern Middle East. It looks at the main ways those questions have been answered, exploring debates both in Western academic scholarship and among scholars and intellectuals in the region itself. For each question, the course offers new ways of thinking about the issue or ways of framing it in different terms. The topics covered in the course include: the kinds of modern state that emerged in the Middle East and the ways its forms of power and authority were shaped; the birth of economic development as a way of describing the function and measuring the success of the state, and the changing metrics of this success; the influence of oil on the politics of the region; the nature and role of Islamic political movements; the transformation of the countryside and the city and the role of rural populations and of urban protest in modern politics; and the politics of armed force and political violence in the region, and the ways in which this has been understood. The focus of the course will be on the politics of the twentieth century, but many topics will be traced back into developments that occurred in earlier periods, and several will be explored up to the present. The course is divided into four parts, each ending with a paper or exam in which participants are asked to analyze the material covered. Each part of the course has a geographical focus on a country or group of countries and a thematic focus on a particular set of questions of historical and political analysis.

MDES UN3331 URBAN SPACE # CONFLICT IN MIDDLE EAST. 3.00 points.

This course explores how civil war, revolution, militarization, mass violence, refugee crises, and terrorism impact urban spaces, and how city dwellers engage in urban resilience, negotiate and attempt to reclaim their right to the city. Through case studies of Beirut (1975-present), Baghdad (2003-present), Cairo (2011-present), Diyarbakir (1914-present), Aleppo (1914-present), and Jerusalem (1914-present), this course traces how urban life adjusted to destruction (and post-conflict reconstruction), violence, and anarchy; how neighborhoods were reshaped; and how local ethnic, religious, and political dynamics played out in these cities and metropolises. Relying on multi-disciplinary and post-disciplinary scholarship, and employing a wealth of audiovisual material, literary works, and interviews conducted by the instructor, the course scrutinizes how conflicts have impacted urban life in the Middle East, and

how civilians react to, confront, and resist militarization in urban spaces

MDES UN3421 Islamic Central Asia. 3 points.

Explores the cultural landscapes of Islamic Central Asia up to the 18th c. Russian conquests, introducing the wide and changing array of meanings that both Islam and Central Asia could take on in this context. Against the association of Central Asia with a periphery, this course restores the centrality of Central Asia to the spheres of exchange that held together a broader Islamic imaginary, including Persian literatures, Sufism, political thought, and the visual arts. Focuses on the empires of the Ghaznavids (977-1186), Mongols (1206-1370), Timurids (1370-1507), and early Mughals. Readings are English translations of primary sources, and modern scholarship to contextualize and theorize these sources. Central questions include: how these texts reflect and shape community, how they mark and make sense of difference, the ways in which they understand and relate to their past(s), and the values that they hold to be most central. No prerequisites.

MDES UN3445 SOCIETIES/CULTRS: INDIAN OCEAN. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces the Indian Ocean as a region linking the Middle East, East Africa, South and Southeast Asia. With a focus on both continuities and rupture from the medieval to the modern period, we study select cultures and societies brought into contact through interregional migration and travel from the 10th to 20th centuries. Different types of people - nobles, merchants, soldiers, statesmen, sailors, scholars, slaves - experienced mobility in different ways. How did different groups of people represent such mobilities? What kinds of political, economic, and social cooperation, accommodation or conflict did different Indian Ocean encounters engender? We read some of the newest humanities and social science scholarship, as well as primary sources ranging from manuscript illustrations, sailor's stories, merchant letters, travelogues, pilgrimage accounts, colonial documents, memoirs, and diplomatic accounts. Students must register for a discussion section, MDES UN3446

MDES UN3644 Visual Cultures of Modern South Asia. 3 points.

This lecture course introduces students to the power and meaning of popular visual cultures of South Asia.

Visual culture is a crucial arena for the enactment of social transformations and the creation of collective imaginaries. We will track such varied modern media types as calendar art, photography, film, architecture, clothing, and religious festivals, loosely following key chronological signposts in the shared histories of the subcontinent. Together, we will practice a new way of understanding history and society – a visual way that will make us aware of the diversity of hopes, fears, and dreams that comprise South Asia. Designed for students with a basic understanding of South Asian history, the course aims to familiarize you with key methodological approaches in visual culture studies and current debates in South Asian art history and media theory.

MDES UN3915 A History of African Cities. 3 points.

This seminar offers an interdisciplinary approach to the study of the history of African cities. It cuts across disciplinary boundaries of history, geography, anthropology, political and cultural sociology, literature and cultural studies, to explore the various trajectories of urbanization on the continent.

Spring 2021: MDES UN3915

MDES UN3920 Contemporary Culture in the Modern Arab World. 3 points.

Prerequisites: the instructor's permission.

This seminar, designed for seniors, aims to acquaint students with the notion and theoretical understanding of culture and to introduce them to a critical method by which they can study and appreciate contemporary culture in the Arab World. The seminar will survey examples of written and cinematic culture (fiction and autobiography), as well as music, dance, and literary criticism in the contemporary Arab world. Students will be reading novels, autobiographies and literary criticism, as well as watch films and listen to music as part of the syllabus. All material will be in translation. Films will be subtitled. Songs will be in Arabic.

CLME UN3928 Arabic Prison Writing. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies the genealogy of the prison in Arab culture as manifested in memoirs, narratives, and poems. These cut across a vast temporal and spatial swathe, covering selections from the Quran, Sufi narratives from al-Hallaj oeuvre, poetry by prisoners of war: classical, medieval, and modern. It also studies modern narratives by women prisoners and political prisoners, and narratives that engage with these issues. Arabic prison writing is studied against other genealogies of this prism, especially in the West, to map out the birth of prison, its institutionalization, mechanism, and role. All readings for the course are in English translations.

MDES UN3960 HONORS THESIS SEMINAR. 1.00 point.

Prerequisites: minimum GPA of 3.5 in MESAAS courses.

The MESAAS honors seminar offers students the opportunity to undertake a sustained research project under close faculty supervision. The DUS advises on general issues of project design, format, approach, general research methodologies, and timetable. In addition, students work with an individual advisor who has expertise in the area of the thesis and can advise on the specifics of method and content. The thesis will be jointly evaluated by the adviser, the DUS, and the honors thesis TA. The DUS will lead students through a variety of exercises that are directly geared to facilitating the thesis. Students build their research, interpretive, and writing skills; discuss methodological approaches; write an annotated bibliography; learn to give constructive feedback to peers and respond to feedback effectively. The final product is a polished research paper in the range of 40-60 pages. Please note: This is a one-year course that begins in the fall semester (1 point) and continues through the spring semester (3 points). Only students who have completed both semesters will receive the full 4 points of credit

CLME GU4042 Cinematic Cities/Comparative Modernities. 4 points.

Mandatory film screenings will follow each class meeting.

This graduate seminar explores the representational, imaginative, and analytical connections between cinema and the urban experience. Theories of modernity frequently hold up the city as the most emblematic site for locating the modern (eg. Benjamin, Simmel, Kracauer). Cinema, too, as art and apparatus, can be said to have embodied the 'shocks' of the modern (Singer, Gunning, Eisenstein). This course introduces students to a significant corpus of literature on cinema and mediated urbanisms. By insisting on a comparative approach, the seminar seeks to put existing theories of cinematic urbanisms that pertain to Berlin, Paris, or Los Angeles, into dialogue with 'other' cinematic sites such as Mumbai, Algiers, Mexico City, Istanbul, Kuala Lumpur, or Dakar. Open to qualified undergraduates with instructor permission. No P/D/F or R credit is allowed for this class.

MDES GU4049 Climate and Empire. 4 points.

Climate change destabilizes the ontic certainty of this world, time, and history. This course in MESAAS will introduce students to the literature on climate change and its relationship to ontology, religion, violence, politics, and gender. We will explore the resilience and limitations of various theoretical approaches as they relate to empirical cases. Students will become familiarized with important arguments that have been advanced to explain climate change in its more recent incarnations in the Middle East and Asia. How have different trajectories of understanding climate change led to different kinds of political cultures and governing institutions? Have some qualities of the "environment" or "climate" remained the same throughout history and across the globe? What is the role of colonialism in modern understandings of climate change? The core of this course will seek to develop a mode of conceptualizing the present by rendering relevant geological time in addition to historical time, earth's history in addition to world's history.

The course begins with the question of how the "climate" has been historically and ethnographically conceptualized

in various intellectual trajectories of human sciences. We consider how religion is connected to environmental change, how the “human” and “non human” are conceptualized in various ontologies, and how religious norms and ethics enact environmental practices. We interrogate the everyday sociality of climate adaption and how climate conflict informs social, political, and environmental citizenship. The course concludes by contemplating the creative ways of being in this new world. We study the innovative forms of cosmopolitan neo-humanism (post- humanism) that emerge from the specter of environmental change.

MDES GU4122 The Novel in Africa. 4 points.

The main task of this course will be to read novels by African writers. But “the novel in Africa” also involves connections between the literary genre of the novel and the historical processes of colonialism, decolonization, and globalization in Africa. One important question we’ll consider is how African novels depict those historical experiences in their themes and plots—we’ll read novels that are “about” colonialism, etc. A more complex question is how these historical processes relate to the emergence of the novel as an important genre for African writers. Edward Said went so far as to say that without imperialism, there would be no *European* novel as we know it. How can we understand the novel in Africa (whether read or written) as a product of the colonial encounter? How did it shape the process of decolonization? What contribution to history, whether literary or political, does the novel in Africa make? We’ll undertake a historical survey of African novels from the 1930s to the present, with attention to various subgenres (village novel, war novel, urbanization novel, novel of postcolonial disillusion, *Bildungsroman*). We’ll attend to how African novelists blend literate and oral storytelling traditions, how they address their work to local and global audiences, and how they use scenes of characters reading novels (whether African or European) in order to position their writing within national, continental, and world literary space.

MDES GU4151 Debates on Capitalism: Africans and the Eurocentric Lens. 4 points.

Within the literature on the history of capitalism there is a lively debate that seeks to explain the world-historical transition from feudal and tributary modes of production to the capitalist mode of production. Substantial issues raised in this debate include the question of whether capitalism can be characterized as a mode of production dominated by the exploitation of free labour; the role of international trade in the origin and development of capitalism; and the role of agriculture in promoting a transition to capitalism. Through the publication of two key texts in the late 1970s Robert Brenner’s proposition that capitalism had its origins in English agriculture came to dominate the transition debate. More recently, however, there

have been a number of publications that seek to challenge the Anglo-centric and Eurocentric tendencies of the entire transition debate. This course begins with the Brenner debates and then takes up revisions, critiques and challenges to that debate. Ultimately, the aim of the course is to more clearly understand the place of non-European polities and peoples in the history and development of capitalism.

HSME GU4154 PAN AFRICANISM. 4.00 points.

“Pan Africanist” ideologies were very diverse from Garveyism, Negritude to the various African America, Caribbean and African discourses of “neo-pharaohism” and “Ethiopianism.” This seminar explores how Black leaders, intellectuals, and artists chose to imagine Black (Africans and people of African descent) as a global community from the late 19th century to the present. It examines their attempts to chart a course of race, modernity, and emancipation in unstable and changing geographies of empire, nation, and state. Particular attention will be given to manifestations identified as their common history and destiny and how such a distinctive historical experience has created a unique body of reflections on and cultural productions about modernity, religion, class, gender, and sexuality, in a context of domination and oppression

MDES GU4160 Major Debates in the Study of Africa. 4 points.

This course will focus on key debates that have shaped the study of Africa in the post-colonial African academy.

We will cover six key debates: Historiography; Slavery: Premodern and Modern; State Formation; Colonialism and Difference; Nationalism; Political Identity and Political Violence

The approach will be multi-disciplinary. To the extent possible, readings will be illustrative of different sides in the debate.

CLME GU4231 Cold War Arab Culture. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies the effects and strategies of the cold war on Arab writing, education, arts and translation, and the counter movement in Arab culture to have its own identities. As the cold war functioned and still functions on a global scale, thematic and methodological comparisons are drawn with Latin America, India and Africa.

Spring 2021: CLME GU4231

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

CLME GU4241 Sufism: Primary Texts and Contexts. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies Sufism as it has emerged, developed, and assumed its presence in Sufi autobiographies and religious and literary writings. The Sufi Path is traced in these writings that include poems like ibn al-Farid's Poem of the Way. Sufi States and Stations are analyzed to understand this Path that reaches its culmination in an ecstatic sense of Oneness. Sufism is also a social and political phenomenon that unsettles formal theologies and involves Sufis in controversies that often end with their imprisonment and death.

MDES G4253 Islamic Law: The Three Debates. 4 points. Not offered during 2020-21 academic year.Prerequisites: *ASCM V2003* or equivalent.

This seminar deals with three paradigmatic sets of questions in the history of Islamic law, each set representing and encompassing key themes pertaining to three important historical phases. Long-standing debates on the "origins" of the Shari'a will be explored, as will the constitution of the formative period, which is variably claimed to stretch from two to four centuries. Scholarship on this period will be examined as ideology. In the second set of questions, squarely situated in the post-formative period (ca. 11th – 17th c.) we examine the relationship between and among social custom, juridical practice and formal legal doctrine, discussing in outline the structural mechanisms the Shari'a has developed to accommodate legal change. Scholarship on this period and on what the features of this period came to represent in the overall constructed history of the Shari'a will also be examined as ideology. In the third set of questions, we analyze so-called legal reform and the role of state in converting the Shari'a to a modern institution that is qualitatively different from its pre-modern predecessor. Scholarship on the Shari'a in the modern period will also be examined as ideology. Finally, but not necessarily at the end of the course, we will pose questions about the nature of interpretation and language in the construction of a paradigmatic idea (and history) of the Shari'a.

MDES GU4259 War Narrative: The Arab World. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course works along a number of axial structures that aim to let texts voice their informing theoretical, political, and poetic strategies. It draws on war narratives in other parts of the world, especially Vietnam, insofar as these find their way into Arabic writing. A poetics of prose gives these narratives the power of literary production that makes them more readable, appealing, and provocative than ordinary journalistic reporting.

Through close readings of a number of Arabic war novels and some long narrative poems, this course proposes to address war in its varieties not only as liberation movements in Algeria and Palestine, but also as an engagement with invasions, as in Iraqi narratives of war, or as conflict as was the case

between Iran and Iraq, 1980-1988, as proxy wars in other parts of the region, or 'civil' wars generated and perpetuated by big powers. Although writers are no longer the leaders of thought as in the first half of the 20th century, they resume different roles of exposition, documentation, reinstatement of identities, and geographical and topographical orientation. Narrators and protagonists are not spectators but implicated individuals whose voices give vent to dreams, desires, intimations, and expectations. They are not utterly passive, however. Behind bewilderment and turbulence, there is a will to expose atrocity and brutality. Writing is an effort to regain humanity in an inhuman situation.

The course is planned under thematic and theoretical divisions: **one** that takes writing as a deliberate exposure of the censored and repressed; **another** as a counter shock and awe strategy [implemented under this name in the wars on Iraq] whereby brutalities are laid bare; and a **third** that claims reporting in order to explore its limits and complicity. On the geographical level, it takes Algeria, Palestine as locations for liberation movements; Iraq as a site of death; Egypt as the space for statist duplicity and camouflage; and Lebanon as an initial stage for a deliberate exercise in a seemingly civil war.

A number of films will be shown as part of students' presentations.**Fall 2020: MDES GU4259**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

CLME GU4262 Themes in the Arabic Novel. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The focus of this seminar will be novels by Arab writers. The course will explore the history of the Arabic novel: its rise, development, and evolution. We will read and analyze novels belonging to various periods in Arab history and representing diverse points of views, including gender, identities, and different sub-cultures and sub-genres. We will look into the connections therein between the novel and the historical backdrops of colonialism, decolonization, globalization, war, rights and personal independence from several perspectives and writers across the Arab world. We will also consider the modern Arabic novel's engagement with the global, glocal, and local as well as its nod to the Arabic literary tradition; its engagement with technology, scientific progress, absurdity, loss, trauma, the human condition, as well as dystopic themes. No knowledge of Arabic is required.

MDES GU4265 Sufism, Sharia, and Politics. 4.00 points.

This seminar is geared toward advanced undergraduate students. Arguably, Sufism and Sharia constituted the two central domains of premodern Islamic cultures. A central domain is recognized as one that defines other domains. If a domain becomes central, "then the problems of other domains are solved in terms of the central domain—they are

considered secondary problems, whose solution follows as a matter of course only if the problems of the central domain are solved” (C. Schmitt). Within this understanding, the seminar aims to introduce the fundamental concepts and (briefly) histories of both *Islam* and *Shari‘a*, with a focus on how the former overlapped with and was often integral to the latter; how *Islam* produced traditions and institutions; and the role it played in the political landscapes of Islam. By necessity, then, the seminar moves from a coverage of *Islamic* thought and praxis, to community and institution building, to political activism (or inactivism, which is seen here as a move toward the political or ethical). The coverage, deliberately tilted toward *Islamic*, aims to be historical and considerably chronological, moving from the earliest Islamic period to late modernity, including the migration of *Islamic* entities to the West. In keeping with the claim of *Islam* as a central domain, we will examine how this phenomenon, together with the *Shari‘a*, rendered the other domains subsidiary to their imperatives. The subordinate idea here is also to try to map out the strongly symbiotic relationship of the two domains, and isolate for analysis contestations and antagonisms. Although the sources – especially the Orientalist – are underdeveloped theoretically, class discussions will call upon the help of various relevant theories in philosophy, intellectual history, politics, and anthropology

Spring 2021: MDES GU4265

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4265	001/10924	W 4:10pm - 6:00pm Online Only	Wael Hallaq	4.00	9/25

MDES GU4349 Concentration Camps from Cuba to East Asia. 3 points.

Forcibly moving civilians to designated areas as a wartime measure has constituted a widely practiced military strategy for centuries. In the late 19th and early 20th centuries, colonial powers increasingly provided more structure and organization to these policies of relocation and internment in the Americas, Africa, and East Asia. This course provides a social history of civilian internment and mass murder from late-19th century colonial cases to World War II.

Through case studies of the Spanish-Cuban war, the South African War, the Philippines-American War, the genocide of the Herero and Nama in Southwest Africa, the Armenian Genocide, and the Holocaust, the course traces the evolution of the concentration camp from a counter-insurgency strategy in wartime to a weapon of mass murder. The course also examines the internment of Japanese Americans, and the Japanese “comfort stations” in comparative perspective.

MDES GU4357 WAR, GENOCIDE, & AFTERMATH COMP PERSPECTIV. 3 points.

This 4000-level course examines how societies grapple with the legacy of mass violence, through an exploration of historical texts, memoirs, textbooks, litigation, and media reports and debates on confronting the past. Focusing on case studies of the Herero Genocide, the Armenian genocide during WWI, and the Holocaust and the Comfort Women during WWII, students investigate the crime and its sequelae, looking at how societies deal with skeletons in their closets (engaging in silence, trivialization, rationalization, and denial to acknowledgment, apology, and repair); surveying responses of survivors and their descendants (with particular attention to intergenerational transmission of trauma, forgiveness, resentment, and the pursuit of redress); and dissecting public debates on modern day issues that harken back to past atrocities.

Spring 2021: MDES GU4357

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4357	001/11024	T Th 6:10pm - 7:25pm Online Only	Khatchig Mouradian	3	16/50

MDES GU4399 Literature of the Great War in the Middle East. 3 points.

Some of the best-known literary texts of the previous century harken back to the Great War. And while works of fiction and non-fiction such as Remarque’s *All Quiet on the Western Front*, Hemingway’s *A Farewell to Arms*, and Woolf’s *Mrs Dalloway* have become twentieth-century classics; and the poetry of Brooke, Graves, Gurney, Owen, and Sassoon widely celebrated; the Middle East’s contribution to the literature of the Great War is little explored. This course takes us on a literary journey from the trenches of Gallipoli and Mesopotamia, to famine-struck towns of Mount Lebanon, to orphanages in Syria. We will examine poetry (including *zajal*—colloquial poetry), and memoirs and diaries by the women and men who withstood the ravages of war and helped shape the modern Middle East. Through close reading and content analysis of a diverse constellation of published and unpublished texts, and using secondary sources as guideposts, we will explore “post-Ottoman memoirs” and verse, including translations from the Arabic and Armenian by the instructor.

MDES GU4601 Politics in India. 4 points.

This course will combine study of long-term historical sociology with more short term understanding of policies and their possible effects. Though its main purpose will be to provide students with an understanding of politics after independence, it will argue, methodologically, that this understanding should be based on a study of historical sociology – plotting long-term shifts in the structure of social power. The course will start with analyses of the structures of power and ideas about political legitimacy in pre-modern India, and the transformations brought by colonialism into that order. After a brief study of the nature of political order under

the colonial state, the courses will focus primarily on the history of the democratic state after independence.

MDES GU4629 Transregional. 4.00 points.

History, Politics, Literature, Society -- all these are studied as within national, or, at best, regional frames. What other scales and approaches might be appropriate to the study of particular phenomena or categories in the past, as well as some of the challenges of the present? This course introduces advanced undergraduates and graduate students to transregional studies. We explore topics, approaches, methods, problems, and disciplines through which we can cross the regions, particularly the regions of MESAAS. Case studies will consider thinking through and with oceanic studies, circulation, diaspora, shared hermeneutical traditions, lingua francas and their stories (world literatures?), and connected histories to rethink concepts of societies, collective affiliations, cosmopolitanism, and world history. Undergraduates must have taken at least one of the following: Intro to Islamic Civ (UN 2003), Intro to Indian Civ (UN 2357), African Before Colonialism (UN 2915), Societies and Cultures across the Indian Ocean (UN 3445), or some equivalent (check with me)

MDES GU4637 Cinema and Colonialism in South Asia. 4 points.

What is the relation between cinema and colonialism? This seminar approaches cinema as a dynamic historical agent that aided, negotiated, refracted, and contested the mechanisms and meanings of colonialism in South Asia. We will study cinema as technology, as industry, and as cultural form, paying attention to questions of film finance, on-screen representation, production infrastructures, circuits of distribution, and sites of exhibition. We will watch films made by British ethnographers, Indian expats, Hollywood orientalis, and South Asian nationalists to study how film served as a key weapon of imperial propaganda as well as anticolonial resistance. From orientalist films that constructed the colony as exotic and dangerous, to the spatial uses of Indian films to reinforce race inequalities in the diaspora (eg. East Africa), cinema is deeply imbricated with colonial strategies of racial, gendered, and caste-based othering. This is a history of cinema as a history of empire; where cinema is not just a text to be read but a cultural, industrial, and social network of power relations.

Spring 2021: MDES GU4637

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MDES GU4721 Epics and Empires: Shahnameh. 4 points.

The purpose of this course is an examination of the genre of epic and its narrative connection to empire-building. The primary text that will be used in this critical examination is the Persian epic poem Shahnameh, composed by Abolqasem Ferdowsi circa 1000 CE.

MDES GU4718 Persian Poetry (In Translation). 4 points.

The purpose of this seminar is to introduce students to the long history and multiple genres of Persian poetry. The seminar will begin with the classical period and come down to the contemporary periods. The geographical span of the course extends from Central Asia to the Indian subcontinent to Iran.

Fall 2020: MDES GU4718

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MDES GU4726 READINGS IN PERSIAN TEXTS. 4.00 points.

May be repeated for credit; content varies.

Prerequisites: Must have completed MDES 2702, equivalent two years of Persian or the instructor's permission.

May be repeated for credit; content varies. Prerequisites: Must have completed MDES 2702, equivalent two years of Persian or the instructor's permission. This course provides experience reading and analyzing Persian language texts, as well as translating them into English. We will also spend some time learning how to read different kinds of paleography, and about various manuscript and print conventions and practices. Supplementary scholarly readings in English will situate the Persian texts. There will be a translation workshop at the end of the semester with related texts of the students choosing, in preparation for a final translation project. No P/D/F or R credit is allowed for this class

Spring 2021: MDES GU4726

MDES GU4733 IRAN: FILM, FICTION, POETRY, HISTORY. 4 points. Not offered during 2020-21 academic year.

This is a general introduction to modern Iranian history with a particular emphasis on film, fiction, and poetry. Through varied exposure to Iranian film and fiction, and Persian poetry, this course is designed to introduce students to critical themes and creative effervescence of modern Iranian culture. The course will concentrate on Iranian cultural history of the last two centuries, with particular emphasis on contemporary issues. But a broader historical context of the last 1400 years will always inform our discussions.

MDES GU4760 SHI'ITES AND SHI'ISM. 4 points.

This is a seminar devoted to a historical and comparative examination of the rise and spread of Shi'ism from its earliest stages in Islamic history to its contemporary conditions in various nation-states (in India, Iran, Iraq, and Lebanon in particular). In this seminar we will cover a range of issues, extended from historical, doctrinal, intellectual, and spiritual roots of Shi'ism to its contemporary political manifestations. The course is intended as a seminar, and students will be expected to conduct guided research in an aspect of Shi'ism that interests them most. The course will be conducted in a combination of weekly lectures, semester-long research, and seminar conversations. Knowledge of Arabic and Persian is not required for this course but would be highly beneficial in conducting research for the final paper.

CLME GU4764 Modern and Medieval Islamic Political Thought. 4 points.

This course is a comparative examination of modern and medieval Islamic political thoughts. The seminar begins with the roots of Islamic political thoughts in the early Islamic history, as well as Qur'anic revelations and Prophetic Hadith traditions. We will then divide the course into two major components: medieval and modern, with the rise of European colonialism in the late 18th century and early 19th century as the principal catalyst of groundbreaking changes in Islamic political thoughts.

MDES UN2602 INTERMEDIATE HINDI-URDU II. 5.00 points.

Prerequisites: *MDES UN1601-UN1602* or the instructor's permission.

One year of prior coursework in Elementary Hindi-Urdu I# II or the instructor's permission. The course aims to continue consolidating and building upon the existing listening, speaking, reading, writing and cultural skills and will help students acquire higher level proficiency in Hindi language. Students will be introduced to new grammatical structures and a broad range of vocabulary through exposure to a variety of authentic materials including Hindi literature, newspapers, folk tales, films, songs, and other kinds of written and audio-visual materials and through these materials. Students will expand their knowledge base of the society and culture of the target languages in this course. No P/D/F or R credit is allowed for this class

Spring 2021: MDES UN2602

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MDES GU4611 Readings In Hindi Literature II. 4 points.

May be repeated for credit; content varies.

Prerequisites: *MDES UN2602* or the instructor's permission. This course introduces students to the riches of the classical Hindi Tradition. We read Bhakti and Sufi Literature in tandem, with a special interest in Tulsidas and the Indo-Islamic Romance.

Eligibility: The class is open to undergraduate and graduate students with two or more years of Hindi- Urdu (or permission of the instructor).

MDES GU4624 Advanced Hindi I. 5 points.

Advanced Hindi I and II are third year courses in the Hindi-Urdu program that aim to continue building upon the existing four language skills (speaking, listening, reading and writing) along with grammar and vocabulary in a communicative approach. The objective of these courses is to strengthen students' language skills and to go beyond them to understand and describe situations and the speech community, understand and discuss Hindi literature and films, news items, T.V. shows and current events. Students will also be given opportunities

to work on their areas of interest such as popular culture, professional and research goals in the target language. Students will be expected to expand their vocabulary, enhance grammatical accuracy and develop cultural appropriateness through an enthusiastic participation in classroom activities and immersing themselves in the speech community outside. This course will be taught in the target language. All kinds of conversations such as daily life, on social/public interests' topics as well as on academic interests, will occur in the target language. No P/D/F or R credit is allowed for this class.

MDES GU4635 Readings In Urdu Literature I. 4 points.

Prerequisites: two years of prior coursework in Hindi-Urdu (*MDES UN1612 & MDES UN1613*), one year of Urdu for Heritage Speakers (*MDES UN1614 & MDES UN1615*), or the instructor's permission.

This course is a literary course, with in-depth exposure to some of the finest works of classical and modern Urdu prose and poetry. In the fall semester, our focus will be on some of the most famous Urdu short stories while, in the spring semester, we will focus on various genres of Urdu poetry. The content may change each semester. This course is open to both undergraduates and graduates. No P/D/F or R credit is allowed for this class.

MDES GU4636 READINGS IN URDU LIT. 4.00 points.

Prerequisites: two years of prior coursework in Hindi-Urdu (*MDES W1612 & MDES W1613*), one year of Urdu for Heritage Speakers (*MDES W1614 & MDES W1615*), or the instructor's permission.

Two semesters of prior coursework in Urdu for Heritage Speakers (Urdu for Heritage Speakers I and II) or one semester of Advanced Urdu or the instructor's permission. This course is a literary course, with in-depth exposure to some of the finest works of classical and modern Urdu poetry i.e. genres of ghazal and nazm. This course is open for both undergraduates and graduates. No P/D/F or R credit is allowed for this class

MDES GU4640 Advanced Urdu. 4 points.

Prerequisites: Two years of prior study in Urdu or one year of Urdu for Heritage Speakers I&II courses at Columbia University, or approval of the professor.

This is a one-semester course in advanced Urdu language. It will be taught in the fall semester. The goal of the course is to develop students' linguistic skills i.e. listening, speaking, reading, writing and cultural skills in Urdu, and give students in-depth exposure to some of the finest works of classical and modern Urdu prose. Special emphasis will be given to developing a high-register vocabulary. Necessary grammar points will also be explained for developing an accurate and nuanced understanding of the Urdu language. After completing this course, students will be able to read and enjoy Urdu classics and critical academic texts related to various disciplines i.e. old tales, short stories, essays, history, satire, criticism, politics, current issues etc. along with effective speaking skills suited to active interaction in the speech community and a more advanced academic discussion for undergraduate and graduate students. Students will develop an in-depth understanding of South Asian society and culture as well. This course will prepare students to take MDES GU4635 Readings in Urdu Literature I.

MDES UN1401 Elementary Sanskrit I. 4 points.

This course constitutes the first half of a year-long introduction to Classical Sanskrit, the translocal language of religious, intellectual, and literary life in South Asia for nearly two millennia. Assuming no prior experience with the language, this introductory sequence provides students with the grammar, reading strategies, and cultural context necessary to begin accessing the language's many rich textual traditions, including

scripture (#ruti), epic (iti#sa), poetry (k#vya), drama (n##aka), systematic thought (##stra), and more.

Fall 2020: MDES UN1401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 1401	001/11773	M T W Th 9:10am - 10:00am Online Only	Shiv Subramaniam	4	7/15

MDES UN2401 Intermediate Sanskrit I. 4 points.

Fee: Language Resource Center Fee - 15.00

Prerequisites: Elementary Sanskrit II or instructor permission. This course constitutes the first half of a year-long reading course designed to give students the tools necessary for advanced study in Classical Sanskrit. Readings in epic (iti#sa), poetry (k#vya), systematic thought (##stra), and commentary (vy#khy#na) will introduce students to a variety of important genres and their distinctive conventions. A focus upon the Sanskrit tradition's own categories of analysis—grammatical, commentarial, and prosodic—will enable students to begin to make sense of original Sanskrit texts as generations of the tradition's own readers have. No P/D/F or R credit is allowed for this class.

Fall 2020: MDES UN2401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 2401	001/11776	T Th 10:10am - 12:00pm Online Only	Shiv Subramaniam	4	3/15

MDES GU4810 ADVANCED SANSKRIT I. 4.00 points.

Prerequisites: Two years of Sanskrit or the instructor's permission.

This course constitutes the first half of a year-long advanced reading course in Classical Sanskrit. In 2020-2021, the focus of Advanced Sanskrit will be the genre of scholastic, commentarial prose (##stra). Placing equal attention on stylistic conventions, discursive strategies, and technical vocabulary, this course will introduce students to select philosophical debates lying at the intersections of epistemology, metaphysics, and philosophy of language. Textual excerpts may be drawn from an array of intellectual disciplines, including Ny#ya, M#m##s#, Yog#c#ra, and Vy#kara#a. Rigorous analysis of primary texts will be supplemented with occasional discussions about what implications the disciplined reading of Sanskrit ##stra may hold for practices such as translation, comparative philosophy, and transdisciplinarity. Prerequisites: Intermediate Sanskrit II or instructor's permission. No P/D/F or R credit is allowed for this class.

Fall 2020: MDES GU4810

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MDES UN1101 Elementary Tamil I. 4 points.

This course constitutes the first half of a year-long introduction to Tamil, the official language of the Indian state of Tamil Nadu as well as an official language of Sri Lanka and Singapore. In addition to being spoken by almost 80 million people worldwide, Tamil also has an impressive classical past, having served as a language of religious, intellectual, and literary life in South India for nearly two millennia. Assuming no prior experience with the language, this introductory sequence provides students with the grammar, language skills, and cultural context necessary for achieving their individual Tamil language goals, whether they be conducting fieldwork or scholarly research, chatting with relatives back home, or simply waxing poetic over an artful *dosai*. In order to cultivate students' reading, writing, speaking, and listening comprehension skills, this course draws upon a wide variety of teaching materials, including the core textbook, oral drills, audio recordings, short films, music videos, memes, and more. No P/D/F or R credit is allowed for this class.

Fall 2020: MDES UN1101

Music Performance Program Director: Magdalena Stern-Baczewska, 618A Dodge; 212-854-2348; mb3713@columbia.edu

The music major provides aspiring musicians and/or scholars with a wide range of ways to think about music (performance-related, theoretical, historical, cultural, and compositional) and to concentrate on the aspects of music that most interest them—from popular and world music to computer music. Our faculty engage in cultural studies (i.e., ethnomusicology) and with current literary theory, connect with faculty of other departments (i.e., English, Philosophy, and Psychology), and are on the cutting edge of technological change. Students who have a passion for music and who have already developed basic skills in areas including performance, music history, composition, or ethnography, should consider a major in music.

MUSIC PERFORMANCE

For information on auditions, registration, and other aspects of performance not included below, visit <https://mpp.music.columbia.edu/>

or contact Magdalena Stern-Baczewska, Director of the Music Performance Program, in 618 Dodge, 212-854-1257.

Students with questions about the Columbia-Juilliard programs should consult *Special Programs* in this Bulletin or contact Rebecca Schiavo, 212-854-9478, rab2195@columbia.edu.

Lessons

Individual lessons on instruments listed under Courses of Instruction may be taken for one half hour per week for 1 point of credit (or in the case of voice lessons at Barnard College, one full hour per week for 2 points). Auditions are only offered in the fall semester and courses are a one year commitment. There is a \$300 lesson fee per semester for each instrumental instruction course.

GUIDELINES FOR ALL MUSIC MAJORS AND CONCENTRATORS

A program of study should be planned with the Director of Undergraduate Studies (DUS) in the first semester of the sophomore year. Students planning to focus on a particular area (i.e. computer music, composition, ethnomusicology, music theory or music history) may wish to select a faculty adviser in that area.

Music Theory & Ear-Training

All music majors and concentrators are required to take the Music Theory sequence through Music Theory IV and the Ear-Training sequence through Ear-Training IV. Placement exams are given prior to your initial enrollment in both the Music Theory sequence and Ear-Training sequence, to determine at what level you will be placed in each. For students who do not place in Music Theory I and/or Ear Training I on the placement

exam, they must complete these course(s) before they start the corresponding sequence(s):

MUSI UN1002 FUNDAMENTALS OF MUSIC and MUSI UN1312 INTRODUCTORY EAR-TRAINING.

Keyboard Proficiency

All music majors are required to take a keyboard proficiency exam upon entrance into the first semester of Theory. Those who do not pass the exam are required to take *MUSI UN1518 KEYBOARD HARMONY/MUSICIANSHIP*.

Language Recommendations

For students who plan to do graduate work in music, studying German, French, Italian and/or Latin is recommended.

Focus in Composition

For students interested in focusing on the area of Composition, you must take these courses in this order:

MUSI UN2319 Music Theory II
MUSI UN3310 Techniques of 20th Century Music
MUSI UN3239 Introduction to Composition
MUSI UN3241 Advanced Composition

MAJOR IN MUSIC

The major in music requires a minimum of 40 points, including the following courses:

You must complete up to Music Theory IV:

MUSI UN2318 - MUSI UN2319	MUSIC THEORY I and MUSIC THEORY II
MUSI UN3321 - MUSI UN3322	MUSIC THEORY III and MUSIC THEORY IV
You must complete up to Ear-Training IV, ET V is optional:	
MUSI UN2314 - MUSI UN2315	Ear Training, I and Ear Training, II
MUSI UN3316 - MUSI UN3317	EAR-TRAINING III and Ear Training, IV
MUSI GU4318	Ear Training, V
MUSI UN3128 - MUSI UN3129	HIST-WEST MUS: MID AGE-BAROQUE and HIST-WEST MUS:CLASSICAL-20TH CENTURY
MUSI UN3400	Topics in Music and Society

Electives: At least two 3000- or 4000-level electives.

The remaining points are to be earned through 1000-level MPP courses, 2000, 3000 or 4000-level courses subject to these constraints:

1. No more than 6 points of 2000-level courses.
2. No more than 4 points of 1000-level MPP courses and UN1518 combined (list below):

MPP UN1401	Bassoon Instruction
MPP UN1403	Cello Instruction
MPP UN1405	Clarinet Instruction
MPP UN1407	Classical Saxophone Instruction
MPP UN1409	Flute Instruction
MPP UN1411	French Horn Instruction
MPP UN1413	Guitar (Bluegrass) Instruction
MPP UN1415	Guitar (Classical) Instruction
MPP UN1417	Harp Instruction
MPP UN1419	Oboe Instruction
MPP UN1421	Organ Instruction
MPP UN1423	Percussion Instruction
MPP UN1425	Piano Instruction
MPP UN1427	String Bass Instruction
MPP UN1429	Trombone Instruction
MPP UN1431	Trumpet Instruction
MPP UN1433	Tuba Instruction
MPP UN1435	Viola Instruction
MPP UN1437	Violin Instruction
MPP UN1439	Early Instruments: Harpsichord
MPP UN1441	Early Instruments: Viola da Gamba
MPP UN1443	Jazz Bass Instruction
MPP UN1445	Jazz Bass (Electric) Instruction
MPP UN1447	Jazz Guitar (Electric) Instruction
MPP UN1449	Jazz Orchestration
MPP UN1451	Jazz Percussion Instruction
MPP UN1453	Jazz Piano Instruction
MPP UN1455	Jazz Saxophone Instruction
MPP UN1457	Jazz Trombone Instruction
MPP UN1459	Jazz Trumpet Instruction
MPP UN1461	Jazz Voice Instruction
MPP UN1511	Collegium Musicum
MPP UN1521	University Orchestra
MPP UN1531	Chamber Ensemble
MPP UN1541	Columbia University Jazz Ensemble
MPP UN1551	World Music Ensemble

CONCENTRATION IN MUSIC

The concentration in music requires a minimum of 28 points, including the following courses:

You must complete up to Music Theory IV:

MUSI UN2318 - MUSI UN2319	MUSIC THEORY I and MUSIC THEORY II
MUSI UN3321 - MUSI UN3322	MUSIC THEORY III and MUSIC THEORY IV
You must complete up to Ear-Training IV, ET V is optional:	

MUSI UN2314 - MUSI UN2315	Ear Training, I and Ear Training, II
MUSI UN3316 - MUSI UN3317	EAR-TRAINING III and Ear Training, IV
MUSI GU4318	Ear Training, V
MUSI UN3128 - MUSI UN3129	HIST-WEST MUS: MID AGE- BAROQUE and HIST-WEST MUS:CLASSICAL-20TH CENTURY
MUSI UN3400	Topics in Music and Society

Electives: At least one 3000- or 4000-level electives.

The remaining points are to be earned through 1000-level MPP courses, 2000, 3000 or 4000-level courses subject to these constraints:

1. No more than 6 points of 2000-level courses.
2. No more than 4 points of 1000-level MPP courses and UN1518 combined (list below):

MPP UN1401	Bassoon Instruction
MPP UN1403	Cello Instruction
MPP UN1405	Clarinet Instruction
MPP UN1407	Classical Saxophone Instruction
MPP UN1409	Flute Instruction
MPP UN1411	French Horn Instruction
MPP UN1413	Guitar (Bluegrass) Instruction
MPP UN1415	Guitar (Classical) Instruction
MPP UN1417	Harp Instruction
MPP UN1419	Oboe Instruction
MPP UN1421	Organ Instruction
MPP UN1423	Percussion Instruction
MPP UN1425	Piano Instruction
MPP UN1427	String Bass Instruction
MPP UN1429	Trombone Instruction
MPP UN1431	Trumpet Instruction
MPP UN1433	Tuba Instruction
MPP UN1435	Viola Instruction
MPP UN1437	Violin Instruction
MPP UN1439	Early Instruments: Harpsichord
MPP UN1441	Early Instruments: Viola da Gamba
MPP UN1443	Jazz Bass Instruction
MPP UN1445	Jazz Bass (Electric) Instruction
MPP UN1447	Jazz Guitar (Electric) Instruction
MPP UN1449	Jazz Orchestration
MPP UN1451	Jazz Percussion Instruction
MPP UN1453	Jazz Piano Instruction
MPP UN1455	Jazz Saxophone Instruction
MPP UN1457	Jazz Trombone Instruction
MPP UN1459	Jazz Trumpet Instruction
MPP UN1461	Jazz Voice Instruction
MPP UN1511	Collegium Musicum

MPP UN1521	University Orchestra
MPP UN1531	Chamber Ensemble
MPP UN1541	Columbia University Jazz Ensemble
MPP UN1551	World Music Ensemble

SPECIAL CONCENTRATION IN JAZZ STUDIES

Students interested in a special concentration in jazz studies should see *Jazz Studies*.

FALL 2020

MUSI UN1002 FUNDAMENTALS OF MUSIC. 3.00 points.

Corequisites: Introductory Ear-Training (V1312, or higher, as determined by placement exam).

Introduction to music, including notation, written and aural skills, and basic conceptual resources of music theory.

Exploration of scale, mode, rhythm, meter, texture and form, with reference to a diverse range of musics

Fall 2020: MUSI UN1002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MUSI UN2030 Jewish Music of New York. 3 points.

Prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard).

With the arrival of the first Jewish immigrants in New York in the mid-1600s until today, Jewish music in the City has oscillated between preserving traditions and introducing innovative ideas. This course explores the variety of ways people have used music to describe, *inscribe*, symbolize, and editorialize their Jewish experience. Along these lines, it draws upon genres of art music, popular music, and non-Western traditions, as well as practices that synthesize various styles and genres, from *hazzanut* to hiphop. Diverse musical experiences will serve as a window to address wider questions of identity, memory, and dislocation. We will also experience the Jewish soundscape of New York's dynamic and eclectic music culture by visiting various venues and meeting key players in today's music scene, and thus engage in the ongoing dialogues that define Jewishness in New York. A basic familiarity with Judaism and Jewish culture is helpful for this course, but it is by no means required. You do not need to know Jewish history to take this class, nor do you need to be able to read music. Translations from Hebrew and Yiddish will be provided, and musical analysis will be well explained.

Fall 2020: MUSI UN2030

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MUSI GU4360 ANALYSIS OF TONAL MUSIC. 3.00 points.

Detailed analysis of selected tonal compositions. This course, for advanced undergraduates and beginning graduates, is intended to develop understanding of tonal compositions and of theoretical concepts that apply to them, through study of specific works in various forms and styles

Fall 2020: MUSI GU4360

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 4360	001/11135	Th 10:10am - 12:00pm 404 Dodge Building	Benjamin Steege	3.00	7/12

MUSI GU4525 Instrumentation. 3 points.

Open to both graduate and advanced music major undergraduate students.

Prerequisites: extensive musical background.

Analysis of instrumentation, with directional emphasis on usage, ranges, playing techniques, tone colors, characteristics, interactions and tendencies, all derived from the classic orchestral repertoire. Topics will include theoretical writings on the classical repertoire as well as 20th century instrumentation and its advancement. Additional sessions with live orchestral demonstrations are included as part of the course.

MUSI GU4630 Recorded Sound. 3 points.

Prerequisites: The instructor's permission.

As music moves into the 21st century, we find ourselves surrounded by an ever-evolving landscape of technological capability. The world of music, and the music industry itself,

is changing rapidly, and with that change comes the opening – and closing – of doorways of possibility. What does this shift mean for today's practicing artist or composer? With big label recording studios signing and nurturing fewer and fewer artists, it seems certain that, today, musicians who want to record and distribute their music need to be able to do much of the recording and production work on their own. But where does one go to learn how to do this – to learn not only the “how to” part of music production, but the historical underpinnings and the development of the music production industry as well?

How does one develop a comprehensive framework within which they can place their own artistic efforts? How does one learn to understand what they hear, re-create what they like and develop their own style?

This class, “Recorded Sound,” aims to be the answer. It's goal is to teach artists how to listen critically to music from across history and genres in order to identify the production techniques that they hear, and reproduce those elements using modern technology so they can be incorporated into the artist's own musical works.

Fall 2020: MUSI GU4630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 4630	001/11137	M 1:10pm - 4:00pm 317 Prentiss Hall	Seth Cluett	3	11/15

MUSI GU4810 Sound: Foundations . 3 points.

This foundational course in sound will begin by exploring how listening happens as well the tools necessary capture and present that listening. Through hands-on experimentation and demonstration, this seminar will examine both the technical and semiotic use of sound as a

material within creative practice. Fundamental studio techniques will be explored including soldering for building cables, microphones, and loudspeakers. We will also explore the building blocks of analog and digital processes for the creation of sound, including microphones (types, patterns, and placement), basic synthesis, and techniques for recording, mixing, editing, and mastering. Through creative projects that implement these skills we will learn by doing. We will study theories of sound and listening that determine or are determined by technology, from the physical and social dimensions of the sounds we use to create, language (sound as a symbol or object), acoustics (sound in space), acousmatics (sound without a visual reference), and psycho-acoustics (sound as cognitive process). This class assumes no prior knowledge or technical skill. Some reading will be assigned and we will look and listen to a lot of work, students are encouraged to participate actively in discussions.

MUSI UN2500 Women and Music. 3 points.

This course explores the relationship between women, music, and performance from a thematic and a cross-cultural perspective. Through the analysis of different case studies, we will investigate different topics from the perspective of ethnomusicology, cultural anthropology, and performance studies. A number of critical questions we will consider include: how does a particular gender ideology constructs and is constructed by musical aesthetics? What are some of the critical roles for women in performance? What is the significance of gender in performances? What does it mean for women to have have and to be the voice? And how is a musical performance bound up with emotions?

MUSI UN3117 Singing Against Slavery: Five Centuries of Resistance. 3.00 points.

From the sixteenth through the nineteenth centuries, African and African-descended people were systematically forced into a cruel system of slavery. Under such extreme circumstances, how did people use music to resist their enslavement? How did their allies, both black and white, use music to mobilize the antislavery movement? And how have musicians used the rhetoric of antislavery to resist slavery's legacies from 1865 to today? This course takes a chronological approach to these questions, tracing shifting strategies of musical resistance to slavery before, during, and after the Anglo-American

antislavery movements of the eighteenth and nineteenth centuries. We will cover a wide range of musical genres, including street ballads, spirituals, operas, and protest songs, as well as written sources such as travel accounts, runaway slave advertisements, and slave narratives. The course takes an inclusive approach to the antislavery movement, paying special attention to the voices of free and enslaved black people as well as women, white and black, who worked to fight slavery. Completion of Masterpieces of Western Music is preferred, though not required

Spring 2021: MUSI UN3117

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 3117	001/17696	M W 10:10am - 11:25am Online Only	Julia Hamilton	3.00	10/15

MUSI UN3129 HIST-WEST MUS:CLASSICAL-20TH CENTURY. 3.00 points.

Prerequisites: *MUSI V2318-2319*. May be taken before or concurrently with this course.

Topics in Western music from the Classical era to the present day, focusing on the development of musical style and thought, and on analysis of selected works

MUSI UN3400 Topics in Music and Society. 3 points.

Music Majors and Concentrators.

This course seeks to approach the study of music and society by comparatively studying repertoires from different parts of the world, how the history of ideas and methods of studying such repertoires shaped them, the practices that constitute them and the ways they are understood and used by different peoples.

Central to this course is the interrelationship between the constitution of a repertoire and the history of the construction of knowledge about it.

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 3400	001/12006	T Th 4:10pm - 5:25pm Online Only	Alessandra Ciucci	3	28/33

MUSI UN3431 Sensing the Amazon: Song, Sound # Image. 3.00 points.

The Amazon is a big, diverse, and complex region, hard to contain under a sole narrative. This course takes the Amazon as a case study for engaging in sound, song and audiovisual productions as modes of fabricating and perceiving difference, creating with difference, as well imagining and transforming territories. Through texts, audiovisual material, and songs focused mainly on the Brazilian Amazon, as well as material produced by Amazonian peoples of rural and urban territories

in Brazil, we will examine clashing and coexisting sensorial perceptions and histories of the region. We will critically engage with the ways the region is perceived as forest, resource, and nature at harm. Students will be invited to examine the Amazon as a home to many different social groups whose modes of living question clear cut separations between the city and the forest, and as a cosmopolitan region with diverse cultural articulations of the sacred and the profane. We will analyze sonic and audiovisual products from and about the Amazon in terms of the ethics of their making and the imaginaries they propose and create. This course is open to students from all departments who are interested in the interdisciplinary study of sound, anthropology, media, and film, as well as anyone interested in expanding their critical sociocultural approach to listening

MUSI UN3996 Honors Research. 3 points.

Open to honors candidates in music only.

Prerequisites: a formal proposal to be submitted and approved prior to registration; see the director of undergraduate studies for details.

A creative/scholarly project conducted under faculty supervision, leading to completion of an honors essay, composition, or the equivalent.

MUSI UN3999 Supervised Independent Study. 3 points.

Prerequisites: approval prior to registration; see the director of undergraduate studies for details.

A creative/scholarly project conducted under faculty supervision.

MUSI GU4109 Music, Musicians and Mobility in the Early Modern Period. 3 points.

In the early modern period—here roughly limited to the fifteenth through early seventeenth century—the Western idea of the world underwent two contrasting, but equally fundamental shifts. On the one hand, the known world expanded in unprecedented and entirely unexpected ways. At the same time, on the other hand, Europe itself splintered dramatically along conflicting religious lines that would shape politics and warfare for centuries after, erecting barriers and boundaries where they previously did not exist. This course studies the effect of these changes on music, through the lens of mobility, understood in various ways, both social and physical.

MUSI GU4308 Theory and Analysis of Jazz and Improvisation. 3 points.

This course explores diverse approaches to analyzing jazz and improvisation. Students will engage with analytical methods stemming from both scholars and improvisers, learn to apply traditional analytical approaches, examine critical issues underlying them, and develop new applications of heretofore underexamined ones. We will focus alternatively on harmony, solos, interaction, cognition, rhythm, and pedagogy, among other issues, and the survey will afford students insight into the priorities, methodologies, outcomes, and shortcomings of each of them. Additionally, the course covers theoretical texts produced by improvising musicians, as well as instances where improvisers engage with preexisting theoretical texts. Finally, we will also examine intersections between identity—encompassing issues such as race, ethnicity, gender, and class among others—and music theory. We will investigate characterizations of music theory, composition, and improvisation in terms of identity and suggest ways that we might incorporate the diverse range of theorists and analysts in our course into larger intellectual and musical histories.

MUSI GU4319 Ear-Training VI. 1 point.

Advanced dictation, sight singing, and musicianship, with emphasis on 20th-century music.

MUSI GU4325 Introduction to Cognitive Musicology. 3 points.

This course is an introduction to a variety of key topics in the field of cognitive musicology, including human development, evolution, neural processing, embodied knowledge, memory and anticipation, cross-cultural perspectives, and emotions. The course explores recent research on these topics, as well as ways in which this research can be applied to music scholarship.

MUSI GU4406 Acoustic Ecologies. 3 points.

This course explores the relationship between music, sound and the environment from a cross cultural perspective. We will explore notions such as acoustic ecology, ambient sound, soundscape and acoustemology, ecomusicology and the relation between sound, climate change, and the anthropocene. We will also address how different cultures conceive of the changing relations between sounding and environment and how these are linked to decolonial struggles.

MUSI GU4515 Conducting Music. 3 points.

Prerequisites: advanced music major and extensive contemporary music background.

Analysis of the modern repertory of contemporary music with directional emphasis on actual conducting preparation, beating patterns, rhythmic notational problems, irregular meters, communication, and transference of musical ideas. Topics will include theoretical writing on 20th-century conducting, orchestration, and phrasing.

MUSI GU4630 Recorded Sound. 3 points.

Prerequisites: The instructor's permission.

As music moves into the 21st century, we find ourselves surrounded by an ever-evolving landscape of technological capability. The world of music, and the music industry itself, is changing rapidly, and with that change comes the opening – and closing – of doorways of possibility. What does this shift mean for today's practicing artist or composer? With big label recording studios signing and nurturing fewer and fewer artists, it seems certain that, today, musicians who want to record and distribute their music need to be able to do much of the recording and production work on their own. But where does one go to learn how to do this – to learn not only the “how to” part of music production, but the historical underpinnings and the development of the music production industry as well?

How does one develop a comprehensive framework within which they can place their own artistic efforts? How does one learn to understand what they hear, re-create what they like and develop their own style?

This class, “Recorded Sound,” aims to be the answer. It's goal is to teach artists how to listen critically to music from across history and genres in order to identify the production techniques that they hear, and reproduce those elements using modern technology so they can be incorporated into the artist's own musical works.

Fall 2020: MUSI GU4630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

OF RELATED INTEREST**PHILOSOPHY**

Departmental Office: 708 Philosophy; 212-854-3196
www.philosophy.columbia.edu

Director of Undergraduate Studies: David Albert,
 706 Philosophy; 212-854-3519; da5@columbia.edu
[\(da5@columbia.edu\)](mailto:da5@columbia.edu)

Economics-Philosophy Adviser: Jessica Collins, 714
 Philosophy; 212-854-3970; jessica.collins@columbia.edu

Students interested in philosophy may pursue a major either in philosophy or in economics-philosophy. Because philosophy treats issues fundamental to both the sciences and the humanities, students are also welcome to combine their philosophy major with work in other fields. Before declaring a major in philosophy or economics-philosophy, and before deciding to combine philosophy with another discipline, students should meet with the director of undergraduate studies to formulate the program best for them.

Philosophy majors are given a foundation in logic and philosophical methodology, and are asked to confront fundamental questions in the main areas of philosophy: epistemology and metaphysics, ethics and political philosophy, philosophy of mind and language, and history of philosophy. The department requires that all majors take at least one seminar (PHIL UN3912), designed to allow students to focus on particular philosophical issues or texts in greater depth. Outstanding seniors may also pursue their own philosophical project in a senior thesis.

Over and above the courses required of all majors, there is room for considerable flexibility. Through an appropriate choice of electives from among the department's offerings (and from related courses in other departments), there are special opportunities for focusing more intensively on one or two subfields of philosophy, e.g., logic and the philosophy of mathematics, philosophy of science, ethics and political philosophy, or the history of philosophy. Students should

consult with the director of undergraduate studies on how best to pursue such programs.

STUDY ABROAD: REID HALL, PARIS

For information on the Columbia in Paris Program at Reid Hall, including summer courses, consult the *Columbia University in Paris Bulletin* (available in 606 Kent and online at the [Office of Global Programs](#) website), call 212-854-2559, or send an email to reidhall@columbia.edu. For information on applicability of Reid Hall courses to the major or concentration, consult the director of undergraduate studies.

GRADING

Courses in which a grade of D has been received do not count toward the major or concentration requirements.

SENIOR THESIS

Undergraduates majoring in Philosophy or Economics-Philosophy may propose to write a senior thesis. Students who wish to write a thesis should approach a faculty member at the end of their junior or beginning of their senior year, and begin working on the proposal early in the fall semester of their senior year. Proposals are due in early December, and will be reviewed by a committee which will include the Director of Undergraduate Studies; students will be notified of the committee's decision within two weeks. Students whose proposals are approved should register for their faculty advisor's section of Supervised Independent Research for the spring term of the senior year. Theses are due in early April.

Students who have a grade point average of 3.6 or above in the major and who complete a thesis will be placed into consideration for departmental honors, though any senior may complete a thesis regardless of their grade point average (upon approval of the proposal).

See the full policy and procedure concerning senior theses on the departmental webpage:

<http://philosophy.columbia.edu/content/senior-thesis-philosophy>

DEPARTMENTAL HONORS

Departmental honors are highly competitive. Normally no more than 10% of the majors graduating in the department each year will receive departmental honors.

In order to qualify for departmental honors in philosophy, a student must have a grade point average of at least 3.6 in the major.

For students with a GPA of 3.6 or above, there are two possible routes to consideration:

1. A student may complete a senior thesis; those students who complete senior theses will automatically be considered for honors without having to be nominated.

2. A student may be nominated by a faculty member early in the spring semester of the senior year; nominated students will be invited to submit a writing sample at least 15 pages in length. A nominated student who is also writing a thesis may submit their thesis as the writing sample, or may choose to submit a different work.

Both the senior theses and writing samples are due in early April. The departmental honors committee will then review the submitted material and the academic records of the writers, and will report to the full faculty.

The full faculty will then decide which students to recommend for departmental honors to the Columbia College and General Studies administrations.

MAJOR IN PHILOSOPHY

Students considering a major in philosophy are strongly encouraged to meet with the director of undergraduate studies early in their sophomore year. All majors must consult with the director of undergraduate studies each term before registering for classes in order to plan and update their individual programs of study.

Students planning to major in philosophy are advised to begin with PHIL UN1010 METHDS/PROB OF PHILOS THOUGHT. Beginning students are especially encouraged to take 2000-level courses, both in the history of philosophy and in systematic philosophy. These courses are typically less specialized and less narrowly focused than higher-numbered ones. More advanced students are encouraged to take 3000-level courses. The department requires that all majors take at least one seminar, PHIL UN3912.

No more than one course at the 1000-level can be counted toward the major. In order to enroll in one of the 4000-level courses, students must have taken at least four courses in Philosophy.

The major requires a minimum of 30 points in philosophy chosen from courses prefixed with *UN* or *GU*:

PHIL UN2101	The History of Philosophy I: Presocratics to Augustine
PHIL UN2201	History of Philosophy II: Aquinas to Kant
PHIL UN3411	SYMBOLIC LOGIC
At least one course in either metaphysics or epistemology e.g., PHIL W3960, or a related course to be chosen in consultation with the director of undergraduate studies.	
Select at least one course in either ethics or social and political philosophy from the following:	
PHIL UN2702	Contemporary Moral Problems
PHIL UN3701	ETHICS
PHIL UN3751	POLITICAL PHILOSOPHY
A related course to be chosen in consultation with the director of undergraduate studies.	
PHIL UN3912	Seminar

CONCENTRATION IN PHILOSOPHY

Philosophy, as an academic discipline, has significant points of contact with a wide range of other subjects—in the humanities, the social sciences, and the natural sciences. A concentration in philosophy thus can be an attractive option for many students. Those considering becoming concentrators are strongly encouraged to meet with the director of undergraduate studies early in their sophomore year, in order to discuss their specific interests and to plan their programs of study. All concentrators

should consult with the director of undergraduate studies each term before registering for courses.

The concentration requires a minimum of 24 points in philosophy, chosen from courses prefixed with *UN* or *GU*. There are no specific courses required for the concentration.

Students may choose courses prefixed with *GR* only with the instructor's permission.

PHIL UN3912 is open to junior and senior concentrators who have taken at least four courses in philosophy.

MAJOR IN ECONOMICS-PHILOSOPHY

Please read *Guidelines for all Economics Majors, Concentrators, and Interdepartmental Majors* in the *Economics* section of this Bulletin.

Economics-Philosophy is an interdisciplinary major that, while introducing students to the basic methodologies of economics and philosophy, stresses areas of particular concern to both. These include subjects such as rationality and decision making, justice and efficiency, freedom and collective choice, and the logic of empirical theories and their testing. Many of the issues are dealt with historically, and classic texts of Plato, Kant, Mill, Marx, and Smith are reviewed.

Two advisers are assigned for the interdepartmental major, one in the Department of Economics and one in the Department of Philosophy. Please note that the Economics adviser can only advise on the Economics requirements and the Philosophy adviser can only advise on the Philosophy requirements.

The Economics-Philosophy major requires a total minimum of 54 points: 25 points in Economics, 16 points in Philosophy, 6 points in Mathematics, 3 points in Statistics, and 4 points in the interdisciplinary seminar as follows:

Economics Core Courses

ECON UN1105	Principles of Economics
ECON UN3211	Intermediate Microeconomics
ECON UN3213	Intermediate Macroeconomics
ECON UN3412	Introduction To Econometrics

Mathematics Sequence

Select a mathematics sequence

Statistics

Select a statistics course

Economics Electives

Three electives are required; refer to the Economics section of this bulletin.

Philosophy Courses

PHIL UN1010	METHDS/PROB OF PHILOS THOUGHT
PHIL UN3411	SYMBOLIC LOGIC

PHIL UN3701	ETHICS (a social or political philosophy course may be substituted, please consult the Philosophy DUS)
PHIL UN3551 or PHIL UN3960	Philosophy of Science EPISTEMOLOGY
PHIL GU4561	Probability and Decision Theory
Seminar	
ECPH GU4950	Economics and Philosophy Seminar (or another seminar in philosophy or economics approved by advisers in both department)

Students who declared before Spring 2014:

The requirements for this program were modified in 2014. Students who declared this program before Spring 2014 should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

FALL 2020

PHIL UN1001 Introduction to Philosophy. 3 points.

Survey of some of the central problems, key figures, and great works in both traditional and contemporary philosophy. Topics and texts will vary with instructor and semester.

Fall 2020: PHIL UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 1001	001/00062	T Th 2:40pm - 3:55pm Room TBA	Francey Russell	3	30/40

PHIL UN3264 19th Century Philosophy: Hegel. 3 points.

Prerequisites: Phil UN2201 or PHIL UN3251

Examines major themes of Hegel's philosophy, with emphasis on social and political thought. Topics include Hegel's critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in a rational society. Readings from Kant's Third Critique help explain how Hegel's project develops out of Kant's transcendental idealism. Some knowledge of Kant's moral theory and his Critique of Pure Reason is presupposed. Prerequisite: at least one of PHIL UN2201, PHIL UN2301, or PHIL UN3251.

Fall 2020: PHIL UN3264

PHIL UN3752 Philosophy of Law. 3 points.

This course explores philosophical reflection on the relationship between law, society and morality. We discuss the nature of law, the nature of legal reasoning, the relationship between law and social policy, and central concepts in civil and criminal law. Readings are drawn from such sources as the natural law tradition, legal positivism, legal realism, and Critical Legal Theory. Readings will be supplemented by analysis of classic cases.

PHIL UN3858 CULTIVATING INDIVIDUALITY. 3 points.

Talk about "individuality", about "being" (or becoming) "yourself" is all around us. But what exactly does this mean? What is genuine individuality, and how can we develop, it in ourselves (through self-development) and in others (by designing appropriate educational institutions)? What is the relationship between an individual and being a part of society? Is there a tension between non-conformism often associated with genuine individuality on the one hand, and the demands of community and good citizenship, on the other? Can educational institutions be designed to fulfill both those demands (to the extent they are distinct)? And how might oppressive social institutions hinder the development of "individuality"? In this course, we will explore these and related questions by drawing both on the classics of philosophy of education (Plato, Rousseau, Nietzsche, Dewey, BeDois), and on relevant literary material that is in conversation with the philosophical texts (Rilke, Tolstoy, Woolfe).

PHIL UN3751 POLITICAL PHILOSOPHY. 3.00 points.

Six major concepts of political philosophy including authority, rights, equality, justice, liberty and democracy are examined in three different ways. First the conceptual issues are analyzed through contemporary essays on these topics by authors like Peters, Hart, Williams, Berlin, Rawls and Schumpeter. Second the classical sources on these topics are discussed through readings from Hobbes, Locke, Hume, Marx, Plato, Mill and Rousseau. Third some attention is paid to relevant contexts of application of these concepts in political society, including such political movements as anarchism, international human rights, conservative, liberal, and Marxist economic policies as well as competing models of democracy

PHYSICAL EDUCATION AND INTERCOLLEGIATE ATHLETICS

Departmental Office: 336 Dodge Physical Fitness Center; 212-854-3439; perec.columbia.edu

Director of Undergraduate Studies: Director of Physical Education and Recreation, Jeffrey Ryder, 332 Dodge Physical Fitness Center; jr3786@columbia.edu; 212-854-4001

Departmental Administrative: Belgica Ramirez,
212-854-3439; br12@columbia.edu

The Physical Education Department offers a variety of activities in the areas of aquatics, fitness, martial arts, individual/dual sports, team sports, and outdoor education. Most of the activities are designed for the beginner level. Intermediate/advanced courses are offered at selected times. All courses are designed to develop and/or improve students' fundamental skills and to help realize their potential. Activity that promotes one's fitness level is emphasized. A major goal is to provide a positive, enjoyable experience for students, hopefully leading to the development of an active, healthy lifestyle.

The majority of the courses are offered in ten time preferences. However, there are early morning conditioning activities, Friday-only classes at Baker Athletics Complex, and special courses that utilize off-campus facilities during weekends. A description of the scheduled activities for each time preference is included in the Department of Physical Education [website](#).

A list of the activities for the term is included in the *Directory of Classes* and on the website. Students may select physical education courses during online registration. Students may register for only one section of Physical Education each term.

PHYSICAL EDUCATION REQUIREMENT

Successful completion of two Physical Education courses is a Columbia College requirement that students are advised to complete by the end of the first year. Students may elect to take one or two additional terms of Physical Education Activities for credit. Students receive 1 point of academic credit for each completed term of physical education for a possible total of 4 points.

For more information on this requirement, please visit the *Core Curriculum*—Physical Education Requirement section of the bulletin.

MEDICAL CONDITIONS

Students who request to have their Physical Education activities limited or waived because of a medical condition should contact the Director of Undergraduate Studies for Physical Education. In some situations, students may require an evaluation by a clinician at Health Services at Columbia in order to receive a waiver. In consultation with the Director of Physical Education, students may be instructed to contact Dr. Melanie Bernitz, Medical Director of Columbia Health Programs, who facilitates these evaluations.

GRADING

The grading in all physical education courses is Pass/Fail. Students who fulfill the attendance and participation requirement receive a Pass. Those who miss more than the permissible number of classes and who do not drop the course by the official drop deadline receive a W (Withdrawal).

