A minimum of 9 points (three courses) chosen with the major adviser to provide depth in the field of environmental science.

These courses build on the foundation and supporting courses listed above and provide a coherent focus in some area of environmental science. Depth courses are 3000- and 4000- level courses that carry EESC or supporting science pre-requisites. Students must include at least one of the following in their course of study:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	SOLID EARTH DYNAMICS

Please note that EESC GU4600 EARTH RESOURCES # SUSTAIN DEV does not fulfill the Depth Requirement, this course would only fulfill the Breadth requirement.

## Areas of focus

The following areas of focus include one of the courses listed above and two or more additional courses. Students are not required to specialize in a focus area, but examples are given below for those who choose to do so.

### Environmental Geology

EESC GU4076	Geologic Mapping
EESC GU4480	Paleobiology and Earth System History
EAEE E3221	

It is recommended that students focusing in environmental geology also take EESC W4050 Remote Sensing.

### Environmental Geochemistry

EESC UN3015	The Earth's Carbon Cycle
EESC GU4885	CHEMISTRY OF CONTINENTL WATERS
EESC GU4887	ISOTOPE GEOLOGY I
EESC GU4924	INTRO TO ATMOSPHERIC CHEMISTRY
EESC GU4888	Stable Isotope Geochemistry
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY

### Hydrology

EESC GU4076	Geologic Mapping
EESC GU4835	Wetlands and Climate Change
EESC GU4885	CHEMISTRY OF CONTINENTL WATERS
EESC BC3025	HYDROLOGY
EAEE E3221	

### Climate Change

EESC UN3015	The Earth's Carbon Cycle
EESC GU4008	Introduction to Atmospheric Science
EESC GU4330	INTRO-TERRESTRIAL PALEOCLIMATE
EESC GU4480	Paleobiology and Earth System History
EESC GU4835	Wetlands and Climate Change
EESC GU4920	PALEOCEANOGRAPHY

It is recommended that students focusing in environmental geology also take EESC GU4050 Remote Sensing.

### Energy and Resources

EESC GU4076	Geologic Mapping
EESC GU4701	Introduction to Igneous Petrology
EAEE E2002	

## MAJOR IN CLIMATE SYSTEM SCIENCE

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators](#) (p. 457) above.

The major in Climate System Science requires a minimum of 43.5 points, distributed as follows:

### Foundational Courses

7.5 points minimum (2 courses):

#### Required:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
-------------	--------------------------------

#### And any one of:

EESC UN1009	GLOBAL WARMING FOR GLOBAL LEADERS
EESC UN1030	OCEANOGRAPHY
EESC UN1201	Environmental Risks and Disasters
EESC UN1600	EARTH RESOURCES # SUSTAIN DEV
or EESC GU4600	EARTH RESOURCES # SUSTAIN DEV
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

### Supporting Courses

12 points minimum (4 courses):

#### One semester of Calculus at the level of Calculus I or higher:

MATH UN1101	CALCULUS I
-------------	------------

#### And any three courses:

PHYS UN1201	GENERAL PHYSICS I
PHYS UN1202	GENERAL PHYSICS II
CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
CHEM UN1404	GENERAL CHEMISTRY II-LECTURES
EEEB UN2001	ENVIRONMENTAL BIOLOGY I
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

### Climate System Core

15 points minimum (five courses):

#### Required: at least one Paleoclimate Course

EESC GU4235	SEA LEVEL CHANGE
EESC GU4330	INTRO-TERRESTRIAL PALEOCLIMATE

EESC GU4480	Paleobiology and Earth System History
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY

#### Required: at least one Modern Climate Course

EESC UN3031	CHEMISTRY OF CLIMATE
EESC UN3109	CLIMATE PHYSICS
EESC GU4008	Introduction to Atmospheric Science
EESC GU4020	HUMANS # THE CARBON CYCLE
EESC GU4040	CLIM THERMODYN/ENERGY TRANSFER
EESC GU4835	Wetlands and Climate Change
EESC GU4923	Biological Oceanography
EESC GU4925	INTRO TO PHYSICAL OCEANOGRAPHY
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY
EESC GU4930	EARTH'S OCEANS # ATMOSPHERE

#### Could include: Other Climate System Course

EESC BC3109	Hydrology
EESC UN3101	Geochemistry for a Habitable Planet
EESC UN3201	SOLID EARTH DYNAMICS
EESC GU4220	GLACIOLOGY
EESC GU4835	Wetlands and Climate Change
EESC GU4885	CHEMISTRY OF CONTINENTL WATERS
EESC GU4923	Biological Oceanography
EESC GU4924	INTRO TO ATMOSPHERIC CHEMISTRY
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY

#### Could include one: Supporting EESC Course

EESC UN3400	COMPUTATIONAL EARTH SCIENCE
EESC GU4210	GEOPHYSICAL FLUID DYNAMICS
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4230	CRUSTAL DEFORMATION
EESC GU4887	ISOTOPE GEOLOGY I
EESC GU4888	Stable Isotope Geochemistry

### Climate Solutions, Justice, Policy and Communication

6 points minimum (any two courses below):

#### Solutions Courses

EESC BC3045	RESPONDING TO CLIMATE CHANGE (Barnard College)
ARCH UN3120	CITY, LANDSCAPE, # ECOLOGY

EAAE E2002	
EAAE E2100	A BETTER PLANET BY DESIGN
EAAE E4001	INDUST ECOLOGY-EARTH RESOURCES
EAAE E4002	ALTERNATIVE ENERGY RESOURCES
EAAE E4006	Field methods for environmental engineering
EAAE E4300	INTRO TO CARBON MANAGEMENT
EAAE E4302	CARBON CAPTURE
EAAE E4301	CARBON STORAGE
EAAE E4305	CO2 UTILIZATION AND CONVERSION
CIEE E3250	
MECE E4211	ENERGY SOURCES AND CONVERSION
SDEV GU4250	CLIMATE CHANGE: RESILIENCE # ADAPTATION
<b>Climate Justice, Policy, Economics</b>	
ANTH BC3932	CLIMATE CH./GLOB. MIGRATION/ HUMAN RIGHTS (Barnard College)
ANTH V3861	
ARCH UN3400	ENVIRONMENTAL VISUALIZATIONS OF NYC
ECON BC3039	ENVIRONMENTAL & NAT. RES. ECONOMICS (Barnard College)
ECON BC3040	ENVIRONMENTAL LAW (Barnard College)
ECON UN2257	THE GLOBAL ECONOMY
ECON GU4750	GLOBALIZATION # ITS RISKS
POLS UN3648	GOVERNING THE GLOBAL ECONOMY
POLS GU4814	GLOBAL ENERGY: SECURITY/ GEOPOL
POLS GU4863	INTERNATIONAL POLITICAL ECONOMY OF DEVELOPING COUNTRIES
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3360	DISASTERS AND DEVELOPMENT
SDEV UN2050	ENVIRONMENTAL POLICY AND GOVERNANCE

## Climate System Capstone

3 points minimum (one course):

EESC UN3904	INDEPENDENT RESEARCH IN CLIMATE SYSTEM SCIENCE
EESC UN3901	SENIOR SEMINAR (taken twice, in fall and spring)
or EESC BC3800 followed by EESC UN3901	
Approved Field Course focused on the Climate System	
~6 weeks, must be proposed and then approved by DUS	

## MAJOR IN CLIMATE AND SUSTAINABILITY

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators](#) (p. 457) above.

The major in Climate and Sustainability is a joint major between the Undergraduate Program in Sustainable Development and DEES, and requires a minimum of 46.5 points, distributed as follows:

### Climate and Sustainability Foundations

Two courses:

SDEV UN2300	CHALLENGES OF SUSTAINABLE DEV
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

### Basic Disciplinary Foundations

Five courses:

#### A. Natural Science Courses (2):

**Required:**

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
-------------	--------------------------------

**One of the following:**

EESC UN1201	Environmental Risks and Disasters
EESC UN1600	EARTH RESOURCES # SUSTAIN DEV
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

#### B. Social Science Courses (2):

**Required:**

SDEV UN2100	Introduction to Climate Justice
-------------	---------------------------------

**One of the following:**

ECON UN1105	PRINCIPLES OF ECONOMICS
POLS UN1601	INTERNATIONAL POLITICS
SDEV UN2000	INTRO TO ENVIRONMENTAL LAW
SDEV UN2050	ENVIRONMENTAL POLICY AND GOVERNANCE
ANTH BC2427	ANTHROPOLOGY OF CLIMATE CHANGE
SDEV UN3400	HUMAN POPULATIONS # SDEV

**C. Quantitative Foundations Course (1)****One of the following:**

STAT UN1201	CALC-BASED INTRO TO STATISTICS
MATH UN2010	LINEAR ALGEBRA
EEEB UN3005	INTRO-STAT-ECOLOGY # EVOL BIOL
EESC BC3017	ENVIRONMENTAL DATA ANALYSIS

Note: Taking Introduction to Statistics and Calculus separately will not fulfill the quantitative requirement.

**Climate and Sustainability: Complexities and Analyses**

Four courses:

**Two courses from the following:**

TBD#### Climate Change: Mitigation	
SDEV GU4250	CLIMATE CHANGE: RESILIENCE # ADAPTATION
ANTH BC3932	CLIM CHNG/GLOBAL MIGR/HUM RGT
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3366	ENERGY LAW
EESC GU4235	SEA LEVEL CHANGE
EAEE E4304	CLOSING THE CARBON CYCLE

**One of the following Natural Science courses:**

EESC GU4220	GLACIOLOGY
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY
EESC GU4923	Biological Oceanography
EESC GU4925	INTRO TO PHYSICAL OCEANOGRAPHY
EESC GU4835	Wetlands and Climate Change
EESC GU4330	INTRO-TERRESTRIAL PALEOCLIMATE
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY
EESC GU4235	SEA LEVEL CHANGE
EAEE E4304	CLOSING THE CARBON CYCLE

**One of the following Social Science courses:**

ANTH 3861	Anthropology of the Anthropocene
POLS 4811	Global Energy: Security/Geopolitics
SDEV 4240	Science Communications
ANTH BC3932	CLIM CHNG/GLOBAL MIGR/HUM RGT
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3366	ENERGY LAW
SDEV GU4050	US WATER # ENERGY POLICY

ECON BC3039

Environmental and Natural Resource Economics

**Electives**

Select two courses from the following areas. If you select Area 1, you must complete two thesis courses, and these will fulfill the elective requirement:

**Area 1:**

EESC UN3901 SENIOR SEMINAR

**Area 2:**

Additional courses listed under the *Climate and Sustainability: Complexities and Analysis* requirement

**Area 3:**

Additional quantitative or qualitative methods or skills courses:

STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN3105	APPLIED STATISTICAL METHODS
STAT UN3106	APPLIED MACHINE LEARNING
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4207	ELEMENTARY STOCHASTIC PROCESS
STAT GU4205	LINEAR REGRESSION MODELS
EAEE E4257	ENVIR DATA ANALYSIS # MODELING
EESC BC3050	BIG DATA WITH PYTHON
SDEV UN3390	GIS FOR SUSTAINABLE DEVELOPMNT
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV
SDEV GU4101	QUAL RESEARCH METHODS SDEV

**Practicum**

One course:

**One of the following:**

SDEV UN3998	SUPERVISED INDIVIDUAL RESEARCH
SDEV GU4500	SUSTAINABILITY AND THE MEANING OF PLACE ON CUTTYHUNK ISLAND
SDEV GU4550	The New York City Watershed: From Community Displacement to Collaboration and Climate Adaptation
SUMA PS4734	Earth Institute Practicum

## Capstone Workshop

One course:

One of the following:

SDEV UN3280	WORKSHOP IN SUSTAINABLE DEVPT
SDEV UN3550	BANGLADSH:LIFE-TECT ACTV DELTA
SDEV GU4400	Sustainable Development in Rwanda

## MINOR IN EARTH AND ENVIRONMENTAL SCIENCE

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators](#) (p. 457) above.

The minor in Earth and Environmental Science requires a minimum of 18 points, distributed as follows:

### Foundational Courses

9 points (two courses):

Select two of the following:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

### Depth and Breadth Courses

9 points minimum (three courses):

Any three additional 1000, 2000, 3000, or 4000-level EESC courses.

## MINOR IN CLIMATE SYSTEM SCIENCE

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators](#) (p. 457) above.

The minor in Climate System Science requires a minimum of 16.5 points, distributed as follows:

### Foundational Courses

7.5 points (two courses):

Both required:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN1009	GLOBAL WARMING FOR GLOBAL LEADERS

### Climate System Module

6 points minimum (any two courses below):

Two courses from the lists below:

EESC UN1030	OCEANOGRAPHY
EESC UN1201	Environmental Risks and Disasters
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

#### Paleoclimate Courses

EESC GU4235	SEA LEVEL CHANGE
EESC GU4330	INTRO-TERRESTRIAL PALEOCLIMATE
EESC GU4480	Paleobiology and Earth System History
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY

#### Modern Climate Courses

EESC UN3031	CHEMISTRY OF CLIMATE
EESC UN3109	CLIMATE PHYSICS
EESC GU4008	Introduction to Atmospheric Science
EESC GU4020	HUMANS # THE CARBON CYCLE
EESC GU4040	CLIM THERMODYN/ENERGY TRANSFER
EESC GU4925	INTRO TO PHYSICAL OCEANOGRAPHY
EESC GU4930	EARTH'S OCEANS # ATMOSPHERE

#### Other Climate System Courses

EESC BC3109	Hydrology
EESC UN3101	Geochemistry for a Habitable Planet
EESC UN3201	SOLID EARTH DYNAMICS
EESC GU4220	GLACIOLOGY
EESC GU4835	Wetlands and Climate Change
EESC GU4885	CHEMISTRY OF CONTINENTL WATERS
EESC GU4923	Biological Oceanography
EESC GU4924	INTRO TO ATMOSPHERIC CHEMISTRY
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY

#### Supporting EESC Courses

EESC UN3400	COMPUTATIONAL EARTH SCIENCE
EESC GU4210	GEOPHYSICAL FLUID DYNAMICS
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4230	CRUSTAL DEFORMATION
EESC GU4887	ISOTOPE GEOLOGY I
EESC GU4888	Stable Isotope Geochemistry

## Climate Solutions, Justice, Policy and Communication

3 points minimum (any one course below):

### Solutions Courses

EESC BC3045 RESPONDING TO CLIMATE CHANGE (Barnard College)	
ARCH UN3120	CITY, LANDSCAPE, # ECOLOGY
EAEE E2002	
EAEE E2100	A BETTER PLANET BY DESIGN
EAEE E4001	INDUST ECOLOGY-EARTH RESOURCES
EAEE E4002	ALTERNATIVE ENERGY RESOURCES
EAEE E4006	Field methods for environmental engineering
EAEE E4300	INTRO TO CARBON MANAGEMENT
EAEE E4302	CARBON CAPTURE
EAEE E4301	CARBON STORAGE
EAEE E4305	CO2 UTILIZATION AND CONVERSION
CIEE E3250	
MECE E4211	ENERGY SOURCES AND CONVERSION
SDEV GU4250	CLIMATE CHANGE: RESILIENCE # ADAPTATION

### Climate Justice, Policy, Economics

ANTH BC3932 CLIMATE CH./GLOB. MIGRATION/HUMAN RIGHTS (Barnard College)	
ANTH V3861	
ARCH UN3400	ENVIRONMENTAL VISUALIZATIONS OF NYC
ECON BC3039 ENVIRONMENTAL & NAT. RES. ECONOMICS (Barnard College)	
ECON BC3040 ENVIRONMENTAL LAW (Barnard College)	
ECON UN2257	THE GLOBAL ECONOMY
ECON GU4750	GLOBALIZATION # ITS RISKS
POLS UN3648	GOVERNING THE GLOBAL ECONOMY
POLS GU4814	GLOBAL ENERGY: SECURITY/GEOPOL

POLS GU4863	INTERNATIONAL POLITICAL ECONOMY OF DEVELOPING COUNTRIES
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3360	DISASTERS AND DEVELOPMENT

## MINOR IN EARTH AND SPACE

Please read Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators (p. 457) above.

The minor in Earth and Space requires a minimum of 15 points, distributed as follows:

### Introductory Course

3 points minimum (one course):

One of the following:

ASTR UN1453	ANOTHER EARTH
ASTR BC1753	LIFE IN THE UNIVERSE
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

### Astronomy Courses

6 points minimum (two courses):

Two of the following:

ASTR UN1403	EARTH, MOON, AND PLANETS
ASTR UN1404	STARS, GALAXIES # COSMOLOGY
ASTR UN1420	Galaxies and Cosmology
ASTR UN1836	STARS AND ATOMS

Or the following ASTR sequence:

ASTR UN2001	INTRO TO ASTROPHYSICS I
ASTR UN2002	INTRO TO ASTROPHYSICS II

## DEES Courses

6 points minimum (two courses):

One of the following:

EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN3201	SOLID EARTH DYNAMICS

Plus one of the following:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN3101	Geochemistry for a Habitable Planet

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before Fall 2023. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Concentrations are not available to students who entered Columbia in or after Fall 2024.

### Concentration in Earth Science

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Concentrators, and Special Concentrators](#) (p. 457) above.

The concentration in Earth science requires a minimum of 24 points, distributed as follows:

#### Foundation Courses

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
or EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

#### Supporting Mathematics and Science Courses

Two science or mathematics courses (6-7 points) selected from among those listed for the Earth science major above.

#### Depth and Breadth and Related Fields Requirements

A minimum of 9 points (typically three courses) is required as follows:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	SOLID EARTH DYNAMICS

One additional course chosen from those listed under Depth Requirement for the earth science major above.

The third course selected from those listed under either Depth Requirement or Breadth and Related Fields Requirement for the earth science major above.

### Concentration in Environmental Science

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Concentrators, and Special Concentrators](#) (p. 457) above.

The concentration in environmental science requires a minimum of 25.5 points, distributed as follows:

#### Foundation Courses

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

#### Supporting Mathematics and Science Courses

Two science or mathematics courses (6-7 points) selected from among those listed for the environmental science major above.

#### Depth and Breadth and Related Fields Requirements

A minimum of 6 points (two courses) is required as follows:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	SOLID EARTH DYNAMICS

One additional course selected from those listed under either Depth Requirement or Breadth and Related Fields Requirement for the environmental science major above.

### Special Concentration in Environmental Science for Majors in Environmental Biology

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Concentrators, and Special Concentrators](#) (p. 457) above.

The Department of Earth and Environmental Sciences sponsors a special concentration which must be done in conjunction with the environmental biology major. Students should be aware that they must complete the environmental biology major in order to receive credit for the special concentration.

The special concentration in environmental science requires a minimum of 31.5 points, distributed as follows:

#### Introductory Environmental Science (13.5 points)

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

#### Introductory Science (6 points)

Two courses in chemistry, physics, mathematics, or environmental biology from the supporting mathematics and science list for the environmental science major above.

## Advanced Environmental Science (12 points)

Four courses at the 3000-level or above chosen from those recommended for the environmental science major above.

Advanced courses used to fulfill requirements in the environmental biology major cannot count toward requirements for the special concentration.

## Special Concentration in Environmental Biology for Majors in Environmental Science

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Concentrators, and Special Concentrators](#) (p. 457) above.

The Department of Ecology, Evolution, and Environmental Biology sponsors a special concentration which must be done in conjunction with the environmental science major. Students should be aware that they must complete the environmental science major in order to receive credit for the special concentration.

The special concentration in environmental biology requires a minimum of 39 points, distributed as follows:

### Introductory Environmental Biology and Environmental Science (17 points)

EEEB UN2001	ENVIRONMENTAL BIOLOGY I
EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EEEB UN2002	ENVIRONMENTAL BIOLOGY II

### Introductory Science (13 points)

Select one of the following chemistry sequences:

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES
CHEM UN1604 & CHEM UN2507	2ND TERM GEN CHEM (INTENSIVE) and Intensive General Chemistry Laboratory

One term of statistics such as the following:

STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS
BIOL BC2286	STATISTICS # RESEARCH DESIGN
EEEB UN3005	INTRO-STAT-ECOLOGY # EVOL BIOL
EEEB UN3087	CONSERVATION BIOLOGY

## Advanced Environmental Biology (9 points)

Three additional advanced EEEB courses (3000-level and above), each chosen from a different curricular area (evolution/genetics, ecology/behavior/conservation, anatomy/physiology/diversity, biology laboratory courses).

Advanced courses used to fulfill requirements in the environmental science major cannot count toward requirements for the special concentration.

## Sustainable Development

Students interested in sustainable development should refer to the *Sustainable Development* section in this Bulletin.

## FALL 2024

### EESC UN1030 OCEANOGRAPHY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement  
Enrollment limited to 160.

Explore the geology of the sea floor, understand what drives ocean currents and how ocean ecosystems operate. Case studies and discussions centered on ocean-related issues facing society

Fall 2024: EESC UN1030

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 1030	001/11442	T Th 11:40am - 12:55pm 501 Northwest Corner	Baerbel Hoenisch	3.00	142/160
EESC 1030	AU1/18835	T Th 11:40am - 12:55pm Othr Other	Baerbel Hoenisch	3.00	14/16

### EESC UN1201 Environmental Risks and Disasters. 3 points.

CC/GS: Partial Fulfillment of Science Requirement  
Priority given to first-years and sophomores.

Prerequisites: high school science and math.

An introduction to risks and hazards in the environment.

Different types of hazards are analyzed and compared: natural disasters, such as tornados, earthquakes, and meteorite impacts; acute and chronic health effects caused by exposure to radiation and toxic substances such as radon, asbestos, and arsenic; long-term societal effects due to environmental change, such as sea level rise and global warming. Emphasizes the basic physical principles controlling the hazardous phenomena and develops simple quantitative methods for making scientifically reasoned assessments of the threats (to health and wealth) posed by various events, processes, and exposures. Discusses methods of risk mitigation and sociological, psychological, and economic aspects of risk control and management.

Fall 2024: EESC UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 1201	001/11443	T Th 10:10am - 11:25am 333 Uris Hall	Goran Ekstrom	3	34/52

**EESC UN1600 EARTH RESOURCES # SUSTAIN DEV.****3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: none; high school chemistry recommended.  
 Prerequisites: none; high school chemistry recommended.  
 Survey of the origin and extent of mineral resources, fossil fuels, and industrial materials, that are non renewable, finite resources, and the environmental consequences of their extraction and use, using the textbook Earth Resources and the Environment, by James Craig, David Vaughan and Brian Skinner. This course will provide an overview, but will include focus on topics of current societal relevance, including estimated reserves and extraction costs for fossil fuels, geological storage of CO<sub>2</sub>, sources and disposal methods for nuclear energy fuels, sources and future for luxury goods such as gold and diamonds, and special, rare materials used in consumer electronics (e.g. Coltan; mostly from Congo) and in newly emerging technologies such as superconducting magnets and rechargeable batteries (e.g. heavy rare earth elements, mostly from China). Guest lectures from economists, commodity traders and resource geologists will provide real world; input. Discussion Session Required

**Fall 2024: EESC UN1600**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 1600	001/11444	T Th 1:10pm - 2:25pm 301 Uris Hall	Peter Kelemen	3.00	74/200

**EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST.****4.50 points.**

Prerequisites: high school algebra. Recommended preparation: high school chemistry and physics; and one semester of college science. Origin and development of the atmosphere and oceans, formation of winds, storms and ocean currents, reasons for changes through geologic time. Recent influence of human activity: the ozone hole, global warming, water pollution. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling. Students majoring in Earth and Environmental Sciences should plan to take EESC W2100 before their senior year to avoid conflicts with Senior Seminar

**Fall 2024: EESC UN2100**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 2100	001/11445	T Th 10:10am - 11:25am 603 Schermerhorn Hall	Jerry McManus, Suzana De Camargo	4.50	41/48
EESC 2100	001/11445	T 4:10pm - 7:00pm 555 Ext Schermerhorn Hall	Jerry McManus, Suzana De Camargo	4.50	41/48

**Spring 2025: EESC UN2100**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 2100	001/13543	T Th 10:10am - 11:25am	Gisela Winckler,	4.50	45/60

603 Schermerhorn Hall	Mingfang Ting			
EESC 2100 001/13543	T 4:10pm - 7:00pm 555 Ext Schermerhorn Hall	Gisela Winckler, Mingfang Ting	4.50	45/60

**EESC UN2200 EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH. 4.50 points.**

CC/GS: Partial Fulfillment of Science Requirement

Priority given to Columbia and Barnard earth science, environmental science, and environmental biology majors should enrollment limits be necessary.

Prerequisites: high school algebra and chemistry.  
 Recommended preparation: high school physics.  
 Recommended preparation: high school chemistry and physics; and one semester of college science. Exploration of how the solid Earth works, today and in the past, focusing on Earth in the Solar system, continents and oceans, the Earth's history, mountain systems on land and sea, minerals and rocks, weathering and erosion, glaciers and ice sheets, the hydrological cycle and rivers, geochronology, plate tectonics, earthquakes, volcanoes, energy resources. Laboratory exploration of topics through examination of rock samples, experimentation, computer data analysis, field exercises, and modeling. Columbia and Barnard majors should plan to take W2200 before their senior year to avoid conflicts with the Senior Seminar

### **EESC UN2330 SCIENCE FOR SUSTAINABLE DEVPT. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

The course provides students with an understanding of Earth's natural systems that is essential to addressing the multi-faceted issues of sustainable development. After completing the course, students should be able to incorporate scientific approaches and perspectives into their research in other fields or policy decisions and be able to use scientific methods of data analysis. The semester will highlight the climate system and solutions from both physical and ecological perspectives; water resources; food production and the cycling of nutrients; and the role of biodiversity in sustainable development. The course emphasizes key scientific concepts such as uncertainty, experimental versus observational approaches, prediction and predictability, the use of models, and other essential methodological aspects

Fall 2024: EESC UN2330

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 2330	001/11447	T Th 2:40pm - 3:55pm 402 Chandler	John Mutter, Jenna Lawrence	3.00	89/120

### **EESC UN3031 CHEMISTRY OF CLIMATE. 3.00 points.**

By the end of this course, students will understand: The biogeochemical cycles driving the composition of trace gas and aerosol species that are both long- and short-lived in the atmosphere that influence climate by directly interacting with radiation (i.e. greenhouse gases (GHGs) such as carbon dioxide, methane, nitrous oxide, ozone, CFCs, aerosols) and those that do so mainly by altering the concentrations of other gases (OH, NO<sub>x</sub>, etc.); The effects of these gas and aerosol species on climate and atmospheric composition; Climate mitigation strategies that are being considered in response to climate warming. This course is designed for undergraduate students seeking a quantitative introduction to climate and climate change science. EESC V2100 (Climate Systems) is not a prerequisite, but can also be taken for credit if it is taken before this course

Fall 2024: EESC UN3031

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **EESC UN3101 Geochemistry for a Habitable Planet. 3 points.**

Prerequisites: any 1000-level or 2000-level EESC course; *MATH V1101* Calculus I and *CHEM W1403* General Chemistry I or their equivalents.

The origin, evolution, and future of our planet, based on the book *How to Build a Habitable Planet* by Wallace S. Broecker. This course will focus on the geochemical processes that built Earth from solar material, led to its differentiation into continents and ocean, and have maintained its surface at a comfortable temperature. Students will participate in a hands-on geochemistry project at Lamont-Doherty Earth Observatory.

Fall 2024: EESC UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 3101	001/11449	T Th 11:40am - 12:55pm 603 Schermerhorn Hall	Terry Plank	3	20/35

### **EESC UN3400 COMPUTATIONAL EARTH SCIENCE. 3.00 points.**

Prerequisites: Required: at least a semester of calculus and physics; any 1000-level or 2000-level EESC course. Computer models are essential for understanding the behavior of complex natural systems in geosciences. This course is an introduction to writing computer models to simulate Earth processes. Students will learn methods for numerical modeling of a variety of geoscience topics, such as nonlinear systems of air chemistry, ocean currents, atmospheric dispersion, and more. Simulations will be created by learning to program with a user-friendly language (Python). Student learning will be facilitated through a combination of lectures, in-class exercises, homework assignments and a final project on a student-selected topic

### **EESC UN3904 INDEPENDENT RESEARCH IN CLIMATE SYSTEM SCIENCE. 3.00 points.**

In this course, students develop and complete a one-semester independent research project in an area of Climate System Science. Each student works closely with a research Mentor, and the course experience for all students is coordinated with a course Instructor. This course fulfills the Capstone experience for the Climate System Science major in DEES. This course cannot be combined with one semester of Senior Seminar UN3901, which is designed as a 1-year course

#### **Fall 2024: EESC UN3904**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 3904	001/11741	Th 8:40am - 9:55am 603 Schermerhorn Hall	Roisin Commane, Jacqueline Austermann	3.00	4/15

### **EESC GU4008 Introduction to Atmospheric Science. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: advanced calculus and general physics, or the instructor's permission.

Basic physical processes controlling atmospheric structure: thermodynamics; radiation physics and radiative transfer; principles of atmospheric dynamics; cloud processes; applications to Earth's atmospheric general circulation, climatic variations, and the atmospheres of the other planets.

#### **Fall 2024: EESC GU4008**

EESC 4008	001/11461	T 4:10pm - 6:40pm 417 Schermerhorn Hall	Lorenzo Polvani	3	39/45

### **EESC GU4020 HUMANS # THE CARBON CYCLE. 3.00 points.**

Prerequisites: One semester of college-level calculus and chemistry; Plus one semester of college-level physics or geoscience. Or instructor's permission. The accelerating climate change of the current day is driven by humanity's modifications to the global carbon cycle. This course offers an introduction basic science of the carbon cycle, with a focus on large-scale processes occurring on annual to centennial timescales. Students will leave this course with an understanding of the degree to which the global carbon cycle is understood and quantified, as well as the key uncertainties that are the focus of current research. We will build understanding of the potential pathways, and the significant challenges, to limiting global warming to 2o C as intended by the 2015 Paris Climate Agreement. The course will begin with a brief review of climate science basics and the role of CO<sub>2</sub> in climate and climate change (weeks 1-2). In weeks 3-4, the natural reservoirs and fluxes that make up the global carbon cycle will be introduced. In week 5-6, anthropogenic emissions and

the observed changes in climate associated with increasing atmospheric CO<sub>2</sub> will be discussed. In weeks 7-11, we will learn about how the land biosphere and ocean are mitigating the increase in atmospheric CO<sub>2</sub> and the feedbacks that may substantially modify these natural sinks. In weeks 12-13, the international policy process and the potential for carbon cycle management will be the focus. In weeks 14, students will present their final projects

#### **Fall 2024: EESC GU4020**

### **EESC GU4230 CRUSTAL DEFORMATION. 3.00 points.**

Prerequisites: introductory geology and one year of calculus. Recommended preparation: higher levels of mathematics. Prerequisites: Introductory geology and one year of calculus. Recommended preparation: One semester of college physics. Introduction to the fundamental concepts of structure and deformation processes in the Earth's crust. Fundamental theories of stress and strain, rock behavior in both brittle and ductile fields, large-scale crustal contractional and extensional structures with focus on their geometries and mechanics

of formation. Introduction to the principles of earthquake mechanics with emphasis on physical processes. Laboratory sessions (part of the lecture) will cover techniques of structural analysis, recognition and interpretation of structures on geologic maps, and construction of interpretative cross sections

**Fall 2024: EESC GU4230**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**EESC GU4330 INTRO-TERRESTRIAL PALEOCLIMATE. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Given in alternate years.

Understanding the fundamental processes driving our Climate System is more important than ever. In this course, I will give an overview of the archives in which evidence of terrestrial paleoclimate is preserved, the approaches to developing and applying proxies of climate from these archives, approaches for constraining the time represented by the information, and interpretations that have been developed from such archives. Important archives to be included are ice cores, caves, wetlands, lakes, trees, and moraines. The time interval covered will be mostly the last few tens of thousands of years, and chronometers based on radiocarbon, U-series and cosmogenic nuclide dating will be presented. A particular emphasis will be put on natural climate processes and interactions that are relevant for the ongoing climate crisis and potential solutions, including a Climate Justice module toward the end of the course. The course will consist of formal lectures that alternate with recitation and discussing examples and problem solving

**Fall 2024: EESC GU4330**

**EESC GU4600 EARTH RESOURCES # SUSTAIN DEV. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: none; high school chemistry recommended.  
Prerequisites: none; high school chemistry recommended. This course is open to graduate students, and juniors and seniors within DEES, Sus Dev, Engineering, Chemistry, Physics, and APAM - or with the instructors permission. Survey of the origin and extent of mineral resources, fossil fuels, and industrial materials, that are non renewable, finite resources, and the environmental consequences of their extraction and use, using the textbook Earth Resources and the Environment, by James Craig, David Vaughan and Brian Skinner. This course will provide an overview, but will include focus on topics of current societal relevance, including estimated reserves and extraction costs for fossil fuels, geological storage of CO<sub>2</sub>, sources and

disposal methods for nuclear energy fuels, sources and future for luxury goods such as gold and diamonds, and special, rare materials used in consumer electronics (e.g. ;Coltan; mostly from Congo) and in newly emerging technologies such as superconducting magnets and rechargeable batteries (e.g. heavy rare earth elements, mostly from China). Guest lectures from economists, commodity traders and resource geologists will provide ;real world; input

**Fall 2024: EESC GU4600**

#### EESC UN3010 FIELD GEOLOGY. 3.00 points.

Fee: to be determined.

This is a field geology course focusing on the Apennine Mountains of central Italy, where a developing "accretionary prism" (associated with oceanic crust subduction) can be observed directly. Students will learn how to interpret the evolution of paleo-environments from the sediment lithologies, textures, fossils, compositions; and the tectonic history from the present day spatial and structural relationships. The rocks range from early Mesozoic oceanic crust and sediments to late Cenozoic sediments impacted by the rise of the Alps. The course visits several classic geological localities, including the Gubbio site of the discovery that the dinosaur extinction was caused by a meteorite, a Carrara Marble quarry (favored by Michelangelo for his sculptures), evaporite sediments from the dry-down of the Mediterranean, the magnificent Frassassi Cave, and effects of recent earthquakes. Priority: This course has a limited number of spaces, and enrollment requires the instructors' permission. Students interested in enrolling are instructed to contact the instructors by email. Priority is given to Columbia College and General Studies senior and junior majors and minors in the Department of Earth and Environmental Sciences, and Barnard senior and junior majors and minors in Environmental Science. Barnard students must receive permission from the Barnard Environmental Science department chair in order to receive the subsidy

#### Spring 2025: EESC UN3010

#### EESC UN3109 CLIMATE PHYSICS. 3.00 points.

This is a calculus-based treatment of climate system physics and the mechanisms of anthropogenic climate change. By the end of this course, students will understand: how solar radiation and rotating fluid dynamics determine the basic climate state, mechanisms of natural variability and change in climate, why anthropogenic climate change is occurring, and which scientific uncertainties are most important to estimates of 21st century change. This course is designed for undergraduate students

seeking a quantitative introduction to climate and climate change science. EESC V2100 (Climate Systems) is not a prerequisite, but can also be taken for credit if it is taken before this course

**Spring 2025: EESC UN3109**

**EESC UN3901 SENIOR SEMINAR. 3.00 points.**

Prerequisites: *EESC BC3800* or *EESC BC3801* and a good grounding in basic sciences.

Guided, independent, in-depth research culminating in the senior thesis in the spring. Includes discussion about scientific presentations and posters, data analysis, library research methods and scientific writing. Students review work in progress and share results through oral reports. Weekly seminar to review work in progress and share results through oral and written reports

**Fall 2024: EESC UN3901**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 3901	001/11460	Th 4:10pm - 6:00pm 405 Milbank Hall	Sidney Hemming, Spahr Webb	3.00	21/50

**Spring 2025: EESC UN3901**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 3901	001/13701	Th 4:10pm - 6:00pm 405 Milbank Hall	Sidney Hemming, Maureen Raymo	3.00	23/50

**EESC GU4009 CHEMICAL GEOLOGY. 3.00 points.**

Given in alternate years.

Prerequisites: physical chemistry or the instructor's permission. This course will examine geological problems from a standpoint of thermodynamic and kinetic theory. Theoretical thermodynamic concepts will be used to derive the crystallization depth and temperature of metamorphic and magmatic minerals, describe the solubility of volatile species in magmas, predict the composition of volcanic gas mixtures, model the nucleation and growth of crystals and bubbles in a melt and determine the chemical interaction between water and rock at the Earth's surface. Kinetic treatments on the diffusion of heat and matter through crystals and melts will be used to constrain the timing of geological processes. Recommended preparation: Knowledge of mathematics at the level of partial differential equations; mineralogy (EESC 4113); and petrology (EESC 4701); or permission of the instructor

**Spring 2025: EESC GU4009**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4009	001/13561	T Th 1:10pm - 2:25pm 506 Schermerhorn Hall	Yves Moussallam	3.00	6/25

**EESC GU4040 CLIM THERMODYN/ENERGY TRANSFER. 3.00 points.**

Given in alternate years.

Prerequisites: *EESC W4008*, advanced calculus, and general physics, or the instructor's permission.

Thermodynamics of atmospheric and oceanic processes fundamental to the climate system. Physical mechanisms of vertical energy transfer: surface fluxes, boundary layers and convection

**Spring 2025: EESC GU4040**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4040	001/13567	T Th 2:40pm - 3:55pm 558 Ext Schermerhorn Hall	Adam Sobel	3.00	5/25

**EESC GU4085 GEODYNAMICS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Given in alternate years.

Prerequisites: calculus, differential equations, introductory physics.

An introduction to how the Earth and planets work. The focus is on physical processes that control plate tectonics and the evolution of planetary interiors and surfaces; analytical descriptions of these processes; weekly physical model demonstrations

Spring 2025: EESC GU4085

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4085	001/13571	T Th 2:40pm - 3:55pm 555 Ext Schermerhorn Hall	W Buck	3.00	7/25

### **EESC GU4210 GEOPHYSICAL FLUID DYNAMICS. 3.00 points.**

Required course for M.A./Ph.D. candidates focusing in physical oceanography and atmospheric sciences. Elective for undergraduate majors in the Department of Earth and Environmental Sciences.

Prerequisites: *APMA E3101*, *APMA E3201* or equivalents and *APPH E4200* or equivalent or the instructor's permission.

Prerequisites: *APMA E3101*, *APMA E3201* or equivalents and *APPH E4200* or equivalent or the instructor's permission. Fundamental concepts in the dynamics of rotating stratified flows. Geostrophic and hydrostatic balances, potential vorticity,  $f$  and beta plane approximations, gravity and Rossby waves, geostrophic adjustment and quasigeostrophy, baroclinic and barotropic instabilities

Spring 2025: EESC GU4210

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4210	001/17430	T Th 8:40am - 9:55am 555 Ext Schermerhorn Hall	Dhruv Balwada	3.00	8/25

### **EESC GU4243 CLIMATE PREDICTION CHALLENGES WITH MACHINE LEARNING. 3.00 points.**

This course is a project-based learning (PBL) course where teams of climate science and data science students collaborate to create machine learning predictive models for challenges inspired by ongoing climate data science research. Students from different background will apply their prior knowledge, work together and teach each other in high-paced collaborative projects. Through a sequence of mini-projects, i.e., "challenges", this course provides students a deeper understanding of using machine learning for climate science and support predictive capabilities. It provides training on a broad set of practical skills for climate data science research (e.g., handling geoscience data formats, data curation, cleaning and transformation, building ML workflow, and collaboration using cloud computing resources, Git and/or GitHub). It will also offer discussions on the opportunities and challenges of using climate science and projections in decision processes. Minimal formal instruction on statistics, data science, machine

learning, or climate science will be given. Project cycles run every 4 weeks, where we will have mini-group data projects. Groups will be formed randomly with students from both climate science and data science background. Project products will be peer-reviewed, in addition to evaluation by the instructional team

Spring 2025: EESC GU4243

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4243	001/17684	T 4:10pm - 6:40pm 903 School Of Social Work	Galen McKinley	3.00	19/20

### **EESC GU4630 AIR-SEA INTERACTION. 3.00 points.**

Given in alternate years. Enrollment limited to 20. Priority based on seniority (graduate students, graduating seniors, etc.).

Prerequisites: solid background in mathematics, physics, and chemistry. Some background in fluid mechanics (as in EESC W4925/APPH E4200) or the instructor's permission. An overview of oceanic and atmospheric boundary layers including fluxes of momentum, heat, mass, (eg. moisture salt) and gases between the ocean and atmosphere; vertical distribution of energy sources and sinks at the interface including the importance of surface currents; forced upper ocean dynamics, the role of surface waves on the air-sea exchange processes and ocean mixed layer processes

Spring 2025: EESC GU4630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4630	001/14863	T Th 2:40pm - 3:55pm 417 Schermerhorn Hall	Christopher Zappa	3.00	5/25

### **EESC GU4924 INTRO TO ATMOSPHERIC CHEMISTRY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Physics W1201, Chemistry W1403, Calculus III, or equivalent or the instructor's permission. *EESC W2100* preferred.

Prerequisites: Physics W1201, Chemistry W1403, Calculus III, or equivalent or the instructor's permission. *EESC W2100* preferred. Physical and chemical processes determining atmospheric composition and the implications for climate and regional air pollution. Basics of physical chemistry relevant to the atmosphere: spectroscopy, photolysis, and reaction kinetics. Atmospheric transport of trace gas species. Atmosphere-surface-biosphere interactions. Stratospheric ozone chemistry. Tropospheric hydrocarbon chemistry and oxidizing power. Legacy effects of photochemical smog and acid rain. Current impacts of aerosol pollution and climate impacts of pollution reduction

Spring 2025: EESC GU4924

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **EESC GU4926 INTRO TO CHEMICAL OCEANOGRAPHY. 3.00 points.**

Given in alternate years.

Prerequisites: the instructor's permission for students without one year of chemistry. Course open to undergraduates with one year of chemistry. Recommended preparation: a solid background in mathematics, physics, and chemistry. Prerequisites: Recommended preparation: one year of chemistry. The course covers: Factors controlling the concentration and distribution of dissolved chemical species within the sea; the physical chemistry of seawater; ocean circulation and biogeochemical processes that interact with each other to influence the distribution and fate of elements in the ocean. The course examines in some detail the two-way interaction between marine ecosystems and their chemical environment, and the implications of these interactions for distributions in the ocean of carbon, nutrients and trace metals. Although this course does not cover specific strategies that have been proposed for marine Carbon Dioxide Removal (mCDR) and ocean storage of carbon, it will cover the basic processes and principles underlying ocean mCDR strategies

Spring 2025: EESC GU4926

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4926	001/13589	T Th 11:40am - 12:55pm 555 Ext Schermerhorn Hall	Robert Anderson	3.00	21/30

### **EESC GU4937 CENOZOIC PALEOCEANOGRAPHY. 3.00 points.**

Given in alternate years. Enrollment limited to 20 students EESC (DEES) graduate students have priority..

Prerequisites: college-level geology helpful but not required. Prerequisites: college-level geology helpful but not required. Introduces the physical, chemical and biological processes that govern how and where ocean sediments accumulate. Major topics addressed are: modes of biogenic, terrigenous and authigenic sedimentation, depositional environments, pore fluids and sediment geochemistry, diagenesis, as well as biostratigraphy and sediment stratigraphic principles and methods. Second half of the semester focuses on major events in Cenozoic paleoceanography and paleoclimatology including orbital control of climate, long-term carbon cycle, extreme climate regimes, causes of ice ages in Earth's history, human evolution, El Niño evolution, and long-term sea level history

Spring 2025: EESC GU4937

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 4937	001/13702	T Th 1:10pm - 2:25pm 603 Schermerhorn Hall	Maureen Raymo, Baerbel Hoenisch	3.00	20/30

### **EESC GR6400 COMMUNICATING EARTH # ENVIR SCI. 3.00 points.**

Communicating science well in the context of the earth and environmental sciences is critical. This science communication course will transect specific earth and environmental science disciplines to provide a foundational understanding of what it means to communicate science and how to do so effectively. Within this overarching theme of science communication, students will gain a comprehensive and holistic understanding of how to communicate earth and environmental science across a variety of formats and to a diversity of audiences. Practical outcomes include but are not limited to students learning 1) how to rationalize a research topic, 2) write a hypothesis driven proposal, 3) evaluate proposals, 4) produce clear and compelling graphics, 5) adopt the latest pedagogical approaches, and 6) present science findings to a diversity of audiences

### **EESC GR6920 DYNAMICS OF CLIMATE. 3.00 points.**

Given in alternate years.

Prerequisites: EESC W4008, and advanced calculus, or the instructor's permission.

Prerequisites: EESC GU4008, and advanced calculus, or the instructors permission. The current climate and its variations over Earth history are interpreted as consequences of fundamental physical processes, including radiative transfer, the atmosphere and ocean circulation, and the carbon cycle. Perturbations to climate, resulting from changing atmospheric composition or insolation, are examined using a combination of simple interpretative models and full Earth System Models

### **EESC GR6949 ADVANCED SEISMOLOGY I. 3.00 points.**

Given in alternate years. **Not offered during 2023-2024 academic year.**

Prerequisites: a solid background in geophysics, and a knowledge of complex variables.

Seismic waves in layered media, matrix methods, free vibrations of the Earth, dislocation theory, source mechanics

### **EESC GR9701 SEMINAR IN ADVANCED PETROLOGY. 1.00-2.00 points.**

**Not offered during 2023-2024 academic year.**

In this seminar, we will explore the interactions between volcanism and climate. From week to week, we will discuss research related to the volcano-climate interactions and address questions such as: How do volcanoes affect global climate? How do we reconstruct the climate impact of past volcanic events? How and why are mass extinction events related to supervolcano and flood basalt eruptions? Can long term changes in climate affect volcanism? The course welcomes participation from students with diverse academic backgrounds, reflecting the inherently interdisciplinary nature of the topic, which spans volcanology, atmospheric science,

paleoclimatology, geophysics, and more. The seminar will also be open to the broader Lamont community, welcoming drop-ins from all staff, postdocs and students

## EAST ASIAN LANGUAGES AND CULTURES

### THE EAST ASIAN LANGUAGES AND CULTURES DEPARTMENT:

Department website: <http://ealac.columbia.edu/>

Office location: 407 Kent Hall

Office contact: 212.854.5027

Director of Undergraduate Studies: [Lu Kou, 412 Kent, lk2950@columbia.edu]

Undergraduate Administrator: [Jennifer Petit-Day, 407 Kent, jp4567@columbia.edu]

### THE STUDY OF EAST ASIAN LANGUAGES AND CULTURES

The program in East Asian studies offers a wide range of courses in a variety of disciplines, as well as training in the Chinese, Japanese, Korean, and Tibetan languages. The program is designed to provide a coherent curriculum for undergraduates wishing to major in East Asian studies, with disciplinary specialization in anthropology, art history, economics, history, literature, philosophy, political science, sociology, or religion. The department also offers a series of introductory and thematic courses especially designed for students seeking to acquire some knowledge of East Asia as part of their broader undergraduate experience.

## STUDENT ADVISING

Information to be added

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Study Abroad Courses

East Asian Studies majors or concentrators who opt to spend the spring semester of their junior year abroad should contact the Director of Undergraduate Studies for information about course selection in the sophomore year.

Students planning to study abroad their junior year must take the required disciplinary and senior thesis-related courses in the spring of their sophomore year. Please contact the Director of Undergraduate Studies for more details.

**Through the Columbia University Center for Undergraduate Global Engagement (UGE), there are a few study abroad options available to students:**

#### The Kyoto Consortium for Japanese Studies

The Kyoto Consortium offers Columbia students the opportunity to study in Japan with a program that offers intensive instruction in the Japanese language and courses that explore a wide range of topics in Japanese studies. The program is designed to strengthen your Japanese skills through intensive language training, cultural immersion, and regular interactions with the local community and/or your host family.

#### ACADEMIC YEAR/ SEMESTER STUDY

Students should have the equivalent of two semesters (fall departure) or three semesters (spring departure) of college-level Japanese completed by the time of their departure. The program is most appropriate for the junior year, but other arrangements are considered.

### Summer Courses

#### The Kyoto Consortium for Japanese Studies SUMMER STUDY

##### Modern Japanese Track

This program is open to students in good academic standing who have completed at least one year of college-level Japanese or the equivalent. Recent graduates may also apply.

##### Classical Japanese Track

This program is open to students in good academic standing who have completed three years of college-level Japanese or the equivalent.

#### Columbia Summer in Beijing: Chinese Language Program

The Columbia Summer in Beijing: Chinese Language program offers Columbia students of all language levels (beginner to

advanced) the opportunity to study in Beijing and complete one academic year of Chinese in nine weeks through intensive courses, language exchange, drill sessions, and cultural activities.

#### Columbia Summer in Shanghai: Business Chinese

The Columbia Summer in Shanghai: Business Chinese program offers Columbia students the opportunity to learn Business Chinese through an intensive course in which students can learn the cultural behaviors, jargon, and linguistic styles used in a professional environment as well as develop their resume and interview skills for multinational businesses. Students should have the equivalent of four semesters of college-level Chinese completed before their departure.

For further information about all of the East Asian programs offered through the Columbia University Center for Undergraduate Global Engagement (UGE), please contact the assigned advisor for each program listed on the UGE website.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Thesis Coursework and Requirements

East Asian Studies majors who wish to write a senior thesis apply to the EALAC Senior Thesis Program at the end of their junior year. Students must have a minimum grade point average of 3.6 in courses taken in the major at the time of the application. Students interested in applying to the Senior Thesis Program should submit the EALAC Senior Thesis Program Application (see Undergraduate Planning Sheets and Forms). The deadline for submitting applications is usually in late April or early May. Please contact the Academic Coordinator for more information about the application process.

All potential thesis writers are required to enroll in the Senior Thesis Research Workshop (EAAS UN3999) in the fall of the senior year. Students who perform satisfactorily in this workshop, successfully complete a thesis proposal, and find a faculty adviser will then write the Senior Thesis itself in the spring semester under the direction of the adviser and a graduate student tutor (EAAS UN3901).

The senior thesis typically consists of about 30-35 pages of text (double-spaced, normal typeface and margins) and 5-8 pages of references. Under no circumstances should a thesis exceed a total of 50 pages (including references), without the special permission of the faculty adviser.

Successful completion of the thesis by the April 1 deadline in the spring semester will be necessary but not sufficient for a student to receive departmental honors. Normally no more than 10% of graduating majors receive departmental honors in a given academic year; as such, not all thesis writers will receive honors.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

In order to qualify for departmental honors, students must have a GPA of at least 3.7 in classes for the major and have submitted an honors senior thesis of distinction. The faculty of the Department of East Asian Languages and Cultures submits recommendations to the College Committee on Honors for confirmation. Normally no more than 10% of the graduating majors in the department receive departmental honors. In addition, EALAC students are eligible to receive both Latin and Phi Beta Kappa Honors conferred by Columbia College and Phi Beta Kappa inductees.

In addition, the Japanese language program awards the Keiko Chevray Award and the Mary Hue Award for Japanese language; the Korean language program awards The Center for Korean Research Manhae Prize for Korean Language; and students in the Chinese language program are eligible for the Columbia Award for Chinese Language Study.

Concentrators are not eligible for departmental honors.

## ON LEAVE (TO BE ADDED) GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Course Numbering Structure

The following are general guidelines to the numbering of department courses open to undergraduates. Students with questions about the nature of a course should consult with the instructor or the Director of Undergraduate Studies.

- 1000-level: Introductory-level undergraduate courses and first-year language courses
- 2000-level: Intermediate-level undergraduate courses and second-year language courses
- 3000-level: Advanced-level undergraduate courses and third-year language courses
- 4000-level: Advanced courses geared toward undergraduate students available to graduate students or geared toward both undergraduate and graduate students, fourth-year and above language courses

### Guidance for Transfer Students

[http://ealac.columbia.edu/wp-content/uploads/2022/09/EALAC\\_Transfer-Credit-Approval-Form.pdf](http://ealac.columbia.edu/wp-content/uploads/2022/09/EALAC_Transfer-Credit-Approval-Form.pdf)

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in East Asian Studies

*The requirements for this program were modified in the Spring 2017 semester. Students who declared an EAS major before this semester have the option of following the old or the new requirements. If you have any questions, please contact the Director of Undergraduate Studies.*

#### Prerequisite

Students must meet the following prerequisite prior to declaring the East Asian Studies major: two years of Chinese, Japanese, Korean, Tibetan, Vietnamese, or the proficiency equivalent (to be demonstrated by placement examination).

#### Language Requirement

Third-year Chinese, Japanese, Korean, Tibetan, or Vietnamese (completion of the UN3005-UN3006 level in Chinese, Japanese, or Korean; TIBT UN3611-UN3612 level in Tibetan; VIET UN3101-UN3102), or the proficiency equivalent (to be demonstrated by placement examination). Students of Chinese

may also complete UN3003-UN3004 to meet the third-year requirement.

One of the following sequences (in the target language):

CHNS UN3003 & CHNS UN3004	THIRD YEAR CHINESE I and THIRD YEAR CHINESE II
Or, for heritage students:	
CHNS UN3005 & CHNS UN3006	THIRD YEAR CHINESE W and THIRD YEAR CHINESE W II
JPNS UN3005 & JPNS UN3006	THIRD YEAR JAPANESE I and THIRD YEAR JAPANESE II
KORN UN3005 & KORN UN3006	THIRD YEAR KOREAN I and THIRD YEAR KOREAN II
TIBT UN3611 & TIBT UN3612	THIRD YEAR MOD COLLOQ TIBET I and THIRD YEAR MODERN TIBETAN II
VIET UN3101	THIRD YEAR VIETNAMESE I

Students who test out of three years or more of a language must take an additional year of that language or another East Asian language at Columbia in order to satisfy the language requirement.

### Introductory Courses

Students are required to take:

AHUM UN1400	COLLOQUIUM ON MAJOR TEXTS
Students must also select two of the following:	
ASCE UN1359	INTRO TO EAST ASIAN CIV: CHINA
ASCE UN1361	INTRO EAST ASIAN CIV: JPN
ASCE UN1363	INTRO TO EAST ASIAN CIV: KOREA
ASCE UN1365	INTRO EAST ASIAN CIV: TIBET
ASCE UN1367	INTRO EA CIV: VIETNAM

First-year students and sophomores, prior to declaring an East Asian studies major, are strongly urged to take one or more of the introductory courses.

### Methodology Course

All majors **must** take EAAS UN3990 APPROACHES TO E ASIAN STUDIES the fall of their junior year. **Please note that this course is only offered in the fall semester.**

### Elective Courses

Students must take four elective courses in East Asian studies, to be chosen in consultation with the DUS. Two of these courses must be EALAC or AMEC courses. Courses in a second East Asian language (one year minimum) or a classical East Asian language (one semester minimum) may be used to fulfill one elective course.

Please note that the following courses CANNOT be counted as an elective course. These courses can only be used to fulfill the EALAC language requirement:

- Business Chinese I/II
- Advanced Business Chinese I/II
- Media Chinese I/II
- Legal Chinese
- Japanese Pop Culture I/II

However, the following courses are NOT categorized as language courses and CAN count as an elective course:

- History of the Chinese Language
- Acquisition of Chinese as a Second Language

### Senior Thesis Program

East Asian Studies majors who wish to write a senior thesis apply to the EALAC Senior Thesis Program at the end of their junior year. Students must have a minimum grade point average of 3.6 in courses taken in the major at the time of the application. Students interested in applying to the Senior Thesis Program should submit the EALAC Senior Thesis Program Application (see [Undergraduate Planning Sheets and Forms](#)). The deadline for submitting applications is usually in late April or early May. Please contact the Academic Coordinator for more information about the application process.

All potential thesis writers are required to enroll in the Senior Thesis Research Workshop (EAAS UN3999) in the fall of the senior year. Students who perform satisfactorily in this workshop, successfully complete a thesis proposal, and find a faculty adviser will then write the Senior Thesis itself in the spring semester under the direction of the adviser and a graduate student tutor (EAAS UN3901).

The senior thesis typically consists of about 30-35 pages of text (double-spaced, normal typeface and margins) and 5-8 pages of references. Under no circumstances should a thesis exceed a total of 50 pages (including references), without the special permission of the faculty adviser.

Successful completion of the thesis by the April 1 deadline in the spring semester will be necessary but not sufficient for a student to receive departmental honors. Normally no more than 10% of graduating majors receive departmental honors in a given academic year; as such, not all thesis writers will receive honors.

---

## Minor in East Asian Studies

### Prerequisite

2 nd year level in one East Asian language.

### Language requirement

-3rd Year level in one East Asian language (typically two semesters of a 3rd year level language)

- If the student has tested out of 3rd year level in one East Asian language, then they must complete at least two full semesters of language study either at the 4th year level or above in that language, or in a second East Asian language at any level
- Alternatively, a student who has tested out may also complete one semester of an approved classical language + one additional content elective (see below for elective requirements) to fulfill this requirement

### Core requirement

AHUM UN1400 OR one of the following East Asian Civilization courses

- ASCE UN1359 (China Civ)
- ASCE UN1361 (Japan Civ)
- ASCE UN1363 (Korea Civ)
- ASCE UN1365 (Tibet Civ)
- ASCE UN1367 (Vietnam Civ)

### Elective requirement

Two EAAS courses at the 3000-level or above, or one EAAS course and one approved non-EAAS course focused on East Asia, of 3000-level or above.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in East Asian Studies

#### Prerequisite

Students must meet the following prerequisite prior to declaring the East Asian Studies concentration: two years of Chinese, Japanese, Korean, Tibetan, Vietnamese, or the proficiency equivalent (to be demonstrated by placement examination).

#### Language Requirement

Third-year Chinese, Japanese, Korean, Tibetan, or Vietnamese (completion of the UN3005-UN3006 level in Chinese, Japanese, or Korean; TIBT UN3611-UN3612 level in Tibetan; VIET UN3101-UN3102), or the proficiency equivalent (to be demonstrated by placement examination). Students of Chinese may also complete UN3003-UN3004 to meet the third-year requirement.

One of the following sequences (in the target language):

CHNS UN3003 & CHNS UN3004	THIRD YEAR CHINESE I and THIRD YEAR CHINESE II
------------------------------	---

Or, for heritage students:

CHNS UN3005 & CHNS UN3006	THIRD YEAR CHINESE W and THIRD YEAR CHINESE W II
------------------------------	--

JPNS UN3005 & JPNS UN3006	THIRD YEAR JAPANESE I and THIRD YEAR JAPANESE II
------------------------------	---

KORN UN3005 & KORN UN3006	THIRD YEAR KOREAN I and THIRD YEAR KOREAN II
------------------------------	---

TIBT UN3611 & TIBT UN3612	THIRD YEAR MOD COLLOQ TIBET I and THIRD YEAR MODERN TIBETAN II
------------------------------	---

VIET UN3101	THIRD YEAR VIETNAMESE I
-------------	-------------------------

Students who test out of a third-year level East Asian language must take either an additional year of the same language, one year of a classical East Asian language, one year of an additional East Asian language, or two electives.

### Introductory Courses

AHUM UN1400	COLLOQUIUM ON MAJOR TEXTS
-------------	------------------------------

Select one of the following:

ASCE UN1359	INTRO TO EAST ASIAN CIV: CHINA
-------------	-----------------------------------

ASCE UN1361	INTRO EAST ASIAN CIV: JPN
-------------	---------------------------

ASCE UN1363	INTRO TO EAST ASIAN CIV: KOREA
-------------	-----------------------------------

ASCE UN1365	INTRO EAST ASIAN CIV: TIBET
-------------	--------------------------------

ASCE UN1367	INTRO EA CIV: VIETNAM
-------------	-----------------------

### Electives

Students must take two courses in East Asian Studies at Columbia or Barnard at the 3000- or 4000-level, subject to approval by the DUS. Courses in a second East Asian language (one year minimum) or a classical East Asian language (one semester minimum) may be used to fulfill one elective course.

Please note that the following courses CANNOT be counted as an elective course. These courses can only be used to fulfill the EALAC language requirement:

- Business Chinese I/II
- Advanced Business Chinese I/II
- Media Chinese I/II
- Legal Chinese
- Japanese Pop Culture I/II

However, the following courses are NOT categorized as language courses and CAN count as an elective course:

- History of the Chinese Language
- Acquisition of Chinese as a Second Language

### Senior Thesis Program

Concentrators are not eligible for the Senior Thesis Program or for departmental honors.

**NOTE: Courses without scheduling information are not offered during this current semester. Please also consult the Directory of Classes for course information before emailing the contact below.**

If you have any course-related questions, please contact the EALAC Academic Coordinator.

## CONTENT COURSES

**ASCE UN1002 INTRO MAJOR TPCS: EAST ASIAN. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An interdisciplinary and topical approach to the major issues and phases of East Asian civilizations and their role in the contemporary world

**ASCE UN1359 INTRO TO EAST ASIAN CIV: CHINA. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: NOTE: Students must register for a discussion section, ASCE UN1360 The evolution of Chinese civilization from ancient times to the 20th century, with emphasis on characteristic institutions and traditions

**ASCE UN1367 INTRO EA CIV: VIETNAM. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Corequisites: ASCE UN1377

Corequisites: ASCE UN1377 This course provides a survey of Vietnamese civilization from prehistoric origins to the French colonization in the 19th century, with special emphasis on the rise and development of independent kingship over the 2nd millennium CE. We begin by exploring ethnolinguistic diversity of the Red River plain over the first millenium BCE, culminating in the material bronze culture known as the Dong Son. We then turn towards the introduction of high sinitic culture, and the region's long membership within successive Chinese empires. We pay special attention to the rise of an independent state out of the crumbling Tang Dynasty, and the specific nation-building effects of war with the Mongols and the Ming Dynasty, in the 14th and 15th centuries respectively. Our class ends with the French colonization of the region, and the dramatic cultural and intellectual transformations that were triggered as a result. Our course will interrogate Vietnamese culture as a protean object, one that is defined and redefined at virtually every level, throughout a history marked by foreign interest, influence, and invasion

**Fall 2024: ASCE UN1367**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASCE 1367	002/18922	M W 2:40pm - 3:55pm 520 Mathematics Building	John Phan	4.00	31/35

**AHUM UN1400 COLLOQUIUM ON MAJOR TEXTS. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores the core classical literature in Chinese, Japanese and Korean Humanities. The main objective of the course is to discover the meanings that these literature offer, not just for the original audience or for the respective cultures, but for us. As such, it is not a survey or a lecture-based course. Rather than being taught what meanings are to be derived from the texts, we explore meanings together, informed by in-depth reading and thorough ongoing discussion

**Fall 2024: AHUM UN1400**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**EAAS UN2342 Mythology of East Asia. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through close readings of major myths of China, Japan, and Korea, this course provides a survey of significant themes of East Asian culture. Inclusion of selected comparative readings also leads students to reconsider the nature of 'world mythology,' a field often constituted by juxtaposing Greek and Latin classics with oral texts collected during anthropological fieldwork. The core materials for this class are from ancient written traditions, but they speak with force and clarity to modern readers, as is underlined by our attention to latter-day reception and reconceptualization of these narratives. This is an introductory, discussion-based class intended for undergraduates. No prior knowledge of East Asian history or culture is required, and all course readings are in English. Satisfies the Global Core requirement.

**EAAS UN3215 KOREAN LITERATURE # FILM. 3.00 points.**

This course traces the history of Korean cinema and literature from the 1930s to the early 2000s. Particular attention is

given to colonialism, national division, war, gender relations, authoritarianism, urbanization, consumer culture, and diaspora. What kinds of familial, social, economic, and political relations do these films and literary works envision? We will link films and literary texts to their historical context, noting how representations of people, places, and ideas have changed over time—from colonialism, through poverty and malaise in the aftermath of the Korean War, to North Korea's continuing search for autonomy in the world system and South Korea's current position as global economic power and maker of the "Korean Wave."

**Spring 2025: EAAS UN3215**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3215	001/11661	W 4:10pm - 6:00pm 255 International Affairs Bldg	Theodore Hughes	3.00	16/20

**EAAS UN3217 KOREAN POPULAR CINEMA. 4.00 points.**

This course surveys modern Korean culture and society through Korean popular cinema. Drawing from weekly screenings and readings on critical film and Korean studies, we will explore major topics and defining historical moments in modern Korean history post-1945.

**Fall 2024: EAAS UN3217**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3217	001/14210	W 4:10pm - 6:00pm 253 Engineering Terrace	Theodore Hughes	4.00	20/21

**EAAS UN3310 SOCIAL PROB IN CONTEMP CHINA. 3.00 points.**

**EAAS UN3322 EAST ASIAN CINEMA. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces students to major works, genres and waves of East Asian cinema from the Silent era to the present, including films from Japan, Korea, Mainland China, Taiwan and Hong Kong. How has cinema participated in East Asian societies' distinct and shared experiences of industrial modernity, imperialism and (post)colonialism? How has cinema engaged with questions of class, gender, ethnic and language politics? In what ways has cinema facilitated transnational circulations and mobilizations of peoples and ideas, and how has it interacted with other art forms, such as theatre, painting, photography and music? In this class, we answer these questions by studying cinemas across the region side-by-side, understanding cinema as deeply embedded in the region's intertwining political, social and cultural histories and circulations of people and ideas. We cover a variety of genres such as melodrama, comedy, historical epic, sci-fi, martial arts and action, and prominent film auteurs such as Yasujiro Ozu, Akira Kurosawa, Yu Hyunmok, Chen Kaige, Hou Hsiao-hsien, and Ann Hui. As cinema is, among other things, a creative

practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects. As a global core course, this class does not assume prior knowledge of East Asian culture or of film studies

**Spring 2025: EAAS UN3322**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3322	001/11668	W 4:10pm - 6:00pm 825 Seeley W. Mudd Building	Takuya Tsunoda	4.00	46/40

**EAAS UN3338 CULTRL HIST-JAPANESE MONSTERS. 3.00 points.**

Priority is given to EALAC and History majors, as well as to those who have done previous coursework on Japan.

From Godzilla to Pokemon (literally, pocket monster) toys, Japanese monsters have become a staple commodity of late-capitalist global pop culture. This course seeks to place this phenomenon within a longer historical, as well as a broader cross-cultural, context. Through an examination of texts and images spanning over thirteen centuries of Japanese history, along with comparable productions from other cultures, students will gain an understanding not only of different conceptions and representations of monsters, ghosts, and other supernatural creatures in Japan, but also of the role of the monstrous in the cultural imagination more generally. The course draws on various media and genres of representation, ranging from written works, both literary and scholarly, to the visual arts, material culture, drama, and cinema. Readings average 100-150 pages per week. Several film and video screenings are scheduled in addition to the regular class meetings. Seating is limited, with final admission based on a written essay and other information to be submitted to the instructor before the beginning of the semester

**EAAS UN3435 Chinese Revolution, Asian Revolution, World Revolution: Revolution and Radicalism in the Long Twentieth Century. 4.00 points.**

This course examines the Chinese Revolution as a global event, one that provided new possibilities for understanding the future not only of China, but Asia and the world. In doing so, it refuses any notion of the Chinese Revolution as a merely "Chinese" event and instead marks the ways in which diverse sets of activists and revolutionaries from across Asia not only contributed towards the formation of Chinese revolutionary politics but also responded on their own terms. The Chinese Revolution thereby emerges as a truly global event and one that transformed political imagination. The course focuses largely on the responses and trajectories of Asian revolutionaries, especially from Vietnam and Japan, whose intellectual and political paths intersected with those of Chinese activists. Students can expect to work through the diverse intellectual interventions of pan-Asian diasporic communities in Japan at the beginning of the twentieth century, read interwar proletarian fiction from Chinese and Japanese authors, compare Chinese and Vietnamese conceptualizations of "people's war" as an

anti-colonial military strategy. They will emerge with a new understanding of the porousness and complexity of basic categories such as China, Asia and revolution

**EAAS UN3575 Approaching Cities and Life in Chinese Cultural History. 4.00 points.**

Italo Calvino's imagined Marco Polo cautions against commemorating the lived experience of a city, "Memory's images, once they are fixed in words, are erased." How shall we modern students of the past retrieve the ways in which foreign men and women dwelled in everyday practice? This seminar will take you on a tour of some key topoi — as both physical and literary constructs — throughout Chinese history, availing of a selection of textual, visual, and cinematic materials that shape and are shaped by the palimpsests of changing Chinese urban life

**HSEA UN3642 Peripheries of the Sinitic World through History. 3.00 points.**

This course surveys the southern and western peripheries of the political entities we today call China from the turn of the 1st millennium CE to the early 20th century. It does so primarily through translations of primary sources - travelogues and geographies- up to the 16th century, at which point it turns its attention to recently published monographs of varying breadth that can cover more ground, given the sheer number of available primary sources from that time on. No prerequisites but Introduction to East Asian Civilizations: Tibet, China, or Vietnam is recommended

**EAAS UN3710 FICTION, FILM, AND MODERN VIETNAM. 4.00 points.**

This course examines film, tv, and a variety of short fiction as vehicles for the production of Vietnamese cultural identities in the modern era

**Fall 2024: EAAS UN3710**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3710	001/15414	T 2:10pm - 4:00pm 569 Alfred Lerner Hall	Vinh Nguyen	4.00	15/15

**AHUM UN3830 COLL ON MODERN EAST ASIA TEXTS. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: *AHUM V3400* is recommended as background. Prerequisites: *AHUM UN3400* is recommended as background. Introduction to and exploration of modern East Asian literature through close reading and discussion of selected masterpieces from the 1890s through the 1990s by Chinese, Japanese, and Korean writers such as Mori Ogai, Wu Jianren, Natsume Soseki, Lu Xun, Tanizaki Jun'ichiro, Shen Congwen, Ding Ling, Eileen Chang, Yi Sang, Oe Kenzaburo, O Chong-hui, and others. Emphasis will be on cultural and intellectual issues and on how literary forms manifested, constructed, or responded to rapidly shifting experiences of modernity in East Asia

**Fall 2024: AHUM UN3830**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHUM 3830	001/17677	M 12:10pm - 2:00pm 401 Hamilton Hall	Hyoseak Choi	4.00	20/20

**HSEA UN3851 GODS, GHOSTS, AND ANCESTORS: RELIGION IN CHINESE CULTURE AND SOCIETY. 3.00 points.**

Examines the social and cultural place of Chinese religions through time, focusing on Chinese ideas of the relation between humans and spirits, and the expression of those ideas in practice. Problems will include the long-term displacement of ancestors by gods in Chinese history; the varying and changing social functions of rituals, and the different views of the same ritual taken by different participants; the growth of religious commerce from early modern times on. Topics will be organized roughly chronologically but the emphasis is on broad change rather than historical coverage

**Spring 2025: HSEA UN3851**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HSEA 3851	001/11682	W 4:10pm - 6:00pm 409 International Affairs Bldg	Robert Hymes	3.00	11/20

**HSEA UN3871 MODERN JAPAN: IMAGES # WORDS. 3.00 points.**

This course relies primarily on visual materials to familiarize students with the history of Japan from the beginning of the nineteenth century through the present. It follows a chronological order, introducing students to various realms of Japanese visual culture—from woodblock prints to film, anime, and manga—along with the historical contexts that they were shaped by, and in turn helped shape. Special attention will be paid to the visual technologies of nation-building, war, and empire; to historical interactions between Japanese and Euro-American visual culture; to the operations of still versus moving images; and to the mass production of visual commodities for the global marketplace. Students who take the course will emerge not only with a better understanding of Japan's modern historical experience, but also with a more discerning eye for the ways that images convey meaning and offer access to the past

**HSEA UN3898 THE MONGOLS IN HISTORY. 3.00 points.**  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Study of the role of the Mongols in Eurasian history, focusing on the era of the Great Mongol Empire. The roles of Chinggis and Khubilai Khan and the modern fate of the Mongols to be considered

**Spring 2025: HSEA UN3898**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HSEA 3898	001/11818	T 10:10am - 12:00pm 507 Hamilton Hall	Morris Rossabi	3.00	23/25

**EAAS UN3901 SENIOR THESIS. 3.00 points.**

Prerequisites: Senior majors only. Senior Seminar required of all majors in East Asian Studies. Open only to senior majors  
**Spring 2025: EAAS UN3901**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3901 001/11687			Daniel Penner	3.00	5/15

**EAAS UN3927 CHINA IN THE MODERN WORLD. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The rise of China has impacted world politics and economy in significant ways. How did it happen? This course introduces some unique angles of self-understanding as suggested by Chinese writers, intellectuals, and artists who have participated in the making of modern China and provided illuminating and critical analyses of their own culture, history, and the world. Readings cover a wide selection of modern Chinese fiction and poetry, autobiographical writing, photography, documentary film, artworks, and music with emphasis on the interplays of art/literature, history, and politics. Close attention is paid to the role of storytelling, the mediating powers of technology, new forms of visuality and sense experience, and the emergence of critical consciousness in response to global modernity. In the course of the semester, a number of contemporary Chinese artists, filmmakers, and writers are invited to answer students' questions. This course draws on cross-disciplinary methods from art history, film studies, anthropology, and history in approaching texts and other works. The goal is to develop critical reading skills and gain in-depth understanding of modern China and its engagement with the modern world beyond the cold war rhetoric. Our topics of discussion include historical rupture, loss and melancholy, exile, freedom, migration, social bonding and identity, capitalism, nationalism, and the world revolution. All works are read in English translation.

**Fall 2024: EAAS UN3927**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3927 001/14212		T 4:10pm - 6:00pm 522c Kent Hall	Lydia Liu	3.00	19/21

**EAAS UN3990 APPROACHES TO E ASIAN STUDIES. 4.00 points.**

Enrollment is limited to EALAC and AMEC majors and concentrators only.

This course is intended to provide a focal point for undergraduate majors in East Asian Studies. It introduces students to the analysis of particular objects of East Asian historical, literary, and cultural studies from various disciplinary perspectives. The syllabus is composed of a series of modules, each centered around an object, accompanied by readings that introduce different ways of understanding its meaning

**Fall 2024: EAAS UN3990**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3990 001/14213		T 2:10pm - 4:00pm 405 Kent Hall	Feng Li	4.00	10/15

**EAAS UN3999 RESEARCH IN EAST ASIAN STUDIES. 2.00 points.**

Introduces students to research and writing techniques and requires the preparation of a senior thesis proposal. Required for majors and concentrators in the East Asian studies major in the spring term of the junior year

**Fall 2024: EAAS UN3999**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 3999 001/16964		M 6:10pm - 8:00pm 522c Kent Hall	Daniel Penner, Lu Kou	2.00	6/15

**EARL GU4023 Women in Buddhism. 4.00 points.**

This course examines a broad array of topics related to the nature of women in Buddhism, both as presented in historical and religious texts as well as in the lives of female Buddhist practitioners. Our aim will be to consider these rules and traditions within the context of their creation as well as their subsequent use. We will also look to the words and examples of women Buddhist practitioners directly, including in modern Western Buddhism

**HSEA GU4027 ISSUES IN EARLY CHINESE CIV. 4.00 points.**

The purpose of this course is to introduce students to the basic issues and problems in the study of early Chinese civilization, some theoretical and others methodological. Through the review of a long series of debates the course offers a quick entrance both to this early period of history and to these studies. Organized around problems, the course encourages critical thinking and contesting arguments and helps the students weigh different positions addressing the problems. By doing so, the course guides the students to search for frontline questions and to probe possible ways to solve the problems. The course deals with both the written records (inscriptional and textual) and the material evidence, and the student can well expect this course to serve as also updates of the most fascinating archaeological discoveries in China made in the past decades. The course is designed as an upper-level undergraduate and MA course; therefore, it is recommended that undergraduate students should take "ASCE V2359: Introduction to East Asian Civilizations: China" before participating in this course.

**Spring 2025: HSEA GU4027**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HSEA 4027 001/11677		T 2:10pm - 4:00pm 405 Kent Hall	Feng Li	4.00	7/15

**EAAS GU4111 Modern Chinese Poetry in a Global Context. 4.00 points.**

In this course, we will take modern Chinese poetry as a crucible in which we can observe the interacting forces of literary history and social change. From diplomats who saw poetry as a medium for cultural translation between China and the world, to revolutionaries who enlisted poetry in the project of social transformation, we will examine the lives and works of some of China's most prominent poets and ask, what can we learn about modern China from reading their poetry? In addition to poems, the course will include fiction, essays, photographs, and films by both Chinese and non-Chinese artists that place our poets in a broader context; topics of discussion include national identity, revolution, translation, gender, the body, ethnicity, and technology

**EARL GU4120 CHAN/ZEN BUDDHISM. 4.00 points.**

Prerequisites: Some background in East Asian Buddhism, or instructor permission required. Zen has become a household term, but the reality behind this term is not well known. Originating in China around the 6th century C.E. the Chan/Zen tradition became one of the major Buddhist schools and rapidly spread to Korea, Japan, Vietnam (and, to a certain extent, Tibet). This course examines some aspects of this tradition, emphasizing its historical development, its mythological elements, and its multifaceted practice, which has for too long been reduced in the Western mind to meditation

**EAAS GU4122 Japanese New Wave and Cinematic Modernism. 4 points.**

This course will delve into an analytical reconsideration of postwar Japanese cinema specifically from the perspective of the Japanese New Wave. While we will aim to capture the exhilaration of the Japanese New Wave by closely analyzing existing studies on some of its key makers and their works, special attention will be given to what is left out of the category as it is conventionally understood, drawing on marginalized works and genres, such as educational and industrial films as well as pink films.

**Fall 2024: EAAS GU4122**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EAAS 4122	001/14215	M 4:10pm - 6:00pm 401 Hamilton Hall	Takuya Tsunoda	4	13/15

**EAAS GU4160 CULTURES IN COLONIAL KOREA. 3.00 points.**

This course examines the processes of colonization that played a central role in locating Korea in an integrated world in the first half of the twentieth century. We will analyze the ways in which the intersections among an array of contemporary global issues and concerns (to name a few- social Darwinism, migration, urban space, gender, sexuality, militarism, race, liberalism, socialism, capitalism) shaped the modern experience in Korea under Japanese rule (1910-1945). Our approach will be multidisciplinary. We will look, for example, at art, architecture, literature, film, philosophy, religion, and

historiography. Throughout, we will pay special attention to the place of Korea and Koreans in the expanding Japanese empire and, more broadly, in the global colonial context. Class will be held as a discussion seminar based on close reading of primary-source documents and recent scholarship.

**EAAS GU4217 CHINA ON STAGE. 4.00 points.**

This course explores how Chinese identity and society have been staged in theatre productions over the past century. Course content includes play scripts in English translation, videos, photographs, archival materials, and English-language books and articles about Chinese theater

**HSEA GU4218 Toward an intellectual history of Vietnam in the 20th century. 3.00 points.**

This course traces the transformation of Vietnamese intellectual activity in the 20th century across a number of major social and political changes, from colonialism to socialism. It considers the circulation of ideas, religion, and cultural productions in shaping intellectual thought and Vietnamese history on a larger scale

**HSEA GU4220 ISLAM IN CHINA AND INNER ASIA. 4.00 points.**

This seminar surveys the history of Islam, both in the Chinese interior and neighboring Inner Asia (primarily Xinjiang), from its arrival to the present day. Beginning with the first legendary accounts of migration from the Middle East to China, we trace the growth of an identifiable Muslim community in the age of the Mongol empire, then look at Ming China's interactions with the Islamic world, the Qing expansion into Inner Asia, and conclude by discussing modernist and nationalist trends of the twentieth-century

**EAAS GU4226 GENDER, CLASS, REAL ESTATE-CHINA. 4.00 points.**

This is a seminar for advanced undergraduates and master's degree students, which explores the socioeconomic consequences of China's development of a boom, urban residential real-estate market since the privatization of housing at the end of the 1990s. We will use the intersecting lenses of gender/sexuality, class and race/ethnicity to analyze the dramatic new inequalities created in arguably the largest and fastest accumulation of residential-real estate wealth in history. We will examine topics such as how skyrocketing home prices and state-led urbanization have created winners and losers based on gender, sexuality, class, race/ethnicity and location (hukou), as China strives to transform from a predominantly rural population to one that is 60 percent urban by 2020. We explore the vastly divergent effects of urban real-estate development on Chinese citizens, from the most marginalized communities in remote regions of Tibet and Xinjiang to hyper-wealthy investors in Manhattan. Although this course has no formal prerequisites, it assumes some basic knowledge of Chinese history. If you have never taken a course on China before, please ask me for guidance on whether or not this class is suitable for you. The syllabus is preliminary and subject to change based on breaking news events and the needs of the class

**Fall 2024: EAAS GU4226**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**EAAS GU4236 CHINA'S LONG 1980's:  
INTERROGATING THE CULTURAL POLITICS OF  
REFORM AND OPENING. 4 points.**

This course examines the experiences and legacies of China's "long 1980s" (1978-1992), a time characterized by a state-led turn from central planning to a market approach to economic and social governance, an increasing integration of China into the world economy, and the emergence of a "cultural fever" characterized by artistic experimentations at all levels of society.

**EARL GU4310 LIFE WRIT/TIBET BUDDHIST LIT. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course engages the genre of life writing in Tibetan Buddhist culture, addressing the permeable and fluid nature of this important sphere of Tibetan literature. Through Tibetan biographies, hagiographies, and autobiographies, the class will consider questions about how life-writing overlaps with religious doctrine, philosophy, and history. For comparative purposes, we will read life writing from Western (and Japanese or Chinese) authors, for instance accounts of the lives of Christian saints, raising questions about the cultural relativity of what makes up a life's story

**EARL GU4312 TIBETAN SACRED SPACE(IN  
COMPARATIVE CONT. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through interdisciplinary theoretical approaches (mostly in the fields of religion, anthropology, literature, and history), this course engages the genre of writing about sacred space in Tibetan Buddhist culture, addressing the micro (built environment) and macro (natural environment) levels of this important sphere of Tibetan literature. Through Tibetan pilgrimage accounts, place (monasteries, temples, etc) based guidebooks, geographically focused biographies, and pictorial representations of place, the class will consider questions about how place-writing overlaps with religious practice, politics, and history. For comparative purposes, we will read place based writing from Western and other Asian authors, for instance accounts of the guidebooks to and inscriptions at Christian churches, raising questions about the cultural relativity of what makes up sacred space.

**EARL GU4320 BUDDHISM AND KOREAN CULTURE. 4.00 points.**

Since Buddhism was introduced to Korea 1,600 years ago, the religion has had great impact on almost all aspects of the Korean society, making significant contributions to the distinct development of Korean culture. In this course, we will explore how Buddhism has influenced and interacted

with various fields of Korean culture such as art, architecture, literature, philosophy, politics, religions, and popular culture. Buddhist scriptures, written in classical Chinese, with their colorful imaginations, have stimulated the development of Korean literature. Buddhist art, sculpture, and architecture have also catalyzed the Korean counterparts to bloom. The sophisticated philosophy and worldview of Buddhism, along with its diverse religious practices and rituals have added richness to the spiritual life of Korean people. Buddhism also attracted a significant number of followers, often playing important roles in politics. Throughout the course, we will not only investigate the influence of Buddhism on diverse aspects of Korean culture on their forms and at their depths, but also examine the interactions between Buddhism and other religions, as well as politics. Students will learn how Korean people have formed and reformed Korean culture through the medium of Buddhism

**Fall 2024: EARL GU4320**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EARL 4320	001/14219	T 4:10pm - 6:00pm 406 Hamilton Hall	Seong-Uk Kim	4.00	5/12

**EARL GU4328 Texts, Paintings, and Images of Korean Religions. 3.00 points.**

The course explores the doctrines, practices, and rituals of Korean religions through iconic texts, paintings, and images. The texts, paintings, and images that the course covers include ghost stories, doctrinal exegeses and charts, missionary letters, polemical and apologetic writings, catechism, folklores, and ritual paintings

**Spring 2025: EARL GU4328**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**EAAS GU4334 Supernatural in Japanese Culture: Ghosts, Gods, and Animals. 4.00 points.**

Covering a period from the 7th century to the present, this class draws on Japanese literature, folklore, painting, performance, and anime, to explore the world of the supernatural, particularly the role of ghosts, gods, demons, animals, and nature. Students are introduced to various strands of popular religion, including Buddhist cosmologies and native beliefs about nature and human life, with special attention to the relationship between the living and the dead, and explore the role of human intermediaries. The course looks at these texts and media in relationship to the local community, gender, social and occupational status, environment (both natural and urban), and historical period, exploring issues of social identity and power

**EAAS GU4352 The Fantastic World of Knights-Errant in Chinese Literature. 4.00 points.**

This course approaches the Chinese knight-errant, often seen in the Kungfu films (most recently *Mulan* 2020), both as a historical fact and a literary imagination. It provides students with a broad overview of Chinese literature until the twentieth century, to familiarize students with the most prominent literary

genres of each time period, from official history to classical poetry, from classical tale to vernacular fiction, from drama to film. Through reading/viewing the knight-errant literature, we will discuss issues including translation and comparative studies, "history" writing and forming, literary genre and media, gender boundary and transgression, national and trans-national

#### **EARL GU4410 TIBETAN MONASTIC INSTITUTIONS.**

**4.00 points.**

Through interdisciplinary theoretical approaches (mostly in the fields of religion, anthropology, and history), this course examines THE key institution in Tibetan culture, namely monasteries. We will address the monastery from many different angles, from the physical infrastructure and soteriological justification to its governing documents as well as economic and educational roles

#### **EAAS GU4425 Women, Body, and Borders in Japanese Literature and Culture. 4.00 points.**

The aim of this course is to examine the interrelated concepts of body, borders, gender construction, and sexuality as expressed in Japanese literature, religion, and culture from the premodern period to the present. We will use a variety of media including oral literature, narrative fiction, noh play, early modern comic literature, novel, film, and anime

#### **EAAS GU4445 Proletarian Asia - working-class culture from 1930s to present. 4.00 points.**

From Bong Joon-ho's runaway success *Parasite*, to manga adaptations of Kobayashi Takiji's novel *The Crab Cannery Ship*, to the proliferation of Chinese migrant worker poetry, recent developments in the cultural landscape of East Asia have seen a renewed concern with the plight of workers and other sections of the oppressed under conditions of late capitalism. This course offers students the opportunity to situate these developments within an extended historical trajectory as the basis on which to think about the relation of radical histories to our present and possible future. It does so by integrating contemporary cultural texts with earlier cultural experiments that arose amidst the political turbulence of the 1930s across a range of locations in East Asia

#### **EAAS GU4520 MODERN KOREAN LIT IN TRANSLATN. 3.00 points.**

#### **EAAS GU4553 SURVEY OF TIBETAN LITERATURE. 4.00 points.**

Designed for both undergraduate and graduate students, this course introduces Tibetan belles-lettres and vernacular works (all in English translation) spanning from the imperial period to the present day. We will engage in close readings, together with discussion of the genre each text represents and its salience in current Tibetan intellectual discourse. In the final four weeks, we will read landmark works from the post-Mao period, with a view to the negotiation of traditional forms amidst the advent of new literary genres and the economics of cultural production. Questions to address include: How have Tibetan literary forms and content developed throughout history? How has the very concept of "Tibetan literature" been conceived? How have Tibetan writers and scholars—past and present—negotiated

literary innovation? Each session will consist of a brief lecture followed by discussion. Lectures will incrementally provide students with a general timeline of Tibetan literary and related historical developments, as well as biographical material regarding the authors assigned for that week. Tibetan language students and heritage learners will be offered three optional sessions to read excerpts of selected texts in Tibetan

#### **EAAS GU4558 Tibetan Science - Medicine, Knowledge, and the State on the Roof of the World. 4.00 points.**

This course aims to pose the question of what 'science' can be in Tibetan and Himalayan cultures, and to examine these 'sciences' in their social, religious, political, transnational, and inter-cultural dimensions. Especially through the field of medicine, it explores the main developments of Tibetan knowledge mostly during the modern era from the 17th century onward, building on both ethnography and primary and secondary written sources. This course pays particular attention to the relation of this knowledge to various states, centralizing institutions, and policies and practices of legitimization, and further to the modernization and globalization of the production, application, and consumption of Tibetan medical knowledge, including during the current Covid-19 pandemic

#### **EAAS GU4565 TIBET IN THE WORLD: CULTURAL PRODUCTION AND SOCIAL CHANGE. 4.00 points.**

This course explores the intersection of cultural production with national policies and global economies in the context of Tibet. We will focus not on colonial sources (Mythos Tibet) but on a wide range of representational and expressive practices by contemporary Tibetans in film, literature, music, social media, art, performance, local museums, etc. -- all since the 1990s. Tibetan cultural production today is at once localized and transnational, whether it is the vision and work of artists in the People's Republic of China or the creation of Tibetans living in the diaspora. We will explore the impact of colonialism and socioeconomic marginalization on the de-centering and re-centering of ethnicity and identity in education, publishing, and the arts. How do Tibetan artists, musicians, filmmakers, writers, comedians, and other cultural producers negotiate the complexities of modernity, secularization, globalization and political agendas, vis-à-vis incentives to preserve traditions, while engaging creatively? Each week will focus on 2 to 3 primary sources and 1 or 2 related secondary readings. Our discussions of the primary source materials (film screenings, readings, artwork, performances, etc.) will be enriched with readings in Cultural Studies, sociology, and anthropology, and by conversations with area artists

**EAAS GU4572 CHINESE DOCUMENTARY CINEMA. 4.00 points.**

What defines a “documentary” film? How do documentaries inform, provoke and move us? What formal devices and aesthetic strategies do documentaries use to construct visions of reality and proclaim them as authentic, credible and authoritative? What can documentary cinema teach us about the changing Chinese society, and about cinema as a medium for social engagement? This seminar introduces students to the aesthetics, epistemology and politics of documentary cinema in China from the 1940s to the present, with an emphasis on contemporary films produced in the past two decades. We examine how documentaries contended history, registered subaltern experiences, engaged with issues of gender, ethnicity and class, and built new communities of testimony and activism to foster social change. Besides documentaries made by Chinese filmmakers, we also include a small number of films made on China by western filmmakers, including those by Joris Ivens, Michelangelo Antonioni, Frank Capra and Carma Hinton. Topics include documentary poetics and aesthetics, evidence, performance and authenticity, the porous boundaries between documentary and fiction, and documentary ethics. As cinema is, among other things, a creative practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects

**EAAS GU4625 Socialist China in the Western Gaze (1949-1978). 4.00 points.**

This seminar attempts to historicize China’s contemporary cultural diplomacy initiatives by examining the nation’s place in the world from the 1950s to the 1970s. Topics include China’s role in the socialist world of the 1950s and 1960s, global Maoist political movements, socialist China in the imagination of Western intellectuals, Western fascination with Maoist “people’s” science, and controversies over the depiction of China in 1970s European documentary cinema

**HSEA GU4720 20TH CENTURY TIBETAN HISTORY. 4.00 points.**

This course is designed for students interested in gaining a broad view of Tibetan history in the 20th century. We will cover the institutional history of major Tibetan state institutions and their rivals in the Tibetan borderlands, as well as the relations with China, Britain, and America. Discussion sessions throughout the semester will focus on important historical issues. *Group(s): C*

**EAAS GU4730 Science and Technology in Chinese Media Cultures. 4.00 points.**

Covering a period from the late 19th century to the present, this class explores how ideas and practices in science and technology have historically entered popular imagination, social organization and political contestation, as they become mediated by various media forms and technologies such as photography, cinema, novels, television, video, internet platforms and data algorithms. In particular, we focus on how science and technology have shaped our understandings of the human body, and impacted on the various bodily experiences, from perception, cognition, to emotion and connection with others in the environment. This class helps students read media artefacts in a historically grounded and conceptually generative way, understanding media artefacts as historically conditioned, yet offering us resources for envisioning the future

**EAAS GU4777 A Thousand-Year Old Romance: Reading The Tale of Genji Across the Ages, Media, and Genres. 4.00 points.**

This course presents a synchronous and diachronous exploration of The Tale of Genji, a masterpiece of Japanese literature. During the first half of the course, students will read the entire English translation of the tale, as well as a number of other primary texts from roughly the same time period in order to gain an understanding of the sociohistorical and literary context in which the tale came about, while the second half of the course is devoted to the reception and adaptations of the tale across various media, genres, and time periods, ranging from commentaries, noh plays, traditional paintings and even “fan fiction” to modern novels and manga. The aim of the course is to provide the students with an understanding of The Tale of Genji’s place within the Japanese literary tradition, and the impact it has had and continues to exert on all facets of Japanese culture

**EAAS GU4810 WOMEN AND LITERARY CULTURE IN JAPAN. 4.00 points.**

Japan has a long tradition of highly sophisticated vernacular literature (poetry, prose fiction, essays and poetic memoirs) by aristocratic court women, particularly from the tenth- and eleventh-century, including The Tale of Genji, often considered the world’s first psychological novel. Writings by women in the early period had a deep impact on subsequent cultural production, and these vernacular writings (as well as the figure of these early women writers) acquired a new, contested significance from the end of the nineteenth century as part of the process of modern nation-building. Gender became a major organizing category in constructing discourse on literature, literary language, and literary modernity, particularly with regard to the novel. This seminar engages in close readings and discussion of selected works from the eleventh-century to twentieth-century Japan with particular attention to the genealogy of women’s writings and changing representations of women, gender, and social relations. Issues include: genre,

media, intertextuality, and literary communities; body and sexuality; and in the modern period, the “woman question” and global feminisms as well as authorship and authority. All readings are in English. Original texts will be provided for those who can read in the original

### **HSEA GU4860 SOC OF CHOSON KOREA 1392-1910.**

**4.00 points.**

Major cultural, political, social, economic and literary issues in the history of this 500-year long period. Reading and discussion of primary texts (in translation) and major scholarly works. All readings will be in English

### **HSEA GU4888 WOMEN & GENDER IN KOREAN. 4 points.**

While the rise of women's history and feminist theory in the 1960s and 1970s fostered more general reevaluations of social and cultural history in the West, such progressions have been far more modest in Korean history. To introduce one of the larger challenges in current Korean historiography, this course explores the experiences, consciousness and representations of women Korea at home and abroad from premodern times to the present. Historical studies of women and gender in Korea will be analyzed in conjunction with theories of Western women's history to encourage new methods of rethinking "patriarchy" within the Korean context. By tracing the lives of women from various socio-cultural aspects and examining the multiple interactions between the state, local community, family and individual, women's places in the family and in society, their relationships with one another and men, and the evolution of ideas about gender and sexuality throughout Korea's complicated past will be reexamined through concrete

topics with historical specificity and as many primary sources as possible. With understanding dynamics of women's lives in Korean society, this class will build an important bridge to understand the construction of New Women in early twentieth-century Korea, when women from all walks of life had to accommodate their "old-style" predecessors and transform themselves to new women, as well as the lives of contemporary Korean women. This will be very much a reading-and-discussion course. Lectures will review the readings in historical perspective and supplement them. The period to be studied ranges from the pre-modern time up to the turn of twentieth century, with special attention to the early modern period.

### **HSEA GU4891 LAW IN CHINESE HISTORY. 4.00 points.**

An introduction to major issues of concern to legal historians as viewed through the lens of Chinese legal history. Issues covered include civil and criminal law, formal and informal justice, law and the family, law and the economy, the search for law beyond state-made law and legal codes, and the question of rule of law in China. Chinese codes and court case records and other primary materials in translation will be analyzed to develop a sense of the legal system in theory and in practice

### CHNS UN1115 Accelerated First Year Chinese (W). 5.00 points.

Accelerated First Year Chinese is an introductory course for heritage Chinese language learners who have native or near-native speaking skills but have little or no knowledge of scripts system of Chinese. Students with an upbringing or long-term exposure to oral Chinese language use can take this course to develop their literacy skills and to gain a deeper understanding of the Chinese culture

### CHNS UN2201 SECOND YEAR CHINESE I. 5.00 points.

Prerequisites: One (1) year of college-level Chinese or the equivalent Texts: Experiencing China As the first half of a one-year program for intermediate Chinese learners, this course helps students consolidate and develop language skills used in everyday communication. Texts are presented in the form of dialogues and narratives that provide language situations, sentence patterns, word usage, and cultural information. This course will enable students to conduct everyday tasks such as shopping for cell phone plans, opening a bank account, seeing a doctor, or renting a place to live. At the end of the course, students will be ready to move on to the second half of the program, which focuses on aspects of Chinese culture such as the social norms of politeness and gift-giving. Semi-formal and literary styles will also be introduced as students transition to more advanced levels of Chinese language study. While providing practical training, Second Year Chinese aims to improve the student's linguistic competence in preparation for advanced studies in Mandarin

### CHNS UN2202 SECOND YEAR CHINESE II. 5.00 points.

As the second half of a one-year program for intermediate Chinese learners, this course helps students consolidate and develop everyday communicative skills in Chinese, as well as introducing aspects of Chinese culture such as the social norms of politeness and gift-giving. Semi-formal and literary styles will also be introduced as students transition to more advanced

levels of Chinese language study. While providing training for everyday communication skills, Second Year Chinese aims to improve the student's linguistic competence in preparation for advanced studies in Mandarin

**CHNS UN3003 THIRD YEAR CHINESE I. 5.00 points.**

Prerequisite: Two years of college-level Chinese (Grade B- or better), First-Year Chinese W, or the equivalent. This course is designed for students who have completed two years of college-level Chinese, one year as heritage learners, or have equivalent proficiency. It offers a comprehensive exploration of Chinese language and culture through a diverse range of content. Students will delve into topics such as Chinese mythology, historical figures, ancient philosophers, idiomatic expressions, and the art of calligraphy. The course includes the study of contemporary Chinese literature and introduces classic works like *The Story of the Three Kingdoms* and *The Dream of the Red Chamber*. Additionally, discussions on Chinese women and society will provide a sociological perspective. By enhancing linguistic skills and expanding cultural knowledge, this course equips students with the proficiency required for advanced communication in Chinese and a deeper understanding of Chinese culture

**CHNS GU4904 ACQ OF CHINESE AS A 2ND LANG. 4.00 points.**

For more than forty years, second language acquisition (SLA) has been emerging as an independent field of inquiry with its own research agenda and theoretical paradigms. The study of SLA is inherently interdisciplinary, as it draws on scholarship from the fields of linguistics, psychology, education, and sociology. This course explores how Chinese is acquired by non-native speakers. Students will learn about general phenomena and patterns during the process of acquiring a new language. They will become familiar with important core concepts, theoretical frameworks, and research practices of the field of SLA, with Chinese as the linguistic focus

**JAPANESE LANGUAGE COURSES****JPNS UN1001 INTRODUCTORY JAPANESE A. 2.50 points.**

Introductory Japanese A is an introduction to Japanese language and culture and is designed for students who have had little or no experience learning Japanese. The goal of this course is to develop four basic skills in modern Japanese with an emphasis on grammatical accuracy and socially appropriate language use. Upon successful completion of this course, students will be able to engage in basic daily conversations and to develop the ability to read and write hiragana as well as katakana. The sequence includes JPNS UN1001 Introductory Japanese A and JPNS UN1002 Introductory Japanese B. These courses combined (JPNS UN1001 and JPNS UN1002) are the equivalent to JPNS UN1101 First Year Japanese I and fulfills the requirement for admission to JPNS UN1102 First Year Japanese II

This course is designed for students who have some background in Vietnamese language, and further develops students' familiarity with the linguistic and grammatical structures of Vietnamese. Students' reading, listening, speaking and writing skills will be emphasized through dialogues, reading passages, authentic materials, listening comprehension exercises, and media clips. Students will also further study life and culture in Vietnam

**Fall 2024: VIET UN2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 2101	001/14235	M W Th 10:10am - 11:25am 4a Kraft Center	Nhu-Anh Nguyen	5.00	5/12

**VIET UN2102 SECOND YEAR VIETNAMESE II. 5.00 points.**

Fee: Language Resource Center Fee - 15

Prerequisites: VIET W1101-W1102 or the instructors permission. This course further develops students familiarity with the linguistic and grammatical structures of Vietnamese, a major language of South East Asia

**Spring 2025: VIET UN2102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 2102	001/11549	M W Th 10:10am - 11:25am 505 Lewisohn Hall	Nhu-Anh Nguyen	5.00	5/12

**VIET UN3101 THIRD YEAR VIETNAMESE I. 3.00 points.**

Prerequisites: VIET UN1101 and VIET UN1102 and VIET UN2101 and VIET UN2102 and

This course is designed for students who have completed fourth semester Vietnamese or have equivalent background of intermediate Vietnamese. The course is aimed at enhancing students' competence in reading and listening comprehension as well as the ability to present or show their knowledge of the language and various aspects of Vietnamese with the use of more advanced Vietnamese

**Fall 2024: VIET UN3101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 3101	001/14236	M W 1:10pm - 2:25pm 522d Kent Hall	Chung Nguyen	3.00	3/12

**VIET UN3102 THIRD YEAR VIETNAMESE II. 3.00 points.**

The course is aimed at enhancing students' competence in reading and listening comprehension as well as the ability to present or show their knowledge of the language and

various aspects of Vietnamese with the use of more advanced Vietnamese

**Spring 2025: VIET UN3102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 3102	001/11551	M W 1:10pm - 2:25pm 522d Kent Hall	Chung Nguyen	3.00	2/12

**VIET GU4101 MIXED ADVANCED VIETNAMESE I. 4.00 points.**

This course is designed for students who have completed six semesters of Vietnamese language class or have equivalent background of advance Vietnamese. It is aimed at developing more advance interpersonal communication skills in interpretive reading and listening as well as presentational speaking and writing at a superior level. Students are also prepared for academic, professional and literary proficiency suitable for post-secondary studies in the humanities and social sciences

**Fall 2024: VIET GU4101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 4101	001/14237	T 12:10pm - 2:00pm 405 Kent Hall	Chung Nguyen	4.00	4/12

**VIET GU4102 MIXED ADVANCED VIETNAMESE II. 4.00 points.**

This course is designed for students who have completed seven semesters of Vietnamese class or have equivalent background of advance Vietnamese. It is aimed at developing more advance interpersonal communication skills in interpretive reading and listening as well as presentational speaking and writing at a superior level. Students are also prepared for academic, professional and literary proficiency suitable for post-secondary studies in the humanities and social sciences

**Spring 2025: VIET GU4102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIET 4102	001/11552	T 12:10pm - 2:00pm 522a Kent Hall	Chung Nguyen	4.00	6/12

## THE STUDY OF ECOLOGY, EVOLUTION & ENVIRONMENTAL BIOLOGY

The Department of Ecology, Evolution & Environmental Biology (E3B) at Columbia University was established in 2001. Although we are a relatively new department, we have grown rapidly in the past decade. We now have an internationally diverse student body and a broad network of supporters at Columbia and throughout New York City. Our affiliated faculty members come from departments at Columbia as well as from the American Museum of Natural History, the New York Botanical Garden, the Wildlife Conservation Society, and the EcoHealth Alliance. Together, we provide an unparalleled breadth and depth of research opportunities for our students.

In creating E3B, Columbia University recognized that the fields of ecology, evolutionary biology, and environmental biology constitute a distinct subdivision of the biological sciences with its own set of intellectual foci, theoretical foundations, scales of analysis, and methodologies.

E3B's mission is to educate a new generation of scientists and practitioners in the theory and methods of ecology, evolution, and environmental biology. Our educational programs emphasize a multi-disciplinary perspective to understand life on Earth from the level of organisms to global processes that sustain humanity and all life.

To achieve this multi-disciplinary perspective, the department maintains close ties to over 70 faculty members beyond its central core. Thus, many faculty members who teach, advise, and train students in research are based in other departments on the Columbia campus or at the partner institutions. Through this collaboration, the department is able to tap into a broad array of scientific and intellectual resources in the greater New York City area. The academic staff covers the areas of plant and animal systematics; evolutionary and population genetics; ecosystem science; demography and population biology; behavioral and community ecology; and related fields of epidemiology, ethnobiology, public health, and environmental policy. Harnessing the expertise of this diverse faculty and the institutions of which they are a part, E3B covers a vast area of inquiry into the evolutionary, genetic, and ecological relationships among all living things.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

Program Planning for all Students

Course Numbering Structure

Guidance for First-Year Students

Guidance for Transfer Students

## UNDERGRADUATE PROGRAMS OF STUDY

The grade of D is not accepted for any course offered in fulfillment of the requirements toward the majors or concentrations.

---

### Major in Environmental Biology

The major in environmental biology requires 50 points, distributed as follows:

#### Lower Division Courses

Two terms of introductory or environmental biology such as the following:

EEEB UN2001 & EEEB UN2002	ENVIRONMENTAL BIOLOGY I and ENVIRONMENTAL BIOLOGY II
------------------------------	---

Two terms of environmental science such as the following:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

Two terms of chemistry such as the following:

CHEM UN1403  
& CHEM UN1404

GENERAL CHEMISTRY I-  
LECTURES  
and GENERAL CHEMISTRY II-  
LECTURES

One term of physics such as the following:

PHYS UN1201 GENERAL PHYSICS I

One term of statistics such as the following:

EEEB UN3005 INTRO-STAT-ECOLOGY #  
EVOL BIOL

BIOL BC2286 STATISTICS # RESEARCH  
DESIGN

STAT UN1101 INTRODUCTION TO  
STATISTICS

STAT UN1201 CALC-BASED INTRO TO  
STATISTICS

One term of calculus such as the following:

MATH UN1101 CALCULUS I

MATH UN1102 CALCULUS II

MATH UN1201 CALCULUS III

MATH UN1202 CALCULUS IV

### Upper Division Courses

Students must complete five advanced elective courses (generally 3000-level or above) satisfying the following distribution. At least one of these courses must include a laboratory component. For more information and a list of appropriate courses, contact the director of undergraduate studies.

1. Ecology, behavior, or conservation biology;
2. Evolution or genetics;
3. Morphology, physiology, or diversity;
4. Policy or economics;
5. One additional course from the preceding four groups.

Students must also complete a senior thesis, which involves completing a research internship (generally in the summer before the senior year) and completing at least one semester of the thesis research seminar, EEEB UN3991- EEEB UN3992 THESIS RESEARCH SEMINAR. Enrollment in both semesters of the seminar, starting in the spring of the junior year, is recommended.

Students planning on continuing into graduate studies in environmental biology or related fields are encouraged to take organic chemistry and genetics.

## Ecology and Evolution Track within the Environmental Biology Major

The ecology and evolution track within the environmental biology major requires 50 points, distributed as follows:

### Lower Division Courses

Two terms of introductory or environmental biology such as the following:

EEEB UN2001 ENVIRONMENTAL BIOLOGY  
& EEEB UN2002 I  
and ENVIRONMENTAL  
BIOLOGY II

Two terms of chemistry such as the following:

CHEM UN1403 GENERAL CHEMISTRY I-  
& CHEM UN1404 LECTURES  
and GENERAL CHEMISTRY II-  
LECTURES

Chemistry laboratory such as the following:

CHEM UN1500 GENERAL CHEMISTRY  
LABORATORY

Two terms of physics such as the following:

PHYS UN1201 GENERAL PHYSICS I  
& PHYS UN1202 and GENERAL PHYSICS II

One term of statistics such as the following:

EEEB UN3005 INTRO-STAT-ECOLOGY #  
EVOL BIOL

BIOL BC2286 STATISTICS # RESEARCH  
DESIGN

STAT UN1101 INTRODUCTION TO  
STATISTICS

STAT UN1201 CALC-BASED INTRO TO  
STATISTICS

Two terms of calculus, or one term of calculus and second  
advanced course in math or statistics such as the following:

MATH UN1101 CALCULUS I

MATH UN1102 CALCULUS II

MATH UN1201 CALCULUS III

MATH UN1202 CALCULUS IV

### Upper Division Courses

Students must complete five advanced elective courses (generally 3000-level or above) satisfying the following distribution. At least one of these courses must include a laboratory component. For more information and a list of appropriate courses, contact the director of undergraduate studies.

1. Three courses in ecology, evolution, conservation biology, or behavior;
2. One course in genetics. BIOL UN3031 GENETICS or BIOL BC2100 MOLECULAR # MENDELIAN GENETICS is recommended;
3. One course in morphology, physiology, or diversity.

Students must also complete a senior thesis, which involves completing a research internship (generally in the summer before the senior year) and completing at least one semester of the thesis research seminar, EEEB UN3991-EEE B UN3992 THESIS RESEARCH SEMINAR. Enrollment in both semesters of the seminar, starting in the spring of the junior year, is recommended.

Students planning on continuing into graduate studies in ecology or evolutionary biology are encouraged to take organic chemistry.

## Major in Evolutionary Biology of the Human Species

The major in evolutionary biology of the human species requires 36 points, distributed as described below.

Students must take a minimum of 20 points from approved biological anthropology courses. The additional courses may be taken in other departments with adviser approval. These include up to 6 points of introductory biology/chemistry or calculus (in any combination). Please speak with the major adviser about the extended list of courses from related areas including Biology, Psychology, Archaeology, Anthropology, Earth and Environmental Science, and Statistics that count toward this program.

For example, students interested in focusing on paleoanthropology would complement the requirements with additional courses in human evolution and morphology, evolutionary biology and theory, archaeology, genetics, and statistics. Those interested in primate behavior would supplement the requirements with classes in behavioral biology, ecology, and statistics.

### Required Courses

EEEB UN1010	HUMAN ORIGINS # EVOLUTION
EEEB UN1011	BEHAVIOR BIOL-LIVING PRIMATES

**\*\*Alternate options may be possible for all courses other than EEEB UN1010 HUMAN ORIGINS # EVOLUTION and EEEB UN1011 BEHAVIOR BIOL-LIVING PRIMATES. These will be considered on an individual basis in consultation with the major/concentration adviser.**

### Conservation Course

EEEB UN3240	Challenges and Strategies of Primate Conservation (This is the recommended conservation course but this requirement can be fulfilled with other classes such as Conservation Biology, Zoo Conservation, Ecology, Behavior and Conservation of Mammals, SEE-U in Jordan or Brazil, or other relevant offerings.)
-------------	---

### Theoretical Foundation from Archaeology

Select one course of the following: Nearly all archaeology courses (save for Rise of Civilization) can fulfill this requirement. Check with the advisor.

#### Archaeology

ANTH UN1007	THE ORIGINS OF HUMAN SOCIETY
ANTH UN2028	THINK LIKE AN ARCHAEOLOGIST
ANTH UN2031	Corpse Life: Anthropological Histories of the Dead [Previously Archaeologies of Death and
ANTH UN3823	ARCH ENGAGE: PAST IN PUB EYE

### Breadth Requirement

Select a minimum of one course from each of the three sections (may overlap seminar requirement for majors): As noted above, this is a partial listing. There are additional options for all of the categories that follow. They will be considered on an individual basis in consultation with the major/concentration adviser.

#### Human Variation/Adaptation/Genetics

EEEB UN3970	Biol Basis Of Human Variation
EEEB GU4340	HUMAN ADAPTATION
EEEB GU4700	RACE:TANGLED HIST-BIOL CONCEPT
BIOL BC2100	MOLECULAR # MENDELIAN GENETICS
BIOL GU4560	EVOL IN THE AGE OF GENOMICS

#### Primate Behavioral Biology and Ecology

EEEB UN3940	Current Controversies in Primate Behavior and Ecology
EEEB GU4015	ANIMAL COMMUN:PRIMATE PERSP
EEEB GU4134	Behavioral Ecology
EEEB GU4201	ECO, BEHAVIOR # CONSERVATION OF MAMMALS (can count for either breadth requirement or conservation requirement, but not both)
EEEB GU4350	PRIMATE SEXUALITY
EEEB GU4370	Parenting Like A Primate: The Evolution of Parental Care
BIOL BC2272	ECOLOGY
BIOL BC2280	ANIMAL BEHAVIOR
PSYC BC1119	Systems and Behavioral Neuroscience
PSYC UN2420	ANIMAL BEHAVIOR
PSYC UN2450	BEHAVIORAL NEUROSCIENCE
PSYC S2490	EVOLUTIONARY PSYCHOLOGY
PSYC BC3372	Comparative Cognition

PSYC UN3450	Evolution of Intelligence, Animal Communication, # Language
PSYC GU4242	Evolution of Language (seminar)
PSYC GU4250	Evolution of Intelligence, Cognition, and Language (Seminar)

#### Human Evolution/Morphology

EEEB UN3204	Dynamics of Human Evolution
EEEB UN3208	EXPLORATIONS IN PRIM ANATOMY
EEEB UN3215	FORENSIC OSTEOLOGY
EEEB UN3220	THE EVOL OF HUM GROWTH # DEVPT
EEEB UN3910	THE NEANDERTALS
EEEB UN3998	INDEPENDENT STUDY
EEEB GU4200	Introduction to Mammalogy
ANAT BC2573	HUMAN ANATOMY AND MOVEMENT
BIOL BC2278	EVOLUTION
BIOL UN3006	PHYSIOLOGY
BIOL UN3208	Introduction to Evolutionary Biology
BIOL UN3019	Brain Evolution
BIOL BC3360	PHYSIOLOGY

#### Seminar

Selection at least one of the following seminars. May also count toward the breadth requirement.

EEEB UN3204	Dynamics of Human Evolution
EEEB UN3910	THE NEANDERTALS
EEEB UN3940	Current Controversies in Primate Behavior and Ecology
EEEB UN3970 Biol Basis Of Human Variation	
EEEB UN3993 & EEB UN3994	EBHS SENIOR THESIS SEMINAR and EBHS SENIOR THESIS SEMINAR

Additional courses in the student's area of focus to complete the required 36 points overall including a minimum of 20 points of approved biological anthropology courses.

Students intending to pursue graduate study in this field should broaden their foundation by taking an introductory biology course (optimally either EEB UN2001 ENVIRONMENTAL BIOLOGY I or EEB UN2002 ENVIRONMENTAL BIOLOGY II) or an advanced evolution course, a genetics course, and a statistics course. We recommend that those interested in either biological anthropology or bioarchaeology take a foundation cultural anthropology course such as ANTH UN1002 THE INTERPRETATION OF CULTURE, ANTH UN2004 INTRO TO SOC # CULTURAL THEORY, ANTH UN2005 THE ETHNOGRAPHIC IMAGINATION, or ANTH UN3040 ANTHROPOLOGICAL THEORY. Students interested in forensic anthropology

should take chemistry in lieu of of biology (though the latter is recommended as a foundation course for all students). The adviser makes additional recommendations dependent on the student's area of focus.

#### Approved Biological Anthropology Courses

##### Paleoanthropology and Morphology

EEEB UN1010	HUMAN ORIGINS # EVOLUTION
EEEB UN3204	Dynamics of Human Evolution
EEEB UN3208	EXPLORATIONS IN PRIM ANATOMY
EEEB UN3215	FORENSIC OSTEOLOGY
EEEB UN3220	THE EVOL OF HUM GROWTH # DEVPT
EEEB UN3910	THE NEANDERTALS
EEEB UN3998	INDEPENDENT STUDY

##### Primate Behavioral Ecology and Evolution

EEEB UN1011	BEHAVIOR BIOL-LIVING PRIMATES
EEEB UN3940	Current Controversies in Primate Behavior and Ecology
EEEB GU4015	ANIMAL COMMUN:PRIMATE PERSP
EEEB GU4350	PRIMATE SEXUALITY
EEEB GU4370	Parenting Like A Primate: The Evolution of Parental Care

##### Human Variation

EEEB UN3970 Biol Basis Of Human Variation	
EEEB GU4340	HUMAN ADAPTATION
EEEB GU4700	RACE:TANGLED HIST-BIOL CONCEPT

##### Additional Courses

EEEB UN3240	Challenges and Strategies of Primate Conservation
EEEB UN3993 & EEB UN3994	EBHS SENIOR THESIS SEMINAR and EBHS SENIOR THESIS SEMINAR

## MINOR IN ECOLOGY, EVOLUTION, AND ENVIRONMENTAL BIOLOGY

Beginning in fall 2024 E3B is pleased to announce a new minor in Ecology, Evolution, and Environmental Biology. This minor provides both grounding in the intellectual pillars of the department while affording students the option to explore the broad scope of biodiversity, ecosystems, and environmental and evolutionary biology. Students may also delve into specific subfields such as conservation biology, botany, behavioral biology and ecology, ecosystem ecology, primatology, or human evolution. No previous biology background is required. Ideally, students will take one course by the end of their second year to see if the program is of interest, but juniors and even

seniors who develop a curiosity in the subject may complete the minor without difficulty.

Advising: Contact the Directors of Undergraduate Programs. [Matt Palmer mp2434@columbia.edu](mailto:mp2434@columbia.edu) ([mp2434@columbia.edu](mailto:mp2434@columbia.edu)) advises students who have a broad organismal/ecosystem focus corresponding to interests in the EB program; [Jill Shapiro jss19@columbia.edu](mailto:jss19@columbia.edu) advises students with a focus on human and non-human primate evolutionary biology and behavior, corresponding to the EBHS program. In addition to the program advisors, guidance as to offerings and a complete list of courses including prerequisites is available on the E3B website.

### **REQUIRED COURSES**

Minors must take one of the following four introductory courses and any other four 3-4 points E3B courses (this includes the other introductory classes).

EEEEB UN2001 Environmental Biology 1 (offered every fall)

EEEEB UN2002 Environmental Biology 2 (offered every spring)

EEEEB UN1010 Human Origins and Evolution (offered every fall)

EEEEB UN1011 Behavioral Biology of Living Primates (offered every spring)

The four introductory offerings are “gateway” classes. We recommend that students interested broadly in organismal biology/environmental biology take either Environmental Biology 1 or 2, or both. Those with a focus on human and non-human primate evolutionary biology and behavior should take either Human Origins and Evolution or Behavioral Biology of Living Primates. This will maximize the number of upper-level courses that would be open but there is still considerable flexibility. There are a small number of classes without any prerequisites and students with foundational biology courses from either Columbia or Barnard Biology may fulfill some class prerequisites\*. Advisors will provide guidance as to offerings and a complete list of courses including prerequisites is available on the E3B website.

\*BIOL2005/2006 and Barnard BIO BC1501 are similar to EEEEEB2001 (Environmental Biology 1) and may substitute this for courses requiring the latter as a prerequisite, but must take five other courses in E3B. Since the BIOL sequence does not include evolution (in contrast to EB1) we highly recommend that they take Environmental Biology 2 or one of the other foundation courses. Barnard BIO BC1500 is similar to Environmental Biology 2 and so students who have completed this can count it as having satisfied the introductory course requirement, and so can take any five courses in E3B to complete the minor.

### **COURSE OPTIONS**

UN3001 Saga of Life

UN3005 Intro Statistics Ecology and Evolutionary Biology

UN3087 Conservation Biology

UN3204 Dynamics of Human Evolution

UN3208 Explorations Primate Anatomy

UN3215 Forensic Osteology

UN3220 Evolution of Human Growth and Evolution

UN3240 Primate Conservation

UN3910 The Neandertals

UN3940 Current Controversies in Primate Behavior

UN3970 Biological Basis of Human Variation

UN3919 Trading Nature

UN3997 Independent Study

UN3998.002 Group Independent Study in Postcranial Osteology

GU4015 Animal Communication: A Primate Perspective

GU4050 Programming and Data Science Skills

GU4055 Principles and Applications in Modern DNA Sequencing

GU4065 Tropical Biology (Winter Break Course in Kenya)

GU4086 Ethnobotany

GU4100 Forest Ecology

GU4105 Intermediate Statistics for Ecology and Evolution

GU4111 Ecosystem Ecology and Global Change

GU4112 Ichthyology

GU4126 Conservation Genetics

GU4127 Disease Ecology

GU4129 Zoo Conservation

GU4134 Behavioral Ecology

GU4135 Urban Ecology and Design

GU4140 Ornithology

GU4150 Theoretical Ecology

GU4160 Landscape Ecology

GU4192 Introduction to Landscape Analysis

GU4195 Marine Conservation

- GU4200 Introduction to Mammalogy
- GU4201 Ecology, Behavior and Conservation of Mammals
- GU4210 Herpetology
- GU4340 Human Adaptation
- GU4350 Primate Sexuality
- GU4370 Parenting Like a Primate: the Evolution of Parental Care
- GU4550 Plant Ecophysiology
- GU4605 Human-Wildlife Conflict
- GU4650 Biodiversity and Ecosystem Processes
- GU4666 Insect Diversity
- GU4670 Introduction to GIS
- GU4700 Race: The Tangled History of a Biological Concept
- GU4910 Field Botany and Plant Systematics
- Summer Only:
- S1001 Biodiversity
- S1115 The Life Aquatic
- S3015 Animal Behavior Through Fieldwork

With advisor approval, students may take a maximum of two courses from a limited set taught by affiliates in other departments. For example: DEES GU4560 The Ecology of Tree line in a Changing Climate; BIOL-BC2240 Plant Evolution and Diversity; BIOL/ANAT BC2574-Laboratory in Human Anatomy; BIOL-BC2272 Ecology; and BIOL BC-3380-Applied Ecology and Evolution.