Those who anticipate attendance problems should contact their instructors or the Director of Undergraduate Studies for Physical Education.

SWIM TEST

All students are also required to pass a swimming test or take beginning swimming for one term to fulfill the swimming requirement. A waiver of the swimming test requirement may be granted if a student has a disability certified by a medical authority that precludes swimming. Students may also request waivers and accommodations on the grounds of religious observance or gender identity/expression. All requests for waivers and accommodations are reviewed by the director of physical education.

LOCKER AND TOWEL SERVICE

Students have access to a lock/towel service (\$38 fee) and, with the exception of tennis, equipment for the activities is supplied by the Physical Education Department.

INTERCOLLEGIATE ATHLETICS

Students who are participating on an intercollegiate team should register for the appropriate team section of PHED UN1005 Intercollegiate Athletics. Intercollegiate athletes are responsible for taking the swimming test. Student athletes who cannot pass the test should take beginning swimming at the first possible opportunity.

Student athletes who register correctly and participate on a team receive a Pass; those who drop off a team in midterm and still wish to receive academic credit must notify the Physical Education Office and be placed in an activity to complete the attendance requirement. Otherwise, the student must officially drop *Intercollegiate Athletics* or they receive a mark of W (Withdrawal).

PHYSICS

Departmental Office: 704 Pupin; 212-854-3348
<http://www.columbia.edu/cu/physics>

Director of Undergraduate Studies: Dr. Jeremy Dodd, 924 Pupin; 212-854-3969; jeremy.dodd@columbia.edu

The physics major offers a rigorous preparation in the intellectual developments of modern physics, along with extensive exposure to the mathematical and experimental techniques required to conduct basic and applied research in physics.

For the major, the department offers a set of required courses well-suited to prepare students for the most rigorous course of graduate study. These can be supplemented by elective courses in a variety of advanced topics. Although most majors go on to graduate work in physics, the intellectual skills acquired in the study of physics can also provide the basis for work in a variety of other scientific and nonscientific areas.

The physics concentration is for students who are interested in physics but are uncertain about graduate study in physics; for those who want to explore other subjects along with physics; for those who want to find a physics- or technology-related job after graduation; or for those who are considering a professional school such as law or medicine. The department helps concentrators custom design programs to ensure maximum flexibility in meeting students' intellectual needs and career goals. With appropriate selection of courses, the concentrator can explore other subjects yet maintain the option of graduate study in physics.

Research is an extremely important component of the Columbia physics experience. Because the department has a very small student-to-faculty ratio, essentially all physics majors and concentrators engage in experimental, computational, or theoretical research under the close supervision of a faculty member during part, if not all, of their time at Columbia.

REGISTRATION FOR INTRODUCTORY COURSES

The department offers a stand-alone one-semester course for nonscience majors, one introductory sequence in physics intended primarily for preprofessional students, and three introductory sequences in physics for engineering and physical

science majors. Students are given credit for courses from only one of the different sequence groups.

Mixing courses across the sequences is strongly discouraged; however, physics majors who begin their studies with PHYS UN1401 Introduction To Mechanics and Thermodynamics - PHYS UN1402 INTRO ELEC/MAGNETISM # OPTCS should take PHYS UN2601 Physics, III: Classical and Quantum Waves as the third-semester course.

Introductory Sequences

Nonscience Majors:

PHYS UN1001 Physics for Poets

Preprofessional Students:

PHYS UN1201 General Physics I
- PHYS UN1202 and General Physics II

Accompanying laboratory course:

PHYS UN1291 General Physics Laboratory
- PHYS UN1292 and General Physics Laboratory II

Engineering and Physical Science Majors:

Select one of the following sequences with accompanying laboratory course:

Sequence A:

PHYS UN1401 Introduction To Mechanics and
- PHYS UN1402 Thermodynamics
- PHYS UN1403 and INTRO ELEC/MAGNETISM
OPTCS
and Introduction to Classical and
Quantum Waves

Sequence B:

PHYS UN1601 Physics, I: Mechanics and
- PHYS UN1602 Relativity
- PHYS UN2601 and Physics, II: Thermodynamics,
Electricity, and Magnetism
and Physics, III: Classical and
Quantum Waves

Sequence C:

PHYS UN2801 Accelerated Physics I
- PHYS UN2802 and Accelerated Physics II

Sequence A is a self-contained group of three courses, while Sequences B and C anticipate more course work in the Physics Department. Students considering a physics major are strongly encouraged to begin one of these sequences in their first year.

LABORATORY

Many of the introductory courses include a laboratory, as indicated. A \$75 per term *laboratory fee* is charged for all 1000-level and 2000-level laboratories.

ADVANCED PLACEMENT

Students may earn a maximum of 6 credits in physics. The department grants 6 credits for a score of 4 or 5 on the AP Physics B exam, but the student is not entitled to any

exemptions. The amount of credit is reduced to 3 if the student takes a 1000-level physics course.

The department grants 3 credits for a score of 4 or 5 on the AP Physics C/MECH exam, but the student is not entitled to any exemptions. The amount of credit is reduced to 0 if the student takes PHYS UN1001, PHYS UN1201, PHYS UN1401 or PHYS UN1601.

The department grants 3 credits for a score of 4 or 5 on the AP Physics C/E&M exam, but the student is not entitled to any exemptions. The amount of credit is reduced to 0 if the student takes PHYS UN1001, PHYS UN1202, PHYS UN1402 or PHYS UN1602.

GUIDELINES FOR ALL PHYSICS MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Majors and concentrators should plan their programs of study with the director of undergraduate studies before the beginning of the junior year.

Prospective physics majors are strongly encouraged to begin one of the introductory physics sequences in their first year. Majors should aim to acquire as extensive a background in mathematics as possible.

The department considers laboratory experience to be an essential part of the physics curriculum. Majors and concentrators can gain such experience in the intermediate-level laboratories, the electronics laboratory, and through experimental research in faculty research groups.

Grading

A grade of C- or better must be obtained for a course to count toward the majors or the concentration. The grade of P is not acceptable, but a course that was taken P/D/F may be counted if and only if the P is uncovered by the Registrar's deadline.

MAJOR IN PHYSICS

Physics Courses

The major in physics requires a minimum of 41 points in physics courses, including:

Introductory Sequences

Select one of the following sequences:

Sequence A: Students with a limited background in high school physics may elect to take:

PHYS UN1401	Introduction To Mechanics and Thermodynamics
- PHYS UN1402	and INTRO ELEC/MAGNETISM
- PHYS UN2601	# OPTCS and Physics, III: Classical and Quantum Waves

Sequence B:

PHYS UN1601	Physics, I: Mechanics and Relativity
- PHYS UN1602	and Physics, II: Thermodynamics, Electricity, and Magnetism
- PHYS UN2601	and Physics, III: Classical and Quantum Waves

Sequence C: Students with advanced preparation in both physics and mathematics may be eligible to take:

PHYS UN2801	Accelerated Physics I
- PHYS UN2802	and Accelerated Physics II

Core Physics Courses

PHYS UN3003	Mechanics
PHYS UN3007	Electricity and Magnetism
PHYS UN3008	Electromagnetic Waves and Optics
PHYS GU4021	Quantum Mechanics I
PHYS GU4022	Quantum Mechanics II
PHYS GU4023	Thermal and Statistical Physics

Elective Courses

Select at least six points of the following courses:

PHYS UN3002	From Quarks To the Cosmos: Applications of Modern Physics
PHYS GU4003	Advanced Mechanics
PHYS GU4011	Particle Astrophysics and Cosmology
PHYS GU4018	Solid-State Physics
PHYS GU4019	Mathematical Methods of Physics
PHYS GU4040	Introduction to General Relativity
PHYS GU4050	Introduction to Particle Physics

With the permission of the Director of Undergraduate Studies, 4000- or 6000-level courses offered in this or other science departments

Laboratory Work at the Intermediate Level *

Select one of the following options:

Option 1:	
PHYS UN3081	Intermediate Laboratory Work (two semesters)
PHYS UN3083	Electronics Laboratory

Option 2:

PHYS UN3081	Intermediate Laboratory Work (three semesters)
Senior Seminar	
PHYS UN3072	Seminar in Current Research Problems

* Approved experimental work with a faculty research group may satisfy one semester of the laboratory requirement.

Mathematics Courses

Calculus through MATH UN1202 CALCULUS IV or MATH UN1208 HONORS MATHEMATICS B; and MATH UN3027 Ordinary Differential Equations or the equivalent.

Recommended cognate courses: MATH UN2010 LINEAR ALGEBRA, MATH UN3007 Complex Variables, and MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS.

CONCENTRATION IN PHYSICS

The concentration in physics requires a minimum of 24 points in physics, including one of the introductory sequences.

INTERDISCIPLINARY MAJOR

It is also possible to major in astrophysics, biophysics, and chemical physics. Students interested in these areas should consult with the director of undergraduate studies and with cognate departments (astronomy, biological sciences, chemistry).

For astrophysics requirements please see:

<http://bulletin.columbia.edu/columbia-college/departments-instruction/astronomy/#requirementstext>

For biophysics requirements please see:

<http://bulletin.columbia.edu/columbia-college/departments-instruction/biological-sciences/#requirementstext>

For chemical physics requirements please see:

<http://bulletin.columbia.edu/columbia-college/departments-instruction/chemistry/#requirementstext>

PHYS UN1001 Physics for Poets. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school algebra.

This course does not fulfill the physics requirement for admission to medical school. No previous background in physics is expected. An introduction to physics taught through the exploration of the scientific method, and the application of physical principles to a wide range of topics from quantum mechanics to cosmology.

Spring 2021: PHYS UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1001	001/10222	M W 2:40pm - 3:55pm Online Only	Szabolcs Marka	3	92/150

PHYS UN1018 Weapons of Mass Destruction. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school science and math.

A review of the history and environmental consequences of nuclear, chemical, and biological weapons of mass destruction (WMD); of how these weapons work, what they cost, how they have spread, how they might be used, how they are currently controlled by international treaties and domestic legislation, and what issues of policy and technology arise in current debates on WMD. What aspects of the manufacture of WMD are easily addressed, and what aspects are technically challenging? It may be expected that current events/headlines will be discussed in class.

PHYS UN1111 Origins and Meaning. 3 points.

This course is a one-semester journey across cosmological history, from the beginning of time to something akin to its end. We will explore the origin of inanimate physical structures (the cosmos as a whole, as well as that of galaxies, stars, planets, particles, atoms and complex molecules), the origin of life (replicating molecules, the first cells, as well as more complex life forms), the origin of mind (self-reflective conscious awareness) and the origin of culture (language, myth, religion, art, and science). We will then consider what science in particular tells us about the very far future, where we will encounter the likely demise of all complex matter, all life and all consciousness. In the face of such disintegration we will examine the nature of value and purpose. We will recognize that the deepest understanding of reality emerges from blending all of the accounts we discuss—from the reductionist to the humanist to the cosmological—and only through such amalgamation can we fully grasp the long-standing human search for meaning.

Fall 2020: PHYS UN1111

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1111	001/13416	F 2:10pm - 5:00pm Online Only	Brian Greene	3	146/150

PHYS UN1201 General Physics I. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: some basic background in calculus or be concurrently taking MATH UN1101 Calculus I. The accompanying laboratory is PHYS UN1291-UN1292

The course will use elementary concepts from calculus. The accompanying laboratory is *PHYS UN1291 - UN1292*. Basic introduction to the study of mechanics, fluids, thermodynamics, electricity, magnetism, optics, special relativity, quantum mechanics, atomic physics, and nuclear physics.

Fall 2020: PHYS UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1201	001/13409	M W 10:10am - 11:25am Online Only	Michael Shaevitz	3	184/200
PHYS 1201	002/13410	M W 5:40pm - 6:55pm Online Only	Jeremy Dodd	3	104/150

Spring 2021: PHYS UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1201	001/10189	T Th 5:40pm - 6:55pm Online Only	P. Michael Tuts	3	141/200

PHYS UN1202 General Physics II. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: This course will use elementary concepts from calculus. Students should therefore have had some high school calculus, or be concurrently enrolled in MATH UN1101. Taken with accompanying lab PHYS UN1291- PHYS UN1292, the sequence PHYS UN1201- PHYS UN1202 satisfies requirements for medical school.

Electricity, magnetism, optics, and modern physics.

Spring 2021: PHYS UN1202

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1202	001/10190	M W 10:10am - 11:25am Online Only	Michael Shaevitz	3	147/200
PHYS 1202	002/12972	M W 5:40pm - 6:55pm Online Only	Eric Raymer	3	115/120

Summer 2021: PHYS UN1202

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1202	002/11140	M W 6:15pm - 7:30pm Online Only	Rebecca Grossman	3	47/70

PHYS UN1291 General Physics Laboratory. 1 point.

Same course as *PHYS W1291x*, but given off-sequence.

Corequisites: PHYS UN1201

This course is the laboratory for the corequisite lecture course and can be taken only during the same term as the corresponding lecture.

Fall 2020: PHYS UN1291

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1291	001/13900	M 1:00pm - 4:00pm Online Only	Giuseppina Cambareri	1	14/15

PHYS UN1292 General Physics Laboratory II. 1 point.

Corequisites: PHYS UN1201, PHYS UN1202

This course is the laboratory for the corequisite lecture course (*PHYS UN1201* - *PHYS UN1202*) and can be taken only during the same term as the corresponding lecture.

Spring 2021: PHYS UN1292

PHYS UN1401 Introduction To Mechanics and Thermodynamics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Corequisites: MATH UN1101

Fundamental laws of mechanics, kinematics and dynamics, work and energy, rotational dynamics, oscillations, gravitation, fluids, temperature and heat, gas laws, the first and second laws of thermodynamics. Corequisite: MATH UN1101 or the equivalent.

Fall 2020: PHYS UN1401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PHYS 1401	002/13413	T Th 10:10am - 11:25am Online Only	Tanya Zelevinsky, Giuseppina Cambareri	3	197/200

PHYS UN1402 INTRO ELEC/MAGNETISM # OPTCS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PHYS UN1401

Corequisites: MATH UN1102

Prerequisites: PHYS W1401. Corequisites: MATH V1102 or the equivalent. Electric fields, direct currents, magnetic fields, alternating currents, electromagnetic waves, polarization, geometrical optics, interference, and diffraction

Spring 2021: PHYS UN1402

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1402	001/10212	T Th 10:10am - 11:25am Online Only	Georgia Karagiorgi	3.00	189/200

PHYS UN1403 Introduction to Classical and Quantum Waves. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PHYS UN1402 *PHYS W1402*.Corequisites: *MATH V1201* or the equivalent.

Classical waves and the wave equation, Fourier series and integrals, normal modes, wave-particle duality, the uncertainty principle, basic principles of quantum mechanics, energy levels, reflection and transmission coefficients, applications to atomic physics.

Fall 2020: PHYS UN1403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1403	001/13415	M W 11:40am - 12:55pm Online Only	Yasutomo Uemura	3	110/150

PHYS UN1493 Introduction to Experimental Physics. 3 points.

Prerequisites: PHYS UN1401 and PHYS UN1402

Laboratory work associated with the two prerequisite lecture courses. Experiments in mechanics, thermodynamics, electricity, magnetism, optics, wave motion, atomic physics, and nuclear physics. Note: Students cannot receive credit for both *PHYS UN1493* and *UN1494*.

PHYS UN1494 Introduction to Experimental Physics. 3 points.

Prerequisites: PHYS UN1401 and PHYS UN1402

Laboratory work associated with the prerequisite lecture course. Experiments in mechanics, thermodynamics, electricity,

magnetism, optics, wave motion, atomic physics, and nuclear physics.

Fall 2020: PHYS UN1494

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

PHYS UN1601 Physics, I: Mechanics and Relativity. 3.5 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Corequisite: MATH UN1102 Calculus II or equivalent.

Fundamental laws of mechanics, kinematics and dynamics, work and energy, rotational dynamics, oscillations, gravitation, fluids, introduction to special relativity and relativistic kinematics. The course is preparatory for advanced work in physics and related fields.

Fall 2020: PHYS UN1601

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1601 001/13417		T Th 10:10am - 11:25am Online Only	Jeremy Dodd	3.5	187/200

Spring 2021: PHYS UN1601

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1601 001/10224		T Th 10:10am - 11:25am Online Only	Brian Cole	3.5	15/180

PHYS UN1602 Physics, II: Thermodynamics, Electricity, and Magnetism. 3.5 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PHYS UN1601 Corequisite: MATH UN1201 or equivalent.

Temperature and heat, gas laws, the first and second laws of thermodynamics, kinetic theory of gases, electric fields, direct currents, magnetic fields, alternating currents, electromagnetic waves. The course is preparatory for advanced work in physics and related fields.

Spring 2021: PHYS UN1602

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1602 001/10223		T Th 10:10am - 11:25am Online Only	Jeremy Dodd	3.5	175/200

PHYS UN2001 Special Relativity. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a working knowledge of high school algebra, trigonometry, and physics. Some familiarity with calculus is useful but not essential.

This course is a comprehensive, one-semester introduction to the essential ideas and mathematical structures underlying Einstein's Special Theory of Relativity. Among the topics covered will be: the relativity of simultaneity, time dilation, Lorentz contraction, velocity combination laws, time dilation over large distances, the Lorentz transformation, spacetime diagrams, the basic (seeming) paradoxes of special relativity, relativistic equations of motion and $E = mc^2$.

PHYS UN2601 Physics, III: Classical and Quantum Waves. 3.5 points.

Prerequisites: PHYS UN1402 or PHYS UN1602 Corequisite: MATH UN1202 or equivalent.

Classical waves and the wave equation, geometrical optics, interference and diffraction, Fourier series and integrals, normal modes, wave-particle duality, the uncertainty principle, basic principles of quantum mechanics, energy levels, reflection and transmission coefficients, the harmonic oscillator. The course is preparatory for advanced work in physics and related fields.

Fall 2020: PHYS UN2601

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2601 001/13418		M W 2:40pm - 3:55pm Online Only	Szabolcs Marka	3.5	64/100

PHYS UN2699 Experiments in Classical and Modern Physics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PHYS UN1601 or PHYS UN1401) and (PHYS UN1602 or PHYS UN1402) and PHYS UN2601 *PHYS W1601* (or *W1401*), *W1602* (or *W1402*), and *W2601*.

Laboratory work associated with the three prerequisite lecture courses. Experiments in mechanics, thermodynamics, electricity, magnetism, optics, wave motion, atomic physics, and nuclear physics.

PHYS UN2801 Accelerated Physics I. 4.5 points.

Prerequisites: Advanced Placement in physics and mathematics, or the equivalent, and the instructor's permission. (A special placement meeting is held during Orientation.)

This accelerated two-semester sequence covers the subject matter of *PHYS UN1601*, *PHYS UN1602* and *PHYS UN2601*, and is intended for those students who have an exceptionally strong background in both physics and mathematics. The course

is preparatory for advanced work in physics and related fields. There is no accompanying laboratory; however, students are encouraged to take the intermediate laboratory, *PHYS UN3081*, in the following year.

Fall 2020: PHYS UN2801

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2801	001/13419	T Th 10:10am - 12:00pm Online Only	Norman Christ	4.5	51/100

PHYS UN2802 Accelerated Physics II. 4.5 points.

Prerequisites: PHYS UN2801

This accelerated two-semester sequence covers the subject matter of *PHYS UN1601*, *PHYS UN1602* and *PHYS UN2601*, and is intended for those students who have an exceptionally strong background in both physics and mathematics. The course is preparatory for advanced work in physics and related fields. There is no accompanying laboratory; however, students are encouraged to take the intermediate laboratory, *PHYS UN3081*, in the following year.

PHYS 2802	001/10225	T Th 10:10am - 12:00pm Online Only	Norman Christ	4.5	32/70

PHYS UN2804 Disc Section Accelerated Physics II. 0 points.

Required discussion section for PHYS UN2802 Accelerated Physics II.

Spring 2021: PHYS UN2804

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2804	001/17325	W 5:10pm - 6:00pm Online Only	Norman Christ	0	6/25
PHYS 2804	002/17326	F 10:10am - 11:00am Online Only	Norman Christ	0	8/25

PHYS UN3002 From Quarks To the Cosmos: Applications of Modern Physics. 3.5 points.

Not offered during 2020-21 academic year.

Prerequisites: PHYS UN2601 or PHYS UN2802

This course reinforces basic ideas of modern physics through applications to nuclear physics, high energy physics, astrophysics and cosmology. The ongoing Columbia research programs in these fields are used as practical examples. The course is preparatory for advanced work in physics and related fields.

PHYS UN3003 Mechanics. 3 points.

Prerequisites: general physics, and differential and integral calculus.

Newtonian mechanics, oscillations and resonance, conservative forces and potential energy, central forces, non-inertial frames of reference, rigid body motion, an introduction to Lagrange's

formulation of mechanics, coupled oscillators, and normal modes.

Spring 2021: PHYS UN3003

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3003	001/10226	M W 10:10am - 11:25am Online Only	John Parsons	3	49/70

PHYS UN3007 Electricity and Magnetism. 3 points.

Prerequisites: general physics, and differential and integral calculus.

Electrostatics and magnetostatics, Laplace's equation and boundary-value problems, multipole expansions, dielectric and magnetic materials, Faraday's law, AC circuits, Maxwell's equations, Lorentz covariance, and special relativity.

Fall 2020: PHYS UN3007

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3007	001/13420	M W 11:40am - 12:55pm Online Only	Alfred Mueller, Giuseppina Cambareri	3	57/100

PHYS UN3008 Electromagnetic Waves and Optics. 3 points.

Prerequisites: PHYS UN3008

Maxwell's equations and electromagnetic potentials, the wave equation, propagation of plane waves, reflection and refraction, geometrical optics, transmission lines, wave guides, resonant cavities, radiation, interference of waves, and diffraction.

Spring 2021: PHYS UN3008

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3008	001/10227	M W 11:40am - 12:55pm 428 Pupin Laboratories	Alfred Mueller, Giuseppina Cambareri	3	55/70

PHYS UN3072 Seminar in Current Research Problems. 2 points.

May be taken for Pass/Fail credit only.

A detailed study of a selected field of active research in physics. The motivation, techniques, and results obtained to the present, as well as the difficulties and unsolved problems. For Physics majors only. Priority given to seniors; juniors by permission of the instructor.

Spring 2021: PHYS UN3072

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3072	001/10228	T 4:10pm - 5:25pm 412 Pupin Laboratories	Georgia Karagiorgi	2	9/40

PHYS UN3081 Intermediate Laboratory Work. 2 points.

May be repeated for credit by performing different experiments. The laboratory has available fifteen individual experiments, of which two are required per 2 points.

Prerequisites: phys UN2601 or phys un2802 Primarily for junior and senior physics majors; other majors must obtain the instructor's permission.

Each experiment is chosen by the student in consultation with the instructor. Each section meets one afternoon per week, with registration in each section limited by the laboratory capacity. Experiments (classical and modern) cover topics in electricity, magnetism, optics, atomic physics, and nuclear physics.

Spring 2021: PHYS UN3081

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3081	002/10230	Th 1:10pm - 5:00pm 6th Flr Pupin Laboratories	Morgan May	2	2/12

PHYS UN3083 Electronics Laboratory. 3 points.

Enrollment limited to the capacity of the laboratory.

Prerequisites: PHYS UN3003 or PHYS UN3007 May be taken before or concurrently with this course.

A sequence of experiments in solid-state electronics, with introductory lectures.

Spring 2021: PHYS UN3083

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3083	001/10232	M W 1:10pm - 4:00pm 329 Pupin Laboratories	John Parsons	3	7/12

PHYS UN3500 Supervised Readings in Physics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: the written permission of the faculty member who agrees to act as supervisor, and the director of undergraduate studies' permission.

Readings in a selected field of physics under the supervision of a faculty member. Written reports and periodic conferences with the instructor.

Fall 2020: PHYS UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

Spring 2021: PHYS UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3500	001/10233		Jeremy Dodd	3	1/20

PHYS UN3900 Supervised Individual Research. 1-5 points.

Prerequisites: the written permission of the faculty member who agrees to act as supervisor, and the director of undergraduate studies' permission.

For specially selected physics majors, the opportunity to do a research project in contemporary physics under the supervision

of a faculty member. A detailed report on the research is presented by the student when the project is completed.

Fall 2020: PHYS UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3900	001/13426		Jeremy Dodd	1-5	8/20

Spring 2021: PHYS UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3900	001/10234		Jeremy Dodd	1-5	7/20

PHYS GU4003 Advanced Mechanics. 3 points.

Prerequisites: differential and integral calculus, differential equations, and PHYS UN3003 or the equivalent.

Lagrange's formulation of mechanics, calculus of variations and the Action Principle, Hamilton's formulation of mechanics, rigid body motion, Euler angles, continuum mechanics, introduction to chaotic dynamics.

Spring 2021: PHYS GU4003

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4003	001/10235	M W 4:10pm - 5:25pm Online Only	James Hill	3	24/45

PHYS GU4011 Particle Astrophysics and Cosmology. 3 points.

Prerequisites: (PHYS UN1403 or PHYS UN2601 or PHYS UN2802) and (MATH UN1202 or MATH UN1208) students are recommended but not required to have taken PHYS UN3003 and PHYS UN3007.

An introduction to the basics of particle astrophysics and cosmology. Particle physics - introduction to the Standard Model and supersymmetry/higher dimension theories; Cosmology – Friedmann-Robertson-Walker line element and equation for expansion of universe; time evolution of energy/matter density from the Big Bang; inflationary cosmology; microwave background theory and observation; structure formation; dark energy; observational tests of geometry of universe and expansion; observational evidence for dark matter; motivation for existence of dark matter from particle physics; experimental searches of dark matter; evaporating and primordial black holes; ultra-high energy phenomena (gamma-rays and cosmic-rays).

PHYS GU4012 String Theory. 3 points.

Prerequisites: PHYS UN3003 and PHYS UN3008 and PHYS GU4021 . PHYS GU4023 would be helpful but is not required. Students should have some familiarity with tools for graphical presentation and numeric problem solving such as Mathematica and/or MatLab.

This course is intended as an introduction to string theory for undergraduates. No advanced graduate-level preparation is assumed, and the material will be covered at (no higher than) the advanced undergraduate level. Advanced topics such as supersymmetry, T-duality, and covariant quantization will not

be covered. The focus will be on the dynamics of classical and quantum mechanical strings, with an emphasis on integrating undergraduate material in classical mechanics, relativity, electrodynamics and quantum mechanics.

PHYS GU4018 Solid-State Physics. 3 points.

Prerequisites: PHYS GU4021 and PHYS GU4023 or the equivalent.

Introduction to solid-state physics: crystal structures, properties of periodic lattices, electrons in metals, band structure, transport properties, semiconductors, magnetism, and superconductivity.

Spring 2021: PHYS GU4018

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4018	001/10236	T Th 2:40pm - 3:55pm Online Only	Aron Pinczuk	3	10/30

PHYS GU4019 Mathematical Methods of Physics. 3 points.

Prerequisites: PHYS UN3003 and PHYS UN3007 and differential and integral calculus; linear algebra; or the instructor's permission.

This course will present a wide variety of mathematical ideas and techniques used in the study of physical systems. Topics will include: ordinary and partial differential equations; generalized functions; integral transforms; Green's functions; nonlinear equations, chaos, and solitons; Hilbert space and linear operators; Feynman path integrals; Riemannian manifolds; tensor analysis; probability and statistics. There will also be a discussion of applications to classical mechanics, fluid dynamics, electromagnetism, plasma physics, quantum mechanics, and general relativity.

Fall 2020: PHYS GU4019

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4019	001/13427	M W 10:10am - 11:25am Online Only	Andrei Beloborodov	3	20/100

PHYS GU4021 Quantum Mechanics I. 3 points.

Prerequisites: PHYS UN3003 and PHYS UN3007

Formulation of quantum mechanics in terms of state vectors and linear operators. Three dimensional spherically symmetric potentials. The theory of angular momentum and spin. Identical particles and the exclusion principle. Methods of approximation. Multi-electron atoms.

Fall 2020: PHYS GU4021

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4021	001/13429	T Th 11:40am - 12:55pm Online Only	William Zajc	3	31/100

PHYS GU4022 Quantum Mechanics II. 3 points.

Prerequisites: PHYS GU4021. Formulation of quantum mechanics in terms of state vectors and linear operators, three-dimensional spherically symmetric potentials, the theory of angular momentum and spin, time-independent and time-

dependent perturbation theory, scattering theory, and identical particles. Selected phenomena from atomic physics, nuclear physics, and elementary particle physics are described and then interpreted using quantum mechanical models.

Spring 2021: PHYS GU4022

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4022	001/10237	T Th 11:40am - 12:55pm 329 Pupin Laboratories	William Zajc	3	28/60

PHYS GU4023 Thermal and Statistical Physics. 3 points.

Prerequisites: PHYS GU4021 or the equivalent.

Thermodynamics, kinetic theory, and methods of statistical mechanics; energy and entropy; Boltzmann, Fermi, and Bose distributions; ideal and real gases; blackbody radiation; chemical equilibrium; phase transitions; ferromagnetism.

Fall 2020: PHYS GU4023

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4023	001/13430	T Th 1:10pm - 2:25pm Online Only	Andrew Millis	3	27/100

PHYS GU4024 Applied Quantum Mechanics. 3 points.

Prerequisites: (PHYS GU4021 and PHYS GU4022)

In this course, we will learn how the concepts of quantum mechanics are applied to real physical systems, and how they enable novel applications in quantum optics and quantum information. We will start with microscopic, elementary quantum systems – electrons, atoms, and ions – and understand how light interacts with atoms. Equipped with these foundations, we will discuss fundamental quantum applications, such as atomic clocks, laser cooling and ultracold quantum gases – a synthetic form of matter, cooled down to just a sliver above absolute zero temperature. This leads us to manybody quantum systems. We will introduce the quantum physics of insulating and metallic behavior, superfluidity and quantum magnetism – and demonstrate how the corresponding concepts apply both to real condensed matter systems and ultracold quantum gases. The course will conclude with a discussion of the basics of quantum information science – bringing us to the forefront of today's quantum applications.

PHYS GU4040 Introduction to General Relativity. 3 points.

Prerequisites: PHYS UN3003 and PHYS UN3007 or the equivalent.

Tensor algebra, tensor analysis, introduction to Riemann geometry. Motion of particles, fluid, and fields in curved spacetime. Einstein equation. Schwarzschild solution; test-particle orbits and light bending. Introduction to black holes, gravitational waves, and cosmological models.

Fall 2020: PHYS GU4040

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PHYS 4040 001/13432 T Th 2:40pm - Rachel 3 21/70
3:55pm Rosen
Online Only

PHYS GU4050 Introduction to Particle Physics. 3 points.

Prerequisites: PHYS UN2601 or PHYS UN2802 or the equivalent.

This course covers the Standard Model of Particle Physics, including its conception, successes, and limitations, with the goal of introducing upper-level physics majors to the foundations and current status of particle physics as a field of research. Specific topics to be covered include: historical introduction and review of the Standard Model; particle interactions and particle dynamics; relativistic kinematics; Feynman calculus, quantum electrodynamics, quantum chromodynamics, and weak interactions; electroweak unification and the Higgs mechanism; neutrino oscillations; and beyond-standard model physics and evidence. Along the way, students will research special topics and familiarize themselves with particle physics research.

POLITICAL SCIENCE

Departmental Office: 710 International Affairs Building;
212-854-3707

<http://www.polisci.columbia.edu>

Director of Undergraduate Studies:

Prof. Richard Betts, 1328 International Affairs Building;
212-854-7325; rkb4@columbia.edu

Economics-Political Science Advisers:

Economics: Prof. Susan Elmes, Director of Undergraduate Studies, 1006 International Affairs Building;
se5@columbia.edu

Political Science: Prof. Michael Ting, 701 International Affairs Building; 212-854-7945; mmt2033@columbia.edu

Political Science-Statistics Advisers:

Political Science: Prof. Andrew Gelman, 1016 Social Work Building; 212-851-2142; gelman@stat.columbia.edu

Statistics: Prof. Banu Baydil, 612 West 115th Street, Room 611; 212-853-1397; bb2717@columbia.edu

Statistics: Prof. Ronald Neath, 612 West 115th Street, Room 612; 212-853-1398; rcn2112@columbia.edu

The discipline of political science focuses on issues of power and governance and, in particular, on political institutions, both formal and informal. It also focuses on political behavior, political processes, political economy, and state-society relations.

The field consists of four substantive subfields: *American politics*, which covers such topics as national and local politics, elections, and constitutional law; *comparative politics*, which aims at understanding the political systems of other countries, both by studying individual states and by engaging in cross-national comparisons; *international relations*, which deals with

the ways that states and other political actors behave in the international arena, including such topics as security, foreign policies, international organizations, and international economic relations; and *political theory*, which analyzes the history of normative political thought as well as of analytic concepts such as the nature of justice or liberty.

Other broad topics, such as “political economy,” or the study of the relationships between economic and political processes, overlap with the subfields, but also constitute a separate program (see below). Methodology, including statistical analysis and formal modeling, also occupies an important place in the discipline.

ADVANCED PLACEMENT

The department grants credit toward the major for work completed under the College Entrance Examination Board (CEEB) Advanced Placement Program. Students receive 3 academic credits and exemption from POLS UN1201 Introduction To American Government and Politics or POLS UN1501 Introduction to Comparative Politics for scores of 5 in the United States and Comparative Government and Politics AP Exams.

ADVISING

The Department of Political Science offers a variety of advising resources to provide undergraduate majors and concentrators with the information and support needed to successfully navigate through the program. These resources are described below.

Undergraduate Advising Office

Students should take questions or concerns about the undergraduate program to the department's undergraduate advising office first. If advisers cannot answer a student's question, they then refer the student to the appropriate person.

The undergraduate advising office is staffed by political science Ph.D. students who hold open office hours each week (the schedule can be found online at <https://polisci.columbia.edu/content/undergraduate-advising>). During open hours, advisers are available to respond to questions and concerns about requirements, course selection, course of study, transfer and study abroad credit, and any other aspect of the program. Students may also reach advisers by email at polisciadvising@columbia.edu.

Students should also consult the undergraduate advisers for assistance in completing the political science program planning form (available online at <https://polisci.columbia.edu/content/undergraduate-forms-library>). The advisers must sign and date this form in the approval column next to any listed class that requires approval to fulfill program requirements (transfer courses, non-traditional courses, etc.). Each student's planning form is kept on file in the department, so that each semester they may meet with an adviser to update it.

The advisers are also available to speak with students about academic and professional issues, including research interests, internships, and post-college plans. Since the advisers have been through the graduate school application process, they are great resources with whom students may discuss the process. Also, as current Ph.D. students in the department, they are familiar with the research interests of political science faculty and can therefore refer students to a professor whose research aligns with the students' interests for focused thesis advice, information about academic, professional, and research opportunities, or professional development.

Requesting a Faculty Adviser

Often the best way for students to obtain advising from a faculty member is to contact a professor with whom they have taken a class in an area of interest. Students also have the option of having a faculty adviser assigned by the department. To request a faculty adviser, students should complete the Faculty Adviser Request Form and submit it to the undergraduate coordinator during the first two weeks of the semester. The link to the current adviser request form may be found in the undergraduate forms library on the department website.

Students may consult with their faculty adviser for any substantive issue, but still must visit walk-in advising hours to have courses approved, to have planning forms reviewed and approved, and to discuss departmental requirements and regulations.

Director of Undergraduate Studies

The director of undergraduate studies oversees the department's undergraduate programs and is available during office hours. While a student's first stop for advising should be the undergraduate advising office, the director of undergraduate studies is available to answer any questions that the undergraduate advisers or the undergraduate coordinator cannot.

Economics–Political Science Adviser

Economics–political science majors may consult with the economics–political science adviser during office hours. However, students should also see an undergraduate adviser to discuss major requirements and fill out a planning form.

Political Science–Statistics Adviser

Political science–statistics majors may consult with the political science–statistics adviser during office hours. However, students should also see an undergraduate adviser to discuss major requirements and fill out a planning form.

Faculty At-Large

All faculty are available for consultation with students during office hours or by appointment to discuss interests in political science, course selection, and other academic or post-college matters. The faculty may provide advice about graduate schools, suggest literature that the student might consult as

sources for research, recommend specific courses or professors based on the student's interests, or offer information about research opportunities with faculty. However, students should note that any issues surrounding departmental regulations and requirements, major certification, course approvals, etc., should be addressed initially with the undergraduate advisers.

HONORS PROGRAM

The department offers the Honors Program for a limited number of seniors who want to undertake substantial research projects and write honors theses. The honors thesis is expected to be about 75 pages in length and of exceptional quality.

Honors students perform research as part of a full-year honors seminar (POLS UN3998-POLS UN3999, 8 points total) during their senior year, in place of the seminar requirement for majors. Honors students may, however, take additional seminars to fulfill other course requirements for the major. Theses are due in late March or early April. To be awarded departmental honors, the student must satisfy all the requirements for the major, maintain a 3.6 GPA in the major, and complete a thesis of sufficiently high quality to merit honors.

The honors seminar director provides general direction for the seminar and supervises all students. Each student also works with a faculty member in his or her major subfield (American politics, comparative politics, international relations, or political theory) and a teaching assistant. The honors seminar meets weekly for part of the year and addresses general issues involved in research and thesis writing, such as how to develop research questions and projects, methodology, sources of evidence, and outlining and drafting long papers. The sessions are also used for group discussions of students' research and thesis presentations. Students are also expected to meet periodically with the supervising professor and preceptor.

Students who wish to apply to the Honors Program must notify the department in writing by the end of the spring semester of the junior year. Please check the department website for the official deadline. Normally no more than 10% of graduating majors receive departmental honors in a given academic year. Applicants are required to have already completed the methods requirement for the major.

Application Materials

Applications to the Honors Program must include the following:

1. A cover page with the student's name, CUID number, e-mail address, and school (Columbia College or General Studies);
2. An official transcript, which may be obtained from the Office of the Registrar in Kent Hall, or from Student Services Online (SSOL);
3. A writing sample, preferably a paper written for a political science course;

4. A brief description (no more than one page) of a possible thesis topic.

Completed applications should be sent to:

Department of Political Science
Attn: Departmental Honors
420 West 118th Street
Mail Code 3320
New York, NY 10027

In addition, students are encouraged to find a faculty sponsor for their thesis proposal. Students who have identified a faculty sponsor should indicate the sponsor in the proposal; students without a faculty sponsor should identify a faculty member with whom they would like to work. Research areas for the political science department faculty are listed on the department's [website](#). Students will be notified by e-mail of the decision taken on their applications before fall registration.

Students who are not accepted into the honors seminar or who decide after the application deadline that they would like to write an honors thesis may take one or two semesters POLS UN3901 INDEPENDENT RESEARCH I and POLS UN3902 INDEPENDENT RESEARCH II in order to write a thesis to submit for honors consideration. Any member of the department's full-time faculty may sponsor independent study courses. Part-time faculty are not obligated to sponsor these courses.

For registration information and more details about this process, students should contact the Academic Affairs Coordinator. Note that most honors theses are about 75 pages in length. All theses must be submitted along with a confidential assessment of the paper by the supervising instructor in order to be considered for departmental honors. Students who choose this path must also complete all the requirements for the major and maintain a minimum major GPA of 3.6. Theses are due in late March or early April, and decisions about departmental honors are announced in May.

DEPARTMENTAL PRIZES AND FELLOWSHIPS

The Department of Political Science administers the following prizes and awards. Unless otherwise noted, students do not play an active part in the nomination process. Rather, faculty members nominate students at their own discretion. Departmental prizes are reserved for political science majors.

Charles A. Beard Prize

A cash prize awarded every other year to the student who writes the best paper in political science during the academic year.

Caroline Phelps Stokes Prize

A cash prize established at the bequest of Caroline Phelps Stokes is awarded to a student who has been a degree candidate at Columbia College or Barnard College for at least one

academic year, and who has written the best essay in course or seminar work on the general subject of human rights.

Allan J. Willen Memorial Prize

A cash prize awarded to the Columbia College student who writes the best seminar paper on a contemporary American political problem.

Edwin Robbins Academic Research/Public Service Fellowship

The Robbins Fellowship provides a stipend each summer for at least two political science students in Columbia College who will be engaged in research in important matters of politics or policymaking or who will be working, without other compensation, as interns in a governmental office, agency, or other public service organization. Each spring, the department invites students to submit fellowship proposals. Awards are announced in late April or early May.

The Arthur Ross Foundation Award

A cash prize awarded to GS students for excellence in the field of political science.

Phyllis Stevens Sharp Fellowship in American Politics

The Phyllis Stevens Sharp Endowment Fund provides stipends each year during the summer for one or more Columbia College or School of General Studies students majoring or concentrating in political science to support research in American politics or policy making, or otherwise uncompensated internships in a government office, agency, or other public service organization. Each spring, the department invites students to submit fellowship proposals. Awards are announced in late April or early May.

EARLY ADMISSION TO THE MASTER'S DEGREE PROGRAM IN POLITICAL SCIENCE FOR COLUMBIA AND BARNARD POLITICAL SCIENCE UNDERGRADUATES

While the Department of Political Science does not offer a joint bachelor of arts/master's degree, it does allow Columbia and Barnard undergraduates to apply for early admission to its master's degree program. This enables qualified undergraduates majoring or concentrating in political science to obtain the B.A. degree and M.A. degree in fewer than five years (ten semesters) from the time of their entrance into Columbia or Barnard, if they fulfill the M.A. course and residency requirements through summer course work after receiving the B.A. or accelerated study during the course of their undergraduate career.

Students should apply during the fall semester of their senior year for admission to the M.A. program in the following fall

semester, after completion of the B.A. degree. The department and the Graduate School of Arts and Sciences may award up to one-half residence unit of advanced standing and/or up to three courses (nine to twelve credits) of transfer credit for graduate courses (4000-level and above) taken at Columbia in excess of the requirements for the Columbia bachelor's degree, as certified by the dean of the undergraduate school awarding the bachelor's degree.

For further information about the application process and minimum qualifications for early admission, please contact the director of undergraduate studies.

For further information about requirements for the M.A. degree, see <https://gsas.columbia.edu/degree-programs/ma-programs/political-science>.

GUIDELINES FOR ALL POLITICAL SCIENCE MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Planning Forms

Major Planning forms are available on the [department website](#).

Policy on Double-Counting Courses

- Policies about double-counting courses to fulfill requirements in more than one major may be found here:
 - [Columbia College](#)
 - [School of General Studies](#)
- Courses in the Core Curriculum do not fulfill requirements for the Political Science major.

Policy on Counting Credits outside the Department of Political Science

- Courses taken at other institutions or other Columbia departments may not be used to meet the requirement of a major or concentration in political science without the approval of the Director of Undergraduate Studies or the department's undergraduate adviser. Students should secure such approval in advance of registration.

Pass/D/Fail and Grading Policy

- A grade of "Pass" is acceptable only for the first course taken toward the major or concentration.
 - The course used to fulfill the research methods requirement cannot be taken Pass/D/Fail.
- Students must receive a grade of at least C- in order for a course to count towards the major or concentration.

AP Credit Policy

- Students who receive transfer credit for one or more AP exams in political science may count a maximum of one AP course toward the major or concentration, contingent upon completing an upper-level (3000 or higher) course with a grade of C or higher in the subfield in which the AP exam was taken. All transfer credits must be approved by the Director of Undergraduate Studies or the undergraduate adviser (polisciadvicing@columbia.edu).

Transfer Credit Policy

- For the political science major, a maximum of three courses in political science may be transferred from other institutions, including study abroad and AP credit. For the political science concentration as well as the economics-political science and political science-statistics interdisciplinary majors, a maximum of two courses in political science may be transferred from other institutions.

All transfer credits must be approved in writing by the Director of Undergraduate Studies or the undergraduate adviser (polisciadvicing@columbia.edu).

- Students wishing to count transfer credits toward the major or concentration should send the undergraduate adviser (polisciadvicing@columbia.edu) their transfer credit report, the syllabi of the courses they want to count toward departmental requirements, and a statement of how they want to apply the transfer credits to the requirements.

Independent Study Policy

- Independent Study (POLS UN3901 INDEPENDENT RESEARCH I in the fall or POLS UN3902 INDEPENDENT RESEARCH II in the spring) taken in fulfillment of course requirements for the major/concentration must be taken for at least 3 points of credit.

MAJOR IN POLITICAL SCIENCE

Program of Study

To be planned with the department as soon as the student starts to register for courses toward the major. Students should not wait until they formally declare the major before meeting with an undergraduate adviser during the registration period to plan their programs for the major.

Course Requirements

Students must choose a **Primary Subfield** and a **Secondary Subfield** to study. The subfields are as follows:

- American Politics (AP)
- Comparative Politics (CP)
- International Relations (IR)
- Political Theory (PT)

The major in political science requires a minimum of 9 courses in political science, to be distributed as follows:

Introductory Courses

Students must take two of the following introductory courses:

POLS UN1201	Introduction To American Government and Politics
POLS UN1501	Introduction to Comparative Politics
POLS UN1601	INTERNATIONAL POLITICS
POLS UN1101	Political Theory I

NOTE: Introductory courses taken that do not fit into the Primary or Secondary Subfield will be counted in the Political Science Elective category.

Primary Subfield

Minimum three courses.

Minor Subfield

Minimum two courses.

Seminars

Two 4-point 3000-level seminars, at least one of which is in the student's Primary Subfield.

(See "Seminars" section below for more information)

Research Methods *

Minimum one course in research methods. Courses that satisfy the research methods requirement are:

POLS UN3220	Logic of Collective Choice
POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS
POLS UN3720	RESEARCH DESIGN: SCOPE AND METHODS
POLS UN3706	Empirical Research Methods in Political Science
POLS UN3768	Experimental Research
POLS GU4710	PRINC OF QUANT POL RESEARCH 1
POLS GU4712	PRINC OF QUANT POL RESEARCH 2

POLS GU4720	QUANT METH 1 APPL REG CAUS INF
POLS GU4722	QUANT METH 2 STAT THEO# CAUS INF
POLS GU4724	QUANT METH 3 EXPERIMENTAL METH
POLS GU4762	Politics in the Lab
POLS GU4764	Design and Analysis of Sample Surveys
POLS GU4790	Advanced Topics in Quantitative Research
POLS GU4792	Quantitative Methods: Research Topics

Political Science Electives

Minimum one course (in any subfield).

- * A student may take another course inside or outside the department that provides relevant training in research methods to satisfy this requirement only with the written permission in advance of the Director of Undergraduate Studies or the department's undergraduate adviser. If a course outside the political science department is used to satisfy the research methods requirement, this same course cannot be used toward other majors/concentrations or programs.

Seminars

Students are expected to take two 3000-level 4-point seminars. They may choose from among the seminars offered, though at least one of the seminars taken must be in the student's Primary Subfield (that in which at least 9 other points have been completed). Entry into seminars requires the instructor's permission.

For detailed seminar registration guidelines, see [the department website](#). Seminars cannot be taken for R credit or Pass/D/Fail.

Barnard colloquia are open to students with the permission of the instructor. However, Barnard colloquia may **not** be used to fulfill the seminar requirement, though they may be used to fulfill subfield or elective requirements. Note that admission to Barnard colloquia is by application to the Barnard Political Science Department only. Please consult with the Barnard Political Science Department for more information.

Recommended Courses

In addition to political science courses, students are strongly advised, but not required, to take six points in a related social science field.

MAJOR IN ECONOMICS–POLITICAL SCIENCE

The major in economics-political science is an interdisciplinary major that introduces students to the methodologies of economics and political science and stresses areas of particular

concern to both. This program is particularly beneficial to students planning to do graduate work in schools of public policy and international affairs.

Two advisers are assigned for the interdepartmental major, one in the Department of Economics and one in the Department of Political Science. Please note that the economics adviser can only advise on economics requirements and the political science adviser can only advise on political science requirements.

Course Requirements

For the political science part of the major, students must choose a **Primary Subfield** and a **Secondary Subfield** to study. The corresponding introductory courses in both subfields must be taken, plus two electives in the Primary Subfield and one in the Secondary Subfield. The subfields are as follows:

- American Politics (AP)
- Comparative Politics (CP)
- International Relations (IR)
- Political Theory (PT)

The economics–political science major requires a total of 59 points: 22 points in economics, 17 points in political science, 6 points in mathematics, 6 points in statistical methods, 4 points in a political science seminar, and 4 points in the interdisciplinary seminar as follows:

Core Requirements in Economics

Students must take all of the following core economics courses:

ECON UN1105	Principles of Economics
ECON UN3211	Intermediate Microeconomics
ECON UN3213	Intermediate Macroeconomics
ECON UN3412 or POLS GU4712	Introduction To Econometrics PRINC OF QUANT POL RESEARCH 2
ECON GU4370	Political Economy

Core Requirements in Mathematics and Statistics

Students must take all of the following core mathematics and statistics courses:

MATH UN1101	CALCULUS I
MATH UN1201	Calculus III
STAT UN1201	Calculus-Based Introduction to Statistics

Economics Electives

Students must take two electives at the 3000 level or higher in the Department of Economics.

Political Science Courses

Students must choose a Primary Subfield and a Secondary Subfield to study. The subfields are as follows: American Politics (AP), Comparative Politics (CP), International Relations (IR), and Political Theory (PT).

Primary Subfield: Minimum three courses, one of which must be the subfield's introductory course.

Secondary Subfield: Minimum two courses, one of which must be the subfield's introductory course.

Seminars

Students must take the following two seminars:

ECPS GU4921	Seminar In Political Economy
and a Political Science Department seminar, in the student's Primary Subfield. Please select one of the following: *	
POLS UN3911	SEMINAR IN POLITICAL THEORY
or POLS UN3912	Seminar in Political Theory
POLS UN3921	AMERICAN POLITICS SEMINAR
or POLS UN3922	AMERICAN POLITICS SEMINAR
POLS UN3951	Seminar in Comparative Politics
or POLS UN3952	Seminar in Comparative Politics
POLS UN3961	INTERNATIONAL POLITICS SEMINAR
or POLS UN3962	INTERNATIONAL POLITICS SEMINAR

* Students who wish to count toward the political science seminar requirement a course that is not in the above list of approved seminars must obtain permission from the political science Director of Undergraduate studies. Barnard colloquia can count for seminar credit only with the written permission of the Director of Undergraduate Studies. Note that admission to Barnard colloquia is by application to the Barnard political science department only.

MAJOR IN POLITICAL SCIENCE–STATISTICS

The interdepartmental major of political science–statistics is designed for students who desire an understanding of political science to pursue advanced study in this field and who also wish to have at their command a broad range of sophisticated statistical tools to analyze data related to social science and public policy research.

Students should be aware of the rules regarding the use of the Pass/D/Fail option. Courses in which a grade of D has been received do not count toward the major requirements.

Political science–statistics students are eligible for all prizes reserved for political science majors.

The political science–statistics major requires a minimum of 15 courses in political science, statistics, and mathematics, to be distributed as follows:

POLITICAL SCIENCE**Primary Subfield**

-Students must choose a Primary Subfield to study. Within the subfield, students must take a minimum of three courses, including the subfield's introductory course. The subfields and their corresponding introductory courses are as follows:

American Politics:	
POLS UN1201	Introduction To American Government and Politics
Comparative Politics:	

POLS UN1501 Introduction to Comparative Politics

International Relations:

POLS UN1601 INTERNATIONAL POLITICS

Political Theory:

POLS UN1101 Political Theory I

-Additionally, students must take one 4-point 3000-level seminar in their Primary Subfield.

Research Methods

-Students must take the following two research methods courses:

POLS GU4710 PRINC OF QUANT POL RESEARCH 1

or POLS UN3704 RESEARCH DESIGN: DATA ANALYSIS

POLS GU4712 PRINC OF QUANT POL RESEARCH 2

STATISTICS

-Students must take one of the following sequences:

Sequence A — recommended for students preparing for graduate study in statistics ¹

MATH UN1101 CALCULUS I

MATH UN1102 CALCULUS II

MATH UN2010 LINEAR ALGEBRA

STAT UN1201 Calculus-Based Introduction to Statistics

STAT GU4203 PROBABILITY THEORY

STAT GU4204 Statistical Inference

STAT GU4205 Linear Regression Models

STAT GU4206 Statistical Computing and Introduction to Data Science

or

Sequence B — recommended for students preparing to apply statistical methods to other fields

STAT UN1101 Introduction to Statistics

STAT UN2102 Applied Statistical Computing

STAT UN2103 APPLIED LINEAR REG ANALYSIS

STAT UN2104 Applied Categorical Data Analysis

STAT UN3105 Applied Statistical Methods

STAT UN3106 Applied Data Mining

Statistics Elective

-Students must take an approved elective in a statistics or a quantitatively oriented course in a social science.

1. Students taking Statistics Sequence A may replace the mathematics requirements with both MATH UN1207 Honors Mathematics A and MATH UN1208 HONORS MATHEMATICS B.

CONCENTRATION IN POLITICAL SCIENCE

Program of Study

To be planned with the department as soon as the student starts to register for courses toward the concentration. Students

should not wait until they formally declare the concentration before meeting with an undergraduate adviser during the registration period to plan their programs for the concentration.

Concentration Requirements

Students must choose a **Primary Subfield** and a **Secondary Subfield** to study. The subfields are as follows:

- American Politics (AP)
- Comparative Politics (CP)
- International Relations (IR)
- Political Theory (PT)

The concentration in political science requires a minimum of 7 courses in political science, to be distributed as follows:

Introductory Courses

Students must take two of the following introductory courses:

POLS UN1201	Introduction To American Government and Politics
POLS UN1501	Introduction to Comparative Politics
POLS UN1601	INTERNATIONAL POLITICS
POLS UN1101	Political Theory I

NOTE: Introductory courses taken that do not fit into the Primary or Secondary Subfield will be counted in the Political Science Elective category.

Primary Subfield

Minimum two courses.

Secondary Subfield

Minimum two courses.

Research Methods *

Minimum one course in research methods. Courses that satisfy the methods requirement are:

POLS UN3220	Logic of Collective Choice
POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS
POLS UN3706	Empirical Research Methods in Political Science
POLS UN3720	RESEARCH DESIGN: SCOPE AND METHODS
POLS UN3768	Experimental Research
POLS GU4710	PRINC OF QUANT POL RESEARCH 1
POLS GU4712	PRINC OF QUANT POL RESEARCH 2
POLS GU4720	QUANT METH 1 APPL REG CAUS INF
POLS GU4722	QUANT METH 2 STAT THEO# CAUS INF
POLS GU4724	QUANT METH 3 EXPERIMENTAL METH
POLS GU4762	Politics in the Lab
POLS GU4764	Design and Analysis of Sample Surveys

POLS GU4790	Advanced Topics in Quantitative Research
POLS GU4790	Advanced Topics in Quantitative Research
POLS GU4792	Quantitative Methods: Research Topics

Political Science Electives

Minimum two courses (in any subfield).

* A student may take another course inside or outside the department that provides relevant training in research methods to satisfy this requirement only with the written permission in advance of the Director of Undergraduate Studies or the department's undergraduate adviser. If a course outside the political science department is used to satisfy the research methods requirement, this same course cannot be used toward other majors/concentrations or programs.

Recommended Courses

In addition to courses in political science, students are strongly advised, but not required, to take six credits in a related social science field.

AMERICAN POLITICS

POLS UN1201 Introduction To American Government and Politics. 4 points.

Lecture and discussion. Dynamics of political institutions and processes, chiefly of the national government. Emphasis on the actual exercise of political power by interest groups, elites, political parties, and public opinion.

Fall 2020: POLS UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 1201	001/00238	M W 11:40am - 12:55pm Room TBA	Michael Miller	4	289/350

POLS UN3208 State Politics. 3 points.

This course is intended to provide students with a detailed understanding of politics in the American states. The topics covered are divided into four broad sections. The first explores the role of the states in America's federal system of government. Attention is given to the basic features of intergovernmental relations and the historical evolution of American federalism. The second part of the course focuses on state-level political institutions. The organization and processes associated with the legislative, executive, and judicial branches are discussed in depth. The third section examines state elections, political parties, and interest groups. Finally, the course concludes by looking closely at various policy areas. Budgeting, welfare, education, and morality policy are among those considered.

POLS UN3213 American Urban Politics. 3 points.

This course examines the pattern of political development in urban America, as the country's population has grown in urbanized locations. It explores the process by which cities and suburbs are governed, how immigrants and migrants are incorporated, and how people of different races and ethnicities interact in urbanized settings as well as the institutional relations of cities and suburbs with other jurisdictions of government. The course focuses both on the historical as well as the theoretical understandings of politics in urban areas.

POLS 3213	001/10152	M W 6:10pm - 7:25pm Online Only	Carlos Vargas-Ramos	3	82/120

POLS UN3222 The American Congress. 3 points.

Prerequisites: POLS UN1201 or the equivalent, or the instructor's permission.

Inquiry into the dynamics, organization, and policy-making processes of the American Congress. Particular emphasis on the relationship of legislators to constituents, lobbyists, bureaucrats, the president, and with one another.

Fall 2020: POLS UN3222

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3222	001/14025	T Th 2:40pm - 3:55pm Online Only	Gregory Wawro	3	70/115

POLS UN3225 American Constitutional History. 4 points.

This Course is intended to look at key developments of American History through the prism of Supreme Court decisions and their aftermath. In essence, this Course will address three questions: 1. How did the Supreme Court reflect, and affect, historic patterns of U.S. development, and how did it impact the legal and economic framework of the United States? 2. How did the Supreme Court respond to, or worsen, crises in U.S. history? 3. How did the perception of individual and collective rights and liberties, and of the function and role of Governments -- both Federal and State -- evolve over time?

COMPARATIVE POLITICS**POLS UN1501 Introduction to Comparative Politics. 4 points.**

This course provides a broad overview of the comparative politics subfield by focusing on important substantive questions about the world today. The course is organized around four questions. First, why can only some people depend upon the state to enforce order? Second, how can we account for the differences between autocracies and democracies? Third, what different institutional forms does democratic government take? Finally, are some institutions more likely than others to produce desirable social outcomes such as accountability, redistribution, and political stability?

Fall 2020: POLS UN1501

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 1501	001/13697	T Th 10:10am - 11:25am Online Only	Kimuli Kasara	4	99/120

POLS UN3534 AUTOCRACY AND DEMOCRACY. 3.00 points.

With longstanding democracies in Europe and the US faltering, autocratic regimes in Russia and China consolidating, and hybrid regimes that mix elements of democracy and autocracy on the rise, scholars, policymakers, and citizens are re-evaluating the causes and consequences of different forms

of government. This course is designed to give students the tools to understand these trends in global politics. Among other topics, we will explore: How do democracies and autocracies differ in theory and in practice? Why are some countries autocratic? Why are some democratic? What are the roots of democratic erosion? How does economic inequality influence a country's form of government? Is the current period of institutional foment different past periods of global instability? This course will help students keep up with rapidly unfolding events, but is designed primarily to help them develop tools for interpreting and understanding the current condition of democracy and autocracy in the world.

Fall 2020: POLS UN3534

POLS 3534	001/15497	M W 10:10am - 11:25am Online Only	Timothy Frye	3.00	42/86

POLS UN3591 CIVIL WARS & POLITICAL VIOLENCE. 3 points.

This course will introduce students to leading contemporary research on civil wars and political violence. We will seek to answer questions including: Why does political violence occur? Does the presence of natural resources make civil wars more or less likely? When do rebel groups choose to target civilians? And how does the international community choose which conflicts to intervene in?

The course is broadly split into two parts. The first half will explore the causes, dynamics and consequences of civil wars, while the second half will focus on other forms of political violence, including terrorism, riots and anti-regime protests.

Spring 2021: POLS UN3591

POLS GU4406 Politics in Contemporary China. 4 points.

This course will be taught in Chinese.

This course focuses on the evolution of Chinese politics since the Chinese Communist Party (CCP) took power in 1949. It introduces and discusses the relationship between the two "three decades" (the three decades under Mao and the three decades of "reform and opening up"). More specifically, the course aims to (1) clarify some important historical facts, (2) analyze the ideological consideration of the "official" history sanctioned by the CCP and its epistemological impact, (3) make a comparison between official view and that of independent scholars about the history; (4) try to respond to some urgent problems faced by contemporary China, and (5) provide suggestions and principles for the reconstruction of the historiography of contemporary China. Students will learn how to understand the recent development Chinese politics, how to analyze the complex contemporary history and reality of China,

and how to approach issues about China from a systematic perspective.

Spring 2021: POLS GU4406

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

POLS GU4407 Nine Thought Trends in China. 4 points.

This course will be taught in Chinese.

Prerequisites: fluency in Chinese (the course will be taught in Chinese, and a large number of readings will be in Chinese). This is an elective course designed for both undergraduate and graduate students who are interested in the contemporary politics in China. The course focuses on nine major thought trends in China today that include 1) the Liberalism; 2) the New Authoritarianism; 3) the New Left; 4) Mao Left; 5) the Democratic Group within the Communist Party; 6) Governing through Confucian Theory; 7) Constitutional Socialism; 8) the so-called "Neither-Left and Nor-Right" Governing Theory; and 9) the New Nationalism Calling Tough Foreign Policies. China is deep in the social and political transition process, and the thoughts and actions of intellectuals themselves have formed an important part in this transition. In this sense, the course not only helps understand the thoughts of intellectuals, but also better help understand today's China affairs as a whole.

Fall 2020: POLS GU4407

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

POLS GU4423 POLITICAL ECONOMY ANALYSIS OF ELITES & INSTITUTIONS. 4.00 points.

This course examines political institutions and elite behavior from a political economy perspective. This course has three core goals. First, the substantive goal is to familiarize students with foundational theoretical arguments and frontier empirical evidence pertaining to central questions in political economy relating to political elite and institutions. Second, the methodological goal is to empower students to implement research designs that can effectively address the substantive questions driving their research. Third, the professionalization goal is to expose students to the academic processes of writing reviews, replicating and extending others' studies, presenting research projects, and writing original research designs or academic papers.

Fall 2020: POLS GU4423

POLS GU4434 Ethnic Politics Across Post-Soviet Eurasia. 4 points.

Various forms of ethnic politics have characterized politics in many states throughout Eurasia since 1991, from nationalist separatism to violent conflict to political competition among ethnic minorities and majorities. This course is designed to encourage students to think deeply about the relationship between ethnicity and politics. We will consider several questions. First, why does ethnicity become politicized? We investigate this question by examining nationalist secessionism and ethnic conflict—phenomena that mushroomed at the end of the Cold War. We will focus on East Central Europe and the former Soviet Union, devoting special attention to the cases of Yugoslavia, the USSR, Moldova, Abkhazia and South Ossetia, and Chechnya. However, we will also study cases in which the dog didn't bark, i.e. places where nationalist mobilization and ethnic violence either did not occur, or emerged and then receded as in the ethnic republics of the Russian Federation (including the "Muslim" regions of Tatarstan and Bashkortostan, etc.). In the second part of the course, we will analyze ethnic politics after independent statehood was achieved throughout the post-Soviet space. How do nationalist state-builders try to construct a nation and a state at the same time? Have they incorporated or discriminated against minorities living within "their" states? How have ethnic minorities responded? We will study Ukraine, the Baltics and Kazakhstan where ethnic Russians and Russian-speaking populations form large portions of the population, devoting particular attention to the crisis in Ukraine. We will also examine how the post-conflict regions of Bosnia and Kosovo have dealt with ethnic pluralism. These cases allow us to gain greater understanding of how multi-ethnic states use forms of federalism, consociationalism, and power-sharing as state-building strategies.

POLS GU4436 POPULISM IN EUROPE AND THE WORLD. 4 points.

Populism is one of the political buzzwords of the early 21st century. It is central to current debates about politics, from radical right parties in Europe to left-wing presidents in Latin America to the Tea Party, Bernie Sanders and Donald Trump in the United States. But populism is also one of the most contested concepts in the social sciences. In line with a growing body of literature, populism should be defined in ideational terms, i.e., as a worldview that considers society to be separated into two homogeneous and antagonistic camps, "the pure people" versus "the corrupt elite," and which argues that politics should be an expression of the *volonté générale* (general will) of the people. This course will provide an introduction to populism in theory and practice.

The first part of the course will discuss how scholars from different parts of the world studied populism since this phenomenon entered the political and social science agenda in the late 1960s. Is populism an ideology? A strategy? A style of politics? A certain type of discourse? Something else? And, crucially, who are “the people” in populism? Could we, possibly, re-conceptualize populism in a way that is at the same time minimal and with sufficient discriminatory power, politically relevant, analytically compelling, operationally feasible, and clearly pointing to an opposite pole?

Beyond defining populism, this course also examines the phenomenon in the entirety of its geographical variants. Populism is an omnipresent, multifaceted, and ideologically boundless phenomenon. What distinguishes its various manifestations in Europe, Latin America, the United States, and elsewhere across time (old vs. new populisms), region (western vs. eastern; but also Nordic, Baltic, and Southern European), regime type in which they develop (democracy vs. non-democracy), and ideological hue (right vs. left populisms)?

A second part of this course will look at actual populist strategies, how populist leaders gain their appeal, what social conditions increase the likelihood of a populist victory, how populists gain and maintain power. What are the determinants of voting motivation for populist parties? And how do they differ from mainstream parties? This course will also examine what happens once populists come into office, as has happened several times in both Europe and Latin America? Cases such as Hungary, Greece and Venezuela are studied in order to understand the way in which populism comes to power and governs.

Spring 2021: POLS GU4436

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4436	001/10167	W 2:10pm - 4:00pm Online Only	Paula Ganga	4	20/20

POLS GU4453 Politics in Russia. 4 points.

This course begins by studying the late Soviet era—the 1970s through the collapse of the Soviet Union in 1991—in order to understand what kind of political system and political culture Russia inherited. We spend some time analyzing why and how the Soviet Union—a superpower for 75 years—disintegrated suddenly and for the most part, peacefully. Then, the bulk of the course focuses on state-building in the Russian Federation. Russia’s effort to construct new political institutions, a functioning economy, and a healthy society represents one of the greatest political dramas of our time. Beginning with Yeltsin’s presidency in 1991 and continuing through the current eras of Putin, Medvedev, and Putin again, we consider phenomena such as economic reform, nationalism, separatism, federalism, war, legal reform, civil society, and democratization. The third part of the course addresses Russia’s foreign relations. Like its predecessor states, the Russian Empire and the Soviet Union, Russia is concerned with what kind of state it is (or should be) and where it stands in the

international order. We will study how Russian elites make sense of Russia’s identity, as well as Russia’s policies toward the US, Europe, its “near abroad,” the Middle East, and China.

POLS GU4461 Latin American Politics. 4 points.

This is a lecture class that seeks to introduce students to social scientific analysis while discuss the shifting dynamics of political representation in Latin America. In analyzing political representation in the region, it focuses on demands for political inclusion by different actors and how they were resisted or accepted by established elites in a process that moved from regime change to electoral rotation in power. The course covers these political dynamics and their institutional consequences since the onset of the twentieth century, starting with the Mexican Revolution, until the contemporary period where democracy is the predominant form of government and elections a crucial tool for social and political change. While analyzing the politics of Latin America, we will cover important political science concepts associated with democratic representation, social inclusion and the rule of the law, such as social movement mobilization, political regime change, presidentialism, political party systems, political identities, state capacity, and institutional weakness.

POLS GU4476 Korean Politics. 4 points.

The course Korean Politics and Foreign Policy aims to advance knowledge of Korea's politics and foreign policy, with emphasis on that of South Korea, but with additional focus on North Korea. This course covers relevant political theory, contemporary history and issues of particular significance to Korean politics, including the growth of civil society and the contest for legitimacy internally and internationally. The course addresses the Peninsula's unique geopolitics, democratic and economic development in South Korea, and the politics and economics of the communist and Confucian North. Given today's tremendous global concern over North Korea's security challenges, the course examines in detail the ideological and political background behind the North's rapidly developing missile and nuclear capabilities and human rights violations. The course posits the aims and objectives of South Korea's international relations and success in the regional and global arena--which contrast starkly with that of North Korea. It assesses South Korea's relations with the United States and near neighbors China and Japan. Finally, it weighs prospects for inter-Korean cooperation, integration and unification.

POLS UN3648 Governing the Global Economy. 4 points.

Who governs the world economy? Why do countries succeed or fail to cooperate in setting their economic policies? When and how do international institutions help countries cooperate? When and why do countries adopt good and bad economic policies? This course examines how domestic and international politics determine how the global economy is governed. We will study the politics of trade, international investment, monetary, immigration, and environmental policies to answer these questions. The course will approach each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence. There will be an emphasis on applying concepts through the analysis of policy-relevant case studies designed specifically for this course.

Fall 2020: POLS UN3648

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

POLS UN3871 CHINA'S FOREIGN RELATIONS. 4 points.

This course will review and analyze the foreign policy of the People's Republic of China from 1949 to the present. It will examine Beijing's relations with the Soviet Union, the United States, Northeast Asia, Southeast Asia, and the Third World during the Cold War, and will discuss Chinese foreign policy in light of the end of the Cold War, changes in the Chinese economy in the reform era, the post-Tiananmen legitimacy

crisis in Beijing, and the continuing rise of Chinese power and influence in Asia and beyond.

This lecture course will analyze the causes and consequences of Beijing's foreign policies from 1949 to the present.

Students must register for a mandatory discussion section.

POLS GU4863 INTERNATIONAL POLITICAL ECONOMY OF DEVELOPING COUNTRIES. 4 points.

This course examines how domestic and international politics influence the economic policies of developing countries. We will critically evaluate different theoretical debates related to foreign economic policymaking in emerging markets, and introduce chief methodological approaches used in contemporary analyses. We will focus attention on different types of cross-border flows: the flow of goods (trade policy), the flow of people (immigration policy), the flow and location of production (foreign investment policy), the flow of capital (financial and monetary policy), and the flow of pollution (environment policy). In the process, we will address several themes that are central to understanding the politics of economic policymaking in emerging economies, including, the legacies of colonialism, trade protectionism and liberalization, globalization and the race to the bottom, the relationship between economic policy and culture, and development and redistribution. There will be an emphasis on applying concepts through the analysis of policy-relevant case studies designed for this course.

POLITICAL THEORY

POLS UN1101 Political Theory I. 4 points.

What is the relationship between law and justice? Are capacities of political judgment shared by the many or reserved for the few? What does human equality consist of and what are

its implications? Can individual freedom be reconciled with the demands of political community? What are the origins and effects of persistent gender inequalities? These are some of the crucial questions that we will address in this introductory course in political theory. The course is divided into five thematic sections, each addressing an enduring political problem or issue and centered on a key text in the history of political thought: 1. Laws, Obligations, and the Question of Disobedience; Sophocles, *Antigone*; 2. Democratic Citizenship and the Capacities of Political Judgment; Plato, *Republic*; 3. Origins and Effects of (In)equality; John Locke, *Second Treatise of Civil Government*; 4. Paradoxes of Freedom; Jean Jacques Rousseau, *On the Social Contract*; 5. The Woman Question; John Stuart Mill, *The Subjection of Women*.

POLS UN3112 GANDHI, KING # POLS OF NONVIOLENCE. 4.00 points.

Since Gandhi's experiments in mass satyagraha over a century ago, nonviolence has become a staple of protest politics across the globe. From the Occupy movements to the Arab Spring to Movement for Black Lives, it might even be entering a new phase of revitalization. At the same time, what exactly nonviolence is and what it can accomplish in politics is very much under debate. This course aims to understand the politics of nonviolence by examining the political ideas and political careers of its most well-known twentieth-century advocates, M.K. Gandhi and Martin Luther King, Jr. Though still venerated as founding figures of nonviolent protest, Gandhi and King have come to be remembered in ways that can misconstrue how they understood and practiced nonviolent politics. To many, Gandhi is a saintly idealist, who wanted to imbue politics with the spirit of ahimsa, truth, and conscience. Likewise, King is taken to be a spokesman for interracial brotherhood and Christian love. While partly true, these images also downplay the political side of their nonviolence – the techniques of organizing and strategies of protest that made their movements successful. We will examine the evolution of Gandhi's and King's political thinking in relation to the movements they led – the Indian independence movement and the civil rights movement in the US. We will consider how the theory and practice of nonviolence evolved and changed as it moved from one context to another. We will be especially focused on understanding the dynamics of nonviolent protest

POLS UN3176 Liberalism: Origins and Challenges. 3 points.

Liberalism is a moral and political outlook that stresses the equal worth of individuals and advocates a range of rights protecting individual conscience, speech, association, movement, and property. This course explores the historical origins, moral claims, and contemporary controversies of liberal thought. Students will investigate the conceptual foundations of liberalism and consider several contemporary critical challenges liberals face. The course is divided into topics that each focus on a particular type of challenge. How, if at all, can liberals accommodate the claims of equality, community, national, multiculturalism, feminism, value pluralism, and moral skepticism?

POLS GU4132 POLIT THOUGHT-CLASSICAL AND MEDIEVAL. 3.00 points.

Prerequisites: Contemporary Civilization or a comparable introduction to political theory course.

Prerequisites: Contemporary Civilization or a comparable introduction to political theory course. The course examines the historical and theoretical foundations of democracy. The underlying assumption is that political arrangements and institutions are the embodiment of political ideas and theories. The course will investigate the historical emergence of democracy as a form of government based on equality before the law and equal access to all citizens to the deliberative, decisional and control processes. The historical starting point is identified in Solon's reforms in Athens which dramatically broke the hegemony of ancient nobility; we will then study Cleisthenes' reforms and their redefinition of citizenry; in the context of the new political ideal of isonomia. We will proceed to examine the theoretical debate of the fifth century BCE, which includes Herodotus (III, 80-82), Thucydides and Protagoras. We will then examine the criticism levelled at democracy by Socrates, Plato and Aristotle: their thought enables us to compare the ancient idea of democracy to our own. Finally, we will study the Roman contribution to the

theory of democracy, namely Cicero's ideal of 'republic' and the role that law, codified law, played in it

POLS GU4139 TOCQUEVILLE AND REVOLUTION. 4.00 points.

Alexis de Tocqueville probably understood the dynamics of revolutions better than anyone before or since. He was an observer of the French 1830 revolution, a participant observer of the 1848 revolution, and arguably the most insightful analyst of the revolution of 1789 and its precursors. In the class we shall engage in a close reading of his writing on the ancient regime and on the first year of the Revolution. We shall also consider some recent writings on France before 1789 and on revolution, notably the Instructor's recent book

RESEARCH METHODS**POLS UN3704 RESEARCH DESIGN: DATA ANALYSIS. 3.00 points.**

This course examines the basic methods data analysis and statistics that political scientists use in quantitative research that attempts to make causal inferences about how the political world works. The same methods apply to other kinds of problems about cause and effect relationships more generally. The course will provide students with extensive experience in analyzing data and in writing (and thus reading) research papers about testable theories and hypotheses. It will cover basic data analysis and statistical methods, from univariate and bivariate descriptive and inferential statistics through multivariate regression analysis. Computer applications will be emphasized. The course will focus largely on observational data used in cross-sectional statistical analysis, but it will consider issues of research design more broadly as well. It will assume that students have no mathematical background beyond high school algebra and no experience using computers for data analysis

POLS UN3720 RESEARCH DESIGN: SCOPE AND METHODS. 4 points.

This class aims to introduce students to the logic of social scientific inquiry and research design. Although it is a course in political science, our emphasis will be on the science part rather than the political part — we'll be reading about interesting substantive topics, but only insofar as they can teach

us something about ways we can do systematic research. This class will introduce students to a medley of different methods to conduct social scientific research.

POLS GU4700 MATH # STATS FOR POLI SCI. 4.00 points.

This course presents basic mathematical and statistical concepts that are essential for formal and quantitative analysis in political science research. It prepares students for the graduate-level sequence on formal models and quantitative political methodology offered in the department. The first half of the course will cover basic mathematics, such as calculus and linear algebra. The second half of the course will focus on probability theory and statistics. We will rigorously cover the topics that are directly relevant to formal and quantitative analysis in political science such that students can build both intuitions and technical skills. There is no prerequisite. The course is aimed for both students with little exposure to mathematics and those who have taken some courses but wish to gain a more solid foundation. NOTE: This course does not satisfy the Political Science Major/Concentration research methods requirement

POLS GU4722 QUANT METH 2 STAT THEO#CAUS INF. 4.00 points.

This course is the second course in the graduate-level sequence on quantitative political methodology offered in the Department of Political Science. Students will learn (1) a framework and methodologies for making causal inferences from experimental and observational data, and (2) statistical theories essential for causal inference. Topics include randomized experiments, estimation under ignorability, instrumental variables, regression discontinuity, difference-indifferences, and causal inference with panel data. We also cover statistical theories, such as theories of ordinary least squares and maximum likelihood estimation, by connecting them to causal inference methods. This course builds on the materials covered in POLS 4700 and 4720 or their equivalent (i.e., probability, statistics, linear regression, and logistic regression)

Spring 2021: POLS GU4722

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

POLS GU4724 QUANT METH 3 EXPERIMENTAL METH. 4.00 points.

In this course, we will discuss the logic of experimentation, its strengths and weaknesses compared to other methodologies, and the ways in which experimentation has been — and could be — used to investigate social phenomena. Students will learn how to interpret, design, and execute experiments. Special attention will be devoted to field experiments, or randomized trials conducted in real-world settings. Prerequisites: Students should have taken at least one or two semesters of statistics.

Some understanding of probability, hypothesis testing, and regression are assumed. Familiarity with statistical software such as R is helpful. We will be working with data in class throughout the term. The examples used in the textbook and lectures are written in R, and R tutorials will be taught in special sessions early in the term

PSYCHOLOGY

Departmental Office: 406 Schermerhorn; 212-854-3608

<https://psychology.columbia.edu/>

Directors of Undergraduate Studies:*Psychology Major and Concentration:*

Prof. Patricia Lindemann, 358E Schermerhorn Extension; pgl2@columbia.edu (Students with last names beginning A-H)

Prof. Katherine Fox-Glassman, 314 Schermerhorn; kjt2111@columbia.edu (Students with last names beginning I-S)

Prof. Chris Baldassano, 370 Schermerhorn Extension; cab2304@columbia.edu (Students with last names beginning T-Z)

Neuroscience and Behavior Major:

Psychology: Prof. Alfredo Spagna, 315 Schermerhorn (Students with last names beginning A-L)

Psychology: Prof. Caroline Marvin, 317 Schermerhorn; cbm2118@columbia.edu (Students with last names beginning M-Z)

Biology (CC): Prof. Jian Yang, 917A Fairchild; jy160@columbia.edu

Biology (GS): Prof. Deborah Mowshowitz, 744 Mudd; dbm2@columbia.edu

Director of Instruction and Academic Affairs:

Prof. Caroline Marvin, 317 Schermerhorn; cbm2118@columbia.edu

Director of Psychology Honors Program:

Prof. Lila Davachi, 371 Schermerhorn Extension; ld24@columbia.edu

Preclinical Adviser: Prof. E'mett McCaskill, 415O Milbank; emccaski@barnard.edu

Administrative Manager: Joanna Borchert-Kopczuk, 406 Schermerhorn; 212-854-3940; jb2330@columbia.edu

Undergraduate Curriculum Assistant: Liz Parish, 406 Schermerhorn; 212-854-8859; uca@psych.columbia.edu

The Department of Psychology offers students a comprehensive curriculum in psychological science, including research methods, cognition, neuroscience, developmental, social, and clinical areas. The curriculum prepares majors for graduate education in these fields and also provides a relevant background for social work, education, medicine, law, and business. Psychology course offerings are designed to meet the varying needs and interests of students, from those wishing to explore a few topics in psychology or to fulfill the science requirement, to those interested in majoring in Psychology or in Neuroscience and Behavior.

PROGRAM GOALS

The department's program goals start with the development of a solid knowledge base in psychological science. Consistent with

the value psychology places on empirical evidence, courses at every level of the curriculum nurture the development of skills in research methods, quantitative literacy, and critical thinking, and foster respect for the ethical values that undergird the science of psychology.

Most of these program goals are introduced in PSYC UN1001 The Science of Psychology, the recommended first psychology course required for all majors that satisfies the prerequisite for most 2000-level courses. These goals are extended and reinforced in our statistics (1600-level) and research methods (1400-level) research methods courses, as well as in the 2000-level lecture courses and 3000- and 4000-level seminars. Each of the 2000-level lecture courses enables students to study systematically, and in greater depth, one of the content areas introduced in PSYC UN1001 The Science of Psychology. These lecture courses are the principal means by which psychology majors satisfy the distribution requirements, ensuring not only depth but also breadth of coverage across three central areas of psychology: (1) perception and cognition, courses in the 2200s, (2) psychobiology and neuroscience, courses in the 2400s, and (3) social, personality, and abnormal psychology, courses in the 2600s. To complete the major, students take one or more advanced seminars and are encouraged to participate in supervised research courses, where they have the opportunity to explore research questions in depth and further develop their written and oral communication skills.

RESEARCH PARTICIPATION

All qualified students are welcome to apply to join a research lab and contribute to ongoing projects. Students may volunteer to work in a lab, register for supervised individual research (PSYC UN3950 Supervised Individual Research), or participate in the department's two-year Honors Program. Information on faculty research is available on the departmental website. Students are advised to read about research laboratories on faculty lab sites and visit the professor's office hours to discuss opportunities. At the beginning of the fall term, the department also hosts a Lab-Preview event for students to learn about research opportunities for the upcoming semester.

PROGRAM PLANNING

Majors and concentrators in psychology and majors in neuroscience and behavior should begin planning a program of study as early as possible. All necessary forms and information are available in Program Planning Tips. All majors and concentrators in Psychology and majors in Neuroscience and Behavior should complete a Major Requirement Checklist before consulting a program adviser to discuss program plans. At minimum, all students must submit a Major Requirement Checklist prior to the start of their final semester, so that graduation eligibility can be certified. Once the MRC is submitted, the Undergraduate Curriculum Assistant and the DUS's will review your curriculum plans and advise if changes need to be made.

ADVISING

The Department of Psychology offers a variety of advising resources to provide prospective and current undergraduate majors and concentrators with the information and support needed to successfully plan their programs. An overview of these resources is provided on the Psychology Undergraduate Advising Resources website.

Students are encouraged to consult with Peer, Faculty, and Program Advisers as they plan their course of study in Psychology or Neuroscience and Behavior. Faculty and Peer Advisers are important contacts for general advice on class choices, research opportunities, and post-graduation plans. For definitive answers to questions regarding major requirements and other aspects of your degree, including transfer credit, current and prospective majors should consult their Program Adviser (Director of Undergraduate Studies) or the Undergraduate Curriculum Assistant in the departmental office. Program Adviser assignments and contact information are provided on the departmental website. For additional information about program, faculty, peer, and pre-clinical advising, please see the Psychology Undergraduate Advising Resources website.

EMAIL COMMUNICATION

The department maintains an e-mail distribution list with the UNIs of all declared majors and concentrators. Students are held responsible for information sent to their Columbia e-mail addresses. **Students should read these messages from the department regularly and carefully.** They are intended to keep students informed about deadlines, requirements, events, and opportunities. Prospective majors or concentrators who would like to be added to the e-mail distribution list should contact the Undergraduate Curriculum Assistant (uca@psych.columbia.edu) in the departmental office.

GUIDE TO COURSE NUMBERS

Course numbers reflect the structure of the Psychology curriculum:

- The 1000-level comprises introductions to psychology, introductory research methods courses, and statistics. PSYC UN1001 The Science of Psychology is an introductory course with no prerequisites, which can serve as the prerequisite for most of the 2000-level courses. The 1400s contain the research methods laboratory courses, and the 1600s contain statistics courses; these two course types are designed to prepare students to be able to understand, critique, and conduct the types of research found in many psychology and neuroscience labs.
- The 2000-level comprises lecture courses that are introductions to areas within psychology; most require PSYC UN1001 The Science of Psychology as a prerequisite.

- The 3000-level comprises more advanced and specialized undergraduate courses; most are given in a seminar format and require instructor permission.
- The 3900s are the courses providing research opportunities for undergraduates.
- The 4000-level comprises advanced seminars suitable for both advanced undergraduates and graduate students, and require instructor permission.

Subcategories within the 2000-, 3000-, and 4000-levels correspond to the three groups in our distribution requirement for undergraduate Psychology majors:

1. Perception and cognition (2200s, 3200s, and 4200s),
2. Psychobiology and neuroscience (2400s, 3400s, and 4400s), and
3. Social, personality, and abnormal psychology (2600s, 3600s, and 4600s).

A fourth category of distribution, the 900s, includes courses such as Advanced Topics in Psychology Research for undergraduates (UN1910, UN1930, and UN1990), and for both graduates and undergraduates (GU4930).

Note that Barnard psychology courses do not follow the same numbering scheme.

HONORS PROGRAM

The department offers a two-year Honors Program, designed for a limited number of juniors and seniors interested in conducting original research. Beginning in the first term of junior year and continuing through senior year, students take PSYC UN3910 Honors Seminar and simultaneously participate in an honors research course (PSYC UN3920 Honors Research) under the supervision of a member of the department. Students make a formal presentation and complete an honors essay based on this research toward the end of their senior year.

To qualify for honors, students must take a total of 6 points beyond the number required for their major and satisfy all other requirements for the major. The additional 6 points may include the *Honors Seminar* and *Honors Research* courses. **Interested students should apply at the end of their sophomore year, and are also required to identify and meet with a potential faculty mentor prior to applying.** Instructions and an application form are available on the Honors Program page of the department website. Typically no more than 10% of graduating majors receive departmental honors in a given academic year.

REQUIREMENTS FOR ADMISSION TO GRADUATE PROGRAMS IN PSYCHOLOGY

Most graduate programs in psychology, including those in clinical psychology, require:

An undergraduate course in introductory psychology:

PSYC UN1001	The Science of Psychology
-------------	---------------------------

A course in statistics such as one of the following:

PSYC UN1610	Introductory Statistics for Behavioral Scientists
-------------	---

PSYC UN1660	Advanced Statistical Inference
-------------	--------------------------------

STAT UN1001	INTRO TO STATISTICAL REASONING
-------------	--------------------------------

STAT UN1101	Introduction to Statistics
-------------	----------------------------

STAT UN1201	Calculus-Based Introduction to Statistics
-------------	---

A laboratory course in research methods such as one of the following:

PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR
-------------	-----------------------------------

PSYC UN1450	RESEARCH METHODS - SOCIAL COGNITION # EMOTION
-------------	---

PSYC UN1455	RESEARCH METHODS: SOCIAL/PERSONALITY
-------------	--------------------------------------

PSYC UN1490	RESEARCH METHODS - COGNITION/DECISION MAKING
-------------	--

Students should also take a variety of more advanced undergraduate courses and seminars. Students interested in PhD programs in any area of psychology are very strongly encouraged to participate in a research lab and enroll in PSYC UN3950 Supervised Individual Research. Students are also encouraged to apply for the Psychology Honors Program at the end of their sophomore year.

Students interested in clinical psychology should obtain experience working in a community service program in addition to supervised individual research experience. Students should consult the department's pre-clinical adviser, Prof. E'mett McCaskill, and attend the department's pre-clinical advising events for more information. Additional resources to help prepare students for graduate study in psychology, and for careers in clinical psychology, are available on the Department of Psychology's website.

ONLINE INFORMATION

The Department of Psychology website provides access to a wide variety of information for majors and prospective majors. Among other useful resources, students will find syllabi posted for most lecture and lab courses and for many advanced seminars. Students should read the on-line course syllabi prior to registering for psychology courses. For assistance in finding all necessary resources, students should contact the undergraduate curriculum assistant (uca@psych.columbia.edu).

SCIENCE REQUIREMENT

PSYC UN1001 The Science of Psychology, PSYC UN1010 Mind, Brain and Behavior (no longer offered), and any PSYC

course in the 2200- or 2400-level may be used to fulfill the science requirement.

2600-level and some other psychology courses, including PSYC BC1001 Introduction to Psychology and other Barnard psychology courses, may not be used to fulfill the science requirement.

All 3- and 4-point courses numbered in the 32xx, 34xx, 42xx, and 44xx can partially fulfill the science requirement. With prior departmental approval, some additional courses may also be used to partially fulfill the science requirement. For more detailed information regarding psychology courses that may be applied toward the science requirement, see the *Core Curriculum* section in this bulletin.

EVENING AND COLUMBIA SUMMER COURSES

The department normally offers at least one lab course (currently PSYC UN1420 RESEARCH METHODS - HUMAN BEHAVIOR and PSYC UN1450 RESEARCH METHODS - SOCIAL COGNITION # EMOTION) in the late afternoon with evening labs. A number of other courses are occasionally offered in late afternoon and evening hours. No more than one quarter of the courses required for the major are normally available in the evening. Working students may find the wide variety of early morning (8:40 a.m.) classes, as well as Summer Session offerings, helpful in completing degree requirements.

Any course offered by the Psychology Department during the Summer Session is applicable toward the same major requirement(s) as the corresponding course of that same number offered during the academic year. For instance, PSYC S1001D The Science of Psychology meets the same major requirements as does PSYC UN1001 The Science of Psychology.

See *Academic Regulations—Study Outside Columbia College* in this Bulletin for additional information.

GUIDELINES FOR ALL PSYCHOLOGY MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

Double Majors/Concentrations

All students attempting to complete double majors, double concentrations, or a combination of a major and a concentration should consult the college rules for double counting of courses.

Overlapping Courses

Students cannot receive credit for two courses—one completed at Columbia and one at another institution (including Barnard)

—if those courses have largely overlapping content. For example, PSYC UN1001 The Science of Psychology is similar in content to introductory psychology courses offered at many other institutions, including Barnard; only one such course will receive credit. Similarly, PSYC UN2630 Social Psychology and PSYC BC1138 Social Psychology have overlapping content; only one will receive credit. Please refer to the table of [Overlapping Courses](#) for a partial list of courses at Columbia and Barnard that are known to overlap.

Grade Requirements for the Major

A grade of C- or higher must be earned and revealed on the transcript in any Columbia or Barnard course, including the first, that is used to satisfy the major requirements. The grade of P is not accepted for credit towards the Psychology major, Psychology concentration, or Neuroscience and Behavior major. Courses taken on a Pass/D/Fail basis may not be used to satisfy the major or concentration requirements unless the grade of P is uncovered by the Registrar's deadline. Students may petition to have their P/D/F grades uncovered after the registrar's deadline for the following three courses only: PSYC UN1001 Science of Psychology, PSYC UN1010 Mind, Brain, & Behavior (no longer offered), and PSYC UN1610 Introductory Statistics for Behavioral Scientists. Courses taken for a P grade may not be used to satisfy the major or concentration requirements, except for P grades earned in the Spring 2020 semester.

Major Requirement Checklist

Prior to the start of their final semester, all seniors must submit a Major Requirement Checklist showing all major courses they have taken and those they plan to take. The Psychology department evaluates each checklist to determine whether or not the course plan completes the major requirements and then notifies the student accordingly. If the student's course plan changes, or if it does not satisfy the major requirements, a revised checklist must be submitted. Departmental approval of an accurate and up-to-date checklist will help ensure completion of all major requirements on time for graduation.

MAJOR IN PSYCHOLOGY

Please read Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors (p. 712) above.

The Psychology Major requirements changed in 2020. Students entering an undergraduate degree program at Columbia in Fall 2020 or later must complete the new major requirements. Students who entered Columbia prior to Fall 2020 may choose to complete either the new major requirements or the old ones.

New Major Requirements (for students entering Fall 2020 or later)

Students must complete 11 courses in Psychology or an approved cognate discipline. To count toward the major, a

course must be taken for 3 or more points. At least 6 of the 11 courses must be in the Columbia Psychology Department.

These 11 courses must include:

1. Introductory Psychology Course
2. One Statistics course
3. One Research Methods course
4. One Group I Course
5. One Group II Course
6. One Group III Course
7. One course meeting the Seminar requirement
8. One course meeting the integrative/applied Special Elective requirement
9. Enough PSYC electives to complete 11 courses

Each course may fulfill only one of these major requirements. See below for details on each of these requirements.

Old Major Requirements (for students entering prior to Fall 2020)

Students must complete 30 or more points to complete the Psychology Major. Those 30 points must include:

1. Introductory Psychology Course
2. One Statistics course
3. One Research Methods course
4. One Group I Course
5. One Group II Course
6. One Group III Course
7. One course meeting the Seminar requirement
8. Enough PSYC electives to complete 30 points

See below for details on each of these requirements. Note that no course may be counted twice in fulfillment of the major requirements.

The Introductory Psychology Course

- PSYC UN1001 The Science of Psychology

A Statistics Course

Select one of the following:

- PSYC UN1610 Introductory Statistics for Behavioral Scientists
- PSYC UN1660 Advanced Statistical Inference
- STAT UN1001 INTRO TO STATISTICAL REASONING
- STAT UN1101 Introduction to Statistics (formerly *STAT W1111*)
- STAT UN1201 Calculus-Based Introduction to Statistics (formerly *STAT W1211*)

A Research Methods Course

Select one of the following:

- PSYC UN1420 RESEARCH METHODS - HUMAN BEHAVIOR
- PSYC UN1450 RESEARCH METHODS - SOCIAL COGNITION # EMOTION
- PSYC UN1455 RESEARCH METHODS: SOCIAL/ PERSONALITY
- PSYC UN1490 RESEARCH METHODS - COGNITION/ DECISION MAKING

Majors are strongly advised to complete the statistics and research methods requirements, in that order, by the fall term of their junior year. Students are advised to verify the specific prerequisites for research methods courses, most of which require prior completion of a statistics course.

Distribution Requirement

One course (3 points or more) must be taken from each of the following three groups (in addition to the introductory, statistics, and research methods courses described above):

- Group I—Perception and cognition: courses numbered in the 2200s, 3200s, or 4200s.
- Group II—Psychobiology and neuroscience: courses numbered in the 2400s, 3400s, or 4400s. Also PSYC UN1010 Mind, Brain and Behavior (no longer offered).
- Group III—Social, personality, and abnormal: courses numbered in the 2600s, 3600s, or 4600s.

Beginning Fall 2019, Research Methods courses will no longer fulfill any of the Group distribution requirements.

Seminar Requirement

In addition, students must complete one course meeting the Seminar requirement. A seminar course must be taken for 3 or more points.

All courses offered through the Columbia Psychology Department and numbered in the 3200s, 3400s, 3600s, 4200s, 4400s, and 4600s count toward the seminar requirement. Not all Barnard courses taught in a seminar format fulfill this requirement—see Barnard Courses, below, for more information.

Seminars are usually taken in the junior and senior year as a culmination of the major program. Enrollment in seminar courses requires the instructor's permission; students are advised to contact instructors at least one month prior to registration to request seminar admission. Note that honors and supervised individual research courses (PSYC UN3910 Honors Seminar, PSYC UN3920 Honors Research, and PSYC UN3950 Supervised Individual Research) will not meet the seminar requirement.

No course may be counted twice in fulfillment of the above major requirements: separate courses must be taken to fulfill the seminar requirement and each distribution group.

Special Elective (for the New Major requirements)

For students entering Columbia in Fall 2020 or later, one course must be taken to fulfill the integrative/applied Special Elective.

The Special Elective encompasses a wide range of courses: those that cut across and connect different sub-disciplines within psychology; those that integrate psychology with other disciplines; those that apply psychology to real-world problems; those that dig deeper into advanced statistics and methods topics; and those that offer hands-on experience with psychology research.

The following courses are pre-approved to count toward the Special Elective requirement. If you would like to count a course that does not appear on this list, please contact your Program Advisor prior to enrolling.

- PSYC UN3950 SUPERVISED INDIVIDUAL RESEARCH or PSYC UN3920 Honors Research (taken for 3 or 4 points)
- PSYC UN1910 Research Ethics in Psychology
- PSYC UN1930 Behavioral Data Science
- PSYC UN1990 Global Behavioral Science
- PSYC UN3615 Children at Risk (Lecture)
- PSYC GU4612 Frontiers of Justice
- PSYC GU4930 Fundamentals of Human Brain Imaging: from theory to practice
- STAT UN2102 Applied Statistical Computing
- STAT GU4243 Applied Data Science
- PSYC BC1088 THE SCIENCE OF LIVING WELL
- PSYC BC2175 Addictive Behaviors (overlaps with PSYC 2460 Drugs & Behavior)
- PSYC BC3155 Psychology and Law
- PSYC BC3465 Field Work # Research Seminar: Toddler Center
- PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER
- PSYC BC3473 Clinical Field Practicum
- PHIL V2400 Psychology and Philosophy of Human Experience
- NSBV BC3387 Topics in Neuroethics

Electives

Additional psychology courses ("electives") must be taken for a total of 30 points (or 11 courses for the new major requirements).

Once a student has met the specific requirements of the major, any other psychology or approved cognate courses they take

to complete the 30-point (or, for students entering Columbia in Fall 2020 or later, the 11-course) minimum constitute electives.

As described below, these may include a limited number of research courses, transfer courses, and Barnard psychology courses not approved for specific requirements.

No course may be counted twice in fulfillment of the above major requirements.

Research Credits

No more than 4 points of [PSYC UN3950 Supervised Individual Research](#) or [PSYC UN3920 Honors Research](#) may be taken in any one term, and no more than 8 points total of research and field work courses ([PSYC UN3950 SUPERVISED INDIVIDUAL RESEARCH](#), [PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER](#), [PSYC BC3473 Clinical Field Practicum](#), [PSYC BC3592 Senior Research Seminar](#) and [PSYC BC3599 Individual Projects](#)) may be applied toward the major. See below for further restrictions on applying Barnard courses toward the psychology major. Under the new 11-course major, research courses must be taken for 3 or 4 points in order to count toward the major; a maximum of 2 such courses may be applied towards the major. (See below for further restrictions on applying Barnard courses toward the psychology major).

Barnard Courses

For students completing the 30-point major: No more than 9 points (minus any transfer credits) from Barnard psychology courses may be applied as credit toward the major.

For students completing the 11-course major: A maximum of 5 courses counted toward the major may be from outside Columbia (i.e., Barnard and/or transfer courses).

The table of [approved Barnard psychology courses](#) indicates which courses have been approved for specific requirements of the psychology major. Courses not on the approved list may only be applied toward a specific requirement with prior written approval from one of the [directors of undergraduate studies](#). Courses not on the approved list for a specific requirement may be applied as elective credit toward the 30 points for the major (or towards the 11 courses needed for the new major requirements).

Beginning in Fall 2019, Barnard Lab courses will not count towards the Research Methods requirement of the Psychology Major or Concentration.

Non-Psychology Courses

For students completing the 11-course major: Some courses offered outside of Psychology departments can count toward major requirements (e.g., courses taken in the Statistics Department; cognate courses offered through Philosophy, Business, Law, etc.). A maximum of 2 such non-PSYC courses may be applied toward the major. Courses offered in the

Barnard Psychology or Neuroscience departments do not count toward this limit.

Transfer Credits

For students completing the 30-point major: No more than 9 transfer credits (or a combination of transfer and Barnard credits) will be accepted toward the psychology major.

For students completing the 11-course major: No more than 3 transfer courses can be applied toward the psychology major. Any transfer courses thus applied count toward the limit of 5 courses from outside Columbia.

Approval of transfer credits on a student's Entrance Credit Report toward general requirements for the B.A. degree does **not** grant approval of these credits toward the psychology major. Students must apply for written approval of transfer credit towards the major by submitting the [Major Requirement Substitution Form](#). This form, along with additional information about transfer credits can be found on the [Transfer Credit page of our website](#). To be approved for the major, a course taken at another institution should be substantially similar to one offered by the department, the grade received must be a B- or better, and the course must have been taken within the past 8 years. As noted above, if two courses overlap in content, only one will be applied towards the major. With the exception of approved Barnard courses, students should consult with one of the [directors of undergraduate studies](#) before registering for psychology courses offered outside the department.

Students who have completed an introductory psychology course at another institution prior to declaring a psychology major should submit a [Major Requirement Substitution Form](#) to verify whether or not this course meets departmental standards for major transfer credit. If transfer credit toward the major is not approved, the student must enroll in [PSYC UN1001 The Science of Psychology](#) or [PSYC BC1001 Introduction to Psychology](#) to complete this major requirement.

AP Psychology Transfer Credit

Beginning in Fall 2019, the Psychology Department will accept a score of 5 on the AP Psychology exam, or a score of 7 on the Higher Level IB Psychology exam, to meet the Science of Psychology requirement. The AP/IB Psychology exam does not count as a course or toward a student's points total for their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course to fulfill the required number of courses or points for their program.

The College Board Advanced Placement (AP) statistics scores do not satisfy the statistics requirement. Students who have completed AP statistics may opt to take a more advanced statistics course to fulfill this requirement with the approval of one of the [directors of undergraduate studies](#).

MAJOR IN NEUROSCIENCE AND BEHAVIOR

Please read [Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors](#) (p. 712) above.

The department cosponsors an interdepartmental major in neuroscience and behavior with the Department of Biological Sciences. For assistance in planning the psychology portion of the neuroscience and behavior major, refer to the [Program Planning Tips website](#) and use the appropriate [major requirement checklist](#).

No course may be counted twice in fulfillment of the biology or psychology requirements described below. Most graduate programs in neuroscience also require one year of calculus, one year of physics, and chemistry through organic.

Required Courses

In addition to one year of general chemistry (or the high school equivalent), ten courses are required to complete the major—five from the Department of Biological Sciences and five from the Department of Psychology. For the definitive list of biology requirements, see the [Department of Biological Sciences website](#).

Required Biology Courses

1. BIOL UN2005 Introductory Biology I: Biochemistry, Genetics & Molecular Biology
2. BIOL UN2006 INTRO BIO II: CELL BIO, DEV/PHYS
3. BIOL UN3004 Neurobiology I: Cellular and Molecular Neurobiology
4. BIOL UN3005 Neurobiology II: Development & Systems
5. One additional 3000- or 4000-level biology course from a [list approved by the biology adviser](#) to the program.
 - BIOL UN3006 PHYSIOLOGY
 - BIOL UN3022 Developmental Biology
 - BIOL UN3025 Neurogenetics
 - BIOL UN3031 Genetics
 - BIOL UN3799 Molecular Biology of Cancer
 - BIOL UN3034 Biotechnology
 - BIOL UN3041 Cell Biology
 - BIOL UN3073 Cellular and Molecular Immunology
 - BIOL UN3193 Stem Cell Biology and Applications
 - BIOC UN3300 Biochemistry
 - BIOC UN3501 Biochemistry: Structure and Metabolism
 - BIOL UN3310 Virology
 - BIOL UN3404 Seminar on the Global Threat of Antimicrobial Resistance
 - BIOC UN3512 Molecular Biology
 - BIOL GU4008 The Cellular Physiology of Disease

- BIOL GU4082 Theoretical Foundations and Applications of Biophysical Methods
- BIOL GU4300 Drugs and Disease
- BIOL GU4510 Genomics of Gene Regulation
- BIOL GU4560 Evolution in the age of genomics
- BIOL GU4035 Seminar in Epigenetics
- BIOL GU4070 The Biology and Physics of Single Molecules
- BIOL GU4075 Biology at Physical Extremes
- BIOL GU4080 The Ancient and Modern RNA Worlds
- BIOL GU4260 Proteomics Laboratory
- BIOL GU4290 Biological Microscopy
- BIOL GU4305 Seminar in Biotechnology

Required Psychology Courses

1. PSYC UN1001 The Science of Psychology
2. PSYC UN2430 COGNITIVE NEUROSCIENCE or PSYC UN2450 Behavioral Neuroscience or PSYC UN2470 Fundamentals of Human Neuropsychology
 - Students who have previously taken PSYC UN1010 Mind, Brain and Behavior (no longer offered) may use that course to fulfill this requirement.
3. One statistics or research methods course from the following:
 - PSYC UN1450 RESEARCH METHODS - SOCIAL COGNITION # EMOTION
 - PSYC UN1490 RESEARCH METHODS - COGNITION/ DECISION MAKING
 - PSYC UN1610 Introductory Statistics for Behavioral Scientists
 - PSYC UN1660 Advanced Statistical Inference
 - STAT UN1101 Introduction to Statistics (formerly *STAT W1111*)
 - STAT UN1201 Calculus-Based Introduction to Statistics (formerly *STAT W1211*)
 - *Please note, STAT UN1001 **does not** count towards the Neuroscience & Behavior major.*
4. One additional 2000- or 3000-level psychology lecture course from a [list* approved by the psychology adviser](#) to the program:
 - PSYC S2210Q Cognition: Basic Processes
 - PSYC UN2215 Cognition and the Brain or PSYC S2215D Cognition and the Brain

- PSYC UN2220 Cognition: Memory and Stress
- PSYC W2225 Attention and Perception
- PSYC W2230 Perception and Sensory Processes
- PSYC W2235 or PSYC S2235Q Thinking and Decision Making
- PSYC UN2250 Evolution of Cognition
- PSYC UN2280 Introduction to Developmental Psychology
- PSYC UN2420 Animal Behavior
- PSYC UN2430 COGNITIVE NEUROSCIENCE
- PSYC UN2440 Language and the Brain
- PSYC UN2450 Behavioral Neuroscience or PSYC S2450Q Behavioral Neuroscience
- PSYC UN2460 Drugs and Behavior
- PSYC UN2470 Fundamentals of Human Neuropsychology
- PSYC UN2480 The Developing Brain
- PSYC UN2620 Abnormal Behavior or PSYC S2620Q Abnormal Behavior

**Please make careful note of this list, as courses not listed here will not count towards the P4 requirement.*

5. One advanced psychology seminar from a list approved by the psychology adviser to the program:

- PSYC W3265 Auditory Perception (Seminar)
- PSYC UN3270 Computational Approaches to Human Vision (Seminar)
- PSYC UN3280 Seminar In Infant Development or PSYC S3280D Seminar in Infant Development
- PSYC S3285D The Psychology of Disaster Preparedness
- PSYC UN3290 Self: A Cognitive Exploration (Seminar)
- PSYC GU4202 Theories of Change in Human Development
- PSYC GU4222 The Cognitive Neuroscience of Aging (Seminar)
- PSYC GU4223 Memory and Executive Function Thru the Lifespan
- PSYC G4225
- PSYC GU4229 Attention and Perception(Seminar)
- PSYC GU4232 Production and Perception of Language
- PSYC G4235
- PSYC GU4236 Machine Intelligence
- PSYC GU4239 Cognitive neuroscience of narrative and film
- PSYC GU4242 Evolution of Language (Seminar)
- PSYC GU4244 Language and Mind
- PSYC GU4250 Evolution of Intelligence, Cognition, and Language (Seminar)

- PSYC GU4270 COGNITIVE PROCESSES
- PSYC G4272 Advanced Seminar in Language Development
- PSYC GU4280 Core Knowledge (Seminar)
- PSYC GU4281 The Psychology of Curiosity
- PSYC GU4282 The Neurobiology and Psychology of Play
- PSYC G4285 Multidisciplinary Approaches to Human Decision Making (Seminar)
- PSYC GU4287 Decision Architecture
- PSYC GU4289 THE GAMES PEOPLE PLAY:PSYCH OF STRAT DEC
- PSYC S3410Q Seminar in Emotion
- PSYC W3435 Neurobiology of Reproductive Behavior (Seminar)
- PSYC UN3445 The Brain & Memory
- PSYC UN3450 EVOL-INTELLIGENC/
CONSCIOUSNESS/ PSYC G4450 The Evolution of Intelligence & Consciousness (Seminar)
- PSYC UN3481 Critical Periods in Brain Development and Behavior
- PSYC W3484 Life Span Development: Theory and Methods
- PSYC UN3496 Neuroscience and Society or PSYC S3496Q Neuroscience and Society
- PSYC W4415 Methods and Issues in Cognitive Neuroscience (Seminar)
- PSYC GU4420 Animal Cognition (Seminar)
- PSYC GU4430 Learning and the Brain (Seminar)
- PSYC GU4435 Non-Mnemonic Functions of Memory Systems
- PSYC G4440 or PSYC S4440Q Topics in Neurobiology and Behavior
- PSYC G4460 Cognitive Neuroscience and the Media (Seminar)
- PSYC GU4470 Psychology & Neuropsychology of Language (Seminar)
- PSYC GU4480 Psychobiology of Infant Development (Seminar)
- PSYC GU4482 Neural Plasticity
- PSYC G4485 Affective Neuroscience (Seminar)
- PSYC GU4486 Developmental and Affective Neuroscience (Seminar)
- PSYC G4492 Psychobiology of Stress
- PSYC G4495 Ethics, Genetics, and the Brain
- PSYC GU4498 Behavioral Epigenetics
- PSYC UN3615 Children at Risk (Lecture)(Seminar)
- PSYC UN3620 Seminar in Developmental Psychopathology
- PSYC UN3623 Topics in Clinical Psychology

- PSYC UN3624 Adolescent Mental Health: Causes, Correlates, Consequences
- PSYC UN3625 Clinical Neuropsychology (Seminar) or PSYC S3625D Clinical Neuropsychology Seminar
- PSYC UN3680 Social Cognitive Neuroscience (Seminar)/ PSYC GU4685 Social Cognitive Neuroscience (Seminar)
- PSYC GU4612 Frontiers of Justice
- PSYC GU4615 The Psychology of Culture and Diversity (Seminar)
- PSYC GU4627 Seminar in Anxiety, Obsessive-Compulsive, and Related Disorders
- PSYC G4630
- PSYC GU4635 The Unconscious Mind (Seminar)
- PSYC GU4645 Culture, Motivation, and Prosocial Behavior
- PSYC G4670 Theories in Social and Personality Psychology (Seminar)
- PSYC GU4672 Moral Psychology
- PSYC GU4673 Political Psychology
- PSYC GU4682 FAQs about Life: Applications of Psychological Research to Everyday Experiences
- PSYC GU4690 Social Factors and Psychopathology (Seminar)
- PSYC GU4695 Psychology of Close Relationships (Seminar)

Note: Students wishing to use a seminar course not listed above to meet the P5 seminar requirement must contact their psychology adviser before enrolling to request permission for an exception. Generally speaking, permission for such exceptions is only granted when there is a compelling case related to the student's research or area of study. Students requesting permission to use a course not on this list must ensure that their substantive coursework in the seminar (generally their final paper) is on a neuroscience-focused topic.

Transfer Credit for Psychology Courses Taken Elsewhere

Students should consult a psychology adviser before registering for psychology courses offered outside the department. With the adviser's approval, one, and only one, course from another institution, including Barnard, may be applied toward the psychology portion of the Neuroscience and Behavior major. Students who wish to obtain credit for a course taken at Barnard or at another institution should complete the Major Requirement Substitution Form. **To be approved for the major, the course should be substantially similar to one offered by this department and approved for this major, and the grade received must be a C- or better if from Barnard, or B- or better if from another institution.** Beginning in Fall 2019, the Psychology department accepts a score of 5 on the AP Psychology exam, or a score of

7 on the Higher Level IB Psychology exam, to meet the PSYC UN1001 The Science of Psychology requirement. The AP/IB Psychology exam does not count as a course or toward a student's points total for their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course -- approved by the Psychology adviser -- to fulfill the required number of courses for their program.

Advanced Placement (AP) statistics scores will not satisfy the statistics/research methods requirement. Students who have completed AP Statistics are encouraged to enroll in a 1400-level research methods course to fulfill this requirement.

Exceptions to Biology Requirements

Any exceptions must be approved in advance by a biology adviser and students must receive an email notification of that approval. Students may substitute Barnard College courses only with prior permission from an adviser.

CONCENTRATION IN PSYCHOLOGY

Please read Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors (p. 712) above.

The Psychology Concentration requirements changed in 2020. Students entering an undergraduate degree program at Columbia in Fall 2020 or later must complete the new concentration requirements. Students who entered Columbia prior to Fall 2020 may choose to complete either the new concentration requirements or the old ones.

New Concentration Requirements (for students entering Fall 2020 or later)

Students must complete 7 courses in Psychology or an approved cognate discipline. To count toward the concentration, a course must be taken for 3 or more points.

1. PSYC UN1001 The Science of Psychology
2. A Statistics or Research Methods course (PSYC UN1610 Introductory Statistics for Behavioral Scientists, STAT UN1001 INTRO TO STATISTICAL REASONING, STAT UN1101 Introduction to Statistics, STAT UN1201 Calculus-Based Introduction to Statistics, or a course in the 14xx's)
3. *Either* 3 courses in one group, *or* 1 course in each of the 3 groups: Group I - Cognition & Perception; Group II - Psychobiology & Neuroscience; Group III - Social, Personality, & Abnormal
4. Additional elective courses in psychology to complete the 7-course requirement

Restrictions on research credits, Barnard credits, non-psychology courses, and transfer credits are modified from those of the psychology major as follows:

- No more than 2 transfer courses from other institutions can be applied toward the concentration.
- No more than 3 total courses from outside Columbia (Barnard and/or transfer) can be applied to the concentration.
- A maximum of 1 non-PSYC course can count toward concentration requirements (e.g., courses taken in the Statistics Department; cognate courses offered through Philosophy, Business, Law, etc.).
- No more than 1 semester of PSYC UN3950 SUPERVISED INDIVIDUAL RESEARCH or other supervised research course (taken for 3 or 4 points) can count towards the concentration.

Except as noted above, other regulations outlined in the Psychology Major section regarding grades, transfer credits, and overlapping courses also apply toward the Psychology Concentration

Old Concentration Requirements (for students entering prior to Fall 2020)

A concentration in psychology requires a minimum of 18 points, including PSYC UN1001 The Science of Psychology and courses in at least two of the three groups listed under "Distribution Requirement" for the psychology major.

Restrictions on research credits, Barnard credits, and transfer credits are modified from those of the psychology major as follows:

1. Only 4 points total may be applied toward the concentration from research or field-work courses, including: PSYC UN3950 Supervised Individual Research, PSYC UN3920 Honors Research PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER, PSYC BC3473 Clinical Field Practicum, PSYC BC3592 Senior Research Seminar, and PSYC BC3599 Individual Projects;
2. Only 5 points from Barnard (including PSYC BC1001 Introduction to Psychology) may be applied toward the concentration.
3. Only 5 points total (including any Barnard points) from approved psychology courses taken outside the department may be applied toward the concentration.

*Beginning Fall 2019, Barnard Lab courses will not count towards the Research Methods requirement of the Psychology Major or Concentration.

Except as noted above, other regulations outlined in the Psychology Major section regarding grades, transfer credits, and overlapping courses also apply toward the Psychology Concentration

PSYC UN1001 The Science of Psychology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Enrollment may be limited. Attendance at the first two class periods is mandatory.

Prerequisites: **BLOCKED CLASS. EVERYONE MUST JOIN WAITLIST TO BE ADMITTED**

Broad survey of psychological science including: sensation and perception; learning, memory, intelligence, language, and cognition; emotions and motivation; development, personality, health and illness, and social behavior. Discusses relations between the brain, behavior, and experience. Emphasizes science as a process of discovering both new ideas and new empirical results. *PSYC UN1001* serves as a prerequisite for further psychology courses and should be completed by the sophomore year.

Fall 2020: PSYC UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1001	001/10065	T Th 1:10pm - 2:25pm Online Only	Patricia Lindemann	3	205/240
PSYC 1001	002/10087	M W 10:10am - 11:25am Online Only	Tina Kao	3	121/189
PSYC 1001	003/13741	T Th 2:40pm - 3:55pm Online Only	Svetlana Rosi	3	183/189

Spring 2021: PSYC UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1001	001/10967	T Th 1:10pm - 2:25pm Online Only	Patricia Lindemann	3	216/240
PSYC 1001	002/10968	M W 11:40am - 12:55pm Online Only	Svetlana Rosi	3	204/189

PSYC UN1021 Science of Psychology: Explorations and Applications. 3.00 points.

UN1021 offers a broad introductory survey of psychological science, discussing relations between the brain, behavior, and experience, with regard to topics including: sensation and perception; learning, memory, language, and cognition; emotions and motivation; development, personality, health and well-being, and social behavior. The course emphasizes science as a process of discovering both new ideas and new empirical results -- and the ways in which psychological research can be used to address real-world challenges

Spring 2021: PSYC UN1021

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1021	001/14309	T Th 2:40pm - 3:55pm Online Only	Caroline Marvin	3.00	30/40

PSYC UN1420 RESEARCH METHODS - HUMAN BEHAVIOR. 4.00 points.

Attendance at the first class is mandatory. Fee: \$70.

Prerequisites: *PSYC W1001* or *PSYC W1010*, and a statistics course (*PSYC W1610* or the equivalent), or the instructor's permission.

Prerequisites: PSYC UN1001 and a statistics course (PSYC UN1610 or the equivalent), or the instructor's permission.

Corequisites: PSYC UN1421 Introduction to the techniques of research employed in the study of human behavior. Students gain experience in the conduct of research, including design of simple experiments, observation and measurement techniques, and the analysis of behavioral data

Spring 2021: PSYC UN1420

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1420	001/10969	M 4:10pm - 6:00pm Online Only	Patricia Lindemann	4.00	53/60

PSYC UN1421 RESEARCH METHODS-HUM BEHAV LAB. 0.00 points.

Limited enrollment in each section.

Corequisites: PSYC UN1420

Corequisites: PSYC UN1420

Spring 2021: PSYC UN1421

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1421	001/11723	M 7:10pm - 9:00pm Online Only	Patricia Lindemann	0.00	21/18
PSYC 1421	002/11724	T 10:10am - 12:00pm Online Only	Patricia Lindemann	0.00	15/18
PSYC 1421	003/19992	W 7:10pm - 9:00pm Online Only	Patricia Lindemann	0.00	17/18

PSYC UN1450 RESEARCH METHODS - SOCIAL COGNITION # EMOTION. 4.00 points.

Attendance at the first class is essential. Priority given to psychology majors. Fee: \$70.

Prerequisites: PSYC UN1001 or PSYC UN1010 and a statistics course (PSYC UN1610 or the equivalent), or the instructor's permission.

Corequisites: PSYC UN1451

An introduction to research methods employed in the study of human social cognition and emotion. Students gain experience in the design and conduct of research, including ethical issues, observation and measurement techniques, interpretation of data, and preparation of written and oral reports

PSYC UN1451 RESEARCH METHODS - SOCIAL COGNITION # EMOTION - LAB. 0.00 points.

Limited enrollment in each section.

Corequisites: PSYC UN1450

An introduction to research methods employed in the study of human social cognition and emotion. Students gain experience in the design and conduct of research, including ethical issues, observation and measurement techniques, interpretation of data, and preparation of written and oral reports

PSYC UN1455 RESEARCH METHODS: SOCIAL/ PERSONALITY. 4.00 points.

Fee: \$70.

Prerequisites: PSYC UN1001 or PSYC UN1010 and a statistics course (PSYC UN1610 or the equivalent), or the instructor's permission.

Corequisites: PSYC UN1456

Prerequisites: PSYC UN1001 or PSYC UN1010 and a statistics course (PSYC UN1610 or the equivalent), or the instructors permission. Corequisites: PSYC UN1456 Methodology and procedures of personality and social psychological research and exercises in data analysis and research design. Ethical issues in psychological research. Statistical concepts such as parameter estimation and testing, measurement reliability and validity, merits and limitations of correlational and experimental research designs, and empirical evaluation of theories

Spring 2021: PSYC UN1455

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1455	001/10977	M 10:10am - 12:00pm Online Only	Niall Bolger	4.00	32/35

PSYC UN1456 RESEARCH METHODS: SOCIAL/ PERSONALITY. 0.00 points.

Limited enrollment in each section.

Corequisite: PSYC UN1455

Spring 2021: PSYC UN1456

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1456	001/11240	W 10:10am - 12:00pm Online Only	Niall Bolger	0.00	19/18
PSYC 1456	002/11241	W 2:10pm - 4:00pm Online Only	Niall Bolger	0.00	12/18

PSYC UN1490 RESEARCH METHODS - COGNITION/ DECISION MAKING. 4.00 points.

Corequisites: PSYC UN1491

Corequisites: PSYC UN1491 Prerequisites: Science of Psychology (PSYC 1001) or Mind, Brain, - Behavior (PSYC 1010) or equivalent intro psych course, plus an introductory statistics course. Introduces research methods employed in the study of the cognitive and social determinants of thinking and decision making. Students gain experience in the conduct of research, including: design of simple experiments; observation and preference elicitation techniques; the analysis of behavioral data, considerations of validity, reliability, and research ethics; and preparation of written and oral reports. Note: Fee: \$70.

Attendance at the first class is essential

Fall 2020: PSYC UN1490

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1490	001/10088	M 2:10pm - 4:00pm Online Only	Katherine Fox-Glassman	4.00	68/65

PSYC UN1491 RESEARCH METHODS - COGNITION/ DECISION LAB. 0.00 points.

Prerequisites: (PSYC UN1001 or PSYC UN1010) and (PSYC UN1610 or STAT UN1001 or STAT UN1101 or STAT UN1201) Or equivalent introductory psychology and statistics courses.

Corequisites: PSYC UN1490

Prerequisites: PSYC UN1001 and (PSYC UN1610 or STAT UN1001 or STAT UN1101 or STAT UN1201) Or equivalent introductory psychology and statistics courses. Corequisites: PSYC UN1490 Required lab for PSYC UN1490

Fall 2020: PSYC UN1491

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1491	001/10830	M 4:10pm - 6:00pm Online Only	Katherine Fox-Glassman	0.00	18/17
PSYC 1491	002/10831	M 4:10pm - 6:00pm Online Only	Katherine Fox-Glassman	0.00	17/17
PSYC 1491	003/10834	M 6:10pm - 8:00pm Online Only	Katherine Fox-Glassman	0.00	17/15
PSYC 1491	004/10836	T 6:10pm - 8:00pm Online Only	Katherine Fox-Glassman	0.00	16/15

PSYC UN1610 Introductory Statistics for Behavioral Scientists. 4 points.

Lecture and lab. Priority given to psychology majors. Fee \$70.

Prerequisites: PSYC UN1001 or PSYC UN1010 Recommended preparation: one course in behavioral science and knowledge of high school algebra.

Corequisites: PSYC UN1611

Introduction to statistics that concentrates on problems from the behavioral sciences.

Fall 2020: PSYC UN1610

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1610	001/10089	T Th 11:40am - 12:55pm Online Only	Katherine Fox-Glassman	4	56/60

Spring 2021: PSYC UN1610

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1610	001/10978	T Th 10:10am - 11:25am Online Only	Christopher Baldassano	4	45/50

PSYC UN1611 Introductory Statistics for Behavioral Scientists (Lab). 0 points.

Limited enrollment in each section.

Corequisites: PSYC UN1610

Required lab section for *PSYC UN1610*.

Fall 2020: PSYC UN1611

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 1611	001/10220	Th 4:10pm - 6:00pm Online Only	Katherine Fox-Glassman	0	16/16
PSYC 1611	002/10221	Th 8:10pm - 10:00pm Online Only	Katherine Fox-Glassman	0	13/16
PSYC 1611	003/10222	F 12:10pm - 2:00pm Online Only	Katherine Fox-Glassman	0	14/16
PSYC 1611	004/24734	Th 6:10pm - 8:00pm Online Only	Katherine Fox-Glassman	0	11/16

Spring 2021: PSYC UN1611

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1611	001/11719	Th 4:10pm - 6:00pm Online Only	Christopher Baldassano	0	16/18
PSYC 1611	002/11720	Th 6:10pm - 8:00pm Online Only	Christopher Baldassano	0	14/18
PSYC 1611	003/13304	Th 2:10pm - 4:00pm Online Only	Christopher Baldassano	0	16/18

PSYC UN1910 Research Ethics in Psychology. 4 points.

Prerequisites: (PSYC UN1001) or equivalent introductory course in psychology.

This course explores the ethical theory, principles, codes and standards applicable to research in psychology and the complexities inherent in ethical research practice.

PSYC UN1930 Behavioral Data Science. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

This course covers the basic skills and knowledge needed to address psychological research questions using data science methods. Topics cover the full scope of a behavioral data science research project including data acquisition, data processing, and data analysis.

Fall 2020: PSYC UN1930

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1930	001/15288	M 2:10pm - 4:00pm Online Only	Matthew Sisco	4	7/18

PSYC UN1990 Global Behavioral Science. 4 points.

This course builds on fundamentals of psychological and behavioral science by exploring reproducibility and replication on a global level. Students will learn from a wide range of studies and their real-world implications.

Spring 2021: PSYC UN1990

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1990	001/17225	M 2:10pm - 4:00pm Online Only	KAI RUGGERI	4	6/15

PSYC UN2215 Cognition and the Brain. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Not offered during 2020-21 academic year.

Prerequisites: *PSYC UN1001* or *PSYC UN1010* (recommended) or the instructor's permission.

How mental activities -- particularly human cognitive processes -- are implemented in the brain, with some emphasis on methods and findings of neuroscience. Topics include long term and working memory, attention and executive processes, concepts and categorization, decision making, and language.

PSYC UN2220 Cognition: Memory and Stress. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Attendance at the first class is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructor's permission.

Memory, attention, and stress in human cognition.

Spring 2021: PSYC UN2220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2220	001/10979	T Th 4:10pm - 5:25pm Online Only	Janet Metcalfe	3	50/60

PSYC UN2235 THINKING AND DECISION MAKING.

3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: an introductory course in psychology.

Prerequisites: an introductory course in psychology. Models of judgment and decision making in both certain and uncertain or risky situations, illustrating the interplay of top-down (theory-driven) and bottom-up (data-driven) processes in creating knowledge. Focuses on how individuals do and should make decisions, with some extensions to group decision making and social dilemmas

Spring 2021: PSYC UN2235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2235	001/10980	T Th 11:40am - 12:55pm Online Only	Katherine Fox-Glassman	3.00	175/180

PSYC UN2250 Evolution of Cognition. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructor's permission.

A systematic review of different forms of cognition as viewed in the context of the theory of evolution. Specific topics include the application of the theory of evolution to behavior, associative learning, biological constraints on learning, methods for studying the cognitive abilities of animals, levels of representation, ecological influences on cognition, and evidence of consciousness in animals.

PSYC UN2280 Introduction to Developmental Psychology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Enrollment may be limited. Attendance at the first two classes is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the equivalent.

Introduction to the scientific study of human development, with an emphasis on psychobiological processes underlying perceptual, cognitive, and emotional development.

Fall 2020: PSYC UN2280

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2280	001/20679	T Th 4:10pm - 5:25pm Online Only	Nim Tottenham	3	128/150

PSYC UN2420 Animal Behavior. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 or a college-level biology course, or the instructor's permission.

Introduction to behavioral systems, evolution of behavioral traits, and analysis of behavior. Topics include reproductive and social behavior, mating systems, competition, cooperation, communication, learning, development and the interplay of genes and environment.

Spring 2021: PSYC UN2420

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2420	001/10981	T Th 2:40pm - 3:55pm Online Only	Sarah Woolley	3	28/36

PSYC UN2430 COGNITIVE NEUROSCIENCE. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology This course provides an in-depth survey of data and models of a wide variety of human cognitive functions. Drawing on behavioral, neuropsychological, and neuroimaging research, the course explores the neural mechanisms underlying complex cognitive processes, such as perception, memory, and decision making. Importantly, the course examines the logic and assumptions that permit us to interpret brain activity in psychological terms

Spring 2021: PSYC UN2430

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2430	001/10982	M W 2:40pm - 3:55pm Online Only	Mariam Aly	3.00	177/180

PSYC UN2440 Language and the Brain. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010, or the instructor's permission.

Introduction to psychological research on human language and communication and to brain mechanisms supporting language processing. Topics include comprehension and production of speech sounds, words and sentences; reading and writing; bilingualism; communication behavior.

PSYC UN2450 Behavioral Neuroscience. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructor's permission.

Examines the principles governing neuronal activity, the role of neurotransmitter systems in memory and motivational processes, the presumed brain dysfunctions that give rise to schizophrenia and depression, and philosophical issues regarding the relationship between brain activity and subjective experience.

Spring 2021: PSYC UN2450

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2450	001/10983	M W 1:10pm - 2:25pm Online Only	Alfredo Spagna	3	89/110

PSYC UN2460 Drugs and Behavior. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *PSYC W1001* or *PSYC W1010*, or the equivalent. The effects of psychoactive drugs on the brain and behavior.

PSYC UN2470 Fundamentals of Human Neuropsychology. 3.00 points.

Fundamentals of Human Neuropsychology is an intermediate-level lecture course, which explores how the analysis of lesion patterns extended across brain networks has offered invaluable insights on the relationship between brain and behavior and deepened our understanding of the causal relationships between brain lesions and their clinical consequences.

Fall 2020: PSYC UN2470

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2470	001/20754	M W 1:10pm - 2:25pm Online Only	Alfredo Spagna	3.00	72/110

PSYC UN2480 The Developing Brain. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *PSYC UN1001* or *PSYC UN1010*, or the instructor's permission.

Brain development across the life span, with emphasis on fetal and postnatal periods. How the environment shapes brain development and hence adult patterns of behavior.

PSYC UN2610 Introduction To Personality. 3 points.

Prerequisites: an introductory psychology course.

A survey of the important methods, findings, and theories in the field of personality research.

PSYC UN2620 Abnormal Behavior. 3 points.

Prerequisites: An introductory psychology course.

Examines definitions, theories, and treatments of abnormal behavior.

Fall 2020: PSYC UN2620

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2620	001/10095	T Th 6:10pm - 7:25pm Online Only	E'mett McCaskill	3	248/200

PSYC UN2630 Social Psychology. 3 points.

Surveys important methods, findings, and theories in the study of social influences on behavior. Emphasizes different perspectives on the relation between individuals and society.

Fall 2020: PSYC UN2630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2630	001/10096	T Th 2:40pm - 3:55pm Online Only	Tory Higgins	3	111/150

PSYC UN2640 INTRO TO SOCIAL COGNITION. 3.00 points.

Prerequisites: an introductory course in psychology or the instructor's permission.

Prerequisite: An introductory psychology course. An introduction to basic concepts in social cognition, an approach to understanding social judgment and behavior by investigating the underlying mental processes. Topics include attitudes, identity, and prejudice, among others

PSYC UN2650 Introduction to Cultural Psychology. 3 points.

Prerequisites: none; some basic knowledge of social psychology is desirable.

A comprehensive examination of how culture and diversity shape psychological processes. The class will explore psychological and political underpinnings of culture and diversity, emphasizing social psychological approaches. Topics include culture and social cognition, group and identity formation, psychology of multiculturalism, stereotyping, prejudice, and gender. Applications to real-world phenomena discussed.

Spring 2021: PSYC UN2650

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2650	001/10984	M W 10:10am - 11:25am 301 Pupin Laboratories	Valerie Purdie-Greenaway	3	100/135

PSYC UN2670 Social Development. 3 points.

Prerequisites: PSYC UN1001 or PSYC UN1010, or the equivalent.

This lecture course introduces students to the study of typical human social development with a particular focus on genetic, familial and peer influences on the development of social behaviors during early childhood.

PSYC UN2690 Frontiers of Justice. 4.00 points.

Frontiers of Justice is designed to encourage students and equip them with the skills to become active and effective "Change Agents" within their academic institutions and larger

communities. Oriented by the question, What does justice look like?, this course aims to raise political and social awareness and engagement with the challenges facing New York City and strengthen ties between Columbia University, disadvantaged communities, and city government agencies and community organizations. Through sharing ideas about how to make structural and systemic change in ways that integrate science, law, politics, history, narrative and community engagement, the course is intended to support students in working to break down racial and ethnic barriers and toward a more fair and just society

Spring 2021: PSYC UN2690

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2690	001/14310	M W 6:10pm - 7:25pm Online Only	Geraldine Downey, Ayanna Sorett	4.00	66/100

PSYC UN3270 Computational Approaches to Human Vision (Seminar). 3 points.

This course will be offered in Fall 2016.

Prerequisites: some background in psychology and/or neurophysiology (e.g., PSYC UN1001, PSYC UN1010, PSYC UN2230, PSYC UN2450; BIOL UN3004 or BIOL UN3005) is desirable. See instructor if you have questions about your background. Some background in mathematics and computer science (e.g., calculus or linear algebra, a programming language) is highly recommended.

Study of human vision--both behavioral and physiological data--within a framework of computational and mathematical descriptions. Please contact Prof. Graham by e-mail (nvg1@columbia.edu) if you are interested in this course.

Spring 2021: PSYC UN3270

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3270	001/10985		Norma Graham	3	6/12

PSYC UN3280 Seminar In Infant Development. 3 points.