Examples of focused programs (e.g., biodiversity, botany, conservation, ecology, evolutionary biology, human evolution & morphology, primatology, zoology, etc., available on the E3B Department website <https://e3b.columbia.edu/>

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Environmental Biology

The concentration in environmental biology differs from the major in omitting calculus and physics from the lower division, requiring three advanced electives rather than five, and omitting the senior seminar with thesis project. It requires 36 points, distributed as follows:

#### Lower Division Courses

Two terms of introductory or environmental biology such as the following:

EEEB UN2001 & EEEB UN2002	ENVIRONMENTAL BIOLOGY I and ENVIRONMENTAL BIOLOGY II (or equivalents)
------------------------------	--

Two terms of environmental science such as the following:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

Two terms of chemistry such as the following:

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and GENERAL CHEMISTRY II- LECTURES
------------------------------	---

One term of statistics. Select one of the following:

EEEB UN3005	INTRO-STAT-ECOLOGY # EVOL BIOL
BIOL BC2286	STATISTICS # RESEARCH DESIGN
STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS

#### Upper Division Courses

EEEB UN3087	CONSERVATION BIOLOGY
-------------	----------------------

Two other 3000- or 4000- level courses from the advanced environmental biology courses listed for the major.

### Concentration in Evolutionary Biology of the Human Species

The concentration in evolutionary biology of the human species requires 20 points including the required introductory courses EEEB UN1010 HUMAN ORIGINS # EVOLUTION, EEEB UN1011 BEHAVIOR BIOL-LIVING PRIMATES, an approved conservation course (optimally Primate Conservation), and three courses for the breadth distribution requirements as described for the major. Students must take a minimum of 15 points from approved biological anthropology courses as described for the major (the two introductory classes count toward that total). The additional courses may be taken in other departments with adviser approval.

Concentrators do not have to complete the theoretical foundation course from archaeology or a seminar.

## Special Concentration in Environmental Science for Environmental Biology Majors

The Department of Earth and Environmental Sciences sponsors a special concentration which must be done in conjunction with the environmental biology major. Students should be aware that they must complete the environmental biology major in order to receive credit for the special concentration.

The special concentration in environmental science requires a minimum of 31.5 points, distributed as follows:

### Introductory Environmental Science (13.5 points)

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST (equivalent to EEB UN2002)

### Introductory Science (6 points)

Two courses in chemistry, physics, mathematics, or environmental biology from the supporting mathematics and science list for the environmental science major.

### Advanced Environmental Science (12 points)

Select four of the following:

EESC UN3015	The Earth's Carbon Cycle
EESC BC3017	ENVIRONMENTAL DATA ANALYSIS
EESC BC3025	HYDROLOGY
EESC GU4008	Introduction to Atmospheric Science
EESC GU4050	GLOBAL ASSMT-REMOTE SENSING
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4550	Plant Ecophysiology
EESC GU4835	Wetlands and Climate Change
EESC GU4885	CHEMISTRY OF CONTINENTAL WATERS
EESC GU4917	THE EARTH/HUMAN INTERACTIONS
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY

Advanced courses used to fulfill requirements in the environmental biology major cannot count toward requirements for the special concentration.

## Special Concentration in Environmental Biology for Environmental Science Majors

The Department of Ecology, Evolution, and Environmental Biology sponsors a special concentration which must be done in conjunction with the environmental science major. Students should be aware that they must complete the environmental science major in order to receive credit for the special concentration.

The special concentration in environmental biology requires a minimum of 39 points, distributed as follows:

### Introductory Environmental Biology and Environmental Science (17 points)

EEEB UN2001	ENVIRONMENTAL BIOLOGY I
EEEB UN2002	ENVIRONMENTAL BIOLOGY II (equivalent to EESC UN2300)
EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

### Introductory Science (13 points)

Select one of the following chemistry sequences:

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and GENERAL CHEMISTRY II- LECTURES
CHEM UN1604 & CHEM UN2507	2ND TERM GEN CHEM (INTENSIVE) and Intensive General Chemistry Laboratory

One term of statistics such as the following:

EEEB UN3005	INTRO-STAT-ECOLOGY # EVOL BIOL
BIOL BC2286	STATISTICS # RESEARCH DESIGN
STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS
EEEB UN3087	CONSERVATION BIOLOGY

### Advanced Environmental Biology (9 points)

Three additional advanced environmental biology courses (3000-level and above), each chosen from a different curricular area (evolution/genetics, ecology/behavior/conservation, anatomy/physiology/diversity, biology laboratory courses).

## FALL 2024

**EEEB UN1010 HUMAN ORIGINS # EVOLUTION. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Lab fee: \$25. Taught every fall.

This is an introductory course in human evolution. Building on a foundation of evolutionary theory, students explore primate behavioral morphology and then trace the last 65 million years of primate evolution from the earliest Paleocene forms to the fossil remains of earliest humans and human relatives. Along with Behavioral Biology of the Living Primates this serves as a core required class for the EBHS program

**Fall 2024: EEEB UN1010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEEB 1010	001/12060	M W 11:40am - 12:55pm 602 Hamilton Hall	Jill Shapiro	3.00	37/86
EEEEB 1010	AU1/18645	M W 11:40am - 12:55pm Othr Other	Jill Shapiro	3.00	6/6

**EEEEB UN1110 HUMAN ORIGINS # EVOLUTION-DISC. 0.00 points.**

**Fall 2024: EEEB UN1110**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEEB 1110	001/12061	Th 5:10pm - 6:00pm 506 Schermerhorn Hall	Jill Shapiro	0.00	17/30
EEEEB 1110	002/12062	Th 6:10pm - 7:00pm 506 Schermerhorn Hall	Jill Shapiro	0.00	9/30
EEEEB 1110	003/12063	F 12:10pm - 1:00pm 506 Schermerhorn Hall	Jill Shapiro	0.00	11/30

**EEEEB UN2001 ENVIRONMENTAL BIOLOGY I. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Introductory biology course for majors in biology or environmental biology, emphasizing the ecological and evolutionary context of modern biology

**Fall 2024: EEEB UN2001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEEB 2001	001/12064	M W 1:10pm - 2:25pm 333 Uris Hall	Andres Bendesky, Bekka Brodie	3.00	28/60

**EEEEB UN3005 INTRO-STAT-ECOLOGY # EVOL BIOL. 3.00 points.**

Prerequisites: some background in ecology, evolutionary biology, and/or statistics is recommended.

Intended for those WITHOUT prior knowledge of statistics.

Some background in ecology, evolutionary biology required.

This is an introduction to the theoretical principles and practical application of statistical methods in ecology and evolutionary biology. The course will cover the conceptual basis for a range of statistical techniques through a series of lectures using examples from the primary literature. The application of these

techniques will be taught through the use of statistical software in computer-based laboratory sessions

**Fall 2024: EEEB UN3005**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEEB 3005	001/12065	M 6:10pm - 8:00pm 330 Uris Hall	Steffen Foerster	3.00	16/35

**EEEEB UN3015 INTRO-STAT-ECOLGY/EVOL BIO-LAB. 0.00 points.**

Required Lab for EEEB UN3005. An introduction to the theoretical principles and practical application of statistical methods in ecology and evolutionary biology. The course will cover the conceptual basis for a range of statistical techniques through a series of lectures using examples from the primary literature. The application of these techniques will be taught through the use of statistical software in computer-based laboratory sessions

**Fall 2024: EEEB UN3015**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEEB 3015	001/12066	T 6:10pm - 7:25pm 425 Pupin Laboratories	Steffen Foerster	0.00	7/20
EEEEB 3015	002/12067	W 6:10pm - 7:25pm 425 Pupin Laboratories	Steffen Foerster	0.00	10/20

**EEEEB UN3991 THESIS RESEARCH SEMINAR. 3.00 points.**

Open only to seniors.

Guided, independent, indepth research experience culminating in the senior essay. Weekly meetings are held to review work in progress, to share results through oral and written reports, and to consider career options for further work in this field

**Fall 2024: EEEB UN3991**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEEB 3991	001/12068	Th 4:10pm - 6:00pm 405 Milbank Hall	Matthew Palmer	3.00	11/20

**EEEEB UN3993 EBHS SENIOR THESIS SEMINAR. 3.00 points.**

Four points for the year-long course.

Prerequisites: the instructor's permission and senior standing as a major in The Evolutionary Biology of the Human Species (EBHS).

Prerequisites: the instructor's permission and senior standing as a major or concentrator in The Evolutionary Biology of the Human Species (EBHS). Year-long seminar in which senior EBHS majors develop a research project and write a senior thesis. Regular meetings are held to discuss research and writing strategies, review work in progress, and share results through oral and written reports

**Fall 2024: EEEB UN3993**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3993	001/12069	M 4:10pm - 6:00pm	Jill Shapiro	3.00	2/8
		1015 Ext Schermerhorn Hall			

**EEEB UN3997 INDEPENDENT STUDY. 1.00-3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Students conduct research in environmental biology under supervision of a faculty mentor. The topic and scope of the research project must be approved before the student registers for the course

**Fall 2024: EEEB UN3997**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 3997	001/12070		Jill Shapiro	1.00-3.00/6	

**EEEB GU4005 Conservation Policy. 3 points.**

The purpose of this course is to arm emerging scientists with an understanding of conservation policy at the city, state, federal and international levels. Our focus will be on understanding the science that informs conservation policy, evaluating the efficacy of conservation policies for achieving conservation goals, and learning about the role that scientists play in forming policy.

**Fall 2024: EEEB GU4005**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4005	001/12071	T 10:10am - 12:00pm 1015 Ext Schermerhorn Hall	Viorel Popescu	3	21/24

**EEEB GU4065 Tropical Biology. 4.00 points.**

Study ecology, evolution, and conservation biology in one of the world's most biologically spectacular settings, the wildlife-rich savannas of Kenya. Although we will meet have a few meetings during the fall semester, the majority of the coursework will be completed during a 16 day field trip to Kenya during winter break. Students will spend their time immersed in an intensive field experience gaining sophisticated training in fieldwork and biological research. Note that there is a lab fee to cover all in-country expenses, and students are also responsible for the cost of airfare to and from Kenya

**Fall 2024: EEEB GU4065**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4065	001/12072		Dustin Rubenstein	4.00	14/14

**EEEB GU4100 FOREST ECOLOGY. 4.00 points.**

EEEB GU4100 Forest Ecology focuses on interpreting and understanding pattern and process in forested ecosystems. These ecosystems include the assemblages of trees and the biological communities and environments in which they exist. The complex interactions among the organisms and the physical environment are a major focus of this course.

The course involves lecture, literature discussion, and field laboratory components, with an emphasis on the analysis and interpretation of student-collected data. FRIDAY MEETINGS WILL RUN ALL DAY IN SEPTEMBER and OCTOBER

**Fall 2024: EEEB GU4100**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4100	001/12073	W 1:10pm - 2:25pm 1015 Ext Schermerhorn Hall	Kevin Griffin, Matthew Palmer	4.00	16/16
EEEB 4100	001/12073	F 9:00am - 1:00pm 1015 Ext Schermerhorn Hall	Kevin Griffin, Matthew Palmer	4.00	16/16

**EEEB GU4129 Zoo Conservation. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course examines the role and function of the modern zoo in the context of the modern conservation movement.

Students will learn about the evolution of the zoological park from an entertainment venue to a reservoir of rare or otherwise endangered species of animals, and as a catalyst for conservation of these species.

**Fall 2024: EEEB GU4129**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4129	001/12074	Th 6:10pm - 8:00pm 1015 Ext Schermerhorn Hall	Scott Silver	3	16/20

**EEEB GU4140 ORNITHOLOGY. 3.00 points.**Prerequisites: *EEEB W2001*, *EEEB W2002*, or equivalent.

This basic ornithology class lays the foundation for more in-depth study as it presents an overview of avian evolution, ecology, and current conservation issues.

**Fall 2024: EEEB GU4140**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4140	001/12075	Th 10:10am - 12:00pm 1015 Ext Schermerhorn Hall	Chad Seewagen, Christopher Nagy	3.00	14/15

**EEEB GU4196 Coastal Ecosystem Science and Policy. 3.00 points.**

With approximately 40% of the global population residing in coastal regions, only about 15% of Earth's coastlines remain intact. Human interactions have affected these complex and biodiverse ecosystems for thousands of years, leaving coasts vulnerable to climate change and the demands of human population increase. By understanding both the science and social behaviors behind ecosystem dynamics, policies can be put forth to mitigate current anthropogenic influences on coastal integrity. This seminar will take a multi-disciplinary in examining current issues and policies that affect coastal ecosystems around the world. To do so, the semester will be

divided into three sections. We will begin with the foundations: what defines a coastal ecosystem and how society and these environments have influenced one another. The second part of class will provide a primer on policy development and implementation. Finally, the remainder of the semester will be dedicated to the pertinent problems facing today's coastal ecosystems and the policies put forth in response. **Bulletin Description:** With approximately 40% of the global population residing in coastal regions, only about 15% of Earth's coastlines remain intact. This course provides an overview of pressing issues and key policies that impact these coastal ecosystems. We will examine the roles that science, history, and social dynamics play in developing and implementing coastal policies and management, while enhancing skills in science communication. Some background in ecology, such as EBII, is recommended but not required. Previous experience in policy is not required

**EEEB GU4350 PRIMATE SEXUALITY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (EEEB UN1010) or (EEEB UN1011)

In this course we take an integrative and comparative approach to understanding the sexual lives of primates. Focusing on mating and reproductive behavior with an explicitly evolutionary perspective, we will identify the fundamental principles of how and why selection has favored particular behaviors and morphologies in different primate species.

**Fall 2024: EEEB GU4350**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 4350	001/12077	T Th 1:10pm - 2:25pm 703 Hamilton Hall	Hoang Thach	3.00	4/20

## SPRING 2025

**EEEB UN1005 Introduction to Ecology, Evolution, and Environmental Biology. 1.00 point.**

This course provides a brief introduction to ecology, evolution and environmental biology with an emphasis on key concepts, current research, and opportunities for undergraduates. The course is taught jointly by the faculty in the department of Ecology, Evolution and Environmental Biology (E3B), with each session covering a different aspect of research and/or teaching in the department. Students are expected to complete weekly readings and participate in discussion both in class and online

**Spring 2025: EEEB UN1005**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 1005	001/14900	T 2:40pm - 3:55pm 1015 Ext Schermerhorn Hall	Matthew Palmer, Jill Shapiro	1.00	8/30

**EEEB UN1011 BEHAVIOR BIOL-LIVING PRIMATES. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Corequisite EEEB UN1111 Study of non-human primate behavior from the perspective of phylogeny, adaptation, physiology and anatomy, and life history. Focuses on the four main problems primates face: finding appropriate food, avoiding being eaten themselves, reproducing in the face of competition, and dealing with social partners. Along with Human Origins - Evolution, this serves as a core required class for the EBHS program

**Spring 2025: EEEB UN1011**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**EEEB UN2002 ENVIRONMENTAL BIOLOGY II. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: EEEB UN2001 *EEEB W2001*.

Prerequisites: EEEB UN2001 Second semester of introductory biology sequence for majors in environmental biology and environmental science, emphasizing the ecological and evolutionary aspects of biology. Also intended for those interested in an introduction to the principles of ecology and evolutionary biology

**Spring 2025: EEEB UN2002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEB 2002	001/14912	M W 11:40am - 12:55pm 833 Seeley W. Mudd Building	Matthew Palmer	4.00	10/40

**EEEB UN3087 CONSERVATION BIOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: introductory organismal biology course, ideally *EEEB W2002*.

Prerequisites: Science majors should have completed one introductory course that covers biology, ecology, evolution or conservation prior to taking this course. Non-science majors should have some exposure to these same topics but are not required to have taken courses in advance of this class

**Spring 2025: EEEB UN3087**

### EEEB UN3208 EXPLORATIONS IN PRIM ANATOMY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement  
Taught every other year. Enrollment limited to 14.

Prerequisites: *EEEB W1010* or *EEEB W1011* or the instructor's permission.

Introductory laboratory course in primate skeletal anatomy. From tarsiers to talapoin, guenons to gibbons, through hands-on expertise students explore the amazing range and diversity of the living members of this order.

Spring 2025: EEEB UN3208

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### EEEB UN3220 THE EVOL OF HUM GROWTH # DEVPT. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement  
Taught intermittently.

Prerequisites: *EEEB W1010* or *ANTH V1007* or the instructor's permission.

This course explores central issues in human growth and development from birth through senescence. Emphasis will be placed on the factors responsible for the variability in current human growth patterns as well as the evolutionary divergence of a uniquely human pattern from our closest living and fossil relatives.

Spring 2025: EEEB UN3220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### EEEB GU4050 Programming and Data Science Skills for Biologists. 3 points.

Prerequisites: One year of introductory biology or permission from the instructor

Programming and Data Science Skills for Biologists will introduce students to computational tools and concepts that are fundamental to working with large biological datasets. This will include learning core principles of a common programming language (Python, R), in addition to tools for collaboration and version control (git, github), reproducible science (jupyter, rstudio), accessing large databases (HDF5, dask), and manipulating and visualizing data. Programmatic approaches are commonly used in biology but few biologists receive formal training in applying programming languages to these tasks. This course offers a deeper understanding of computational techniques and algorithms as they apply to real

biological datasets, with particular attention to genomic, spatial, and network analyses.

**Spring 2025: EEEB GU4050**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4050	001/15010	T Th 10:10am - 11:25am 329 Uris Hall	Isaac Overcast, Deren Eaton	3	9/25

**EEEE GU4086 ETHNOBOTANY. 3.00 points.**

Priority given to students with backgrounds in ecology or plant systematics.

A survey of the relationships between people and plants in a variety of cultural settings. Sustainability of resource use, human nutrition, intellectual property rights, and field methodologies are investigated.

**Spring 2025: EEEB GU4086**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4086	001/15015	T 10:10am - 12:00pm 1015 Ext Schermerhorn Hall	Michael Balick, Alex McAlvay	3.00	27/30

**EEEE GU4105 Intermediate Statistics for Ecology and Evolutionary Biology. 3.00 points.**

This course builds on an introductory course in statistics and dives deeper into linear regression models, including generalized linear models, mixed/hierarchical models, model diagnostics, and model selection. It focuses on the practical applications of these methods rather than the mathematical complexities. A prior course or equivalent knowledge of fundamental concepts in statistics as well as familiarity with R programming are required pre-requisites for this course

**Spring 2025: EEEB GU4105**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4105	001/15017	T 6:10pm - 7:00pm 502 Northwest Corner	Steffen Foerster	3.00	6/20

**EEEE GU4192 INTRO TO LANDSCAPE ANALYSIS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: SDEV W3390 or EESC W4050 or the instructors permission. This class provides basic theory in landscape analysis and training in methods for analyzing landscapes, focusing on interpretation of satellite images. The class covers approaches and definitions in landscape analysis, data sources, land cover classification, change detection, accuracy assessment, projections of future land cover change, and techniques to interpret results of these analyses. Students will obtain hands-on experience working with data from a

landscape related to his/her research or a landscape chosen by the instructors

**Spring 2025: EEEB GU4192**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4192	001/15032	T 8:40am - 11:25am 318 Hamilton Hall	Ruth DeFries	3.00	22/25

**EEEE GU4210 HERPETOLOGY. 4.00 points.**

Prerequisites: at least one course in Introductory Biology.

The course explores the science of herpetology in three parts:

- 1) the evolution and ecology of amphibians and reptiles;
- 2) their physiological adaptations; and 3) requirements for conservation, management, policy and monitoring.

**Spring 2025: EEEB GU4210**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4210	001/15049	Th 1:10pm - 2:25pm 1015 Ext Schermerhorn Hall	Matthew Palmer	4.00	8/18
EEEE 4210	001/15049	T 1:10pm - 3:55pm 325 Pupin Laboratories	Matthew Palmer	4.00	8/18

**EEEE GU4370 Parenting Like A Primate: The Evolution of Parental Care. 3.00 points.**

Humans, like other animals, have evolved strategies of parental care, which include traits and trade-offs that enhance development and survival of offspring at the expense of parents. This course addresses questions such as: Why do we care for offspring? What physiological and genetic mechanisms underlie parental behavior? What drives variation in parental care strategies? We will analyze the diverse array of social and mating systems along with parental care strategies, focusing on primates including humans

**Spring 2025: EEEB GU4370**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4370	001/15068	T Th 10:10am - 11:25am 305 Uris Hall	Alba Lucia Morales Jimenez	3.00	13/15

**EEEE GU4450 Ethology and the Evolution of Behavior. 3.00 points.**

What are the sources and mechanisms of diversity of behavior among individuals and between species and how does behavior evolve at genetic, molecular, and neuronal levels? Readings will span an arc from an introduction to ethology and animal behavior, through studies of animal behavior in nature and in the laboratory, followed by how animals interact with their physicochemical and social environments, and ending with a perspective on the diversity and evolution of animal behavior

**Spring 2025: EEEB GU4450**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EEEE 4450	001/17784	M 2:10pm - 4:00pm	Andres Bendesky	3.00	11/15

Schermerhorn Hall

### EEEB GU4700 RACE:TANGLED HIST-BIOL CONCEPT. 4.00 points.

Enrollment limited to 15. Priority given to EBHS majors/concentrators.

From Aristotle to the 2020 US census, this course examines the history of race as a biological concept. It explores the complex relationship between the scientific study of biological differences-real, imagined, or invented and the historical and cultural factors involved in the development and expression of "racial ideas." Scientific background not required. [Additional hour for film screenings weekly in second half of the semester--attendance at films is mandatory.] Please note that this course DOES NOT fulfill the SC requirement at the College or GS.

Spring 2025: EEEB GU4700

Undergraduate Coordinator: Laura Yan, [ly38@columbia.edu](mailto:ly38@columbia.edu)

## THE STUDY OF ECONOMICS

Economics is the study of the ways in which society allocates its scarce resources among alternative uses and the consequences of these decisions. The areas of inquiry deal with a varied range of topics such as international trade, domestic and international financial systems, labor market analysis, and the study of less developed economies. Broadly speaking, the goal of an economics major is to train students to think analytically about social issues and, as such, provide a solid foundation for not only further study and careers in economics, but also for careers in law, public service, business, and related fields.

The Economics Department offers a general economics major in addition to five interdisciplinary majors structured to suit the interests and professional goals of a heterogeneous student body. All of these programs have different specific requirements but share the common structure of core theoretical courses that provide the foundation for higher-level elective courses culminating in a senior seminar. Students are urged to carefully look through the details of each of these programs and to contact an appropriate departmental advisor to discuss their particular interests.

## STUDENT ADVISING

The Department of Economics offers a variety of advising resources to provide prospective and current undergraduate majors and concentrators with the information and support needed to successfully navigate through the program. These resources are described below.

## Consulting Advisors

For answers to the most common questions that students have about the majors, the department has graduate student advisors, who are available by e-mail at [econ-advising@columbia.edu](mailto:econ-advising@columbia.edu), or during weekly office hours to meet with students.

Students should direct all questions and concerns about any economic program to the graduate student advisors either in person or via e-mail. The graduate student advisors can discuss major requirements, scheduling, and major course selection,

as well as review student checklists and discuss progress in the major. Occasionally, graduate student advisors may refer a student to someone else in the department (such as the director of undergraduate studies) or in the student's school for additional advising.

Contact information and office hours for the graduate student advisors are posted on the Advisors page [Advisors page](#) of the departmental website in the week prior to the beginning of the semester. Students considering one of the interdepartmental majors should speak to both a graduate student advisor from the Economics Department and the advisor from the other department early in the sophomore year.

### Faculty Advisors

Faculty advisors are available only to declared majors. They are able to discuss students' academic and career goals, both in terms of the undergraduate career and post-graduate degrees and research. Students wishing to discuss these types of substantive topics may request a faculty advisor by completing the google form available on the [Advisors page](#) of the departmental website.

The department does its best to match students with faculty members that share similar academic interests. While faculty advisors do not discuss major requirements—that is the role of the graduate student advisors—they do provide guidance in course selection as it relates to meeting a student's intellectual goals and interests, as well as advise on career and research options. It is recommended that students who plan on attending a Ph.D. program in economics or are interested in pursuing economics research after graduation request a faculty advisor.

## Enrolling in Classes

### Prerequisites

The Department strictly enforces all course prerequisites. Prerequisite courses cannot be taken concurrently with or after the course—they must be taken before the course. Students who take a course out of sequence (before or concurrently with its prerequisites) will not be allowed to count those credits towards the completion of their major, and consequently will be required to take an additional course to replace those credits. For placement in the calculus sequence, please consult the Math department's section of the Bulletin. The list of Prerequisites for Econ courses can be found on the [Course Prerequisites](#) page of the Dept. website.

### Registration for Restricted Classes

Most lecture courses are open to online Registration. However, Seminars, Research Courses, Independent Study and Corporate Finance are restricted. Information regarding Seminar Registration can be found on the [Senior Seminar Registration](#) page. Registration information for Research Course credit, Independent Study and Corporate Finance can be found on the [Registration Information](#) page.

## Preparing for Graduate Study

On the [Preparing for Graduate School](#) page on our website, you will find general advice for students thinking about pursuing a PhD in economics. All students who are considering graduate work should review the material posted there. Since graduate work requires more mathematical and statistical training than the economics major, students interested in graduate work should speak with econ-advising about planning their course schedule.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

AP tests must be taken in both microeconomics and macroeconomics, with a score of 5 on one test and at least a 4 on the other. Provided that this is achieved, the department grants 4 credits for a score of 4 and 5 on the AP Economics exam along with exemption from [ECON UN1105 PRINCIPLES OF ECONOMICS](#).

### IB Credit or GCE A Level Exams

If you took the IB Exam and received either a 6 or a 7 or if you took GCE A Level Exams and received an A or a B, then you will receive credit from the college. Those credits will automatically exempt you from the Principles requirement.

## Barnard College Courses

Barnard Economics Core Courses and seminars do NOT count towards the Columbia Economics Major or concentration. Specifically, the following courses will NOT count toward your major program:

[ECON BC1003](#), [ECON BC1007](#), [ECON BC2411](#), [ECON BC3018](#), [ECON BC3033](#), [ECON BC3035](#).

The Barnard courses listed below will count as Electives toward your Economics Major provided you have completed the course prerequisites, have not taken an equivalent course in the Columbia Department, and have fulfilled the minimum requirement of taking 5 lecture courses in the Columbia Department.

### Economics (Barnard)

ECON BC2010	The Economics of Gender
ECON BC2012	Economic History of Western Europe
ECON BC2017	INTRODUCTION TO HEALTH ECONOMICS
ECON BC2020	Introduction to Development Economics
ECON BC2075	Logic and Limits of Economic Justice
ECON BC2224	CODING MARKETS
ECON BC3010	American Wellbeing
ECON BC3011	INEQUALITY AND POVERTY

ECON BC3012	THE ECONOMICS OF EDUCATION
ECON BC3013	Economic History of the United States
ECON BC3014	Entrepreneurship
ECON BC3017	Economics of Business Organization
ECON BC3019	LABOR ECONOMICS
ECON BC3027	Economics of Inequality
ECON BC3022	Economic History of Europe
ECON BC3023	Topics in Economic History
ECON BC3024	MIGRATION # ECONOMIC CHANGE
ECON BC3026	Economics of the Public Sector
ECON BC3029	EMPIRICAL APPROACHES DEVLPMNT
ECON BC3031	Economics of Life
ECON BC3038	INTERNATIONAL MONEY # FINANCE
ECON BC3039	Environmental and Natural Resource Economics
ECON BC3041	THEORETICAL FOUNDATIONS- POLIT ECON
ECON BC3045	BUSINESS CYCLES
ECON BC3047	International Trade
ECON BC3049	Economic Evaluation of Social Programs
ECON BC3270	Topics in Money and Finance
ECON UN3025	FINANCIAL ECONOMICS
ECON UN3265	MONEY AND BANKING

**NOTES:**

1) ECON UN2261 Accounting and Finance for Economics does NOT count as an economics elective. Financial Economics majors may take this course to fulfill their accounting requirement.

2) The above list is not necessarily complete. Barnard Department on occasion adds new lecture courses. If you have a question about a Barnard elective course not listed above, then you should contact econ-advising@columbia.edu.

**Transfer Courses**

Any courses taken outside of the Economics Departments at Columbia or Barnard that you would like to apply towards the completion of your economics degree must be approved by the Department of Economics in addition to approval by your school. All majors and joint majors are required to take a minimum of 5 lecture courses from the Columbia Department of Economics and must take their senior seminar at Columbia.

See the [Transfer Credit Information](#) page for details on which courses may be eligible for transfer credit, as well as information on how to apply for transfer credit. Please read

the information carefully before submitting your materials for review.

**Study Abroad Courses**

All students who plan to study abroad must contact Sunil Gulati during the prior semester to get preliminary approval for any economics courses that they intend to take abroad. Students should also review the information posted on the [Transfer Credit Information](#) page for details regarding which courses may be eligible.

**Summer Courses**

All students who hope to take classes in the Summer outside of Columbia University must also contact Sunil Gulati in advance to get preliminary approval for any economics courses. Note that students must also have approval from their school to take Summer courses outside of Columbia.

**UNDERGRADUATE RESEARCH AND SENIOR THESIS****Undergraduate Research in Courses**

All majors write a research paper in either a senior seminar or in the honors seminar. Each semester the department offers a wide range of senior seminars (see [Senior Seminar Descriptions](#) for the seminars currently on offer). Seminars are small, discussion-based courses focused on a research topic in economics. Students are expected to attend and participate in these courses, as well as to write an original research paper. Registration information for senior seminars is available on the [Senior Seminar Registration](#) page. Some students will write a senior thesis in the Honors Seminar. Details about writing a senior thesis are below.

**Senior Thesis Coursework and Requirements  
SENIOR HONORS THESIS****Honors Seminar**

The honors seminar is a full-year course, and you will not receive a grade until you have completed both semesters. Completing both semesters satisfies your seminar requirement in the economics department. If you do not complete both semesters, however, you must take a senior seminar to graduate as a major. For details see the Senior Honors Thesis info on the [Honors and Prizes](#) page.

Students who successfully complete the Honors Seminar are eligible to graduate with departmental honors in economics.

**Undergraduate Research Outside of Courses**

During the academic year, students may work as an RA with a faculty member or PhD student and receive 1 – 2 credits of either ECON GU4996 Research Credit or ECON GU4995 Research Credit (GU 4995 is for GS students only). Research positions typically entail an average of 3 hours of work per

week per credit. Research credit may not be used as a substitute for elective or seminar requirements in the major and students will receive a letter grade for their work. Students considering graduate work or writing a senior thesis in economics should take one or more RA positions during their time at Columbia. Information on Research Credit (GU4995 and GU4996) is posted on the [Opportunities](#) page. Available RA positions are posted every semester on our WIKI page, [Econ Info For Students](#) (log-in required).

## DEPARTMENT HONORS AND PRIZES

### Departmental Honors

Economics majors and economics joint majors who wish to be considered for departmental honors in economics must:

1. Have at least a 3.7 GPA in their major courses;
2. Take ECON GU4999 Senior Honors Thesis Workshop (a one-year course);
3. Receive at least a grade of A- in ECON GU4999 Senior Honors Thesis Workshop.

Students must apply for admission to GU4999 and details regarding that application are included in the annual Summer Mailing sent to all students with a declared program in economics. Please note that ECON GU4999 Senior Honors Thesis Workshop may be taken to fulfill the seminar requirement for the economics major and all economics joint majors. Normally no more than 10% of graduating majors receive departmental honors in a given academic year. Please see the [Honors and Prizes](#) page on the department's website for more information.

### Undergraduate Prizes

All prize recipients are announced at the end of the spring semester each academic year.

#### Sanford S. Parker Prize

Established in 1980, this prize is awarded annually to a Columbia College graduating student who majored or concentrated in economics and plans on continuing his or her studies in an economics Ph.D. program within the two years following his or her graduation.

#### Romine Prize

Established in 1997, this prize is awarded annually to two students (Columbia College or General Studies) majoring in economics: one for the best honors thesis paper, and the other for the best economics seminar paper.

#### Summer Research Prizes

#### *Parker Summer Research Fellowship*

The Parker Summer Fellowship provides financial support for five Columbia College underclassmen who take unpaid summer internships that focus on research. Preference is given to students working with Columbia researchers but all CC students undertaking a summer research position are eligible to apply.

#### *GS Prize for Summer Research*

The GS Summer Fellowship provides financial support for 2 GS underclassmen who take unpaid summer internships that focus on research. Preference is given to students working with Columbia researchers but all GS students undertaking a summer research position are eligible to apply.

## OTHER IMPORTANT INFORMATION

### Online Information

Students can access useful information online, including but not limited to: a comprehensive FAQ page; transfer credit information; sample programs and checklists; faculty office hours, contact information and fields of specialization; advisor contact information; teaching and research assistant opportunities; a list of tutors; and current course offerings.

Posted on our [Announcements](#) page are links to the most important memos that we distribute to our majors including pre-registration mailings, the summer mailing and information for new majors. Our [WIKI](#) page has information about opportunities both inside and outside of the department. Login is required to access the WIKI page.

### Frequently Asked Questions

As a first step, students are encouraged to visit the Dept.'s [FAQ page](#), which provides comprehensive information and answers to the most frequently-asked questions about the departmental majors and requirements. This page also includes a section that answers specific questions of first-year students, sophomores, and non-majors.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

There are a number of resources to assist you in planning your program in economics.

- [Checklists](#) for all programs are available on our website.
- [Econ-advising](#) is available to assist all students with academic planning. They can be reached by email or in person during their office hours.
- Tentative annual course offerings are posted on the [website](#) and in departmental newsletters.
- Information for new students is posted on the [Academic Resources Fair](#) page.

## Course Numbering Structure

All economics programs begin with an introductory 1000 level course (Principles of Economics) and progress through the required 3000 level required core economics courses (Intermediate Micro, Intermediate Macro and Econometrics). Most elective courses are offered at the 3000 and 4000 level and all require that students have completed at least UN 3211 Int Micro and UN 3213 Int Macro. The department offers a limited number of 2000 level electives and these courses only require that students have completed Principles of Economics.

## Guidance for First-Year Students

Our [Academic Resources Fair](#) page has answers to the most common questions of new students at Columbia. On that page you will find information about advising, placement, course planning, opportunities in the department and much more. If you are interested in pursuing economics, then it is strongly

recommended that you read through the information posted here.

## Guidance for Transfer Students

Our [Academic Resources Fair](#) page has answers to the most common questions of transfer students at Columbia. On that page you will find information about advising, placement, course planning, opportunities in the department and much more. If you are interested in pursuing economics, then it is strongly recommended that you read through the information posted here.

The [Transfer Credit](#) page has all of the information that you will need to apply for transfer credits for economics courses that you have taken elsewhere. Note that the economics department will also review your transfer credits for calculus I, statistics and accounting courses. Details about all of these courses are also posted at Transfer Credit Information.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

#### Checklists and Requirements

Checklists and Requirement information are available on the [Department website](#).

#### Economics Core Courses

**All** of the core courses must be completed **no later than the spring semester** of the student's **junior year** and must be taken at Columbia. *Students who take any core course during the fall semester of their senior year must obtain written permission from the department's director of undergraduate studies.* Unless otherwise specified below, all students must complete the following core courses:

ECON UN1105	PRINCIPLES OF ECONOMICS
ECON UN3211	INTERMEDIATE MICROECONOMICS
ECON UN3213	INTERMEDIATE MACROECONOMICS
ECON UN3412	INTRODUCTION TO ECONOMETRICS

#### Prerequisites

Course prerequisites are strictly enforced. Prerequisites must be taken before the course, not after or concurrently.

Economics courses taken before the completion of any of its prerequisites, even with instructor approval, are **not** counted toward the major, concentration, or interdepartmental majors. Exemptions from a prerequisite requirement may only be made, in writing, by the department's director of undergraduate studies. Credits from a course taken *prior* to

the completion of its prerequisites are **not** counted towards the major requirements. As a consequence, students are required to complete **additional**, specific courses in economics at the direction of the director of undergraduate studies.

The prerequisites for required courses are as follows:

Course	Prerequisites
ECON UN1105 PRINCIPLES OF ECONOMICS	None
MATH UN1101 CALCULUS I	
STAT UN1201 CALC-BASED INTRO TO STATISTICS	MATH UN1101 CALCULUS I
ECON UN3211 INTERMEDIATE MICROECONOMICS	ECON UN1105 PRINCIPLES OF ECONOMICS MATH UN1201 CALCULUS III or UN1205
ECON UN3213 INTERMEDIATE MACROECONOMICS	ECON UN1105 PRINCIPLES OF ECONOMICS MATH UN1101 CALCULUS I Co-requisite: MATH UN1201 CALCULUS III or UN1205
ECON UN3412 INTRODUCTION TO ECONOMETRICS	MATH UN1201 CALCULUS III or UN1205 ECON UN3211 INTERMEDIATE MICROECONOMICS or UN3213 STAT UN1201 CALC-BASED INTRO TO STATISTICS
ECON 2000-level electives	ECON UN1105 PRINCIPLES OF ECONOMICS
ECON GU4211 ADVANCED MICROECONOMICS	ECON UN3211 INTERMEDIATE MICROECONOMICS ECON UN3213 INTERMEDIATE MACROECONOMICS MATH UN2010 LINEAR ALGEBRA Corequisites: MATH UN2500 ANALYSIS AND OPTIMIZATION or GU4061
ECON GU4412 ADVANCED ECONOMETRICS	ECON UN3211 INTERMEDIATE MICROECONOMICS
ECON GU4213 ADVANCED MACROECONOMICS	ECON UN3213 INTERMEDIATE MACROECONOMICS
ECON GU4413 Econometrics of Time Series and Forecasting	ECON UN3412 INTRODUCTION TO ECONOMETRICS MATH UN2010 LINEAR ALGEBRA

ECON UN3025 FINANCIAL ECONOMICS	ECON UN3211 INTERMEDIATE MICROECONOMICS	ECPS GU4950 ECONOMICS # PHILOSOPHY	ECON UN3211 INTERMEDIATE MICROECONOMICS
ECON GU4020 ECON OF UNCERTAINTY # INFORMTN	ECON UN3213 INTERMEDIATE MACROECONOMICS		ECON UN3213 INTERMEDIATE MACROECONOMICS
ECON GU4230 ECONOMICS OF NEW YORK CITY	STAT UN1201 CALC-BASED INTRO TO STATISTICS	Barnard electives	ECON UN3412 INTRODUCTION TO ECONOMETRICS
ECON GU4260 MARKET DESIGN			See Barnard bulletin
ECON GU4280 CORPORATE FINANCE			
ECON GU4370 POLITICAL ECONOMY			
ECON GU4700 FINANCIAL CRISES			
ECON GU4710 FINANCE AND THE REAL ECONOMY			
ECON GU4850 COGNITIVE MECH # ECON BEHAVIOR			
ECON GU4860 BEHAVIORAL FINANCE	ECON UN3211 INTERMEDIATE MICROECONOMICS		
	ECON UN3213 INTERMEDIATE MACROECONOMICS		
	ECON UN3412 INTRODUCTION TO ECONOMETRICS (Co-requisite)		
All other ECON 3000- and 4000-level electives	ECON UN3211 INTERMEDIATE MICROECONOMICS		
	ECON UN3213 INTERMEDIATE MACROECONOMICS		
ECON UN3901 ECONOMICS OF EDUCATION	ECON UN3211 INTERMEDIATE MICROECONOMICS		
ECON UN3952 MACROECONOMICS #FORMATION OF EXPECTATIONS	ECON UN3213 INTERMEDIATE MACROECONOMICS		
ECON UN3981 APPLIED ECONOMETRICS	ECON UN3412 INTRODUCTION TO ECONOMETRICS		
ECON GU4911 MICROECONOMICS SEMINAR			
ECON GU4913 MACROECONOMICS SEMINAR			
ECON GU4918 SEMINAR IN ECONOMETRICS			
ECPS GU4921 SEMINAR IN POLITICAL ECONOMICS	ECON UN3211 INTERMEDIATE MICROECONOMICS		
	ECON UN3213 INTERMEDIATE MACROECONOMICS		
	ECON UN3412 INTRODUCTION TO ECONOMETRICS		
	ECON GU4370 POLITICAL ECONOMY		

It is **strongly recommended** that students take ECON UN3412 INTRODUCTION TO ECONOMETRICS in the semester **immediately** following the completion of the statistics course.

### Grading

No course with a grade of D or lower, including calculus and statistics courses, can count toward the major, concentration, or interdepartmental majors. Economics core courses with a grade of D or F must be retaken and completed with a grade of C- or better.

Students who receive a grade of D or F in a core course are permitted to take a higher-level elective course that has that core course as a prerequisite, so long as it is taken concurrently with the retaking of that core course. For example, if a student fails ECON UN3211 INTERMEDIATE MICROECONOMICS, the student must retake it and, in the same semester, may enroll in an elective course for which it is a prerequisite, provided that all other prerequisites for the elective have been completed. The same rule applies to the required math and statistics courses. For example, if a student fails *MATH UN1201 CALCULUS III*, the student may retake calculus III concurrently with *Intermediate Microeconomics*. Students who must retake any core economics or math course may not retake it concurrently with a senior seminar; the economics core courses *ECON UN3211 INTERMEDIATE MICROECONOMICS*, *ECON UN3213 INTERMEDIATE MACROECONOMICS*, and *ECON UN3412 INTRODUCTION TO ECONOMETRICS* must be successfully completed before a student may enroll in a seminar.

A grade of W is not equivalent to a grade of D or F; it does not qualify a student to retake the course concurrently with a higher level course that lists the course as a prerequisite. Students who receive a grade of W in a core course must complete the course with a grade of C- or better before taking a course that lists it as a prerequisite.

Only ECON UN1105 PRINCIPLES OF ECONOMICS may be taken for a grade of Pass/D/Fail, and the student must receive a grade of P for it to count towards the requirements for the major, concentration, or interdepartmental majors.

### Economics Electives

Only those courses identified in the Economics Department listings in this Bulletin may be taken for elective credit. All 3000-level or higher electives offered by the Economics Department have ECON UN3211 INTERMEDIATE MICROECONOMICS and ECON UN3213 INTERMEDIATE

MACROECONOMICS as prerequisites. However, some electives have additional prerequisites and students should ensure that all prerequisites have been completed (see the table of prerequisites printed above). *Seminars do not count as electives.*

### Seminars

Seminars can be taken only after all of the required core courses in economics have been successfully completed. Students may not take or re-take ECON UN3211 INTERMEDIATE MICROECONOMICS, ECON UN3213 INTERMEDIATE MACROECONOMICS, or ECON UN3412 INTRODUCTION TO ECONOMETRICS concurrently with any senior seminar. *Seminars do not count as electives.* Each seminar is limited to sixteen students, with priority given to seniors. For ECPS GU4921 SEMINAR IN POLITICAL ECONOMICS and ECPH GU4950 ECONOMICS # PHILOSOPHY, priority is given to economics-political science and economics-philosophy majors, respectively.

For seminar registration details, read the information posted on the department's *Senior Seminar Registration* page: <http://econ.columbia.edu/senior-seminars-registration>.

### Mathematics

Students must consult with the Mathematics Department for the appropriate placement in the calculus sequence. Students must complete one of the following sequences:

Select one of the following sequences:

MATH UN1101 & MATH UN1201	CALCULUS I and CALCULUS III
MATH UN1101 & MATH UN1205	CALCULUS I and ACCELERATED MULTIVARIABLE CALC
MATH UN1207 & MATH UN1208	HONORS MATHEMATICS A and HONORS MATHEMATICS B

In addition:

1. Students who receive a grade of D or F in MATH UN1201 CALCULUS III or MATH UN1205 must retake the course, but may enroll in ECON UN3211 INTERMEDIATE MICROECONOMICS.
2. Students who receive a grade of D or F in MATH UN1207 HONORS MATHEMATICS A may either retake the course, or take MATH UN1201 CALCULUS III or MATH UN1205, and enroll in ECON UN3211 INTERMEDIATE MICROECONOMICS concurrently.

### Statistics

Unless otherwise specified below, all students must take STAT UN1201 CALC-BASED INTRO TO STATISTICS, or a higher level course, such as STAT GU4204 STATISTICAL INFERENCE, or STAT GU4001.

### Barnard Courses

A limited number of Barnard economics electives may count toward the major, concentration, and interdepartmental majors. Students should pay careful attention to the limit of Barnard electives indicated in their program requirements. Please see the *Transfer Credit* section below for information on the number of Barnard electives that may be taken to fulfill major requirements. In addition, students may receive credit for the major, concentration, and interdepartmental majors only for those Barnard economics courses listed in this Bulletin. However, students may not receive credit for two courses whose content overlaps. Barnard and Columbia economics electives with overlapping content include but are not limited to:

ECON BC3029 & ECON GU4321	EMPIRICAL APPROACHES DEVLPMNT and ECONOMIC DEVELOPMENT
------------------------------	---

ECON BC3038 & ECON GU4505	INTERNATIONAL MONEY # FINANCE and INTERNATIONAL MACROECONOMICS
------------------------------	---

ECON BC3019 & ECON GU4400	LABOR ECONOMICS and LABOR ECONOMICS
------------------------------	--

ECON BC3047 & ECON GU4500	International Trade and INTERNATIONAL TRADE
ECON BC3039 & ECON GU4625	Environmental and Natural Resource Economics and ECONOMICS OF THE ENVIRONMENT

ECON BC3041 & ECON GU4235	THEORETICAL FOUNDATIONS- POLIT ECON and HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes
------------------------------	---

ECON GU4400	LABOR ECONOMICS
-------------	-----------------

ECON GU4235	HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes
-------------	--

Students should always first consult with *econ-advising* to confirm that the Barnard elective they wish to take does not overlap with a Columbia elective that they have already taken or plan to take. Students may *not* take the Barnard core economics, math, statistics, or seminar courses for credit towards the completion of major requirements.

### School of Professional Studies Courses

The Department of Economics does not accept *any* of the courses offered through the School of Professional Studies for credit towards the economics major, concentration, or interdepartmental majors with the exception of the courses offered by the Economics Department during the summer session at Columbia.

## Other Department and School Courses

Please note that with the exception of the above Barnard courses and the specific courses listed below for the financial economics major, no other courses offered through the different departments and schools at Columbia count toward the economics majors or concentration.

## Transfer Credits

Students are required to take a minimum number of courses in the Columbia Economics Department. For all majors and interdepartmental majors, students must complete a minimum of *five* lecture courses in the Columbia department. Students may fulfill their remaining requirements for economics lecture courses through AP (or IB or GCE) credits, Barnard electives, transfer courses, and study abroad courses (the latter two are subject to the approval of the Economics Department). The following table summarizes the new rules:

Program	Number of required economics lecture courses	Minimum number which must be taken in the department	Maximum number of outside allowed
Economics major	9	5	4
Financial economics	8	5	3
Economics-mathematics	7	5	2
Economics-political science	7	5	2
Economics-statistics	7	5	2
Economics-philosophy	7	5	2
Economics concentration	7	4	3

- Lecture courses** do not include seminars, which must be taken in the Columbia Economics Department. The lecture course counts are counts of economics courses only and do **not** include math, statistics, or courses in other departments;
- At least two of the three *3000*-level economics core courses must be taken in the department and no corresponding Barnard courses are accepted. ECON UN3025 FINANCIAL ECONOMICS and ECON UN3265 MONEY AND BANKING are counted as departmental courses regardless of the instructor;
- Outside courses** include AP (or IB or GCE) credits, transfer credits, Barnard *2000*- and *3000*-level elective courses and transfer credits from other universities. In the case where two or more courses taken outside of Columbia are used as the equivalent of ECON UN1105 PRINCIPLES OF

ECONOMICS, those courses are counted as one transfer course.

- At least one of the core finance courses, ECON UN3025 FINANCIAL ECONOMICS and ECON GU4280 CORPORATE FINANCE, must be taken at Columbia.

**Approval of transfer credits** to fulfill economics requirements must be obtained in writing from the Department of Economics (see the [departmental website](#) or speak with your advising dean for information regarding applications for transfer credit). Approval is granted only for courses that are considered to be comparable to those offered at Columbia.

**Summer courses** taken at other institutions must be approved in writing by the department's transfer credit adviser before the course is taken. The department does not accept transfer credits for any 3000 level core courses taken during a summer session outside of Columbia University. Summer courses taken from the department of economics at Columbia University do not need approval.

**Guidelines and instructions** on how to request transfer credit approval can be found in the *Transfer Credit Information* page of the [departmental website](#).

---

## Major in Economics

Please read **Required Coursework for all Programs** above. [Checklists](#) for all programs are available on our website.

The economics major requires a minimum of 35 points in economics, 6 points in mathematics, and 3 points in statistics, for a total of at least 44 points as follows:

### Economics Core Courses

All economics core courses

#### Mathematics

Select a mathematics sequence

#### Statistics

Select a statistics course

### Economics Electives

Select at least five electives, of which no more than one may be taken at the 2000-level (including Barnard courses)

### Economics Seminar

Select one economics seminar course

---

## Major in Financial Economics

Please read **Required Coursework for all Programs** above.

The Department of Economics offers the major in financial economics, which provides an academic framework to explore the role of financial markets and intermediaries in the allocation (and mis-allocation) of capital. Among the topics studied in financial economics are financial markets, banks and other

financial intermediaries, asset valuation, portfolio allocation, regulation and corporate governance.

The financial economics major requires 26 points in economics, 6 points in mathematics, 3 points in statistics, 3 points in business, and 12 points from a list of selected courses for a total minimum of 50 points as follows:

#### Economics Core Courses

All economics core courses

#### Finance Core Courses \*

ECON UN3025 FINANCIAL ECONOMICS

ECON GU4280 CORPORATE FINANCE

BUSI UN3013 FINANCIAL ACCOUNTING

\*NOTE: The department considers BUSI UN3013, IEOR E2261 and ECON UN2261 as overlapping courses. Students who take these three courses shall be credited with one course only. Financial economics majors who are also in the Business Management concentration program (CNBUMG) must take an additional elective from either the financial economics prescribed elective list (below) or from the CNBUMB prescribed list.

#### Mathematics

Select a mathematics sequence

#### Statistics

Select a statistics course

#### Electives

Select four of the following, of which two must be from the Columbia or Barnard economics departments, or equivalent economics transfer credits:

ECON BC3014	Entrepreneurship
ECON BC3017	Economics of Business Organization
ECON UN3265	MONEY AND BANKING
ECON UN3901	ECONOMICS OF EDUCATION
ECON UN3952	MACROECONOMICS #FORMATION OF EXPECTATIONS
ECON GU4020	ECON OF UNCERTAINTY # INFORMTN
ECON GU4213	ADVANCED MACROECONOMICS
ECON GU4251	INDUSTRIAL ORGANIZATION
ECON GU4260	MARKET DESIGN
ECON GU4412	ADVANCED ECONOMETRICS
ECON GU4415	GAME THEORY
or ECON BC3080	Applied Game Theory
ECON GU4465	PUBLIC ECONOMICS
or ECON BC3026	Economics of the Public Sector
ECON GU4500	INTERNATIONAL TRADE
or ECON BC3047	International Trade
ECON GU4505	INTERNATIONAL MACROECONOMICS
or ECON BC3038	INTERNATIONAL MONEY # FINANCE

STAT GU4262 Stochastic Processes for Finance

#### Seminar

The seminar must be chosen from a list of seminars eligible for the financial economics major. The department indicates which seminars are eligible for the major on the Senior Seminars page of the departmental website.

Students must have completed at least one of ECON UN3025 or ECON GU4280 prior to taking their senior seminar.

\* 1) Students must complete the finance core no later than fall of their senior year. 2) At least one of the core finance courses, ECON UN3025 and ECON GU4280, must be taken at Columbia.

## Major in Economics-Mathematics

Please read **Required Coursework for all**

**Programs** above. [Checklists](#) for all programs are available on our website.

The major in economics and mathematics provides students with a grounding in economic theory comparable to that provided by the general economics major and exposes students to rigorous and extensive training in mathematics. The program is recommended for any student planning to do graduate work in economics.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Mathematics has an assigned adviser with whom students may consult on mathematics requirements. The economics adviser can only advise on economics requirements; the mathematics adviser can only advise on mathematics requirements.

The economics-mathematics major requires a total of 52 or 56 points (depending on mathematics sequence) : 29 points in economics and 23-27 points in mathematics and statistics as follows:

### Economics Core Courses

All economics core courses

### Economics Electives

Select three electives at the 3000-level or above

### Mathematics

Select one of the following sequences:

MATH UN1101 & MATH UN1102  
& MATH UN1201 & MATH UN2010  
CALCULUS I and CALCULUS II  
and CALCULUS III and LINEAR ALGEBRA

MATH UN1101 & MATH UN1102  
& MATH UN1205 & MATH UN2010  
CALCULUS I and CALCULUS II  
and ACCELERATED MULTIVARIABLE CALC  
and LINEAR ALGEBRA

MATH UN1207 & MATH UN1208  
HONORS MATHEMATICS A and HONORS MATHEMATICS B

Note: Students who take MATH UN1205 may not receive credit for both MATH UN1201 and MATH UN1202.

Analysis requirement:

MATH UN2500 ANALYSIS AND OPTIMIZATION

Select three of the following:

MATH UN1202 CALCULUS IV

MATH UN2030 ORDINARY DIFFERENTIAL EQUATIONS

Any mathematics course at the 3000-level or above

Note: Students who take MATH UN1205 will not receive credit for MATH UN1202.

### Statistics

Select one of the following sequences:

STAT GU4001 INTRODUCTION TO PROBABILITY AND STATISTICS

STAT GU4203 & STAT GU4204 PROBABILITY THEORY and STATISTICAL INFERENCE

### Economics Seminar

Select an economics seminar

NOTE:

1. Students who fulfill the statistics requirement with STAT GU4203 and STAT GU4204, may count STAT GU4203 or STAT GU4204 as one of the three required mathematics electives.
2. Students who choose the one year sequence (STAT GU4203/ STAT GU4204), must complete the year long sequence *prior* to taking ECON UN3412. Students receive elective credit for the probability course.

## Major in Economics-Philosophy

Please read **Required Coursework for all**

**Programs** above. [Checklists](#) for all programs are available on our website.

Economics-philosophy is an interdisciplinary major that introduces students to basic methodologies of economics and philosophy and stresses areas of particular concern to both, e.g. rationality and decision making, justice and efficiency, freedom and collective choice, logic of empirical theories and testing. Many issues are dealt with historically. Classic texts of Plato, Kant, Mill, Marx, and Smith are reviewed.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Philosophy has an assigned adviser with whom students may consult on philosophy requirements. The economics adviser can only advise on economics requirements; the philosophy adviser can only advise on philosophy requirements.

The economics-philosophy major requires a total minimum of 54 points: 25 points in economics, 16 points in philosophy, 6 points in mathematics, 3 points in statistics, and 4 points in the interdisciplinary seminar as follows:

### Economics Core Courses

ECON UN1105 PRINCIPLES OF ECONOMICS

ECON UN3211 INTERMEDIATE MICROECONOMICS

ECON UN3213 INTERMEDIATE MACROECONOMICS

ECON UN3412 INTRODUCTION TO ECONOMETRICS

### Mathematics

Select a mathematics sequence

### Statistics

Select a statistics course

### Economics Electives

Three Electives are required; two must be selected from the below list, and the remaining elective may be any economics elective at the 3000-level or above.

ECON GU4020	ECON OF UNCERTAINTY # INFORMTN
ECON UN3901	ECONOMICS OF EDUCATION
ECON GU4211	ADVANCED MICROECONOMICS
ECON GU4213	ADVANCED MACROECONOMICS
ECON GU4228	URBAN ECONOMICS
ECON GU4230	ECONOMICS OF NEW YORK CITY
ECON GU4235	HISTORICAL FOUNDATIONS OF MODERN ECONOMICS: Adam Smith to J M Keynes
or ECON BC3041	THEORETICAL FOUNDATIONS-POLIT ECON
ECON GU4260	MARKET DESIGN
ECON GU4301	ECONOMIC GROWTH # DEVELOPMENT I
ECON GU4321	ECONOMIC DEVELOPMENT
or ECON BC3029	EMPIRICAL APPROACHES DEVELOPMENT
ECON GU4370	POLITICAL ECONOMY
ECON GU4400	LABOR ECONOMICS
or ECON BC3019	LABOR ECONOMICS
ECON GU4415	GAME THEORY
or ECON BC3080	Applied Game Theory
ECON GU4438	ECONOMICS OF RACE IN THE U.S.
ECON GU4465	PUBLIC ECONOMICS
or ECON BC3026	Economics of the Public Sector

PHIL UN3411      SYMBOLIC LOGIC

PHIL UN3701      ETHICS

PHIL UN3551      PHILOSOPHY OF SCIENCE  
or PHIL UN3960      EPISTEMOLOGY

PHIL GU4561      PROBABILITY # DECISION THEORY

### Seminar

ECPH GU4950      ECONOMICS # PHILOSOPHY

**Students who declared before Spring 2014:** The requirements for this program were modified in 2014. Students who declared this program before Spring 2014 should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

## Major in Economics–Political Science

Please read **Required Coursework for all Programs** above. Checklists for all programs are available on our website.

Political economy is an interdisciplinary major that introduces students to the methodologies of economics and political science and stresses areas of particular concern to both. This program is particularly beneficial to students planning to do graduate work in schools of public policy and international affairs.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Political Science has an assigned adviser with whom students may consult on political science requirements. The economics adviser can only advise on economics requirements; the political science adviser can only advise on political science requirements.

The economics–political science major requires a total of 59 points: 22 points in economics, 17 points in political science, 6 points in mathematics, 6 points in statistical methods, 4 points in a political science seminar, and 4 points in the interdisciplinary seminar as follows.

The political science courses are grouped into four areas, i.e. subfields: (1) American Politics, (2) Comparative Politics, (3) International Relations, and (4) Political Theory. For the political science part of the major, students are required to select one area as a major subfield and one as a minor subfield. The corresponding introductory courses in both subfields must be taken, plus two electives in the major subfield, and one in the minor subfield.

### Economics Core Courses

ECON UN1105	PRINCIPLES OF ECONOMICS
ECON UN3211	INTERMEDIATE MICROECONOMICS

ECON UN3213	INTERMEDIATE MACROECONOMICS
ECON GU4370	POLITICAL ECONOMY

**Mathematics**

Select a mathematics sequence

**Statistical Methods**

STAT UN1201	CALC-BASED INTRO TO STATISTICS
-------------	-----------------------------------

Select one of the following:

ECON UN3412	INTRODUCTION TO ECONOMETRICS
POLS GU4712	PRINC OF QUANT POL RESEARCH 2

**Economics Electives**

Select two electives (6 points) at the 3000-level or above

**Political Science Courses**

Students must choose a Primary Subfield and a Secondary Subfield to study. The subfields are as follows: American Politics (AP), Comparative Politics (CP), International Relations (IR), and Political Theory (PT).

Primary Subfield: Minimum three courses, one of which must be the subfield's introductory course.

Secondary Subfield: Minimum two courses, one of which must be the subfield's introductory course.

**Seminars**

Students must take the following two seminars:

ECPS GU4921	SEMINAR IN POLITICAL ECONOMICS
-------------	-----------------------------------

and a Political Science Department seminar, in the student's Primary Subfield. Please select one of the following: \*

POLS UN3911	SEMINAR IN POLITICAL THEORY
or POLS UN3912	SEMINAR IN POLITICAL THEORY
POLS UN3921	AMERICAN POLITICS SEMINAR
or POLS UN3922	AMERICAN POLITICS SEMINAR
POLS UN3951	COMPARATIVE POLITICS SEMINAR
or POLS UN3952	Seminar in Comparative Politics
POLS UN3961	INTERNATIONAL POLITICS SEMINAR
or POLS UN3962	INTERNATIONAL POLITICS SEMINAR

- Students who wish to count toward the political science seminar requirement a course that is not in the above list of approved seminars must obtain permission from the political science Director of Undergraduate studies. Barnard colloquia can count for seminar credit only with the written permission of the Director of Undergraduate Studies. Note that admission to Barnard colloquia is by application to the Barnard political science department only.

**Major in Economics-Statistics**

Please read **Required Coursework for all Programs** above. [Checklists](#) for all programs are available on our website.

The major in economics-statistics provides students with a grounding in economic theory comparable to that provided by the general economics major, but also exposes students to a significantly more rigorous and extensive statistics training than is provided by the general major. This program is recommended for students with strong quantitative skills and for those contemplating graduate studies in economics.

The Department of Economics has graduate student advisers with whom students may consult on economics requirements. The Department of Statistics has an assigned adviser with whom students may consult on statistics requirements. The economics adviser can only advise on economics requirements; the statistics adviser can only advise on statistics requirements.

The economics-statistics major requires a total of 59 points: 29 in economics, 15 points in statistics, 12 points in mathematics, 3 points in computer science as follows:

**Economics Core Courses**

All economics core courses

**Economics Electives**

Select three electives at the 3000-level or above

**Mathematics**

Select one of the following sequences:

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN2010	CALCULUS I and CALCULUS II and CALCULUS III and LINEAR ALGEBRA
--	---

MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN2010	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA
--	--

MATH UN1207 & MATH UN1208	HONORS MATHEMATICS A and HONORS MATHEMATICS B
------------------------------	---

**Statistics**

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS

One elective in statistics from among courses numbered STAT GU 4206 through GU 4266.

**Computer Science**

Select one of the following:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB

COMS W1007	
ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI
STAT UN2102	Applied Statistical Computing
<b>Economics Seminar</b>	
ECON GU4918	SEMINAR IN ECONOMETRICS

**Students who declared before Spring 2014:** The requirements for this program were modified in 2014. Students who declared this program before Spring 2014 should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Economics

Please read **Required Coursework for all Programs** above. [Checklists](#) for all programs are available on our website.

The economics concentration requires a minimum of 25 points in economics, 6 points in mathematics, and 3 points in statistics, for a total of at least 34 points as follows:

#### Economics Core Courses

All economics core courses

#### Mathematics

Select a mathematics sequence

#### Statistics

Select a Statistics course

#### Economics Electives

Select at least three electives, of which no more than one may be taken at the 2000-level (including Barnard courses)

## ECONOMICS CORE COURSES

### ECON UN1105 PRINCIPLES OF ECONOMICS. 4.00 points.

Corequisites: ECON UN1155

Corequisites: ECON UN1155 How a market economy determines the relative prices of goods, factors of production, and the allocation of resources and the circumstances under which it does it efficiently. Why such an economy has fluctuations and how they may be controlled

#### Fall 2024: ECON UN1105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 1105	001/10846	M W 8:40am - 9:55am 501 Schermerhorn Hall	Sunil Gulati	4.00	219/220
ECON 1105	002/10847	T Th 2:40pm - 3:55pm 309 Havemeyer Hall	Waseem Noor	4.00	213/210

ECON 1105	003/10848	M W 11:40am - 12:55pm 301 Uris Hall	Isaac Bjorke	4.00	190/200

ECON 1105	003/13536	T Th 1:10pm - 2:25pm 301 Uris Hall	Brendan O'Flaherty	4.00	107/200

### ECON UN3211 INTERMEDIATE MICROECONOMICS. 4.00 points.

Prerequisites: ECON UN1105 and MATH UN1101 and (MATH UN1201 or MATH UN1207) *ECON W1105* or the equivalent; *MATH V1101*, *MATH V1201* (or *MATH V1207*).  
Prerequisites: ECON UN1105 and MATH UN1101 and (MATH UN1201 or MATH UN1207) The determination of the relative prices of goods and factors of production and the allocation of resources

#### Fall 2024: ECON UN3211

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3211	001/10851	M W 1:10pm - 2:25pm 614 Schermerhorn Hall	Susan Elmes	4.00	91/110
ECON 3211	002/11065	T Th 1:10pm - 2:25pm 209 Havemeyer Hall	Caterina Musatti	4.00	96/110
ECON 3211	003/10852	T Th 6:10pm - 7:25pm 310 Fayerweather	Qi Ge	4.00	75/96

#### Spring 2025: ECON UN3211

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3211	001/13542	M W 2:40pm - 3:55pm 310 Fayerweather	Murat Yilmaz	4.00	72/96
ECON 3211	002/13544	M W 11:40am - 12:55pm 310 Fayerweather	Isaac Bjorke	4.00	96/96
ECON 3211	003/13545	M W 1:10pm - 2:25pm 310 Fayerweather	Isaac Bjorke	4.00	94/96
ECON 3211	004/13547	T Th 2:40pm - 3:55pm 329 Pupin Laboratories	Caterina Musatti	4.00	98/96

### ECON UN3213 INTERMEDIATE MACROECONOMICS. 4.00 points.

Prerequisites: (MATH UN1101 or MATH UN1207) and ECON UN1105 *ECON W1105* or the equivalent; *MATH V1101* or *MATH V1207*.

Corequisites: MATH UN1201

Prerequisites: (MATH UN1101 or MATH UN1207) and ECON UN1105 or the equivalent. Corequisites: MATH UN1201 This course covers the determination of output, employment, inflation and interest rates. Topics include economic growth, business cycles, monetary and fiscal policy, consumption and savings and national income accounting

**Fall 2024: ECON UN3213**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3213	001/10853	M W 1:10pm - 2:25pm 402 Chandler	Emilien Gouin-Bonenfant	4.00	105/110
ECON 3213	002/10854	M W 2:40pm - 3:55pm 402 Chandler	Emilien Gouin-Bonenfant	4.00	83/110
ECON 3213	003/11056	T Th 2:40pm - 3:55pm 301 Uris Hall	Irasema Alonso	4.00	151/150

**Spring 2025: ECON UN3213**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3213	001/13548	M W 8:40am - 9:55am 517 Hamilton Hall	Martin Uribe	4.00	40/86
ECON 3213	002/13551	M W 10:10am - 11:25am 517 Hamilton Hall	Martin Uribe	4.00	58/86
ECON 3213	003/13552	T Th 4:10pm - 5:25pm 402 Chandler	Irasema Alonso	4.00	147/125

**ECON UN3412 INTRODUCTION TO ECONOMETRICS. 4.00 points.**

Prerequisites: (ECON UN3211 or ECON UN3213) and (MATH UN1201 or MATH UN1207) and STAT UN1201 *ECON W3211* or *W3213*; *STAT 1201* or *SIEO 3001*; and *MATH V1201* or *V1207*.

Prerequisites: (ECON UN3211 or ECON UN3213) and (MATH UN1201 or MATH UN1207) and STAT UN1201 Modern econometric methods; the general linear statistical model and its extensions; simultaneous equations and the identification problem; time series problems; forecasting methods; extensive practice with the analysis of different types of data

**Fall 2024: ECON UN3412**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3412	001/10859	T Th 4:10pm - 5:25pm 203 Mathematics Building	Seyhan Erden	4.00	102/110
ECON 3412	002/10860	M W 2:40pm - 3:55pm 310 Fayerweather	Jushan Bai	4.00	58/96

## ECONOMICS ELECTIVES

**ECON UN2105 THE AMERICAN ECONOMY. 3.00 points.**

Prerequisites: *ECON W1105*.

Prerequisites: ECON UN1105 The course surveys issues of interest in the American economy, including economic measurement, well-being and income distribution, business cycles and recession, the labor and housing markets, saving and wealth, fiscal policy, banking and finance, and topics in central banking. We study historical issues, institutions, measurement, current performance and recent research

**Fall 2024: ECON UN2105**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 2105	001/10849	T Th 11:40am - 12:55pm 517 Hamilton Hall	Claudia Halbac	3.00	84/86

**ECON UN2257 THE GLOBAL ECONOMY. 3.00 points.**

Prerequisites: *ECON W1105*.

Prerequisites: ECON UN1105 Covers five areas within the general field of international economics: (i) microeconomic issues of why countries trade, how the gains from trade are distributed, and protectionism; (ii) macroeconomic issues such as exchange rates, balance of payments and open economy macroeconomic adjustment, (iii) the role of international institutions (World Bank, IMF, etc); (iv) economic development and (v) economies in transition

**Spring 2025: ECON UN2257**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 2257	001/13538	T Th 11:40am - 12:55pm 301 Pupin Laboratories	Waseem Noor	3.00	80/189

**ECON UN3025 FINANCIAL ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211*, *W3213* and *STAT 1201*.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Institutional nature and economic function of financial markets. Emphasis on both domestic and international markets (debt, stock, foreign exchange, eurobond, eurocurrency, futures, options, and others). Principles of security pricing and portfolio management; the Capital Asset Pricing Model and the Efficient Markets Hypothesis

**Fall 2024: ECON UN3025**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3025	001/10850	M W 1:10pm - 2:25pm 501 Schermerhorn Hall	Waldo Ojeda	3.00	131/150

ECON 3025	002/00787	M W 6:10pm - 7:25pm 504 Diana Center	Jose Cao-Alvira	3.00	52/60
-----------	-----------	---	-----------------	------	-------

**Spring 2025: ECON UN3025**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3025	001/13471	T Th 2:40pm - 3:55pm 301 Uris Hall	Waldo Ojeda	3.00	89/125
ECON 3025	003/00763	T Th 1:10pm - 2:25pm 263 Macy Hall	Elham Saeidinezhad	3.00	72/100
ECON 3025	004/00782	M W 6:10pm - 7:25pm L1002 Milstein Center	Jose Cao-Alvira	3.00	69/100

**ECON UN3901 ECONOMICS OF EDUCATION. 3.00 points.**

Prerequisites: (econ un3211 and econ un3213 and econ un3412)

Prerequisites: (econ un3211 and econ un3213 and econ un3412) Course objective: This course has two objectives: (1) To develop students' skills in research and writing. Specifically, participants will work on: formulating a research question, placing it in the context of an existing literature and/or policy area, and using economic and econometric tools to address it in writing. Specifically, in the first part of the class, readings, problem sets, and a midterm exam will build skills in these areas. In the second part, students will come up with a research question, and address it in a research proposal/report. While all the applications will be on the economics of education, these skills will be useful in students' subsequent careers, regardless of the area of economics they focus on. (2) To provide an introduction to key issues in the economics of education. Specifically, education is a significant industry every person entering this course will have already spent years in this industry as a customer, as a worker, as an input, or all of the above. The course will address questions like: What does economics have to say about how this industry is organized and what determines its output? Why do individuals invest in education? What determines the behavior, productivity, and reputation of firms in the industry? What role should government and public policy (if any) play in its operation?

**ECON UN3952 MACROECONOMICS#FORMATION OF EXPECTATIONS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 This course has two main objectives: To introduce students to the process of writing a research paper. This includes identifying and formulating a research question, reviewing the previous literature and positioning the problem in that context, identifying the proper tools and data to answer the question, and finally writing the findings in the format of a research paper. An immediate goal is to prepare the students to undertake a senior thesis project. To provide an introduction to selected topics and survey evidence in macroeconomics, with a focus on the expectation formation process of economic agents.

We will start by going through some canonical models that are widely used for economic and policy analysis to understand the role of expectations in the decision making of households and firms. We will then go through a series of survey data and relate the empirical evidence to the theoretical predictions of those canonical models

**ECON UN3981 APPLIED ECONOMETRICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

The objective of this course is to develop students' research skills and to learn the process of writing an original research paper. The skills and process include the ability to identify a problem and state in a concise manner, literature review, data collection, model formulation and estimation, evaluation of the problem and writing up the findings in a format of a research paper. An immediate and more specific goal is to prepare students to tackle a senior thesis project.

Towards this goal, this course will review or introduce the most widely used econometric techniques for empirical research. These include multiple regressions, probit and logit models, instrumental variables methods, panel data methods, regression discontinuity designs. This course will also introduce some time series methods such as vector autoregressive process, cointegration analysis, financial time series, and modeling of volatilities. Students will need to practice these methods with a computer software package (R or STATA) and with actual economic data sets.

**ECON GU4020 ECON OF UNCERTAINTY # INFORMTN. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213* and *STAT 1201*.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Topics include behavior uncertainty, expected utility hypothesis, insurance, portfolio choice, principle agent problems, screening and signaling, and information theories of financial intermediation

**Spring 2025: ECON GU4020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4020	001/17549	M W 4:10pm - 5:25pm 516 Hamilton Hall	Ingmar Nyman	3.00	26/50

**ECON GU4211 ADVANCED MICROECONOMICS. 4.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and MATH UN2010 *ECON W3211, W3213*, and *MATH V2010*.

Corequisites: MATH UN2500, MATH GU4061

Prerequisites: ECON UN3211 and ECON UN3213 and MATH UN2010 Students must register for required discussion section. Corequisites: MATH UN2500 or MATH GU4061 The course provides a rigorous introduction to microeconomics. Topics will vary with the instructor but will include consumer theory, producer theory, general equilibrium and welfare, social choice theory, game theory and information economics. This course is

strongly recommended for students considering graduate work in economics. Discussion section required

**Spring 2025: ECON GU4211**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4211	001/13560	M W 1:10pm - 2:25pm 420 Pupin Laboratories	Susan Elmes	4.00	16/50

**ECON GU4213 ADVANCED MACROECONOMICS. 4.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 *ECON W3211, W3213, W3412 and MATH V2010*.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 Required discussion section  
ECON GU4214 An introduction to the dynamic models used in the study of modern macroeconomics. Applications of the models will include theoretical issues such as optimal lifetime consumption decisions and policy issues such as inflation targeting. This course is strongly recommended for students considering graduate work in economics

**Fall 2024: ECON GU4213**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4213	001/10862	M W 5:40pm - 6:55pm 503 Hamilton Hall	Hassan Afrouzi Khosroshahi	4.00	16/54

**ECON GU4228 URBAN ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211 and W3213*.

Congestion and other games, and the pricing of transit services. Location theory and land rents. Segregation and discrimination. The fiscal structure of American cities. Zoning and the taking issue. Abandonment and city-owned property. Economic development, abatements, subsidies, and eminent domain. Crime, deadweight losses, and the allocation of police services.

**Spring 2025: ECON GU4228**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4228	001/13562	T Th 10:10am - 11:25am 517 Hamilton Hall	Jason Barr	3.00	47/86

**ECON GU4230 ECONOMICS OF NEW YORK CITY. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213 and STAT 1201*.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 This course takes New York as our laboratory. Economics is about individual choice subject to constraints and the ways that choices sum up to something often much more than the parts. The fundamental feature of any city is the combination of those forces that bring people together and those that push them apart. Thus both physical and social space will be central to our discussions. The underlying theoretical and empirical analysis will touch on spatial aspects of urban

economics, regional, and even international economics. We will aim to see these features in New York City taken as a whole, as well as in specific neighborhoods of the city. We will match these theoretical and empirical analyses with readings that reflect close observation of specific subjects. The close observation is meant to inspire you to probe deeply into a topic in order that the tools and approaches of economics may illuminate these issues in a fresh way

**ECON GU4251 INDUSTRIAL ORGANIZATION. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211 and W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 The study of industrial behavior based on game-theoretic oligopoly models. Topics include pricing models, strategic aspects of business practice, vertical integration, and technological innovation

**Fall 2024: ECON GU4251**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4251	001/10863	M W 4:10pm - 5:25pm 517 Hamilton Hall	Gautam Gowrisankaran	3.00	66/86

**ECON GU4260 MARKET DESIGN. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, ECON W3213 and STAT W1201*.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 This course uses modern microeconomic tools for understanding markets for indivisible resources and exploring ways to improve their design in terms of stability, efficiency and incentives. Lessons of market design will be applied to developing internet platforms for intermediating exchanges, for auctions to allocate sponsored search advertising, to allocate property rights such as public lands, radio spectrums, fishing rights, for assigning students to public schools, and for developing efficient kidney exchanges for transplantation

**Fall 2024: ECON GU4260**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4260	001/10864	M W 2:40pm - 3:55pm 517 Hamilton Hall	Yeon-Koo Che	3.00	43/86

**ECON GU4280 CORPORATE FINANCE. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, ECON W3213 and STAT 1201*.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 An introduction to the economics principles underlying the financial decisions of firms. The topics covered include bond and stock valuations, capital budgeting, dividend policy, market efficiency, risk valuation, and risk management. For information regarding REGISTRATION for this course, go to: <http://econ.columbia.edu/registration-information>

**Fall 2024: ECON GU4280**

**ECON GU4301 ECONOMIC GROWTH # DEVELOPMNT I. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 Empirical findings on economic development, theoretical development models; problems of efficient resource allocation in a growing economy; balanced and unbalanced growth in closed and open economic systems; the role of capital accumulation and innovation in economic growth

**Fall 2024: ECON GU4301**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4301	001/15876	M W 11:40am - 12:55pm 517 Hamilton Hall	Nuria Quella	3.00	32/86

**ECON GU4321 ECONOMIC DEVELOPMENT. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 Historical comparative examination of the economic development problems of the less developed countries; the roles of social institutions and human resource development; the functions of urbanization, rural development, and international trade

**Fall 2024: ECON GU4321**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4321	001/10931	T Th 1:10pm - 2:25pm 702 Hamilton Hall	Jack Willis	3.00	36/86

**ECON GU4325 ECONOMIC DEVELOPMENT OF JAPAN. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 The growth and structural changes of the post-World War II economy; its historical roots; interactions with cultural, social, and political institutions; economic relations with the rest of the world

**Spring 2025: ECON GU4325**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

ECON 4325	001/13565	T Th 8:40am - 9:55am 310 Fayerweather	David Weinstein	3.00	79/96
-----------	-----------	--	-----------------	------	-------

**ECON GU4370 POLITICAL ECONOMY. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 or *ECON W3211*, *W3213*, *STAT 1201* (or *POLS 4710* for those who declared prior to Spring 2014).

The objective of this course is to develop understanding of how political institutions and behavior shape economic outcomes, and vice versa. Starting from the micro level study of political behavior, we will build up to analyze the internal workings of institutions and ultimately macro level economic and political outcomes. During the course we will cover the following topics

- Limits and potential of markets
- Public goods provision
- Voting
- Redistribution

**Fall 2024: ECON GU4370**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4370	001/10932	M W 10:10am - 11:25am 413 Kent Hall	Alessandra Casella	3.00	52/70

**ECON GU4400 LABOR ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

The labor force and labor markets, educational and man power training, unions and collective bargaining, mobility and immobility, sex and race discrimination, unemployment.

**Spring 2025: ECON GU4400**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4400	001/13566	M W 10:10am - 11:25am 303 Uris Hall	Tatiana Mocanu	3.00	18/54

**ECON GU4412 ADVANCED ECONOMETRICS. 4.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 *ECON W3211*, *ECON W3213*, *ECON W3412*, *MATH V2010*.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 Students must register for required discussion section. The linear regression model will be presented in matrix form and basic asymptotic theory will be introduced. The course will also introduce students to basic time series methods for forecasting and analyzing economic data. Students will be expected to apply the tools to real data

**ECON GU4413 Econometrics of Time Series and Forecasting. 3 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 *W3211*, *W3213*, *W3412*.

Corequisites: MATH UN2010

This course focuses on the application of econometric methods to time series data; such data is common in the testing of macro and financial economics models. It will focus on the application of these methods to data problems in macro and finance.

**Spring 2025: ECON GU4413**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4413	001/13568	T Th 11:40am - 12:55pm 417 Mathematics Building	Seyhan Erden	3	16/54

**ECON GU4415 GAME THEORY. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213

Introduction to the systematic treatment of game theory and its applications in economic analysis

**Fall 2024: ECON GU4415**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ECON GU4438 ECONOMICS OF RACE IN THE U.S.. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213 *ECON GU4400* is strongly recommended. What differences does race make in the U.S. economy? Why does it make these differences? Are these differences things we should be concerned about? If so, what should be done? The course examines labor markets, housing markets, capital markets, crime, education, and the links among these markets. Both empirical and theoretical contributions are studied

**Fall 2024: ECON GU4438**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4438	001/11022	T Th 2:40pm - 3:55pm 517 Hamilton Hall	Brendan O'Flaherty	3.00	76/86

**ECON GU4465 PUBLIC ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 Types of market failures and rationales for government intervention in the economy. Benefit-cost analysis and the theory of public goods. Positive and normative aspects of taxation. The U.S. tax structure

**Fall 2024: ECON GU4465**

**ECON GU4480 GENDER # APPLIED ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211*, *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 This course studies gender gaps, their extent, determinants and consequences. The focus will be on the allocation of rights in different cultures and over time, why women's rights have typically been more limited and why most societies have traditionally favored males in the allocation of resources

**Fall 2024: ECON GU4480**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4480	001/11024	M W 4:10pm - 5:25pm 330 Uris Hall	Lena Edlund	3.00	46/60

**ECON GU4500 INTERNATIONAL TRADE. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213 The theory of international trade, comparative advantage and the factor endowments explanation of trade, analysis of the theory and practice of commercial policy, economic integration. International mobility of capital and labor; the North-South debate

**Fall 2024: ECON GU4500**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4500	001/11026	T Th 10:10am - 11:25am 602 Hamilton Hall	Waseem Noor	3.00	59/86

**ECON GU4505 INTERNATIONAL MACROECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213. Econ GU4505 is an elective in the economics major. The course develops models for the analysis of the determinants of international capital flows, trade imbalances, and exchange rates. The models are then used as the basis for the discussion of topics such as Global Imbalances, Uncertainty and the Current Account, The Global Saving Glut, Purchasing Power Parity, Sudden Stops, Real Exchange Rates and Productivity, Covered Interest Rate Parity, Uncovered Interest Rate Parity, Borrowing Externalities and Optimal Capital Controls, Overborrowing, Macroeconomic Adjustment under Flexible and Fixed Exchange Rates, Twin Deficits, and Balance of Payment Crises

**ECON GU4615 LAW AND ECONOMICS. 3.00 points.****ECON GU4625 ECONOMICS OF THE ENVIRONMENT. 3.00 points.**

Not offered during 2023-2024 academic year.

Microeconomics is used to study who has an incentive to protect the environment. Government's possible and actual role in protecting the environment is explored. How do technological change, economic development, and free trade affect the environment? Emphasis on hypothesis testing and quantitative analysis of real-world policy issues.

### **ECON GU4630 Climate Finance. 3.00 points.**

In lieu of the failure of legislatures to pass comprehensive carbon taxes, there is growing pressure on the financial system to address the risks of global warming. One set of pressures is to account for the heightened physical risks due to extreme weather events and potential climate tipping points. Another set of pressures are to find approaches to incentivize corporations to meet the goals set out in the Paris Treaty of 2015. These approaches include (1) mandates or restrictions to only hold companies with decarbonization plans, (2) development of negative emissions technologies such as direct-air capture and (3) promotion of natural capital markets that can be used to offset carbon emissions. Moreover, financial markets also provide crucial information on expectations and plans of economic agents regarding climate change. This course will cover both models and empirical methodologies that are necessary to assess the role of the financial system in addressing global warming

Spring 2025: ECON GU4630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4630	001/13570	M W 1:10pm - 2:25pm 207 Mathematics Building	Jose Scheinkman, Harrison Hong	3.00	84/150

### **ECON GU4700 FINANCIAL CRISES. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213 and STAT 1201.*

This course uses economic theory and empirical evidence to study the causes of financial crises and the effectiveness of policy responses to these crises. Particular attention will be given to some of the major economic and financial crises in the past century and to the crisis that began in August 2007.

### **ECON GU4710 FINANCE AND THE REAL ECONOMY. 3.00 points.**

Prerequisites: (Econ UN3211) and (ECON UN3213) and (STAT UN1201)

Prerequisites: (Econ UN3211) and (ECON UN3213) and (STAT UN1201) This course uses economic theory and empirical evidence to study the links between financial markets and the real economy. We will consider questions such as: What is the welfare role of finance? How do financial markets affect consumers and firms? How do shocks to the financial system transmit to the real economy? How do financial markets impact inequality?

Spring 2025: ECON GU4710

### **ECON GU4750 GLOBALIZATION # ITS RISKS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211 and W3213.*

Prerequisites: ECON UN3211 and ECON UN3213 The world is being transformed by dramatic increases in flows of people, goods and services across nations. Globalization has the potential for enormous gains but is also associated to serious risks. The gains are related to international commerce where the industrial countries dominate, while the risks involve the global environment, poverty and the satisfaction of basic needs that affect in great measure the developing nations. Both are linked to a historical division of the world into the North and the South-the industrial and the developing nations. Key to future evolution are (1) the creation of new markets that trade privately produced public goods, such as knowledge and greenhouse gas emissions, as in the Kyoto Protocol; (2) the updating of the Breton Woods Institutions, including the creation of a Knowledge Bank and an International Bank for Environmental Settlements

Spring 2025: ECON GU4750

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4750	001/13573	M W 5:40pm - 6:55pm 602 Hamilton Hall	Graciela Chichilnisky	3.00	71/86

### **ECON GU4840 BEHAVIORAL ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213 Within economics, the standard model of behavior is that of a perfectly rational, self interested utility maximizer with unlimited cognitive resources. In many cases, this provides a good approximation to the types of behavior that economists are interested in. However, over the past 30 years, experimental and behavioral economists have documented ways in which the standard model is not just wrong, but is wrong in ways that are important for economic outcomes. Understanding these behaviors, and their implications, is one of the most exciting areas of current economic inquiry. The aim of this course is to provide a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality and choice under risk and uncertainty. For each area we will study three things: 1. The evidence that indicates that the standard economic model is missing some important behavior 2. The models that have been developed to capture these behaviors 3. Applications of these models to (for example) finance, labor and development economics As well as the standard lectures, homework assignments, exams and so on, you will be asked to participate in economic experiments, the data from which will be used to illustrate some of the principals in the course. There will also be a certain small degree of classroom 'flipping', with a portion of many lectures given over

to group problem solving. Finally, an integral part of the course will be a research proposal that you must complete by the end of the course, outlining a novel piece of research that you would be interested in doing

**Spring 2025: ECON GU4840**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4840	001/13576	M W 11:40am - 12:55pm 142 Uris Hall	Mark Dean	3.00	60/96

**ECON GU4850 COGNITIVE MECH # ECON BEHAVIOR. 4.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213; STAT 1201.*

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Standard economic theory seeks to explain human behavior (especially in economic settings, such as markets) in terms of rational choice, which means that the choices that are made can be predicted on the basis of what would best serve some coherent objective, under an objectively correct understanding of the predictable consequences of alternative actions. Observed behavior often seems difficult to reconcile with a strong form of this theory, even if incentives clearly have some influence on behavior; and the course will discuss empirical evidence (both from laboratory experiments and observations in the field) for some well-established anomalies. But beyond simply cataloguing anomalies for the standard theory, the course will consider the extent to which departures from a strong version of rational choice theory can be understood as reflecting cognitive processes that are also evident in other domains such as sensory perception; examples from visual perception will receive particular attention. And in addition to describing what is known about how the underlying mechanisms work (something that is understood in more detail in sensory contexts than in the case of value-based decision making), the course will consider the extent to which such mechanisms --- while suboptimal from a normative standpoint that treats perfect knowledge of one's situation as costless and automatic --- might actually represent efficient uses of the limited information and bounded information-processing resources available to actual people (or other organisms). Thus the course will consider both ways in which the realism of economic analysis may be improved by taking into account cognitive processes, and ways in which understanding of cognitive processes might be advanced by considering the economic problem of efficient use of limited (cognitive) resources

**ECON GU4860 BEHAVIORAL FINANCE. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 Neoclassical finance theory seeks to explain financial market valuations and fluctuations in terms of investors having rational expectations and being able to trade without costs. Under these assumptions, markets are efficient in that stocks and other assets are always priced just right. The efficient

markets hypothesis (EMH) has had an enormous influence over the past 50 years on the financial industry, from pricing to financial innovations, and on policy makers, from how markets are regulated to how monetary policy is set. But there was very little in prevailing EMH models to suggest the instabilities associated with the Financial Crisis of 2008 and indeed with earlier crises in financial market history. This course seeks to develop a set of tools to build a more robust model of financial markets that can account for a wider range of outcomes. It is based on an ongoing research agenda loosely dubbed "Behavioral Finance", which seeks to incorporate more realistic assumptions concerning human rationality and market imperfections into finance models. Broadly, we show in this course that limitations of human rationality can lead to bubbles and busts such as the Internet Bubble of the mid-1990s and the Housing Bubble of the mid-2000s; that imperfections of markets --- such as the difficulty of short-selling assets --- can cause financial markets to undergo sudden and unpredictable crashes; and that agency problems or the problems of institutions can create instabilities in the financial system as recently occurred during the 2008 Financial Crisis. These instabilities in turn can have feedback effects to the performance of the real economy in the form of corporate investments

#### ECON GU4918 SEMINAR IN ECONOMETRICS. 4.00 points.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 *ECON 3211, W3213, W3412*, and sign-up in the department's office. Registration information is posted on the department's Seminar Sign-up webpage.

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and sign-up in the departments office. Registration information is posted on the departments Seminar Sign-up webpage. Analyzing data in a more in-depth fashion than in ECON UN3412. Additional estimation techniques include limited dependent variable and simultaneous equation models. Go to the departments undergraduate Seminar Description webpage for a detailed description

#### Spring 2025: ECON GU4918

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4918	001/13605	W 4:10pm - 6:00pm 1102 International Affairs Bldg	Seyhan Erden	4.00	12/16

#### ECPS GU4921 SEMINAR IN POLITICAL ECONOMICS. 4.00 points.

Priority is given to economics-political science majors who are in their senior year, but any available space is open to students who have taken the elective course in political economy.

Prerequisites: *ECON W3211, W3213, W3412 (or POLS 4711), W4370*. Registration information is posted on the department's Seminar Sign-up webpage.

Prerequisites: ECON W3211, W3213, W3412 (or POLS 4711), W4370. Registration information is posted on the departments Seminar Sign-up webpage. Required for majors in the joint program between political science and economics. Provides a forum in which students can integrate the economics and political science approach to political economy. The theoretical tools learned in political economy are applied: the analysis of a historical episode and the empirical relation between income distribution and politics on one side and growth on the other

**Spring 2025: ECPS GU4921**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECPS 4921	001/17541	Th 10:10am - 12:00pm 613 Hamilton Hall	Claudia Halbac	4.00	14/16
ECPS 4921	002/17544	M 10:10am - 12:00pm Room TBA	Carlo Prato	4.00	11/16

**ECPH GU4950 ECONOMICS # PHILOSOPHY. 4.00 points.**

Open only to economics-philosophy majors who are in their senior year.

Prerequisites: *ECON W3211, ECON W3213, ECON W3412*. Students will be contacted by the Economics department for pre-enrollment.

Prerequisites: *ECON W3211, ECON W3213, ECON W3412*. Students will be contacted by the Economics department for pre-enrollment. Explores topics in the philosophy of economics such as welfare, social choice, and the history of political economy. Sometimes the emphasis is primarily historical and sometimes on analysis of contemporary economic concepts and theories

**Spring 2025: ECPH GU4950**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECPH 4950	002/17528	T 10:10am - 12:00pm 716 Philosophy Hall	Jessica Collins, Brendan O'Flaherty	4.00	4/16

**ECON GU4999 SENIOR HONORS THESIS WORKSHOP. 3.00 points.**

3 points per semester.

Prerequisites: *ECON UN3211 and ECON UN3213 and ECON UN3412 and ECON W3211, W3213, W3412*, and the director of the departmental honors program's permission. Students must have a minimum GPA of 3.7 in all required major courses, including calculus and statistics, prior to enrollment.

Prerequisites: *ECON UN3211 and ECON UN3213 and ECON UN3412 and the director of the departmental honors programs permission*. Students must have a minimum GPA of 3.7 in all required major courses, including calculus and statistics, prior to enrollment. The honors thesis seminar is a year-long course, beginning in the fall semester and ending in the spring semester. Students who have been approved to enter the workshop will be registered for both semesters by the department during the first two weeks of classes; 3 points are earned per semester. This workshop may only be taken by students applying for departmental honors, and it also fulfills the economics seminar requirement for the economics major and all joint majors. Students must see the director during mid-semester registration in the spring to discuss their proposed thesis topic, at which time they will be matched with appropriate faculty who will act as their thesis adviser. Students will meet their adviser over the course of the year at mutually agreed upon times. A rough draft of the thesis will be due

during the first week of February in the spring semester, and the final draft will be due three weeks before the last day of classes. Please note that for those joint majors that require two seminars, one in economics and one in the other discipline (i.e. Political Science), the economics senior honors thesis seminar only fulfills the economics seminar requirement

**Fall 2024: ECON GU4999**

Program Director/Chair: Professor Maria River Maulucci

Department Administrator: Amy Shire ([ashire@barnard.edu](mailto:ashire@barnard.edu))

## THE STUDY OF EDUCATION

The Barnard Education Program envisions education as an emancipatory human right that develops people's capacities to think critically and act creatively for peace, justice, and sustainability in local and global contexts. Education is a fundamental human activity that occurs in formal and informal settings as people interact within their social, historical, and physical environments. The program educates students to draw on interdisciplinary research and perspectives in order to critically analyze the role of education in society, and to create and sustain equitable educational practices and policies for all.

## PROGRAMS OF STUDY

The Barnard Education Program is committed to strengthening public education and addressing issues of equity and social justice, particularly in urban schools. We offer two tracks in Education: Education Studies (Major and Minor/Special Concentration), and Urban-Teaching Minors/Special Concentration (that leads to teacher certification in Elementary/Childhood Education or Secondary-Adolescent Education).

In all tracks, students develop critical lenses to understand education as a fundamental human activity that occurs across many settings; to analyze the issues facing public schools; and to consider ways to promote fair and inclusive policies and practices for children and youth. The classes are open to all undergraduates at Columbia (BC, SEAS, GS, CC). The two tracks we offer are:

### Education Studies

Education Studies is an interdisciplinary program for students who wish to understand, critically analyze, and conduct

research on the role of education in society. Our students draw on a wide range of theoretical and empirical scholarship to study education as a social, cultural, and historical process. We understand education as much more than schooling, even as schooling is central to many of our concerns. Students who pursue the major or the minor/special concentration in Education Studies learn to evaluate educational policy, practice, and research through a critical, equity-oriented lens. Our graduates will be prepared to act creatively for peace, justice, and sustainability in local and global educational contexts. Education Studies prepares students to pursue graduate studies or positions in public policy, sociology, history, youth studies, philosophy, psychology, and other areas where K-12 education is frequently a focus of coursework and scholarship, as well as to pursue teacher certification through a graduate program. Education Studies does not lead to teacher certification.

**Education Studies Major:** The Education Studies major is designed for students whose primary interest is in pursuing Education as their major course of study. Education Studies majors concentrate in one of three areas: Education, Culture, and Society; Educational Policy; or Comparative and International Education. In their senior year, they conduct an original inquiry project. Currently, the major in Education Studies is open to Barnard College students only.

**Education Studies Minor/Special Concentration:** Education Studies minors (BC) or special concentrations (CC, GS) pursue similar coursework to that undertaken by the majors. This course of study is intended to complement a major's disciplinary specialization and methodological training. In addition to the requirements of the minor/special concentration, students must complete a major. The special concentration minors are open to all students at Barnard College, Columbia College, and College of General Studies.

For further information, and to apply to the major or minor tracks, please visit our [website](#)

#### Urban Teaching Minors/Special Concentrations

This track is for students who want to graduate from college with teacher certification. Our goal is to prepare students to become skilled and reflective teachers who can effectively respond to the learning needs of diverse learners, and create supportive and intellectually stimulating classroom communities. Students learn to create innovative curriculum; gain experience observing, tutoring, and teaching a diverse range of children and young people; develop confidence in their role as teachers who can promote fair and inclusive school practices; and graduate with certification to teach in New York.

This program is registered by the New York State Department of Education and accredited by the Association for Advancing Quality in Educator Preparation (AAQEP). Students who complete the program will be recommended for Initial Certification in either Childhood Education (Grades 1-6) or Adolescent Education (Grades 7-12). We provide ongoing

support to program completers through our Barnard Teacher Network.

To apply to the Urban Teaching tracks, please visit our [website](#). Students are encouraged to apply for admission by March of the sophomore year but no later than April 30th of their sophomore year. Those who plan to study abroad during junior year should apply by the spring of the freshman year, but no later than the first Tuesday in September of the sophomore year. Admission criteria include good academic standing; evidence of commitment to the field of education; interest in issues of social justice issues as they affect education, particularly in urban schools; and capacity for growth as an intellectually resourceful and reflective teacher. Enrollment is limited.

## REQUIREMENTS FOR THE EDUCATION STUDIES MAJOR

To complete the Major (BC) in Education Studies, students must complete a minimum of 40 points of course work, listed below. *Please note that the Education Studies major is currently being offered to Barnard College students only.*

The Education Studies track requires a minimum of eleven courses:

### Requirement A - Foundational Coursework

EDUC BC1510	FOUNDATIONS OF EDUCATION
URBS UN3310	RACE, SPACE, URB SCHOOLS

### Requirement B - Field Experience

Select one of the following:

EDUC BC3050	SCIENCE IN THE CITY
EDUC BC3052	MATH # THE CITY
EDUC BC3055	ARTS AND HUMANITIES IN THE CITY:CRITICAL
EDUC BC3058	SCIENCE IN THE CITY II
SOCI UN3974	SOCI OF SCHOOLS,TEACH,LEARNING

### Requirement C - Concentration Courses

Select 6 of the following: At least 2 courses must be EDUC courses. Course selection to be determined with adviser.

EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY
EDUC BC3042	GENDER, SEXUALITY, AND SCHOOL
EDUC BC3045	COMPLICATING CLASS: EDUCATION AND THE LIMITS OF EQUITY
EDUC BC3040	MIGRATION, GLOBALIZATION, AND EDUCATION
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY
EDUC BC3044	EDUCATION AND SOCIAL CHANGE IN COMPARATIVE GLOBAL CONTEXTS
EDUC BC3034	Families, Communities, and Schools
EDUC BC3030	Critical Pedagogies

PHIL UN2100	Philosophy of Education
SOCI UN3225	SOCIOLOGY OF EDUCATION
ECON BC3012	THE ECONOMICS OF EDUCATION
PSYC BC2134	Educational Psychology
CSER UN3928	COLONIZATION/ DECOLONIZATION
HRTS UN3001	INTRODUCTION TO HUMAN RIGHTS

**Other Courses** You may count other electives not listed here toward the Concentration Courses requirement. These courses must be reviewed with your adviser before enrollment.

### Requirement D - Senior Capstone

EDUC BC3088	Senior Research Seminar: Methods of Inquiry
EDUC BC3089	Senior Research Seminar: Inquiry

## REQUIREMENTS FOR THE URBAN TEACHING MINORS/SPECIAL CONCENTRATIONS

### Elementary/Childhood Education (To Teach Grades 1-6)

This program leads to New York State Initial Certification in Childhood Education (Grades 1- 6). In addition to the liberal arts major, students must complete a total of 32-34 credits as follows:

**Requirement A - Educational Foundations** For students who have already taken EDUC BC3032, PHIL UN2100, SOCI UN3225, or ECON BC3012 to fulfill Requirement A prior to Fall 2018 do not need to enroll in EDUC BC1510 to fulfill the requirement.

EDUC BC1510	FOUNDATIONS OF EDUCATION	4
-------------	--------------------------	---

### Requirement B - Psychology

Select one of the following: 3-4.5

PSYC BC1115	Cognitive Psychology
PSYC BC1129	Developmental Psychology
PSYC BC2134	Educational Psychology
PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR *

### Requirement C - Pedagogical Elective

Select one of the following:

EDUC BC3050	SCIENCE IN THE CITY
EDUC BC3052	MATH # THE CITY
EDUC BC3055	ARTS AND HUMANITIES IN THE CITY:CRITICAL
EDUC BC3058	SCIENCE IN THE CITY II

### Requirement D - Pedagogical Core

EDUC BC3025	INCLUSIVE APPROACHES TO TEACHING LITERACY: THEORY AND PRACTICE	4
EDUC BC3053	MULTICULTURAL ELEMENTARY PEDA	4

EDUC BC3063	STUDENT TEACHING/URBAN SCHOOLS	6
EDUC BC3064	SEM: ISSUES URBAN TEACHING	4

**Requirement E - Liberal Arts and Sciences**

Visit <https://education.barnard.edu/UrbanTeaching/LiberalArtsandSciencesRequirements> for more information.

**Requirement F - Clinical Experiences**

Visit <https://education.barnard.edu/UrbanTeaching/ClinicalExperiences> for more information.

\* Courses offered at Columbia

Note: Senior year student teaching may conflict with other opportunities at Barnard (e.g., PSYC BC3465 Field Work # Research Seminar: Toddler Center, PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER). Students with these interests should arrange their schedules accordingly.

## Secondary/Adolescent Education (To Teach Grades 7-12)

This program leads to the New York State Initial Certification in Adolescent Education (Grades 7-12) in the fields of English, Foreign and Ancient Languages, Mathematics, the Sciences, and Social Studies. Students must complete a total of 32-34 credits from the following course of study:

**Requirement A - Educational Foundations** For students who have already taken EDUC BC3032, PHIL UN2100, SOCI UN3225, or ECON BC3012 to fulfill Requirement A prior to Fall 2018 do not need to enroll in EDUC BC1510 to fulfill the requirement.

EDUC BC1510	FOUNDATIONS OF EDUCATION	4
-------------	--------------------------	---

**Requirement B - Psychology**

Select one of the following: 3-4.5

PSYC BC1107	Psychology of Learning
PSYC BC1115	Cognitive Psychology
PSYC BC1129	Developmental Psychology
PSYC BC2134	Educational Psychology
PSYC BC3382	ADOLESCENT PSYCHOLOGY
PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR *

**Requirement C - Pedagogical Elective**

Select one of the following:

EDUC BC3050	SCIENCE IN THE CITY
EDUC BC3052	MATH # THE CITY
EDUC BC3055	ARTS AND HUMANITIES IN THE CITY:CRITICAL
EDUC BC3058	SCIENCE IN THE CITY II

**Requirement D - Pedagogical Core**

EDUC BC3025	INCLUSIVE APPROACHES TO TEACHING LITERACY: THEORY AND PRACTICE	4
-------------	--	---

EDUC BC3054	MULTICULTURAL SECONDARY PEDAG	4.00
-------------	-------------------------------	------

EDUC BC3065	SECONDARY STU TCHNG URB SCHLS	6.00
-------------	-------------------------------	------

EDUC BC3064	SEM: ISSUES URBAN TEACHING	4
-------------	----------------------------	---

EDUC BC3061	ASSESSMENT OF TEACHING	3.00
-------------	------------------------	------

**Requirement E - Liberal Arts and Sciences**

Visit <https://education.barnard.edu/UrbanTeaching/LiberalArtsandSciencesRequirements> for more information.

**Requirement F - Clinical Experiences**

Visit <https://education.barnard.edu/UrbanTeaching/ClinicalExperiences> for more information.

### Additional Urban Teaching Certification Requirements: Adolescent/Secondary

Students seeking certification in Adolescent Education must also complete 36 credits in the content area for which they seek certification. Typically, students major in the subject area for which they are seeking certification. Students must earn a grade of C or better for each course taken in the content core.

**English:**

A total of 36 credits of English.

**Foreign Languages:**

A total of 36 credits in French, German, Greek, Italian, Latin, or Spanish.

**Mathematics:**

A total of 36 credits of Mathematics.

**Science:**

A total of 36 credits in sciences including a minimum of 18 credits of collegiate-level study in the science or each of the sciences for which certification is sought: Biology, Chemistry, Physics, or Earth Science. Please note that psychology does not count as a science for NYS Teacher Certification. \*\*

**Social Studies:**

A total of 36 credits, including 6 credits of American History; 6 credits of European or World History; 3 credits of non-Western study; and any other distribution to make 36 credits, chosen from credits in History, Political Science, Anthropology, Sociology, and Economics.

\* Courses offered at Columbia

\*\*Please note that some applied science courses will not be accepted.

## Certification Requirements

The Urban Teaching program is accredited by AAQEP and approved by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (grades 1-6) or Adolescent Education (grades 7-12). New York State has reciprocity with most other states, allowing graduates of the program the ability to apply for certification in another

state through our membership in the Interstate Certification Agreement.

Certification is based on demonstrated competency in both academic and field settings. Students are required to complete a minimum of 360 hours of educational based clinical experiences. 260+ hours must be supervised field based experiences. Students must pass the New York State Teacher Certification Examinations and the edTPA performance assessment. Also required are workshops in Child Abuse Identification; School Violence Intervention and Prevention; and the Dignity for All Students Act (DASA), offered at Teachers College.

## REQUIREMENTS FOR THE EDUCATION STUDIES MINOR/SPECIAL CONCENTRATION

To complete the Minor (BC) or Special Concentration (CC/GS) in Education Studies, students must complete 21-24 points of course work, listed below.

The Education Studies track requires a minimum of six courses:

### Requirement A - Educational Foundations

EDUC BC1510	FOUNDATIONS OF EDUCATION	4
-------------	--------------------------	---

### Requirement B - Educational Electives

Select three of the following: One Educational Elective course must be an EDUC course.

EDUC BC3030	Critical Pedagogies	
EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY	
EDUC BC3034	Families, Communities, and Schools	
EDUC BC3040	MIGRATION, GLOBALIZATION, AND EDUCATION	
EDUC BC3042	GENDER, SEXUALITY, AND SCHOOL	
EDUC BC3044	EDUCATION AND SOCIAL CHANGE IN COMPARATIVE GLOBAL CONTEXTS	
EDUC BC3045	COMPLICATING CLASS: EDUCATION AND THE LIMITS OF EQUITY	
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY	
URBS UN3310	RACE. SPACE, URB SCHOOLS	
AMST UN3931	Topics in American Studies (Sec. 002: Race, Poverty, and American Criminal Justice or Sec. 003: Equity in Higher Education)	
CSER UN3928	COLONIZATION/ DECOLONIZATION	
ECON BC3012	THE ECONOMICS OF EDUCATION	

PHIL UN2100	Philosophy of Education	
PSYC BC2134	Educational Psychology	
PSYC BC3363	PEDAGOGY HIGHER EDUC:PSYCH	
PSYC BC3382	ADOLESCENT PSYCHOLOGY	
SOCI UN3225	SOCIOLOGY OF EDUCATION	
SOCI W3923	Adolescent Society	
SOCI UN3974	SOCI OF SCHOOLS,TEACH,LEARNING *	

### Requirement C - Pedagogical Elective

Select one of the following:

EDUC BC3050	SCIENCE IN THE CITY	
EDUC BC3052	MATH # THE CITY	
EDUC BC3055	ARTS AND HUMANITIES IN THE CITY:CRITICAL	
EDUC BC3058	SCIENCE IN THE CITY II	

### Requirement D - Pedagogical Core

EDUC BC3051	SEMINAR URBAN EDUCATION	4
-------------	-------------------------	---

\* Courses offered at Columbia

## REQUIREMENTS FOR THE URBAN TEACHING SPECIALIZATION

Urban Studies majors who wish to pursue certification should apply to the Education Program by the spring of their freshman year. We encourage students to plan carefully if they wish to pursue this option.

Urban Studies majors who have selected Urban Teaching as their area of specialization within the major should complete the following:

### Requirement A - Educational Foundations

EDUC BC1510	FOUNDATIONS OF EDUCATION	4
-------------	--------------------------	---

### Requirement B - Psychology

Select one of the following:

PSYC BC1107	Psychology of Learning	
PSYC BC1115	Cognitive Psychology	
PSYC BC1129	Developmental Psychology	
PSYC BC2134	Educational Psychology	
PSYC BC3382	ADOLESCENT PSYCHOLOGY	
PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR *	

### Requirement C - Field Studies

Select one of the following:

EDUC BC3050	SCIENCE IN THE CITY	
EDUC BC3052	MATH # THE CITY	
EDUC BC3055	ARTS AND HUMANITIES IN THE CITY:CRITICAL	
EDUC BC3058	SCIENCE IN THE CITY II	

SOCI UN3974 SOCI OF  
SCHOOLS,TEACH,LEARNING  
\*

**Requirement D - Pedagogical Core**

EDUC BC3025	INCLUSIVE APPROACHES TO TEACHING LITERACY: THEORY AND PRACTICE	4
EDUC BC3053	MULTICULTURAL ELEMENTARY PEDA	4
or EDUC BC3054	MULTICULTURAL SECONDARY PEDAG	

\* Courses offered at Columbia

## REQUIREMENTS FOR THE URBAN EDUCATION SPECIALIZATION

Urban Studies majors who have selected Urban Education as their area of specialization within the major should complete the following:

**Requirement A - Educational Foundations**

EDUC BC1510	FOUNDATIONS OF EDUCATION	4
-------------	-----------------------------	---

**Requirement B - Educational Electives**

Select two of the following:

EDUC BC3030	Critical Pedagogies
EDUC BC3032	INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY
EDUC BC3034	Families, Communities, and Schools
EDUC BC3040	MIGRATION, GLOBALIZATION, AND EDUCATION
EDUC BC3042	GENDER, SEXUALITY, AND SCHOOL
EDUC BC3044	EDUCATION AND SOCIAL CHANGE IN COMPARATIVE GLOBAL CONTEXTS
EDUC BC3045	COMPLICATING CLASS: EDUCATION AND THE LIMITS OF EQUITY
EDUC BC3250	EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY
URBS UN3310	RACE. SPACE, URB SCHOOLS
PHIL UN2100	Philosophy of Education
SOCI UN3225	SOCIOLOGY OF EDUCATION
ECON BC3012	THE ECONOMICS OF EDUCATION

**Requirement C - Field Studies**

Select one of the following:

EDUC BC3050	SCIENCE IN THE CITY
EDUC BC3052	MATH # THE CITY
EDUC BC3055	ARTS AND HUMANITIES IN THE CITY:CRITICAL

EDUC BC3058 SCIENCE IN THE CITY II  
SOCI UN3974 SOCI OF  
SCHOOLS,TEACH,LEARNING  
\*

**Requirement D - Capstone**

EDUC BC3051	SEMINAR URBAN EDUCATION	4
-------------	----------------------------	---

\* Courses offered at Columbia

\*EDUC BC3030 *Critical Pedagogies* can count towards the Education Electives **or** the Pedagogical Elective requirement in Spring 2021 only.

The department of Education is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.

### EDUC BC1510 FOUNDATIONS OF EDUCATION. 3.00 points.

Students are required to attend a discussion section.

Introduction to the psychological, philosophical, sociological, and historical foundations of education as way to understand what education is, how education has become what it is, and to envision what education should be

**Fall 2024: EDUC BC1510**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 1510	001/00372	M W 1:10pm - 2:25pm 140 Horace Mann Hall	Drew Chambers	3.00	30/40
EDUC 1510	002/00373	M W 4:10pm - 5:25pm 323 Milbank Hall	Ishrat Ahmed	3.00	28/40

**Spring 2025: EDUC BC1510**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 1510	001/00795	M W 4:10pm - 5:25pm 203 Diana Center	Ishrat Ahmed	3.00	43/40
EDUC 1510	002/00796	T Th 11:40am - 12:55pm LI001 Milstein Center	Fawziah Qadir	3.00	53/50

### EDUC BC3032 INVESTIGATING THE PURPOSES AND AIMS OF EDUCATION POLICY. 4.00 points.

Prerequisites: the instructor's permission. Open to all students, preference given to Urban Teaching, Ed Studies and Urban Studies. Enrollment limited to 15 students for each section.

Prerequisites: the instructors permission. Course enrollment will be determined after the first class meeting. Open to all students; preference given to Urban Teaching, Education Studies, and Urban Studies students. This course explores a broad continuum of educational policies, with a critical eye toward the impact these policies have on promoting equity and

justice. Because no one course can do everything, our focus will be on educational policy in the United States. However, a major research assignment will be for you to do a critical analysis of one of these policies in the context of another country

### **EDUC BC3044 EDUCATION AND SOCIAL CHANGE IN COMPARATIVE GLOBAL CONTEXTS. 4.00 points.**

This course will examine the relationship between education and social change in different regions of the world, with a focus on vulnerable populations (e.g., indigenous groups, street and working children, immigrants, women and girls; refugees)

**Fall 2024: EDUC BC3044**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3044	001/00388	Th 2:10pm - 4:00pm 119 Milstein Center	Fawziah Qadir	4.00	17/24

### **EDUC BC3050 SCIENCE IN THE CITY. 4.00 points.**

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. In partnership with the American Museum of Natural History students investigate science, science pedagogical methods, and ways to use New York City as a resource for science teaching and learning. Sessions will be held at Barnard and the museum. Field trips and fieldwork required. Non-science majors pre-service elementary students and first year students, welcome. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective

**Fall 2024: EDUC BC3050**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3050	001/00390	F 10:10am - 12:00pm 222 Milbank Hall	Althea Hoard	4.00	9/20

### **EDUC BC3051 SEMINAR URBAN EDUCATION. 4.00 points.**

This seminar serves as the capstone course for students pursuing the Education Studies minor/special concentration or the Urban Studies major/concentration with an Urban Education Specialization. The Seminar in Urban Education explores the historical, political and socio-cultural dynamics of urban education in the U.S. context. Over time, a range of social actors have intervened in the “problem” of urban education, attempting to reshape and reform urban schools. Others have disputed this “problem” focused approach, arguing that policy makers, teachers, and researchers should start from the strengths and capacities located in urban communities. Despite decades of wide ranging reform efforts, however, many urban schools still fail to provide their students with an adequate, equitable education. Seminar in Urban Education investigates this paradox by pursuing three central course questions: 1) How have various social actors tried to achieve equity in urban schools over time? 2) What are the range and variation of assets and challenges found in urban schools? and 3) Considering this history and context, what would effective reform in a global city like NYC look like? Students will engage these questions not only through course readings and

seminar discussions, but through a 40-hour field placement in a New York City public school classroom, extra-curricular program, or other education based site

**Fall 2024: EDUC BC3051**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3051	001/00394	Th 12:10pm - 2:00pm 501 Diana Center	Rachel Throop	4.00	13/18

### **EDUC BC3053 MULTICULTURAL ELEMENTARY PEDAG. 4.00 points.**

This seminar will engage prospective teachers in developing effective strategies for teaching at the elementary school level in ways that draw upon five specific domains of knowledge: knowledge of self, content, pedagogy, context and students. Students will be introduced to a variety of teaching approaches and develop ways to adapt them to teach various subjects to students in urban public school settings, understanding the intellectual, social and emotional needs of elementary school students. Students will learn to write lesson plans, develop assessments and practice teaching in “microteaching” sessions taught to peers. We will explore state standards, approaches to classroom management, and Universal Design for Learning as we develop approaches to create caring, democratic learning communities

**Fall 2024: EDUC BC3053**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3053	001/00396	W 4:10pm - 7:00pm L1001 Milstein Center	Lisa Edstrom	4.00	4/10

### **EDUC BC3054 MULTICULTURAL SECONDARY PEDAG. 4.00 points.**

What does it mean to be an excellent teacher? The Seminar in Secondary Multicultural Pedagogy will engage this question as you work to develop methods for teaching your subject(s) in ways that draw upon five specific domains of knowledge: knowledge of self, content, pedagogical methods, context, and students. You will be introduced to a variety of multicultural teaching approaches and develop ways to adapt them to your particular subject area and to the intellectual, social, and emotional needs of adolescent learners. Throughout the course, we will consider how to effectively differentiate instruction for and support ELL students and students with special needs. Seminar sessions will include discussions, presentations of lessons, group activities, and problem-solving issues teachers encounter in the classroom. We will explore culturally responsive approaches to: learning; learning standards; instruction and assessment; creating caring, democratic learning communities; selecting curriculum content, and engaging all students in learning. Assignments will ask you to reflect on the teaching/learning process in general, and on the particulars of teaching your academic discipline. We will accomplish this through lesson planning, practice teaching two mini-lessons, observing your peers teaching and offering feedback, and

exploring stances and strategies for multicultural pedagogy in your content area

**Fall 2024: EDUC BC3054**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3054	001/00397	W 4:10pm - 7:00pm LI001 Milstein Center	Lisa Edstrom	4.00	6/10

**EDUC BC3055 ARTS AND HUMANITIES IN THE CITY:CRITICAL. 4.00 points.**

Using the theme of “Arts and Humanities in the City”, this seminar will build participants’ knowledge of critical literacy, digital storytelling methods, and ways to use New York City as a resource for teaching the Arts (Dance, Theatre, Music, and Visual Arts), Social Studies, and English Language Arts in grades K-12. Critical literacy is an approach to teaching and learning that focuses on developing students’ abilities to read, analyze, understand, question, and critique hidden perspectives and socially-constructed power relations embedded in what it means to be literate in a content area

**Fall 2024: EDUC BC3055**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3055	001/00399	Th 10:10am - 12:00pm 502 Diana Center	Drew Chambers	4.00	15/20

**Spring 2025: EDUC BC3055**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3055	001/00460	Th 12:10pm - 2:00pm 113 Milstein Center	Drew Chambers	4.00	17/20

**EDUC BC3064 SEM: ISSUES URBAN TEACHING. 4.00 points.**

Corequisites: EDUC BC3063 or EDUC BC3065. Enrollment limited to student teachers enrolled in the Education Program. Designed to help student teachers develop as reflective practitioners who can think critically about issues facing urban schools, particularly how race, class and gender influence schooling; and to examine the challenges and possibilities for providing intellectually engaging, meaningful curriculum to all students in urban classrooms

**Fall 2024: EDUC BC3064**

**EDUC BC3025 INCLUSIVE APPROACHES TO TEACHING LITERACY: THEORY AND PRACTICE. 6.00 points.**

This seminar engages students in an exploration of how schools prepare students to be literate across multiple subject areas. Engaging students with theory and practice, we will look at how students learn to read and write, considering approaches for literacy instruction from early childhood through adolescence. Understanding that schools are required

to meet the needs of diverse learners, we will explore literacy instruction for K-12 students with special needs, multilingual learners, and students from diverse cultural backgrounds. This course requires 60 hours of clinical experience (fieldwork)

**Spring 2025: EDUC BC3025**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3025	001/00798	T 9:00am - 11:50am 501 Diana Center	Drew Chambers	6.00	8/16

**EDUC BC3030 Critical Pedagogies. 4.00 points.**

This course explores education as a process through which critical consciousness and epistemic justice combat oppression in communities. Students will connect seminal work by critical pedagogues, such as Paolo Freire and bell hooks, to systemic educational challenges and lived experience. As a class, we will investigate power dynamics and structural inequalities at the systemic, institutional, interpersonal and individual levels. Students will problem-pose, dialogue and create pedagogical tools through praxis, by integrating the theory learned in the class to educational practice

**Fall 2024: EDUC BC3030**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3030	001/00378	T 2:10pm - 4:00pm 227 Milbank Hall	Fawziah Qadir	4.00	19/24

**EDUC BC3040 MIGRATION, GLOBALIZATION, AND EDUCATION. 4.00 points.**

Globalization and mass migration are reconfiguring the modern world and reshaping the contours of nation-states. New technologies that facilitate the movement of information, goods and people across borders have made it easier for people to remain culturally, politically, economically and socially connected to the places from which they migrated. This seminar focuses on the experiences of the youngest members of these global migration patterns—children and youth—and asks: What do these global flows mean for educating young people to be members of the multiple communities to which they belong? This seminar will explore the following questions: What is globalization and why is it leading to new patterns of migration? How do children and youth experience ruptures and continuities across contexts of migration? How do language policies affect young people's capacity to be educated in a new land? What does it mean to forge a sense of belonging and citizenship in a "globalized" world, and how does this challenge our models of national citizenship? How are the processes by which young people are incorporated into their new country entwined with structures of race, class, and gender? Drawing on fiction, autobiography, and anthropological and sociological research this class will explore these questions from a variety of disciplinary perspectives

**Fall 2024: EDUC BC3040**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3040	001/00384	M 10:10am - 12:00pm 502 Diana Center	Orubba Almansouri	4.00	14/20

**EDUC BC3042 GENDER, SEXUALITY, AND SCHOOL. 4.00 points.**

Broadly, this course explores the relationship between gender, sexuality, and schooling across national contexts. We begin by considering theoretical perspectives, exploring the ways in which gender and sexuality have been studied and understood in the interdisciplinary field of education. Next, we consider the ways in which the subjective experience of gender and sexuality in schools is often overlooked or inadequately theorized. Exploring the ways that race, class, citizenship, religion and other categories of identity intersect with gender and sexuality, we give primacy to the contention that subjectivity is historically complex, and does not adhere to the analytically distinct identity categories we might try to impose on it

**Spring 2025: EDUC BC3042**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3042	001/00442	M 11:00am - 12:50pm 306 Milbank Hall	Ileana Jimenez	4.00	18/20

**EDUC BC3051 SEMINAR URBAN EDUCATION. 4.00 points.**

This seminar serves as the capstone course for students pursuing the Education Studies minor/special concentration or the Urban Studies major/concentration with an Urban Education Specialization. The Seminar in Urban Education explores the historical, political and socio-cultural dynamics of urban education in the U.S. context. Over time, a range of social actors have intervened in the "problem" of urban education, attempting to reshape and reform urban schools. Others have disputed this "problem" focused approach, arguing that policy makers, teachers, and researchers should start from the strengths and capacities located in urban communities. Despite decades of wide ranging reform efforts, however, many urban schools still fail to provide their students with an adequate, equitable education. Seminar in Urban Education investigates this paradox by pursuing three central course questions: 1) How have various social actors tried to achieve equity in urban schools over time? 2) What are the range and variation of assets and challenges found in urban schools? and 3) Considering this history and context, what would effective reform in a global city like NYC look like? Students will engage these questions not only through course readings and seminar discussions, but through a 40-hour field placement in a New York City public school classroom, extra-curricular program, or other education based site

**Fall 2024: EDUC BC3051**

**EDUC BC3052 MATH # THE CITY. 4.00 points.**

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. In partnership with NYC public school teachers, students will have opportunities

to engage in mathematical learning, lesson study, curriculum development, and implementation, with a focus on using the City as a resource. Students will explore implications for working with diverse populations. Non-math majors, pre-service elementary students and first-year students welcome. Fieldwork and field trips required. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective

**Spring 2025: EDUC BC3052**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3052	001/00495	W 10:10am - 12:00pm 306 Milbank Hall	Maria Rivera Maulucci	4.00	8/20

**EDUC BC3058 SCIENCE IN THE CITY II. 4.00 points.**

Prerequisites: the instructors permission. Open to Non-science majors, pre-service elementary students, and first-year students. Students investigate the science of learning, the Next Generation Science Standards, scientific inquiry and engineering design practices, and strategies to include families in fostering student achievement and persistence in science. Fieldwork required. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective

**EDUC BC3061 ASSESSMENT OF TEACHING. 3.00 points.**

Open to Urban Teaching students in the Education Program.