Prerequisites: a course in perception, cognition or developmental psychology, and the instructor's permission. Analysis of human development during the first year of life, with an emphasis on infant perceptual and cognitive development.

PSYC UN3290 Self: A Cognitive Exploration (Seminar). 4 points.

Not offered during 2020-21 academic year.

Prerequisites: PSYC UN1001 or PSYC UN1010, or the equivalent, plus the instructor's permission.

What does it mean to have a sense of self? Is it uniquely human? Taking a cognitive perspective, we will discuss these questions as well as self-reflective and self-monitoring abilities, brain structures relevant to self-processing, and disorders of self. We will also consider the self from evolutionary,

developmental, neuroscience, and psychopathological perspectives.

PSYC UN3445 The Brain & Memory. 4 points.

Prerequisites: (PSYC UN1010) or Equivalent introductory course in neuroscience or cognitive psychology and the instructor's permission

This seminar will give a comprehensive overview of episodic memory research: what neuroimaging studies, patient studies, and animal models have taught us about how the brain creates, stores, and retrieves memories.

PSYC UN3450 EVOL-INTELLIGENC/ CONSCIOUSNESS. 3.00 points.

Prerequisites: PSYC UN1001 or PSYC UN1010, and the instructor's permission.

Prerequisites: PSYC UN1001, and the instructors permission. A systematic review of the evolution language covering the theory of evolution, conditioning theory, animal communication, ape language experiments, infant cognition, preverbal antecedents of language and contemporary theories of language

Fall 2020: PSYC UN3450

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3450	001/10105	T 2:10pm - 4:00pm Online Only	Herbert Terrace	3.00	10/15

Spring 2021: PSYC UN3450

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3450	001/13298	Th 2:10pm - 4:00pm Online Only	Herbert Terrace	3.00	10/12

PSYC UN3481 Critical Periods in Brain Development and Behavior. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Not offered during 2020-21 academic year.

Prerequisites: (PSYC UN1010 or equivalent course in neuroscience or cognitive psychology.

The majority of our mental capacities—ranging from basic sensory functions to more advanced social, emotional and cognitive capabilities—take many years to develop and are highly influenced by environmental signals encountered during particular developmental ‘critical periods’. In this seminar we will explore examples of these periods across diverse brain systems and behaviors, ranging from vision and audition to social, emotional and cognitive development, by considering each example in the context of human brain function and behavior as well as at the level of more detailed neurobiological mechanisms underlying these changes elucidated by studies using non-human animal systems.

Fall 2020: PSYC UN3481

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3481	001/10106	Th 10:10am - 12:00pm Online Only	Sarah Canetta	4	12/15

PSYC UN3496 Neuroscience and Society. 3 points.

Prerequisites: Science of Psychology (PSYC 1001) or Mind, Brain, & Behavior (PSYC 1010), or equivalent introductory psychology course. Students who have not taken one of these courses may also be admitted with instructor permission.

This course investigates the ways in which research in human neuroscience both reflects and informs societal issues. Topics include how neuroscience research is interpreted and applied in areas such as healthcare, education, law, consumer behavior, and public policy.

Fall 2020: PSYC UN3496

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3496	001/10107	W 6:10pm - 8:00pm Online Only	Jenna Reinen	3	14/12

PSYC UN3615 Children at Risk (Lecture). 4 points.

Prerequisites: PSYC UN1010, PSYC UN2280, PSYC UN2620, or PSYC UN2680, and the instructor's permission.

Considers contemporary risk factors in children's lives. The immediate and enduring biological and behavioral impact of risk factors.

PSYC UN3620 Seminar in Developmental Psychopathology. 4 points.

Prerequisites: at least two of the following courses: (UN1001, UN1010, UN2280, UN2620, UN2680, UN3280) and the instructor's permission.

Developmental psychopathology posits that it is development itself that has gone awry when there is psychopathology. As such, it seeks to understand the early and multiple factors contributing to psychopathology emerging in childhood and later in life. We will use several models (e.g., ones dominated by biological, genetic, and psychological foci) to understand the roots of mental illness.

Fall 2020: PSYC UN3620

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3620	001/10110	W 2:10pm - 4:00pm Online Only	Hannah Hoch	4	14/15

PSYC UN3621 Creativity and the Good Life. 4 points.

Prerequisites: PSYC UN1001 or equivalent introductory psychology course

Is it possible to make sense of something as elusive as creativity? Yes, it is. This seminar will review the latest science of creativity, and how creativity is relevant to everyday life, society, and the good life. A wide variety of perspectives within the field will be highlighted, including different theories of the creative process and ways of assessing creativity.

PSYC UN3623 Topics in Clinical Psychology. 4 points.

Prerequisites: (PSYC UN1001) Instructor permission required. A seminar for advanced undergraduate students exploring different areas of clinical psychology. This course will provide you with a broad overview of the endeavors of clinical

psychology, as well as discussion of its current social context, goals, and limitations.

Spring 2021: PSYC UN3623

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3623	001/11459	W 6:10pm - 8:00pm Online Only	Irit Felsen	4	17/19
PSYC 3623	002/11750	W 12:10pm - 2:00pm 253 Engineering Terrace	Hannah Hoch	4	16/16

PSYC UN3624 Adolescent Mental Health: Causes, Correlates, Consequences. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 and Prior coursework in Abnormal Psychology and Research Methods strongly preferred.

Adolescence is a peak period for the onset of mental disorders and suicidal behaviors. The seminar is designed to enhance understanding of topics including, prevalence, etiology, risk factors, mechanisms, prevention and treatment approaches, and ethical considerations related to clinical research.

Spring 2021: PSYC UN3624

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3624	001/10986	T 10:10am - 12:00pm Online Only	Randy Auerbach	4	13/12

PSYC UN3625 Clinical Neuropsychology (Seminar). 3 points.

Prerequisites: an introductory course in neuroscience, like PSYC UN1010 or PSYC UN2450, and the instructor's permission.

Analysis of the assessment of physical and psychiatric diseases impacting the central nervous system, with emphasis on the relationship between neuropathology and cognitive and behavioral deficits.

Spring 2021: PSYC UN3625

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3625	001/12802	T 2:10pm - 4:00pm Online Only	E'mett McCaskill	3	18/18

PSYC UN3661 Happiness Studies Seminar. 3 points.

The aim of the course is to introduce students to the field of happiness studies. Drawing on research from the field of psychology, systems thinking, psychology, neuroscience, and other disciplines, the course explores key components of personal, interpersonal, and societal happiness.

PSYC UN3680 Social Cognitive Neuroscience (Seminar). 3 points.

Not offered during 2020-21 academic year.

Prerequisites: at least two of the following courses: PSYC UN1001, PSYC UN1010, PSYC UN2630, PSYC UN3410,

PSYC UN3480, PSYC UN3485; and the instructor's permission.

An introduction to the emerging interdisciplinary field of social cognitive neuroscience, which examines topics traditionally of interest to social psychologists (including control and automaticity, emotion regulation, person perception, social cooperation) using methods traditionally employed by cognitive neuroscientists (functional neuroimaging, neuropsychological assessment).

PSYC UN3690 The Self in Social Context (Seminar). 4 points.

Prerequisites: PSYC UN1001 or UN1010, or the equivalent, and the instructor's permission.

This course centers on understanding the self embedded in the social context. We will integrate knowledge from various areas of psychology (developmental, cognitive, social cognition) with a main focus in social psychology. This course will provide the opportunity to gain an understanding of research in the following areas: the development of self in a social context, the relationship between the self and the broader socio-cultural context, the impact of self-involvement on social/cognitive processes, and contemporary research on individual differences.

PSYC UN3691 Interpersonal Cognition Seminar: Close Relationships, Identity, and Memory. 4 points.

Prerequisites: PSYC UN2630 or PSYC UN2640 Instructor permission. 1 course in research methods

What makes people 'click'? How does interpersonal closeness develop? How do close relationships influence our thought processes, behaviors, and identities? How do our conversations with relationship partners change our memories of events and our perceptions of reality? And finally, what are the implicit and explicit cognitive mechanisms underlying these processes?

The primary objective of this course will be to provide you with the relevant literature, theoretical background, methodological proficiency, and critical thinking and communication skills to articulate your own answers to these questions, and to propose future studies in the field.

PSYC UN3910 Honors Seminar. 1 point.

Year-long course. Students receive credit only after both terms have been completed. May be repeated for additional credit.

Prerequisites: open to students in the honors program only. Discussion of a variety of topics in psychology, with particular emphasis on recent developments and methodological problems. Students propose and discuss special research topics.

Fall 2020: PSYC UN3910

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3910	001/10219	W 4:10pm - 6:00pm Online Only	Lila Davachi	1	28/20

Spring 2021: PSYC UN3910

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3910	001/10988	W 4:10pm - 6:00pm	Lila Davachi	1	28/30

327 Seeley W.
Mudd Building

PSYC UN3920 Honors Research. 1-4 points.

May be repeated for additional credit.

Prerequisites: open to students in the honors program only. Except by special permission of the director of undergraduate studies, no more than 4 points of individual research may be taken in any one term. This includes both *PSYC UN3950* and *PSYC UN3920*. No more than 12 points of *PSYC UN3920* may be applied toward the honors program in psychology. Special research topics arranged with the instructors of the department leading toward a senior honors paper.

Fall 2020: PSYC UN3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3920	001/10282		Lila Davachi	1-4	27/20

Spring 2021: PSYC UN3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3920	001/10989		Lila Davachi	1-4	27/30

PSYC UN3950 SUPERVISED INDIVIDUAL RESEARCH. 0 points.

1-4 points. May be repeated for credit. Prerequisites: the instructor's permission. Except by special permission of the director of undergraduate studies, no more than 4 points of individual research may be taken in any one term. This includes both *PSYC UN3950* and *PSYC UN3920*. No more than 8 points of *PSYC UN3950* may be applied toward the psychology major, and no more than 4 points toward the concentration. Readings, special laboratory projects, reports, and special seminars on contemporary issues in psychological research and theory

PSYC GU4202 Theories of Change in Human Development. 4.00 points.

What are the agents of developmental change in human childhood? How has the scientific community graduated from nature versus nurture, to nature and nurture? This course offers students an in-depth analysis of the fundamental theories in the study of cognitive and social development

Fall 2020: PSYC GU4202

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202 001/20777		T 10:10am - 12:00pm Online Only	Dima Amso	4.00	8/15

PSYC GU4222 The Cognitive Neuroscience of Aging (Seminar). 4 points.

Prerequisites: courses in introductory psychology and cognitive psychology; and the instructor's permission.

Comprehensive overview of various conceptual and methodologic approaches to studying the cognitive neuroscience of aging. The course will emphasize the importance of combining information from cognitive experimental designs, epidemiologic studies, neuroimaging, and clinical neuropsychological approaches to understand individual differences in both healthy and pathological aging.

PSYC GU4223 Memory and Executive Function Thru the Lifespan. 4 points.

Prerequisites: the instructor's permission, plus PSYC UN1001 or PSYC UN1010, or the equivalent. Optimal preparation will include some background in experimental design and statistics. Memory and executive processing are critical cognitive functions required for successfully navigating everyday life. In lifespan studies, both exhibit relatively long developmental trajectories followed by stasis and then relative decline in old age. Yet, neither memory nor executive function is a unitary construct. Rather, each is comprised of separable components that may show different developmental trajectories and declines or maintenance at older ages. Moreover, memory is malleable and is a reconstruction of past experience, not an exact reproduction. We will discuss a range of topics related to the development, maintenance and potential decline in memory and executive function from infancy through old age.

Spring 2021: PSYC GU4223

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4223	001/11206	W 12:10pm - 2:00pm Online Only	David Friedman	4	7/12

PSYC GU4224 Consciousness and Cognitive Science. 4.00 points.

Our human experience is rich: the thrill of falling in love, the spark of a new idea, the zing of table salt, the sharpness of pain. For thousands of years, philosophers, artists, and religious scholars have tried to explain our subjective experience. More recently, neuroscientists and artificial intelligence experts have contributed to this discussion, weighing in on whether we are “more than meat” (as Descartes famously put it), and whether computers can ever be sentient. In this class, we will begin with the big questions and an interdisciplinary overview of consciousness, then delve into psychology's role. Using literature from perception, memory, emotion, metacognition, attention, and symbolic development, among other areas of psychology, we will see what empirical evidence can tell us about who we are, what we are able to know, and why we even have an experience of the world at all

Spring 2021: PSYC GU4224

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4224	001/12475	W 2:10pm - 4:00pm Online Only	Nora Isacoff	4.00	10/12

PSYC GU4225 Consciousness and Attention (Seminar). 4 points.

Prerequisites: the instructor's permission; some basic knowledge of cognitive science and neuroanatomy is desirable, but not necessary.

Discussion of current issues in the scientific studies of consciousness, including the search for the neural correlates of visual awareness, volition, and the various kinds of impairments of consciousness and attention as described in clinical cases.

Specific topics may vary from year to year. May be repeated for credit.

Spring 2021: PSYC GU4225

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4225	001/11853	T 12:10pm - 2:00pm Online Only	Alfredo Spagna	4	10/12

PSYC GU4229 Attention and Perception. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010) or Equivalent introductory course in neuroscience or cognitive psychology
This seminar aims to provide an in-depth overview of neuroscientific knowledge regarding two critical cognitive functions: attention and perception. For each topic, results from behavioral studies are combined with those from recent neurocognitive approaches – primarily neuropsychological and functional brain imaging studies – that reveal the underlying neural networks and brain mechanisms.

Fall 2020: PSYC GU4229

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4229	001/10217	T 12:10pm - 2:00pm Online Only	Alfredo Spagna	4	6/15

PSYC GU4232 Production and Perception of Language. 4 points.

Prerequisites: two courses in Psychology and the instructor's permission.

Topics include phonetic expression, motoric and perceptual organization, speech codes and memory codes, spoken word recognition, phrase formation, and the effects of context in perception and production.

PSYC G4230 Sensation and Perception (Seminar). 3 points. Not offered during 2020-21 academic year.

Prerequisites: the instructor's permission; some background in perception is required.

Topics on the perception of space. Discussions, reviews, and recent literature.

PSYC GU4235 Special Topics in Vision (Seminar). 3 points.

This course will be offered in Fall 2016. May be repeated for additional credit.

Prerequisites: the instructor's permission. Please contact Prof. Graham by e-mail (nvg1@columbia.edu) if you are interested in this course.

TBD

Spring 2021: PSYC GU4235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4235	001/10990		Norma Graham	3	4/12

PSYC GU4236 Machine Intelligence. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

This course will survey historical and modern developments in machine intelligence from fields such as psychology, neuroscience, and computer science, and from intellectual movements such as cybernetics, artificial intelligence, neural networks, connectionism, machine learning, and deep learning. The emphasis is on the conceptual understanding of topics. The course does not include, nor require background in, computer programming and statistics. A crucial aspect of the seminar is for students to become informed consumers of applications of artificial intelligence.

Fall 2020: PSYC GU4236

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4236	001/13455	W 6:10pm - 8:00pm Online Only	Trenton Jerde	4	14/15

PSYC GU4239 Cognitive neuroscience of narrative and film. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010 or Equivalent introductory course in neuroscience or cognitive psychology)
This seminar will provide a broad survey of how narrative stories, films, and performances have been used as tools to study cognition in psychology and neuroscience.

Fall 2020: PSYC GU4239

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4239	001/10100	M 10:10am - 12:00pm Online Only	Christopher Baldassano	3	13/15
PSYC 4239	002/10101	M 2:10pm - 4:00pm Online Only	Christopher Baldassano	3	16/15

PSYC GU4242 Evolution of Language (Seminar). 3 points. Not offered during 2020-21 academic year.

Prerequisites: PSYC UN1001 or
This seminar will consider the evolution of language at the levels of the word and grammar, in each instance, phylogenetically and ontogenetically. Since humans are the only species that use language, attention will be paid to how language differs from animal communication.

Spring 2021: PSYC GU4242

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4242	001/10991	T 2:10pm - 4:00pm Online Only	Herbert Terrace	3	12/12

PSYC GU4244 Language and Mind. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 and Preferably, an additional course in psychology, focusing on cognition, development, or research methods. Instructor permission required.
This seminar explores the relationship between language and thought by investigating how language is mentally represented and processed; how various aspects of language interact with

each other; and how language interacts with other aspects of cognition including perception, concepts, world knowledge, and memory. Students will examine how empirical data at the linguistic, psychological, and neuroscientific levels can bear on some of the biggest questions in the philosophy of mind and language and in psychology.

Fall 2020: PSYC GU4244

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4244	001/10103	W 2:10pm - 4:00pm Online Only	Nora Isacoff	4	12/15

PSYC GU4250 Evolution of Intelligence, Cognition, and Language (Seminar). 3 points.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the equivalent, based on instructor assessment, plus one of the instructors' permission.

How did language evolve and why are human beings the only species to use language? How did the evolution of social intelligence, in particular, cooperation, set the stage for the origin of language and consciousness? We will explore how psychologists, philosophers, neuroscientists, anthropologists, biologists and computational scientists, among others, have collaborated during recent years to produce important insights in the evolution of intelligence, consciousness and language.

PSYC GU4265 Auditory Perception. 4 points.

Prerequisites: PSYC UN1010 PSYC UN1010 or equivalent; background in statistics/research methods recommended
How does the human brain make sense of the acoustic world? What aspects of auditory perception do humans share with other animals? How does the brain perform the computations necessary for skills such as sound localization? How do we focus our auditory attention on one voice in a crowd? What acoustic cues are important for speech perception? How is music perceived? These are the types of questions we will address by studying the basics of auditory perception from textbook readings and reviews, and reading classic and current literature to understand scientific progress in the field today.

PSYC GU4270 COGNITIVE PROCESSES. 3.00 points.

Prerequisites: For undergraduates: one course in cognitive psychology or cognitive neuroscience, or the equivalent, and the instructor's permission.

Prerequisites: For undergraduates: one course in cognitive psychology or cognitive neuroscience, or the equivalent, and the instructors permission. Metacognition and control processes in human cognition. Basic issues include the cognitive mechanisms that enable people to monitor what they know and predict what they will know, the errors and biases involved in self-monitoring, and the implications of metacognitive ability for peoples self-determined learning, behavior, and their understanding of self

Spring 2021: PSYC GU4270

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 4270 001/10992 W 2:10pm - 4:00pm Lisa Son 3.00 19/35
Online Only

PSYC GU4280 Core Knowledge (Seminar). 4 points.

Prerequisites: For undergraduates: courses in introductory psychology, cognitive or developmental psychology, and the instructor's permission.

Core Knowledge explores the origins and development of knowledge in infants and children, with an additional emphasis on evolutionary cognition. In this course, we will examine evidence from cognitive psychology, developmental psychology, comparative psychology, neuroscience, and linguistics to look at the child's conception of objects, number, space, language, agency, morality and the social world. We will look at which aspects of knowledge are uniquely human, which are shared with other animals, and how this knowledge changes as children develop.

Fall 2020: PSYC GU4280

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4280	001/13747	W 12:10pm - 2:00pm Online Only	Koleen McCrink	4	14/15

PSYC GU4281 The Psychology of Curiosity. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or equivalent introductory psychology course

What is curiosity and how do we study it? How does curiosity facilitate learning? This course will explore the various conceptual and methodological approaches to studying curiosity and curiosity-driven learning, including animal and human studies of brain and behavior.

PSYC GU4282 The Neurobiology and Psychology of Play. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Play is a highly rewarding activity that is considered critical to cognitive, social, and emotional development. How do we define play and how do we study it? How does play help humans and other animals learn about their world and prepare them for adulthood? This course will examine the latest developments in the field of play from various methodological approaches to understand the relationship between play, learning, and normative development.

Fall 2020: PSYC GU4282

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4282	001/14386	Th 12:10pm - 2:00pm Online Only	Melanie Pincus	4	13/15

PSYC GU4287 Decision Architecture. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN2235) or an equivalent course on judgment and decision making ,AND the instructor's permission

This course reviews current research in the domain of decision architecture: the application of research in cognitive and social psychology to real-world situations with the aim of influencing behavior. This seminar will discuss recent and classic studies, both of decision theory and of applied decision research, to explore the effectiveness—as well as the limitations—of a selection of these behavioral “nudges.”

Spring 2021: PSYC GU4287

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4287	001/10994	W 10:10am - 12:00pm Online Only	Katherine Fox-Glassman	4	13/12

PSYC GU4289 THE GAMES PEOPLE PLAY:PSYCH OF STRAT DEC. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN2235) or equivalent course on judgment and decision-making

Prerequisites: (PSYC UN2235) or equivalent course on judgment and decision-making A seminar course exploring strategic decision making (also known as behavioral game theory). This course examines the psychology underlying situations in which outcomes are determined by choices made by multiple decision makers. The prime objective will be to examine the use of experimental games to test psychological theories

PSYC GU4420 Animal Cognition (Seminar). 3 points.

Prerequisites: For undergraduates: the instructor's permission. Seminar concerning a nonverbal animal's use of internal representations of past experience as a basis for action. Topics include how representations are formed, what aspects of experience are encoded, how information is stored, and how it is used later to guide behavior.

PSYC GU4430 Learning and the Brain (Seminar). 4 points.

Prerequisites: courses in introductory psychology and/or neuroscience, and the instructor's permission. What are the neural mechanisms that support learning, memory, and choices? We will review current theories in the cognitive neuroscience of human learning, discuss how learning and decision making interact, and consider the strengths and weaknesses of two influential methods in the study of human brain and behavior--functional imaging and patient studies.

PSYC GU4435 Non-Mnemonic Functions of Memory Systems. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010) or equivalent introductory course in neuroscience or cognitive psychology The past decade has produced an extraordinary amount of evidence that challenges the classic view of a “medial temporal lobe memory system”, namely, the idea that the medial temporal lobe plays a necessary role in long-term memory but not other cognitive functions. This course will introduce these challenges to the traditional perspective by exploring functions

of the so-called memory system in domains outside of long-term memory.

PSYC GU4440 TOPICS-NEUROBIOLOGY & BEH. 3 points.

Course overview: Research on autism spectrum disorder, or ASD, is highly multi-disciplinary, because it is a behaviorally defined disorder known to depend strongly on genetics. We will explore the nature of ASD by examining studies in genetics, epidemiology, neurobiology and behavior. We will examine the results from neurobiological experiments on animal models of ASD at the behavioral, systems, cellular, molecular and genetic levels. Questions to be considered will include: Is ASD really a single disorder? Which theories of ASD causation are the most compelling? Has there really been a rise in ASD prevalence? What makes a good animal model of ASD? Can neurobiological experiments on animals lead to treatments for ASD? Can any oddities of animal behaviors be considered directly analogous to those comprising a human behavioral disorder? Will the future bring "personalized medicine" with dedicated animal or human stem cell models for every person with ASD? What types of environmental insult contribute to ASD? What are the links between the immune and nervous systems in ASD? How do current behavioral findings from people with ASD direct neurobiological research?

Spring 2021: PSYC GU4440

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4440	001/11210	M 2:10pm - 4:00pm Online Only	Yunglin Gazes	3	9/12

PSYC GU4470 Psychology & Neuropsychology of Language (Seminar). 4 points.

Prerequisites: the instructor's permission. A course in the psychology of language or linguistics is highly recommended. This seminar surveys current theories of language production. We will examine psycholinguistic and neuroimaging studies of word and sentence production conducted with monolingual and bilingual speakers, and individuals with acquired language impairments.

Spring 2021: PSYC GU4470

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4470	001/10995	T 4:10pm - 6:00pm 310 Fayerweather	Michele Miozzo	4	12/12

PSYC GU4480 Psychobiology of Infant Development (Seminar). 4 points.

Prerequisites: (PSYC UN1001 or PSYC UN1010) and a course in developmental psychology, and the instructor's permission. The focus of the seminar is on human development during the fetal period and early infancy. We will examine the effects of environmental factors on perinatal perceptual, cognitive, sensory-motor, and neurobehavioral capacities, with emphasis on critical conditions involved in both normal and abnormal brain development. Other topics include acute and long term effects of toxic exposures (stress, smoking, and alcohol) during

pregnancy, and interaction of genes and the environment in shaping the developing brain of "high-risk" infants, including premature infants and those at risk for neurodevelopmental disorders such as Sudden Infant Death Syndrome.

Spring 2021: PSYC GU4480

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4480	001/11207	T 4:10pm - 6:00pm Online Only	William Fifer	4	13/12

PSYC GU4482 Neural Plasticity. 4 points.

This seminar provides an overview of the mechanisms and behaviors associated with neural plasticity. Students will obtain a basic working knowledge of the different types of neural plasticity, and how these affect cognition and behaviors.

Spring 2021: PSYC GU4482

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4482	001/10996	W 10:10am - 12:00pm Online Only	Tina Kao	4	9/12

PSYC GU4486 Developmental and Affective Neuroscience (Seminar). 4 points.

Prerequisites: courses in developmental psychology, and either research methods or affective neuroscience, and the instructor's permission.

Introduction to leading theoretical perspectives employed by developmental psychologists in the study of affective neuroscience. Exploration of the developmental brain and behavior relationships in humans and animal models of typical and atypical emotional behavior, with a critical reading of recent research findings in the field.

PSYC GU4490 Inheritance (Seminar). 4 points.

Prerequisites: basic knowledge of biology and neuroscience recommended; the instructor's permission required.

Explores the concept of inheritance and the mechanisms through which inheritance is mediated. Will focus on the generational transmission of physiology and behavior, but will also consider the inheritance of culture and language.

PSYC GU4493 Stress and the Brain. 4.00 points.

This course will use clinical studies and experimental research on animals to understand the impact of stress during various periods of development on brain function and behavior. We will address the long- and short-term consequences of stress on cognition, emotion, and ultimately psychopathology through investigating how various stressors can induce neurobiological and behavioral outcomes through genetic, epigenetic, and molecular mechanisms in the brain

Spring 2021: PSYC GU4493

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4493	001/12474	F 2:10pm - 4:00pm Online Only	Jennifer Blaze	4.00	11/12

PSYC GU4498 Behavioral Epigenetics. 4 points.

Prerequisites: basic background in neurobiology (for instance PSYC UN1010, UN2450, UN2460, UN2480, and GU4499) and the instructor's permission.

This course will provide an overview of the field of epigenetics, with an emphasis on epigenetic phenomena related to neurodevelopment, behavior and mental disorders. We will explore how epigenetic mechanisms can be mediators of environmental exposures and, as such, contribute to psychopathology throughout the life course. We will also discuss the implications of behavioral epigenetic research for the development of substantially novel pharmacotherapeutic approaches and preventive measures in psychiatry.

Fall 2020: PSYC GU4498

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4498	001/10109	F 2:10pm - 4:00pm Online Only	Jennifer Blaze	4	14/15

PSYC GU4612 Frontiers of Justice. 4.00 points.

Frontiers of Justice is designed to encourage students and equip them with the skills to become active and effective "Change Agents" within their academic institutions and larger communities.. Oriented by the question, What does justice look like?, this course aims to raise political and social awareness and engagement with the challenges facing New York City and strengthen ties between Columbia University, disadvantaged communities, and city government agencies and community organizations. Through sharing ideas about how to make structural and systemic change in ways that integrate science, law, politics, history, narrative and community engagement, the course is intended to support students in working to break down racial and ethnic barriers and toward a more fair and just society

Fall 2020: PSYC GU4612

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4612	001/21573	M 6:10pm - 8:00pm 200b Schermerhorn Hall	Geraldine Downey, Ayanna Sorett	4.00	21/21

PSYC GU4615 The Psychology of Culture and Diversity (Seminar). 4 points.

Prerequisites: the instructor's permission; some basic knowledge of social psychology is desirable.

A comprehensive examination of how culture and diversity shape psychological processes. The class will explore psychological and political underpinnings of culture and diversity, emphasizing social psychological approaches. Topics include culture and self, culture and social cognition, group and identity formation, science of diversity, stereotyping, prejudice, and gender. Applications to real-world phenomena discussed.

Fall 2020: PSYC GU4615

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 4615	001/10112	W 10:10am - 12:00pm Online Only	Valerie Purdie-Greenaway	4	13/15
PSYC 4615	002/10113	W 2:10pm - 4:00pm Online Only	Valerie Purdie-Greenaway	4	11/15

PSYC GU4627 Seminar in Anxiety, Obsessive-Compulsive, and Related Disorders. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or Equivalent introductory course AND PSYC UN2620 Abnormal Psychology or equivalent course in abnormal psychology strongly preferred.

This seminar course will focus on the etiology and phenomenology of anxiety disorders, obsessive-compulsive disorder (OCD), and OCD-related disorders, as well as their evidence-based treatments

PSYC GU4630 Advanced Seminar in Current Personality Theory and Research (Seminar). 3 points.

Open to psychology graduate students and advanced undergraduate psychology majors.

Prerequisites: the instructor's permission.

Critical review and analysis of basic and enduring issues in personality theory, assessment, and research.

Spring 2021: PSYC GU4630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4630	001/13308	M 10:10am - 12:00pm Online Only	Svetlana Komissarouk	3	10/12

PSYC GU4635 The Unconscious Mind (Seminar). 4 points.

Prerequisites: the instructor's permission; some basic knowledge of social psychology is desirable.

Discussion of the unconscious mind from the perspective of social cognition, with an emphasis on both theoretical and empirical background, as well as current issues in measuring automatic processing. Topics include: implicit memory systems; unconscious attitudes, goals and behavior, emotions, and decision making; the activation and deactivation of knowledge systems; and priming.

PSYC GU4645 Culture, Motivation, and Prosocial Behavior. 4 points.

Prerequisites: Some knowledge of Research Methods, Statistics, and Social Psychology, plus Instructor's Permission.

Reviews and integrates current research on three important topics of social psychology: culture, motivation, and prosocial behavior. Discussions and readings will cover theoretical principles, methodological approaches, and the intersection of these three topics. Students will write a personal research proposal based on the theories presented during the seminar.

Fall 2020: PSYC GU4645

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 4645 001/10829 M 10:10am - 12:00pm Svetlana Komissarouk 4 14/15
Online Only

PSYC GU4670 Theories in Social and Personality Psychology (Seminar). 3 points.

Prerequisites: the instructor's permission.

Comparison of major theoretical perspectives on social behavior. The nature of theory construction and theory testing in psychology generally. Exercises comparing the predictions of different theories for the same study are designed to acquire an appreciation of how to operationalize theories and an understanding of the various features of a good theory.

PSYC GU4672 Moral Psychology. 4 points.

Prerequisites: Two courses in psychology, including at least one course with a focus on social and/or developmental psychology, and permission of the instructor.

Review of theories and current research on moral cognition and behavior. Topics include definitions of morality, the development of moral cognition, the role that other aspects of human experience (e.g., emotion, intentions) play in moral judgments, and the relationship between moral psychology and other areas of study (e.g., religious cognition, prejudice and stereotyping, the criminal justice system).

Fall 2020: PSYC GU4672

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4672	001/10115	T 10:10am - 12:00pm Online Only	Larisa Heiphetz	4	12/12

PSYC GU4673 Political Psychology. 4 points.

This seminar will explore what psychology (mostly social and cognitive) can tell us about politics. The class aims to provide a broad introduction to ideas and methods in the field of political psychology, as well as a deep understanding of a few specific topics.

PSYC GU4682 FAQs about Life: Applications of Psychological Research to Everyday Experiences. 4 points.

Prerequisites: Two courses in psychology, with at least one focusing on statistics and/or research methods in psychology, and permission of the instructor.

Review of basic psychological research that is relevant to questions people frequently encounter during the course of everyday life. Potential topics for this seminar include research on decision-making, emotion, and/or interpersonal relationships.

Fall 2020: PSYC GU4682

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4682	001/10116	T 2:10pm - 4:00pm Online Only	Larisa Heiphetz	4	11/12

PSYC GU4685 Social Cognitive Neuroscience (Seminar). 3 points.

Prerequisites: for graduate students, course equivalents of at least two of the following courses: PSYC UN1001, PSYC

UN1010, PSYC UN2630, PSYC UN3410, PSYC UN3480, and PSYC UN3485; and/or the instructor's permission.

An introduction to the emerging interdisciplinary field of social cognitive neuroscience, which examines topics traditionally of interest to social psychologists (including control and automaticity, emotion regulation, person perception, social cooperation) using methods traditionally employed by cognitive neuroscientists (functional neuroimaging, neuropsychological assessment).

Spring 2021: PSYC GU4685

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4685	001/17229	F 12:10pm - 2:00pm 200b Schermerhorn Hall	Kevin Ochsner	3	12/12

PSYC GU4686 Barriers and Levers for Behavior Change. 4 points.

Prerequisites: (PSYC UN1001 or PSYC UN1010) and prior coursework in research methods/statistics. A prior course related to social, applied, and cultural psychology or decision making will also be helpful.

Seminar course exploring individual, social, and cultural barriers and levers for behavior change, with a focus on social issues, such as motivating pro-environmental action, encouraging positive health behavior change, and promoting charitable giving.

PSYC GU4690 Social Factors and Psychopathology (Seminar). 3 points.

Prerequisites: the instructor's permission.

Reviews and integrates current research on the role of social factors in psychopathology. The immediate and long-term effects of chronic and traumatic stressors originating outside the family (e.g., natural disasters, chronic poverty) and inside the family (e.g., family violence, divorce, parental psychopathology) on psychopathology.

PSYC GU4695 Psychology of Close Relationships (Seminar). 3 points.

Prerequisites: Research Methods, statistics, social psychology, and the instructor's permission.

Introduction to leading theoretical perspectives employed by social psychologists in the study of close romantic relationships. Exploration of relationship-relevant constructs (e.g., love, commitment, intimacy, breakups) through the lenses offered by these different theories, and with a critical reading of recent research findings in this field.

PSYC GU4880 In Service of Equity: Examining Developmental Science through the Lens of Policy. 4.00 points.

Urie Bronfenbrenner (1974) wrote, "We have now come the full circle and returned to our starting point—issues of social policy as points of departure for the identification of significant theoretical and scientific questions concerning the development of the human organism as a function of interaction with its enduring environment—both actual and potential." This course

is designed to examine emotional and cognitive development through the lens of existing financial, social, and educational policies. We will examine the influence - on child development - of inequities in education, household socioeconomic status and poverty, neighborhood socioeconomic status and poverty, access to prenatal care, parental incarceration rates, and systemic racism

Spring 2021: PSYC GU4880

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4880	001/12480	T 10:10am - 12:00pm Online Only	Dima Amso	4.00	13/12

PSYC GU4930 Fundamentals of Human Brain Imaging: from theory to practice. 4 points.

CC/GS: Partial Fulfillment of Science Requirement

Fundamentals of human brain imaging is a new advanced course open to undergraduates students from the Psychology, Neuroscience, Engineering, and Statistics Departments, that traces the key steps of the recent “neuroimaging revolution”, and introduces the various methodologies and associated analytic approaches that are now available in the field of cognitive neuroscience. Specifically, the course develops around three main questions, currently under-represented in our undergraduate curriculum: 1) What is the advantage to study human cognition using correlational methodologies (e.g., EEG, MEG, fMRI)? 2) Which is the particular contribution of each method in the understanding of brain/behavior relationship? 3) Which are the most common ways to approach the analyze the neuroimaging data? By promoting an inclusive environment and implementing active learning strategies, this course stimulates critical thinking and fosters collaboration among students from different departments.

REGIONAL STUDIES

EAST CENTRAL EUROPEAN CENTER

<http://ece.columbia.edu/>

Director: Prof. Alan Timberlake, 1228 International Affairs Building; 212-854-8488; at2205@columbia.edu

Related Departments: Anthropology, Economics, History, Political Science, Slavic Languages and Literatures, and Sociology.

Language Requirement: Two years or demonstrated reading knowledge of one of the following languages: Czech, Hungarian, Polish, Romanian, Russian, Bosnian/Croatian/Serbian, or Ukrainian.

The regional studies major is designed to give undergraduates the general mastery of a discipline and at the same time permit them to do specialized work in the history and cultures of a particular geographic area through the associated institutes of the Faculty of Arts and Sciences. It is an interdisciplinary major

in which students divide their work between the associated institute and an appropriate academic department. Students plan their programs with the consultant of the associated institute they have selected.

MAJOR IN REGIONAL STUDIES

The major in regional studies requires a minimum of 36 points, of which 18 must be credited by the associated institute, i.e. East Central European Center, and an additional 18 must be in one of the College departments designated as relevant by the institute. Six points of seminar work approved by the institute are required of all majors and are included in the total of 36 points.

Language Study

Courses taken to satisfy the institute’s language requirement are not counted toward the 18 institute points.

A current list of courses available to students interested in East Central European studies can be obtained from the [Center](#), 1228 International Affairs Building.

RELIGION

Departmental Office: Room 103, 80 Claremont; 212-851-4122

<http://www.columbia.edu/cu/religion>

Director of Undergraduate Studies: Professor Courtney Bender, 80 Claremont; 212-851-4134; cb337@columbia.edu

The Religion Department's curriculum is designed to engage students in critical, comparative, and interdisciplinary exploration of religious life. The faculty's research and teaching build upon the shared understandings that religion continues to be a central and influential component of human life, society, and politics—and that, furthermore, religious transmission and authority are constantly being shaped in dynamic interactions with other religious traditions, societies, and cultures. Courses and seminars in religion teach students how to analyze and investigate religious texts, histories, beliefs, bodies, and communities using a variety of disciplinary and methodological approaches.

Students are also encouraged to conduct their studies by exploring one or more zone of inquiry. These are focus areas that integrated in the departmental curriculum and complement the tradition-based approaches. They provide broad and alternative frames that aim to identify problems, chart trajectories cutting across different field specialties, and set parameters for theoretical and methodological questions. The zones are: *Time* (History, Modernity), *Transmission* (Tradition, Memory, Institutions), *Space* (Place, Geography, Virtual Space), *Body* (Materiality, Mind, Bio-ethics), and *Media* (Transportation, Information, Communication).

Majors and concentrators in religion gain both a foundation in the study of religious traditions in historical contexts and zones of inquiry, all grounded in theoretical and methodological debates that shape academic and public discussions about religion. Lecture courses, seminars, and colloquia are designed to balance students' growing understanding of particular religious topics, dynamics, and traditions with intensive engagement with critical theoretical, political, and philosophical debates. Students are encouraged to pursue a course of study in which they develop breadth and depth, as well as the tools and expertise to pose (and even answer) necessary questions about religious phenomena of the past or present.

As the study of religion is truly interdisciplinary, students find their work in the department enhanced by their coursework in the College's Core curriculum and in related departments. Many religion courses are listed in the College's Global Core requirement, and numerous religious works are central texts in Literature Humanities and Contemporary Civilization. Majors and concentrators are required to take courses outside of religion in related fields to expand their vision of approaches to religion.

In addition, the University's wide offerings in the languages of various religious traditions (including Arabic, Chinese, Greek, Hebrew, Japanese, Persian, Latin, Sanskrit, and Tibetan) augment many students' abilities to conduct research in religion. Students likewise are actively encouraged to explore the world-renowned archival resources within Columbia's libraries (including the Rare Book and Manuscript Room, the Burke Library at Union Theological Seminary, the C.V. Starr East Asian Library), and to explore and investigate the equally wide range of living religious communities represented in New York's global neighborhoods.

Prospective majors should first arrange to meet with the Director of Undergraduate Studies. All students are then allocated a faculty adviser, and must submit a copy of the Declaration of Major form to the director of undergraduate studies. After agreeing upon a plan for the major or concentration, students must obtain final approval and confirmation from the Director of Undergraduate Studies.

GUIDELINES FOR ALL RELIGION MAJORS AND CONCENTRATORS

Major in Religion

All majors are encouraged to pursue both depth and breadth by constructing a program of study in consultation with the Director of Undergraduate Studies. The program should include courses in a variety of religious traditions. Students who write a senior thesis may include a term of individually supervised research as one of the courses for their major.

Courses

For the major the following 9 courses are required:

- 1 gateway course (1000 level)
- 2 introductory courses (2000 level)
- 2 intermediate courses (3000 level)
- 2 seminars (4000 level)
- 1 additional course at any level
- RELI UN3199 Theory (formerly Juniors Colloquium)

Concentration in Religion

To be planned in consultation with the Director of Undergraduate Studies and with a member of the faculty in an area in which the student has a particular interest. The program should include some study in a breadth of religious traditions.

Courses

For the concentration the following 7 courses are required:

- 1 gateway course (1000 level)
- 2 introductory courses (2000 level)
- 2 intermediate courses (3000 level)
- 1 seminar (4000 level)
- RELI UN3199 Theory

DEPARTMENTAL HONORS

Students who write a senior thesis and maintain a GPA of 3.66 or above in the major may be considered for departmental honors. Writing a senior thesis qualifies a student for consideration for departmental honors but does not assure it. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

COURSE NUMBERING

Courses are numbered by level and type:

- 1000-level: Gateway lecture course
- 2000-level: Introductory and "traditions" lectures
- 3000-level: Intermediate lecture
- 4000-level: Seminar

and Zone:

- x100-199: Theory (RELI UN3199)
- x200-299: Time (zone)
- x300-399: Transmission (zone)
- x400-499: Space (zone)
- x500-599: Body (zone)
- x600-699: Media (zone)

GUIDELINES FOR ALL RELIGION MAJORS AND CONCENTRATORS

Senior Thesis

Many students choose to write a senior honors thesis in order to pursue an advanced topic in greater depth, or to work on a particular area of interest with one of their professors. This opportunity is available to all students who major in the department, regardless of GPA, and serves for many as their undergraduate capstone experience.

Students who write a senior thesis may apply for up to 3 points of directed reading with their thesis adviser. The deadline for application for the honors thesis in religion is the last day of exams in the student's junior spring term, and must be submitted for approval to the director of undergraduate studies. The application must include both a prospectus for the paper and a letter of support by the faculty member who has agreed to direct the thesis. The prospectus (5-7 pages) should detail a research program and the central question(s) to be pursued

in the paper, preparation for the thesis, and a timeline. The primary adviser of the thesis must be a member of the Religion Department faculty.

Many students find that identifying a thesis project earlier in the junior year, in conjunction with the Juniors colloquium, presents an opportunity to develop a proposal in advance of deadlines for summer research funding from various sources, including the undergraduate schools and the Institute for Religion Culture and Public Life.

Grading

Courses in which a grade of D has been received do not count toward the major or concentration requirements.

MAJOR IN RELIGION

All majors are encouraged to pursue both depth and breadth by constructing a program of study in consultation with the Director of Undergraduate Studies and with a member of the faculty in an area in which they have particular interest. The program should include courses in a variety of religious traditions. Students who write a senior thesis may include a term of individually supervised research as one of the courses for their major.

For the major the following 9 courses are required::

- 1 gateway course (1000 level)
- 2 introductory courses (2000 level)
- 2 intermediate courses (3000 level)
- 2 seminars (4000 level)
- 1 additional course at any level
- RELI UN3199 Theory (formerly Juniors Colloquium)

CONCENTRATION IN RELIGION

To be planned in consultation with the Director of Undergraduate Studies and with a member of the faculty in an area in which the student has a particular interest. The program should include some study in a breadth of religious traditions.

For the concentration the following 7 courses are required:

- 1 gateway course (1000 level)
- 2 introductory courses (2000 level)
- 2 intermediate courses (3000 level)
- 1 seminar (4000 level)
- RELI UN3199 Theory

SPRING 2021

RELI UN1320 Losing My Religion. 3.00 points.

The R.E.M. lead singer Michael Stipe explained that the phrase “losing my religion” in the song of the same title does not refer to what we might commonly understand by “religion.” Rather it cites the expression used in the Southern U.S. for losing

one's temper, feeling frustrated, exasperated, and desperate. The loss present in John Legend and Common's song "Glory" from the movie *Selma* are the lives lost to the unattenuated history of racist violence and in the struggle against structural white supremacy. In this context, for Blacks "freedom is like religion." Like religion. Even if the song does not shy away from Christian theological tropes, "religion" here too remains elusive. Living through a major global pandemic as we are (although arguably, racism and capitalism are also ongoing—albeit mostly unacknowledged—global pandemics), we are witnessing the losses attributable to Covid-19 precipitating changing practices and rituals of marking losses, mourning, and building community in the present. Apart from impacting practices that we generally term "religious," loss and living with losses also reveal what may have been our individual and collective "religion" lost and what may emerge as the "religions" we hew to newly or nonetheless. In this course we will explore how various meanings of "religion" might offer us conceptual tools for thinking about loss, community, and damaged life. We will examine how religious practices change in relation to losses and reflect on losses of religion both personally (e.g., because one's hitherto familiar value system breaks down) and collectively (e.g., the forced conversions and suppression of religious traditions by colonialism). We will track how loss and rituals surrounding loss can change how history, time, space, and meaning are experienced. We will ask what if anything comes after or alongside loss, especially given the perdurance of loss that is brought about by centuries of systemic violence. Given the circumstances of our moment, we will also take time to reflect on the (hopefully only temporary) loss of face-to-face communal learning in a shared classroom and what new rituals of virtual learning mean for building communities and relating to others and the world. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and to challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to loss, damaged life, community, complicated and violent pasts, the precarity of the present, vanishing futures and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should experience this course as enlarging the set of critical tools at their disposal for creative and rigorous thinking

MDES UN2004 Conflicts: Race, Region, Religion. 4.00 points.

Prior to "conflict resolution," there is conflict. But what is conflict and how do we understand it? This introductory lecture course proposes to explore established objects in their presumed ties to the fact and concept of "conflict." We will inquire into the nature of conflict as well as into the kinds of conflicts that

operate, or seem to operate, perhaps even to structure, the understanding of race, of region, and of religion. We will attend to the solidity and fragility of geographic divisions (regional and trans regional conflicts), their history (modern / premodern, colonial / pre- and post-colonial), the emergence of race (racial and ethnic conflicts), the pertinence of religions (religious strife and violence), their relation to political associations (religion and politics, religion and nationalism) and to other social and/or economic divisions (class, gender). We will interrogate the analytic and descriptive value of keywords like war, enmity, dispute, division, partition. We will also reflect on disciplinary tensions and divisions toward an understanding and perpetuation of conflict. Finally, we will think about the possibility and impossibility of "speaking with the enemy."

RELI UN2309 Hinduism. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Considers efforts since 1900 to synthesize a coherent understanding of what "Hinduism" entails, sometimes under the heading of *sanatana dharma*. Using a rubric provided by the *Bhagavad Gita*, explores philosophical/theological (*jnana*), ritual (*karma*), and devotional (*bhakti*) aspects of Hindu life and thought.

RELI UN2335 RELI IN BLACK AMERICA:AN INTRO. 4.00 points.

Religion has been a complicated and contested, yet central, organizing force in the making of black life in the America. At the same time, African American religious life has been the subject of much scrutiny throughout the history of the United States, serving arguments that advocated abolition, emancipation and full enfranchisement, but also functioning as evidence to justify enslavement and second-class citizenship. To better understand such phenomena, this course provides a chronological survey that introduces students to a range of ideas and practices, individuals and institutions, as well as important themes and topics in African American (thus American) religious history. Primary attention is given to Afro-Protestantism in the United States; however, throughout the course attention is directed to religious diversity and varying religious traditions/practices in different diasporic locales. By

the end of the semester students will be expected to possess a working knowledge of major themes/figures/traditions in African American religious life, as well as key questions that have shaped the study thereof

RELI UN2405 CHINESE RELIGIOUS TRADITIONS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course provides a chronological and thematic introduction to Chinese religions from their beginnings until modern times. It examines distinctive concepts, practices and institutions in the religions of China. Emphasis will be placed on the diversity and unity of religious expressions in China, with readings drawn from a wide-range of texts: religious scriptures, philosophical texts, popular literature and modern historical and ethnographic studies. Special attention will be given to those forms of religion common to both “elite” and “folk” culture: cosmology, family and communal rituals, afterlife, morality

and mythology. The course also raises more general questions concerning gender, class, political patronage, and differing concepts of religion

RELI UN2779 INTRODUCTION TO NATIVE AMERICAN RELIGIOUS TRADITIONS. 3 points.

There are over 800 distinct Native American nations currently within the borders of the United States. This course offers a broad introduction to the diversity of American Indian religious systems and their larger functions in communities and in history. We will explore general themes in the study of Native American religious traditions as well as look at some specific examples of practices, ideas, and beliefs. Of particular importance are the history and effects of colonialism and missionization on Native peoples, their continuing struggles for religious freedom and cultural and linguistic survival, and the ways in which American Indians engage with religion and spirituality, both past and present, to respond to social, cultural, political, and geographical change.

ASRL BC3115 WHY DO BAD THINGS HAPPEN TO GOOD PEOPLE?. 4.00 points.

This course is an introduction to the field of inquiry called The Problem of Evil, or Theodicy – that is, the investigation of God in the face of evil and suffering in the world. How do we justify God? How do we reconcile disaster, pain, and suffering with an all-good, all-knowing, all-compassionate God? This question arises in all religious traditions, but here we will study only four: the Jewish, Christian, Muslim, and Hindu traditions, each of which proposes its own array of answers. Our emphasis will be on primary texts from each tradition, with introductory and interpretive secondary sources brought in as supplementary. These primary sources will be discussed in class, but especially in required section meetings. A sub-theme of the course is the “pastoral” dimension of answers to the Problem of Evil: to what extent are the answers we study comforting? This course has been created with the many crises presently afflicting our world – COVID-19, climate change, and the injustice of racism, to name a few – in mind

RELI UN3208 Aaahh Real Monsters: Critical Monster Studies. 3.00 points.

This course examines the major issues and themes of critical monster studies. It explores questions about how we conceive and understand monsters theoretically, historically, socially, and culturally. Is there a quintessential monster category? Or are monsters constructed? How do social, cultural, and religious factors affect our perception of monsters and the idea of monstrosity? What roles do monsters fill in determining how people construct and deconstruct their communities? Are monsters members of the community? What does the idea of monstrosity imply about the limits of what is possible in nature? Are monsters just supernatural or are there natural monsters? And what do modern depictions of monsters in popular media have to say about how our perception of monsters is changing? Together, we explore all of these questions and orient students into the burgeoning field of critical monster studies

RELI UN3232 Museums and Sacred Things. 4 points.

This course invites students to consider how museums create, curate, collect, and engage with sacred things, including things that are recognizably religious, things that become “sacred” through the processes of museum collection and display, visitors to museums, and even museum spaces themselves. This course focuses on the American context, and American

museums. We will first consider the particular social and political contexts in which museums and museum practices developed and responded to sacred things, and the contexts in which “religion” serves as a valuable if often implicit classification structure. We will then focus on the ways in which things deemed sacred are engaged by museums and encountered by museumgoers, with particular attention to the ways that museumgoers, museum architecture, and religious communities all interact in relation so object. In this class, students will learn to thoughtfully ask question and evaluate the role that museums as public institutions play in shaping public and private understandings and experiences of religion, the sacred, and spirituality.

RELI GU4213 Islam and the Secular: Rethinking Concepts of Religion in North-Western Africa and the Middle East. 4.00 points.

The class offers a critical discussion of the conceptual apparatus of the anthropology of Islam and secularism and of the ways in which it shapes recent interventions in history and theory but also in Islamic studies with a particular focus on North-Western Africa and the Middle East. The questions that will be examined during the class read as follows: 1. What is Islam: a religion or a cultural formation, a discursive tradition or a way of life? How is one to construct a definition of Islam beyond orientalist legacies? Can one define Islam anthropologically outside the tradition itself? 2. How did French and British Empires transform or destroyed Islamic institutions while governing Muslims in the Middle East and North-West Africa? Are these colonial technologies Christian or secular and is there a significant difference between Christian slavery and secular colonialism? To what extent is secularism reducible to an imperial ideology or to Christianity itself? 3. How did Muslims respond to the challenge of modernity and to European imperial hegemony? How can one think philosophically within the Islamic tradition after the hegemony of Europe and colonialism?

RELI GU4517 After the Human. 4.00 points.

The advent of high-speed computing, Big Data, new forms of Artificial Intelligence, and global networking is rapidly transforming all aspects of life. Implants, transplants, genetic engineering, cloning, nanotechnology, cyborgs, hybrids, prostheses, mobile phones, tracking devices and wearable devices. The Internet of Things and the Internet of Bodies are becoming interconnected to transform what once was known as human being. These developments raise fundamental questions about what comes after the human. This course considers the philosophical and theological implications of this question by addressing the following issues: Natural vs. Artificial, Treatment vs. Enhancement, the Artificial Intelligence Revolution, Ubiquitous Computing, the Internet of Things, the Singularity, Extended Mind and Superintelligence, Internet of Bodies and Superorganisms, Death and After Life. Students will have the option of writing a term paper or doing a project related to the course readings

RELI GU4998 Religion and the Indian Wars. 4 points.

The frontier is central to the United States' conception of its history and place in the world. It is an abstract concept that reflects the American mythology of progress and is rooted in religious ideas about land, labor, and ownership. Throughout the nineteenth century, these ideas became more than just abstractions. They were tested, hardened, and revised by U.S. officials and the soldiers they commanded on American battlefields. This violence took the form of the Civil War as well as the series of U.S. military encounters with Native Americans known as the Indian Wars. These separate yet overlapping campaigns have had profound and lasting consequences for the North American landscape and its peoples.

This course explores the relationship between religious ideology and violence in the last half of nineteenth century. Organized chronologically and geographically, we will engage with both primary sources and classic works in the historiography of the Indian Wars to examine how religion shaped U.S. policy and race relations from the start of the Civil War through approximately 1910.

FALL 2020

RELI UN1310 God. 3 points.

What is religion? And what does God have to do with it? This course will seek to engage a range of answers to these questions. The class is not a survey of all religious

traditions. Rather, it will address religion as a comparative problem between traditions as well as between scholarly and methodological approaches. We will engage the issue of perspective in, for example, the construction of a conflict between religion and science, religion and modernity, as well as some of the distinctions now current in the media between religion, politics, economics and race. And we will wonder about God and gods.

RELI UN2506 From Exodus to the Coronavirus: Scriptures and Narratives of Religious Responses to Epidemics. 4.00 points.

The purpose of this course is to offer an overview of religious responses to epidemics and pandemics, mostly in a monotheistic tradition, and to engage with the questions of collective guilt, collective mourning, divine justice (or lack thereof), and the societal disruption that such illnesses create or expose as well as persecution and discrimination. The questions raised will help us find parallels with these times of pandemics and put our current times into perspective, but also contextualize and reflect on the nuances of past events and responses

RELI UN2507 From Exodus to the Coronavirus: Scriptures and Narratives of Religious Responses to Epidemics - Discussion. 0.00 points.

The purpose of this course is to offer an overview of religious responses to epidemics and pandemics, mostly in a monotheistic tradition, and to engage with the questions of collective guilt, collective mourning, divine justice (or lack thereof), and the societal disruption that such illnesses create or expose as well as persecution and discrimination. The questions raised will help us find parallels with these times of pandemics and put our current times into perspective, but also contextualize and reflect on the nuances of past events and responses

RELI UN3202 Religion in America I. 3 points.

This course offers a survey of American religions from the 1500s through the mid-1800s. We examine the politics of conversion in different kinds of colonialisms; the different strands of Christianity in early America and their cultural contexts; the emergence of evangelical Protestantism; the effects of religious disestablishment in the early republic; and the relationship between religion and social movements.

RELI UN3207 In the Margins of the Middle Ages: Religious Minorities in the Medieval Latin West. 4.00 points.

This course investigates marginal religious groups, including apostates, heretics, Jews, magicians, Muslims, etc. against the backdrop of Christianity in medieval Western Europe. Through examining various types of primary textual and pictorial sources including papal letters, penitential handbooks, lawyers' commentaries, autobiographies, manuscript illuminations, paintings, etc., the class will facilitate students to rethink the socio-historical situation of religious minorities, the defining of religious boundaries in history, and the echoes of such defining in the contemporary world. (No prerequisites)

RELI GU4307 BUDDHISM # DAOISM IN CHINA. 4.00 points.

Prerequisites: one course on Buddhism or Chinese religious traditions is recommended, but not required, as background. In recent decades, the study of the so-called "Buddho-Daoism" has become a burgeoning field that breaks down the traditional boundary lines drawn between the two Chinese religious traditions. In this course we will read secondary scholarship in English that probes the complex relationships between Buddhism and Daoism in the past two millennia. Students are required not only to be aware of the tensions and complementarity between them, but to be alert to the nature of claims to either religious purity or mixing and the ways those claims were put forward under specific religio-historical circumstances. The course is organized thematically rather than chronologically. We will address topics on terminology, doctrine, cosmology, eschatology, soteriology, exorcism, scriptural productions, ritual performance, miracle tales and visual representations that arose in the interactions of the two religions, with particular attention paid to critiquing terms such as "influence," "encounter," "dialogue," "hybridity," "syncretism," and "repertoire." The course is designed for both advanced undergraduate and graduate students in the fields of East Asian religion, literature, history, art history, sociology and anthropology. One course on Buddhism or Chinese religious traditions is recommended, but not required, as background

RELI GU4322 Exploring the Sharia: Topics in Islamic Law. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The platform of every modern Islamist political party calls for the implementation of the sharia. This term is invariably (and incorrectly) interpreted as an unchanging legal code dating back to 7th century Arabia. In reality, Islamic law is an organic and constantly evolving human project aimed at ascertaining God's will in a given historical and cultural context. This course offers a detailed and nuanced look at the Islamic legal methodology and its evolution over the last 1400 years. The first part of the semester is dedicated to classical Islamic jurisprudence, concentrating on the manner in which jurists used the Qur'an, the Sunna (the model of the Prophet), and rationality to articulate a coherent legal system. The second part of the course focuses on those areas of the law that engender passionate debate and controversy in the contemporary world. Specifically, we examine the discourse surrounding Islamic family (medical ethics, marriage, divorce, women's rights) and criminal (capital punishment, apostasy, suicide/martyrdom) law. The course concludes by discussing the legal implications of Muslims living as minorities in non-Islamic countries and the effects of modernity on the foundations of Islamic jurisprudence.

RELI GU4999 GLOBAL INDIGENOUS RELIGIOUS HISTORIES. 4.00 points.

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of lacking religion; as pagan, barbarian, non-modern, and without history or civilization. Despite this conundrum of identity

and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative

ALL COURSES (INCLUDING THOSE NOT OFFERED THE CURRENT ACADEMIC YEAR)

RELI UN1310 God. 3 points.

What is religion? And what does God have to do with it? This course will seek to engage a range of answers to these questions. The class is not a survey of all religious traditions. Rather, it will address religion as a comparative problem between traditions as well as between scholarly and methodological approaches. We will engage the issue of perspective in, for example, the construction of a conflict between religion and science, religion and modernity, as well as some of the distinctions now current in the media between religion, politics, economics and race. And we will wonder about God and gods.

RELI UN1312 Religion in Black America: An Introduction. 4 points.

Religion has been a complicated and contested, yet central, organizing force in the making of black life in the America. At the same time, African American religious life has been the subject of much scrutiny throughout the history of the United States, serving arguments that advocated abolition, emancipation and full enfranchisement, but also functioning as evidence to justify enslavement and second-class citizenship. To better understand such phenomena, this course provides a chronological survey that introduces students to a range of ideas and practices, individuals and institutions, as well as important themes and topics in African American (thus American) religious history. Primary attention is given to Afro-Protestantism in the United States; however, throughout the course attention is directed to religious diversity and varying religious traditions/practices in different diasporic locales. By the end of the semester students will be expected to possess a working knowledge of major themes/figures/traditions in African American religious life, as well as key questions that have shaped the study thereof.

RELI UN1320 Losing My Religion. 3.00 points.

The R.E.M. lead singer Michael Stipe explained that the phrase “losing my religion” in the song of the same title does not refer to what we might commonly understand by “religion.” Rather it cites the expression used in the Southern U.S. for losing one’s temper, feeling frustrated, exasperated, and desperate. The loss present in John Legend and Common’s song “Glory” from the movie *Selma* are the lives lost to the unattenuated history of racist violence and in the struggle against structural white supremacy. In this context, for Blacks “freedom is like religion.” Like religion. Even if the song does not shy away from Christian theological tropes, “religion” here too remains elusive. Living through a major global pandemic as we are (although arguably, racism and capitalism are also ongoing—albeit mostly unacknowledged—global pandemics), we are witnessing the losses attributable to Covid-19 precipitating changing practices and rituals of marking losses, mourning, and building community in the present. Apart from impacting practices that we generally term “religious,” loss and living with losses also reveal what may have been our individual and collective “religion” lost and what may emerge as the “religions” we hew to newly or nonetheless. In this course we will explore how various meanings of “religion” might offer us conceptual tools for thinking about loss, community, and damaged life. We will examine how religious practices change in relation to losses and reflect on losses of religion both personally (e.g., because one’s hitherto familiar value system breaks down) and collectively (e.g., the forced conversions and suppression of religious traditions by colonialism). We will track how loss and rituals surrounding loss can change how history, time, space, and meaning are experienced. We will ask what if anything comes after or alongside loss, especially given the perdurance of loss that is brought about by centuries of systemic violence. Given the circumstances of our moment, we will also take time to reflect on the (hopefully only temporary) loss of face-to-face communal learning in a shared classroom and what new rituals of virtual learning mean for building communities and relating to others and the world. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and to challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to loss, damaged life, community, complicated and violent pasts, the precarity of the present, vanishing futures and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should experience this course as enlarging the set of critical tools at their disposal for creative and rigorous thinking

RELI UN1610 Religion and Popular Culture. 3 points.

When we hear “pop culture,” we often think of it in comparison to a “high culture.” In reality, popular culture is something that everyone has easy access to, and represents a common language of the people. religion permeates American popular culture in surprising ways, and is part of national vocabulary.

In addition, religious communities turn to popular culture as a way to preserve their own identities and uniqueness in the face of homogenization and assimilation.....

RELI UN1612 Religion and the History of Hip Hop. 4.00 points.

This is an undergraduate lecture course introducing students to the study of religion through an engagement with the history of hip hop music. More specifically, this course is organized chronologically to narrate a history of religion in the United States (circa 1970 to the present day) by mapping the ways that a variety of religious ideas and practices have animated rap music’s evolution and expansion during this time period. While there are no required prerequisites for the course, prior coursework in religious studies, African American studies, and/or popular music is helpful.

RELI UN1615 Vampires. 3 points.

Do you believe in vampires? Like ghosts and zombies, vampires circulate in a secularized world and few are those who would speak of a “vampire religion.” This course will attempt to do that. It will ask about the ubiquitous figure of the vampire, insofar as it evokes the ancient and the archaic, the modern and the postmodern. With Bram Stoker’s *Dracula* as our guide, and with the help of film, we will explore the religious significance of vampires and what they mean for the salvation — or perdition — of the soul. We will wonder about vampires and sexuality, vampires and media, vampires and (geo-)politics, and even vampires and the economy.

RELI UN1620 Religion and the Movies. 3 points.

This class is an introduction to both film and religious studies and aims to explore their interaction. Ranging from auteurs to blockbusters, the course will analyze movies that make use of the sacred and of religious themes, figures or metaphors. The course will probe the definitions and boundaries of religion -as theology, myth, ideology- and will show students how religion remains a critical presence in the arts, even in a secular guise. We will look at the ways in which popular culture can serve religious functions in contemporary society and examine how faith is represented in popular culture.

RELI UN2205 Buddhism: Indo-Tibetan. 4 points.

Recitation Section Required

Historical introduction to Buddhist thought, scriptures, practices, and institutions. Attention given to Theravada, Mahayana, and Tantric Buddhism in India, as well as selected non-Indian forms.

RELI UN2304 Christianity. 3 points.

Survey of Christianity from its beginnings through the Reformation. Based on lectures and discussions of readings in primary source translations, this course will cover prominent developments in the history of Christianity. The structure will allow students to rethink commonly held notions about the evolution of modern Christianity with the texture of historical influence.

RELI UN2305 Islam. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An introduction to the Islamic religion in its premodern and modern manifestations. The first half of the course concentrates on "classical" Islam, beginning with the life of the Prophet, and extending to ritual, jurisprudence, theology, and mysticism. The second half examines how Muslims have articulated Islam in light of colonization and the rise of a secular modernity. The course ends with a discussion of American and European Muslim attempts at carving out distinct spheres of identity in the larger global Muslim community.

RELI UN2307 Chinese Religious Traditions. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Historical survey highlighting major developments in Chinese religion: includes selections from the "Warring States" classics, developments in popular Daoism, and an overview of the golden age of Chinese Buddhism. Touches on "Neo-Confucianism," popular literature of the late imperial period, and the impact of Western ideas.

RELI UN2308 Buddhism: East Asian. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Lecture and discussion. An introductory survey that studies East Asian Buddhism as an integral, living religious

tradition. Emphasis on the reading of original treatises and historiographies in translation, while historical events are discussed in terms of their relevance to contemporary problems confronted by Buddhism. There is a mandatory weekly discussion session.

RELI UN2309 Hinduism. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Considers efforts since 1900 to synthesize a coherent understanding of what "Hinduism" entails, sometimes under the heading of *sanatana dharma*. Using a rubric provided by the *Bhagavad Gita*, explores philosophical/theological (*jnana*), ritual (*karma*), and devotional (*bhakti*) aspects of Hindu life and thought.

RELI UN2312 Religion and Nasty Women. 4 points.

Used in 2016 by then presidential candidate, Donald Trump, in reference to his female opponent, Hillary Clinton, the phrase "nasty woman" has become a badge of honor and a rallying cry for women's empowerment.

The origin of the word "nasty," attested in the 14th century, indicates highly unpleasant qualities- nauseating or unclean, in a literal or figurative way. It also came to evoke indecency and obscenity- and religious traditions have a long history of such depiction of women.

After introducing some key texts on the otherness and objectification of women (including by Aristotle, Beauvoir, Kristeva, Nussbaum, and Butler), we will examine a number of female characters- goddesses, prostitutes, and virgins - in the Mesopotamian, Greek, Jewish, Christian, Buddhist, Hindu, and Islamic corpus that fit the definition of nasty. We will also analyze some of the underlying tropes of impurity and danger that characterize nastiness involving bodily fluids, sexuality, and knowledge. Spanning theology, literature, movies, and popular culture the course aims to be a survey of religious-based misogyny as well as women's responses in their pursuit of agency.

RELI UN2313 Religion and Nasty Women - Discussion. 0 points.

Used in 2016 by then presidential candidate, Donald Trump, in reference to his female opponent, Hillary Clinton, the phrase "nasty woman" has become a badge of honor and a rallying cry for women's empowerment.

The origin of the word "nasty," attested in the 14th century, indicates highly unpleasant qualities- nauseating or unclean, in a literal or figurative way. It also came to evoke indecency and obscenity- and religious traditions have a long history of such depiction of women.

RELI UN2405 CHINESE RELIGIOUS TRADITIONS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course provides a chronological and thematic introduction to Chinese religions from their beginnings until modern times. It examines distinctive concepts, practices and institutions in the religions of China. Emphasis will be placed on the diversity and unity of religious expressions in China, with readings drawn from a wide-range of texts: religious scriptures, philosophical texts, popular literature and modern historical and ethnographic studies. Special attention will be given to those forms of religion common to both "elite" and "folk" culture: cosmology, family and communal rituals, afterlife, morality and mythology. The course also raises more general questions concerning gender, class, political patronage, and differing concepts of religion

RELI UN2415 Religions of Harlem. 3 points. **Not offered during 2020-21 academic year.**

Through a range of field exercises and classroom guests, this course will introduce students to the rich religious history of Harlem, while also challenging them to document and analyze the diversity of Harlem's contemporary religious scene.

RELI UN2506 From Exodus to the Coronavirus: Scriptures and Narratives of Religious Responses to Epidemics. 4.00 points.

The purpose of this course is to offer an overview of religious responses to epidemics and pandemics, mostly in a monotheistic tradition, and to engage with the questions of collective guilt, collective mourning, divine justice (or lack thereof), and the societal disruption that such illnesses create or expose as well as persecution and discrimination. The questions raised will help us find parallels with these times of pandemics and put our current times into perspective, but also contextualize and reflect on the nuances of past events and responses

RELI UN2670 Magic and Modernity. 3 points.
Not offered during 2020-21 academic year.

This course introduces students to the cultural history of magic: as an idea, as a practice, and as a tool with which to wield power and induce wonder. Magic, as we will explore, is a modern concept, the contours of which have been shaped by its relations with religion and science, always against larger backdrops—of the Enlightenment, Romanticism, (post) colonialism, and (post) secularism. Readings are drawn from

philosophy, anthropology, religious studies, sociology, drama, literature, history, history of science, and political theory.

RELI UN2779 INTRODUCTION TO NATIVE AMERICAN RELIGIOUS TRADITIONS. 3 points.

There are over 800 distinct Native American nations currently within the borders of the United States. This course offers a broad introduction to the diversity of American Indian religious systems and their larger functions in communities and in history. We will explore general themes in the study of Native American religious traditions as well as look at some specific examples of practices, ideas, and beliefs. Of particular importance are the history and effects of colonialism and missionization on Native peoples, their continuing struggles for religious freedom and cultural and linguistic survival, and the ways in which American Indians engage with religion and spirituality, both past and present, to respond to social, cultural, political, and geographical change.

RELI UN3202 Religion in America I. 3 points.

This course offers a survey of American religions from the 1500s through the mid-1800s. We examine the politics of conversion in different kinds of colonialisms; the different strands of Christianity in early America and their cultural contexts; the emergence of evangelical Protestantism; the effects of religious disestablishment in the early republic; and the relationship between religion and social movements.

RELI UN3204 Religion, Sexuality, and Truth. 3 points.

The extent of Michel Foucault engagement with Christianity has only recently come to light with the publication of his lectures from the early 1980s. These lectures constitute, in many ways, the culmination of Foucault's work on power, sexuality, subjectivity and the discursive operations whereby knowledge is produced. In this course, we will appreciate the depth and originality of Foucault's critical account of Christianity and examine the major role it occupied in his thought on subjects such as sexuality, governmentality, truth telling, confession, and judicial forms. We will understand Foucault's work along with the crucial role he ascribed to Christianity in forming the history of the present.

RELI UN3206 Religion in the Archive. 4 points.

Students must sign up for a discussion section on Fridays, 10:10-11:25. **Not offered during 2020-21 academic year.**

In Religion in the Archive, students will conduct archival research and create digital humanities projects that "remix" and decolonize a missionary archive: the Papers of Matilda Calder Thurston (1875-1958), an American missionary who helped establish the first four-year women's college in China, Ginling College in Nanjing. Thurston's papers belong to the Missionary Research Library housed at Burke Library. The class will meet twice a week for lectures addressing the history of American and Chinese religions and focused on theoretical questions of imperialism, gender, conversion, and modernization. Students will also engage with debates about the archive/archiving, the digital humanities, and what it means to present scholarly research to a public audience. During the Friday recitation, students will conduct archival research and scan archival documents, to embed metadata, to work with a database program, and to design a website and/or produce a podcast.

RELI UN3207 In the Margins of the Middle Ages: Religious Minorities in the Medieval Latin West. 4.00 points.

This course investigates marginal religious groups, including apostates, heretics, Jews, magicians, Muslims, etc. against the backdrop of Christianity in medieval Western Europe. Through examining various types of primary textual and pictorial sources including papal letters, penitential handbooks, lawyers' commentaries, autobiographies, manuscript illuminations, paintings, etc., the class will facilitate students to rethink the socio-historical situation of religious minorities, the defining of

religious boundaries in history, and the echoes of such defining in the contemporary world. (No prerequisites)

RELI UN3208 Aaahh Real Monsters: Critical Monster Studies. 3.00 points.

This course examines the major issues and themes of critical monster studies. It explores questions about how we conceive and understand monsters theoretically, historically, socially, and culturally. Is there a quintessential monster category? Or are monsters constructed? How do social, cultural, and religious factors affect our perception of monsters and the idea of monstrosity? What roles do monsters fill in determining how people construct and deconstruct their communities? Are monsters members of the community? What does the idea of monstrosity imply about the limits of what is possible in nature? Are monsters just supernatural or are there natural monsters? And what do modern depictions of monsters in popular media have to say about how our perception of monsters is changing? Together, we explore all of these questions and orient students into the burgeoning field of critical monster studies

RELI UN3210 Millennium: Apocalypse and Utopia. 3 points.

Study of apocalyptic thinking and practice in the western religious tradition, with a focus on American apocalyptic religious movements and their relation to contemporary cultural productions, as well as notions of history and politics.

RELI UN3225 Religion and Capitalism: Faith and the American Market. 3 points.

Is the market a religious system? Can we consider "capitalism" to be a key arena in which the relationship between the religious and the secular is both negotiated and performed? In this course, students will explore the complicated relationship between faith and the market, the religious and the secular, and the evolution of vice and virtue as they relate to economic thriving in the United States. While no hard and fast rules for thinking about the relationship between right conduct and material interests cut across all religious and philosophical traditions, human agents invest real faith into currency, into markets, and into the reigning economic order to bring about increased opportunities, wealth, and freedom to people across the globe. Throughout this semester, we will chart both the long shadows and the future trajectories of these beliefs from our American perspective.

In this course, students will develop a strong foundational knowledge of the key theorists who have defined these

relationships for generations before applying a critical lens to a number of global themes (the construction of race, the power of class, and the policing of gender) in an American context. To this end, our syllabus will be split into three units, each anchored by a particular theorist central to the academic study of religion (Max Weber, Karl Marx, and Michel Foucault) and followed by a number of case study texts that will bring their constructs and lenses into more lively debate and discussion.

RELI UN3230 Philosophy of Religion. 3 points.

This course in the Philosophy of Religion will consider the relationship between faith and reason, religion and morality, religion and art, and religion and technology. Attention will be devoted to an exploration of comparative interpretations of God or the divine in the western philosophical and theological traditions and Zen Buddhism as well as the interrelation of interpretations of God, self, and world. The course will conclude with a consideration of the question of life after death in philosophy, literature, and information technology.

RELI UN3232 Museums and Sacred Things. 4 points.

This course invites students to consider how museums create, curate, collect, and engage with sacred things, including things that are recognizably religious, things that become “sacred” through the processes of museum collection and display, visitors to museums, and even museum spaces themselves. This course focuses on the American context, and American museums. We will first consider the particular social and political contexts in which museums and museum practices developed and responded to sacred things, and the contexts in which “religion” serves as a valuable if often implicit classification structure. We will then focus on the ways in which things deemed sacred are engaged by museums and encountered by museumgoers, with particular attention to the ways that museumgoers, museum architecture, and religious communities all interact in relation to object. In this class, students will learn to thoughtfully ask question and evaluate the role that museums as public institutions play in shaping public and private understandings and experiences of religion, the sacred, and spirituality.

RELI UN3260 Sociology of Religion. 3 points.

Prerequisites: prior coursework in religion or sociology is highly encouraged.

This course introduces classical and contemporary theoretical and empirical approaches to the sociological study of religion, including secularization and secularity, religious identity formation, and sociological approaches to religious practice and meaning. Special focus will be on contemporary American topics, including religion and transnationalism, the role of religious actors and discourses in American politics, law and economics, and everyday religious practice.

RELI UN3303 Judaism and Translation in the Medieval and Early Modern Mediterranean. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The course explores both the practice of translation (the rendering of texts from one language to another) and the idea of translation (as a medium of cultural transmission) in the medieval and early modern Mediterranean.

RELI UN3304 Memory and Violence in Shi'i Islam. 4 points.

Not offered during 2020-21 academic year.

Why do humans insist on remembering and often memorializing violence? And how do they decide when violence is worth remembering or not? This course ponders these questions through a case study by examining the martyrdom of Husayn b. Ali (d. 680), grandson of the Prophet Muhammad and the third Imam in Shi'i Islam. We will explore the many ways in which this violent event has acquired meaning for people around the world from the seventh century until today using the lens of "collective memory" and its

role in community formation. There are no prerequisites, but background knowledge of Middle Eastern history will be very helpful.

RELI UN3309 Modern Islamic Thought. 4 points.

Who speaks for Islam and Muslims today? Is an "Islamic Reformation" necessary? Is there a Muslim "clergy"? What makes certain religious voices and institutions more authoritative than others? This course explores questions such as how can we conceptualize "authority" and the ways in which religious authorities are constructed in Islam in the modern and post-modern age. What sorts of shifts have occurred at centers of Islamic learning in the modern period? How may some of major influential orientations to Islamic thought today be characterized? How are American Muslims thinkers influenced by modern Islamic thought from Muslim majority countries and how are they developing their own body of thought? What are some of the major debates in contemporary American Muslim thought regarding violence, gender, race and economic justice?

RELI UN3315 Readings in Kabbalah. 3 points.

This course will serve to provide a wide but detailed exploration of Jewish Mysticism, raising questions about its connection to other Jewish traditions, the kind of symbolism and hermeneutics at stake, and the conception of God, man and world we are dealing with, amongst other major ideas.

RELI UN3321 Religion and Climate Crisis: India. 4 points.

Connections between dramatic climate assaults and religious practices and perspectives, taking Hindu India as an example: glaciers and floods, extreme weather, overpopulation, air and water pollution, deforestation. Hindu contexts, causes, and responses.

RELI UN3322 Religion & Climate Crisis: India - Discussion. 0 points.

This is the discussion section for RELI UN3321. You must register for that course before registering for this course.

RELI UN3340 Early Christianity. 3 points.

Examines the competing currents within early Christianity, with emphasis placed on the literary and social expressions of Christian belief and identity. Topics to be covered include persecution and martyrdom, debates over authority and religious experience, orthodoxy and heresy, and asceticism and monasticism, among others.

RELI UN3357 I and We in the Christian East: The Making of Identity. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course will provide a survey of Christian history in the eastern Mediterranean and Near East from roughly the fourth to

the eleventh centuries with particular attention to religion and identity. How would the various Christians in this era answer the questions: "Who am I?" "Who are we?" How did their understanding of the divine influence their understanding of themselves and how was this identity enacted through writing and ritual? Though our focus will be on this period, we will also consider the framing of the history of "Eastern" Christianity into the modern period. No prerequisites.

RELI UN3401 MUSLIMS IN DIASPORA-DISC. 0 points.

Corequisites: RELI UN3407

Discussion section associated with RELI UN3407-MUSLIMS IN DIASPORA.

RELI UN3406 Space, Narrative, and Religion in India. 3 points.

Not offered during 2020-21 academic year.

Course Description: This course is fundamentally about sacred places and the stories that people tell about and within them. We will explore the role that narratives – mythological, historical, personal, and academic – have played in the creation, maintenance and conceptualization of sacred spaces in South Asia. Each class in the first section of the course is devoted to a particular site or category of sites, and examines the roles that religious texts and iconography play in the traditions with which the sites are associated. In the second section of the course, we will consider ethnographic perspectives on religious journeys. Finally, in the third section, we will focus on the idealization of region or nation as a sacred space, and examines the manner in which narratives are invoked to formulate identities and to negotiate conflicts and differentials of power.

As we navigate these topics, we will explore answers to the following questions: How are spaces made "sacred"? What are the multiple types of narratives that come to be associated with sacred spaces, and what roles do they play in their production? How are such narratives transmitted, and for whom? How do religious practitioners utilize these spaces and their narratives in order to negotiate various facets of daily life, and in order to situate themselves within the religious landscape of South Asia?

RELI UN3407 Muslims in Diaspora. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Consideration of controversies surrounding mosque-building, headscarves, honor killing, and other publicized issues that expose tensions surrounding citizenship and belonging for Muslims in North America and Europe. Exploration of film and other media representations of Muslims in the West. There will be additional meeting times for film screenings

RELI UN3414 Changing Places. 4.00 points.

Globalization, climate, migration, surveillance, homelessness, and virtualization are changing the places where people live, work, love, pray, struggle, and die. This course explores the presuppositions and implications of intersecting vectors that are pushing society to the edge of collapse. The inquiry begins with

a consideration of the contemporary status of the four ancient elements – earth, air, water, and fire, and proceeds to explore displacements in cities and the country and replacements in churches, temples, mosques, woods, gardens, and cemeteries. Have we passed the tipping point, or is recovery still possible?

RELI UN3425 Judaism and Courtly Literature in Medieval and Early Modern Iberia and Italy. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The course explores secular Jewish literature composed in the medieval and Early Modern Mediterranean in the context of its Arabic and Romance-language counterparts. After examining the literary, linguistic and philosophical backdrop of Jews in the Islamic Empire, we will focus on poetry and prose of al-Andalus, Christian Spain and Italy. We will look at examples of how Jews depicted themselves and how Christian and *converso* thinkers portrayed Jews. In addition, we will consider two crossover writers, one Jew in Spain and one in Italy, whose compositions in Castilian and Italian were accepted and integrated into Christian society. Historical materials will accompany textual examples, which span the eleventh through sixteenth centuries.

RELI UN3430 Indigenous Religious Histories. 4 points.

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of *lacking* religion; as pagan, barbarian, non-modern, and without history or civilization.

Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, the history of anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative.

RELI UN3500 BUDDHIST ETHICS. 3.00 points.

Spring 2021: RELI UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 3500	001/11860	T Th 1:10pm - 2:25pm Online Only	Thomas Yarnall	3.00	11/25

RELI UN3501 Introduction To the Hebrew Bible. 3 points.

An introduction, by critical methods, to the religious history of ancient Israel against the background of the ancient Near East.

RELI UN3511 Tantra in South Asia, East Asia & the West. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An introduction to the history, literature, and ideology of Tantra and Tantric texts, deities, rituals, and traditions, proceeding chronologically from the early centuries C.E. to current forms of Tantric practice, and primarily covering India, China, and Japan. Attention will also be given to contemporary iterations of Tantra in the West. Questions of definition, transmission, patronage, gender, and appropriation link the various sections of the course. Readings include primary texts, secondary sources, local case studies, and art historical material.

RELI UN3517 Queer Theory, Religion, and Their Discontents. 3.00 points.

For the most part queer studies and religious studies have met each other with great suspicion and little interest in the conceptual resources of the respectively other field. Our guiding questions will be: What does religion have to do with queerness? What does queerness have to do with religion? Queer theory and activists, unless they already identify as religious, often have little or little good to say about religion. Conversely, many religious traditions intensively regulate gender, sex, sexuality, and especially queerness. Beyond the mutual disinterest, anxieties, and animosities, this course will explore how religious studies can enrich queer theory and how queer theory can reshape our thinking about religious studies. Our course will examine how our questions about religion shift once we start paying attention to queerness, gender, sexuality, pleasure, pain, and desire. Equally, we will examine how queer discourses mobilize religious and theological images and ideas, especially where these images and ideas are no longer clearly recognizable as having religious origins. Together we will wonder about a variety of core issues in queer studies and religion, such as embodiment, sexuality, gender-variability, coloniality, race appearing as religious identity and religious identity as gendered, as well as the role of catastrophe, utopia, and redemption in our experience of the world. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to gender, sexuality, desire, and embodiment in our everyday lives and how religion and religious formations are entangled with these issues well beyond religious communities. Moreover, students should experience this course as enlarging the set of critical tools at their hands for creative and rigorous thinking

RELI UN3518 Buddhism in East Asian Medical Cultures. 3 points.

This seminar introduces students to the intersections between Buddhism and medicine in East Asia in the premodern period.

The course begins with Buddhist ideas and practices concerning health and disease in ancient India over two millennia ago, and follows the eastward transmission of these concerns and activities into China, Korea, and Japan until roughly the 16th century. In addition to secondary studies representing the latest research in this burgeoning field, this course gives special attention to critical readings of shorter selections of primary sources translated into English, including sutras, monastic regulations, recipe collections, liturgical documents, and longevity manuals. Reading these selections through multiple methodological frameworks—social history, history of the body, and material culture, students will gain an appreciation of the rich diversity that characterized Buddhist healthcare practices before the introduction of Western medicine. A fundamental premise of this course is that different currents of Buddhism constituted medical cultures in their own right, a perspective that will help us to complicate conventional notions of both “religion” and “medicine.” We will aim to achieve a nuanced understanding of the ways that healing concerns shaped how monks and nuns related to actors of other therapeutic communities, and therefore emphasis is placed on the social and cultural contexts in which Buddhist medical practices were embedded. Students will thereby acquire a basic grounding in East Asian Buddhism to complement our particular concern with the dynamics of medical history. Previous coursework in Buddhism or East Asian religion is thus recommended but not required.

RELI UN3521 Muslim Masculinities. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This interdisciplinary course explores a variety of Muslim modes of masculinity as they have developed over time and as they have varied across different regions of the Islamic World. Students examine and problematize the social and cultural construction of masculinity in various parts of the Islamic world, including in the Middle East, South Asia, Sub-Saharan Africa, and in the Muslim diasporas of Europe and the Americas. In trying to understand the complex ways in which men and manhood are made in Islamic societies we will center our attention on the perceptions of bodily and social differences in Muslims’ larger articulations of gender and sexuality. A particular focus will be on the relationship between masculinity and violence against women and non-Muslims.

RELI UN3522 MUSLIM MASCULINITIES-DISC. 0 points.

Discussion section for RELI UN3521 - MUSLIM MASCULINITIES

RELI UN3575 Evangelicalism: Sex, Media, and Religion in America. 3 points.

Crossing denominations and encompassing a range of theological commitments, evangelical Christianity can be described as a theological disposition, a mode of hermeneutical practice, a theological-aesthetic sensibility, a mass spiritual movement, a practice of cultivating sacred affect, an errand to the world, and a genre of revivalism. This multidisciplinary seminar will emphasize the role of popular media in

constituting an evangelical public, the gendered nature of evangelical subjectivity, the role of sex and sexuality in evangelical self-definition, and the ways that evangelical theological categories have shaped what we think of as “the secular” in the United States.

RELI UN3606 Religion and Media in America. 3 points.

This course examines the role of media in shaping religious identities, beliefs, practices, and institutions using case studies from American history and contemporary American culture. For the purpose of this course, the term media will be interpreted broadly to mean any technique or technology designed to communicate information such as verbal discourses, written texts, visual representations, ritual gestures, sacred objects, and telecommunication technologies. In foregrounding media, we will examine how religious beliefs and practices have been remembered, disseminated, translated, and contested in the American context. Just as important, we will examine how religious groups have negotiated their American identity through media practices and their narrative content.

As we will see, acts of transmission such as writing, mapping, broadcasting, and televising play essential parts in drawing and erasing communal boundaries from both within and without. With this in mind, we will not be attempting to identify what religion is, so much as the ways in which historical actors understood themselves to be religious. We will find that what counts as religion varies, sometimes dramatically, across times, spaces, and cultures; “America” is similarly unstable and contested. Our job, then, will be to understand the role of media and mediation in constituting their contours.

RELI UN3612 The Religious History of Hip Hop. 3 points.

This is an undergraduate lecture course introducing students to the study of religion through an engagement with the history of hip hop music. More specifically, this course is organized chronologically to narrate a history of religion in the United States (from 1970 to the present day) by mapping the ways that a variety of religious ideas and practices have animated rap music’s evolution and expansion during this time period. While there are no required prerequisites for the course, prior coursework in religious studies, African American studies, and/or popular music is helpful.

RELI UN3630 Religion and Black Popular Cultures. 3 points.

As an exploration of the relationship between religion, race, and popular culture, the course will begin with theoretical readings that expose students to a variety of definitions of and approaches to each of these categories. After tackling these theoretical concerns, the remainder of the course will entail a cross genre and thematic engagement with the terrain of black popular culture(s) in which students will be challenged to apply new theoretical resources in order to interpret a wide range of “religious” phenomena.

RELI UN3671 Religion and Human Rights. 4.00 points.

What is the relationship between religion and human rights? How have different religious traditions conceived of “the human” as a being worthy of inherent dignity and respect, particularly in moments of political, military, economic, and ecological crisis? How and why have modern regimes of human rights privileged some of these ideas and marginalized others? What can these complicated relationships between religion and human rights explain some of the key crises in human rights law and politics today, and what avenues can be charted for moving forward? In this class, we will attempt to answer these questions by first developing a theoretical understanding of some of the key debates about the origins, trajectories, and legacies of modern human rights’ religious entanglements. We will then move on to examine various examples of ideas about and institutions for protecting “humanity” from different regions and histories. Specifically, we will examine how different societies, organizations, and religious traditions have addressed questions of war and violence; freedom of belief and expression; gender and sexual orientation; economic inequality; ecology; and the appropriate ways to punish and remember wrongdoing. In doing so, we will develop a repertoire of theoretical and empirical tools that can help us address both specific crises of human rights in various contexts, as well as the general crisis of faith and observance of human rights as a universal norm and aspiration for peoples everywhere

RELI UN3881 The Doctrine of Discovery: Religion, Law, and Legacies of 1492. 4.00 points.

How did European-Christians justify the colonization of the Americas? Did these justifications vary between different European empires, and between the Protestant and Catholic faiths, and if so, how? Do these justifications remain in effect in modern jurisprudence and ministries? This class explores these questions by introducing students to the Doctrine of Discovery. The Doctrine of Discovery is the defining legal rationale for European Colonization in the Western Hemisphere. The Doctrine has its origins in a body of ecclesiastic, legal, and philosophical texts dating to the late-fifteenth century, and was summarized by Chief Justice John Marshall of the United States Supreme Court, in the final, unanimous decision the judiciary issued on the 1823 case *Johnson v. M’Intosh*. Students will be introduced to the major, primary texts that make up the Doctrine, as well as contemporary critical studies of these texts and the Doctrine in general

RELI GU4105 Religion Lab. 4 points.

Discussion Section Required

In their research, scholars of religion employ a variety of methods to analyze "texts" ranging from historical documents to objects of visual culture. This course acquaints students with both the methods and the materials utilized in the field of religious studies. Through guided exercises, they acquire research skills for utilizing sources and become familiarized with dominant modes of scholarly discourse. The class is organized around a series of research "scavenger hunts" that are due at the start of each week's class and assigned during the discussion section (to be scheduled on the first day of class). Additional class meeting on Thursdays.

RELI GU4120 GENDER IN ANC CHRISTIANITY. 4.00 points.

This seminar considers the difference gender makes in interpreting ancient Christian texts, ideas, and practices. Topics will include gender hierarchy and homoeroticism, prophecy and authority, outsiders' views of Christianity, bodily pieties such as martyrdom and asceticism, and gender politics in the establishment of church offices. Emphasis will be placed on close readings of primary sources and selected scholarly framings of these sources

RELI GU4202 Time, Modernity, Death. 4 points.

The notion of modernity in the West implies a distinctive interpretation of temporality and subjectivity, which grows out of theological and philosophical traditions. Lutheran Protestantism, as developed by Hegel, Kierkegaard, and Heidegger, created the conditions for both the construction and the deconstruction of modernism and its extension in postmodernism. The course will examine these two trajectories by considering their contrasting interpretations of the relationship of human selfhood to time and death. On the one hand, the death of God leads to a radical immanence in which human subjectivity either is absolutized as the will to power or mastery that dominates or negates all difference

and otherness, or is repressed by universal structures and infrastructures for which individual subjects are unknowing and unwitting vehicles. On the other hand, human subjectivity appears to be finite because its irreducible singularity is always given by an other that can be neither known nor controlled.

The course will conclude by considering the alternative psychological, political, and ethical implications of these two contrasting positions.

RELI GU4204 Religions of the Iranian World. 4 points.

This course is a seminar open to undergraduate and graduate students who wish to gain an understanding of the diverse religious traditions of the Iranian world from ancient to contemporary times. This subject has often been organized around the assumption that a continuous tradition of an Iranian national religious heritage can be identified and traced through from ancient, Zoroastrian to medieval Islamic traditions, and then ultimately to contemporary Shi'ite and minority Zoroastrian and Baha'i traditions. This perspective has presumed that such a legacy has been constitutive and determinative for Iranians' sense of national identity and for their core religious world-view. From the outset, this course aims to problematize and ultimately overturn this approach, first of all, by historicizing the very idea of Iran and by challenging the assumption that an Iranian identity was even recognizable before the twentieth century, much less constitutive of some unbroken traditions of religious thought or practice. While there may be some persistent threads in language, mythic heritage, and religiosity that one can observe throughout the Iranian plateau and Central Asia across the centuries, it is more useful to examine these as part of a larger matrix of exchanges with adjacent cultural and religious systems. Students will examine a series of interrelated themes that are key to the studies of religion in the Iranian world. While the course does cover material that progresses roughly chronologically from the first millennium BCE to contemporary times, it is not a systematic historical survey. Each week will focus on a cluster of scholarly works and related primary sources on focused topics related to the successive religious traditions in Iran, the Mazdaen dualist traditions, Islam, and Baha'ism.

RELI GU4205 Love, Translated: Hindu Bhakti. 4 points.

Hindu poetry of radical religious participation-bhakti-in translation, both Sanskrit (the Bhagavad Gita) and vernacular. How does such poetry/song translate across linguistic divisions within India and into English? Knowledge of Indian languages is welcome but not required. Multiple translations of a single text or poet bring to light the choices translators have made.

RELI GU4206 HISTORY, TIME, AND TRADITION. 4 points.

In *Refashioning Futures*, David Scott asks if the accurate reconstruction of the past of an identity is the crucial point of a theoretical intervention. He ponders, instead, if such a historicist analysis should be followed by an emphatic “But so what?” The importance of asking “so what?” is that it allows us to begin to refuse, Scott writes, “history its subjectivity, its constancy, its eternity” and “interrupt its seemingly irrepressible succession, causality, its sovereign claim to determinacy” (105) The question “so what?” requires, in other words, we answer for history’s prominence and providence as well as consider other possible formations of community, temporality, and inheritance not anchored by the weight of ‘history’.

This seminar examines the overwhelming hold of “history” in the present by considering Scott’s poignant “But so what?” We will begin by examining the problem-space of ‘history’ itself and how ‘history’ emerged as the foundation to understanding and ordering religious life globally. We will explore the wide-ranging effects of Enlightenment rationality and Orientalist knowledge production as well as consider the imbrication of history with theology and the secular. This section of the course will help develop a shared set of concepts and problematics, which we will continuously encircle throughout. We will then examine how scholars have troubled this historical conscription, reorienting our understandings of temporality, tradition, and the past. The last half of the course, therefore, considers a range of different methods and theories that undo the importance of ‘history’ while remaining attuned to questions of the past, time, and inheritance

RELI GU4207 Religion and the Afro-Native Experience. 4 points.

African Americans and Native Americans have a shared history of racial oppression in America. However, the prevailing lenses through which scholars understand settler colonialism, religion, and black and indigenous histories focus overwhelmingly on the dynamics between Europeans and these respective groups. How might our understanding of these subjects change when viewed from a different point of departure, if we center the history of entanglements between black and native lives? How does religion structure the overlapping experiences of Afro-Native peoples in North America?

From political movements in Minneapolis, Oakland, and New York City to enslavement from the Cotton Belt to the Rio Grande, this class will explore how Africans, Native Americans, and their descendants adapted to shifting contexts of race and religion in America. The course will proceed thematically by examining experiences of war, dislocation, survival, and diaspora.

RELI GU4209 Religion, Politics and Culture in Contemporary Black America. 4.00 points.

This course examines the period commonly referred to as the “post-Civil Rights era”—that is, from the 1960s up through the current moment: a span of time also theorized through the

related rhetorics of “postmodern,” “postcolonial” and “post-Soul. We will explore the inter-workings of religion, politics and culture (as they converge and diverge) in contemporary black life. Attention will be given to formal religious traditions (i.e. Christianity, Islam, African-derived traditions), but also to a range of ideas about religion and/or spirituality as they are revealed in the artistic expression, politics and activism, and popular culture and media. Taking analytical cues from critical race theory, questions of agency, power and difference will be fore-grounded, as witnessed in how religious discourses and practices negotiate such categories as race, class, gender and sexuality. Ultimately, bringing together developments within the inter-disciplinary fields of black studies and the study of religion, ultimately this class will examine the ways in which various ideas about “religion” shape and circulate across various forms of black political organizing and cultural expression in our current moment. This seminar is open undergraduates and graduate students. While there are no require pre-requisites, students are expected have some prior background in religious studies and/or African American Studies

RELI GU4212 Modern Buddhism. 4 points.

What most Americans and Europeans call ‘Buddhism’ today is in fact a hybrid tradition dating back to the 19th century. It owes as much to European philosophy and esoteric thought as to Asian traditions themselves and appeared in the context of decolonization. This course will survey the history of this recent tradition, identifying cultural and political trends that contributed to its creation in various geographical areas. Readings include several primary texts by important proponents of Modern Buddhism. The texts should also be read in comparison with the appropriate scholarly works on the Asian traditions they supposedly draw on. One course on Buddhism or East Asian Religions is recommended, but not required, as background.

RELI GU4213 Islam and the Secular: Rethinking Concepts of Religion in North-Western Africa and the Middle East. 4.00 points.

The class offers a critical discussion of the conceptual apparatus of the anthropology of Islam and secularism and of the ways in which it shapes recent interventions in history and theory but also in Islamic studies with a particular focus on North-Western Africa and the Middle East. The questions that will be examined during the class read as follows: 1. What is Islam: a religion or a cultural formation, a discursive tradition or a way of life? How is one to construct a definition of Islam beyond orientalist legacies? Can one define Islam anthropologically outside the tradition itself? 2. How did French and British Empires transform or destroyed Islamic institutions while governing Muslims in the Middle East and North-West Africa?

Are these colonial technologies Christian or secular and is there a significant difference between Christian slavery and secular colonialism? To what extent is secularism reducible to an imperial ideology or to Christianity itself? 3. How did Muslims respond to the challenge of modernity and to European imperial hegemony? How can one think philosophically within the Islamic tradition after the hegemony of Europe and colonialism?

Spring 2021: RELI GU4213

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

RELI GU4214 African and North African Philosophy: An Introduction. 3.00 points.

What is African philosophy? Is a theory African simply because it is rooted in the political present of the continent? Is it African because it corresponds to an African cultural singularity or simply because its authors and inventors come from or live in Africa? This class will examine a) how religious traditions shape African theory b) how the influence of colonial anthropology on concepts of African culture and tradition can be challenged c) how African theory relates to African politics of decolonization, in North and “sub-Saharan” Africa. The major dialectical problem we will examine during the class is the ongoing contradiction between claims of authenticity and demands of liberation, traditionalism and modernity, religion and secularism, culturalism and Marxism

RELI GU4215 Hinduism Here. 4 points.

Historical, theological, social and ritual dimensions of “lived Hinduism” in the greater New York area. Sites selected for in-depth study include worshipping communities, retreat centers, and national organizations with significant local influence. Significant fieldwork component

RELI GU4218 Heidegger and the Jews. 4 points.

The conundrum of Martin Heidegger and the Jews continues. The recent publications of Heidegger’s *Black-Notebooks* reignited the debate over his ties to the National Socialist party and his personal anti-Semitism. These notebooks reveal that Heidegger establishes a *philosophical* case for his prejudices against Jews, one which arguably cuts to the very heart of his thinking. And yet, many of his closest and most brilliant students were Jewish, and it is becoming increasingly clear that his philosophy has left an indelible mark on twentieth century Jewish thought. This course is divided into two units: In the first unit we will become familiar with some central themes of Heidegger’s thought and explore the question of the philosophical grounding of his political failing. In the second unit we will examine a variety of responses to Heidegger by Jewish thinkers who, in different ways and for different purposes, both profited greatly from his philosophical innovations and levelled profound criticism of his thought and actions. The animating question the course will attempt

to answer is: Is it possible, as one student of Heidegger’s had suggested, to think with and against Heidegger?

RELI GU4219 Colonialism and religion in South Asia. 4 points.

This course examines the conceptual trouble wrought by colonial rule in relation to boundaries, both of tradition and identity. We will begin by examining the category of ‘religion’ and how it emerged as an object of inquiry to understand and order life in the South Asian subcontinent. By exploring the wide-ranging effects of Orientalist knowledge production premised on secular historicity, this section of the course will help develop a shared set of concepts, which we will continuously encircle throughout. We will then question the role of this knowledge/power nexus in creating and reifying both notions of ‘fluid’ and ‘communal’ boundaries by studying the internal coherence and colonial inflection of several religious traditions in the subcontinent (Hinduism, Sikhism, Islam, and Buddhism). In concluding, we will consider how colonialism shifted the parameters of selfhood, creating new grounds, as well as reifying old ones, from which subjects came to contest the parameters of a given tradition.

Spring 2021: RELI GU4219

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4219	001/16637	T 4:10pm - 6:00pm Online Only	Jay Ramesh	4	8/15

RELI GU4220 Political Theology. 4 points.

Prerequisites: Prior coursework in Religion, MESAAS, political theory, or related field is advised.

This reading-intensive course will engage the notion of “political theology,” a phrase that emerges within the Western tradition (Varro, Augustine) and has become instrumental in thinking and institutionalizing the distinction between religion and politics over the course of the twentieth century. We will take as our point of departure the key texts that have revived this notion (Schmitt, Kantorowicz), and engage their interpretation of the Bible and of Augustine and medieval followers. We will then examine the role of Spinoza and Moses Mendelsohn, the extension of the notion of religion to “the East” (Said, Grosrichard, Asad), and conclude with some of the current debates over secularization in the colonizing and colonized world.

The main part of the course will be dedicated to the question of religion as it informs our thinking of disciplinary divisions. Is religion a sphere than can be isolated? How did it become so? What are the effects of this isolation?

RELI GU4222 Heidegger and Derrida. 4 points.

This seminar will explore the relationship between Heidegger and Derrida through a close reading of texts in which they consider common questions and issues. Works from both early and late Heidegger will be considered. An examination of Derrida’s writings on Heidegger reveals how he simultaneously appropriates and criticizes Heidegger in developing his critique of the western philosophical and theological tradition. Special

attention will be paid to their contrasting interpretations of time and their alternative accounts of the work of art. This course is a sequel to Hegel and Kierkegaard, though the previous course is not a prerequisite for this seminar.

RELI GU4224 Dialectics: Theology and Philosophy between Europe and Africa. 4 points.

What is dialectical reason? Is it still a mode of theological reasoning, as many critiques have argued, or a revolutionary form of secular critique? To what degree did it shape the language of revolutionary Marxism both in Europe and Africa, as the work of Fanon notably testifies? How does it still define the horizon of contemporary philosophy, French theory and postcolonial thinking? The class will address this question. Beginning with Hegel, it will trace the becoming of his legacy in Marx, Fanon, Sartre and contemporary issues in French theory and African philosophy.

RELI GU4228 South Asia and the Secular. 4 points.

This seminar explores different contestations and inflections of the secular in South Asia. We will begin by tracing a genealogy of the secular, which gave rise to a particular discursive grammar. Grounding ourselves in this formative space of the secular, we will study the constitutive nature of imperialism within the secular by examining the disciplining and conscripting role of Orientalism and the colonial state. Though noting these changes produced by colonial rule, this course also explores the arguments scholars of South Asia have made distinguishing between “secularisms” and the production of a tolerant and cosmopolitan South Asian orientation. In conjunction and against these possibilities, rather than consider the religious retrograde or communal, we will consider the continual striving toward political autonomy through disputation in the parameters of a given tradition—which resist incorporation into a broader pluralist or syncretic Indic model.

RELI GU4304 Krishna. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Study of a single deity in the Hindu pantheon as illuminated in art, music, dance, drama, theological treatises, patterns of ritual, and texts both classic and modern. Special attention to Krishna's consort Radha, to Krishna's reception in the West, and to his portrayal on Indian television.

RELI GU4307 BUDDHISM # DAOISM IN CHINA. 4.00 points.

Prerequisites: one course on Buddhism or Chinese religious traditions is recommended, but not required, as background. In recent decades, the study of the so-called “Buddho-Daoism” has become a burgeoning field that breaks down the traditional boundary lines drawn between the two Chinese religious traditions. In this course we will read secondary scholarship in English that probes the complex relationships between Buddhism and Daoism in the past two millennia. Students are required not only to be aware of the tensions and complementarity between them, but to be alert to the nature of claims to either religious purity or mixing and the ways those claims were put forward under specific religio-historical circumstances. The course is organized thematically rather than chronologically. We will address topics on terminology, doctrine, cosmology, eschatology, soteriology, exorcism, scriptural productions, ritual performance, miracle tales and visual representations that arose in the interactions of the two religions, with particular attention paid to critiquing terms such as “influence,” “encounter,” “dialogue,” “hybridity,” “syncretism,” and “repertoire.” The course is designed for both advanced undergraduate and graduate students in the fields of East Asian religion, literature, history, art history, sociology and anthropology. One course on Buddhism or Chinese religious traditions is recommended, but not required, as background

RELI GU4322 Exploring the Sharia: Topics in Islamic Law. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The platform of every modern Islamist political party calls for the implementation of the sharia. This term is invariably (and incorrectly) interpreted as an unchanging legal code dating back to 7th century Arabia. In reality, Islamic law is an organic and constantly evolving human project aimed at ascertaining God's will in a given historical and cultural context. This course offers a detailed and nuanced look at the Islamic legal methodology and its evolution over the last 1400 years. The first part of the semester is dedicated to classical Islamic jurisprudence, concentrating on the manner in which jurists used the Qur'an, the Sunna (the model of the Prophet), and rationality to articulate a coherent legal system. The second part of the course focuses on those areas of the law that engender passionate debate and controversy in the contemporary world. Specifically, we examine the discourse surrounding Islamic family (medical ethics, marriage, divorce, women's rights) and criminal (capital punishment, apostasy, suicide/martyrdom) law. The course concludes by discussing the legal implications of Muslims living as minorities in non-Islamic countries and the effects of modernity on the foundations of Islamic jurisprudence.

RELI GU4325 Sufism. 4 points.

Prerequisites: Permission of instructor.

This is a seminar for advanced undergraduate and graduate students who wish to gain an understanding of the richness of Sufism (Islamic mysticism). We will examine the historical origins, development and institutionalization of Sufism, including long-standing debates over its place within the wider Islamic tradition. By way of a close reading of a wide range of primary and secondary sources, we will examine Sufi attitudes toward the body, Sufi understandings of lineage, power and religious authority, as well as the continued importance of Sufism in the modern world

RELI GU4326 SUFISM IN SOUTH ASIA. 4.00 points.

Sufism or tassawuf has misleadingly been described as the mystical side of Islam, implying that it is somehow detached from the material world. Throughout the history of Islam, Sufi ideas, practices, and institutions have borne a complex, intimate, and sometimes fraught relationship with other aspects of Islamic tradition and practice, a relationship that has also been profoundly impacted by Orientalist scholarship in the colonial period and by global reformist currents in the postcolonial period. This seminar for advanced undergraduates and graduate students is an interdisciplinary investigation of how Sufism has been affected by the historical, sociocultural, political, and everyday environments in which it is experienced and practiced, with a particular focus on South Asia. Eclectic in approach, we will begin by considering how Sufism has been construed and even constructed by scholars, considering how modern notions of the self, religion, and the political have shaped scholarly understandings of what Sufism is. Focusing on bodily practices and well known individual Sufis who lived in South Asia during different historical periods, we will use them as a vehicle for understanding Sufi experience within the context of the evolving Sufi orders within specific local spaces. We will consider why Sufism has become such a target of controversy and ambivalence among Muslims in the modern world and trace some of the changing controversies and tensions that Sufis have struggled with over time, focusing on their understandings of self, society and reality

RELI GU4365 Revolutionary Women and Political Islam. 4 points.

Muslim female reformers and revolutionaries were at the forefront of many of the 20th and early 21st centuries' historic socio-political and religious movements across the Global South. Members of diverse classes, families, and ethnic communities, many worked within the tenets of Islam in multiple ways to construct religious identity and work towards achieving and demanding civil and political rights. Yet the myriad theoretical and popular discourses underpinning emergent and longstanding women's movements within revolutionary contexts are frequently overlooked. Moreover, representations of Muslim women too often rely on essentialist, ahistorical, static, victim-centered, and Orientalist descriptions and analyses. As a result, shades of difference in interpretation, ideology, practice, and culture are minimized. This course situates Muslim women as complex, multidimensional actors engaged in knowledge production and political and feminist struggles. We will read key texts and analyses from scholars and activists writing on religion, gender, sexuality, family planning, and women's status in the contemporary Global South. The following questions will emerge in our discussions: "When is a hejab just a hejab?," "Do Muslim Women Really Need Saving?," and "What is an 'Islamic Feminist' and Should We Care?" Readings include memoirs, editorials, ethnographies, and political treatises, as well as historical scholarship from North Africa, the Gulf, the Levant, and Southeast Asia.

RELI GU4407 Living Together: North American (Religious) Experiments. 3.00 points.

The purpose of this seminar is to study historical communal religious experiments in the United States. It will engage with the questions of religious counter-cultures, and in particular the ways that communal religious groups challenge mainstream economic, political, gender, racial, and sexual norms through fashioning alternative modes of living together. The seminar will concentrate on study and analysis of texts, practices, and materials from two religious groups, the Shakers and Father Divine's International Peace Mission. The questions raised in considering these two historical groups will be refocused in a final unit that compares these communities to the comparatively short lived and "secular" Occupy movement, and brings the issues and challenges of alternative forms of living into the present moment

RELI GU4411 Religion, Mind, and Science Fiction. 4 points.

While not yet fully recognized as a literary or philosophical genre, science fiction, through the "dislocation" it operates, raises (or amplifies) questions that have long been the preserve of religion, metaphysics, or philosophy, and it has brought some of these questions into the realm of popular culture. Science fiction is often perceived as hostile to religion, yet it often blurs the boundaries between science and religion. Recent

SF, unlike the traditional "space opera," revolves around the relations between the human mind and Artificial Intelligence — a challenge that our fast-evolving technoscientific society is confronting with a new sense of urgency. This course examines overlapping issues and questions shared by religion and SF.

RELI GU4412 RECOVERING PLACE. 4.00 points.

Fall 2020: RELI GU4412

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4412	001/21383	W 10:10am - 12:00pm Online Only	Mark Taylor	4.00	3/20

RELI GU4416 Empire and Secularization in Africa: Reform, Mission, Islam. 4 points.

This course examines how Empires paved the way to a new form of domination in Africa. Secularizing processes will be analyzed in relation to imperial histories in Africa. From the Expedition in Egypt to the Berlin Conference, Empires in Africa were both secular and religious. We will examine the multiple ways in which Empires colonized Africa by encountering, regulating or transforming African religious traditions. The class will compare historical geographies of "North Western" and "North Eastern" Africa by focusing on the Maghreb and West Africa but also on Egypt and Sudan. We will examine the relations of Empires with Islam and Christian missions in Africa. We will also examine how African uprisings challenge and challenged Imperial and State powers both before and during the Panafrikan movement. We will eventually look at both Imperial and Anti-Imperial legacies in Africa today.

RELI GU4417 Recovering Place. 4.00 points.

During the late 20th and early 21st centuries, the intersection of multiple disruptions has led to the loss of a sense of place. This has resulted in pervasive alienation and disorientation, which has led to a desire a growing desire to recover place. This course will examine the interplay between Displacement (Migration, Virtualization, Surveillance, Climate, Globalization) and Replacement (City, Rivers, Forests, Country). Special attention will be given to Displacement and Replacement in New York City. Students will have the opportunity to write a term paper or to create a project in an alternative medium

RELI GU4418 On African Theory: Religion, Philosophy, Anthropology. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

What is African Theory? Is a theory African simply because it is rooted in the political present of the continent? Is it African because it corresponds to an African cultural singularity or simply because its authors and inventors come from or live in Africa? This class will examine some central aspects of both African and African philosophy. We will study a) how religious traditions shape African theory b) how the influence of colonial anthropology on concepts of African culture and tradition can be challenged c) how African theory relates to African politics of decolonization, in North and "sub-Saharan"

Africa. The major dialectical problem we will examine during the class is the ongoing contradiction between claims of authenticity and demands of liberation, traditionalism and modernism, religion and secularism, culturalism and Marxism.

RELI GU4509 Crime and Punishment in Jewish Culture. 4 points.

Explores ethical, cultural, and political dimensions of Jewish criminal punishment from the Bible through modernity, with focus on death penalty and running reference to Foucault's *Discipline and Punish*. Topics include: interaction between law and narrative; Jewish power to punish; Sanhedrin trial of Jesus; ritualization of execution; prison; torture; martyrdom.

RELI GU4513 Buddhism and Neuroscience. 4 points.

With the Dalai Lama's marked interest in recent advances in neuroscience, the question of the compatibility between Buddhist psychology and neuroscience has been raised in a number of conferences and studies. This course will examine the state of the question, look at claims made on both sides, and discuss whether or not there is a convergence between Buddhist discourse about the mind and scientific discourse about the brain.

RELI GU4514 Defining Marriage. 4 points.

This seminar examines the changing purpose and meaning of marriage in the history of the United States from European colonization through contemporary debates over gay marriage. Topics include religious views of marriage, interracial marriage, and the political uses of the institution.

RELI GU4515 Reincarnation and Technology. 4 points.

A seminar exploring reincarnation, resurrection, and their contemporary cyber-relatives, uploading and simulation.

We'll explore Abrahamic, Amerind, Chinese, Greek, and Indian accounts, the Tibetan Buddhist reincarnation tradition and methodology in detail, and contemporary research on reincarnation, near-death, and out-of-body experiences. We will then turn to contemporary developments in science, religion, and philosophy concerning uploading consciousness to computer media and the probability that we are living a simulation. We will investigate whether religious traditions are consistent with or expressive of simulated reality, and the application of karma to all of the above.

RELI GU4516 The Politics of Freud in the Postcolony. 4 points.

This seminar examines the legacies of psychoanalysis through a critical exploration of how its concepts, practices and institutes have operated in colonial and postcolonial contexts. Weekly discussions will look at how practicing therapists, activists, anthropologists and others have extended, subverted and displaced psychoanalytic thought within non-European histories and imaginaries. Topics include challenges to the universality of the Oedipus emerging from early 20th century anthropologist's studies of kinship in Papua New Guinea, legacies of a self-made South Asian psychoanalyst's challenges to Freudian orthodoxies, and the study of a psychoanalysis of

racism forged out of a Martinican psychiatrist's encounters with colonial neuroses in Algeria. We will also explore how psychoanalytic concepts have been deployed in debates about repression and sexuality in daily life during the Cultural Revolution and the psychic legacies of Maoism in contemporary China. In addition to reading the work of Freud and his critics, we will encounter primary materials—religious texts, movies, novels—that have been subjected to psychoanalytically-infllected interpretations. While attending to the cultural, racial and political assumptions suffusing psychoanalysis, our seminar will also show how variously situated authors have given this tradition new applications and meanings.

RELI GU4517 After the Human. 4.00 points.

The advent of high-speed computing, Big Data, new forms of Artificial Intelligence, and global networking is rapidly transforming all aspects of life. Implants, transplants, genetic engineering, cloning, nanotechnology, cyborgs, hybrids, prostheses, mobile phones, tracking devices and wearable devices. The Internet of Things and the Internet of Bodies are becoming interconnected to transform what once was known as human being. These developments raise fundamental questions about what comes after the human. This course considers the philosophical and theological implications of this question by addressing the following issues: Natural vs. Artificial, Treatment vs. Enhancement, the Artificial Intelligence Revolution, Ubiquitous Computing, the Internet of Things, the Singularity, Extended Mind and Superintelligence, Internet of Bodies and Superorganisms, Death and After Life. Students will have the option of writing a term paper or doing a project related to the course readings

RELI GU4526 Food and Sex in Premodern Chinese Buddhism. 4 points.

This course is an upper-level seminar on appetite and its management, designed for advanced undergraduates and graduate students. Our focus will be on the appetites of food hunger and sexual desire, and how Chinese Buddhist teachings propose to manage these. Food and sex are separate domains of experience, but as the primary objects of bodily appetites, they are analogous. Eating and sex both involve a direct and substantive interaction with the material world that is driven by powerful desires. In Buddhist teachings, these desires are said to bind us to the cycle of rebirth (*saṃsāra*) and to shape the actions (karma), both mental and corporeal, that constitute our moral engagement with the phenomenal world. Hence it is important to know how a Buddhist on the path out of suffering is to manage these activities. What do monastic codes stipulate? What disciplines did lay Buddhists undertake? How are transgressions identified and handled? How do ancient Chinese and Daoist ideas inform the development of Chinese

Buddhist attitudes toward sex and diet? How did Chinese Buddhist monastics come to adopt a meatless diet? How do religions use food and sex as tools for determining one's ritual purity (i.e., moral worth)? We will explore these and related topics. Despite the common perception of Buddhism as a world-denying religion focused on transcending bodily needs, Chinese Buddhists (and their Indian or Central Asian counterparts) engaged in numerous body practices with worldly benefit, while at the same time mitigating the dangers of desire through various doctrinal and practical means. This course is an exploration of those means.

RELI GU4528 Religion and the Sexed Body. 4.00 points.

This seminar will examine how bodily practices associated with gender and sexualities are cultivated, regulated, and articulated within various religious traditions and how these practices have been influenced by global processes, including colonialism, the accelerating movement of people and technologies, and modern secularism and identity politics. Throughout the course we will tack back and forth between theoretical works and ethnographic/historical writing, in order to articulate what is probably the most difficult aspect of original research: how to bring together “high theory” and primary sources ranging from field research to data drawn from a variety of media

Spring 2021: RELI GU4528

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4528	001/13348	M W 2:10pm - 4:00pm Online Only	Katherine Ewing	4.00	9/15

RELI GU4535 Buddhist Contemplative Sciences. 4 points.

This course will explore key Buddhist contemplative sciences, including: stabilizing meditation; analytic insight meditation; the four immeasurables; form and formless trances; mind training; and the subtle body-mind states activated and transformed through advanced Tantric yoga techniques. These will be explored both within their traditional interdisciplinary frameworks, as well as in dialog with related contemporary arts and sciences.

RELI GU4562 Wittgenstein and Religion. 4 points.

Ludwig Wittgenstein is one of the most important philosophers of the twentieth century, and probably one of the most widely read by non-philosophers. His influence on a number of intellectual disciplines (philosophy, politics, theology, social science, history, etc.) has been considerable. This course will focus on Wittgenstein's own writings and their reception, with a focus on the study of religion and anthropology.

RELI GU4611 The Lotus Sutra in East Asian Buddhism. 4 points.

Prerequisites: open to students who have taken one previous course in either Buddhism, Chinese religions, or a history course on China or East Asian.

The course examines some central Mahayana Buddhist beliefs and practices through an in-depth study of the Lotus sutra. Schools (Tiantai/Tendai, Nichiren) and cultic practices such as sutra-chanting, meditation, confessional rites, and Guanyin

worship based on the scripture. East Asian art and literature inspired by it.

RELI GU4613 Silence. 4 points.

We live in a world of noise where incessant buzz and endless chatter are used as strategies of distraction deployed for political and economic purposes. Increasingly invasive technologies leave little time for quiet reflection and thoughtful deliberation. As the volume rises, silence becomes either a tactic for repression or a means of resistance.

This course will consider the question of silence from the perspectives of theology, philosophy, literature, politics, and art. Special attention will be paid to the role silence plays in different religious traditions. An effort will be made to create a dialogue among philosophical, theological literary, artistic, and film treatments of silence.

Questions to be considered include: How does the importance of silence change with time and place? What are the theological and metaphysical presuppositions of different interpretations of silence? What is the relation of changing technologies to the cultivation of, or resistance to silence? What are the psychological dimensions of different kinds of silence? What is the pedagogical value of silence? How can silence be expressed in music, the visual arts, and architecture? How does the importance of silence change in different social, political, and economic circumstances? Do we need more or less silence today?

RELI GU4615 Media and Religion. 4 points.

Typewriters, trains, electricity, telephones, telegraph, stock tickers, plate glass, shop windows, radio, television, computers, Internet, World Wide Web, cell phones, tablets, search engines, big data, social networks, GPS, virtual reality, Google glass. The technologies turn back on their creators to transform them into their own image. This course will consider the relationship between mechanical, electronic, and digital technologies and different forms of twentieth-century capitalism. The regimes of industrial, consumer, and financial shape the conditions of cultural production and reproduction in different ways. The exploration of different theoretical perspectives will provide alternative interpretations of the interplay of media, technology, and religion that make it possible to chart the trajectory from modernity to postmodernity and beyond.

RELI GU4616 Technology, Religion, Future. 4 points.

This seminar will examine the history of the impact of technology and media on religion and vice versa before bringing into focus the main event: religion today and in the future. We'll read the classics as well as review current writing, video and other media, bringing thinkers such as Eliade, McLuhan, Mumford and Weber into dialogue with the current writing of Kurzweil, Lanier and Taylor, and look at, among other things: ethics in a Virtual World; the relationship between Burning Man, a potential new religion, and technology; the relevance of God and The Rapture in Kurzweil's Singularity; and what will become of karma when

carbon-based persons merge with silicon-based entities and other advanced technologies.

Spring 2021: RELI GU4616

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

RELI GU4617 Image Theories in Chinese Religions. 4 points.

What does “image” mean in Chinese intellectual traditions? How did proponents of different religious persuasions construe the relationship between images and their referents differently and how did such construal change over time? Why did the practice of fashioning images often give rise to controversies in Chinese history? What makes images the object of adoration as well as destruction? Throughout the course, we will tackle these questions from diverse perspectives. The first half of the course examines a variety of accounts from Chinese indigenous classics and treatises. The second half looks at how discourses of the image further diversified after the arrival of Buddhism in China.

RELI GU4619 Islam in Popular Culture. 4.00 points.

This course interrogates seminal issues in the academic study of Islam through its popular representation in various forms of media from movies and television to novels and comic books. The class is structured around key theoretical readings from a range of academic disciplines ranging from art history and anthropology to comparative literature and religion. The course begins by placing the controversies surrounding the visual depiction of Muhammad in historical perspective (Gruber). This is followed by an examination of modern portrayals of Muslims in film that highlights both the vilification of the “other” (Shaheen) and the persistence of colonial discourses centered on the “native informant” (Mamdani). Particular emphasis is given to recent pop cultural works that challenge these simplistic discourses of Islam. The second half of the course revisits Muhammad, employing an anthropological framework (Asad) to understand the controversies surrounding Salman Rushdie’s *Satanic Verses*. The obsession with a gendered depiction of Islam is then examined through an anthropological framework that sheds light on the problems of salvation narratives (Abu Lughod). The course ends with a look at the unique history of Islam in America, particularly the tension between immigrant and African-American communities

Spring 2021: RELI GU4619

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4619	001/00689	Th 4:10pm - 6:00pm Room TBA	Najam Haider	4.00	9/12

RELI GU4626 READING (IN THEORY). 3.00 points.

This reading-intensive course will engage, over time with essential texts of the current critical canon. Offered over a series of semesters, it is aimed at developing a practice of reading: close or distant, and always attentive. Let us say: slow reading. What does it mean to read? Where and when does

reading start? Where does it founder? What does reading this author (Freud, for example) or that author (say, Foucault) do to the practice of reading? Can we read without misreading? Can we read for content or information without missing the essential? Is there such a thing as essential reading? Favoring a demanding and strenuous exposure to the text at hand, this course promises just that: a demanding and strenuous exposure to reading. The course can be repeated for credit

RELI GU4630 Indo-Tibetan Buddhist Philosophy. 4 points.
Examination of topics in the religious philosophy of Tibet.

RELI GU4637 Talmudic Narrative. 4 points.

This course examines the rich world of Talmudic narrative and the way it mediates between conflicting perspectives on a range of topics: life and death; love and sexuality; beauty and superficiality; politics and legal theory; religion and society; community and non-conformity; decision-making and the nature of certainty. While we examine each text closely, we will consider different scholars’ answers – and our own answers – to the questions, how are we to view Talmudic narrative generally, both as literature and as cultural artifact?

RELI GU4807 Divine Human Animal. 4 points.

This course focuses on “thinking with” animals (Levi-Strauss) through the lens of the religious imagination. The concentration will be primarily on “Western” religious cultures, especially Judaism and the question of Jewishness.

RELI GU4998 Religion and the Indian Wars. 4 points.

The frontier is central to the United States’ conception of its history and place in the world. It is an abstract concept that reflects the American mythology of progress and is rooted in religious ideas about land, labor, and ownership. Throughout the nineteenth century, these ideas became more than just abstractions. They were tested, hardened, and revised by U.S. officials and the soldiers they commanded on American battlefields. This violence took the form of the Civil War as well as the series of U.S. military encounters with Native Americans known as the Indian Wars. These separate yet overlapping campaigns have had profound and lasting consequences for the North American landscape and its peoples.

This course explores the relationship between religious ideology and violence in the last half of nineteenth century. Organized chronologically and geographically, we will engage with both primary sources and classic works in the historiography of the Indian Wars to examine how religion shaped U.S. policy and race relations from the start of the Civil War through approximately 1910.

RELI GU4999 GLOBAL INDIGENOUS RELIGIOUS HISTORIES. 4.00 points.

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of lacking religion; as pagan, barbarian, non-modern, and without history or civilization. Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative

SLAVIC LANGUAGES

Departmental Office: 708 Hamilton; 212-854-3941
<http://www.columbia.edu/cu/slavic/>

Director of Undergraduate Studies:

Prof. Jessica Merrill, 715 Hamilton Hall; 212-854-3941;
jem2159@columbia.edu

Russian Language Program Director:

Prof. Alla Smyslova, 708 Hamilton; 212-854-8155;
as2157@columbia.edu

The Department of Slavic Languages and Literatures is devoted to the study of the cultures, literatures, and languages of Russia and other Slavic peoples and lands. We approach our study and teaching of these cultures with an eye to their specificity and attention to their interaction with other cultures, in history and in the contemporary global context. We focus not only on the rich literary tradition, but also on the film, theater, politics, art, music, media, religious thought, critical theory, and intellectual history of Russians and other Slavs. Our approach is interdisciplinary.

Students who take our courses have different interests. Many of our courses are taught in English with readings in English and have no prerequisites. As a consequence, our majors and concentrators are joined by students from other literature departments, by students of history and political science who have a particular interest in the Slavic region, and by others who are drawn to the subject matter for a variety of intellectual and practical reasons.

We provide instruction in Russian at all levels (beginning through very advanced), with a special course for heritage speakers. To improve the proficiency of Russian learners and speakers, we offer a number of literature and culture courses in which texts are read in the original and discussion is conducted in Russian. We offer three levels of other Slavic languages: Bosnian-Croatian-Serbian, Czech, Polish, and Ukrainian (with additional courses in culture in English). All language courses in the Slavic Department develop the four basic language skills (speaking, listening, reading, and writing) and cultural understanding.

Our department prides itself on the intellectual vitality of its program and on the sense of community among students and faculty. As they explore Russian and Slavic languages, literatures, and cultures, students develop not only their specific knowledge and cultural understanding, but also the capacity for critical thought, skills in analyzing literary and other texts, and the ability to express their ideas orally and in writing. Our graduates have used their knowledge and skills in different ways: graduate school, Fulbright and other fellowships, journalism, publishing, law school, NGO work, public health, government work, and politics. Our faculty is proud of its students and graduates.

MAJORS AND CONCENTRATIONS

Guided by the director of undergraduate studies and other faculty members, students majoring in Slavic create a program that suits their intellectual interests and academic goals. They choose from three tracks: Russian Language and Culture (for those with a strong interest in mastering the language), Russian Literature and Culture (for those who want to focus on literary and cultural studies), and Slavic Studies (a flexible regional studies major for those interested in one or more Slavic cultures). In each major, students may count related courses in other departments among their electives.

In addition to its majors, the department offers five concentrations. Three are analogous to the major tracks (Russian Language and Culture, Russian Literature and Culture, and Slavic Studies). There is also a concentration in Russian Literature that does not require language study and another concentration in Slavic Cultures that allows students to focus on a Slavic language and culture other than Russian.

Motivated seniors are encouraged but not required to write a senior thesis. Those who write a thesis enroll in the Senior Seminar in the fall term and work individually with a thesis adviser. Students have written on a wide range of topics in literature, culture, media, and politics.

SLAVIC CULTURE AT COLUMBIA OUTSIDE OF THE CLASSROOM

All interested students are welcome to take part in departmental activities, such as conversation hours, Slavic student organizations, the department's various film series (Russian, East Central European, Central Asian, and Ukrainian), and the

country's first undergraduate journal of Eastern European and Eurasian Culture, *The Birch*. The Slavic Department has close ties to the Harriman Institute and the East Central European Center, which sponsor lectures, symposia, performances, and conferences.

STUDY AND RESEARCH ABROAD

The department encourages its students to enrich their cultural knowledge and develop their language skills by spending a semester or summer studying in Russia, the Czech Republic, Poland, Ukraine, or the countries of the former Yugoslavia. The department helps students find the program that suits their needs and interests. Undergraduates may apply to the Harriman Institute for modest scholarships for research during winter/spring breaks or the summer.

ADVANCED/NEWL PLACEMENT

A score of 5 on the AP/NEWL Russian exam satisfies the foreign language requirement. Upon successful completion of a 3-point 3000 level (or higher) course at Columbia, the Department of Slavic Languages will award 3 points of AP credit, provided the grade in the course is a B or better. Courses taught in English may not be used to earn AP credit. No credit or placement is given for the SAT II Subject test. If you wish to continue with Russian at Columbia, you should take the departmental placement test and speak with the Russian program director prior to registration to ensure proper placement.

GUIDELINES FOR ALL SLAVIC MAJORS AND CONCENTRATORS

Senior Thesis

A senior thesis is not required for any Slavic major. Students who wish to undertake a thesis project should confer with the director of undergraduate studies during the registration period in April of their junior year and register to take RUSS UN3595 Senior Seminar in the fall term of their senior year. Students can opt to expand the thesis into a two-semester project register for RUSS UN3998 Supervised Individual Research, with their thesis adviser, in the spring term of their senior year. *Senior Seminar* may satisfy one elective requirement; the optional second semester of thesis work adds one course to the 15 required for the major.

Grading

Courses in which a grade of D has been received do not count toward major or concentration requirements.

MAJOR IN RUSSIAN LANGUAGE AND CULTURE

This major is intended for students who aim to attain maximal proficiency in the Russian language. Intensive language training is complemented by an array of elective courses in Russian culture that allow students to achieve critical understanding of contemporary Russian society and of Russian-speaking communities around the world. Since this major emphasizes language acquisition, it is not appropriate for native Russian speakers.

The program of study consists of 15 courses, distributed as follows:

Eight semesters of coursework in Russian language (from first- through fourth-year Russian) or the equivalent

Select two of the following surveys; at least one of these should be a Russian literature survey (RUSS UN3220 or RUSS UN3221):

RUSS UN3220	Literature and Empire: The Reign of the Novel in Russia (19th Century) [In English]
RUSS UN3221	LIT # REVOLUTION (20TH C LIT)
RUSS UN3223	Magical Mystery Tour: The Legacy of Old Rus'
SLCL UN3001	Slavic Cultures

RUSS GU4006	Russian Religious Thought, Praxis, and Literature
CLRS GU4022	Russia and Asia: Orientalism, Eurasianism, Internationalism
RUSS GU4107	Russian Literature and Culture in the New Millennium

Five additional courses in Russian culture, history, literature, art, film, music, or in linguistics, chosen in consultation with the director of undergraduate studies. At least one of the selected courses should be taught in Russian

MAJOR IN RUSSIAN LITERATURE AND CULTURE

The goal of this major is to make students conversant with a variety of Russian literary, historical and theoretical texts in the original, and to facilitate a critical understanding of Russian literature, culture, and society. It is addressed to students who would like to complement serious literary studies with intensive language training, and is especially suitable for those who intend to pursue an academic career in the Slavic field.

The program of study consists of 15 courses, distributed as follows:

Six semesters of coursework in Russian language (from first-through third-year Russian) or the equivalent.

Select three of the following surveys; two of which must be in Russian literature (RUSS UN3220 and RUSS UN3221)

RUSS UN3220	Literature and Empire: The Reign of the Novel in Russia (19th Century) [In English]
RUSS UN3221	LIT # REVOLUTION (20TH C LIT)
RUSS UN3223	Magical Mystery Tour: The Legacy of Old Rus'
SLCL UN3001	Slavic Cultures
RUSS GU4006	Russian Religious Thought, Praxis, and Literature
CLRS GU4022	Russia and Asia: Orientalism, Eurasianism, Internationalism
RUSS GU4107	Russian Literature and Culture in the New Millennium

Six additional courses in Russian literature, culture, history, film, art, music, or in advanced Russian language, chosen in consultation with the director of undergraduate studies. At least one course should be taught in Russian

Students considering graduate study in Russian literature are strongly advised to complete four years of language training.