**EDUC BC3063 STUDENT TEACHING/URBAN SCHOOLS. 6.00 points.**

Prerequisites: completion of EDUC BC2052 or EDUC BC2062 and EDUC BC2055, with grades of B or better. NYCDOE Fingerprinting. Corequisites: EDUC BC3064. Enrollment limited. Supervised student teaching in elementary schools includes creating lesson plans, involving students in active learning, using cooperative methods, developmentally appropriate assessment, and meeting the needs of diverse learners in urban schools. Teaching skills developed through weekly individual and/or group supervision meetings (to be scheduled at the beginning of the semester), conferences, and portfolio design. Requires 100 hours of teaching at two different grade levels, full-time for one semester. Note: Students are only permitted to leave their student teaching placements early twice a week, once for EDUC BC3064 and one other day for one additional course having a start time of 2 pm or later. Students are only permitted to take one additional course while enrolled in EDUC BC3063 and EDUC BC3064

**Spring 2025: EDUC BC3063**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EDUC 3063	001/00464	T 4:10pm - 6:00pm 225 Milbank Hall	Drew Chambers	6.00	4/5

**EDUC BC3065 SECONDARY STUDENT TEACHING URBAN SCHOOLS. 6.00 points.**

Prerequisites: Completion of EDUC BC2052 or EDUC BC2062 and EDUC BC2055, with grades of B or better. NYCDOE

Fingerprinting required. Corequisites: EDUC BC3064.

Enrollment limited. Supervised student teaching in secondary schools includes creating lesson plans, involving students in active learning, using cooperative methods, developmentally appropriate assessment, and meeting the needs of diverse learners in urban schools. Teaching skills developed through weekly individual and/or group supervision meetings (to be scheduled at the beginning of the semester), conferences, and portfolio design. Requires 100 hours of teaching at two different grade levels, full-time for one semester. Note: Students are only permitted to leave their student teaching placements early twice a week, once for EDUC BC3064 and one other day for one additional course having a start time of 2 pm or later. Students are only permitted to take one additional course while enrolled in EDUC BC3064 and EDUC BC3065

**URBS UN3310 RACE, SPACE, URBAN SCHOOLS. 3.00 points.**

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and

sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory

**Fall 2024: URBS UN3310**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**EDUC BC3250 EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY. 4.00 points.**

The rise in political polarization and social inequality over the past few decades has challenged the ideals that public schools were founded on nearly two centuries ago. In the past few years, we have witnessed a surge in homophobic, racist, misogynist, and xenophobic rhetoric in our society and our schools. At the same time, teachers in classrooms across this country have been engaged in the difficult work of challenging oppression and injustice in their schools, communities, and nation. These teachers know that the future of our democracy is at stake. Using a historical and sociological framework, this course examines the past and present conditions that have led to political polarization, escalating inequality, and persistent injustice. It seeks to examine the lineage of racism, sexism, nativism, and imperialism on our nation and its schools and to consider the extent to which these challenges are uniquely American or part of a more global phenomenon. It offers an introduction to the deep current of American social, political, and economic culture that many argue has produced the challenges that our nation faces today: personal and political gain marred by intolerance, derived from wealth, and rooted in the history of segregation, sexism, and exploitation. Instead of seeing these challenges as separate entities, the course acknowledges the intersectional nature of power and politics. Students will consider how these conditions affect their roles as educators and the lives of the youth and families in their schools and communities. They will leave the course with a deeper appreciation and understanding of the historical and sociological antecedents that have contributed to polarization, inequity, and injustice around the globe

## CROSS-LISTED COURSES

**ECON BC3012 THE ECONOMICS OF EDUCATION. 3.00 points.**

Prerequisites: ECON BC3035 and ECON BC2411 or permission of the instructor. Analyzes education policies and education markets from an economic perspective. Examines challenges that arise when researchers attempt to identify the causal effects of inputs. Other topics: (1) education as an investment, (2) public school finance, (3) teacher labor markets,

(4) testing/accountability programs, (5) school choice programs, and (6) urban public school reforms

**Spring 2025: ECON BC3012**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3012	001/00803	T Th 1:10pm - 2:25pm 152 Horace Mann Hall	Randall Reback	3.00	31/45

**PHIL UN2100 Philosophy of Education. 3 points.**

Drawing on classical and contemporary sources, this course will introduce students to a variety of texts that address the philosophical consideration of education, including its role in the development of the individual and the development of a democratic society. Readings from Plato, Rousseau, Dewey, and others.

**PSYC BC2134 Educational Psychology. 3 points.**

Prerequisites: BC1001 or permission of the instructor.

Through a participative classroom model, the major theories of child and adolescent development and learning fundamental to the educative process are examined. Analysis of applications and implications of psychological knowledge for classroom teaching through observations and research in elementary and secondary school classes. Examines models of instruction and assessment; motivation, teaching, and learning strategies; and gender, economic, and racial issues.

**PSYC BC3382 ADOLESCENT PSYCHOLOGY. 4.00 points.**

Prerequisites: BC1001 and BC1129 Developmental Psychology or permission of the instructor. Enrollment limited to 20 senior majors. Barnard students receive priority. Examines adolescent development in theory and reality. Focuses on individual physiological, sexual, cognitive, and affective development and adolescent experiences in their social context of family, peers, school, and community. Critical perspectives of gender, race and ethnicity, sexuality, and teen culture explored

**Spring 2025: PSYC BC3382**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3382	001/00264	T 9:00am - 10:50am 405 Barnard Hall	Erica Musser	4.00	17/16

**URBS UN3310 RACE. SPACE, URB SCHOOLS. 3.00 points.**

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections

between city schools and their local contexts? What does it mean to be a “neighborhood school”? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory

#### Fall 2024: URBS UN3310

## ENGLISH AND COMPARATIVE LITERATURE

### THE ENGLISH AND COMPARATIVE LITERATURE DEPARTMENT:

**Departmental Office:** 602 Philosophy Hall; 212-854-3215  
<http://www.english.columbia.edu>

**Director of Undergraduate Studies:** Prof. Nicholas Dames, 603 Philosophy; 212-854-4016; [nicholas.dames@columbia.edu](mailto:nicholas.dames@columbia.edu)

**Undergraduate Coordinator:** Alexa Adams, 602 Philosophy; 212-854-6295; [enclundergraduatecoordinator@columbia.edu](mailto:enclundergraduatecoordinator@columbia.edu)

### THE STUDY OF ENGLISH AND COMPARATIVE LITERATURE

The program in English fosters the ability to read critically and imaginatively, to appreciate the power of language to shape thought and represent the world, and to be sensitive to the ways in which literature is created and achieves its effects. It has several points of departure, grounding the teaching of critical reading in focused attention to the most significant works of English literature, in the study of the historical and social conditions surrounding literary production and reception, and in theoretical reflection on the process of writing and reading and the nature of the literary work.

The courses the department offers draw on a broad range of methodologies and theoretical approaches, from the formalist

to the political to the psychoanalytical (to mention just a few). Ranging from the medieval period to the 21st century, the department teaches major authors alongside popular culture, traditional literary genres alongside verbal forms that cut across media, and canonical British literature alongside postcolonial, global, and trans-Atlantic literatures.

At once recognizing traditional values in the discipline and reflecting its changing shape, the major points to three organizing principles for the study of literature—history, genre, and geography. Requiring students not only to take a wide variety of courses but also to arrange their thinking about literature on these very different grids, the major gives them broad exposure to the study of the past, an understanding of the range of forms that can shape literary meaning, and an encounter with the various geographical landscapes against which literature in English has been produced.

## STUDENT ADVISING

### Consulting Advisers

Questions about coursework or program requirements can be addressed to the department’s **Undergraduate Coordinator**, to the **Director of Undergraduate Studies (DUS)**, or to any member of the department’s **Committee on Undergraduate Education (CUE)**. The DUS and CUE are the department’s de facto academic advisors, and hold open office hours each week to offer guidance to majors, minors, and concentrators, as well as those interested in declaring in future.

Newly-declared majors or minors should make an **appointment with the DUS or a CUE member** to discuss their academic plans as soon as possible after declaration. They should also contact the Undergraduate Coordinator and request that their names be added to the department’s **listserv**, which disseminates information and updates about courses, events, deadlines, and other matters.

Throughout the year, the CUE will also organize dedicated **information sessions** about graduate study, professional development, fellowship and prize applications, and more.

## COURSE INFORMATION

### Lectures

Generally, lectures are addressed to a broad audience and do not assume previous course work in the area, unless prerequisites are noted in the description. The size of some lectures is limited. Senior majors have preference unless otherwise noted, followed by junior majors, followed by senior and junior non-majors. Students are responsible for checking for any special registration procedures on-line at <https://english.columbia.edu/content/course-listings>.

### Seminars

The department regards seminars as opportunities for students to do advanced undergraduate work in fields in which they have already had some related course experience. With the exception

of some *CLEN* classes (in which, as comparative courses, much material is read in translation), students' admission to a seminar presupposes their having taken ENGL UN2000 Approaches to Literary Study. During the three weeks preceding the registration period, students should check <https://english.columbia.edu/content/course-listings> for application instructions for individual seminars. Applications to seminars are usually due by the end of the week preceding registration. Students should always assume that the instructor's permission is necessary; those who register without having secured the instructor's permission are not guaranteed admission.

## UNDERGRADUATE RESEARCH OPPORTUNITIES

### Independent Study Projects

During the regular academic semester, students may design and undertake an individualized Independent Study with the sponsorship of a faculty member, in order to pursue a particular interest that is not represented in a given semester's course offerings.

Most Independent Study projects are awarded 3 points of academic credit, but proposals can stipulate anywhere from 1-4 points, depending on workload. For guidance on course points, see [here](#).

To propose an Independent Study, please complete [this form](#) and submit it to the Undergraduate Coordinator no later than two weeks prior to the start of classes, for review by the DUS and CUE.

Note that you **cannot register** for an independent study without official departmental approval.

### The Richmond Williams Travelling Fellowship

The Williams Fellowship supports summer research projects requiring foreign travel, with grants of up to \$6000.00. The competition is open to any Columbia College junior majoring in English and Comparative Literature. Recipients of the award must undertake a significant piece of independent scholarship based on their research in the senior year – either as an independent study, or as part of the Senior Essay program. The application can be found on the department website [here](#). Note: it is highly recommended that applicants review Columbia's [Undergraduate International Travel Policy](#) before and during the application process.

### The Humanities Research Scholars Program

The Humanities Research Scholars Program (HRSP) offers a select group of rising juniors at Columbia College the opportunity to pursue independent research projects and to develop analytical and investigative skills that will serve them well in any future endeavor. This program is designed to help students learn from one another as well as from leaders in the academic and professional world, and to support students in their intellectual pursuits and their future growth. It focuses on

students interested in research in the humanities or humanistic social sciences.

Humanities Research Scholars will engage in two main pursuits over the course of one summer session of research: (1) the development of knowledge, skills, and approaches to the study of the humanities that will be transferable to any professional field; and (2) the development of an independent research project over six weeks of the summer that allows the exploration of a specific topic with guidance from a faculty member.

Learn more about the HRSP [here](#).

### Other opportunities

The Undergraduate Research and Fellowships office frequently posts opportunities for research across fields, [here](#). Within English, faculty occasionally seek research assistants for help on specific projects; such calls for research assistants are usually made through the departmental listserv.

## THE SENIOR ESSAY PROGRAM

The Senior Essay program is an opportunity for majors in English and Comparative Literature to explore some literary topic of special interest to them in depth. Essay projects typically involve extensive critical reading and/or original research, and result in a piece of written work (approximately 10,000 words) that constitutes a substantial critical or scholarly argument.

To undertake a Senior Essay, students must first register for the fall research methods seminar, ENGL UN3795. In the spring, essayists then continue work on their projects with the guidance of a dedicated faculty advisor, and submit their final drafts in April. Examples of past Senior Essays in English can be found [here](#).

Note that English majors are **not required** to write a Senior Essay (although it is a requirement for eligibility for Departmental Honors).

## DEPARTMENTAL HONORS AND ACADEMIC PRIZES

### Departmental Honors:

Each year, in consultation with the faculty, the CUE awards Departmental Honors to no more than 10% of graduating majors. Honors are determined on the basis of the Senior Essay, as well as performance in departmental coursework and participation in departmental culture.

### Academic Prizes:

The English department awards numerous prizes for critical and creative writing each year; information about these prizes can be found [here](#).

## THE DEGREE AUDIT REPORTING SYSTEM (DARS)

The DAR is a useful tool for students to monitor their progress toward degree requirements, but it is not an official document for the major or concentration, nor should it replace consultation with departmental advisers. The department's director of undergraduate studies is the final authority on whether requirements for the major have been met. Furthermore, the DAR may be inaccurate or incomplete for any number of reasons—for example, courses taken elsewhere and approved for credit do not show up on the DAR report as fulfilling a specific requirement.

Students should fill out a Major Requirements Worksheet early in the semester preceding graduation. The worksheet must be reviewed by an adviser and submitted to 602 Philosophy before the registration period for the final semester. The worksheet is available in the English Department or on the department website [here](#).

## ONLINE INFORMATION

Other departmental information—faculty office hours, registration instructions, late changes, etc.—is available on the [departmental website](#).

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

There are many paths through a degree in English and Comparative Literature, even within the requirements described below. Students considering a major or minor are encouraged to make an appointment with the DUS to discuss their particular interests and goals. They should also feel free to enroll in one of the department's gateway lectures (1000-level), which have no prerequisites. Students who are already embarked on a degree in English should also be sure to check in with the DUS or a member of CUE regularly to ensure that they complete their requirements in the most rewarding way possible.

### Enrolling in Courses

In the weeks before registration, the [departmental website](#) will continually update course information, including prerequisites and course caps. Please be sure to check each course's particular registration guidelines, as these can vary dramatically; for seminars, in particular, instructor permission is required for enrollment, and instructors will often require a specific application in order to consider any student for admission.

## Approaches to Literary Study

The introductory course ENGL UN2000 Approaches to Literary Study, together with its companion seminar, ENGL UN2001 Approaches to Literary Study Seminar, is required for the English major, minor, or concentration. It should be taken by the end of the sophomore year. Fulfillment of this requirement is a factor in admission to seminars and to some lectures. This once-a-week faculty lecture, accompanied by a seminar led by an advanced graduate student in the department, is intended to introduce students to the study of literature. Students read works from the three major literary modes (lyric, drama, and narrative), drawn from premodern to contemporary literature, and learn interpretative techniques required by these various modes or genres. This course does not fulfill any distribution requirements.

## Course Numbering Structure

**1000-level:** Courses in this tier are broad gateway lectures, and do not require prior knowledge of or coursework in English.

**2000-level:** Courses in this tier are lectures focused on more specialized topics. These courses may have prerequisites at the instructors' discretion, and may also offer weekly discussion sections to complement lectures.

**3000-level:** Courses in this tier are seminars intended for English majors and minors (though others are welcome to apply), and are capped at 18 students. While particular seminars may have particular requirements for admission, seminar applicants are generally expected to have taken ENGL 2000: Approaches to Literary Study.

**4000-level:** Courses in this tier are advanced seminars, which require significantly more reading and writing than other courses offered by the department. Priority for enrollment will be given to senior English majors, although faculty may admit others (including graduate students) if space permits.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in English (for students who matriculated in 2023-4 and prior)

Please read *Guidelines for all English and Comparative Literature Majors and Concentrators* above.

**At least 10 courses in English, including:**

#### The Introductory Course

- **either** ENGL 3001: *Literary Texts and Critical Methods*, or ENGL 2000: *Approaches to Literary Study*

#### Distribution Requirements

- **one** course focused on **each** of the following **genres** (3 courses total): poetry, prose, drama/film/media

- **one** course focused on **each** of the following **geographical** areas (3 courses total): British, American, Global/Comparative
- **three** courses focused on literature **pre-1800** (only one of which can be a Shakespeare course)

(Designations of distribution requirements can be found on the department's course listings site; note that a single course can fulfill more than one distribution requirement; Shakespeare 1, for example, would cover British, drama, and one pre-1800).

### Major in English (for students who matriculated in 2024-5 and after)

**At least 10 courses in English, including:**

#### The Introductory Course

- ENGL 2000: *Approaches to Literary Study*

#### Distribution Requirements

- **one** course focused on **each** of the following **genres** (3 courses total): poetry, prose, drama/film/media
- **one** course focused on **each** of the following **geographical** areas (3 courses total): British, American, Global/Comparative
- **one** course focused on the study of **ethnicity and race**
- **two** courses focused on literature **pre-1700** (only one of which can be a Shakespeare course)
- **one** course focused on literature **1700-1900**
- **one** course focused on literature **1900-present**

(Designations of distribution requirements can be found on the department's course listings site; note that a single course can fulfill more than one distribution requirement; Shakespeare 1, for example, would cover British, drama, and one pre-1700).

#### Capstone

**either** a Senior Essay **or** an advanced (4000-level) seminar

---

## Minor in English

**Any 5 courses in English, including** ENGL 2000: Approaches to Literary Study. Students who wish to minor in English should meet with the DUS or CUE to plan out their particular course of study.

#### Coursework Options and Restrictions

- **AP credits.** These cannot be counted toward the major/minor/concentration.

- **Barnard English Courses.** These can be applied to the major/minor/concentration without special approval for the first two courses, and with DUS approval for any additional courses. The DUS can also advise as to which distribution requirements are fulfilled by Barnard English courses.
- **Columbia Non-English courses.** Up to **two** related courses (of at least 3 credits each) can be counted toward the major or concentration, but **not** toward the minor. Such courses are typically offered by foreign-language departments, film, or creative writing – but other related courses can be accepted pending DUS approval. Note that **only** courses with designation ENGL or CLEN can be used to fulfill distribution requirements.
- **Core Courses.** Lit Hum, CC, UW, Art Hum, and Music Hum cannot be counted toward the major/minor/concentration. Global Core courses with a ENGL or CLEN designation can be counted toward the major/minor/concentration as well as toward College requirements.
- **Courses Taken Outside Columbia.** These can be counted toward the major or concentration, if they have been accepted by Columbia for transfer credit. Typically **no more than three** such courses can count toward the major or concentration, and **only one** can be applied to the minor. Transferred courses must be approved by the DUS, who can also help determine which distribution requirements they fulfill.
- **Independent Study and Senior Essay.** Only **one** independent study course (of at least 3 credits) can be counted toward the major/minor/concentration. The Senior Essay program (fall and spring) counts as **one** of the 10 courses required for the major.
- **P/D/F.** Only **one** course taken for a P/D/F grade can be counted toward the major/minor/concentration. Note that any course in which a student receives a grade of D or F cannot count toward the major/minor/concentration.
- **Summer Session.** Only **two** summer courses can be counted toward the major/minor/concentration.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in English

8 courses in English, including:

#### The Introductory Course

- **either** ENGL 3001: *Literary Texts and Critical Methods*, or ENGL 2000: *Approaches to Literary Study*

#### Distribution Requirements

- **one** course focused on any **two** of the following **genres** (2 courses total): poetry, prose, drama/film/media
- **one** course focused on any **two** of the following **geographical** areas (2 courses total): British, American, Global/Comparative
- **two** courses focused on literature **pre-1800** (only one of which can be a Shakespeare course)

(Designations of distribution requirements can be found on the department's course listings site; note that a single course can fulfill more than one distribution requirement; Shakespeare 1, for example, would cover British, drama, and one pre-1800.)

## COMPARATIVE LITERATURE PROGRAM

Students who wish to major in comparative literature should consult the *Comparative Literature and Society* section of this Bulletin.

### SPRING 2025

#### INTRODUCTION TO THE MAJOR

**ENGL UN2000 Approaches to Literary Study. 4.00 points.**

**Prerequisites:** Students who register for ENGL UN2000 must also register for one of the sections of ENGL UN2001. This course is intended to introduce students to the advanced study of literature, through a weekly pairing of a faculty lecture (ENGL 2000) and small seminar led by an advanced doctoral candidate (ENGL 2001). Students in the course will read works from across literary history, learning the different interpretive techniques appropriate to each of the major genres (poetry, drama, and prose fiction). Students will also encounter the wide variety of critical approaches taken by our faculty and by the discipline at large, and will be encouraged to adapt and combine these approaches as they develop as thinkers, readers, and writers. ENGL 2000/2001 is a requirement for both the English Major and English Minor. While it is not a general prerequisite for other lectures and seminars, it should be taken as early as possible in a student's academic program

#### Fall 2024: ENGL UN2000

## MEDIEVAL

**ENGL UN2792 Early Horror. 3.00 points.**

This course will examine the origins and evolutions of horror literature from ancient Babylon to the Early Modern period. We will be examining consistent tropes that span long periods of time, as well as local innovations and idiosyncracies that are particular to a given culture at a given moment. We will be asking what makes for horror—that is, how does horror literature work, and what is it trying to do—as well as why horror is such an enduring modality

**Spring 2025: ENGL UN2792**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 2792	001/14725	T Th 8:40am - 9:55am 428 Pupin Laboratories	Eleanor Johnson	3.00	116/120
ENGL 2792	AU1/19120	T Th 8:40am - 9:55am Othr Other	Eleanor Johnson	3.00	22/20

**ENGL UN3794 Trees. 4.00 points.**

Trees shadow the human in faceless fashion. They mark of a form of deep-time AN record and respond to ecological devastation and abundance. Symbolic of the strange proximity of the divine in numerous different religious and literary traditions, trees figure as alter-egos or doubles for human lives and after-lives (in figures like the trees of life and salvation, trees of wisdom and knowledge, genealogical trees). As prostheses of thought and knowledge, they become synonymous with structure and form, supports for linguistic and other genres of mapping, and markers of organization and reading. As key sources of energy, trees—as we know them today -- are direct correlates with the rise of the Anthropocene. Trees are thus both shadows and shade: that is, they are coerced doubles of the human and as entry ways to an other-world that figure at the limits of our ways of defining thought and language. By foregrounding how deeply embedded trees are in world-wide forms of self-definition and cultural expression, this course proposes a deeper understanding of the way in which the environment is a limit-figure in the humanities' relation to its "natural" others. This course assumes that the "real" and the "literary" are not opposed to one another, but are intimately co-substantial. To think "climate" or "environment" is not merely a matter of the sciences, rather, it is through looking at how the humanities situates "the tree" as a means of self-definition that we can have a more thorough understanding of our current ecological, political, and social climate. Foregrounding an interdisciplinary approach to literary studies, this course includes material from eco-criticism, philosophy, religion, art history, indigenous and cultural and post-colonial studies. It will begin by coupling medieval literary texts with theoretical works, but will expand (and contract) to other time periods and geographic locales

**Fall 2024: ENGL UN3794**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3794	001/14185	T 4:10pm - 6:00pm 612 Philosophy Hall	Patricia Dailey	4.00	22/18

**Spring 2025: ENGL UN3794**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3794	001/17308	T 4:10pm - 6:00pm 401 Hamilton Hall	Patricia Dailey	4.00	19/18

**ENGL UN3892 BEOWULF. 4.00 points.**

This course will primarily consist in the task of translating the remarkably challenging poem Beowulf. We will be reading (smaller) portions of the vast quantity of secondary texts as we negotiate and debate issues raised by our readings and contemporary scholarship. As we work through the language of the text, comparing translations with our own, we will also be tracking concepts. Each student will be using our communal site (location tbd) for posting translations as well as for starting individual projects on word clusters / concepts

**ENGL UN3873 Troilus and Criseyde. 4.00 points.**

The intellectual goals of the course are to understand the manuscript evidence for the text and to be able to read Chaucer with precision: precision as to the grammatical structure, vocabulary, rhymes, and meter of the text. Being such an enlightened, close reader will help students in many, if not all, of their other courses, and will be invaluable to them in most any job they will ever have thereafter

**Fall 2024: ENGL UN3873**

**RENAISSANCE****ENGL UN1336 Shakespeare II. 3.00 points.**

This course covers the second half of William Shakespeare's career, attending to the major dramatic genres in which he wrote. It will combine careful attention to the plays' poetic richness with a focus on their theatrical inventiveness, using filmed productions of many of the plays to explore their staging possibilities. At the same time, we will use the plays as thematic springboards to explore the cultural forces – pertaining to, among others things, politics, class, religion, gender, and race – that shaped the moment in which Shakespeare lived and worked

**ENGL UN2232 TRADE AND TRAFFIC WITH EARLY MODERN ENGLAND. 3.00 points.**

This lecture course explores England's sense of itself in relation to the rest of the world in the late sixteenth and seventeenth centuries. It will examine the hopes and fears provoked by the trade and traffic between the English and other peoples, both inside and outside the country's borders, and raise questions of economics, race, ethnicity, religion, nationality, immigration, and slavery. The central materials are familiar and unfamiliar English plays, by William Shakespeare, Christopher Marlowe, Philip Massinger, John Fletcher, and others, which we will study alongside economic treatises, acts and proclamations, and travel narratives

**CLEN UN3776 A Pre-History of Science Fiction. 4.00 points.**

This undergraduate seminar course traces a possible pre-history of the genre we now know as science fiction. While science fiction is routinely tracked back to the nineteenth century, often to *Frankenstein* or *The Last Man* by Mary Shelley, this course looks at some earlier literary writings that share certain features of modern science fiction: utopian and dystopian societies, space travel, lunar travel, time travel, the mad experimental scientist, and unknown peoples or creatures. While the center of this course features texts associated with the Scientific Revolution of the seventeenth century (by Bacon, Kepler, Godwin, and Cavendish), it ranges back to the second century Lucian of Sarosota, and forward to the early nineteenth century with novels by Shelley

**Spring 2025: CLEN UN3776**

**CLEN GU4598 Erasmian Humanism. 4.00 points.**

Erasmus of Rotterdam (d. 1536), arguably the single most influential public intellectual of the sixteenth century, was responsible for the educational and religious reforms that changed European culture in the early modern period and

that are in many quarters still with us today. This course will feature the rhetorical assumptions and methods that shaped these reforms with an eye to the commonalities that narrowed the gap between the exercises of the schoolmaster, the efforts of the preacher, and the accomplishments of the literary artist

**ENGL UN3444 Race, Religion, and Early Modernity. 4.00 points.**

"Race and religion are conjoined twins. They are both products of modernity."—Theodore Vial In this course, we will turn the clock back to early modernity, exploring the entanglement of concepts of racial and religious difference in the texts and cultural products of early modern England. Beginning in sixteenth century England, we will explore how a distinctive English Protestant identity was fashioned in relation to various religious and racial others, most notably the Jew, the Ottoman "Turk", and the Black African. We will then turn to the literatures of encounter, exploring how the categories of race and religion were articulated in travel narratives, ethnographic accounts, and political polemic. Finally, we will turn to the writings of Afro-descended and Indigenous Christians, exploring how religious self-fashioning was performed by these racialized subjects. Conversations throughout the semester will be attentive to the specificities of the period, whilst also serving to recontextualise and unsettle contemporary categories of racial and religious difference. Seminar readings will primarily consist of primary sources from the period including poetry, prose and drama from England and, in the latter part of the semester, its colonies. These will be supplemented with a variety of textual and non-textual materials, including works of art, historical documents, period-specific scholarship, and contemporary theory. Keywords: race, religion, empire, travel, colonialism, enslavement, conversion

**Spring 2025: ENGL UN3444**

**ENGL UN1335 Shakespeare I. 3.00 points.**

(Lecture). This course will cover the histories, comedies, tragedies, and poetry of Shakespeare's early career. We will examine the cultural and historical conditions that informed Shakespeare's drama and poetry; in the case of drama, we will also consider the formal constraints and opportunities of the early modern English commercial theater. We will attend to Shakespeare's biography while considering his work in relation to that of his contemporaries. Ultimately, we will aim to situate the production of Shakespeare's early career within the highly collaborative, competitive, and experimental theatrical and literary cultures of late sixteenth-century England

**Fall 2024: ENGL UN1335**

**ENGL UN2100 Drama Before Shakespeare. 3.00 points.**

This lecture course focuses on the many different forms of drama that emerged in England in the decades before William Shakespeare started writing. The drama of sixteenth-century England found its stages in a bewildering variety of venues: the city streets, boys' grammar schools, the universities of Oxford and Cambridge, the Inns of Court, the royal court, civic halls, private households, and inns. This course will introduce students to a range of plays in all genres (tragedies, comedy, history), and use these plays to explore aspects of Elizabeth theatre, including the playhouses, companies, repertory, playwriting, and the printing of plays. No knowledge of Shakespeare's plays is required

**ENGL GU4462 Gender and Resistance in Early Modern Literature. 4.00 points.**

This class will focus on early modern literature's fascination with the relationship between women, gender, and political resistance in the early modern period. The works we will read together engage many of the key political analogies of the period, including those between the household and the state, the marital and the social contract, and rape and tyranny. These texts also present multiple forms of resistance to gendered repression and subordination, and reimagine sexual, social, and political relationships in new and creative ways. Readings will include key classical and biblical intertexts, witchcraft and murder pamphlets, domestic conduct books, defenses of women, poetry (by William Shakespeare, Aemilia Lanyer and Lucy Hutchinson), drama (Othello, The Winter's Tale, and Gallathea), and fiction (by Margaret Cavendish). The class will also include visits to The Morgan Library, Columbia's Rare Book and Manuscript Library, and The Metropolitan Museum of Art

**Fall 2024: ENGL GU4462**

**18TH AND 19TH CENTURY****ENGL UN2400 Romanticism. 3.00 points.**

This course is designed as an overview of major texts (in poetry and prose), contexts, and themes in British Romanticism. The movement of Romanticism was born in the ferment of revolution, and developed alongside so many of the familiar features of the modern world—features for which Romanticism provides a vantage point for insight and critique. As we read authors including William Blake, John Keats, Mary Shelley, and many others, we will situate our discussions around key issues including: the development of new ideas about individualism and community; industrialization and ecology (changes in nature and in the very conception of "nature"); and slavery and abolition

**Spring 2025: ENGL UN2400**

**ENGL UN2402 Romantic Poetry. 3.00 points.**

This course examines major British poets of the period 1789-1830. We will be focusing especially on the poetry and poetic theory of William Blake, William Wordsworth, Samuel Taylor Coleridge, Lord Byron, Percy Shelley, and John Keats. We will also be reading essays, reviews, and journal entries by such figures as Robert Southey, William Hazlitt, and Dorothy Wordsworth. The class is open to all undergraduate; first-year students and non-English majors are welcome. Graduate students interested in taking the course should email the professor

**ENGL UN3626 GREAT SHORT WORKS OF AMERICAN PROSE. 4.00 points.**

The aim of this course is to read closely and slowly short prose masterworks written in the United States between the mid-19th century and the mid-20th century, and to consider them in disciplined discussion. Most of the assigned works are fiction, but some are public addresses or lyrical or polemical essays. We will read with attention to questions of audience and purpose: for whom were they written and with what aim in mind: to promote a cause, make a case for personal or political action, provoke pleasure, or some combination of all of these aims? We will consider the lives and times of the authors but will focus chiefly on the aesthetic and argumentative structure of the works themselves

**ENGL UN3432 Places for Poetry. 4.00 points.**

This seminar asks how poetry claims places. The poets come mostly from Britain or its former colonies. The poems range from the seventeenth century all the way to the present day, with the majority (around two-thirds of the schedule) drawn from the long eighteenth century. In that period, an age of increased urbanization inside Britain's borders and increased mobility around its expanding empire, the main distinction that organized cultural conversations about place was the divide between the town and the country. But poems about the virtues of rural life often spoke from a distressed urban perspective, and poems about the dynamism of the city frequently described it from the viewpoint of an outsider or newcomer. What the eighteenth century can teach us about the poetry of place, then, is that it might secretly be poetry of movement, poetry about how one seemingly stable location (or type of location)

might pick up and go somewhere else. Starting from this insight, we will wrestle with larger questions about how shareable the poetry of place can be. Does staying faithful to a single place—its grainy specificity, its deep history, its rich tradition—risk making a poem unintelligible elsewhere? To what extent does a place-based poem need to shed its local attachments and try to speak a more universal language? How can a poem communicate its rootedness with people who don't have roots in the same spot? When is a poem an extension of place, and when is it an escape from it? Instead of proceeding chronologically, our weekly seminar will largely be arranged by settings that various English, Scottish, Irish, Caribbean, Anglo-Indian, and American poets have evoked. For the first ten weeks of the term, we will move from one type of place to another: from country houses to city streets, perhaps, or battlefields to bridges, hills to dales, walking paths to railway stations, outer islands to outer space. For the final few weeks, we will shift our organization and sample several major poets of place—one or two from the eighteenth century, one or two from the following centuries. Your final project for the class will imaginatively map the poetry of one of the places that you claim or one of the places that claims you

**ENGL UN3437 John Keats. 4.00 points.**

John Keats (1795–1821) is one of the most beloved of all English writers, a poet of intense sensitivity, imagination, and generosity. In this class we will read work from across Keats's brief, meteoric career, devoting significant attention to his early poems as well as to the pieces from his 1820 Poems for which he is best known. We will also read a large selection of Keats's letters, as well as poems, letters, and reviews by Keats's contemporaries, in addition to a sampling of modern criticism

**ENGL UN3486 Out of Her Mind: American Women Writing, 1630-1930. 4.00 points.**

This course explores how American women writers who suffered from depression, disability, bodily pain, or social marginalization, used the environment and its literary representations to redefine the categories of gender, ability, and personhood. Prior to their inclusion into the public sphere through the US Constitution's 19th Amendment which in 1920 granted women the right to vote, American artists had to be particularly resourceful in devising apt strategies to counter the political and aesthetic demands that had historically dispossessed them of the voice, power, and body. This course focuses on the women writers who conceptualized their own surroundings (home, house, marriage, country, land, island

and the natural world) as an agent that actively and decisively participates in the construction and dissolution of personal identity. In doing so, they attempted to annul the separation of the public (politics) and the private (home) as respective male and female spheres, and in this way they contributed, ahead of their own time, to the suffragist debates. Our task in this course will be to go beyond the traditional critical dismissal of these emancipatory strategies as eccentric or “merely aesthetic” and therefore inconsequential. Instead, we will take seriously Rowlandson’s frontier diet, Fuller’s peculiar cure for her migraines, Wheatley’s oblique references to the Middle Passage, Jewett’s islands, Ša’s time-travel, Thaxter’s oceans, Hurston’s hurricanes, and Sansay’s scathing portrayal of political revolutions. We will read these portrayals as aesthetic decisions that had—and continue to have—profound political consequences: by externalizing and depersonalizing what is commonly understood to be internal and intimate, the authors we read collapse the distinction between inside and outside, between the private and public—the distinction that traditionally excluded women from participation in the public life, in policy- and decision-making

### **ENGL UN3994 ROMANTICISM # FREEDOM. 4.00 points.**

“Freedom” was perhaps the central watchword of Romantic-era Britain, yet this concept remains notoriously difficult to pin down. Taking a cue from the sociologist and historian Orlando Patterson, who writes that “freedom is one those of values better experienced than defined,” this seminar will explore the variegated experiences of freedom and its opposites in the literature of British Romanticism. Romanticism unfolds alongside major revolutions in America, France, and Haiti, and we will begin by examining how the differing conceptions of freedom offered in the wake of these revolutions and their receptions galvanized writers and thinkers in Britain. From here, we will probe the expressions, possibilities, implications, and limits of freedom as outlined in various domains: political, individual, aesthetic, economic, philosophical, religious, and beyond. In situating Romanticism alongside developments

like revolution, the rise of globalization, and the Atlantic slave trade, we will be particularly interested in confronting how the explosion of claims to freedom in this period emerges together with and in response to the proliferation of enslaved, colonized, and otherwise constrained or hindered bodies. As we read poems, novels, slave narratives, philosophical essays, political tracts and documents, and more, a fundamental question for the course will concern the relation between binary terms: to what extent, and how, do notions of freedom in Romanticism depend on the necessary exclusion of the unfree? Since the Romantic age sees the birth of concepts of freedom still prevalent in our own day, this course will offer an opportunity to reflect critically on the present. To that end, we will take up some contemporary theoretical analyses and critiques of freedom, both directly in relation to Romanticism and reaching beyond

## **20TH AND 21ST CENTURY**

### **CLEN GU4840 Jazz and the Literary Imagination. 3 points.**

This course will focus on the interwoven nature of jazz and literature throughout the 20th and early 21st century. We will consider the ways that jazz has been a source of inspiration for a variety of twentieth-century literatures, from the poetry of the Harlem Renaissance to African American drama and contemporary fiction. Our readings and musical selections highlight creative ideas and practices generated through the formal and thematic convergences of jazz and literature, allowing us to explore questions such as: How do writers capture the sounds and feelings of different musical forms within fictional and non-fictional prose? In what ways might both music and literature (and/or their points of intersection) represent ideas of black identity and consciousness? How can certain musical concepts and terms of analysis (improvisation, rhythm, syncopation, harmony) be applied to practices of writing? How does music suggest modes of social interaction or political potential to be articulated in language?

**ENGL UN3781 Lab Lit, Weird Science, and Speculative Fiction. 4.00 points.**

This course will focus on literary fiction and film about science, scientists, and scientific culture. We'll ask how and why writers have wanted to represent the sciences and how their work is inspired, in turn, by innovations in scientific knowledge of their time. This is not a class on genre fiction. Unlike a science fiction class, we will cover narratives in a variety of genres—some highly speculative, and some in a more realist vein—thinking about how literary form is related to content. We start with Mary Shelley's *Frankenstein*, often considered the first work of science fiction, before moving to works from across the twentieth and twenty-first centuries including H.G. Wells's *The Island of Dr. Moreau*, George Schulyer's *Black No More*, Sinclair Lewis's *Arrowsmith*, Carl Sagan's *Contact*, Richard Powers's *Overstory*, and the short stories of Ted Chiang. We will also watch such films as James Whale's *Frankenstein*, Ridley Scott's *Blade Runner*, Andrew Niccol's *Gattaca*, and Yorgos Lanthimos's *Poor Things*. In addition to asking how science and scientists are represented in these narratives, we'll also discuss the cultural impact of such scientific innovations as the discovery of electricity, cell theory, eugenics and racial science, vaccines and immunology, space travel, new reproductive technologies, gene editing and more. A STEM background is not required, but students will be expected to have curiosity and motivation to learn about science, as well as its narrative representation

**Spring 2025: ENGL UN3781**

**ENGL UN3576 U.S. Poetry in the Expanded Field Since 1960. 4.00 points.**

This course explores postwar poets' extensive experimentation with new media and hybrid genres. The visual arts and the sonic arts—as well as computer-generated writing—offered inspiration to poets who understood themselves to be working in a context broader than conventional lyric poetry. Poets to be discussed include John Cage, Frank O'Hara, Amiri Baraka, Larry Eigner, Jayne Cortez, Norman Pritchard, Bernadette Mayer, Susan Howe, Theresa Hak Kyung Cha, Tan Lin, Claudia Rankine, and Lilian-Yvonne Bertram. We will also discuss theoretical accounts of the “expanded field” of intermedia arts and cross-genre writing. No prior knowledge of postwar poetry or art is presumed

**ENGL GU4614 Ralph Ellison. 4.00 points.**

In this seminar we will read virtually everything by Ralph Ellison—leaving aside for now the posthumous “novel” published as *Three Days Before the Shooting*. We will concentrate on this writer's highly influential insights and perspectives as an essayist, short story writer, and novelist. We also will investigate his recently discovered work as a photographer, and his uses of “photographic imagery” in his writing. Above all we will delve deeply into his aesthetic values as well as his political philosophy or—to use a keystone Ellisonian word—his stances. As we read Ellison's fiction and nonfiction (and look at his photographs), let us be watchful for Ellison's positions on current cultural/critical questions: parody and pastiche; sound technologies and art (musical and literary); “planned dislocations of the senses”; the importance of place—region, city or country, nation; internationality; complex definitions of individuality and community; race; vernacular art and culture; and the role of the politically engaged artist. How to track a line from Ellison's early Marxism to his later more centrist political positions? What do today's readers make of his strong American nationalism? How have political conservatives made use of Ellison? Beyond “stances,” what are the key terms for unpacking the world according to Ellison?

**ENGL UN3438 Archives and Afterlives in Postcolonial Texts. 4.00 points.**

What are archives and why are they a common feature of postcolonial stories? What are the different forms of archives that we encounter in postcolonial narratives and what aesthetic effects do they have on these narratives? By looking at archives that are found in literary texts and literary texts that are found in archives, we will study the different ways that the term 'archive' can be understood: as documents deemed important for posterity, as ephemeral collections of ‘small things’ in surprising shapes and spaces, and as metaphor for the ways in which time and knowledge are organized and experienced. We will consider how archives act as sites where the afterlives of unjust racial pasts persist into the present and take forms both old and new. We will discuss the role of archives in literary pursuits of racial justice as sites that both enable discovery and necessitate loss. As a word that sits on the borders between life and afterlife, past and future, ‘fact’ and fantasy, colonial and postcolonial, ‘archive’ is a resonant keyword through which many urgent concerns in the study of race and Empire today can be examined. Through our work for this course, we will ask: How might we as literary scholars of the postcolonial respond creatively to the traces and absences of the archive? We will explore archival afterlives in postcolonial works from the 20th and 21st centuries across a range of media including novels, poetry, film. We will also develop some initial forays into hands-on archival research at Columbia's Rare Books and Manuscripts Library and seek out institutional as well as

informal archives that lie beyond Morningside Heights. No prerequisites

**ENGL UN3985 FILM NARRATIVE (SEMINAR). 4.00 points.**

Prerequisites: Permission of the instructor.

Prerequisites: Permission of the instructor. This course will examine the noir tradition in American film between 1941 and 1959. We begin with noir's origins in two turn-of-the-century literary works about Empire, Inc and the divided self of the modern era, Conrad's "Heart of Darkness" and Stevenson's "Dr Jekyll and Mr Hyde". We will consider the international roots of Hollywood noir, many of whose directors were European refugees from Hitler, and its depictions of the femme fatale, l'homme fatale, and the world métropole, particularly NYC and LA. Readings will include Marxist, postcolonial, and gender theory, and film history. Films will include "The Killers", "Double Indemnity", "The Big Heat", "The Lodger", "Gilda", "Sunset Blvd", "Sweet Smell of Success", and "Vertigo".

Application instructions: Email Professor Ann Douglas (ad34@columbia.edu) with the subject heading "Film Noir application". In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available

**MDES GU4122 THE NOVEL IN AFRICA. 4.00 points.**

The main task of this course will be to read novels by African writers. But the novel in Africa also involves connections between the literary genre of the novel and the historical processes of colonialism, decolonization, and globalization in Africa. One important question we'll consider is how African novels depict those historical experiences in their themes and plots—we'll read novels that are about colonialism, etc. A more complex question is how these historical processes relate to the emergence of the novel as an important genre for African writers. Edward Said went so far as to say that without imperialism, there would be no European novel as we know it. How can we understand the novel in Africa (whether read or written) as a product of the colonial encounter? How did it shape the process of decolonization? What contribution to history, whether literary or political, does the novel in Africa make? We'll undertake a historical survey of African

novels from the 1930s to the present, with attention to various subgenres (village novel, war novel, urbanization novel, novel of postcolonial disillusion, Bildungsroman). We'll attend to how African novelists blend literate and oral storytelling traditions, how they address their work to local and global audiences, and how they use scenes of characters reading novels (whether African or European) in order to position their writing within national, continental, and world literary space

**ENGL UN3439 Afro-Asian Literary Imaginaries. 4.00 points.**

In a gesture of solidarity with the Black Lives Matter movement, and spurred on by a wave of anti-Asian violence ignited by the onset of the COVID-19 pandemic, Asian American artists and activists recently revived the slogan "Yellow Peril Supports Black Power." Behind this slogan lies a long history of solidarity and collaboration between members of the Asian and African diasporas who saw their struggles against racial oppression, both on a domestic and global scale, as deeply intertwined. This course explores the literary dimensions of this rich yet often overlooked history, whose greatest thinkers were often also writers themselves. Through the study of poetry, novels, drama, and memoir, we will trace the development of "Afro-Asian" literary imaginaries from the early twentieth century to the present. Far from adopting a uniform approach to the subject, the texts we read will vary in form and content, ranging from the romantic, to the experimental, to the critical. Our reading throughout the course will be anchored in key historical moments in the history of Black and Asian solidarity and conflict, from pre-war anti-colonial movements, to the Third World Liberation strikes of the 1960s, to the Los Angeles riots of 1992. Together, we will ask what the unique role of literature has been within this history, and explore the possibilities that literature holds for imagining cross-racial solidarity in our contemporary moment

**ENGL UN2826 American Modernism. 3.00 points.**

This course approaches modernism as the varied literary responses to the cultural, technological, and political conditions of modernity in the United States. The historical period from the turn of the century to the onset of World War II forms a backdrop for consideration of such authors as Gertrude Stein, Willa Cather, Jean Toomer, Zora Neale Hurston, Ernest Hemingway, Ezra Pound, T.S. Eliot, Marianne Moore, F. Scott Fitzgerald, and Djuna Barnes. Assigned readings will cover a range of genres, including novels, poetry, short stories, and contemporary essays

**CLEN UN2742 World Fiction Since 1965. 3.00 points.**

In the period since 1965, fiction has become global in a new sense and with a new intensity. Writers from different national traditions have been avidly reading each other, wherever they happen to come from, and they often resist national and regional labels altogether. If you ask the Somali writer Nuruddin Farah whether the precocious child of Maps was inspired by Salman Rushdie's *Midnight's Children*, he will answer (at least he did when I asked him) that he and Rushdie both were inspired by Sterne's *Tristram Shandy* and Grass's *The Tin Drum*. At the same time, the human experiences around which novelists organize their fiction are often themselves global, explicitly and powerfully but also mysteriously. Our critical language is in some ways just trying to catch up with innovative modes of storytelling that attempt to be responsible to the global scale of interconnectedness on which, as we only rarely manage to realize, we all live. Authors will include some of the following: Gabriel Garcia Márquez, Jamaica Kincaid, W.G. Sebald, Elena Ferrante, and Zadie Smith

**CLEN GU4199 LITERATURE AND OIL. 3.00 points.**

This course will investigate the connections between literary/cultural production and petroleum as the substance that makes possible the world as we know it, both as an energy source and a component in the manufacture of everything from food to plastic. Our current awareness of oil's scarcity and its myriad costs (whether environmental, political, or social) provides a lens to read for the presence (or absence) of oil in texts in a variety of genres and national traditions. As we begin to imagine a world "beyond petroleum," this course will confront the ways in which oil shapes both the world we know and how we know and imagine the world. Oil will feature in this course in questions of theme (texts "about" oil), of literary form (are there common formal conventions of an "oil novel"?), of interpretive method (how to read for oil), of transnational circulation (how does "foreign oil" link US citizens to other spaces?), and of the materiality (or "oiliness") of literary culture (how does the production and circulation of texts, whether print or digital, rely on oil?).

**ENGL UN3712 HENRY JAMES AND EDITH WHARTON. 4.00 points.**

James & Wharton, America's two greatest novelists in the half century after the civil war and the eve of the first world war, were friends and fellow cosmopolitans, at home in the US & Europe, chroniclers of an emerging transatlantic urban modernity traversing New York, London, Paris, Rome, Geneva. Their fiction often portrays glamorous surfaces and intricate social texts that their brilliant heroines -- Isabel Archer of *The Portrait of a Lady* & Lily Bart of *The House of Mirth*, for example -- negotiate with wit and subtlety, confusion and daring, amidst fear and fascination. They find themselves immersed in bruising plots -- crafted by society's disciplinary imperatives and by their creators, the latter standing in uneasy complicity with the social order even as they seek its transformation.

Giving female protagonists unprecedented boldness and ambition, Wharton & James chart how intense exertion of will and desire collides with "the customs of the country," to cite the title of a great Wharton novel. We will read the three novels mentioned above as well as Wharton's *Summer & Ethan Frome* and James's "Daisy Miller," *Washington Square* & *The Ambassadors*.

**Fall 2024: ENGL UN3712**

**ENGL UN3628 FAULKNER. 4.00 points.**

In this course, we'll be studying novels, stories, and screenplays from the major phase of William Faulkner's career, from 1929 to 1946. Our primary topic will be Faulkner's vision of American history, and especially of American racial history: we'll be asking what his fictions have to say about the antebellum/"New" South; the Civil War and Reconstruction; the issues of slavery, emancipation, and civil rights; and the many ways in which the conflicts and traumas of the American past continue to shape and burden the American present. But we'll consider other aspects of Faulkner's work, too: his contributions to modernist aesthetics, his investigations of psychology and subjectivity, his exploration of class and gender dynamics, his depiction of the natural world, and his understanding of the relationship between literature and the popular arts

**Fall 2024: ENGL UN3628**

**ENGL UN3351 FAMILY FICTIONS: MEMOIR, FILM AND THE NOVEL. 4.00 points.**

This course will explore cinematic, novelistic and memoirist renderings of "family cultures," family feeling, the family as narrative configuration, and home as a utopian/dystopian and oneiric space. Explorations of memory, imagination and childhood make-believe will interface with readings in psychoanalysis and in the social history of this polymorphous institution. A central goal of the course is to help each of you toward written work that is distinguished, vital and has urgency for you. Authors will include Gaston Bachelard, Alison Bechdel, Jessica Benjamin, Sarah M. Broom, Lucille Clifton, Vivian Gornick, Lorraine Hansberry, Maggie Nelson and D.W. Winnicott; and films by Sean Baker, Ingmar Bergman, Alfonso Cuarón, Greta Gerwig, Lance Hammer, Barry Jenkins, Elia Kazan, Lucretia Martel, Andrei Zvyagintsev and others

**ENGL UN3734 American Literature and Corporate Culture. 4 points.**

Prerequisites: the instructor's permission.

(Seminar). "It is not expected of critics as it is of poets that they should help us to make sense of our lives; they are bound only to attempt the lesser feat of making sense of the ways we try to make sense of our lives." - Frank Kermode  
This seminar will focus on American literature during the rise of U.S. corporate power in the nineteenth and twentieth centuries. The legal and economic entity of the corporation established new social hierarchies and systems of power, changed the roles of government and families, and wrought new forms of relationships between individuals. American culture demonstrated both an enchantment with the possibilities of a growing economy and a looming anxiety about the systematization of personal relationships. Authors and critics grappled with an American society that seemed to offer unprecedented opportunity for social rise but only within a deeply threatening and impersonal structure. We'll examine the ways that literary and popular culture depicted corporations and the ways that corporate structure influenced literary aesthetics and form. **Application instructions:** E-mail Professor Aaron Ritzenberg (ajr2186@columbia.edu) with the subject heading "American Literature and Corporate Culture seminar". In your message, include basic information: name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they'll automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available.

**ENGL UN3805 The Political Novel. 4.00 points.**

Is the political novel a genre? It depends on your understanding both of politics and of the novel. If politics means parties, elections, and governing, then few novels of high quality would qualify. If on the other hand "the personal is the political," as the slogan of the women's movement has it, then almost everything the novel deals with is politics, and few novels would not qualify. This seminar will try to navigate between these extremes, focusing on novels that center on the question of how society is and ought to be constituted. Since this question is often posed ambitiously in so-called "genre fiction" like thrillers and sci-fi, which is not always honored as "literature," it will include some examples of those genres

as well as uncontroversial works of the highest literary value like Melville's "Benito Cereno," Ellison's "Invisible Man," and Camus's "The Plague."

**Fall 2024: ENGL UN3805**

**CLEN GU4899 Resistance Literature. 4.00 points.**

This course will explore the historical category of Resistance Literature, its theory and practice, its transnational expansion, and its ongoing relevance today. Originally proposed by Palestinian author and political activist Ghassan Kanafani in 1967, "Resistance Literature" named an activist practice of writing that sought to challenge discriminatory state practices, social policies, power structures and lived injustices, as well as to reshape the ideological frameworks that enabled official political structures of oppression in the institutional forms of colonialism (settler and otherwise), neocolonialism, authoritarianism, apartheid, systemic racism, ethnonationalisms, gendered exclusions, and religious discrimination. Examining diverse genres such as novels, poetry, plays, memoirs, films, we will analyze the literary and political strategies, motifs, and modes by which authors around the world over the past century have attempted to use their art to resist oppression, to mobilize public opinion, and to advocate for social change. Collectively, we will attempt to identify literary and formal commonalities across these literatures to identify generic characteristics of Resistance Literature that might distinguish it from Literature in general

**Fall 2024: CLEN GU4899**

**ENGL GU4932 ESSAYISM. 4.00 points.**

In the second decade of the 21st century there is more critical attention than ever before on the essay as a literary genre and a cultural practice that crosses media, registers, disciplines, and contexts. The concept of "essayism" was redefined by the Robert Musil in his unfinished modernist novel, *The Man Without Qualities* (1930) from a style of literature to a form of thinking in writing: "For an essay is not the provisional or incidental expression of a conviction that might on a more favourable occasion be elevated to the status of truth or that might just as easily be recognized as error . . . ; an essay is the unique and unalterable form that a man's inner life takes in a decisive thought." In this course will explore how essays can increase readers' and writers' tolerance for the existential tension and uncertainty we experience both within ourselves as well as in the worlds we inhabit. As Cheryl Wall argues, essays also give their practitioners meaningful work to do with their private musings and public concerns in a form that thrives

on intellectual as well as formal experimentation. The course is organized to examine how practitioners across media have enacted essayism in their own work and how theorists have continued to explore its aesthetic effects and ethical power

**Fall 2024: ENGL GU4932**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ENGL GU4559 August Wilson. 4.00 points.**

In this seminar we will read the complete published plays of August Wilson along with significant unpublished and obscurely published plays, prose, and poetry. The centerpieces of this course will be what Wilson termed his "century cycle" of plays: each work focusing on the circumstances of Black Americans during a decade of the twentieth century. As we consider these historical framings, we also will explore closely on what Wilson identified as the "four B's" that influenced his art most emphatically: Bessie Smith (sometimes he called this first B the Blues), Amiri Baraka, Romare Bearden, and Jorge Luis Borges. Accordingly, as we consider theoretical questions of cross-disciplinary conversations in art, we will study songs by Bessie Smith (and broad questions of the music and literary form), plays, prose, and poetry of Baraka (particularly in the context of Wilson's early Black Arts Movement works), the paintings of Bearden, and the poetry and prose (along with a few lectures and transcribed interviews) of Borges. We will use archival resources (online as well as "hard copy" material, some of it at Columbia) to explore Wilson's pathways as a writer, particularly as they crisscrossed the tracks of his "four B's." Along the way we will examine several drawings and paintings (from his University of Pittsburgh archives) as we delve into the rhythmical shapes, textures, and colors he used on paper and canvas as well as in his plays. Visitors to the class will include Wilson's musical director Dwight Andrews and at least one of his regular actors

## SPECIAL TOPICS

**ENGL UN1075 Children's Literature. 3.00 points.**

This is a historical survey of literature (mostly narrative) intended primarily for children, which will explore not only the pleasures of imagination but the varieties of narrative and lyric form, as well as the ways in which story-telling gives shape to individual and cultural identity. Drawing on anonymous folk tale from a range of cultures, as well as a variety of literary works produced from the late 17th century to the present, we'll attend to the ways in which changing forms of children's literature reflect changing understandings of children and childhood, while trying not to overlook psychological and

formal structures that might persist across this history. Readings of the primary works will be supplemented by a variety of critical approaches—psychoanalytic, materialist, feminist, and structuralist—that scholars have employed to understand the variety and appeal of children’s literature

### ENGL UN3648 Comics, Health, and Embodiment. 4.00 points.

Deformed, grotesque, super/transhuman and otherwise extraordinary bodies have always been a central feature of comics. However, the past ten years have seen a surge of graphic narratives that deal directly with experiences of health and illness, and that are recognized as having significant literary value. This course will focus on graphic narratives about healthcare, illness, and disability with particular attention to questions of embodied identities such as gender, sexuality, race, and age. Primary texts will include the work of Alison Bechdel, Roz Chast, CeCe Bell, David Small, Allie Brosch, and Ellen Fournery. We will study the vocabulary, conventions, and formal properties of graphic literature, asking how images and text work together to create narrative. We will consider whether graphic narrative might be especially well suited to representations of bodily difference; how illness/disability can disrupt conventional ideas about gender and sexuality; how experiences of the body as a source of pain, stigmatization, and shame intersect with the sexualized body; and how illness and disability queer conventional sexual arrangements, identities, and attachments. While studying the construction of character, narrative, framing, color, and relationship between visual and print material on the page, students will also produce their own graphic narratives

Hall

### CLEN GU4578 Reading the Haitian Revolution. 4.00 points.

The Haitian Revolution (1791-1803), in which the enslaved in France’s richest Caribbean colony threw off their chains and defeated the European colonial powers, was a seismic event in modernity. As an “unthinkable” revolution that was silenced by later (according to Michel-Rolph Trouillot) history yet was ubiquitously discussed at the time, the Haitian Revolution calls into question the very meaning of an “event” and challenges the fundamental organizing terms of the modern era. In this class, we will study this revolution, its representations, and its legacies into the present. We’ll pay special attention to the archive that records the experiences of the Haitian revolutionaries themselves, from poems, songs, and plays to political texts, and we’ll also be interested in reactions from Romantic-era writers in Europe like William Wordsworth and Victor Hugo. How was the revolution written and expressed by its participants, and what can we learn from the depictions it solicited in those reading about the event from afar? In the last weeks, the course will also take up important historical, literary, and philosophical treatments of the Haitian Revolution in the twentieth-century. This course is open to advanced undergraduates and to graduate students. As a 4000-level seminar, you’ll be expected to produce a research paper related to the course material at the conclusion. Some reading knowledge of French would be helpful but is not required

### CLRS GU4039 Chekhov and Others. 3.00 points.

We will explore Anton Chekhov’s work on its own terms, in its cultural context, and in relation to the work of others, especially Anglophone writers who responded, directly or indirectly, to Chekhov and his work. Readings by Chekhov include selected stories (short and long), his four major plays, and Sakhalin Island, his study of the Russian penal colony. There are no prerequisites. Knowledge of Russian is not required; all readings in English. Students who know Russian are encouraged to read Chekhov’s work in Russian. The course will be comparative as it addresses Chekhov on his own and in relation to anglophone writers. The course is open to undergraduates (CC, GS, BC) and graduates in GSAS and other schools. The attention to how Chekhov writes may interest students in the School of the Arts

### ENGL UN3394 HOW WRITERS THINK. 4.00 points.

Prerequisites: Permission of instructor.

The spell cast by a captivating novel or elegant research can lead us to imagine that great writing is a product of the author's innate genius. In reality, the best writing is a product of certain not-very-intuitive practices. This course lifts the veil that obscures what happens in the minds of the best writers. We will examine models of writing development from research in composition studies, cognitive psychology, genre studies, linguistics, ESL studies, and educational psychology. Our classroom will operate as a laboratory for experimenting with the practices that the research identifies. Students will test out strategies that prepare them for advanced undergraduate research, graduate school writing, teaching, editing, and collaborative writing in professional settings. The course is one way to prepare for applying for a job as a peer writing fellow in Columbia's Writing Center

**Spring 2025: ENGL UN3394**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3394	001/14726	T 2:10pm - 4:00pm 612 Philosophy Hall	Aaron Ritzenberg	4.00	18/18

**ENGL UN3884 Climate Fictions. 4.00 points.**

This course will consider numerous kinds of climate fictions, including, but not limited to, the recent literary category of prose fiction known as "cli-fi," or climate fiction. In this course, "climate fictions" also refers to a range of ideas, assumptions, cultural narratives, and hypotheses about the Earth's climate: in other words, frameworks constructed by humans[1] for thinking about (or not thinking about) the climatic conditions of our planetary home. These fictions might include such debatable propositions as "humans can't change the climate," "there's nothing we can do about climate change," "climate change is something that will happen in the future," "climate change is something that will happen far away," or "climate change is only about the weather." "Climate fictions" also include scenarios and projections of a near-future, climate-changed world, whether those offered by scientists, by writers, or by ordinary people as they contemplate the possible trajectories of their lives and the lives of their descendants. Thinking among these versions of "climate fictions," we'll consider the role of literature and the literary imagination in fashioning, interpreting, and inhabiting them. What work does the imagination do in the world, in grappling both with the worlds that humans have made, and with the boundary parameters of the Earth system that have shaped life on this planet as we have known it? How do cultural and narrative assumptions shape the work of scientists and policy-makers? How can prose fiction help readers engage with the challenges of knowledge, emotion, anticipation, judgement, and action that a warming world will require? How can climate fictions of all sorts help readers try on modes of living and other futures that we do or don't want—or lull them into thinking that such anticipation is unnecessary or futile? Thinking together about these questions, we will use the reading list and the seminar meetings to hone our skills of noticing, extrapolating, speculating, proposing, listening, disagreeing, concurring, and cooperating in the difficult work of confronting fear and doubt and of finding a

path toward truth and perhaps even hope. You will be asked to read carefully and curiously, to test your ideas in regular informal writing and weekly seminar discussion, and to develop more polished thoughts (or dreams!) in a response paper and a final project. [1] The English word fiction derives from the Latin verb *finire*: to fashion or form

**ENGL GU4885 Writers on Writing: Fictions, Theories, Risks, and Rituals. 4.00 points.**

This seminar examines how 20th and 21st century writers have staged in their fiction, nonfiction, and multi-genre works ideas about why, how, and for whom they write. What do writers have to say in their essays and public talks about the strategies they use to sit down to their writing, when everything else in the world seems to be requiring their attention elsewhere? How is the figure of the writer and their often-fraught relationship with their work depicted in fictional accounts and in the complex retrospection of memoir and essays? In what ways do writers tether their goals for their work to the needs and experiences of others in communities of which they are a part or that they wish to reach? The course begins with essays and talks that answer the question, "Why I Write" by Virginia Woolf, George Orwell, James Baldwin, Joan Didion, bell hooks, Stephen King as well as philosophical explorations through Helene Cixous's *Three Steps on the Ladder of Writing*. These ideas about writers' motivations will provide launching points for how each of us can begin to theorize our own motives as writers. We will use these ideas as a frame for reading novels that center the figure of the writer including Yoko Ogawa's *The Memory Police*, Macedonio Fernández's *The Museum of Eterna's Novel (The First Good Novel)*, Jenny Offill's *The Department of Speculation*, and Colm Tóibín's *The Master*. Through the work of essayists and memoirists, Samule Delaney, Leslie Jamison, and Maggie Nelson, we will track how writers wrestle with the political, aesthetic, and affective dimensions of their identity as writers. Our final weeks will invite us to explore writerly advice and strategies for getting the work done. We will listen to podcasts featuring historians, such as *Drafting the Past*, explore revision strategies in John McPhee's *Draft 4*, consider our writerly routines with excerpts from Maria Popova's literary blog, *The Marginalian* and distill ideas about the work of research and writing from talks and essays by writers who have influenced each of us at Columbia and beyond. Students will produce their own autotheory of writing to accompany a piece in any genre that they will be drafting over the course of the semester

### **CPLS UN3951 Narratives for Living: Planetary. 3.00 points.**

Is it possible to read literature in such a way as to be coherent with the requirements for the environmental disaster that seems to be upon us? This course will attempt to answer this question through 4 novels dealing with planetarity and climate change. This is a restricted course by interview only. ICLS students will read the Bengali and/or French texts in the original. Students are required to write a 1 page response to the text to be read the next day by midnight the previous day. Class discussions will be constructed on these responses. There will be a colloquium at the end of the semester, requiring oral presentation of a research paper that will engage the entire class

### **ENGL UN3795 SENIOR ESSAY RESEARCH METHODS. 3.00 points.**

The senior essay research methods seminar, offered in several sections in the fall semester, lays out the basic building blocks of literary and cultural studies. What kinds of questions do literary and cultural critics ask, and what kinds of evidence do they invoke to support their arguments? What formal properties characterize pieces of criticism that we find especially interesting and/or successful? How do critics balance the desire to say something fresh vis-a-vis the desire to say something sensible and true? What mix of traditional and innovative tools will best serve you as a critical writer? Voice, narrative, form, language, history, theory and the practice known as “close reading” will be considered in a selection of exemplary critical readings. Readings will also include “how-to” selections from recent guides including Amitava Kumar’s *Every Day I Write the Book*, Eric Hayot’s *The Elements of Academic Style* and Aaron Ritzenberg and Sue Mendelsohn’s *How Scholars Write*. The methods seminar is designed to prepare those students who choose to write a senior essay to complete a substantial independent project in the subsequent semester. Individual assignments will help you discover, define and refine a topic; design and pursue a realistic yet thrilling research program or set of protocols; practice “close reading” an object (not necessarily verbal or textual) of interest; work with critical sources to develop your skills of description and argument; outline your project; build out several sections of the project in more detail; and come up with a timeline for your spring semester work. In keeping with the iterative nature of scholarly research and writing, the emphasis is more on process than on product, but you will end the semester with a clear plan for your essay itself as well as for the tasks you will execute to achieve that vision the following semester. The methods seminar is required of all students who wish to write a senior essay in their

final semester. Students who enroll in the methods seminar and decide not to pursue a senior essay in the spring will still receive credit for the fall course

### **ENTA UN3701 DRAMA, THEATRE AND THEORY. 4.00 points.**

Prerequisites: Instructor's permission. (Seminar). Theatre typically exceeds the claims of theory. What does this tell us about both theatre and theory? We will consider why theatre practitioners often provide the most influential theoretical perspectives, how the drama inquires into (among other things) the possibilities of theatre, and the various ways in which the social, spiritual, performative, political, and aesthetic elements of drama and theatre interact. Two papers, weekly responses, and a class presentation are required. Readings include Aristotle, Artaud, Bharata, Boal, Brecht, Brook, Castelvetro, Craig, Genet, Grotowski, Ibsen, Littlewood, Marlowe, Parks, Schechner, Shakespeare, Sowerby, Weiss, and Zeami. Application Instructions: E-mail Professor Austin Quigley (aeq1@columbia.edu) with the subject heading Drama, Theatre, Theory seminar. In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available

### CSER UN3523 INTRODUCTION TO LATINX STUDIES. 4.00 points.

In the US, Latinxs are often treated in quantitative terms—as checkmarks on census forms, or as data points in demographic surveys. However, Latinxs have always been more than mere numbers: while some have stayed rooted in traditional homelands, and while others have migrated through far-flung diasporas, all have drawn on and developed distinctive ways of imagining and inhabiting the Americas. In this course, we will explore a wide range of these Latinx lifeways. Through readings in the humanities and social sciences, we will learn how Latinxs have survived amidst and against settler colonialism and racial capitalism. Meanwhile, through the study of literature and art, we will see how Latinxs have resisted and/or reinforced these social systems. With our interdisciplinary and intersectional approach, we will determine why Latinidad has manifested differently in colonial territories (especially Puerto Rico), regional communities (especially the US–Mexico borderlands), and transnational diasporas (of Cubans, of Dominicans, and of a variety of Central Americans). At the same time, we will understand how Latinxs have struggled with shared issues, such as (anti-) Blackness and (anti-)Indigeneity, gender and sexuality, citizenship and (il)legality, and economic and environmental (in)justice. During the semester, we will practice Latinx studies both collectively and individually: to enrich our in-class discussions, each student will complete a reading journal, a five- page paper, a creative project, and a digital timeline

### ENGL UN3891 INTRO TO CLASSICAL RHETORIC. 4.00 points.

Prerequisites: the instructor's permission. (Seminar). This course examines rhetorical theory from its roots in ancient Greece and Rome and reanimates the great debates about language that emerged in times of national expansion and cultural upheaval. We will situate the texts of Plato, Isocrates, Aristotle, Cicero, Quintilian, and others in their historical contexts to illuminate ongoing conversations about the role of words and images in the negotiation of persuasion, meaning making, and the formation of the public. In the process, we will discover that the arguments of classical rhetoric play out all around us today. Readings from thinkers like Judith Butler, Richard McKeon, Robert Pirsig, and Bruno Latour echo the ancients in their debates about hate speech regulation, the purpose of higher education, and the ability of the sciences to arrive at truth. We will discover that rhetoricians who are writing during eras of unprecedented expansion of democracies, colonization, and empire have a great deal to say about the workings of language in our globalizing, digitizing age. Application instructions: E-mail Professor Sue Mendelsohn (sem2181@columbia.edu) by April 11 with the subject heading Rhetoric seminar. In your message, include basic information:

your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available

### CLEN UN3725 Literary Guides to Living and Dying Well from Plato to Montaigne. 4.00 points.

Surrounded by friends on the morning of his state-mandated suicide, Socrates invites them to join him in considering the proposition that philosophizing is learning how to die. In dialogues, essays, and letters from antiquity to early modernity, writers have returned to this proposition from Plato's *Phaedo* to consider, in turn, what it means for living and dying well. This course will explore some of the most widely read of these works, including by Cicero, Seneca, Jerome, Augustine, Boethius, Petrarch, and Montaigne, with an eye to the continuities and changes in these meanings and their impact on the literary forms that express them. Application instructions: E-mail Prof. Eden (khe1@columbia.edu) with your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available

### CLEN UN3790 Caribbean Radicalisms in New York, 1890-1990. 4.00 points.

New York City has been closely linked to the Caribbean from at least the seventeenth century. Presently, nearly 25% of its inhabitants are of Caribbean descent. In addition, according to a 2021 New York City Office of Immigrants report, five of the top countries of origin of the city's new immigrants were born in a Caribbean country: Dominican Republic (421,920, number 1), Jamaica (165,260, number 3), Guyana (136,180, number 4); Trinidad and Tobago (85,680, number 8), and Haiti (78,250, number 9). In addition, Puerto Ricans, who are colonial migrants, number 1.2 million or 9% of the city's population. During the late nineteenth and twentieth centuries, New York City was a pivotal space for Caribbean radical praxis understood here as political action and thought shaped by the Caribbean experiences of enslavement, coloniality, and diaspora. These interventions deeply transformed not only New York but multiple other contexts in Latin America, Africa, and Europe, and a broad range of movements including anti-

colonial, anti-racist, feminist, and queer. To better understand the impact of Caribbean radical figures and thought in New York and beyond, we will examine texts from a broad range of writers and thinkers, including Jesús Colón, Julia de Burgos, Hubert Harrison, Alexis June Jordan, Audre Lorde, José Martí, Malcolm X, Manuel Ramos Otero, Clemente Soto Vélez, and Arthur Schomburg

#### ENTA UN3708 Reenactment and Performance in 20th # 21st Centuries. 4.00 points.

Has reenactment, or the practice of “restaging a historical or biographical event” reached an end? While the idea of historically replicating a past event is quite passé, reenactment is everywhere from verbatim theatrical tribunals to biopics. This class will ask critical questions regarding reenactment as a performance act that crosses temporal, cultural, and discipline-specific boundaries and polarities. Investigating reenactment’s dynamics, potentials, and failures, we will examine battle reenactments, international theatrical tribunals, Indigenous performance, visits to nuclear disaster sites, autobiographical performance, and method actors. The final project will give the option of developing a research essay or crafting a creative portfolio. No prerequisites

#### CLEN GU4575 Source Texts of Postcolonial Vision. 4.00 points.

We will read texts by Memmi, Du Bois, Marguerite Duras and North African feminists to create a gendered and class-sensitive sense of the origins of postcolonial thinking. We will draw a definition of postcolonial hope before the actual emergence of postcolonial nation-states. A 1-page response to the text to be read will be required the previous day. No midterm paper. The final paper will be an oral presentation in a colloquium. ICLS students will be expected to read Memmi in French. No incompletes. Admission by interview. 20# participation, 20# papers, 60# presentation. Seminar Instructions: Interviews will be in August. Email Deeva Gupta dg3242@columbia.edu, Gayatri Chakravorty Spivak gcs4@columbia.edu and Tomi Haxhi th2666@columbia.edu with the subject heading "Source Texts of Postcolonial Vision." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course

#### ENGL UN3675 Transpacific Personalities: The Personal Essay and Immigrant History in Asian American Literature. 4.00 points.

Since the 1974 publication of the first anthology of Asian American writing, Aiiieeeee!, the field of Asian American Studies has been pulled in two different directions, simultaneously trying to articulate a coherent identity of, and place for, Asian American subjects while also articulating this coherence in relation to immigrant labor and history. This introductory course will survey the way this tension, between personal coherence and collective historical experience, formally characterizes Asian American media and literature since the 1970s, in which the form of the personal essay is critically expanded and brought into conflict with the racialized history of Asian American immigrant experience. Beginning with Lisa Lowe’s *Immigrant Acts* (1994) and Colleen Lye’s *America’s Asia* (2005), this course will furnish students with an understanding of both the successive exclusion acts applied to different waves of East and Southeast Asian immigration to the United States, as well as the ways these exclusion acts produced, and were produced by, expanding forms of anti-Asian American racism. This framework of economic policy and racial form will then be used as a lens to investigate prominent texts across the Asian American canon (as well as outside of this canon) by authors such as Frank Chin, Maxine Hong Kingston, Carlos Bulosan, John Okada, Theresa Cha, Jessica Hagedorn, Wilfrido Nollado, and Elaine Castillo

#### Fall 2024: ENGL UN3675

#### ENGL UN3477 New Suns: Worlding in Black Speculative Fiction. 4.00 points.

This course takes Octavia E. Butler’s enigmatic expression, “There’s nothing new under the sun, but there are new suns” as a guide for exploring the politics of Black speculative fiction, science fiction, and fantasy. With literary, sonic, visual, and cinematic examples, including works from Pauline Hopkins, W.E.B. DuBois, Samuel Delany, Wangechi Mutu, Janelle Monae, Sun Ra, Saul Williams, and others, this class considers the contexts of possibility for re/imagining Black pasts, presents and futures. Paying particular attention to how Black speculative fiction creates new worlds, social orders, and entanglements, students will develop readings informed by ecocriticism, science and technology studies, feminist, and queer studies. We will consider the multiple meanings and various uses of speculation and worlding as we encounter and

interpret forms of utopian, dystopian, and (post)apocalyptic thinking and practice. No prerequisites

## UNIVERSITY WRITING

**ENGL CC1010 UNIVERSITY WRITING. 3.00 points.**

ENGL CC/GS1010: University Writing, is a one-semester seminar designed to facilitate students' entry into the intellectual life of the university by teaching them to become more capable and independent academic readers and writers. The course emphasizes habits of mind and skills that foster students' capacities for critical analysis, argument, revision, collaboration, meta-cognition, and research. Students read and discuss essays from a number of fields, complete regular informal reading and writing exercises, compose several longer essays, and devise a research-based project of their own design. Courses of Instruction ENGL CC1010 University Writing. 3 points. ENGL CC/GS1010: University Writing (3 points) focuses on developing students' reading, writing, and thinking, drawing from readings on a designated course theme that carry a broad appeal to people with diverse interests. No University Writing class presumes that students arrive with prior knowledge in the theme of the course. We are offering the following themes this year: UW: Contemporary Essays, CC/GS1010.001-.099 UW: Readings in American Studies, CC/GS1010.1xx UW: Readings in Gender and Sexuality, CC/GS1010.2xx UW: Readings in Film and Performing Arts, CC/GS1010.3xx UW: Readings in Urban Studies, CC/GS1010.4xx (will be sharing 400s with Human Rights) UW: Readings in Climate Humanities, CC/GS1010.5xx (will be sharing 500s with Data # Society) UW: Readings in Medical Humanities, CC/GS1010.6xx UW: Readings in Law # Justice, CC/GS1010.7xx UW: Readings in Race and Ethnicity, CC/GS1010.8xx University Writing for International Students, CC/GS1010.9xx For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>

## SENIOR ESSAY METHODS SEMINAR

### ENGL UN3795 SENIOR ESSAY RESEARCH METHODS. *3.00 points.*

The senior essay research methods seminar, offered in several sections in the fall semester, lays out the basic building blocks of literary and cultural studies. What kinds of questions do literary and cultural critics ask, and what kinds of evidence do they invoke to support their arguments? What formal properties characterize pieces of criticism that we find especially interesting and/or successful? How do critics balance the desire to say something fresh vis-a-vis the desire to say something sensible and true? What mix of traditional and innovative tools will best serve you as a critical writer? Voice, narrative, form, language, history, theory and the practice known as “close reading” will be considered in a selection of exemplary critical readings. Readings will also include “how-to” selections from recent guides including Amitava Kumar’s *Every Day I Write the Book*, Eric Hayot’s *The Elements of Academic Style* and Aaron Ritzenberg and Sue Mendelsohn’s *How Scholars Write*. The methods seminar is designed to prepare those students who choose to write a senior essay to complete a substantial independent project in the subsequent semester. Individual assignments will help you discover, define and refine a topic; design and pursue a realistic yet thrilling research program or set of protocols; practice “close reading” an object (not necessarily verbal or textual) of interest; work with critical sources to develop your skills of description and argument; outline your project; build out several sections of the project in more detail; and come up with a timeline for your spring semester work. In keeping with the iterative nature of scholarly research and writing, the emphasis is more on process than on product, but you will end the semester with a clear plan for your essay itself as well as for the tasks you will execute to achieve that vision the following semester. The methods seminar is required of all students who wish to write a senior essay in their final semester. Students who enroll in the methods seminar and decide not to pursue a senior essay in the spring will still receive credit for the fall course

#### Fall 2024: ENGL UN3795

## FALL 2024

### INTRODUCTION TO THE MAJOR

#### ENGL UN3001 LITERARY TEXTS # CRIT METHODS. 4.00 points.

Prerequisites: Students who register for ENGL UN3001 must also register for one of the sections of ENGL UN3011 Literary Texts, Critical Methods. This course is intended to introduce students to the advanced study of literature. Students will read works from different genres (poetry, drama, and prose fiction), drawn from the medieval period to the present day, learning the different interpretative techniques required by each. The course also introduces students to a variety of critical schools and approaches, with the aim both of familiarizing them with these methodologies in the work of other critics and of encouraging them to make use of different methods in their own critical writing. This course (together with the companion seminar ENGL UN3011) is a requirement for the English Major and Concentration. It should be taken as early as possible in a student's career. Fulfillment of this requirement will be a factor in admission to seminars and to some lectures

### MEDIEVAL

#### ENGL UN3920 MEDIEVAL ENGLISH TEXTS. 4.00 points.

Prerequisites: the instructor's permission.

The class will read the poem *Sir Gawain and the Green Knight* in the original Middle English language of its unique surviving copy of circa 1400, and will discuss both the poem's language and the poem's literary merit. The class will read the poem *Sir Gawain and the Green Knight* in the original Middle English language of its unique surviving copy of circa 1400, and will discuss both the poem's language and the poem's literary merit.

Fall 2024: ENGL UN3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3920	001/14190	T 10:10am - 12:00pm 612 Philosophy Hall	David Yerkes	4.00	17/18

### RENAISSANCE

#### ENGL UN3336 SHAKESPEARE II. 3.00 points.

(Lecture). Shakespeare II examines plays from the second half of Shakespeare's dramatic career, primarily a selection of his major tragedies and his later comedies (or "romances")

#### ENGL GU4263 Literature of the 17th C. 3 points.

This lecture course surveys the non-dramatic literature of seventeenth-century England, with particular attention to its prose writings. The course will focus on topics including the new politics of the Jacobean court; the tensions leading to the civil wars; the so-called "scientific revolution" and its discontents; and the challenges of the Restoration, including plague and fire. Authors studied will include Ben Jonson, Francis Bacon, John Donne, Aemelia Lanyer, George Herbert,

Thomas Browne, Robert Burton, John Milton, Andrew Marvell, Margaret Cavendish. Abraham Cowley, and Katherine Philips.

#### ENGL UN3262 English Literature 1500-1600. 3 points.

(Lecture). This course aims to introduce you to a selection of sixteenth-century English verse and prose, from major works such as More's *Utopia*, Spenser's *Faerie Queene* and Sidney's *Defense of Poesie*, to more occasional but illuminating excerpts. Although the classes will range widely across social, political and historical concerns, the focus will be on close reading of the texts. [NB This course fulfills the poetry requirement]

#### ENGL UN3343 WOMEN IN RENAISSANCE DRAMA CULTRE. 4.00 points.

Concentrating on the drama of early modern England, this course will investigate a culture of surveillance regarding women's bodies in the period. We will give special focus to the fear of female infidelity, the theatrical fascination with the woman's pregnant body, and the cultural desire to confirm and expose women's chastity. We will read plays in which women are falsely accused of adultery, in various generic contexts (such as William Shakespeare's *Cymbeline* and *Much Ado About Nothing*), along with plays in which women actually commit infidelity (such as the anonymous *Arden of Faversham* and Thomas Middleton's *A Chaste Maid in Cheapside*). Focusing on a different play each week, we will ask: what does it take, ultimately, to believe women about their fidelity? At the same time, what is the effect of being doubted on women themselves? We will also give consideration to the particular resources of dramatic form, paying attention to moments in plays that coerce spectators themselves into mistaken judgments about women. We will supplement our reading of drama with pamphlets, advice literature, poems, church court cases, and ballads, in order to place these plays within a broader and more varied culture of female surveillance in early modern England. Finally, we will work to recover past strategies of liberation from this surveillance in the plays we read, in women's writing that warns against male betrayal, and in dramatic and historical instances of female cross-dressing

### 18TH AND 19TH CENTURY

#### ENGL UN3728 American Transcendentalism. 4.00 points.

The class is an intensive reading of the prose and poetry of Emerson, Thoreau, Whitman and Emily Dickinson. Through detailed analysis of Emerson's *Essays* we will try to understand his philosophy as an effort to radically reformulate traditional concepts of identity, thinking, and everyday living, and investigate the politics that guided his philosophical efforts, especially his stance on slavery and his activism against the Cherokee removals. But we will also be interested in his thinking on dreams, visions and mental transports and in order to ask how those experiences come to model his understanding of personal identity and bodily integrity. In Thoreau, we will look closely into ideas about the art of living and his theory of architecture, as well as quotidian practices of dwelling, eating or cooking, as ways to come to terms with one's own life. We will pay special attention to Thoreau's understanding of

thinking as walking, as well as the question of space vs. time and we will spend a lot of time figuring his theory of living as mourning. With Whitman we will attend to his new poetics and investigate its relation to forms of American Democracy. We will also want to know how the Civil War affected Whitman's poetics both in terms of its formal strategies and its content. Finally, we will try to understand how ideas and values of transcendentalist philosophy fashion poetry of Emily Dickinson both in its form and its content. We will thus be looking at Dickinson's famous fascicles but also into such questions as loss, avian and vegetal life and the experience of the embodied more generally

**ENGL UN3933 Jane Austen. 4.00 points.**

Prerequisites: Permission of instructor.

This seminar offers intensive study of the career of Jane Austen, including important recent criticism. We'll be especially interested in the relations between narrative form and the social dynamics represented in her fiction. We'll try to cover all six of the (completed) novels, but we can adjust our pace in response to the interests of seminar members

**ENGL GU4400 Romanticism. 3.00 points.**

This course is designed as an overview of major texts (in poetry and prose), contexts, and themes in British Romanticism. The movement of Romanticism was born in the ferment of revolution, and developed alongside so many of the familiar features of the modern world—features for which Romanticism provides a vantage point for insight and critique. As we read authors including William Blake, Jane Austen, John Keats, Mary Shelley, and many others, we will situate our discussions around the following key issues: the development of individualism and new formations of community; industrialization and ecology (changes in nature and in the very conception of "nature"); and slavery and abolition

**CLEN GU4822 19th Century European Novel. 3 points.**

The European novel in the era of its cultural dominance.

Key concerns: the modern metropolis (London, Paris, St. Petersburg); the figures of bourgeois narrative (*parvenus*, adulterers, adolescents, consumers) and bourgeois consciousness (nostalgia, *ressentiment*, sentimentalism, ennui); the impact of journalism, science, economics. Authors to be drawn from: Goethe, Stendhal, Balzac, Dickens, Tolstoy, Dostoevsky, Flaubert, Turgenev, Zola.

## 20TH AND 21ST CENTURY

**ENGL GU4622 AFRICAN AMERICAN LITERATURE II. 3.00 points.**

(Lecture). This survey of African American literature focuses on language, history, and culture. What are the contours of African American literary history? How do race, gender, class, and sexuality intersect within the politics of African American culture? What can we expect to learn from these literary works? Why does our literature matter to student of social change? This lecture course will attempt to provide answers to these questions, as we begin with Zora Neale Hurstons *Their Eyes*

*Were Watching God* (1937) and Richard Wrights *Native Son* (1940) and end with Melvin Dixons *Loves Instruments* (1995) with many stops along the way. We will discuss poetry, fiction, drama, and non-fictional prose. Other authors include Ralph Ellison, James Baldwin, Gwendolyn Brooks, Malcom X, Ntozake Shange, Audre Lorde, and Toni Morrison. There are no prerequisites for this course. The formal assignments are two five-page essays and a final examination. Class participation will be graded

**ENGL UN3042 Ulysses. 4.00 points.**

The seminar will look at the structure of the novel, its plan, with special attention paid to 'The Odyssey', but also to the variations in tone in the book, the parodies and elaborate games becoming more complex as the book proceeds. We will examine a number of Irish texts that are relevant to the making of 'Ulysses', including Robert Emmett's speech from the dock, Yeats's 'The Countess Cathleen' and Lady Gregory translations from Irish folk-tales

**ENTA UN3970 MAJOR 20TH CENTURY PLAYWRIGHTS. 4.00 points.**

Prerequisites: the instructor's permission.

The course will trace the pattern of the evolving theatrical careers of Henrik Ibsen and Harold Pinter, exploring the nature of and relationships among key features of their emerging aesthetics. Thematic and theatrical exploration involve positioning the plays in the context of the trajectories of modernism and postmodernism and examining, in that context, the emblematic use of stage sets and tableaux; the intense scrutiny of families, friendships, and disruptive intruders; the experiments with temporality, multi-linearity, and split staging; the issues raised by performance and the implied playhouse; and the plays' potential as instruments of cultural intervention. Two papers are required, 5-7 pages and 10-12 pages, with weekly brief responses, and a class presentation. Readings include major plays of both writers and key statements on modernism and postmodernism. Application Instructions: E-mail Professor Austin Quigley (aeq1@columbia.edu) with the subject heading "Ibsen and Pinter seminar." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available

**CLEN GU4771 The Literary History of Atrocity. 3.00 points.**

Sometime around the publication of Garcia Marquez's classic novel *One Hundred Years of Solitude* in 1967, novelists who wanted to make a claim to ethical and historical seriousness began to include a scene of extreme violence that, like the banana worker massacre in Garcia Marquez, seemed to offer a definitive guide to the moral landscape of the modern world. This course will explore both the modern literature that was inspired by Garcia Marquez's example and the literature that led up to this extraordinary moment—for example, the

literature dealing with the Holocaust, with the dropping of the atomic bomb, with the Japanese invasion of China in the 1930s, and with the Allied bombing of the German cities. It will also ask how extraordinary this moment in fact was, looked at from the perspective of literature as a whole, by inspecting earlier examples of atrocities committed in classical antiquity, in the Crusades, against Native Americans and (in Tolstoy) against the indigenous inhabitants of the Caucasus. Before the concept of the non-combatant had been defined, could there be a concept of the atrocity? Could a culture accuse itself of misconduct toward the members of some other culture? In posing these and related questions, the course offers itself as a major but untold chapter both in world literature and in the moral history of humankind

**CLEN GU4201 POETRY OF THE AFRICAN DIASPORA. 3.00 points.**

This course will focus on twentieth century poetry written by authors of African descent in Africa, the Caribbean, and the United States. The readings will allow us to cover some of the most significant poetry written during the major black literary movements of the century, including the Harlem Renaissance, Negritude, and the Black Arts movement. In particular, the course will be designed around a selection of books of poetry by black writers. We will thus spend a substantial amount of time reading each poet in depth, as well as discussing various strategies for constructing a volume of poetry: thematic or chronological arrangements, extended formal structures (suites, series, or montages), historical poetry, attempts to imitate another medium (particularly black music) in writing, etc. We will use the readings to consider approaches to the theorization of a diasporic poetics, as well as to discuss the key issues at stake in the tradition including innovation, the vernacular, and political critique

**ENGL UN3757 The Lost Generation. 4.00 points.**

In this course we'll study literature by "The Lost Generation," the celebrated cohort of U.S. writers who came of age during the First World War and went on to publish their major works during the heady days of The Jazz Age and the doldrums of The Great Depression. The authors we'll read will include Barnes, Dos Passos, Eliot, Faulkner, Fitzgerald, Hemingway, Hughes, Hurston, Larsen, Loos, McKay, and Toomer, and we'll talk about their relations to the major aesthetic movements of the 1920s and 1930s: Modernism, The Harlem Renaissance, and The Literary Left. Our primary focus, however, will be on how these writers depicted and expressed the alienation of the young during this period. We'll be learning about a rising generation of Americans who felt out of step with their times and ill-suited to their places, and we'll be reading books about rootlessness and expatriation, masking and passing, apathy and radicalism, loneliness and misanthropy, repression and derangement, and several other preoccupations of these drifting, wandering, "lost" artists

**ENGL GU4316 WORLD'S END: 20th/21st CENTURY DYSTOPIAN FICTION AND FILM. 3.00 points.**

No future, there's no future, no future for you...or me...What happens after the end of the future? If England's dreaming in 1977 looked like a dead-end, how do we dream of futures in a moment so much closer to the reality of worlds' end? In this class, we will read a range of ambiguous utopias and dystopias (to use a term from Ursula LeGuin) and explore various models of temporality, a range of fantasies of apocalypse and a few visions of futurity. While some critics, like Frederick Jameson, propose that utopia is a "meditation on the impossible," others like José Muñoz insist that "we must dream and enact new and better pleasures, other ways of being in the world, and ultimately new worlds." Utopian and dystopian fictions tend to lead us back to the present and force confrontations with the horrors of war, the ravages of capitalist exploitation, the violence of social hierarchies and the ruinous peril of environmental decline. In the films and novels and essays we engage here, we will not be looking for answers to questions about what to do and nor should we expect to find maps to better futures. We will no doubt be confronted with dead ends, blasted landscapes and empty gestures. But we will also find elegant aesthetic expressions of ruination, inspirational confrontations with obliteration, brilliant visions of endings, breaches, bureaucratic domination, human limitation and necropolitical chaos. We will search in the narratives of uprisings, zombification, cloning, nuclear disaster, refusal, solidarity, for opportunities to reimagine world, ends, futures, time, place, person, possibility, art, desire, bodies, life and death

**CLEN GU4550 NARRATIVE AND HUMAN RIGHTS. 3.00 points.**

(Lecture). We can't talk about human rights without talking about the forms in which we talk about human rights. This course will study the convergences of the thematics, philosophies, politics, practices, and formal properties of literature and human rights. In particular, it will examine how literary questions of narrative shape (and are shaped by) human rights concerns; how do the forms of stories enable and respond to forms of thought, forms of commitment, forms of being, forms of justice, and forms of violation? How does narrative help us to imagine an international order based on human dignity, rights, and equality? We will read classic literary texts and contemporary writing (both literary and non-literary) and view a number of films and other multimedia projects to think about the relationships between story forms and human rights problematics and practices. Likely literary authors: Roberto Bolaño, Miguel de Cervantes, Assia Djebar, Ariel Dorfman, Slavenka Drakulic, Nuruddin Farah, Janette Turner Hospital, Franz Kafka, Sahar Kalifeh, Sindiwe Magona, Maniza Naqvi, Michael Ondaatje, Alicia Partnoy, Ousmane Sembène, Mark Twain . . . . We will also read theoretical and historical pieces by authors such as Agamben, An-Naim, Appiah, Arendt, Balibar, Bloch, Chakrabarty, Derrida, Douzinas, Habermas, Harlow, Ignatieff, Laclau and Mouffe, Levinas, Lyotard, Marx, Mutua, Nussbaum, Rorty, Said, Scarry, Soyinka, Spivak, Williams

**ENGL UN3269 BRITISH LITERATURE 1900-1950. 3.00 points.**

This is a survey course on great works of British literature from around 1900 through around 1950, starting with the late-Victorian world of Thomas Hardy, extending through the fin-de-siècle worlds of Oscar Wilde and W. B. Yeats, then into the modernist landscape of Joseph Conrad, James Joyce, and T. S. Eliot, and ending with the late-modernist vision of Virginia Woolf and W. H. Auden. The course includes a wide range of social, political, psychological, and literary concerns, and delves deeply into political and moral questions that are always urgent but which took specific forms during this period

**ENGL GU4605 AMERICAN LITERATURE-POST 1945. 3.00 points.****AMST UN3931 Topics in American Studies. 4 points.**

**ENGL UN3851 INDIAN WRITING IN ENGLISH. 4.00 points.**

Prerequisites: the instructor's permission.

Prerequisites: the instructor's permission. (Seminar). As the great imperial powers of Britain, France, and Belgium, among others, ceded self-rule to the colonies they once controlled, formerly colonized subjects engaged in passionate discussion

about the shape of their new nations not only in essays and pamphlets but also in fiction, poetry, and theatre. Despite the common goal of independence, the heated debates showed that the postcolonial future was still up for grabs, as the boundary lines between and within nations were once again redrawn. Even such cherished notions as nationalism were disputed, and thinkers like the Nobel laureate Rabindranath Tagore sounded the alarm about the pitfalls of narrow ethnocentric thinking. Their call for a philosophy of internationalism went against the grain of ethnic and racial particularism, which had begun to take on the character of national myth. The conflict of perspectives showed how deep were the divisions among the various groups vying to define the goals of the postcolonial nation, even as they all sought common cause in liberation from colonial rule. Nowhere was this truer than in India. The land that the British rulers viewed as a test case for the implementation of new social philosophies took it upon itself to probe their implications for the future citizenry of a free, democratic republic. We will read works by Indian writers responding to decolonization and, later, globalization as an invitation to rethink the shape of their societies. Beginning as a movement against imperial control, anti-colonialism also generated new discussions about gender relations, secularism and religious difference, the place of minorities in the nation, the effects of partition on national identity, among other issues. With the help of literary works and historical accounts, this course will explore the challenges of imagining a post-imperial society in a globalized era without reproducing the structures and subjectivities of the colonial state. Writers on the syllabus include Rabindranath Tagore, M.K. Gandhi, B.R. Ambedkar, Mulk Raj Anand, Raja Rao, Mahasweta Devi, Bapsi Sidwa, Rohinton Mistry, Amitav Ghosh, and Arundhati Roy. Application Instructions: E-mail Professor Viswanathan (gv6@columbia.edu) with the subject heading Indian Writing in English seminar. In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course

**ENGL UN3710 The Beat Generation. 4 points.**

Limited to seniors. Priority given to those who have taken at least one course in 20th-century American culture, especially history, jazz, film, and literature.

Prerequisites: Permission of instructor.

(Seminar). Surveys the work of the Beats and other artists connected to the Beat movement. Readings include works by Jack Kerouac, Allen Ginsberg, William Burroughs, Amiri Baraka, and Joyce Johnson, as well as background material in the post-World War II era, films with James Dean and Marlon Brando, and the music of Charlie Parker and Thelonius Monk. **Application instructions:** E-mail Professor Ann Douglas (ad34@columbia.edu) with the subject heading "The Beat Generation". In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. *Admitted students should register for the*

*course; they will automatically be placed on a wait list, from which the instructor will in due course admit them as spaces become available.*

## SPECIAL TOPICS

### ENGL UN3394 HOW WRITERS THINK. 4.00 points.

Prerequisites: Permission of instructor.

The spell cast by a captivating novel or elegant research can lead us to imagine that great writing is a product of the author's innate genius. In reality, the best writing is a product of certain not-very-intuitive practices. This course lifts the veil that obscures what happens in the minds of the best writers. We will examine models of writing development from research in composition studies, cognitive psychology, genre studies, linguistics, ESL studies, and educational psychology. Our classroom will operate as a laboratory for experimenting with the practices that the research identifies. Students will test out strategies that prepare them for advanced undergraduate research, graduate school writing, teaching, editing, and collaborative writing in professional settings. The course is one way to prepare for applying for a job as a peer writing fellow in Columbia's Writing Center

Spring 2025: ENGL UN3394

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3394	001/14726	T 2:10pm - 4:00pm 612 Philosophy Hall	Aaron Ritzenberg	4.00	18/18

### ENGL UN3756 LITERARY NONFICTION. 4.00 points.

This course is about "creative" or "literary nonfiction": writing that deploys techniques usually associated with literature to tell stories about actual events, people, or things. Over the course of the seminar, we will investigate the nature of the genre, looking closely at the work of some of its greatest practitioners to analyze how they convey their meaning and achieve their effects. We will ask why writers might choose to use literary techniques to write nonfiction, and discuss the ethical issues the genre raises. At the same time, the seminar is a place for you to develop your work in a supportive and thoughtful community of readers and writers. Application instructions: to apply, please email Professor Peters (peters@columbia.edu) the following: name, year, school, major, a few sentences on why you want to take the course, and a short piece representing your writing at its best. (It may be fiction or nonfiction, and there is no minimum or maximum length, but choose a piece whose first few sentences show the quality of your writing!)

### CLEN UN3776 A Pre-History of Science Fiction. 4.00 points.

This undergraduate seminar course traces a possible pre-history of the genre we now know as science fiction. While science fiction is routinely tracked back to the nineteenth century, often to *Frankenstein* or *The Last Man* by Mary Shelley, this course looks at some earlier literary writings that share certain features of modern science fiction: utopian and dystopian societies, space travel, lunar travel, time travel, the mad experimental scientist, and unknown peoples or creatures. While the center

of this course features texts associated with the Scientific Revolution of the seventeenth century (by Bacon, Kepler, Godwin, and Cavendish), it ranges back to the second century Lucian of Sarosota, and forward to the early nineteenth century with novels by Shelley

Spring 2025: CLEN UN3776

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLEN 3776	001/14677	T 8:10am - 10:00am 612 Philosophy Hall	Alan Stewart	4.00	14/18

### ENGL GU4938 HISTORY OF HORROR. 3.00 points.

This course will take a *longue durée* approach to one of the most widely-attested, and least studied, genres in the western canon: horror. We will take as an orienting assumption the idea that horror is a serious genre, capable of deep and sustained cultural, political, and historical critique, despite its contemporary status as "pulpy" or "pop culture." We will ask what horror is as an affective and cognitive state, and we will also ask what horror means as a genre. We will ask how horror gets registered in narrative, drama, and in poetic form, and we will address how horror evolves over the centuries. Indeed, the course will range widely, beginning in the early 14th century, and ending in the second decade of the 21st. We will explore multiple different sub-genres of horror, ranging from lyric poetry to film, to explore how horror afforded authors with a highly flexible and experimental means of thinking through enduring questions about human life, linguistic meaning, social connectedness, connectedness with The Beyond, scientific inquiry, and violence. We will explore a series of through-lines: most notably that of cultural otherness, with Jewishness as a particularly archetypal other, thus the pronounced treatment of Jewish literature throughout the course. Other through-lines will include the ideas of placelessness, violence toward women, perverse Christian ritual, and the uncanny valley that separates humans from non-humans. Ultimately, we will try to map out the kinds of social, political, and historical work that horror can do

### ENGL UN3879 Global Adaptations of Shakespeare. 4.00 points.

Shakespeare is often considered a touchstone of "universal" values and ideas, and yet his work has been robustly adapted/rewritten/blown apart/creatively appropriated by people across the world who remake his plays to serve their own visions. This course will introduce some of the debates about adaptation and appropriation in modern Shakespeare studies by looking at three plays—*Romeo and Juliet*, *Othello*, and *Twelfth Night*—and some of the many adaptations springing from those works. Who owns Shakespeare? How radically can a play be refashioned and still be considered in conversation with his work? Is it useful to divide adaptations into those that resist or write back against Shakespeare and those that display a less conflicted relationship to his authority? What political work do adaptations do in the contexts in which they were written? What happens to those local roots and contexts when productions and

films enter global networks of distribution and interpretation? How does a change in medium, say from theater to film to comic book, affect the appropriation process? We will take up these questions in regard to adaptations created in regions as different as India, Iraq, Mali, and Canada. No prior Shakespeare coursework is required, though some knowledge of his plays is preferable. Assignments include two short papers, an oral presentation, and brief weekly responses to each adaptation

**CLEN UN3720 Plato the Rhetorician. 4 points.**

Prerequisites: Instructor's permission

(Seminar). Although Socrates takes a notoriously dim view of persuasion and the art that produces it, the Platonic dialogues featuring him both theorize and practice a range of rhetorical strategies that become the nuts and bolts of persuasive argumentation. This seminar will read a number of these dialogues, including *Apology*, *Protagoras*, *Ion*, *Gorgias*, *Phaedrus*, *Menexenus* and *Republic*, followed by Aristotle's *Rhetoric*, the rhetorical manual of Plato's student that provides our earliest full treatment of the art. Application instructions: E-mail Prof. Eden (khe1@columbia.edu) with your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available.

**CLEN UN3455 Pacifism and the Apocalyptic Imagination. 4.00 points.**

This course examines the evolution of pacifist thought in literature from the interwar years to the dawn of the atomic age. It seeks to study the literature of twentieth-century pacifism as a response to expanding technologies of modern warfare. The course asks the following questions, among others: What shape does pacifist thought take in the atomic age, and how does it compare with interwar pacifism? What similarities or differences are discernible? What role do literary representations of modern warfare play in the evolution of pacifist thought? Does pacifism gain persuasive power through these representations, or do they lay bare its limits? How might one understand pacifism's conceptual relation to nonviolence, anti-war resistance, and anti-militarism? The course begins with works by pacifist writers in the interwar years: Bertrand Russell, *Why Men Fight* (1917); the correspondence between Einstein and Freud in 1932; Aldous Huxley, "What Are You Going to Do About It?" (1936) and *Eyeless in Gaza* (1936); Virginia Woolf, *Three Guineas* (1938) and "Thoughts on Peace in an Air Raid" (1940); Vera Brittain, "Women and Peace" (1940). The course then considers the evolution of pacifism in the shadow of Hiroshima and Nagasaki, focusing on novels, memoirs, essays, short stories, and films, including the following works: Aldous Huxley, *Ape and Essence* (1948); M. K. Gandhi, *For Pacifists* (1949); Pearl Buck, *Command the Morning* (1959); Alfred Coppel, *Dark December* (1960); Masuji Ibuse, *Black Rain* (1965); Kenzaburo Oe, *Hiroshima Notes* (1965) and *Fire from the Ashes*, ed. (1985); Anand

Patwardhan, *War and Peace* (2002, documentary); Howard Zinn (ed.), *The Power of Nonviolence* (2002). The course encourages students to view selected films probing pacifist and anti-war themes alongside literary and philosophical texts, with a view to grasping the themes' adaptability across various genres. Students must apply to enrol in the seminar, providing information about year, school, relevant prior coursework, and reasons for wanting to take the course. Students from all disciplines are welcome to apply; prior coursework in literature is strongly recommended

**CLEN GU4728 Literature in the Age of AI. 3.00 points.**

In this course we will consider the long history of literature composed with, for, and by machines. Our reading list will start with Ramon Llull, the thirteenth-century combinatorial mystic, and continue with readings from Gottfried Leibniz, Francis Bacon, Jonathan Swift, and Samuel Butler. We will read "Plot Robots" instrumental to the writing of Hollywood scripts and pulp fiction of the 1920s, the avant-garde poetry of Dada and OULIPO, computer-generated love letters written by Alan Turing, and novels created by the first generation of artificial intelligence researchers in the 1950s and 60s. The course will conclude at the present moment, with an exploration of machine learning techniques of the sort used by Siri, Alexa, and other contemporary chat bots

**ENGL UN3486 Out of Her Mind: American Women Writing, 1630-1930. 4.00 points.**

This course explores how American women writers who suffered from depression, disability, bodily pain, or social marginalization, used the environment and its literary representations to redefine the categories of gender, ability, and personhood. Prior to their inclusion into the public sphere through the US Constitution's 19th Amendment which in 1920 granted women the right to vote, American artists had to be particularly resourceful in devising apt strategies to counter the political and aesthetic demands that had historically dispossessed them of the voice, power, and body. This course focuses on the women writers who conceptualized their own surroundings (home, house, marriage, country, land, island and the natural world) as an agent that actively and decisively participates in the construction and dissolution of personal identity. In doing so, they attempted to annul the separation of the public (politics) and the private (home) as respective male and female spheres, and in this way they contributed, ahead of their own time, to the suffragist debates. Our task in this course will be to go beyond the traditional critical dismissal of these emancipatory strategies as eccentric or "merely aesthetic" and therefore inconsequential. Instead, we will take seriously Rowlandson's frontier diet, Fuller's peculiar cure for her migraines, Wheatley's oblique references to the Middle Passage, Jewett's islands, Ša's time-travel, Thaxter's oceans, Hurston's hurricanes, and Sansay's scathing portrayal of political revolutions. We will read these portrayals as aesthetic decisions that had—and continue to have—profound political consequences: by externalizing and depersonalizing what is commonly understood to be internal and intimate, the authors we read collapse the distinction between inside and

outside, between the private and public—the distinction that traditionally excluded women from participation in the public life, in policy- and decision-making

Spring 2025: ENGL UN3486

## ETHNICITY AND RACE STUDIES

### THE CENTER FOR THE STUDY OF ETHNICITY AND RACE

Department Website: [Center for the Study of Ethnicity and Race](#)

Office location: 420 Hamilton Hall

Office contact: 212-854-0510, 212-854-0507

**Director of Undergraduate Studies:** Dr. Bahia Munem; bmm2194@columbia.edu; 212-854-2058

**Assistant Director:** May Niiya; mkn2129@columbia.edu; 212-854-0510

**Program Coordinator:**

### ETHNICITY AND RACE STUDIES

Founded in 1999, the Center for the Study of Ethnicity and Race (CSER) is an interdisciplinary intellectual space whose mission is to advance the most innovative teaching, research, and public discussion about race and ethnicity. To promote its mission, the Center organizes conferences, seminars, exhibits, film screenings, and lectures that bring together faculty, undergraduates, and graduate students with diverse interests and backgrounds. Moreover, CSER partners with departments, centers, and institutes at Columbia, as well as with colleagues and organizations on and off campus, in order to reach new audiences and facilitate an exchange of knowledge.

### STUDENT ADVISING

#### Consulting Advisers

Information to be added

#### Enrolling in Classes

Information to be added

#### Preparing for Graduate Study

Information to be added

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Barnard College Courses

To ensure that Barnard College courses complement the major and integrate effectively with the major's requirements, students are encouraged to consult with CSER's undergraduate adviser as early in their academic program as possible. The director of undergraduate studies can advise students in what may be relevant programs for their areas.

### Transfer Courses

To ensure that transfer courses complement the major and integrate effectively with the major's requirements, students are encouraged to consult with CSER's undergraduate adviser as early in their academic program as possible. The director of undergraduate studies can advise students in what may be relevant programs for their areas.

### Study Abroad Courses

Students are highly encouraged to participate in study-abroad programs through the [Center for Undergraduate Global Engagement](#), as they represent an exciting opportunity to learn new languages and live in countries that are germane to their areas of study. In addition, travel abroad can enrich every student's intellectual experience by providing an opportunity to learn about other perspectives on ethnicity and race.

In the past, students have participated in study-abroad programs in many parts of the world, including Australia, the Dominican Republic, Mexico, and South Africa. To ensure that study abroad complements the major and integrates effectively with the major's requirements, students are encouraged to consult with CSER's undergraduate adviser as early in their academic program as possible. The director of undergraduate studies can advise students in what may be relevant programs for their areas.

### Summer Courses

To ensure that summer courses complement the major and integrate effectively with the major's requirements, students are encouraged to consult with CSER's undergraduate adviser as early in their academic program as possible. The director of undergraduate studies can advise students in what may be relevant programs for their areas.

## CORE CURRICULUM CONNECTIONS

Information to be added

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Thesis Coursework and Requirements

Majors who elect to follow the Honors track must complete at least four CSER elective courses within their area of

specialization, and maintain a 3.6 GPA in the major. In lieu of a fifth elective, Honors majors are required to enroll in the following course in the spring semester of their senior year, during which they are required to write a thesis:

CSER UN3990 Senior Project Seminar (4 points)

Honors majors are required to present their senior essays at the annual undergraduate symposium in April. Students may fulfill this option in one of the following two ways:

1. By matriculating in the Senior Thesis course and writing the thesis under the supervision of the course faculty.
2. By taking an additional 4-point seminar where a major paper is required and further developing the paper into a thesis length work (minimum of 30 pages) under the supervision of a CSER faculty member.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

CSER majors may choose to write and/or produce an honors project. The senior thesis gives undergraduate majors the opportunity to engage in rigorous, independent, and original research on a specific topic of their choosing. If a monograph, the honors thesis is expected to be 35-50 pages in length. Honors projects can also take other forms, such as video or websites. These projects also require a written component, but of a shorter length than the traditional thesis. During their senior year, honors students perform research as part of CSER UN3990 Senior Project Seminar. Senior projects are due in early April. The Honors Thesis is an excellent option for any student interested in pursuing a Master's degree or Ph.D. Students should consult with their director of undergraduate studies no later than the beginning of the first term of their senior year if they wish to be considered for departmental honors. Students who are awarded departmental honors are notified by their department in mid-May.

In order to qualify for departmental honors, students must satisfy all the requirements for the major, maintain a GPA of at least 3.6 in the major, and complete a high quality honors project. In addition, each student is expected to meet periodically with his or her supervising project adviser and preceptor. Although the senior thesis is a prerequisite for consideration for departmental honors, all Ethnicity and Race studies majors are strongly encouraged to consider undertaking thesis work even if they do not wish to be considered for departmental honors.

### Academic Prizes

In addition to departmental honors, CSER also confers the following awards to two graduating seniors:

CSER Award for Outstanding Thesis

- A CSER faculty committee will review all senior projects and will select one for the Outstanding Thesis award.
- As part of its deliberation process, the committee reviews recommendations made by CSER faculty, the Modes of Inquiry# course instructor and the CSER preceptor. In order to receive this award, the student must keep a GPA of 3.6 or above in the major courses.

CSER Award for Academic Excellence

- CSER confers this award to a student who has consistently demonstrated her/his intellectual capacity in and outside the classroom. In order to receive this award, the student must keep a GPA of 3.6 or above in the major courses.

## UNDERGRADUATE PROGRAMS OF STUDY

The Ethnicity and Race Studies major and concentration encompass a variety of fields and interdisciplinary approaches to the critical study of ethnicity and race.

Faculty and students find this field exciting because it opens up new ways of thinking about two fundamental aspects of human social existence: race and ethnicity. Although various traditional disciplines such as history, sociology, anthropology, and literature offer valuable knowledge on the subject, ethnicity and race studies provides a flexible interdisciplinary and comparative space to bring the insights of various conceptual frameworks and disciplines together in critical dialogue.

Overall, the major introduces students to the study of ethnicity and race and the deep implications of the subject matter for thinking about human bodies, power, identity, culture, social hierarchy, and the formation of political communities. The major encourages students to consider the repercussions of racial and ethnic identifications to local and global politics, and how race and ethnicity relates to gender, sexuality, and social class, among other forms of hierarchical difference.

Students majoring in ethnicity and race studies may focus their work on specific groups, including Asian Americans, Latinos, and Native Americans, and/or concentrate on the comparative study of how race and ethnic categories are formed and how they transform. Students also have the option of designing an individualized course of study. Individualized courses of study may encompass a wide variety of themes. Among the most studied are those involving the relationship between race, ethnicity and law; health; human rights; urban spaces; cultural production; visual culture; and the environment.

Due to its rigorous curriculum, which trains students in theory, history, and a wide range of modes of inquiry, the major enables a student to follow multiple directions after graduation. According to our internal surveys, nearly half of CSER students continue to graduate programs in history, anthropology, and ethnic studies, among other areas. A second group of students pursues a variety of professions, most notably related to law, medicine, media, social work, government, and human rights.

## MAJOR IN ETHNICITY AND RACE STUDIES

*The requirements for this program were modified on March 2022. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.*

The major in ethnicity and race studies consists of a minimum of 27 points. All majors are required to take three core courses as listed below:

Core Courses		Points
1.		
CSER UN1010	INTRO TO COMP ETHNIC STUDIES (or)	4.00
2.		
CSER UN3928	COLONIZATION/ DECOLONIZATION	4.00

OR		
CSER UN3942	RACE AND RACISMS	4.00
3.		
CSER UN3919	MODES OF INQUIRY	4.00

### Specialization

All majors will select one of the areas of specialization listed below from which to complete their remaining coursework:

- Asian American studies
- Comparative ethnic studies
- Latino/a studies
- Native American/Indigenous studies
- Individualized courses of study

Majors who elect NOT to follow the Honors track must complete at least five CSER elective courses, in consultation with their major adviser, within their area of specialization. At least one of these electives must be a writing-intensive seminar (3000 or above level courses must be chosen within the department). Majors who elect to follow the Honors track must complete at least four CSER elective courses, in consultation with their major adviser, within their area of specialization.

### Honors

In lieu of a fifth elective, Honors majors are required to enroll in the following course in the spring semester of their senior year, during which they are required to write a thesis:

CSER UN3990	SENIOR PROJECT SEMINAR	4
-------------	------------------------	---

Honors majors are required to present their senior essays at the annual undergraduate symposium in April. Students may fulfill this option in one of the following two ways:

1. By matriculating in the Senior Thesis course and writing the thesis under the supervision of the course faculty.
2. By taking an additional 4-point seminar where a major paper is required and further developing the paper into a thesis length work (minimum of 30 pages) under the supervision of a CSER faculty member.

### Language Courses

- One of the following is highly recommended, although not required for the major:

- One course beyond the intermediate-level in language pertinent to the student's focus
- An introductory course in a language other than that used to fulfill the degree requirements, but that is pertinent to the student's focus
- A linguistics or other course that critically engages language
- An outside language and study abroad programs that include an emphasis on language acquisition

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Ethnicity and Race Studies

*The requirements for this program were modified on March 2022. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their correct course of study.*

The concentration in ethnicity and race studies requires a minimum of 19 points. Students take two core courses (may choose between CSER UN1010 and CSER UN1040) and four elective courses, one of which must be a seminar:

			Points
<b>Core Courses</b>			
The concentration in ethnicity and race studies requires a minimum of 19 points. All students who choose a concentration are required to take two core course as listed below:			
1.			
CSER UN1010	INTRO TO COMP ETHNIC STUDIES (or)	4	
2.			
CSER UN3928	COLONIZATION/ DECOLONIZATION	4	
OR			
CSER UN3942	RACE AND RACISMS	4	
<b>Specialization</b>			
Students must complete at least four courses, in consultation with their major adviser, in one of the following areas of specialization. At least one of the elective courses must be a seminar.			
Asian American studies			
Comparative ethnic studies			
Latino/a studies			
Native American/Indigenous studies			
Individualized courses of study			

## SPRING 2025

### Ethnicity and Race Studies

#### CSER UN3701 LATINX RACIAL IDENTITY # CULTURAL PRODUCTION. 4.00 points.

Enrollment limited to 22.