MAJOR IN SLAVIC STUDIES

This flexible major provides opportunities for interdisciplinary studies within the Slavic field. Students are encouraged to choose one target language (Bosnian-Croatian-Serbian, Czech, Polish, Russian, or Ukrainian), though there are possibilities

for studying a second Slavic language as well. Generally, the major has one disciplinary focus in history, political science, economics, religion, anthropology, sociology, art, film, or music. In addition, this program allows students to focus on a particular Slavic (non-Russian) literature and culture or to do comparative studies of several Slavic literatures, including Russian. Students should plan their program with the director of undergraduate studies as early as possible, since course availability varies from year to year.

The program of study consists of 15 courses, distributed as follows:

Six semesters of coursework in one Slavic language (from first- through third-year Russian, Bosnian-Croatian-Serbian, Czech, Polish, or Ukrainian) or the equivalent.

Two relevant courses in Russian, East/Central European or Eurasian history.

Two relevant literature or culture courses in Slavic, preferably related to the target language.

Five additional courses with Slavic content in history, political science, economics, literature, religion, anthropology, sociology, art, film, or music, chosen in consultation with the director of undergraduate studies. Two of these electives may be language courses for students who opt to include a second Slavic language in their program.

Altogether students should complete four courses in a single discipline, including, if appropriate, the required history or literature/culture courses.

CONCENTRATION IN RUSSIAN LANGUAGE AND CULTURE

This program is intended for students who aim to attain proficiency in the Russian language. Intensive language training is complemented by an array of elective courses in Russian culture that allow students to achieve critical understanding of contemporary Russian society and of Russian-speaking communities around the world. Since this concentration emphasizes language acquisition, it is not appropriate for native Russian speakers.

The program of study consists of 10 courses, distributed as follows:

Six semesters of coursework in Russian language (from first-through third-year Russian) or the equivalent.

Select one of the following surveys:

SLCL UN3001	Slavic Cultures
RUSS UN3220	Literature and Empire: The Reign of the Novel in Russia (19th Century) [In English]
RUSS UN3221	LIT # REVOLUTION (20TH C LIT)
RUSS UN3223	Magical Mystery Tour: The Legacy of Old Rus'

CLRS GU4022 Russia and Asia: Orientalism, Eurasianism, Internationalism

Three additional courses in Russian culture, history, literature, art, film, music, or in linguistics, chosen in consultation with the director of undergraduate studies; at least one of the selected courses should be taught in Russian.

RUSS GU4107 Russian Literature and Culture in the New Millennium

CONCENTRATION IN SLAVIC (NON-RUSSIAN) LANGUAGE AND CULTURE

This program is intended for students who aim to attain proficiency in a Slavic language other than Russian. Intensive language training is complemented by an array of elective courses in Slavic cultures that allow students to achieve critical understanding of the communities that are shaped by the Slavic language of their choice. Since this concentration emphasizes language acquisition, it is not appropriate for native speakers of the target language.

The program of study consists of 10 courses, distributed as follows:

Six semesters of coursework in one Slavic language (from first- through third-year Bosnian-Croatian-Serbian, Czech, Polish, or Ukrainian) or the equivalent.

Four additional courses in Slavic literature, culture or history, or in linguistics, chosen in consultation with the director of undergraduate studies; at least two should be directly related to the target language of study.

CONCENTRATION IN RUSSIAN LITERATURE AND CULTURE

The goal of this concentration is to make students conversant with a variety of Russian literary texts and cultural artifacts that facilitate a critical understanding of Russian culture. It is addressed to students who would like to combine language training with study of the Russian literary tradition.

The program of study consists of 10 courses, distributed as follows:

Four semesters of coursework in Russian language (first- and second-year Russian) or the equivalent.

Select two of the following surveys; one of which must be a literature survey (RUSS UN3220 or RUSS UN3221)

RUSS UN3220 Literature and Empire: The Reign of the Novel in Russia (19th Century) [In English]

RUSS UN3221 LIT # REVOLUTION (20TH C LIT)

RUSS UN3223 Magical Mystery Tour: The Legacy of Old Rus'

RUSS GU4006 Russian Religious Thought, Praxis, and Literature

SLCL UN3001 Slavic Cultures

CLRS GU4022 Russia and Asia: Orientalism, Eurasianism, Internationalism

RUSS GU4107 Russian Literature and Culture in the New Millennium

Four additional courses in Russian literature, culture, and history, chosen in consultation with the director of undergraduate studies.

CONCENTRATION IN SLAVIC STUDIES

This flexible concentration provides opportunities for interdisciplinary studies within the Slavic field. Students are encouraged to choose one target language (Bosnian-Croatian-Serbian, Czech, Polish, Russian, or Ukrainian), and one disciplinary focus in history, political science, economics, religion, anthropology, sociology, art, film, or music. In addition, this program allows students to focus on a particular Slavic (non-Russian) literature and culture, or to do comparative studies of several Slavic literatures, including Russian.

The program of study consists of 10 courses, distributed as follows:

Four semesters of coursework in one Slavic language (first- and second-year Bosnian-Croatian-Serbian, Czech, Polish, Russian, or Ukrainian) or the equivalent.

One relevant courses in Russian, East/Central European or Eurasian history.

One relevant literature or culture course in Slavic, preferably related to the target language.

Four additional courses with Slavic content in history, political science, economics, literature, religion, anthropology, sociology, art, film, or music, chosen in consultation with the director of undergraduate studies

Altogether students should complete three courses in a single discipline, including, if appropriate, the required history or literature/culture courses.

CONCENTRATION IN RUSSIAN LITERATURE

This concentration is addressed to serious literature students who would like to pursue Russian literature but have no training in Russian. It allows students to explore the Russian literary tradition, while perfecting their critical skills and their techniques of close reading in a variety of challenging courses in translation.

The program of study consists of 8 courses, with no language requirements, distributed as follows:

Select two of the following Russian literature surveys (in translation):

RUSS UN3220 Literature and Empire: The Reign of the Novel in Russia (19th Century) [In English]

RUSS UN3221 LIT # REVOLUTION (20TH C LIT)

Six additional courses, focused primarily on Russian literature, culture, and history, though courses in other Slavic literatures are also acceptable if approved by the director of undergraduate studies.

Relevant literature courses from other departments may count toward the concentration only if approved by the director of undergraduate studies.

BOSNIAN/CROATIAN/SERBIAN LANGUAGE AND LITERATURE

BCRS UN1101 Elementary Bosnian/Croatian/Serbian I. 4 points.

Essentials of the spoken and written language. Prepares students to read texts of moderate difficulty by the end of the first year.

Fall 2020: BCRS UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 1101	001/10534	M W F 10:10am - 11:25am Online Only	Aleksandar Boskovic	4	14/12

BCRS UN1102 Elementary Bosnian/Croatian/Serbian II. 4 points.

Essentials of the spoken and written language. Prepares students to read texts of moderate difficulty by the end of the first year.

Spring 2021: BCRS UN1102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 1102	001/10124	M W F 10:10am - 11:25am Online Only	Aleksandar Boskovic	4	9/12

BCRS UN2101 Intermediate Bosnian/Croatian/Serbian I. 3 points.

Prerequisites: BCRS UN1102 or the equivalent.

Readings in Serbian/Croatian/Bosnian literature in the original, with emphasis depending upon the needs of individual students.

Fall 2020: BCRS UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 2101	001/10535	M W F 11:40am - 12:55pm Online Only	Aleksandar Boskovic	3	5/12

BCRS UN2102 Intermediate Bosnian/Croatian/Serbian II. 3 points.

Prerequisites: BCRS UN1102 or the equivalent.

Readings in Serbian/Croatian/Bosnian literature in the original, with emphasis depending upon the needs of individual students. This course number has been changed to BCRS 2102

Spring 2021: BCRS UN2102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 2102	001/10125	M W F 11:40am - 12:55pm Online Only	Aleksandar Boskovic	3	6/12

BCRS GU4002 (Dis)integration in Frames: Race, Ethnicity and gender Issues in Yugoslav and Post Yugoslav Cinemas. 3 points.

This course investigates the complex relationship between aesthetics and ideology in Yugoslav and post-Yugoslav cinema. Specifically, it examines the variety of ways in which race, ethnicity, gender inequality, and national identity are approached, constructed, promoted, or contested and critically dissected in film texts from the Socialist Federative Republic of Yugoslavia (SFRY) and its successor states (Bosnia, Croatia, Serbia, FYR Macedonia). The course has four thematic units and is organized chronologically.

BCRS GU4331 Advanced Bosnian/Croatian/Serbian I. 3 points.

Prerequisites: BCRS UN2102

Further develops skills in speaking, reading, and writing, using essays, short stories, films, and fragments of larger works. Reinforces basic grammar and introduces more complete structures.

Fall 2020: BCRS GU4331

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 4331	001/10536	M W 1:10pm - 2:25pm Online Only	Aleksandar Boskovic	3	0/12

BCRS GU4332 Advanced Bosnian/Croatian/Serbian II. 3 points.

Prerequisites: BCRS UN2102

Further develops skills in speaking, reading, and writing, using essays, short stories, films, and fragments of larger works. Reinforces basic grammar and introduces more complete structures.

Spring 2021: BCRS GU4332

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 4332	001/10126	M W 1:10pm - 2:25pm Online Only	Aleksandar Boskovic	3	0/12

COMPARATIVE LITERATURE - CZECH

CLCZ GU4020 Czech Culture Before Czechoslovakia. 3 points.

Not offered during 2020-21 academic year.

Prerequisites: sophomore standing or the instructor's permission.

An interpretive cultural history of the Czechs from earliest times to the founding of the first Czechoslovak republic in 1918. Emphasis on the origins, decline, and resurgence of Czech national identity as reflected in the visual arts, architecture, music, historiography, and especially the literature of the Czechs.

CLCZ GU4030 Postwar Czech Literature [in English]. 3 points.

A survey of postwar Czech fiction and drama. Knowledge of Czech not necessary. Parallel reading lists available in translation and in the original.

Fall 2020: CLCZ GU4030

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLCZ 4030	001/10422	T Th 2:40pm - 3:55pm Online Only	Christopher Harwood	3	4/15

CLCZ GU4035 The Writers of Prague. 3 points.

A survey of the Czech, German, and German-Jewish literary cultures of Prague from 1910 to 1920. Special attention to Hašek, Čapek, Kafka, Werfel, and Rilke. Parallel reading lists available in English and in the original.

CLCZ GU4038 Prague Spring of '68 in Film and Literature [In English]. 3 points.

The course explores the unique period in Czech film and literature during the 1960s that emerged as a reaction to the imposed socialist realism. The new generation of writers (Kundera, Skvorecký, Havel, Hrabal) in turn had an influence on young emerging film makers, all of whom were part of the Czech new wave.

COMPARATIVE LITERATURE - POLISH

CLPL GU4042 Bestsellers of Polish Literature. 3 points. Not offered during 2020-21 academic year.

A study of the 20th-century Polish novel during its most invigorated, innovative inter-war period. A close study of the major works of Kuncewiczowa, Choromanski, Wittlin, Unilowski, Kurek, Iwaskiewicz, Gombrowicz, and Schulz. The development of the Polish novel will be examined against the background of new trends in European literature, with emphasis on the usage of various narrative devices. Reading knowledge of Polish desirable but not required. Parallel reading lists are available in the original and in translation.

CLPL GU4040 Mickiewicz. 3 points.

Not offered during 2020-21 academic year.

The Polish literary scene that in this particular period stretched from Moscow, Petersburg, and Odessa, to Vilna, Paris, Rome. The concept of exile, so central to Polish literature of the 19th-century and world literature of the 20th will be introduced

and discussed. The course will offer the opportunity to see the new Romantic trend initially evolving from classicism, which it vigorously opposed and conquered. We will examine how the particular literary form - sonnet, ballad, epic poem and the romantic drama developed on the turf of the Polish language. Also we will see how such significant themes as madness, Romantic suicide, Romantic irony, and elements of Islam and Judaism manifested themselves in the masterpieces of Polish poetry. The perception of Polish Romanticism in other, especially Slavic, literatures will be discussed and a comparative approach encouraged. Most of the texts to be discussed were translated into the major European languages. Mickiewicz was enthusiastically translated into Russian by the major Russian poets of all times; students of Russian may read his works in its entirety in that language. The class will engage in a thorough analysis of the indicated texts; the students' contribution to the course based on general knowledge of the period, of genres, and/or other related phenomena is expected.

CLPL GU4300 The Polish Novel After 1989. 3 points. Not offered during 2020-21 academic year.

This seminar is designed to offer an overview of Post-1989 Polish prose. The literary output of what is now called post-dependent literature demonstrates how political transformations influenced social and intellectual movements and transformed the narrative genre itself. The aesthetic and formal developments in Polish prose will be explored as a manifestation of a complex phenomenon bringing the reassessment of national myths, and cultural aspirations. Works by Dorota Masłowska, Andrzej Stasiuk, Paweł Huelle, Olga Tokarczuk, Magdalena Tulik and others will be read and discussed. Knowledge of Polish not required.

CLPL GU4301 Survey of Polish Literature and Culture. 3 points.

This course introduces and explores key works, traditions, and tendencies in Polish literature and culture from the Middle Ages to the present. Focusing in particular on the monuments of Polish literature, the course embeds them in historical context and places them in dialog with important ideas and trends in both Polish and European culture of their time. The aim is to engender and establish an understanding of Poland's position on the literary and cultural map of Europe. In addition to literature, works of history, political science, film, and the performing arts will be drawn on for course lecture and discussion. No prerequisites. Readings in English.

COMPARATIVE LITERATURE - SLAVIC

CLSL UN3304 How To Read Violence: The Literature of Power, Force and Brutality from 20th Century Russia and America. 3 points.

This course seeks to understand how authors and filmmakers in the 20th century communicate the experience of violence to their audiences. We will discuss how fragmentation, montage, language breakdown and other techniques not only depict violence, but reflect that violence in artistic forms. We

will also ask what representing violence does to the artistic work. Can the attempt to convey violence become an act of violence in itself? We will consider texts from Vladimir Mayakovsky, John Dos Passos, Andrei Platonov, Vasiliy Grossman, Allen Ginsberg, Anna Akhmatova, Richard Wright, Cormac McCarthy, Vladimir Sorokin, as well as films from Sergei Eisenstein, Alexei Balabanov and Quentin Tarantino. Full course description and syllabus available at readingviolence.weebly.com.

CLSL GU4003 Central European Drama in the Twentieth Century. 3 points.

Focus will be on the often deceptive modernity of modern Central and East European theater and its reflection of the forces that shaped modern European society. It will be argued that the abstract, experimental drama of the twentieth-century avant-garde tradition seems less vital at the century's end than the mixed forms of Central and East European dramatists.

CLSL GU4004 Introduction to Twentieth-Century Central European Fiction. 3 points.

This course introduces students to works of literature that offer a unique perspective on the tempestuous twentieth century, if only because these works for the most part were written in "minor" languages (Czech, Polish, Hungarian, Serbian), in countries long considered part of the European backwaters, whose people were not makers but victims of history. Yet the authors of many of these works are today ranked among the masters of modern literature. Often hailing from highly stratified, conservative societies, many Eastern and Central European writers became daring literary innovators and experimenters. To the present day, writers from this "other" Europe try to escape history, official cultures, politics, and end up redefining them for their readers. We will be dealing with a disparate body of literature, varied both in form and content. But we will try to pinpoint subtle similarities, in tone and sensibility, and focus, too, on the more apparent preoccupation with certain themes that may be called characteristically Central European.

CLSL GU4008 Slavic Avant-Garde Surfaces. 3 points.
Not offered during 2020-21 academic year.

This lecture course will provide a punctual survey of the major trends and figures in the interwar visual culture and avant-garde poetry of the Soviet Russia and East Central Europe (Poland, Czechoslovakia, Hungary, and Yugoslavia), including the opulent field of their intersection. Topics include various interfaces of visual culture and graphic arts, such as public spaces, walls, propaganda trains, windows, postcards, posters, books, and screens. The course will address the innovative use of typography and photography, typophoto and photomontage, as well as the short written and hybrid genres such as manifesto, cinepoetry, photo essay, and photo frescoes. We will discuss poets and artists such as Mayakovsky, Lissitsky, Rodchenko, Klutis, Vertov, Teige, Nezval, Sutnar, Štirsky, Szczuka, Stern, Themersons, Kassák, Kertész, Moholy-Nagy, Goll, Micić,

VuÄo, Matić. Each session will include a lecture followed by discussion.

CLSL GU4075 Soviet and Post-Soviet, Colonial and Post Colonial Film. 3 points.

The course will discuss how filmmaking has been used as an instrument of power and imperial domination in the Soviet Union as well as on post-Soviet space since 1991. A body of selected films by Soviet and post-Soviet directors which exemplify the function of filmmaking as a tool of appropriation of the colonized, their cultural and political subordination by the Soviet center will be examined in terms of postcolonial theories. The course will focus both on Russian cinema and often overlooked work of Ukrainian, Georgian, Belarusian, Armenian, etc. national film schools and how they participated in the communist project of fostering a «new historic community of the Soviet people» as well as resisted it by generating, in hidden and, since 1991, overt and increasingly assertive ways their own counter-narratives. Close attention will be paid to the new Russian film as it re-invents itself within the post-Soviet imperial momentum projected on the former Soviet colonies.

Fall 2020: CLSL GU4075

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLSL 4075	001/10454	T 6:10pm - 10:00pm Online Only	Yuri Shevchuk	3	10/25

CLSS GU4101 Balkan as a Metaphor. 3 points.

This seminar for graduate and advanced undergraduate students has two main objectives. First, it is to critically assess competing and conflicting conceptions of the Balkans, Balkanism, and Balkanization. Second, it engages with border studies, a vast and thriving field that makes sense of widely different and constantly changing definitions of the border. The course's case studies focus on the region of the former Yugoslavia across the disciplines currently recognized as the humanities and social sciences. We will examine what those disciplinary borders do to the different types of borders we have chosen to analyze. We will discuss the concepts of copy and imitation in relation to Balkan arts and politics in the contemporary globalized world. We will explore documentary film and performance art representations of how refugees, migrant minorities, and borderline populations counter marginalizations and trauma.

CLSL GU4995 Central European Jewish Literature: Assimilation and Its Discontents. 3 points.

Examines prose and poetry by writers generally less accessible to the American student written in the major Central European languages: German, Hungarian, Czech, and Polish. The problematics of assimilation, the search for identity, political commitment and disillusionment are major themes, along with the defining experience of the century: the Holocaust; but because these writers are often more removed from their Jewishness, their perspective on these events and issues may be different. The influence of Franz Kafka on Central European

writers, the post-Communist Jewish revival, defining the Jewish voice in an otherwise disparate body of works.

COMPARATIVE LITERATURE – RUSSIAN

CLRS UN3309 Fact and Fiction: The Document in Russian and American Literature. 3 points.

“Truth is stranger than fiction,” wrote Mark Twain in 1897. It is an axiom more relevant today than ever before, as more and more writers draw on “true events” for their literary works. Svetlana Alexievich, 2015 winner of the Nobel Prize for Literature, goes so far as to insist that “there are no borders between fact and fabrication, one flows into the other” in contemporary literature. In this course we read works from Russian and American literature that dance along this line between fact and fiction. Sometimes called “creative non-fiction,” “literary journalism,” or “documentary prose,” these works (Sergei Tretiakov, Viktor Shklovsky, Truman Capote, Tom Wolfe, John McPhee, Artem Borovik, and others) blur the boundaries between documentary evidence and literary art. No prerequisites.

CLRS GU4011 Dostoevsky, Tolstoy, and the English Novel [in English]. 3 points.

A close reading of works by Dostoevsky (*Netochka Nezvanova*; *The Idiot*; “A Gentle Creature”) and Tolstoy (*Childhood*, *Boyhood*, *Youth*; “Family Happiness”; *Anna Karenina*; “The Kreutzer Sonata”) in conjunction with related English novels (Bronte’s *Jane Eyre*, Eliot’s *Middlemarch*, Woolf’s *Mrs. Dalloway*). No knowledge of Russian is required.

Fall 2020: CLRS GU4011

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLRS 4011	001/10417	M W 10:10am - 11:25am Online Only	Liza Knapp	3	34/56

CLRS GU4017 Chekhov [English]. 3 points.

A close reading of Chekhov’s best work in the genres on which he left an indelible mark (the short story and the drama) on the subjects that left an indelible imprint on him (medical science, the human body, identity, topography, the nature of news, the problem of knowledge, the access to pain, the necessity of dying, the structure of time, the self and the world, the part and the whole) via the modes of inquiry (diagnosis and deposition, expedition and exegesis, library and laboratory, microscopy and materialism, intimacy and invasion) and forms of documentation (the itinerary, the map, the calendar, the photograph, the icon, the Gospel, the Koan, the lie, the love letter, the case history, the obituary, the pseudonym, the script) that marked his era (and ours). No knowledge of Russian required.

CLRS GU4022 Russia and Asia: Orientalism, Eurasianism, Internationalism. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores the formation of Russian national and imperial identity through ideologies of geography, focusing on a series of historical engagements with the concept of “Asia.” How has the Mongol conquest shaped a sense of Russian identity as something distinct from Europe? How has Russian culture participated in Orientalist portrayals of conquered Asian lands, while simultaneously being Orientalized by Europe and, indeed, Orientalizing itself? How do concepts of Eurasianism and socialist internationalism, both arising in the early 20th century, seek to redraw the geography of Russia’s relations with East and West? We will explore these questions through a range of materials, including: literary texts by Russian and non-Russian writers (Pushkin, Lermontov, Tolstoy, Solovyov, Bely, Blok, Pilnyak, Khlebnikov, Planotov, Xiao Hong, Kurban Said, Aitimatov, Iskander, Borsky); films (Eisenstein, Tarkovsky, Kalatozov, Paradjanov, Mikhalkov); music and dance (the Ballets Russes); visual art (Vereshchagin, Roerich); and theoretical and secondary readings by Chaadaev, Said, Bassin, Trubetsky, Leontiev, Lenin, and others.

CLRS GU4036 Nabokov and Global Culture. 3 points.

In 1955, an American writer of Russian descent published in Paris a thin book that forever shaped English language, American culture, and the international literary scene. That book, of course, was Vladimir Nabokov’s *Lolita*.

We will speak of exile, memory and nostalgia, of hybrid cultural identities and cosmopolitan elites, of language, translation and multilingualism. All readings will be in English.

CLRS GU4037 Poets, Rebels, Exiles: 100 Years of Russians and Russian Jews in America. 3.00 points.

Poets, Rebels, Exiles examines the successive generations of the most provocative and influential Russian and Russian Jewish writers and artists who brought the cataclysm of the Soviet and post-Soviet century to North America. From Joseph Brodsky—the bad boy bard of Soviet Russia and a protégé of Anna Akhmatova, who served 18 months of hard labor near the North Pole for social parasitism before being exiled—to the most recent artistic descendants, this course will interrogate diaspora, memory, and nostalgia in the cultural production of immigrants and exiles.

CLRS GU4038 Dostoevsky in the 1870s: Demons, Diary of a Writer, Adolescent, and Dickens.. 3 points.

A study of Dostoevsky and Dickens as two writers whose engagement in the here and now was vital to their work and to their practice of the novel. Readings from Dostoevsky cluster in the 1870s and include two novels, *Demons* (1872) and *The Adolescent* (1876), and selections from his *Diary of a Writer*. Readings from Dickens span his career and include, in addition to *David Copperfield* (1850), sketches and later essays.

CLRS GU4040 The Future is Red (White and Blue): Modernity and Social Justice in U.S. and U.S.S.R.. 4 points.

In the 1920s, the Soviet Union and the U.S. emerged as growing world powers, offering each other two compelling,

if often opposed, versions of modernity. At the same time, each country saw its intercontinental rival as an attractive, but dangerous “other”: a counterexample of the road not taken, and a foil for its own ideology and identity. From the 1920s to the heat of the Cold War, Some of the USSR’s most prominent public figures came to the U.S. and several American intellectuals, progressive activists, and officials traveled to the Soviet experiment. This course examines the cultural images of the American and Soviet “other” in the texts that resulted from these exchanges. We will read works about America from Sergei Esenin, Vladimir Mayakovsky, Ilya Il’f and Evgeny Petrov, and poems, essays, and novels about Russia by Langston Hughes, Claude McKay, Louise Bryant, W.E.B. Du Bois, John Steinbeck, and others. Each of these texts attempts to grapple with what it means to be modern—both technologically advanced and socially liberated—in different national contexts and under different proclaimed ideologies.

CZECH LANGUAGE AND LITERATURE

CZCH UN1101 Elementary Czech I. 4 points.

Essentials of the spoken and written language. Prepare students to read texts of moderate difficulty by the end of the first year.

POLI GU4051 Movements in Polish Cinema. 3 points.

This course introduces and explores three separate movements in Polish post-World War II cinema – the “Polish School” of 1955–1965, the “Cinema of Moral Concern” of 1976–1981, and the “New Naïveté,” of 1999–2009. Each of these currents adopted a loosely conceived, historically specific aesthetic and ideological platform, which they sought to put into practice artistically in order to exert a therapeutic and a didactic influence on the culture and society of their time.

-
- The “Polish School,” which was characterized by a blend of Italian neorealist and Polish Romantic or absurdist/existentialist styles, sought to represent and work through the national trauma of World War II in a context in which political censorship prevented the direct address of such issues. It includes the early work of world-renowned director Andrzej Wajda, as well as works by prominent filmmakers such as Andrzej Munk, Jerzy Kawalerowicz, and Wojciech Has.
-
- The “Cinema of Moral Concern,” which drew on and combined the techniques of West European “cinemas of truth” with those of the New Hollywood, was in the forefront of the cultural ferment of the late 70s, which was devoted to the establishment of an underground civil society outside the institutions of the communist state and led up to the founding of the trade union Solidarity. It includes early work by internationally recognized filmmakers Krzysztof Kieślowski, Krzysztof Zanussi, and Agnieszka Holland.
-

- The “New Naïveté” drew on a broad variety of Hollywood and international styles, seeking to transform the legacy of Solidarity’s anti-communist “revolution of the spirit” into contemporary forms of cultural capital in order to lay the foundations for “capitalism with a human face.” Among filmmakers active in this movement are Krzysztof Krauze, Robert Gliński, and Piotr Trzaskalski.
-

Screening approximately one film a week, we will view at least five works from each movement, examining and discussing their individual formal and aesthetic principles and ideological investments, their relation to their respective movement as a whole, and their impact on the culture of their day.

ROMANIAN LANGUAGE AND LITERATURE

RMAN GU4002 Romanian Culture, Identity and Complexes. 3 points.

This course addresses the main problems that contribute to the making of Romanian identity, as fragmented or as controversial as it may seem to those who study it. The aim is to become familiar with the deepest patterns of Romanian identity, as we encounter it today, either in history, political studies, fieldwork in sociology or, simply, when we interact with

Romanians. By using readings and presentations produced by Romanian specialists, we aim to be able to see the culture with an "insider's eye", as much as we can. This perspective will enable us to develop mechanisms of understanding the Romanian culture and mentality independently, at a more profound level and to reason upon them.

RMAN GU4003 Byzantine and Post-Byzantine Elements of Romanian Culture. 3 points.

Prerequisites: Reading knowledge of Romanian and French ...The Byzantine as "post-Romantic", as "eclectic", "Oriental", in its version of localized, picturesque, intra-European Orientalism appears less explored and probably less considered of importance when trying to understand the intricacies of a culture and, by expanding it, of culture in general. Our explorations of Byzantine/Byzantinism will help us develop a subtler understanding of the mechanisms of the cultural equation West/Orient and of the cultural hierarchies....

RUSSIAN LANGUAGE

RUSS UN1101 First-year Russian I. 5 points.

Grammar, reading, composition, and conversation.

RUSS UN3105 Real World Russian. 3 points.

Prerequisites: (RUSS UN2102) (department placement test)

This content-based course has three focal points: 1) communicative skills 1) idiomatic language; 3) cross-cultural awareness.

The course is designed to help students further develop all of their language skills with particular focus on communicative and information processing skills, as well as natural student collaboration in the target language. The materials and assignments that will be used in class allow to explore a broad range of social, cultural, and behavioral contexts and familiarize students with idiomatic language, popular phrases and internet memes, developments of the colloquial language, and the use of slang in everyday life.

On each class students will be offered a variety of content-based activities and assignments, including, information gap filling, role-play and creative skits, internet search, making presentations, and problem-solving discussions. Listening comprehension assignments will help students expand their active and passive vocabulary and develop confidence using natural syntactic models and idiomatic structures.

Students will be exposed to cultural texts of different registers, which will help them enhance their stylistic competence. Students will learn appropriate ways to handle linguo-social situations, routines, and challenges similar to those they come across when traveling to Russia. They will explore various speech acts of daily communication, such as agreement/disagreement, getting and giving help, asking for a favor, expressing emotions, and so forth. Part of class time will be devoted to nonverbal communication, the language of gestures, emotional phonetics and intonation.

RUSS GU4350 Moving to Advanced-Plus: Language, Culture, Society in Russian Today. 3 points.

Prerequisites: Six semesters of college Russian and the instructor's permission.

The course is designed to provide advanced and highly-motivated undergraduate and graduate students of various majors with an opportunity to develop professional vocabulary and discourse devices that will help them to discuss their professional fields in Russian with fluency and accuracy. The course targets all four language competencies: speaking, listening, reading and writing, as well as cultural understanding. Conducted in Russian.

RUSS GU4351 Moving to Advanced-Plus: Language, Culture, Society in Russian Today. 3 points.

Prerequisites: eight semesters of college Russian and the instructor's permission.

The course is designed to provide advanced and highly-motivated undergraduate and graduate students of various majors with an opportunity to develop professional vocabulary and discourse devices that will help them to discuss their professional fields in Russian with fluency and accuracy. The course targets all four language competencies: speaking,

listening, reading and writing, as well as cultural understanding. Conducted in Russian.

RUSS GU4434 Practical Stylistics [in Russian]. 3 points.

Prerequisites: *RUSS W4334* or the equivalent or the instructor's permission.

Prerequisite: four years of college Russian or instructor's permission. The course will focus on theoretical matters of language and style and on the practical aspect of improving students' writing skills. Theoretical aspects of Russian style and specific Russian stylistic conventions will be combined with the analysis of student papers and translation assignments, as well as exercises focusing on reviewing certain specific difficulties in mastering written Russian.

RUSS GU4910 LITERARY TRANSLATION. 4.00 points.

Prerequisites: four years of college Russian or the equivalent.

Prerequisites: four years of college Russian or the equivalent. Workshop in literary translation from Russian into English focusing on the practical problems of the craft. Each student submits a translation of a literary text for group study and criticism. The aim is to produce translations of publishable quality

RUSSIAN LITERATURE (IN ENGLISH)

RUSS UN3220 Literature and Empire: The Reign of the Novel in Russia (19th Century) [In English]. 3 points.

Explores the aesthetic and formal developments in Russian prose, especially the rise of the monumental 19th-century novel, as one manifestation of a complex array of national and cultural aspirations, humanistic and imperialist ones alike. Works by Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov. Knowledge of Russian not required.

Fall 2020: RUSS UN3220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RUSS 3220	001/10588	T Th 1:10pm - 2:25pm Online Only	Emma Lieber	3	9/45

RUSS UN3221 LIT # REVOLUTION (20TH C LIT). 3.00 points.

The revolutionary period (1905-1938) in Russia was not only one of extreme social upheaval but also of exceptional creativity. Established ideas about individuality and collectivity, about how to depict reality, about language, gender, authority, and violence, were all thrown open to radical questioning. Out of this chaos came ideas about literature and film (just for example) which have shaped Western thought on these subjects to this day. In this course we will study a variety of media and genres (poetry, manifestos, film, painting, photomontage, the novel, theoretical essays) in an effort to gain a deep understanding of this complex and fascinating period in Russian cultural history

RUSS UN3222 Tolstoy and Dostoevsky [In English]. 3 points.

Two epic novels, Tolstoy's *War and Peace* and Dostoevsky's *The Brothers Karamazov*, will be read along with selected shorter works. Other works by Tolstoy include his early *Sebastopol Sketches*, which changed the way war is represented in literature; *Confession*, which describes his spiritual crisis; the late stories "*Kreutzer Sonata*" and "*Hadji Murad*"; and essays on capital punishment and a visit to a slaughterhouse. Other works by Dostoevsky include his fictionalized account of life in Siberian prison camp, *The House of the Dead*; *Notes from the Underground*, his philosophical novella on free will, determinism, and love; "*A Gentle Creature*," a short story on the same themes; and selected essays from *Diary of a Writer*. The focus will be on close reading of the texts. Our aim will be to develop strategies for appreciating the structure and form, the powerful ideas, the engaging storylines, and the human interest in the writings of Tolstoy and Dostoevsky. No knowledge of Russian is required.

Spring 2021: RUSS UN3222

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

RUSS UN3223 Magical Mystery Tour: The Legacy of Old Rus'. 3 points.

Winston Churchill famously defined Russia as "a riddle wrapped in a mystery inside an enigma." This course aims at demystifying Russia by focusing on the core of its "otherness" in the eyes of the West: its religious culture. We will explore an array of texts, practices and pragmatic sites of Russian religious life across such traditional divides as medieval and modern, popular and elite, orthodox and heretical. Icons, liturgical rituals, illuminated manuscripts, magic amulets, religious sects, feasting and fasting, traveling practices from pilgrimages to tourism, political myths and literary mystification, decadent projects of life-creation, and fervent anticipation of the End are all part of the tour that is as illuminating as it is fun. No knowledge of Russian required.

RUSS GU4006 Russian Religious Thought, Praxis, and Literature. 3 points.

This course examines the interaction of religious thought, praxis, and literature in the nineteenth and early twentieth centuries. As the Russian Empire sought to define its place in the world, many Russian writers and thinkers turned to religious experience as a source of meaning. A varied body of work emerged as they responded to the tradition of Russian Orthodoxy. The goals of this course are to acquaint students with key texts of Russian religious thought and to give students the knowledge and tools required for critical inquiry into the religious dimension of Russian literature and culture.

RUSS GU4013 Late Tolstoy (Beyond Anna Karenina): Thinker, Writer, Activist, Pacifist, Humanitarian, and Mortal. 4 points.

The focus of the course is Tolstoy's work in the last 35 years of his life. On finishing *War and Peace* and *Anna Karenina*, Tolstoy swore off the kind of literature and decided to devote himself to what he believed would be more meaningful work. This work included confessions, letters, tracts, critiques, proclamations, invectives, exposes, meditations, and gospel, and as more fiction, some of which is overly didactic and some which is, like his earlier fiction, more covertly so.

RUSS GU4046 The Trickster in the Modern Russian Literature and Culture. 3 points.

"Trickster" does not simply mean "deceiver" or "rogue" (the definition of trickster according to the Oxford Encyclopedic English Dictionary), but rather "creative idiot", to use Lewis Hyde's expression. This hero unites the qualities of characters who at first sight have little in common — the "selfish buffoon" and the "culture hero"; someone whose subversions and transgressions paradoxically amplify the culture-constructing effects of his (and most often it is a "he") tricks. The trickster is a typical comic protagonist — it is enough to recollect Renard the Fox from the medieval *Roman de Renard*, Panurge from François Rabelais' *The Life of Gargantua and of Pantagruel*, Cervantes' Sancha Panza, Beaumarchais's Figaro, Gogol's Khlestakov, Mark Twain's Tom Sawyer and Huckleberry Finn, Yaroslav Hašek's Švejk, Charlie Chaplin's Tramp, Max Bialystock in Mel Brooks' *Producers*, Bart Simpson and Borat (Sacha Baron Cohen), as well as Jon Stewart and Stephen Colbert along with many other comical characters of the same genre — to confirm this self-evident thesis

RUSS GU4453 Women and Resistance in Russia. 3 points.

Cultural and political history of women and resistance in Russia, from the Putin era to medieval saints. Explores forms and specificity of female resistance in Russia across history. Addresses questions of historical narrative in light of missing

sources. Material includes: prose by Svetlana Alexievich, Lydia Chukovskaya, Lidiya Ginzburg, Alexandra Kollontai, Masha Gessen, Anna Politkovskaia, and Pussy Riot's Nadezhda Tolokonnikova; poetry by Anna Akhmatova, Marina Tsvetaeva and Sophia Parnok; films by Kira Muratova; visual art by Natalia Goncharova and fellow "amazons" of the Russia Avant Garde, together with memoirs, saint's lives, letters, diaries, and urban legend. Final project: curating a museum exhibit.

Prerequisites: Open to undergraduate and graduate students. No Russian required for the undergraduate students. Graduate students are expected to do the readings in Russian.

RUSSIAN LITERATURE**RUSS UN3332 Vvedenie v russkuiu literaturu: Scary Stories. 3 points.**

For non-native speakers of Russian.

Prerequisites: two years of college Russian or the instructor's permission.

The course is devoted to the reading, analysis, and discussion of a number of Russian prose fiction works from the eighteenth to twentieth century. Its purpose is to give students an opportunity to apply their language skills to literature. It will teach students to read Russian literary texts as well as to talk and write about them. Its goal is, thus, twofold: to improve the students' linguistic skills and to introduce them to Russian literature and literary history. A close study in the original of the "scary stories" in Russian literature from the late eighteenth century. Conducted in Russian.

SLAVIC CULTURE

SLCL UN3001 Slavic Cultures. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The history of Slavic peoples - Russians, Czechs, Poles, Serbs, Croats, Ukrainians, Bulgarians - is rife with transformations, some voluntary, some imposed. Against the background of a schematic external history, this course examines how Slavic peoples have responded to and have represented these transformations in various modes: historical writing,

hagiography, polemics, drama and fiction, folk poetry, music, visual art, and film. Activity ranges over lecture (for historical background) and discussion (of primary sources).

Fall 2020: SLCL UN3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SLCL 3001	001/10418	T Th 10:10am - 11:25am Online Only	Alan Timberlake	3	56/85

SLCL UN3100 FOLKLORE PAST # PRESENT. 3.00 points.

For the past two centuries, writers, composers, and artists have found inspiration in the stories, songs, and beliefs of their grandparents, their servants (or their slaves), and their neighbors. This class asks what "folklore" means and what purposes – political as well as artistic – it can serve. Our focus will be traditional, oral Slavic folk genres, but we will also look at contemporary American folklore. Folklore is characterized by repetition and variation; the oral texts we find in books have been extracted from their original context and framed as such. Collecting folklore from fellow students or in the communities around campus will allow you to experience how this happens firsthand. The course will cover a variety of genres of oral folklore -- riddles, spells, fairy tales, epics and folksongs. We will also examine the way that Slavic and Eastern European folklore has been readapted in "high" art genres such as literature and ballet. By the end of the semester, students will be able to recognize patterns and interpret meanings of traditional folkloric genres, and to acquire the tools and techniques necessary for collecting, documenting and interpreting contemporary folklore. Assignments will also allow students to improve skills of textual analysis and analytic, and creative writing

Fall 2020: SLCL UN3100

HNGR GU4028 Modern Hungarian Prose in Translation: Exposing Naked Reality. 3 points.

This course introduces students to representative examples of an essentially robust, reality-bound, socially aware literature. In modern Hungarian prose fiction, the tradition of nineteenth-century "anecdotal realism" remained strong and was further enlivened by various forms of naturalism. Even turn-of-the century and early twentieth-century modernist fiction is characterized by strong narrative focus, psychological realism, and an emphasis on social conditions and local color. During the tumultuous decades of the century, social, political, national issues preoccupied even aesthetics-conscious experimenters and ivory-tower dwellers. Among the topics discussed will be "populist" and "urban" literature in the interwar years, post-1945 reality in fiction, literary memoirs and reportage, as well as late-century minimalist and postmodern trends.

HNGR GU4050 The Hungarian New Wave: Cinema in Kadarist Hungary [In English]. 3 points.
Not offered during 2020-21 academic year.

Hungarian cinema, like film-making in Czechoslovakia, underwent a renaissance in the 1960's, but the Hungarian new wave continued to flourish in the 70's and film remained one of the most important art forms well into the 80's. This course examines the cultural, social and political context of representative Hungarian films of the Kadarist period, with special emphasis on the work of such internationally known filmmakers as Miklos Jancso, Karoly Makk, Marta Meszaros, and Istvan Szabo. In addition to a close analysis of individual films, discussion topics will include the "newness" of the new wave in both form and content (innovations in film language, cinematic impressionism, allegorical-parabolic forms, auteurism, etc.), the influence of Italian, French, German and American cinema, the relationship between film and literature, the role of film in the cultures of Communist Eastern Europe, the state of contemporary Hungarian cinema. The viewing of the films will be augmented by readings on Hungarian cinema, as well as of relevant Hungarian literary works.

SLAVIC LITERATURES

SLLT GU4000 EURASIAN EXILES & LIT IN N.Y.. 3 points.

Eurasian Exiles and Literature in New York examines Eurasian exile literature in the United States and especially New York over the course of four emigration waves: so called Second Wave writers who fled the Russian Revolution (Vladimir Nabokov), the Third Wave exiles, who came after World War II (Joseph Brodsky and Sergei Dovlatov), the exile literature of the last Soviet generation who came as refugees in the late 1970s and early 1980s (Gary Shteyngart, Irina Reyn), and the perestroika and post-Soviet diaspora, who came to New York after 1991. All four waves drew upon a rich Russian cultural heritage and influences that they encountered abroad to create innovative work: new topoi and urban fiction as well as unique images of New York. All four have complicated and fascinating engagements with American society and the cultures of New York City, and also with the Russian and Eurasian émigré communities, vibrant worlds unto themselves. The initial waves drew mainly on East European themes and were still attached to Russia while the latter were increasingly concerned with non-Russian nationalities like Bukharan Jews, Georgians, and Tajiks. The course looks closely and critically at the meanings of "exile" and "Eurasia," as well as the poetics of exilic and urban writing; it asks whether we can still speak of exiles and exile fiction in the postSoviet age of globalization, social media, and unprecedented migration.

UKRAINIAN LANGUAGE AND LITERATURE

UKRN UN1101 Elementary Ukrainian I. 3 points.

Designed for students with little or no knowledge of Ukrainian. Basic grammar structures are introduced and reinforced, with

equal emphasis on developing oral and written communication skills. Specific attention to acquisition of high-frequency vocabulary and its optimal use in real-life settings.

Prerequisites: UKRN UN1102 or the equivalent.

Reviews and reinforces the fundamentals of grammar and a core vocabulary from daily life. Principal emphasis is placed on further development of communicative skills (oral and written). Verbal aspect and verbs of motion receive special attention.

Fall 2020: UKRN UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
UKRN 2101	001/10549	M W Th 10:10am - 11:25am Online Only	Yuri Shevchuk	3	3/12

UKRN UN2102 Intermediate Ukrainian II. 3 points.

Prerequisites: UKRN UN1102 or the equivalent.

Reviews and reinforces the fundamentals of grammar and a core vocabulary from daily life. Principal emphasis is placed on further development of communicative skills (oral and written). Verbal aspect and verbs of motion receive special attention.

Spring 2021: UKRN UN2102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
UKRN 2102	001/10134	M W Th 10:10am - 11:25am Online Only	Yuri Shevchuk	3	3/12

UKRN GU4001 Advanced Ukrainian I. 3 points.

Prerequisites: UKRN UN2102 or the equivalent.

The course is for students who wish to develop their mastery of Ukrainian. Further study of grammar includes patterns of word formation, participles, gerunds, declension of numerals, and a more in-depth study of difficult subjects, such as verbal aspect and verbs of motion. The material is drawn from classical and

contemporary Ukrainian literature, press, electronic media, and film. Taught almost exclusively in Ukrainian.

UKRN GU4002 Advanced Ukrainian II. 3 points.

Prerequisites: UKRN UN2102 or the equivalent.

The course is for students who wish to develop their mastery of Ukrainian. Further study of grammar includes patterns of word formation, participles, gerunds, declension of numerals, and a more in-depth study of difficult subjects, such as verbal aspect and verbs of motion. The material is drawn from classical and contemporary Ukrainian literature, press, electronic media, and film. Taught almost exclusively in Ukrainian.

UKRN GU4006 Advanced Ukrainian Through Literature, Media, and Politics. 3 points.

This course is organized around a number of thematic centers or modules. Each is focused on stylistic peculiarities typical of a given functional style of the Ukrainian language. Each is designed to assist the student in acquiring an active command of lexical, grammatical, discourse, and stylistic traits that distinguish one style from the others and actively using them in real-life communicative settings in contemporary Ukraine. The styles include literary fiction, scholarly prose, and journalism, both printed and broadcast.

Fall 2020: UKRN GU4006

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
UKRN 4006	001/10557	M W 2:40pm - 3:55pm Online Only	Yuri Shevchuk	3	2/12

UKRN GU4007 Advanced Ukrainian Through Literature, Media and Politics II. 3 points.

This course is organized around a number of thematic centers or modules. Each is focused on stylistic peculiarities typical of a given functional style of the Ukrainian language. Each is designed to assist the student in acquiring an active command of lexical, grammatical, discourse, and stylistic traits that distinguish one style from the others and actively using them in real-life communicative settings in contemporary Ukraine. The styles include literary fiction, scholarly prose, and journalism, both printed and broadcast.

Spring 2021: UKRN GU4007

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
UKRN 4007	001/10135	M W 2:40pm - 3:55pm Online Only	Yuri Shevchuk	3	2/12

UKRN GU4033 FIN DE SIECLE UKRAINIAN LIT. 3.00 points.

The course focuses on the emergence of modernism in Ukrainian literature in the late 19th century and early 20th century, a period marked by a vigorous, often biting, polemic between the populist Ukrainian literary establishment and young Ukrainian writers who were inspired by their European counterparts. Students will read prose, poetry, and drama written by Ivan Franko, the writers of the Moloda Muza, Olha

Kobylianska, Lesia Ukrainka, and Volodymyr Vynnychenko among others. The course will trace the introduction of feminism, urban motifs and settings, as well as decadence, into Ukrainian literature and will analyze the conflict that ensued among Ukrainian intellectuals as they shaped the identity of the Ukrainian people. The course will be supplemented by audio and visual materials reflecting this period in Ukrainian culture. Entirely in English with a parallel reading list for those who read Ukrainian.

UKRN GU4037 The Aura of Soviet Ukrainian Modernism. 3 points.

This course studies the renaissance in Ukrainian culture of the 1920s - a period of revolution, experimentation, vibrant expression and polemics. Focusing on the most important developments in literature, as well as on the intellectual debates they inspired, the course will also examine the major achievements in Ukrainian theater, visual art and film as integral components of the cultural spirit that defined the era. Additionally, the course also looks at the subsequent implementation of the socialist realism and its impact on Ukrainian culture and on the cultural leaders of the renaissance. The course treats one of the most important periods of Ukrainian culture and examines its lasting impact on today's Ukraine. This period produced several world-renowned cultural figures, whose connections with the 1920s Ukraine have only recently begun to be discussed. The course will be complemented by film screenings, presentations of visual art and rare publications from this period. Entirely in English with a parallel reading list for those who read Ukrainian.

UKRN GU4054 Creating Identity in Contemporary Ukrainian Culture. 3 points.

This course presents and examines post-Soviet Ukrainian literature. Students will learn about the significant achievements, names, events, scandals and polemics in contemporary Ukrainian literature and will see how they have contributed to Ukraine's post-Soviet identity. Students will examine how Ukrainian literature became an important site for experimentation with language, for providing feminist perspectives, for engaging previously-banned taboos and for deconstructing Soviet and Ukrainian national myths. Among the writers to be focused on in the course are Serhiy Zhadan, Yuri Andrukhovych, Oksana Zabuzhko and Taras Prokhasko. Centered on the most important successes in literature, the course will also explore key developments in music and visual art of this period. Special focus will be given to how the 2013/2014 Euromaidan revolution and war are treated in today's literature. By also studying Ukrainian literature with regards to its relationship with Ukraine's changing political life, students will obtain a good understanding of the dynamics of today's Ukraine and the development of Ukrainians as a nation in the 21st century. The course will be complemented by audio and video presentations. Entirely in English with a parallel reading list for those who read Ukrainian.

SOCIOLOGY

Department Office: 501 Knox Hall; 212-853-1909
<http://www.sociology.columbia.edu>

Director of Undergraduate Studies: Teresa Sharpe, 501 Knox; ts2785@columbia.edu

Director of Academic Administration and Finance:
 Teresa Aguayo, 501C Knox Hall; 212-854-9890;
 ta2015@columbia.edu

Student Program Coordinator: Winston Gordon, 501 Knox;
 wg2339@columbia.edu

Sociology is the study of society. In examining patterns of association, sociologists explore the interactions of people, communities, and organizations. In this sense, sociology is not the study of people; it is the study of the relationships among people. This study includes the associations between people and the products of human interaction, such as organizations, technologies, economies, cities, culture, media, and religion. In the kinds of questions it asks, sociology is a deeply humanist discipline and sociologists demand the analytic rigor of scientific investigation.

In training students in our department, we encourage them to ask big questions and we work to give them the tools to provide answers. These tools might mean ethnographic observation, pouring through historical archives, looking at census data, analyzing social networks, or interviewing people from various walks of life.

As a bridging discipline that seeks the scientific exploration of questions that matter to human communities, such as inequality and social injustice, sociology addresses many of the same areas of life as our neighboring social science disciplines. Yet we often approach these areas quite differently. For example, problems of economic and political life are a central concern to sociologists. Rather than explore these as independent or particular features of society, we seek to embed them within the complex whole of the social world. Students will find the Department of Sociology to be a broad, demanding department that provides its students with the conceptual and methodological tools to make sense of the opportunities and social problems of the global communities in which we live.

GRADING

A letter grade of C- or better is needed in all Sociology courses in order to satisfy the program requirements.

DEPARTMENTAL HONORS

In order to be considered for departmental honors, majors must have a minimum GPA of 3.6 overall and 3.8 in courses in the Department of Sociology. In addition, students must

produce an exceptional honors thesis in the two-semester *Senior Seminar* (SOCI UN3995-SOCI UN3996 Senior Seminar).

In order to register for the *Senior Seminar*, students must have completed SOCI UN3010 Methods for Social Research and have had their research project accepted by the faculty member teaching the Senior Seminar. Submissions of research projects are due by May 1 preceding the seminar. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

MAJOR IN SOCIOLOGY

The major in sociology requires a minimum of 30-31 points as follows:

Core Courses

The following three courses are required (10 points):

SOCI UN1000	THE SOCIAL WORLD
SOCI UN3000	Social Theory
SOCI UN3010	Methods for Social Research

Elective Courses

Select six courses (20-21 points) in the Department of Sociology, to include at least three lecture courses (2000- or 3000-level, 3 points each) and at least two seminars (4 points each). The sixth course could be either a lecture course (to a total of 30 points) or a seminar (to a total of 31 points). For students taking the two-semester Senior Seminar, the sixth course must be a seminar. Some examples of electives include: *

SOCI UN3020	Social Statistics
SOCI UN3213	Sociology of African American Life
SOCI UN3235	Social Movements
SOCI UN3490	Mistake, Misconduct, Disaster
SOCI UN3285	Israeli Society and the Israeli-Palestinian Conflict
SOCI UN3264	The Changing American Family
SOCI UN3900	Societal Adaptations to Terrorism
SOCI UN3914	Seminar in Inequality, Poverty, and Mobility
SOCI UN3931	Sociology of the Body
SOCI UN3974	Sociology of Schools, Teaching and Learning
SOCI UN3995	Senior Seminar
SOCI UN3996	Senior Seminar

* These may include the two-semester *Senior Seminar* (SOCI UN3995-SOCI UN3996).

Core Courses

The following three courses are required (10 points):

SOCI UN1000	THE SOCIAL WORLD
SOCI UN3000	Social Theory
SOCI UN3010	Methods for Social Research

Elective Courses

Select three courses (10 points) in the Department of Sociology, one of which must be a seminar. Some examples of electives include:

SOCI UN3900	Societal Adaptations to Terrorism
SOCI UN3914	Seminar in Inequality, Poverty, and Mobility
SOCI UN3915	Stigma and Discrimination
SOCI UN3931	Sociology of the Body
SOCI UN3974	Sociology of Schools, Teaching and Learning
SOCI UN3985	Queer Practice
SOCI UN3995	Senior Seminar
SOCI UN3996	Senior Seminar

SPRING 2021

SOCI UN1000 THE SOCIAL WORLD. 3.00 points.

Identification of the distinctive elements of sociological perspectives on society. Readings confront classical and contemporary approaches with key social issues that include power and authority, culture and communication, poverty and discrimination, social change, and popular uses of sociological concepts

Fall 2020: SOCI UN1000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 1000	001/11590	T Th 11:40am - 12:55pm Online Only	Teresa Sharpe	3.00	332/210

Spring 2021: SOCI UN1000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 1000	001/11266	M W 10:10am - 11:25am Online Only	Teresa Sharpe, Adam Reich	3.00	140/150

SOCI UN3000 Social Theory. 4 points.

Prerequisites: Sophomore standing.

Required for all sociology majors. Prerequisite: at least one sociology course of the instructor's permission. Theoretical accounts of the rise and transformations of modern society in the 19th and 20th centuries. Theories studied include those of Adam Smith, Tocqueville, Marx, Durkheim, Max Weber, Roberto Michels. Selected topics: individual, society, and polity; economy, class, and status; organization and ideology; religion and society; moral and instrumental action.

Fall 2020: SOCI UN3000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3000	001/00048	M T W Th 1:10pm - 2:25pm	Deborah Becher	4	41/70

CONCENTRATION IN SOCIOLOGY

The concentration in sociology requires a minimum of 20 points as follows:

Room TBA

Spring 2021: SOCI UN3000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3000	001/00108	M T W Th 1:10pm - 2:25pm Room TBA	Deborah Becher	4	65/65

SOCI UN3009 Contemporary Social Theory. 3 points.

This is a survey class that will familiarize students with the most important theoretical developments in post-war sociology.

Fall 2020: SOCI UN3009

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3009	001/21377	M W 6:10pm - 7:25pm Online Only	Andreas Wimmer	3	11/60

SOCI UN3010 Methods for Social Research. 4 points.

Prerequisites: SOCI UN1000 The Social World or Instructor Permission

Required for all Sociology majors. Introductory course in social scientific research methods. Provides a general overview of the ways sociologists collect information about social phenomena, focusing on how to collect data that are reliable and applicable to our research questions.

Fall 2020: SOCI UN3010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

-----------	-----------	-------------------------------------	-----------------------	---	-------

SOCI UN3265 MINORITIES/ETHNIC GP-AMER LIFE. 3.00 points.

This course examines gender as a flexible but persistent boundary that continues to organize our work lives and our home lives, as well as the relationship between the two spheres. We will explore the ways in which gender affects how work is structured; the relationship between work and home; the household as a place of paid (and unpaid) labor; and how changes in the global economy affect gender and work identities.

Spring 2021: SOCI UN3265

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3265	001/11018	M T W Th 11:40am - 12:45pm Online Only	Teresa Sharpe	3.00	34/40

SOCI UN3297 Sociology of Transnational Market Making. 4 points.

The course will introduce core theories and key concepts in economic and political sociology, plus international political economy to provide a broad overview about the debates linked to the coming about and development of transnational markets. Classes are organized around three topics. We will start with the discussion of the works of classics like Weber, Durkheim and Polanyi on the emergence and evolution of national markets, followed by reading recent applications of the works of classics on the evolution of transnational markets. The third part of the course will explore the question of how can one apply these theoretical approaches to the study of the politics of the Single European Market and use their tools of analysis for the better understanding of the evolution of core-periphery relations in the EU.

Students taking this course will acquire the capacity for informed participation in debates on the politics of transnational market making. They will gain the analytical tools to start independent research on issues linked to the politics of economic integration in Europe

SOCI UN3915 Stigma and Discrimination. 4 points.

This course considers stigma and discrimination as general processes that apply to a broad range of phenomena, from mental illness to obesity to HIV/AIDS to racial groups. We will use a conceptual framework that considers power and social stratification to be central to stigma and discrimination. We will focus on both macro- and micro-level social processes and their interconnections, and we will draw on literature from both sociology and psychology.

SOCI UN3921 HIGHER EDUCATION AND INEQUALITY. 4 points.

Prerequisites: (SOCI UN1000)

Higher education in the U.S. is going through a period of rapid change. State support is shrinking, student debt is increasing,

full-time faculty are being replaced by adjuncts, and learning outcomes are difficult to measure, at best. This class will try to makes sense of these changes. Among other questions, it will ask whether higher education is a source of social mobility or a means of class reproduction; how the college experience differs by race, class, and type of college attended; how the economics of higher education have led to more expensive college and more student loans; and how we might make college better. We will consider several different points of view on the current state of U.S. higher education: that of students who apply to and attend college, that of colleges and universities, and that of society at large. As part of this course, students will conduct research on their own universities: Columbia College or Barnard College.

SOCI UN3926 Race, Place, and the United States. 4.00 points.

The course analyzes the relationship between race/ethnicity and spatial inequality, emphasizing the institutions, processes, and mechanisms that shape the lives of urban dwellers. It surveys major theoretical approaches and empirical investigations of racial and ethnic stratification in several urban cities, and their concomitant policy considerations

Spring 2021: SOCI UN3926

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3926	001/11281	Th 6:10pm - 8:00pm Online Only	Kristin Murphy	4.00	15/15

SOCI UN3937 Sociology of Human Rights. 4.00 points.

Sociology came to the study of human rights much later than law, philosophy, or political science. In this course, you'll learn (1) what constitutes a sociology of human rights and (2) what sociology, its classics, and its diverse methods bring to the empirical study and theory of human rights. We'll explore the history, social institutions and laws, ideas, practices, and theories of human rights. We'll become familiar with the social actors, social structures, and relationships involved in practices such as violation, claims-making, advocacy, and protection. We'll consider how social, cultural, political, and economic forces affect human rights issues. We'll learn about the questions sociologists ask, starting with the most basic (but far from simple) question, "what is a human right?" We'll tackle key debates in the field, considering – for instance – whether human rights are universal and how human rights relate to cultural norms/values, national sovereignty, and national security. Finally, we'll apply the concepts we've learned to a wide range of issues (ex: how racial, ethnic, gender, and other social inequalities relate to human rights), rights (ex: LGBTQ rights, the rights of laborers, the rights of refugees), and cases (ex: enslavement, the separation of children from their families, circumcision, sterilization, the use of torture). We'll consider human rights cases in the United States and across the globe, and how events and actions in one place relate to human rights violations in another

Spring 2021: SOCI UN3937

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

SOCI 3937	001/11282	F 12:10pm - 2:00pm Online Only	Rosemary McGunnigle-Gonzales	4.00	16/20
-----------	-----------	-----------------------------------	------------------------------	------	-------

SOCI UN3960 Law, Science, and Society. 4 points.

This course addresses basic contemporary social issues from several angles of vision: from the perspective of scientists, social scientists, legal scholars, and judges. Through the use of case studies, students will examine the nature of theories, evidence, "facts," proof, and argument as found in the work of scientists and scholars who have engaged the substantive issues presented in the course.

Spring 2021: SOCI UN3960

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3960	001/11279	T 10:10am - 12:00pm Online Only	Jonathan Cole	4	22/20

SOCI UN3974 Sociology of Schools, Teaching and Learning. 4 points.

In this class we will examine the school as a central institution in modern society, and we will grapple with an important question in the sociology of education: what role to schools play in reinforcing or challenging broader patterns of social inequality? We will pay special attention to the ways in which students' class, race/ethnicity and gender shape their educational experiences. We will also look at how schools are organized, how schools construct differences among students, and how schools sort kids into different (and unequal) groups. Finally we will explore the types of interventions - at both the individual and organizational levels - that can mitigate inequality in educational achievement and help low-income students to succeed.

One such intervention that has shown promise is tutoring in academic and social and behavioral skills, and interventions that strengthen self-affirmation. A major component of this class is your experience as a tutor. You will be trained as tutors to work with students from local high schools both through in-person tutoring and through tutoring using social networking technologies. Throughout the semester we will combine our academic learning with critical reflection on our experience in the field. Because you will be working with NYC high school students, we will pay special attention to how NYC high schools are organized and how current issues in education play out in the context of NYC schools.

Fall 2020: SOCI UN3974

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3974	001/11648	F 10:10am - 12:00pm Online Only	Jacquelyn Duran	4	47/50

SOCI UN3980 Immigrant New York: The Changing American City. 4 points.

How has immigration transformed New York City? What are the major ethnic groups in the city? How are immigrants and

their U.S.-born children incorporated into the city's schools, workplaces and neighborhoods? How will their integration reshape patterns of ethnic and racial inequality in the city? This course will focus on New York City as a case study to highlight how immigration has transformed the city's demographic, political, socioeconomic and spatial landscape.

SOCI UN3981 Migration and Development. 4 points.

This is a seminar course on the social structure of migration—the movement of people from place to place—and its developmental consequences. The readings are organized by topic and include examples drawn from many countries, in order to highlight the commonality of migration processes across societies as well as specific societal differences that reflect national differences in social institutions, regional variations in economic development, etc. Papers concerned both with internal migration and international migration are included; as we will see, the apparent distinction between these two forms of migration—the presence of institutional barriers with respect to international migration and the supposed absence of such barriers with respect to internal migration—breaks down in societies that impose institutional constraints on internal migration: China, the former Soviet Union, and apartheid-era South Africa, among others.

Spring 2021: SOCI UN3981

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3981	001/11283	Th 10:10am - 12:00pm Online Only	Yao Lu	4	10/15

SOCI UN3996 Senior Seminar. 4 points.

Prerequisites: required methods and theory courses for the major, and the instructor's permission. Students wishing to qualify for departmental honors must take W3996y. Students carry out individual research projects and write a senior thesis under the supervision of the instructor and with class discussion. Written and oral progress reports.

Fall 2020: SOCI UN3996

SOCI GU4701 CREATIVITY/TECH:WAR & COM. 4 points.

This course examines the ways that technological shifts have catalyzed innovation and social change in human societies. The focus is on the social basis for creativity. Analysis centers on the conflicts, disruptions and tensions that emerge in society when new and/or competing technologies are introduced. Students will explore two substantive spheres of social life. The first is war. Throughout recorded history,

participants have sought to garner competitive advantages in battle via technological innovation. We look at several moments in which the development of a particular innovation helped bring about massive societal change. The second focus is on commerce. The class will examine the impact of digital technologies on those who work in creative industries undergoing transformation via technology and diffusion of tech-inspired ideas. The learning objectives for students are:

- To situate technology within a wider social and historical context.
- To consider creativity as a social activity, not only as individual aptitude.
- To place the contemporary period of so-called “fast paced technological progress” within a sociological framework of change and innovation.

FALL 2020

SOCI UN1000 THE SOCIAL WORLD. 3.00 points.

Identification of the distinctive elements of sociological perspectives on society. CSER UN1040 CRIT APPRO-STUDY OF ETH # RACE. 3.00 points.

This course provides an introduction to central approaches and concepts animating the investigation of race and ethnicity. We will not treat either of these categories of difference as a given, nor as separable from other axes of social difference. Rather, we will apply an interdisciplinary and intersectional framework to illuminate how these concepts have come to emerge and cohere within a number of familiar and less familiar socio-cultural and historical contexts. We will consider how racial and ethnic differentiation as fraught but powerful processes have bolstered global labor regimes and imperial expansion projects; parsed, managed, and regulated populations; governed sexed and gendered logics of subject and social formation; and finally, opened and constrained axes of self-understanding, political organization, and social belonging. Special attention will be given to broadening students understanding of racial and ethnic differentiation beyond examinations of identity.

Taken together, theoretical and empirical readings, discussions, and outside film screenings will prepare students for further coursework in race and ethnic studies, as well as fields such as literary studies, women's studies, history, sociology, and anthropology

Fall 2020: CSER UN1040

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

SOCI UN2235 Sexuality in Social Context. 4.00 points.

Despite the ubiquity of sexual imagery in contemporary Western popular culture, most people regard sexuality to be an intimate topic that concerns the drives, experiences and pleasures of individuals. In this course, we will examine the social and pluralistic character of sexual desires, meanings, practices and politics, their variations, cultural locations, institutional determinants and even geopolitical dimensions. We will begin by surveying some of the most influential theoretical works from psychoanalysis, sexology and early sociological writings on sexualities, paying particular attention to how they undergird more contemporary social thought. We then move on to examine the influence of queer theoretical critique on sociological thinking about heterosexuality, whiteness, sexual diversity, and cross-national differences in the interrelationships between gender and sexuality. We will end the course by looking at three discrete topics within the larger sociological subfield of sexuality studies: global sex work, the ethics of participants observation in sexual; communities and contemporary discourses of sexual consent (the last with a particular focus on campus sexual cultures)

Fall 2020: SOCI UN2235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

SOCI UN3000 Social Theory. 4 points.

Prerequisites: Sophomore standing.

Required for all sociology majors. Prerequisite: at least one sociology course of the instructor's permission. Theoretical accounts of the rise and transformations of modern society in the 19th and 20th centuries. Theories studied include those of Adam Smith, Tocqueville, Marx, Durkheim, Max Weber, Roberto Michels. Selected topics: individual, society, and polity; economy, class, and status; organization and ideology; religion and society; moral and instrumental action.

SOCI UN3120 Trust and Mistrust in Science and Expertise. 4 points.

Skepticism about science and expertise is evident today in multiple arenas and clearly can no longer be considered a passing phenomenon. From climate change to vaccines; from mammograms to Coronavirus testing; from opposition to rules regulating acceptable levels of carcinogens to AI algorithms purporting to yield better decisions than human experts; the challenges to the authority of experts come from both sides of the political spectrum and take multiple forms. Most discussions of the challenges to expertise start from the question of mistrust. They ask why do people mistrust science and experts given their obvious and well-documented successes and their contribution to immense improvements in collective well-being? This way of posing the question inevitably leads to the conclusion that people mistrusting experts are irrational, uninformed or duped. This, however, may not be the most productive way to pose the question. For the social scientist, mistrust is not the puzzle, trust is. It is not surprising that people would tend to mistrust decisions taken in locales far removed from their daily lives, that are supported by forms of knowledge and technical arrangements that can be relatively opaque and difficult to grasp. It is not surprising especially since these decisions impact some individuals and groups adversely, while benefitting others. Finally, every now and then, but predictably so, it becomes obvious in hindsight that the wrong decisions were taken. Under these circumstances it is far more puzzling, counter-intuitive and difficult to understand why, how, and under what conditions people do trust science and experts. If we want to understand mistrust, and ultimately arrive at a more balanced arrangement of the relations between experts and laypeople, we need to begin by asking what is trust? How

is it typically organized and secured? What sustains trust in experts and scientists? Only after we have some grasp of the mechanisms by which trust is cultivated, can we hope to have an explanation of the contemporary atmosphere of mistrust, that does not deteriorate into mere name-calling ("climate denial," "anti-vaxxers," etc.) This course will be organized, accordingly, in two parts. In the first part, we will consider different approaches to trust, and specifically for how trust in science and experts is elicited and secured. The second half of the course will be dedicated to examining contemporary case studies of mistrust in science and experts, while exploring different "engines of crisis": the demand for parity between doctors and patients/parents, especially in the case of vaccinations; the emergence of "risk" as the central topic of the politics of expertise, especially as regarding environmental pollution; the strategic manufacturing of ignorance ("agnotology") by tobacco manufacturers and by opponents of climate change research; the replacement of expert judgment with "black-boxed" algorithms in forensics and risk assessment; the legitimization crisis of regulatory science; and the rejection of dependence on experts in the name of an ethics of "care of self."