The course will investigate the impact of racial identity among Latinx in the U.S. on cultural production of Latinos in literature, media, politics and film. The seminar will consider the impact of bilingualism, shifting racial identification, and the viability of monolithic terms like Latinx. We will see how the construction of Latinx racial identity affects acculturation in the U.S., with particular attention to hybrid identities and the centering of black and indigenous cultures. Examples will

be drawn from different Latinx ethnicities from the Caribbean, Mexico and the rest of Latin America

Spring 2025: CSER UN3701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3701	001/15873	T 2:10pm - 4:00pm 420 Hamilton Hall	Edward Morales	4.00	19/22

#### CSER UN3875 Performances of Race # Disaster. 4.00 points.

Through close study of popular culture and policy, this course examines the creation and maintenance of race within and through scenes of “natural disaster.” Flood, famine, and earthquake are demonstrations of unrest and rupture that are not simply environmental but also socio-politically produced by the ongoing disaster of racial capitalism. In our efforts to uncover the ways in which race is (per)formed on stage and street as well as within the wide halls of government, we will pay close attention to the language, services, organizations, and cultural productions used to entrench the punitive differences announced and amplified by disaster. Along the way, we will also complicate that word (“disaster”) in order to listen to the voices and make space for the bodies of those vulnerable peoples in the U.S. and contiguous Global South

Spring 2025: CSER UN3875

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3875	001/17540	T 12:10pm - 2:00pm 420 Hamilton Hall	Shana Redmond	4.00	9/12

#### CSER UN3905 ASIAN AMERICAN # PSYCH OF RACE. 4.00 points.

This seminar provides an introduction to mental health issues for Asian Americans. In particular, it focuses on the psychology of Asian Americans as racial/ethnic minorities in the United States by exploring a number of key concepts: immigration, racialization, prejudice, family, identity, pathology, and loss. We will examine the development of identity in relation to self, family, college, and society. Quantitative investigation, qualitative research, psychology theories of multiculturalism, and Asian American literature will also be integrated into the course

Spring 2025: CSER UN3905

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3905	001/15874	T 10:10am - 12:00pm 420 Hamilton Hall	Motoni Fong Hodges	4.00	16/15

#### CSER UN3913 VIDEO AS INQUIRY. 4.00 points.

The goal of this course is to familiarize students with visual production, particularly video production, as a mode of inquiry to explore questions related to race, ethnicity, indigeneity, and other forms of social hierarchy and difference. The class will include readings in visual production as a mode of inquiry and on the basic craft of video production in various genres (fiction, documentary, and experimental). As part of the course, students will produce a video short and complete it by semester's end

**Spring 2025: CSER UN3913**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3913	001/15875	W 4:10pm - 6:00pm 420 Hamilton Hall	Frances Negron-Muntaner	4.00	21/18

**CSER UN3940 COMP STUDY OF CONSTITUTNL CHAL. 4.00 points.**

This course will examine how the American legal system decided constitutional challenges affecting the empowerment of African, Latino, and Asian American communities from the 19th century to the present. Focus will be on the role that race, citizenship, capitalism/labor, property, and ownership played in the court decision in the context of the historical, social, and political conditions existing at the time. Topics include the denial of citizenship and naturalization to slaves and immigrants, government sanctioned segregation, the struggle for reparations for descendants of slavery, and Japanese Americans during World War II

**Spring 2025: CSER UN3940**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3940	001/15876	Th 10:10am - 12:00pm 420 Hamilton Hall	Elizabeth OuYang	4.00	16/22

**CSER UN3942 RACE AND RACISMS. 4.00 points.**

In this class we will approach race and racism from a variety of disciplinary and intellectual perspectives, including: critical race theory/philosophy, anthropology, history and history of science and medicine. We will focus on the development and deployment of the race concept since the mid-19th century. Students will come to understand the many ways in which race has been conceptualized, substantiated, classified, managed and observed in the (social) sciences, medicine, and public health. We will also explore the practices and effects of race (and race-making) in familiar and less familiar social and political worlds. In addition to the courses intellectual content, students will gain critical practice in the seminar format -- that is, a collegial, discussion-driven exchange of ideas

**Fall 2024: CSER UN3942**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3942	001/13936	W 2:10pm - 4:00pm 420 Hamilton Hall	Bahia Munem	4.00	11/15

**Spring 2025: CSER UN3942**

CSER 3942	001/15877	W 2:10pm - 4:00pm 420 Hamilton Hall	Bahia Munem	4.00	16/15

**CSER UN3990 SENIOR PROJECT SEMINAR. 4.00 points.**

The Senior Project Seminar will focus primarily on developing students' ideas for their research projects while charting their research goals. The course is designed to develop and hone the skills necessary to complete a senior thesis paper or creative project. An important component of the seminar is the

completion of original and independent student research. The seminar provides students a forum in which to discuss their work with both the instructor and their peers. The professor, who facilitates the colloquium, will also provide students with additional academic support through seminar presentations, one-on-one meetings, and classroom exercises; supplementary to the feedback they receive from their individual faculty advisors. The course is divided into three main parts: 1.) researching and producing a senior project thesis; 2.) the submission of coursework throughout the spring semester that help lead to a successful completed project; 3.) and an oral presentation showcasing one's research to those in and beyond the CSER community at the end of the academic year. This course is reserved for seniors who are completing a CSER senior project and who have successfully completed Modes of Inquiry in either their junior or senior year

**Spring 2025: CSER UN3990**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3990	001/15878	W 12:10pm - 2:00pm 420 Hamilton Hall	Darius Echeverria	4.00	20/22

**CSER GU4004 Data, Race, Power and Justice. 4.00 points.**

For more than a century, scientists, policy makers, law enforcement, and government agencies have collected, curated and analyzed data about people in order to make impactful decisions. This practice has exploded along with the computational power available to these agents. Those who design and deploy data collection, predictive analytics, and autonomous and intelligent decision-making systems claim that these technologies will remove problematic biases from consequential decisions. They aim to put a rational and objective foundation based on numbers and observations made by non-human sensors in the management of public life and to equip experts with insights that, they believe, will translate into better outcomes (health, economic, educational, judicial) for all. But these dreams and their pursuit through technology are as problematic as they are enticing. Throughout American history, data has often been used to oppress minoritized communities, manage populations, and institutionalize, rationalize, and naturalize systems of racial violence. The impersonality of data, the same quality that makes it useful, can silence voices and displace entire ways of knowing the world

**Spring 2025: CSER GU4004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 4004	001/15879	F 10:10am - 12:00pm 613 Hamilton Hall	Brian Luna Lucero	4.00	16/22

**CSER GU4005 Abolition: Theory and Practice. 4.00 points.**

This course will follow the idea of abolition as expressed first through the eighteenth and nineteenth-century struggle to end chattel slavery in the Americas, and then as it has come to define the struggle against over-policing and mass-incarceration in the late twentieth and early twenty-first centuries. In the first half of the class, we will consider abolition in England and its colonies, Haiti, Cuba, and the U.S. In so doing we will

examine both primary sources from abolitionist print culture (narratives by fugitives from slavery, speeches, poems, and polemical tracts), as well as secondary sources by historians, literary critics, and political theorists. In the second half, we will likewise read writing by activists (some incarcerated or formerly incarcerated, and some not) alongside journalism and scholarship from the burgeoning interdisciplinary field of carceral studies. Across both periods, Black writers will take up the bulk of our attention

#### Spring 2025: CSER GU4005

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 4005	001/15880	M 4:10pm - 6:00pm 420 Hamilton Hall	Matthew Sandler	4.00	14/25

#### CSER GU4340 Visionary Medicine: Racial Justice, Health and Speculative Fiction. 4.00 points.

In Fall 2014, medical students across the U.S. staged die-ins as part of the nationwide #blacklivesmatter protests. The intention was to create a shocking visual spectacle, laying on the line “white coats for black lives.” The images were all over social media: students of all colors, dressed in lab coats, lying prone against eerily clean tile floors, stethoscopes in pockets, hands and around necks. One prone student held a sign reading, “Racism is Real.” These medical students’ collective protests not only created visual spectacle, but produced a dynamic speculative fiction. What would it mean if instead of Michael Brown or Eric Garner or Freddie Gray, these other, more seemingly elite bodies were subjected to police violence? In another viral image, a group of African American male medical students from Harvard posed wearing hoodies beneath their white coats, making clear that the bodies of some future doctors could perhaps be more easily targeted for state-sanctioned brutality. “They tried to bury us,” read a sign held by one of the students, “they didn’t realize we were seeds.” Both medicine and racial justice are acts of speculation; their practices are inextricable from the practice of imagining. By imagining new cures, new discoveries and new futures for human beings in the face of illness, medicine is necessarily always committing acts of speculation. By imagining ourselves into a more racially just future, by simply imagining ourselves any sort of future in the face of racist erasure, social justice activists are similarly involved in creating speculative fictions. This course begins with the premise that racial justice is the bioethical imperative of our time. It will explore the space of science fiction as a methodology of imagining such just futures, embracing the work of Asian- and Afroturism, Cosmos Latinos and Indigenous Imaginaries. We will explore issues including Biocolonialism, Alien/nation, Transnational Labor and Reproduction, the Borderlands and Other Diasporic Spaces. This course will be seminar-style and will make central learner participation and presentation. The seminar will be interdisciplinary, drawing from science and speculative fictions, cultural studies, gender studies, narrative medicine, disability studies, and bioethics. Ultimately, the course aims to connect the work of science and speculative fiction with on the ground action and organizing

CSER 4340	001/13853	W 10:10am - 12:00pm 328 Uris Hall	Sayantani DasGupta	4.00	21/20

#### CSER GU4350 CINEMA OF SUBVERSION. 4.00 points.

Russian filmmaker Andre Tarkovsky said that “the artist has no right to an idea in which he is not socially committed.” Argentine filmmaker Fernando Solanas and Spanish-born Octavio Getino postulated an alternative cinema that would spur spectators to political action. In this course we will ask the question: How do authoritarian governments influence the arts, and how do artists respond? We will study how socially committed filmmakers have subverted and redefined cinema aesthetics to challenge authoritarianism and repression. In addition, we will look at how some filmmakers respond to institutional oppression, such as poverty and corruption, even within so-called “free” societies. The focus is on contemporary filmmakers but will also include earlier classics of world cinema to provide historical perspective. The course will discuss these topics, among others: What is authoritarianism, what is totalitarianism, and what are the tools of repression within authoritarian/totalitarian societies? What is Third Cinema, and how does it represent and challenge authoritarianism? How does film navigate the opposition of censorship, propaganda and truth? How do filmmakers respond to repressive laws concerning gender and sexual orientation? How do they deal with violence and trauma? How are memories of repressive regimes reflected in the psyche of modern cinema? And finally, what do we learn about authority, artistic vision, and about ourselves when we watch these films?

#### Spring 2025: CSER GU4350

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

#### CSER GR5001 METHODS IN AMERICAN STUDIES. 4.00 points.

Conceived in the 1920’s and 1930’s, American Studies sought to make a synoptic account of the “national character.” Since the 1960’s, the field has turned towards a focus on various forms of inequality as the dark side of American exceptionalism. This course surveys the development of the field’s current preoccupations, covering a range of periods, regions, groups, and cultural practices that present productive problems for generalizations about U.S. identity. We begin with the first academic movement in American Studies, the myth and symbol school—and think through its growth in the context of post-WWII funding for higher education. We then move on to a series of debates centered at intersections of race, ethnicity, gender, and sexuality. We’ll close by examining the historical background of protest movements built around the identitarian concerns about rape culture and mass incarceration

**ENGL UN3439 Afro-Asian Literary Imaginaries. 4.00 points.**

In a gesture of solidarity with the Black Lives Matter movement, and spurred on by a wave of anti-Asian violence ignited by the onset of the COVID-19 pandemic, Asian American artists and activists recently revived the slogan “Yellow Peril Supports Black Power.” Behind this slogan lies a long history of solidarity and collaboration between members of the Asian and African diasporas who saw their struggles against racial oppression, both on a domestic and global scale, as deeply intertwined. This course explores the literary dimensions of this rich yet often overlooked history, whose greatest thinkers were often also writers themselves. Through the study of poetry, novels, drama, and memoir, we will trace the development of “Afro-Asian” literary imaginaries from the early twentieth century to the present. Far from adopting a uniform approach to the subject, the texts we read will vary in form and content, ranging from the romantic, to the experimental, to the critical. Our reading throughout the course will be anchored in key historical moments in the history of Black and Asian solidarity and conflict, from pre-war anti-colonial movements, to the Third World Liberation strikes of the 1960s, to the Los Angeles riots of 1992. Together, we will ask what the unique role of literature has been within this history, and explore the possibilities that literature holds for imagining cross-racial solidarity in our contemporary moment

Spring 2025: ENGL UN3439

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGL 3439	001/14804	F 2:10pm - 4:00pm 420 Hamilton Hall	Mieko Anders	4.00	17/18

**AFAS GU4001 Revolution and Decolonization in the African Diaspora. 4.00 points.**

This undergraduate/graduate seminar examines the history of Black revolutionary movements for decolonization from the era of slavery to the late twentieth century. While studies of what historians have called “Black Internationalism” have emerged over the past ten years, the revolutionary and decolonial legacies of Black Freedom movements have tended to be overshadowed by nation-centric models of Black Studies that tend to predominate in the field. This course poses long-standing questions for a new generation of students. How have Black revolutionary thinkers and movements analyzed the racial, class, gendered, and sexual dimensions of colonization? How have they confronted colonial state power and envisioned postcolonial transformation? What obstacles did these movements face? What lessons can be learned from revisiting Black revolutionary traditions? The course employs both intellectual history and social movement methodologies so that students can develop the tools to examine histories of decolonization and the visions of freedom that they inspired. While the class begins with the foundational struggles against slavery, the bulk of the course focuses on the revolutionary struggles of the mid-late 20th century, when a wide array of decolonization movements from Ghana and the Congo, to Cuba and the United States, attempted to challenge Euro-American

imperial domination. The course’s diasporic focus, including struggles for decolonization in Africa, prompts students to explore the connections and resonances across national borders and colonial frontiers

Spring 2025: AFAS GU4001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**AHIS GU4089 NATIVE AMERICAN ART. 4.00 points.**

This course looks closely at objects and images produced by Native North Americans across history. Grounding our study in essays and guest lectures from Native scholars, we will investigate the significance of the works and how and to whom meaning is communicated. Beginning with an introduction that links aesthetics and worldview using the conventional organizing principle of the culture area, we quickly move on to case studies that take up key issues that persist for Native people living under settler colonialism today, including questions of sovereignty, self-expression, transformation and representation. Along the way, we will also tackle historiographic questions about how knowledge about Native art has been produced in universities and museums and how Indigenous people have worked to counter those discourses

Spring 2025: AHIS GU4089

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**WMST GU4330 SWANA Diasporas: Culture, Politics and Identity Formation in a Time of War. 4.00 points.**

In this class we will study South-West Asian and North African (SWANA) diasporic populations, social movements and cultural production that have responded to the multi-faceted ramifications of the 21st century war on terror. We will focus on diverse Arab, Iranian, and Afghan diasporas in the United States, where 19th and 20th century legacies of racism, xenophobia, Islamophobia and Orientalism combined in new ways to target these groups after the September 11th, 2001 attacks. Drawing on an interdisciplinary array of texts, including ethnography, fiction, feminist and queer theory, social movement theory, and visual and performance art, we will look at how the “war on terror” has shaped the subjectivities and self-representation of SWANA communities. Crucially, we will examine the gender and sexual politics of Islamophobia and racism and study how scholars, activists and artists have sought to intervene in dominant narratives of deviance, threat, and backwardness attributed to Muslim and other SWANA populations. This course takes up the politics of naming, situating the formation of “SWANA” as part of an anti-colonial genealogy that rejects imperial geographies such as “Middle East.” We will ask how new geographies and affiliations come into being in the context of open-ended war, and what

new political identities and forms of cultural production then become possible

**HIST GU4933 American Radicalism in the Archives. 4.00 points.**

“American Radicalism in the Archives” is a research seminar examining the multiple ways that radicals and their social movements have left traces in the historical record. Straddling the disciplines of social movement history, public humanities, and critical information studies, the seminar will use the archival collections at Columbia University’s Rare Book & Manuscript Library to trace the history of social movements and to consider the intersections of radical theory and practice with the creation and preservation of archives

**Spring 2025: HIST GU4933**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**SOCI GR6068 Reckoning with Asian America. 4.00 points.**

It took the mass murder of six Asian women in Atlanta on March 16, 2021 to draw national attention to what Asian Americans have been warning about since the wake of Covid-19: a surge in anti-Asian violence and hate. Since the onset of the coronavirus, 1 in 8 Asian American adults experienced a hate incident, and 1 in 7 Asian American women worry all the time about being victimized, reflecting an under-recognized legacy of anti-Asian violence, bigotry, misogyny, and discrimination in the United States that dates back more than 150 years. Drawing on research and readings from the social sciences, this course links the past to the present in order to understand this legacy, and how it continues to affect Asian Americans today

**Spring 2025: SOCI GR6068**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CLGR GR6822 Writing of Marginalized Communities in Germany. Politics, Aesthetics, Interventions. 4.00 points.**

For the first time since the Second World War, the far right wins a regional election in Germany. All comes together with a rising number of Nazi attacks and pogroms, documented cases of police violence and racial profiling, political parties promoting the idea of a Fortress Europe, and more restrictions being imposed on asylum and migration, even by liberal political parties. Taking this as a point of departure, the course investigates post-millennial literature by Black authors and authors of color in Germany. The course will focus on the entanglement of politics and aesthetics, as well as the

emergence of new forms and narrative techniques as an intervention in contemporary Germany literature, with stories and plots becoming almost a prophecy of the political reality. We will also closely investigate how BPoC-authors write into and reshape German memory culture that is usually thought of as belonging to white majority society. How do racist killings infiltrate plots and change narrative structures? How is German collective remembrance being (re)shaped with stories by marginalized authors on the Holocaust, the history of German colonialism and other genocides? How is Europe being represented? Where does it end? What transnational alliances, networks, and solidarities are made im/possible? These are some of the many questions the course aims to tackle. The course is taught in English. All readings are available in German and English

## FALL 2024

### Ethnicity and Race Studies

**CSER UN1010 INTRO TO COMP ETHNIC STUDIES.**

**4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement  
Students MUST register for a Discussion Section.

Introduction to the field of comparative ethnic studies

**Fall 2024: CSER UN1010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 1010	001/13925	M W 1:10pm - 2:25pm 717 Hamilton Hall	Shana Redmond	4.00	59/60

**HIST UN3030 IMMIGRATION AND CITIZENSHIP IN AMER HIST. 4.00 points.**

This course explores the meaning of American citizenship in connection with the country’s immigration history. Topics include historic pathways to citizenship for migrants; barriers to citizenship including wealth, race, gender, beliefs and documentation; and critical issues such as colonialism, statelessness, dual nationality, and birthright citizenship. We will ask how have people become citizens and under what authority has that citizenship been granted? What are the historic barriers to citizenship and how have they shifted over time? What major questions remain unanswered by Congress and the Supreme Court regarding the rights of migrants to attain and retain American citizenship?

**Fall 2024: HIST UN3030**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 3030	001/14140	Th 12:10pm - 2:00pm 311 Fayerweather	Jessica Lee	4.00	12/15

**CSER UN3490 POST 9/11 IMMIGRATION POLICIES.**

**4.00 points.**

Since September 11, 2001, there has been an avalanche of immigration enforcement policies and initiatives proposed or implemented under the guise of national security. This course will analyze the domino effect of the Patriot Act, the Absconder

Initiative, Special Registration, the Real I.D. Act, border security including the building of the 700-mile fence along the U.S./Mexico border, Secured Communities Act—that requires the cooperation of state and local authorities in immigration enforcement, the challenge to birthright citizenship, and now the congressional hearings on Islamic radicalization. Have these policies been effective in combating the war on terrorism and promoting national security? Who stands to benefit from these enforcement strategies? Do immigrant communities feel safer in the U.S.? How have states joined the federal bandwagon of immigration enforcement or created solutions to an inflexible, broken immigration system?

**Fall 2024: CSER UN3490**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3490	001/13928	Th 10:10am - 12:00pm 420 Hamilton Hall	Elizabeth OuYang	4.00	19/22

**CSER UN3523 INTRODUCTION TO LATINX STUDIES. 4.00 points.**

In the US, Latinxs are often treated in quantitative terms—as checkmarks on census forms, or as data points in demographic surveys. However, Latinxs have always been more than mere numbers: while some have stayed rooted in traditional homelands, and while others have migrated through far-flung diasporas, all have drawn on and developed distinctive ways of imagining and inhabiting the Americas. In this course, we will explore a wide range of these Latinx lifeways. Through readings in the humanities and social sciences, we will learn how Latinxs have survived amidst and against settler colonialism and racial capitalism. Meanwhile, through the study of literature and art, we will see how Latinxs have resisted and/or reinforced these social systems. With our interdisciplinary and intersectional approach, we will determine why Latinidad has manifested differently in colonial territories (especially Puerto Rico), regional communities (especially the US–Mexico borderlands), and transnational diasporas (of Cubans, of Dominicans, and of a variety of Central Americans). At the same time, we will understand how Latinxs have struggled with shared issues, such as (anti-) Blackness and (anti-)Indigeneity, gender and sexuality, citizenship and (il)legality, and economic and environmental (in)justice. During the semester, we will practice Latinx studies both collectively and individually: to enrich our in-class discussions, each student will complete a reading journal, a five- page paper, a creative project, and a digital timeline

**Fall 2024: CSER UN3523**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CSER UN3702 Memory and Monuments in the U.S. West. 4.00 points.**

This class explores the relationships among memory, monuments, place, and political power in the United States West. The course begins with an introduction to the theory of

collective memory and then delves into case studies in New Mexico, California, and Texas. We will expand our perspective at the end of the course to compare what we have learned with the recent debates over monuments to the Confederacy. We will consider both physical manifestations of collective memory such as monuments and architecture as well as intangible expressions like performance, oral history and folklore

**Fall 2024: CSER UN3702**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CSER UN3919 MODES OF INQUIRY. 4.00 points.**

Corequisites: CSER UN3921

Corequisites: CSER UN3921 This class, a combination of a seminar and a workshop, will prepare students to conduct, write up, and present original research. It has several aims and goals. First, the course introduces students to a variety of ways of thinking about knowledge as well as to specific ways of knowing and making arguments key to humanistic and social science fields. Second, this seminar asks students to think critically about the approaches they employ in pursuing their research. The course will culminate in a semester project, not a fully executed research project, but rather an 8-10 page proposal for research that will articulate a question, provide basic background on the context that this question is situated in, sketch preliminary directions and plot out a detailed methodological plan for answering this question. Students will be strongly encouraged to think of this proposal as related to their thesis or senior project. Over the course of the semester, students will also produce several short exercises to experiment with research techniques and genres of writing

**Fall 2024: CSER UN3919**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3919	001/13930	Th 12:10pm - 2:00pm 420 Hamilton Hall	Sayantani DasGupta	4.00	21/25

**CSER UN3922 RACE#REPRESENTATION IN ASIAN AMER CINEMA. 4.00 points.**

Enrollment limited to 22.

This seminar focuses on the critical analysis of Asian representation and participation in Hollywood by taking a look at how mainstream American cinema continues to essentialize the Asian and how Asian American filmmakers have responded to Hollywood Orientalist stereotypes. We will analyze various issues confronting the Asian American, including yellowface, white patriarchy, male and female stereotypes, the “model minority” myth, depictions of “Chinatowns,” panethnicity, the changing political interpretations of the term Asian American throughout American history, gender and sexuality, and cultural hegemonies and privileging within the Asian community

### **CSER UN3926 LATIN MUSIC AND IDENTITY. 4.00 points.**

Latin music has had a historically strained relationship with mainstream music tastes, exploding in occasional boom periods, and receding into invisibility in others. What if this were true because it is a space for hybrid construction of identity that directly reflects a mixture of traditions across racial lines in Latin America? This course will investigate Latin musics transgression of binary views of race in Anglo-American society, even as it directly affects the development of pop music in America. From New Orleans jazz to Texas corridos, salsa, rock, and reggaeton, Latin music acts as both as a soundtrack and a structural blueprint for the 21st century's multicultural experiment. There will be a strong focus on studying Latin musics political economy, and investigating the story it tells about migration and globalization

**Fall 2024: CSER UN3926**

### **CSER UN3928 COLONIZATION/DECOLONIZATION. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement  
Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructor's permission.  
Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructors permission.  
This course explores the centrality of colonialism in the making of the modern world, emphasizing cross-cultural and social contact, exchange, and relations of power; dynamics of conquest and resistance; and discourses of civilization, empire, freedom, nationalism, and human rights, from 1500 to 2000. Topics include pre-modern empires; European exploration, contact, and conquest in the new world; Atlantic-world slavery and emancipation; and European and Japanese colonialism in Asia, Africa, and the Middle East. The course ends with a section on decolonization and post-colonialism in the period after World War II. Intensive reading and discussion of primary documents

### **CSER UN3935 Historical Anthropology of the US-Mexico Border. 4 points.**

Beginning in the 1980s, border crossing became an academic rage in the humanities and the social sciences. This was a consequence of globalization, an historical process that

reconfigured the boundaries between economy, society, and culture; and it was also a primary theme of post-modernist aesthetics, which celebrated playful borrowing of multiple and diverse historical references. Within that frame, interest in the US-Mexican border shifted dramatically. Since that border is the longest and most intensively crossed boundary between a rich and a poor country, it became a paradigmatic point of reference. Places like Tijuana or El Paso, with their rather seedy reputation, had until then been of interest principally to local residents, but they now became exemplars of post-modern "hybridity," and were meant to inspire the kind of transnational scholarship that is required in today's world. Indeed, the border itself became a metaphor, a movable imaginary boundary that marks ethnic and racial distinction in American and Mexican cities. This course is an introduction to the historical formation of the US-Mexican border.

### **CSER UN3942 RACE AND RACISMS. 4.00 points.**

In this class we will approach race and racism from a variety of disciplinary and intellectual perspectives, including: critical race theory/philosophy, anthropology, history and history of science and medicine. We will focus on the development and deployment of the race concept since the mid-19th century. Students will come to understand the many ways in which race has been conceptualized, substantiated, classified, managed and observed in the (social) sciences, medicine, and public health. We will also explore the practices and effects of race (and race-making) in familiar and less familiar social and political worlds. In addition to the courses intellectual content, students will gain critical practice in the seminar format -- that is, a collegial, discussion-driven exchange of ideas

**Fall 2024: CSER UN3942**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 3942	001/13936	W 2:10pm - 4:00pm 420 Hamilton Hall	Bahia Munem	4.00	11/15

### **SOCI UN3968 IMMIGRATION, RACE, AND ASIAN AMERICANS. 4.00 points.**

Drawing from evidenced-based social science research, this course will equip students to understand how the laws and policies of America's past continue to affect the experiences, trajectories, and perceptions of Asian Americans today. Tracing the racial mobility of Asian Americans from "unassimilable to exceptional", we begin by studying legacies of exclusion

and then examine Asian Americans' experiences in education, affirmative action, the workplace, and the surge of anti-Asian violence during the Covid-19 pandemic

Fall 2024: SOCI UN3968

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3968	001/13849	M 2:10pm - 4:00pm 509 Knox Hall	Jennifer Lee	4.00	15/22

### **CSER GU4360 AMER DIVA:RACE,GDNDR#PERFMNC. 4.00 points.**

What makes a diva a diva? How have divas shaped and challenged our ideas about American culture, performance, race, space, and capital during the last century? This seminar explores the central role of the diva—the celebrated, iconic, and supremely skilled female performer—in the fashioning and re-imagining of racial, gendered, sexual, national, temporal, and aesthetic categories in American culture. Students in this course will theorize the cultural function and constitutive aspects of the diva and will analyze particular performances of a range of American divas from the 20th and 21st centuries and their respective roles in (re)defining American popular culture

Fall 2024: CSER GU4360

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSER 4360	001/13937	W 10:10am - 12:00pm 420 Hamilton Hall	Deborah Paredez	4.00	16/15

### **CSER GR5000 INTRO TO AMERICAN STUDIES. 3.00 points.**

This course explores the set of possibilities presented by American Studies as a comparative field of study. We begin with a brief overview of the history of the field, and then we'll focus primarily on the range of modes in which its interdisciplinary work has been undertaken (literary, historical, legal, digital, etc.). The idea here is not to arrive at a comprehensive picture of American Studies, but to think about the many ways people have produced knowledge under its aegis. We will also focus on work by Columbia faculty, and sessions of the course are built around visits by faculty in the field to Columbia's University Seminar in American Studies. Our guiding questions include: How does one do research in a multimedia, "cultural" environment? How does one situate oneself as an "intellectual" or "critic" in relation to one's object of study? How does one write about different media/genres? How does one incorporate different methodologies into one research project?

## FILM AND MEDIA STUDIES

### THE FILM AND MEDIA STUDIES DEPARTMENT:

Department website: <https://arts.columbia.edu/film/undergraduate>

Office location: 513 Dodge Hall

Office contact: 212-854-2815/ [Film@columbia.edu](mailto:Film@columbia.edu)

Director of Undergraduate Studies: Prof. Robert King, [rk2704@columbia.edu](mailto:rk2704@columbia.edu) (Spring 2025), Prof. Annette Insdorf, [ai3@columbia.edu](mailto:ai3@columbia.edu) (Fall 2024)

Departmental Administrators:

Hanna Seifu, Director of Academic Administration, [hes2130@columbia.edu](mailto:hes2130@columbia.edu) Sarah Adriance, Assistant Director of Academic Administration, [sja2175@columbia.edu](mailto:sja2175@columbia.edu)

### THE STUDY OF FILM

The major in film studies is scholarly, international in scope, and writing-intensive. Students choose to major in film if they want to learn more about the art form, from technology to cultural significance; want to work in the film industry; or are interested in a major that combines arts and humanities.

Students usually declare the major toward the end of the second year by meeting with the departmental adviser; together, they create a program of twelve required courses within the major, often supplemented by courses outside the department. In the lecture classes and seminars, there tends to be a mixed population of undergraduate majors and graduate film students.

Students have the opportunity to gain additional experience by taking advantage of internship opportunities with film companies, working on graduate student films, and participating in the Columbia Undergraduate Film Productions (CUFP), an active, student-run organization that provides film-making experience to Columbia undergraduate producers and directors. In addition to careers in screenwriting, directing, and producing, alumni have gone on to work in film distribution, publicity, archives, and festivals, and to attend graduate school to become teachers and scholars.

The trajectory of the major is from introductory-level courses (three are required), to intermediate and advanced-level courses (two are required, plus seven electives). While film studies majors take workshops in screenwriting and film-making, the course of study is rooted in film history, theory, and culture.

The prerequisite for all classes is INTRO TO FILM # MEDIA STUDIES ([FILM UN1000](#)) offered each term at Columbia as well as at Barnard, and open to first-year students.

Subsequently, majors take a combination of history survey courses; workshops ("Labs"); and advanced classes in theory, genre study, national cinemas, auteur study, and screenwriting.

The educational goal is to provide film majors with a solid grounding in the history and theory of film; its relation to other forms of art; and its synthesis of visual storytelling, technology, economics, and sociopolitical context, as well as the means to begin writing a script and making a short film.

Students who wish to graduate with honors must take the **SENIOR SEMINAR IN FILM STUDIES (FILM UN3900)**, writing a thesis that reflects mastery of cinematic criticism. The essay is submitted after the winter break. Students decide upon the topic with the professor and develop the essay during the fall semester.

Since film courses tend to be popular, it is imperative that students attend the first class. Registration priority is usually given to film majors and seniors.

## STUDENT ADVISING

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

## DEPARTMENT HONORS AND PRIZES

### Department Honors

In order to qualify for departmental honors, students must have a GPA of 3.75 in the major and distinction in their overall achievements in film study. Students who take FILM UN3900 Senior Seminar in Film Studies automatically enter consideration for honors; however, the class is not a requirement for honors.

### Academic Prizes

The Pat Anderson Prize in Film Reviewing is named for the film critic who died in 2011. For many decades, she was part of New York's movie community – writing about motion pictures for "Films in Review" – and a vital member of the National Board of Review from the 1970s until 2009.

The Guy Gallo Memorial Award in Screenwriting is in memory of adjunct professor Guy Gallo, who taught screenwriting at Columbia and Barnard for over twenty-five years. He is best known for writing the screenplay of *Under the Volcano*, which John Huston directed in the early 1980s.

The Andrew Sarris Memorial Award for Film Criticism is an annual award in honor of the celebrated Columbia film professor who died in 2012. The influential critic behind the "auteur theory," Sarris was the author of some of the most celebrated essays and books on American film, including his landmark study, *The American Cinema: Directors and Directions, 1929-1968*.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

### Course Numbering Structure

### Guidance for First-Year Students

### Guidance for Transfer Students

Contact the Director of Undergraduate Studies

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Film & Media Studies

The major in film studies requires a minimum of 36 points distributed as follows:

**Introductory Courses**

FILM UN1000	INTRO TO FILM # MEDIA STUDIES (The summer class Introduction to the Study and Theory of Film also satisfies this requirement.)
FILM GU4000	FILM AND MEDIA THEORY (This is an advanced class that students are recommended to take in their junior year. It is only offered in the Fall.)

**Cinema History Courses**

Select two of the following courses, one of which must either be FILM UN2010 or FILM UN2020:

FILM UN2010	CINEMA HIST I: BEGIN-1930
FILM UN2020	CINEMA HIST II: 1930-1960
FILM UN2030	CINEMA HIST III: 1960-1990
FILM UN2040	CINEMA HISTORY IV: AFTER 1990

**Laboratories**

Select one of the following courses:

FILM UN2410	LAB IN WRITING FILM CRITICISM
FILM UN2510	LAB IN FICTION FILMMAKING
FILM UN2420	LABORATORY IN SCREENWRITING
FILM UN2520	LAB IN NONFICTION FILMMAKING

**Electives**

Students take seven elective classes of their choosing. Electives commonly offered at Columbia include, but are not limited to, the following:

FILM UN2130	American Film: Comedy
FILM UN2132	American Film: Cult # Exploitation
FILM UN2134	American Film: The Western
FILM UN2136	American Film: Film Noir
FILM UN2290	Topics in World Cinema: Arab and Africa
FILM UN2292	Topics in World Cinema: China
FILM UN2294	WORLD CINEMA: LATIN AMERICA
FILM UN2310	THE DOCUMENTARY TRADITION
FILM UN3010	AUTEUR STUDY
FILM UN3013	Auteur Studies: Chantal Akerman's Cinema, Writing and Moving Images
FILM UN3900	SENIOR SEMINAR IN FILM STUDIES
FILM UN3910	Senior Seminar in Filmmaking
FILM UN3920	SENIOR SEM IN SCREENWRITING
FILM UN3925	NARRATIVE STRAT-SCREENWRITING

FILM UN3950	SEMINAR IN MEDIA: SERIALITY
FILM GU4020	Brazilian Cinema: Cinema Novo and Beyond
FILM GU4294	World Cinema: Latin America
FILM GU4320	New Directions in Film and Philosophy
FILM GU4300	Black Film and Media
FILM GU4310	EXPERIMENTAL FILM # MEDIA
FILM GU4910	Seeing Narrative
FILM GU4940	QUEER CINEMA
FILM GU4953	Reality Television

**Notes:**

- Outside of the required classes, most undergraduate courses offered through the Columbia or Barnard Film and Media Studies majors will count as an elective, including summer classes. Please confirm with the Director of Undergraduate Studies.
- Film- or media-related classes from other departments can count as electives only with prior DUS approval.
- There is a cap of FOUR classes in screenwriting or filmmaking that can be applied toward the major.
- Cinema History or Lab classes taken in excess of the above requirements roll over as electives (e.g., if you take two labs, one will count as one of your seven electives).

**Minor in Film & Media Studies**

The minor consists of five courses (fifteen credits) as follows:

Intro to Film and Media Studies (FILM UN1000) (3 credits)

Two of the following four courses, one of which must be FILM UN2010 or UN2020:

o Cinema History I: Beginnings to 1930 (FILM UN2010) (3 credits)

o Cinema History II: 1930-1960 (FILM UN2020) (3 credits)

o Cinema History III: 1960-1990 (FILM UN2030) (3 credits)

o Cinema History IV: After 1990 (FILM UN2040) (3 credits)

Any two electives, one of which can be from the following labs:

o Lab in Writing Film Criticism (FILM UN2410) (3 credits)

o Lab in Screenwriting (FILM UN2420) (3 credits)

o Lab in Fiction Filmmaking (FILM UN2510) (3 credits)

o Lab in Nonfiction Filmmaking (FILM UN2520) (3 credits)

Some classes are at present not available to minors except with explicit instructor approval, as

follows: Senior Seminar in Film Studies (FILM UN3900); Advanced Film Production Practice

(FILM UN3915); Senior Seminar in Screenwriting (FILM UN3920); Narrative Strategies in

Screenwriting (FILM UN3925).

### Advising and governance

Students who take the minor should begin with Intro to Film and Media Studies, which is open

to all students across the university, no matter their year or major/minor. The Cinema History

classes can also be taken at any time, irrespective of declared major/minor. Lab classes and

seminars will only be available to students who have declared minors in Film and Media Studies

(usually at the end of their sophomore year).

All minors are entitled to one lab class, although they may take a second for their other elective

if space permits. Priority for labs will be organized as follows: 1) majors who have not taken a

lab; 2) minors who have not taken a lab; 3) majors who have already taken one lab; 4) minors

who have already taken one lab.

Students can apply only one study abroad or transfer class (3-credit equivalent) to completion

of the minor. This restriction also applies to film-related classes offered in other Columbia

programs.

### FILM UN1000 INTRO TO FILM # MEDIA STUDIES. 3.00 points.

Lecture and discussion. Priority given to declared film majors. Fee: \$75.

This course serves as an introduction to the study of film and related visual media, examining fundamental issues of aesthetics (mise-en-scene, editing, sound), history (interaction of industrial, economic, and technological factors), theory (spectatorship, realism, and indexicality), and criticism (auteurist, feminist, and genre-based approaches). The course also investigates how digital media change has been productive of new frameworks for moving image culture in the present. Discussion section FILM UN1001 is a required corequisite

### FILM UN1010 Genre Study. 3 points.

Fee: Course Fee - 75

This course examines how globalization and the global success of American blockbuster films have affected Hollywood film production, stardom, distribution, and exhibition. The course will analyze blockbuster aesthetics, including aspects of special effects, 3-D, sound, narration, genre, and editing. We will also study the effects of new digital technologies on Hollywood and the cross-pollination among Hollywood, art house, and other national cinemas. Finally, we will examine the effects of 9/11, the “war on terrorism,” climate change and other global concerns on marketing, aesthetics and other aspects of this cinema

### FILM UN2010 CINEMA HIST I: BEGIN-1930. 3.00 points.

This course rethinks the ;birth of cinema; from the vantage of ;when old media was new.; Following standard approaches, it moves from actualities to fiction, from the ;cinema of attractions; to narrative, from the cinematographe to cinema, from cottage industry to studio system. Units in silent film music, early genres, film piracy and copyright, word and moving image, and restoration--the film archivists dilemma in the digital era. FILM W2011

Building

### FILM UN2020 CINEMA HIST II: 1930-1960. 3.00 points.

This course examines major developments and debates in the history of cinema between 1930 and 1960, from the consolidation of the classic Hollywood studio system in the early sound era to the articulation of emergent ;new waves; and new critical discourses in the late 1950s. Our approach will be

interdisciplinary in scope, albeit with an emphasis on social and cultural history - concerned not only with how movies have developed as a form of art and medium of entertainment, but also with cinemas changing function as a social institution. Discussion section FILM UN 2021 is a required co-requisite

#### Fall 2024: FILM UN2020

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 2020	001/13781	Th 2:10pm - 3:25pm Kob Lenfest Center For The Arts	Ronald Gregg	3.00	42/55

#### FILM UN2030 CINEMA HIST III:1960-1990. 3.00 points.

By closely watching representative classics from countries including Italy, Poland, Russia and Argentina, we will study the distinctive trends and masters of this vibrant era. Special attention will be paid to the French New Wave (60s); the New German Cinema (70s); the reformulation of Hollywood studio filmmaking in the 70s (Altman, Cassavetes, Coppola), and the rise of the independent American cinema (80s). Discussion section FILM UN 2031 is a required co-requisite

#### Fall 2024: FILM UN2030

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 2030	001/13782	M 2:10pm - 6:00pm 511 Dodge Building	Annette Insdorf	3.00	49/60
FILM 2030	AU1/18646	M 2:10pm - 6:00pm Othr Other	Annette Insdorf	3.00	4/3

#### FILM UN2040 CINEMA HISTORY IV: AFTER 1990. 3.00 points.

This course brings our survey of the development of the art, technology, and industry of motion images up to the present. During this era, most people no longer watched movies (perhaps the most neutral term) in theaters, and digital technology came to dominate every aspect of production, distribution, and exhibition. Highlighted filmmakers include Michael Haneke, Lars von Trier, Wong Kar-wei, and Steve McQueen. Topics range from contemporary horror to animation. Requirements: short (2-3 pages) papers on each film shown for the class and a final, take-home exam. FILM W2041

#### Spring 2025: FILM UN2040

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 2040	001/17189	T 10:10am - 1:55pm 511 Dodge Building	Elizabeth Ramirez Soto	3.00	41/55

#### FILM UN2190 TOPICS IN AMERICAN CINEMA. 3.00 points.

This course surveys the American film genre known as film noir, focusing primarily on the genre's heyday in the 1940s and early 1950s, taking into account some of its antecedents in the

hard-boiled detective novel, German Expressionism, and the gangster film, among other sources. We will consider a number of critical and theoretical approaches to the genre, and will also study a number of film noir adaptations and their literary sources

#### FILM UN2290 Topics in World Cinema: Arab and Africa. 3 points.

FILM W2291

#### FILM UN2292 Topics in World Cinema: China. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Fee: Course Fee - 75

The international revelation of Chinese cinema in the 1980s was one of the great events both for film studies and film production in the past fifty years: the depth and richness of the classic cinemas of the PRC, Hong Kong and Taiwan were complemented by the emergence of exciting new films and filmmakers from each of those film cultures. This course will trace the history and development of filmmaking in mainland China and Hong Kong, from the Shanghai cinema of the 1930s to recent examples of digital media production, examining changes in film style and technique within the context of ever-shifting political currents and production models. A special focus will be the ongoing dialogue between Chinese film and international trends ranging from realism to postmodernism.

#### FILM UN2293 TOPICS IN WORLD CINEMA-DISC. 0.00 points.

See above. This submission is to generate a course number for the discussion section to go with the lecture course.

#### FILM UN2294 WORLD CINEMA: LATIN AMERICA. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An overview of the major developments in the art and industry of cinema in Latin America, ranging from its earliest days to the most recent works of the digital era. The interaction of Latin American filmmakers with international movements such as neorealism, modernism, cinema vérité, and postmodernism will be addressed. Among the filmmakers to be studied are Luis Buñuel, Glauber Rocha, Raúl Ruiz and Lucrecia Martel. Students will discover the major industrial trends as well as artistic currents that have defined Latin American cinema, as well as have the chance to analyze a number of key works both in terms of their varying approaches to filmmaking as well as their resonance with political/social/historical issues

#### Fall 2024: FILM UN2294

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 2294	001/18683	F 10:10am - 1:45pm 511 Dodge Building	Elizabeth Ramirez Soto	3.00	54/55

**FILM UN2295 World Cinema: Latin America - Discussion Section. 0 points.**

Discussion section lead by a Teaching Assistant to review lecture, reading and screening.

**FILM UN2310 THE DOCUMENTARY TRADITION. 3.00 points.**

Film screening, lecture, and discussion. Fee: \$75.

This class offers an introduction to the history of documentary cinema and to the theoretical and philosophical questions opened up by the use of moving images to bear witness, persuade, archive the past, or inspire us to change the future. How are documentaries different than fiction films? What is the role of aesthetics in relation to facts and evidence in different documentary traditions? How do documentaries negotiate appeals to emotions with rational argument? From the origins of cinema to our current “post-truth” digital age, we will look at the history of how cinema has attempted to shape our understanding of reality. FILM W2311

**Spring 2025: FILM UN2310**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 2310	001/17208	T 2:00pm - 5:45pm 511 Dodge Building	Nico Baumbach	3.00	42/60

**FILM UN2400 Script Analysis. 3 points.**

Lecture and discussion. Fee: \$50.

The dramatic and cinematic principles of screen storytelling, including dramaturgy, character and plot development, use of camera, staging, casting, sound, editing, and music. Diverse narrative techniques, story patterns, dramatic structures, and artistic and genre forms are discussed, and students do screenwriting exercises. FILM UN2401 discussion section is required

**FILM UN2410 LAB IN WRITING FILM CRITICISM. 3.00 points.**

Priority is given to film majors.

Prerequisites: the instructor's permission. Non-majors must also submit a writing sample, approximately 3 pages long, to cj2374@columbia.edu.

Lab in Writing Film Criticism This course will focus on writing fresh, original criticism, on developing an individual

voice, and on creating strong arguments supporting your ideas (qualities that translate to many areas, from reviewing to pitching a film project). Screenings in and outside class will be followed by discussion and in-class writing exercises, as well as regular writing assignments. How do you choose an effective critical approach? How do you make your opinions vivid and convincing on the page? We will also analyze recent criticism and consider the changing landscape of film criticism today. Prerequisite: Instructor's permission. Submit a short, film-related sample to cj2374@columbia.edu Note: Because permission is required, on-line registration may say the course is full when it is not. Priority given to film majors

#### FILM UN3010 AUTEUR STUDY. 3.00 points.

Fee: \$50.

This seminar in Auteur Study explores the cinematic work of the renowned Polish filmmaker Krzysztof Kieslowski, best known for such classics as *Three Colors: Blue, White, Red* and *Decalogue*. Special attention will be paid to the latter--ten 1-hour films loosely based on the 10 Commandments--considered a towering achievement of poetic style as well spiritual vision. Through in-class screenings, discussions, and readings, we will focus on the formal, political and thematic richness of his films. Requirements include weekly attendance, punctuality, classroom participation, a midterm paper (5 - 7 pages), and a final paper (10 - 12 pages)

#### FILM UN3020 INTERDISCIPLINARY STUDIES. 3.00 points.

Fee: \$75.

Is this cinema or television? While it may seem that this question has only recently been asked with the advent of streaming platforms like Netflix and the rise of "global television" (Lobato 2019) in this seminar we will learn that the close relationship between cinema and television is long-standing. The course will focus on the 1970s and 1980s, an exciting period of collaboration between European public television and independent filmmakers from all over the world. From a historical and theoretical perspective, we will examine key debates around media specificity and convergence, television as a "utopia," and the challenges of co-production between the "North" and the "South," among other issues. Focus is on a wide range of directors from the U.S., Europe, and the "Global South" who made films for European public television (e.g. Rossellini, Godard # Miéville, Jarmusch, Burnett, Ruiz, Black Audio Film Collective, Sarmiento, etc.)

#### Fall 2024: FILM UN3020

#### FILM UN3900 SENIOR SEMINAR IN FILM STUDIES.

**3.00 points.**

Fee: \$30.

A seminar for senior film majors planning to write a research paper in film history/theory/culture. Course content changes yearly

#### Fall 2024: FILM UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 3900	001/13784	Th 10:10am - 1:40pm 508 Dodge Building	Racquel Gates	3.00	11/12

#### FILM UN3910 Senior Seminar in Filmmaking. 3 points.

Prerequisites: FILM UN2420 or FILM UN2510 *FILM W2420* or *FILM W2510*.

An advanced directing workshop for senior film majors who have already completed *FILM UN2420* or *FILM UN2510*.

#### FILM UN3915 ADVANCED FILM PRODUCTION PRACTICE. 3.00 points.

Prerequisites: FILM UN2510 or FILM UN2520

Advanced Film Production Practice is an advanced production and lecture course for students who wish to obtain a deeper understanding of the skills involved in screenwriting, directing and producing. Building on the fundamentals established in the Labs for Fiction and Non-Fiction Filmmaking, this seminar further develops each student's grasp of the concepts involved in filmmaking through advanced analytical and practical work to prepare Thesis film materials

#### Fall 2024: FILM UN3915

#### FILM UN3920 SENIOR SEM IN SCREENWRITING. 3.00 points.

A seminar for senior film majors. Students will complete a step outline and minimum of 30 pages of their project, including revisions. Through reading/viewing and analyzing selected scripts/films, as well as lectures, exercises and weekly critiques, students will expand their understanding of dramatic writing

and narrative-making for film and TV, including adaptations. They will learn appropriate structure for each specific screenwriting form, and endeavor to apply their understanding of drama, character, theme, and structure to their chosen narrative project

**Fall 2024: FILM UN3920**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 3920	001/13786	F 2:10pm - 4:40pm 403 Dodge Building	Loren-Paul Caplin	3.00	15/15

**FILM UN3925 NARRATIVE STRAT-SCREENWRITING. 3.00 points.**

Prerequisites: *FILM W2420*.

Prerequisites: *FILM W2420*. This workshop is primarily a continuation of Senior Seminar in Screenwriting. Students will either continue developing the scripts they began in Senior Seminar in Screenwriting, or create new ones including a step outline and a minimum of 30 pages. Emphasis will be placed on character work, structure, theme, and employing dramatic devices. Weekly outlining and script writing, concurrent with script/story presentation and class critiques, will ensure that each student will be guided toward the completion of his or her narrative script project

**Spring 2025: FILM UN3925**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 3925	001/13285	F 2:10pm - 4:40pm 508 Dodge Building	Loren-Paul Caplin	3.00	12/15

**FILM UN3930 The Actor's Art: Jeanne Moreau. 3.00 points.**

Study of major films in the seven-decade career of Jeanne Moreau (1928-2017), the performing artist who is widely recognized as France's greatest actress of the post-World War II era and who has also been a pioneering female director. Topics include: the value for film criticism and history of conceptualizing the performer as a creative auteur; Moreau's manner(s) of film acting and role realization; the risks and the productive consequences of her serving as "muse" to such male directors as Louis Malle, François Truffaut, Orson Welles, Joseph Losey, Rainer Werner Fassbinder, and Paul Mazursky, and as a creative partner to such female directors as Marguerite Duras and Josée Dayan; her embodiments and projections of sexuality and sensuality and how they differ from those of other so-called "screen love goddesses" (Brigitte Bardot, Elizabeth Taylor, Sophia Loren, Simone Signoret, Catherine Deneuve); Moreau's own work as a director of feature-length films; the rewards and burdens of international stardom and the challenge of being expected to "represent" France and its cinema; growing old in the public eye and life-long strategies for career renewal and sustainability

**FILM UN3950 SEMINAR IN MEDIA: SERIALITY. 3.00 points.**

From streaming to binge-viewing, *Serial* to *Breaking Bad*, seriality is a preeminent framework for the orchestration

of contemporary media production and consumption. This course explores histories and theories of seriality as a recurrent trope of media cultures over the last century and more. To this end, the course adopts a comparative media perspective, exploring seriality in its varied textual manifestations across diverse media forms (the penny press, early cinema, television, podcasts, and social media). It also focuses on the range of functions that seriality has performed, as, e.g., a mode for the systematization of mass cultural reproduction, as a framework for the integration of fan networks and media systems, even as a vehicle for the creation of national and political communities.

**FILM UN3960 INTRO TO EXPERIMENTAL FILM # VIDEO. 3.00 points.**

This course provides an overview of experimental film and video since the early 20th century European art movements (abstract, Dada, Surrealism), including the emergence of American experimental film in the 1940s, post-World War II underground experimental films, structuralist films and early video art in the 1960s and 70s, post-1960s identitarian experimental work, the emergence of digital video in museums and online in the 1990s to the present. The course surveys and analyses a wide range of experimental work, including the artists Hans Richter, Luis Bunuel, Salvador Dali, Joseph Cornell, Maya Deren, Andy Warhol, Stan Brakhage, Michael Snow, Martha Rosler, Vito Acconci, Barbara Hammer, Su Friedrich, Julie Dash, Isaac Julien, Matthew Barney, Ryan Trecartin, and others. The course will study the structural, aesthetic and thematic links between mainstream and avant-garde cinema, theater, and art movements, and will place the films in their economic, social, and political contexts

**FILM GU4000 FILM AND MEDIA THEORY. 3.00 points.**  
Fee: \$50.

Prerequisites: *FILM W1000*.

This course offers a historical and critical overview of film and media theory from its origins up to the present

**Fall 2024: FILM GU4000**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

508 Dodge  
Building

**FILM GU4310 EXPERIMENTAL FILM # MEDIA. 3.00 points.**

This course provides an overview of experimental film and video since the early 20th century European art movements (abstract, Dada, Surrealism), including the emergence of American experimental film in the 1940s, post-World War II underground experimental films, structuralist films and early video art in the 1960s and 70s, post-1960s identitarian experimental work, the emergence of digital video in museums and online in the 1990s to the present. The course surveys and analyses a wide range of experimental work, including the artists Hans Richter, Luis Bunuel, Salvador Dali, Joseph Cornell, Maya Deren, Andy Warhol, Stan Brakhage, Michael Snow, Martha Rosler, Vito Acconci, Barbara Hammer, Su Friedrich, Julie Dash, Isaac Julien, Matthew Barney, Ilana Harris-Babou, and others. The course will study the structural, aesthetic and thematic links between mainstream and avant-garde cinema, theater, and art movements, and will place the films in their economic, social, and political contexts

**FILM GU4320 New Directions in Film and Philosophy. 0 points.**

**FILM GU4910 Seeing Narrative. 3 points.**

Prerequisites: the instructor's permission.

An advanced film theory “workshop” in which we shall avoid reading film theory in favor of a selection of other texts, taken mainly from the domains of art history, philosophy, and literature. Our central question will be: What can filmmakers and film theorists learn from discourses about vision and its relation to narrative that pre-date the cinema, or that consider the cinema only marginally?

**FILM GU4940 QUEER CINEMA. 3.00 points.**

This course examines themes and changes in the (self-)representation of lesbians, gay men, bisexuals, and transgender people in cinema from the early sound period to the present. It pays attention to both the formal qualities of film and filmmakers’ use of cinematic strategies (mise-en-scene, editing, etc.) designed to elicit certain responses in viewers and to the distinctive possibilities and constraints of the classical Hollywood studio system, independent film, avant-garde cinema, and world cinema; the impact of various regimes of formal and informal censorship; the role of queer men and women as screenwriters, directors, actors, and designers; and the competing visions of gay, progay, and antigay filmmakers. Along with considering the formal properties of film and the historical forces that shaped it, the course explores what cultural analysts can learn from film. How can we treat film as evidence in historical analysis? We will consider the films we see as evidence that may shed new light on historical problems and periodization, and will also use the films to engage with recent queer theoretical work on queer subjectivity, affect, and culture

Fall 2024: FILM GU4940

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 4940	001/13789	W 9:10am - 12:55pm	Ronald Gregg	3.00	18/17

**FILM GU4950 Visual Bodies: From Cinema to New Media. 3 points.**

How is the human body, in its diversity, portrayed on screen ? And how may filmic languages—from cinema to new media—be affected by the multifaceted experience of our embodied dimension ? In this course we will examine the intricate relationship between cinema and the body as a paradigmatic way to study how moving images are seen, made, and experienced today. From a plurality of standpoints (historical, formal, theoretical) and across a wide range of corpus (documentary, fiction, experimental, new media, art cinema), we will ask ourselves how different filmic discourses are able to represent and explore the creative faculties but also the darker sides of the body, its gestures, desires, impulses or drives. We will investigate how they can account for the cognitive, gender, cultural, technological and political revolutions associated with the body throughout history, with a particular emphasis on contemporary contexts of new images, mediascapes, and practices. Focusing on several key-sites of the (post-)modern condition—cosmopolitan/metropolitan experiences, narrative technologies, pluralist (dis-)identifications, transmedial mobility, immanent temporalities—the course will offer rich critical opportunities to make sense of contemporary bodies via moving images, and *vice versa*.

Theoretical/critical works read in class will include texts by Bergson, Epstein, Pierce, Deleuze, Bellour, Elsaesser, Doane, Lastra...

The course is organized around lectures/seminars and film screenings. Students are expected to participate fully by carrying out assessed readings and writing assignments, actively involve in classroom discussions/viewings, and give scheduled oral presentations.

**FILM GU4951 NEW MEDIA ART. 3.00 points.**

The rapid democratization of technology has led to a new wave of immersive storytelling that spills off screens into the real world and back again. These works defy traditional constraints as they shift away from a one-to-many to a many-to-many paradigm, transforming those formerly known as the audience from passive viewers into storytellers in their own right. New opportunities and limitations offered by emergent technologies are augmenting the grammar of storytelling, as creators wrestle with an ever-shifting digital landscape. New Media Art pulls back the curtain on transmedial works of fiction, non-fiction, and emergent forms that defy definition. Throughout the semester we will explore projects that utilize Artificial Intelligence, Virtual Reality, Augmented Reality and the Internet of Things, alongside a heavy-hitting selection of new media thinkers, theorists, and critics. The course will be co-taught as a dialogue between artistic practice and new media theory. Lance Weiler, a new media artist and founder

of Columbia's Digital Storytelling Lab, selected the media artworks; Rob King, a film and media historian, selected the scholarly readings. It is in the interaction between these two perspectives that the course will explore the parameters of emerging frontiers in media art and the challenges these pose for existing critical vocabularies

**Fall 2024: FILM GU4951**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 4951	001/13790	M 2:00pm - 5:00pm 504 Dodge Building	Lance Weiler, Regina Harsanyi	3.00	18/23

**FILM UN2530 Lab in the Video Essay. 3.00 points.**

This media lab is a hands-on exploration of producing video essays as an essential aspect of scholarly discourse in the digital age. The course challenges students to actively engage with a range of media projects, guided by the tenets of critical media practice. Through a mode of scholarship and research through the creation of media, students will acquire both theoretical understanding of critical media and practical skills such as scriptwriting, video editing, audio narration, and publishing. Drawing on case studies from media and film studies, students are invited to review and deconstruct video essays, podcasts, interactive essays, and digital storytelling. The course aims to encourage students to think beyond traditional written formats, explore new methods of critical analysis and argument, and to create publishable or presentable video essays. It supports the conception and production of new knowledge through media, constructing critical insights that utilize the expressiveness of our contemporary audiovisual networks

**Fall 2024: FILM UN2530**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FILM 2530	001/15966	M 6:30pm - 9:30pm 511 Dodge Building	Behrang Garakani	3.00	12/12

**FILM GU4111 Auteur Study: David Lynch and The American Imaginary. 3.00 points.**

The course explores the work of David Lynch, one of American cinema's most singular figures. We will consider Lynch's narrative features, experimental shorts, and TV series, as well as his painting, photography, and music. One of our aims is to situate Lynch within (and alongside, and against) Hollywood and other cinematic and artistic traditions, while also suggesting connections, overt and otherwise, to a range of filmmakers and artists who have come after him. At the heart of our investigation is Lynch's distinctive sensibility, which is at once easy to recognize and hard to define. By looking closely at his use of cinematic language, we will ask how Lynch's films achieve their particular effects, and how they might give form to the desires and fears of their times. Drawing on multiple frameworks — including politics, place, gender, race, surrealism, spirituality, trauma, psychoanalysis, narratology, language, and architecture — we will examine

the contradictions at the heart of the Lynchian aesthetic and its relationship to the myths, icons, and taboos of postwar America

**Fall 2024: FILM GU4111**

**FILM GU4945 Contemporary Russian Media. 3.00 points.**

This course explores the evolution of Russian media during the decades following the collapse of the Soviet Union. The fall of the communist state had an outsized effect on the Russian mediascape. The four pillars of mass media which had previously been nationalized — cinema, television, radio, and the paper press — now had to contend with the challenges of the free market. These new economic conditions, together with technological developments and the disappearance of tight ideological control imposed by the state, led to a radical redefinition of the media industry. The Internet, which officially came to Russia in 1994, complicated the picture further. The course primarily focuses on moving image media — cinema, television and the Internet, tracing the historical development of each, analyzing a range of key works produced during this period. Our focus will be on the relationship between media and politics. We deliberately avoid referring to the period in question as post-Soviet or Putin's Russia because both of these terms come with a set of assumptions and expectations which would limit the scope of our conversation. Instead, we emphasize the diversity of the contemporary Russian mediascape and how different productions negotiated questions of gender, national identity, and politics during the period in question. We conclude by examining the sudden recent conclusion of the relative ideological flexibility which was prompted by the Russian invasion of Ukraine in February 2022, as well as the way platforms such as YouTube and services such as VPN continue making an alternative media sphere possible for Russian speakers. There is no language requirement to take this seminar. All required readings and course materials will be available in English

## FRENCH

### THE FRENCH DEPARTMENT:

Department website: <https://french.columbia.edu/>

Office location: 515-521 Philosophy Hall

Office contacts: Julie L. Stevens [js4504@columbia.edu](mailto:js4504@columbia.edu)

Department Chair: Prof. Emmanuelle Saada [es2593@columbia.edu](mailto:es2593@columbia.edu)

Director of Undergraduate Studies: Prof. Aubrey Gabel, [aag2188@columbia.edu](mailto:aag2188@columbia.edu)

Director of the French Language Program: Dr. Pascale Hubert-Leibler [ph2028@columbia.edu](mailto:ph2028@columbia.edu)

Undergraduate Administrator: Benita Dace, [byd1@columbia.edu](mailto:byd1@columbia.edu)

## FRENCH AND FRANCOPHONE STUDIES

The undergraduate Major in French and Francophone Studies and Minor in French and Francophone Studies give students an overview of French and francophone literature, culture, politics, and societies from the Middle Ages to the present. Students take a series of required courses in which they hone their linguistic skills (primarily with Read, Think, Write in French) before delving into the study of literature, culture, politics and society with Introduction to French and Francophone Studies: History and Introduction to French and Francophone Studies: Literature, and the Senior Seminar in which students refine their understanding of literary analysis, works and methods and are introduced to research in French and francophone studies. Students also take advanced electives on any aspect of French or francophone literature, culture, or history.

The optional Senior Essay, written under the guidance of a faculty member at Columbia or during a student's semester abroad, provides an initiation to scholarly research. It is a requirement to be eligible for departmental honors.

Seeing as a direct experience of contemporary French society is an essential part of the program, students are strongly encouraged to spend a summer, a semester or an academic year at Reid Hall-Columbia University in Paris, where they can take courses that will be credited toward the French major as well as to other majors including Political Sciences, History or Art History. Qualified students may also take courses directly in the French university system.

Please reach out to the Director of Undergraduate Studies for Majors' and Minors' Worksheets (for French and Francophone Studies), which provide a breakdown of course requirements.

## STUDENT ADVISING

All advising for undergraduate students pursuing a French and Francophone studies major and minor is handled by the Director of Undergraduate Studies. Students with questions regarding language requirements should contact the Director of the French Language Program.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

Entering students are placed, or exempted, on the basis of their College Board Achievement or Advanced Placement scores, or their scores on the placement test taken online: FRENCH PLACEMENT TEST. An SAT score of 780 or a score of 5 on the AP exam satisfies the language requirement. Students with a score of 4 on the AP exam will be placed in Intermediate II, but may attempt to place out by requesting to take an oral exam administered by the Director of the Language Program.

### Barnard College Courses

Many advanced literature and culture courses at Barnard College may fulfill elective credits for the French major or minor at Columbia, pending approval by the Director of Undergraduate Studies. Please note: The Barnard course, FREN BC1204 Intermediate II does not fulfill the undergraduate language requirement.

### Transfer Courses

Transfer students may apply a limited number of qualifying credits from other institutions to elective courses in the French major and minor, pending approval from the Director of Undergraduate Studies. Students should be expected to present syllabi and transcripts for courses at previous institutions.

### Study Abroad

Seeing as a direct experience of contemporary French society is an essential part of the program, students are strongly encouraged to spend either a summer term, a semester, or a full, academic year at Reid Hall, Columbia University's Global Center in Paris, where they can take courses that will be credited toward the French major as well as to other majors (e.g. history, art history, political science) and the global core. Qualified students may also take courses directly in the French university system.

For information on study abroad, visit the OGP website at [www.ogp.columbia.edu](http://www.ogp.columbia.edu), call 212-854-2559, or e-mail [studyabroad@columbia.edu](mailto:studyabroad@columbia.edu). For a list of approved study abroad programs, visit <http://www.ogp.columbia.edu/index.cfm?FuseAction=Programs.ListAll>. For Reid Hall's French immersion program, please visit <https://global.undergrad.columbia.edu/program/columbia-paris-semester>.

### Summer Study in Paris

Study abroad opportunities at Reid Hall are available during the summer. These include language and culture courses, global core electives and a combined course that meets both Columbia's ArtHum and MusicHum requirements. For information about study abroad, please visit <https://global.undergrad.columbia.edu/studyabroad>.

## Summer Courses

The French Department offers a limited number of courses in the French language and in French and francophone literature, history, and culture over the summer. For more information about summer courses in French, please please contact [Samuel Skippon \(ss2642@columbia.edu\)](mailto:ss2642@columbia.edu), the Director of Summer Sessions.

## CORE CURRICULUM CONNECTIONS

The French Department offers courses in the Global Core, which may also count as electives in the French major or minor. For a current listing of Global Core courses, please consult this website: <https://bulletin.columbia.edu/columbia-college/core-curriculum/global-core-requirement/>

## UNDERGRADUATE RESEARCH AND SENIOR ESSAY

### Senior Essay

The Senior Essay offers students an opportunity to immerse themselves in a research project and to hone their research and writing skills. It substitutes for an elective and makes the student eligible for departmental honors. The essay (25 pages minimum, in French) is usually written under the direction of a tenured or tenure-faculty faculty member (assistant professor, associate professor, or professor). Occasionally, with the permission of the DUS, the essay may be written under the direction of a lecturer. Only students who choose to write a Senior Essay are eligible for departmental honors.

The Senior Essay is a year-long project. Students are required to meet with the DUS to discuss their choice of adviser. They should do so preferably before the end of the spring semester of their junior year and no later than September 15th of their senior year. Once they have established a relationship with their adviser, they should have their research project approved by the latter, with a copy to the DUS (no later than October 15th). In the Spring, students should register for the Senior Tutorial in Literature (FREN UN3996). Students developing a Senior Essay are still required to take the Senior Seminar (FREN UN3995) in their senior year.

### Undergraduate Research outside of Courses

The Department of French fosters students' research and critical thinking skills both inside and outside of the classroom. During their studies, interested students are encouraged to apply for undergraduate research funding opportunities, awarded by the department (see the Undergraduate Research Fellowship below), other Columbia units and outside sources. French and Francophone Studies graduates often go on to teach and research abroad, through programs like the [US Fulbright Program](#) or the [Teaching Assistant Program in France \(TAPIF\)](#).

## DEPARTMENT HONORS AND PRIZES

### Academic Prizes

The Department of French awards the following prizes to students enrolled in courses in the department:

1. Prize for Excellence in French Studies: awarded to a highly promising student in an intermediate or advanced French course;
2. Senior French Prize: awarded to an outstanding graduating major.

Undergraduate Research Outside of Courses [drop-down]

The Department of French fosters students' research and critical thinking skills both inside and outside of the classroom. During their studies, interested students are encouraged to apply for undergraduate research funding opportunities, awarded by the department (see the Undergraduate Research Fellowship below), other Columbia units and outside sources. French and Francophone Studies graduates often go on to teach and research abroad, through programs like the [US Fulbright Program](#) or the [Teaching Assistant Program in France \(TAPIF\)](#).

### Undergraduate Research Fellowship

Every year, the Department of French awards the French and Francophone Studies Undergraduate Research Fellowship. The fellowship is intended to support students majoring in the humanities or the social sciences pursuing research in France or a francophone country or region during the summer between their junior and senior years. Please visit [this website](#) for up-to-date information.

### Department Honors

Majors who wish to be considered for departmental honors should consult with the director of undergraduate studies. To be eligible for departmental honors, students must have a grade point average of at least 3.7 in major courses and have completed an approved senior essay (information below) under the guidance of a faculty member at Columbia or Reid Hall. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## OTHER IMPORTANT INFORMATION

### In Fulfillment of the Language Requirement

Students beginning the study of French at Columbia must take four terms of the following two-year sequence: FREN UN1101-UN1102 Elementary French I & II, and FREN UN2101-UN2102 Intermediate French I & II.

Entering students are placed, or exempted, on the basis of their College Board Achievement or Advanced Placement scores,

or their scores on the placement test taken online: [FRENCH PLACEMENT TEST](#). An SAT score of 780 or a score of 5 on the AP exam satisfies the language requirement. Students with a score of 4 on the AP exam will be placed in Intermediate II, but may attempt to place out by requesting to take an oral exam administered by the Director of the Language Program.

Please note: The Barnard course, [FREN BC1204](#) Intermediate II does not fulfill the undergraduate language requirement.

## Language Proficiency Courses

Elementary and intermediate French courses help students develop an active command of the language. In FREN UN1101 ELEMENTARY FRENCH I and FREN UN1102 ELEMENTARY FRENCH II, the communicative approach is the main instructional method. In addition to practicing all four language skills—listening, speaking, reading, and writing—students are introduced to the cultural features of diverse French-speaking communities.

In intermediate courses FREN UN2101 INTERMEDIATE FRENCH I and FREN UN2102 INTERMEDIATE FRENCH II, students develop linguistic competence through the study of short stories, films, novels, and plays. After completing the four-semester language sequence, students can discuss and write in fairly proficient French on complex topics.

At the third-year level, attention is focused on more sophisticated use of language, in grammar and composition courses, and on literary, historical, and philosophical questions.

## Conversation Courses

Students looking for intensive French oral practice may take some of the 2-point conversation courses offered at intermediate and advanced levels. Conversation courses generally may not be counted toward the major or concentration.

### Advanced Placement

- AP score of 4 automatically places a student in French Intermediate II, thereby granting them the equivalency of the first 3 courses of the elementary-intermediate sequence.
- AP score of 5 or DELF: The department grants 3 credits for a score of 5 on the AP French Language exam, or for the completion of DELF (Diplôme d'Etudes en Langue Française). Students are awarded this credit only after they take a 3000-level French course (taught in French, for at least 3 points) and obtain a grade of B or above in that course.
- DALF C1 level or IB HL score of 6 or 7: The department grants 3 credits for the C1 level of DALF (Diplôme Approfondi de Langue Française), or for a score of 6 or 7 on the International Baccalaureate (IB) Higher Level (HL) exam. Students have no obligation to take higher-level French courses in order to receive these 3 credits, but

restrictions apply on the use of these credits toward the French major.

## Language Laboratory and On-line Materials

Language laboratories located in the International Affairs Building provide opportunities for intensive practice in French pronunciation and aural comprehension. French courses typically make extensive use of on-line interactive materials that students can access from their own computers.

## Maison Française

Students interested in French should acquaint themselves with the Maison Française, which houses a reading room of French newspapers, periodicals, books, and videos, and sponsors lectures/discussions and aby distinguished French visitors to New York City. With its weekly French film series as well as, book club, café-conversation. Another opportunity to practice French, discover new aspects of Francophone culture, and learn about internships and professional opportunities is the French Cultural Society. For information about the FCS, contact the departmental liaison, Dr. Laurence Marie. and other events, the Maison Française offers an excellent opportunity for students to perfect their language skills and enhance their knowledge of French and Francophone culture.

### Professors

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students interested in majoring or minoring in French and Francophone Studies should consult the Curriculum Maps, available on the Bulletin and the Department of French website. Students should also meet with the Director of Undergraduate Studies to discuss their degree progress on a semesterly basis.

### Guidance for First-Year Students

Incoming students interested in majoring or minoring in French and Francophone Studies should immediately begin taking courses in French upon their arrival, after having taken the Language Placement Exam to test into the appropriate course level. Some students will need to take additional language courses before beginning courses for the major/minor, and others can proceed directly to major and/or minor requirements. As they continue with their course requirements, students should consult the Curriculum Maps, available on the Bulletin and the Department of French website. After their first year, students should also consult with the Director of Undergraduate Studies on a semesterly basis.

### Guidance for Transfer Students

Transfer students interested in majoring or minoring in French and Francophone Studies should immediately should also consult with the Director of Undergraduate Studies, who will decide which, if any, courses may be afforded transfer credit. Students should have syllabi and course materials on hand, so that the DUS can evaluate possible courses for transfer credits. After this, students majoring or minoring in French and Francophone Studies are encouraged to meet with the DUS to discuss their degree progress on a semesterly basis.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in French and Francophone Studies

For those students who would like to major in French and Francophone studies, please consult our website and the information below. Each student's program of study is to be discussed regularly with the Director of Undergraduate Studies, starting in the spring semester of the sophomore year.

### COURSES

A minimum of 30 points beyond completion of the language requirement (FREN UN2102), which should be distributed as follows:

#### CORE (12 points):

FREN UN3405	Read, Think, Write in French (Formerly Titled, "Advanced Grammar and Composition")
FREN UN3409	INTRO TO FRENCH # FRANCOPHONE HISTORY
FREN UN3410	Intro French # Francophone Literature
FREN UN3995	SENIOR SEMINAR

#### ELECTIVES (18 points, or 15 points in case of a senior essay):

Six elective courses in French or francophone literature and culture at the 3000 or 4000 level.

These elective courses can include advanced literature, culture, and history courses offered by the Department of French, as well as our popular "French Thru/Through X" courses, which reinforce advanced French language proficiency through various cultural themes (including Current Events, Paris, Pop Culture, the Visual Arts, and so on).

These elective courses should include a minimum of one course that covers the Early-Modern period (before 1800) and a maximum of two "French Thru/Through X" classes (FREN UN32XX).

Students are encouraged to study abroad at Reid Hall. Relevant courses taken at Reid Hall or at a French partner institution may count towards the major.

Though students should prioritize classes taught in French and in the Department of French, courses with significant coverage of the French and Francophone world in other departments may also be counted towards the major with DUS approval.

Some French Barnard College courses may be taken with the approval of the Director of Undergraduate Studies.

### CURRICULUM MAP:

- Students are encouraged to first complete FREN UN3405, to prepare themselves for other, more advanced university courses in French. One possible curriculum map is thus to take FREN UN3405, then the core literature and history survey courses (in any order or concurrently), before

completing the three required elective courses. However, additional core and elective courses can ultimately be taken in any order or concurrently.

- Elective credits can also be completed while studying abroad, either at the Columbia Undergraduate program at Reid Hall in Paris or at partner institutions, such as Sciences Po and a few other qualifying Parisian universities.
- Any elective courses taken at partner institutions will be subject to DUS approval.

## Minor in French and Francophone Studies

For those students who would like to minor in French and francophone studies, please consult our website and the information below. Each student's program of study is to be discussed regularly with the Director of Undergraduate Studies, starting in the spring semester of the sophomore year.

### COURSES

The minor is composed of five courses, or a minimum of 15 points beyond the language requirement / prerequisite (FREN UN2102), which are distributed as follows.

#### CORE (6 points):

- FREN UN3405 "Read, Think, Write in French" (Formerly titled "Advanced Grammar and Composition")
- One of our two core interdisciplinary, undergraduate survey courses, which cover literature, history, and culture from the Middle Ages to the Present. These include either the history survey (FREN UN3409 Introduction to French and Francophone Studies: History) or the literature survey (FREN UN3410 Introduction to French and Francophone Studies: Literature).

#### INTERDISCIPLINARY ELECTIVES (9 points):

- The remaining three electives can be fulfilled by various French or Francophone literature courses at the 3000 or 4000 level.
- These elective courses can include advanced literature, culture, and history courses offered by the Department of French, as well as our popular "French Thru/Through X" (FREN UN32XX) courses, which reinforce advanced French language proficiency through various cultural themes (including Current Events, Paris, Pop Culture, the Visual Arts, and so on).
- Students are encouraged to study abroad at Reid Hall. Relevant courses taken at Reid Hall or at a French partner institution may count towards the major.
- Though students should prioritize classes taught in French and in the Department of French, courses with significant

coverage of the French and Francophone world in other departments may also be counted towards the minor with DUS approval.

- Although students should prioritize classes taught in the Department of French at Columbia, some French courses at Barnard College may be taken with the approval of the Director of Undergraduate Studies.

### CURRICULUM MAP:

- Students are encouraged to first complete FREN UN3405, to prepare themselves for other, more advanced university courses in French. One possible curriculum map is thus to take FREN UN3405, then one core course (either the literature or history survey courses), before completing the three required elective courses. However, additional core and elective courses can ultimately be taken in any order or concurrently. Students may also opt to take the remaining core course for an elective credit (i.e., to take both the literature and history survey courses, and to count one towards the minor requirement and one towards an elective credit).
- Elective credits can also be completed while studying abroad, either at the Columbia Undergraduate program at Reid Hall in Paris or at partner institutions, such as Sciences Po and a few other qualifying Parisian universities.
- Any elective courses taken at partner institutions will be subject to DUS approval.

### LANGUAGE PROFICIENCY REQUIREMENTS:

- Students could begin completing their minor immediately in their freshman year but should begin a minor no later than their junior year. Upon arrival at Columbia, interested students will need to pass the language proficiency exam to determine whether they need to complete first- and second-year French courses, or whether they can pass directly to FREN UN3405.
- All language prerequisites must be completed before taking FREN UN3405.
- The AP French exam already fulfills the language requirement for Columbia students, so it may not fulfill requirements for the minor.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in French and Francophone Studies

The concentration in French and Francophone Studies requires a minimum of 24 points beyond completion of the language

requirement ( FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	Read, Think, Write in French
FREN UN3409	INTRO TO FRENCH # FRANCOPHONE HISTORY
FREN UN3410	Intro French # Francophone Literature
FREN UN3995	SENIOR SEMINAR

The remaining four courses (12 points) are to be chosen from 3000- or 4000- level offerings in French literature, culture, or history.

One of the following advanced language classes can be counted as an elective: French for Diplomats; French Culture, Language and Society through ... (FREN UN324X); Advanced Translation Workshop.

## Major in French

The major in French requires a minimum of 33 points beyond completion of the language requirement (FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	Read, Think, Write in French
FREN UN3333 & FREN UN3334	INTRO TO LITERARY STUDIES I and INTRO TO LITERARY STUDIES II
FREN UN3600	INTRO TO FRENCH CIVILIZATION
FREN UN3995	SENIOR SEMINAR

Select one upper-level course on literature before 1800.

Select one course in area of Francophone literature or culture, i.e., bearing on practices of French outside of France or on internal cultural diversity of France.

The remaining four courses (12 points) are to be chosen from 3000-level offerings in French literature, linguistics, or civilization.

One of the following advanced language classes can be counted as an elective: French for Diplomats; French Culture, Language and Society through...; Advanced Translation Workshop; and The Cultural Workshop.

### Note the following:

FREN BC3006 Composition and Conversation is not applicable to either the French major or the concentration.

Other Barnard French courses may be taken with the approval of the director of undergraduate studies;

Heritage speakers are exempted from FREN UN3405 THIRD-YEAR GRAMMAR # COMP, but must replace the course by taking an advanced elective

The following Columbia French courses are not applicable to the French major or concentration:

FREN UN1101	ELEMENTARY FRENCH I
FREN UN1102	ELEMENTARY FRENCH II
FREN UN1105	ACCELERATED ELEM FRENCH
FREN UN2101	INTERMEDIATE FRENCH I
FREN UN2102	INTERMEDIATE FRENCH II
FREN UN2106	RAPID READING AND TRANSLATION
FREN UN2121	INTERMED CONVERSATN FRENCH I
FREN UN2122	INTERMED CONVERSATN FRENCH II
FREN UN3131	THIRD-YEAR CONVERSATION FR I
FREN UN3132	THIRD-YEAR CONVERSATION FR II

## Concentration in French

The concentration in French requires a minimum of 24 points beyond completion of the language requirement (FREN UN2102 Intermediate Course II), distributed as follows:

FREN UN3405	Read, Think, Write in French
FREN UN3333 & FREN UN3334	INTRO TO LITERARY STUDIES I and INTRO TO LITERARY STUDIES II
FREN UN3600	INTRO TO FRENCH CIVILIZATION

The remaining four courses (12 points) are to be chosen from 3000-level offerings in French literature, linguistics, or civilization.

One of the following advanced language classes can be counted as an elective: French for Diplomats; French Culture, Language and Society through...; Advanced Translation Workshop; and The Cultural Workshop

## LANGUAGE

### FREN UN1101 ELEMENTARY FRENCH I. 4.00 points.

The aim of the beginning French sequence (French 1101 and French 1102) is to help you to develop an active command of the language. Emphasis is placed on acquiring the four language skills--listening, speaking, reading and writing--within a cultural context, in order to achieve basic communicative proficiency

**FREN UN2121 INTERMED CONVERSATN FRENCH I. 2.00 points.**

We will be working on pronunciation, vocabulary acquisition, listening comprehension, and oral expression. Activities will include listening comprehension exercises, skits, debates, and oral presentations, as well as discussions of films, songs, short films, plays, news, articles, short stories or other short written documents. Although grammar will not be the focus of the course, some exercises will occasionally aim at reviewing particular points. The themes and topics covered will be chosen according to students' interests

### **FREN UN3240 FREN LANG,SOC,CULTRE THRU FILM. 3.00 points.**

Prerequisites: FREN UN2102 *FREN W2202* Intermediate French II.

Prerequisites: FREN UN2102 French socio-political issues and language through the prism of film. Especially designed for non-majors wishing to further develop their French language skills and learn about French culture. Each module includes assignments targeting the four language competencies: reading, writing, speaking and oral comprehension, as well as cultural understanding

#### **Spring 2025: FREN UN3240**

FREN 3240	001/13641	T Th 2:40pm - 3:55pm 327 Uris Hall	Heidi Holst-Knudsen	3.00	15/15

### **FREN UN3241 FRENCH LANGUAGE THRU THEATER. 3.00 points.**

The course is taught in French and focuses on learning the French language via the study of theatre (through plays, scenes, theories, lecture/workshops by guests, as well as performing a series of activities). The course offers students the opportunity to have a better grasp of the variety of French theatres within the culture; and to perform the language through the body and mind. Its goal is to both introduce students to theatre and to explore how it challenges us physically and emotionally, as well as in intellectual, moral, and aesthetic ways. No previous acting experience is necessary but a desire to “get up and move” and possibly even go see plays as a class project is encouraged

#### **Spring 2025: FREN UN3241**

FREN 3241	001/13645	M W 11:40am - 12:55pm 407 Hamilton Hall	Pascale Crepon	3.00	14/18

### **FREN UN3405 Read, Think, Write in French. 3.00 points.**

Enrollment limited to 15.

Prerequisites: *FREN W3405* must be taken before *FREN W3333/4* unless the student has an AP score of 5 or the director of undergraduate studies' permission.

UN3405 enables students to hone and perfect their reading and writing skills while improving their ability to express and organize thoughts in French. In this engaging advanced language class, students are exposed to major texts in fields as diverse as journalism, sociology, anthropology, politics, literature, philosophy and history. Stimulating class discussions, targeted reviews of key grammatical points in context, and an array of diverse writing exercises all contribute to strengthen students' mastery of the French language. This course also works as a bridge class between Intermediate French II and courses that focus on French and Francophone cultures, history and literature (such as 3409 and 3410). Students who take this class will be fully prepared to take advanced content classes or spend a semester in a Francophone country. This class is required for the French major and minor

### **FREN UN3242 FREN LANG,SOC,CULTRE THRU PARIS. 3.00 points.**

Prerequisites: 2 years of college French Paris may be referred to as the capital of modernity, as the city of romance and pleasure, as the center of social and political powers, or as a privileged stage for crises and revolutions. Analyzing and researching the meanings of these diverse representations would expose students to key aspects of French and Francophone political, social, and cultural history. This is a proposal for a course intended for students who, having completed their language requirement in French, would like to better their knowledge of French language and society. It would offer students the opportunity to study representations of Paris over the centuries as a way to practice writing, reading, and conversation in French and as a way to deepen their understanding of French and Francophone cultures. Materials for the course would include major literary texts as well as paintings, movies and popular songs, but also museum websites, local newspapers and local ads, brochures from retail and food malls, restaurant menus, postcards... such variety can be utilitarian and intellectually compelling at the same time. It would allow students not only to study language registers and vocabulary contextualization but also work on finding patterns and making connections

### **FREN UN3244 FRENCH THRU CURRENT EVENTS. 3.00 points.**

The course will offer students an understanding of fundamental underlying concepts that structure French society and that are necessary to grasp if one wants to follow current events in France. This course could be of interest not only to CC students but also to students enrolled at SIPA or Teacher's College. Moreover, this course would allow for a comparative approach to how same events are covered in US, or other foreign media, and in France. Given that this course will deal with current events, the readings will depend entirely on how the news unfolds. Students will be given an introduction to the various media outlets available to them: the press, television and online sources. As the course unfolds, I will adapt the choice of sources that best follow events as they happen. 2022 for example, will be the year France assumes the presidency of the European Union. It will also be the year of the presidential elections. For such events, I will propose specific institutional sources. On the other hand, events that could not be anticipated will require some form of guidance in terms of sources. In spite of the obvious unpredictability of the specific content of this course, certain key concepts necessary to understand current events in France will be presented. These may vary slightly from one semester to another, but would include, without being limited to: the structure of government and public institutions, political parties, unions and "associations", social benefits and "the welfare state", public vs. private sector, "Paris is France", universalism, secularism and "laïcité", cultural exceptionalism, the figure of the intellectual, national identity, immigration, geography of France and demographics, relation to Europe,

geopolitics, globalization and sovereignty. Of course, the choice of themes and concepts in a given semester would be influenced by dominant topics in the French news

#### **Fall 2024: FREN UN3244**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FREN 3244	001/14754	T Th 1:10pm - 2:25pm 411 Hamilton Hall	Samuel Skippon	3.00	11/18

### **FREN UN3243 Lang. Culture, Society: La culture pop. 3.00 points.**

The host of the daily radio show Popopop on the public radio France Inter routinely introduces his guests by asking them "what is pop culture?" / "qu'est ce que la culture pop?" The answers are at least as diverse as the guests' cultural, social, and generational backgrounds. Keeping the complexity and variety of the possible answers to this question in mind, students in this class will be introduced to French pop culture or La culture pop française both in its specificity and in contrast to American pop culture. In this French language class, critical thinking applied to mass media such as music, movies, ads, and newspapers, as well as literature ranging from les BD (comics and graphic novels) to les polars (detective fiction), and as well as to Social Media (blogs, podcasts, influencers, etc.) will enable students to better grasp some of the forces shaping culture in French society, equipping them with knowledge and concepts that are helpful to understanding dominant cultural trends and their impact on contemporary French Society. Exposing students to such a wide variety of materials will be intellectually compelling and will also expose them to a variety of language registers

## **LITERATURE AND CULTURE**

### **FREN UN3503 Enlightenment/Counter-Enlightenment. 3 points.**

Prerequisites: completion of *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission. Taking modern definitions and critiques of Enlightenment as its starting point, this course will look at how the Enlightenment defined itself as a philosophical, cultural and literary movement, practiced self-criticism from within, and responded to dissension and critique from without. Authors will include Adorno, Horkheimer, Foucault and Israel for the modern critical context, and Voltaire, Diderot, Buffon, Rousseau, Sade and Kant for the eighteenth century material. The course will be given in French, but non-majors may write papers in English. This course fulfills the French Major requirement for a course on literature before 1800.

### **FREN W3515 Writing the Self Workshop. 3 points.**

Corequisites: *FREN W3333-FREN W3334* or equivalent, or the director of undergraduate studies' permission.

In this course, we will read works spanning the history of French literature from the Renaissance to the present in which the problem of writing the self is posed. We will also engage in various writing exercises (pastiche, translation, personal narrative) and discuss the works on the syllabus in

conjunction with our own attempts to write the self. Authors will include Montaigne, Rousseau, Roland, Sand, Colette, Barthes, Modiano, and NDiaye. This course fulfills the pre-1800 requirement.

**FREN UN3517 Montaigne, Descartes, Pascal. 3 points.**

Prerequisites: *FREN W3333-W3334* or the director of undergraduate studies' or the instructor's permission. A study of Montaigne's *Essais* and their rewriting by Descartes and Pascal, with a focus on the nature of intellectual and aesthetic innovation in a humanist context.

**FREN UN3600 INTRO TO FRENCH CIVILIZATION. 3.00 points.**

Prerequisites: *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission. Prerequisites: *FREN UN3333* or *UN3334* and *UN3405*, or the director of undergraduate studies permission. Based on readings of short historical sources, the course will provide an overview of French political and cultural history since 1700

**FREN W3666 Moliere. 3 points.**

Prerequisites: completion of *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission. Study of Molière's major plays, including *Tartuffe*, *Dom Juan*, and *Le Misanthrope*, focusing on key concepts such as naturalness and convention, value and exchange, and the relationship between ethics and comedy. Special attention will be paid to the connections between critical approaches of the text and the various ways in which the plays can be staged.

**FREN W3714 1914-2014 : un siècle de littératures en français. 3 points.**

Not offered during 2023-2024 academic year.

Prerequisites: completion of *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission. This class is intended as a survey course on French literatures in the past 100 years. It will consider all major moments and movements of literature in French in the 20th century (surrealism, existentialism, negritude, Nouveau Roman...) until and including some of the most remarkable literary creations of the early 21st century. The course is taught in French and the readings will be in French.

**FREN W3766 Transcribing/Writing Tales in Africa. 3 points.**

Not offered during 2023-2024 academic year.

Prerequisites: *FREN W3333-FREN W3334* or the director of undergraduate studies' or the instructor's permission. The students are required to be able to read and discuss tales in French.

Transcribing, adapting, rewriting, reinventing in the French language African oral tales is an important literary genre in African francophone literature. The works of authors such as Amadou Hampâté Bâ from Mali, Bernard Dadié from Côte d'Ivoire and Birago Diop from Senegal are among the classics of that genre. The course is a study of a certain number

of "tales" written with talent and humor by Bâ, Dadié and Diop; they are from the following books: *Il n'y a pas de petite querelle* (Bâ), *Le pagne noir* (Dadié), *Les contes d'Amadou Koumba*, and *Les nouveaux contes d'Amadou Koumba* (Diop). This course is intended primarily for undergraduate students interested in French and in Francophone Studies majors, concentrators, and those who speak French and want to study an important aspect of literature in French.

**FREN W3726 Sex, Class and Shame in 20th-21st Century French Literature. 3 points.**

Prerequisites: Prerequisites: completion of *FREN W3333* or *W3334* and *W3405*, or the director of undergraduate studies' permission.

The second half of the twentieth century in France saw a sudden explosion of literary works examining, with unprecedented explicitness, sexuality and social class and the relations between them. This course will provide an introduction to the literature of sexual and social abjection, beginning with Genet and Violette Leduc and including works by Annie Ernaux, Christine Angot, Virginie Despentes, and Edouard Louis. We will also consider relevant sociological writings by Bourdieu, Eribon, and Goffman. Readings and discussion will be in French.

**CLFR UN3830 French Film. 3 points.**

A study of landmarks of French cinema from its origins to the 1970s. We will pay particular attention to the relation between cinema and social and political events in France. We will study films by Jean Vigo, Jean Renoir, Rene Clair, Alain Resnais, Francois Truffaut and Jean-Luc Godard. In English.

**FREN UN3409 INTRO TO FRENCH # FRANCOPHONE HISTORY. 3.00 points.**

This class provides an introduction to the history of France and of the francophone world since the Middle Ages. It initiates students to the major events and themes that have shaped politics, society, and culture in France and its former colonies, paying special attention to questions of identity and diversity in a national and imperial context. Modules include a combination of lecture and seminar-style discussion of documents (in French). This course is part of a two-course sequence and is a core requirement the French and Francophone Studies major

Aubrey 3.00 1/10  
Gabel**GERMANIC LANGUAGES****GERMANIC LANGUAGES**Department website: <https://germanic.columbia.edu/>

Office location: 414 Hamilton Hall

Office contact: 212-854-3202, [germanic@columbia.edu](mailto:germanic@columbia.edu)Director of Undergraduate Studies: Professor Annie Pfeifer, 409 Hamilton Hall, [ap750@columbia.edu](mailto:ap750@columbia.edu), 212-854-8986Director of the Language Program: Jutta Schmiere-Heller, [js2331@columbia.edu](mailto:js2331@columbia.edu), 212-854-5381Director of Academic Administration and Finance: Kerstin Hofmann, 415 Hamilton Hall, [kh3168@columbia.edu](mailto:kh3168@columbia.edu), 212-854-1624**THE DEPARTMENT OF GERMANIC LANGUAGES**

The Department of Germanic Languages and Literatures is considered one of the very best in the country. Many of the faculty specialize in the study of German literature and culture from 1700 to the present. German majors acquire proficiency in examining literary, philosophical, and historical texts in the original, as well as critical understanding of modern German culture and society. Particular attention is given to German-speaking traditions within larger European and global contexts. Courses taught in translation build on Columbia's Core Curriculum, thereby allowing students to enroll in upper-level seminars before completing the language requirement.

All classes are taught as part of a living culture. Students have ample opportunities to study abroad, to work with visiting scholars, and to take part in the cultural programs at Deutsches Haus. In addition, the department encourages internships with German firms, museums, and government offices. This hands-on experience immerses students in both language and culture, preparing them for graduate study and professional careers.

Upon graduation, German majors compete successfully for Fulbright or DAAD scholarships for research in Germany or Austria beyond the B.A. degree. Our graduating seniors are highly qualified to pursue graduate studies in the humanities and social sciences, as well as professional careers. Former majors and concentrators have gone on to careers in teaching, law, journalism, banking and consulting, international affairs, and communications.

German literature and culture courses are taught as seminars integrating philosophical and social questions. Topics include romanticism, revolution, and national identity; German intellectual history; minority literatures; Weimar cinema;

German-Jewish culture and modernity; the Holocaust and memory; and the history and culture of Berlin. Classes are small, with enrollment ranging from 5 to 15 students.

The department regularly offers courses in German literature and culture in English for students who do not study the German language. The department also participates in Columbia's excellent program in comparative literature and society.

## THE YIDDISH STUDIES PROGRAM

The Yiddish Studies Program at Columbia University, the global leader in Yiddish scholarship and teaching, focuses on the experiences and cultural efflorescence of Ashkenazic Jewry over a thousand years and five continents. It is a perfect exemplar of Columbia's interests in global and transnational study, weaving together language, literature, and culture in a way that echoes the best of Columbia's justly famed humanities programs.

The program in Yiddish studies offers both the undergraduate Major, Concentration and three new Minor tracks, in addition to graduate studies leading to the Ph.D. In both the undergraduate and graduate program, emphasis is placed not merely on acquiring linguistic proficiency and textual study, but also viewing Yiddish literature in a larger cultural and interdisciplinary context. The graduate program, the only degree-granting Yiddish Studies Program in the United States, is considered one of the world's most important, with its graduates holding many of the major university positions in the field.

Students of Yiddish have ample opportunities to enhance their studies through a number of fellowships. The Naomi Fellowship, a fully-subsidized Yiddish Study Abroad program allows students to explore Yiddish culture and history in Israel and Poland. The Irene Kronhill Pletka YIVO Fellowship enables students to expand on their archival research skills in New York. Upon graduation, our majors compete successfully for Fulbright and other prestigious scholarships, and are highly qualified to pursue careers in humanities, social sciences, as well as artistic and professional careers.

Students work with faculty in Germanic languages, Jewish studies, history, and Slavic studies to broaden their understanding of the literature, language, and culture of Eastern European Jewry. The Yiddish Studies Program is also closely affiliated with the Institute for Israel and Jewish Studies, which offers diverse programming and other fellowship opportunities. Classes are small, and instruction is individualized and carefully directed to ensure that students gain both a thorough general grounding and are able to pursue their own particular interests in a wide-spanning field. The program also offers classes taught in translation for students who do not study Yiddish. The Yiddish programming, such as lectures, monthly conversation hours, Meet a Yiddish Celebrity series, as well as the activities of the Yiddish Club of Columbia's Barnard/

Hillel allows students to explore Yiddish culture outside the classroom.

## The German Language Placement Exam

The German Language Placement Exam is offered every semester to students who already speak the language in order to determine their language level (Elementary, Intermediate, Advanced) and the right level language course. Visit our [website for details](#).

## The German Language Program

First- and second-year German language courses emphasize spoken and written communication, and provide a basic introduction to German culture. Goals include mastery of the structure of the language and enough cultural understanding to interact comfortably with native speakers.

After successfully completing the elementary German sequence, GERM UN1101 ELEMENTARY GERMAN I-GERM UN1102, students are able to provide information about themselves, their interests, and daily activities. They can participate in simple conversations, read edited texts, and understand the main ideas of authentic texts. By the end of GERM UN1102, students are able to write descriptions, comparisons, and creative stories, and to discuss general information about the German-speaking countries.

The intermediate German sequence, GERM UN2101 INTERMEDIATE GERMAN I-GERM UN2102 INTERMEDIATE GERMAN II, increases the emphasis on reading and written communication skills, expands grammatical mastery, and focuses on German culture and literary texts. Students read short stories, a German drama, and increasingly complex texts. Regular exposure to video, recordings, the World Wide Web, and art exhibits heightens the cultural dimensions of the third and fourth semesters. Students create portfolios comprised of written and spoken work.

Upon completion of the second-year sequence, students are prepared to enter advanced courses in German language, culture, and literature at Columbia and/or at the Berlin Consortium for German Studies in Berlin. Advanced-level courses focus on more sophisticated use of the language structure and composition (GERM UN3001 ADVANCED GERMAN I-GERM UN3002 ADVANCED GERMAN II); on specific cultural areas; and on literary, historical, and philosophical areas in literature-oriented courses (GERM UN3333 INTRO TO GERMAN LIT (GERMAN)).

## In Fulfillment of the Language Requirement in German

Students beginning the study of German at Columbia must take four terms of the following two-year sequence:

GERM UN1101	ELEMENTARY GERMAN I
GERM UN1102	ELEMENTARY GERMAN II

GERM UN2101	INTERMEDIATE GERMAN I
GERM UN2102	INTERMEDIATE GERMAN II

Entering students are placed, or exempted, on the basis of their College Board Achievement or Advanced Placement scores, or their scores on the placement test administered by the departmental language director. Students who need to take GERM UN1101 ELEMENTARY GERMAN I-GERM UN1102 ELEMENTARY GERMAN II may take GERM UN1125 Accelerated Elementary German I & II as preparation for GERM UN2101 INTERMEDIATE GERMAN I.

## STUDENT ADVISING

### Consulting Advisers

**Director of Undergraduate Studies:** Professor Annie Pfeifer, 409 Hamilton Hall, [ap750@columbia.edu](mailto:ap750@columbia.edu), 212-854-8986

**Director of the German Language Program:** Jutta Schmiers-Heller, [js2331@columbia.edu](mailto:js2331@columbia.edu), 212-854-5381

**Director of the Yiddish Studies Program:** Professor Jeremy Dauber, [jad213@columbia.edu](mailto:jad213@columbia.edu)

**Director of the Yiddish Language Program:** Agnieszka Legutko, [abl209@columbia.edu](mailto:abl209@columbia.edu), 212-854-3202

Students can contact the DUS with advising questions. The Department of Germanic Languages is represented at the Academic Resources Fair prior to the beginning of the fall semester and hosts fall and spring open houses for interested students.

### Enrolling in Classes

The German Language Placement Exam is offered throughout the year to students who already speak the language in order to determine their language level (Elementary, Intermediate, Advanced) and the right level language course. Visit our [website for details](#).

### Preparing for Graduate Study

Upon graduation, German majors compete successfully for Fulbright or DAAD scholarships for research in Germany or Austria beyond the B.A. degree. Graduating seniors are highly qualified to pursue graduate studies in the humanities and social sciences, as well as professional careers. Former majors and minors have gone on to pursue graduate degrees in law, journalism, banking and consulting, international affairs, education, and communications.

In addition to applying for Fulbright or DAAD scholarships, students considering graduate work may also wish to write a senior thesis or develop an independent research project with a faculty mentor.

Students interested in pursuing a PhD or MA in the field of Germanic Languages should therefore speak with the Director of Undergraduate Studies and other faculty members no later

than the beginning of the fall semester before applying (i.e., typically the fall of the senior year).

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor [or special program or concentration] must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

### Advanced Placement

The department grants 3 credits for a score of 5 on the AP German Language exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3000-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in German. Courses taught in English may not be used for language AP credit. The department grants 0 credits for a score of 4 on the AP German Language exam, but the foreign language requirement is satisfied.

### Barnard College Courses

The German programs at Columbia and Barnard work together closely. Students may take courses at Barnard to count towards the Major or Minor with the approval of the DUS. Students at Barnard should speak to their advisor at Barnard regarding Columbia courses as the departments are distinct and the requirements for their respective majors are different.

### Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor [or special program or concentration].

### Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor [or special program or concentration], the DUS will need to confirm that they can be used toward requirements in the major/minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.”

## **FUBiS Summer Language Program in Berlin**

The department offers a language-intensive German program over the summer at the Freie Universität Berlin (FUBiS). Financial support is provided primarily by the Germanistic Society of America and the Max Kade Foundation, with some help from Barnard College, Columbia College, General Studies, Columbia Engineering, and the Department of Germanic Languages.

The FUBiS scholarship is for students who have completed at least two semesters or equivalent of German language instruction in our German language program by May of the year they are applying. Scholarships are awarded based on academic achievement and German language aptitude. Each scholarship includes a travel grant, tuition for a six-week/ one month-long German language course, and lodging at the summer program of the FU University. For additional information on FUBiS, please contact our department and visit <https://www.fubis.org>.

## **Berlin Consortium for German Studies**

The Berlin Consortium for German Studies (BCGS) provides students with a study abroad program, administered by Columbia University, which includes students from other consortium member schools (Princeton, Yale, University of Pennsylvania, Johns Hopkins, and the University of Chicago). You can study a semester or a full academic year. We have the original immersion program (4 semesters + of German required) and a program for students with less German. Please visit the Global Engagement page and click on the tab “Calendars and Pathways” to see all the options available to you: <https://global.undergrad.columbia.edu/program/bcgs>

For additional information on the Berlin Consortium, see the [Study Abroad—Sponsored Programs](#) section in this Bulletin, visit the [Center for Undergraduate Global Engagement](#), or consult the program's office at [uge@columbia.edu](mailto:uge@columbia.edu) ([iuge@columbia.edu](mailto:iuge@columbia.edu)).

## **Summer Courses**

Summer courses at Columbia are offered through the School of Professional Studies.

Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## **CORE CURRICULUM CONNECTIONS**

Faculty and graduate instructors from the Department of Germanic Languages regularly teach in the Core, usually Literature Humanities and Contemporary Civilization.

The Department of Germanic Languages also offers several courses that build on the coursework in Contemporary Civilization including “Marx, Nietzsche, Freud” (GERM4670GU) and “Aesthetic Theory - Frankfurt School” (CLGR 4210GU) and “Aesthetics and Philosophy of History” (CLGR4250GU).

## **UNDERGRADUATE RESEARCH AND SENIOR THESIS**

### **Undergraduate Research in Courses**

Beyond the wide-ranging language instruction, the department offers courses that teach students critical theory and interdisciplinary thinking that are applicable to many areas of knowledge. Courses like “Literary Theory: Nietzsche-Agamben” (CLGR4130GU) introduce students to theoretical and interdisciplinary methods. “Advanced Topics” (UN3991) introduces students to contemporary topics and scholarly debates and is based on current research interests of faculty members. Students are also given an opportunity to develop an independent research project.

Students should consult with the Director of Undergraduate Studies. Students can register for Directed Readings with a faculty member.

### **Senior Thesis Coursework and Requirements**

A senior thesis is not required for the major. Students interested in a senior thesis or research project may do so through independent study with a faculty member over one or two semesters. Students should approach a faculty member at the end of their junior or beginning of their senior year.

## **Undergraduate Research Outside of Courses DEPARTMENT HONORS AND PRIZES**

### **Department Honors**

Normally no more than 10% of graduating majors receive departmental honors in a given academic year. For the requirements for departmental honors, see the DUS.

### **Academic Prizes**

All prize recipients are announced at the end of the spring semester of each academic year.

The German Academic Achievement Award is awarded to the top students in German language classes. The award is made by the department together with the support of the Consulate General of the Federal Republic of Germany. The prize consists

of a certificate provided by the Consulate and a small gift provided by the department.

The Deutscher Verein Prize is a cash prize given annually to a single Columbia College junior or senior who submits the best essay on a prescribed topic in German Literature or culture. Essays can be in English or in German.

The Deutsches Haus Prize for Distinguished Undergraduate Achievement is given to a graduating German major or minor who has demonstrated excellence and promise in the field of German Studies.

## OTHER IMPORTANT INFORMATION

### Deutsches Haus

Deutsches Haus, 420 West 116th Street, provides a center for German cultural activities on the Columbia campus. It sponsors lectures, film series, and informal gatherings that enrich the academic programs of the department. Frequent events throughout the fall and spring terms offer students opportunities to engage with current issues in the field and practice their language skills. Twice a month during the semester, the department offers “Kaffeestunde,” an open German conversation hour for speakers at all proficiency levels. The department also holds monthly Dutch and Yiddish Conversation hours.

### Grading

Courses in which a grade of D has been received do not count toward the major or concentration requirements.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before the 2023-2024 academic year may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

### Course Numbering Structure

The 1000 and 2000-level courses are typically language classes including Elementary, Intermediate, and Conversation. At the 3000/4000-level, courses are either advanced language classes and literature/culture classes. While many 3000/4000 courses are taught in English, others are taught in the target language and have language prerequisites or requirements.

### Guidance for First-Year Students

Students who have had prior German instruction are required to take the placement test, which is offered every semester. Students may enroll in 3000 and 4000 level literature and culture courses taught in English before or without completing the language requirements.

### Guidance for Transfer Students

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit. Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor [or special program or concentration].

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in German Literature and Cultural History

The goal of the major is to provide students with reasonable proficiency in reading a variety of literary, philosophical, and historical texts in the original and, through this training, to facilitate a critical understanding of modern German-speaking cultures and societies. Students should plan their program of study with the director of undergraduate studies as early as possible. Competence in a second foreign language is strongly recommended, especially for those students planning to attend graduate school.

The major in German literature and cultural history requires a minimum of 30 points, distributed as follows:

GERM UN2102	INTERMEDIATE GERMAN II
GERM UN3001	ADVANCED GERMAN I (can be waived and replaced by another 3000 level class upon consultation with the DUS)
or GERM UN3002	ADVANCED GERMAN II
GERM UN3333	INTRO TO GERMAN LIT (GERMAN)

Select two of the following survey courses in German literature and culture (at least one of these must focus on pre-20th-century cultural history):

GERM UN3442	Literature in the 18th and 19th Centuries
GERM UN3443	SURVEY OF GERMAN LIT:19C (GER)
GERM UN3444	SURVEY OF GERMAN LIT:20C (GER)
GERM UN3445	German Literature After 1945 [In German]

One course in German intellectual history

GERM UN3991	Advanced Topics in German Literature
-------------	--------------------------------------

The remaining courses to be chosen from the 3000- or 4000-level offerings in German and Comparative Literature—German in consultation with the Director of Undergraduate Studies.

Intermediate German II (GERM UN 2102) can be counted toward the required 30 points, but the total of points from language courses should not be higher than six points.

#### Senior Thesis

A senior thesis is not required for the major. Students interested in a senior thesis or research project may do so through independent study with a faculty member over one or two semesters.

### Major in Yiddish Studies

The program is designed as a combination of language and content courses. First- and second-year Yiddish language courses emphasize spoken and written communication, and provide a basic introduction to Eastern European Jewish culture. Goals include mastery of the structure of the language and enough cultural understanding to interact comfortably with native speakers.

After second-year Yiddish language courses are completed, students should feel sufficiently comfortable to begin to work with Yiddish literature in the original. Upper-level undergraduate/graduate courses are designed to accommodate students with a range of Yiddish language experience, and intensive language summer study abroad, such as the Naomi Praver Kadar International Yiddish Summer Program (the Yiddish Studies program at Columbia offers the fully-subsidized Naomi Fellowship for students of Yiddish), or other academic summer programs, is also encouraged for improvement in language acquisition and comprehension.

The goal is to provide students with reasonable proficiency in reading a variety of literary, philosophical, and historical texts in the original and, through this training, to provide them with a critical understanding of Yiddish-speaking culture and society.

The second pillar of the Yiddish program is an intimate exposure to the literature and culture of the Yiddish-speaking Jewry. That exposure is achieved through several courses in Yiddish literature, which, although they may cover a variety of subjects or proceed from a number of methodological and disciplinary orientations, share a rigorous commitment to analyzing and experiencing that literature within an overarching historical and cultural framework.

These courses in Yiddish literature, culture and Jewish history will provide students with a solid interdisciplinary foundation in Yiddish studies. Inevitably and necessarily, these courses, whether taught in Yiddish, English, or in a combination of the Yiddish text and English language instruction – cover the sweep of Yiddish literary history from the early modern period to today.

Students should plan their program of study with the director of undergraduate studies as early as possible. There is a prerequisite of two years of Yiddish, or equivalent to be demonstrated through testing.

The Major in Yiddish Studies requires a minimum of 30 points, distributed as follows:

1. **Two courses of advanced language study** (6 points); YIDD UN3101, YIDD UN3102
2. **Three courses in Yiddish literature** (9 points); e.g. YIDD UN3500, YIDD GU4420
3. **At least one course related to a senior thesis** (3 points);

**4. Four related courses, at least one of which is in medieval or modern Jewish history** (12 points); e.g. HIST UN4604, YIDD GU4113.

A senior thesis **is required** for the Major in Yiddish Studies. Students interested in a senior thesis or research project may do so through independent study with a faculty member over one or two semesters. Students must conduct original research, some of which must take place in the Yiddish language, and are required to submit a culminating paper, of no less than 35 pages.

Elective courses:

Elective courses can be taken at Columbia as well as at affiliated institutions such as the Jewish Theological Seminary, Barnard College, New York University, etc. Columbia's arrangements with the joint degree appointing program at JTS, i.e. JTS and GS Joint program with List College, offers students exposure to a wide variety of courses on Yiddish and Yiddish-related topics taught by experts in the field of Yiddish and comparative Jewish literature.

Thanks to the consortial arrangements with other universities in the New York area (Barnard, NYU, Yale, Penn, etc.) students both in Columbia College and General Studies, can take courses at these institutions for degree credit, which allows for student exposure to experts in twentieth-century Soviet Yiddish literature, Yiddish women's writing, Yiddish literature in Israel, and much more (Profs. Gennady Estraiikh, Kathryn Hellerstein, and Hannan Hever). These arrangements allow students to have, if they so choose, an even broader intellectual experience than the already broad interdisciplinary opportunities available to them via the courses offered by the faculty on the Interdisciplinary Committee on Yiddish at Columbia.

Language courses need to be taken at Columbia.

Honors options:

Departmental Honors in Yiddish Studies can be granted to a total of 10% of the students graduating with the Major in Yiddish Studies in a given year across both Columbia College and General Studies.

---

## Minor in German

**The total number of courses required for the minor is 5 courses (= minimum of 15 points).**

Pre-requisites:

The minor requires at least 4 semesters of German language (= through Intermediate II), or equivalent proficiency determined by placement test. However, students can count the second semester of intermediate German (GERM UN2102) towards their five courses and begin other coursework (in translation) before completing the four semesters of language.

Language/Literature and Culture distribution:

A maximum of 6 points can be fulfilled with upper-level language courses (Intermediate II and/or Advanced). The remaining credits (= at least three courses) need to be 3000/4000-level literature/culture courses.

**Required Course:**

### GERM UN3333 (Introduction to German Literature)

Course Description: Prerequisites: GERM UN2102 or the equivalent. Examines short literary texts and various methodological approaches to interpreting such texts in order to establish a basic familiarity with the study of German literature and culture.

**Recommended Electives:**

1. One of the period survey courses in German literature and culture
  - a. GERM UN3442 Survey of German Literature: 18th-Century
  - b. GERM UN3443 Survey of German Literature: 19th-Century
  - c. GERM UN3444: Survey of German Literature: 20th-Century
2. GERM UN3991: Advanced Topics in German Literature

**Other electives:**

The remaining courses can be chosen, in consultation with the Director of Undergraduate Studies, from the department's other 3000- or 4000-level offerings in German and Comparative Literature-German (taught in German or English).

**Sequencing:**

## Minor in German Thought and Critical Theory

The minor enables students to gain a deeper knowledge of a critical intellectual and philosophical tradition, which was first established by Kant and then adapted by Marx, Nietzsche, Freud, Arendt, and the Frankfurt School. In addition to historicizing the contexts that allowed for the emergence of this mode of critical thinking, the minor also trains students to extend this critical awareness to new but equally contingent circumstances that we encounter in our global presents and futures. The minor draws on and strengthens crucial core competencies of a Columbia undergraduate education, especially critical thinking, written communication, global awareness, oral communication, and research. Students expand their knowledge of critical arguments by Kant, Marx, Nietzsche, and Arendt whose texts they also read as part of Contemporary Civilization. Offered in cooperation with the Philosophy Departments at Barnard and Columbia, this interdisciplinary minor allows students to explore various dimensions of critical theory including literary theory, continental philosophy, aesthetics, and political theory.

The total number of courses required for the minor is 5 courses (minimum of 15 points). Prerequisites: None. The second semester of Contemporary Civilization is recommended but not required. There is no German language requirement as part of the minor. Classes will be taught in English.

Requirements: Students have to take two of the following three courses:

### 1. CLGR4210GU: Aesthetic Theory - Frankfurt School

Critical theory was the central practice of the Frankfurt School. Founded in Frankfurt in 1923 and later based at Columbia University, this interdisciplinary institute influenced fields like sociology, political science, film, cultural studies, media theory, and comparative literature. The course begins by examining the genealogy of the Frankfurt School in Marxism and its critique of fascism and traces its afterlife in aesthetic theory, deconstruction, and gender studies, as well as the specter of "Cultural Marxism" recently floating around right-wing circles. We read texts by key figures of the Frankfurt School such as Theodor W. Adorno, Max Horkheimer, Herbert Marcuse and Jürgen Habermas as well as works by adjacent figures like Walter Benjamin, Hannah Arendt, and Siegfried Kracauer.

### 2. GERM4670GU: Marx, Nietzsche, Freud

Along with Darwin, Marx, Nietzsche and Freud have radically altered what and how we know; about humans, language, history, religion, things and life. Because their thought has shaped our sense of ourselves so fundamentally, Michel Foucault has referred to these three authors as discourse-founders. As such they will be treated in this class. Special attention will be paid to the affinities and competition among their approaches. Secondary sources will be subject to short presentations (in English) of those students capable of reading German.

### 3. CLGR4250GU: Aesthetics and Philosophy of History (in English)

This course offers an introduction to German intellectual history by focusing on the key texts from the 18th and 19th century concerned with the philosophy of art and the philosophy of history. Instead of providing a general survey, this thematic focus that isolates the relatively new philosophical subspecialties allows for a careful tracing of a number of key problematics. The texts chosen for discussion in many cases are engaged in lively exchanges and controversies. Readings are apportioned such that students can be expected to fully familiarize themselves with the arguments of these texts and inhabit them.

Electives: In addition, students take elective courses to be chosen from the following list of classes. They can also petition for other elective courses to count toward the minor, dependent on approval by the DUS of German.

Approved electives:

PHIL UN 2301 History of Philosophy: Kant-Nietzsche

PHIL UN 3251 Kant

PHIL UN 3264 19th Century Philosophy: Hegel

PHIL UN 3351 Phenomenology & Existentialism

CLGR GU4215 Spirit and Ghosts from Kant to Marx

CLGR GU 4420 Walter Benjamin

CLGR GU 4130 Literary Theory: Nietzsche-Agamben

CLGR GU 4251 Kant with Arendt (NEW COURSE PENDING APPROVAL)

## Minor in Yiddish Studies

### 3 Separate Minor Tracks Available:

The Yiddish minor is designed as a combination of five courses with three separate tracks:

5 courses (= minimum of 15 points)

1) Minor in Yiddish Language: 5 language courses;

2) Minor in Yiddish Language and Literature: a combination of language and content courses;

3) Minor in Yiddish Culture: 5 content courses.

### Requirements:

#### 1. Courses required for Minor in Yiddish Language:

##### *Requirement: Five Language Courses*

YIDD 1101 UN Elementary Yiddish I 4 points

YIDD 1102 UN Elementary Yiddish II 4 points

This year-long course offers an introduction to the language that has been spoken by the Ashkenazi Jews for more than a millennium, and an opportunity to discover a fabulous world of Yiddish literature, language and culture in a fun way. Using games, new media, and music, we will learn how to speak, read, listen and write in a language that is considered one of the richest languages in the world (in some aspects of vocabulary). We will also venture outside the classroom to explore the Yiddish world today: through field trips to Yiddish theater, Yiddish-speaking neighborhoods, Yiddish organizations, such as YIVO or Yiddish farm, and so on. We will also have Yiddish-speaking guests and do a few digital projects. At the end of the two-semester course, you will be able to converse in Yiddish on a variety of everyday topics and read most Yiddish literary and non-literary texts. Welcome to Yiddishland!

YIDD 2101 UN Intermediate Yiddish I 4 points

YIDD 2102 UN Intermediate Yiddish II 4 points

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission.

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission.

This year-long course is a continuation of Elementary Yiddish II. As part of the New Media in Jewish Studies Collaborative, this class will be using new media in order to explore and research the fabulous world of Yiddish literature, language, and culture, and to engage in project-oriented activities that will result in creating lasting multi-media online presentations. In addition to expanding the command of the language that has been spoken by the Ashkenazi Jews for more than a millennium, i.e. focusing on developing speaking, reading, writing and listening skills, and on the acquisition of more advanced grammatical concepts, students will also get some video and film editing training, and tutorials on archival research. The class will continue to read works of Yiddish literature in the original and will venture outside of the classroom to explore the Yiddish world today: through exciting field trips to Yiddish theater, Yiddish-speaking neighborhoods, YIVO, Yiddish Farm, and so on. And we will also have the Yiddish native-speaker guest series. Welcome back to Yiddishland!

YIDD 3101 UN    Advanced Yiddish        3 points

This course focuses predominantly on developing reading comprehension skills, as well as on listening, writing, speaking, and some more advanced grammar. It explores literary and scholarly texts examining the modern Jewish experience in the context of the twentieth-century history and culture of the Ashkenazi Jews. Supplementary texts will be selected based on students' interests and may include historical pedagogical materials, past and present newspaper articles, polemic, poetry, historical and scholarly articles. We will also venture outside the classroom to explore the Yiddish world today: through field trips to Yiddish theater, Yiddish-speaking neighborhoods, Yiddish organizations, such as YIVO, and so on. We will apply our reading and translating skills to contribute to the Mapping Yiddish New York online project, and will also have Yiddish-speaking guests. At the end of the semester, you will be able to converse in Yiddish on a variety of everyday topics and read authentic Yiddish literary and non-literary texts. Welcome back to Yiddishland!

Please note: Study abroad courses (such as the Naomi Fellowship run by Yiddish Studies Program) can count towards the minor fulfillment as well.

## **2. Courses required for Minor in Yiddish Language and Literature**

***Requirement: Combination of language and content courses: at least 15 points (see below).***

- 2 language courses at Elementary and/or Intermediate levels (listed above), and 3 elective content courses (listed below), at least two of which are literature courses: at least 17 points.

OR

- 1 language course at Advanced level (listed above) and 4 elective content courses (listed below), at least two of which are literature courses: at least 15 points.

## **3. Courses required for the Minor in Yiddish Culture**

***Requirement: Five elective content courses: at least 15 points.***

Selected from the list below, with at least three of being literature courses: at least 15 points.

The courses in Yiddish literature, culture and Jewish history, whether taught in Yiddish, English, or a combination of the English and Yiddish texts and English language instruction will expose students to modern global Yiddish/Jewish cultures from a number of methodological and disciplinary perspectives.

Please see chart below for recommended elective content courses for:

2) Minor in Yiddish Language and Literature

3) Minor in Yiddish Culture\*

1. YIDD UN3500: Survey of Yiddish Literature
2. CLYD UN3500: Readings in Yiddish Literature
3. YIDD GU4420: Gender & Sexuality in Yiddish Literature
4. CLYD UN4200 : American Jewish Literature: Survey
5. CLYD GU4250: Memory and Trauma in Yiddish Literature
6. YIDD UN3520: Magic & Monsters in Yiddish Literature
7. HIST UN3657: Medieval Jewish Cultures
8. HIST UN3644: Modern Jewish Intellectual History
9. HIST UN3630: American Jewish History
10. HIST UN4604: Jews and the City

\*The above list is "recommended" and not "required" since there are only two full-time Yiddish faculty members at the Department of Germanic Languages, and the courses are offered in rotation. This option also allows students to choose courses aligned with their interests and research needs. All the literature courses are taught by the Yiddish faculty at the Department of Germanic Languages, other courses are taught by faculty in History, Slavic, and Religion Departments.

The Yiddish minor requirement can be fulfilled by choosing from the list of approved courses (listed here and on the departmental website) in consultation with a Yiddish Advisor – either Director of Undergraduate Studies (DUS) or the Director of the Yiddish Language Program (DLP), preferably during the first two years of undergraduate studies. All courses have to be approved in advance by the Yiddish Advisor, who will make sure student minor design (particularly in case of Minor in Yiddish Language and Literature and Minor in Yiddish Culture) offers a solid foundation in Yiddish language, literature, and culture.

The Yiddish Advisor is in contact with the faculty outside of the Germanic Languages Department in order to consult, collaborate, and monitor the student progress towards the minor, the same model being applied in regard to the Yiddish Major. Many of the Columbia faculty teaching Jewish studies content courses are also affiliated with the Institute for Israel and Jewish Studies, which not only provides students and other departments with information about Jewish/Yiddish studies courses offered across the university on a regular basis, but it also facilitates networking and collaborations between the faculty.

**List of all elective content courses for the Yiddish Minor:**

YIDD GU4101 INTRODUCTION TO YIDDISH STUDIES

YIDD UN3500 SURVEY OF YIDDISH LIT

CLYD UN4200 AMER JEWISH LIT: SURVEY

\*Since the above list of elective courses is so expansive, the additional course descriptions can be provided upon request.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before the 2023-2024 academic year. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Concentrations are not available to students who entered Columbia in or after Fall 2024.

## Concentration in German Literature and Cultural History

The concentration in German literature and cultural history requires a minimum of 21 points in German courses.

GERM UN3333      INTRO TO GERMAN LIT  
(GERMAN)

At least one of the period survey courses in German literature and culture

GERM UN3442      Literature in the 18th and 19th  
Centuries

GERM UN3443      SURVEY OF GERMAN LIT:19C  
(GER)

GERM UN3444      SURVEY OF GERMAN LIT:20C  
(GER)

GERM UN3445      German Literature After 1945 [In  
German]

GERM UN3991      Advanced Topics in German  
Literature

The remaining courses to be chosen from the 3000- or 4000-level offerings in German and Comparative Literature in consultation with the Director of Undergraduate Studies

## Concentration in Yiddish Studies

The concentration in Yiddish studies requires a minimum of 21 points, distributed as follows:

1. **Two courses of advanced language study** (6 points); YIDD UN3101, YIDD UN3102
2. **Two courses in Yiddish literature** (6 points); e.g. YIDD UN3500, YIDD GU4420
3. **Three related courses, at least one of which is in medieval or modern Jewish history** (9 points); e.g. HIST UN4604, YIDD GU4113.

## Special Concentration in German for Columbia College and School of General Studies Students in STEM fields

The special concentration in German requires a minimum of 15 points.

GERM UN3333      INTRO TO GERMAN LIT  
(GERMAN)

At least one of the period survey courses in German Literature and Culture

GERM UN3442      Literature in the 18th and 19th  
Centuries

GERM UN3443      SURVEY OF GERMAN LIT:19C  
(GER)

GERM UN3444      SURVEY OF GERMAN LIT:20C  
(GER)

GERM UN3445      German Literature After 1945 [In  
German]

GERM UN3991      Advanced Topics in German  
Literature

Two courses to be chosen from the 3000- or 4000-level (taught in German or English) offerings in German and Comparative Literature German in consultation with the Director of Undergraduate Studies

## COMPARATIVE LITERATURE-GERMAN

**CLGR UN3212 Postwar Modernism: Literature # Thought. 3.00 points.**

This course will examine how postwar European authors grapple with the inadequacies of language in the wake of unspeakable violence. We will explore how postwar experimentation intensifies modernist innovations that were already underway, and the ways in which these texts perhaps reflect an unprecedented historical breach. The postwar period sees a number of philosophers who champion the ambiguity of literature as socially or morally salutary, and write in an increasingly expressive prose. Yet many literary works thematize their own limits and begin to adopt philosophical and political terminology. Why and how do the boundaries that typically distinguish literary genre, and literature and thought, break down at this particular point in the 20th century? How does art--and the reformulation of language and genre--play a role in healing, mourning, or changing society in the aftermath of mass death? An analogous question will be: how do these texts, written amid European crises of roughly a century ago, speak to us in our contemporary moment of crisis and upheaval? Readings will include works by Koeppen, Brecht, Beckett, Heidegger, Adorno, Ausländer, Celan, Bachmann, and Domin

**CLGR GU4241 Literature and Money. 3.00 points.**

Money in its multiple forms has received renewed attention in recent decades, especially since the financial crises in 2008 and the emergence of new cryptocurrencies. Money has been described as a means of exchange, a store of value, a measure of debt, a commodity, a social institution, or a tool in the formation of identity. In all of these instances, money fuses economic purposes with social and cultural practices. Exploring the intersections between economics and aesthetics, this course will juxtapose some of the most influential theories of money from Adam Smith to the present with contemporaneous literary texts that reflect on various aspects of money in their poetics on a thematic or formal level. Literary texts include Shakespeare, Goethe, Balzac, Zola, Thomas Mann, and Martin Amis

## COMPARATIVE LITERATURE- YIDDISH

### CLYD UN3500 READINGS IN JEWISH LITERATURE.

**3.00 points.**

As an onset of an ongoing investigation into the history and development of Jewish literature, we will focus on its very beginnings, as culturally understood – the Book of Genesis – and read it in light of millennia of Jewish literary commentary as lenses through which to examine currents, traditions, and trajectories of Jewish literary interpretation and history. By focusing on several distinct episodes and then tracking those episodes' reception in the light of differing moments of interpretation, we will try to gain a sense of this seminal work's changing role in Jewish history and culture. Familiarity with Biblical and rabbinic Hebrew not absolutely required, but strongly recommended

**Spring 2025: CLYD UN3500**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLYD 3500	001/17221	T 2:10pm - 4:00pm 516 Hamilton Hall	Jeremy Dauber	3.00	11/25

### CLYD GU4250 Memory and Trauma in Yiddish Literature (in English). 3 points.

Trauma has become a defining aspect of the modern Jewish experience, while the recently emerged memory studies shed a new light on how we remember the past, and understand memory. As Cathy Caruth observes in *Trauma: Explorations of Memory* (1995), "The traumatized, we might say, carry an impossible history within them, or they become themselves the symptom of a history that they cannot entirely possess." This course examines how memory, especially memory of trauma, is explored in Yiddish literature, film, and beyond. It focuses predominantly on the works relating to the Holocaust and its impact on the first, second, and third generations, but it also engages with other kinds of memory and other kinds of trauma (pogroms, Chmielnitsky massacres, loss, death, etc.). It approaches the questions of memory and trauma from the perspective of gender, body, and identity, as well as postmemory. The course aims for students to discuss and critically engage with the works listed on the syllabus, in order to develop the skills of analytical, and abstract thinking, as well as the ability to express that critical thinking in writing. Texts will be offered in English translation, no knowledge of Yiddish required.

## DUTCH

### DTCH UN1101 ELEMENTARY DUTCH I. 4.00 points.

Fundamentals of grammar, reading, speaking, and comprehension of the spoken language. During the spring term supplementary reading is selected according to students' needs

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

## FINNISH

#### FINN UN2101 INTERMEDIATE FINNISH I. 4.00 points.

Prerequisites: *FINN W1101-W1102* or the instructor's permission.

Prerequisites: FINN UN1101-UN1102 or the instructor's permission. Continued practice in aural comprehension, reading, speaking, and writing; review and refinement of grammatical structures; vocabulary building. Readings include Finnish fiction and nonfiction

#### FINN UN2102 INTERMEDIATE FINNISH II. 4.00 points.

Prerequisites: *FINN W1101-W1102* or the instructor's permission.

Prerequisites: FINN UN1101-UN1102 or the instructors permission. Continued practice in aural comprehension, reading, speaking, and writing; review and refinement of grammatical structures; vocabulary building. Readings include Finnish fiction and nonfiction

## GERMAN

#### GERM UN1101 ELEMENTARY GERMAN I. 4.00 points.

Prerequisites: No prior German. German 1101 is a communicative language course for beginners, taught in German, in which students develop the four skills -listening, speaking, reading, and writing- and a basic understanding of German-speaking cultures. Emphasis is placed on acquiring the four language skills within a cultural context. Upon

successful completion of the course, students will be able to understand, speak, read, and write German at a level enabling them to communicate with native speakers and provide basic information about their background, family, daily activities, student life, work, and living quarters. Completion of daily assignments, which align with class content, and consistent work are necessary in order to achieve basic communicative proficiency. If you have prior German, the placement exam is required

#### GERM UN1102 ELEMENTARY GERMAN II. 4.00 points.

Prerequisites: GERM UN1101 *GERM V1101* or the equivalent.

Prerequisites: GERM UN1101 or the equivalent. If you have prior German outside of Columbia's language sequence, the placement exam is required. German 1102 is the continuation of Elementary German I (1101). It is a four-skill language course taught in German, in which students continue to develop listening, speaking, reading, and writing skills in German and an understanding of German-speaking cultures. Emphasis is placed on acquiring the four language skills--listening, speaking, reading and writing--within a cultural context. Students expand their communication skills to include travel, storytelling, personal well-being, basic economics, recent historical events, and working with movie segments. Completion of daily assignments, which align with class

content, and consistent work are necessary in order to achieve basic communicative proficiency.

**GERM UN2101 INTERMEDIATE GERMAN I. 4.00 points.**  
Prerequisites: GERM UN1102 GERM V1102 or the equivalent.

Prerequisites: GERM UN2101 or the equivalent. If you have prior German outside of Columbia's language sequence, the placement exam is required. Intermediate German UN2102 is conducted entirely in German and emphasizes the four basic language skills, cultural awareness, and critical thinking. A wide range of topics (from politics and poetry to art) as well as authentic materials (texts, film, art, etc.) are used to improve the 4 skill. Practice in conversation aims at enlarging the vocabulary necessary for daily communication. Grammar is practiced in the context of the topics. Learning and evaluation are individualized (individual vocabulary lists, essays, oral presentations, final portfolio) and project-based (group work and final group project)

**GERM UN2521 INTERMEDIATE CONVERSATION I. 2.00 points.**

Corequisites: GERM UN1201

Prerequisites: Completion of GERM UN1101 and UN1102 or the equivalent This 2-point conversation group is designed for students who are now taking Intermediate German UN2101 or who wish to maintain their spoken German at least at the advanced intermediate level. The course is designed to improve your ability to speak and understand and manage German in everyday situations; to provide opportunities to participate in conversational situations on any topics you are interested in; to strengthen and acquire skills to understand German spoken at normal conversational speed; to expand active and passive vocabularies speaking skills; and to maintain a certain level of written German through short written activities. This course does not count towards the language requirement

**GERM UN3001 ADVANCED GERMAN I. 3.00 points.**

Prerequisites: *GERM V1202* or the director of undergraduate studies' permission.

Prerequisites: *GERM UN2102*. If you have prior German outside of Columbia's language sequence, the placement exam is required. Note: UN3001 and UN3002 are not sequential. German UN3001 is an ambitious socio-cultural exploration of Berlin. Designed to follow up the language skills acquired in first- and second-year language courses (or the equivalent thereof), this course gives students greater proficiency in speaking, reading, and writing German while focusing on topics from German society today through various German media, such as internet, film, and literature through the lens of Germany's capital, Berlin. Topics discussed include: cultural diversity in Berlin's multi-cultural neighborhoods; questioning and reflecting upon Berlin's recent past; developing your own Berlin experience and presenting your interests in various forms, such as presentations, an essay, your CV, an application letter and interview for an internship in Berlin. The course represents a gateway class to literature courses and counts towards the major and concentration in German. Taught in German

Fall 2024: **GERM UN3001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GERM 3001	001/11738	M W 11:40am - 12:55pm 313 Hamilton Hall	Jutta Schmiers-Heller	3.00	13/15

**GERM UN3333 INTRO TO GERMAN LIT (GERMAN). 3.00 points.**

Prerequisites: *GERM V1202* or the equivalent.

Prerequisites: *GERM UN2102* or the equivalent. Examines short literary texts and various methodological approaches to interpreting such texts in order to establish a basic familiarity with the study of German literature and culture

Fall 2024: **GERM UN3333**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GERM 3333	001/11739	M W 10:10am - 11:25am 318 Hamilton Hall	Stefan Andriopoulos	3.00	7/25

**GERM UN3444 SURVEY OF GERMAN LIT:20C (GER). 3.00 points.**

Prerequisites: *GERM W3333* or *W3334* or the director of undergraduate studies' or the instructor's permission.

. This course examines modernist literature, art, and music in the early twentieth century. In close readings, students will focus on the essential works from this period and learn to situate them in their historical contexts and the urban settings in which they were conceived: Munich, Prague, Vienna, and Berlin. The analysis of modernist works will be framed with introductions to questions of language, gender and sexuality, anti-Semitism, and the emergence of fascism. Authors include Arthur Schnitzler, Frank Wedekind, Robert Musil, Franz Kafka, Thomas Mann, Irmgard Keun, Bertolt Brecht, Alfred Döblin,

and Walter Benjamin; musical works by Berg, Schoenberg, and Weill. The course is taught in German

**SWEDISH****SWED UN2101 Intermediate Swedish I. 3 points.**

The goal of this course is to further develop the speaking, reading, writing, and listening skills you have acquired in the first year Swedish courses and broaden your knowledge about the Swedish culture and history. Topics emphasize contemporary Swedish life and cross-cultural awareness. In addition to the main text, newspaper articles, shorter literary texts, film, and internet resources will be used. Class will be conducted almost exclusively in Swedish. To succeed in this course, you must actively participate. You will be expected to attend class regularly, prepare for class daily, and speak as much Swedish as possible. Methodology The class will be taught in a communicative way. It will be conducted primarily, but not exclusively in Swedish. In-class activities and homework assignments will focus on improving and developing speaking, reading, writing, listening skills, and deepening the students' understanding of Swedish culture through interaction and exposure to a broad range of authentic materials.

**YIDDISH****YIDD UN1101 ELEMENTARY YIDDISH I. 4.00 points.**

This course offers an introduction to the language that has been spoken by the Ashkenazi Jews for more than a millennium, and an opportunity to discover a fabulous world of Yiddish literature, language and culture in a fun way. Using games, new media, and music, we will learn how to speak, read, listen and write in a language that is considered one of the richest languages in the world (in some aspects of vocabulary). We will also venture outside the classroom to explore the Yiddish world today: through field trips to Yiddish theater, Yiddish-speaking neighborhoods, Yiddish organizations, such as YIVO or Yiddish farm, and so on. We will also have Yiddish-speaking guests and do a few digital projects. At the end of the two-semester course, you will be able to converse in Yiddish on a variety of everyday topics and read most Yiddish literary and non-literary texts. Welcome to Yiddishland!

Fall 2024: **YIDD UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
YIDD 1101	001/12835	M W 4:10pm - 6:00pm 316 Hamilton Hall	Joshua Beirich	4.00	8/15

**YIDD UN1102 ELEMENTARY YIDDISH II. 4.00 points.**

This course offers an introduction to the language that has been spoken by the Ashkenazi Jews for more than a millennium, and an opportunity to discover a fabulous world of Yiddish literature, language and culture in a fun way. Using games, new media, and music, we will learn how to speak, read, listen and write in a language that is considered one of the richest languages in the world (in some aspects of vocabulary). **YIDD UN2101 INTERMEDIATE YIDDISH I. 4.00 points.**

Prerequisites: *YIDD W1101-W1102* or the instructor's permission.

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission. This year-long course is a continuation of Elementary Yiddish II. As part of the New Media in Jewish Studies Collaborative, this class will be using new media in order to explore and research the fabulous world of Yiddish literature, language, and culture, and to engage in project-oriented activities that will result in creating lasting multi-media online presentations. In addition to expanding the command of the language that has been spoken by the Ashkenazi Jews for more than a millennium, i.e. focusing on developing speaking, reading, writing and listening skills, and on the acquisition of more advanced grammatical concepts, students will also get some video and film editing training, and tutorials on archival research. The class will continue to read works of Yiddish literature in the original and will venture outside of the classroom to explore the Yiddish world today: through exciting field trips to Yiddish theater, Yiddish-speaking neighborhoods, YIVO, Yiddish Farm, and so on. And we will also have the Yiddish native-speaker guest series. Welcome back to Yiddishland!

Office contact: 212-854-4646, [history@columbia.edu](mailto:history@columbia.edu)

Director of Undergraduate Studies: Prof. Paul Chamberlin / [dus-history@columbia.edu](mailto:dus-history@columbia.edu)

Undergraduate Administrator: Michael Adan / [undergraduate-history@columbia.edu](mailto:undergraduate-history@columbia.edu)

### THE STUDY OF HISTORY

The History undergraduate curriculum covers most areas of the world and most periods of history. Our courses explore various methodologies, a wide range of ways of writing history,

and different approaches to the past. We emphasize no one approach to history and insist upon no single interpretive model. Thinking historically is an analytical skill of increasing value in an epoch dominated by short-term perspectives.

The History Department offers a major, concentration, and minor in history. Each degree enables students to achieve a deeper and broader knowledge of a particular field of history, while also developing the kinds of analytical and writing skills important in many areas of life. The heart of the undergraduate major is the senior thesis seminar, a small-group course in which students work closely with an individual faculty member on some subject. Undergraduate majors are not required to write a senior thesis, however in order to receive departmental honors a senior thesis must be completed. Each year the department offers 3 to 4 sections of Senior Thesis Seminar and students have the flexibility to work on any subject that they choose.

## STUDENT ADVISING

### Consulting Advisers

The History Department does not assign individual advisors providing the Undergraduate Education Committee (UNDED) for student advising. The UNDED, which consists of full-time faculty members, are ready to help undergraduates understand degree requirements, choose a specialization, guide students toward appropriate courses, and simply discuss students' experiences. Students may see any member of UNDED for advising concerns. UNDED advisors also approve a History student's Plan of Study, which serves as the course plan for students and lists the courses required to earn a History degree.

UNDED advisors hold office hours during the fall and spring terms and membership of UNDED changes from year to year, therefore please consult the department's website for an up-to-date roster. History students are strongly encouraged to meet with an UNDED advisor at least twice, during the fall of their junior year and the fall of their senior year.

The undergraduate open house is held in February of each academic year. It serves as an opportunity for students to learn more about the History program from the DUS, UA, current students, and alumni.

### Enrolling in Classes

History courses fall into two types, lectures and seminars. Though almost all of these courses do not require placement exams, some seminars might require an application to join.

LECTURES meet twice a week for 1 hour and 15 minutes each session and have additional required discussion sections that meet once a week. Lectures range from the very large (over 300 students) to the very small (fewer than 25). Most lecture courses require a midterm and a final examination; many also require written assignments and final papers. For identification

purposes, history lectures are numbered at the 1000 or 2000 level (exceptions exist for courses taught in the summer, which are sometimes listed at the 3000 level).

SEMINARS are smaller, more intensive courses that explore focused topics through concentrated reading in secondary literature, primary-source research, or both. They meet once a week for 1 hour and 50 minutes. The workload for seminars is generally heavier than for lectures, with more reading and more written work. Seminars normally do not have a final examination but often require a substantial paper. In many cases, admission to a seminar requires approval from the instructor and can include an application. History seminars are numbered at the 3000-level (all undergraduate) or 4000-level (undergraduate and graduate). Some summer courses listed at the 3000 level may be lectures and do not qualify as seminars.

### Preparing for Graduate Study

TBA

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

Advanced Placement courses from High School or British A-levels do not count as History courses or towards the major, concentration, or minor.

### Barnard College Courses

Barnard College courses offered through the Barnard History Department are eligible to count towards the Columbia History major, concentration, or minor.

### Transfer Courses

The History department allows up to 3 courses outside of Columbia University to count towards the major (up to 2 for concentrators and minors), to which no more than 2 may be applied toward the specialization. These courses consist of transfer courses and/or study abroad courses.

Transfer courses taken at an accredited college in the United States must first be evaluated and approved by a student's home school before consideration to count towards the History major, concentration or minor. Students who wish to apply transfer courses to the major, concentration or minor should submit a transfer credit request to the History Department ([undergraduate-history@columbia.edu](mailto:undergraduate-history@columbia.edu)).

To submit a transfer credit request with the History Department, students must submit an application that includes the following:

- Completed departmental transfer credit form
- Transcript from course institution showing course grade

- Course syllabi
- Current Plan of Study
- An official Columbia PDF transcript is required for students that have not officially declared History as their major or concentration.
- Available coursework from the courses, such as papers or exams (for courses outside the United States)

Transfer credit request from and details can be found on the History Departments transfer credit page [here](#).

## Study Abroad Courses

The History department allows up to 3 courses outside of Columbia University to count towards the major (up to 2 for concentrators and minors), to which no more than 2 may be applied toward the specialization. These courses consist of transfer courses and/or study abroad courses.

History majors, concentrators and minors may choose to study abroad as part of their undergraduate education. This is typically done during the junior year for one term. A period of study overseas offers history students excellent opportunities to develop language skills as well as begin research projects that may be developed into a senior thesis. Members of UNDED will be happy to discuss with students their plans and how they fit both intellectual goals and program requirements. Please note that courses are formally approved by the department only after you have returned and a transfer credit request has been submitted. Students who wish to apply study abroad courses to the major, concentration or minor should submit a transfer credit request to the History Department (undergraduate-history@columbia.edu).

To submit a transfer credit request with the History Department, students must submit an application that includes the following:

- Completed departmental transfer credit form
- Transcript from course institution showing course grade
- Course syllabi
- Current Plan of Study
- An official Columbia PDF transcript is required for students that have not officially declared History as their major or concentration.
- Available coursework from the courses, such as papers or exams (for courses outside the United States)

Transfer credit request from and details can be found on the History Departments transfer credit page [here](#).

## Summer Courses

History (HIST) summer courses taken through the School of Professional Studies are eligible to count towards the major, concentration, or minor.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

History students are encouraged to strengthen their analytical and writing skills which can be achieved through seminars. History seminars explore focused topics through concentrated reading in secondary literature, primary-source research, or both. The workload for seminars is generally heavier than lectures with more reading and more written work. Seminars normally do not have a final examination but often require a substantial paper. It is recommended that students begin taking seminars their second year and at the 3000-level. Seminars at the 4000-level consist of both undergraduate and graduate students.

Some seminars have prerequisites, which are noted in the directory course listing. In many cases, students must receive permission from the instructor prior to registering for a seminar.

### Senior Thesis Coursework and Requirements

History majors have the option of writing a senior thesis over one or two terms. This process involves original research, normally with extensive use of primary materials. The department encourages students with a strong interest in a particular subject to consider a thesis and strongly advises all students considering an academic career to write one.

Students are advised to begin thinking about whether they wish to write a thesis, and about possible topics by the start of junior year. Applications to join the year-long Senior Thesis Seminar are due during the spring semester of a student's junior year. Students writing a senior thesis must take at least 1 HIST seminar by the fall of their senior year.

Alternatively, students who wish to work with a member of the department on an individual basis may register for a one or two-term independent senior thesis section for 2-4 credits per term. Students who pursue this option should identify an appropriate supervisor (History Department faculty member) and submit a short proposal, approved by the supervisor, to the History Department before the beginning of the thesis term. Independent theses cannot be considered for honors and prizes consideration.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

The Undergraduate Education Committee (UNDED) awards departmental honors on the basis of a high major grade point average (at least 3.6) as well as an excellent senior thesis. Students must also have an overall GPA of at least 3.6. The committee takes into account the depth and breadth of the

program of study for each honors candidate. Normally, no more than 10% of graduating majors receive Departmental Honors.

## Academic Prizes

Senior Thesis Seminar writers have the opportunity to submit their thesis for prizes given by the History Department, the College, and General Studies. Prizes not administered by the department are also available and details can be found through your school's academic affairs office.

## OTHER IMPORTANT INFORMATION

## ON LEAVE

**Fall 2024:** Blackmar, Chauncey, Elshakry, Evtuhov, Jacoby, Kreitman, Lightfoot, Lurie, Mazurek, Ngai, Pedersen, Rao, Robcis, Senocak, Stafford, Stephanson, Witgen, Zelin,

**Spring 2025:** Blackmar, Elshakry, Evtuhov, Jacoby, Kobrin, Kreitman, Lightfoot, Lurie, Naylor, Ngai, Pedersen, Robcis, Senocak, Stafford, Stephanson, Witgen

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE HISTORY DEPARTMENT

### Program Planning for all Students Course Numbering Structure

History courses are typically offered as a lecture or a seminar.

Lectures meet twice a week for 1 hour and 15 minutes each session and have additional required discussion sections that meet once a week and are numbered at the 1000-level and 2000-level below:

- UN 1xxx - Introductory Survey Lectures
- UN 2xxx - Undergraduate Lectures

Seminars are smaller, more intensive courses that explore focused topics through concentrated reading in secondary literature, primary-source research, or both. The workload for seminars is generally heavier than for lectures, with more reading and more written work often requiring a substantial paper. Seminars are numbered at the 3000-level and 4000-level below:

- UN 3xxx - Undergraduate Seminars
- GU 4xxx - Joint Undergraduate/Graduate Seminars

History subject fields are numbered below (with some exceptions):

- x000-x059: Ancient
- x060-x099: Medieval
- x100-x199: Early modern Europe
- x200-x299: East Central Europe
- x300-x399: Modern Western Europe
- x400-x599: United States
- x600-x659: Jewish
- x660-x699: Latin America
- x700-x759: Middle East
- x760-x799: Africa
- x800-x859: South Asia
- x860-x899: East Asia
- x900-x999: Research, historiography, and transnational

### Guidance for First-Year Students

Students interested in a History degree should first take a look at the department's [Undergraduate Handbook](#) which details the requirements of the major, concentrator, and minor in History.

In regards to courses and where to begin, the History curriculum does not have a set course plan or “one size fits all”

for History students. Every major, concentrator, and minor will have the opportunity to choose a field to specialize in to which their course plan will be created on a Plan of Study based on that specialization.

What is recommended to all first-year students interested in history is to begin with a lecture at the 1000 or 2000 level that captures their interest. From there they proceed to a seminar related to that initial lecture and/or more lectures as they begin building History courses for their Plan of Study.

## Guidance for Transfer Students

Students transferring into Columbia should first take a look at the department's [Undergraduate Handbook](#) which details the requirements of the major, concentrator, and minor in History.

After familiarizing themselves with the History program, transfer students should consider submitting a transfer credit request for history courses taken at their previous institution. In addition, transfer students should meet with an Undergraduate Education Committee (UNDED) advisor to go over and create a Plan of Study to set a course plan in place.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

All History students are required to choose and complete a “specialization”. The specialization is a set of courses on a specific field, theme, or subject. In most cases, the regional specialization must be bound by a time period; for example, “20th Century U.S. History” as opposed to just “U.S. History”.

To determine which History courses fulfill a specialization, students should consult an Undergraduate Education Committee (UNDED) advisor.

Students interested in a thematic specialization (e.g. Environmental History) should consult an Undergraduate Education Committee (UNDED) advisor.

All program course plans are organized through a student's Plan of Study, which is approved by an UNDED advisor.

### Major in History

The History major is an opportunity for students to pursue their intellectual interests, whether in a specific or multiple fields in history. Students will establish an understanding of various methodologies and approaches to reading and writing history and also acquire skills such as critical thinking, research and analysis, synthesizing large amounts of information, and writing.

The total number of History courses required to complete the major is 9, most of which will be 4-points, and are created through a student's Plan of Study. Courses eligible to count toward the major are below:

- Courses in the History Departments of both Columbia and Barnard (HIST and HIST BC)
- Cross-Listed courses for a specific term (found in the Columbia College Bulletin)
- Transfer courses accepted through a transfer credit request.
- Graduate courses taught by History Department faculty

With advice and approval from the Undergraduate Education Committee (UNDED), students will create a Plan of Study, which serves as the course plan for their degree.

As mentioned, the History major requires 9 total courses listed on a Plan of Study approved by an UNDED advisor. The Plan of Study courses breakdown is below:

**SPECIALIZATION COURSES** are courses directly related to a student's chosen specialization. (4 specialization courses required)

**BREADTH COURSES** are courses taken outside of a student's specialization. They are broken down into two categories: time and space.

- Removed in Time: course covering a time period far removed from their specialization. (1 removed-in-time course required)
- Removed in Space: courses in regions removed from their chosen specialization. (2 removed-in-space courses required)

**ADDITIONAL HISTORY COURSES.** These courses are History courses that do not have to fit a specific requirement. (2 additional courses required)

**SEMINAR REQUIREMENT.** Of the 9 courses, at least 2 of them must be History seminars, with at least one of them being a seminar in specialization.

### Minor in History

The History minor serves as an introduction to the discipline affording students from other programs the opportunity to pursue their intellectual interests, whether in a specific or multiple fields. Through the minor students will establish an understanding of various methodologies and approaches to

reading and writing history. Through the courses taken within History minor students will also acquire skills such as critical thinking, research and analysis, synthesizing large amounts of information, and writing.

The total number of History courses required to complete the minor is 5, most of which will be 4-points. Courses eligible to count toward the minor are below:

- Courses in the History Departments of both Columbia and Barnard (HIST and HIST BC)
- Cross-Listed courses for a specific term (found in the Columbia College Bulletin)
- Graduate courses taught by History Department faculty

With advice and approval from the Undergraduate Education Committee (UNDED), students will create a Plan of Study, which serves as the course plan for their degree.

As mentioned, the History minor requires 5 total courses listed on a Plan of Study approved by an UNDED advisor. The Plan of Study courses breakdown is below:

**SPECIALIZATION COURSES** are courses directly related to a student's chosen specialization. (2 specialization courses required)

**ADDITIONAL HISTORY COURSES.** These courses are History courses that do not have to fit a specific requirement. (3 additional courses required)

**BREADTH REQUIREMENT.** Of the 5 courses, at least 1 of them must be a course taken pre-1500 or post-1500.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in History

The History concentration offers an opportunity to students from other programs the opportunity to pursue their intellectual interests, whether in a specific or multiple fields in history. Through the concentration students will establish an understanding of various methodologies and approaches to reading and writing history. Through the courses taken within History concentration students will also acquire skills such as critical thinking, research and analysis, synthesizing large amounts of information, and writing.

The total number of History courses required to complete the minor is 6, most of which will be 4-points. Courses eligible to count toward the minor are below:

- Courses in the History Departments of both Columbia and Barnard (HIST and HIST BC)
- Cross-Listed courses for a specific term (found in the Columbia College Bulletin)
- Transfer courses accepted through a transfer credit request.
- Graduate courses taught by History Department faculty

With advice and approval from the Undergraduate Education Committee (UNDED), students will create a Plan of Study, which serves as the course plan for their degree.

As mentioned, the History concentration requires 6 total courses listed on a Plan of Study approved by an UNDED advisor. The Plan of Study courses breakdown is below:

**SPECIALIZATION COURSES** are courses directly related to a student's chosen specialization. (3 specialization courses required)

**BREADTH COURSES** are courses taken outside of a student's specialization. They are broken down into two categories: time and space.

- Removed in Time: course covering a time period far removed from their specialization. (1 removed-in-time course required)
- Removed in Space: courses in regions removed from their chosen specialization. (1 removed-in-space course required)

**ADDITIONAL HISTORY COURSES.** The sixth course required for a History concentration does not have to fit a specific requirement. (1 additional courses required)

## FALL 2024 HISTORY COURSES

**HIST UN1002 Ancient History of the Middle East. 4.00 points.**

The purpose of this course is to introduce you to the ancient histories of the region in western Asia that is today called the Middle East. There we find the earliest cultures in world history documented with an abundance of sources, including numerous written texts, which allows us to study the first attestations of many elements of life we take for granted, such as writing, cities, laws, empires, and much more. The course aims to provide you with a knowledge of the most important empirical data about these histories and to confront you the impact some of the developments made on human life as well as the difficulties we confront trying to study them

**Fall 2024: HIST UN1002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 1002	001/10335	T Th 4:10pm - 5:25pm 703 Hamilton Hall	Marc Van De Mierop	4.00	20/35

**HIST UN1010 ANCIENT GREEK HIST, 800-146 BC. 4.00 points.**

A review of the history of the Greek world from the beginnings of Greek archaic culture around 800 B.C. through the classical and hellenistic periods to the definitive Roman conquest in 146 B.C. with concentration on political history, but attention also to social and cultural developments. Field(s): ANC

**Fall 2024: HIST UN1010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 1010	001/10331	T Th 11:40am - 12:55pm 602 Hamilton Hall	Richard Billows	4.00	48/70

**HIST UN1071 History of Christianity from the Origins to the Reformation. 4.00 points.**

Christianity is a one-semester introduction to the history of classical forms of Christianity, The Church and society in western Europe from its origins to the 16th century Reformation, with emphasis on Western developments (early Christianity, persecutions, heresies, monasticism, Crusades, popular piety, cults of saints, mendicants, universities, civic religion, mysticism, papal authority, Pre-reformation and Reformation), including its interactive dimensions with Islam, Judaism, distant Eastern worlds, and Global contexts

**Fall 2024: HIST UN1071**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 1071	001/14937	T Th 11:40am - 12:55pm 333 Uris Hall	Benedicte Sere	4.00	26/35
HIST 1071	AU1/21223	T Th 11:40am - 12:55pm Othr Other	Benedicte Sere	4.00	4/4

**HIST BC1401 INTRODUCTION TO AMERICAN HISTORY TO 1865. 4.00 points.**

Themes include Native and colonial cultures and politics, the evolution of American political and economic institutions, relationships between religious and social movements, and connecting ideologies of race and gender with larger processes such as enslavement, dispossession, and industrialization

**Fall 2024: HIST BC1401**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 1401	001/00025	M W 2:40pm - 3:55pm 323 Milbank Hall	Andrew Lipman	4.00	45/70

**HIST UN1786 History of the City in Latin America. 4.00 points.**

This course covers the historical development of cities in Latin America. Readings, lectures, and discussion sections will examine the concentration of people in commercial and political centers from the beginnings of European colonization in the fifteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; changing power dynamics in modern

Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; planned versus unplanned cities and the rise of informal economies; the way changing legal and political rights regimes have affected urban life; and the constant tension between tradition and progress through which urban society was formed. There are no prerequisites for this course. Attendance at weekly Discussion Sections required

**Fall 2024: HIST UN1786**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 1786	001/10362	M W 10:10am - 11:25am 602 Hamilton Hall	Amy Chazkel	4.00	32/70
HIST 1786	AU1/20952	M W 10:10am - 11:25am Othr Other	Amy Chazkel	4.00	5/5

**HIST BC2101 HISTORY OF CAPITALISM. 3.00 points.**

The aim of this course is to provide students with analytical tools to think critically and historically about the concept of capitalism. By studying how philosophers, economists, and political theorists have defined and described the concept of capitalism throughout its history, students will be provided with a set of terminologies and analytical frameworks that enable them to interrogate the various dimensions of capitalism

**Fall 2024: HIST BC2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 2101	001/00191	T Th 4:10pm - 5:25pm LI002 Milstein Center	Carl Wennerlind	3.00	73/90

**HIST UN2305 WAR IN GERMANY 1618-2018. 4.00 points.**

For much of modern history Germany was Europe's battlefield. Its soldiers wrote themselves into the annals of military history. But it was also a place where war was discussed, conceptualized and criticized with unparalleled vigor. Nowhere did the extreme violence of the seventeenth century and the early twentieth century leave a deeper mark than on Germany. Today, as we enter the twenty-first century, Germany is the nation that has perhaps come closest to drawing a final, concluding line under its military history. This course will chart the rise and fall of modern militarism in Germany. For those interested in military history per se, this course will not hold back from discussing battles, soldiers and weapons. But it will also offer an introduction to German history more generally. And through the German example we will address questions in political philosophy that haunted modern European history and continue to haunt America today. How is state violence justified? How can it be regulated and controlled? What is its future?

**Fall 2024: HIST UN2305**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 2305	001/11267	M W 2:40pm - 3:55pm	Adam Tooze	4.00	55/70

Cin Alfred Lerner  
Hall

### **HIST BC2321 COLONIAL ENCOUNTERS. 3.00 points.**

Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism

### **HIST BC2401 PLTCS CRIME# POLICING IN U.S.. 3.00 points.**

This course will examine the historical development of crime and the criminal justice system in the United States since the Civil War. The course will give particular focus to the interactions between conceptions of crime, normalcy and deviance, and the broader social and political context of policy making

#### **Fall 2024: HIST BC2401**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 2401	001/00027	M W 6:10pm - 7:25pm LI002 Milstein Center	Matthew Vaz	3.00	66/60

### **HIST BC2413 UNITED STATES 1940-1975. 3.00 points.**

Emphasis on foreign policies as they pertain to the Second World War, the atomic bomb, containment, the Cold War, Korea, and Vietnam. Also considers major social and intellectual trends, including the Civil Rights movement, the counterculture, feminism, Watergate, and the recession of the 1970s

#### **Fall 2024: HIST BC2413**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 2413	001/00028	M W 11:40am - 12:55pm 408 Zankel	Mark Carnes	3.00	130/150
HIST 2413	AU1/18644	M W 11:40am - 12:55pm Othr Other	Mark Carnes	3.00	21/18

### **HIST BC2385 Global Environmental History. 3.00 points.**

This class introduces students to the field of environmental history from a global perspective. Environmental history is the study of the relationship between nature and society over time. It deals with the material environment, cultural and scientific understandings of nature, and the politics of socio-economic use of natural resources. The class combines the study of classic texts that were foundational to the field with modern case studies from all over the world. It addresses questions of global relevance, such as: how did the environment shape human history? How did humans shape the natural environment? How are power relations of class, race and gender embedded in the environment we live in? The class welcomes students from the natural and social sciences, as well as the humanities. The goal of the course is to understand how the relationship between environment and society in history led to the current climate crisis

### **HIST UN2432 U.S. ERA OF CIVIL WAR # RECON. 4.00 points.**

It is difficult to exaggerate the significance of the American Civil War as an event in the making of the modern United States and, indeed, of the western world. Indeed the American Civil War and Reconstruction introduced a whole series of dilemmas that are still with us. What is the legacy of slavery in U.S. history and contemporary life? What is the proper balance of power between the states and the central government? Who is entitled to citizenship in the United States? What do freedom and equality mean in concrete terms? This course surveys the history of the Civil War and Reconstruction in all of its aspects. It focuses on the causes of the war in the divergent development of northern and southern states; the prosecution of the war and all that it involved, including the process of slave emancipation; and the contentious process of reconstructing the re-united states in the aftermath of Union victory. The course includes the military history of the conflict, but ranges far beyond it to take the measure of the social and political changes the war unleashed. It focuses on the Confederacy as well as the Union, on women as well as men, and on enslaved black people as well as free white people. It takes the measure of large scale historical change while trying to grasp the experience of those human beings who lived through it

### **HIST UN2523 HEALTH INEQUALITY: MODERN US. 4.00 points.**

Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/

racial/sexual formations, technological networks, and health politics since the turn of the twentieth century. Topics to be examined will include, but will not be limited to, black women's health organization and care; HIV/AIDS politics, policy, and community response; benign neglect; urban renewal and gentrification; medical abuses and the legacy of Tuskegee; tuberculosis control; and environmental justice. There are no required qualifications for enrollment, although students will find the material more accessible if they have had previous coursework experience in United States history, pre-health professional (pre-med, pre-nursing, or pre-public health), African-American Studies, Women and Gender Studies, Ethnic Studies, or American Studies

**HIST UN2587 SPORT#SOCIETY IN THE AMERICAS. 4.00 points.**

This course explores the ways organized sport constitutes and disrupts dominant understandings of nation, race, gender, and sexuality throughout the Americas. Working from the notion that sport is “more than a game,” the class will examine the social, cultural and political impact of sports in a variety of hemispheric American contexts from the 19th century until the present. While our primary geographic focus will be the United States, Brazil, and the Caribbean, the thrust of the course encourages students to consider sports in local, national, and transnational contexts. The guiding questions of the course are: What is the relationship between sport and society? How does sport inform political transformations within and across national borders? How does sport reinforce and/or challenge social hierarchies? Can sport provide alternative visions of the self and community? Throughout the semester we will examine such topics as: the continuing political struggles surrounding the staging of mega-events such as the Olympics and World Cup, the role of professional baseball in the rise and fall of Jim Crow segregation, the impact of football on the evolution of masculine identities in the U.S., the impact of tennis on the Second-Wave feminist movement, and the role of sports in the growth of modern American cities. Course materials include works by historians, sociologists, social theorists, and journalists who have also been key contributors to the burgeoning field of sports studies. Thus, the course has three objectives: 1) To deepen our understanding of the relationship between sport and society 2) To encourage students to examine the sporting world beyond the frame of the nation-state 3) To

consider the promises and challenges of sport as a site of social theory and knowledge production

**HIST UN2660 LATIN AMERICAN CIVILIZATION I. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course aims to give a portrait of the development of Latin America from the first contact with the Europeans to the creation of independent states. We will focus on society and interaction among the various ethnic and socio-economic groups at the level of daily life. For each class, students will have to read sections of a core text as well as a primary source, or document, from the period; before the end of every class there will be 15 minutes to discuss the document together. In addition, students will enroll in discussion sections held by TAs

**HIST UN2671 The Cold War in Latin America. 4.00 points.**

This lecture offers a comprehensive view of the Cold War in Latin America and zooms in on those places and moments when it turned hot. It understands the Cold War as a complex and multi-layered conflict, which not only pitted two superpowers—the United States and the Soviet Union—against one another, but also two ideologies—capitalism and socialism—whose appeal cut across societies. In Latin America, the idea of socialist revolution attracted a diverse set of actors (workers, students, intellectuals, politicians, etc.) and posed a significant challenge to both capitalism and United States hegemony. We will probe what the Cold War meant to people across the region, paying particular attention to revolutionary and counterrevolutionary events in Guatemala, Cuba, Chile, and Nicaragua, all the while examining the diplomatic and cultural battles for the hearts and minds of Latin Americans

**HSWM UN2761 GENDER # SEXUALITY IN AFRICA. 4.00 points.**

This course examines the history of gender, sexuality and ways of identifying along these lines in Africa from early times through the twentieth century. It asks how gender and sexuality have shaped key historical developments, from African kingdoms and empires to postcolonial states, from colonial conquest to movements for independence, from indigenous healing practices to biomedicine, from slavery to the modern forms of work. It will also explore the history of different sexualities and gender identities on the continent. A key objective is to extend the historical study of gender and sexual identity in Africa beyond 'women's history' to understand gender as encompassing all people in society and their relationships, whether domestic or public.

**HIST UN2851 Making Modern Korea. 4.00 points.**

This course explores Korea's history from the late nineteenth century to the present with a particular focus on caste/class, gender, war and industrialization. Using primary and secondary texts as well as documentary film and literary ephemera, the seminar analyses such topics as the relationship between imperialism and rebellions in the nineteenth century; the uneven experience of Japanese colonial rule; Korea's early feminist movement; how North Korea became a communist society; the deep scars of the Korean War; cultures of industrialism in South and North Korea; counter-cultural movements in 1970s, 1980s and 1990s South Korea; and contemporary challenges

facing the peninsula. This course will give students a thorough grounding in modern Korean history and introduce them to major interpretative currents in the study of Korean history

**HIST UN2972 Unsettling Science. 4.00 points.**

Unsettling Science invites students to do exactly that: ask big questions about science and interrupt preconceived ideas about what science is and who does it. This course is an introductory dive into the interplay between science, technology, health, environment, and society. By offering deep historical and contemporary perspectives, this course equips students with skills essential to critically exploring not only longstanding questions about the world but also urgent issues of our time. Unsettling Science will provide students with the critical and methodological tools to think creatively about local and global challenges and develop interventions. To do so, the course focuses on a series of fundamental questions that underpin the study of science and society from a variety of perspectives

**HIST UN2978 Science and Pseudoscience: Alchemy to AI. 4.00 points.**

During the 2020 US presidential election and the years of the COVID-19 pandemic, science and "scientific truths" were fiercely contested. This course provides a historical perspective on the issues at stake. The course begins with an historical account of how areas of natural knowledge, such as astrology, alchemy, and "natural magic," which were central components of an educated person's view of the world in early modern Europe, became marginalized, while a new philosophy of nature (what we would now call empirical science) came to dominate the discourse of rationality. Historical developments examined in this course out of which this new understanding of nature emerged include the rise of the centralized state, religious reform, and European expansion. The course uses this historical account to show how science and pseudoscience developed in tandem in the period from 1400 to 1800. This historical account equips students to examine contemporary issues of expertise, the social construction of science, pluralism in science, certainty and uncertainty in science, as well as critical engagement with contemporary technologies

**HIST UN3009 Cities and Slavery in the Atlantic World. 4 points.**

Although African slavery in the Americas is most often associated with rural life and agricultural production, cities were crucial sites in the history of slavery. This undergraduate seminar explores the intertwined histories of urbanization and slavery in the Atlantic world from the sixteenth to the twentieth centuries.

Readings and discussions will touch on slavery's impact on such European centers as Nantes, Liverpool, London, and Seville and on African cities but will concentrate on the "New World," eventually coming to focus on the places where slavery lasted long enough to intersect with the beginnings of urban modernity and industrialization: Cuba and especially Brazil. We will end the semester reading and reflecting on the lasting legacies of African slavery in the cities of the Atlantic world after abolition, considering both slavery's memorialization on and erasure from the urban landscape.

**HIST UN3030 IMMIGRATION AND CITIZENSHIP IN AMER HIST. 4.00 points.**

This course explores the meaning of American citizenship in connection with the country's immigration history. Topics include historic pathways to citizenship for migrants; barriers to citizenship including wealth, race, gender, beliefs and documentation; and critical issues such as colonialism, statelessness, dual nationality, and birthright citizenship. We will ask how have people become citizens and under what authority has that citizenship been granted? What are the historic barriers to citizenship and how have they shifted over time? What major questions remain unanswered by Congress and the Supreme Court regarding the rights of migrants to attain and retain American citizenship?

**HIST BC3199 Queer and Trans Histories of Europe since the Middle Ages. 4.00 points.**

This seminar challenges students to consider "queer" and "trans" as categories of both experience and analysis in the historical record. We will first take on the theoretical framing of terms such as "queer" and "trans" and question their meaning and usefulness in a historical context. We will consider how we, as historians, can access the past so often rendered invisible in the archives. The course will also seek to understand dominant narratives of gender and sexuality in various periods and contexts in Europe, and then explore what it looked like when individuals and communities acted in ways that did not align with contemporary expectations

### **HIST BC3379 Water Histories: Society, Environment, and Power in Global History. 4.00 points.**

This class explores the relationship between water and society in history. How did water shape human and environmental histories around the globe? On one hand, oceans and rivers affected the characteristics and resources of different civilizations. Throughout history, every community depended on access to water resources, developed local practices of water management, and produced cultural and scientific understandings of “water.” On the other hand, human attempts at regulating water flows aimed at controlling life itself, as water is essential for life. Hydro-power, before being a renewable source energy, required exerting political power over humans and nature alike. Grounded in the interdisciplinary approach of the environmental humanities, this class will explore the politics of water management thanks to a wide range of case studies. Starting with the first environmental history of the Mediterranean in the early modern period, we will focus on the last two centuries to examine the roots of the current environmental crisis. By following the politics of water flows, the class will introduce students to key themes in global environmental history, such as the role of geography, climate, race, energy, labor, technology, cities, animals, diseases, and empires in the transformation of human societies. Finally, the class provides foundational historical knowledge to understand the importance of water in contemporary debates about environmental justice and climate change

### **HIST UN3507 A Trans History of the United States. 4.00 points.**

This course explores the diversity of gendered experiences across the history of the United States with an emphasis on the individuals, communities, and movements that have

been interpreted as trans. The course has three goals: 1) to offer an in-depth survey of the history of trans and gender nonconforming experiences across the history of the United States; 2) to critically explore the emergence of “transgender” as a social, medical, and historical category, with attention to its assumptions and exclusions; 3) to provide experience with critical interpretation of primary sources documenting gendered lives in the past. Key historical themes include experiences of trans/gender in relation to race and colonialism, labor, migration, medicine, kinship and sexuality, legal and carceral systems, activism, performance, media, and technology. Key historiographical themes include: changing interpretations of gender/sexuality by successive generations of historians, identities such as “trans” as both categories of analysis and objects of historical inquiry themselves, the challenges presented by sources that overlook, misrepresent, or obscure gendered subjectivity, and the political stakes of trans history during times of backlash and hostility towards trans communities. Course meetings include discussion of secondary readings and analysis of primary sources, and in-class activities and assignments emphasize developing skills to identify, analyze, and use a wide range of sources to understand shifting frameworks of gender throughout US history. No prerequisites necessary

### **HIST UN3571 Left and Right in American History. 4.00 points.**

This course examines 20th-century American political movements of the Left and Right. We will cover Socialism and the Ku Klux Klan in the early twentieth century; the Communist Party and right-wing populists of the 1930s; the civil rights movement, black power, and white resistance, 1950s-1960s; the rise of the New Left and the New Right in the 1960s; the Women's liberation movement and the Christian right of the 1970s; and finally, free-market conservatism, neoliberalism, white nationalism and the Trump era. We will explore the organizational, ideological and social history of these political mobilizations. The class explores grass-roots social movements and their relationship to “mainstream” and electoral politics. We will pay special attention to the ways that ideas and mobilizations that are sometimes deemed extreme have in fact helped to shape the broader political spectrum. Throughout the semester, we will reflect on the present political dilemmas of our country in light of the history that we study

### **HIST UN3712 African Climate and History. 4.00 points.**

This course examines how Africa's climate has changed in the past and with what consequences for the people living on the continent. It looks at the scope, duration and intensity of past climate events and their impacts, while using these historical climate events to teach fundamental climate concepts. Central to the course is the human experience of these events and the diversity of their responses. The major question underpinning this course is, therefore, how have people responded to past climate events, whether short-term, decadal or longer in scope? This question is predicated on the complexity of human society and moves away from the binary of collapse vs. resilience that dominates much thinking about the impact of climate changes on past societies. This framing recognizes the significance of climate for food production and collection, as well as trade and cosmologies. It does not take climate to be the determining factor in history. Rather it foregrounds the myriad ways people acted in the face of, for example, multi-decadal below average rainfall or long periods of more reliable precipitation

### **HIST UN3803 THE MUGHAL MEMOIRS. 4.00 points.**

The early sixteenth century rise of the Mughal authority in North India coincided with the arrival of the Portuguese in South India, the emergence of Safavid empire, and the dominance of the Ottoman empire. Within the first hundred years, even more claimants to imperial power in India – the British, the French, the Rajput, the Maratha – were engaged in political negotiations, resistance and accommodation with the Mughal. We will follow the course of the development of Mughal political thought, economic and environmental impact and courtly culture through to their official demise in 1857. The first four emperors of Mughal India left various accounts for us. Babur (r. 1525–1530), the founder of the dynasty, wrote an autobiography. Memoirs of the second, Humayun (r. 1530–1556), were written by his sister, and others in his army. The third, Akbar (r. 1556–1605) was the subject of the most amazing regnal history-- written by his minister and aide Abu'l Fazl. His son Jahangir (r. 1605–1627), recorded his daily activities and thoughts in his own journal that was published by him. To best engage with this complex universe, we will use the semantic vocabulary of 'seeing'. This course will delve into how Mughal emperors saw their world and how they narrated it. This course is almost exclusively focused on primary readings. We will read large portions of the texts written by the Mughal elite. We will read them to examine their treatment of sacral landscape, nature and environment, gender, social networks, power and violence, agency and interiority, performativity, usage of history and memory. This focus on memoir and autobiographical writing would allow us to delve far deeply into the socio-cultural worlds of the Mughal then is possible via a perfunctory reading of secondary sources

**HIST UN3927 Global Histories of Plants and Empire, c. 1500-1800. 4.00 points.**

This course provides a broad introduction to global history as it relates to science, medicine, and empire. In particular, we will explore the relationships between plants and empires in the early modern period. The course will predominantly focus on the colonial empires of early modern Europe (the Portuguese, Dutch, Spanish, French, and British), but will also incorporate case studies from the Mughal, Ottoman, Qing, and Russian empires. Broadly, we will analyze how much the desire for particular plants influenced and motivated imperial projects and assess the impacts of these projects on the natural world. We will evaluate the ways in which plants and knowledge about plants traveled, or failed to travel, and the labor involved in these processes in the context of empire. Finally, we will think about the shifting meanings and uses of plants over time and how this impacts our study of them

**HIST GU4218 The Black Sea in History. 4 points.**

We are used to thinking of history in national terms, or at least in reference to major civilizations (“Western civilization,” “Near Eastern civilization,” etc.). In “real life,” however, interactions among people, linguistic communities, and cultures frequently cut across political divisions. Water – rivers, streams, seas – is often an invitation to settlement, commerce, and conquest. This course offers a look (inspired in part by Fernand Braudel’s *Mediterranean*) at a body of water – the Black Sea – and the lands around it, in sweeping historical perspective. Focus is on those moments when the various civilizations and empires that originated and flourished around the Black Sea met and intersected in friendship or in enmity. We will look at ancient civilizations, Greek colonization, Byzantine-Slav interactions, the period of Ottoman dominance, Russian-Turkish rivalry, and decolonization and wars in the 19th and 20th centuries. We hope that we will be able to pay particular attention to questions of ecology, language, religion, and cultural interaction throughout.

**HIST GU4298 Food in Modern East Central Europe: A Cultural and Political History. 4.00 points.**

Food is life – says a banal truism. It is the foundation of biological existence, and producing, creating and savoring food pervades life from the cradle to the last breath. It is everywhere from the campfire to picture galleries and philosophy books. It is material and symbolic, emotional and calculated. It is a glue and a dividing line between people. Food is history. Both as a prominent or an almost invisible thread running through life, food is more than itself, a lens on how society changed through history. This course uses food as a social phenomenon to highlight differences and commonalities of the region called East Central Europe without and within. It reflects upon the numerous faces of food, how its changes, its use, creation, consumption, and study mirrors broader historical developments and how it serves as focus of attachments known from contemporary politics: national, local, regional. Following food in East Central European history offers not only an analysis of food and its function within society, but how food has changed with society too. Throughout the course we shall explore the different – material, cultural, political, class – meanings of food, while introducing perspectives from different academic disciplines like social and political history, sociology, nationalism studies, anthropology. We start from the material, and through the concepts of food culture and food ways we shall connect the symbolic and practical aspects of food. After exploring how technology and science changed food and how it is related to modernity, we shall delve into the cultural and political: how does food reflect and represent various differences, how it is used to symbolize the immaterial. Finally, as East Central European food history is anything but peculiar, we will use food to think about the possible meanings of this geographic concept

**HIST GU4374 Welfare States and Warfare States, Europe and the United States since c. 1870. 4.00 points.**

What kind of protection does a state owe its citizens? In the early twentieth century, states across Europe and the United States developed a whole host of social benefits that sought

to protect some citizens against the risks of modern industrial society: against accidents, old age, widowhood, motherhood, and illness. Yet any observer will immediately notice that this exact period of state expansion was also the era of high imperialism, in which labor markets were segregated by gender and race, citizenship rights were limited, fascism was on the rise, and the world waged global war. What, then, was the relationship between welfare states and warfare states in Europe and the United States? In this class, we will read about the evolution of social policies and social politics across the globe since the 1870s, from imperial expansion and welfare in the Boer War to migration politics in the contemporary European Union. We will examine how welfare states developed under pressure from new social movements and in response to new social and economic problems. We will interrogate whether welfare entrenched, or alleviated, social exclusions around race, gender, disability, and class. We will consider when states become invested in the health and wellbeing of their citizens and why. Finally, we will evaluate the impact of empire, war, and decolonization on the rise and, perhaps, the fall of welfare state. That is, in this class we will ask: if, as the famous phrase goes, war made the state, did war make the welfare state too?

**HIST GU4389 Stalinism. 4.00 points.**

The quarter century during which Joseph Stalin ruled the Soviet Union witnessed some of the twentieth century's most dramatic events: history's fastest plunge into modernity, an apocalyptic world war, and the emergence of a socialist state as a competitive world power. This tutorial will offer students a deep dive not only into the historical depths of the Stalin era but into the gloriously complex historiographical debates that surround it. Some of the questions that will animate the readings, writings, and discussions that students will engage in are as follows: Did Stalin depart from or represent a continuation of the policies introduced by his predecessor Vladimir Lenin? Did he rule in a totalitarian fashion or in ways comparable to other twentieth century regimes? Were his policies destructive or possibly productive? And perhaps most boggling of all: why did no one resist Stalinist rule?

**HIST GU4426 PEOPLE OF THE OLD SOUTH. 4.00 points.**

No place or period in American history has ignited more passion or brought into being a richer trove of first-rate scholarship than the South during the years before the Civil War. On the other hand, no place or period in American

history has generated more misguided scholarship or more propaganda. In this course, students will sample historical literature and primary sources about the Old South, evaluating the interpretations historians have offered and scrutinizing some of the documents on which historians of the Old South have based their conclusions

**HIST GU4435 Democracy and its Technocrats. 4.00 points.**

Science and technology have become increasingly central to the basic functioning of democratic societies. The administrative state, both on the local and national level, is dependent on technological systems to ensure democratic rule and deliver services: from voting machines and welfare databases to passport scanners and the laboratory equipment necessary to set environmental standards. Just as necessary are the numerous experts – engineers, statisticians, epidemiologists, and environmental scientists – who either work for or advise the state in its dealings. How should we think about the technocratic nature of modern democracy? Is it an inevitable and necessary pre-condition for governing modern mass society? Or is it an alarming aspect, an undemocratic impulse, that undermines the promise of democratic rule? The course will examine the coproduction of science and politics. In the first part of the semester, students will gain conceptual tools with which to rethink the connection between science, technology, power, politics, policy, and democracy. They will consider the role of expertise in modern politics, as well as the construction of the public. In the second part of the semester we will consider in greater detail the way technocratic governance developed in the United States from the end of the nineteenth century to the contemporary moment

### **HIST GU4641 HOLOCAUST GENOCIDE-AMER CULTRE. 4.00 points.**

When the Holocaust Museum in Washington, D.C. opened in 1993, some people asked why a "European" catastrophe was being memorialized alongside shrines to Washington, Jefferson, and Lincoln while there was still no museum documenting the experience of African slaves in the United States or the effort to exterminate the Native Americans on this continent. How American intellectuals have thought about the Nazi regime and the Holocaust in Europe since before the Second World War and in the latter half of the twentieth century is the focus on this course. The course will also compare the ways the United States narrates, conceptualizes and deals with the Holocaust as opposed to other genocidal events. This course is comparative at its core as it examines how intellectuals and institutions spanning from Hannah Arendt to the United Nations to the US Holocaust Museum have woven this event into American culture

### **HIST GU4681 The Nahuas Through Their Sources. 4.00 points.**

This seminar aims to give a basic knowledge of the history, society, and culture of the Nahuas, one of the main Indigenous groups of Mexico, during the early period, 16th-18th centuries. The Nahuas left a vast and varied corpus of documents written in Nahuatl, a language still in use today. In each class, we will be reading a different set of documents available both in Nahuatl and in English translation and analyze them together to get an understanding of the Nahua world from within. To help us in this analysis, we will be reading also academic works by experts in the field of Indigenous history of early Latin America. Thanks to a collaboration with Eduardo de la Cruz, director of IDIEZ (Instituto de Docencia e Investigación Etnológica de Zacatecas) and a native-speaker instructor of Nahuatl, we will have the possibility to learn how Nahuatl is spoken today and how Indigenous people read their own primary sources from the past. The course will have at least one activity with professor de la Cruz built in the class time and accessible via Zoom

### **HIST GU4721 Archaeology and Heritage in the Ottoman Lands in the Long 19th Century. 4.00 points.**

"Archaeology and Heritage in the Ottoman Lands" is an undergraduate/graduate seminar focusing on archaeology, museology, and the notion of heritage throughout the lands under Ottoman rule during the 'long' nineteenth century. The objective is to critically reassess the nature of Western

antiquarian and archaeological endeavors, and to focus on the local dimension of the question to fill numerous gaps and inconsistencies in the 'grand narrative' of Near Eastern archaeology and heritage

### **HIST GU4743 MANUSCRIPTS OF THE MUSLIM WORLD. 4.00 points.**

This course is designed to provide the foundations for exploring the rich and fascinating history of Islamic manuscripts from the 9th through the 19th century. Its structure is shaped mainly by thematic considerations in a notable chronological fashion. The meetings amount to a series of "cuts" through the topic and cover themes such as the paper revolution, authorship, scribal culture, technologies of book production, readers and their notes, libraries and book collections, or textual as well as extra-textual components of manuscripts. Over the semester, we will study key material, textual, and visual elements of Islamic book culture spanning many centuries and continents, and visit major historiographical questions on the millennium-long history of Islamic manuscript tradition before the widespread adoption of print technology

### **HIST GU4962 Making and Knowing in Early Modern Europe: Hands-On History. 4.00 points.**

This course introduces undergraduate and graduate students to the materials, techniques, contexts, and meanings of skilled craft and artistic practices in early modern Europe (1350-1750), in order to reflect upon a series of topics, including craft knowledge and artisanal epistemology; the intersections between craft and science; and questions of

historical methodology in reconstructing the material world of the past. The course will be run as a "Laboratory Seminar," with discussions of primary and secondary materials, as well as hands-on work in a laboratory. The first semester long course to use the published Edition of Fr. 640 as its focus, it will test the use of the Edition in a higher education classroom to inform the development of the Companion. This course is associated with the Making and Knowing Project of the Center for Science and Society at Columbia University. The first semester-long course to use the published Edition of Fr. 640 as its focus, it will test the use of the Edition in a higher education classroom to inform the development of Phase II of the Making and Knowing Project - a Research and Teaching Companion. Students' final projects (exploratory and experimental work in the form of digital/textual analysis of Ms. Fr. 640, reconstruction insight reports, videos for the Companion, or a combination) will be published as part of the Companion or the Sandbox depending on content and long-term maintenance considerations

### HSWM UN2761 GENDER # SEXUALITY IN AFRICA. 4.00 points.

This course examines the history of gender, sexuality and ways of identifying along these lines in Africa from early

times through the twentieth century. It asks how gender and sexuality have shaped key historical developments, from African kingdoms and empires to postcolonial states, from colonial conquest to movements for independence, from indigenous healing practices to biomedicine, from slavery to the modern forms of work. It will also explore the history of different sexualities and gender identities on the continent. A key objective is to extend the historical study of gender and sexual identity in Africa beyond 'women's history' to understand gender as encompassing all people in society and their relationships, whether domestic or public.

### CSER UN3928 COLONIZATION/DECOLONIZATION. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement  
Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructor's permission.  
Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructors permission.  
This course explores the centrality of colonialism in the making of the modern world, emphasizing cross-cultural and social contact, exchange, and relations of power; dynamics of conquest and resistance; and discourses of civilization, empire, freedom, nationalism, and human rights, from 1500 to 2000. Topics include pre-modern empires; European exploration, contact, and conquest in the new world; Atlantic-world slavery and emancipation; and European and Japanese colonialism in Asia, Africa, and the Middle East. The course ends with a section on decolonization and post-colonialism in the period after World War II. Intensive reading and discussion of primary documents

### EAAS UN3990 APPROACHES TO E ASIAN STUDIES. 4.00 points.

Enrollment is limited to EALAC and AMEC majors and concentrators only.

This course is intended to provide a focal point for undergraduate majors in East Asian Studies. It introduces students to the analysis of particular objects of East Asian historical, literary, and cultural studies from various disciplinary perspectives. The syllabus is composed of a series of modules, each centered around an object, accompanied by readings that introduce different ways of understanding its meaning

### SDEV GU4501 History of the Climate Crisis. 4.00 Points.

The climate crisis is a defining feature of contemporary life. How did we get here? This course considers the historical, social, ethical, and political life of global warming in an effort to better understand the present climate age. Themes and topics include: the origins of fossil fuel-based energy systems and the cultural life of oil; the history of climate science and the geopolitics of climate knowledge production; the emergence of climate change as a global political issue; debates about political responses to climate change versus market-based approaches; the question of culpability and who should be held responsible for causing global warming; and the recent emergence of a global climate justice movement and its relationship to racial justice and indigenous rights movements

**HIST UN1020 The Romans and Their World. 4 points.**

This course examines the history of the Roman Empire from the formation of the Roman monarchy in 753 BCE to the collapse of the Western Empire in 476 CE. At the heart of the class is a single question: how did the Roman Empire come to be, and why did it last for so long? We will trace the rise and fall of the Republic, the extension of its power beyond Italy, and the spread of Christianity. Epic poetry, annalistic accounts, coins, papyri, inscriptions, and sculpture will illuminate major figures like Cleopatra, and features of daily life like Roman law and religion. The destructive mechanics by which Rome sustained itself--war, slavery, and environmental degradation--will receive attention, too, with the aim of producing a holistic understanding this empire. Discussion Section Required.

**Spring 2025: HIST UN1020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 1020	001/13649	T Th 11:40am - 12:55pm 310 Fayerweather		4	49/70

**HIST UN1942 The Year 1000: A World History. 4.00 points.**

This course is designed to introduce students to the study of premodern history, with a substantive focus on the variety of cultures flourishing across the globe 1000 years ago. Methodologically, the course will emphasize the variety of primary sources historians use to reconstruct those cultures, the various approaches taken by the discipline of history (and neighboring disciplines) in analyzing those sources, and the particular challenges and pleasures of studying a generally "source poor" period. The course queries the concepts of "global history" and "world history" as applied to the "middle millennium" (corresponding to Europe's "medieval history"), by exploring approaches that privilege connection, comparison, combination, correlation, or coverage

**HIST UN2088 The Historical Jesus and the Origin of Christianity. 4 points.**

The goal of this course will be to subject the source materials about Jesus and the very beginnings of Christianity (before about 150 CE) to a strictly historical-critical examination and analysis, to try to understand the historical underpinnings of what we can claim to know about Jesus, and how Christianity arose as a new religion from Jesus' life and teachings. In addition, since the search or quest for the "historical Jesus" has been the subject of numerous studies and books in recent times, we shall examine a selection of prominent "historical Jesus" works and theories to see how they stand up to critical scrutiny from a historical perspective.

**HIST UN2100 EARLY MOD EUR: PRINT # SOCIETY. 4.00 points.**

This course will examine key cultural, political, and religious developments in early modern Western Europe (c. 1500-1800) using the lens of print technology and culture as entry point. From the Reformation of Luther, to the libelles of pre-revolutionary France, from unlocking the mysteries of the human body to those of the heavens, from humanist culture to the arrival of the novel, no important aspect of European culture in the early modern centuries can be understood without taking into account the role of print. Its material aspects, its marketing and distribution channels, and its creation of new readers and new "republics" form the contours of this course

**HIST UN2215 MODERN RUSSIAN HISTORY. 4.00 points.**

An introductory survey of the history of Russia, the Russian Empire, and the Soviet Union over the last two centuries. Russia's role on the European continent, intellectual movements, unfree labor and emancipation, economic growth and social change, and finally the great revolutions of 1905 and 1917 define the "long nineteenth century." The second half of the course turns to the tumultuous twentieth century: cultural experiments of the 1920s, Stalinism, World War II, and the new society of the Khrushchev and Brezhnev years. Finally, a look at very recent history since the East European revolutions of 1989-91. This is primarily a course on the domestic history of Russia and the USSR, but with some attention to foreign policy and Russia's role in the world

**HIST UN2353 Shadow of the Sun King: Early Modern France. 4.00 points.**

This course will offer a survey of French history from the Wars of Religion to the Revolution, when the kingdom was the predominant power in Europe. Topics to be addressed include the rise of the Bourbon monarchy, the crystallization of absolutism as a political theology, the spectacular rise and collapse of John Law's financial system, the emergence of the philosophe movement during the Enlightenment, and the gradual de-legitimation of royal power through its association with despotism. Thematically, the course will focus on shifting logics of representation—that is, the means by which political, economic, and religious power was not only reflected, but also generated and projected, through a range of interrelated practices that include Catholic liturgy, courtly protocols, aristocratic codes of honor, financial experimentation, and the critical styles of thinking and reading inculcated by the nascent public sphere

**HIST UN2438 POLITICAL HISTORY OF CONTEMPORARY AFRICA. 3.00 points.**

This course offers a survey of the political history of contemporary Africa, from independence to the present day, with a focus on the states and societies south of the Sahara. We will use the tools of historians to study African political life: who held political power; how they wielded it and to what ends; and what kinds of opposition they faced. An important sub-theme involves American policy and actions, including those of civil society organizations, vis-à-vis African nation-states

**HIST UN2444 THE VIETNAM WAR. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

April 30, 2025 marks the fiftieth anniversary of the end of the Vietnam War. Upon the semicentennial, this special edition lecture course will reflect on the half century of scholarship and art to examine war's history, including its origins, evolution, and conclusion, and assess its legacies today. Rather than just view the war as an event in American or Vietnamese history, this course will examine the war from a multitude of perspectives by inviting special lecturers, analyzing primary

documents, dissecting novels and memoirs, screening war films, and drawing from the rich historiography of that oft-studied war. Throughout this course, we will ask questions that continue to elicit fierce debate: What brought the United States and Vietnam to war? What impact did the war have on North Vietnamese, South Vietnamese, and American politics? How did decisions made in the corridors of power on both sides of the Pacific affect everyday people on the battlefronts and homefronts? Why did it end the way it did? What lessons can we draw from the Vietnam War? Attendance and participation in lectures and weekly discussion sections is mandatory. All the readings and episodes are available online through Butler Library (CLIO) or Canvas (C)

**HIST UN2565 American History at the Movies. 4.00 points.**

This lecture explores major topics in modern American history through an examination of the American film industry and some of its most popular films and stars. It begins with the emergence of "Hollywood" as an industry and a place in the

wake of WWI and ends with the rise of the so-called 'New Hollywood' in the 1970s and its treatment of the 1960s and the Vietnam War. For much of this period, Hollywood's films were not protected free speech, making movies and stars peculiarly reflective of, and vulnerable to, changes in broader cultural and political dynamics. Students will become familiar with Hollywood's institutional history over this half-century in order to understand the forces, both internal and external, that have shaped the presentation of what Americans do and don't see on screens and to become skilled interpreters of American history at the movies

**HIST UN2663 MEXICO FROM REVOL TO DEMOCRACY. 4.00 points.**

This course will survey a century of Mexican history that oscillated between an authoritarian regime (Porfirio Díaz's presidency, 1876-1911), a massive revolutionary upheaval (1911-1920), the construction of a single-party, corporatist regime that became a model of stability and economic success (that of the Partido Revolucionario Institucional), and a complex transition to democracy (culminated in the July 2000 presidential elections but, one might argue, still ongoing). Politics will be defined in broad terms. Lectures and readings will consider social and cultural processes from diverse perspectives. Topics will include: migration and population growth; economic expansion and stagnation; urban history, crime and punishment; gender, women and families; elite and popular culture; labor, agrarian reform; the left, electoral and armed insurgency; relations with the United States and other countries of Latin America. Local and regional perspectives will be offered as an alternative against prevailing state-centered, national narratives. Combining thematic and chronological lectures and discussion of primary sources, the course will examine the most exciting recent literature on Mexican society, culture, and politics. Discussion of primary sources will be an important component of this course. Classes will combine lecture and discussion of historical contents with discussion of primary documents. These documents will include texts (political manifestos, essays, letters, testimonies, legislation, literature) as well as movies, music and visual records (mostly photography and painting). Discussions sections will also use those documents to expand on topics presented in the lectures and the required readings

**HIST UN3049 Provinces of the Roman Empire. 4.00 points.**

Between the mid-third century BCE and mid-second century BCE, Rome rapidly acquired a Mediterranean empire consisting of territories that it divided into administrative units called provinces. Through the examination of documentary and literary sources, and art and archaeology, this seminar traces the formation and growing complexity of Roman provincial administration and life in the provinces during the Republic and imperial period. Topics of study include the responsibilities of the provincial governor and his staff; the creation of provincial landscapes through the destruction of cities and construction of long-distance roads; the emergence of new provincial identities; revolts against Rome; and provincial expressions of loyalty to the emperor

**HIST UN3321 Solidarity in the Age of Decolonization. 4.00 points.**

The central demand in numerous contemporary emancipation movements is "decolonization," irrespective of the presence of a formal empire. This class addresses how we think about decolonization today. What does paying attention to the big picture view of decolonization reveal about the term's changing meaning? We will look at events, paying attention to how decolonization is perceived by different people, in different places, at different times—not only in the colony but in the metropole. How do "sympathetic" members of society react? What does it mean to sympathize? What kinds of solidarity were formed between metropolitan activists and anti-colonial leaders? What about solidarity-activists in the empire? What counts as solidarity? How does this fit into our understanding of decolonization? These are the questions that will be guiding our course. We will focus our topic by concentrating on liberation

from the maritime empires of Great Britain and France (though these are just a fraction of independence movements), starting with the independence of the American colonies and ending with contemporary debates on the notion of decolonization. We will also direct our attention to specific global issues connected to the process of decolonization: the world economy, human rights, apartheid, and transnational protest. The course will be organized like a seminar—there are no lectures, only discussions of the assigned texts

**HIST UN3363 Feminist Histories of Gender and Sexuality in Modern Britain. 4.00 points.**

This undergraduate seminar offers students an introduction to the histories of gender and sexuality in Modern Britain since the early-nineteenth century. The advent of new nation states, industries, empires, and political ideologies transformed the place of gender and sexuality in British society. Yet the attempt to document those historical transformations changed the ways that feminist historians wrote that history too. This class thus introduces students to the major topics in the history of gender and sexuality in modern Britain: the relationship between industrialization and family labor, conceptions and categories of homosexuality and heterosexuality, the impact of imperialism on gender roles, queer histories of urbanization and the metropolis, and the place of gender, race, and sexuality in the development of the modern state. But it will also ask students to consider how historians like Sally Alexander, Catherine Hall, Judith Walkowitz, Durba Mitra, Samuel Rutherford, and Kennetta Hammond Perry have applied and engaged the major theorists of gender and sexuality, including Frederick Engels, Michel Foucault, Judith Butler, Carole Pateman, Henri Lefebvre, Eve Kosofsky Sedgwick, Stuart Hall, and Hazel Carby. In doing so, students will learn both the histories and the theories that comprise the feminist historical tradition of Modern Britain

**HIST UN3429 TELLING ABOUT THE SOUTH. 4.00 points.**

A remarkable array of Southern historians, novelists, and essayists have done what Shreve McCannon urges Quentin Compson to do in William Faulkner's *Absalom, Absalom!*--tell about the South--producing recognized masterpieces of American literature. Taking as examples certain writers of the 19th and 20th centuries, this course explores the issues they confronted, the relationship between time during which and about they wrote, and the art of the written word as exemplified in their work. Group(s): D Field(s): US Limited

**HIST UN3562 The Seven Years' War (1754-1763), Global Perspective: Europe, Asia, Africa, and Americas. 4.00 points.**

Prerequisites: History Majors Preferred This research seminar explores the causes, course, and consequences of the Seven Years' War, arguably the first world war in modern history. Topics include the origins of the conflict in North America and in Europe, the relationship between imperial rivalry in the American colonies and the contest for supremacy in central Europe, the impact of the war on trade and settlement in South Asia, the West Indies, the Philippines, and West Africa, and the legacies of the conflict for British imperial expansion in India, North America, Senegal, and the southern Caribbean. During the second half of the semester, members of the seminar will devote the majority of their time to the research and writing of a substantial paper

**HIST UN3591 One Person, One Vote?. 4.00 points.**

In recent years, the American public has ranked worries over the future of American democracy among its top concerns. American citizens consider free and fair elections to be the bedrock of U.S. representative democracy. However, for most of U.S. history, there has been a profound gap between the ideals of democratic representation and its reality, with many Americans being disenfranchised. This course will examine the history of efforts to secure voting rights for U.S. citizens, including women and people of color, as well as continuing attempts to curtail or suppress these rights. Further, we will survey how debates over voting rights intersected with conflicts over the nature of political representation, and how the ideal of "fair representation" has been construed and fought over during the 20th century. Topics will include: the nineteenth amendment, Jim Crow disenfranchisement in the U.S. South, the Voting Rights Act, histories of apportionment and redistricting, as well as fights over the electoral college

**HIST UN3608 Women and Gender in Latin America and the Caribbean. 4.00 points.**

This course examines women's experiences in Latin America and the Caribbean from colonial times to current days. We will investigate debates on class, race, religion and ethnicity while looking at major historical events. We will rely on several primary and secondary sources such as archival documents, oral histories, arts and visual resources that will help us understand how gender shaped the political, social, and economic structures of Latin America and the Caribbean. We will also learn about important women, such as Sor Juana Inés de la Cruz and Chica da Silva, examine the role of women warriors and spies in the Wars of Independence and the Haitian Revolution, and discuss how multiple gender-based issues are deeply tied to the history of Latin America and the Caribbean, such as indigenous gender systems, Catholicism and education, female suffrage, feminism and populism, conservatism, the ideology of separate spheres, the politicization of motherhood, among others

**HIST GU4082 Medieval Religion: definitions and concepts. 4.00 points.**

In this course, the concept of religion stands at the heart of our exploration, as it shaped and was shaped by the medieval world. We will critically engage with definitions and interpretations of religion, both as a subject of scholarly debate in the study of religions and as a pivotal force in medieval history. The course will examine how Christianity, Judaism, and Islam were not only systems of belief but also comprehensive frameworks that structured medieval society, politics, and intellectual life. Through an analysis of religious texts, practices, and institutions, we will explore how religion was lived and understood in the Middle Ages, while also addressing broader theoretical debates in the history of religion. This approach invites us to reflect on the historical construction of "religion" as a category and its relevance in shaping our understanding of the medieval world

**HIST GU4110 FRENCH AMERICA 1534-1804. 4.00 points.**

A study of the French Atlantic World from the exploration of Canada to the Louisiana Purchase and Haitian Independence, with a focus on the relationship between war and trade, forms of intercultural negotiation, the economics of slavery, and the changing meaning of race. The demise of the First French Colonial Empire occurred in two stages: the British victory at the end of the Seven Years War in 1763, and the proclamation of Haitian Independence by insurgent slaves in 1804. The first French presence in the New World was the exploration of the Gulf of St. Lawrence by Jacques Cartier in 1534. At its peak the French Atlantic Empire included one-third of the North American continent, as well as the richest and most productive sugar and coffee plantations in the world. By following the history of French colonization in North America and the Caribbean, this class aims to provide students with a different perspective on the history of the Western hemisphere, and on US history itself. At the heart of the subject is the encounter between Europeans and Native Americans and between Europeans and Africans. We will focus the discussion on a few issues: the strengths and weaknesses of French imperial control as compared with the Spanish and the British; the social, political, military, and religious dimensions of relations with Native Americans; the extraordinary prosperity and fragility of the plantation system; evolving notions of race and citizenship; and how the French Atlantic Empire shaped the history of the emerging United States

**HIST GU4255 A Global History of East Central Europe Before the Modern Times. 4.00 points.**

Looking at Central and Eastern Europe through the systematic application of transnational methods and from a truly global perspective can offer original and valuable insights. Central and Eastern Europe has tended to be a semi-peripheral area in the global scheme of things, and it has thus been much closer to the global average than some of the parts of the world on which much of recent global historiography has focused. Central and Eastern European countries have also developed numerous and still underexplored intercontinental connections outside the Western core that should be of special interest in our age of multipolarity. At the same time, it can be assumed that this diverse area, as a peripheral part of Europe in a formerly largely Eurocentric world. The global history of the region is not intended to exaggerate the role Central and Eastern Europe played in transcontinental processes in the last millennia. It rather aims to show how the diverse people of the region have come to be interconnected with and shaped by phenomena originating in all the various parts of the globe, transnational and global trends that certainly have exerted a much greater impact on their country's multifaceted history than the other way round. The course does not intend to deconstruct national narratives as such. It attempts to substantially enrich such narratives and reconceptualize them for an age of manifold global interconnectedness. To put it differently, the words "East Central European" and "global" are equally significant parts of the course's title. It aims to re-contextualize medieval and early modern histories of Hungary, Bohemia, and Poland by looking at global processes in their regional context rather than looking at the region as an exceptional and distinct area. While the region has traditionally been described in scholarship as the periphery of Western Christianity, there has been little understanding of the region as an area with close ties towards the Eastern Mediterranean (Byzantium), towards Eastern Europe (towards the Rus) and how global processes such as climate change, trade connections, political representation or artistic changes reached (and spread from) the region

**HIST GU4279 A Cultural History of the Soviet Century. 4.00 points.**

In the English-language literature, the history of the Soviet Union is often dominated by the Cold War. As a result, events central to the lives of Soviet citizens are viewed within a wider geopolitical context that often overlooks regional and ethnic specificity. Cultural products from music, film, dance, and literature provide insight into individual and collective responses to traumatic events. In this course, students study the history of the USSR through the lens of memory and trauma studies by analyzing cultural artifacts as a form of testimony and social history. This course engages with varied cultural products chronologically from the formation of the Union and Revolution through Soviet collapse and the kleptocratic rise of Putin. Materials include poetry and prose by Solzhenitsyn, Mandelstam, and Akhmatova, music by Shostakovich, Prokofiev, and Vysotski, primary sources and speeches, and historical analyses by Kotkin, Snyder, and Fitzpatrick. To present a de-Russified view of the USSR, materials also include those produced by marginalized Soviet populations like Indigenous and Eveny scholars, Holocaust and GULAG survivors, and veterans

**HIST GU4379 Ever Closer Union?: Histories of European Integration since 1945. 4.00 points.**

This class offers an introduction to the history and the practice of European integration since 1945. In 1945, western Europe lay in ruins after one of the largest and most destructive wars in world history. By 1957, however, six European governments decided to come together in a European Economic Community and, some sixty years later, they had built a European Union that included twenty-seven countries and, by combined size, constituted the second largest economy in the world. Why would six states just ravaged by occupation and war so quickly volunteer to share sovereignty with one another and why did so many other governments decide to join up later? What kinds of European unification did they envisage, how did these visions of European integration change, and what kind of united Europe did they build? To answer these questions, this class explores the evolution of European integration from the end of the Second World War and the collapse of European empires to the end of the Cold War and the creation of the European Union. We will reconstruct various and evolving visions for the integration of Europe, studying the place of Europe in a world of empires to the place of Europe in a globalizing economy. We will examine the rise of the major policies and institutions of the European Community: from agricultural policy to environmental law, from demands for democratic representation to the regulation of international migration. All the while, we will assess how the European Community responded to the major events of the late twentieth century

– including decolonization, the oil crisis, neoliberalism, the end of the Cold War, the migrant crisis, and the rise of right-wing populism – and interrogate the impact of European institutions upon those events. To do so, we will read widely across history and political science and we will make extensive use of new primary source collections, especially those newly digitized by the Historical Archives of the European Union. This course thus doubles as a history of European integration and an examination of Europe’s changing place in the world

### **HIST GU4385 Rousseau and the Modern Self. 4.00 points.**

This seminar is the third in a series on the history of modern conceptions of the self. Other figures in the series include Montaigne, Pascal, and Tocqueville. This seminar focuses on Rousseau, and in particular Emile, his treatise on education and psychology. We will pay particular attention to how he draws from both Montaigne and Pascal to develop a third conception of the self and its development. We also examine Reveries of a Solitary Walker to see how Rousseau’s general theory of the self relates to his understanding of himself at the end of his life

### **HIST GU4405 The Bible in Early America. 4.00 points.**

Anglo-American colonists enjoyed a relatively high degree of literacy, and what they mostly did with that literacy was read the Bible. This course shows how early American culture and the course of American history were shaped by extraordinarily widespread reading and oral transmission of the Bible. Each week will focus on the biblical texts, dilemmas, and crises of a different period in early American history. Topics include Puritan colonization, Native American conversion, Black Bible culture, American nationalism, religious mysticism, and the slavery debate. This course will have an immersive element: in order to better understand the intellectual and psychological effect of constant contemplation of the Bible, students will experiment with text exegesis, memorization, dream analysis, and the interpretation of contemporary events in the style of early Anglo-American Bible readers

### **HIST GU4532 TOPICS IN AMERICAN CIVIL WAR AND RECONSTRUCTION. 4.00 points.**

Few events in American history can match the significance of the American Civil War and Reconstruction and few left a better cache of records for scholars seeking to understand its signal events, actors, and processes. Starting with the secession of eleven southern states, white southerners’ attempts to establish a proslavery republic (the Confederate States of America) unleashed an increasingly radical, even revolutionary war. Indeed, as the war assumed a massive scope it drove a process of state building and state-sponsored slave emancipation in the United States that ultimately reconfigured the nation and remade the terms of political membership in it

### **HIST GU4693 WRITERS ON HISTORY: THOMAS MANN. 4.00 points.**

This seminar is devoted to examining the work of writers who address the nature and course of history in their imaginative and non-fiction work. This semester we will be exploring the work of Thomas Mann in the context of the First and Second World Wars. This will include his relation to the German “conservative revolution,” the Weimar political experience, and the United States, where he spent several years in exile. We will pay particular attention to his conceptions of modern history as expressed in his novels

**HIST GU4695 Urban Waters: ecologies, inequalities, and environmental justice in Latin American cities. 4.00 points.**

How does climate change transform how we read, write and tell urban histories? How can the so-called Anthropocene change how we do urban ethnography? How does it affect how we imagine viable, desirable urban futures? Finally, how do we reassess agency, social change, and collective life in the face of challenges brought about by the entanglement of human and non-human actions in phenomena like melting icebergs, air pollution, viruses and pandemics, floods and landslides, or rising sea levels? Addressing these questions requires expanding the temporal and spatial scopes and scales usually deployed in modern urban histories. With this end in mind, we will engage with readings that explore how ports, landfills, pollution, rivers, lakes, pipes and wells, wastewater, beaches and disasters constitute sites of city making in different cities and time periods, and therefore of instituting, reproducing or perpetuating inequalities. We will focus mostly but not exclusively on case studies of Latin American cities, drawing scholarly work in history, anthropology, social and environmental history, urban political ecology, geography, science and technology studies, architecture, urbanism and urban planning

**HIST GU4711 OCCULT IN THE MUSLIM PAST. 4.00 points.**

This seminar is designed to explore the rich but sorely understudied occult scientific lore in the pre-modern Islamic world. For over a millennium, from the seventh through even the twenty-first century, and spanning a broad geographical spectrum from the Nile to Oxus, different forms and praxis of occult scientific knowledge marked intellectual and political endeavors, everyday lives and customs, and faith-based matters of individuals constituting the so-called Islamicate world. However, despite the impressive array of textual, material, and visual sources coming down to us from the Muslim past, the topic has been severely marginalized under the post-Enlightenment definitions of scientific knowledge, which also shaped how the history of sciences in the Islamicate world was written in the last century. One of this seminar's main objectives is to rehabilitate such biased perspectives through a grand tour of occult knowledge and practice appealed in the pre-modern Muslim world. Over the semester, by relying on a set of secondary studies and translated primary sources, we will revisit the question of the marginalization of Islamicate occult sciences, explore the actors' definitions and discussions about the epistemic value of these sciences, trace their social and political implications in everyday life and imperial politics,

and examine the key textual, technical, and material aspects of the occult tradition. In several of our sessions, we will have hands-on practice to better familiarize ourselves with the instructed techniques and methods in different branches of occult sciences. We will also regularly visit the Columbia University Rare Book & Manuscript Library to view texts and materials available in our collection

**HIST GU4716 Imag(in)ing the Ottoman Empire: A visual history, 18th-20th centuries. 4.00 points.**

"Imag(in)ing the Ottoman Empire: A visual history, 18th-20th centuries" is an undergraduate/graduate seminar focusing on visual representations of the Ottoman Empire during the last two centuries of its existence, from the early eighteenth to the early twentieth century. The objective is to study the development of visual representations both by and about the Empire, from Ottoman miniatures to early European paintings, and from the surge of Western illustrated magazines to the local uses of photography. The seminar's chronological thread will be complemented by a thematic structure designed to explore different aspects and influences concerning the production and diffusion of images: curiosity, documentation, exoticism, propaganda, orientalism, modernity, self-fashioning, eroticism, policing, to name just a few

**HIST GU4811 Encounters with Nature: The History and Politics of Environment, Health and Development in South Asia and Beyond. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course offers an understanding of the interdisciplinary field of environmental, health and population history and will discuss historical and policy debates with a cross cutting, comparative relevance: such as the making and subjugation of colonized peoples and natural and disease landscapes under British colonial rule; modernizing states and their interest in development and knowledge and technology building, the movement and migration of populations, and changing place of public health and healing in south Asia. The key aim of the course will be to introduce students to reading and analyzing a range of historical scholarship, and interdisciplinary research on environment, health, medicine and populations in South Asia and to introduce them to an exploration of primary sources for research; and also to probe the challenges posed by archives and sources in these fields. Some of the overarching questions that shape this course are as follows: How have environmental pasts and medical histories been interpreted, debated and

what is their contemporary resonance? What have been the encounters (political, intellectual, legal, social and cultural) between the environment, its changing landscapes and state? How have citizens, indigenous communities, and vernacular healers mediated and shaped these encounters and inserted their claims for sustainability, subsistence or survival? How have these changing landscapes shaped norms about bodies, care and beliefs? The course focuses on South Asia but also urges students to think and make linkages beyond regional geographies in examining interconnected ideas and practices in histories of the environment, medicine and health. Topics will therefore include (and students are invited to add to these perspectives and suggest additional discussion themes): colonial and globalized circuits of medical knowledge, with comparative case studies from Africa and East Asia; and the travel and translation of environmental ideas and of medical practices through growing global networks

#### **HIST GU4842 The City # the Archive. 4.00 points.**

How to write the city? What is an archive for writing the city? What liminal and marginal perspectives are available for thinking about writing the city? What is the place of the city in the global south in our historical imagination? Our attempt in this seminar is to look at the global south city from the historical and analytical perspectives of those dispossessed and marginal. Instead of 'grand' summations about "the Islamic City" or "Global City," we will work meticulously to observe annotations on power that constructs cities, archives and their afterlives. The emphasis is on the city in South Asia as a particular referent though we will learn to see Cairo, New York, and Istanbul

#### **HIST GU4872 North Korean History, Culture and Politics. 4.00 points.**

North Korea is widely regarded as a country without a history; as enigmatic as it is isolated. Dispensing with this cliché, this course invites students to engage with North Korean history using a variety of primary and secondary sources. We begin in the medieval period to trace the distinct features of the northern region that made it uniquely receptive to outside ideas. Understanding the north as a frontier zone of experimentation and adaption allows us to examine the attractive power of modernity in the north during the early twentieth century via the influence of Christianity, capitalism and communism. Utilizing texts and materials made in North Korea and internationally, including feature and documentary films, women's magazines,

graphic novels, literary fiction and testimony, the course investigates the conditions within which knowledge about North Korea has been produced, circulated and repressed. Key topics to be explored include the history of Christianity and capitalism in Pyongyang and the northern provinces, communist cadres in the 1930s, the allure of the North in the 1940s, the Korean War and the purges that followed, North Korea's relations with neighbors and the world, and the high cost its citizens pay for the country's brutal sanction economy

**HIST BC2199 A History of Witchcraft and Magic in Europe. 3.00 points.**

This lecture course examines the social, cultural, and legal history of witchcraft, magic, and the occult throughout European history. We will examine the values and attitudes that have influenced beliefs about witchcraft and the supernatural,

both historically and in the present day, using both primary and secondary sources. This course will pay specific attention to the role of gender and sexuality in the history of witchcraft, as the vast majority of individuals charged in the witch hunts of the sixteenth and seventeenth centuries were indeed women. We will also study accusations of witchcraft, breaking down the power dynamics and assumptions at play behind the witch trials, and the impacts of these trials on gender relations in European society. This class will track the intersections of magic and science throughout the early-modern period, and the reconciliation of belief systems during the Enlightenment. We will carry our analysis into the modern period, touching on Victorian spiritualism and mysticism, McCarthyism in the United States, and contemporary goddess worship. We will conclude the semester with an investigation into the role of witchcraft in discussions of gender, race, and sexuality in popular culture

**Spring 2025: HIST BC2199**

**HIST BC2375 Fascism in European History. 3.00 points.**

What was Fascism? What kind of appeal did authoritarianism and dictatorship have in interwar Europe? How did the Fascist "New Order" challenge liberal democracies and why did it fail in World War II? What was the common denominator of Fascist movements across Europe, and in particular in Mussolini's Italy, Salazar's Portugal, Franco's Spain, culminating in Nazi Germany? This class examines the history of Fascism as an ideology, constellation of political movements, and authoritarian regimes that aimed at controlling the modernization of European societies in the interwar period. Thus, the course focuses in particular on the relationship between politics, science and society to investigate how Fascism envisioned the modernity of new technologies, new social norms, and new political norms. The class will also explore Fascism's imperialist goals, such as the calls for national renewal, the engineering of a new race, and the creation of a new world order

**Spring 2025: HIST BC2375**

**HIST UN2689 COLONIAL CITIES OF THE AMERICAS. 4.00 points.**

This course examines the history of cities in the Americas in the colonial era, c. 1500-1800, organized around three large themes. First, we study the precolonial origins of American urban systems, focusing especially on Mesoamerica and the Andes, and exploring questions of urban continuity, disruption and change, and the forms of indigenous cities. Second, we

study various patterns of city foundations and city types across the Americas, examining Spanish, Portuguese, British, Dutch and French colonial urban systems. Third, we focus on the cities more closely by looking at key issues such as urban form, built environment, social structure. Specific themes include a critical analysis of the Spanish colonial grid, the baroque city, and 18th-century urban reforms, as well as race and class, urban slavery, and urban disease environments.

**HIST BC2699 Latin American Civilization II. 4.00 points.**

This course is intended to offer a survey of the history of a complex and vast region through two centuries. In order to balance the specificity of particular histories and larger processes common to Latin America, units will often start with a general presentation of the main questions and will be followed by lectures devoted to specific countries, regions, or themes. We will look closely at the formation of class and ethnic identities, the struggle around state formation, and the links between Latin America and other regions of the world. We will stress the local dimension of these processes: the specific actors, institutions and experiences that shaped the diversity and commonalities of Latin American societies. The assignments, discussion sections, and lectures are intended to introduce students to the key conceptual problems and the most innovative historical research on the region and to encourage their own critical reading of Latin American history

**Spring 2025: HIST BC2699**

**HIST BC2859 South Asian Diasporas. 3.00 points.**

This course will familiarize students with major debates around questions in the study of diaspora and migration while providing a sense of their interlinkages with large scale socio-political processes such as the globalization of labor, the formation of social hierarchies, as well as movements for survival and belonging. Students who complete this course will learn how to: 1) Use and evaluate primary materials through critical reading and interpretation 2) Conduct close readings of key texts in multimedia formats (posters and ephemera, digital archives, art and cultural production, manifestos, etc.) 3) Evaluate divergent perspectives and representations by combining historical accounts with memory and personal narratives 4) Adopt methods of public outreach

and neighborhood ethnography to understand the imprint of the past on the present 5) Present arguments cogently and logically in writing and speaking, including through collaborative learning and presentation

HIST 2859	001/00883	M W 2:40pm - 3:55pm LI003 Barnard Hall	Maia Ramnath-Christiansen	3.00	10/70

**HIST BC2963 History of Globalization. 3.00 points.**

Globalization emerged as a concept in the 1990s to describe the various supranational forces that shape the contemporary world. Its history, however, is much older, and it encompasses major historical developments such as the formation and global spread of empires, of trade and capitalism, slavery, and migratory movements, as well as environmental and ecological issues. Processes of globalization and deglobalization affect central categories with which to interpret social, political and economic dynamics such as sovereignty, hegemony, and inequality. This course will offer students the critical instruments to discuss globalizing dynamics and how they have affected human societies historically. We will proceed both thematically and chronologically, to develop the analytical instruments to understand how various dimensions of globalization emerged and transformed over time, as well as the different interpretations that scholars have offered to interpret them

**Spring 2025: HIST BC2963**

**HIST BC2985 History of Global Economic Inequality. 3.00 points.**

Economic inequality characterizes virtually every human society, informing deep social dynamics. And yet scholars and lay people alike hold vastly differing opinions about the effects that inequality has on the social fabric, and the need to combat it. The question of how wealth and income are distributed among the members of a national community as well as among nations has acquired center stage in analyses about fundamental issues such as the causes of the progress and decline of societies and the dynamics of globalization. Inequality issues are at the heart of discussions about international economic relations, transnational phenomena such as migrations and the domestic economic platforms of political parties. This course will provide students with the critical instruments with which to analyze the main interpretations of economic inequality from the eighteenth century to the present. We will read and discuss authors who have addressed the question of inequality and distribution: how did they frame the issue? What visions of society emerged from their analyses? We will see how the concept of inequality has changed historically, how different dimensions (e.g., national and international) have appeared and disappeared, and how visions of national, international

and global inequality inform debates about the foundational elements of the social compact

HIST 2985	001/00851	T Th 8:40am - 9:55am 405 Milbank Hall	Michele Alacevich	3.00	17/60

**HIST BC3370 Science, Environment and European Colonialism. 4.00 points.**

Science and colonialism were driving forces in the making of the global and interconnected world where we live today. The history of “Western science” is deeply intertwined with Europe’s encounter with the world, as colonialism provided the laboratory for disciplines such as geography, natural history, medicine, and anthropology. The challenges and opportunities of new natural environments shaped the way Europeans explored, analyzed, and studied nature and society. The circulation of specimens, data, and scientific expertise made colonial governance possible. This course will introduce students to major themes regarding the relationship between science, colonial environments and European empires. Students will develop reading skills and will explore key topics in early and late modern European history, the history of science, and environmental history

**Spring 2025: HIST BC3370**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 3370	001/00152	W 6:10pm - 8:00pm 111 Milstein Center	Angelo Caglioti	4.00	9/15

**HIST BC3399 Urban Histories of Britain, 1600-1900. 4.00 points.**

In this course we will explore the social and cultural landscape of urban Britain throughout seventeenth, eighteenth, and nineteenth centuries. Specifically, we will look to the urban centers of London, Manchester, Edinburgh, and Glasgow. This period saw large-scale urbanization across Britain and with this urbanization came dramatic changes in the social, cultural, political, and economic spheres. We will map the socio-spatial intricacies of seventeenth-century London, question the notion of an “urban renaissance” in the eighteenth century, and trace the explosion of rapid industrialization in nineteenth-century Manchester. In doing so, we will examine how questions of class, race, gender, sexuality, and nationality played out within the urban landscape. A portion of the course will be dedicated to the development of student research projects

**Spring 2025: HIST BC3399**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 3399	001/00784	M 2:10pm - 4:00pm 111 Milstein Center	Dale Booth	4.00	13/15

**HIST BC3698 Mass-Mediated Politics in Modern Latin America. 4.00 points.**

This undergraduate seminar offers an introduction to the study of mass media and politics in Latin America from the early 19th

to the early 21st century. Throughout the course, the students will get acquainted with some of the key concepts, problems, and methods through which historians and communication scholars have probed the relationship between mass media and political power in the region. We will define and understand media broadly, but we will focus largely on printed media and, to a lesser extent, radio, cinema, and television. We will discuss both breaks and continuities between different media technologies, journalistic cultures, and political regimes.

Knowledge of Spanish is welcome, but not mandatory

**Spring 2025: HIST BC3698**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 3698	001/00856	T 4:10pm - 6:00pm 207 Milbank Hall	Alfonso Salgado	4.00	12/15

### **HIST BC3791 Lagos: From the Pepperfarm to the Megacity. 4.00 points.**

**Not offered during 2023-2024 academic year.**

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Lagos: The City Is... the unofficial capital of Nigeria the go-slow capital of the world Rem Koolhaas' planning mystery George Packer's mega-city nightmare Above all, as social scientist Margaret Peil once said, Lagos: The city is the people. At last count, over 15 million people to be (in)exact which makes Lagos the second most densely populated city in Africa. How does a city like Lagos come into being? What are its origins? What is its history in regional, continental, and global context? How does it 'work' and what work does it do for our understandings of cities, urbanization, urbanism, colonialism, globalization, trans-nationalism, and the spatial factor in Africanist historical analyses? This course examines the many Lagoses that have existed over time, in space, and in the imagination from the city's origins to the 21st century. This is a reading, writing, viewing, and listening intensive course. We will be reading scholarly, policy-oriented, and popular sources on Lagos as well as screening films and audio recordings that feature Lagos in order to learn about the social, cultural, and intellectual history of this West African mega-city

### **HIST BC3823 RACE/RACISM/ANTIRACISM: STUDIES IN GLOBAL THOUGHT. 4.00 points.**

**RACE/RACISM/ANTIRACISM: STUDIES IN GLOBAL THOUGHT** Recent protests against racial violence erupting across the United States have demanded that the United States address systemic injustice entrenched in its national history. The Black Lives Matter movement has extended still further, inciting communities across the globe to raise their voices against discrimination and inequality. Rather than viewing the United States— and the north Atlantic, more generally— through an exceptionalist lens, this seminar draws on the strong transnational resonance of the Black Lives Matter movement and the compelling responses of global communities across distinct demographics and colonial histories to decenter the historical origins of race thinking and provincialize its conceptual centrality as a first step in

understanding its reach and relevance as a global signifier of “difference” today. How might we develop critical studies of race and racism that are truly global and extend beyond the historical experience of the North Atlantic, and North America in particular? Might we consider the concept history of race, commonly associated with the Atlantic World and plantation slavery as a form of historical difference proximate to other practices of social hierarchy and distinction across the modern world? How can scholarship that addresses questions of black vitality, fugitivity and Afropessimism engage productively and rigorously with questions of colonial servitude and postcolonial sovereignty that emanates from anticaste thought, ideas of Islamic universality, Pan-Africanism, or heterodox Marxisms? An exercise in comparative thinking, this seminar will function as an interstitial home for intellectual engagements in both the Global South and North, excavating linkages between injustices perpetrated through divisions of race, caste, and minority status, as well as the conceptual innovations born from struggles against them. We are explicitly focused on the relationship between worldmaking and concept formation. Questions of historical comparison and conceptual convergence are important. So, too the forms of sociopolitical solidarity and political utopias that have arisen as a consequence of struggles against enslavement and imperialism. Every seminar session will open with a twenty-minute discussion about political and social historical contexts. However, this is a course focused on the close and careful reading of ideas and concepts in a manner similar to courses in the history of ideas and/or political thought

**Spring 2025: HIST BC3823**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 3823	001/00850	M 4:10pm - 6:00pm 308 Diana Center	Maia Ramnath-Christiansen	4.00	8/15

### **HSEA UN3851 GODS, GHOSTS, AND ANCESTORS: RELIGION IN CHINESE CULTURE AND SOCIETY. 3.00 points.**

Examines the social and cultural place of Chinese religions through time, focusing on Chinese ideas of the relation between humans and spirits, and the expression of those ideas in practice. Problems will include the long-term displacement of ancestors by gods in Chinese history; the varying and changing social functions of rituals, and the different views of the same ritual taken by different participants; the growth of religious commerce from early modern times on. Topics will be organized roughly chronologically but the emphasis is on broad change rather than historical coverage

**Spring 2025: HSEA UN3851**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HSEA 3851	001/11682	W 4:10pm - 6:00pm 409 International Affairs Bldg	Robert Hymes	3.00	11/20

**HIST BC3864 Feast/Famine: Food Environment China. 4.00 points.**

Food has always been a central concern in Chinese politics, religion, medicine, and culture. This course takes an ecological approach to the provision, preparation, and consumption of food in Chinese history, from the Neolithic times to the post-socialist era today. In examining Chinese approaches to soil fertility, healthy diet, and culinary pleasures, we explore alternative food systems for a more sustainable future

**Spring 2025: HIST BC3864**

**HSEA GU4027 ISSUES IN EARLY CHINESE CIV. 4.00 points.**

The purpose of this course is to introduce students to the basic issues and problems in the study of early Chinese civilization, some theoretical and others methodological. Through the review of a long series of debates the course offers a quick entrance both to this early period of history and to these studies. Organized around problems, the course encourages critical thinking and contesting arguments and helps the students weigh different positions addressing the problems. By doing so, the course guides the students to search for frontline questions and to probe possible ways to solve the problems. The course deals with both the written records (inscriptional and textual) and the material evidence, and the student can well expect this course to serve as also updates of the most fascinating archaeological discoveries in China made in the past decades. The course is designed as an upper-level undergraduate and MA course; therefore, it is recommended that undergraduate students should take "ASCE V2359: Introduction to East Asian Civilizations: China" before participating in this course.

**Spring 2025: HSEA GU4027**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**FRHS GU4354 RACIAL HISTORIES OF EUROPE (15th-21st Centuries). 4.00 points.**

After being somewhat eclipsed after World War II, race has reemerged as a central preoccupation in Western European politics, making it more important than ever to understand how the concept and practices have developed and how they have shaped the history of Europe. In this class, we will focus on historiographical debates about race, including how and when it emerged as an ideology and how it has permeated the history of modern Europe. We will emphasize the histories of Spain, France, Britain and Germany. We will focus on a set of connected debates, starting with the relationship between race and modernity. Was race a product of internal European dynamics in the late middle-ages related to the status of Christians of Jewish and Muslim origin or of social relations in the Americas following the conquest and the Atlantic slave trade? How much does the history of race share with the history of capitalism and imperialism? What was the role of scientific and artistic representations in the production of race? How was race connected to class, gender and sex? How and when did it become a central dimension of historical narratives and especially of how Europeans told their history? How shall we understand the relationship between antisemitism and other forms of racism in the longue durée history of Europe? How have historians analyzed the role of racism in the final solution and, conversely, how has race been transformed after the holocaust and into the present?

**Spring 2025: FRHS GU4354**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FRHS 4354	001/17238	T 2:10pm - 4:00pm 308a Lewisohn Hall	Emmanuelle Saada	4.00	15/18

**HSEA GU4891 LAW IN CHINESE HISTORY. 4.00 points.**

An introduction to major issues of concern to legal historians as viewed through the lens of Chinese legal history. Issues covered include civil and criminal law, formal and informal justice, law and the family, law and the economy, the search for law beyond state-made law and legal codes, and the question of rule of law in China. Chinese codes and course case records and other primary materials in translation will be analyzed to develop a sense of the legal system in theory and in practice

**Spring 2025: HSEA GU4891**

## SCIENCE AND SOCIETY

The Science and Society minor is an interdisciplinary collection of courses for students who wish to explore critical approaches to and societal implications of science, technology, health, and environment. The aim of the minor is to equip students in all fields, whether humanities, social sciences, or STEM disciplines, to critically interact with both new developments and long histories of science and technology, enabling them make sense of and intervene on societal grand challenges on individual, community, and global scales.

The Science and Society minor is informed by the existing field of Science and Technology Studies (STS), an established interdisciplinary field that leverages methods and theories from the social sciences and humanities to interrogate the impacts not only of science and technology on society and culture but also of society and culture on science and technology.

### FACULTY INFORMATION - TO BE UPDATED

### GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

#### Program Planning for all Students

The Science and Society minor is comprised of one required introductory course and additional courses offered by a variety of departments at Columbia and Barnard. For advising, consult with the Director of Undergraduate Studies, Dr. Madi Whitman.

## UNDERGRADUATE PROGRAMS OF STUDY

### Minor in Science and Society

- HIST/SCSO UN2972: Unsettling Science (1)
- Method or theory course (1)
  - Can be drawn from a number of departments, e.g., anthropology, sociology, history, the natural sciences
- Electives (3)
  - Students are encouraged to select electives according to chosen tracks (e.g., history of science, environmental health, race and technology) in consultation with the Director of Undergraduate Studies and affiliated Science and Society faculty. See the list of courses for the current semester for examples of elective courses.

## FALL 2024

### BC2385: Global Environmental History | A. Caglioti

Considers how the relationship between the environment and society in history led to the current climate crisis.

### BC3244: Environmental Sociology | M. Hernandez

Examines the social roots and impacts of environmental contamination and disaster

### BC3379: Water Histories | A. Caglioti

Explores the relationship between water and society in history.

### BC3956: Surveillance | R. Serhan

Explores the various ways we are monitored by state authorities and corporations.

### GU4425: Climate, Religion and Colonialism | R. Taylor-Seymour

Examines intersections between religion and climate through the lens of colonialism.

### GU4501: History of the Climate Crisis | L. Aronowsky

Considers the historical, social, ethical, and political life of global warming in an effort to better understand the present climate age.

### UN1203: The Social Animal in the Digital Age | S. Venkatesh

Considers the impact of modern technology on society.

### UN2103: Architectural Design | M. Schwartzman

Explores modes of visualization, technologies of mediation, and environmental transformations.

### UN2523: Health Inequality in the Modern US | S. Roberts

Explores historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics.

### UN2530: Life Beyond Emergency | A. Siddiqi

Examines constructed environments and spatial practices in contexts of displacement.

**UN2972: Unsettling Science | M. Whitman**

A dive into the interplay between science, technology, health, environment, and society.

**UN2978: Science and Pseudoscience: Alchemy to AI | P. Smith, M. Whitman**

A historical account of how science and pseudoscience developed in tandem.

**UN3020: Science Saves | C. Martini**

Studies the various intersections of science, technology, society, and religion.

**UN3203: Power, Politics & Society | R. Serhan**

Introduces students to the field of political sociology.

**UN3712: African Climate and History | J. Smerdon, R. Stephens**

Examines how Africa's climate has changed and the consequences for the the continent's residents

**UN3811: Toxic | V. Agard-Jones**

Explores the conditions that give rise to local body burdens, plumbing the history of toxicity as a category.

**UN3976: Anthropology of Science | G. Jae**

Examines specific debates in the history and philosophy of science.

**W4308: Sexuality and Science | R. Jordan-Young**

Examines research on human sexuality, from early sexology through contemporary studies.

**UN3356: Earth Works | R. Morris**

An anthropological analysis of extractive economies.

**BC3959: How Race Gets Under Our Skin | D. Reed**

Examines how institutionalized racism and the structure of health care contributes to the neglect and sometimes abuse of racial and ethnic minorities.

**SPRING 2024****HSAM UN2901 DATA:PAST, PRESENT AND FUTURE. 3.00 points.**

Lect: 1.5. Lab: 1.5.

Data-empowered algorithms are reshaping our professional, personal, and political realities, for good--and for bad. Data: Past, Present, and Future moves from the birth of statistics in

the 18th century to the surveillance capitalism of the present day, covering racist eugenics, World War II cryptography, and creepy personalized advertising along the way. Rather than looking at ethics and history as separate from the science and engineering, the course integrates the teaching of algorithms and data manipulation with the political whirlwinds and ethical controversies from which those techniques emerged. We pair the introduction of technical developments with the shifting political and economic powers that encouraged and benefited from new capabilities. We couple primary and secondary readings on the history and ethics of data with computational work done largely with user-friendly Jupyter notebooks in Python

**HIST GU4588 RACE, DRUGS, AND INEQUALITY. 4.00 points.**

Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor's permission.

Note: Admission to this course is by application only. Please use the form found in the SSOL course message. Through a series of secondary- and primary-source readings, digital archive research, and writing assignments, we will explore the history of harm reduction from its origins in syringe exchange, health education, and condom distribution, to the current moment of decriminalization, safe consumption politics, and medically assisted treatment (MAT). At the same time, we will think about how harm reduction perspectives challenge us to rethink the histories and historiography of substance use, sexuality, health, and research science. Along with harm reduction theory and philosophy, relevant concepts and themes include syndemic and other epidemiological concepts theory; structural inequities (structural violence, structural racism); medicalization; biomedicalization; racialization; gender theory and queer theory; mass incarceration, hyperpolicing, and the carceral state; the "housing first" approach; political and other subjectivities; and historical constructions of "addiction"/"addicts", rehabilitation/recovery, what are "drugs," and the "(brain) disease model"/NIDA paradigm of addiction. Readings are multidisciplinary and include works in history, epidemiology, anthropology, sociology, psychology, and other disciplines, and the syllabus will include at least one field trip to a harm reduction organization. Students will complete a short research project. There are no official prerequisites. However, students should have some academic or professional background in public health, African-American/ethnic studies history or social science, and/or some other work related to the course material. Admission to this course is by application only. Please use the form found in the SSOL course message. Students may not enroll in this course on a pass/fail basis or as an auditor without instructor permission. Student assessment will be based on various criteria: Class discussion participation - 35# Presentation of the readings - 15# Writing assignments - 50#

### **HIST UN3437 CORP BEHAVIOR # PUBLIC HEALTH. 4.00 points.**

Priority given to majors and concentrators, seniors, and juniors.

In the decades since the publication of *Silent Spring* and the rise of the environmental movement, public awareness of the impact of industrial products on human health has grown enormously. There is growing concern over BPA, lead, PCBs, asbestos, and synthetic materials that make up the world around us. This course will focus on environmental history, industrial and labor history as well as on how twentieth century consumer culture shapes popular and professional understanding of disease. Throughout the term the class will trace the historical transformation of the origins of disease through primary sources such as documents gathered in lawsuits, and medical and public health literature. Students will be asked to evaluate historical debates about the causes of modern epidemics of cancer, heart disease, lead poisoning, asbestos-related illnesses and other chronic conditions. They will also consider where responsibility for these new concerns lies, particularly as they have emerged in law suits. Together, we will explore the rise of modern environmental movement in the last 75 years

## **HUMAN RIGHTS**

### **THE HUMAN RIGHTS DEPARTMENT**

Program Office: Institute for the Study of Human Rights; 61 Claremont Ave (Interchurch Center), 3rd floor; 646-745-8577; [uhrp@columbia.edu](mailto:uhrp@columbia.edu)

Departmental Website: <http://humanrightscolumbia.org/education/undergraduate>

Director of Undergraduate Studies: Prof. Glenn Mitoma, [gtm2136@columbia.edu](mailto:gtm2136@columbia.edu)

Deputy Director, ISHR: Gergana Halpern, [gh2410@columbia.edu](mailto:gh2410@columbia.edu)

Undergraduate Education Manager: Julia Mannes, [jmm2447@columbia.edu](mailto:jmm2447@columbia.edu)

### **THE STUDY OF HUMAN RIGHTS**

Human rights are central to contemporary understandings of justice and equality and have crucial bearing on the ability to assess and respond to emerging technological, economic, social, cultural, and political issues.

The Undergraduate Human Rights Program at the Institute for the Study of Human Rights engages students in this dynamic and evolving field and enhances their knowledge, skills, and commitment to human rights. The program offers a major and a minor in human rights (and a concentration for students who entered Columbia prior to the 2024-25 academic year). It provides students the opportunity to deepen their knowledge and explore their interests in human rights outside the classroom, and works to strengthen and support

the undergraduate human rights community on campus. More information on academic and extracurricular events, opportunities, and resources for undergraduate human rights students is available on the program's website. For an advising appointment, please e-mail [uhrp@columbia.edu](mailto:uhrp@columbia.edu).

## **STUDENT ADVISING**

### **Consulting Advisers**

Prior to each semester, students should submit a major, minor, or concentration worksheet. These worksheets are also available on the ISHR undergraduate program website. Students may also e-mail [uhrp@columbia.edu](mailto:uhrp@columbia.edu) to set up an advising appointment.

### **Enrolling in Classes**

Students are encouraged to take Introduction to Human Rights (HRTS UN 3001 ) early in their studies, if possible.

We offer a selection of human rights courses at the 3000- and 4000-level. Courses offered by other schools or departments, which are pre-approved for the degree can be found on our [undergraduate course list](#).

If you have questions about course approvals or enrollment in HRTS classes, please email [UHRP@columbia.edu](mailto:UHRP@columbia.edu).

### **Preparing for Graduate Study**

Students interested in pursuing graduate human rights studies may be interested in applying for the Human Rights Studies B.A./M.A. option. Applicants should apply the semester before the one in which they intend to begin taking courses that will count toward the M.A. For information on how to apply for the Human Rights Studies Master of Arts (HRSMA) program and relevant deadlines, please visit this [page](#). All students would complete the 30 credit points and 2 Residence Units required of the M.A. program, but the joint option allows students to receive an M.A. one semester earlier than would normally be possible. Please refer to the [B.A./M.A. page](#) of the website for additional information.

Students are also encouraged to review the information below pertaining to the Human Rights Research Award, the Senior Thesis Track, and other Professional Development resources, which may be of interest to those planning to pursue graduate studies.

## **DEPARTMENTAL HONORS AND SENIOR THESIS**

### **Departmental Honors**

To be eligible for departmental honors, a student must satisfy all the requirements for the major, maintain a 3.6 GPA in the major, maintain an overall GPA of 3.6, and complete a thesis of sufficiently high quality to merit honors. A thesis is required for all students who wish to be considered for honors, but does not guarantee honors. Students who graduate in October, February, or May of a given academic year are eligible for

honors consideration in May. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

Students interested in writing a thesis for honors consideration complete a two semester course sequence during their final year of study. In the fall, students take HRTS UN3994 Human Rights Senior Seminar: Research Methods, which introduces students to various research methods and guides them through the proposal development process. In the spring, students take HRTS UN3996 Human Rights Thesis Seminar. This course will consist of group sessions, where students will present their work and participate in discussions, as well as individual meetings with their thesis supervisor, who is also the course instructor.

Students are encouraged to write a thesis, but they should not do so solely to be eligible for honors consideration. Rather, students should consider enrolling in the thesis seminar in order to demonstrate their capacity to produce a work of original research and develop more specialized knowledge of a human rights issue. You can learn more about specific timelines for Thesis application at <https://www.humanrightscolumbia.org/education/undergraduate/human-rights-major>.

### Undergraduate Research Opportunities

#### Human Rights Research Award

In addition to the Senior Thesis Track, the ISHR Human Rights Research Award provides students with an opportunity to gain valuable research experience, while supporting the work of Columbia faculty conducting human rights-related research. Students who receive the Award are expected to complete approximately 80-120 hours of research assistance during the academic year. The research opportunities selected for each academic year are circulated to students in the Fall semester. ISHR will award one stipend per research opportunity in the amount of \$1,500. Priority will be given to HRSMA and UHRP students. Please visit our [financial resources page](#) for this and other opportunities.

### Academic Prizes and Professional Development

ISHR fosters undergraduate students' academic and professional development by awarding prizes and stipends, organizing events and activities with human rights practitioners and experts, and connecting students with resources related to the human rights field. Specifics are available on our [Professional Development and Financial Resources page](#).

Jo Becker (Adjunct Associate Professor of International and Public Affairs)

Louis Bickford (Adjunct Professor of Political Science)

Michael Bochenek (Adjunct Associate Professor)

Noah Chasin (Adjunct Associate Professor)

Belinda Cooper (Adjunct Assistant Professor)

Bruce Cronin (Adjunct Professor)

Paisley Currah (Adjunct Professor)

Jackie Dugard (Senior Lecturer in the Discipline of Human Rights)

Tracey Holland (Adjunct Assistant Professor)

Daniela Ikawa (Adjunct Assistant Professor)

Glenn Mitoma (Lecturer in the Discipline of Human Rights)

Shourideh Molavi (Senior Lecturer in the Discipline of Human Rights)

Andrew Nathan (Class of 1919 Professor of Political Science)

Julie Rajan (Adjunct Associate Professor)

Joseph Slaughter (Director, Institute for the Study of Human Rights; Associate Professor, Department of English and Comparative Literature)

Elsa Stamatopoulou (Director, Indigenous Peoples' Rights Program)

Tim Wyman-McCarthy (Lecturer in the Discipline of Human Rights)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

Welcome to the Institute for the Study of Human Rights. You might want to join the [ISHR Newsletter](#) or contact [UHRP@columbia.edu](mailto:UHRP@columbia.edu) to begin receiving undergraduate announcements.

### Program Planning for all Students

Guidelines for all Human Rights Majors and Minors

Human Rights Concentrators who entered Columbia in or before the 2023-2024 academic year should consult the requirements at the bottom of this page regarding Concentrations. Students should also consult the general academic policies of their school.

#### Planning Forms

Prior to each semester that they take courses in the program, students should submit a [major](#), [minor](#), or [concentration](#) worksheet by emailing [uhrp@columbia.edu](mailto:uhrp@columbia.edu). Students may also email [UHRP@columbia.edu](mailto:UHRP@columbia.edu) to set up an advising appointment.