SOCI BC3219 Race, Ethnicity, and Society. 3 points.

Examines the social construction of race and ethnicity in the United States from colonial period to present. Analyzes how capitalist interests, class differences, gender, immigration, and who “deserves” the full rights and privileges of citizenship, shape boundaries between and within racial and ethnic groups. Also considers how racism affects resource access inequities between racial groups in education, criminal justice, media, and other domains. Explores factors underpinning major social change with an eye toward discerning social conditions necessary to create and sustain just social systems.

SOCI UN3324 Global Urbanism. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Using classical texts about cities (do they still work for us?) and on the diverse new literatures on cities and larger subjects with direct urban implications, we will use a variety of data sets to get a detailed empirical information, and draw on two large ongoing research projects involving major and minor global cities around the world (a total of over 60 cities are covered in detail as of 2008). Students will need to register for a discussion section as well; details to be announced.

SOCI UN3675 Organizing Innovation. 4 points.

This course examines major innovations in organizations and asks whether innovation itself can be organized. We study a range of forms of organizing (e.g., bureaucratic, post-bureaucratic, and open architecture network forms) in a broad variety of settings: from fast food franchises to the military-entertainment complex, from airline cockpits to Wall Street trading rooms, from engineering firms to mega-churches, from scientific management at the turn of the twentieth century to collaborative filtering and open source programming at the beginning of the twenty-first. Special attention will be paid to the relationship between organizational forms and new digital technologies.

SOCI UN3900 Societal Adaptations to Terrorism. 4 points.

Prerequisites: Junior or Senior standing

Examines how countries have adjusted to the threat of terrorism. How the adaptation reflects the pattern of terrorist attacks, as well as structural and cultural features of the society. Adaptations by individuals, families, and organizational actors.

SOCI UN3914 Seminar in Inequality, Poverty, and Mobility. 4 points.

This is an undergraduate seminar in social stratification. The course focuses on the current American experience with socioeconomic inequality and mobility. The goals of the course are to understand how inequality is conceptualized and measured in the social sciences, to understand the structure of inequality in the contemporary U.S., to learn the principal theories and evidence for long term trends in inequality, to understand the persistence of poverty and the impact of social

policies on American rates of poverty, and to understand the forces that both produce and inhibit intergenerational social mobility in the U.S. Given the nature of the subject matter, a minority of the readings will sometimes involve quantitative social science material. The course does not presume that students have advanced training in statistics, and any readings sections that contain mathematical or statistical content will be explained in class in nontechnical terms as needed. In these instances, our focus will not be on the methods, but rather on the conclusions reached by the author concerning the research question that is addressed in the text.

SOCI BC3920 Advanced Topics in Gender and Sexuality. 4 points.

This research and writing-intensive seminar is designed for senior majors with a background and interest in the sociology of gender and sexuality. The goal of the seminar is to facilitate completion of the senior requirement (a 25-30 page paper) based on "hands on" research with original qualitative data. Since the seminar will be restricted to students with prior academic training in the subfield, students will be able to receive intensive research training and guidance through every step of the research process, from choosing a research question to conducting original ethnographic and interview-based research, to analyzing and interpreting one's findings. The final goal of the course will be the production of an original paper of standard journal-article length. Students who choose to pursue their projects over the course of a second semester will have the option of revisiting their articles further for submission and publications.

Fall 2020: SOCI BC3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3920	001/00054	Th 4:10pm - 6:00pm Room TBA	Elizabeth Bernstein	4	10/16

SOCI BC3925 Advanced Topics in Law & Society. 4 points.

Law creates order. And yet, outlaws or lawbreakers are everywhere. Students will learn to ask and answer questions about living law, understanding that it involves law-followers and law-breakers. Students will read and discuss sociological investigations of the law and perform their own research into a significant question about law-in-action.

SOCI UN3926 Race, Place, and the United States. 4.00 points.

The course analyzes the relationship between race/ethnicity and spatial inequality, emphasizing the institutions, processes, and mechanisms that shape the lives of urban dwellers. It surveys major theoretical approaches and empirical investigations of racial and ethnic stratification in several urban cities, and their concomitant policy considerations

Spring 2021: SOCI UN3926

SOCI UN3937 Sociology of Human Rights. 4.00 points.

Sociology came to the study of human rights much later than law, philosophy, or political science. In this course, you'll learn (1) what constitutes a sociology of human rights and (2) what sociology, its classics, and its diverse methods bring to the empirical study and theory of human rights. We'll explore the history, social institutions and laws, ideas, practices, and theories of human rights. We'll become familiar with the social actors, social structures, and relationships involved in practices such as violation, claims-making, advocacy, and protection. We'll consider how social, cultural, political, and economic forces affect human rights issues. We'll learn about the questions sociologists ask, starting with the most basic (but far from simple) question, "what is a human right?" We'll tackle key debates in the field, considering – for instance – whether human rights are universal and how human rights relate to cultural norms/values, national sovereignty, and national security. Finally, we'll apply the concepts we've learned to a wide range of issues (ex: how racial, ethnic, gender, and other social inequalities relate to human rights), rights (ex: LGBTQ rights, the rights of laborers, the rights of refugees), and cases (ex: enslavement, the separation of children from their families, circumcision, sterilization, the use of torture). We'll consider human rights cases in the United States and across the globe, and how events and actions in one place relate to human rights violations in another

SOCI BC3946 GLOBAL HEALTH, POLITICS, AND SOCIETY. 4 points.

What is global health? Where do global health disease priorities come from, and how do the ways that we understand disease

shape how we respond to it? What happens when good ideas and good intentions go wrong? This course critically examines the politics of global health and its impact on local institutions and people. Drawing on social science research, the course will address three main themes: 1) how global health priorities are defined and constructed, 2) how our understandings of disease influence our response to that disease, and 3) how efforts to respond to disease intersect with people on the ground, sometimes in unexpected ways. We will examine the global health industry from the vantage point of different institutions and actors – international organizations, governments, local healthcare institutions, healthcare workers, and people living with or at risk of various illnesses like HIV/AIDS, malaria, cancer, and Ebola. A primary goal of this course is to help you to develop skills in critical thinking in relation to global health issues and their impact on society. Students will demonstrate their knowledge through individual writing, class discussion, presentations, and a final research project.

Fall 2020: SOCI BC3946

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3946	001/00055	T 6:10pm - 8:00pm Room TBA	Amy Zhou	4	15/16

SOCI UN3974 Sociology of Schools, Teaching and Learning. 4 points.

In this class we will examine the school as a central institution in modern society, and we will grapple with an important question in the sociology of education: what role to schools play in reinforcing or challenging broader patterns of social inequality? We will pay special attention to the ways in which students' class, race/ethnicity and gender shape their educational experiences. We will also look at how schools are organized, how schools construct differences among students, and how schools sort kids into different (and unequal) groups. Finally we will explore the types of interventions - at both the individual and organizational levels - that can mitigate inequality in educational achievement and help low-income students to succeed.

One such intervention that has shown promise is tutoring in academic and social and behavioral skills, and interventions that strengthen self-affirmation. A major component of this class is your experience as a tutor. You will be trained as tutors to work with students from local high schools both through in-person tutoring and through tutoring using social networking technologies. Throughout the semester we will combine our academic learning with critical reflection on our experience in the field. Because you will be working with NYC high school students, we will pay special attention to how NYC high schools are organized and how current issues in education play out in the context of NYC schools.

SOCI GU4043 WORKSHOP ON WEALTH & INEQUALITY. 1 point.

This Workshop is linked to the Workshop on Wealth & Inequality Meetings. This is meant for graduate students, however, if you are an advanced undergraduate student you can email the professor for permission to enroll.

SOCI GU4801 Israel and the Palestinians. 4 points.

The seminar will examine the main political, economic, and social processes that have been shaping contemporary Israel. The underlying assumption in this seminar is that much of these processes have been shaped by the 100-year Israeli-Arab/Palestinian conflict. The first part of the course will accordingly focus on the historical background informing the conflict and leading to the Palestinian refugee problem and establishment of a Jewish, but not Palestinian, state in 1948. The second part of the seminar focuses on Israel's occupation of the West Bank (and Gaza) and the settlement project, as well as on USA's role and its impact on the conflict, the occupation, and Israel. These topics did not get much academic attention until recently, but as researchers began to realize that the Occupation and the West Bank settlements are among the most permanent institutions in Israel, they have come under the scrutiny of academic research.

The third part the seminar will concentrate on the development of the conflict after the establishment of Israel and its effects on sociological processes and institutions in contemporary Israel. Analyzing patterns of continuity and change in the past seven decades, we will discuss immigration and emigration patterns, as well as issue relating to ethnicity, gender, religion and politics, and the Israeli military.

Department Administrator:

Dood Kalicharan, 1003 School of Social Work;

212-851-2130; dk@stat.columbia.edu

The Department offers several introductory courses. Students interested in statistical concepts, who plan on consuming, but not creating statistics, should take STAT UN1001 INTRO TO STATISTICAL REASONING. The course is designed for students who have taken a pre-calculus course, and the focus is on general principles. It is suitable for students seeking to satisfy the Barnard quantitative reasoning requirements.

Students seeking an introduction to applied statistics should take STAT UN1101 Introduction to Statistics. The course is designed for students who have some mathematical maturity, but who may not have taken a course in calculus, and the focus is on the elements of data analysis. It is recommended for pre-med students, and students contemplating the concentration in statistics. Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN1201 Calculus-Based Introduction to Statistics. The course is designed for students who have taken a semester of college calculus or the equivalent, and the focus is on preparation for a mathematical study of probability and statistics. It is recommended for students seeking to complete the prerequisite for econometrics, and for students contemplating the major in statistics. Students seeking a one-semester calculus-based survey of probability theory and statistical theory and methods should take STAT GU4001 INTRODUCTION TO PROBABILITY AND STATISTICS. This course is designed for students who have taken calculus, and is meant as a terminal course. It provides a somewhat abridged version of the more demanding sequence STAT GU4203 PROBABILITY THEORY and STAT GU4204 Statistical Inference. While some mathematically mature students take the more demanding sequence as an introduction to the field, it is generally recommended that students prepare

for the sequence by taking STAT UN1201 Calculus-Based Introduction to Statistics.

The Department offers the Major in Statistics, the Concentration in Statistics, and interdisciplinary majors with Computer Science, Economics, Mathematics, and Political Science. The concentration is suitable for students preparing for work or study where substantial skills in data analysis are valued and may be taken without mathematical prerequisites.

The concentration consists of a sequence of six courses in applied statistics, but students may substitute statistics electives numbered 4203 or above with permission of the concentration advisors. The major consists of mathematical and computational prerequisites, an introductory course, and five core courses in probability theory and theoretical and applied statistics together with three electives. The training in the undergraduate major is comparable to a masters degree in statistics.

Students may wish to consult the following guidelines when undertaking course planning. It is advisable to take STAT UN1101 Introduction to Statistics and STAT UN2102 Applied Statistical Computing before taking any of the more advanced concentration courses, STAT UN2103 APPLIED LINEAR REG ANALYSIS, STAT UN2104 Applied Categorical Data Analysis, STAT UN3105 Applied Statistical Methods, and STAT UN3106 Applied Data Mining. It is advisable to take STAT UN1201 Calculus-Based Introduction to Statistics, STAT GU4203 PROBABILITY THEORY, STAT GU4204 Statistical Inference, and STAT GU4205 Linear Regression Models in sequence. Courses in stochastic analysis should be preceded by STAT GU4203 PROBABILITY THEORY, and for many students, it is advisable to take STAT GU4207 Elementary Stochastic Processes before embarking on STAT GU4262 Stochastic Processes for Finance, STAT GU4264 STOCHASTIC PROCESSES-APPLIC, or STAT GU4265 Stochastic Methods in Finance. Most of the statistics courses numbered from 4221 to 4234 are best preceded by STAT GU4205 Linear Regression Models. The data science courses STAT GU4206 Statistical Computing and Introduction to Data Science, STAT GU4241 Statistical Machine Learning, and STAT GU4242 Advanced Machine Learning should be taken in sequence.

ADVANCED PLACEMENT

The Department offers three points of advanced credit for a score of 5 on the AP statistics exam. Students who are required to take an introductory statistics course for their major should check with their major advisor to determine whether this credit provides exemption from their requirement.

DEPARTMENTAL HONORS

Students are considered for department honors on the basis of GPA and the comprehensiveness and difficulty of their course work in the Department. The Department is generally

permitted to nominate one tenth of graduating students for departmental honors.

UNDERGRADUATE RESEARCH IN STATISTICS AND THE SUMMER INTERNSHIP

Matriculated students who will be undergraduates at Columbia College, Barnard College, the School of General Studies, or the School of Engineering and Applied Sciences may apply to the Department's summer internship program. The internship provides summer housing and a stipend. Students work with Statistics Department faculty mentors. Applicants should send a brief statement of interest and a copy of their transcript to Ms. Dood Kalicharan in the Statistics Department office by the end of March to be considered. If summer project descriptions are posted on the Department's website, please indicate in the statement of interest which project is of interest. Students seeking research opportunities with Statistics Department faculty during the academic year are advised to be entrepreneurial and proactive: identify congenial faculty whose research is appealing, request an opportunity to meet, and provide some indication of previous course work when asking for a project.

MAJOR IN STATISTICS

The requirements for this program were modified in March 2016. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

The major should be planned with the director of undergraduate studies. Courses taken for a grade of Pass/D/Fail, or in which

the grade of D has been received, do not count toward the major. The requirements for the major are as follows:

Mathematics and Computer Science Prerequisites

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	Calculus III
MATH UN2010	LINEAR ALGEBRA

One of the following five courses

COMS W1007	Honors Introduction to Computer Science
ENGI E1006	Introduction to Computing for Engineers and Applied Scientists
COMS W1005	Introduction to Computer Science and Programming in MATLAB
STAT UN2102	Applied Statistical Computing
COMS W1004	Introduction to Computer Science and Programming in Java

Core courses in probability and statistics

STAT UN1201	Calculus-Based Introduction to Statistics
STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
STAT GU4206	Statistical Computing and Introduction to Data Science
STAT GU4207	Elementary Stochastic Processes

Three approved electives in statistics or, with permission, a cognate field.

- Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 Linear Regression Models with STAT GU4282 Linear Regression and Time Series Methods, and should take as one of their electives STAT GU4281 Theory of Interest.
- Students preparing for graduate study in statistics are encouraged to replace two electives with MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

CONCENTRATION IN STATISTICS

Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count towards the concentration. The requirements for the concentration are as follows.

STAT UN1101	Introduction to Statistics
STAT UN2102	Applied Statistical Computing
STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN2104	Applied Categorical Data Analysis
STAT UN3105	Applied Statistical Methods
STAT UN3106	Applied Data Mining

- Students may replace courses required for the concentration by approved Statistics Department courses.

MAJOR IN DATA SCIENCE

In response to the ever growing importance of "big data" in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications at the interface between computer science and statistics. The Statistics Department and the Department of Computer Science have responded with a joint-major that emphasizes the interface between the disciplines.

Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major. The requirements for the major are as follows:

Mathematical Prerequisites

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	Calculus III
MATH UN2010	LINEAR ALGEBRA

Statistics Required Courses

STAT UN1201	Calculus-Based Introduction to Statistics
STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
STAT GU4241	Statistical Machine Learning
or COMS W4771	Machine Learning

Statistics Electives

Select two of the following courses:

STAT UN3106	Applied Data Mining
STAT GU4206	Statistical Computing and Introduction to Data Science
STAT GU4243	Applied Data Science
STAT GU4224	BAYESIAN STATISTICS
STAT GU4242	Advanced Machine Learning

Computer Science Introductory Courses

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
ENGI E1006	Introduction to Computing for Engineers and Applied Scientists
COMS W1007	Honors Introduction to Computer Science

And select one of the following courses:

COMS W3134	Data Structures in Java
COMS W3136	Data Structures with C/C++
COMS W3137	Honors Data Structures and Algorithms

Computer Science Required Courses

COMS W3203	DISCRETE MATHEMATICS
------------	----------------------

CSOR W4231	Analysis of Algorithms I
------------	--------------------------

Computer Science Electives

Select three of the following courses:

COMS W3261	Computer Science Theory
COMS W4236	Introduction to Computational Complexity
COMS W4252	Introduction to Computational Learning Theory
COMS W4111	INTRODUCTION TO DATABASES
COMS W4130	Principles and Practice of Parallel Programming

Any COMS W47xx course EXCEPT W4771

MAJOR IN ECONOMICS-STATISTICS

Please read *Requirements for all Economics Majors, Concentrators, and Interdepartmental Majors* in the [Economics](#) (p. 407) section of this Bulletin.

The major in Economics-Statistics provides students with a grounding in economic theory comparable to that of the general economics major, but also exposes students to a more rigorous and extensive statistics training. This program is recommended for students with strong quantitative skills and for those contemplating graduate studies in economics.

Two advisers are assigned for the interdepartmental major, one in the Department of Economics and one in the Department of Statistics. The economics adviser can only advise on economics requirements and the statistics adviser can only advise on statistics requirements.

Students should be aware of the rules regarding the use of the Pass/D/Fail option. Courses in which a grade of D has been received do not count toward the major requirements.

The economics-statistics major requires a total of 59 points: 29 in economics, 15 points in statistics, 12 points in mathematics, and 3 points in computer science, as follows:

Economics Core Courses

Complete the Economics core courses.

Economics Electives

Select three electives at the 3000-level or above, of which no more than one may be a Barnard course.

Mathematics

Select one of the following sequences:

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and Calculus III
- MATH UN2010	and LINEAR ALGEBRA
MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1205	and Accelerated Multivariable Calculus
- MATH UN2010	and LINEAR ALGEBRA

MATH UN1207 Honors Mathematics A
- MATH UN1208 and HONORS MATHEMATICS
B

Statistics

STAT UN1201 Calculus-Based Introduction to
Statistics

STAT GU4203 PROBABILITY THEORY

STAT GU4204 Statistical Inference

STAT GU4205 Linear Regression Models

One elective from among courses numbered STAT GU4206
through GU4266.

Computer Science

Select one of the following courses:

COMS W1004 Introduction to Computer Science
and Programming in Java

COMS W1005 Introduction to Computer Science
and Programming in MATLAB

COMS W1007 Honors Introduction to Computer
Science

ENGI E1006 Introduction to Computing for
Engineers and Applied Scientists

STAT UN2102 Applied Statistical Computing

Seminar

ECON GU4918 Seminar In Econometrics

Students who declared before Spring 2014:

The requirements for this program were modified in 2014. Students who declared this program before Spring 2014 should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

MAJOR IN MATHEMATICS-STATISTICS

The program is designed to prepare the student for: (1) a career in industries such as finance and insurance that require a high level of mathematical sophistication and a substantial knowledge of probability and statistics; and (2) graduate study in quantitative disciplines. Students choose electives in finance, actuarial science, operations research, or other quantitative fields to complement requirements in mathematics, statistics, and computer science.

Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major. The requirements for the major are as follows:

Mathematics

Select one of the following sequences:

MATH UN1101 CALCULUS I

MATH UN1102 CALCULUS II

MATH UN1201 Calculus III

MATH UN2010 LINEAR ALGEBRA

MATH UN2500 ANALYSIS AND
OPTIMIZATION

OR

MATH UN1101 CALCULUS I

MATH UN1102 CALCULUS II

MATH UN1205 Accelerated Multivariable
Calculus

MATH UN2010 LINEAR ALGEBRA

MATH UN2500 ANALYSIS AND
OPTIMIZATION

OR

MATH UN1207 Honors Mathematics A

MATH UN1208 HONORS MATHEMATICS B

MATH UN2500 ANALYSIS AND
OPTIMIZATION

Statistics required courses

STAT UN1201 Calculus-Based Introduction to
Statistics

STAT GU4203 PROBABILITY THEORY

STAT GU4204 Statistical Inference

STAT GU4205 Linear Regression Models

And select one of the following courses:

STAT GU4207 Elementary Stochastic Processes

STAT GU4262 Stochastic Processes for Finance

STAT GU4264 STOCHASTIC PROCESSES-
APPLIC

STAT GU4265 Stochastic Methods in Finance

Computer Science

Select one of the following courses:

COMS W1004 Introduction to Computer Science
and Programming in Java

COMS W1005 Introduction to Computer Science
and Programming in MATLAB

ENGI E1006 Introduction to Computing for
Engineers and Applied Scientists

COMS W1007 Honors Introduction to Computer
Science

or an advanced Computer Science offering in
programming

Electives

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

- Students interested in modeling applications are recommended to take MATH UN3027 Ordinary Differential Equations and MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS
- Students interested in finance are recommended to include among their electives, MATH GR5010 Introduction to the Mathematics of Finance, STAT GU4261 Statistical Methods in Finance, and STAT GU4221 Time Series Analysis.
- Students interested in graduate study in mathematics or in statistics are recommended to take MATH GU4061 INTRO

MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

- Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 Linear Regression Models with STAT GU4282 Linear Regression and Time Series Methods, and to take among their electives STAT GU4281 Theory of Interest.

MAJOR IN POLITICAL SCIENCE–STATISTICS

The interdepartmental major of political science–statistics is designed for students who desire an understanding of political science to pursue advanced study in this field and who also wish to have at their command a broad range of sophisticated statistical tools to analyze data related to social science and public policy research.

Students should be aware of the rules regarding the use of the Pass/D/Fail option. Courses in which a grade of D has been received do not count toward the major requirements.

Political science–statistics students are eligible for all prizes reserved for political science majors.

The political science–statistics major requires a minimum of 15 courses in political science, statistics, and mathematics, to be distributed as follows:

Political Science

Students must choose a primary subfield to study. Within the subfield, students must take a minimum of three courses, including the subfield's introductory course. The subfields and their corresponding introductory courses are as follows:

American Politics:

POLS UN1201	Introduction To American Government and Politics
-------------	--

Comparative Politics:

POLS UN1501	Introduction to Comparative Politics
-------------	--------------------------------------

International Relations:

POLS UN1601	INTERNATIONAL POLITICS
-------------	------------------------

Political Theory:

POLS UN1101	Political Theory I
-------------	--------------------

Additionally, students must take a 4-point seminar in their primary subfield.

Research Methods

Students must take the following two research methods courses:

POLS GU4710	PRINC OF QUANT POL RESEARCH 1
or POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS
POLS GU4712	PRINC OF QUANT POL RESEARCH 2

Statistics

Select one of the following two sequences.

Sequence recommended for students preparing for graduate study in statistics.

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN2010	LINEAR ALGEBRA
STAT UN1201	Calculus-Based Introduction to Statistics
STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
STAT GU4206	Statistical Computing and Introduction to Data Science

Students taking the first track may replace the Mathematics prerequisites with both of MATH UN1207 and MATH UN1208

or

Sequence recommend for students preparing to apply statistical methods in the social sciences.

STAT UN1101	Introduction to Statistics
STAT UN2102	Applied Statistical Computing
STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN2104	Applied Categorical Data Analysis
STAT UN3105	Applied Statistical Methods
STAT UN3106	Applied Data Mining

Statistics elective:

Students must take an approved elective in a statistics or a quantitatively oriented course in a social science.

INTRODUCTORY COURSES

Students interested in statistical concepts, but who do not anticipate undertaking statistical analyses, should take STAT UN1001 Introduction to Statistical Reasoning. Students seeking an introduction to applied statistics or preparing for the concentration should take STAT UN1101 Introduction to Statistics (without calculus). Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN1201 Calculus-based Introduction to Statistics. Students seeking a one-semester calculus-based survey should take STAT GU4001 Introduction to Probability and Statistics. The undergraduate seminar STAT UN1202 features faculty lectures prepared with undergraduates in mind; students may attend without registering.

STAT UN1001 INTRO TO STATISTICAL REASONING. 3.00 points.

A friendly introduction to statistical concepts and reasoning with emphasis on developing statistical intuition rather than on mathematical rigor. Topics include design of experiments, descriptive statistics, correlation and regression, probability, chance variability, sampling, chance models, and tests of significance

STAT UN1010 Statistical Thinking For Data Science. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

The advent of large scale data collection and the computer power to analyze the data has led to the emergence of a new discipline known as Data Science. Data Scientists in all sectors analyze data to derive business insights, find solutions to societal challenges, and predict outcomes with potentially high impact. The goal of this course is to provide the student with a rigorous understanding of the statistical thinking behind the fundamental techniques of statistical analysis used by data scientists. The student will learn how to apply these techniques to data, understand why they work and how to use the analysis results to make informed decisions. The student will gain this understanding in the classroom and through the analysis of real-world data in the lab using the programming language Python. The student will learn the fundamentals of Python and how to write and run code to apply the statistical concepts taught in the classroom

Fall 2020: STAT UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

STAT UN1101 Introduction to Statistics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement, BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Prerequisites: intermediate high school algebra.

Designed for students in fields that emphasize quantitative methods. Graphical and numerical summaries, probability, theory of sampling distributions, linear regression, analysis of variance, confidence intervals and hypothesis testing. Quantitative reasoning and data analysis. Practical experience with statistical software. Illustrations are taken from a variety of

fields. Data-collection/analysis project with emphasis on study designs is part of the coursework requirement.

STAT UN1201 Calculus-Based Introduction to Statistics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement, BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Prerequisites: one semester of calculus.

Designed for students who desire a strong grounding in statistical concepts with a greater degree of mathematical rigor than in *STAT W1111*. Random variables, probability distributions, pdf, cdf, mean, variance, correlation, conditional distribution, conditional mean and conditional variance, law of iterated expectations, normal, chi-square, F and t distributions, law of large numbers, central limit theorem, parameter estimation, unbiasedness, consistency, efficiency, hypothesis testing, p-value, confidence intervals, maximum likelihood estimation. Serves as the pre-requisite for *ECON W3412*.

STAT UN1202 Undergraduate Seminar. 1 point.

Prerequisites: Previous or concurrent enrollment in a course in statistics would make the talks more accessible.

Prepared with undergraduates majoring in quantitative disciplines in mind, the presentations in this colloquium focus on the interface between data analysis, computation, and theory in interdisciplinary research. Meetings are open to all undergraduates, whether registered or not. Presenters are drawn from the faculty of department in Arts and Sciences, Engineering, Public Health and Medicine.

Fall 2020: STAT UN1202

APPLIED STATISTICS CONCENTRATION COURSES

The applied statistics sequence, together with an introductory course, forms the concentration in applied statistics. STAT UN2102 Applied statistical computing may be used to satisfy the computing requirement for the major, and the other concentration courses may be used to satisfy the elective requirements for the major. (Students who sat STAT GU4205

Linear Regression for the major would find that they have covered essentially all of the material in STAT UN2103 Applied Linear Regression Analysis.

STAT UN2102 Applied Statistical Computing. 3 points.

Corequisites: An introductory course in statistic (STAT UN1101 is recommended).

This course is an introduction to R programming. After learning basic programming component, such as defining variables and vectors, and learning different data structures in R, students will, via project-based assignments, study more advanced topics, such as recursion, conditionals, modular programming, and data visualization. Students will also learn the fundamental concepts in computational complexity, and will practice writing reports based on their statistical analyses.

Spring 2021: STAT UN2102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2102 001/13134		T Th 4:10pm - 5:25pm Online Only	Wayne Lee	3	94/120

STAT UN2103 APPLIED LINEAR REG ANALYSIS. 3.00 points.

Prerequisites: An introductory course in statistics (STAT UN1101 is recommended). Students without programming experience in R might find STAT UN2102 very helpful. Develops critical thinking and data analysis skills for regression analysis in science and policy settings. Simple and multiple linear regression, non-linear and logistic models, random-effects models. Implementation in a statistical package. Emphasis on real-world examples and on planning, proposing, implementing, and reporting

Fall 2020: STAT UN2103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2103 001/12883		M W 6:10pm - 7:25pm Online Only	Daniel Rabinowitz	3.00	47/60

STAT UN2104 Applied Categorical Data Analysis. 3 points.

Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

This course covers statistical models and methods for analyzing and drawing inferences for problems involving categorical data. The goals are familiarity and understanding of a substantial and integrated body of statistical methods that are used for such problems, experience in analyzing data using these methods, and proficiency in communicating the results of such methods, and the ability to critically evaluate the use of such methods. Topics include binomial proportions, two-way and three-way contingency tables, logistic regression, log-linear models for large multi-way contingency tables, graphical methods. The statistical package R will be used.

Spring 2021: STAT UN2104

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

STAT 2104 001/13138 M W 11:40am - Ronald 3 38/60
12:55pm Neath
Online Only

STAT UN3105 Applied Statistical Methods. 3 points.

Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

This course is intended to give students practical experience with statistical methods beyond linear regression and categorical data analysis. The focus will be on understanding the uses and limitations of models, not the mathematical foundations for the methods. Topics that may be covered include random and mixed-effects models, classical non-parametric techniques, the statistical theory causality, sample survey design, multi-level models, generalized linear regression, generalized estimating equations and over-dispersion, survival analysis including the Kaplan-Meier estimator, log-rank statistics, and the Cox proportional hazards regression model. Power calculations and proposal and report writing will be discussed.

Fall 2020: STAT UN3105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 3105	001/12884	T Th 11:40am - 12:55pm Online Only	Wayne Lee	3	21/60

STAT UN3106 Applied Data Mining. 3 points.

Prerequisites: STAT UN2103. Students without programming experience in R might find STAT UN2102 very helpful. This course will be taught as a machine learning class. We will cover topics including data-based prediction, classification, specific classification methods (such as logistic regression and random forests), and basics of neural networks. Programming in homeworks will require R; students without programming experience in R might find STAT UN2102 helpful.

Spring 2021: STAT UN3106

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 3106	001/13142	T Th 2:40pm - 3:55pm Online Only	Wayne Lee	3	33/50

FOUNDATION COURSES

The calculus-based foundation courses for the core of the statistics major. These courses are GU4203 Probability Theory, GU4204 Statistical Inference, GU4205 Linear Regression, GU4206 Statistical Computing and Introduction to Data Science, and GU4207 Elementary Stochastic processes. Ideally, students would take Probability theory or the equivalent before taking either Statistical Inference or Elementary Stochastic Processes, and would have taken Statistical Inference before, or at least concurrently with taking Linear Regression Analysis, and would have taken Linear Regression analysis before, or at least concurrently, with taking the computing and data science course. A semester of calculus should be taken before

Probability, additional semesters of calculus are recommended before Statistical Inference, and a course in linear algebra before Linear Regression is strongly recommended. For the more advanced electives in stochastic processes, Probability Theory is an essential prerequisite, and many students would benefit from taking Elementary Stochastic Processes, too. Linear Regression and the computing and data science course should be taken before the advanced electives in machine learning and data science. Linear Regression is a strongly recommended prerequisite, or at least co-requisite, for the remaining advanced statistical electives.

STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
STAT GU4206	Statistical Computing and Introduction to Data Science
STAT GU4207	Elementary Stochastic Processes

ADVANCED STATISTICS COURSES

Advanced statistics courses combine theory with methods and practical experience in data analysis. Undergraduates enrolling in advanced statistics courses would be well-advised to have completed STAT GU4203 (Probability Theory), GU4204 (Statistical Inference), and GU4205 (Linear Regression).

STAT GU4221 Time Series Analysis. 3 points.

CC/GS: Partial Fulfillment of Science Requirement, BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Prerequisites: STAT GU4205 or the equivalent. Least squares smoothing and prediction, linear systems, Fourier analysis, and spectral estimation. Impulse response and transfer function. Fourier series, the fast Fourier transform, autocorrelation function, and spectral density. Univariate Box-Jenkins modeling and forecasting. Emphasis on applications. Examples from the physical sciences, social sciences, and business. Computing is an integral part of the course.

Fall 2020: STAT GU4221

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4221	001/12556	T Th 1:10pm - 2:25pm Online Only	Flavio Bartmann	3	0/50

Spring 2021: STAT GU4221

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4221	001/13157	T Th 6:10pm - 7:25pm Online Only	Rongning Wu	3	12/25

STAT GU4222 NONPARAMETRIC STATISTICS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: STAT GU4204 or the equivalent.

Prerequisites: STAT GU4204 or the equivalent. Statistical inference without parametric model assumption. Hypothesis testing using ranks, permutations, and order statistics. Nonparametric analogs of analysis of variance. Non-parametric regression, smoothing and model selection

STAT GU4223 Multivariate Statistical Inference. 3 points.

Prerequisites: STAT GU4205 or the equivalent.

Multivariate normal distribution, multivariate regression and classification; canonical correlation; graphical models and Bayesian networks; principal components and other models for factor analysis; SVD; discriminant analysis; cluster analysis.

Spring 2021: STAT GU4223

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4223	001/13158	T Th 1:10pm - 2:25pm Online Only	Cynthia Rush	3	12/25

STAT GU4224 BAYESIAN STATISTICS. 3.00 points.

Prerequisites: STAT GU4204 or the equivalent.

Prerequisites: STAT GU4204 or the equivalent. Bayesian data analysis: building, fitting, evaluating and improving probability models. Prior information, hierarchical models and combining information. Linear and nonlinear models. Simulation of fake data and evaluation of methods. Computing using R and Stan

Fall 2020: STAT GU4224

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4224	001/12490	M W 6:10pm - 7:25pm Online Only	Ronald Neath	3.00	21/50

Spring 2021: STAT GU4224

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4224	001/13159	T Th 6:10pm - 7:25pm Online Only	Ronald Neath	3.00	16/25

STAT GU4231 Survival Analysis. 0 points.

Prerequisites: STAT GU4205 or the equivalent.

Survival distributions, types of censored data, estimation for various survival models, nonparametric estimation of survival distributions, the proportional hazard and accelerated lifetime models for regression analysis with failure-time data. Extensive use of the computer.

Spring 2021: STAT GU4231

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4231	001/13160	M W 7:40pm - 8:55pm Online Only	Irene Hueter	0	4/25

STAT GU4232 Generalized Linear Models. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: STAT GU4205 or the equivalent.

Statistical methods for rates and proportions, ordered and nominal categorical responses, contingency tables, odds-

ratios, exact inference, logistic regression, Poisson regression, generalized linear models.

Spring 2021: STAT GU4232

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4232	001/13162	M W 7:40pm - 8:55pm Online Only	Michael Sobel	3	5/25

STAT GU4233 Multilevel Models. 3 points.

Prerequisites: STAT GU4205 or the equivalent.

Theory and practice, including model-checking, for random and mixed-effects models (also called hierarchical, multi-level models). Extensive use of the computer to analyse data.

STAT GU4234 Sample Surveys. 3 points.

CC/GS: Partial Fulfillment of Science Requirement, BC:

Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Prerequisites: STAT GU4204 or the equivalent.

Introductory course on the design and analysis of sample surveys. How sample surveys are conducted, why the designs are used, how to analyze survey results, and how to derive from first principles the standard results and their generalizations. Examples from public health, social work, opinion polling, and other topics of interest.

Fall 2020: STAT GU4234

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4234	001/12492	M W 1:10pm - 2:25pm Online Only	Rongning Wu	3	8/15

STAT GU4241 Statistical Machine Learning. 3 points.

Prerequisites: STAT GU4206.

The course will provide an introduction to Machine Learning and its core models and algorithms. The aim of the course is to provide students of statistics with detailed knowledge of how Machine Learning methods work and how statistical models can be brought to bear in computer systems - not only to analyze large data sets, but to let computers perform tasks that traditional methods of computer science are unable to address. Examples range from speech recognition and text analysis through bioinformatics and medical diagnosis. This course provides a first introduction to the statistical methods and mathematical concepts which make such technologies possible.

Spring 2021: STAT GU4241

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4241	001/13165	T Th 2:40pm - 3:55pm 417 Mathematics Building	Xiaofei Shi	3	5/35

STAT GU4261 Statistical Methods in Finance. 3 points.
CC/GS: Partial Fulfillment of Science Requirement, BC:
Fulfillment of General Education Requirement: Quantitative
and Deductive Reasoning (QUA).

Prerequisites: STAT GU4205 or the equivalent.

A fast-paced introduction to statistical methods used in quantitative finance. Financial applications and statistical methodologies are intertwined in all lectures. Topics include regression analysis and applications to the Capital Asset Pricing Model and multifactor pricing models, principal components and multivariate analysis, smoothing techniques and estimation of yield curves statistical methods for financial time series, value at risk, term structure models and fixed income research, and estimation and modeling of volatilities. Hands-on experience with financial data.

Fall 2020: STAT GU4261

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4261	001/12494	F 8:40am - 11:25am Online Only	Hammou El 3 Barmi		8/25

Spring 2021: STAT GU4261

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4261	001/13169	Sa 9:10am - 11:40am Online Only	Zhiliang Ying	3	18/25

STAT GU4263 Statistical Inference and Time Series Modelling. 3 points.

Prerequisites: STAT GU4204 or the equivalent. STAT GU4205 is recommended. Modeling and inference for random processes, from natural sciences to finance and economics. ARMA, ARCH, GARCH and nonlinear models, parameter estimation, prediction and filtering. This is a core course in the MS program in mathematical finance.

Fall 2020: STAT GU4263

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4263	002/12496	Sa 10:10am - 12:40pm Online Only	Li Haoran	3	12/35

STAT GU4291 Advanced Data Analysis. 3 points.

CC/GS: Partial Fulfillment of Science Requirement, BC:
Fulfillment of General Education Requirement: Quantitative
and Deductive Reasoning (QUA).

Prerequisites: STAT GU4205 and at least one statistics course numbered between GU4221 and GU4261.

This is a course on getting the most out of data. The emphasis will be on hands-on experience, involving case studies with real data and using common statistical packages. The course covers, at a very high level, exploratory data analysis, model formulation, goodness of fit testing, and other standard and non-standard statistical procedures, including linear regression, analysis of variance, nonlinear regression, generalized linear models, survival analysis, time series analysis, and modern

regression methods. Students will be expected to propose a data set of their choice for use as case study material.

Fall 2020: STAT GU4291

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4291	001/12515	F 6:10pm - 8:40pm Online Only	Demissie Alemayehu	3	6/25

Spring 2021: STAT GU4291

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4291	001/13172	F 10:10am - 12:40pm Online Only	Hammou El 3 Barmi		8/25

ACTUARIAL SCIENCES COURSES

Only students preparing for a career in actuarial sciences should consider the courses in this section. Such students may also be interested in courses offered through the School of Professional Studies M.S. Program in Actuarial Science, but must check with the academic advisors in their schools to know whether they are allowed to register for those courses. Students majoring in statistics and preparing for a career in actuarial science may take STAT GU4282 (Regression and Time Series Analysis) in place of the major requirement STAT GU4205 (Linear Regression Analysis).

STAT GU4281	Theory of Interest
STAT GU4282	Linear Regression and Time Series Methods

ADVANCED DATA SCIENCE COURSES

In response to the ever growing importance of "big data" in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications at the interface between computer science and statistics. The Department offers a sequence that begins with the core course STAT GU4206 (Statistical Computing and Introduction to Data Science) and continues with the advanced electives GU4241 (Statistical Machine Learning) and GU4242 (Advanced Machine Learning), and also the advanced elective STAT GU4243 (Applied Data Science). Undergraduate students without experience in programming would likely benefit from taking the statistical computing and data science course before attempting GU4241, GU4242, or GU4243.

STAT GU4241	Statistical Machine Learning
STAT GU4242	Advanced Machine Learning
STAT GU4243	Applied Data Science
STAT GU4702	Exploratory Data Analysis and Visualization

ADVANCED STOCHASTIC PROCESSES COURSES

The stochastic processes electives in this section have STAT GU4203 (Probability Theory) or the equivalent as prerequisites

Most students would also benefit from taking STAT GU4207 (Elementary Stochastic Processes) before embarking on the more advanced stochastic processes electives.

STAT GU4262	Stochastic Processes for Finance
STAT GU4264	STOCHASTIC PROCESSES- APPLIC
STAT GU4265	Stochastic Methods in Finance

SUSTAINABLE DEVELOPMENT

Departmental Office: The Earth Institute, Office of Academic and Research Programs, Hogan, B-Level; <http://sdev.ei.columbia.edu>

Co-Directors of Undergraduate Studies:

Ruth DeFries, 212-851-1647; rd2402@columbia.edu
Jason Smerdon, 845-365-8493; jsmerdon@ldeo.columbia.edu

Program Administrators:

Natalie Unwin-Kuruner, 212-854-8536;
natalie@ei.columbia.edu
Cari Shimkus, 212-851-9350; cshimkus@ei.columbia.edu

Sustainable development is founded on the premise that human well-being should advance without irreparable harm to ecosystems and the vital services they provide, without depleting essential resources, and without posing risks to future generations. The term "sustainable" refers to managing the world's economy in a manner consistent with the continued healthy functioning of Earth's ecosystems, oceans, atmosphere and climate. In this context, "development" refers to continued social, political, and economic progress aimed at improving the well-being of the global community, especially for the poorest people.

ACADEMIC PROGRAMS

The Earth Institute—in collaboration with Columbia College, the School of General Studies, the School of International and Public Affairs, and the Departments of Earth and Environmental Science; Ecology, Evolution, and Environmental Biology; and Earth and Environmental Engineering—offers a major and a special concentration in sustainable development.

These programs are designed to: engage students in this emergent interdisciplinary discussion, provide knowledge of the theory and practice of sustainable development, stimulate a critical examination of historical and conceptual antecedents, provide experience in the complex challenges of sustainable development through direct engagement, and help them imagine alternative futures for our rapidly changing world. With help from the Earth Institute faculty, courses are specifically created to address the very real and complex issues

of development as they relate to the interactions of the natural and social systems.

The major focuses heavily on the sciences and provides students with a working knowledge of issues on a range of interacting subject areas. After declaring the major, students are assigned an academic adviser from within the Earth Institute, who advises on class selection and career development. Students benefit from a support system of faculty, advisers, and program managers, and have access to the multitude of resources for internships, study abroad programs, and career development.

The special concentration is intentionally more flexible, but its structure allows students to benefit from the cross-disciplinary courses and to build the expertise to allow them to address the fundamental issue of how to move towards a trajectory of sustainability.

The sustainable development program is structured to ensure that students graduate with the skills and knowledge to enable them to advance professionally in the public, private, governmental, and nonprofit sectors, and to pursue advanced degrees. Those interested in sustainable development are encouraged to participate in lectures, conferences, and other programs sponsored by the Earth Institute.

GRADING

A letter grade of C- or better is needed in all program-related courses in order to satisfy the program requirements.

SUSTAINABLE DEVELOPMENT FACULTY

Susana Adamo (Center for International Earth Information Network)

Satyajit Bose (School of International and Public Affairs)

Steve Cohen (The Earth Institute; School of International and Public Affairs)

Lisa Dale (The Earth Institute; Ecology, Evolution, and Environmental Biology)

Ruth DeFries (Ecology, Evolution, and Environmental Biology) (Co-Director)

Paul Gallay (Ecology, Evolution and Environmental Biology)

Michael Gerrard (Center for Climate Change Law and Columbia Law School)

Adela Gondek (Ecology, Evolution and Environmental Biology)

Radley Horton (Center for Climate Systems Research)

Joyce Klein-Rosenthal (The Earth Institute)

Jacqueline Klopp (The Earth Institute)

Upmanu Lall (Columbia Water Center; International Research Institute for Climate and Society)

Kytt McManus (Center for International Earth Science Information Network)

Dara Mendeloff (Center for International Earth Science Information Network)

Rachel Moresky (Population and Family Health)

John Mutter (Earth and Environmental Sciences; School of International and Public Affairs)

Linda Pistolesi (Center for International Earth Science Information Network)

Robert Pollack (Biological Sciences)

Elliott Sclar (The Earth Institute; Architecture, Planning, and Preservation; School of International and Public Affairs)

Jason Smerdon (Lamont-Doherty Earth Observatory) (Co-Director)

Marni Sommer (Mailman School of Public Health)

Martin Stute (Lamont-Doherty Earth Observatory)

Phil Weinberg (Ecology, Evolution and Environmental Biology)

MAJOR IN SUSTAINABLE DEVELOPMENT

The sustainable development foundation courses should be taken first and students should then work with the program adviser on further course selection and sequencing.

The major in sustainable development requires a minimum of 15 courses and a practicum as follows:

Sustainable Development Foundation

SDEV UN1900	Introduction to Sustainable Development Seminar
SDEV UN2300	Challenges of Sustainable Development
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

Basic Disciplinary Foundation

Select one of the following science sequences.

CHEM UN1403 - CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and General Chemistry II (Lecture)
------------------------------	--

EESB UN2001 - EESB UN2002	Environmental Biology I: Elements to Organisms and Environmental Biology II: Organisms to the Biosphere (EESC UN2310 is a co-requisite with EESB UN2002)
EESC UN1600 - EESC UN2100	Earth Resources and Sustainable Development and Earth's Environmental Systems: The Climate System
EESC UN1600 - EESC UN2200	Earth Resources and Sustainable Development and EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN1600 - EESC UN2300	Earth Resources and Sustainable Development and Earth's Environmental Systems: The Life System (EESC UN2310 is co-requisite with EESC UN2300)
EESC UN2100 - EESC UN2200	Earth's Environmental Systems: The Climate System and EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2100 - EESC UN2300	Earth's Environmental Systems: The Climate System and Earth's Environmental Systems: The Life System (EESC UN2310 is co-requisite with EESC UN2300)
EESC UN2200 - EESC UN2300	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH and Earth's Environmental Systems: The Life System (EESC UN2310 is co-requisite with EESC UN2300)
PHYS UN1201 - PHYS UN1202	General Physics I and General Physics II (LABS PHYS 1291 and PHYS 1292 also required)
Select two of the following social science courses:	
ANTH UN1002	The Interpretation of Culture
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ECON UN1105	Principles of Economics
POLS UN1201	Introduction To American Government and Politics (Students can take POLS 1201 or SDEV 2050)
POLS UN1501	Introduction to Comparative Politics (Students can take POLS 1501 OR POLS 1601)
POLS UN1601	INTERNATIONAL POLITICS
SDEV UN2000	Introduction to Environmental Law
SDEV UN2050	Environmental Policy and Governance

SDEV UN3400	Human Populations and Sustainable Development
SOCI UN1000	THE SOCIAL WORLD
Select one of the following quantitative foundations courses:	
EEEB UN3005	Introduction to Statistics for Ecology and Evolutionary Biology
EESC BC3017	Environmental Data Analysis
MATH UN2010	LINEAR ALGEBRA
STAT UN1201	Calculus-Based Introduction to Statistics
STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN3105	Applied Statistical Methods
STAT UN3106	Applied Data Mining
STAT GU4203	PROBABILITY THEORY
STAT GU4204	Statistical Inference
STAT GU4205	Linear Regression Models
STAT GU4207	Elementary Stochastic Processes
Analysis and Solutions to Complex Problems	
Select two of the following courses:	
CIEE E3260	Engineering for developing communities
EAEE W4304	Closing the carbon cycle
ECIA W4100	Management and development of water systems
EESC BC3032	Agricultural and Urban Land Use: Human-Environment Interactions
EESC BC3045	Responding to Climate Change
EESC GU4600	Earth Resources and Sustainable Development
PLAN A4579	Introduction to Environmental Planning
PUBH UN3100	Fundamentals of Global Health
SDEV UN3330	Ecological and Social Systems for Sustainable Development
SDEV UN3355	Climate Change and Law
SDEV UN3360	Disasters and Development
SDEV UN3366	Energy Law
SDEV UN3410	Cities # Sustainability
SOCI BC3932	Climate Change, Global Migration, and Human Rights in the Anthropocene
URBS UN3565	Cities in Developing Countries: Problems and Prospects
SDEV GU4250	CLIMATE CHANGE: RESILIENCE # ADAPTATION
The Summer Ecosystems Experience for Undergraduates (SEE-U) *	
Skills/Actions	
Select two of the following courses:	
EAEE E4257	ENVIR DATA ANALYSIS # MODELING
EESC GU4050	Global Assessment and Monitoring Using Remote Sensing

EESC BC3050	Big Data with Python: Python for Environmental Analysis and Visualisation
SDEV UN2320	Economic and Financial Methods for Sustainable Development
SDEV UN3390	GIS for Sustainable Development
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV
SDEV GU4015	Complexity Science
SOCI UN3010	Methods for Social Research
SUMA PS4100	Sustainability Management
SDEV GU4101	Qualitative Research Methods for Sustainable Development
SDEV GU4240 Science Communication	
The Summer Ecosystems Experience for Undergraduates (SEE-U) *	
Practicum	
Select one of the following courses:	
INAF U4420	Oil, Rights and Development
SDEV UN3998	Sustainable Development Independent Study
SUMA PS4310	Practicum in Innovation Sustainability Leadership
SUMA PS4734 Earth Institute Practicum	
Electives	
Select two courses from the following areas. Courses can be combined across Areas 2-5 only. If you select Area 1, you must complete two thesis courses and these will fulfill the elective requirement:	
Area 1: Senior Thesis Sequence (EESC BC3800/ EESC BC3801 and EESC UN3901) **	
Area 2: Upper level courses from the approved electives list (see link in footnotes to access list) ***	
Area 3: Additional courses listed under Analysis and Solutions to Complex Problem	
Area 4: Additional courses listed under Skills/Actions	
Area 5	
SDEV UN3310	Ethics of Sustainable Development
SDEV GU4050	Essential Connections: US Water & Energy Policy in a Resource-Constrained World
SDEV GU4350	PUBLIC LANDS IN THE AMERICAN WEST
Capstone Workshop	
SDEV UN3280	Workshop in Sustainable Development
SDEV UN3550	BANGLADSH:LIFE-TECT ACTV DELTA

- * The Summer Ecosystem Experiences for Undergraduates (SEE-U): Please note that students in the major or the special concentration who take SEE-U as a 6-point course can use 3 points towards the Complex Problems requirement and 3 points towards the Skills/Action requirement. If SEE-U is taken for 3 points, it can only count as one Complex Problems class.
 - ** If choosing the senior thesis option to fulfill the elective requirements, students must take both courses in the senior thesis sequence.
 - ***For a full list of previously approved electives, please visit the sustainable development program website: <http://sdev.ei.columbia.edu/curriculum/major/>.
- Not Please visit the Sustainable Development website for requirements:
Majors: <http://sdev.ei.columbia.edu/curriculum/major/>

SPECIAL CONCENTRATION IN SUSTAINABLE DEVELOPMENT

In addition to the requirements of the special concentration, students must complete a major or a full concentration.

The sustainable development foundation courses should be taken first and students should then work with the program adviser on further course selection and sequencing.

The special concentration in sustainable development requires a minimum of 9 courses and a practicum as follows:

Sustainable Development Foundation

SDEV UN1900	Introduction to Sustainable Development Seminar
SDEV UN2300	Challenges of Sustainable Development
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

Natural Science Systems

Select one of the following courses. NOTE--Associated Labs are also required:

CHEM UN1403	GENERAL CHEMISTRY I- LECTURES
EEEB UN1001	Biodiversity
EEEB UN2002	Environmental Biology II: Organisms to the Biosphere (EESC UN2310 is co-requisite with EEEB UN2002)
EESC UN1003	Climate and Society: Case Studies
EESC UN1011	Earth: Origin, Evolution, Processes, Future
EESC UN1201	Environmental Risks and Disasters
EESC UN1600	Earth Resources and Sustainable Development
EESC UN2100	Earth's Environmental Systems: The Climate System

EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	Earth's Environmental Systems: The Life System (EESC UN2310 is co-requisite with EESC UN2300)
PHYS UN1201 - PHYS UN1291	General Physics I and General Physics Laboratory
Human Science Systems	
Select one of the following courses:	
ANTH UN1002	The Interpretation of Culture
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ECON UN1105	Principles of Economics
POLS UN1201	Introduction To American Government and Politics (Students can take POLS 1201 OR SDEV 2050)
POLS UN1501	Introduction to Comparative Politics (Students can take POLS 1501 OR POLS 1601)
POLS UN1601	INTERNATIONAL POLITICS
SDEV UN2000	Introduction to Environmental Law
SDEV UN2050	Environmental Policy and Governance
SDEV UN3400	Human Populations and Sustainable Development
SOCI UN1000	THE SOCIAL WORLD
Analysis and Solutions to Complex Problems	
Select two of the following courses:	
CIEE E3260	Engineering for developing communities
EAEE W4304	Closing the carbon cycle
ECIA W4100	Management and development of water systems
EESC BC3032	Agricultural and Urban Land Use: Human-Environment Interactions
EESC BC3045	Responding to Climate Change
EESC GU4600	Earth Resources and Sustainable Development
PLAN A4579	Introduction to Environmental Planning
PUBH UN3100	Fundamentals of Global Health
SDEV UN3330	Ecological and Social Systems for Sustainable Development
SDEV UN3355	Climate Change and Law
SDEV UN3360	Disasters and Development
SDEV UN3366	Energy Law
SDEV UN3410	Cities # Sustainability
SOCI BC3932	Climate Change, Global Migration, and Human Rights in the Anthropocene
URBS UN3565	Cities in Developing Countries: Problems and Prospects

The Summer Ecosystem Experiences for Undergraduates (SEE-U) *

Skills/Actions

Select one of the following courses:

EAE E4257	ENVIR DATA ANALYSIS # MODELING
EESC BC3050	Big Data with Python: Python for Environmental Analysis and Visualisation
EESC GU4050	Global Assessment and Monitoring Using Remote Sensing
SCNC W3010	Science, technology and society
SDEV UN2320	Economic and Financial Methods for Sustainable Development
SDEV UN3390	GIS for Sustainable Development
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV
SDEV GU4015	Complexity Science
SDEV GU4101	Qualitative Research Methods for Sustainable Development
SDEV GU4240	Science Communication
SUMA PS4100	Sustainability Management
SOCI UN3010	Methods for Social Research

The Summer Ecosystem Experiences for Undergraduates (SEE-U) *

Practicum

Select one of the following courses:

INAF U4420	Oil, Rights and Development
SDEV UN3998	Sustainable Development Independent Study
SUMA PS4310	Practicum in Innovation Sustainability Leadership

SUMA PS4734 Earth Institute Practicum

Capstone Workshop

SDEV UN3280	Workshop in Sustainable Development
SDEV UN3550	BANGLADSH:LIFE-TECT ACTV DELTA

* The Summer Ecosystem Experiences for Undergraduates (SEE-U): Please note that students in the major or the special concentration who take SEE-U as a 6-point course can use 3 points towards the Complex Problems requirement and 3 points towards the Skills/Action requirement. If SEE-U is taken for 3 points, it can only count as one Complex Problems class.

Not Sustainable Development Website for Special Concentrators: <http://sdev.ei.columbia.edu/curriculum/special-concentration/>

SDEV UN1900 Introduction to Sustainable Development Seminar. 1 Point.

Open to prospective sustainable development majors and concentrators only.

The course is designed to be a free flowing discussion of the principals of sustainable development and the scope of this emerging discipline. This course will also serve to introduce the students to the requirements of the undergraduate program in sustainable development and the content of the required courses in both the special concentration and the major. The focus will be on the breadth of subject matter, the multidisciplinary nature of the scholarship and familiarity with the other key courses in the program. Offered in the Fall and Spring.

Term	Section	Call Number	Instructor	Times/Location
Fall 2020	001	11168	Jason Smerdon	T 11:40am - 12:55pm Online Only
Spring 2021	001	13382	Jason Smerdon	T 11:40am - 12:55pm Online Only

SDEV UN2000 Introduction to Environmental Law. 3 Points.

The course provides an overview of environmental law for students without a legal background. It examines U.S. statutes and regulations regarding air, water, hazardous and toxic materials, land use, climate change, endangered species, and the like, as well as international environmental issues. After completing the course students should be equipped to understand how the environmental laws operate, the role of the courts, international treaties and government agencies in implementing environmental protection, and techniques used in addressing these issues.

Term	Section	Call Number	Instructor	Times/Location
Spring 2021	001	13581	Philip Weinberg	M W 10:10am - 11:25am Online Only

SDEV UN2050 Environmental Policy and Governance. 3 Points.

Sustainability is a powerful framework for thinking about business, economics, politics and environmental impacts. An overview course, Environmental Policy & Governance will focus specifically on the policy elements of sustainability. With an emphasis on the American political system, the course will begin by exploring the way the American bureaucracy addresses environmental challenges. We will then use the foundations established through our understanding of the US system to study sustainable governance at the international level. With both US and international perspectives in place, we will then address a range of specific sustainability issues including land use, climate change, food and agriculture, air quality, water quality, and energy. Over the course of the semester, we will study current events through the lens of sustainability policy to help illustrate course concepts and theories.

SDEV UN2300 Challenges of Sustainable Development. 3 Points.

This course provides an introduction to the field of sustainable development, drawing primarily from social science and policy studies. It offers a critical examination of the concept of sustainable development, showing how factors like economics, population, culture, politics and inequality complicate its goals. Students will learn how different social science disciplines (political science, demography, economics, geography, history, law, and sociology) approach challenges of sustainable development across a variety of topics (fisheries, climate change, air pollution, consumption, energy, conservation, and water management). The course provides students with some of the fundamental concepts, vocabulary, and analytical tools to pursue and think critically about sustainable development. Offered in the Spring.

Term	Section	Call Number	Instructor	Times/ Location
Spring 2021	001	13582	Lisa Dale	T Th 10:10am - 11:25am Online Only

SDEV UN2320 Economic and Financial Methods for Sustainable Development. 3 Points.

Prerequisites: Principles of Economics and one semester of calculus.

The objective of this course is to introduce students to the skills and methods necessary to understand and evaluate the economic and financial aspects of sustainable development. Throughout the course, students will compare competing objectives and policies through the prism of economic & financial reasoning. Environmental economics and finance are broad areas covering all the multi-faceted and complex interactions between the economic system and the natural environment. Financial markets are the primary source of signals used to direct economic activity in a capitalist global economy. Economic activity is the primary determinant of the quality and sustainability of the natural environment. Students interested in sustainable development who are unfamiliar with economics and who do not develop a facility with economic and financial concepts are severely handicapped in their efforts to increase the level of environmental responsibility embedded in economic activity. This course is intended to provide students with a flying introduction to key analytical concepts required to understand topics in environmental economics and finance and to introduce them to selected topics within the field. The first part of the course (the Analytical Toolbox) is designed to provide a set of portable skills for two sets of students: a) those who will work in fields specifically devoted to sustainable development who, as part of their work, will need to engage with sources of economic & financial information and with discourses where sustainable development is not a focus; and

b) students who may end up following careers in organizations where sustainability is not the primary objective. The topics and readings in the second part of the course were chosen to facilitate a critical engagement with the broad intellectual framework underlying sustainable development from the perspective of economics and finance. The topics are intended to create a community of intellectual discourse on sustainable development that will spill over beyond the classroom to the conversations of students and alumni that will far outlive graduation. Offered in the Fall.

Fall 2020	001	11171	Satyajit Bose	M W 4:10pm - 5:25pm Online Only

SDEV UN3280 Workshop in Sustainable Development. 4 Points.

Open to sustainable development seniors only.

The upper level undergraduate Sustainable Development Workshop will be modeled on client based graduate-level workshops, but with more time devoted to methods of applied policy analysis and issues in Sustainable Development. The heart of the course is the group project on an issue of sustainable development with a faculty advisor providing guidance and ultimately grading student performance. Students would receive instruction on methodology, group work, communication and the context of policy analysis. Much of the reading in the course would be project-specific and identified by the student research teams. Offered in Fall and Spring. For registration issues contact Cari Shimkus (cshimkus@ei.columbia.edu).

SDEV UN3310 Ethics of Sustainable Development. 3 Points.

Aiming to improve human conditions within many diverse environments, sustainable development seeks to create, increase and perpetuate benefit and to cease, rectify and reverse harm. Sustainable development is consequently inextricable from the fabric of ethics, woven with determinations of benefit and harm to the existence and well-being of both humans and nonhumans. Underlying such determinations are those of self- and other-regarding motivation and behavior; and underlying these are still others, of sensitivity and rationality in decision-making, whether individual, social or public. Sustainable

development is interlaced with and contingent upon all these determinations, at once prescriptive and judgmental, which can be called the ethics of sustainable development. This course is divided into four main sections, of which two are intended to show the ethical fallacies of unsustainable development, and two, the ethical pathways of sustainable development. The first section focuses upon ethically problematic basic assumptions, including human (species) hegemony, happy (hedonic) materialism, and selective (data) denial. The second focuses upon ethically problematic ensuing rationalizations, including those pertaining to damages, victims, consequences and situations of climatic, chemical, biological and ecological harm. The third section responds to these rationalizations with ethically vital considerations of earth justice, environmental justice, culturally-based ethics, and sector-based ethics (water, food, place and climate ethics). Finally, the fourth section responds to the initial, longstanding problematic assumptions with a newly emergent ethical paradigm, comprising biotic wholeness, environmental integrity and the deliberative zero-goal. Tying all sections together is the central theme: to be sustainable, development must be ethical. Reflecting the collaborative quality of the field of sustainable development, the course extends to readings whose authors have all pursued their work at intersections of science and ethics, environment and ethics, policy and ethics, business and ethics, and sustainable development and ethics.

SDEV UN3330 Ecological and Social Systems for Sustainable Development. 3 Points.

Prerequisites: SDEV UN2300 Challenges of Sustainable Development and EESC UN2330 Science for Sustainable Development.

The course focuses on basic principles in understanding ecological and social relationships and then focuses on three current topics central to Sustainable Development for in-depth study. Examples of topics to be covered are: conservation of biodiversity, payments for ecosystem services, and the ecology of food production. The emphasis will be on the multiple perspectives— environmental, social and economic—required to understand and develop solutions to problems in sustainable development. These topics will undoubtedly vary from year to year, as the course keeps pace with current topics.

SDEV UN3355 Climate Change and Law. 3 Points.

Enrollment limited to 15.

The purpose of this course is to provide students with a broad introduction to the field of climate law in the United States and at the international level. The course begins with an overview of the causes and effects of global climate change and the methods available to control and adapt to it. We then examine the negotiation, implementation and current status of the United Nations Framework Convention on Climate

Change, the Kyoto Protocol, and the Copenhagen Accord. The focus then turns to the past and proposed actions of the U.S. Congress, the executive branch and the courts, as well as regional, state and municipal efforts. The Clean Air Act, the National Environmental Policy Act and the Endangered Species Act will receive special attention. We evaluate the various legal tools that are available to address climate change, including cap-and-trade schemes; carbon taxation; command-and-control regulation; litigation; securities disclosures; and voluntary action. The roles of energy efficiency, renewable energy sources, carbon capture and sequestration, and forestry and agriculture each receive close attention. Implications for international human rights, international trade, environmental justice, and international and intergenerational equity are discussed. The course concludes with examination of the special challenges posed by China; proposals for adaptation and geoengineering; and business opportunities and the role of lawyers. Offered in the Spring.

SDEV UN3360 Disasters and Development. 3 Points.

Prerequisites: *EESC 2330*; *SDEV W2300*.

Human welfare status is very unevenly distributed throughout the globe – some of us live very comfortable lives, others remain in desperate poverty showing little progress away from their condition. Between are countries that are rapidly developing and converging toward the welfare of the richest. At all levels of economic development human activities place significant pressure on the environment and threatens all of Earth's vital functions and support systems for human life. This challenge requires timely responses based on solid understanding of the human/environment interface, technological and economic approaches to mitigate adverse effects on the environment, and routes to understanding the complex dynamics of the coupled human/natural systems that can chart a pathway to improvement in the lives of the poorest and continued well-being for those who have achieved prosperity without forcing natural systems into decline or massive fluctuation. This course offers undergraduate students, for the first time, a comprehensive course on the link between natural disaster events and human development at all levels of welfare. It explores the role that natural disasters might have and have had in modulating development prospects. Any student seriously interested in sustainable development, especially in light of climate change, must study the nature of

extreme events - their causes, global distribution and likelihood of future change. This course will cover not only the nature of extreme events, including earthquakes, hurricanes, floods and droughts but also their transformation into disaster through social processes. It will ultimately help students to understand the link between such extreme events, the economic/social shock they represent and development outcomes. The course will combine careful analysis of the natural and social systems dynamics that give rise to disasters and examine through group learning case studies from the many disasters that have occurred in the first decade of the 21st century. Offered in the Spring (odd years only).

SDEV UN3366 Energy Law. 3 Points.

This course concerns the regulation of energy, energy resources, and energy facilities. Among the topics will be the regulation of rates and services; the roles of the Federal Energy Regulatory Commission and the state public utility commissions; and the interaction with environmental law. Attention will be devoted to energy resources (such as oil, natural gas and coal) and to generating, transmission and distribution facilities. The current and future roles of renewable energy, energy efficiency, and nuclear energy will receive special attention, as will the regulation and deregulation of electricity.

SDEV UN3390 GIS for Sustainable Development. 3 Points.

Priority given to sustainable development senior and juniors.

This course is designed to provide students with a comprehensive overview of theoretical concepts underlying GIS systems and to give students a strong set of practical skills to use GIS for sustainable development research. Geographic Information Systems (GIS) are a system of computer software, data and analysis methods used to create, store, manage, digital information that allow us to create maps and dynamic models to analyze the physical and social processes of the world. Through a mixture of lectures, readings, focused discussions, and hands-on exercises, students will acquire an understanding of the variety and structure of spatial data and databases, gain knowledge of the principles behind raster and vector based spatial analysis, and learn basic cartographic principles for producing maps that effectively communicate a message. Student will also learn to use newly emerging web based mapping tools such as Google Earth, Google Maps and similar tools to develop on-line interactive maps and graphics. The use of other geospatial technologies such as the Global Positioning System will also be explored in this class. Case studies examined in class will draw examples from a wide ranges of GIS applications developed to assist in the

development, implementation and evaluation of sustainable development projects and programs. On completion of the course, students will: 1. use a variety of GIS software programs to create maps and reports; 2. develop a sound knowledge of methods to search, obtain, and evaluate a wide variety of spatial data resources; 3. develop skills needed to determine best practices for managing spatial data resources; 4. use GIS to analyze the economic, social and environmental processes underlying the concept of building a sustainable world; 5. Gain an understanding of the limits of these technologies and make assessments of uncertainty associated with spatial data and spatial analysis models. Offered in the fall and spring.

SDEV UN3400 Human Populations and Sustainable Development. 3 Points.

Population processes and their outcomes in terms of population size and distribution have a fundamental role in sustainable development and also broad policy implications. This course will introduce students to the scientific study of human populations as a contribution toward understanding social structure, relations, and dynamics, as well as society-nature interactions. The aim is to offer a basic introduction to the main theories, concepts, measures, and uses of demography. The course will cover the issues of population size, distribution and composition, and consumption, at different scales from global to regional to local, as well as the implications for population-environment relationships. It will also address the fundamental demographic processes of mortality, fertility and migration, including their trends and transitions. We will consider these topics in the context of economic development, sustainability and cultural change. The course will also include an overview of basic demographic techniques and tools used for identifying, managing, analyzing and interpreting population data, and an introduction to population projections. Lab sessions will supplement readings and lectures by enabling students to explore data sources, calculate rates, and graphically represent demographic data. Offered in the Fall (even years).

Fall 2020	001	11189	Susana Adamo	T Th 10:10am - 11:25am Online Only

SDEV UN3410 Cities # Sustainability. 3.00 Points.

In an increasingly urban world, sustainable development is not possible without achieving sustainability in cities. This course explores the challenges and opportunities of sustainable development policy-making at the urban level through the study of local efforts to address climate change, provide access to clean water, and develop renewable energy resources, among other topics. Students will gain a more detailed understanding of how cities' histories, land use patterns, and economies influence urban resource use, and how cities have attempted to change those impacts. Using case studies of local sustainability initiatives, students examine how a city's governance structure, political dynamics, and administrative capacity affect policy outcomes. Consideration of the equity implications of urban sustainability efforts is integral to the course

SDEV UN3450 SPATIAL ANALYSIS FOR SDEV. 3.00 Points.

Priority given to sustainable development senior and juniors.

This is an intermediate course in spatial modeling developed specifically for students in the Undergraduate Sustainable Development program. This course will provide a foundation for understanding a variety of issues related to spatial analysis and modeling. Students will explore the concepts, tools, and techniques of GIS modeling and review and critique modeling applications used for environmental planning and policy development. The course will also offer students the opportunity to design, build and evaluate their own spatial analysis models. The course will cover both vector and raster based methods of analysis with a strong focus on raster-based modeling. We will draw examples from a wide range of applications in such areas as modeling Land Use and Land Cover for biodiversity and conservation, hydrological modeling, and site suitability modeling. The course will consist of lectures, reading assignments, lab assignments, and a final project

Spring 2021	001	13587	Kytt MacManus	W 11:40am - 1:55pm Online Only

SDEV UN3550 BANGLADSH:LIFE-TECT ACTV DELTA. 4 Points.

Open to sustainable development seniors only.

This course will explore the interaction of riverine processes, water and hydrology, sedimentary processes, tectonics, land subsidence and sea level rise, environmental issues, cultural setting, and sustainable development in the world's largest delta. The course will explore both the hazards and resources

for life in this dynamic environment through lectures, a field trip to Bangladesh during Spring Break and guest lecturers in earth and social sciences. During the field trip, we will be joined by Dhaka University professors and students, providing experience in cross-cultural collaboration, as well as translators to interviews and discussions with Bangladeshis.

By the end of the course, students will develop a quantitative understanding of the multiple earth sciences issues. It will also provide a perspective on the mixture of competing earth science, social, historical and political issues that must be addressed in order to effectively address environmental issues. Students should acquire an ability to assess competing claims and projections for future environmental change.

SDEV UN3998 Sustainable Development Independent Study. 1-3 Points.

Sustainable development majors and special concentrators must register for this independent study to use internship hours for the practicum credit. Students must consult with their program adviser and department before registering. Offered fall, spring and summer.

Term	Section	Call Number	Instructor	Times/ Location

Spring 2021	001	13589	Ruth DeFries, Cari Shimkus	

SDEV GU4015 Complexity Science. 3 Points.

The Complexity Course is a survey of techniques, applications, and implications of complexity science and complex systems. This course aims to be both an introduction for students from other fields, and a forum for continued discussion within the complexity community. Topics include systems dynamics, chaos, scaling, fatter-tailed distributions, fractals, information theory, emergence, criticality, agent-based models, graph theory, and social networks.

SDEV GU4050 Essential Connections: US Water & Energy Policy in a Resource-Constrained World . 3 Points.**Course Summary:**

Water, one of humankind's first power sources, remains critically important to the task of maintaining a sustainable energy supply, in the United States and elsewhere. Conversely, the need to provide safe drinking water and keep America's rivers clean cannot be met without access to reliable energy supplies. As the impact of climate disruption and other resource constraints begins to mount, the water/energy nexus is growing increasingly complex and conflict-prone.

Essential Connections begins by examining the development of America's water and energy policies over the past century and how such policies helped to shape present-day environmental law and regulation. Our focus then turns to the current state of US water and energy resources and policy, covering issues such as oil and gas exploration, nuclear energy, hydroelectric power and renewables. We also examine questions of inclusion

and equity in connection with the ways in which communities allocate their water and energy resources and burdens along racial, ethnic and socioeconomic lines. The third and final section of the course addresses the prospects for establishing water and energy policies that can withstand climate disruption, scarcity and, perhaps most importantly, America's seemingly endless appetite for political dysfunction.

By semester's end, students will better understand the state of America's energy and water supply systems and current efforts to cope with depletion, climate change and related threats affecting these critical, highly-interdependent systems. As a final project, students will utilize the knowledge gained during the semester to create specific proposals for preserving and enhancing the sustainability of US water and energy resources.

Spring 2021	001	13590	Paul Gally	M 6:10pm - 8:00pm Online Only

SDEV GU4101 Qualitative Research Methods for Sustainable Development. 3 Points.

Students of sustainable development are faced with an array of global challenges that warrant scholarly inquiry. Social science questions are particularly well suited for qualitative research. This course will provide an overview of social science research methods, with a focus on building a toolkit for undergraduate students. We begin with an overview of the science of knowing. How do we generate scientific hypotheses in the social sciences, and then how can we find out whether those hypotheses are accurate? An exploration of a range of qualitative research methods will occupy the majority of our class time, including interviewing, case studies, questionnaires, surveys, coding, and participant observation. Toward the end of the course we consider how mixed methods allow for the integration of quantitative tools in the social sciences. Throughout, students will both study and practice these research methods, experimenting to better understand the strengths and challenges associated with each approach. The course will end with poster presentations in which students share their own research and justify the methods they have employed.

SDEV GU4250 CLIMATE CHANGE: RESILIENCE # ADAPTATION. 3.00 Points.

This course will offer a focused study of climate change adaptation policy, exploring dimensions of adaptation across sectors and scales. With a thematic focus on pervasive global inequities, students will also consider challenges associated with international development and disaster risk management. An inter-disciplinary framework will enrich the course, and students will learn about perspectives from the natural sciences, law, architecture, anthropology, humanitarian aid, and public policy. The online intensive version of this course will combine synchronous and asynchronous learning: twice weekly live discussion sessions will be matched with assigned readings, recorded lectures and videos

Term	Section	Call Number	Instructor	Times/ Location

SDEV GU4350 PUBLIC LANDS IN THE AMERICAN WEST. 3.00 Points.

Environmental issues in the American West are dramatically different from the rest of the country due in large part to the prevalence of public lands. Most western states have a land base that is at least 35% public, and competing interests vie for limited resources and navigate a complex bureaucracy. This course will focus on the federal agencies authorized to make management decisions across those lands: the U.S. Forest Service, U.S. Bureau of Land Management, U.S. Park Service, and others. We will explore the legal and regulatory framework that guides land use decisions, and study enduring resource access conflicts. Pulling from both academic scholarship and the gray literature in political science, environmental sciences, law, and organizational behavior, this course provides an interdisciplinary overview of governance challenges in the American West. Organized into three parts, the course will unfold as follows. Part I reviews the theory and origins of our public lands system. We will explore political and ecological history, as well as contributions from psychology and anthropology that help flesh out the layered values associated with the collective choice to remove so much land from the private estate. Part II brings us to the nuts and bolts of the system, and we will learn about the agencies responsible for managing public lands with a focus on the National Park Service, the U.S. Forest Service, and the Bureau of Land Management. Laws and regulations that guide these agencies will also be covered in this section of the course. Part III is the longest section. This second half of the course will consist of a tour through key controversies on public lands, including energy development, recreation access, Wilderness designation, wildfire management, and endangered species management

URBAN STUDIES

Urban Studies at Columbia

Columbia Adviser: Prof. Amy Chazkel; ac2227@columbia.edu

713 Milstein Learning Center

212-854-4073

Department Assistant: Valerie Coates

MISSION

The Barnard–Columbia Urban Studies program enables students to explore and understand the urban experience in all of its richness and complexity. It recognizes the city as an amalgam of diverse peoples and their social, political, economic, and cultural interactions within a distinctive built environment. Students study the evolution and variety of urban forms and governance structures, which create opportunities for, as well as constrain, the exercise of human agency, individual and collective. They explore the place of the city in different historical and comparative contexts, as well as in the human imagination.

Majors build an intellectual foundation that combines interdisciplinary coursework and a concentration of study within a single field. Through the two-semester junior colloquium, students study urban history and contemporary issues, and at the same time hone their interdisciplinary, analytical and research skills. This shared experience prepares them for their independent research project in their senior year. We encourage our majors to use New York City as a laboratory, and many courses draw on the vast resources of the city and include an off-campus experience.

STUDENT LEARNING OUTCOMES

Having successfully completed the major in Urban Studies, the student will be able to:

- Apply concepts or methods from more than one social science or adjacent discipline to analyze an urban issue or problem.
- Describe the distinctive social, cultural, and spatial features of cities and illustrate their impacts on the urban experience.
- Apply basic skills of empirical reasoning to an urban problem.

- Explain how the idea of the city varies in different historical and comparative contexts.
- Demonstrate familiarity with a particular disciplinary approach to the city as an object of study.
- Demonstrate understanding of the history and variety of urban forms and governance structures.
- Articulate a well-defined research question, conduct independent research using primary sources and a variety of theoretical and methodological approaches, and write a substantive research paper.
- Communicate ideas effectively in written or oral form.
- Organize and present group research projects.

Director: Gergely Baics (History and Urban Studies)

Associate Director: Aaron Passell (Urban Studies)

Columbia College Adviser: Amy Chazkel, Bernard Hirschhorn Associate Professor of Urban Studies

General Studies Advisor: Aaron Passell, Associate Director (Urban Studies)

Urban Studies Faculty

Assistant Professors: Gergely Baics (History and Urban Studies), Deborah Becher (Sociology), Angela Simms (Sociology and Urban Studies), Nick R. Smith (Architecture and Urban Studies)

Associate Professors: Mary Rocco (Term, Urban Studies), Christian Siener (Term, Urban Studies), Chandler Miranda (Term, Urban Studies)

The Urban Studies **Advisory Committee** consults on matters of curriculum and program direction. For more information, please consult the **Advisory Committee** web page on the program website

Major in Urban Studies

The major in urban studies is comprised of seven curricular requirements:

Requirement U: Introduction to Urban Studies (1 course)

URBS UN1515 Introduction to Urban Studies

Requirement A: Urban-Related Social Sciences (3 courses)

One course dealing primarily with urban subject matter from *each of three* of the following disciplines: Anthropology, Economics, History, Political Science, Sociology. For students declaring a major in Urban Studies after Spring 2018, one of the three courses *must* be History.

Many courses offered through Urban Studies may count towards Requirement A. For example, URBS UN3420

Introduction to Urban Sociology Introduction to Urban Sociology counts as a Sociology course, URBS UN3450 Neighborhood and Community Development counts as a Political Science course, etc. Student should try to complete at least two of the Requirement A courses before taking the Junior Seminar (see Requirement E, below). It is recommended that majors fulfill this requirement before their junior year.

Requirement B: Urban-Related Non-Social Science (1 course)

One course dealing primarily with urban subject matter from a discipline not listed above (such as Architecture, Art History, English, Environmental Science, etc.)

Requirement C: Methods of Analysis (1 course)

One course in methods of analysis, such as URBS UN2200 INTRODUCTION TO GIS METHODS. Methods courses in related disciplines will also be considered for the requirement. Please consult the [program website](#) or the Associate Director

Requirement D: Specialization (5 courses)

Five or more courses in a specialization from one of the participating departments. Barnard College students can double-count one A, B, or C course toward this requirement (only one of five), with the approval of the Director; Columbia College and General Studies students cannot double-count courses. Barnard majors also have specific requirements for each specialization, which are outlined in detail on the program website, urban.barnard.edu.

Requirement E: Junior Seminar (1 course)

URBS UN3545 Junior Seminar: The Shaping of the Modern City Multiple sections of this course are taught each semester by various faculty on different topics. For more information, please consult the [program website](#) or the Associate Director.

Requirement F: Senior Seminar (2 courses)

A senior thesis written in conjunction with a two-semester research seminar, chosen from the following four options:

URBS UN3992 Senior Seminar: The Built Environment

URBS UN3994 Senior Seminar: New York Field Research

URBS UN3996 Senior Seminar: International Topics in Urban Studies

A research seminar in the department of specialization. This option must be approved by the Associate Director.

A complete list and courses that fulfill requirements A–E can be found on the program's website, urban.barnard.edu.

Appropriate substitutions may be made for courses listed above with the approval of the Associate Director.

There is no minor in Urban Studies.

There is no concentration in Urban Studies.

URBS UN2200 INTRODUCTION TO GIS METHODS. 3 points.

Prerequisites: Must attend first class for instructor permission.

Prerequisites: Must attend first class for instructor permission.

Students create maps using ArcGIS software, analyze the physical and social processes presented in the digital model, and use the data to solve specific spatial analysis problems.

Note: this course fulfills the C requirement in Urban Studies.

URBS UN1515 Introduction to Urban Studies. 3 points.

This course is intended to be both an interdisciplinary introduction to the city and to the field of Urban Studies. As an introduction to the city, the course will address a variety of questions: What is a city? How did cities develop? How do cities function socially, politically, and economically? Why do people live in cities? What are some of the major issues facing cities in the early twenty-first century, and how can cities address these issues? As an introduction to the interdisciplinary field of Urban Studies, the course will present models of how scholars approach cities from a variety of disciplinary viewpoints, including architecture, planning, law, sociology, history, archaeology, anthropology, political science, public policy, and geography. Students will learn some of the major concepts in the field of Urban Studies, and will study the works of leading scholars in the field. Students in the course will approach cities from a number of disciplines, not only through the reading, but also through assignments that take place in different locations throughout New York City.

URBS UN3440 Shrinking Cities. 3 points.

While some cities thrive and struggle to house the global majority, others struggle with the effects of urban shrinkage—population loss, disinvestment and abandonment. The path to urban decline is paved by social, economic and spatial forces that result in shrinking cities. This class explores how to understand and engage with urban decline. It includes a consideration of sundry efforts to reverse, live with, and rethink urban decline in a variety of locales. The hope is that this exercise will shed light not only on iconic declining places like Detroit, but also on the nature of uneven development and how it is the rule rather than the anomalous exception within capitalist urbanization.

Course materials draw on disciplines such as planning, economics, architecture, history and sociology to help understand urban decline and its outcomes from a variety of perspectives. Over the course of the semester, we will investigate larger processes—globalization, deindustrialization and socioeconomic change—to understand how cities and communities responded to the consequences of these forces.

We will engage with the global literature on shrinking cities but will be focused primarily on exploring the dynamics of shrinkage in US cities. To that end, following a wide-reaching examination of nation-wide phenomena, we will study in-depth a sample of cities to understand local and regional variations and responses. How do we treat cities that do not grow? Given the constrained or complete lack of resources in these places, to what extent should some cities be allowed to “die”? What is the impact on the residents that remain in these places?

URBS UN3480 From Homelessness to Foreclosure: NYC Geographies of Shelter and Home. 4 points.

This course will examine the social, political, and economic elements that have aligned in New York City to produce the most expansive infrastructure of homeless shelters in the United States, as well as ongoing changes in the city's homeless policy since the housing foreclosure crisis. While we will focus primarily on the past 30 to 40 years in New York City, we will consider the history of homelessness and housing in the United States since the Great Depression. Major themes will include criminalization, origin myths, and representations of people who are experiencing homelessness. Key questions will include: In what ways is the current geography of homelessness the result of historical patterns of racism and discrimination? How does studying homelessness provide insight into the ways urban spaces are made? Why have shelters become the primary public response to homelessness in New York? How are race and gender central to the project of building a shelter infrastructure in New York? How are shelters experienced by those living in them? What are some of the ways people living in shelters organize to advocate for their rights and to resist mainstream representations?

URBS UN3992 Senior Seminar: The Built Environment. 4 points.

(year-long course, 4 points per term)

Prerequisites: Senior standing. Year-long course; participation is for two consecutive terms. No new students admitted for spring.

Emphasizes the study of the built environment of cities and suburbs, and the related debates. Readings, class presentations, and written work culminate in major individual projects, under the supervision of faculty trained in architecture, urban design, or urban planning.

Fall 2020: URBS UN3992

URBS UN3994 Senior Seminar: New York Field Research. 4 points.

(year-long course, 4 points per term)

Prerequisites: Senior standing. Year-long course; participation is for two consecutive terms. No new students admitted for spring.

Using New York City as a research laboratory, under the guidance of the faculty coordinator, students clarify basic theoretical issues related to their chosen research problem; find ways of making a series of empirical questions operational; collect evidence to test hypotheses; analyze the data using a variety of social science techniques; and produce reports of basic findings.

URBS UN3310 Race, Space, and Urban Schools. 3 points.

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory.

Spring 2021: URBS UN3310

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
URBS 3310	001/00233	T Th 4:10pm - 6:00pm Room TBA	Chandler Miranda	3	48/50

URBS UN3420 Introduction to Urban Sociology. 3 points.

Prerequisites: Students must attend first class.

Examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey research, quantitative studies, and participant observation will provide

perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment.

URBS UN3450 Neighborhood and Community

Development. 3 points.

New York City is made up of more than 400 neighborhoods. The concept of neighborhoods in cities has had many meanings and understandings over time. Equally complex is the concept of community used to describe the people attached to or defined by neighborhood. While neighborhood can be interpreted as a spatial, social, political, racial, ethnic, or even, economic unit; community often refers to the group of stakeholders (i.e. residents, workers, investors) whose interests directly align with the conditions of their environment. Community development is "a process where these community members come together to take collective action and generate solutions to common problems" that result from the changing contexts in their neighborhoods. Using a variety of theories and approaches, residents organize themselves or work with community development practitioners on the ground to obtain safe, affordable housing, improve the public realm, build wealth, get heard politically, develop human capital, and connect to metropolitan labor and housing markets. To address the ever-changing contexts of neighborhoods, community development organizations are taking on new roles and adapting (in various cases) to larger forces within the city, region and nation such as disinvestment, reinvestment, increased cultural diversity, an uncertain macroeconomic environment, and changes in federal policy.

For more than a century, city-dwellers—and especially New Yorkers—have been tackling these challenges. This course will examine both historic and contemporary community building and development efforts, paying special attention to approaches which were shaped by New York City. This urban center, often described as a "city of neighborhoods," has long been a seedbed for community-based problem-solving inventions. The course will focus on the theories (why?), tools (how?), and actors (who?) within the field of community development practice and is organized around important sectors (housing, economic development, food systems, arts), case studies, and contested concepts (public participation, social capital, public space).

Spring 2021: URBS UN3450

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

URBS UN3351 URBAN ELSEWHERE: EXPLORING A WORLD OF CITIES. 3.00 points.

We live in an increasingly urbanized world. But what does it mean to be "urban"? As urbanization reaches more corners of the globe, its forms and processes become increasingly diverse. Urban Elsewhere is dedicated to investigating this diversity and to exploring the implications that unfamiliar urban phenomena might have for how we understand urbanization—both elsewhere in the world and in our own backyards. Through

a comparative engagement with case studies drawn from around the world, this course will challenge some of our most deeply held, common sense assumptions about urbanization. Students will be asked to stretch the conceptual limits of urbanization and explore the social and political possibilities of an expanded urbanism. In doing so, the course will engage with the many of the most heated theoretical debates about urbanization, equipping students with a set of comparative analytical tools with which to explore the wider field of urban studies

Cross-listed Courses

ARCH UN3502 URBANIZING CHINA. 4 points.

This course investigates the dramatic urban transformation that has taken place in mainland China over the last four decades. The speed and scale of this transformation have produced emergent new lifeways, settlement patterns, and land uses that increasingly blur the distinction between urban and rural areas. At the same time, Chinese society is still characterized by rigid, administrative divisions between the nation's urban and rural sectors, with profound consequences for people's lives and livelihoods. The course therefore examines the intersection between the rapid transformation of China's built environment and the glacial transformation of its administrative categories. We will take an interdisciplinary approach to this investigation, using perspectives from architecture, history, geography, political science, anthropology, urban planning, and cultural studies, among other disciplines.

The course is divided into two parts: Over the first five weeks, we will consider the historical context of China's urbanization and its urban-rural relations, including the imperial, colonial, and socialist periods, as well as the current period of reform. In the remainder of the semester, we will turn our focus to contemporary processes of urbanization, with a particular emphasis on the complex interrelationship between urban and rural China. This portion of the semester is organized into three two-week units on land and planning, housing and demolition, and citizenship and personhood.

HIST UN2689 COLONIAL CITIES OF THE AMERICAS, c. 1500-1800. 4 points.

This course examines the history of cities in the Americas in the colonial era, c. 1500-1800, organized around three large themes. First, we study the precolonial origins of American urban systems, focusing especially on Mesoamerica and the Andes, and exploring questions of urban continuity, disruption and change, and the forms of indigenous cities. Second, we study various patterns of city foundations and city types across the Americas, examining Spanish, Portuguese, British, Dutch and French colonial urban systems. Third, we focus on the cities more closely by looking at key issues such as urban form, built environment, social structure. Specific themes include a critical analysis of the Spanish colonial grid, the baroque city, and 18th-century urban reforms, as well as race and class, urban slavery, and urban disease environments.

HIST UN3277 History of Urban Crime and Policing in Latin America in Global Perspective. 4 points.

This seminar will examine the social construction of criminality and the institutions that developed to impose and enforce the criminal law as reflections of Latin American society throughout the region's history, with a particular emphasis on the rise of police forces as the principal means of day-to-day urban governance. Topics include policing and urban slavery; policing the urban "underworld"; the changing cultural importance of police in urban popular culture; the growth of scientific policing methods, along with modern criminology and eugenics; policing and the enforcement of gender norms in urban public spaces; the role of urban policing in the rise of military governments in the twentieth century; organized crime; transitional justice and the contemporary question of the rule of law; and the transnational movement of ideas about and innovations in policing practice. In our readings and class discussions over the course of the semester, we will trace how professionalized, modern police forces took shape in cities across the region over time. This course actually begins, however, in the colonial period before there was anything that we would recognize as a modern, uniformed, state-run police force. We will thus have a broad perspective from which to analyze critically the role of police in the development of Latin American urban societies—in other words, to see the police in the contemporary era as contingent on complex historical processes, which we will seek to understand.

HIST BC3842 Subaltern Urbanism: South Asia. 3.00 points.

This course asks how spatial politics intersect with economic inequality and social difference. The course draws on the convergent yet distinct urban trajectories of cities in the global South (Bangalore; Bombay/Mumbai; Lahore; New Delhi; Dhaka) as an enabling location for exploring broader questions of comparative and global urbanism from an explicitly South-South perspective. That is, we ask how distinct yet connected urban forms might force us to alter our approaches to the city; approaches that are largely drawn from modular Euro-American paradigms for understanding urbanization as coeval with modernity, as well as industrialization. We do so in this seminar by focusing on people and practices—subaltern urbanity (and on those whose labor produced the modern city), as well as on spatial orders—the informal or unintended city—to ask the question: “what makes and unmakes a city?” How might questions about built form, industrialization, capital flows, and social life and inhabitation that takes the perspective of “city theory from the Global South” shed new understanding on the history of the city, the extranational frames of colonial modernity, and the ongoing impact of neoliberalism? How can we rethink critical concepts in urban studies (precarity, spatial segregation, subalternity, economies of eviction, urban dispossession) through embedded studies of locality and lifemaking?

HIST GU4012 HISTORY OF THE CITY IN LATIN AMERICA. 4.00 points.

This course covers the historical development of cities in Latin America. Readings examine the concentration of people in commercial and political centers from the beginnings of European colonization in the sixteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; cities as sites of imperial power and their post-colonial role in nation-building; changing power dynamics in modern Latin America, especially as they impacted the lives of cities’ nonelite majority populations; the legalities and politics of urban space; the complexity and historical development of urban segregation; the rise of informal economies; and the constant tension between tradition and progress through which urban societies have formed. Reading knowledge of Spanish and/or Portuguese will be helpful but is not required. Open to both undergraduate and graduate students; graduate students will be given additional reading and writing assignments

URBS S1517 INTRODUCTION TO URBAN STUDIES. 3.00 points.

This course is intended to be both an interdisciplinary introduction to the city and to the field of Urban Studies. As an introduction to the city, the course will address a variety

of questions: What is a city? How did cities develop? How do cities function socially, politically, and economically? Why do people live in cities? What are some of the major issues facing cities in the early twenty-first century, and how can cities address these issues? As an introduction to the interdisciplinary field of Urban Studies, the course will present models of how scholars approach cities from a variety of disciplinary viewpoints, including architecture, planning, law, sociology, history, archaeology, anthropology, political science, public policy, and geography. Students will learn some of the major concepts in the field of Urban Studies, and will study the works of leading scholars in the field. Students in the course will approach cities from a number of disciplines, not only through the reading, but also through assignments that take place in different locations throughout New York City

VISUAL ARTS

Departmental Office: 310 Dodge; 212-854-4065

<http://arts.columbia.edu/visual-arts>

Director of Undergraduate Studies: Associate Prof. Nicola López, ngl1@columbia.edu

Director of Academic Administration: Carrie Gundersdorf; cg2817@columbia.edu

Manager of Academic Administration: Laura Mosquera; lm3004@columbia.edu

The Visual Arts Program in the School of the Arts offers studio art classes as a component of a liberal arts education and as a means to an art major, concentration, and joint major with the Art History and Archaeology Department.

Courses in which a grade of D has been received do not count toward the major or concentration requirements.

Only the first course a student takes in the department may be taken for a grade of Pass/D/Fail.

REGISTRATION

Please Note: Visual Arts courses are currently closed for registration. If you are interested in taking a Visual Arts class, please add your name to the waitlist of the course and attend the first day of the class via Zoom. If a Visual Arts class is full, visit arts.columbia.edu/undergraduate-visual-arts-program.

DECLARING A MAJOR IN VISUAL ARTS

The Visual Arts Undergraduate Program requires a departmental signature when declaring a major. After meeting with their college academic adviser, students should set up a meeting to consult with the director of undergraduate studies, Associate Professor Nicola Lopez. Please email Carrie Gundersdorf (cg2817@columbia.edu) or Laura Mosquera (lm3004@columbia.edu) for the current Requirements

Worksheet for the Visual Arts Major, Art History and Visual Arts Interdepartmental Major or Visual Arts Concentration.

PROFESSORS

Gregory Amenoff
 Susanna Coffey (1 Year Appointment for 2020-21)
 Jon Kessler
 Sarah Sze
 Rirkrit Tiravanija
 Tomas Vu-Daniel

ASSOCIATE PROFESSORS

Matthew Buckingham (Chair)
 Shelly Silver
 Nicola López (Director of Undergraduate Studies)
 Leeza Meksin (Director of Graduate Studies)

ASSISTANT PROFESSORS

 Sable Elyse Smith

GUIDELINES FOR ALL VISUAL ARTS MAJORS, CONCENTRATORS, AND INTERDEPARTMENTAL MAJORS

A maximum of 12 credits from other degree-granting institutions may be counted toward the major, only with the approval of the director of undergraduate studies.

MAJOR IN VISUAL ARTS

A total of 35 points are required as follows:

Visual Arts (32 points)

VIAR UN1000	BASIC DRAWING (formerly VIAR R1001)
-------------	-------------------------------------

VIAR UN2300 or VIAR UN2200	Sculpture I Ceramics I
-------------------------------	---------------------------

Five additional VIAR 3-point studio courses (15 points)

VIAR UN3800	SEM IN CONTEMP ART PRACTICE
-------------	-----------------------------

Senior Thesis consists of the following four courses:

VIAR UN3900 - VIAR UN3910	SENIOR THESIS I and Visiting Critic I (formerly VIAR R3901 and VIAR R3921)
------------------------------	---

VIAR UN3901 - VIAR UN3911	SENIOR THESIS II and VISITING CRITIC II
------------------------------	--

Art History (3 points)

One 20th-century Art History 3-point course or equivalent, such as:

AHIS UN2405	Twentieth-Century Art (formerly AHIS W3650)
-------------	---

Senior Thesis

Before taking the Senior Thesis, majors are advised to complete 18 points of required Visual Arts courses. Senior Thesis consists of four 2-point courses taken over two semesters: VIAR UN3900 SENIOR THESIS I-VIAR UN3901 SENIOR THESIS II (4 points) and VIAR UN3910 Visiting Critic I-VIAR UN3911 VISITING CRITIC II (4 points). (*Senior Thesis I* and *Visiting Critic I* run concurrently and *Senior Thesis II* and *Visiting Critic II* run concurrently).

Visual arts majors must sign up for a portfolio review to enroll in Senior Thesis. Portfolio reviews are scheduled in April preceding the semester for which students seek entry. Portfolios are evaluated by the director of undergraduate studies and a faculty committee. After each semester of Senior Thesis, a faculty committee evaluates the work and performance completed.

MAJOR IN ART HISTORY AND VISUAL ARTS

The combined major requires the completion of sixteen or seventeen courses. Up to two 3-point courses in art history may be replaced by a related course in another department, with approval of the adviser. It is recommended that students interested in this major begin the requirements in their sophomore year. The requirements for the major are as follows :

Art History (25 points)

AHIS UN3000	INTRO LIT/METHODS OF ART HIST (formerly VIAR W3895)
-------------	---

Seven additional art history (AHIS) 3-point lecture courses:

At least one course in three of four historical periods, as listed below
--

An additional two courses drawn from at least two different world regions, as listed below
--

Two additional lectures of the student's choice

Visual Arts (21 points)

VIAR UN1000	BASIC DRAWING (formerly VIAR R1001)
-------------	-------------------------------------

VIAR UN2300 or VIAR UN2200	Sculpture I (formerly VIAR R3330) Ceramics I
-------------------------------	---

Five additional VIAR 3-point studio courses (15 points)

In the senior year, students must complete either a seminar in the Department of Art History and Archaeology or a senior project in visual arts (pending approval by the Visual Arts Department).

Students electing the combined major should consult with the director of undergraduate studies in Visual Arts, as well as with the undergraduate program coordinator in the Art History and Archaeology Department.

NOTE: Chronological divisions are approximate. In case of ambiguities about course eligibility to fill the requirement, consult the director of undergraduate studies in Art History and Archaeology.

Historical Periods

- Ancient (up to 400 CE/AD)
- 400 - 1400
- 1400 - 1700
- 1700 - present

World Regions

- Africa
- Asia
- Europe, North America, Australia
- Latin America
- Middle East

CONCENTRATION IN VISUAL ARTS

A total of 21 points are required as follows:

Visual Arts (18 points)

VIAR UN1000	BASIC DRAWING (formerly VIAR R1001)
VIAR UN2300	Sculpture I (formerly VIAR R3330)
or VIAR UN2200	Ceramics I

Four additional VIAR 3-point studio courses (12 points)

Art History (3 points)

One 20th-century Art History 3-point course or equivalent, such as:

AHIS UN2405	Twentieth-Century Art (formerly AHIS W3650)
-------------	---

DRAWING

VIAR UN1000 BASIC DRAWING. 3.00 points.

(Formerly R1001) The fundamentals of visual vocabulary and handling of drawing materials including charcoal, compressed charcoal, pencil, pen, ink, and brushes. Various conceptual and practical approaches to image-making are explored as formal issues such as line, volume, contrast, and composition are emphasized. Class assignments are accompanied by discussions and critiques. Students draw largely from observation, working with a variety of sources that may include still-life objects and the human figure. Portfolio required at the end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

Fall 2020: VIAR UN1000

VIAR UN3010 Collage: Mixed Media. 3 points.

Prerequisites: (VIAR UN1000)

(Formerly R3515) This course approaches drawing as an experimental and expressive tool. Students will explore the boundaries between drawing and sculpture and will be encouraged to push the parameters of drawing. Collage, assemblage and photomontage will be used in combination with more traditional approaches to drawing. The class will explore the role of the imagination, improvisation, 3-dimensional forms, observation, memory, language, mapping, and text. Field trips to artists' studios as well as critiques will play an important role in the course. The course will culminate in a final project in which each student will choose one or more of the themes explored during the semester and create a series of artworks. This course is often taught under the nomenclature Drawing II - Mixed Media.

VIAR UN3011 PROBLEMS IN DRAWING. 3.00 points.

Prerequisites: VIAR R1000. (Formerly R4005) Students will connect with the very heart of the Western Art tradition, engaging in this critical activity that was the pillar of draftsmanship training from the Renaissance on through the early Modern Era. This pursuit is the common thread that links artists from Michelangelo and Rubens to Van Gogh and Picasso. Rigorous studies will be executed from plaster casts of antique sculptures, and pedagogical engravings. Students will confront foundational issues of academic training; assessing proportion and tonal value, structure and form. Hours will be spent on a single drawing pushing to the highest degree of accuracy in order develop a means for looking at nature. There is a focus on precision and gaining a thorough understanding of the interaction between light and a surface. This approach emphasizes drawing by understanding the subject and the physical world that defines it. While this training has allowed great representational artists of the past to unlock the poetry from the world around them and continues to inspire a surging new realist movement, it can also serve as a new way of seeing and a launching point for achieving creative goals. If the class is

full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

PAINTING

VIAR UN2100 Painting I. 3 points.

Prerequisites: (VIAR UN1000)

(Formerly R3201) Introduction of the fundamental skills and concepts involved in painting. Problems are structured to provide students with a knowledge of visual language along with a development of expressive content. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

VIAR UN3101 Painting II: Representation into Abstraction. 3 points.

Prerequisites: (VIAR UN1000) and (VIAR UN2100)

(Formerly R3202) Painting II: Extension of *VIAR UN2100*. This course explores the transition of representational form towards abstraction in the early 20th century (Cubism) with full consideration to recent movements such as geometric abstraction, organic abstraction, gestural abstraction, color field and pattern painting. Students will be encouraged to find dynamic approaches to these classic tropes of 20th and 21st century abstraction.

Fall 2020: VIAR UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3101	001/13631	W 10:00am - 4:00pm Online Only	Susanna Coffey	3	8/14

VIAR UN3102 PAINTING III: Advanced Painting. 3 points.

Prerequisites: (VIAR UN1000) and (VIAR UN2100)

Prerequisites: (VIAR UN1000) and (VIAR UN2100) Painting III: Advanced study in painting will be a material inquiry into the consequential concepts, histories, and critical language embedded in making painting's historical past and its' present. Is painting now a singular "medium"? How do facture, scale, form and a multitude of image-making options, regardless of "style", accrue as to create meaning? Participants are expected to present work weekly, as Individual studio or group critiques. These will be augmented by readings of selected historical essays and contemporaneous writings, as well as visual presentations on a rotating basis.

VIAR UN3103 Advanced Painting: Process. 3 points.

Prerequisites: VIAR UN1000 and VIAR UN2100

In this advanced course, students develop their own individual painting practice through experimentation, risk taking, and rigorous evaluation of the interwoven questions of material and content in their work. A special emphasis is based on what we can do with the process of painting, and its vast and ever changing array of procedures, substrates, approaches, and techniques. How can painting materialize your response to what you encounter visually, intellectually, poetically, psychologically, politically, and culturally? "Painting" is open

in the class, and expansion and integration of other materials is fully acceptable. The course consists of directed but open assignments, presentations on historical and contemporary work, introduction to new materials, readings, individual and group critiques, and visits to working artists' studios, museums/galleries.

VIAR UN3120 FIGURE PAINTING. 3.00 points.

Prerequisites: VIAR R1000 and VIAR R2100. (Formerly R3210) Course provides the experience of employing a wide range of figurative applications that serve as useful tools for the contemporary artist. Non-Western applications, icon painting, and the European/American traditions are presented. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

VIAR GU4704 Photo III: Photobook. 3 points.

This course will explore the photobook as a central medium of contemporary lens-based practice. Students are exposed to a variety of approaches and viewpoints through historical lectures, class trips, and presentations by guest photographers, curators, critics, editors, graphic designers, etc. Each student will propose, develop, and produce editioned books during this course. This course requires reading, independent research, and work outside of class time.

Fall 2020: VIAR GU4704

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 4704	001/20752	T Th 10:00am - 12:30pm Online Only	Dana Buhl	3	8/15

VIAR UN3104 Painting III: Advanced Painting. 3.00 points.

This advanced painting class will consider contemporary painting in the context of traditional genres, exploring both continuity and discontinuity between contemporary painting and the tradition out of which it arose. Questions considered will include: Do traditional genres such as the history painting, the still-life, the nude, the portrait, the landscape painting have any relevance to contemporary painting? If not, where have these genres migrated to in our contemporary culture? Does contemporary painting exist solely as a cliché of art production, a hand-made status symbol and luxury commodity or can an argument be made for painting as an individual revolt against mass culture? Is painting's appeal simply due to nostalgia for a now-obsolete technology of representation or does its enduring popularity result from a desire for the physical/personal in a screen-based world? How are contemporary artists using painting today and what critical strategies are available to painters today? Students will be expected to present artwork weekly for individual and group critiques. The course will use an expanded definition of painting so students should feel free to experiment with other media as desired. Students will be required to research historical and contemporary (both art and mass culture) examples of the various genres and to create visual presentations of their research. Supplemental readings

will be assigned weekly. Students will spend the last month working on a project of their choice

PHOTOGRAPHY

VIAR UN1700 PHOTOGRAPHY: PHOTO I. 3.00 points.

(Formerly R3701) An introductory course in the technical, aesthetic, and conceptual foundations of photography. With an emphasis on the student's own creative practice, this course will explore the basics of photography and its history through regular shooting assignments, demonstrations, critique, lectures, and readings. No prior photography experience is required

Fall 2020: VIAR UN1700

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 1700	001/13614	F 10:00am - 4:00pm Online Only	Emile Askey	3.00	14/13
VIAR 1700	002/13615	M W 9:30am - 12:00pm Online Only	Rachel Stern	3.00	9/13

VIAR UN2701 PHOTOGRAPHY: PHOTO II. 3.00 points.

Prerequisites: (VIAR UN1700)

Prerequisites: (VIAR UN1700) (Formerly R3702) Photography II is a project-based class designed to expand upon the conceptual and technical concerns first encountered in Photography I. Over the course of the semester, students will work with manually controlled digital cameras or 35mm or 120mm cameras and learn how to refine image production techniques. An emphasis will be placed on the editing, sequencing, and display of images while cultivating a theoretical and historical context to situate the work. Students will engage with an array of photographic practices through presentations, guest artist lectures, and field trips. Additional readings by artists and writers will be assigned for the class to collectively discuss critical issues in contemporary image-making

Spring 2021: VIAR UN2701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2701	001/16948	T Th 2:00pm - 4:30pm Online Only	Delphine Fawundu	3.00	12/13

VIAR UN3710 PHOTO:DIGITAL DOCUMENTARY. 3.00 points.

(Formerly R4702) The goal of the course is for each student to create small-scale documentary projects using photography and writing with an eye towards web publishing. Taking advantage of the ease and speed of image production and distribution, students will propose and workshop projects that can be quickly completed and uploaded to a class website. Assignments, readings and discussions will focus on the role of the documentary tradition in the history of photographic art practice. Students must provide their own laptop and digital camera. If the class is full, sign up for the wait list at <http://arts.columbia.edu/photolist>

VIAR GU4702 Photography: Advanced Photo III Seminar. 3 points.

Prerequisites: VIAR UN1700

This course will explore the Artists book as an essential medium of contemporary artistic and lens based practice. Lectures and presentations will consider the mediums historical roots in Dadaism, Constructivism and Fluxus to enliven an expansive consideration of the books essential principles — scale, material, touch and dissemination. Students are exposed to a variety of approaches and viewpoints through presentations by guest photographers, writers, curators, publishers as well as class trips to archives, museums and galleries. Using various research methodologies with a distinct focus on image and text students will explore narrative development, sequencing, repetition and pacing. Each student will propose, develop and produce a unique editioned artists book during this course.

PRINTMAKING

VIAR UN2420 Printmaking I: Intaglio. 3 points.

(Formerly R3401) Enables the student to realize concepts and visual ideas in a printed form. Basic techniques are introduced and utilized: the history and development of the intaglio process; demonstrations and instruction in line etching, relief, and dry point. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

VIAR UN2430 Printmaking I: Relief. 3 points.

(Formerly R3411) Printmaking I: Relief introduces woodcut and other relief techniques. Given the direct quality of the process, the class focuses on the student's personal vision through experimentation with this print medium. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

Fall 2020: VIAR UN2430

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2430	001/13629	M W 9:30am - 12:00pm Online Only	Nathan Catlin	3	7/9

VIAR UN3410 Printmaking I: Photogravure. 3 points.

Prerequisites: VIAR UN1400 or VIAR UN2420 or VIAR UN1700

Prerequisites: VIAR UN1400 or VIAR UN2420 or VIAR UN1700 (Formerly R3417)

The purpose of this course is to incorporate the photomechanical intaglio printmaking process into the student's own work, and in turn, for them to capitalize on its usage as part of their visual arts language. The students will learn the **polymer plate** process known as **Solar Plate** and structure it to the concepts they are creating and investigating. By integrating it into conventional intaglio techniques and combining them into finished works, the student's printmaking lexicon will be expanded.

This course is a concise study and practice of the process of photoetching, also known as photoengraving, utilizing non-toxic photo-polymer plates, thus reducing the exposure to harmful chemicals used in other photomechanical printmaking processes. This also coincides with the transitioning of the print studio into a *Green* workplace.

VIAR UN3412 Printmaking: Drawing Into Print. 3 points.

Prerequisites: VIAR UN2420 or VIAR UN2430 note that VIAR UN2430 was formerly R3420.

The objective of the course is to provide students with an interdisciplinary link between drawing, photography and printmaking through an integrated studio project. Students will use drawing, printmaking and collage to create a body of work to be presented in a folio format. In the course, students develop and refine their drawing sensibility, and are encouraged to experiment with various forms of non-traditional printmaking. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

Fall 2020: VIAR UN3412

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3412	001/13632	T 10:00am - 4:00pm Online Only	Ivan Forde	3	4/12

VIAR UN3421 Printmaking II: Intaglio. 3 points.

Prerequisites: VIAR UN2420

(Formerly R3402) Continues instruction and demonstration of further techniques in intaglio. Encourages students to think visually more in the character of the medium, and personal development is stressed. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

VIAR UN3431 Printmaking II: Relief. 3 points.

Prerequisites: VIAR UN2430

(Formerly R3412) Printmaking II: Relief continues instruction and demonstration of further techniques in woodcut. Encourages students to think visually more in the character of the medium, and personal development is stressed. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

Fall 2020: VIAR UN3431

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3431	001/13634	M W 9:30am - 12:00pm Online Only	Nathan Catlin	3	4/3

VIAR GU4400 ADVANCED PRINTMAKING. 3.00 points.

Prerequisites: VIAR R2420, or VIAR R2430. (Formerly R3415) Designed for students who have already taken one semester of a printmaking course and are interested in continuing on an upper level. Students are encouraged to work in all areas, separate or combined, using their own vocabulary and imagery to create a body of work by the

end of the semester. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

Spring 2021: VIAR GU4400

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 4400	001/16970	F 10:00am - 4:00pm 210 Dodge Building	Tomas Vu Daniel, Kiki Smith, Valerie Hammond	3.00	11/14

SCULPTURE/NEW GENRE

VIAR UN2200 Ceramics I. 3 points.

(Formerly R3130) This studio course will provide the students with a foundation in the ceramic process, its history, and its relevance to contemporary art making. The course is structured in two parts. The first centers on the fundamental and technical aspects of the material. Students will learn construction techniques, glazing and finishing methods, and particulars about firing procedures. This part of the course will move quickly in order to expose the students to a variety of ceramic processes. Weekly assignments, demonstrations, and lectures will be given. The second centers on the issue of how to integrate ceramics into the students' current practice. Asking the question of why we use ceramics as a material and, further, why we choose the materials we do to make art. Rigorous group and individual critiques focusing on the above questions will be held. The goal of this course is to supply the students with the knowledge and skill necessary to work in ceramics and enough proficiency and understanding of the material to enable them to successfully incorporate it into their practice. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

Fall 2020: VIAR UN2200

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2200	001/13626	Th 10:00am - 4:00pm Online Only	Joseph Peet	3	8/8

VIAR UN2300 Sculpture I. 3 points.

(Formerly R3330) The fundamentals of sculpture are investigated through a series of conceptual and technical projects. Three material processes are introduced, including wood, metal, and plaster casting. Issues pertinent to contemporary sculpture are introduced through lectures, group critiques, discussions, and field trips that accompany class assignments. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

Fall 2020: VIAR UN2300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2300	001/13627	F 10:00am - 4:00pm Online Only	Jon Kessler	3	8/8

VIAR UN3201 CERAMICS II. 3.00 points.

Prerequisites: (VIAR UN1000) and (VIAR UN2100) Painting III: Advanced study in painting will be a material inquiry into

the consequential concepts, histories, and critical language embedded in making painting's historical past and its' present. Is painting now a singular "medium"? How do facture, scale, form and a multitude of image-making options, regardless of "style", accrue as to create meaning? Participants are expected to present work weekly, as Individual studio or group critiques. These will be augmented by readings of selected historical essays and contemporaneous writings, as well as visual presentations on a rotating basis

VIAR UN3301 SCULPTURE II. 3.00 points.

Prerequisites: VIAR UN2300 or the instructors permission. (Formerly R3331) Continuation of VIAR UN2300. The objective of the class is to engage in in-depth research and hands on studio projects related to a specific theme to be determined by each student. Each student is expected to complete class with four fully realized and thematically linked works. Wood, metal, and plaster will be provided for this class but video, sound, performance and various mixed media approaches are highly encouraged. In addition, lecture and field trips will be part of the course. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

VIAR UN3302 SCULPTURE III. 3.00 points.

Prerequisites: VIAR R2300. (Formerly R3332) Sculpture III is an invitation for immersive sculpting. The class will explore the idea of experiences and construction of contexts as central research topics. The class becomes a laboratory space to explore various techniques to heighten body awareness and spatial sensibility. Through assignments and workshops, the students will practice how to digest these sensory experiences through their studio practice. Historical precedents for art outside the usual mediums and venues will be our reference points to investigate how our own work may take part in a generative process that evolves the definition of sculpture. The assignments in the first half of the semester point the students to performance, site specificity, and sound, that utilize New York City's odd spots and professionals. While building such common experiential platforms, the class will also build language for a dialogic space, through weekly in-class discussions lead by the instructor, guests, and rotating panels of the students. As the semester progresses, the emphasis will gradually be shifted from experiential learning to intensive studio work on a final project, where the students are asked to pay close attention to how various methods and fields of subjects combine. The resulting project has to be the best work you have ever done. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

VIAR GU4600 Performance Art; Developing a Visual Lexicon. 3 points.

Using a set of related interdisciplinary activities, the students in this class will discover their own vocabulary of images, a visual lexicon, to articulate new work emerging through the medium of performance art. Because art requires a temperature or a "climate" for it to be developed, we will view critical film works, as well as creating new videos and live performance. We will learn about the medium of performance art to communicate

to groups of people about new artistic projects and ideas. Every artist has their own vocabulary that lays dormant until it's discovered. Then it takes time management, prioritizing, sacrifice, discipline, edification, distillation and a fun studio practice for this work to emerge. We will do this together using the medium of performance, which makes the best use of what is available; the body and other performative tools, that may be applicable as we work towards illustrating new ideas. Availabilism is a term I invented to encapsulate my philosophy around art making which is the idea that every artist should make the best use of what's available.

We will practice different experiments and performance methods using props, costumes, painting, sculpture, song writing and music. Just like theater, performance art is a medium that creates a collective atmosphere giving the student a sense of community. This is an important aspect for artists that struggle communicating and sharing their ideas. With courage and audacity, students will learn how to use their availabilism as it can help articulate their individual artistic expression. Students will write and examine their personal history and artistic goals to distill the information that compels each individual to analyze why art is such an important part of his/her life. This class will expose the student to the possibilities of live performance as not just entertainment, but another medium that an artist can access to expand their individual creative expression.

MOVING IMAGE

VIAR UN3500 Beginning Video. 3 points.

Beginning Video is an introductory class on the production and editing of digital video. Designed as an intensive hands-on production/post-production workshop, the apprehension of technical and aesthetic skills in shooting, sound and editing will be emphasized. Assignments are developed to allow students to deepen their familiarity with the language of the moving image medium. Over the course of the term, the class will explore the language and syntax of the moving image, including fiction, documentary and experimental approaches. Importance will be placed on the decision making behind the production of a work; why it was conceived of, shot, and edited in a certain way. Class time will be divided between technical workshops, viewing and discussing films and videos by independent producers/artists and discussing and critiquing students projects. Readings will be assigned on technical, aesthetic and theoretical issues. Only one section offered per semester. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

Fall 2020: VIAR UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3500	001/13688	T 10:00am - 4:00pm Online Only	Shelly Silver	3	2/9

VIAR GU4501 Advanced Video. 3 points.

Advanced Video is a full day class 10:00am- 4:00pm.

Prerequisites: (VIAR UN3500) *VIAR UN3500* Beginning Video or prior experience in video or film production.

Advanced Video is an advanced, intensive project-based class on the production of digital video. The class is designed for advanced students to develop an ambitious project or series of projects during the course of the semester. Through this production, students will fine-tune shooting and editing skills as well as become more sophisticated in terms of their aesthetic and theoretical approach to the moving image. The class will follow each student through proposal, dailies, rough-cut and fine cut stage. The course is organized for knowledge to be shared and accumulated, so that each student will learn both from her/his own process, as well as the processes of all the other students. Additional screenings and readings will be organized around the history of video art and the problematics of the moving image in general, as well as particular issues that are raised by individual student projects. NOTE: There is only one section offered per semester. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

VISUAL ARTS MAJOR REQUIREMENTS

VIAR UN3800 SEM IN CONTEMP ART PRACTICE. 3.00 points.

(Formerly R4601) New York City is the most abundant visual arts resource in the world. Visits to museums, galleries, and studios on a weekly basis. Students encounter a broad cross-section of art and are encouraged to develop ideas about what is seen. The seminar is led by a practicing artist and utilizes this perspective. Columbia College and General Studies Visual Arts Majors must take this class during their junior year. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

Fall 2020: VIAR UN3800

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3800	001/13635	Th 1:00pm - 4:00pm Online Only	Elizaveta Meksin	3.00	9/14

VIAR UN3900 SENIOR THESIS I. 2.00 points.**VIAR UN3901 SENIOR THESIS II. 2.00 points.**

Prerequisites: VIAR UN3900 Department approval required. See requirements for a major in visual arts. VIAR UN3900 is the prerequisite for VIAR UN3901. Corequisites: VIAR UN3911 Students must enroll in both semesters of the course (VIAR UN3900 and VIAR UN3901). The student is required to produce a significant body of work in which the ideas, method of investigation, and execution are determined by the student. A plan is developed in consultation with the faculty. Seminars; presentations. At the end, an exhibition or other public venue is presented for evaluation. Studio space is provided

VIAR UN3910 Visiting Critic I. 2 points.

Prerequisites: Department approval required. See requirements for a major in visual arts. VIAR UN3910 is the prerequisite for VIAR UN3911.

Corequisites: VIAR UN3900

(Formerly R3921) Students are required to enroll in both semesters (*VIAR UN3910* and *VIAR UN3911*). A second opinion is provided to the senior students regarding the development of their senior project. Critics consist of distinguished visitors and faculty. Issues regarding the premise, methodology, or presentation of the student's ideas are discussed and evaluated on an ongoing basis.

Fall 2020: VIAR UN3910

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3910	001/13638	W 5:15pm - 10:00pm Online Only	Emily Henretta	2	10/20

VIAR UN3911 VISITING CRITIC II. 2.00 points.

Prerequisites: VIAR UN3910 Department approval required. See requirements for a major in visual arts. Corequisites: VIAR UN3901 (Formerly R3922) Students are required to enroll in both semesters (VIAR UN3910 and VIAR UN3911). A second opinion is provided to the senior students regarding the development of their senior project. Critics consist of distinguished visitors and faculty. Issues regarding the premise, methodology, or presentation of the students ideas are discussed and evaluated on an ongoing basis

WOMEN'S AND GENDER STUDIES

Program Office: 763 Schermerhorn Extension; 212-854-3277; 212-854-7466 (fax)

<http://irwgs.columbia.edu/>

Director of Undergraduate Studies: Prof. Vanessa

Agard-Jones, 867 Schermerhorn Extension; vanessa.agard-jones@columbia.edu

Located within the Institute for Research on Women, Gender, and Sexuality and taught in cooperation with Barnard College's Department of Women's, Gender and Sexuality Studies, the program in women's and gender studies provides students with a culturally and historically situated, theoretically diverse understanding of feminist scholarship and its contributions to the disciplines. The program introduces students to feminist discourse on the cultural and historical representation of nature, power, and the social construction of difference. It encourages students to engage in the debates regarding the ethical and political issues of equality and justice that emerge in such discussion, and links the questions of gender and sexuality to those of racial, ethnic, and other kinds of hierarchical difference.

Through sequentially organized courses in women's, gender, and sexuality studies, as well as required discipline-based courses in the humanities and social sciences, the major provides a thoroughly interdisciplinary framework, methodological training, and substantive guidance in specialized areas of research. Small classes and mentored thesis-writing give students an education that is both comprehensive and tailored to individual needs. The major culminates in a thesis-writing class, in which students undertake original research and produce advanced scholarship.

Graduates leave the program well prepared for future scholarly work in women's, gender, and sexuality studies, as well as for careers and future training in law, public policy, social work, community organizing, journalism, and professions in which there is a need for critical and creative interdisciplinary thought.

MAJOR IN WOMEN'S AND GENDER STUDIES

The requirements for this program were modified on September 22, 2014. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

Students should plan their course of study with the undergraduate director as early in their academic careers as possible. The requirements for the major are:

WMST UN1001	Introduction to Women's and Gender Studies
or WMST UN3125	Introduction to Sexuality Studies
WMST UN3311	FEMINIST THEORY
WMST UN3514	Historical Approaches to Feminist Questions
WMST UN3521	Senior Seminar I
WMST UN3915	Gender and Power in Transnational Perspective

Six approved Elective Courses on women, gender, and/or sexuality in consultation with the director of undergraduate studies.*

* Electives will be selected in coordination with the director of undergraduate studies to best suit students' specific interests and to provide them with the appropriate range of courses, whether their focus is ethnic studies, pre-med, pre-law, sociology, public health, queer studies, visual culture, literature, or another area of interest. Students are encouraged to take a broad interdisciplinary approach. The director of undergraduate studies will help students fine-tune their academic program in conjunction with IRWGS courses, cross-listed courses, and other courses offered at Columbia.

CONCENTRATION IN WOMEN'S AND GENDER STUDIES

The requirements for this program were modified on September 22, 2014. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

The same requirements as for the major, with the exception of WMST UN3521 Senior Seminar I.

SPECIAL CONCENTRATION FOR THOSE MAJORING IN ANOTHER DEPARTMENT

The requirements for this program were modified on September 22, 2014. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.

WMST UN1001 Introduction to Women's and Gender Studies; plus four additional approved elective courses on gender.

FALL 2020

WMST UN3125 Introduction to Sexuality Studies. 3 points.

This course is designed to introduce major theories sexuality, desire and identity. We will be considering the relations between the history of sexuality and the politics of gender. We will read some primary texts in gender theory, and in the study of sexuality, desire, and embodiment. This course also provides an introduction to the interdisciplinary examination of human sexual and erotic desires, orientations, and identities. We will study how desires are constructed, how they vary and remain the same in different places and times, and how they interact with other social and cultural phenomena such as government, family, popular culture, scientific inquiry, and, especially, race and class.

Fall 2020: WMST UN3125

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3125	001/10010	M W 2:40pm - 3:55pm Online Only	Jack Halberstam	3	63/90

WMST UN3450 Topics in Sexuality and Gender Law. 3 points.

As society shifts in its views about sexuality and gender, so too does the law. Indeed, legal developments in this area have been among the most dynamic of the past couple of decades. Yet law does not map easily or perfectly onto lived experience, and legal arguments do not necessarily track the arguments made in public debate.

In this seminar, we will explore the evolving jurisprudence of sexuality and gender law in a variety of areas. Our goal throughout the semester will be to understand and think about these issues as lawyers do - with our primary focus on

understanding and evaluating the arguments that can be made on both (or all) sides of any particular case, with some attention to the factors outside of the courtroom that might shape how courts approach their work. Related to this, we will also seek to understand how and why some of the jurisprudence has changed over time.

Fall 2020: WMST UN3450

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3450	001/10011	Th 2:10pm - 4:00pm Online Only	Suzanne Goldberg	3	19/20

WMST UN3521 Senior Seminar I. 4 points.

The Senior Seminar in Women's Studies offers you the opportunity to develop a capstone research paper by the end of the first semester of your senior year. Senior seminar essays take the form of a 25-page paper based on original research and characterized by an interdisciplinary approach to the study of women, sexuality, and/or gender. You must work with an individual advisor who has expertise in the area of your thesis and who can advise you on the specifics of method and content. Your grade for the semester will be determined by the instructor and the advisor. Students receiving a grade of "B+" or higher in Senior Seminar I will be invited to register for Senior Seminar II by the Instructor and the Director of Undergraduate Studies. Senior Seminar II students will complete a senior thesis of 40-60 pages. Please note, the seminar is restricted to Columbia College and GS senior majors.

WMST GU4325 Embodiment and Bodily Difference. 4 points.

At once material and symbolic, our bodies exist at the intersection of multiple competing discourses, including the juridical, the techno-scientific, and the biopolitical. In this course, we will draw upon a variety of critical interdisciplinary literatures—including feminist and queer studies, science and technology studies, and disability studies—to consider some of the ways in which the body is constituted by such discourses, and itself serves as the substratum for social relations. Among the key questions we will consider are the following: What is natural about the body? How are distinctions made between presumptively normal and pathological bodies, and between psychic and somatic experiences? How do historical and political-economic forces shape the perception and meaning of bodily difference? And most crucially: how do bodies that are multiply constituted by competing logics of gender, race, nation, and ability offer up resistance to these and other categorizations?

WMST GU4350 Performing feminist activism in Contemporary Latin America. 4 points.

This course explores different ways in which feminist artists and activists use performance to spark social change in Latin America. Using feminism and performance studies as critical lenses, this course addresses how performative actions can challenge patriarchal systems in neoliberal times. We begin the course by reviewing key texts to discuss the key terms “feminisms”, “performance” and “activisms”. Then, the course turns to an examination of contemporary feminist activism in Latin America, including the #niunamenos movement in Argentina, the 2018 feminist tsunami in Chile and the work of Mujeres Creando in Bolivia. In each session, we will discuss the performative strategies activists use to denounce, protest and resist dominant discourses of power, neoliberalism and gender violence, searching to trace connectivities and fractures among different contemporary feminist activist movements across Latin America.

WMST 3522	001/14285	W 4:10pm - 6:00pm Online Only	Vanessa Agard-Jones	4	1/20

WMST UN3200 Queer Theory. 4 points.

This class will ask you to read a set of novels, theoretical essays and social science studies in order to think deeply about sexuality, identity, desire, race, objects, relationality, being, knowing and becoming. We will consider sexuality, desire and gender not as a discrete set of bodily articulations, nor as natural expressions of coherent identities so much as part off the formulation of self that Avery Gordon names “complex personhood.” Beginning with a recent film from the UK that rereads queerness back through a history of labor and ending with a recent film made entirely on the iPhone and that stages queerness as part of an alternative articulation of Hollywood, we will explore new and old theories of queer desire.

Through the readings, discussions, and assignments, you will develop critical analytical skills to consider social change movements with particular attention to how sex, gender, race, class, sexuality, sexual orientation, and other systems of power shape people's everyday lives. We will trace the intersection of

histories of labor, medicine, representation and activism and we will ask difficult questions about assimilation, mainstreaming, globalization and pink capitalism.

WMST UN3655 Gender and Public Health: Disparities, Pathways, and Policies. 3.00 points.

This seminar provides an intensive introduction to critical thinking about gender in relation to public health. We begin with a rapid immersion in social scientific approaches to thinking about gender in relation to health, and then examine diverse areas in which gendered relations of power – primarily between men and women, but also between cis- and queer individuals – shape health behaviors and health outcomes. We engage with multiple examples of how gendered social processes, in combination with other dimensions of social stratification, shape health at the population level. The overarching goal of this class is to provide a context for reading, discussion, and critical analysis to help students learn to think about gender – and, by extension, about any form of social stratification – as a driver of patterns in population health. We also attend consistently to how public health as a field is itself a domain in which gender is reproduced or contested

WMST 3655	001/13913	W 8:10am - 10:00am Online Only	Jennifer Hirsch	3.00	11/13

WMST UN3915 Gender and Power in Transnational Perspective. 4 points.

Enrollment limited to 15.

Prerequisites: Instructor approval required

Considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist movements that have emerged to address contemporary gendered inequalities. Topics include political economy, global

care chains, sexuality, sex work and trafficking, feminist politics, and human rights.

If it is a small world after all, how do forces of globalization shape and redefine both men's and women's positions as workers and political subjects? And, if power swirls everywhere, how are transnational power dynamics reinscribed in gendered bodies? How is the body represented in discussions of the political economy of globalization? These questions will frame this course by highlighting how gender and power coalesce to impact the lives of individuals in various spaces including workplaces, the home, religious institutions, refugee camps, the government, and civil society, and human rights organizations. We will use specific sociological and anthropological case studies, to look at how various regimes of power operate to constrain individuals as well as give them new spaces for agency. This course will enable us to think transnationally, historically, and dynamically, using gender as a lens through which to critique relations of power and the ways that power informs our everyday lives and identities.

WMST GU4000 GENEALOGIES OF FEMINISM. 4.00 points.

This advanced seminar examines historical, social, cultural, and theoretical propositions for decolonizing praxis and their complex relations to feminist critique. How do we understand Western European colonialism and coloniality as modes, conditions, and institutions of power, dispossession, subjugation, and subjection continuing into the present? What are the methods, practices, and vision enacted and proposed by the colonized for undoing and radically transforming the determinate logics, instruments, and structures of colonialism as these persist in the present moment? We will consider how gender and sexuality as well as race – as technologies of social organization, codes of valuation, and modes of survival – shape colonialism and the struggles against it. We will inquire into their significance to projects of decolonization. How might decolonization envision and make possible other ways of life?

WMST GU4235 Indigenous Feminisms. 4 points.

Indigenous women, queers, trans- and Two Spirit people have been at the forefront of activism and resistance to state incursion into Indigenous lands and waters. This was evident most recently at Mauna Kea, a mountain sacred to Kanaka Maoli in Hawaii as women, trans and queer formed the first

line of resistance and occupation against the construction of a 1000-meter telescope on the site. This is not unique, their voices, along with indigenous queer and feminist scholars, have been working to address issues as far-ranging as mascots, settler appropriation of indigenous cultures, missing and murdered indigenous women and girls, and the violence against indigenous urban youth. This seminar will consider how those indigenous feminist, queer, and Two Spirit scholars have theorized gender, sexuality, race, and colonialism, alongside issues of land, water and sovereignty. We will read works that consider how indigeneity challenges how gender and sexuality are expressed in the context of settler colonialism and racial capitalism.

WMST GU4317 ADVANCED TOPICS. 4.00 points.

This course explores transcontinental connections across Africa, Asia, and the Americas as forged in the practices and movements of peoples, in the context of global colonial and postcolonial orders. We will consider the intersections, crossings, and collaborations of different communities of the global South across these continents in the course of their social, cultural, and political struggles to shape and transform the worlds they live in. We will ask, how might different narratives of these global South connections contribute to our imagination and practice of global resistance and transformation? Topics include: colonialism, capitalism, Third Worldism, feminism

WMST BC2150 PRACTICING INTERSECTIONALITY. 3.00 points.

This introductory course for the Interdisciplinary Concentration or Minor in Race and Ethnicity (ICORE/MORE) is open to all students. We focus on the critical study of social difference as an interdisciplinary practice, using texts with diverse modes of argumentation and evidence to analyze social differences as fundamentally entangled and co-produced. Because of the interdisciplinary nature of this course, the professor will frequently be joined by other faculty from the Consortium for Critical Interdisciplinary Studies (CCIS), who bring distinct disciplinary and subject matter expertise. Some keywords for this course include hybridity, diaspora, borderlands, migration, and intersectionality

WMST BC3814 ACTIVISM # INQUIRY LAB A. 1.00 point.

This lab course is an optional addition to the WGSS junior colloquia courses “Theorizing Feminist Activisms” and “Feminist Inquiry”; students must take one of those courses simultaneously with this lab. The lab gives students an opportunity to gain practical experience with one or more qualitative research methods that are frequently used in feminist and gender studies. It will be particularly valuable as groundwork for senior thesis research, but all students enrolled in Theorizing Activisms or Feminist Inquiry are encouraged to take the lab to deepen their understanding of practical and ethical issues in conducting research in support of social change