#### Grades

No course with a grade of D or lower is credited towards the major or minor. One course, with the exception of the three

core courses required for the major or the one core course for the minor, can be taken for Pass/D/Fail. The student must receive a grade of P for the course to count towards the requirements of the major. All other courses must be taken for a letter grade. All seminar courses must be taken for a letter grade.

### Double-Counting

In accordance with the academic policies of their school, students may double-count a maximum of two classes towards the Human Rights Major or Minor with another program's major or minor, provided that the classes are approved to fulfill a requirement for each program. Students should consult the academic policies of their school for specific information regarding the double-counting of courses taken to fulfill Global Core or other school requirements.

### Summer Courses and Courses Taken at Other Columbia Schools

Courses taken at Barnard College and summer courses taken through the School of Professional Studies may be counted for the major or minor requirements, with departmental approval.

## Course Numbering Structure

Courses 3999 and below are strictly undergraduate courses; 4000-level courses are for graduate and advanced undergraduate students, 6000-level and above are for graduate students with limited exceptions.

## Guidance for First-Year Students

If you are considering pursuing a Human Rights Major or Minor, we would be glad to meet with you and tell you more about the degree, share advising tips, and help you familiarize yourself with our programs and the work of the Institute for the Study of Human Rights (ISHR) more broadly. Please don't hesitate to contact us at [uhrp@columbia.edu](mailto:uhrp@columbia.edu), sign up for the [ISHR Newsletter](#), which disseminates information about human rights events, opportunities, and initiatives on campus, or visit our [website](#). Most ISHR events are open to the entire Columbia community and we look forward to welcoming all students interested in human rights (even if you have not declared your major/minor yet!).

## Guidance for Transfer Students

### Transfer Credit/Study Abroad Credit

Human rights students may transfer a maximum of three courses (nine Columbia-equivalent credits) towards the Major or one course (three Columbia-equivalent credits) towards the Minor for courses taken at another institution. This includes study abroad credit and Advanced Placement courses. No more than one AP course can be transferred towards the major or the minor. Typically no more than one transfer course can count toward the distributional, and the remainder would count for

the specialization. The application of transferred courses must be approved by the Director of Undergraduate Studies or the undergraduate adviser.

Students wishing to count transfer courses toward the major or the minor should email [uhrp@columbia.edu](mailto:uhrp@columbia.edu) with their Entrance/Transfer Credit Report or a transcript, the syllabi of the courses they want to count toward departmental requirements, and a statement of how they want to apply the transfer credits to the requirements.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

All students in the program complete HRTS UN3001 INTRODUCTION TO HUMAN RIGHTS

### Major in Human Rights

The major in human rights requires 10 courses for a minimum of 31 points as follows. One of the distributional or specialization courses must be a seminar.

#### Core Courses

HRTS UN3001	INTRODUCTION TO HUMAN RIGHTS
HRTS UN3190	INT'L HUMAN RIGHTS LAW
HRTS UN3995	HUMAN RIGHTS SENIOR SEMINAR

#### Distributional Requirement \*

Students take one course in three of these four categories (three courses), for a minimum of 9 credit points.

- Politics and history
- Culture and representation
- Political theory and philosophy
- Social and economic processes

#### Specialization Requirement \*\*

Students fulfill the specialization requirement by focusing on a particular discipline, taking four courses for a minimum of 12 credit points offered by a single department or institute.

\* Please see the ISHR [undergraduate course list](#) for the current list of courses that fulfill the distributional requirement of the major.

\*\*The goal of the specialization requirement is to equip students with the tools of a specific discipline. Students should inform the human rights program of their intended specialization before taking courses to fulfill this requirement. As a general rule, fields of study listed as [academic programs](#) on the bulletin are approved for the specialization requirement if a free-standing major is offered. Courses approved for that major are generally approved for the human rights specialization. However, language acquisition and studio courses may not be taken to fulfill the specialization requirement. Students are encouraged to take any core

and/or methodology courses required by a program when fulfilling their specialization requirement. Students are also encouraged to take courses within their chosen specialization that focus on human rights issues, but the specialization requirement can be fulfilled by taking any four courses within the same discipline. For example, if a student's specialization is Political Science, he or she can fulfill the specialization requirement by taking any four POLS courses.

## Minor in Human Rights

The minor in human rights requires 5 courses for a minimum of 15 points as follows:

### HRTS UN3001 INTRODUCTION TO HUMAN RIGHTS

Four additional human rights courses.

Please see the ISHR [undergraduate course list](#) for the current list of courses that fulfill the Minor requirements.

## B.A. / M.A. Program

Applicants interested in the Human Rights Studies B.A./M.A. option should apply the semester before the one in which they intend to begin taking courses that will count toward the M.A. For information on how to apply for the Human Rights Studies Master of Arts (HRSMA) program and relevant deadlines, please visit this [page](#). All students would complete the 30 credit points and 2 Residence Units required of the M.A. program, but the joint option allows students to receive an M.A. one semester earlier than would normally be possible. Please refer to the [B.A./M.A. page](#) of the website for additional information.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

As of Fall 2024, the University is phasing out Concentrations. Students who entered Columbia prior to the 2024-25 academic year may pursue a Concentration in Human Rights. Students who previously enrolled in the Concentration are also welcome to discuss switching to a Minor (details above). The policies outlined above regarding Grades and Double-Counting Courses also apply to students pursuing the Human Rights Concentration.

## Concentration in Human Rights

The concentration in human rights requires 8 courses for a minimum of 24 points as follows:

HRTS UN3001 INTRODUCTION TO HUMAN RIGHTS

Seven additional human rights courses, one of which must be a seminar.

Please see the ISHR [undergraduate course list](#) for the current list of courses that fulfill the concentration requirements.

### HRTS UN3001 INTRODUCTION TO HUMAN RIGHTS. 3.00 points.

Evolution of the theory and content of human rights; the ideology and impact of human rights movements; national and international human rights law and institutions; their application with attention to universality within states, including the U.S. and internationally

Fall 2024: HRTS UN3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3001	001/10538	M W 2:40pm - 3:55pm 501 Northwest Corner	Andrew Nathan	3.00	136/150

### HRTS UN3190 INT'L HUMAN RIGHTS LAW. 3.00 points.

This course will introduce students to the international law of human rights, and give a basic orientation to fundamental issues and controversies. The course has two principal focal points: first, the nuts and bolts of how international law functions in the field of human rights, and second, the value and limitations of legal approaches to a variety of human rights issues. Throughout the course, both theoretical and practical questions will be addressed, including who bears legal duties and who can assert legal claims, how these duties might be enforced, and accountability and remedy for violations. Attention will be given to how international law is made, what sorts of assumptions underlie various legal mechanisms, and how the law works in a variety of contexts

Fall 2024: HRTS UN3190

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3190	001/11500	T 6:10pm - 8:00pm 613 Hamilton Hall	Belinda Cooper	3.00	22/22

Spring 2025: HRTS UN3190

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3190	001/14152	W 6:10pm - 8:00pm 613 Hamilton Hall	Christian De Vos	3.00	23/22

### HRTS UN3960 Refugees, Rights, and Representation. 3.00 points.

Given that, according to the UNHCR, there are currently 108.4 million forcibly displaced people worldwide, over 35 million of whom are refugees, it is unsurprising that their predicament preoccupies international lawyers, academics from the social sciences to the humanities, engineers and economists, journalists, policy specialists at NGOs, government officials, artists, tech companies, philanthropists, and, most significantly, displaced persons themselves. This seminar asks how these different actors draw on specific discourses and arguments—technological, scientific, personal, moral, historical—as they construct the figure and the problem of ‘the refugee.’ We will

recognize refugee crises as an issue of urgent public concern as well as an occasion for interrogating how such crises are represented across academic, legal, and cultural conversations. Does displacement caused by personal persecution, natural disasters and climate change, armed conflict, or economic deprivation invite different kinds of international attention or sympathy? Where does the sanctuary promised the citizen end and the hospitality owed the stranger begin? How do contemporary developments in climate science, social media technologies, and big data intersect with discourses on refugees? And if 'the refugee' tells the lie to the nation state's capacity to account for the world's people, what other forms of political and social organization does the refugee live, inspire, create, or warn against? To consider such questions, we will examine political theory, history, anthropology, and philosophy; analyze international legal documents, policy proposals, investigative journalism, and NGO reports; and engage with novels, poetry, film, and photography, among other materials

**HRTS UN3970 Introduction to Genocide Studies. 3.00 points.**

This course provides students with an introduction to the study of genocide. In this class, we will take a critical approach to understanding genocide, meaning: we will try to avoid easy moralizing and distancing of genocide; we won't take existing legal and political definitions of genocide for granted; and we will think about power in relation to genocide perpetration and prevention. Our strategy will be interdisciplinary, meaning: we will explore the ways historians, psychologist, lawyers, political scientists, and others have tried to understand genocide; and we will reflect on the limits on what and how we can know about genocide as a human experience. This course aspires to be practical and applied, meaning this course fundamentally anti-genocidal in its purpose, and students will have the opportunity to contribute to and/or develop practical efforts commemorate, advocate against, or prevent the perpetration of genocide

**Fall 2024: HRTS UN3970**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3970	001/10539	W 10:10am - 12:00pm 306 Uris Hall	Glenn Mitoma	3.00	20/22

**HRTS UN3994 HUMAN RIGHTS SENIOR SEMINAR RSRCH METHOD. 4.00 points.**

This course aims to introduce students to human rights research methods, while providing them with practical research tools. The course will be tailored to students' interests, disciplinary backgrounds and research areas. The specific topics students will research and the methods they will employ will determine the substantive focus of readings. During the course we will ask the following questions: 'what is human rights research?', how do you carry out research in an interdisciplinary field?, what distinguishes academic research from applied research and advocacy? While answering these questions, you will become familiar with the literature on human rights methodologies, and you will engage in analysis and critical assessment of important

human rights research literature. In addition, the course gives a practical approach to research methodology. You will learn about a diverse set of methodologies, such as interviewing and focus groups, archival research, ethnographic and participant observation, interviewing focus groups, conducting online research; interpretive and non-empirical methods and basic quantitative methodologies to be employed in the study of human rights. As you learn about different methodological approaches, you will develop your own research project. Scholars and practitioners in the field of human rights research will present their work and engage in discussions with students about their own research, challenges, successes and publication venues. NB: This course is geared towards students who commit to writing a senior thesis. It is part of a two-course sequence: HRTS UN3994 Section 001 Human Rights Senior Seminar: Research Methods in the fall and HRTS UN3996 Human Rights Thesis Seminar in the spring. Students who do not intend to write a thesis should enroll in HRTS UN3995 section 001 Human Rights Senior Seminar, which is a one-semester course taught each semester focused on writing a seminar paper

**Fall 2024: HRTS UN3994**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 3994	001/10643	W 2:10pm - 4:00pm 302 Alfred Lerner Hall	Tracey Holland	4.00	10/20

**HRTS UN3995 HUMAN RIGHTS SENIOR SEMINAR. 4.00 points.**

Prerequisites: *HRTS V3001*.

The senior seminar is a capstone course required for the human rights major. The seminar provides students the opportunity to discuss human rights from a variety of disciplinary perspectives and to explore various theoretical approaches and research methodologies. Students undertake individual research projects while collectively examining human rights through directed readings and discussion

**Fall 2024: HRTS UN3995**

**HRTS GU4011 Indigenous Rights and Settler Colonialism in North America. 3.00 points.**

**Course Description** This interdisciplinary course explores both the rights of Indigenous people in settler colonies as well as the complex historical and theoretical relationship between human rights and settler colonialism. We will pursue three lines of inquiry. The first critically explores how central political concepts of the international state system—sovereignty, property, territory, self-determination—entwine the histories of settler colonialism and human rights. The second charts the rise and mechanisms of the international Indigenous rights movement, in particular its activity at the United Nations leading to the Declaration on the Rights of Indigenous Peoples in 2007, and its contributions to ongoing debates on environmental and climate justice, group rights, natural resources and territorial autonomy, and cultural rights. The third unit interrogates settler state responses to the movement for Indigenous human rights, such as cooptation, recognition, and apology. Through readings drawn from history, ethnography, political and critical theory, international relations, Native studies, law, and documents produced by intergovernmental organizations and NGOs, we will explore and deepen the tensions between human rights as a theory and practice and the political lives and aspirations of Indigenous peoples and activists. What technologies of rule—such as residential school systems and property law—do settler colonial states deploy to dispossess Indigenous peoples? How have Indigenous peoples used the international human rights regime to mobilize against such dispossession? How have these states resisted the global Indigenous rights movement? And can the human rights regime, rooted in the international state system, meaningfully contribute to anticolonial movements in liberal settler colonies? While we will touch on settler colonialism as it manifests around the globe, the course's geographical focus will be on North America. **Course objectives** Throughout this course, you will: Develop a historically-informed understanding of both international indigenous rights and settler colonialism as idea, practice, institution, and discourse; Place the literature on human rights and settler colonialism into critical conversation in order to deepen existing conceptual problems and generate new ones; Identify the main arguments in theoretical texts, legal and policy documents, and public debates; Read and

think across disciplines to develop arguments that speak to multiple scholarly communities; Produce an original argument in relation to other authors' arguments, and construct and organize an analytical, argumentative paper; Communicate ideas effectively in class discussions and presentations; Bring case studies and questions encountered outside the course into the classroom to challenge or nuance the assigned material

**Fall 2024: HRTS GU4011**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**HRTS GU4215 NGOs # THE HUMAN RIGHTS MOVEMENT. 3.00 points.**

This class takes a social movement perspective to analyze and understand the international human rights movement. The course will address the evolution of the international human rights movement and focus on the NGOs that drive the movement on the international, regional and domestic levels. Sessions will highlight the experiences of major human rights NGOs and will address topics including strategy development, institutional representation, research methodologies, partnerships, networks, venues of engagement, campaigning, fundraising and, perhaps most importantly, the fraught and complex debates about adaptation to changing global circumstances, starting with the pre-Cold War period and including some of the most up-to-date issues and questions going on in this field today

**Fall 2024: HRTS GU4215**

**HRTS GU4270 SOCIAL MEDIA AND HUMAN RIGHTS. 3.00 points.**

**PRIORITY:HRSMA. GRAD & UNDERGRAD(3&4YR) ON 1ST DAY OF TERM**

This course examines how changes in information and communications technology have, over the past two decades, fundamentally transformed the practices of civil society actors engaged with human rights issues. New communications tools such as Twitter, blogs, and Facebook have changed the ways that organizations communicate with their followers and seek to influence public debate. The increasing accessibility of analytic tools for researching and visualizing changing patterns of human rights abuse has empowered groups to better understand and respond more forcefully to these issues. Indeed, the use of social media as a communications tool has made it a data source for those monitoring and analyzing patterns of activity, in ways that draw increasingly on the techniques of big data analysis

### **HRTS GU4380 Advocacy for Socio-Economic Rights. 3.00 points.**

This course will examine practical issues, opportunities, tactics and strategies to advocate for economic and social rights. The course will incorporate central debates about economic and social rights, such as how to identify violators and define state responsibility, whether these rights can be litigated, and how to make implementable recommendations for change, measure implementation and measure impact. The course will also look more in depth at the standards and fulfillment challenges on several of the key rights including health, housing, education, and labor. Throughout the course, you will focus on one economic and social rights topic of your choice. Through the lens of your chosen topic, you will review how organizations and social movements have engaged to affect change on similar issues, and use that research to explore many of the practical skills of advocacy and campaigning: framing recommendations and calls to action; drafting policy briefs; crafting media pitches and social media content; and designing and evaluating an overall advocacy strategy

Spring 2025: HRTS GU4380

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **HRTS GU4400 SEXUAL ORIENT,GENDR ID,HUM RTS. 3.00 points.**

PRIORITY:HRSMA. GRAD & UNDERGRAD (3&4YR) ON 1ST DAY OF TERM

Debates over the rights of lesbian, gay, bisexual and transgender people have never been more visible in the international arena. Advocates are beginning to have some success in putting sexual orientation and gender identity on the agenda for inclusion in human rights instruments. But in many local and regional contexts, state-sanctioned homophobia is on the rise, from the official anti-gay stance of Russia featured during the Sochi Winter Games to the passage of Mississippi's anti-gay bill and Uganda's anti-homosexuality act. This course examines these trends in relation to strategies pursued by grassroots activists and NGOs and the legal issues they raise, including marriage and family rights, discrimination, violence, torture, sex classification, and asylum. We will also focus on current debates about the relation between sexual rights and gender justice, tensions between universalist constructions of gay/trans identity and local formations of sexual and gender non-conformity, and legacies of colonialism

### **HRTS GU4460 Climate Justice. 3.00 points.**

The unfolding climate emergency occurs at the confluence of three global systems of domination – capitalism, racialized imperialism, and patriarchy. Premised as they are on exploitation, competition, and inequality rather than consideration, cooperation and balance, these systems of

domination not only have caused the crisis but are seemingly unable to resolve it. Among the injustices of the contemporary impasse is the likelihood the people who have least benefited from the global (dis)order, and especially minorities in the global south, will be the worst affected casualties of climate change. Encompassing a focus on equity and frameworks for accountability and redress, the human rights paradigm is a useful lens through which to analyze the emergency, exert accountability, and imagine better futures. It is against this backdrop that this interdisciplinary (climate science, law, politics, social science, development studies and anthropology) course on Climate Justice has been introduced to the Human Rights Studies MA program. This 3-credit course addresses contemporary issues in the evolving discourse and epistemology of climate justice. How should we understand the climate emergency from a social justice perspective? What terminologies, discourses and paradigms are useful? How have individuals, non-government organizations and social movements sought to overcome climate change vulnerabilities and advance climate justice? What litigation, law and policy initiatives have been brought, and with what level of success? And what alternative models of living, working and being are conceivable for a more socially, ecologically, and existentially sustainable world?

Spring 2025: HRTS GU4460

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 4460 001/11537		T 12:10pm - 2:00pm 507 Philosophy Hall	Jacqueline Dugard	3.00	7/22

### **HRTS GU4500 SOCIO-ECONOMIC RIGHTS. 3.00 points.**

The course addresses selected issues in the protection of socio-economic rights in an international and comparative perspective. Socio-economic rights have emerged from the margins into the mainstream of human rights. The course will take this status as its starting point and examine the human rights to housing, food, water, health and sanitation in depth. We will explore conceptual issues through the lens of specific rights which will help us ground these principles and ideas in concrete cases. We will discuss developments on socioeconomic rights and examine their relevance in the United States as well as selected other countries, particularly those with progressive legislation, policies and jurisprudence. What is the meaning and scope of the rights to housing, food, water, health and sanitation? What is the impact of discrimination and inequalities on the enjoyment of socio-economic rights? How can governments be held accountable for the realization of human rights? What machinery is there at the international level to ensure that the rights are protected, respected and fulfilled? How can this machinery be enhanced? How can judicial, quasijudicial, administrative and political mechanisms be used at the domestic level? What is the role of different actors in the context of human rights, the role of States and individuals, but also (powerful) non-State actors and civil society? How have activists and policymakers responded to challenges? And

what lies ahead for the human rights movement in addressing economic and social rights in a multilateral, globalized world?

**Fall 2024: HRTS GU4500**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 4500	001/10542	T 12:10pm - 2:00pm 707 Hamilton Hall	Jacqueline Dugard	3.00	13/22

**HRTS GU4600 HUMAN RIGHTS IN ANTHROPOCENE. 3.00 points.**

In August 2016, a working group of the International Geological Congress voted to acknowledge a new geological epoch, following 11,700 years of the Holocene, and that it would be called The Anthropocene. The announcement indicated a new era in the earth's chronology marked by the consequences of human activity on the planet's ecosystems. Closely related to discussions of sustainability, investigations into the Anthropocene tend to focus on environmental and ecological issues while ignoring its social justice dimensions. This course will investigate how Human Rights has and will be impacted by the Anthropocene, with special attention paid to the human dimensions and consequences of anthropogenic change. Do new and troubling revelations about anthropogenic mistreatment of the earth and its resources modify or amplify the kinds of responsibilities that govern activity between individuals and communities? How do we scale the human response from the urban, to the periurban, to the rural? How must the study of Human Rights evolve to address violence and mistreatment associated not just among humans but also amid human habitats? What sorts of juridical changes must occur to recognize and respond to new manifestations of social injustice that relate directly to consequences of anthropogenic changes to the Earth system? Topics will include discussions of the Environmental Justice movement, agribusiness, access to (and allocation of) natural resources, population growth; its global impact, advocacy for stronger and more accountability through environmental legal change, biodiversity in urban environments, and the growing category of environmental refugees

**Fall 2024: HRTS GU4600**

**HRTS GU4650 CHILDREN'S RIGHTS ADVOCACY. 3.00 points.**

This course is designed to introduce contemporary children's rights issues and help students develop practical advocacy skills to protect and promote the rights of children. Students will explore case studies of advocacy campaigns addressing issues including juvenile justice, child labor, child marriage, the use of child soldiers, corporal punishment, migration and child refugees, female genital mutilation, and LGBT issues affecting

children. Over the course of the semester, students will become familiar with international children's rights standards, as well as a variety of advocacy strategies and avenues, including use of the media, litigation, and advocacy with UN, legislative bodies, and the private sector. Written assignments will focus on practical advocacy tools, including advocacy letters, op-eds, submissions to UN mechanisms or treaty bodies, and the development of an overarching advocacy strategy, including the identification of goals and objectives, and appropriate advocacy targets and tactics

**Fall 2024: HRTS GU4650**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 4650	001/10543	F 2:10pm - 4:00pm 301 Hamilton Hall	Michael Bochenek, Jo Becker	3.00	14/22

**HRTS GU4915 HUMAN RIGHTS # URBAN PUB SPACE. 3.00 points.**

Priority for 3rd & 4th yr CC/GS HUMR studs & to HRSMA studs

The course will explore the often-contested terrain of urban contexts, looking at cities from architectural, sociological, historical, and political positions. What do rights have to do with the city? Can the ancient idea of a right to the city tell us something fundamental about both rights and cities? Our notion of citizenship is based in the understanding of a city as a community, and yet today why do millions of people live in cities without citizenship? The course will be organized thematically in order to discuss such issues as the consequences of cities developments in relation to their peripheries beginning with the normative idea of urban boundaries deriving from fortifying walls, debates around the public sphere, nomadic architecture and urbanism, informal settlements such as slums and shantytowns, surveillance and control in urban centers, refugees and the places they live, catastrophes natural and man-made and reconstruction, and sovereign areas within cities the United Nations, War Crimes Tribunals. At the heart of our inquiry will be an investigation of the ways in which rights within urban contexts are either granted or withheld

**HRTS GU4930 INT'L HUMANITARIAN LAW/HUM RGTS. 4.00 points.**

Prerequisites: the instructor's permission. Please e-mail the instructor at [bc14@columbia.edu](mailto:bc14@columbia.edu).

This seminar will cover various issues, debates, and concepts in the international law of armed conflict (known as international humanitarian law), particularly as it relates to the protection of non-combatants (civilians and prisoners of war). In doing so, we will examine how international humanitarian law and human rights law intersect. Both sets of legal norms are designed to protect the lives, well-being, and dignity of

individuals. However, the condition of armed conflict provides a much wider set of options for governments and individuals to engage in violent, deadly action against others, including killing, forcibly detaining, and destroying the property of those designated as combatants. At the same time, the means of waging war are not unlimited, but rather are tightly regulated by both treaty and customary law. This course will examine how these regulations operate in theory and practice, focusing on the principles of distinction, proportionality, and military necessity

Spring 2025: HRTS GU4930

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HRTS 4930	001/11807	W 10:10am - 12:00pm 201 80 Claremont	Bruce Cronin	4.00	14/22

### **HRTS GU4950 HUMAN RIGHTS # HUMAN WRONGS. 3.00 points.**

MAIL INSTR FOR PERM.PRIORITY:3&4YR HUMAN RIGHT & HRSMA

Prerequisites: the instructor's permission. Please e-mail the instructor at [bc14@columbia.edu](mailto:bc14@columbia.edu).

Prerequisites: the instructors permission. Please e-mail the instructor at [bc14@columbia.edu](mailto:bc14@columbia.edu). This course will examine the tension between two contradictory trends in world politics. On the one hand, we have emerged from a century that has seen some of the most brutal practices ever perpetrated by states against their populations in the form of genocide, systematic torture, mass murder and ethnic cleansing. Many of these abuses occurred after the Holocaust, even though the mantra never again was viewed by many as a pledge never to allow a repeat of these practices. Events in the new century suggest that these trends will not end anytime soon. At the same time, since the middle of the twentieth century, for the first time in human history there has been a growing global consensus that all individuals are entitled to at least some level of protection from abuse by their governments. This concept of human rights has been institutionalized through international law, diplomacy, international discourse, transnational activism, and the foreign policies of many states. Over the past two decades, international organizations, non-governmental organizations, and international tribunals have gone further than any institutions in human history to try to stem state abuses. This seminar will try to make sense of these contradictions

Fall 2024: HRTS GU4950

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **HRTS GU4965 Gender-Based Violence # Human Rights. 3.00 points.**

The term 'gendercide' highlights a range of distinct and specific forms of violence executed against human beings based on their own gender self-identification as well as patriarchal assumptions about their gender. In this course, we will

examine research discerning, movements challenging, and the adjudication, and/or lack thereof, of Gender Based Violence (GBV) in several major categories traversing spatial, temporal, and ideological contexts, including: reproductive rights and health; trafficking and migration; and disaster and pandemics. It is critical to: interrogate the ideologies that drive and sustain GBV; examine in detail the harm it presents to human beings; explore what can be done to protect the security of those experiencing GBV; and to think about measures of prevention to guard additional human beings from experiencing it. The heart of the course will involve an intersectional analysis of specific case studies; highlighting the GBV associated with each case; examining the impact of GBV on human rights; and how GBV has been addressed in society. The close study of each case will assist students in illuminating intricacies, complexities, and challenges to human security in specific contexts

Fall 2024: HRTS GU4965

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **HRTS GU4970 Refugees, Citizenship, Migration. 3.00 points.**

This interdisciplinary course grapples with nation-states and cities at its margins, exploring the exclusions, oppositions, silences and, in particular, the 'Others' or 'in-betweens' of the nation-state as an organizing tool. 'Illegal migrants', 'refugees', 'asylum seekers', 'exiles', 'nomads', 'aliens', and other 'Others': these are all in-between figures, exceptions to a political order defined by membership in the city, borders, sovereignty and nation-states. In their very existence, they represent a challenge to this political order, as social and political theorists have long recognized. This seminar explores the dynamics, contradictions and politics surrounding nation-states and their Others with particular attention to the responses to them on the part of ostensibly liberal-democratic states. We examine the relationship between citizenship, statelessness, refugee-hood and migration as exceptions to a political order defined by membership in the city, borders, sovereignty and nation-states. Students will engage with film, fiction, visual animations and displacement maps to examine key theoretical and critical interventions by scholars who examine nation-states and cities at their margins. To this end, participants will examine key theoretical interventions by Hannah Arendt, Michel Foucault, Jacques Derrida, and Giorgio Agamben alongside scholars who have grappled with, contested, and developed their ideas, such as Étienne Balibar, Didier Bigo, Jacques Rancière, and Seyla Benhabib. With these texts, the participants will attempt to explore non-national or post-national alternatives to the nation-state and citizenship as a tool for planning and organization of people and space. Taken together, this course provides an alternative to conventional scholarship on this subject. It engages with and provides an alternative to the mainstream literature to take for granted

the inclusive and integrative character of nation-states and its respective memberships in the form of refugees, citizens and migrants. At first glance, the course may appear highly theoretical, but not to worry—we will move slowly through the texts and concepts together. The instructor will also ensure that we apply the ideas discussed in class to concrete and tangible case studies with examples given to enable easier access and collective learning

**Fall 2024: HRTS GU4970**

## ITALIAN

### THE DEPARTMENT OF ITALIAN:

Department website: <https://italian.columbia.edu/>

Office location: 502 Hamilton Hall

Office contact: 212-854-2308, [italian@columbia.edu](mailto:italian@columbia.edu)

Director of Undergraduate Studies: Konstantina Zanou, 212-853-8205 [kz2269@columbia.edu](mailto:kz2269@columbia.edu)

Directors of the Language Program (DLP):

Elementary: Felice Beneduce, [fb2321@columbia.edu](mailto:fb2321@columbia.edu)

Intermediate: Alessandra Saggin, [as2931@columbia.edu](mailto:as2931@columbia.edu)

## ITALIAN AND MEDITERRANEAN STUDIES

The Italian Department offers students in-depth knowledge of Italian language, literature, history, and culture from the Middle Ages to the present, by placing Italy within its Mediterranean culture in an intimate, seminar setting with the close supervision of the department's faculty.

The Major in Italian is designed to give students an advanced knowledge of the Italian language and to help them gain a deeper understanding of the literature, culture, history, and society of Italy in a globalized world.

The Minor in Italian is a smaller and more flexible course of study that allows students to develop an understanding of Italian literature, culture, history, and society.

## STUDENT ADVISING

Director of Undergraduate Studies: Konstantina Zanou, 212-853-8205 [kz2269@columbia.edu](mailto:kz2269@columbia.edu)

Directors of the Language Program (DLP):

Elementary: Felice Beneduce, [fb2321@columbia.edu](mailto:fb2321@columbia.edu)

Intermediate: Alessandra Saggin, [as2931@columbia.edu](mailto:as2931@columbia.edu)

## Consulting Advisers

- For questions regarding the major and the minors, students should contact the Director of Undergraduate Studies: Konstantina Zanou, 212-853-8205 [kz2269@columbia.edu](mailto:kz2269@columbia.edu)
- For questions regarding Italian language courses, students should contact the Directors of the Language Program (DLP):
  - Elementary: Felice Beneduce, [fb2321@columbia.edu](mailto:fb2321@columbia.edu)
  - Intermediate: Alessandra Saggin, [as2931@columbia.edu](mailto:as2931@columbia.edu)
- Students pursuing an Italian Major should download this worksheet.
- Students pursuing an Italian Minor should download this worksheet.
- Students pursuing a Minor in Mediterranean Studies should download this worksheet.

## Enrolling in Classes

1. For students pursuing an Italian Major or Minor, who have no prior knowledge of Italian, the required sequence is Elementary Italian I & II (UN1101-UN1102) or Intensive Elementary Italian (UN112) and Intermediate Italian I & II (UN2101-UN2102) or Intensive Intermediate Italian (UN2121).
2. Students with prior knowledge of Italian must take the Italian placement exam before declaring the Italian Major or Minor. Students may be exempted from the language requirement in Italian in one of three ways:
  - a. by presenting a score of 4 or 5 on the Advanced Placement Italian Exam
  - b. by presenting a score of 780 or above on the SAT Subject Test in Italian
  - c. by obtaining a satisfactory score on the department's placement examination

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of the Italian Major, the Italian Minor, and the Minor in Mediterranean Studies must be taken at Columbia University unless expressly permitted by the Director of Undergraduate Studies. Exceptions or substitutions

permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

## Advanced Placement

The department grants 3 credits for a score of 5 on the AP Italian Language exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3000-level (or higher) course with a grade of B or higher.

This course must be for at least 3 points of credit and be taught in Italian. Courses taught in English may not be used for language AP credit. The department grants 0 credits for a score of 4 on the AP Italian Language exam, but the foreign language requirement is satisfied.

## Barnard College Courses

All relevant Barnard courses are treated as part of the available curriculum and accepted in the Major and Minors. Students should consult with the Director of Undergraduate Studies on which Barnard courses are considered relevant.

## Transfer Courses

- When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor.
- No more than three (3) courses toward the Italian Major may be fulfilled with transfer credit; no more than one (1) course toward the Minors.
- Students should contact the Director of Undergraduate Studies to request review of transfer credit and submit the syllabi of courses taken outside Columbia for consideration.

## Study Abroad Courses

- Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor, the Director of Graduate Studies will need to confirm that they can be used toward requirements in the Major/Minors.
- Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad

that can be applied to the Major/Minor, and they must be approved by the Director of Undergraduate Studies.

## Summer Courses

- Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the Major/Minors only as articulated in Department guidelines or by permission of the Director of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.
- Beyond the [Columbia Summer in Venice Program](#), for students who stay in New York the Italian Department offers courses in Elementary and Intermediate Italian during the Summer.

## CORE CURRICULUM CONNECTIONS

- Students may be interested in course offerings in this department that can be taken in fulfillment of the Global Core requirement and the Language requirement of the Core Curriculum. See the list of approved courses for the requirement on this page of the Bulletin that lists all approved courses to see the list of courses in this department that have been approved for the requirement.
- For students who would like to build on their experience in Literature Humanities, the Italian Department offers courses on Dante, who has been on the Literature Humanities curriculum since its inception, and on Boccaccio. In addition, the Department offers Mediterranean Humanities I & II, a sequence of courses designed as the Global Core equivalent of Literature Humanities.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

The courses offered by the Italian Department introduce students to an array of methodologies in literary criticism, comparative literature, cultural studies, film studies, food studies, history of philology, intellectual and transnational history

### Senior Thesis Coursework and Requirements

Highly motivated Italian majors have the opportunity to pursue a senior thesis under the guidance of a faculty adviser in an area of Italian literature or culture of their choosing. The senior thesis tutorial (ITAL UN3993 Senior Thesis/Tutorial) will count for 3 points.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Majors in Italian who wish to be considered for departmental honors in Italian must (1) have at least a 3.6 GPA in their courses for the major and (2) complete a senior thesis or tutorial and receive a grade of at least A- within the context of the course ITAL UN3993. Normally, departmental honors are awarded to no more than one graduating senior.

### Academic Prizes

- The Italian Department awards through an internal selection process the following prizes:

For Columbia College students:

—Dino Bigongiari Prize: This prize was established by the former students and friends of Professor Bigongiari. It may be awarded annually to the Columbia College senior who has written an outstanding essay on Italian Civilization, or whose work in the regular Italian courses is judged most worthy of distinction.

—Helen and Howard R. Marraro Prize: This prize may be awarded annually to up to 2 Columbia College undergraduates of high academic distinction and promise in an area of study concerned with Italian culture, including art, music, comparative literature, history, economics, government, or in any other academic discipline. The prize was established in honor of Professor Marraro.

For General Studies students:

—The Medaglia D'Oro prize for excellence in Italian Studies. (The amount of this prize is \$300.)

—The Benedetto Marraro Prize for distinction in Italian Studies. (The amount of this prize is \$300.)

- The National Italian Honor Society (GKA)

Juniors and seniors (CC, GS, BC) who show superior scholastic performance in the field of Italian language, literature, and culture can be nominated as members of the National Italian Honor Society (GKA). The Honor Society “encourages college students to acquire a greater interest in, and a deeper understanding of, Italian culture, art and history.” Juniors and seniors with at least a B+ average in Italian who have taken courses in culture and/or literature are eligible for membership.

In addition, the Society offers a \$500 award to an essay (2000-2500 words) written in Italian. Students must be seniors completing an Italian Major or Minor in order to compete for the essay award.

## OTHER IMPORTANT INFORMATION

- A wide range of cultural programs are sponsored by the Italian Academy for Advanced Studies in America, including the activities of the Columbia Seminar on Modern Italian Studies. These programs enrich the learning experience of the students and offer opportunities to meet distinguished Italian and Italian-American visitors to the University.

The Columbia Summer in Venice Program, housed in the Casa Muraro, offers students the opportunity to immerse themselves in the culture, history, and language of Venice on a six-week summer program in the city. Students learn about the art, literature, music, culture and society of Venice and the Veneto region while also having the option to study and practice Italian. The program is not geared toward any particular major (although its courses count toward the Major and Minor in Italian, as well as the Minor in Mediterranean Studies), and students with no Italian language or art history background are eligible to apply.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

- Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.
- Students who entered Columbia in or before Fall 2023 may select from a curriculum of majors and minors and

concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

- The program of study is to be planned as early as possible with the Director of Undergraduate Studies. Students are advised to meet with the Director of Undergraduate Studies each semester in order to obtain program approval.

## Course Numbering Structure

With the exception of conversation courses, Elementary language classes are UN1XXX, Intermediate language classes are UN2XXX, and Advanced language classes are UN3XXX.

(Conversation courses do not count toward the Major or the Minor and all start with UN1XXX, regardless of level.) Any literature, culture or history courses at the 4XXX level start with GU and are suitable for undergraduate students as well as graduate students. Undergraduate literature, culture or history courses start with UN3XXXX.

## Guidance for First-Year Students

- For students pursuing an Italian Major or Minor the prerequisite is Intermediate II or a demonstrated equivalent level of knowledge of the Italian language.
- For students who have no prior knowledge of Italian, the required sequence is Elementary Italian I & II (UN1101-UN1102) or Intensive Elementary Italian (UN1121) and Intermediate Italian I & II (UN2101-UN2102) or Intensive Intermediate Italian (UN2121).
- Students with prior knowledge of Italian must take the Italian placement exam before declaring the Italian Major or Minor. Students may be exempted from the language requirement in Italian in one of three ways: a) by presenting a score of 4 or 5 on the Advanced Placement Italian Exam; b) by presenting a score of 780 or above on the SAT Subject Test in Italian; c) by obtaining a satisfactory score on the department's placement examination

## Guidance for Transfer Students

Transfer students pursuing an Italian Major or Minor may need to enroll in Intensive Italian courses (ITAL UN1121 Intensive Elementary Italian; ITAL UN2121 Intensive Intermediate Italian) in order to fulfill the language prerequisite in time.

## Double-counting Guidelines for All Students

- If a student decides to pursue more than one program of study, the student's declared programs of study may not both be governed by the same department. For example, a

student may not declare a Major or a Minor in Italian and a Minor in Mediterranean Studies.

- Students may double-count courses taken to fulfill the Language requirement and the Global Core requirement toward programs of Study (Italian Major and Minor, and Minor in Mediterranean Studies). Note: The shared courses of the Core Curriculum—specifically, Art Humanities, Contemporary Civilization, Frontiers of Science, Literature Humanities, Music Humanities, and University Writing—may not be double-counted with any major or minor.
- In addition to double-counting any courses described above, students pursuing two programs of study may double-count a maximum of two classes of any type, if the classes are approved by the Director of Undergraduate Studies to fulfill a requirement for each program of study.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Italian

The Major in Italian offers students in-depth knowledge of Italian language, literature, history, and culture from the Middle Ages to the present. Through a cluster of courses from the Italian Department, as well as other Humanities and Social Science departments and approved study abroad programs, the Major in Italian seeks to enhance students' knowledge of Italy in a globalized world.

The learning goals of the Major in Italian are therefore: 1) to give students an advanced knowledge of the Italian language; and 2) to help students gain a deeper understanding of the literature, culture and history of Italy.

### Design

The Major in Italian requires a minimum of 30 points (10 courses).

### Prerequisites

The 30 required points (10 courses) do not include the necessary prerequisites, i.e. Intermediate II or a demonstrated equivalent level of knowledge of the Italian language.

For students who have no prior knowledge of Italian, the required sequence to cover the prerequisite is Elementary Italian I & II (UN1101-UN1102) and Intermediate Italian I & II (UN2101-UN2102), or Intensive Elementary Italian (ITAL UN1121) and Intensive Intermediate Italian (ITAL UN2121), or a combination between a regular sequence and an intensive course. Therefore, for a student who must take all coursework at Columbia (i.e., who does not enter Columbia with advanced placement) the overall number of courses required to pursue an Italian Major is 14 (46 points, 16 of which count also toward the Language requirement).

However, the overall number of courses required to pursue an Italian Major becomes either 12 if the student chooses the Intensive Elementary & Intermediate Italian option (42 points, 12 of which count also toward the Language requirement), or 13 if the student chooses a combination between a regular sequence and an intensive course (44 points, 14 of which count also toward the Language requirement).

However, students with prior knowledge of Italian may be exempted from the prerequisites in one of three ways: a) by presenting a score of 4 or 5 on the Advanced Placement Italian Exam; b) by presenting a score of 780 or above on the SAT Subject Test in Italian; c) by obtaining a satisfactory score on the department's placement examination. Therefore, for them the overall number of courses required to pursue an Italian Major is 10 (30 points).

### Required Courses

Italian majors are required to take two sequences: a) a sequence of Advanced Italian Language courses and b) a sequence of courses in Italian Literature or Cultural Studies:

- Advanced Italian Language (this sequence should be taken in progressive order)
- Advanced Italian (ITAL UN3335). Advanced reading, writing, speaking with emphasis on authentic cultural materials. Topic and semester themes vary. Taught in Italian.
- Italian Language through Content. Course offerings under this category include courses such as: Italian through Cinema (ITAL UN3337); Italiana. Introduction to Italian Culture, the High, the Low, and the In-between (ITAL UN3338); Learning Italian in Class and Online: A Telecollaboration with Italy (ITAL UN3339); Art Itineraries: Italian through Art (ITAL UN3341); Business Italian and the Made in Italy Excellence: Learning Italian for trade and industry (ITAL UN3342); Advanced Italian: Comparative Stylistics & Translation (ITAL UN3343); Italy: Emigration-Immigration (ITAL UN3232); and Grand Tour in Italy (ITAL UN3645). These are all courses of Advanced Italian Language through a specific subject and with emphasis on cultural content. Taught in Italian.

and

- Italian Literature or Cultural Studies

Introduction to Italian Literature I and II (ITAL UN3333-4) provides an overview of major authors and works in the Italian literary tradition from the Middle Ages to the present. Taught in Italian. (This sequence does not need to be taken in progressive order.)

or

Italian Cultural Studies I and II (ITAL GU4502-3). An interdisciplinary investigation into Italian culture and society from national unification in 1860 to the present. Taught

in English. (This sequence does not need to be taken in progressive order.)

### Elective Courses

With the permission of the Director of Undergraduate Studies, Italian majors select six additional courses from the department's 3000- or 4000-level offerings or from other Humanities and Social Science departments with a focus on Italian culture, society and history from the Middle Ages to the present (at least 50% of the material of courses offered outside of the Italian Department should focus on Italian topics). Students who have taken courses in Italian Literature, Italian History, and/or Italian Culture while abroad should consult with the Director of Undergraduate Studies to determine if the courses may be applicable to the Major.

Highly motivated students have the opportunity to pursue a senior thesis under the guidance of a faculty adviser in an area of Italian literature or culture of their choosing. The senior thesis tutorial (ITAL UN3993 Senior Thesis/Tutorial) will count for 3 points.

Majors in Italian are required to take at least two of the six elective courses from the Italian Department's offerings, which are not Language Through Content courses. The remaining four elective courses can include Language Through Content courses or offerings from other Humanities and Social Science departments and study abroad Programs.

Students pursuing an Italian Major should download and use the relevant [worksheet](#).

### Minor in Italian

The Minor in Italian is a smaller and more flexible course of study aiming to introduce students to Italian language, literature, history, and culture from the Middle Ages to the present day. Through a cluster of courses from the Italian Department, as well as from other Humanities and Social Science departments and approved study abroad programs, the Minor in Italian seeks to enhance students' knowledge of Italy in a globalized world.

The learning goals of the Minor in Italian are therefore: 1) to give students an advanced-level knowledge of the Italian language; and 2) to help students gain a deeper understanding of the literature, culture, and history of Italy.

### Design

The Minor in Italian requires a minimum of 15 points (5 courses).

### Prerequisites

The 15 required points (5 courses) do not include the necessary prerequisites, i.e., Intermediate II or a demonstrated equivalent level of knowledge of the Italian language.

For students who have no prior knowledge of Italian, the required sequence to cover the prerequisite is Elementary Italian I & II (UN1101-UN1102) and Intermediate Italian I & II (UN2101-UN2102), or Intensive Elementary Italian (ITAL UN1121) and Intensive Intermediate Italian (ITAL UN2121), or a combination between a regular sequence and an intensive course. Therefore, for a student who must take all coursework at Columbia (i.e., who does not enter Columbia with advanced placement) the overall number of courses required to pursue an Italian Minor is 9 (31 points, 16 of which count also toward the Language requirement). However, the overall number of courses required to pursue an Italian Major becomes either 7 if the student chooses the Intensive Elementary & Intermediate Italian option (27 points, 12 of which count also toward the Language requirement), or 8 if the student chooses a combination between a regular sequence and an intensive course (29 points, 14 of which count also toward the Language requirement).

However, students with prior knowledge of Italian may be exempted from the prerequisites in one of three ways: a) by presenting a score of 4 or 5 on the Advanced Placement Italian Exam; b) by presenting a score of 780 or above on the SAT Subject Test in Italian; c) by obtaining a satisfactory score on the department's placement examination. Therefore, for them the overall number of courses required to pursue an Italian Minor is 5 (15 points).

### Required Courses

Italian minors are required to take one of the following course sequences: a) Advanced Italian Language; b) Italian Literature; c) Italian Cultural Studies:

- Advanced Italian Language (this sequence should be taken in progressive order)
- Advanced Italian (ITAL UN3335). Advanced reading, writing, speaking with emphasis on authentic cultural materials. Topic and semester themes vary. Taught in Italian.
- Italian Language through Content. Course offerings under this category include courses such as: Italian through Cinema (ITAL UN3337); Italiana. Introduction to Italian Culture, the High, the Low, and the In-between (ITAL UN3338); Learning Italian in Class and Online: A Telecollaboration with Italy (ITAL UN3339); Art Itineraries: Italian through Art (ITAL UN3341); Business Italian and the Made in Italy Excellence: Learning Italian for trade and industry (ITAL UN3342); Advanced Italian: Comparative Stylistics & Translation (ITAL UN3343); Italy: Emigration-Immigration (ITAL UN3232); and Grand Tour in Italy (ITAL UN3645). These are all courses of Advanced Italian Language through a specific subject and with emphasis on cultural content. Taught in Italian.

or

- Italian Literature

Introduction to Italian Literature I and II (ITAL UN3333-4) provides an overview of major authors and works in the Italian literary tradition from the Middle Ages to the present. Taught in Italian. (This sequence does not need to be taken in progressive order.)

or

- Italian Cultural Studies

Italian Cultural Studies I and II (ITAL GU4502-3). An interdisciplinary investigation into Italian culture and society from national unification in 1860 to the present. Taught in English. (This sequence does not need to be taken in progressive order.)

### Elective Courses

In addition to one of the above sequences, students pursuing the Minor in Italian will be asked to select three courses from the department's 3000- or 4000-level offerings or from other Humanities and Social Science departments with a focus on Italian culture, society and history from the Middle Ages to the present (at least 50% of the material of courses offered outside of the Italian Department should focus on Italian topics). Minors in Italian are required to take at least one of the three elective courses within the Italian Department's offerings which are not Language Through Content Courses, chosen in consultation with the Director of Undergraduate Studies.

Students pursuing an Italian Minor should download and use the relevant [worksheets](#).

### Minor in Mediterranean Studies

The Minor in Mediterranean Studies is a flexible course of study intended to introduce students to the various facets of the Mediterranean Sea from a cross-disciplinary perspective. Drawing on courses from within the Italian Department as well as departments and units across the university, the program seeks to enhance students' understanding of this culturally diverse and politically important region of the world. It offers them the opportunity to explore the connections among the peoples living in this geographic area over a broad chronological span—from prehistoric times to the present—and to focus on issues that go beyond specific nations, cultures, and states, such as migration, cultural transfers, diversity, multilingualism, translation, border crossing, empires and colonialism, circulation of goods and ideas, islands, the physical environment, and resource management. The learning goals of the Minor in Mediterranean Studies are therefore: 1) to give students vital tools for thinking about the world from the perspective of an interconnected sea space and through a comparative and transnational point of view; and 2) to help students gain a deeper understanding of the history, and culture of the Mediterranean through an interdisciplinary path of study. Upon completion of the Minor, students should be able to have a basic

knowledge of the ways in which the Mediterranean Sea has served over time as a medium of contact, exchange, and interaction among multiple societies, nations, religions, and languages, and use this knowledge to reconsider global relations in the world today.

### Design

The Minor in Mediterranean Studies requires a minimum of 15 points (5 courses).

### Prerequisites

There are no prerequisites.

### Required Courses

Minors in Mediterranean Studies are required to take the following two-semester sequence (not necessarily taken in progressive order). This sequence also **fulfills the Global Core requirement**:

- Mediterranean Humanities I (CLIA GU4499)

Course description: Mediterranean Humanities I explores the literatures of the Mediterranean from the late Middle Ages to the Early Nineteenth Century. We will read Boccaccio, and Cervantes, as well as Ottoman poetry, Iberian Muslim apocalyptic literature, and the Eurasian connected versions of the One Thousand and One Nights. We will dive into the travel of texts and people, stories and storytellers across the shores of the Middle Sea. Based on the reading of literary texts (love poetry, short stories, theater, and travel literature), as well as letters, biographies, memoirs, and other ego-documents produced and consumed in the Early Modern Mediterranean, we will discuss big themes such as Orientalism, estrangement, forced mobility, connectivity, multiculturalism and the clash of civilizations. Also, following in the footsteps of Fernand Braudel and Erich Auerbach, we will reflect on the Mediterranean in the age of the first globalization as a laboratory of the modern global world and world literature.

- Mediterranean Humanities II (CLIA GU4500)

Course description: What is the Mediterranean and how was it constructed and canonized as a space of civilization? A highly multicultural, multilingual area whose people represent a broad array of religious, ethnic, social and political differences, the Mediterranean has been seen as the cradle of western civilization, but also as a dividing border and a unifying confluence zone: as a sea of pleasure and a sea of death. The course aims to enhance students' understanding of the multiple ways this body of water has been imagined by the people who lived or traveled across its shores. By exploring major works of theory, literature and cinema since 1800, it encourages students to engage critically with a number of questions (nationalism vs cosmopolitanism, South/North and East/West divides, tourism, exile and migration, colonialism

and orientalism, borders and divided societies) and to 'read' the sea through different viewpoints. In the final analysis, Med Hum II is meant to engage the question of what it means to stand on watery grounds and to view the world through a constantly shifting lens.

### Elective Courses

In addition to these two Global Core courses, students pursuing the Minor in Mediterranean Studies will take **three elective courses**. **One** should be from the Mediterranean offerings of the Italian Department, while the other **two** can be from other departments and units across the university. The approved courses should adopt a Mediterranean transnational, comparative or regional perspective, engage with issues on a cross-Mediterranean scale (such as migration, cultural transfers, translation, borders, contacts and conflicts, empires and colonialism, islands, circulation of goods and ideas, common environmental and resource management questions), or place their particular topics within a Mediterranean framework (at least 50% of the course material should fulfill these requirements). Students pursuing a Minor in Mediterranean Studies should download and use the relevant [worksheet](#).

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before Fall 2023. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study. Concentrations are not available to students who entered Columbia in or after Fall 2024.

### Concentration in Italian

The Concentration in Italian requires a minimum of 24 points (8 courses).

### Prerequisites

The 24 required points (8 courses) do not include the necessary prerequisites, i.e., Intermediate II or a demonstrated equivalent level of knowledge of the Italian language.

For students who have no prior knowledge of Italian, the required sequence to cover the prerequisite is Elementary Italian I & II (UN1101-UN1102) and Intermediate Italian I & II (UN2101-UN2102), or Intensive Elementary Italian (ITAL UN1121) and Intensive Intermediate Italian (ITAL UN2121), or a combination between a regular sequence and an intensive course. Therefore, for a student who must take

all coursework at Columbia (i.e., who does not enter Columbia with advanced placement) the overall number of courses required to pursue an Italian Concentration is 12 (40 points, 16 of which count also toward the Language requirement). However, the overall number of courses required to pursue an Italian Major becomes either 10 if the student chooses the Intensive Elementary & Intermediate Italian option (36 points, 12 of which count also toward the Language requirement), or 11 if the student chooses a combination between a regular sequence and an intensive course (38 points, 14 of which count also toward the Language requirement).

However, students with prior knowledge of Italian may be exempted from the prerequisites in one of three ways: a) by presenting a score of 4 or 5 on the Advanced Placement Italian Exam; b) by presenting a score of 780 or above on the SAT Subject Test in Italian; c) by obtaining a satisfactory score on the department's placement examination. Therefore, for them the overall number of courses required to pursue an Italian Concentration is 6 (24 points).

### Required Courses

Italian concentrators are required to take two sequences: a) a sequence of Advanced Italian Language courses and b) a sequence of courses in Italian Literature or Cultural Studies:

- Advanced Italian Language (this sequence should be taken in progressive order)
- Advanced Italian (ITAL UN3335). Advanced reading, writing, speaking with emphasis on authentic cultural materials. Topic and semester themes vary. Taught in Italian.
- Italian Language through Content. Course offerings under this category include courses such as: Italian through Cinema (ITAL UN3337); Italiana. Introduction to Italian Culture, the High, the Low, and the In-between (ITAL UN3338); Learning Italian in Class and Online: A Telecollaboration with Italy (ITAL UN3339); Art Itineraries: Italian through Art (ITAL UN3341); Business Italian and the Made in Italy Excellence: Learning Italian for trade and industry (ITAL UN3342); Advanced Italian: Comparative Stylistics & Translation (ITAL UN3343); Italy: Emigration-Immigration (ITAL UN3232); and Grand Tour in Italy (ITAL UN3645). These are all courses of Advanced Italian Language through a specific subject and with emphasis on cultural content. Taught in Italian.

and

- Italian Literature or Cultural Studies

Introduction to Italian Literature I and II (ITAL UN3333-4) provides an overview of major authors and works in the Italian literary tradition from the Middle Ages to the present. Taught in Italian. (This sequence does not need to be taken in progressive order.)

or

Italian Cultural Studies I and II (ITAL GU4502-3). An interdisciplinary investigation into Italian culture and society from national unification in 1860 to the present. Taught in English. (This sequence does not need to be taken in progressive order.)

### Elective Courses

With the permission of the Director of Undergraduate Studies, Italian concentrators select four additional courses from the department's 3000- or 4000-level offerings or from other Humanities and Social Science departments with a focus on Italian culture, society and history from the Middle Ages to the present (at least 50% of the material of courses offered outside of the Italian Department should focus on Italian topics). Students who have taken courses in Italian Literature, Italian History, and/or Italian Culture while abroad should consult with the Director of Undergraduate Studies to determine if the courses may be applicable to the Concentration.

## ITALIAN COURSES

**ITAL UN1101 ELEMENTARY ITALIAN I. 4.00 points.**  
Limited enrollment.

Elementary level of Italian

**Fall 2024: ITAL UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

Prerequisites: ITAL UN2102 or sufficient fluency to satisfy the instructor. Conversation courses may not be used to satisfy the language requirement or fulfill major or concentration requirements. This course is designed for students who have attended four semesters of Italian language, mastered the grammatical structure of the language and are ready to expand and enlarge their language skills. A particular emphasis will be put on oral production, on listening and on reading: in class and at home the students will analyze various kinds of text and genres. In-class time is dedicated to speaking and practicing Italian through a combination of group-based and individual activities, focusing on a wide range of contemporary cultural themes through the use of varied materials such as newspaper articles, advertising material and short film clips. We will focus also on grammatical structures, language functions and activities to expand the vocabulary

**Spring 2025: ITAL UN1312**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ITAL UN3333 INTRO TO ITALIAN LITERATURE I. 3.00 points.**

Prerequisites: *ITAL V1202* or *W1202* or the equivalent.

Prerequisites: Intermediate Italian II ITAL UN2102 or the equivalent. UN3334x-UN3333y is the basic course in Italian literature. UN3333: This course, entirely taught in Italian, introduces you to Medieval and early modern Italian literature.

It will give you the opportunity to test your ability as a close-reader and discover unusual and fascinating texts that tell us about the polycentric richness of the Italian peninsula. We will read poems, tales, letters, fiction and non-fiction, travel writings and political pamphlets. The great "Three Crowns" - Dante, Petrarca and Boccaccio - as well as renowned Renaissance authors such as Ludovico Ariosto and Niccolò Machiavelli, will show us the main path to discover Italian masterpieces and understand the European Renaissance. But we will also explore China with Marco Polo and the secrets of the Medieval soul diving into the mystical poems by Jacopone da

Todi. We will study parody and laughter through the “poesia giocosa” (parodic poetry) by Cecco Angiolieri and the legacy of Humanism through the letters of Poggio Bracciolini. This first overview will allow you to explore Italian literature from its complex and multicultural beginnings to its diffusion across Europe during the Renaissance

**ITAL UN3339 Learning Italian in Class and Online: A Telecollaboration with Italy. . 3 points.**

Prerequisites: (ITAL UN2102)

The aim of the course is the intensive practice in the spoken and written language, through topics on current cultural issues assigned for in class and online discussions. Students will learn about current events through a varied selection of written and visual texts such as newspaper articles, authentic videos and in-person interviews. There will be an extensive work on vocabulary and grammar review. The course will be integrated by an online section, which will allow students to engage with the language and the topics selected, also outside of class. In particular, during the second half of the semester, we will partner with the students of a Master's program in "Teaching Italian to foreigners" at an Italian University, for an unique online exchange program.

At the end of the course, students will have acquired a deeper knowledge of Italian contemporary life and culture, and improved both their written and oral communication skills, within specific socio-pragmatic areas.

Italian is the language of instruction and the use of English is not permitted in class nor during the online lessons.

**ITAL UN3341 Art Itineraries: Italian through Art. 3.00 points.**

Prerequisites: (ITAL UN2102) or (ITAL UN2121)

Prerequisites: (ITAL UN2102) or (ITAL UN2121) Students must have completed Intermediate level Italian language proficiency. The course, designed for students who have mastered the grammatical structure of the language, will give the students the opportunity to improve their language skills and discover Italian art from Middle Ages to the second half of twentieth century. The works of the artists will be studied and discussed with the intent of developing knowledge of the main features of artistic and cultural movements and of the appropriate vocabulary and terminology to describe and talk about them. A particular emphasis will be put to oral and written productions: various kinds of texts and genres will be practiced (description, narration, critical analysis). Students will learn how to describe and interpret a work of art, examine

the main characteristics and the techniques used by the artists and will be able to look for themes recurring in the artistic productions. The artists covered during the course will be introduced along the lines of their unique artistic, historical and socio-cultural relevance through different sources: images, scholarly essays, literature, video and music. Two visits to the Metropolitan Museum of Art and to CIMA (Center for Modern Italian Art) will be organized. In Italian

**Spring 2025: ITAL UN3341**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ITAL 3341	001/13052	M W 1:10pm - 2:25pm 509 Hamilton Hall	Alessandra Saggin	3.00	7/16

**ITAL UN3342 Business Italian and the Made in Italy Excellence: Learning Italian for trade and industry. 3.00 points.**

Everywhere in the world, the expression ‘Made in Italy’ evokes the idea of quality, elegance and unique taste. From food to wine, from artisanal craftsmanship to fashion, from the automobile industry to the design, ‘Made in Italy’ means creativity, durability, and a guarantee of excellence. Today, Italy is the fourth largest economic power in Europe and many countries like the USA have long established economic relationships and partnership with it. While the English language has been increasingly used during these economic exchanges, a basic knowledge of Italian terminology within a context of commerce and trade is an important asset and a useful resource. Developing a strong understanding of the Italian business environment and its culture offers useful advantages for all those who want to create ties with or plan to work in the Italian business world in the future. The course is open to all students who have completed the Italian intermediate level and would like to have an introduction to Italian language used for work and business. The course will be conducted as an intensive practice in the spoken and written language through assigned topics focusing on Italian business and related cultural themes. It will provide an overview of the job market world and the business environment in Italy, giving students the main tools to explore and interact appropriately in a professional environment. During the second half of the semester, the course will introduce students to the Made in Italy excellence and the history responsible for Italian Style’s world-renowned fame and high-demand. Students will learn how the concept of Made in Italy originated, look at the history of Italian style and its international value. The lessons in the second half of the semester will be integrated with interviews of people in Italy and in New York City working in businesses that sell or advertise Italian products. The interviews (one per week) will provide a direct look into the areas that are being discussed in class, so that students will have the opportunity to learn firsthand what it means to work in a business in Italy or with Italy, and with Italian products

**ITAL UN3642 ROAD TRIPS:TRAVEL IN ITAL CIN. 3.00 points.**

Explores the representation of national identity in Italian cinema from the Facist era to the present. Examines how both geography and history are used to construct an image of Italy and the Italians. Special focus on the cinematic representation of travel and journeys between North and South. Films by major neo-realist directors (Rossellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Amelio).

**ITAL UN3643 History of Italian Cinema. 3 points.**

This course explores the evolution of Italian Cinema from the pre-Fascist era to the millenium, and examines how films construct an image of Italy and the Italians. Special focus will be on the cinematic representations of gender. Films by major directors (Fellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Garrone, Rohrwacher) will be discussed.

**Spring 2025: ITAL UN3643**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ITAL 3643	001/13053	Th 2:10pm - 4:00pm 507 Hamilton Hall	Elizabeth Leake	3	14/25

**ITAL UN3645 Grand Tour in Italy. 3 points.  
Course Description**

This course proposes a virtual tour of the country’s most famous sites, looking at the ways in which what is local and peculiar, diverse and marginal, contributes its distinctive style and character to the overall unity and uniqueness of Italy.

Each week we consider a different aspect of Italy’s richness and variety: from the evolution of its language/s and dialects to its humor; its art and landscapes; the music from ancient times to current pop songs; its cinema and web serials, its cuisine, the contributions of migrants, and much more.

The course is highly interdisciplinary and will assist students in the development of their linguistic and cultural skills, while tracing the origins of most mainstream Italian cultural phenomena, and imparting an awareness of modern Italy's multiculturalism.

**CLIA GU3660 MAFIA MOVIES. 3.00 points.**

Examines representations of the mafia in American and Italian film and literature. Special attention to questions of ethnic identity and immigration. Comparison of the different histories and myths of the mafia in the U.S. and Italy. Readings includes novels, historical studies, and film criticism. Limit 35

**ITAL UN3661 New Perspectives on Machiavelli # Renaissance Florence. 3.00 points.**

What do we envision when we think about Renaissance Florence? A long-standing and influential narrative placing Florence at the heart of the Renaissance prompts us to imagine a civilization defined by the esthetic ideals of beauty,

grace, harmony, and balance. On the other hand, there are counter arguments that emphasize darker elements and suggest that the Italian Renaissance was a period marked by violence, immorality, and a cynicism famously attributed to the Florentine Niccolò Machiavelli. Since neither of these contrasting perspectives provides an exhaustive, accurate picture, it is useful—indeed, necessary—to explore the phenomenon that we call Renaissance with an openness to its full range of dimensions. In this process, our very present may both contribute to and complicate our endeavor to shape new paths of inquiry. This course will focus on Renaissance Florence from a variety of viewpoints. In the introductory section, we will use a diverse set of sources (including theoretical readings and examples from pop culture) to lay the foundations of our work. Then, building on recent trends in Renaissance scholarship, our exploration will foreground three perspectives in particular: (I) we will look at Renaissance Florence through the lens of queer and gender studies; (II) we will consider the role of orality and performance; and (III) we will focus on cultural and religious diversity. Special attention will be devoted to the figure and works of Niccolò Machiavelli. By looking at Machiavelli from the three perspectives mentioned above, we will be able to investigate neglected sides of his intellectual personality as well as to reappraise some aspects of his political thinking. Throughout the semester, we will interrogate a wide variety of primary sources, including literary texts, letters, paintings, and musical pieces. Moreover, we will read selected secondary sources that will facilitate our dialogue with the primary materials and enable us to take into account additional queries. In order to reach the learning objectives set for the course, students will have the possibility to engage in an array of oral, written, and multimodal assignments. There are no prerequisites for this course. Students are welcome to read sources in the original language if they wish to do so; however, no knowledge of Italian is required

### **ITAL UN3865 Introduction to Fashion Studies. 3.00 points.**

This seminar examines the many meanings of fashion, design, and style; how values underlying fashion are selected, preserved, denied, reinvented or rethought; how the symbolic meanings and ideological interpretations are connected to creation, production and consumption of fashion goods. Based on an anthropological perspective and framework, this interdisciplinary course will analyze ways in which we can understand fashion through the intersections of many different levels: political, economic, aesthetic, symbolic, religious, etc. The course will study how fashion can help us understand the ways in which tradition and innovation, creativity and technology, localism and globalization, identity and diversity, power and body, are elaborated and interpreted in contemporary society, and in relation to a globalized world. Short videos that can be watched on the computer will be assigned. There are no pre-requisites for this course. In English

### **ITAL GU4015 ITALIAN FOOD/GLOBALIZED WORLD. 3.00 points.**

This seminar examines the many meanings of food in Italian culture and tradition; how values and peculiarities are transmitted, preserved, reinvented and rethought through a lens that is internationally known as ;Made in Italy;; how the symbolic meanings and ideological interpretations are connected to creation, production, presentation, distribution, and consumption of food. Based on an anthropological perspective and framework, this interdisciplinary course will analyze ways in which we can understand the Italian taste through the intersections of many different levels: political, economic, aesthetic, symbolic, religious, etc. The course will study how food can help us understand the ways in which tradition and innovation, creativity and technology, localism and globalization, identity and diversity, power and body, are elaborated and interpreted in contemporary Italian society, in relation to the European context and a globalized world. Short

videos that can be watched on the computer and alternative readings for those fluent in Italian will be assigned. In English

**ITAL GU4019 TOPICS in MICROHISTORY. 3 points.**

In the 1970s and 1980s a group of young Italian historians transformed the methods of historical inquiry and narrative. This class explores the origins, the diffusion, as well as the debate around Italian Microhistory across Europe and the United States. In particular, we will focus on “cultural” and “social” Microhistory and its evolution in Italy, France, and the US. We will read masterpieces such as Carlo Ginzburg’s *The Cheese and the Worms*, as well as Nathalie Zemon Davis’s *The Return of Martin Guerre*. Also, we will analyze the current application of microhistorical methods to contemporary global history and the genre of biography. Topics include pre-modern popular culture and literacy, minority and marginality, the Inquisition, individual and collective identities, and the relation between the pre-modern Mediterranean, Europe and the world. *In Italian*.

**Spring 2025: ITAL GU4019**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ITAL 4019	001/13067	W 2:10pm - 4:00pm 501 Hamilton Hall	Pier Mattia Tommasino	3	4/20

**CLIA GU4021 The Age of Romanticism Across the Adriatic. 3 points.**

This interdisciplinary seminar will study Romanticism as a literary trend, as much as a historical phenomenon and a life attitude. Romanticism is viewed here as the sum of the different answers to the sense of insecurity, social alienation and loneliness, provoked by the changing and frail world of the end of the eighteenth and the beginning of the nineteenth century. We will investigate the Romantic ideology in relation to the trans-Adriatic world of Italy and Greece, an area that entered modernity with the particular lure and burden of antiquity, as well as through revolutionary upheaval. Students will be invited to read authors like Vittorio Alfieri, Ugo Foscolo, Silvio Pellico, Giacomo Leopardi, Alessandro Manzoni, Massimo d’Azeglio, and to reflect on themes such as Nostalgia and Nationalism, the Discovery of the Middle Ages, the Historical Novel, the Invention of Popular Tradition, the Fragmented Self, Autobiographical and Travel Writing, the Brigand Cult, Hellenism, Philhellenism, Orientalism and Balkanism, and others.

**CLIA GU4022 Diasporas in Italian and Transnational History. 3 points.**

Some years ago the word Diaspora referred to Jews and was spelled with a capital D. Today, almost every ethnic group, country, or separatist movement has its diaspora. Usually, these diasporas are presented as pieces of national life scattered here and there, in places far away from the national core. In this seminar, however, we will treat diasporas not as an emblem of national unity but as an expression of diversity, of a multiplicity of loyalties and belongings. By combining history, literature, film, and cultural studies, and by approaching the topic through

the lens of transnationalism, we will study topics such as Mobility and Nationalism, Diasporas in Intellectual History, The Mediterranean in Motion, Italian Migration, Mobile Italy and its Colonies, Displacements in the Eastern Mediterranean, Lost Cosmopolitanisms in the Middle East, Emigration from Eastern Europe, and Mediterranean Refugees and Memory. The aim is to turn our gaze away from the territorially defined countries, towards a view of the world in which countries are ship-like territories.

**ITAL GU4022 THE QUR'AN IN EUROPE. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Is the Qur’an translatable? Was the Qur’an translated? Are non Arabic-speaking Muslims allowed to translate the Qur’an? And what about non-Muslims? Did Muslims and non-Muslims collaborate in translating the text of the Qur’an into Latin and European vernaculars? This course focuses on the long history of the diffusion of the Qur’an, the Scripture of the Muslims, and one of the most important texts in the history of humanity. We will focus on reading and translation practices of the Qur’an in Europe and the Mediterranean, from the Middle Ages to the contemporary world. We will explore how European Muslims, such as Iberian *moriscos*, European Jews, as well as Orthodox, Protestants and Catholics read, copied, collected, translated and printed the Qur’an. We will also explore why the Qur’an was confuted, forbidden, burned and even eaten, drunk and worn along eight centuries of the history of Europe. This long excursus, based on a close reading of the Qur’an and on the discussion of the major themes this close reading proposes, will help us to understand the role of Islam and its revelation in the formation of European societies and cultures.

**CLIA GU4023 Travel Literature in and from the Mediterranean, 18th-19th centuries. 3 points.**

This course will study various forms of travel writing within, from, and to the Mediterranean in the long nineteenth century. Throughout the semester, you will read a number of travel accounts to develop your understanding of these particular sources and reflect on the theoretical discussions and the themes framing them, namely orientalism, postcolonial studies, imaginative geographies, literature between fiction and reality, Romantic and autobiographical writing, gender, sexuality and the body, the rise of archeology, adventurism, mass migration and tourism. We will focus on Italian travel writers visiting the Ottoman Empire and the Americas (Cristina di Belgioioso, Gaetano Osculati, Edmondo de Amicis) and others visiting the Italian peninsula (Grand Tourists, Madame De Staël), and we will study the real or imaginary travels of French, British and American writers to the Eastern Mediterranean and to antique and holy lands (Jean-Jacques Barthélemy, Count Marcellus, Austen Henry Layard, Lord Byron, Mark Twain), as well as Arabic travel writers to the West (Rif al-Andalus).

**CLIA GU4024 Nationalism in Theory and History. 3.00 points.**

Were nations always there? Are they real or imagined? Do they come before or after nationalism and the state? How did

we pass from a world of empires, duchies, and city-states to a world of nation-states? Where does legitimacy reside if not in God and his endowed kings? Is the modern world really 'disenchanted'? How did we come to understand time, space, language, religion, gender, race, and even our very selves in the era of nations? Are we done with this era, living already in postnational times? This course will combine older theories of nationalism (Gellner, Anderson, Hobsbawm, Smith) with recent approaches of the phenomenon after the 'Imperial/Global/Transnational Turn' (Bayly, Conrad, Innes, Isabella, Reill, Stein etc.) and late studies in Gender, Race, Culture and Nationalism, in order to offer new answers to old questions. We will talk about many places around the world, but the main stage where we will try out our questions is Italy and the Mediterranean

### **CLIA GU4025 Italian Migrations. 3.00 points.**

This course will offer an account of the multiple migrations out, in and through Italy since 1800. By combining history, literature, and film, and by approaching the topic through the lens of transnationalism, we will study different topics of Italian mobility, such as Exile and the Risorgimento, The Mediterranean in Motion, Migrants' Experiences at Sea, The Great Italian "Exodus" to the Americas, Mobile Italy and its Colonies, The Lost Italian "Cosmopolitanisms" of the Middle East, Postwar Italian "National Refugees", and Contemporary Migration to Italy. We will read masterpieces of Italian literature both by Italian-American authors and by contemporary migrants to Italy. We will watch some of the most important films and documentaries on these topics. And we will think about how such phenomena as Italian mass emigration in the long nineteenth century, Fascist colonialism and resettlement of populations in the twentieth century, postwar refugees, and contemporary immigrants to Italy are all intrinsically interconnected and make part of the same story. Overall, the aim of this course is to turn our gaze away from the territorially defined Italy, towards a view of Italy as a space on the move

### **ITAL GU4043 Italian Renaissance Literature and Culture. 3 points.**

This course on Italian Renaissance literature and culture will pay special attention to the crossing of boundaries, whether socio-cultural, religious, linguistic, gendered, ethnic, or strictly geographical, in a range of fourteenth- to early seventeenth-century texts in a variety of genres, including travelogue, chivalric epic poetry, comedy, dialogues, and the novella, as well as political, philosophical, and scientific writing. Authors covered include Marco Polo, Leonardo Bruni, Pico della Mirandola, Boiardo, Ariosto, Machiavelli Castiglione, Beolco, Giraldi Cinzio, Tasso, Moderata Fonte, Tarabotti, and Galileo. *In English.*

### **ITAL GU4055 ANTHROPOLOGY OF CONTEMP ITALY. 3.00 points.**

This seminar examines ways in which Italy is understood and represented by Italians and non-Italians. It will analyze the formation of multiple discourses on Italy, how Italian culture and society are imagined, represented and/or distorted. Based

on an anthropological perspective, this course will examine ways in which we can understand Italy through the intersections of pluralism, ethnicity, gender, and religion. The course will study how Italy strives for political and economic unity, while there is a concurrent push toward inequality, exclusion, and marginalization. Moreover, the course will analyze the revitalization of nationalism on one hand of regionalism on the other, and will focus on the concepts of territory, identity, and tradition. Short videos that can be watched on computer and alternative readings for those fluent in Italian will be assigned. There are no pre-requisites for this course

#### **Spring 2025: ITAL GU4055**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **ITAL GU4057 ANTHROPOLOGY OF ITALIAN FOOD, FASHION, & DESIGN. 3 points.**

#### **ITAL GU4086 Castiglione and the Italian Renaissance Court. 3 points.**

Focus on Castiglione's Book of the Courtier as educational treatise, philosophical meditation, sociopolitical document, and book of courtly manners; other courtly writings of the period, from Della Casa's Galateo to Ariosto's Satires to Bembo's Asolani. Lectures in English; text in Italian, although comparative literature students who can follow with the help of translations are welcome.

#### **ITAL GU4089 Petrarch's Canzoniere. 3 points.**

This course presents a reading of Petrarch's *Canzoniere* and a theory of the lyric sequence as a genre. In this course we examine Petrarch as he fashions himself authorially, especially in the context of Ovid, Dante, and previous lyric poets. We bring to bear ideas on time and narrative from authors such as Augustine and Ricoeur in order to reconstruct the metaphysical significance of collecting fragments in what was effectively a new genre. We will consider Petrarch's lyric sequence in detail as well as read Petrarch's *Secretum* and *Trionfi*. Lectures in English; text in Italian, although students from other departments who can follow with the help of translations are welcome.

### **ITAL GU4091 DANTE'S DIVINA COMMEDIA 1. 4.00 points.**

ITALIAN MAJORS AND ITALIAN DEPT GRADUATE STUDENTS MUST REGISTER FOR SECTION 001.

Prerequisites: SECTION 001: reading knowledge of Italian. SECTION 002: none.

#### **Fall 2024: ITAL GU4091**

### **ITAL GU4100 Narratives of Modernity. 3 points.**

In revisiting two major authors of the Italian modern novel, the course investigates the relation between fiction and the "conditions of modernity" (personal risk, anxiety and lack of control on reality, secularization, to name a few). Special attention will be paid to the response of the novelistic discourse to modernity, and to Italy's peculiarly peripheral position in the modern world. Primary texts will be read in Italian, while theoretical references will be in English.

### **ITAL GU4109 ITAL AUTOBIOGRAPHY 19-20TH CENT. 3.00 points.**

Against the backdrop of the heated critical debate on the boundaries and limitations of the autobiographical genre, this course addresses the modern and contemporary tradition of autobiographical writings, focusing in particular (but not exclusively) on exploring and positing the potential difference between male and female autobiographers. More specifically, we will question the adequacy of the traditional model of autobiographical selfhood based on the assumption of unified, universal, exemplary and transcendent self to arrive at an understanding of women's autobiography. Topics to be addressed include: the crisis of the subject, *je est un autre*, the man with a movie camera, strategies of concealment and disclosures. Authors to be studied include: D'Annunzio, Pirandello, Svevo, Fellini, Moretti, Ortese, Ginzburg, Manzini, Cialente, Ramondino. In Italian

### **ITAL GU4185 The Making of Italy: The Risorgimento in Global Context. 3 points.**

This course will examine the history of the Italian Risorgimento by following the major historiographical trends of the recent decades. First, it will approach the Risorgimento through

the prism of cultural and intellectual history by investigating a series of topics, such as the discursive patterns of the 'Risorgimento canon', the gendered tropes of nationalism, the creation of a new public sphere through operas, festivals and plebiscites, the connection of nationalism with religion, and the relation of empire to nation and liberalism. Second, it will look at the Risorgimento through the eyes of local and regional history by examining local patriotisms, revolutions and civil wars and the division between North and South. Finally, it will offer a new topography of Italian history by placing the Risorgimento in its Mediterranean and global context and by exploring its international aspects: the global icons that it produced (i.e. Garibaldi, Mazzini); the networks of exiles in other Mediterranean and European countries; the war volunteers; and the connection of Italian patriots with the wave of liberalism and revolution that swept the globe from India to Latin America.

Fall 2024: ITAL GU4185

### **ITAL GU4220 INTRO-HIST # THEORY-LIT INTERP. 3.00 points.**

#### **CLIA GU4300 Renaissance Orientalism. 3.00 points.**

This course offers an overview of the scholarly debate about the Renaissance during the last twenty years (2001-2021), with a particular focus on the relationship between early modern Italy, Europe, and Muslim Eurasia. This class intends to give students insight into and philological tools to engage the current debate about the revision of the concept—and the period—of the Renaissance (broadly 1350-1570). We will read both primary (Petrarch, Pico della Mirandola, Galateo, Leonardo Bruni, Leo Africanus) and secondary sources in order to understand the main trends of philological and historical research about early modern Eurasia in the last twenty years. We will read about how Petrarch's anti-Arabism has been analyzed and used by twentieth-century Medievalists. We will explore how Said's *Return to Philology* influenced the study of the transmission of texts in the Early Modern World. Also, we will try to understand the role of Islam, Muhammad, and the Ottoman Empire in the evolution of European political thought. Similarly, we will dive into Early Modern European representations of the Muslim Other, as well as into Arabic travel writing about Early Modern Europe. The main goal of this class is to discuss with the students about what happened in the field of Renaissance studies in the last two decades, roughly between September 11, 2001 and our current "post"-pandemic world, with a particular attention to the study of literary texts, intellectual and cultural history, the history and theory of translation. In English

**ITAL GU4395 Fifty Years of Impatience: The Italian Novel between 1950-2000. 3 points.**

The course examines some of the most important novels that belong to Italy's period of major social and economic transformations. Only after WWII Italy finally becomes a modern nation, i.e. a republic based on truly universal suffrage, and an industrialized country. Such accelerated progress, though, causes deep social instability and mobility which obviously results in heavy psychological pressures on the people: adaptation becomes crucial and inevitable. Fiction therefore resumes the task to represent such awkwardness of integration into a modern bourgeois society that, contrarily to its European and American counterpart, is extremely tentative and insecure per se, since it's political identity has extremely precarious grounds. Among other authors, primary readings include Giuseppe Tomasi di Lampedusa's *The Leopard* and Italo Calvino's *If on a Winter's Night a Traveler*. *Primary Readings in Italian.*

**ITAL GU4420 The Window On the World: Reassessing Italian Neorealism. 3 points.**

Roberto Rossellini, Vittorio De Sica, Luchino Visconti and other Italian filmmakers challenged modes of film production in vogue in the 1940s and 1950s, both in theoretical and practical terms. This course will analyze both the feature films and the theoretical writings of such directors as those mentioned and others, in order to investigate the modes of representation of reality in the immediate postwar years, their relation to the identity of the newborn Italian Republic, and their significance in post-WWII filmmaking. All readings and lectures in English; Films in Italian or French, with English subtitles.

**CLIA GU4499 Mediterranean Humanities I. 3.00 points.**

Mediterranean Humanities I explores the literatures of the Mediterranean from the late Middle Ages to the Early Nineteenth Century. We will read Boccaccio, and Cervantes, as well as Ottoman poetry, Iberian Muslim apocalyptic literature, and the Eurasian connected versions of the One Thousand and One Nights. We will dive into the travel of texts and people, stories and storytellers across the shores of the Middle Sea. Based on the reading of literary texts (love poetry, short stories, theater, and travel literature), as well as letters, biographies, memoirs, and other ego-documents produced and consumed in the Early Modern Mediterranean, we will discuss big themes as Orientalism, estrangement, forced mobility, connectivity, multiculturalism and the clash of civilizations. Also, following in the footsteps of Fernand Braudel and Erich Auerbach, we will reflect on the Mediterranean in the age of the first globalization as a laboratory of the modern global world and world literature

Fall 2024: CLIA GU4499

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLIA 4499	001/10022	W 2:10pm - 4:00pm 507 Hamilton Hall	Pier Mattia Tommasino	3.00	22/25

**CLIA GU4500 Mediterranean Humanities II. 3.00 points.**

What is the Mediterranean and how was it constructed and canonized as a space of civilization? A highly multicultural, multilingual area whose people represent a broad array of religious, ethnic, social and political difference, the Mediterranean has been seen as the cradle of western civilization, but also as a dividing border and a unifying confluence zone, as a sea of pleasure and a sea of death. The course aims to enhance students' understanding of the multiple ways this body of water has been imagined by the people who lived or traveled across its shores. By exploring major works of theory, literature and cinema since 1800, it encourages students to engage critically with a number of questions (nationalism vs cosmopolitanism, South/North and East/West divides, tourism, exile and migration, colonialism and orientalism, borders and divided societies) and to 'read' the sea through different viewpoints: through the eyes of a German Romantic thinker, a Sephardic Ottoman family, an Algerian feminist, a French historian, a Syrian refugee, an Italian anti-fascist, a Moroccan writer, an Egyptian exile, a Bosnian-Croat scholar, a Lebanese-French author, a Cypriot filmmaker, an Algerian-Italian journalist, and others. In the final analysis, Med Hum II is meant to arouse the question of what it means to stand on watery grounds and to view the world through a constantly shifting lens

### CLIA GU4700 The Mediterranean in History and Anthropology. 3 points.

This course will offer an overview of historical and anthropological writing on the Mediterranean from the birth of the field through the pages of Fernand Braudel's celebrated book in the 1940s to the present day. It will trace the shifts in the ways we understand the Mediterranean by examining the sea as a malleable geographical space, which changes over time. It will explore topics such as the macro- and micro-histories of the Sea; the 'history in' and the 'history of' the Mediterranean; 'anti-Mediterraneanism'; the revolutionary Mediterraneans; the colonial Mediterranean; the Grand Tour; the migrants in the Mediterranean; Italy in the Mediterranean, and others. Looking at the sea can tell us a lot about human life on land and can change our perspective on how we view this and other parts of the world.

### ITAL GU4725 Pirandello and Modern Drama. 3 points.

The course will examine the foundations of modern drama and stage representation by analysing Luigi Pirandello's plays and theoretical works in close comparison with the major authors and drama theorists of the XIX century, including Bertolt Brecht, August Strinberg, and Jean Genet.

### CLIA GU4725 PIRANDELLO # MOD ITALIAN DRAMA. 3.00 points.

## HUNGARIAN COURSES

### HNGR UN1101 ELEMENTARY HUNGARIAN I. 4.00 points.

Introduction to the basic structures of the Hungarian language. Students with a schedule conflict should consult the instructor about the possibility of adjusting hours

#### Fall 2024: HNGR UN1101

### HNGR UN3340 Advanced Hungarian Grammar. 3 points.

*Advanced Hungarian Grammar* focuses on the more complex syntactic/semantic constructions of Hungarian in addition to vocabulary enrichment. Readings in literature, oral presentations, translations, and essays serve to enhance the grammatical material.

### HNGR UN3341 ADVANCED READINGS IN HUNGARIAN. 3.00 points.

Prerequisites: *HNGR W1201-W1202* and *HNGR W3340*, or the equivalent.

This course has an emphasis on rapid and comprehensive reading of academic materials. In addition to weekly readings, oral presentations and written essays serve to improve fluency in all aspects of Hungarian.

### HNGR UN3343 DESCRIPTIVE GRAMMAR-HUNGARIAN. 3.00 points.

This course is designed for those curious about the structure of Hungarian - an unusual language with a complex grammar quite different from English, or, indeed, any Indo-European

language. The study of Hungarian, a language of the Finno-Ugric family, offers the opportunity to learn about the phonology of vowel harmony, the syntax of topic-comment discourse, verb agreement with subjects and objects, highly developed case systems and possessive nominal paradigms. In addition to its inflectional profile, Hungarian derivation possibilities are vast, combinatory, and playful. During the semester we will touch upon all the important grammatical aspects of Hungarian and discuss them in relation to general linguistic principles and discourse, and finally, through some text analysis, see them in action. Although the primary discussion will center on Hungarian, we will draw on comparisons to other Finno-Ugric languages, most notably Finnish and Komi; students are encouraged to draw on comparisons with their own languages of interest. No prerequisite. Counts as Core Linguistics

## JAZZ STUDIES

**The Center for Jazz Studies:** Prentis Hall, 4th floor (632 W. 125th Street); 212-851-9270  
<http://www.columbia.edu/cu/cjs>

### Jazz at Columbia:

Louis Armstrong Jazz Performance Program (LAJPP)

**Director of Center for Jazz Studies:** Prof. Kevin Fellezs, 806 Dodge Hall, 212-854-6689, [kf2362@columbia.edu](mailto:kf2362@columbia.edu)

**Director of Jazz Performance:** Prof. Ole Mathisen, 621 Dodge Hall; 212-854-3825; [om2141@columbia.edu](mailto:om2141@columbia.edu) ([cjw5@columbia.edu](mailto:cjw5@columbia.edu))

**Program Administrator:** Yulanda McKenzie, 602 Philosophy; 212-851-9270; [ym189@columbia.edu](mailto:ym189@columbia.edu)

*Starting in Fall '24, the Special Concentration in Jazz Studies is no longer available for students to declare. Students who declared the Special Concentration in Jazz Studies in Spring '24 or prior are allowed to complete this concentration.*

The Special Concentration in Jazz Studies is an interdisciplinary liberal arts course of study that uses jazz music—and the jazz culture from which the music emanated—as a prism through which to study jazz culture during what might be termed the long jazz century, the Sprawling 20's. The curriculum in this field guides students in developing a firm grounding in the traditions and aesthetic motives of jazz music, viewed through the perspectives of music history and ethnomusicology as well as literary theory and cultural studies.

The program also explores in depth the development of jazz-oriented art works in the music's sister arts—literature, dance, painting, photography, and film. While a U.S. focus is highly appropriate, considering the many ways in which jazz is a definitive music of this nation, students also explore jazz's geographical history beyond these shorelines, including

complex, ongoing interactions with Africa, the Caribbean, Europe, and Asia.

While there are some fields where the fit with jazz studies is very obvious—music, American studies, African-American studies, English, comparative literature, and history—students can major in any field whatsoever. Is there a jazz or improvisatory philosophy? What might be its relation to studies of aesthetics or American pragmatism? And what are jazz's implications for the student of law? How does one protect the intellectual property rights of an improvised jazz solo? What about business? What economic and political forces have shaped jazz? Who buys jazz? What is its audience? What is a jazz painting? A jazz novel? What is jazz poetry? What is jazz dance? What is a jazz film? What are the sources and meanings of art? What work does the music do for the whole community?

Along with problems of musical history, form, and definition, our courses explore jazz as a culture. Students not only study individual jazz artists but also explore the immeasurably variegated worlds through which such artists moved, and which they helped to shape. As cultural historians-in-training—focused on questions of nationality, race, sexuality, gender, economics, and politics—students explore the extraordinarily complicated terrains of the New Orleans of Bunk Johnson, for example, or the Baltimore of Billie Holiday (born in Philadelphia, reared in Baltimore). They explore such artists' other geographical travels. What did their images, including mistaken conceptions of who they were, tell us about the cultures that mythologized them?

How did these jazz musicians influence not only musicians but other artists of their era and milieu: the poets and novelists, painters and sculptors, photographers and filmmakers, dancers and choreographers who regularly heard them play and often shared with them a sense of common project?

One thinks of Tito Puente, working with singers and dancers at the Palladium; Jackson Pollack dancing to the music as he spun drips of paints on canvasses placed on the studio floor; Langston Hughes writing detailed instructions to the musicians he hoped would accompany performance of his poetry; Romare Bearden's beautifully turned stage and costume designs for Alvin Ailey and Dianne McIntyre, whose improvisatory jazz dance workshop was called Sound in Motion; the drummer Jo Jones in an interview naming as key influences a series of tap dancers he admired; Stanley Crouch, stirring in his high-powered essays in a room where jazz drums stand at the center, the old dream-kit inspiration; Ralph Ellison, who kept in touch with his beginnings as a musician in Oklahoma City through hour-long conversations with his childhood friend, the singer Jimmy Rushing; Toni Morrison reading her magical prose to improvisations by Max Roach and the dancer Bill T. Jones; and the pianist Jason Moran playing at the Studio Museum in Harlem, where he introduced his group as including Beauford Delany, whose paintings hung on the wall near the bandstand—vigorous all and recall across the art forms.

Perhaps above all, the Special Concentration in Jazz Studies is designed to prepare students to be well-prepared and flexible improvisers in a universe of change and possibility.

### Special Concentration in Jazz Studies (For students who declared the concentration on or before the 2023-2024 academic year)

Starting in Fall '24, the Special Concentration in Jazz Studies is no longer available for students to declare. Students who declared the Special Concentration in Jazz Studies in Spring '24 or prior are allowed to complete this concentration.

The special concentration in jazz studies requires a total of seven courses (21 points minimum), distributed as follows:

### Requirements for Non-Music Majors/Concentrators

MUSI UN1002	FUNDAMENTALS OF MUSIC
MUSI UN2016	JAZZ
MUSI UN3998	SUPERVISED INDEPENDENT STUDY
ENGL GU4612	JAZZ AND AMERICAN CULTURE

(3) interdisciplinary courses as approved by the director  
Private music lessons (strongly recommended but not required)

MPP UN1541 CU Jazz Ensembles (strongly recommended but not required)

### Requirements for Music Majors/Concentrators

MUSI UN2016	JAZZ
MUSI UN3998	SUPERVISED INDEPENDENT STUDY
MUSI GU4500	JAZZ TRANSCRIPTION # ANALYSIS
MUSI GU4505	JAZZ ARRANGING # COMPOSITION
ENGL GU4612	JAZZ AND AMERICAN CULTURE

(2) interdisciplinary courses as approved by the director

Private music lessons (strongly recommended but not required)

MPP UN1541 CU Jazz Ensembles (strongly recommended but not required)

### JAZZ GU4900 Jazz and the Literary Imagination. 3 points.

(Lecture). This course will focus on the ways that jazz has been a source of inspiration for a variety of twentieth-century literatures, from the blues poetry of the Harlem Renaissance to contemporary fiction. We will consider in detail the ways that writers have discovered or intuited formal models and political implications in black music. Rather than simply assume that influence only travels in one direction, we will also take up some literary efforts (including autobiography, poetry, historiography, and criticism) by musicians themselves. What are the links between musical form and literary innovation? How can terms of musical analysis (improvisation, rhythm, syncopation, harmony) be applied to the medium of writing? How does music suggest modes of social interaction or political potential to be articulated in language? How does one evaluate the performance of a poem (in an oral recitation or musical setting) in relation to its text? Materials may include writings and recordings by Jacques Attali, James Weldon Johnson, Langston Hughes, Louis Armstrong, Zora Neale Hurston, Sterling Brown, Kurt Schwitters, Ralph Ellison, Amiri Baraka, Ella Fitzgerald, William Melvin Kelley, Edward Kamau Brathwaite, Gayl Jones, Michael Ondaatje, Ed Pavlic, Joseph Jarman, Nathaniel Mackey, and Harryette Mullen, among others. Requirements: weekly response papers, a 5-7 pg. midterm paper and a 9-12 pg. final paper.

### JAZZ GU4920 Jazz and Cinema. 3 points.

Because the beginnings of jazz and film both date to the last years of the nineteenth century, the two art forms essentially grew up together. The history of both is inseparable from the technological revolutions of the twentieth century, and at least in the United States, from histories of racial representation. We will explore the racial issues raised by American films along with how filmmakers represent gender, American humor, discourses of art and the popular, and the conventions of narrative. We will pay special attention to

how all of this changes dramatically throughout the twentieth and early twenty-first centuries. After establishing what is most American about jazz and cinema, we will move on to documentary films as well as to films from Europe where many of the dominant American myths about jazz are both perpetuated and transformed. The goal of the course is to understand jazz as a music as well as a cultural practice that has been in constant flux during the last 120 years. The representation of the music and its practitioners in cinema is crucial to an understanding of the music at each of its many cultural moments.

## JEWISH STUDIES

### THE INSTITUTE FOR ISRAEL AND JEWISH STUDIES:

Department website: <http://www.iijs.columbia.edu/>

Office location: 617 Kent Hall

Office contact: 212-854-2581, [iijs@columbia.edu](mailto:iijs@columbia.edu) (<http://www.iijs.columbia.edu/>)

**Program Director:** Dr. Isabelle Levy, [icl2001@columbia.edu](mailto:icl2001@columbia.edu) ([icl2001@columbia.edu](mailto:icl2001@columbia.edu))

## JEWISH STUDIES

The academic discipline of Jewish Studies is an interdisciplinary field centered on the analysis and investigation of Jewish history, religion, cultures, languages, and literatures. The discipline ranges from the study of Jews and Judaism in antiquity to the present day. It explores Judaism not only as a religion, but also as a civilization and culture.

A minor in Jewish Studies is available for undergraduates and allows students to draw upon classes in a wide range of departments across the University, including, but not limited to, History; Sociology; Middle Eastern, South Asian, and African Studies; Germanic Languages; Music; Film; and Religion. The requirements for the minor are designed to provide students with the interdisciplinary knowledge necessary to pursue Jewish Studies both broadly and deeply.

The roots of Judaism lie deeper than one region, gender, language, or culture, and by studying the interconnectedness of these areas, the depth of understanding across a range of spheres and disciplines greatly increases. The minor in Jewish Studies provides students with an opportunity to expand their knowledge according to their particular interests and can likewise complement an array of majors across academic disciplines.

Students wishing to complete a minor in Jewish Studies work with Program Director Dr. Isabelle Levy to decide upon course selection and sequencing. The program office provides and keeps on record a planning form to track the fulfillment of requirements for the minor.

## STUDENT ADVISING

### Consulting Advisers

Please reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) for any advising needs

### Enrolling in Classes

IIJS courses are available for registration through Vergil. Professors will often give enrollment priority to Jewish Studies minors if you contact them directly. If you have any questions about which classes apply towards the Minor in Jewish Studies, please contact our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu).

### Preparing for Graduate Study

Jewish Studies students continue on to graduate study in a variety of fields. Please reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) for any advising needs.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

Students will not be able to apply advanced placement credit towards the minor.

### Barnard College Courses

Certain Barnard College courses may be applied towards the minor. Several Barnard courses are cross-listed with Jewish Studies. If you have any questions about which classes apply towards the Minor in Jewish Studies, please contact our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu).

### Transfer Courses

Students may request permission on a case-by-case basis to apply one course each of transfer coursework and study abroad coursework to the minor. If you have any questions about which classes apply towards the Minor in Jewish Studies, please contact our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu).

### Study Abroad Courses

Students may request permission on a case-by-case basis to apply one course each of transfer coursework and study abroad coursework. If you have any questions about which classes apply towards the Minor in Jewish Studies, please contact our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu).

### Summer Courses

Some summer courses may be applied toward the minor. If you have any questions about which classes apply towards the Minor in Jewish Studies, please contact our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu).

## CORE CURRICULUM CONNECTIONS

In addition to finding intellectual links among their coursework, Core Curriculum courses, and major study coursework, Jewish Studies students may choose to take Global Core courses that contain Jewish Studies content. As is College policy, two courses that fulfill either the Global Core or the science requirement can be double-counted toward the Core requirements and toward one of your programs of study.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

Jewish Studies students will have the opportunity to meet with Jewish Studies Librarian Michelle Margolis and to consult Columbia's Jewish Studies research collections, which exceeds 150,000 monographs; 1,000 periodical titles; 60,000 Hebrew and Yiddish titles; Jewish scholarly works in Western and Slavic languages; and 1,700 Hebrew and Jewish-language (e.g.,

Judeo-Arabic) manuscripts—the largest collection of Judaica manuscripts in any secular research university.

## Undergraduate Research in Courses

Most Jewish Studies courses, as well as cross-listed courses that count towards the Minor, include a research component. Instructors will support students in completing research projects.

The Jewish Studies curriculum includes for-credit faculty-advised independent research. Students may reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) with questions about undergraduate research.

## DEPARTMENT HONORS AND PRIZES

Students on track to complete the Jewish Studies minor may apply for limited summer research funding at the discretion of the IJIS faculty. Please reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) with questions.

## AFFILIATED FACULTY

Beth Berkowitz (Religion, Barnard)  
Clemence Boulouque (Religion)  
Elisheva Carlebach (History)  
Yinon Cohen (Sociology)  
Jeremy Dauber (Germanic Languages)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Please reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) for any advising needs.

### Course Numbering Structure

Undergraduate coursework is offered at the 2000, 3000, and 4000 levels. Undergraduate courses are worth 3 or 4 points. Many Jewish Studies courses are cross-listed in other departments, including History; Germanic Languages; Middle Eastern, South Asian, and African Studies; Religion; Slavic Languages; Music; and Sociology. Some 5000 or 6000 level courses may be available for undergraduate enrollment, at the discretion of the instructor.

### Guidance for First-Year Students

Please reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) for any advising needs.

## Guidance for Transfer Students

Please reach out to our Program Director, Dr. Isabelle Levy, at [icl2001@columbia.edu](mailto:icl2001@columbia.edu) for any advising needs.

## UNDERGRADUATE PROGRAMS OF STUDY

### Minor in Jewish Studies

In addition to the requirements of the minor, students must complete a major.

Students are required to complete five Jewish Studies courses comprising between 15 to 20 points, depending on the number of points of each course. Introductory language study that complements the student's Jewish Studies coursework may constitute one of these courses. Languages may include (but are not limited to) Arabic, Aramaic, French, Greek, Hebrew, Russian, and Yiddish and should be relevant to the student's other coursework in Jewish Studies. Language courses at the advanced level that are conducted in the language and that require reading and writing in the language may count as an additional course.

Jewish Studies students may choose to take Global Core courses that contain Jewish Studies content. As is College policy, two courses that fulfill either the Global Core or the science requirement can be double-counted toward the Core requirements and toward one of your programs of study.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Special Concentration in Jewish Studies

In addition to the requirements of the special concentration, students must complete a major or a full concentration.

For a special concentration in Jewish studies, students are required to complete a minimum of 21 points. Please note:

- At least one course must be taken from each of three of the focus areas listed below.
- Credits for language courses may constitute at most 10 points, and one year of Hebrew or Yiddish language is strongly recommended.
- A minimum of 18 points must be taken at Columbia or as part of an approved study abroad program (unless equivalent courses are not offered at Columbia, as determined by the faculty adviser).

The focus areas listed below are examples. Additionally, as new courses are introduced, new focus areas may develop. Some courses may fall under multiple headings. Determination of a course's focus area is at the discretion of the faculty adviser.

### Focus Areas

**Bible and Rabbinics/Ancient Judaism****Medieval Judaism****Modern Judaism****Israeli Society****Gender and Judaism****Jewish History and Culture****Jewish Literature**

Jewish Studies courses are housed in a number of departments throughout the University. For a full list of courses for the 2024-2025 academic year please [visit the Institute website](#).

**FALL 2024 COURSES****Jewish Studies****JWST GU4145 Topics in Israeli Cinema. 3.00 points.**

Israel has a unique and constantly-evolving national cinema, the product of its diverse immigrant population, influences from neighboring nations, and dramatic national history. Beginning with artistic influences from abroad and culminating with native self-examinations, this course will provide a survey of Israeli film history, recurring foci of Israeli cinema, and introductions to influential filmmakers from early director Rama Burshtein. Each class meeting will include a complete screening of an Israeli feature film, as well as clips of related works. Readings will include critical essays and histories which elaborate on in-class screenings and cover additional topics and films. Written assignments will be three analytical essays which will encourage critical thinking, close analysis of films, and independent research beyond the materials presented in class. All readings are in English. All feature films and film clips are in Hebrew (some include Arabic), and will be presented with English subtitles. Students fluent in Hebrew and Arabic are encouraged to interpret the dialogue for additional meaning that may not be translated in the subtitles

Fall 2024: JWST GU4145

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
JWST 4145	001/11261	T 10:00am - 1:45pm	Stuart Weinstock	3.00	17/25
		337 Seeley W. Mudd Building			

**JWST GU4990 Topics in Jewish Studies. 4.00 points.**

This course approaches Jewish Studies from theoretical and pedagogical standpoints. In addition to looking back at ancient, medieval and Early Modern approaches to the study of Jewish topics and examining the theoretical, historical and religious underpinnings of Jewish Studies as a modern discipline, we will also read theoretical writings from related disciplines. The course will balance these materials with pedagogical materials and exercises. Faculty from disciplines related to Jewish Studies will visit the seminar to offer perspectives on current approaches to the field, and the class will visit the Rare Book and Manuscript Library with Jewish Studies Librarian

Michelle Chesner. This course is required for students in the Jewish Studies MA program. It is open to graduate students, and advanced undergraduates may register with permission from the instructor. Please note that faculty visits will be added to the syllabus as they are scheduled

Fall 2024: JWST GU4990

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
JWST 4990	001/10647	M 10:10am - 12:00pm Room TBA	Isabelle Levy	4.00	5/15

**JWST GU4147 Between Tradition # Innovation: Readings in Hasidic History and Literature. 3.00 points.**

The popular eighteenth-century mystical revivalist movement known as Hasidism transformed the religious and cultural life of Eastern European Jewry and remains a vibrant form of Judaism to this day. This seminar will introduce students to the history, ideology and major personalities of the Hasidic movement through a close reading of a broad selection of primary texts, including mystical tracts, collections of sermons, spiritual directives, hagiographical tales and polemical writings. We will explore the mystical ideas and practices taught by the founders of the movement, the new forms of leadership they developed and the fierce controversies they aroused. We will also consider the role played by Hasidic literature in the formation and spread of the movement and the tensions it embodied between tradition and innovation, elitism and populism, and oral and written modes of communication. This course is open to graduate students and advanced undergraduates may register with permission from the instructor

Fall 2024: JWST GU4147

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**JWST GU4156 An Introduction to World Zionist Thought. 4.00 points.**

In this course, students will be exposed to a range of different ideas and movements that, together, constitute(d) "Zionism." Although Israel is frequently in the news, the ideology that lies, in many ways, at the heart of Israeli politics and society is often represented in simplistic – even superficial or inaccurate – terms. Far more than a mere example of "nationalism," Zionism has variously been interwoven with struggles over land, labor, gender, religion, and identity in not only Palestine/Israel, but also North Africa, East Africa, Southwest Asia, Central Asia, Europe, the Americas, and beyond. Throughout the semester, students will read both primary and secondary sources in order to understand Zionism in its myriad meanings. Part I of the course will explore some of the basic tenets and debates of Zionism, with a focus on ideas prominent in the early twentieth century, such as socialism and Hebraism. Part II of the course will examine the ways in which Zionist ideas conceived in the Ottoman Empire and Europe diverged and took on new

and renewed meaning as the Zionist movement reached global dimensions

**Fall 2024: JWST GU4156**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
JWST 4156	001/17030	W 12:10pm - 2:00pm 401 Hamilton Hall	Benjamin Berman-Gladstone	4.00	6/15

**JWST UN2155 Music, Sound, and Antisemitism. 3.00 points.**

From the Middle Ages to the present, individuals involved in making and writing about music, have engaged in behaviors, creations, and discourses steeped in hatred of Jews. This course examines the various ways in which these individuals have used music to perform and inscribe, symbolize, describe, and editorialize antisemitism. In so doing, it focuses on musicking—a term that encompasses all musical activity from composing to performing to listening—in the realms of art music, popular music, and non-Western traditions, as well as of genres that synthesize different styles. It also draws on sound, including language and speech as well as writings such as Wagner's *Judenthum in der Musik* (1848#50/69) and Carl Engel's *The Music of the Most Ancient Nations* (1864). All of these will serve as a window through which to address the types of Jew-hatred that have become known since the mid-nineteenth century as antisemitism—religious, national and ethnic, political, populist, economic, and institutional—as well as hate speech or “hate talk” and the Jewish responses to it. A basic familiarity with music is helpful for this course, but it is not required as long as there is an openness to listening to music and a commitment to basic aural analysis. You do not need to know Jewish history to take this class, nor do you need to be able to read music. Translations will be provided, and musical analysis will be well explained. Suggested prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard)

**MDES UN2516 INT HEBREW:INTENSVE GRAMMAR REV. 4.00 points.**

This course focuses on Modern Hebrew grammar, and verb conjugation in particular. It is designed for students with substantial knowledge of Modern Hebrew. Over the semester, students will systematically review the grammatical patterns of regular verbs (shlemim), and learn the grammatical patterns of the irregular verbs (gzarot), as well as several other grammatical topics. After successful completion of this course, the foreign language requirement will be fulfilled (for students of Columbia College and other academic units that require a 4th-semester proficiency). Successful completion of this course also allows students to register in third-year Modern Hebrew

**Fall 2024: MDES UN2516**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 2516	001/13912	M Th 11:40am - 12:55pm C01 Knox Hall	Illan Gonen	4.00	12/12

**MDES UN2517 HEBREW FOR HERITAGE SPEAKERS I. 4.00 points.**

Fee: Language Resource Center Fee - 15.00

Prerequisites: Permission of instructor. Hebrew for Heritage Speakers I forms part of a year-long sequence with Hebrew for Heritage Speakers II. The course is intended for those who have developed basic speaking and listening skills through exposure to Hebrew at home or in day-school programs but do not use Hebrew as their dominant language and have not reached the level required for exemption from the Columbia language requirement. Heritage speakers differ in the degree of their fluency, but their vocabulary is often limited to topics in daily life and many lack skills in reading and writing to match their ability to converse. The course focuses on grammar and vocabulary enrichment, exposing students to a variety of

cultural and social topics in daily life and beyond. By the end of the semester students are able to read and discuss simple texts and write about a variety of topics. Successful completion of the year-long sequence prepares students to enroll in third-year modern Hebrew. No P/D/F or R credit is allowed for this class

**Fall 2024: MDES UN2517**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MDES GU4501 READINGS IN HEBREW TEXTS I. 4.00 points.**

Prerequisites: (MDES GU4510) and (MDES GU4511) *MDES W4510*, *MDES W4511*, or the instructor's permission.

Prerequisites: (MDES GU4510) and (MDES GU4511) 3RD Year Modern Hebrew or the instructor's permission. This course focuses on central identities shaping Israeli society and is designed to give students extensive experience in reading Hebrew. Through selected readings of contemporary literary works and media texts, students will increase their proficiency in Hebrew and enhance their understanding of Israeli culture and society. All readings, written assignments, and class discussions are in Hebrew. No P/D/F or R credit is allowed for this class

**Spring 2025: MDES GU4501**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4501	001/11460	M W 12:10pm - 2:00pm 607 Martin Luther King Building	Naama Harel	4.00	13/12

**MDES GU4510 3RD YR MODERN HEBREW I. 4.00 points.**

Prerequisites: Hebrew W1513 or W1515 or the instructor's permission. Students are expected to have basic familiarity with regular and irregular verbs in five categories of the Hebrew verb system: Pa'al, Pi'el, Hif'il, Hitpa'el and Nif'al.

Prerequisites: 2nd Year Modern Hebrew II, Hebrew for Heritage Speakers II, or the instructor's permission. This course is designed to take students from the intermediate to advanced level. Students will further develop their reading, writing, speaking, and listening skills in Hebrew through an examination of a wide range of sources, including short stories, poems, visual arts, popular music, television shows and films. All readings, written assignments, and class discussions are in Hebrew. No P/D/F or R credit is allowed for this class

**HIST GR8132 THE JEWISH BOOK IN EARLY MOD WORLD. 4.00 points.**

This course will situate the Jewish book within the context of the theoretical and historical literature on the history of the book: notions of orality and literacy, text and material platform, authors and readers, print and manuscript, language and gender, the book trade and its role in the circulation of people and ideas in the early age of print

**HIST GU4641 HOLOCAUST GENOCIDE-AMER CULTRE. 4.00 points.**

When the Holocaust Museum in Washington, D.C. opened in 1993, some people asked why a "European" catastrophe was being memorialized alongside shrines to Washington, Jefferson, and Lincoln while there was still no museum documenting the experience of African slaves in the United States or the effort to exterminate the Native Americans on this continent. How American intellectuals have thought about the Nazi regime and the Holocaust in Europe since before the Second World War and in the latter half of the twentieth century is the focus on this course. The course will also compare the ways the United States narrates, conceptualizes and deals with the Holocaust as opposed to other genocidal events. This course is comparative at its core as it examines how intellectuals and institutions spanning from Hannah Arendt to the United Nations to the US Holocaust Museum have woven this event into American culture

## Comparative Literature

**CLGR UN3458 Netflix Culture. 3.00 points.**

Netflix Culture "Whether you are in Sydney or St. Petersburg, Singapore or Seoul, Santiago or Saskatoon, you now can be part of the internet TV revolution. No more waiting. No more watching on a schedule that's not your own. No more frustration. Just Netflix." (Netflix CEO Reed Hastings, 2016) The word "Netflix" refers not simply to the American online video store that became a streaming service in the twenty-first century's first decade and an international production

company in the second. It is a synecdoche for the widespread popularization of Internet TV seen in the success of SVODs (subscription video-on-demand services) like Amazon Prime Video, Disney , and Apple TV . The course will focus on the pioneering role of the Netflix streaming service and its dominant role in the creation and distribution of popular film and television content. In recent years, the success of internationally acclaimed productions has signaled a renewed interest in global histories and cultures, many of which were produced by Netflix and made available worldwide through its streaming service. The course discusses how processes of distribution and redistribution set in motion by the streaming service call for us to reconsider and reapproach ideas advanced by cultural studies that now seem unsuitable for delineating the full scope of Internet TV's proliferation. We analyze Netflix series in the global scene and examine how global contents are tied to the emergence of unique genres. How do recent Netflix productions change, modify, or reimagine the narratives of national histories and cultures globally? Has the international online platform and film market more generally changed national images and stereotypes? More specifically, which genre conventions emerge from global politics and these new modes of streaming services? How have the series assimilated to international market conditions and audiences? Has the serial dispositive of television (as opposed to film), as well as the different viewing venues (private space of one's home) and mode of consumption (binging), changed how global contents are presented? Each week will focus on a different genre and analyze central episodes from two different series

**CLSL GU4029 Bible, Literature, Theory. 3.00 points.**

This class aims to introduce the students to the field of Bible and Literature, with special attention to the Hebrew Bible and to Literary Theory. We will read portions of Genesis, Numbers, Jonah, Hosea, Ezekiel, Esther, Mark, and Revelations, and discuss it in tandem with literary theory as well as 20th Century literary texts. Literary theory, this class will argue, is central for our understanding of the Bible, and, at the same time, the Biblical text is essential for the manner in which we theorize literature. Our discussion will be guided by four loosely interconnected questions: What insights can we gain about the theology of the Biblical text from a literary analysis? What happens to theological ideas once they are dramatized and narrativized? In what way can modern literary adaptations of the Bible contribute to our understanding of the Biblical text? How does the Bible challenge and trouble some of the perceived ideas of literary theory? The syllabus is divided into three units. The first unit —Bible and Literature in Theory, offers a survey of some of the scholarly approaches to the intersection of literature and theology. We will read theory that interrogates the intersection of theological and literary

concepts, focusing on omniscience, authorship, temporality, characterization, and plot. The second unit —Literature as Biblical Exegesis, shifts the focus to a reading of Biblical texts in tandem with their modern literary and cinematic interpretations, focusing on Job and Esther. What, we will ask, happen to the Biblical world once it is being refracted through a modern sensibility? How can we take literature seriously as Biblical hermeneutics? The third unit —Recent Directions, introduces some of the recent directions in the field, focusing on how literature imagines the relationship between Bible, archeology, and modernity, as well as on the intersection of Biblical literature, fantasy, and science fiction

**Fall 2024: CLSL GU4029**

**CLSL GU4012 Holocaust Literature: Critical Thinking in Dark Times. 3.00 points.**

How do you write literature in the midst of catastrophe? To whom do you write if you don't know whether your readership will survive? Or that you yourself will survive? How do you theorize society when the social fabric is tearing apart? How do you develop a concept of human rights at a time when mass extermination is deemed legal? How do you write Jewish history when Jewish future seems uncertain? This course offers a survey of the literature and intellectual history written during World War II (1939-1945) both in Nazi occupied Europe and in the free world, written primarily, but not exclusively, by Jews. We will read novels, poems, science fiction, historical fiction, legal theory and social theory and explore how intellectuals around the world responded to the extermination of European Jewry as it happened and how they changed their understanding of what it means to be a public intellectual, what it means to be Jewish, and what it means to be human. The aim of the course is threefold. First, it offers a survey of the Jewish experience during WWII, in France, Russia, Poland, Latvia, Romania, Greece, Palestine, Morocco, Iraq, the USSR, Argentina, and the United States. Second, it introduces some of the major contemporary debates in holocaust studies. Finally, it provides a space for a methodological reflection on how literary analysis, cultural studies, and historical research intersect

**RELI GU4509 CRIME/PUNISHMENT-JEWISH CULTRE. 4.00 points.**

Jews have stood on every imaginable side of criminal justice: accuser and accused; prosecutor, defendant, and defender; judge and judged; spectator; storyteller; journalist; critic; advocate. How did Jews approach these various roles, and what notions of crime, criminality, punishment, and justice did they bring with them? This course crosses chronological eras, geographical regions, and academic disciplines to explore configurations of crime and punishment in Jewish cultures. It strives to achieve a balance in its coverage of Ashkenaz vs. Sefarad; ancient, late ancient, medieval, modern, and contemporary Judaism; the specific and historical vs. the philosophical and theoretical; and varieties of sex, race, and gender. The role of classical Jewish texts, theology, and community in shaping Jewish approaches to criminal justice will all be considered

**Fall 2024: RELI GU4509**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**SOCI GR6161 Dynamics of the Israeli-Palestinian Conflict. 4.00 points.**

The seminar will explore the Israeli-Palestinian (and Israeli-Arab) conflict from the beginning of the 20th century until today. The first part of the seminar will focus on the historical background informing the conflict and leading to the Palestinian refugee problem and the establishment of a Jewish, but not Palestinian, state in 1948. The second part of the seminar focuses on Palestinian-Arab citizens in Israel, Israel's occupation of the West Bank and Gaza, the settlement project,

and possible political solutions, as well as the USA's role and its impact on the conflict, the occupation, and the current Gaza war

**Women's Studies****WMST GU4336 GENDER AND SEXUALITY IN YIDDISH LITERATURE. 4.00 points.**

Early publications in Yiddish, a.k.a. the mame loshn, 'mother tongue,' were addressed to "women and men who are like women," while famous Yiddish writer, Sholem Aleichem, created a myth of "three founding fathers" of modern Yiddish literature, which eliminated the existence of Yiddish women writers. As these examples indicate, gender has played a significant role in Yiddish literary power dynamics. This course will explore representation of gender and sexuality in modern Yiddish literature and film in works created by Sholem Aleichem, Sholem Asch, Fradl Shtok, Sh. An-sky, Malka Lee, Anna Margolin, Celia Dropkin, Isaac Bashevis Singer, Kadya Molodowsky, Troim Katz Handler, and Irena Klepfisz. You will also acquire skills in academic research and digital presentation of the findings as part of the Mapping Yiddish New York project that is being created at Columbia. No knowledge of Yiddish required

## Yiddish

### YIDD UN1101 ELEMENTARY YIDDISH I. 4.00 points.

This course offers an introduction to the language that has been spoken by the Ashkenazi Jews for more than a millennium, and an opportunity to discover a fabulous world of Yiddish literature, language and culture in a fun way. Using games, new media, and music, we will learn how to speak, read, listen and write in a language that is considered one of the richest languages in the world (in some aspects of vocabulary). We will also venture outside the classroom to explore the Yiddish world today: through field trips to Yiddish theater, Yiddish-speaking neighborhoods, Yiddish organizations, such as YIVO or Yiddish farm, and so on. We will also have Yiddish-speaking guests and do a few digital projects. At the end of the two-semester course, you will be able to converse in Yiddish on a variety of everyday topics and read most Yiddish literary and non-literary texts. Welcome to Yiddishland!

#### Fall 2024: YIDD UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### YIDD UN2101 INTERMEDIATE YIDDISH I. 4.00 points.

Prerequisites: *YIDD W1101-W1102* or the instructor's permission.

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission. This year-long course is a continuation of Elementary Yiddish II. As part of the New Media in Jewish Studies Collaborative, this class will be using new media in order to explore and research the fabulous world of Yiddish literature, language, and culture, and to engage in project-oriented activities that will result in creating lasting multi-media online presentations. In addition to expanding the command of the language that has been spoken by the Ashkenazi Jews for more than a millennium, i.e. focusing on developing speaking, reading, writing and listening skills, and on the acquisition of more advanced grammatical concepts, students will also get some video and film editing training, and tutorials on archival research. The class will continue to read works of Yiddish literature in the original and will venture outside of the classroom to explore the Yiddish world today: through exciting field trips to Yiddish theater, Yiddish-speaking neighborhoods, YIVO, Yiddish Farm, and so on. And we will also have the Yiddish native-speaker guest series. Welcome back to Yiddishland!

### YIDD GU4113 Yiddish for Academic Purposes I. 3 points.

The course focuses on developing skills in reading and translating Yiddish texts for academic research. It starts with an accelerated review of Yiddish grammar, accompanied by short texts and grammar and translation exercises, and then continues with reading a variety of more advanced literary and scholarly texts. Some of the material listed on the syllabus may be substituted by texts suggested by the students. The objective of the class is to acquire solid grammar base as well as reading proficiency that goes beyond word-for-word translation, includes skills of making reasonable guesses based on the context, and develops reading strategies. The course is designed primarily for graduate students who need to conduct research in Yiddish but it is open to everyone. No knowledge of Yiddish required but some background is strongly recommended.

## SPRING 2025 COURSES

### Jewish Studies

#### JWST GU4158 Zionist Thought: Center and Periphery. 4.00 points.

In this course, students will learn about some of the many manifestations of Zionist thought and organizing from the nineteenth century to the present day. The term "Zionism" is much-debated, but usually with little direct reference to its myriad meanings over time and space. The priorities, concerns, and ideas of Zionists in 1940s Algeria might differ greatly from contemporaneous Egyptian Zionist circles. On the other hand, twenty-first century American Zionists might have more in common with 1910s Ottomanists than one would expect. Each week, we will explore a different region of the world, examining Zionism in the Ottoman Empire, 'Iraq,

Iran, India, Yemen, 'Aden, Europe, North Africa (Algeria, Tunisia, Morocco, Libya, and Egypt), Sub-Saharan Africa (Ethiopia, Eritrea, Djibouti, and Nigeria), South America, the United States, and Israel. Doing so will allow us to develop an expansive understanding of Zionist thought, shedding light on critical debates and current events in Israel and around the world

**Spring 2025: JWST GU4158**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
JWST 4158	001/10850	W 12:10pm - 2:00pm 302 Fayerweather	Benjamin Berman-Gladstone	4.00	26/25

**JWST GU4600 History of Modern Israel. 4.00 points.**

While Israel is perhaps one of the most discussed and debated state in the world – only few onlookers have a deep understanding of Israel's complex and fragmented society and politics. This course invites the students into a journey to the historical and current Israeli politics and society by introducing the creation of the Israeli Democracy, the main political debates, different ideological visions, and the main cleavages and demographic divisions that have driven Israeli society from 1948 through the present days. By presenting continuation and changes in Israel history and society the students will learn about the main events in Israel history with respect to military and diplomatic issues, different groups and parties – among them, Ultra-Orthodox (Haredim), Palestinian citizens of Israel, Ethiopian Jews, Religious Zionist, Jewish settlers, Ashkenazi vs Mizrahi/Sephardic Jews – which create the fabric of Israel politics and society from its formative years to the current era. With an eye open to current developments, the course will also discuss new trends in Israeli politics. In addition to the reading and primary sources, the students will watch and review films about Israeli politics and culture. At the end of the course the students will gain a better understanding of Israel and its complexities. Course Objectives By the end of the course students will, (1) Understand Israel's broad and diverse social and political spectrum, with an emphasis on historical events and core issues (the peace process, religion-state dynamics, etc.) 2. Be able to discuss and write intelligently about Israel's history, politics and culture

**Spring 2025: JWST GU4600**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
JWST 4600	001/15623	T 12:10pm - 2:00pm 302 Fayerweather	Avraham Shilon	4.00	27/29

**JWST GU4601 The History of Mizrahi Jews. 4.00 points.**

The term "Mizrahi Jews" defines the Jews who lived under Islamic rule throughout the Middle East and North Africa since the Ottoman era. Most of the Jewish settlement in that area began before the Muslim conquest, and since then created a unique heritage that absorbed local Muslim customs and languages alongside the Jewish cultural and religious traditions of those areas. Jewish presence in these countries of Islam ended almost completely in the mid-20th century after most Jews emigrated to Israel and a minority migrated to other

countries. In 1948, the year Israel was founded, about a million Jews lived in the countries of Islam, while in 2024, about 30,000 remained, mostly in Turkey and Iran. Each of the communities in the region had its unique world of history, culture, and heritage, alongside common similarities shared by most of these communities. However, the research literature on them - referred to as Arab-Jews, Mizrahim, or Sephardi - is still lacking compared to the research on European Jews. In this course, we will learn about the history, sociology, culture, and intellectual horizons of those Jews who lived in Arab countries and later immigrated to Israel. The reading will pay special attention to the ways they were absorbed in Israel, to their difficulties and processes of integration - all against the backdrop of the current Israeli-Arab conflict and memories of past coexistence. By that, we will also examine broader questions concerning decolonization processes, nationalism, identities, secularization, and religion. The main part of the second stage of this course will outline the contours of Mizrahi culture in their homelands and later in Israel as it has developed in recent decades in various fields: music, literature, television, cinema, food, theater, art, and more. In addition to the articles, the students will watch and review films, music shows, speeches, and other primary sources At the course's end, the students will better understand the unique history, politics, and culture of Mizrahi Jews

**Spring 2025: JWST GU4601**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
JWST 4601	001/15624	W 10:10am - 12:00pm 337 Seeley W. Mudd Building	Avraham Shilon	4.00	36/35

**JWST GU4155 Auteur Study: Steven Spielberg. 3.00 points.**

The world's most influential living film director and the most impactful creator of popular culture in the last quarter of the Twentieth Century is a Jewish-American. Steven Spielberg's uncanny grasp of visual storytelling and his auteurist signature can be found on every film he has directed, as well as many he has produced. This course will analyze the content and formal construction of Spielberg's films by following their thematic through-lines – family ties (strained and healthy), the implacable threat, humanity at war, man vs. the natural world, the child's perspective, Jewish identity and others – in films as disparate as *Jaws* and *The Color Purple*. Each class meeting will include a complete screening of a feature film directed by Steven Spielberg, as well as clips of related films by Spielberg. Readings will include critical essays, histories, and interviews which elaborate on in-class screenings and cover additional topics and films. Written assignments will be three analytical essays which will encourage critical thinking, close analysis of film texts, and independent research beyond the materials presented in class

**Spring 2025: JWST GU4155**

414 Pupin  
Laboratories

### **SPJS UN3303 JEWISH CULTURE IN TRANSL IN MED IBERIA. 3.00 points.**

The course explores both the practice of translation (the rendering of texts from one language into another) and the idea of translation (as a medium of cultural transmission) in medieval Iberia. Jews were not only the paradigmatic translators of texts from Arabic to Latin and Castilian but were also translators of literary phenomena into the Jewish literary cultures of Iberia. Further, Hebrew texts made their way into Romance languages, rendered by both Jewish and non-Jewish writers. Theoretical materials on translation and historical background on translation practices of the period will accompany readings. All readings are in English, but all texts will be made available in the original language, and students are encouraged to read in the original whenever possible. Sources in bold are primary sources. Students are expected to spend three hours preparing for each class session

#### **Spring 2025: SPJS UN3303**

## **Sociology**

### **SOCI GU4801 Israel and the Palestinians. 4.00 points.**

The seminar will examine the main political, economic, and social processes that have been shaping contemporary Israel. The underlying assumption in this seminar is that much of these processes have been shaped by the 100-year Israeli-Arab/Palestinian conflict. The first part of the course will accordingly focus on the historical background informing the conflict and leading to the Palestinian refugee problem and establishment of a Jewish, but not Palestinian, state in 1948. The second part of the seminar focuses on Israel's occupation of the West Bank (and Gaza) and the settlement project, as well as on USA's role and its impact on the conflict, the occupation, and Israel. These topics did not get much academic attention until recently, but as researchers began to realize that the Occupation and the West Bank settlements are among the most permanent institutions in Israel, they have come under the scrutiny of academic research. The third part the seminar will concentrate on the development of the conflict after the establishment of Israel and its effects on sociological processes and institutions in contemporary Israel. Analyzing patterns of continuity and change in the past seven decades, we will discuss immigration and emigration patterns, as well as issue relating to ethnicity, gender, religion and politics, and the Israeli military

### **ENRE BC3145 Jews in Christian Narrative. 4.00 points.**

Since the beginning of the movement that would become Christianity, Jews have occupied a unique – and uniquely fraught – position in the Christian imagination. Why did so few of the very Jews to whom Jesus preached accept him as their messiah? Why, as the Church grew in wealth and influence, did Jews continue to live in Christian communities, and what was their proper place in Christian society? In our course, we will read early and medieval Christian narratives about Jews that are, in many ways, an attempt to answer these questions – dark imaginative visions of Jews as child-killers, cannibals, and devil worshippers. We will use narrative, psychological, and literary theory as tools to analyze these tales and to make sense of their complicated and continuing legacy

#### **Spring 2025: ENRE BC3145**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **RELI UN1452 Animals and Religion. 4.00 points.**

Religion features animals everywhere, from the lion lying with the lamb in biblical prophecy, to the beasts that populate many myths, to beliefs in the transmigration between human and animal souls, to legislations and rituals for animal slaughter, to religious responses to animal suffering, to a range of positions on meat-eating and vegetarianism, and the list keeps going. “Animals and Religion” introduces you to the many different ways that the world’s religious traditions approach nonhuman beings — the creatures we call “animals.” We will address animals in the big “world religions” such as Buddhism, Hinduism, and the “Abrahamic” traditions, as well as in local and indigenous traditions and in secular spiritualities, from antiquity to today. We will conduct our inquiry under the shadow of species extinction, factory farming, and other forms of species-based oppression. The course will explore how religious traditions are obstacles as well as rich resources in

contemporary thinking about the question of the animal and in the choices we make regarding fellow creatures

**RELI UN1620 RELIGION # THE MOVIES. 4.00 points.**

This class is an introduction to both film and religious studies and aims to explore their interaction. Ranging from auteurs to blockbusters, the course will analyze movies that make use of the sacred and of religious themes, figures or metaphors. The course will probe the definitions and boundaries of religion -as theology, myth, ideology- and will show students how religion remains a critical presence in the arts, even in a secular guise. We will look at the ways in which popular culture can serve religious functions in contemporary society and examine how faith is represented in popular culture

## Yiddish

**YIDD UN1102 ELEMENTARY YIDDISH II. 4.00 points.**

This course offers an introduction to the language that has been spoken by the Ashkenazi Jews for more than a millennium, and an opportunity to discover a fabulous world of Yiddish literature, language and culture in a fun way. Using games, new media, and music, we will learn how to speak, read, listen and write in a language that is considered one of the richest languages in the world (in some aspects of vocabulary). We will also venture outside the classroom to explore the Yiddish world today: through field trips to Yiddish theater, Yiddish-speaking neighborhoods, Yiddish organizations, such as YIVO or Yiddish farm, and so on. We will also have Yiddish-speaking guests and do a few digital projects. At the end of the two-semester course, you will be able to converse in Yiddish on a variety of everyday topics and read most Yiddish literary and non-literary texts. Welcome to Yiddishland!

**Spring 2025: YIDD UN1102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
YIDD 1102	001/13390	M W 4:10pm - 6:00pm 408 Hamilton Hall	Joshua Beirich	4.00	10/15

**YIDD UN2102 INTERMEDIATE YIDDISH II. 4.00 points.**

Prerequisites: *YIDD W1101-W1102* or the instructor's permission.

Prerequisites: YIDD UN1101-UN1102 or the instructor's permission. This year-long course is a continuation of Elementary Yiddish II. As part of the New Media in Jewish Studies Collaborative, this class will be using new media in

order to explore and research the fabulous world of Yiddish literature, language, and culture, and to engage in project-oriented activities that will result in creating lasting multi-media online presentations. In addition to expanding the command of the language that has been spoken by the Ashkenazi Jews for more than a millennium, i.e. focusing on developing speaking, reading, writing and listening skills, and on the acquisition of more advanced grammatical concepts, students will also get some video and film editing training, and tutorials on archival research. The class will continue to read works of Yiddish literature in the original and will venture outside of the classroom to explore the Yiddish world today: through exciting field trips to Yiddish theater, Yiddish-speaking neighborhoods, YIVO, Yiddish Farm, and so on. And we will also have the Yiddish native-speaker guest series. Welcome back to Yiddishland!

## Hebrew

**MDES UN2518 HEBREW FOR HERITAGE SPEAKERS. 4.00 points.**

Prerequisites: MDES W1517

Prerequisites: Hebrew for Heritage Speakers I Hebrew for Heritage Speakers II forms the second part of a year-long sequence with Hebrew for Heritage Speakers I. The course is intended for those who have developed basic speaking and listening skills through exposure to Hebrew at home or in day-school programs but do not use Hebrew as their dominant language and have not reached the level required for exemption from the Columbia language requirement. Heritage speakers differ in the degree of their fluency, but their vocabulary is often limited to topics in daily life and many lack skills in reading and writing to match their ability to converse. The course focuses on grammar and vocabulary enrichment, exposing students to a variety of cultural and social topics in daily life and beyond. By the end of the semester students are able to read and discuss simple texts and write about a variety of topics. Successful completion of the year-long sequence prepares students to enroll in third-year modern Hebrew. No P/D/F or R credit is allowed for this class

**Spring 2025: MDES UN2518**

**MDES GU4501 READINGS IN HEBREW TEXTS I. 4.00 points.**

Prerequisites: (MDES GU4510) and (MDES GU4511) *MDES W4510*, *MDES W4511*, or the instructor's permission.

Prerequisites: (MDES GU4510) and (MDES GU4511) 3RD Year Modern Hebrew or the instructor's permission. This

course focuses on central identities shaping Israeli society and is designed to give students extensive experience in reading Hebrew. Through selected readings of contemporary literary works and media texts, students will increase their proficiency in Hebrew and enhance their understanding of Israeli culture and society. All readings, written assignments, and class discussions are in Hebrew. No P/D/F or R credit is allowed for this class

**Spring 2025: MDES GU4501**

**MDES GU4532 Beyond Human in Modern Hebrew Literature. 4.00 points.**

“The possibility of pogroms,” claims Theodor Adorno, “is decided in the moment when the gaze of a fatally-wounded animal falls on a human being. The defiance with which he repels this gaze—’after all it’s only an animal’—reappears irresistibly in cruelties done to human beings.” This course traces the development of Modern Hebrew literature, from its fin-de-siècle revival to contemporary Israeli fiction, through the prism of animality and animalization. We will focus on human-animal relations and animalization/dehumanization of humans in literary works by prominent Hebrew authors, including M.Y. Berdichevsky, Devorah Baron, S.Y. Agnon, Amos Oz, David Grossman, Orly Castel-Bloom, Almog Behar, Etgar Keret, and Sayed Kashua. Employing posthumanist and ecofeminist theoretical lenses, we will analyze the bio-political intersections of species and gender, as well as animalization as a process of otherization of marginalized ethnic groups. Throughout the course, we will ask questions, such as: why animals abound in Modern Hebrew literature? Are they merely metaphors for intra-human issues, or rather count as subjects? What literary devices are used to portray animals? How has the depiction of human-animal relations changed in Hebrew over the last 150 years? How do cultural and political frameworks inform representations of human-animal relations? No prior knowledge of Hebrew is required; all readings and class discussions will be in English. Course participants with reading knowledge of Hebrew are encouraged to consult the original literary texts, provided by the instructor upon request

**Spring 2025: MDES GU4532**

**Comparative Literature****CLYD UN3500 READINGS IN JEWISH LITERATURE. 3.00 points.**

As an onset of an ongoing investigation into the history and development of Jewish literature, we will focus on its very beginnings, as culturally understood – the Book of Genesis – and read it in light of millennia of Jewish literary commentary as lenses through which to examine currents, traditions, and trajectories of Jewish literary interpretation and history. By focusing on several distinct episodes and then tracking those episodes' reception in the light of differing moments of interpretation, we will try to gain a sense of this seminal work's changing role in Jewish history and culture. Familiarity with Biblical and rabbinic Hebrew not absolutely required, but strongly recommended

**Spring 2025: CLYD UN3500**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLYD 3500	001/17221	T 2:10pm - 4:00pm 516 Hamilton Hall	Jeremy Dauber	3.00	11/25

**History****HIST UN2100 EARLY MOD EUR: PRINT # SOCIETY. 4.00 points.**

This course will examine key cultural, political, and religious developments in early modern Western Europe (c. 1500-1800) using the lens of print technology and culture as entry point. From the Reformation of Luther, to the libelles of pre-revolutionary France, from unlocking the mysteries of the human body to those of the heavens, from humanist culture to the arrival of the novel, no important aspect of European culture in the early modern centuries can be understood without taking into account the role of print. Its material aspects, its marketing and distribution channels, and its creation of new readers and new "republics" form the contours of this course

**Spring 2025: HIST UN2100**

**HIST GU4601 JEWS-LATER ROMAN EMP,300-600CE. 4.00 points.**

This course will explore the background and examine some of the manifestations of the first Jewish cultural explosion after 70 CE. Among the topics discussed: the Late Roman state and the

Jews, the rise of the synagogue, the redaction of the Palestinian Talmud and midrashim, the piyyut and the Hekhalot

**HIST GU4632 Jews in the Ancient City: Politics and Materiality. 4.00 points.**

This course will examine the experience of Jews in the cities of the eastern Roman Empire, offering a challenge to modern hypotheses of Jewish corporate stability in that setting and contributing to modern discussions of the relations between the Roman state, Greek cities, and Jewish and Christian subjects

**Spring 2025: HIST GU4632**

## LANGUAGE RESOURCE CENTER

**Office:** 353 International Affairs Building; 212-854-9224  
<http://www.lrc.columbia.edu/>

**Director:** Dr. Stéphane Charitos, 353 International Affairs Building; 212-854-6341; [sc758@columbia.edu](mailto:sc758@columbia.edu)

**Associate Director:** Christopher Kaiser, 353 International Affairs Building; 212-854-3326; [ck2831@columbia.edu](mailto:ck2831@columbia.edu)

**Hours of Operation:** Monday-Friday, 9 a.m.–5 p.m.

The Language Resource Center supports students throughout the course of their language study at Columbia. The LRC provides flexible physical and virtual spaces for language learning, facilitates access to resources, and connects students to language-related opportunities at Columbia and beyond. The LRC is also home to the Shared Course Initiative, which uses specialized distance classrooms for sharing several languages between Columbia, Cornell, and Yale universities. For more information on language learning at Columbia, visit [lrc.columbia.edu](http://lrc.columbia.edu).

### AKKADIAN

All Akkadian courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

**AKAD OC1101 ELEMENTARY AKKADIAN I. 3.00 points.**

**AKAD OC1102 ELEMENTARY AKKADIAN II. 3.00 points.**

Introduction to cuneiform script and to the Akkadian language, with emphasis on grammatical structure

**AKAD OC2101 INTERMEDIATE AKKADIAN I. 3.00 points.**

Prerequisites: AKAD UN1101 and AKAD UN1102 or the instructor's permission. Readings in Akkadian literature

**AKAD OC2102 INTERMEDIATE AKKADIAN II. 3.00 points.**

Further readings in Akkadian literature

### ANCIENT EGYPTIAN

All Ancient Egyptian courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

**EGYP OC1101 ELEMENTARY ANCIENT EGYPTIAN I: INTRO TO CLASSICAL HIEROGLYPHIC EGYPTIAN (MIDDLE EGYPTIAN). 4.00 points.**

Introduction to hieroglyphics; readings in ancient Egyptian texts

**EGYP OC1102 ELEMENTARY ANCIENT EGYPTIAN II: INTRO TO CLASSICAL HIEROGLYPHIC EGYPTIAN (MIDDLE EGYPTIAN). 4.00 points.**

This course, the second in a two-semester sequence, will introduce students to the Middle Egyptian (Classical) dialect of the ancient Egyptian language. Students will become familiar with the hieroglyphic writing system, as well as key elements of the grammar and vocabulary of Middle Egyptian

**EGYP OC2101 INTERMEDIATE ANCIENT EGYPTIAN I: ANCIENT EGYPTIAN TEXTS. 4.00 points.**

Advanced readings in ancient Egyptian texts

**Fall 2024: EGYPT OC2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**BURMESE****BURM UN1101 ELEMENTARY BURMESE I. 4.00 points.**

This course aims to train students to achieve basic skills in Burmese. They will develop competency in reading and writing Burmese script. Students will also learn basic spoken Burmese

**BURM UN1102 ELEMENTARY BURMESE II. 4.00 points.**

This course is the second part of the Elementary Burmese level and aims to train students to achieve basic skills in Burmese. In

this course student will continue to develop their competency in reading and writing the Burmese script. Students will also continue to practice basic spoken Burmese

**BURM UN2101 Intermediate Burmese. 4.00 points.**

This course is for students who have taken first-year Burmese or learned some Burmese elsewhere and know how to read and write Burmese script. Students will continue learning all major aspects of the language at the intermediate level, including the reading and understanding of formal-style texts. In spoken Burmese, students will practice communicating at the increasingly complicated and practically useful level. Some of the assignments are completed online using interactive video and audio materials

**BURM UN2102 Intermediate Burmese II. 4.00 points.**

This course extends intermediate language study in the Burmese language, building on structures and concepts introduced in Intermediate Burmese I. Students will hone their competency in reading and writing Burmese script, including formal style. Students will also practice spoken Burmese using compound sentences

## CANTONESE

**CANT OC1101 ELEMENTARY CANTONESE I. 4.00 points.**

This course introduces students to both the spoken and written Cantonese language, with achieving conversational proficiency being a primary goal. The course emphasizes oral expressions, listening comprehension, and grammar. It is designed to give beginning students a practical command of the language. Upon completion of the course, students can expect to converse in simple sentences, and recognize and write about 350 Chinese characters. Students with passable conversation ability or native speakers from Cantonese-speaking communities should not enroll in this course. Note: This course is part of the language exchange program with New York University (NYU). Classes will be held at NYU

**Fall 2024: CANT OC1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

## HAITIAN KREYOL (KREYÒL)

### KREY OC1101 ELEMENTARY HAITIAN KREYOL I. 4.00 points.

This course introduces students to the language of Haitian Kreyòl, also called Creole, and is intended for students with little or no prior knowledge of the language. Haitian Kreyòl is spoken by Haiti's population of nine million and by about one million Haitians in the U.S. Including over 190,000 in the New York City area. In fact, New York City has the second largest population of Kreyòl Speakers after Port--au--Prince, Haiti's capital. Through this course, you will develop introductory speaking, reading, and writing skills. We use a communicative approach, balanced with grammatical and phonetic techniques. Classroom and textbook materials are complemented by work with film, radio, and especially music (konpa, rasin, twoubadou, rap, raga, levanjil, vodou tradisyonèl, etc.), as well as with visits to city museums and institutions related to Haiti. Note: This course is part of the language exchange program with New York University (NYU). Classes will be held at NYU

Fall 2024: KREY OC1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
KREY 1101	001/11764	M W F 12:30pm - 1:45pm None None	Stephane Charitos, Wynnne Lamour, Christopher Kaiser	4.00	4/10

### KREY OC1102 ELEMENTARY HAITIAN KREYOL II. 4.00 points.

This course introduces students to the language of Haitian Kreyòl, also called Creole, and is intended for students with little or no prior knowledge of the language. Haitian Kreyòl is spoken by Haiti's population of nine million and by about one million Haitians in the U.S. Including over 190,000 in the New York City area. **IRISH**

All Irish courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

**IRSH OC1101 ELEMENTARY IRISH I. 4.00 points.**

This course introduces students to the rudiments of the Irish language, including phonemes and pronunciation, syntactical structure, and verbal conjugations. In addition, a history of the language is provided, as well as a general introduction to Irish culture, including discussions of family and place names. Students are encouraged to begin speaking with basic sentence structures, eventually expanding into more complex verbal conjugations while concentrating on idiomatic expressions. The accumulation of vocabulary is stressed and students are introduced to basic literature in Irish while developing beginning conversational fluency

**Fall 2024: IRSH OC1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
IRSH 1101	001/11763	M W 11:00am - 12:15pm None None	Christopher Kaiser, Stephane Charitos	4.00	4/5

**IRSH OC1102 ELEMENTARY IRISH II. 4.00 points.**

This course introduces students to the rudiments of the Irish language, including phonemes and pronunciation, syntactical structure, and verbal conjugations. In addition, a history of the language is provided, as well as a general introduction to Irish culture, including discussions of family and place names. Students are encouraged to begin speaking with basic sentence structures, eventually expanding into more complex verbal conjugations while concentrating on idiomatic expressions. **KHMER****KHMR UN1101 Elementary Khmer I. 4 points.**

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Khmer, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

**KHMR UN1102 Elementary Khmer II. 4 points.**

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Khmer, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

**KHMR UN2101 Intermediate Khmer I. 4 points.**

In this course, learners will continue practicing all four language skills through every day dialogues, writing letters, and describing basic situations. In addition, they will be introduced to Khmer literature and learn how to read and comprehend basic Khmer texts, such as newspaper articles. Finally, they will be introduced to current affairs as well as social, artistic, and cultural events and issues in Cambodia. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

**QUECHUA**

All Quechua courses are part of the language exchange program with New York University (NYU). Classes will be held at NYU.

**QUCH OC1101 ELEMENTARY QUECHUA I. 4.00 points.**

Quechua is the most important and most widely-distributed indigenous language in South America, with over 10 million speakers living from the high mountains to the tropical lowlands in Colombia, Ecuador, Peru, Bolivia, Chile, and Argentina. Those who speak it call the language runa simi or runa shimi, human speech. It was the principal language of the Inca empire and the key language of cultural interaction during the colonial era. Quechua has remained central to indigenous peoples efforts to preserve their cultural autonomy. It has gained greater force in recent years, during which indigenous movements have swept Quechua speakers into national politics, where they have succeeded in transforming constitutions to recognize cultural diversity, making Quechua an official language of state, and successfully promoting schooling in the language. Students who satisfactorily complete Elementary Quechua I and II will be well-prepared for intensive summer study at one of many summer study abroad programs in Ecuador, Peru, and Bolivia that will put them in closer contact with the indigenous world

**Fall 2024: QUCH OC1101**

#### SINH UN1102 Elementary Sinhala II. 4 points.

This course is designed to bring students with no background to a point where they can perform most basic linguistic functions in Sinhala, including greetings, likes/dislikes, telling about yourself, describing places and situations, all in appropriate time frames. The class uses a highly interactive classroom style, supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by videoconferencing from Cornell as part of the Shared Course Initiative.

#### SINH UN2101 INTERMEDIATE SINHALA I. 4.00 points.

Prerequisites: SINH W1101-1102 or the instructor's permission. In this course, learners will continue practicing all four language skills through every day dialogues, writing letters, and describing basic situations. In addition, they will be introduced to Sinhala literature and learn how to read and comprehend basic Sinhala texts, such as newspaper articles. Finally, they will be introduced to current affairs as well as social, artistic, and cultural events and issues in Sri Lanka. The class uses a highly interactive classroom style supplemented by extensive use of video - both prepared and student-produced - and other computer-assisted tools. Please note this course is offered by

videoconferencing from Cornell as part of the Shared Course Initiative

**SINH UN3101 Literary Sinhala I. 3.00 points.**

This one-semester course introduces the distinctive grammatical forms and vocabulary used in Literary Sinhala. While focused particularly on the development of reading skills, the course also introduces students to Literary Sinhala composition, builds students' listening comprehension of semi-literary Sinhala forms (such as those used in radio and TV news), and guides students in incorporating elements of the literary register of Sinhala in their spoken production

**Fall 2024: SINH UN3101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SINH 3101	001/11079	M 11:00am - 12:30pm 352b International Affairs Bldg	Stephane Charitos, Bandara Herath, Christopher Kaiser	3.00	1/5

## LATIN AMERICAN AND CARIBBEAN STUDIES

### THE INSTITUTE OF LATIN AMERICAN STUDIES:

Department website: <https://ilas.columbia.edu/>

Office location: 8th Floor International Affairs Building

Office contact: 212-854-4643; [ek2159@columbia.edu](mailto:ek2159@columbia.edu)

Director of Undergraduate Studies: M. Victoria Murillo,  
[mm2140@columbia.edu](mailto:mm2140@columbia.edu)

Senior Manager of Business & Students Affairs: Eliza Kwon-Ahn,  
[ek2159@columbia.edu](mailto:ek2159@columbia.edu)

### THE STUDY OF LATIN AMERICAN & CARIBBEAN STUDIES

The major in Latin American and Caribbean Studies stresses knowledge of a dynamic, historically deep and extensive region, but it also focuses on social, political, and cultural phenomena that transcend physical boundaries. The major thus reflects multidisciplinary dialogues that are transnational yet remain anchored in the common historical experience of Latin American societies. Thanks to the broad range of courses on Latin America offered in different departments of instruction and centers at Columbia, the major provides a multidisciplinary training on politics, history, culture, economy and society.

The Institute of Latin American Studies coordinates the major and offers access to research support, study abroad options, and linkages and credits toward the M.A. program in Latin American and Caribbean studies.

## STUDENT ADVISING

For general advising, please contact ILAS Senior Manager of Business & Student Affairs Eliza Kwon-Ahn  
[ek2159@columbia.edu](mailto:ek2159@columbia.edu)

### Preparing for Graduate Study

Please contact the DUS Prof. M. Victoria Murillo  
[mm2140@columbia.edu](mailto:mm2140@columbia.edu)

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

Not applicable

### Barnard College Courses

Not applicable

### Transfer Courses

Students are allowed to receive course credit for study abroad only. To find out more, please see "Study Abroad Courses"

### Study Abroad Courses

Students are encouraged to study abroad during their Junior years. The program accepts up to 12 credits for the disciplinary of choice for the major and up to 3 credits for the minor.

Interested students should submit the syllabi and all the coursework related to each course prior to traveling for approval by the DUS.

### Summer Courses

Not applicable

## CORE CURRICULUM CONNECTIONS

Many of the interdisciplinary courses for the program may partially satisfy Global core requirements. Not all courses are offered every semester, but there are ample opportunities to take these courses:

HIST UN2618: The Modern Caribbean

HIST UN2660: Latin American Civilization I

HIST UN2661: Latin American Civilization II

LACV UN1020: Primary Texts of Latin American Civilization

HIST GU4301: Politics and Justice in Latin America through Crime Fiction

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

Students in the major track will have opportunities to develop their own research as part of the required seminar course.

Students can work independently with a professor for one seminar or if accepted, take the graduate seminar courses for the MA students in Latin American & Caribbean Studies (LCRS G6400 and G6401).

For more information, please contact Eliza Kwon-Ahn at [ek2159@columbia.edu](mailto:ek2159@columbia.edu).

## Senior Thesis Coursework and Requirements

not applicable

## Undergraduate Research Outside of Courses

not applicable

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Departmental Honors are awarded to no more than 10% of graduating majors (including October, February and May graduates); students should have a GPA of at least 3.6 in major courses in order to be considered for Departmental Honors; and students should have successfully completed an honors thesis, or an equivalent project of high quality.

Students may work independently with a professor or if accepted, take the graduate seminar courses for the MA students in Latin American & Caribbean Studies (LCRS G6400 and G6401).

### Academic Prizes

Not applicable

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

For additional information on Latin American and Caribbean Studies, please visit the Institute's [website](#) or contact Eliza Kwon-Ahn, Senior Manager of Business & Student Affairs, at [ek2159@columbia.edu](mailto:ek2159@columbia.edu).

### Program Planning for all Students

Not applicable

### Course Numbering Structure

Not applicable

### Guidance for First-Year Students

Students interested in Latin American & Caribbean Studies are encouraged to take one of the following 3 history courses:

1. HIST UN2660: Latin American civilization, I
2. HIST UN2661: Latin American civilization, II
3. LACV CC1020: Primary Texts of Latin American Civilization

These above courses will fulfill the global core requirement and give students the historical foundation as Latin America as a whole.

### Guidance for Transfer Students

Students interested in Latin American & Caribbean Studies are encouraged to take one of the following 3 history courses:

1. HIST UN2660: Latin American civilization, I
2. HIST UN2661: Latin American civilization, II
3. LACV CC1020: Primary Texts of Latin American Civilization

These above courses will fulfill the global core requirement and give students the historical foundation as Latin America as a whole.

If a transfer student has taken a similar course in a previous institution, we encourage students to consult the DUS for course replacement.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

Students interested in the major or the minor should start taking one of the following 3 courses:

1. HIST UN2660: Latin American civilization, I
2. HIST UN2661: Latin American civilization, II
3. LACV CC1020: Primary Texts of Latin American Civilization

### Major in Latin American and Caribbean Studies

The major requires a minimum of 31 points as follows:

Select five of the following fourteen courses. One of these courses must be Latin American Civilization I (HIST UN2660), Latin American Civilization II (HIST UN2661) or Primary Texts in Latin American Civilization (LACV UN1020):

CLEN GU4644	REVOLUTION IN/ON THE CARIBBEAN
HIST UN1786	History of the City in Latin America
HIST UN2618	THE MODERN CARIBBEAN
HIST UN2660	LATIN AMERICAN CIVILIZATION I
HIST UN2661	LATIN AMERICAN CIVILIZATION II
HIST BC2664	FAMILIES LATIN AMERICA
HIST BC2676	LATIN AMERICA: MIGRATION, RACE, AND ETHNICITY
HIST BC2681	WOMEN AND GENDER IN LATIN AMERICA
HIST GU4301	Politics and Justice in Latin America through Crime Fiction
LACV UN1020	PRIM TEXTS OF LATIN AMER CIV
POLS UN3560	PLCS URBAN DEV LATIN AMERICA
POLS UN3565	DRUGS # POLITICS IN AMERICAS
POLS GU4461	Latin American Politics
SPAN UN3300	ADV LANGUAGE THROUGH CONTENT

**\*\*\* The SPAN UN3300 section taken for the Major must focus on Latin America. Please contact the ILAS Student Affairs Coordinator for details.**

### Language Requirement

Select one course on Spanish, Portuguese, or an indigenous language at the intermediate or advanced level; if students can demonstrate advance knowledge of one of these languages, they can replace this course with an area studies course.

### Discipline of Choice

Select four courses in a discipline or theme of choice with substantive focus on Latin America. One of these courses must be a seminar. All students, however, need to take at least two courses in a discipline or theme outside of their specialization. The director of undergraduate studies advises students on areas of specialization and must approve courses with substantial Latin American or Caribbean contents not included in the list of eligible courses.

Up to 12 credits for Discipline of Choice requirement can be earned through study abroad. Students are encouraged to explore study abroad options before their junior year. Upon return, they should submit the syllabi and all coursework related to each course taken abroad for approval by the director of undergraduate studies.

### Minor in Latin American & Caribbean Studies

The minimum number of credits is 15 (5 courses).

A. CORE COURSES: At least One (1) courses from the following Four (4) courses.

1. HIST UN2660: Latin American civilization, I
2. HIST UN2661: Latin American civilization, II
3. LACV CC1020: Primary Texts of Latin American Civilization
4. POLS GU4461: Latin American Politics

B. SPECIALIZED LECTURE/SEMINAR COURSES: At least Two (2) from the following Ten (10) courses.

1. ASFB GU4100: Slavery and Freedom in Latin America
2. CLEN GU4644: Revolution in/on the Caribbean
3. HIST UN1786: History of the City in Latin America
4. HIST UN2618: The Modern Caribbean
5. HIST BC2676: Reproducing Inequalities: Families in Latin America
6. HIST BC2681: Women and Gender in Latin America
7. HIST GU4301: Politics and Justice in Latin America through Crime Fiction
8. POLS UN3560: Political Urban Development in Latin America

9. POLS V3565: Drugs and Politics in the Americas

10. SPAN UN3300: Advanced Language through Content (with Latin American focus)

C. SEMINAR COURSE: Students will take one seminar course in any department with DUS approval to develop an in-depth topic in the region.

Up to 3 credits (1 course) can be earned through study abroad. Students are encouraged to explore study abroad options before their junior year. Prior to traveling, they should submit the syllabi and all coursework related to each course taken abroad for approval by the director of undergraduate studies.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Latin American and Caribbean Studies

The concentration requires a minimum of 18 points as follows:

Select three of the following fourteen courses. One of these courses must be in Latin American Civilization I (HIST UN2660), Latin American Civilization II (HIST UN2661) or Primary Texts in Latin America (LACV UN1020):

CLEN GU4644	REVOLUTION IN/ON THE CARIBBEAN
HIST UN1786	History of the City in Latin America
HIST UN2618	THE MODERN CARIBBEAN
HIST UN2660	LATIN AMERICAN CIVILIZATION I
HIST UN2661	LATIN AMERICAN CIVILIZATION II
HIST BC2664	FAMILIES LATIN AMERICA
HIST BC2676	LATIN AMERICA: MIGRATION, RACE, AND ETHNICITY
HIST BC2681	WOMEN AND GENDER IN LATIN AMERICA
HIST GU4301	Politics and Justice in Latin America through Crime Fiction
LACV UN1020	PRIM TEXTS OF LATIN AMER CIV
POLS UN3560	PLCS URBAN DEV LATIN AMERICA
POLS UN3565	DRUGS # POLITICS IN AMERICAS
POLS GU4461	Latin American Politics
SPAN UN3300	ADV LANGUAGE THROUGH CONTENT

**\*\*\* The SPAN UN3300 section taken for the Concentration must focus on Latin America. Please contact the ILAS Student Affairs Coordinator for details.**

#### Language Requirement

Select one course on Spanish, Portuguese, or an indigenous language at the intermediate or advanced level; if students can demonstrate advance knowledge of one of these languages, they can replace this course with an area studies course.

#### Discipline of Choice:

Select two courses in a discipline or theme of choice with substantive focus on Latin America. One of these courses must be a seminar. All students, however, need to take at least one course in a discipline or theme outside of their specialization. The director of undergraduate studies advises students on areas of specialization and must approve courses with substantial Latin American or Caribbean contents not included in the list of eligible courses.

The concentration requires a minimum of 18 points as follows: Up to 6 credits for the Discipline of Choice requirement can be earned through study abroad. Students are encouraged to explore study abroad options before their junior year. Prior to traveling, they should submit the syllabi and all coursework related to each course taken abroad for approval by the director of undergraduate studies.

American Cultures

# LATIN AMERICAN AND IBERIAN CULTURES

## Departmental Office:

101 Casa Hispánica | 612 W. 116th Street | (212) 854-4187  
<http://www.laic.columbia.edu/>

## Interim Director of Undergraduate Studies:

Dr. Lee B. Abraham | [lba2133@columbia.edu](mailto:lba2133@columbia.edu)

## Director of Graduate Studies:

Prof. Alberto Medina | [am3149@columbia.edu](mailto:am3149@columbia.edu)

## Director of the Spanish Language Program:

Dr. Lee B. Abraham | 402 Casa Hispánica | (212) 854-3764  
[lba2133@columbia.edu](mailto:lba2133@columbia.edu)

## Director of the Portuguese Language Program:

José Antonio Castellanos-Pazos | 501 Casa Hispánica | (212) 854-0277 | [jc846@columbia.edu](mailto:jc846@columbia.edu)

## Director of the Catalan Language Program:

Elsa Úbeda | [eu2130@columbia.edu](mailto:eu2130@columbia.edu)

The Department of Latin American and Iberian Cultures (LAIC) at Columbia, located in the Casa Hispánica, has long enjoyed an international reputation as a center for Hispanic and Lusophone studies. The department provides linguistic preparation in Spanish, Portuguese, and Catalan, and offers a flexible program to study manifestations of the Hispanic and Lusophone worlds in all historical periods—from the medieval to the globalized present—and in a variety of cultural contexts: the Iberian Peninsula, Latin America, the former colonies of Portugal, and the United States.

Students can enter the program at any level of linguistic and cultural preparedness. The department offers a placement exam to determine the level at which students may either begin or continue study. Majors and concentrators in Hispanic studies and Portuguese studies are typically double majors who bring insights and methods from fields such as history, political science, women's studies, anthropology, economics, Latino studies, Latin American studies, etc., which fosters engaging discussions.

## ACADEMIC PROGRAMS

The department offers two majors. The major in Hispanic studies gives students a well-rounded preparation in the history and culture of the Hispanic world. The second option, a major in Hispanic studies with specialization, allows students to study the Hispanic world through a number of fields, among them Latin American studies, gender studies, political science, economics, history, and sociology. The department also offers two concentrations: Hispanic studies and Portuguese studies.

The language and major programs have also been designed in close consultation and cooperation with Barnard's Department of Spanish and Latin American Cultures. All courses taken in one program may be used to fulfill the requirements of the other. Hence, Columbia and Barnard students may move freely between departments of both institutions for courses that best fit their intellectual interests and schedules.

## ADVANCED PLACEMENT

The department grants 3 credits for a score of 5 on the AP Spanish Language exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3300-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in Spanish. Courses taught in English may not be used for language AP credit.

The department grants 0 credits for a score of 4 on the AP Spanish Language exam, but the foreign language requirement is satisfied.

The department grants 3 credits for a score of 5 on the AP Spanish Literature exam, which satisfies the foreign language requirement. Credit is awarded upon successful completion of a 3300-level (or higher) course with a grade of B or higher. This course must be for at least 3 points of credit and be taught in Spanish. Courses taught in English may not be used for language AP credit.

The department grants 0 credits for a score of 4 on the AP Spanish Literature exam, but the foreign language requirement is satisfied.

## STUDY ABROAD

The department strongly recommends that all Hispanic and Portuguese studies majors/concentrators study abroad. Most courses taken abroad can be used to fulfill the requirements for the major and concentration, and with adequate planning, even some of the requirements for a second major or concentration. A maximum of four (4) courses taken abroad may be applied to the major, and a maximum of three (3) to the concentration in Hispanic or Portuguese studies.

All students are strongly advised to take either SPAN UN3349 HISPANIC CULTURES I (SP) or SPAN UN3350 HISPANIC CULTURES II (SP) before studying abroad. Actual or potential majors and concentrators in Hispanic or Portuguese studies

should seek tentative approval of their programs from the director of undergraduate studies before their departure.

## THE HISPANIC INSTITUTE

The department hosts the Hispanic Institute at Columbia. Founded in 1920 as the Instituto de las Españas, the Institute sponsors and disseminates research on Hispanic and Luso-Brazilian culture. Since 1934, the Institute has published the *Revista Hispánica Moderna*, a distinguished journal in Hispanic criticism and theory.

## IN FULFILLMENT OF THE LANGUAGE REQUIREMENT

For students with no knowledge of Spanish, Portuguese, or Catalan, at least four terms of the language are required: *UN1101-UN1102* (or *UN1120*) and *UN2101-UN2102* (or *UN2120*). **All courses must be taken for a letter grade to fulfill the language requirement.**

Students with prior knowledge of Spanish who plan to continue studying Spanish are required to take the department's on-line placement examination before registering for courses. Students with prior knowledge of Portuguese or Catalan should speak with the director of language programs.

Students may be exempted from the language requirement in one of four ways:

1. Present a score of 4 or 5 on the AP Spanish Language or Spanish Literature Exams. Students who receive a score of 5 in either exam are awarded 3 AP credits upon successful completion of a 3300-level (or above) course with a grade of B or higher. AP credit is not granted for a score of 4.
2. Present a score of 780 or above on the SAT Subject Test. Students with a score lower than 780 should take the department's on-line placement exam and follow the placement advice received.
3. Present a score of a 7, 6, or 5 on the International Baccalaureate Higher Level Exam in Spanish.
4. Obtain a score of 625 or higher on the department's Spanish as a Second Language Placement Exam. If the score on the online exam qualifies a student for exemption from the language requirement, they are required to take a second in-person version of the online placement exam during orientation (for entering students) or during the semester (for continuing students). Please check our Department's website for information about scheduling the second in-person exam for possible exemption..

## DEPARTMENTAL HONORS

Beginning in Spring 2015, the department put in place a new timeline and training program for juniors, to assist students with planning and completing the Honors Thesis during their senior year. The Honors Thesis is an excellent option for any student interested in pursuing a Master's degree or Ph.D.; but, above all, it is a highly formative research and writing experience—

one that can bear unexpected fruits toward any path the student decides to take in the future.

All students pursuing a major through the department may apply to write an Honors Thesis. The department envisions the thesis as an intellectually challenging and rewarding experience that crowns four years of undergraduate studies with an original contribution in the field chosen by the student.

The department supports students in shaping their research topic and provides frequent advising throughout the research and writing process. The timeline is as follows:

- During the junior year, students take into consideration the possibility of writing an Honors Thesis in the following year. The topic of the Honors Thesis may likely originate in an advanced course taken during the junior year; students may also choose to develop ideas discussed or papers written in courses taken in previous years. Juniors schedule a meeting (or, if the student is studying abroad, a Skype conversation) with the director of undergraduate studies to discuss their proposed topic and faculty adviser.
- By May 15, juniors who have decided to write an Honors Thesis in their senior year send a formal proposal to the director of undergraduate studies, which includes:
  - A title and a one-page abstract;
  - The name of the proposed faculty adviser;
  - An application for departmental partial funding support (for those who would like to pursue research during the summer).
- By May 30, the Honors Thesis committee reviews the proposals and informs the students of its decision.
- In the fall of the senior year:
  - Seniors selected to write the Honors Thesis enroll in a Supervised Individual Research section (SPAN UN3997 or SPAN UN3998) with their faculty adviser and write the Honors Thesis during the entire senior year under the direction of their adviser. For the purposes of the major, this independent study counts as a 3-point course towards elective courses.
  - Faculty advisers organize Honors Thesis Workshops to discuss students' ongoing projects and provide advising on research tools, methodological and theoretical frames, and overall writing process.
- In the fall of the senior year, students enroll in a Senior Seminar.
- By April 15 of the senior year, students complete and submit a PDF of the Honors Thesis via email for consideration towards departmental honors and prizes.

To be considered for departmental honors, a student must write an Honors Thesis and maintain a GPA of at least 3.6 in major courses. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## UNDERGRADUATE PRIZES

The faculty awards an undergraduate prize every year:

### Susan Huntington Vernon Prize

Established in 1941 by a member of the noted family of New York Hispanophiles, it is given to the Columbia College senior major who has demonstrated excellence in the study of Spanish, Portuguese, and Latin American languages and cultures.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### UNDERGRADUATE PROGRAMS OF STUDY

#### Major in Hispanic Studies

Students who declared this program before March 2016 (when requirements changed) should contact the Director of Undergraduate Studies to confirm their correct course of study.

Students may only register once in each of the Core Courses (SPAN UN3300, SPAN UN3349 and SPAN UN3350).

The major in Hispanic studies requires 11 courses (minimum of 33 points) as follows:

#### Core Courses

SPAN UN3300	ADV LANGUAGE THROUGH CONTENT
SPAN UN3349	HISPANIC CULTURES I (SP)
SPAN UN3350	HISPANIC CULTURES II (SP)

#### Elective Courses

Select seven elective courses (21 points): a minimum of three 3000- or 4000-level electives must be chosen within the department and up to three electives related to Hispanic Studies may be taken outside the department.

#### Senior Seminar

SPAN UN3991	SENIOR SEMINAR
-------------	----------------

---

### Major in Hispanic Studies with Specialization

Students who declared this program before March 2016 (when requirements changed) should contact the Director of Undergraduate Studies to confirm their correct course of study.

Students may only register once in each of the Core Courses (SPAN UN3300, SPAN UN3349 and SPAN UN3350).

The major in Hispanic studies with specialization requires 14 courses (minimum of 42 points) as follows. Students should consult the director of undergraduate studies to plan their program and refer to the Hispanic Studies Major Worksheet.

#### Core Courses

SPAN UN3300	ADV LANGUAGE THROUGH CONTENT
SPAN UN3349	HISPANIC CULTURES I (SP)
SPAN UN3350	HISPANIC CULTURES II (SP)

#### Elective Courses

Select ten elective courses (30 points): four of which must be chosen within the department and six of which must be in the field of specialization. Approved courses taken abroad may be counted as inside or outside the department for the specialization. A maximum of four courses taken abroad may be counted toward the major.

#### **Senior Seminar\***

SPAN UN3991      SENIOR SEMINAR

\* In exceptional cases and with the director of undergraduate studies' approval, students may take a senior seminar in their area of specialization as a seventh course outside the department, if they have completed enough foundational courses to manage the demands of an advanced seminar. In such cases, the director of undergraduate studies must receive a letter or e-mail from the seminar instructor indicating approval of a student's membership in the course; the seminar project must be on a Hispanic topic; and a copy of the project must be turned in to the director of undergraduate studies for the student's file upon completion of the course. Students who complete the senior seminar in another department may also count it as the third elective course on a Hispanic topic outside the department, in which case they may take a fourth 3000- or 4000-level course in the department.

## **Minor in Hispanic Studies**

### **Prerequisite**

Students must either have progressed through the introductory level and first semester of the intermediate language sequence, or display the proficiency equivalent (to be demonstrated by a placement exam).

### **5 Total Courses:**

#### **Two Language Courses**

- SPAN UN2102 - Intermediate Spanish
- SPAN UN3300 - Advanced Language through Content

#### **Three 3000+ Courses**

- Hispanic Cultures I (SPAN UN3349) or Hispanic Cultures II (SPAN UN3350)
- Two elective courses in LAIC at 3000+ level or higher (SPAN, PORT, CAT). The extensive offering of classes varies from year to year.

### **Students with higher level of language proficiency have three options :**

- #1- Language classes in LAIC may be used as an elective

Students who test out of SPAN UN2102 may take the equivalent of two semesters of another language course at the introductory level OR one semester of an intermediate language course in another language taught in the Latin American or Iberian Department (ex: Catalan, Portuguese)

The goal is to achieve reading proficiency.

### **#2- Study Abroad / Course outside LAIC:**

Students who test out of SPAN UN2102 and have not chosen #1(Catalan or Portuguese language classes) can count one course related to Latin American and Iberian Cultures content outside of LAIC at the 3000+ level, subject to approval by the Director of Undergraduate Studies.

### **#3- Substitute UN 2102 and/or UN3300 for a LAIC elective**

Students who test out SPAN UN2102 and have not chosen options #1 or #2 can substitute it with an elective course in LAIC at the 3000+ level or higher, subject to approval by the Director of Undergraduate Studies. In addition, a student who has earned a 5 in Advanced Placement (AP)

Spanish or is a native speaker who has completed high school in a Spanish-speaking country may substitute UN3300 with an elective course in LAIC at the 3000+ level or higher, subject to approval by the Director of Undergraduate Studies.

## **Minor in Portuguese**

### **Prerequisite**

Students must have completed 3 semesters of Portuguese (PORT UN1101, PORT UN1102, and PORT UN2101), or the proficiency equivalent (to be demonstrated by a placement exam). Spanish speakers may fulfill the prerequisite with PORT 1320 Portuguese for Spanish Speakers.

### **5 Total Courses:**

#### **One Language Course**

- Either PORT UN2102 (Intermediate Portuguese II) or PORT UN2120 (Comprehensive Intermediate Portuguese)

#### **Four 3000+ Courses**

\*The following courses are offered on a rotating basis each semester so students have the chance to choose from a variety of topics each semester:

- PORT UN3300 - Advanced Language through Content
- PORT UN3101 - Conversations about the Lusophone World
- PORT UN3301 - Advanced Writing and Composition
- PORT UN3330 - Introduction to Portuguese Studies
- PORT UN3350 - Lusophone and Afro-Brazilian Cultures
- PORT UN3601 - Race, Medicine, and Literature in Brazil

-PORT UN4033 - Language and Queer Identities in Brazil?

**Students with higher level of language proficiency have three options :**

#1- Language classes in LAIC may be used as an elective

Students who test out of PORT UN2102 may take the equivalent of two semesters of another language course at the introductory level OR one semester of an intermediate language course in another language taught in the Latin American or Iberian Department (ex: Catalan, Spanish) The

goal is to achieve reading proficiency.

#2- Study Abroad / Course outside LAIC:

Students who test out of PORT UN2102 and have not chosen #1 (Catalan or Spanish language classes) can count one Columbia course related to Latin American and Iberian Cultures content outside of LAIC at the 3000+ level OR two study abroad courses, subject to approval by the

Director of Undergraduate Studies (classes should have a clear Portuguese focus). Note the opportunity to count two study abroad courses for Portuguese (vs. one for Spanish), which rewards students for studying abroad in Portuguese-speaking places

#3- Substitute PORT UN2102 for a LAIC elective

Students who test out PORT UN2102 and have not chosen options #1 or #2 can substitute it with an elective course in LAIC at the 3000+ level or higher, subject to approval by the Director of Undergraduate Studies.

## Minor in Catalan

The Catalan Minor follows the structure of the LAIC and Portuguese Minors but allows for more interdisciplinary and thematic courses since there is only one Catalan faculty member.

### Prerequisite

Students must have completed one year of Catalan (CAT UN1120 and CAT UN2101), or the proficiency equivalent (to be demonstrated by a placement exam).

### 5 Total Courses:

One Language Course

-CAT UN2102 - Intermediate Catalan II

Four 3000+ Courses

\*The following courses are offered on a rotating basis each semester so students have the chance to choose from a variety of topics each semester. Note below that the conditions for counting Catalan related classes from beyond LAIC (both at Columbia and during study abroad) are more

flexible than for Spanish and Portuguese, since we are cognizant of our reliance on a single Catalan faculty member in LAIC

-CAT UN 3300 - Advanced Catalan through Content

-CAT UN 3500 - Literature in Catalan Cinema

-SPAN3300 - Introduction to Catalan Cultures OR SPAN3300 - Exploring Barcelona

**Students with higher level of language proficiency have three options :**

#1- Language classes in LAIC may be used as an elective

Students who test out of CAT UN2102 may take the equivalent of two semesters of another language course at the introductory level OR one semester of an intermediate language course in another language taught in the Latin American or Iberian Department (ex: Portuguese, Spanish)

The goal is to achieve reading proficiency.

#2- Study Abroad / Course outside LAIC:

Students who test out of CAT UN2102 and have not chosen #1 (Catalan or Spanish language classes) can count two Columbia course related to Latin American and Iberian Cultures content outside of LAIC at the 3000+ level OR two study abroad courses, subject to approval by the

Director of Undergraduate Studies (classes should have a clear Catalan focus). Note the opportunity to count two non-LAIC (vs. one for Portuguese and Spanish) or two study abroad courses for Catalan (vs. two for Portuguese and one for Spanish), which rewards students for

studying abroad in Catalan-speaking places.

#3- Substitute CAT UN2102 for a LAIC elective

Students who test out CAT UN2102 and have not chosen options #1 or #2 can substitute it with an elective course in LAIC at the 3000+ level or higher, subject to approval by the Director of Undergraduate Studies.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Hispanic Studies

Students who declared this program before March 2016 (when requirements changed) should contact the Director of Undergraduate Studies to confirm their correct course of study.

Students may only register once in each of the Core Courses (SPAN UN3300, SPAN UN3349 and SPAN UN3350).

The concentration in Hispanic studies requires eight courses (minimum of 24 points) as follows:

#### Core Courses

SPAN UN3300	ADV LANGUAGE THROUGH CONTENT
SPAN UN3349	HISPANIC CULTURES I (SP)
SPAN UN3350	HISPANIC CULTURES II (SP)

#### Elective Courses

Select five elective courses (15 points): a minimum of four 3000- or 4000-level courses must be chosen within the department and up to one elective related to Hispanic Studies may be taken outside the department. A maximum of three courses taken abroad may be counted toward the concentration. Students may only register once for SPAN UN3300.

## Concentration in Portuguese Studies

The concentration in Portuguese studies requires eight courses (minimum 24 points) as follows:

#### Core Courses

PORT UN3101	CONVERS ABOUT LUSOPHONE WORLD
PORT UN3300	ADV LANGUAGE THROUGH CONTENT
PORT UN3330	INTRO TO PORTUGUESE STUDIES
PORT UN3350	LUSOPHONE AFR/AFRO-BRAZ CULTRS

#### Elective Courses

Select four elective courses (12 points): at least two must have a PORT designation and be chosen from the department's 3000-level offerings. Electives taken outside of the department must have the director of undergraduate studies' approval and be related to Portuguese studies. A maximum of two courses taught in English may be counted toward the concentration overall. Refer to the Portuguese Concentration Worksheet.

## FALL 2024 - SPRING 2025 SPANISH

### SPAN UN1101 ELEMENTARY SPANISH I. 4.00 points.

Prerequisites: a score of 0-279 in the department's Placement Examination.

Prerequisites: a score of 0-279 on the department's Spanish as a Second Language Placement exam. An introduction to Spanish communicative competence, with stress on basic oral interaction, reading, writing, and cultural knowledge. Principal objectives are to understand and produce commonly used sentences to satisfy immediate needs; ask and answer questions about personal details such as where we live, people we know and things we have; interact in a simple manner with people who speak clearly, slowly and are ready to cooperate; and understand simple and short written and audiovisual texts in

Spanish. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

#### Fall 2024: SPAN UN1101

### SPAN UN1102 ELEMENTARY SPANISH II. 4.00 points.

Prerequisites: SPAN UN1101 *SPAN W1101*, or a score of 280-379 in the department's Placement Examination.

Prerequisites: SPAN UN1101 or a score of 280-379 on the department's Spanish as a Second Language Placement exam. An intensive introduction to Spanish language communicative competence, with stress on basic oral interaction, reading, writing and cultural knowledge as a continuation of SPAN UN1101. The principal objectives are to understand sentences and frequently used expressions related to areas of immediate relevance; communicate in simple and routine tasks requiring a direct exchange of information on familiar matters; describe in simple terms aspects of our background and personal history; understand the main point, the basic content, and the plot of filmic as well as short written texts. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

#### Fall 2024: SPAN UN1102

### SPAN UN1113 Spanish Rapid Reading and Translation. 3 points.

Open to graduate students in GSAS only.

This course, conducted in English, is designed to help graduate students from other departments gain proficiency in reading and translating Spanish texts for scholarly research. The course prepares students to take the Reading Proficiency Exam that most graduate departments demand to fulfill the foreign-language proficiency requirement in that language. Graduate students with any degree of knowledge of Spanish are welcome. A grade of A- or higher in this class will satisfy the GSAS foreign language proficiency requirement in Spanish.

#### Spring 2025: SPAN UN1113

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### SPAN UN1120 COMPREHENSIVE BEGINNING SPAN. 4.00 points.

Prerequisites: This course is an intensive and fast-paced coverage of both *SPAN W1101* and *SPAN W1102*. Students MUST meet the following REQUIREMENTS: 1. A minimum of 3 years of high school Spanish (or the equivalent) AND a score of 330 or above in the Department's Placement Examination, OR 2. fluency in a language other than English (preferably another Romance language). If you fulfill the above requirements, you do not need instructor's permission to register. HOWEVER, the instructor will additionally assess

student proficiency during the Change of Program Period. Students who do not have the necessary proficiency level may not remain in this course.

Intensive, fast-paced elementary Spanish course for multilingual learners who have had little to no formal education in Spanish. Replaces the sequence SPAN UN1101-SPAN UN1102. Prerequisites: Take the Department's Language Placement Examination. (It is only for diagnostic purposes, to assess your language learning skills, not your knowledge of Spanish). If you score approximately 330 OR MORE, you may qualify for this course if: - you have had little to no formal education in Spanish, AND - you identify with ONE of the following language learner profiles: Learners of Spanish as a 3rd language: fluent in a language other than English Informal learners of Spanish: English speakers who have "picked up" Spanish by interacting with Spanish speakers in informal settings "Receptive" Spanish heritage learners: English dominant, but you understand Spanish spoken by family and community members (The exam is only an initial assessment for diagnostic purposes. Your score might be high, even if you have never studied Spanish in a formal setting). You do not need my permission to register\*. I will further assess your level during the Change of Program period. Feel free to contact me if you have any questions or if you are unsure about your placement in this course. \*Students who do not have the necessary proficiency level may not remain in this course. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

### SPAN UN2101 INTERMEDIATE SPANISH I. 4.00 points.

Prerequisites: SPAN UN1102 or SPAN UN1120 or *SPAN W1102* or *SPAN W1120*, or a score of 380-449 in the department's Placement Examination.

Prerequisites: SPAN UN1102 or SPAN UN1120 or or a score of 380-449 in the departments Placement Examination. An intensive course in Spanish language communicative competence, with stress on oral interaction, reading, writing, and culture as a continuation of SPAN UN1102 or SPAN UN1120. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

**SPAN UN2103 INTERMED SPAN II - MEDICAL. 4.00 points.**

Prerequisites: SPAN UN2101

Prerequisites: SPAN UN2101 or a score of 380-449 on the Department's placement examination. This is an intensive course in Spanish language communicative competence with an emphasis on oral interaction, reading, writing, and culture at an Intermediate II level with focus on health-related topics in the Spanish-speaking world. In an increasingly interconnected world, and in multilingual global cities such as New York City, the study of a foreign language is fundamental not only in the field of the humanities but also in the natural sciences. This interdisciplinary course analyzes the intersection between these two disciplines through the study of health-related topics in Iberian and Latin American cultural expressions (literature, film, documentaries, among other sources) in order to explore new critical perspectives across both domains. Students will learn health-related vocabulary and usage-based grammar in Spanish. Students will develop a cultural understanding of medicine, illness, and treatment in the Spanish-speaking world. Finally, students will be able to carry out specific collaborative tasks in Spanish with the aim of integrating language, culture, and health. \* This course fulfills the last semester of the foreign language requirement. Therefore, students who have taken SPAN UN 2101 (Intermediate Spanish I), or have a score of 380-449 on the Department's placement exam, and are interested in health-related topics may proceed and enroll in SPAN UN 2103 (Intermediate Spanish II: Health-Related Topics in the Spanish-Speaking World). Pre-med

and pre-health students, as well as those students majoring in the natural sciences—including biology, general chemistry, organic chemistry, biochemistry, and physics—will be given registration priority. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

### SPAN UN2108 SPANISH FOR HERITAGE SPEAKERS.

#### 4.00 points.

Prerequisites: SPAN UN1108 or scoring at this level on the department's Spanish as a Heritage Language Placement test (<https://columbia-barnard.vega-labs.com>). The principal aim of SPAN UN2108 is to build upon and further develop the knowledge of Spanish that heritage learners bring to the classroom – from SPAN UN1108 and/or from family and neighborhood exposure to the language. This course cultivates intermediate-level formal speaking, listening, reading, and writing abilities. Spanish heritage language courses at Columbia/Barnard focus on the development of communicative abilities and literacy from sociolinguistic and sociocultural approaches. Throughout the semester, students will be reviewing spelling patterns, building vocabulary, acquiring and effectively using learning strategies, and strengthening composition skills in Spanish. Cultural projects and readings reinforce learners' understanding of the multiple issues related to Hispanic cultures in the United States and in other Spanish-speaking societies

### SPAN UN3300 ADV LANGUAGE THROUGH CONTENT.

#### 3.00 points.

Prerequisites: SPAN UN2102 fulfillment of the language requirement.

Prerequisites: SPAN UN2102 or AP score of 4 or 5; or SAT score. An intensive exposure to advanced points of Spanish grammar and structure through written and oral practice, along with an introduction to the basic principles of academic composition in Spanish. Each section is based on the exploration of an ample theme that serves as the organizing principle for the work done in class (Please consult the Directory of Classes for the topic of each section.) This course is required for the major and the concentration in Hispanic Studies. Formerly SPAN W3200 and SPAN BC3004. If you have taken either of these courses before you cannot take SPAN UN3300. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

**SPAN UN3350 HISPANIC CULTURES II (SP). 3.00 points.**

This course surveys cultural production of Spain and Spanish America from the eighteenth to the twenty-first centuries. Students will acquire the knowledge needed for the study of the cultural manifestations of the Hispanic world in the context of modernity. Among the issues and events studied will be the Enlightenment as ideology and practice, the Napoleonic invasion of Spain, the wars of Spanish American independence, the fin-de-siecle and the cultural avant-gardes, the wars and revolutions of the twentieth century (Spanish Civil War, the Mexican and Cuban revolutions), neoliberalism, globalization, and the Hispanic presence in the United States. The goal of the course is to study some key moments of this trajectory through the analysis of representative texts, documents, and works of art. Class discussions will seek to situate the works studied within the political and cultural currents and debates of the time. All primary materials, class discussion, and assignments are in Spanish. This course is required for the major and the concentration in Hispanic Studies

**SPAN UN3991 SENIOR SEMINAR. 4.00 points.**

Prerequisites: senior major or concentrator status.

The course is a requirement for all the LAIC majors. In this seminar, students develop an individual research project and write an essay under the guidance of the course's instructor and in dialogue with the other participants' projects. After an introductory theoretical and methodological section, and a research session at the library, the syllabus is entirely constructed on the students' projects. Every participant is in charge of a weekly session. Essay outlines and drafts are discussed with the group throughout the semester. The final session is a public symposium with external respondents.

**SPAN UN3315 New York as Theatre of Spanish Modernity. 3 points.**

From the beginning of the XXth Century some of the key figures of Spanish contemporary culture, writers, filmmakers or architects, had a very close relationship to New York, sometimes as travelers, sometimes living in the city for long periods of time. That transatlantic contact, far from anecdotal, turned into an essential element of the self-understanding of those authors and a crucial presence in their work. The contact with New York modernity would be an unavoidable component in their own versions of modernity but their presence would also leave an important trace in the city. As yet more Spanish cultural travelers got in contact with the city a different phenomenon developed: from the 1950's, New York would be used as a privileged stage to project a certain institutional idea of Spain, to sell a refurbished image of the nation as sophisticated and modern after decades of international marginalization under Francoism. This course will develop a comparative study of both processes as seen in literary sources, film and architecture (García Lorca, Camba, Dalí, Tápies, Buñuel, Loriga, Sert, Calatrava...)

**SPAN UN3366 Unseen Things: Fantastic Narratives in Contemporary Spain. 3 points.**

This course is a survey of Spanish literature and cinema that offers a glimpse to the Spanish canon through the cultural topology of "Fantasy". By conceiving fantasy as a historically produced—and therefore historically changing—notation, we will travel across five centuries to examine

how phenomena associated with the supernatural and the paranormal were understood in their time and how they are understood today. Haunting memories and spaces, ghosts and imaginary representations, supernatural events, monsters, spiritistic practices, and phantasmagorias will parade before our eyes as we try to come up with a comprehensive account for what we could call the "Spanish uneven development". The discussions over differential temporalities, social and political imaginaries, collective memories, the role of fiction and symbolic representations, and the connection between fantasy and the economic, political, and ideological practices in a determinate social formation will be interrogated in our seminar from different historical vantage points. Readings (most of them by major authors) will be the center of the discussion, whereas visual materials, documentary, art and movies will do their part to illustrate the readings. Several questions will be raised (and hopefully answered) along this journey: How can we explain proliferation of fantastic narratives in Contemporary Spain? And, finally, how can we examine the recent boom and success of Spanish fantastic, supernatural and horror pieces, particularly in film and in the novel? Is there such thing as a "Spanish fantastic" genre?

**SPAN UN3731 ENV. # CITI: CULTRS OF IBERIAN PENINSULA. 3.00 points.**

This course examines the role of nature and the environment in both contemporary literature and the arts, and attempts to explore a conceptual framework for the definition of environment as a cultural and material production. Environmental peculiarities and historical discontinuities and continuities have created social and political conjunctures in the Iberian Peninsula in which questions concerning nature, space, landscape, and urban and rural experiences have become central to the cultural and the critical imagination in the 20th & 21st Centuries. From the debate over the privatization and erosion of communal rights and the environmental dispossession (and repossession) of the resources to the history of the constructions of nature(s) in literary and cinematic landscapes, the guiding question is how cultural and social practices interfere in the production of what Rob Nixon has called 'slow violence', that is, the incremental dynamics of environmental violence that intensify the vulnerability of populations and natural ecosystems. To address this issue, we will not only read a number of novels, essays, poems, short stories and theoretical production, but also engage in the study of artwork and new Iberian democratic experiences, and the development of the cultural environmental studies and ecocriticism in literature and the arts today. The class will be conducted in Spanish and all written assignments will also be in that language.

**SPAN GU4010 LANGUAGE CROSSING IN LATINX CARIBBEAN CULTURAL PRODUCTION. 3 points.****SPAN G4030 Spanish Pragmatics. 4 points.**

In one sense, Pragmatics is concerned with how we use the language, why and how the speakers communicate in social interactions. The interpretation of meaning in context is probably the main field of study of this multidiscipline,

considering the speaker-meaning as the central point of departure. The term Pragmatics refers to a broad perspective on different aspects of communication, including linguistics, but also cognitive psychology, cultural anthropology, philosophy, sociology and rhetoric among others. Through this course we will study chronologically and apply in specific cases of study of the Spanish language the most meaningful pragmatic theories, such as: Context, Deixis, Speech acts, Implicature, Cooperative Principle, Politeness, Relevance, Pragmatic markers, Metaphors and Cross-cultural pragmatics. Pragmatics, as we know, is a most helpful criterion in the interpretation of many different types of texts. As a course within our Department's curriculum this instrument of rhetoric analysis is a basic tool in the comprehension of our students' discourse in their literary, cultural, and critical papers. This discipline goes beyond the analysis of strictly forms or verbal utterances, hence its multidisciplinary applicability to a wide range of fields of studies in Spanish. Whichever the student's field of study might be, Pragmatics provides a valuable and accurate vocabulary that can be applied to any textual interpretation. In this course, the pragmatic perspective is a starting point to delve into the processes of communication in Spanish. After this first approach, the student will gain an insight into new aspects of the linguistics of language use in general and the use of Spanish in particular.

#### **CPLS GU4810 Theories of the Subject. 4 points.**

This seminar will revisit some major texts and concerns in the theoretical humanities that develop genealogical, psychoanalytical or political theories of the subject, roughly from Marx until today. The goal is to come to a critical understanding of the centrality of this notion of the subject as one of the founding concepts of modernity, as well as to draw out all the consequences of its crisis in radical humanistic (or even so-called posthumanist) thought today. Thinkers to be discussed further include Freud, Foucault, Badiou, Butler, Althusser, Rozitchner, Žižek and Zupan#i#.

## **PORTUGUESE**

### **PORT UN1101 ELEMENTARY PORTUGUESE I. 4.00 points.**

A beginning course designed for students who wish to start their study of Portuguese and have no proficiency in another Romance language. The four language skills: listening, speaking, reading, and writing are developed at the basic level

#### **Fall 2024: PORT UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **PORT UN2101 INTERMEDIATE PORTUGUESE I. 4.00 points.**

Prerequisites: PORT W1120 or the equivalent. General review of grammar, with emphasis on self-expression through oral and written composition, reading, conversation, and discussion

#### **Fall 2024: PORT UN2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PORT 2101	001/10708	M W 2:10pm - 4:00pm	Ana Huback	4.00	8/15

606 Martin Luther  
King Building

#### Spring 2025: PORT UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PORT 2101	001/14026	M W 4:10pm - 6:00pm 412 Pupin Laboratories	Ana Huback	4.00	12/15

#### PORT UN2120 COMPREHENSIVE INTERMED PORT. 4.00 points.

Prerequisites: PORT UN1102 or PORT UN1320. Prerequisites: this course is an intensive and fast-paced coverage of both PORT UN2101 and PORT UN2102. Students MUST demonstrate a strong foundation in Portuguese and meet the following REQUIREMENT: A- or higher in PORT UN1102 or PORT UN1320. If you fulfill the above requirement, you do not need the instructors permission to register. HOWEVER the instructor will additionally assess student proficiency during the Change of Program Period. Students who do not have the necessary proficiency level may not remain in this course. This course replaces the sequence PORT UN2101-PORT UN2102

#### Fall 2024: PORT UN2120

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PORT 2120	001/10710	T Th 2:10pm - 4:00pm 412 Pupin Laboratories	Joao Nemi Neto	4.00	6/15

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PORT 2120	001/14027	M W 10:10am - 12:00pm 412 Pupin Laboratories	Ana Huback	4.00	6/15

#### PORT UN3101 CONVERS ABOUT LUSOPHONE WORLD. 3.00 points.

Prerequisites: PORT W1220.

Prerequisites: PORT W1220. This conversation class will help students develop their oral proficiency in Portuguese. We will discuss current events, participate in challenging pronunciation exercises, improve understanding of Portuguese idioms, develop conversation strengths, confront weaknesses, and increase fluency in spoken Portuguese

#### PORT UN3300 ADV LANGUAGE THROUGH CONTENT. 3.00 points.

Corequisites: PORT UN1220

Corequisites: PORT UN1220 An intensive exposure to advanced points of Portuguese grammar and structure through written and oral practice, along with an introduction to the basic principles of academic composition in Portuguese. This course is required for the concentration in Portuguese Studies. This course is intended to improve Portuguese language skills in grammar, comprehension, and critical thinking through an archive of texts from literature, film, music, newspapers, critical reception and more. To do so, we will work through Portuguese-speaking communities and cultures from Brazil,

to Portugal and Angola, during the twentieth and twenty-first century, to consider the mode in which genre, gender and sexuality materialize and are codified, disoriented, made, unmade and refigured through cultural productions, bodies, nation and resistant vernaculars of aesthetics and performance, always attentive to the intersections of gender with class and racism

#### Fall 2024: PORT UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PORT 3300	001/10711	T Th 2:40pm - 3:55pm 505 Casa Hispanica	Jose Castellanos-Pazos	3.00	6/15

#### PORT UN3490 BRAZILIAN SOCIETY # CIV (ENG). 3.00 points.

Each week, a historical period is studied in connection to a particular theme of ongoing cultural expression. While diverse elements of popular culture are included, fiction is privileged as a source of cultural commentary. Students are expected to assimilate the background information but are also encouraged to develop their own perspective and interest, whether in the social sciences, the humanities (including the fine arts), or other areas

#### Fall 2024: PORT UN3490

**LINGUISTICS****THE LINGUISTICS PROGRAM:**Program website: <https://slavic.columbia.edu/content/linguistics>

**Director of Undergraduate Studies:** Meredith Landman (meredith.landman@columbia.edu)

**Undergraduate Administrator:** John Lacqua (jl808@columbia.edu)

**THE STUDY OF LINGUISTICS**

In any discussion of linguistics, in popular or academic contexts, the first question is always, what is linguistics, after all? This is remarkable. Language informs most of our mental and cultural activity, and linguistics is just the study of language.

The significance of linguistics in the context of the liberal arts education is twofold. On the one hand, linguistics is a highly developed field of knowledge whose achievements, challenges, and problems constitute an integral part of the modern world of ideas. On the other, understanding the inner properties of language as a complex mechanism and awareness of the extensive tools of its description developed by linguistics provides a crucial background for a variety of disciplines whose subject involves language, such as analytical philosophy, anthropology, folklore, sociology, psychology, computer science, archeology, classic philology, and literary theory.

Our programs of study are designed to acquaint students with the theoretical ideas, conceptual apparatus, and research techniques involved in the study of language in all its variety and uses.

## STUDENT ADVISING

### Consulting Advisers

Students with questions regarding the Linguistics Program should contact the Linguistics DUS, Meredith Landman (meredith.landman@columbia.edu).

Prospective majors or minors should contact the Linguistics DUS as early as possible for advice on progressing through our programs of study.

Students are encouraged to join the Linguistics undergraduate listserv, on which we advertise open houses, colloquia, and other events hosted by our program, as well as internship, summer school, and job opportunities. To join our listserv, please email Meredith Landman (meredith.landman@columbia.edu).

### Enrolling in Classes

Students who are waitlisted for a course should email the course instructor.

### Preparing for Graduate Study

Columbia's linguists have distinguished themselves with awards and plans after graduation, such as Fulbright Fellowships in Germany, Georgia, and Taiwan, graduate study at the University of Hawaii at Manoa, University of Michigan at Ann Arbor, and CUNY Graduate Center. Linguistics is also a natural background for studying law, and our students have entered such law schools as Harvard, UCLA, and NYU.

Students interested in pursuing a graduate program in linguistics should consult the Linguistics DUS for advice.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Transfer Courses

Students may be awarded at most three transfer or study abroad courses toward the major and at most one toward the minor, on a case-by-case basis, with approval from the Linguistics DUS. A syllabus for the courses in question will be required for approval.

### Study Abroad Courses

Undergraduates have engaged in unique travel and research projects, including sign language in Nicaragua; language attitudes in Kyrgyzstan; colloquial Arabic in Cairo; summer internship at the Max Planck Institute for Evolutionary Biology;

and study abroad in Spain, England, India, Hungary, and Ireland.

Students may be awarded at most three transfer or study abroad courses toward the major and at most one toward the minor, on a case-by-case basis, with approval from the Linguistics DUS. A syllabus for the courses in question will be required for approval.

## CORE CURRICULUM CONNECTIONS

The Linguistics Program offers the Global Core course *LING 3102: Endangered Languages in the Global City* each fall.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Thesis Coursework and Requirements

A senior thesis is required for the linguistics major. Linguistics majors must complete two semesters of the senior thesis seminar in the fall and spring of their senior year.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Department honors are awarded to at most 10 percent of the graduating cohort. Students must be in good standing (a GPA of at least 3.6) to be considered for department honors.

 Carol Rounds (Hungarian; Italian)  
 José Plácido Ruiz-Campillo (Latin American and Iberian Studies)  
 Richard Sacks (English and Comparative Literature)  
 Ann Senghas (Psychology, Barnard)  
 Mariame Sy (Wolof; Pulaar; MESAAS)  
 Herbert Terrace (Psychology)  
 Alan Timberlake (Slavic Languages)  
 Zhirong Wang (Chinese; East Asian Languages and Cultures)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students with questions regarding the Linguistics Program should contact the Linguistics DUS, Meredith Landman ([meredith.landman@columbia.edu](mailto:meredith.landman@columbia.edu)).

Prospective majors or minors should contact the Linguistics DUS as early as possible for advice on progressing through our programs of study.

Students are encouraged to join the Linguistics undergraduate listserv, on which we advertise open houses, colloquia, and other events hosted by our program, as well as internship, summer school, and job opportunities. To join our listserv, please email Meredith Landman ([meredith.landman@columbia.edu](mailto:meredith.landman@columbia.edu)).

### Guidance for First-Year Students

First-year students should enroll in *LING 3101: Introduction to Linguistics* in the fall of their first year and contact the Linguistics DUS for further advice on progressing through our programs of study.

### Guidance for Transfer Students

Transfer students should contact the Linguistics DUS as early as possible for advice on progressing through our programs of study.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Linguistics

Linguistics, especially since the 1960s, has become a highly multifarious and interdisciplinary field of inquiry. This requires that a major acquaint students with a number of subfields, all of which are crucial to understanding what modern linguistic analysis is about (and foster interdisciplinary inquiry as well). To wit, the person with a basic foundation in what constitutes linguistic study in our times, including training for graduate study if desired, understands:

- a) the basics of grammatical analysis in terms of sounds and sentence structure
- b) how languages change over time
- c) the mechanics of how languages express meaning and implication
- d) the details and nuances of how language is used in social space
- e) the ways and extent to which the world's 7000 languages differ from one another
- f) the relationship between language and cognition writ large

To this end, the major requirements – totaling 38 points – are as follows:

1. LING UN3101 INTRODUCTION TO LINGUISTICS (3pts.)
2. LING GU4376 PHONETICS # PHONOLOGY (3pts.)
3. LING GU4903 SYNTAX (3pts.)
4. One course from four out of five themes (12 pts. total):

- a) Language in time  
 Content: Historical linguistics, as in how grammars transform over time (such as the development of Modern from Old English) in terms of sounds, structures, and meaning

LING GU4108 LANGUAGE HISTORY  
ENGL GU4901 HISTORY OF THE ENGLISH LANGUAGE  
CHNS GU4019 HISTORY OF CHINESE LANGUAGE

- b) Language in context  
 Content: How language varies in structure and usage according to sociological factors such as gender, class, race, power and culture

LING GU4800 LANGUAGE # SOCIETY  
LING UN3102 Endangered Languages in the Global City: Lang, Culture, and Migration in Contemporary NYC  
ANTH UN1009 INTRO TO LANGUAGE # CULTURE  
ANTH GR6067 Language and Its Limits (graduate seminar open to undergraduates)  
AMST UN3931 Topics in American Studies (Languages of America)  
AMST UN3931 Topics in American Studies (Language Contact)  
SPAN GU4010 LANGUAGE CROSSING IN LATINX CARIBBEAN CULTURAL PRODUCTION  
SPAN BC3382 SOCIOLING ASPECTS  
U.S.SPANISH (taught in Spanish)  
PORT GU4033 Language # Queer Brazil (ENG)

- c) Language diversity  
 Content: How languages differ from one another and in which ways; especially valuable in this module are a) Field Methods, eliciting the vocabulary and structure of a lesser documented

language by questioning a native speaker, in the fashion of professional linguists, b) courses focusing on the structure of individual languages

LING GU4120 LANG DOCUMENTATION/FIELD MTHDS

LING GU4171 LANGUAGES OF AFRICA

HNGR UN3343 Descriptive Grammar Hungarian

d) Language and meaning

Content: semantics, philosophy of language, cognitive linguistics, natural language processing

LING GU4190 DISCOURSE ANALYSIS

PHIL UN2685 INTRO TO PHIL OF LANGUAGE

SPAN GU4011 CONVERSATION IN SPANISH:PRACTICE AND ANA

SPAN GR5450 A COGNITIVE LINGUISTICS ACCOUNT OF LANGUAGE

SPAN GU4030 Spanish Pragmatics (taught in Spanish)

e) Psychology and biology of language

Content: psycholinguistics, neurolinguistics, language genesis. This is especially important given the burgeoning research on the actual structural representation of language in the brain, as well as increasingly influential proposals that ground language in larger thought processes (as opposed to the Chomskyan proposal that language is, to a considerable extent, generated via exclusive cognitive mechanisms).

LING UN3103 Language, Brain and Mind

PSYC BC3164 PERCEPTION AND LANGUAGE

PSYC GU4232 Production and Perception of Language

PSYC BC3369 Language Development

PSYC GU4242 Evolution of Language (seminar) (graduate seminar open to undergraduates)

PSYC GU4244 LANGUAGE AND MIND

PSYC GU4272 Advanced Seminar in Language Development

PSYC GU4470 PSYCH # NEUROPSYCH OF LANGUAGE

5. One elective course (3 pts.) from a) one of the themes above or b) a linguistics-related course from another department subject to approval from the program. This allows students to either sample more widely or specialize somewhat in a subarea of linguistics that has come to interest them. Pre-approved (non-theme) elective courses for the major are as follows:

Anthropology

ANTH UN3947: Text, Magic, Performance

Cognitive Science

COGSCI UN1001: Introduction to Cognitive Science

Computer Science

COMS W1002: Computing in Context: Computing in Linguistics

COMS W4705: Natural Language Processing

COMS W4995: Topics in Computer Science (with approval)

COMS E6998: Topics in Computer Science (with approval)

East Asian Languages and Cultures

CPLS GU4111: World Philology

EAAS GU4412: History of Writing in a Cosmopolitan East Asia

Philosophy

PHIL UN3411: Symbolic Logic

6. Senior thesis (two semesters, 3 pts. per semester)

7. Language requirement: Two semesters of an intermediate-level language sequence (8 points). The language must differ from that used to fulfill the core foreign language requirement. The language taken can be ancient (e.g., Latin, Sanskrit, or Ancient Greek) or modern but should neither be the student's native or semi-native language nor belong to one of the major groups of modern European languages (i.e., neither Romance nor Germanic—thus, not French, Spanish, Italian, Portuguese, Catalan, German, or Dutch). Students must actually take the courses in question; testing out of the linguistics language requirement is not allowed.

## Minor in Linguistics

The linguistics minor is designed to acquaint students with a scientific approach to language in all of its variety and uses. The minor draws students from diverse disciplines and career paths who share a common interest in language. Linguistic training can be particularly valuable for students majoring in language-related fields such as those in the cognitive sciences (computer science, philosophy, anthropology, psychology, neuroscience, music), language studies, and human rights. A background in linguistics can also be an asset for students pursuing careers in law, language technologies, education, publishing, or speech and hearing sciences. Many of our students are drawn to the field because they are speakers—or advocates for speakers—of smaller or endangered languages, and they want to learn how to document and describe such languages or help develop and advance technologies for them.

Our program offers students the flexibility to tailor the minor to their specific needs and interests. Students may choose courses that will enhance their primary area of study, or they may explore linguistics as a secondary field of study independent of their major.

The minor in linguistics consists of five courses (16 points):

1) Three courses in linguistics (i.e., offered in the Linguistics Program). The choice of courses will depend on the student's interests. We strongly recommend—but do not require—that students begin the minor with *Ling UN3101: Introduction to Linguistics*.

Our current course offerings are as follows, organized by subarea:

a) Language structure: The basics of linguistic analysis

LING UN3101: Introduction to Linguistics

LING GU4376: Phonetics & Phonology

LING GU4903: Syntax

LING GU4XXX: Semantics & Pragmatics (new course to be offered in Spring 2025)

b) Language and society: How language is used in social space

AMST UN3990: Topics in American Studies: Language Contact OR Languages of America

LING UN3102: Endangered Languages in NYC

LING GU4800: Language & Society

c) Language and cognition: the role of language in cognition

LING UN3103: Language, Brain & Mind

d) Language diversity: the ways and extent to which the world's 7000 languages vary

HNGR UN3343: Hungarian Descriptive Grammar

LING GU4120: Language Documentation & Field Methods

LING GU4171: Languages of Africa

LING GU4174: Languages of Asia

LING GU4022: Word & Grammar

e) Language change: how languages change over time

ENGL GU4901: History of the English Language

LING GU4108: Language History

2) One elective course, either a) in linguistics from the list above or b) in a related field, chosen with approval from the Director of Undergraduate Studies. Pre-approved elective courses for the minor are as follows:

Anthropology

ANTH UN1009: Introduction to Language and Culture

ANTH UN3947: Text, Magic, Performance

ANTH GR6067: Language and Its Limits (graduate seminar open to undergraduates)

Cognitive Science

COGSCI UN1001: Introduction to Cognitive Science

Computer Science

COMS W1002: Computing in Context: Computing in Linguistics

COMS W4705: Natural Language Processing

COMS W4995: Topics in Computer Science (with approval)

COMS E6998: Topics in Computer Science (with approval)

East Asian Languages and Cultures

CHNS GU4019: History of Chinese Language

CPLS GU4111: World Philology

EAAS GU4412: History of Writing in a Cosmopolitan East Asia

Latin American and Iberian Cultures

SPAN BC3382: Sociolinguistic Aspects of US Spanish

SPAN GU4010: Language Crossing in Latinx Caribbean Cultural Production

SPAN GU4030: Spanish Pragmatics (taught in Spanish)

SPAN GF5450: Mind and Body in Space: A Cognitive Linguistics Account of Language

Philosophy

PHIL UN2685: Introduction to the Philosophy of Language

PHIL UN3685: Philosophy of Language

PHIL UN3411: Symbolic Logic

PHIL GR9525: Topics in the Philosophy of Language (graduate seminar open to undergraduates)

Psychology

PSYC BC3164: Perception & Language

PSYC BC3369: Language Development

PSYC UN3450: Evolution of Intelligence, Animal Communication & Language

PSYC GU4232: Production & Perception of Language

PSYC GU4244: Language & Mind

PSYC GU4272: Advanced Seminar in Language Development

PSYC GU4470: Psychology and Neuropsychology of Language

3) One language course at the intermediate level (i.e., equivalent to the third semester or beyond) (4 points). *The language may be the same as that used to fulfill the core foreign language requirement.* The language taken can be ancient (e.g., Latin, Sanskrit, or Ancient Greek) or modern but should neither be the student's native or semi-native language nor belong to one of the major groups of modern European languages (i.e., neither Romance nor Germanic—thus, not French, Spanish,

Italian, Portuguese, Catalan, German, or Dutch). Students must actually take the course in question; testing out of the linguistics language requirement is not allowed.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE FALL 2023

### Special Concentration in Linguistics

The special concentration in linguistics is not sufficient for graduation in and of itself. It must be taken in conjunction with a major or a full concentration in another discipline.

Please note: the requirements for the special concentration in Linguistics were modified in the Fall 2019 semester. Students who entered Columbia before the Fall 2019 semester have the option of following the new or the old requirements. If you have any questions, please contact the Director of Undergraduate Studies.

For the new requirements, students must take 23 points in the linguistics program as specified below.

For the old requirements, students must take 18 points; the requirements are specified below, with the exception that the language requirement is one language course at the intermediate level (4pts.), separate from the core curriculum foreign language requirement.

The requirements for the special concentration (23 points) are as follows:

1. Three core courses in linguistics chosen from:

LING UN3101 INTRODUCTION TO LINGUISTICS  
 LING UN3102 Endangered Languages in the Global City: Lang, Culture, and Migration in Contemporary NYC  
 LING UN3103 Language, Brain and Mind  
 HNGR UN3343 Descriptive Grammar Hungarian  
 LING GU4108 LANGUAGE HISTORY  
 LING GU4120 LANG DOCUMENTATION/FIELD MTHDS  
 LING GU4171 LANGUAGES OF AFRICA  
 LING GU4190 DISCOURSE ANALYSIS  
 LING GU4376 PHONETICS # PHONOLOGY  
 LING GU4800 LANGUAGE # SOCIETY  
 LING GU4903 SYNTAX

2. Two additional courses from either a) the core linguistics courses, or b) a linguistics-related course from another department subject to approval from the program. Courses previously approved include those listed below:

Anthropology:  
 ANTH UN1009 INTRO TO LANGUAGE # CULTURE  
 ANTH GU4042 Agent, Person, Subject, Self  
 ANTH GR6067 Language and Its Limits  
 ANTH GR6125 Language, Culture, and Power

Chinese:

CHNS GU4019 HISTORY OF CHINESE LANGUAGE

Computer Science:  
 COMS W1012 Computational Linguistics  
 COMS W4705 Natural Language Processing  
 COMS W4995 Topics in Computer Science (with approval)  
 COMS E6998 Topics in Computer Science (with approval)

Comparative Literature & Society:  
 CPLS GU4111 World Philology

French:  
 FREN BC3011 History of the French Language

Philosophy:  
 PHIL UN2685 INTRO TO PHIL OF LANGUAGE  
 PHIL UN3411 SYMBOLIC LOGIC  
 PHIL UN3685 PHILOSOPHY OF LANGUAGE  
 PHIL GU4490 LANGUAGE AND MIND

Psychology:

PSYC UN2215 Cognition and the Brain

PSYC UN2440: Language and the Brain

PSYC UN2450 BEHAVIORAL NEUROSCIENCE  
 PSYC BC3164 PERCEPTION AND LANGUAGE  
 PSYC UN3265 Auditory Perception (Seminar)  
 PSYC BC3369 LANGUAGE DEVELOPMENT  
 PSYC GU4232 Production and Perception of Language  
 PSYC GU4272 Advanced Seminar in Language Development

Spanish:  
 SPAN BC3382 SOCIOLING ASPECTS U.S.SPANISH  
 SPAN GU4010 LANGUAGE CROSSING IN LATINX CARIBBEAN CULTURAL PRODUCTION  
 SPAN GU4011 CONVERSATION IN SPANISH:PRACTICE AND ANA  
 SPAN GU4030 Spanish Pragmatics  
 SPAN GR5450 A COGNITIVE LINGUISTICS ACCOUNT OF LANGUAGE

Sociology:  
 SOCI GU4030 Sociology of Language

3. Language requirement: Two semesters of an intermediate-level language sequence (8 points). The language taken can be an ancient language (e.g., Latin, Ancient Greek, Sanskrit) or a modern one but should neither belong to one of the major groups of modern European languages (Germanic, Romance) nor be the student's native or semi-native language. In addition, the language cannot also be used to satisfy the core language requirement.

## LINGUISTICS

**LING UN3101 INTRODUCTION TO LINGUISTICS. 3.00 points.**

An introduction to the study of language from a scientific perspective. The course is divided into three units: language

as a system (sounds, morphology, syntax, and semantics), language in context (in space, time, and community), and language of the individual (psycholinguistics, errors, aphasia, neurology of language, and acquisition). Workload: lecture, weekly homework, and final examination

#### Fall 2024: LING UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3101	001/11717	M W 11:40am - 12:55pm 417 International Affairs Bldg	William Foley	3.00	207/300

#### Spring 2025: LING UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3101	001/00885	T Th 5:40pm - 6:55pm 323 Milbank Hall	Maya Barzilai	3.00	28/30

### LING UN3102 Endangered Languages in the Global City: Lang, Culture, and Migration in Contemporary NYC. 3.00 points.

Of the world's estimated 7,000 languages – representing migrations and historical developments thousands of years old – the majority are oral, little-documented, and increasingly endangered under the onslaught of global languages like English. This course will take the unprecedented, paradoxical linguistic capital of New York City as a lens for examining how immigrants form communities in a new land, how those communities are integrated into the wider society, and how they grapple with linguistic and cultural loss. Interdisciplinary with an experiential learning component, the course will focus on texts, materials, encounters, and fieldwork with three of the city's newest and least-studied indigenous immigrant communities (indigenous Latin Americans, Himalayans, and Central Asians). Indigeneity, though often invisible or perceived as marginal in global cities like New York, is in fact pervasive and fundamental. Cities now constitute a crucial site for understanding migration and cultural change, with language a vehicle for culture. Studying cultures only in situ (i.e. in their homelands) risks missing a crucial dimension. Students will be immersed in stateless, oral, immigrant cultures while also gaining a hands-on critical understanding of language endangerment and urban sociolinguistic research, first through field experiences and guest speakers (Endangered Language Alliance partners) and then by going out together into communities to work on projects in small teams. The Endangered Language Alliance (ELA), where the instructor is Co-Director, was formed as a non-profit research institute in 2010 as a forum for researchers, community members, activists, artists, and other New Yorkers to come together to support indigenous and minority languages. ELA's video recordings provide first-hand testimony of endangered languages in the global city – in indigenous languages with English translation – available in few other places. Those texts will be central to this course, supplemented by the new, first-ever, detailed language map of New York City being produced by ELA

#### Fall 2024: LING UN3102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3102	001/13831	T Th 4:10pm - 5:25pm 303 Uris Hall	Ross Perlin	3.00	61/60

### LING UN3103 Language, Brain and Mind. 3.00 points.

The ability to speak distinguishes humans from all other animals, including our closest relatives, the chimpanzees. Why is this so? What makes this possible? This course seeks to answer these questions. We will look at the neurological and psychological foundations of the human faculty of language. How did our brains change to allow language to evolve? Where in our brains are the components of language found? Are our minds specialized for learning language or is it part of our general cognitive abilities to learn? How are words and sentences produced and their meanings recognized? The structure of languages around the world varies greatly; does this have psychological effects for their speakers?

#### Fall 2024: LING UN3103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3103	001/11718	M W 2:40pm - 3:55pm 140 Uris Hall	William Foley	3.00	37/52

### LING UN3997 Supervised Individual Research. 2-4 points.

#### Fall 2024: LING UN3997

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3997	001/14449		William Foley	2-4	1/5

### LING UN3998 Supervised Individual Research. 2-4 points.

Supervised Individual Research

### LING GU4023 Semantics. 3.00 points.

This course provides an introduction to semantics, the study of meaning in language. We will explore a range of semantic phenomena, and students will learn the tools and techniques of formal semantic analysis as well as core concepts, goals, and findings of the field

#### Spring 2025: LING GU4023

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4023	001/17183	T Th 11:40am - 12:55pm 608 Schermerhorn Hall	Meredith Landman	3.00	25/30

### LING GU4108 LANGUAGE HISTORY. 3.00 points.

Prerequisites: LING UN3101 *LING W3101*.

Prerequisites: LING UN3101 Language, like all components of culture, is structured and conventional, yet can nevertheless change over time. This course examines how language changes, firstly as a self-contained system that changes organically and autonomously, and secondly as contextualized habits that change in time, in space, and in communities. Workload: readings # discussion, weekly problems, and final examination

### LING GU4120 LANG DOCUMENTATION/FIELD MTHDS. 3.00 points.

Prerequisites: LING UN3101 *LING W3101*.

Prerequisites: LING UN3101 In light of the predicted loss of up to 90% of the world languages by the end of this century, it has become urgent that linguists take a more active role in documenting and conserving endangered languages. In this course, we will learn the essential skills and technology of language documentation through work with speakers of an endangered language

Spring 2025: LING GU4120

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4120	001/13123	T Th 2:40pm - 3:55pm 707 Hamilton Hall	Meredith Landman	3.00	11/15

### LING GU4171 LANGUAGES OF AFRICA. 3.00 points.

The African continent is home not to simply a collection of similar "African dialects," but to at least 1000 distinct languages that belong to five language families, none of them any more closely related than English and its relatives are to Japanese. This includes the Semitic languages that emerged in the Middle East and are now most commonly associated with Arabic and Hebrew, the famous "click" languages of Southern Africa whose origins are still shrouded by mystery, and in the case of Malagasy on Madagascar, the Austronesian family of Southeast Asia and Oceania - the language traces to speakers who travelled over the ocean from Borneo to Africa. This course will examine languages in all of these families, with a focus on how they demonstrate a wide array of linguistic processes and how they interact with social history, anthropology, and geography.

### LING GU4172 The Structure of Cambodian. 3 points.

Like every other language, Cambodian is totally unique in some respects (these are of interest only to the language learner), and a representative human language in others (these are of interest to all students of language). Thus, for example, like every written language, Cambodian will exhibit diglossia: the grammar and the vocabulary of the written language will differ from that of the spoken language. It is also a member of a language family, known as Austroasiatic, whose members are spoken from NE India through Malaysia, Myanmar, and Indochina. In addition, Cambodian is a structural representative of a given type of language spoken throughout mainland Southeast Asia. That is, in many respects, the structure of Cambodian is similar to those of Lao, Thai, Vietnamese, as well as Hmong. In the "Far West" of SE Asia, are spoken other languages, among them Burmese, Mon, and Karen, which are still similar, but less so. All of these languages are isolating, monosyllabic languages. Of the languages just listed, only Vietnamese and Mon are genetically related to Cambodian. Finally, in its orthography and lexicon, Cambodian has borrowed so extensively from Indic languages, that all literate speakers have a considerable background in practical etymology, and recognize borrowings from, say, Pali, as English speakers generally do not recognize borrowings

from Norman French or Latin or Greek. Since the Indic languages belong to Indo-European, some unexpected words in Cambodian (e.g. *niam*, *smaeu*) will turn out to have English cognates (like *name*, *same*).

Your goal in this course is not to acquire a speaking knowledge of Khmer. (For that you would need a pedagogical grammar, a native-speaker instructor, and hours and hours of practice in the lab and in the classroom.) It is rather to understand from a linguist's point of view what it is that makes this language a typical language of this part of the world. We will be working through a reference grammar of the language together.

You are each also going to 'adopt' another mainland SE Asian language for purposes of comparison, to experience for yourself what it means for a language to be a member of a linguistic alliance or Sprachbund. You may select your own 'pet' language, and your assignment will then be to 'master' this language in the same way that you have 'mastered' Khmer.

### LING GU4190 DISCOURSE ANALYSIS. 3.00 points.

Prerequisites: LING UN3101 *LING W3101*.

Prerequisites: LING UN3101 How discourse works; how language is used: oral vs. written modes of language; the structure of discourse; speech acts and speech genres; the expression of power; authenticity; and solidarity in discourse, dialogicity, pragmatics, and mimesis

### LING GU4206 ADV GRAMMAR AND GRAMMARS. 3.00 points.

Prerequisites: LING UN3101 *LING W3101*.

An investigation of the possible types of grammatical phenomena (argument structure, tense/aspect/mood, relative clauses, classifiers, and deixis). This typological approach is enriched by the reading of actual grammars of languages from Asia, Africa, Australia, and the Americas in which grammatical descriptions are read with an eye to important notional concepts of grammar: reference and categorization, case and role of arguments with predicates (ergativity), tense/aspect/mood. Discussion of meaning is combined with attention to expression (that is, morphology), which yanks our attention towards language change (grammaticalization)

### LING GU4376 PHONETICS # PHONOLOGY. 3.00 points.

Prerequisites: LING UN3101 *LING W3101*.

Prerequisites: LING UN3101 An investigation of the sounds of human language, from the perspective of phonetics (articulation and acoustics, including computer-aided acoustic analysis) and phonology (the distribution and function of sounds in individual languages)

Fall 2024: LING GU4376

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4376	001/11715	T Th 11:40am - 12:55pm 330 Uris Hall	Meredith Landman	3.00	33/60

### LING GU4800 LANGUAGE # SOCIETY. 3.00 points.

How language structure and usage varies according to societal factors such as social history and socioeconomic factors,

illustrated with study modules on language contact, language standardization and literacy, quantitative sociolinguistic theory, language allegiance, language, and power

**Spring 2025: LING GU4800**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4800	001/13115	M W 1:10pm - 2:25pm 330 Uris Hall	Ross Perlin	3.00	35/60

### **LING GU4903 SYNTAX. 3.00 points.**

Prerequisites: LING UN3101 *LING W3101*.

Prerequisites: LING UN3101 Syntax - the combination of words - has been at the center of the Chomskyan revolution in Linguistics. This is a technical course which examines modern formal theories of syntax, focusing on later versions of generative syntax (Government and Binding) with secondary attention to alternative models (HPSG, Categorical Grammar)

**Fall 2024: LING GU4903**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4903	001/11716	T Th 2:40pm - 3:55pm 401 Chandler	Meredith Landman	3.00	16/30

## MATHEMATICS

### THE DEPARTMENT OF MATHEMATICS

**Department website:** <http://www.math.columbia.edu>

#### **Director of Undergraduate Studies**

Julien Dubedat, 601 Mathematics; 212-854-8806;  
[jd2653@columbia.edu](mailto:jd2653@columbia.edu)

**Undergraduate Academic Coordinator**  
TBD

## THE STUDY OF MATHEMATICS

The major in mathematics is an introduction to some of the highlights of the development of theoretical mathematics over the past four hundred years from a modern perspective. This study is also applied to many problems, both internal to mathematics and arising in other disciplines such as physics, cryptography, and finance.

Majors begin by taking either Honors mathematics or the calculus sequence. Students who do not take MATH UN1207 HONORS MATHEMATICS A and MATH UN1208 HONORS MATHEMATICS B normally take MATH UN2010 LINEAR ALGEBRA in the second year. Following this, majors begin to learn some aspects of the main branches of modern mathematics: algebra, analysis, and geometry; as well as some of their subdivisions and hybrids (e.g., number theory, differential geometry, and complex analysis). As the courses become more advanced, they also become more theoretical and proof-oriented and less computational.

Aside from the courses offered by the Mathematics Department, cognate courses in areas such as astronomy, chemistry, physics, probability, logic, economics, and computer science can be used toward the major. A cognate course must be a 2000-level (or higher) course and must be approved by the director of undergraduate studies. In general, a course not taught by the Mathematics Department is a cognate course for the mathematics major if either (a) it has at least two semesters of calculus as a stated prerequisite, or (b) the subject matter in the course is mathematics beyond an elementary level, such as PHIL UN3411 SYMBOLIC LOGIC, in the Philosophy Department, or COMS W3203 DISCRETE MATHEMATICS, in the Computer Science Department. A list of pre-approved cognate courses can be found under the [major requirements](#).

Another requirement for majors is participation in an undergraduate seminar, usually in the junior or senior year. Applied math majors must take the undergraduate applied math seminar sequence in both the junior and senior year. In these seminars, students gain experience in learning an advanced topic and lecturing on it. In order to be eligible for departmental honors, majors must write a senior thesis.

## Student Advising

#### **Director of Undergraduate Studies**

Prof. Julien Dubedat, 601 Mathematics; 212-854-8806;  
[jd2653@columbia.edu](mailto:jd2653@columbia.edu)

#### **Calculus Director**

## Enrolling in Classes

Most undergraduate level courses in Mathematics can be taken once the prerequisite courses have been completed.

Any exceptions to waive a prerequisite requirement must be obtained by writing to the Director of Undergraduate Studies.

Students who wish to register for a section of either Supervised Readings and/or Senior Thesis must first identify a faculty sponsor, determine a suitable topic, and obtain written permission from the Director of Undergraduate Studies. Refer to the Undergraduate Research and Senior Thesis section, below.

## Preparing for Graduate Study

Departmental advisors can offer advice about and help with graduate school applications. The Mathematics department also runs a [Master's degree program in mathematical finance](#) and a [Ph.D. program in mathematics](#).

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Comprehensive information on college level coursework taken outside Columbia University are described on the College's [Academic Regulation website](#) or the General Studies [Transfer Credit website](#).

## Advanced Placement

AP or IB calculus may count towards degree requirements, subject to completion of a higher level course:

- The department grants 3 credits for a score of 4 or 5 on the AP Calculus AB exam provided students complete MATH UN1102 CALCULUS II or MATH UN1201 CALCULUS III with a grade of C or better.
- The department grants 3 credits for a score of 4 on the AP Calculus BC exam provided students complete MATH UN1102 CALCULUS II or MATH UN1201 CALCULUS III with a grade of C or better.
- The department grants 6 credits for a score of 5 on the AP Calculus BC exam provided students complete MATH UN1201 CALCULUS III or MATH UN1205 ACCELERATED MULTIVARIABLE CALC or MATH UN1207 HONORS MATHEMATICS A with a grade of C or better.

Students can receive credit for only one calculus sequence. Other college level courses taken during high school may substitute for course prerequisites pending the approval of the Director of Undergraduate Studies, but will not confer credits.

## Barnard College Courses

Any course offered by the Mathematics@Barnard department will count towards degree requirements.

## Transfer Courses

Courses taken at other colleges or universities may be evaluated for transfer credit. A maximum of 16 transfer credits may be

granted. A maximum of 6 transfer credits may be counted towards minor requirements.

- Course equivalency requests for any Calculus level course, Linear Algebra, or Ordinary Differential Equations must be submitted to the Calculus Director for evaluation.
- Course equivalency requests for any other mathematics course must be submitted to the Director of Undergraduate Studies for evaluation.

## Study Abroad Courses

Although study abroad is not an integral part of your studies in mathematics, it can provide you with exposure to a different culture and a different educational system, and, as such, can be very fulfilling. You may also want to participate in the Budapest Mathematical Seminar or similar programs in your junior year. Keep in mind, however, that study abroad requires careful planning. If you are seriously considering studying abroad, you should consult with the Director of Undergraduate Studies as early in your program as possible in order to plan your major accordingly and to incorporate study abroad courses that are compatible with your major in mathematics.

## Summer Courses

Any mathematics or approved cognate course offered during the summer session will count towards the degree, with the exception of online only courses, which *do not* count towards degree requirements.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

*MATH UN3901 Supervised Readings I* (fall term only)  
*MATH UN3902 Supervised Readings II* (spring term only)

Prerequisites: The written permission of the faculty member who agrees to act as sponsor (sponsorship limited to full-time instructors on the staff list), as well as the permission of the Director of Undergraduate Studies. The written permission must be deposited with the Director of Undergraduate Studies before registration is completed.

Guided reading and study in mathematics. A student who wishes to undertake individual study under this program must present a specific project to a member of the staff and secure his or her willingness to act as sponsor. Written reports and periodic conferences with the instructor. Supervising Readings do NOT count towards major requirements, with the exception of an advanced written approval by the Director of Undergraduate Studies.

### Senior Thesis Coursework and Requirements

A Senior Thesis in Mathematics is an original presentation of a subject in pure or applied mathematics from sources in the published literature. The thesis must demonstrate significant

independent work of the author. A thesis is expected to be between 20 and 50 pages with complete references and must have a substantial expository component to be well received.

A student who is interested in writing a senior thesis needs to identify a faculty member in the Department of Mathematics as an advisor, determine an appropriate topic, and receive the written approval from the faculty advisor and the Director of Undergraduate Studies. The research of the thesis is conducted primarily during the fall term and the final paper is submitted to the Director of Undergraduate Studies by the end of March.

Students must register for *MATH UN3994 SENIOR THESIS IN MATHEMATICS I* (4 credits) in the fall semester of their senior year. An optional continuation course *MATH UN3995 SENIOR THESIS IN MATHEMATICS II* (2 credits) is available during the spring. The second term of this sequence may not be taken without the first. Registration for the spring continuation course has no impact on the timeline or outcome of the final paper. Sections of Senior Thesis in Mathematics I and II do NOT count towards the major requirements, unless prior written approval is obtained from the Director of Undergraduate Studies.

## Undergraduate Research Outside of Courses

The department runs several undergraduate research programs aimed at math majors. Opportunities are available during the academic year and summer terms.

The Undergraduate Mathematics Society is the department's undergraduate club. Detailed information on membership, Society-sponsored seminars and activities, and archival resources are available on the Society's Web site. The department also sponsors workshops and weekly seminars in mathematics, and posts information about special lectures, conferences, and seminars at nearby schools.

In addition, the Association for Women in Mathematics Columbia Chapter connects students and professors interested in mathematics at Columbia University and Barnard College as part of a broader effort to encourage women and girls to study and to have active careers in the mathematical sciences, and to promote equal opportunity for and the equal treatment of women and girls in the STEM fields.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

To be recommended to the College Committee on Honors, Awards, and Prizes, which makes the final decisions on all honors' recipients, you must have a GPA of 3.63 in the major and have completed a senior thesis of merit. For more information on researching and writing the senior thesis and on departmental honors, you should consult with the Director of Undergraduate Studies. Normally no more than 10% of

graduating majors receive departmental honors in a given academic year.

## Academic Prizes

### Putnam Exam

The Putnam exam is a nationwide competitive exam administered each year on the first Saturday in December. A faculty member conducts coaching sessions for students who are interested in competing.

### Columbia Prizes

Several prizes for excellence in mathematics are awarded each year to undergraduates, based on performance on a prize exam scheduled each spring. These include:

- Professor Van Amringe Mathematical Prize
  - This prize, established in 1910 by George G. Dewitt, Class of 1867, may be awarded to a first year, a sophomore, and a junior student in the College who are deemed most proficient in the mathematical subjects designated during the year of the award.
- John Dash Van Buren Jr. Prize in Mathematics
  - Established in 1906 by Mrs. Louis T. Hoyt in memory of her nephew, John Dash Van Buren, Jr., Class of 1905, this prize may be awarded to a Columbia College senior degree candidate who writes the best examination in subjects prescribed by the Mathematics Department.

## OTHER IMPORTANT INFORMATION

Other helpful information may be found on the Department of Mathematics website.

## PROFESSORS

- David A. Bayer (Barnard)
- Andrew Blumberg
- Simon Brendle
- Ivan Corwin
- Panagiotas Daskalopoulos
- Aise Johan de Jong (Department Chair)
- Daniela De Silva (Barnard Chair)
- Julien Dubedat

## SENIOR LECTURERS IN DISCIPLINE

- Mikhail Smirnov
- Peter Woit

## LECTURERS IN DISCIPLINE

- George Dragomir

## ON LEAVE

- Fall 2024: Profs. Aggarwal, Bayer, Giorgi, Li, Sawhney, Shen, Wang
- Spring 2025: Profs. Aggarwal, Bayer, Li, Liu, Sawhney, Urban, Wang

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN MATHEMATICS

### PROGRAM PLANNING FOR ALL STUDENTS

### Placement in the Calculus Sequences

#### Calculus I

Students who have essentially mastered a precalculus course and those who have a score of 3 or less on an Advanced Placement (AP) exam (either AB or BC) should begin their study of calculus with MATH UN1101 CALCULUS I.

#### Calculus II and III

Students with a score of 4 or 5 on the AB exam, 4 on the BC exam, or those with no AP score but with a grade of A in a full year of high school calculus may begin with either MATH UN1102 CALCULUS II or MATH UN1201 CALCULUS III. Note that such students who decide to start with Calculus III may still need to take Calculus II since it is a requirement or prerequisite for other courses. In particular, they **MUST** take Calculus II before going on to MATH UN1202 CALCULUS IV. Students with a score of 5 on the BC exam may begin with Calculus III and do not need to take Calculus II.

Those with a score of 4 or 5 on the AB exam or 4 on the BC exam may receive 3 points of AP credit upon completion of Calculus II with a grade of C or higher. Those students with a score of 5 on the BC exam may receive 6 points of AP credit upon completion of Calculus III with a grade of C or higher.

#### Accelerated Multivariable Calculus

Students with a score of 5 on the AP BC exam or 7 on the IB HL exam may begin with MATH UN1205 ACCELERATED MULTIVARIABLE CALC. Upon completion of this course with a grade of C or higher, they may receive 6 points of AP credit.

#### Honors Mathematics A

Students who want a proof-oriented theoretical sequence and have a score of 5 on the BC exam may begin with MATH UN1207 HONORS MATHEMATICS A, which is especially designed for mathematics majors. Upon completion of this course with a grade of C or higher, they may receive 6 points of AP credit.

### Transfer Inside the Calculus Sequences

Students who wish to transfer from one calculus course to another are allowed to do so beyond the date specified on the Academic Calendar. They are considered to be adjusting their level, not changing their program. However, students must obtain the approval of the new instructor and their advising dean prior to reporting to the Office of the Registrar.

## Grading

No course with a grade of D or lower can count toward the major, interdepartmental major, minor, or concentration.

## Double Counting

Students who are doing a double major should review the College Bulletin's policy on [Double Counting Courses towards Requirements](#). In general, courses in the Calculus sequence may be counted towards both majors, with up to two additional MATH UN2xxx or higher level courses at the discretion of all approving departments. Students pursuing a minor may double count at most one additional MATH UN2xxx or higher level course.

## Planning Forms

[Planning forms](#) for all programs are available on our website. These forms should be completed and approved by a department adviser early in the semester of the expected graduation date.

## COURSE NUMBERING STRUCTURE

- 1000-2000 Level courses are intended to be introductory courses (such as the Calculus sequence and Linear Algebra).
- 3000-4000 Level courses cover more advanced mathematics, as well as supervised readings, undergraduate seminars, and senior theses.
- 5000 Level courses are Master's level courses.
- 6000 Level and above are PhD level courses.

## GUIDANCE FOR FIRST-YEAR STUDENTS

The systematic study of mathematics begins with one of the following three alternative calculus and linear algebra sequences:

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN1202 & MATH UN2010	CALCULUS I and CALCULUS II and CALCULUS III and CALCULUS IV and LINEAR ALGEBRA
---	--

OR

MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN2010	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA
--	--

OR

MATH UN1101 & MATH UN1102 & MATH UN1207 & MATH UN1208	CALCULUS I and CALCULUS II and HONORS MATHEMATICS A and HONORS MATHEMATICS B
--	---

Credit is allowed for only one calculus and linear algebra sequence.

*Calculus I, II* is a standard course in single-variable differential and integral calculus; *Calculus III, IV* is a standard course in multivariable differential and integral calculus; *Accelerated Multivariable Calculus* is an accelerated course in multivariable differential and integral calculus.

While *Calculus II* is no longer a prerequisite for *Calculus III*, students are strongly urged to take it before taking *Calculus III*. In particular, students thinking of majoring or concentrating in mathematics or one of the joint majors involving mathematics should take *Calculus II* before taking *Calculus III*. Note that *Calculus II* is a prerequisite for *Accelerated Multivariable Calculus*, and both *Calculus II* and *Calculus III* are prerequisites for *Calculus IV*.

The third sequence, *Honors Mathematics A/B*, is for exceptionally well-qualified students who have strong Advanced Placement scores. It covers multivariable calculus (MATH UN1201 CALCULUS III - MATH UN1202 CALCULUS IV) and linear algebra (MATH UN2010 LINEAR ALGEBRA), with an emphasis on theory.

## GUIDANCE FOR TRANSFER STUDENTS

Consideration for AP, IB and transfer credit is as follows:

Equivalent to *MATH UN1101 Calculus I*:

- A score of 4 on the Calculus BC Advanced Placement exam.
- A score of 4 or 5 on the Calculus AB Advanced Placement exam.
- A score of 6 on the IB Mathematics: analysis and approaches HL exam (2021 or later) or a score of 6 on the IB HL Mathematics or Further Mathematics exams (2020 or earlier).
- A score of 6 or 7 on the IB Mathematics: applications and interpretation HL exam (2021 or later) or a score of 6 or 7 on the IB SL Mathematics exam (2020 or earlier). This does not include the IB "Mathematical Studies SL" exam.
- An A on the A-Level Mathematics exam or a B in A-Level Further Mathematics exam in the U.K.
- A grade of A in a full year of high school calculus.

Equivalent to *MATH 1101 Calculus I* and *MATH 1102 Calculus II*:

- A score of 5 on the Calculus BC Advanced Placement.
- A score of 7 on the IB Mathematics: analysis and approaches HL exam (2021 or later) or a score of 7 on the IB HL Mathematics or Further Mathematics exams (2020 or earlier).
- An A on the A-Level Further Mathematics exam in the U.K.

## UNDERGRADUATE PROGRAMS OF STUDY

### MAJOR IN MATHEMATICS

The major requires 40-42 points as follows:

Select one of the following three calculus and linear algebra sequences (13-15 points including Advanced Placement Credit):

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN1202 & MATH UN2010	CALCULUS I and CALCULUS II and CALCULUS III and CALCULUS IV and LINEAR ALGEBRA <sup>1</sup>
---	---

OR

MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN2010	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA <sup>1</sup>
--	---

OR

MATH UN1101 & MATH UN1102 & MATH UN1207 & MATH UN1208	CALCULUS I and CALCULUS II and HONORS MATHEMATICS A and HONORS MATHEMATICS B
--	---

12 points in the following courses:

MATH GU4041	INTRO MODERN ALGEBRA I
MATH GU4042	INTRO MODERN ALGEBRA II
MATH GU4061	INTRO MODERN ANALYSIS I <sup>2</sup>
MATH GU4062	INTRO MODERN ANALYSIS II <sup>2</sup>

3 points in the following:

MATH UN3951	UNDERGRADUATE SEMINARS I <sup>3</sup>
or MATH UN3952 UNDERGRADUATE SEMINARS II	

12 points from the following:

- 1) Courses offered by the department numbered 2000 or higher <sup>3</sup>
- 2) Courses from the list of approved cognate courses below. A maximum of 6 credits may be taken from courses outside the department. <sup>4</sup>

VARIABLES, MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS, or MATH GU4032 FOURIER ANALYSIS.

<sup>3</sup> Only one Undergraduate Seminar may count towards the major requirements.

<sup>4</sup> Additional courses may be selected only with prior written approval from the Director of Undergraduate Studies.

The program of study should be planned with a departmental adviser before the end of the sophomore year. Majors who are planning on graduate studies in mathematics are urged to obtain a reading knowledge of one of the following languages: French, German, or Russian.

Majors are offered the opportunity to write an honors senior thesis under the guidance of a faculty member. Interested students should refer to the "Undergraduate Research and Senior Thesis" section on the Overview tab for additional information.

<sup>1</sup> MATH UN2015 Linear Algebra and Probability does NOT replace MATH UN2010 LINEAR ALGEBRA as prerequisite requirements of math courses. Students will not receive full credit for both courses UN2010 and UN2015. Students who have taken MATH UN2015 and consider taking higher level Math courses should contact a major advisor to discuss alternative pathways.

<sup>2</sup> Students who are not contemplating graduate study in mathematics may replace one or both of the two terms of MATH GU4061- MATH GU4062 by one or two of the following courses: MATH UN2500 ANALYSIS AND OPTIMIZATION, MATH UN3007 COMPLEX

## MAJOR IN APPLIED MATHEMATICS

The major requires 37-41 points as follows:

Select one of the following three calculus and linear algebra sequences (13-15 points including Advanced Placement Credit):

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN1202 & MATH UN2010	CALCULUS I and CALCULUS II and CALCULUS III and CALCULUS IV and LINEAR ALGEBRA <sup>1</sup>
MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN2010	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA <sup>1</sup>
MATH UN1101 & MATH UN1102 & MATH UN1207 & MATH UN1208	CALCULUS I and CALCULUS II and HONORS MATHEMATICS A and HONORS MATHEMATICS B
MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH GU4032	FOURIER ANALYSIS
MATH GU4061	INTRO MODERN ANALYSIS I

Select one of the following three courses. The selected course may not count as an elective.

MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH GU4032	FOURIER ANALYSIS
MATH GU4061	INTRO MODERN ANALYSIS I

Take each of the following two required courses:

APMA E4901	SEM-PROBLEMS IN APPLIED MATH (junior year)
APMA E4903	SEM-PROBLEMS IN APPLIED MATH (senior year)

18 points in electives, with at least 9 points in Track A electives, or at least 9 points in Track B electives. A maximum of 9 points may be selected from courses outside these tracks, with prior written approval from the Director of Undergraduate Studies.

#### TRACK A

MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH UN2030	ORDINARY DIFFERENTIAL EQUATIONS
MATH UN3007 or MATH GU4065 or APMA E4204	COMPLEX VARIABLES HONORS COMPLEX VARIABLES FUNCTNS OF A COMPLEX VARIABLE

APMA E4306	Applied Stochastic Analysis
ECON GU4415	GAME THEORY

<sup>1</sup> MATH UN2015 Linear Algebra and Probability does NOT replace MATH UN2010 LINEAR ALGEBRA as prerequisite requirements of math courses. Students will not receive full credit for both courses UN2010 and UN2015. Students who have taken MATH UN2015 and consider taking higher level Math courses should contact a major advisor to discuss alternative pathways.

## MAJOR IN COMPUTER SCIENCE–MATHEMATICS

The goal of this interdepartmental major is to provide substantial background in each of these two disciplines, focusing on some of the parts of each which are closest to the other. Students intending to pursue a Ph.D. program in either discipline are urged to take additional courses, in consultation with their advisers.

The major requires 20 points in computer science, 19-21 points in mathematics, and two 3-point electives in either computer science or mathematics.

#### Computer Science

COMS W1004  or COMS W1007	Introduction to Computer Science and Programming in Java

<sup>1</sup> MATH UN2015 Linear Algebra and Probability does NOT replace MATH UN2010 LINEAR ALGEBRA as prerequisite requirements of math courses. Students will not receive full credit for both courses UN2010 and UN2015. Students who have taken MATH UN2015 and consider taking higher level Math courses should contact a major advisor to discuss alternative pathways.

---

## MAJOR IN ECONOMICS- MATHEMATICS

For a description of the joint major in economics-mathematics, see the *Economics* section of this bulletin.

---

## MAJOR IN MATHEMATICS- STATISTICS

The program is designed to prepare the student for: (1) a career in industries such as finance and insurance that require a high level of mathematical sophistication and a substantial knowledge of probability and statistics, and (2) graduate study in quantitative disciplines. Students choose electives in finance, actuarial science, operations research, or other quantitative fields to complement requirements in mathematics, statistics, and computer science.

The major requires 38-43 points as follows:

### Mathematics

Select one of the following sequences:

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN2010 & MATH UN2500	CALCULUS I and CALCULUS II and CALCULUS III and LINEAR ALGEBRA and ANALYSIS AND OPTIMIZATION <sup>1</sup>
---	--

OR

MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN2010 & MATH UN2500	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA and ANALYSIS AND OPTIMIZATION <sup>1</sup>
---	---

OR

MATH UN1207  
& MATH UN1208  
& MATH UN2500

HONORS MATHEMATICS A  
and HONORS MATHEMATICS  
B  
and ANALYSIS AND  
OPTIMIZATION (with approval  
from the adviser)

### Statistics

#### Introductory Course

STAT UN1201      CALC-BASED INTRO TO  
STATISTICS

#### Required Courses

STAT GU4203      PROBABILITY THEORY  
STAT GU4204      STATISTICAL INFERENCE  
STAT GU4205      LINEAR REGRESSION  
MODELS

Select one of the following courses:

STAT GU4207      ELEMENTARY STOCHASTIC  
PROCESS  
STAT GU4262      Stochastic Processes for Finance  
STAT GU4264      STOCHASTIC PROCESSES-  
APPLIED I  
STAT GU4265      STOCHASTIC METHODS IN  
FINANCE

### Computer Science

Select one of the following courses:

COMS W1004      Introduction to Computer Science  
and Programming in Java  
COMS W1005      Introduction to Computer Science  
and Programming in MATLAB  
ENGI E1006      INTRO TO COMP FOR ENG/  
APP SCI  
COMS W1007  
or an advanced computer science offering in programming

### Electives

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

<sup>1</sup> MATH UN2015 Linear Algebra and Probability does NOT replace MATH UN2010 LINEAR ALGEBRA as prerequisite requirements of math courses. Students will not receive full credit for both courses UN2010 and UN2015. Students who have taken MATH UN2015 and consider taking higher level Math courses should contact a major advisor to discuss alternative pathways.

Students interested in modeling applications are recommended to take MATH UN2030 ORDINARY DIFFERENTIAL EQUATIONS and MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS.

Students interested in finance are recommended to take MATH GR5010 INTRO TO THE MATH OF FINANCE,

STAT GU4261 STATISTICAL METHODS IN FINANCE, and STAT GU4221 TIME SERIES ANALYSIS.

Students interested in graduate study in mathematics or in statistics are recommended to take MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 LINEAR REGRESSION MODELS with STAT GU4282 Linear Regression and Time Series Methods , and to take among their electives STAT GU4281 Theory of Interest .

## MINOR IN MATHEMATICS

The Minor in Mathematics aims to provide students with a solid foundation of mathematical concepts. The program focuses on essential coursework, including multivariable calculus and linear algebra.

The minor functions as a complement to a number of closely related majors, including physics, economics, and computer science. Designed for accessibility, the minor emphasizes foundational understanding rather than proof-based courses, distinguishing it from the comprehensive Mathematics major.

Students in economics, computer science, statistics, physics, and similar natural science programs such as biology and climate science may be particularly interested in the minor. However, its versatile skillset extends beyond these disciplines. Students in language programs, art, and other humanities can also benefit from the minor's quantitative proficiency, enhancing their studies and future career prospects.

Students start with the minor requirements, e.g. with advanced placement sufficient to start the Multivariable Calculus/Linear Algebra component. Upon completion of the minor, students will have acquired the skills and knowledge to carry out basic and advanced computations, formulate and solve problems, both internal to mathematics and arising from real world applications.

The minor consists of 15-17 points, as follows:

1. Multivariable calculus
2. Linear Algebra
3. Three approved elective courses (at least 9 points), two of which must be 2000+ level courses offered by the Mathematics department. The third course may either be an additional course in Math, or selected from a list of approved cognate courses<sup>1</sup>. Only one Undergraduate Seminar in Mathematics (MATH UN3951 UNDERGRADUATE SEMINARS I or MATH UN3952 UNDERGRADUATE SEMINARS II) may count towards the minor requirements.

Multivariable Calculus & Linear Algebra

Select one of the following five multivariable and linear algebra sequences:

MATH UN1202 & MATH UN2010	CALCULUS IV and LINEAR ALGEBRA
OR	
MATH UN1202 & MATH UN2015	CALCULUS IV and Linear Algebra and Probability
OR	
MATH UN1205 & MATH UN2010	ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA
OR	
MATH UN1205 & MATH UN2015	ACCELERATED MULTIVARIABLE CALC and Linear Algebra and Probability
OR	
MATH UN1207 & MATH UN1208	HONORS MATHEMATICS A and HONORS MATHEMATICS B

Electives

Select three elective courses (at least 9 points), two of which must be 2000+ level courses offered by the Mathematics department. The third course may either be an additional course in Math, or selected from a list of approved cognate courses.<sup>1</sup>

Only one Undergraduate Seminar in Mathematics (MATH UN3951 UNDERGRADUATE SEMINARS I or MATH UN3952 UNDERGRADUATE SEMINARS II) may count towards the minor requirements.

<sup>1</sup> See the list of approved cognate courses under the Major in Mathematics

Prerequisites

Prerequisites for the courses in (1) Multivariable calculus and (2) Linear Algebra are as follows:

- MATH UN1202 CALCULUS IV: requires MATH UN1102 CALCULUS II and MATH UN1201 CALCULUS III
- MATH UN1205 ACCELERATED MULTIVARIABLE CALC: requires MATH UN1101 CALCULUS I and MATH UN1102 CALCULUS II
- MATH UN2010 LINEAR ALGEBRA: MATH UN1201 CALCULUS III (strongly recommended)
- MATH UN2015 Linear Algebra and Probability: MATH UN1101 CALCULUS I (strongly recommended)

MINOR IN MATHEMATICAL PROBABILITY

Probability Theory is a core mathematical subject with deep connections to a wide variety of disciplines. Many fundamental probabilistic concepts and problems stem from such fruitful interactions, from material sciences (e.g. percolation) to social sciences and computer science (e.g. random networks). The Minor in Mathematical Probability is a focused minor aiming at providing students majoring in these disciplines with a solid mathematical foundation organized around the probabilistic concepts pertinent to their main program of study. The transversal nature of probability both in science at large, and in terms of university structure, is underlined by the option of satisfying some core and elective requirements in other departments, such as Statistics and Industrial Engineering and Operation Research.

The minor naturally complements programs of study in natural and social sciences. As a focused minor, it also provides students with precise guidance on choices of coursework with direct relevance to and synergy with their major.

Students start with the minor requirements, e.g. with advanced placement sufficient to start the Multivariable Calculus/Linear Algebra component. Upon completion of the minor, students will have acquired core mathematical skillsets motivated and illustrated by interactions with other disciplines, organized around theoretical and applied probability. The specialized structure and designation of the minor may also benefit career and professional development.

The minor consists of 15-17 points, as follows:

1. Multivariable calculus
2. Linear Algebra
3. Probability Theory
4. Two approved elective courses (at least 6 points), at least one of which is an approved course offered by the Mathematics Department. The second course may either be an additional course in Math, or selected from the list of approved cognate courses.

Multivariable Calculus & Linear Algebra

MATH UN1201 & MATH UN2010	CALCULUS III and LINEAR ALGEBRA
OR	
MATH UN1201 & MATH UN2015	CALCULUS III and Linear Algebra and Probability
OR	
MATH UN1205 & MATH UN2010	ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA
OR	

MATH UN1205 & MATH UN2015  
ACCELERATED MULTIVARIABLE CALC and Linear Algebra and Probability

OR

MATH UN1207 & MATH UN1208  
HONORS MATHEMATICS A and HONORS MATHEMATICS B

#### Probability Theory

MATH GU4155 PROBABILITY THEORY  
or STAT GU4203 PROBABILITY THEORY  
or IEOR E3658 PROBABILITY FOR ENGINEERS

#### Electives

Select two elective courses (at least 6 points), at least one of which is an approved course offered by the Mathematics Department. The second course may either be an additional course in Math, or selected from the list of approved cognate courses below.

#### Approved Mathematics Electives

MATH UN2030 ORDINARY DIFFERENTIAL EQUATIONS

MATH UN2500 ANALYSIS AND OPTIMIZATION

MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS

MATH UN3050 DISCRETE TIME MODELS IN FINANC

MATH GU4061 INTRO MODERN ANALYSIS I

MATH GU4062 INTRO MODERN ANALYSIS II

MATH GU4156 ADVANCED PROBABILITY THEORY

#### Approved Cognate Electives

COMS W3203 DISCRETE MATHEMATICS

IEOR E3106 STOCHASTIC SYSTEMS AND APPLICATIONS

PHIL GU4561 PROBABILITY & DECISION THEORY

PHYS GU4023 THERMAL & STATISTICAL PHYSICS

STAT GU4204 STATISTICAL INFERENCE

STAT GU4207 ELEMENTARY STOCHASTIC PROCESS

STAT GU4262 Stochastic Processes for Finance

STAT GU4264 STOCHASTIC PROCESSES-APPLICTNS I

### Prerequisites

Prerequisites for the courses in (1) Multivariable calculus and (2) Linear Algebra are as follows:

- MATH UN1201 CALCULUS III: requires MATH UN1101 CALCULUS I
- MATH UN1205 ACCELERATED MULTIVARIABLE CALC: requires MATH UN1101 CALCULUS I and MATH UN1102 CALCULUS II

- MATH UN2010 LINEAR ALGEBRA: MATH UN1201 CALCULUS III (strongly recommended)
- MATH UN2015 Linear Algebra and Probability: MATH UN1101 CALCULUS I (strongly recommended)

Prerequisites for the courses in (3) Probability Theory are as follows:

- MATH GU4155 PROBABILITY THEORY: MATH GU4061 INTRO MODERN ANALYSIS I (approved elective)
- STAT GU4203 PROBABILITY THEORY: At least one semester, and preferably two, of calculus. An introductory course (STAT UN1201 CALC-BASED INTRO TO STATISTICS, preferably) is strongly recommended
- IEOR E3658 PROBABILITY FOR ENGINEERS: Solid knowledge of calculus, including multiple variable integration

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR CONCENTRATION IN MATHEMATICS

The concentration requires the following:

#### Mathematics

Select one of the following three multivariable calculus and linear algebra sequences:

MATH UN1201 & MATH UN1202 & MATH UN2010  
CALCULUS III and CALCULUS IV and LINEAR ALGEBRA <sup>1</sup>

OR

MATH UN1205 & MATH UN2010  
ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA <sup>1</sup>

OR

MATH UN1207 & MATH UN1208  
HONORS MATHEMATICS A and HONORS MATHEMATICS B

#### Additional Courses

Select at least 12 additional points from any of the courses offered by the department numbered 2000 or higher. A maximum of 3 credits may be taken from courses outside the department. <sup>2</sup>

<sup>1</sup> MATH UN2015 Linear Algebra and Probability does NOT replace MATH UN2010 LINEAR ALGEBRA as prerequisite requirements of math courses. Students will not receive full credit for both courses UN2010 and UN2015. Students who have taken MATH UN2015 and consider taking higher

level Math courses should contact a major advisor to discuss alternative pathways.

<sup>2</sup> For mathematics courses taken in other departments, consult with the Director of Undergraduate Studies.

Any course given by the Mathematics department fulfills the General Studies quantitative reasoning requirement when passed with a satisfactory letter grade.

### **MATH UN1003 COLLEGE ALGEBRA-ANLYTC GEOMTRY. 3.00 points.**

Prerequisites: score of 550 on the mathematics portion of the SAT completed within the last year, or the appropriate grade on the General Studies Mathematics Placement Examination. For students who wish to study calculus but do not know analytic geometry. Algebra review, graphs and functions, polynomial functions, rational functions, conic sections, systems of equations in two variables, exponential and logarithmic functions, trigonometric functions and trigonometric identities, applications of trigonometry, sequences, series, and limits. This course may not be taken for credit after the successful completion of any course in the Calculus sequence

#### **Fall 2024: MATH UN1003**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1003	001/00010	M W 6:10pm - 7:25pm 323 Milbank Hall	Lindsay Piechnik	3.00	51/56

**MATH UN1205 ACCELERATED MULTIVARIABLE CALC. 4.00 points.**

Prerequisites: (MATH UN1101 and MATH UN1102)

Prerequisites: (MATH UN1101 and MATH UN1102). Vectors in dimensions 2 and 3, vector-valued functions of one variable, scalar-valued functions of several variables, partial derivatives, gradients, optimization, Lagrange multipliers, double and triple integrals, line and surface integrals, vector calculus. This course is an accelerated version of MATH UN1201 - MATH UN1202. Students taking this course may not receive credit for MATH UN1201 and MATH UN1202

**Fall 2024: MATH UN1205**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1205	001/11864	M W 1:10pm - 2:25pm 329 Pupin Laboratories	Dawei Shen	4.00	65/90

**Spring 2025: MATH UN1205**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1205	001/15308	T Th 11:40am - 12:55pm 520 Mathematics Building	Marco Castronovo	4.00	31/64

**MATH UN1207 HONORS MATHEMATICS A. 4.00 points.**

Prerequisites: (see Courses for First-Year Students).

Prerequisites: (see "Guidance for First-Year Students" in the Bulletin). The second term of this course may not be taken without the first. Multivariable calculus and linear algebra from a rigorous point of view. Recommended for mathematics majors. Fulfills the linear algebra requirement for the major. (SC)

**Fall 2024: MATH UN1207**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1207	001/11865	T Th 1:10pm - 2:25pm 140 Uris Hall	Giulia Sacca	4.00	43/52

**MATH UN1208 HONORS MATHEMATICS B. 4.00 points.**

Prerequisites: (see Courses for First-Year Students).

Prerequisites: (see "Guidance for First-Year Students" in the Bulletin). The second term of this course may not be taken

without the first. Multivariable calculus and linear algebra from a rigorous point of view. Recommended for mathematics majors. Fulfills the linear algebra requirement for the major. (SC)

**Spring 2025: MATH UN1208**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 1208	001/15314	T Th 1:10pm - 2:25pm 330 Uris Hall	Jeanne Boursier	4.00	30/64

**MATH UN2000 INTRO TO HIGHER MATHEMATICS. 3.00 points.**

Introduction to understanding and writing mathematical proofs. Emphasis on precise thinking and the presentation of mathematical results, both in oral and in written form. Intended for students who are considering majoring in mathematics but wish additional training. CC/GS: Partial Fulfillment of Science Requirement. BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA)

**Fall 2024: MATH UN2000**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2000	001/00013	M W 10:10am - 11:25am 328 Milbank Hall	Dusa McDuff	3.00	28/55

**MATH BC2001 PERSPECTIVES IN MATHEMATICS. 1.00 point.**

Prerequisites: some calculus or the instructor's permission. Intended as an enrichment to the mathematics curriculum of the first years, this course introduces a variety of mathematical topics (such as three dimensional geometry, probability, number theory) that are often not discussed until later, and explains some current applications of mathematics in the sciences, technology and economics

**Spring 2025: MATH BC2001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 2001	001/00904	W 2:40pm - 3:30pm 140 Horace Mann Hall	Dusa McDuff	1.00	17/30

**MATH UN2005 INTRODUCTION TO MATHEMATICS PROOFS. 0.00 points.**

This is a seminar course that covers the basics of mathematical proofs and in particular the epsilon-delta argument in single variable calculus. Students who have little experience with mathematical proofs are strongly encouraged to take this course concurrently with Honors Math, Into to Modern Algebra, or Intro to Modern Analysis

**Fall 2024: MATH UN2005**

**MATH UN2015 Linear Algebra and Probability. 3.00 points.**

Linear algebra with a focus on probability and statistics. The course covers the standard linear algebra topics: systems of linear equations, matrices, determinants, vector spaces, bases, dimension, eigenvalues and eigenvectors, the Spectral Theorem and singular value decompositions. It also teaches applications of linear algebra to probability, statistics and dynamical systems giving a background sufficient for higher level courses in probability and statistics. The topics covered in the probability theory part include conditional probability, discrete and continuous random variables, probability distributions and the limit theorems, as well as Markov chains, curve fitting, regression, and pattern analysis. The course contains applications to life sciences, chemistry, and environmental life sciences. No a priori background in the life sciences is assumed. This course is best suited for students who wish to focus on applications and practical approaches to problem solving. It is recommended to students majoring in engineering, technology, life sciences, social sciences, and economics. Math majors, joint majors, and math concentrators must take MATH UN2010 Linear Algebra or MATH UN1207 Honors Math A, which focus on linear algebra concepts and foundations that are needed for upper-level math courses. MATH UN2015 (Linear Algebra and Probability) does NOT replace MATH UN2010 (Linear Algebra) as prerequisite requirements of math courses. Students may not receive full credit for both courses MATH UN2010 and MATH UN2015. Students who have taken MATH UN2015 and consider taking higher level Math courses should contact a major advisor to discuss alternative pathways

**Fall 2024: MATH UN2015**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MATH UN3007 COMPLEX VARIABLES. 3.00 points.**

Prerequisites: MATH UN1202 *MATH V1202*. An elementary course in functions of a complex variable.

Prerequisites: MATH UN1202 An elementary course in functions of a complex variable. Fundamental properties of the complex numbers, differentiability, Cauchy-Riemann equations. Cauchy integral theorem. Taylor and Laurent series, poles, and essential singularities. Residue theorem and conformal mapping.(SC)

**Fall 2024: MATH UN3007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3007	001/11877	T Th 11:40am - 12:55pm 312 Mathematics Building	Ovidiu Savin	3.00	55/100

**MATH UN3020 NUMBER THEORY AND CRYPTOGRAPHY. 3.00 points.**

Prerequisites: one year of calculus.

Prerequisites: one year of calculus. Prerequisite: One year of Calculus. Congruences. Primitive roots. Quadratic residues.

Contemporary applications

**Spring 2025: MATH UN3020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3020	001/15349	M W 10:10am - 11:25am 203 Mathematics Building	Siddhi Krishna	3.00	52/100

**MATH UN3025 MAKING, BREAKING CODES. 3.00 points.**

Prerequisites: (MATH UN1101 and MATH UN1102 and MATH UN1201) and *MATH V1101*, *MATH V1102*, *MATH V1201* and *MATH V2010*.

Prerequisites: (MATH UN1101 and MATH UN1102 and MATH UN1201) and and MATH UN2010. A concrete introduction to abstract algebra. Topics in abstract algebra used in cryptography and coding theory

**Fall 2024: MATH UN3025**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3025	001/11878	T Th 1:10pm - 2:25pm 312 Mathematics Building	Dorian Goldfeld	3.00	95/100

**MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS. 3.00 points.**

Prerequisites: MATH UN3027 and MATH UN2010 *MATH V3027* and *MATH V2010* or the equivalent

Prerequisites: (MATH UN2010 and MATH UN2030) or the equivalent introduction to partial differential equations. First-order equations. Linear second-order equations; separation of variables, solution by series expansions. Boundary value problems

**Spring 2025: MATH UN3028**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3028	001/15351	T Th 2:40pm - 3:55pm 417 Mathematics Building	Simon Brendle	3.00	60/64

**MATH UN3050 DISCRETE TIME MODELS IN FINANC. 3.00 points.**

Prerequisites: (MATH UN1102 and MATH UN1201) or (MATH UN1101 and MATH UN1102 and MATH UN1201) and MATH UN2010 *MATH V1102*, *MATH V1201* (or *MATH V1101*, *MATH V1102*, *MATH V1201*), *MATH V2010*.

Recommended: *MATH V3027* (or *MATH V2030*) and *SIEO W3600*.

Prerequisites: (MATH UN1102 and MATH UN1201) or (MATH UN1101 and MATH UN1102 and MATH UN1201) and MATH UN2010 Recommended: MATH UN3027 (or MATH UN2030 and SIEO W3600). Elementary discrete time methods for pricing financial instruments, such as options. Notions of arbitrage, risk-neutral valuation, hedging, term-structure of interest rates

**Spring 2025: MATH UN3050**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 3050	001/15353	M W 6:10pm - 7:25pm 417 Mathematics Building	Mikhail Smirnov	3.00	57/64

**MATH UN3386 DIFFERENTIAL GEOMETRY. 3.00 points.**

Prerequisites: MATH UN1202 *MATH V1202* or the equivalent. Local and global differential geometry of submanifolds of Euclidean 3-space. Frenet formulas for curves. Various types of curvatures for curves and surfaces and their relations. The Gauss-Bonnet theorem.

**MATH UN3901 SUPERVISED READINGS I. 1.00-3.00 points.**

Prerequisites: the written permission of the staff member who agrees to act as sponsor (sponsorship limited to full-time instructors on the staff list), as well as the director of undergraduate studies' permission. *The written permission must be deposited with the director of undergraduate studies before registration is completed.*

Prerequisites: The written permission of the faculty member who agrees to act as sponsor (sponsorship limited to full-time instructors on the staff list), as well as the permission of the Director of Undergraduate Studies. The written permission must be deposited with the Director of Undergraduate Studies before registration is completed. Guided reading and study in mathematics. A student who wishes to undertake individual study under this program must present a specific project to a member of the staff and secure his or her willingness to act as sponsor. Written reports and periodic conferences with the instructor. Supervising Readings do NOT count towards major requirements, with the exception of an advanced written approval by the DUS

### **MATH UN3994 SENIOR THESIS IN MATHEMATICS I. 4.00 points.**

Majors in Mathematics are offered the opportunity to write an honors senior thesis under the guidance of a faculty member. Interested students should contact a faculty member to determine an appropriate topic, and receive written approval from the faculty advisor and the Director of Undergraduate Studies (faculty sponsorship is limited to full-time instructors on the staff list). Research is conducted primarily during the fall term; the final paper is submitted to the Director of Undergraduate Studies during the subsequent spring term. MATH UN3994 SENIOR THESIS IN MATHEMATICS I must be taken in the fall term, during which period the student conducts primary research on the agreed topic. An optional continuation course MATH UN3995 SENIOR THESIS IN MATHEMATICS II is available during the spring. The second term of this sequence may not be taken without the first. Registration for the spring continuation course has no impact on the timeline or outcome of the final paper. Sections of SENIOR THESIS IN MATHEMATICS I and II do NOT count towards the major requirements, with the exception of an advanced written approval by the DUS

#### **Fall 2024: MATH UN3994**

### **MATH GU4007 ANALYTIC NUMBER THEORY. 3.00 points.**

Prerequisites: MATH UN3007 *MATH V3007*.

Prerequisites: MATH UN3007 A one semester course covering the theory of modular forms, zeta functions, L -functions, and the Riemann hypothesis. Particular topics covered include the Riemann zeta function, the prime number theorem, Dirichlet characters, Dirichlet L-functions, Siegel zeros, prime number theorem for arithmetic progressions, SL (2, Z) and subgroups, quotients of the upper half-plane and cusps, modular forms, Fourier expansions of modular forms, Hecke operators, L-functions of modular forms

**Spring 2025: MATH GU4007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4007	001/15355	T Th 2:40pm - 3:55pm 307 Mathematics Building	Amadou Bah	3.00	4/20

**MATH GU4032 FOURIER ANALYSIS. 3.00 points.**

Prerequisites: three terms of calculus and linear algebra or four terms of calculus.

Prerequisites: three terms of calculus and linear algebra or four terms of calculus. Prerequisite: three terms of calculus and linear algebra or four terms of calculus. Fourier series and integrals, discrete analogues, inversion and Poisson summation formulae, convolution. Heisenberg uncertainty principle. Stress on the application of Fourier analysis to a wide range of disciplines

**Fall 2024: MATH GU4032**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MATH GU4043 ALGEBRAIC NUMBER THEORY. 3.00 points.**

Prerequisites: MATH GU4041 and MATH GU4042 *MATH W4041-MATH W4042* or the equivalent.

Prerequisites: MATH GU4041 and MATH GU4042 or the equivalent Algebraic number fields, unique factorization of ideals in the ring of algebraic integers in the field into prime ideals. Dirichlet unit theorem, finiteness of the class number, ramification. If time permits, p-adic numbers and Dedekind zeta function

**Spring 2025: MATH GU4043**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4043	001/15362	T Th 4:10pm - 5:25pm 307 Mathematics Building	Yujie Xu	3.00	2/20

**MATH GU4044 REPRESENTATIONS OF FINITE GROUPS. 3.00 points.**

Prerequisites: MATH UN2010 and MATH GU4041 *MATH V2010* and *MATH W4041* or the equivalent.

Prerequisites: MATH UN2010 and MATH GU4041 or the equivalent. Finite groups acting on finite sets and finite dimensional vector spaces. Group characters. Relations with subgroups and factor groups. Arithmetic properties of character values. Applications to the theory of finite groups: Frobenius groups, Hall subgroups and solvable groups. Characters of the symmetric groups. Spherical functions on finite groups

**Fall 2024: MATH GU4044**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4044	001/11880	T Th 1:10pm - 2:25pm 407 Mathematics Building	Andrei Okounkov	3.00	15/30

**MATH GU4045 ALGEBRAIC CURVES. 3.00 points.**

Prerequisites: (MATH GU4041 and MATH GU4042) and MATH UN3007 *MATH W4041*, *MATH W4042* and *MATH V3007*.

Prerequisites: (MATH GU4041 and MATH GU4042) and MATH UN3007 Plane curves, affine and projective varieties,

singularities, normalization, Riemann surfaces, divisors, linear systems, Riemann-Roch theorem

#### Spring 2025: MATH GU4045

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4045	001/15365	M W 11:40am - 12:55pm 307 Mathematics Building	Yoonjoo Kim	3.00	6/20

#### MATH GU4051 TOPOLOGY. 3.00 points.

Prerequisites: (MATH UN1202 and MATH UN2010) and *MATH V1202*, *MATH V2010*, and rudiments of group theory (e.g., *MATH W4041*). *MATH V1208* or *MATH W4061* is recommended, but not required.

Prerequisites: (MATH UN1202 and MATH UN2010) and rudiments of group theory (e.g. MATH GU4041). MATH UN1208 or MATH GU4061 is recommended, but not required. Metric spaces, continuity, compactness, quotient spaces. The fundamental group of topological space. Examples from knot theory and surfaces. Covering spaces

#### Fall 2024: MATH GU4051

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4051	001/11881	T Th 6:10pm - 7:25pm 520 Mathematics Building	Rostislav Akhmechet	3.00	17/49

#### MATH GU4052 INTRODUCTION TO KNOT THEORY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: MATH GU4051 Topology and / or MATH GU4061 Introduction To Modern Analysis I (or equivalents). Recommended (can be taken concurrently): MATH UN2010 linear algebra, or equivalent. The study of algebraic and geometric properties of knots in  $\mathbb{R}^3$ , including but not limited to knot projections and Reidemeisters theorem, Seifert surfaces, braids, tangles, knot polynomials, fundamental group of knot complements. Depending on time and student interest, we will discuss more advanced topics like knot concordance, relationship to 3-manifold topology, other algebraic knot invariants

#### Fall 2024: MATH GU4052

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4052	001/11882	M W 11:40am - 12:55pm 307 Mathematics Building	Siddhi Krishna	3.00	10/20

#### MATH GU4053 INTRO TO ALGEBRAIC TOPOLOGY. 3.00 points.

Prerequisites: MATH UN2010 and MATH GU4041 and MATH GU4051 *MATH V2010*, *MATH W4041*, *MATH W4051*.

Prerequisites: MATH UN2010 and MATH GU4041 and MATH GU4051 The study of topological spaces from algebraic properties, including the essentials of homology and the fundamental group. The Brouwer fixed point theorem. The homology of surfaces. Covering spaces

#### Spring 2025: MATH GU4053

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4053	001/15367	T Th 11:40am - 12:55pm 307 Mathematics Building	Soren Galatius	3.00	12/20

#### MATH GU4061 INTRO MODERN ANALYSIS I. 3.00 points.

Prerequisites: MATH UN1202 *MATH V1202* or the equivalent, and *MATH V2010*. The second term of this course may not be taken without the first.

Prerequisites: MATH UN1202 or the equivalent, and MATH UN2010. The second term of this course may not be taken without the first. Real numbers, metric spaces, elements of general topology, sequences and series, continuity, differentiation, integration, uniform convergence, Ascoli-Arzelà theorem, Stone-Weierstrass theorem

#### Fall 2024: MATH GU4061

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4061	001/11858	T Th 1:10pm - 2:25pm 417 Mathematics Building	Sven Hirsch	3.00	53/64
MATH 4061	002/11859	T Th 2:40pm - 3:55pm 417 Mathematics Building		3.00	61/64

#### Spring 2025: MATH GU4061

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4061	001/15369	M W 1:10pm - 2:25pm 614 Schermerhorn Hall	Julien Dubedat	3.00	49/100

#### MATH GU4062 INTRO MODERN ANALYSIS II. 3.00 points.

Prerequisites: MATH UN1202 *MATH V1202* or the equivalent, and *MATH V2010*. The second term of this course may not be taken without the first.

The second term of this course may not be taken without the first. Power series, analytic functions, Implicit function theorem, Fubini theorem, change of variables formula, Lebesgue measure and integration, function spaces

#### Fall 2024: MATH GU4062

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4062	001/11883	M W 11:40am - 12:55pm 520 Mathematics Building	Milind Hegde	3.00	12/49

#### Spring 2025: MATH GU4062

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4062	001/15370	T Th 4:10pm - 5:25pm 520 Mathematics Building	Francesco Lin	3.00	49/49

**MATH GU4065 HONORS COMPLEX VARIABLES. 3.00 points.**

Prerequisites: (MATH UN1207 and MATH UN1208) or MATH GU4061 *MATH V1207* and *MATH V1208* or *MATH W4061*.

Prerequisites: (MATH UN1207 and MATH UN1208) or MATH GU4061 A theoretical introduction to analytic functions. Holomorphic functions, harmonic functions, power series, Cauchy-Riemann equations, Cauchy's integral formula, poles, Laurent series, residue theorem. Other topics as time permits: elliptic functions, the gamma and zeta function, the Riemann mapping theorem, Riemann surfaces, Nevanlinna theory

**Fall 2024: MATH GU4065**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4065	001/11884	T Th 11:40am - 12:55pm 520 Mathematics Building	Francesco Lin	3.00	35/45

**MATH GU4081 INTRO-DIFFERENTIABLE MANIFOLDS. 3.00 points.**

Prerequisites: (MATH GU4051 or MATH GU4061) and MATH UN2010 *MATH W4051* or *MATH W4061* and *MATH V2010*.

Prerequisites: (MATH GU4051 or MATH GU4061) and MATH UN2010 Concept of a differentiable manifold. Tangent spaces and vector fields. The inverse function theorem. Transversality and Sard's theorem. Intersection theory. Orientations. Poincaré-Hopf theorem. Differential forms and Stokes theorem

**Spring 2025: MATH GU4081**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4081	001/15373	M W 10:10am - 11:25am 520 Mathematics Building	Sven Hirsch	3.00	20/49

**MATH GU4155 PROBABILITY THEORY. 3.00 points.**

Prerequisites: MATH GU4061 or MATH UN3007 *MATH W4061* or *MATH V3007*.

Prerequisites: MATH GU4061 or MATH UN3007 A rigorous introduction to the concepts and methods of mathematical probability starting with basic notions and making use of combinatorial and analytic techniques. Generating functions. Convergence in probability and in distribution. Discrete probability spaces, recurrence and transience of random walks. Infinite models, proof of the law of large numbers and the central limit theorem. Markov chains

**Fall 2024: MATH GU4155**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4155	001/11860	T Th 2:40pm - 3:55pm 507 Mathematics Building	Ivan Corwin	3.00	12/26

**MATH GU4156 ADVANCED PROBABILITY THEORY. 3.00 points.**

This course will cover advance topics in probability, including: the theory of martingales in discrete and in continuous time; Brownian motion and its properties, stochastic integration, ordinary and partial stochastic differential equations; Applications to optimal filtering, stopping, control, and finance; Continuous-time Markov chains, systems of interacting particles, relative entropy dissipation, notions of information theory; Electrical networks, random walks on graphs and groups, percolation

**Spring 2025: MATH GU4156**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4156	001/15375	T Th 2:40pm - 3:55pm 332 Uris Hall	Ioannis Karatzas	3.00	25/49

**MATH GU4200 MATHEMATICS AND THE HUMANITIES. 4.00 points.**

This course is being taught by two senior faculty members who are theorists and practitioners in disciplines as different as mathematics and literary criticism. The instructors believe that in today's world, the different ways in which theoretical mathematics and literary criticism mold the imaginations of students and scholars, should be brought together, so that the robust ethical imagination that is needed to combat the disintegration of our world can be produced. Except for the length of novels, the reading is no more than 100 pages a week. Our general approach is to keep alive the disciplinary differences between literary/philosophical (humanities) reading and mathematical writing. Some preliminary questions we have considered are: the survival skills of the logicist school over against the Foundational Crisis of the early 20th century; by way of Wittgenstein and others, we ask, Are mathematical objects real? Or are they linguistic conventions? We will consider the literary/philosophical use of mathematics, often by imaginative analogy; and the role of the digital imagination in the humanities: Can so-called creative work as well as mathematics be written by machines? Guest faculty from other departments will teach with us to help students and instructors understand various topics. We will close with how a novel animates "science" in prose, stepping out of the silo of disciplinary mathematics to the arena where mathematics is considered a code-name for science: Christine Brooke-Rose's novel *Subscript*

**Spring 2025: MATH GU4200**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4200	001/15379	T 4:10pm - 6:00pm 301m Fayerweather	Michael Harris, Justin Clarke-Doane	4.00	18/20

**MATH GU4391 INTRO TO QUANTUM MECHANICS. 3.00 points.**

This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as

well as their physical motivations and consequences. It is meant to be accessible to students with no previous formal training in quantum theory. The role of symmetry, groups and representations will be stressed

#### Fall 2024: MATH GU4391

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MATH 4391	001/11885	M W 2:40pm - 3:55pm 417 Mathematics Building	Peter Voit	3.00	15/64

#### MATH GU4392 INTRO TO QUANTUM MECHANICS II. 3.00 points.

Continuation of GU4391. This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as well as their physical motivations and consequences. It is meant to be accessible to students with no previous formal training in quantum theory. The role of symmetry, groups and representations will be stressed.

## MEDIEVAL AND RENAISSANCE STUDIES

Department website: <http://www.medren.columbia.edu>

Office location: 653-A Ext. Schermerhorn Hall

Office contact: 212-853-4200, [medren@columbia.edu](mailto:medren@columbia.edu)  
([videogameugrad@columbia.edu](mailto:videogameugrad@columbia.edu))

**Program Director:** Dr. Susan Boynton, Professor of Music, 621 Dodge Hall, [slb184@columbia.edu](mailto:slb184@columbia.edu)

**Program Administrator:** Lauren Palmer, 653-A Ext. Schermerhorn Hall, [medren@columbia.edu](mailto:medren@columbia.edu)

Medieval and Renaissance studies is an interdisciplinary program in which a student combines a minor in medieval or Renaissance civilization with a major or concentration in one of the following departments:

- Art History and Archaeology
- Classics
- East Asian Languages and Cultures
- English and Comparative Literature
- French and Romance Philology
- Germanic Languages
- History
- Italian
- Latin American and Iberian Cultures
- Middle Eastern, South Asian, and African Studies
- Music
- Philosophy

- Religion
- Slavic Languages

For more information about the special concentration in medieval and Renaissance studies, visit <http://medren.columbia.edu/>.

## EXECUTIVE COMMITTEE OF THE INTERDEPARTMENTAL COMMITTEE ON MEDIEVAL AND RENAISSANCE STUDIES

Christopher Baswell (English and Comparative Literature)  
Susan Boynton (Music; Program Director, Medieval and Renaissance Studies)  
Emily Runde (Rare Book and Manuscript Library)  
Gregory Bryda (Art History and Archaeology)  
Seth Kimmel (Latin American and Iberian Cultures)  
Alan Stewart (English and Comparative Literature)  
Michael Waters (Art History and Archaeology)  
Jeffrey Wayno (Columbia University Libraries)  
Hannah Weaver (English and Comparative Literature)

**Full Faculty List:** <https://medren.columbia.edu/content/faculty>

## UNDERGRADUATE PROGRAMS OF STUDY

### Minor in Medieval and Renaissance Studies

Students can earn a minor in Medieval and Renaissance Studies by taking five (5) courses (15-20 points) offered by any of the following departments:

Art History and Archaeology; Classics; East Asian Languages and Cultures; English and Comparative Literature; French and Romance Philology; Germanic Languages; History; Italian; Latin American and Iberian Cultures; Middle Eastern, South Asian, and African Studies; Music; Philosophy; Religion; Slavic Languages.

Courses are to be chosen in consultation with the Director of Medieval and Renaissance Studies, and **courses choices must be approved** in order to count for the minor.

Approved courses usually have a primary focus on the period between 500 and 1700 CE.

### Language Requirement

Students must demonstrate an ability to work with original language sources (other than in Early Modern English) from the medieval and/or Early Modern periods, either through coursework focusing on the historical language (e.g., LATN UN3033 Medieval Latin; MDES GU4214 Fourth Year Classical Arabic I) or through research (e.g., a senior thesis or seminar paper with substantial use of original language sources).

Any courses used to demonstrate the language requirement may also count toward the course requirement for the minor. Students must gain approval of the Director of Medieval and Renaissance Studies before registering for courses to fulfill this language requirement.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Special Concentration in Medieval and Renaissance Studies

Students considering the special concentration in medieval and Renaissance studies should consult with the director in advance of course registration to ensure that their selection of courses will count towards the special concentration.

*Please note that requirements for the Special Concentration were revised November 2017.*

In addition to fulfilling the requirements for a departmental major or concentration, students with this special concentration should plan on taking an additional four (4) courses in other departments of the program, to be chosen in consultation with an appropriate member of the committee.

Students must also demonstrate an ability to work with original language sources (other than in Early Modern English) from the medieval and/or Early Modern periods, either through language coursework focusing on the historical language (e.g., LATN UN3033 MEDIEVAL LANGUAGE # LITERATURE, MDES GU4214 FOURTH YEAR CLASSICAL ARABIC I) or through research (e.g., a senior thesis or seminar paper with substantial use of original language sources). Any courses outside the major used to demonstrate the language requirement may also count toward the course requirement for the special concentration. Students should gain approval of the director of the program in advance for plans to fulfill this language requirement.

## MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES

**Departmental Office:** 401 Knox; 212-854-2556  
<http://mesaas.columbia.edu>

**Director of Undergraduate Studies:** Hamid Dabashi, 416 Knox Hall, 212-854-7524; [av3096@columbia.edu](mailto:av3096@columbia.edu) ([hd14@columbia.edu](mailto:hd14@columbia.edu))

### Language Coordinators:

**Sanskrit:** Jay Ramesh, 311 Knox; 212-854-2893; [jr3203@columbia.edu](mailto:jr3203@columbia.edu)

**Tamil:** Jay Ramesh, 311 Knox; 212-854-2893; [jr3203@columbia.edu](mailto:jr3203@columbia.edu)

**Turkish:** Zuleyha Mary Fikret, 313 Knox; 212-854-0473; [zc2208@columbia.edu](mailto:zc2208@columbia.edu)

The undergraduate program in Middle Eastern, South Asian, and African studies (MESAAS) offers students the opportunity to study in depth the cultures, ideas, histories, and politics of several overlapping world regions. The program emphasizes a close engagement with intellectual traditions, creative movements, and political debates, drawing on a wide variety of historical and contemporary sources in literature, religion, political thought, law, the visual and performing arts, and new media. Courses also examine the historical and cultural contexts in which these traditions and debates have been produced.

## MAJORS AND CONCENTRATIONS

Majors develop two closely related skills. The first is linguistic expertise. A minimum of two years of course work in one language is required, and further work (including intensive summer language study) is greatly encouraged, because the aim is to study a cultural field through its own texts and discourses. The Department of Middle Eastern, South Asian, and African Studies offers courses in Arabic, Persian, Ottoman, Turkish, Hebrew, Armenian, Sanskrit, Hindi/Urdu, Tamil, Swahili and Wolof.

The second skill is learning how to think and write about complex cultural formations, drawing on a variety of methods and disciplinary approaches. The approaches vary according to the faculty members' expertise, incorporating methods from relevant fields in the humanities and social sciences, such as literary criticism, film studies, cultural studies, political theory, and intellectual history.

The only difference between the MESAAS major and the concentration is that the latter does not require language proficiency.

## PROFESSORS

Gil Anidjar  
Muhsin J. Ali al-Musawi  
Partha Chatterjee (*emeritus*)  
Hamid Dabashi  
Mamadou Diouf  
Laura Fair

Wael Hallaq

## GUIDELINES FOR ALL MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES MAJORS AND CONCENTRATORS

### Introduction to MESAAS

Majors and concentrators begin their work with an introductory course that emphasizes a particular area (the Middle East, South Asia, or Africa). For instance, students interested in the Middle East would take MDES UN1003 Premodern Islamic Worlds. Students keen on learning more about South Asia would take ASCM UN2357 INTRO TO INDIAN CIVILIZATION, HSME UN3810 History of South Asia I: al-Hind to Hindustan, or HIST W3811 South Asia II: Empire and Its Aftermath. The introductory course generally recommended for students interested in Africa is MDES UN2030 Major Debates in the Study of Africa.

### Required Core Courses

All majors must take two additional core courses. The first is a small seminar in which they explore some of the classic texts of the region, either AHUM UN1399 COLLOQUIUM ON MAJOR TEXTS: MIDDLE EAST/INDIA (for those focusing on the Middle East and South Asia) or AFCV UN1020 AFRICAN CIVILIZATION (for those focusing on Africa).

With this background, students are ready to take MDES UN3000 THEORY AND CULTURE generally in the junior or senior year. This course examines critical approaches to the study of language, culture, and politics and encourages students to reflect on their own work from many different perspectives.

### Additional Requirements

Fifteen additional points (generally five courses) are chosen in consultation with the director of undergraduate studies. These may include six points of coursework from other departments, subject to the director of undergraduate studies' approval. Although students may have a particular interest (e.g., Arab political thought, Urdu literature, Armenian history, Iranian cinema, or contemporary West Africa), they are encouraged to gain exposure to the fullest range of courses and approaches offered by the faculty, and to familiarize themselves with other regions beyond their core area.

## In Fulfillment of the Language Requirement (for Majors)

Enrollment in language courses is in some cases determined by placement exams. For more information, see *Languages* on the [departmental website](#) and, if necessary, consult the relevant Coordinator listed on that page. The website includes separate pages for each language, describing the program of instruction, courses for heritage speakers, summer language programs, and more. Language courses must be taken for a letter grade. Pass/D/Fail or Registration credit (R) is not permitted. Those seeking to waive a language requirement must take a proficiency test.

Students who enter with language proficiency at only the second-year level must complete one additional year of language study and one additional MESAAS course. When students enter with language proficiency at the third year level (or in cases where only two years of a particular language are offered in MESAAS), they must substitute three additional MESAAS courses.

## Advising

Newly declared majors and concentrators should meet with the director of undergraduate studies in order to plan a program of study. The goal is to strike a balance between courses that help a student achieve depth in a particular area/discipline and those that foster a wider perspective.

Although students are encouraged to approach faculty in the department based on their specific interests, the director of undergraduate studies functions as an ad hoc adviser for all entering students, addressing issues of course requirements, credit, approval for courses in other departments or schools, study abroad, and, eventually, honors requirements (including the senior thesis). Students should not hesitate to contact the director of undergraduate studies to set up an appointment.

## Grading

Courses in which the grade of D has been received do not count toward the major or concentration requirements, nor do those taken Pass/D/Fail, except for the first course taken toward the major or concentration.

## Honors Program/Senior Thesis

Students may also wish to write a thesis. While not required for graduation, the thesis enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the student's junior year. Interested students should attend the relevant information sessions and identify a potential faculty adviser.

All students who wish to write a thesis must enroll in MDES UN3960 HONORS THESIS SEMINAR PART 1, a full year course consisting of a 1-point segment in the Fall semester and a 3-point segment in the Spring semester. Students work closely with their peers in a supportive environment to produce a substantial piece of research (in the range of 40 pages). The

primary intellectual guidance is provided by the faculty adviser, whereas the director of undergraduate studies and the honors seminar teaching assistant oversee the general development of the project. Every year in April, MESAAS hosts a senior colloquium in which students present their research. For more information on the honors program, see *Frequently Asked Questions* on the [departmental website](#).

For additional guidelines, see *Departmental Honors* as outlined in the *Academic Honors, Prizes, and Fellowships* section of the Columbia College Bulletin.

## MAJOR IN MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES

Students should obtain a [Major Declaration](#) form from their advising dean and bring it to the director of undergraduate studies for approval. The director of undergraduate studies meets with students as necessary in order to establish and approve their individual programs of study. The requirements for the major are as follows:

Select a one-term introductory culture course, to be approved by the director of undergraduate studies

AHUM UN1399	COLLOQUIUM ON MAJOR TEXTS: MIDDLE EAST/INDIA
MDES UN3000	THEORY AND CULTURE

Select two years of a language regularly taught in the department, or substitutional courses for students who test out of this requirement with the approval of the director of undergraduate studies

Select 15 points of coursework, which may include up to six points from other departments, selected in consultation with the director of undergraduate studies

### The MESAAS Major and its 'tracks'

Students majoring in MESAAS are studying the languages, and central cultural and political aspects of the societies of the Middle East, South Asia, and Africa, in past and present. This can be done either with a focus on one of these three regions, i.e. the 'African Studies', the 'South Asian Studies', or the 'Middle Eastern Studies' track, or a comparative perspective on them, the 'combined track'.

The coursework for each of those 'tracks' is composed of the same five elements: 1. an approved Introductory course; 2. a seminar on texts from the region; 3. 'Theory and Culture'; 4. five approved elective courses; 5. the regional language requirement.

Note that some MESAAS courses are already comparative by design and connect more than one region: for example, *Societies and Cultures Across the Indian Ocean*, or *Postcolonial Thought*, or courses on Persianate culture that include North

India, or Middle East courses that include North Africa. These may satisfy requirements for more than one track, subject to approval by the Director of Undergraduate Studies (DUS).

#### African Studies

1. MDES UN3130 Major Debates in the Study of Africa or another approved introductory lecture course.
2. CC1020 African Civilization
3. MDES UN3000 Theory and Culture
4. Five additional courses on Africa, such as: South African Literature and Culture: Apartheid and After; East Africa and the Swahili Coast; or Pan Africanism (see the Courses page for more options). You may include up to two courses from other departments, in fields such as African history, politics, and philosophy, the anthropology of Africa, and African art, subject to the approval of the Director of Undergraduate Studies. For a listing of courses in other departments, see [here](#).
5. Language: A minimum of two years of course work in Swahili, Wolof, Arabic, Pulaar, or another African language. See the MESAAS language programs [here](#). Those already fluent in an African language may substitute other courses—see [FAQ](#). Not required for the concentration.

#### Middle Eastern Studies

1. MDES UN1003 Premodern Islamic Worlds or another approved introductory lecture course.
2. Asian Humanities UN1399 Major Texts: Middle East/India
3. MDES UN3000 Theory and Culture
4. Five additional courses on the Middle East, such as: Arabic Self-Narratives; Central Questions in Islamic Law, Palestinian-Israeli Politics and Society, or Epics and Empires (see the Courses page for more options). You may include up to two courses from other departments, in fields such as Middle Eastern history, politics, and anthropology, or Islamic art, subject to the approval of the Director of Undergraduate Studies. Find a list of Middle East courses in other departments [here](#).
5. Language: A minimum of two years of coursework in Arabic, Hebrew, Persian, Turkish, or Armenian. See the MESAAS language programs [here](#). Those already fluent in a Middle Eastern language may substitute other courses—see [FAQ](#). Not required for the concentration.

#### South Asian Studies

1. MDES UN2357 Indian Civilization or another approved introductory lecture course.
2. Asian Humanities UN3399 Major Texts: Middle East/India
3. MDES UN3000 Theory and Culture
4. Five additional courses on South Asia, such as: Mughal India; Gandhi and his Interlocutors; or Cinemas of India (see the Courses page for more options). You may include up to six points of course work from other departments, in fields such as South Asian history, politics, and anthropology, or Indian art, subject to the approval of the Director of Undergraduate Studies. Find a list of South Asia courses in other departments [here](#).

5. Language: A minimum of two years of course work in Hindi/Urdu, Sanskrit, Persian, or other South Asian languages. See the MESAAS language programs [here](#). Those already fluent in a South Asian language may substitute other courses—see [FAQ](#). Not required for the concentration.

#### Combined

There is also a combined option. For this, you may satisfy the five requirements by choosing courses from any of the three tracks.

1. An approved introductory lecture course.
2. Asian Humanities UN1399 Major Texts: Middle East/India – OR: CC1020 African Civilization
3. MDES UN3000 Theory and Culture
4. Five additional courses, fitting one's course of study, to be approved by DUS
5. Language: A minimum of two years of course work in any of the regional MESAAS languages, to be approved by the DUS.

---

## CONCENTRATION IN MIDDLE EASTERN, SOUTH ASIAN, AND AFRICAN STUDIES

The requirements are identical with those for the major, except that there is no departmental language requirement. Fifteen points in department courses, selected with the approval of the director of undergraduate studies. These may not include elementary or intermediate language courses. Not more than two courses out of the general 15 points may be devoted to language study.

## LECTURES AND SEMINARS

### **MDES UN1001 CRITICAL THEORY: A GLOBAL PERSPECTIVE. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The purpose of this foundational course is to introduce Columbia undergraduate students, in the context of their Global Core curriculum, to the seminal field of critical theory. The historical domain of this course is within the last century and its geographical spectrum is global. European critical thinkers are included in this course but not privileged. Thinkers from Asia, Africa, Europe, North, South, and Latin America, are examined here in chronological order and in equal democratic footing with each other. This course as a result is decidedly cross-cultural, one step forward towards de-alienating critical thinkers from around the globe and the issues they address without pigeonholing them as something “other” or “different.” The course is designed and offered in the true spirit of the “Global Core.” The purpose of the course is to reach for the common denominator of serious critical thinking about the fate of our humanity and the health of our social relations in an increasingly fragile world—where the false binaries

of “the West” and “the Rest” no longer hold. The roster of critical thinkers we will examine is by no means exhaustive but representative. Any number of other critical thinkers can be added to this roster but none of those we will examine can be excluded from them. The course is divided into thirteen successive weeks and for each week a number of seminal, original, and groundbreaking texts are identified. Each week we will examine selected passages from these texts. The course is designed as a lecture course, and my lectures are based on the totality of these texts but students will be assigned specific shorter passages to read

**MDES UN1030 “Game of Thrones”: On Epics and Empires. 4.00 points.**

This undergraduate course offered in the context of the Global Core component of the Core Curriculum is an examination of the globally popular HBO series “Game of Thrones” as a prototype for a comparative understanding of the larger question of epics and empires. In this course we expand the domains of our interests and inquiries far wider and divide our syllabus into four parts: (1) Westeros: The Mythic Empire; (2) Persia: The First Empire, (3) America: The Last Empire; and (4) On Epics and Empires. Our objective will be to examine the main themes and overall arch of “Game of Thrones” into wider mythic, heroic, and transhistorical dimensions of our contemporary history

**AHUM UN1399 COLLOQUIUM ON MAJOR TEXTS: MIDDLE EAST/INDIA. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This seminar is an exploration of some “great books” from the Middle East and South Asia. We will read books, plays, stories, and poems in English translation that were originally written in Arabic, Persian, Bangla, Sanskrit. From the Thousand and One Nights to an Arabic epic about a warrior princess to the Bhagavad Gita, we will examine themes of storytelling, gender, politics, and the nature of divinity. With the exception of one Sudanese novel, we will be focusing on texts from the premodern period, and our focus will be on how to interpret texts, develop arguments about those texts, and learning about cultures of reading and writing in the past

**ASCM UN2003 INTRO TO ISLAMIC CIVILIZATION. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Lecture and recitation. Islamic civilization and its characteristic intellectual, political, social, and cultural traditions up through 1800. Note: Students must register for a discussion section, ASCM UN2113

**MDES UN2004 Conflicts: Race, Region, Religion. 4.00 points.**

Prior to “conflict resolution,” there is conflict. But what is conflict and how do we understand it? This introductory lecture course proposes to explore established objects in their presumed ties to the fact and concept of “conflict.” We will inquire into the nature of conflict as well as into the kinds of conflicts that operate, or seem to operate, perhaps even to structure, the understanding of race, of region, and of religion. We will attend to the solidity and fragility of geographic divisions (regional and trans regional conflicts), their history (modern / premodern, colonial / pre- and post-colonial), the emergence of race (racial and ethnic conflicts), the pertinence of religions (religious strife and violence), their relation to political associations (religion and politics, religion and nationalism) and to other social and/or economic divisions (class, gender). We will interrogate the analytic and descriptive value of keywords like war, enmity, dispute, division, partition. We will also reflect on disciplinary tensions and divisions toward an understanding and perpetuation of conflict. Finally, we will think about the possibility and impossibility of “speaking with the enemy.”

**ASCM UN2008 CONTEMP ISLAMIC CIVILIZATION. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Lecture and recitation. No previous study of Islam is required. The early modern, colonial, and post-colonial Islamic world studied through historical case studies, translated texts, and recent anthropological research. Topics include Sufism and society, political ideologies, colonialism, religious transformations, poetry, literature, gender, and sexuality

**MDES UN2012 Finding Happiness: Readings in Arab-Islamic Texts. 4.00 points.**

The quest for happiness predates writing itself. In this course, we read together some of the monumental and foundational texts that questioned, interrogated, but also defined and

redefined happiness from the premodern Arab-Islamic tradition. Is happiness an absence of something or the presence of something? Is it found or actively pursued? Is one happy being alone or in a society? Are friends necessary to our happiness? Is the perfection of the self, morals, and character happiness? Emphasis lies on the exploration of the themes of the assigned works through close reading and discussion. The course will pay additional attention to the contextualization of the texts. Emphasis lies on the active study of the assigned works through close reading, discussion, and creative assignments

**MDES UN2042 South Asia at the Crossroads of Empires. 3.00 points.**

In this course we will study the late colonial and early post-colonial periods of South Asian history together. Some of the events we will cover include: the climax of anti-colonial movements in South Asia, WWII as it developed in South and Southeast Asia, the partition of British India, the two Indo-Pakistan wars, and the 1971 Bangladesh War. While we will read selected secondary literature, we will focus on a range of primary sources, including original radio broadcasts and oral history interviews. We will also study artistic interpretations of historical developments, including short stories and films. In this course, we will strive to remain attentive to the important changes engendered by colonialism, while simultaneously recognizing the agency of South Asians in formulating their own modernities during this critical period. We will also seek to develop a narrative of modern South Asian history, which is attentive to parallel and/or connected events in other regions

**MDES UN1003 Premodern Islamic Worlds. 4.00 points.**

This course introduces the Islamic world from the lifetime of the Prophet Muhammad (d. 632) to 1500 CE. The Islamic world stretches across a remarkable geographical expanse from modern Spain and Senegal in the west to the north of modern India in the east. Telling one cohesive story out of many histories is therefore challenging, even if we had a full lifetime to devote to it. We cannot include everything and, as with every complicated story worth knowing, what we choose to exclude is important. This semester, we bypass some of the traditional narratives of political and military history, which privilege the rise and fall of dynasties, the rule of great men, and the clashes of armies. We will still organize along political lines, but the focus of our conversations will be the incredible diversity of the various communities in the Islamic world. We approach these histories through primary sources— poems, coins, buildings, etc.—that we will read together in every class meeting. Our goal will be to situate each source in the political, cultural, and religious contexts of its production. This approach will allow us to appreciate premodern Islamic worlds through the centuries. Through the assignments and conversations in class and section, students will Explore the diversity of premodern

Islam; Analyze primary sources produced in the Islamic world before 1500, both individually and as a class; Engage with modern scholarship about Islam in India and Central Asia; the Middle East; North, West, and East Africa; and Southern Europe; Construct a source-based argument about the Islamic world before 1500

**MDES UN2641 CINEMAS OF INDIA. 3.00 points.**

This course offers an expansive journey through the forms, pleasures, and meanings of Indian cinema. It explores the plural beginnings of popular film; the many competing cinemas produced across India; the diverse protagonists (from vamps to vigilantes) that populate the imagined entity named 'national cinema'; and the varied audiences addressed by these cinemas. Over the course of the semester, we will watch 15 of the most iconic narrative films produced in India, including Diamond Queen (1940), Awara (1951), Deewar (1975), Roja (1992), Mahanagar (1963), and Bandit Queen (1994). As we voyage with the dynamic, shifting codes and priorities of India's fiction filmmaking, we also shadow the emergence of the Indian nation and contestations of its coherence

**MDES UN2650 GANDHI # HIS INTERLOCUTORS. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Gandhi is in two senses an extraordinary figure: he was the most important leader of anti-imperialist movements in the twentieth century; yet, his ideas about modernity, the state, the industrial economy, technology, humanity's place in nature, the presence of God - were all highly idiosyncratic, sometimes at odds with the main trends of modern civilization. How did a man with such views come to have such an immense effect on history? In some ways, Gandhi is an excellent entry into the complex history of modern India - its contradictions, achievements, failures, possibilities. This course will be primarily a course on social theory, focusing on texts and discursive exchanges between various perceptions of modernity in India. It will have two parts: the first part will be based on reading Gandhi's own writings; the second, on the writings of his main interlocutors. It is hoped that through these exchanges students will get a vivid picture of the intellectual ferment in modern India, and the main lines of social and political thought that define its intellectual culture. The study in this course can be followed up by taking related courses in Indian political thought, or Indian politics or modern history. This course may not be taken as Pass/D/Fail

Spring 2025: MDES UN2650

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**HSME UN2915 AFRICA BEFORE COLONIALISM. 3.00 points.**

This course is an interdisciplinary exploration of the precolonial history of the African continent. It investigates in-depth the political, social, cultural and economic developments of different Africa communities, covering various regions and periods, from prehistory to the formation of the Indian Ocean and Atlantic worlds. Its focus is the intersection of politics, economics, culture and society. Using world history and Africa's location in the production of history as key analytical frames, it pays special attention to social, political and cultural changes that shaped the various individual and collective experiences of African peoples and states and the historical discourses associated to them

Fall 2024: HSME UN2915

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MDES UN3000 THEORY AND CULTURE. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Required of all majors. Introduces theories of culture particularly related to the Middle East, South Asia, and Africa. Theoretical debates on the nature and function of culture as a symbolic reading of human collectivities. Examines critical cultural studies of the Middle East, South Asia, and Africa. Enables students to articulate their emerging knowledge of Middle East, South Asian, and African cultures in a theoretically informed language

**MDES UN3042 PALESTINIAN-ISRAELI POLIT/SOC. 4.00 points.**

The History of the Jewish Enlightenment (Haskala) in 19th century Europe and the development of Zionism through the current peace process between the state of Israel and the Arab states and the Palestinian national movement. Provides a historical overview of the Zionist-Palestinian conflict to familiarize undergraduates with the background of the current situation. No P/D/F or R credit is allowed for this class

Spring 2025: MDES UN3042

**MDES UN3048 Pandemics: A Global History. 3.00 points.**

With an interdisciplinary perspective, this course seeks to expand the understanding of past pandemic crises and recent, lived pandemics such as COVID-19. COVID-19 has brought up urgent questions about how we can understand and historicize pandemics and trace the changing relationship between disease and its vectors, humans and their environments. This course seeks to expand the understanding of past and recent pandemics through a historical lens that traces the deep seated racial and class disparities, social and cultural stigma, and political

responses and control that they were expressed and deployed during these historical crises. It seeks to understand and analyze pandemics as representing complex, disruptive and devastating crises that effect profound transformations in ideas, social and economic relations and challenge interdependent networks and cultures. Pandemics are balanced in a global-local flux between dramaturgic, proliferating, contagious outbreaks; and endemic, chronic infections that have prolonged periods of latency before again reemerging through new transmissions. They also serve as a crucial lens to analyze a range of historical connections, ensions and movements ranging from colonialism and the politics of borders, global capitalism and labor, migration and mobility, decolonization and development, and neoliberalism and global health politics

**MDES UN3121 Literature and Cultures of Struggle in South Africa. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Generations of resistance have shaped contemporary life in South Africa -- in struggles against colonialism, segregation, the legislated racism known as apartheid, and the entrenched inequalities of the post-apartheid era. Two constants in this history of struggle have been youth as a vanguard of liberation movements and culture as a "weapon of struggle." As new generation of South African youth -- the "born frees" -- has now taken to the streets and social media to "decolonize" the university and claim their education as a meaningful right, this course traces the ways that generations of writers, artists, and activists have faced censorship, exile, and repression in an ongoing struggle to dismantle apartheid and to free the mind, "the most powerful weapon in the hands of the oppressor" according to Black Consciousness activist Steve Biko. This course traces the profoundly important roles that literature and other cultural production (music, photography, film, comics, Twitter hashtags like #rhodesmustfall and #feesmustfall) have played in struggle against apartheid and its lingering afterlife. Although many of our texts were originally written in English, we will also discuss the historical forces, including nineteenth-century Christian missions and Bantu Education, as well as South Africa's post-1994 commitment to being a multilingual democracy, that have shaped the linguistic texture of South African cultural life.

**CLME UN3221 ARABIC LITERATURE AS WORLD LITERATURE. 4.00 points.**

This seminar focuses on Arabic literature in the world, as World Literature. The focus will be on pre-modern and modern Arabic literary works that traveled and circulated and were adapted to and acquired individual meanings in different cultures. We will look at literary works that achieved 'worldliness' through either writing back to the center or through international literary prizes. We will consider how literary works travel and circulate through their fusion with regional concepts, or even take on new meanings at different times and places. Admittedly, also, we will look into the

strengths, weaknesses, and criticism surrounding World Literature

**MDES UN3260 RETHINKING MIDDLE EAST POLITICS. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines a set of questions that have shaped the study of the politics of the modern Middle East. It looks at the main ways those questions have been answered, exploring debates both in Western academic scholarship and among scholars and intellectuals in the region itself. For each question, the course offers new ways of thinking about the issue or ways of framing it in different terms. The topics covered in the course include: the kinds of modern state that emerged in the Middle East and the ways its forms of power and authority were shaped; the birth of economic development as a way of describing the function and measuring the success of the state, and the changing metrics of this success; the influence of oil on the politics of the region; the nature and role of Islamic political movements; the transformation of the countryside and the city and the role of rural populations and of urban protest in modern politics; and the politics of armed force and political violence in the region, and the ways in which this has been understood. The focus of the course will be on the politics of the twentieth century, but many topics will be traced back into developments that occurred in earlier periods, and several will be explored up to the present. The course is divided into four parts, each ending with a paper or exam in which participants are asked to analyze the material covered. Each part of the course has a geographical focus on a country or group of countries and a thematic focus on a particular set of questions of historical and political analysis

**MDES UN3331 URBAN SPACE # CONFLICT IN MIDDLE EAST. 3.00 points.**

This course explores how civil war, revolution, militarization, mass violence, refugee crises, and terrorism impact urban spaces, and how city dwellers engage in urban resilience, negotiate and attempt to reclaim their right to the city. Through case studies of Beirut (1975-present), Baghdad (2003-present), Cairo (2011-present), Diyarbakir (1914-present), Aleppo (1914-present), and Jerusalem (1914-present), this course traces how urban life adjusted to destruction (and post-conflict reconstruction), violence, and anarchy; how neighborhoods were reshaped; and how local ethnic, religious, and political dynamics played out in these cities and metropolises. Relying on multi-disciplinary and post-disciplinary scholarship, and employing a wealth of audiovisual material, literary works, and interviews conducted by the instructor, the course scrutinizes how conflicts have impacted urban life in the Middle East, and

how civilians react to, confront, and resist militarization in urban spaces

Spring 2025: MDES UN3331

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 3331	001/11474	M 4:10pm - 6:00pm 332 Uris Hall	Khatchig Mouradian	3.00	46/52

**MDES UN3421 Islamic Central Asia. 3 points.**

Explores the cultural landscapes of Islamic Central Asia up to the 18th c. Russian conquests, introducing the wide and changing array of meanings that both Islam and Central Asia could take on in this context. Against the association of Central Asia with a periphery, this course restores the centrality of Central Asia to the spheres of exchange that held together a broader Islamic imaginary, including Persian literatures, Sufism, political thought, and the visual arts. Focuses on the empires of the Ghaznavids (977-1186), Mongols (1206-1370), Timurids (1370-1507), and early Mughals. Readings are English translations of primary sources, and modern scholarship to contextualize and theorize these sources. Central questions include: how these texts reflect and shape community, how they mark and make sense of difference, the ways in which they understand and relate to their past(s), and the values that they hold to be most central. No prerequisites.

**MDES UN3445 SOCIETIES/CULTRS: INDIAN OCEAN. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces the Indian Ocean as a region linking the Middle East, East Africa, South and Southeast Asia. With a focus on both continuities and rupture from the medieval to the modern period, we study select cultures and societies brought into contact through interregional migration and travel from the 10th to 20th centuries. Different types of people - nobles, merchants, soldiers, statesmen, sailors, scholars, slaves - experienced mobility in different ways. How did different groups of people represent such mobilities? What kinds of political, economic, and social cooperation, accommodation or conflict did different Indian Ocean encounters engender? We read some of the newest humanities and social science scholarship, as well as primary sources ranging from manuscript illustrations, sailor's stories, merchant letters, travelogues, pilgrimage accounts, colonial documents, memoirs, and diplomatic accounts

**MDES UN3644 Visual Cultures of Modern South Asia. 3 points.**

This lecture course introduces students to the power and meaning of popular visual cultures of South Asia. Visual culture is a crucial arena for the enactment of social transformations and the creation of collective imaginaries. We will track such varied modern media types as calendar art, photography, film, architecture, clothing, and religious festivals, loosely following key chronological signposts in the shared histories of the subcontinent. Together, we will practice a new way of understanding history and society – a visual way

that will make us aware of the diversity of hopes, fears, and dreams that comprise South Asia. Designed for students with a basic understanding of South Asian history, the course aims to familiarize you with key methodological approaches in visual culture studies and current debates in South Asian art history and media theory.

**MDES UN3915 A HISTORY OF AFRICAN CITIES. 3.00 points.**

This seminar offers an interdisciplinary approach to the study of the history of African cities. It cuts across disciplinary boundaries of history, geography, anthropology, political and cultural sociology, literature and cultural studies, to explore the various trajectories of urbanization on the continent.

**Spring 2025: MDES UN3915**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MDES UN3920 CONTEMP CULTURE IN ARAB WORLD. 3.00 points.**

Prerequisites: the instructor's permission.

This seminar, designed for seniors, aims to acquaint students with the notion and theoretical understanding of culture and to introduce them to a critical method by which they can study and appreciate contemporary culture in the Arab World. The seminar will survey examples of written and cinematic culture (fiction and autobiography), as well as music, dance, and literary criticism in the contemporary Arab world. Students will be reading novels, autobiographies and literary criticism, as well as watch films and listen to music as part of the syllabus. All material will be in translation. Films will be subtitled. Songs will be in Arabic

**Fall 2024: MDES UN3920**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CLME UN3928 ARABIC PRISON WRITING. 3.00 points.**  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies the genealogy of the prison in Arab culture as manifested in memoirs, narratives, and poems. These cut across a vast temporal and spatial swathe, covering selections from the Quran, Sufi narratives from al-Hallaj oeuvre, poetry by prisoners of war: classical, medieval, and modern. It also studies modern narratives by women prisoners and political prisoners, and narratives that engage with these issues. Arabic prison writing is studied against other genealogies of this prism, especially in the West, to map out the birth of prison, its institutionalization, mechanism, and role. All readings for the course are in English translations

**Fall 2024: CLME UN3928**

CLME 3928	001/11052	T 2:10pm - 4:00pm 208 Knox Hall	Muhsin Al-Musawi	3.00	29/25

**MDES UN3960 HONORS THESIS SEMINAR PART 1. 1.00 point.**

Prerequisites: minimum GPA of 3.5 in MESAAS courses. The MESAAS honors seminar offers students the opportunity to undertake a sustained research project under close faculty supervision. The DUS advises on general issues of project design, format, approach, general research methodologies, and timetable. In addition, students work with an individual advisor who has expertise in the area of the thesis and can advise on the specifics of method and content. The thesis will be jointly evaluated by the adviser, the DUS, and the honors thesis TA. The DUS will lead students through a variety of exercises that are directly geared to facilitating the thesis. Students build their research, interpretive, and writing skills; discuss methodological approaches; write an annotated bibliography; learn to give constructive feedback to peers and respond to feedback effectively. The final product is a polished research paper in the range of 40-60 pages. Please note: This is a one-year course that begins in the fall semester (1 point) and continues through the spring semester (3 points). Only students who have completed both semesters will receive the full 4 points of credit

**Fall 2024: MDES UN3960**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 3960	001/14772	M 12:10pm - 2:00pm 403 Knox Hall	Hamid Dabashi	1.00	9/15

**MDES UN3961 Honors Thesis Seminar Part 2. 3.00 points.**

The MESAAS honors seminar offers the opportunity to undertake a sustained research project working closely with an individual faculty adviser. It also enables you, as part of a small group of MESAAS students working with the seminar instructor, to develop the skills of academic research and writing and learn how to collaborate with peers and create an engaged intellectual community. This 3-point seminar continues the work begun in the Fall semester of the senior year in MDES 3960 Honors Thesis Seminar Part 1

**Spring 2025: MDES UN3961**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 3961	001/11252	M 12:10pm - 2:00pm 403 Knox Hall	Hamid Dabashi	3.00	8/20

**MDES GU4049 Climate and Empire. 4.00 points.**

Climate change destabilizes the ontic certainty of this world, time, and history. This course in MESAAS will introduce students to the literature on climate change and its relationship to ontology, religion, violence, politics, and gender. We will explore the resilience and limitations of various theoretical approaches as they relate to empirical cases. Students will become familiarized with important arguments that have been advanced to explain climate change in its more recent incarnations in the Middle East and Asia. How have different trajectories of understanding climate change led to different kinds of political cultures and governing institutions? Have some qualities of the “environment” or “climate” remained the same throughout history and across the globe? What is the role of colonialism in modern understandings of climate change? The core of this course will seek to develop a mode of conceptualizing the present by rendering relevant geological time in addition to historical time, earth’s history in addition to world’s history. The course begins with the question of how the “climate” has been historically and ethnographically conceptualized in various intellectual trajectories of human sciences. We consider how religion is connected to environmental change, how the “human” and “non human” are conceptualized in various ontologies, and how religious norms and ethics enact environmental practices. We interrogate the everyday sociality of climate adaption and how climate conflict informs social, political, and environmental citizenship. The course concludes by contemplating the creative ways of being in this new world. We study the innovative forms of cosmopolitan neo-humanism (post- humanism) that emerge from the specter of environmental change

**Fall 2024: MDES GU4049**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MDES GU4122 THE NOVEL IN AFRICA. 4.00 points.**

The main task of this course will be to read novels by African writers. But the novel in Africa also involves connections between the literary genre of the novel and the historical processes of colonialism, decolonization, and globalization in Africa. One important question we'll consider is how African novels depict those historical experiences in their themes and plots—we'll read novels that are about colonialism, etc. A more complex question is how these historical processes relate to the emergence of the novel as an important genre for African writers. Edward Said went so far as to say that without imperialism, there would be no European novel as we know it. How can we understand the novel in Africa (whether

read or written) as a product of the colonial encounter? How did it shape the process of decolonization? What contribution to history, whether literary or political, does the novel in Africa make? We'll undertake a historical survey of African novels from the 1930s to the present, with attention to various subgenres (village novel, war novel, urbanization novel, novel of postcolonial disillusion, Bildungsroman). We'll attend to how African novelists blend literate and oral storytelling traditions, how they address their work to local and global audiences, and how they use scenes of characters reading novels (whether African or European) in order to position their writing within national, continental, and world literary space

**MDES GU4151 DEBATES ON CAPITALISM. 4.00 points.**

Within the literature on the history of capitalism there is a lively debate that seeks to explain the world-historical transition from feudal and tributary modes of production to the capitalist mode of production. Substantial issues raised in this debate include the question of whether capitalism can be characterized as a mode of production dominated by the exploitation of free labour; the role of international trade in the origin and development of capitalism; and the role of agriculture in promoting a transition to capitalism. Through the publication of two key texts in the late 1970s Robert Brenner's proposition that capitalism had its origins in English agriculture came to dominate the transition debate. More recently, however, there have been a number of publications that seek to challenge the Anglo-centric and Eurocentric tendencies of the entire transition debate. This course begins with the Brenner debates and then takes up revisions, critiques and challenges to that debate. Ultimately, the aim of the course is to more clearly understand the place of non-European politics and peoples in the history and development of capitalism

**HSME GU4154 PAN AFRICANISM. 4.00 points.**

“Pan Africanist” ideologies were very diverse from Garveyism, Negritude to the various African America, Caribbean and African discourses of “neo-pharaohism” and “Ethiopianism.” This seminar explores how Black leaders, intellectuals, and artists chose to imagine Black (Africans and people of African descent) as a global community from the late 19th century to the present. It examines their attempts to chart a course of race, modernity, and emancipation in unstable and changing geographies of empire, nation, and state. Particular attention will be given to manifestations identified as their common history and destiny and how such a distinctive historical experience has created a unique body of reflections on and cultural productions about modernity, religion, class, gender, and sexuality, in a context of domination and oppression

**MDES GU4160 Major Debates in the Study of Africa. 4 points.**

This course will focus on key debates that have shaped the study of Africa in the post-colonial African academy.

We will cover six key debates: Historiography; Slavery: Premodern and Modern; State Formation; Colonialism and Difference; Nationalism; Political Identity and Political Violence

The approach will be multi-disciplinary. To the extent possible, readings will be illustrative of different sides in the debate.

**CLME GU4221 Literary Encounters and Reading across the Wor(l)ds. 4.00 points.**

The focus of this seminar will be exploring the conception of encounters, and contact zones, throughout a selection of Arabic literary works. The course will explore the history of translation in Arabic literary history, the introduction of prose and its development; the Arabic readerly culture; the colonial encounter and its effect on language and form of literature. We will not read encounter as one-way traffic only, but we will also read it as a two-way process. We will read non-Arabic works that were influenced by the texts we are reading and their literary reception in other literary traditions. We will also consider the institution of literary prizes as a form of encounter and analyze the power of celebrity culture on the readership of the contemporary Arabic novel

**CLME GU4231 COLD WAR ARAB CULTURE. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies the effects and strategies of the cold war on Arab writing, education, arts and translation, and the counter movement in Arab culture to have its own identities. As the cold war functioned and still functions on a global scale, thematic and methodological comparisons are drawn with Latin America, India and Africa

**CLME GU4241 SUFISM: PRIMARY TEXTS/ CONTEXTS. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies Sufism as it has emerged, developed, and assumed its presence in Sufi autobiographies and religious and literary writings. The Sufi Path is traced in these writings that include poems like ibn al-Farid's Poem of the Way. Sufi States and Stations are analyzed to understand this Path that reaches its culmination in an ecstatic sense of Oneness. Sufism is also a social and political phenomenon that unsettles formal theologies and involves Sufis in controversies that often end with their imprisonment and death

**MDES GU4259 War Narrative: The Arab World. 4 points.**  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course works along a number of axial structures that aim to let texts voice their informing theoretical, political, and poetic strategies. It draws on war narratives in other parts of the world, especially Vietnam, insofar as these find their way into Arabic writing. A poetics of prose gives these narratives the power of literary production that makes them more readable, appealing, and provocative than ordinary journalistic reporting.

Through close readings of a number of Arabic war novels and some long narrative poems, this course proposes to address war in its varieties not only as liberation movements in Algeria and Palestine, but also as an engagement with invasions, as in Iraqi narratives of war, or as conflict as was the case between Iran and Iraq, 1980-1988, as proxy wars in other parts of the region, or 'civil' wars generated and perpetuated by big powers. Although writers are no longer the leaders of thought as in the first half of the 20th century, they resume different roles of exposition, documentation, reinstatement of identities, and geographical and topographical orientation. Narrators and protagonists are not spectators but implicated individuals whose voices give vent to dreams, desires, intimations, and expectations. They are not utterly passive, however. Behind bewilderment and turbulence, there is a will to expose atrocity and brutality. Writing is an effort to regain humanity in an inhuman situation.

The course is planned under thematic and theoretical divisions: **one** that takes writing as a deliberate exposure of the censored and repressed; **another** as a counter shock and awe strategy [implemented under this name in the wars on Iraq] whereby brutalities are laid bare; and a **third** that claims reporting in order to explore its limits and complicity. On the geographical level, it takes Algeria, Palestine as locations for liberation movements; Iraq as a site of death; Egypt as the space for statist duplicity and camouflage; and Lebanon as an initial stage for a deliberate exercise in a seemingly civil war.

**A number of films will be shown as part of students' presentations.**

Spring 2025: MDES GU4259

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CLME GU4262 THEMES IN THE ARABIC NOVEL. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The focus of this seminar will be novels by Arab writers. The course will explore the history of the Arabic novel: its rise, development, and evolution. We will read and analyze novels

belonging to various periods in Arab history and representing diverse points of views, including gender, identities, and different sub-cultures and sub-genres. We will look into the connections therein between the novel and the historical backdrops of colonialism, decolonization, globalization, war, rights and personal independence from several perspectives and writers across the Arab world. We will also consider the modern Arabic novel's engagement with the global, glocal, and local as well as its nod to the Arabic literary tradition; its engagement with technology, scientific progress, absurdity, loss, trauma, the human condition, as well as dystopic themes. No knowledge of Arabic is required

**MDES GU4265 Sufism, Sharia, and Politics. 4.00 points.**

This seminar is geared toward advanced undergraduate students. Arguably, Sufism and Sharia constituted the two central domains of premodern Islamic cultures. A central domain is recognized as one that defines other domains. If a domain becomes central, "then the problems of other domains are solved in terms of the central domain—they are considered secondary problems, whose solution follows as a matter of course only if the problems of the central domain are solved" (C. Schmitt). Within this understanding, the seminar aims to introduce the fundamental concepts and (briefly) histories of both Sufism and Sharia, with a focus on how the former overlapped with and was often integral to the latter; how Sufism produced traditions and institutions; and the role it played in the political landscapes of Islam. By necessity, then, the seminar moves from a coverage of Sufi thought and praxis, to community and institution building, to political activism (or inactivism, which is seen here as a move toward the political or ethical). The coverage, deliberately tilted toward Sufism, aims to be historical and considerably chronological, moving from the earliest Islamic period to late modernity, including the migration of Sufi entities to the West. In keeping with the claim of Sufism as a central domain, we will examine how this phenomenon, together with the Sharia, rendered the other domains subsidiary to their imperatives. The subordinate idea here is also to try to map out the strongly symbiotic relationship of the two domains, and isolate for analysis contestations and antagonisms. Although the sources – especially the Orientalist – are underdeveloped theoretically, class discussions will call upon the help of various relevant theories in philosophy, intellectual history, politics, and anthropology

**MDES GU4266 Decolonizing the Arabian Nights. 4.00 points.**

In a unique revival of interest, the Arabian Nights has made its way to the academy as the handiest and most approachable cultural commodity. Courses are given on its history, translation, media reproduction, Walt Disney's appropriation, and, occasionally, narratology. By the end of the 19th century, it was available in translation or abridgement in every written language. This course resituates its advent and vogue in specific cultural contexts that closely relate to the rise of the bourgeoisie and the colonial enterprise. It also explores popular and intellectual or critical responses in terms of the rise of literary theory and modes of literary production. Its massive presence

gives way in time to pantomime, parody, and pastiche, before engaging again the attention of prominent writers and theorists of 'prose poetics' and the fantastic. Its referential popular presence undergoes fluctuations to fit media stereotypes and hegemonic regimes of thought. This course attempts to dislodge originals from adaptations, highlight the nature of entry in terms of a commoditizing enterprise that reproduces the Arabian Nights as a 'western text', a point that in turn incites a counter search for manuscripts, and 'authentication' processes. Originals and translations will be compared and cinematic or theater productions will be studied, along with paintings, covers, and tourist guides that present the Nights as a commodity in a post-industrial society

**MDES GU4349 Concentration Camps from Cuba to East Asia. 3 points.**

Forcibly moving civilians to designated areas as a wartime measure has constituted a widely practiced military strategy for centuries. In the late 19th and early 20th centuries, colonial powers increasingly provided more structure and organization to these policies of relocation and internment in the Americas, Africa, and East Asia. This course provides a social history of civilian internment and mass murder from late-19th century colonial cases to World War II.

Through case studies of the Spanish-Cuban war, the South African War, the Philippines-American War, the genocide of the Herero and Nama in Southwest Africa, the Armenian Genocide, and the Holocaust, the course traces the evolution of the concentration camp from a counter-insurgency strategy in wartime to a weapon of mass murder. The course also examines the internment of Japanese Americans, and the Japanese "comfort stations" in comparative perspective.

**MDES GU4357 WAR, GENOCIDE, & AFTERMATH: A COMP PERSPECTIV. 4.00 points.**

This 4000-level course examines how societies grapple with the legacy of mass violence, through an exploration of historical texts, memoirs, textbooks, litigation, and media reports and debates on confronting the past. Focusing on case studies of the Herero Genocide, the Armenian genocide during WWI, and the Holocaust and the Comfort Women during WWII, students investigate the crime and its sequelae, looking at how societies deal with skeletons in their closets (engaging in silence, trivialization, rationalization, and denial to acknowledgment, apology, and repair); surveying responses of survivors and their descendants (with particular attention to intergenerational transmission of trauma, forgiveness, resentment, and the pursuit of redress); and dissecting public debates on modern day issues that harken back to past atrocities

Fall 2024: MDES GU4357

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4357	001/15447	M 4:10pm - 6:00pm 608 Martin Luther King Building	Khatchig Mouradian	4.00	28/35

**MDES GU4399 Literature of the Great War in the Middle East. 3.00 points.**

Some of the best-known literary texts of the previous century harken back to the Great War. And while works of fiction and non-fiction such as Remarque's *All Quiet on the Western Front*, Hemingway's *A Farewell to Arms*, and Woolf's *Mrs Dalloway* have become twentieth-century classics; and the poetry of Brooke, Graves, Gurney, Owen, and Sassoon widely celebrated; the Middle East's contribution to the literature of the Great War is little explored. This course takes us on a literary journey from the trenches of Gallipoli and Mesopotamia, to famine-struck towns of Mount Lebanon, to orphanages in Syria. We will examine poetry (including zajal—colloquial poetry), and memoirs and diaries by the women and men who withstood the ravages of war and helped shape the modern Middle East. Through close reading and content analysis of a diverse constellation of published and unpublished texts, and using secondary sources as guideposts, we will explore "post-Ottoman memoirs" and verse, including translations from the Arabic and Armenian by the instructor

**MDES GU4601 Politics in India. 4 points.**

This course will combine study of long-term historical sociology with more short term understanding of policies and their possible effects. Though its main purpose will be to provide students with an understanding of politics after independence, it will argue, methodologically, that this understanding should be based on a study of historical sociology – plotting long-terms shifts in the structure of social power. The course will start with analyses of the structures of power and ideas about political legitimacy in pre-modern India, and the transformations brought by colonialism into that order. After a brief study of the nature of political order under the colonial state, the courses will focus primarily on the history of the democratic state after independence.

**Spring 2025: MDES GU4601**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4601	001/11361	Th 2:10pm - 4:00pm 606 Martin Luther King Building	Sudipta Kaviraj	4	14/25

**MDES GU4629 Transregional. 4.00 points.**

History, Politics, Literature, Society -- all these are studied as within national, or, at best, regional frames. What other scales and approaches might be appropriate to the study of particular phenomena or categories in the past, as well as some of the challenges of the present? This course introduces advanced undergraduates and graduate students to transregional studies. We explore topics, approaches, methods, problems, and disciplines through which we can cross the regions, particularly the regions of MESAAS. Case studies will consider thinking through and with oceanic studies, circulation, diaspora, shared hermeneutical traditions, lingua francas and their stories (world literatures?), and connected histories to rethink concepts of societies, collective affiliations, cosmopolitanism, and world history. Undergraduates must have taken at least one of the

following: Intro to Islamic Civ (UN 2003), Intro to Indian Civ (UN 2357), African Before Colonialism (UN 2915), Societies and Cultures across the Indian Ocean (UN 3445), or some equivalent (check with me)

**Fall 2024: MDES GU4629**

**MDES GU4637 Cinema and Colonialism in South Asia. 4 points.**

What is the relation between cinema and colonialism? This seminar approaches cinema as a dynamic historical agent that aided, negotiated, refracted, and contested the mechanisms and meanings of colonialism in South Asia. We will study cinema as technology, as industry, and as cultural form, paying attention to questions of film finance, on-screen representation, production infrastructures, circuits of distribution, and sites of exhibition. We will watch films made by British ethnographers, Indian expats, Hollywood orientalist, and South Asian nationalists to

study how film served as a key weapon of imperial propaganda as well as anticolonial resistance. From orientalist films that constructed the colony as exotic and dangerous, to the spatial uses of Indian films to reinforce race inequalities in the diaspora (eg. East Africa), cinema is deeply imbricated with colonial strategies of racial, gendered, and caste-based othering. This is a history of cinema as a history of empire; where cinema is not just a text to be read but a cultural, industrial, and social network of power relations.

**Spring 2025: MDES GU4637**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4637	001/11405	W 4:10pm - 6:00pm 207 Knox Hall	Debashree Mukherjee	4	19/20

**MDES GU4721 Epics and Empires: Shahnameh. 4 points.**

The purpose of this course is an examination of the genre of epic and its narrative connection to empire-building. The primary text that will be used in this critical examination is the Persian epic poem *Shahnameh*, composed by Abolqasem Ferdowsi circa 1000 CE.

**MDES GU4718 Persian Poetry (In Translation). 4 points.**

The purpose of this seminar is to introduce students to the long history and multiple genres of Persian poetry. The seminar will begin with the classical period and come down to the contemporary periods. The geographical span of the course extends from Central Asia to the Indian subcontinent to Iran.

**MDES GU4726 READINGS IN PERSIAN TEXTS. 4.00 points.**

May be repeated for credit; content varies.

Prerequisites: Must have completed *MDES 1713*, equivalent two years of Persian or the instructor's permission.

May be repeated for credit; content varies. Prerequisites: Must have completed *MDES 2702*, equivalent two years of Persian or the instructor's permission. This course provides experience reading and analyzing Persian language texts, as well as translating them into English. We will also spend some time learning how to read different kinds of paleography, and about various manuscript and print conventions and practices. Supplementary scholarly readings in English will situate the Persian texts. There will be a translation workshop at the end of the semester with related texts of the students choosing, in preparation for a final translation project. No P/D/F or R credit is allowed for this class

**MDES GU4733 IRAN:FILM,FICT,POETRY,HIS. 4 points.**

**MDES GU4760 SHI'ITES AND SHI'ISM. 4 points.**

This is a seminar devoted to a historical and comparative examination of the rise and spread of Shi'ism from its earliest stages in Islamic history to its contemporary conditions in various nation-states (in India, Iran, Iraq, and Lebanon in particular). In this seminar we will cover a range of issues, extended from historical, doctrinal, intellectual, and spiritual roots of Shi'ism to its contemporary political manifestations. The course is intended as a seminar, and students will be expected to conduct guided research in an aspect of Shi'ism that interests them most. The course will be conducted in a combination of weekly lectures, semester-long research, and seminar conversations. Knowledge of Arabic and Persian is not required for this course but would be highly beneficial in conducting research for the final paper.

**CLME GU4764 Modern and Medieval Islamic Political Thought. 4 points.**

This course is a comparative examination of modern and medieval Islamic political thoughts. The seminar begins with the roots of Islamic political thoughts in the early Islamic history, as well as Qur'anic revelations and Prophetic Hadith traditions. We will then divide the course into two major components: medieval and modern, with the rise of European colonialism in the late 18th century and early 19th century as the principal catalyst of groundbreaking changes in Islamic political thoughts.

## SOUTH ASIAN LANGUAGE COURSES (HINDI, URDU, SANSKRIT, TAMIL)

### MDES UN1601 ELEMENTARY HINDI-URDU I. 5.00

#### points.

An introduction to the most widely spoken language of South Asia. Along with an understanding of the grammar, the course offers practice in listening and speaking. The Hindi (Devanagari) script is used for reading and writing. No P/D/F or R credit is allowed for this class

#### Fall 2024: MDES UN1601

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 1601	001/10263	M T W Th 4:10pm - 5:15pm 610 Martin Luther King Building	Aftab Ahmad	5.00	15/15

### MDES UN1608 HINDI FOR HERITAGE SPEAKERS I.

#### 5.00 points.

This is an accelerated course for students of South Asian origin who already possess a knowledge of basic vocabulary and limited speaking and listening skills in Hindi. They may not have sufficient skills in reading and writing but are able to converse on familiar topics such as: self, family, likes, dislikes and immediate surroundings. This course will focus on developing knowledge of the basic grammar of Hindi and vocabulary enrichment by exposing students to a variety of cultural and social topics related to aspects of daily life; and formal and informal registers. Students will be able to read and discuss simple texts and write about a variety of everyday topics by the end of the semester. No P/D/F or R credit is allowed for this class

### MDES UN2602 INTERMEDIATE HINDI-URDU II. 5.00

#### points.

Prerequisites: *MDES W1610-W1611* or the instructor's permission.

One year of prior coursework in Elementary Hindi-Urdu I# II or the instructor's permission. The course aims to continue consolidating and building upon the existing listening, speaking, reading, writing and cultural skills and will help students acquire higher level proficiency in Hindi language. Students will be introduced to new grammatical structures and a broad range of vocabulary through exposure to a variety of authentic materials including Hindi literature, newspapers, folk

tales, films, songs, and other kinds of written and audio-visual materials and through these materials. Students will expand their knowledge base of the society and culture of the target languages in this course. No P/D/F or R credit is allowed for this class

**Spring 2025: MDES UN2602**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 2602	001/13305	M T W Th 1:10pm - 2:15pm 104 Knox Hall	Rakesh Ranjan	5.00	8/15

**MDES GU4611 Readings In Hindi Literature II. 4 points.**

May be repeated for credit; content varies.

Prerequisites: *MDES W1613* or the instructor's permission.

This course introduces students to the riches of the classical Hindi Tradition. We read Bhakti and Sufi Literature in tandem, with a special interest in Tulsidas and the Indo-Islamic Romance.

Eligibility: The class is open to undergraduate and graduate students with two or more years of Hindi- Urdu (or permission of the instructor).

**MDES GU4624 ADVANCED HINDI I. 5.00 points.**

Advanced Hindi I and II are third year courses in the Hindi-Urdu program that aim to continue building upon the existing four language skills (speaking, listening, reading and writing) along with grammar and vocabulary in a communicative approach. The objective of these courses is to strengthen students' language skills and to go beyond them to understand and describe situations and the speech community, understand and discuss Hindi literature and films, news items, T.V. shows and current events. Students will also be given opportunities to work on their areas of interest such as popular culture, professional and research goals in the target language. Students will be expected to expand their vocabulary, enhance grammatical accuracy and develop cultural appropriateness through an enthusiastic participation in classroom activities and immersing themselves in the speech community outside. This course will be taught in the target language. All kinds of conversations such as daily life, on social/public interests' topics as well as on academic interests, will occur in the target language. No P/D/F or R credit is allowed for this class

**Fall 2024: MDES GU4624**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4624	001/10293	T Th 10:10am - 12:00pm 112 Knox Hall	Rakesh Ranjan	5.00	5/10

**MDES GU4625 ADVANCED HINDI II. 5.00 points.**

Advanced Hindi I and II are third year courses in the Hindi-Urdu program that aim to continue building upon the existing four language skills (speaking, listening, reading and writing) along with grammar and vocabulary in a communicative approach. The objective of these courses is to strengthen students' language skills and to go beyond them to understand

and describe situations and the speech community, understand and discuss Hindi literature and films, news items, T.V. shows and current events. Students will also be given opportunities to work on their areas of interest such as popular culture, professional and research goals in the target language. Students will be expected to expand their vocabulary, enhance grammatical accuracy and develop cultural appropriateness through an enthusiastic participation in classroom activities and immersing themselves in the speech community outside. This course will be taught in the target language. All kinds of conversations such as daily life, on social/public interests' topics as well as on academic interests, will occur in the target language. No P/D/F or R credit is allowed for this class

**MDES GU4635 Readings In Urdu Literature I. 4 points.**

Prerequisites: two years of prior coursework in Hindi-Urdu (*MDES W1612* & *MDES W1613*), one year of Urdu for Heritage Speakers (*MDES W1614* & *MDES W1615*), or the instructor's permission.

This course is a literary course, with in-depth exposure to some of the finest works of classical and modern Urdu prose and poetry. In the fall semester, our focus will be on some of the most famous Urdu short stories while, in the spring semester, we will focus on various genres of Urdu poetry. The content may change each semester. This course is open to both undergraduates and graduates. No P/D/F or R credit is allowed for this class.

**MDES GU4636 READINGS IN URDU LIT. 4.00 points.**

Prerequisites: two years of prior coursework in Hindi-Urdu (*MDES W1612* & *MDES W1613*), one year of Urdu for Heritage Speakers (*MDES W1614* & *MDES W1615*), or the instructor's permission.

Two semesters of prior coursework in Urdu for Heritage Speakers (Urdu for Heritage Speakers I and II) or one semester of Advanced Urdu or the instructor's permission. This course is a literary course, with in-depth exposure to some of the finest works of classical and modern Urdu poetry i.e. genres of ghazal and nazm. This course is open for both undergraduates and graduates. No P/D/F or R credit is allowed for this class

**Spring 2025: MDES GU4636**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4636	001/13296	T Th 6:10pm - 8:00pm 116 Knox Hall	Aftab Ahmad	4.00	10/15

**MDES GU4640 Advanced Urdu. 4.00 points.**

Prerequisites: Two years of prior study in Urdu or one year of Urdu for Heritage Speakers I#II courses at Columbia University, or approval of the professor. This is a one-semester course in advanced Urdu language. It will be taught in the

fall semester. The goal of the course is to develop students' linguistic skills i.e. listening, speaking, reading, writing and cultural skills in Urdu, and give students in-depth exposure to some of the finest works of classical and modern Urdu prose. Special emphasis will be given to developing a high-register vocabulary. Necessary grammar points will also be explained for developing an accurate and nuanced understanding of the Urdu language. After completing this course, students will be able to read and enjoy Urdu classics and critical academic texts related to various disciplines i.e. old tales, short stories, essays, history, satire, criticism, politics, current issues etc. along with effective speaking skills suited to active interaction in the speech community and a more advanced academic discussion for undergraduate and graduate students. Students will develop an in-depth understanding of South Asian society and culture as well. This course will prepare students to take MDES GU4635 Readings in Urdu Literature I

**Fall 2024: MDES GU4640**

**MDES UN1401 ELEMENTARY SANSKRIT I. 4.00 points.**

This course constitutes the first half of a year-long introduction to Classical Sanskrit, the translocal language of religious, intellectual, and literary life in South Asia for nearly two millennia. Assuming no prior experience with the language, this introductory sequence provides students with the grammar, reading strategies, and cultural context necessary to begin accessing the language's many rich textual traditions, including scripture (sruti), epic (itihasa), poetry (kavya), drama (naṭaka), systematic thought (śāstra), and more

**Fall 2024: MDES UN1401**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 1401	001/10987	M T W Th 9:10am - 10:00am 608 Martin Luther King Building	Jay Ramesh	4.00	14/20

**MDES UN2401 Intermediate Sanskrit I. 4 points.**

Fee: Language Resource Center Fee - 15.00

This course constitutes the first half of a year-long reading course designed to give students the tools necessary for advanced study in Classical Sanskrit. Readings in epic (itihasa), poetry (kavya), systematic thought (śāstra), and commentary (vyākhyāna) will introduce students to a variety of important genres and their distinctive conventions. A focus upon the Sanskrit tradition's own categories of analysis—grammatical, commentarial, and prosodic—will enable students to begin to make sense of original Sanskrit texts as generations of the tradition's own readers have. No P/D/F or R credit is allowed for this class.

**Fall 2024: MDES UN2401**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 2401	001/10988	T Th 10:10am - 12:00pm 608 Martin Luther King Building	Jay Ramesh	4	9/20

**MDES GU4810 ADVANCED SANSKRIT I. 4.00 points.**

Prerequisites: Two years of Sanskrit or the instructor's permission.

This course constitutes the first half of a year-long advanced reading course in Classical Sanskrit. In 2021-2022, the focus of Advanced Sanskrit will be the genres of literary theory (ālaṅkāraśāstra) and belles-lettres (kāvyā). Lending equal attention to literary theory and literary practice, this course will introduce students to iconic works of Sanskrit literature along with the interpretive frameworks whereby they were analyzed, relished, and appraised. Literary excerpts may be drawn from an array of subgenres, including courtly epic (mahākāvya), epic drama (nāṭaka), literary prose (gadya), and individual verses (muktaka). Rigorous analysis of primary texts will be supplemented by occasional discussions about what implications the disciplined reading of kāvyā may hold for practices such as translation, comparative literature, and transdisciplinarity. Prerequisites: Intermediate Sanskrit II or instructor's permission

**Fall 2024: MDES GU4810**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 4810	001/14832	M W 2:10pm - 4:00pm 116 Knox Hall	Jonathan Peterson	4.00	5/10

**MDES GU4812 ADVANCED SANSKRIT II. 4.00 points.**

Prerequisites: Two years of Sanskrit or the instructor's permission.

Prerequisites: Two years of Sanskrit or the instructors permission. Prerequisites: Two years of Sanskrit or the instructors permission. The two levels of advanced Sanskrit are given in alternate years. In 2017-2018 court literature (fall) and literary criticism (spring) will be offered; in 2018-2019, philosophy. Close reading of major works, exploring both philological and literary-theoretical aspects of the texts. No P/D/F or R credit is allowed for this class

**MDES UN1101 ELEMENTARY TAMIL I. 4.00 points.**

This course constitutes the first half of a year-long introduction to Tamil, the official language of the Indian state of Tamil Nadu as well as an official language of Sri Lanka and Singapore. In addition to being spoken by almost 80 million people worldwide, Tamil also has an impressive classical past, having served as a language of religious, intellectual, and literary life in South India for nearly two millennia. Assuming no prior experience with the language, this introductory sequence provides students with the grammar, language skills, and cultural context necessary for achieving their individual Tamil language goals, whether they be conducting fieldwork or scholarly research, chatting with relatives back home,

or simply waxing poetic over an artful dosai. In order to cultivate students' reading, writing, speaking, and listening comprehension skills, this course draws upon a wide variety of teaching materials, including the core textbook, oral drills, audio recordings, short films, music videos, memes, and more. No P/D/F or R credit is allowed for this class

**Fall 2024: MDES UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 1101	001/10986	M T W Th 1:10pm - 2:00pm 352b International Affairs Bldg	Jay Ramesh	4.00	17/20

**MDES UN1102 ELEMENTARY TAMIL II. 4.00 points.**

Introduces students to the basic grammatical and syntactical skills required to function adequately in a Tamil-speaking environment. Of particular interest to students planning to conduct scholarly research or fieldwork in that region of the world. Introduces students to the rich culture of the Indian subcontinent where Tamil is spoken. No P/D/F or R credit is allowed for this class

**Spring 2025: MDES UN1102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MDES 1102	001/11321	M T W Th 1:10pm - 2:00pm 352b International Affairs Bldg	Jay Ramesh	4.00	15/20

**MDES UN2101 Intermediate Tamil I. 4 points.**

Prerequisites: *MDES W1101-W1102* or the instructor's permission.

Further develops students' written and oral proficiency in order to allow them to function adequately in a Tamil-speaking environment. Of particular interest to students planning to conduct scholarly research or fieldwork in a Tamil-speaking context. Develops the students' appreciation for the rich culture of the Indian subcontinent where Tamil is spoken. No P/D/F or R credit is allowed for this class.

**MDES UN2102 INTERMEDIATE TAMIL II. 4.00 points.**

Prerequisites: *MDES W1101-W1102* or the instructor's permission.

Prerequisites: *MDES W1101-W1102* or the instructor's permission. Further develops students' written and oral proficiency in order to allow them to function adequately in a Tamil-speaking environment. Of particular interest to students planning to conduct scholarly research or fieldwork in a Tamil-speaking context. Develops the students' appreciation for the rich culture of the Indian subcontinent where Tamil is spoken. No P/D/F or R credit is allowed for this class

**MDES UN3301 Advanced Tamil I. 3 points.**

This course aims at students improving further their language proficiency. It aims at students getting introduced to the long and continuous literary history of Tamil by reading non-contemporary Tamil writings, sometimes the ancient Tamil literary works.

**MDES UN3302 Advanced Tamil II. 3 points.**

This course aims at students improving further their language proficiency. It aims at students getting introduced to the long and continuous literary history of Tamil by reading non-contemporary Tamil writings, sometimes the ancient Tamil literary works.

## AFRICAN LANGUAGE COURSES (PULAAR, SWAHILI, WOLOF) \*FOR ARABIC LANGUAGE COURSES, SEE MIDDLE EASTERN LANGUAGES, ABOVE

**PULA UN1101 Elementary Pulaar I. 4 points.**

This course offers students an introduction to the basic structures of Pulaar, a major language of West Africa. No P/D/F or R credit is allowed for this class.

**PULA UN1102 Elementary Pulaar II. 4 points.**

This course offers students an introduction to the basic structures of Pulaar, a major language of West Africa. No P/D/F or R credit is allowed for this class.

**PULA UN2101 Intermediate Pulaar I. 3 points.**

This course further develops a student's knowledge of Pulaar, a major language of West Africa. No P/D/F or R credit is allowed for this class.

**PULA UN2102 Intermediate Pulaar II. 4 points.**

This course further develops a student's knowledge of Pulaar, a major language of West Africa. No P/D/F or R credit is allowed for this class.

**SWHL UN1101 ELEMENTARY SWAHILI I. 4.00 points.**

Essentials of grammar, basic vocabulary, practice in speaking and reading Swahili the most widely used indigenous language of East Africa. No P/D/F or R credit is allowed for this class

## THE STUDY OF MUSIC

The music Major, Minor in Music and SEAS Music Minor provide aspiring music scholars and/or musicians with a wide range of ways to think about music (theoretical, historical, cultural, compositional and performance-related) and to concentrate on the aspects of music that most interest them

—from popular to world music to computer music. Our faculty engage in cultural studies (i.e. Ethnomusicology) and with current literary theory, connect with faculty of other departments (i.e. English, Philosophy, and Psychology), and are on the cutting edge of technological change. Students who have a passion for music and who have already developed basic skills in areas including performance, music history, composition or ethnography, should consider a major or minor in music.

## MUSIC MAJOR & MINORS

The Department of Music at Columbia University and Barnard College currently offers undergraduate courses and programs of study (Major in Music, Minor in Music and SEAS Music Minor) for the four following schools: Columbia College, Barnard College, General Studies and the School of Engineering and Applied Sciences. Starting in the 2024 - 2025 academic year, the Concentration in Music will begin to be phased out.

## MUSIC PERFORMANCE PROGRAM

The Music Performance Program (MPP) is a division of the Department of Music which supports music making of the highest caliber, by creating learning and performance opportunities for undergraduate students, regardless of their academic major. While we do not offer degrees in music performance, we provide a high-quality offering to student musicians from across Columbia University that includes a wide array of for-credit Classical, Jazz, Pop/Contemporary and World Music ensembles and lessons in addition to the Columbia University Orchestra. The Minor in Music, new in the 2024 - 2025 academic year, offers a Pathway in Performance.

For information on auditions, registration and other aspects of performance not included below, please contact contact Magdalena Stern-Baczewska, Director of the Music Performance Program or visit [mpp.music.columbia.edu](http://mpp.music.columbia.edu)

Students with questions about the Columbia-Juilliard programs should consult Special Programs in this Bulletin or [mpp.music.columbia.edu/content/columbia-juilliard-program](http://mpp.music.columbia.edu/content/columbia-juilliard-program)

### Lessons

Individual instrument lessons listed under Courses of Instruction are 6 hours per semester and are 1 credit courses.

Voice lessons at Barnard College are 12 hours per semester and are 2 credit courses. There is a \$300 lesson fee per semester for each instrumental lesson course (note that Columbia College, General Studies & SEAS students who receive institutional need based grants from Columbia will receive a credit for the music lesson fees as part of their financial aid package) and \$500 per semester for each Barnard voice lesson course. Auditions are only offered in the fall semester and courses are a one year commitment. Lessons are graded as pass/fail only.

## Ensembles

Participation in the following ensembles is open to all members of the University community. Students who wish to receive course credit may register for 1 point per semester for these courses as listed. Ensembles receive letter grades only.

See Music Performance Program [website](#) for audition and activity information about all of the below.

## MasterClass

Performance Seminar MasterClass (MPP UN1601) is open to classical musicians of any instrument(s) with the highest commitment to performance. Students are admitted via live audition during the first week of classes in the Fall. Each week, two students perform repertoire of their choice for the class and receive feedback from everyone present. The discussions, moderated by the director of the Music Performance Program, Dr. Magdalena Stern-Baczewska, are designed to provide constructive criticism to the performers and to pose questions related to performance from the perspectives of musical interpretation, career management, professional collaboration, and pedagogy.

## Practice Rooms

Please see [Practice Rooms and Policies](#) for the most up to date information.

## DEPARTMENTAL HONORS

For departmental honors, see the Director of Undergraduate Studies during the first week of the first semester of senior year. A formal written proposal is required. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## MUSIC THEORY, EAR-TRAINING & LANGUAGE GUIDELINES FOR MUSIC MAJORS AND MINORS

A program of study should be planned with the Director of Undergraduate Studies (DUS) in the first semester of the sophomore year.

### Music Theory & Ear-Training

All music majors and existing concentrators are required to take the Music Theory sequence through Music Theory IV and the Ear-Training sequence through Ear-Training IV. These courses are optional for the new Minor in Music. Placement exams are given prior to your initial enrollment in both the Music Theory sequence and Ear-Training sequence, to determine at what level you will be placed in each. For students who do not place in Music Theory I and/or Ear Training I (or higher) on the placement exam, you must complete these pre-requisite course(s) before you can start the corresponding sequence(s). The pre-reqs do not count towards the points required for the major & concentration:

MUSI UN1002 FUNDAMENTALS OF MUSIC and MUSI UN1312 INTRODUCTORY EAR-TRAINING.

### Language Recommendations

For students who plan to do graduate work in music, studying German, French, Italian and/or Latin is recommended.

## MAJOR IN MUSIC

The major in music requires a minimum of 40 points, including the following courses:

Required to complete up to Music Theory IV; Fundamentals pre-req required if you don't test into Music Theory I or higher:

MUSI UN1002	FUNDAMENTALS OF MUSIC
MUSI UN2318	MUSIC THEORY I
MUSI UN2319	MUSIC THEORY II
MUSI UN3321	MUSIC THEORY III
MUSI UN3322	MUSIC THEORY IV

Required to complete up to Ear-Training IV; Intro Ear-Training pre-req required if you don't test into ET I or higher:

MUSI UN1312	INTRODUCTORY EAR-TRAINING
MUSI UN2314	EAR-TRAINING I
MUSI UN2315	EAR-TRAINING II
MUSI UN3316	EAR-TRAINING III
MUSI UN3317	EAR-TRAINING IV

Required to complete both History courses:

MUSI UN3128	HIST-WEST MUS: MID AGE-BAROQUE
MUSI UN3129	HIST-WEST MUS:CLASSICAL-20TH CENTURY

Required to complete Topics course:

MUSI UN3400	TOPICS IN MUSIC # SOCIETY
-------------	---------------------------

Electives: At least two 3000- or 4000-level electives.

The remaining points are to be earned through 1000-level MPP courses, 2000, 3000 or 4000-level courses subject to these constraints:

1. No more than 6 points of 2000-level courses.
2. No more than 4 points of 1000-level MPP courses (list below):

### Performance Credit/MPP Courses

MPP UN1401	BASSOON INSTRUCTION
MPP UN1403	CELLO INSTRUCTION
MPP UN1405	CLARINET INSTRUCTION
MPP UN1407	CLASSICAL SAXOPHONE INSTRUCTION
MPP UN1409	FLUTE INSTRUCTION

MPP UN1601	Performance Seminar MasterClass

## MINOR IN MUSIC (NEW IN 2024)

The new Minor in Music is organized around pathways of personal interest, designed with the guidance of an advisor in the Department of Music. Any combination of 15 credits from the Music course list will fulfill the minor. Of those 15 credits, up to 6 maximum performance credits, consisting of lessons and/or ensembles, are allowed for any pathway (please note students must audition and be accepted into the Music Performance Program in order to register for lessons and/or ensembles).

Below are recommended pathways that students can use as a guide if they have interest in the areas of Music Studies, Music Production, Jazz, Performance or Composition. The courses listed in these pathways are not required and serve only as suggestions to students with interests in these areas.

All students interested in the Minor in Music should reach out to the Director of Undergraduate Studies, who will refer you to an advisor.

### Pathway: Music Studies

Required to complete one Theory course (determined by placement test):

MUSI UN1002 FUNDAMENTALS OF MUSIC

MUSI UN2318 MUSIC THEORY I

MUSI UN2319 MUSIC THEORY II

MUSI UN3321 MUSIC THEORY III

Required to complete one History course:

MUSI UN3128 HIST-WEST MUS: MID AGE-BAROQUE

MUSI UN3129 HIST-WEST  
MUS:CLASSICAL-20TH  
CENTURY

Required to complete Topics course:

MUSI UN3400 TOPICS IN MUSIC # SOCIETY

Electives: One 1000- or 2000- or 3000- or 4000-level elective.

Electives: One 1000- or 2000- or 3000- or 4000-level elective or three performance points from UN1401 - UN1461 and/or UN1511 - UN1551.

### Pathway: Music Production

Required to complete these three courses:

MUSI UN2205 INTRODUCTION TO DIGITAL MUSIC

MUSI UN2230 History and Practice of Electronic Music

MUSI GU4630 RECORDED SOUND

Required to complete three Ear-Training courses or one Music Theory course (determined by placement test):

MUSI UN1312 INTRODUCTORY EAR-TRAINING

MUSI UN2314 EAR-TRAINING I

MUSI UN2315 EAR-TRAINING II

MUSI UN3316 EAR-TRAINING III

MUSI UN3317 EAR-TRAINING IV

MUSI UN1002 FUNDAMENTALS OF MUSIC

MUSI UN2318 MUSIC THEORY I

MUSI UN2319 MUSIC THEORY II

MUSI UN3321 MUSIC THEORY III

Electives: One 1000- or 2000- or 3000- or 4000-level elective.

### Pathway: Jazz

Required to complete these four courses:

MUSI UN2016 JAZZ

MUSI UN2582 JAZZ  
IMPROVISTN:THRY,HIST,PRAC

MUSI GU4500 JAZZ TRANSCRIPTION #  
ANALYSIS

MUSI GU4505 JAZZ ARRANGING #  
COMPOSITION

Electives: Three performance points from UN1401 - UN1461 and/or UN1511 - UN1551.

### Pathway: Performance

Required: Six performance points from UN1401 - UN1461 and/or UN1511 - UN1551.

Required to complete three Ear-Training courses (determined by placement test):

MUSI UN1312 INTRODUCTORY EAR-TRAINING

MUSI UN2314 EAR-TRAINING I

MUSI UN2315 EAR-TRAINING II

MUSI UN3316 EAR-TRAINING III

MUSI UN3317 EAR-TRAINING IV

Required to complete one Theory course (determined by placement test):

MUSI UN1002 FUNDAMENTALS OF MUSIC

MUSI UN2318 MUSIC THEORY I

MUSI UN2319 MUSIC THEORY II

MUSI UN3321 MUSIC THEORY III

Electives: One 1000- or 2000- or 3000- or 4000-level elective.

### Pathway: Composition

Required to complete one Theory course (determined by placement test):

MUSI UN1002 FUNDAMENTALS OF MUSIC

MUSI UN2318 MUSIC THEORY I

MUSI UN2319 MUSIC THEORY II

MUSI UN3321 MUSIC THEORY III

Electives: Two from the following courses:

MUSI UN2240 The Song Within Us:  
Composition, Analysis,  
Performance

MUSI UN3239 Undergraduate Composition

MUSI UN3241 ADVANCED COMPOSITION I

Electives: One from the following courses:

MUSI UN2205 INTRODUCTION TO DIGITAL MUSIC

MUSI UN2230 History and Practice of Electronic Music

MUSI GU4630 RECORDED SOUND

MUSI GU4810 Sound: Foundations

Electives: One from the following courses:

MUSI GU4525 INSTRUMENTATION

MUSI GU4526 ORCHESTRATION

MUSI GU4515 CONDUCTING MUSIC

### Performance Credit/MPP Courses

MPP UN1401 BASSOON INSTRUCTION

MPP UN1403 CELLO INSTRUCTION

MPP UN1405 CLARINET INSTRUCTION

MPP UN1407 CLASSICAL SAXOPHONE  
INSTRUCTION

MPP UN1409 FLUTE INSTRUCTION

MPP UN1411 FRENCH HORN INSTRUCTION

MPP UN1413 GUITAR (BLUEGRASS)  
INSTRUCTION

MPP UN1414 Guitar (Popular-Contemporary)  
Instruction

MPP UN1415	GUITAR (CLASSICAL) INSTRUCTION
MPP UN1417	HARP INSTRUCTION
MPP UN1419	OBOE INSTRUCTION
MPP UN1421	ORGAN INSTRUCTION
MPP UN1423	PERCUSSION INSTRUCTION
MPP UN1425	PIANO INSTRUCTION
MPP UN1427	STRING BASS INSTRUCTION

MPP UN1601	Performance Seminar MasterClass

## CONCENTRATION IN MUSIC ( FOR STUDENTS WHO DECLARED THE CONCENTRATION ON OR BEFORE THE 2023-24 ACADEMIC YEAR)

The concentration in music requires a minimum of 28 points, including the following courses:

Required to complete up to Music Theory IV; Fundamentals pre-req required if you don't test into Music Theory I or higher:

MUSI UN1002	FUNDAMENTALS OF MUSIC
MUSI UN2318	MUSIC THEORY I
MUSI UN2319	MUSIC THEORY II
MUSI UN3321	MUSIC THEORY III
MUSI UN3322	MUSIC THEORY IV

Required to complete up to Ear-Training IV; Intro Ear-Training pre-req required if you don't test into ET I or higher:

MUSI UN1312	INTRODUCTORY EAR-TRAINING
MUSI UN2314	EAR-TRAINING I
MUSI UN2315	EAR-TRAINING II
MUSI UN3316	EAR-TRAINING III
MUSI UN3317	EAR-TRAINING IV
MUSI GU4318	Ear Training, V
Required to complete both History courses:	
MUSI UN3128	HIST-WEST MUS: MID AGE-BAROQUE
MUSI UN3129	HIST-WEST MUS:CLASSICAL-20TH CENTURY
Required to complete Topics course:	
MUSI UN3400	TOPICS IN MUSIC # SOCIETY
Electives: At least one 3000- or 4000-level electives.	
The remaining points are to be earned through 1000-level MPP courses, 2000, 3000 or 4000-level courses subject to these constraints:	
No more than 6 points of 2000-level courses.	
No more than 4 points of 1000-level MPP courses (list below):	

### Performance Credit/MPP Courses

MPP UN1401	BASSOON INSTRUCTION
MPP UN1403	CELLO INSTRUCTION
MPP UN1405	CLARINET INSTRUCTION
MPP UN1407	CLASSICAL SAXOPHONE INSTRUCTION
MPP UN1409	FLUTE INSTRUCTION

### **MUSI UN1312 INTRODUCTORY EAR-TRAINING. 1.00 point.**

This course is an introduction to basic skills in sight reading. Instruction includes reading rhythms in simple meter, solfege recitation, and sight-singing simple melodies

#### **Fall 2024: MUSI UN1312**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 1312	001/10061	M W 12:10pm - 1:00pm 404 Dodge Building	Sadie Dawkins	1.00	12/14

#### **Spring 2025: MUSI UN1312**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 1312	001/10827	M W 12:10pm - 1:00pm	Mary Asti	1.00	10/14

### **MUSI UN2010 ROCK. 3.00 points.**

How did Elvis become the “King of Rock’n’Roll” instead of, for example, Chuck Berry? Who are LaVern Baker, Sister Rosetta Tharpe, and Etta James and what do they have to do with rock and roll? Why and how did “rock and roll” become “rock”? What are the relationships among rock, rhythm and blues, soul, and funk? What do classical music composers such as J.S. Bach, Modest Mussorgsky, and Philip Glass have to do with rock? How many times has rock “died”? What is rock music’s relevance both historically and today? This course will introduce you to popular music studies, a field of inquiry that draws scholars from a number of different disciplines, including musicology, sociology, philosophy, anthropology and literature. Examining rock music in an interdisciplinary way has opened the genre to increasing attention beyond musicological methodologies and assumptions. First, however, we must ask some fundamental questions: for instance, what, exactly, is popular music as well as, importantly, what differentiates rock music from other genres? Our definitions will reveal some of the assumptions we bring to any discussion of popular music. Throughout this semester, we will question our assumptions about rock music culture through an investigation into a series of keywords. Each keyword will focus our attention on various aspects of rock music in order to think through the complexities of what might, on the surface, seem self-evident. Terms such as “genre” or “the everyday” will be examined to help us gain critical analytical tools with which to assess various rock music productions, artists, and processes

#### **Fall 2024: MUSI UN2010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 2010	001/11802	M 4:10pm - 6:40pm  622 Dodge Building	Kevin Fellezs	3.00	31/40

### **MUSI UN2020 SALSA, SOCA # REGGAE. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

A survey of the major syncretic urban popular music styles of the Caribbean, exploring their origins, development, and sociocultural context.

#### **Fall 2024: MUSI UN2020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 2020	001/10062	T Th 1:10pm - 2:25pm Cin Alfred Lerner Hall	Christopher Washburne	3.00	304/300

### **MUSI UN2021 MUSIC IN CONTEMP NATIVE AMER. 3.00 points.**

Music in Contemporary Native America is a historical, ethnographic, and topical examination of contemporary Native American musical practices and ideologies. The course emphasizes popular, vernacular, and mass mediated musics, and

calls into question the simple distinction between traditional and modern aspects of Native American cultures. Our readings and class guests (several of whom will be Native American scholars) emphasize the importance of understanding Native 2 American perspectives on these topics. Three short papers and one substantial final project are required. Approximately 100-150 pages of reading per week

#### Fall 2024: MUSI UN2021

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 2021	001/10063	T Th 1:10pm - 2:25pm 701c Dodge Building	Aaron Fox	3.00	2/25
MUSI 2021	AU1/19417	T Th 1:10pm - 2:25pm Othr Other	Aaron Fox	3.00	3/3

### MUSI UN2205 INTRODUCTION TO DIGITAL MUSIC.

#### 3.00 points.

Prerequisites: *HUMA W1123* or the equivalent, and the instructor's permission.

An introduction to the potential of digital sound synthesis and signal processing. Teaches proficiency in elementary and advanced digital audio techniques. This course aims to challenge some of the tacet assumptions about music that are built into the design of various user interfaces and hardware and fosters a creative approach to using digital audio workstation software and equipment. Permission of Instructor required to enroll. Music Majors have priority for enrollment

#### Fall 2024: MUSI UN2205

### MUSI UN2230 History and Practice of Electronic Music.

#### 3.00 points.

This course will provide a critical survey of the development of electronic and computer music and sound from around the globe. From early experiments and precursors in the late 19th century through to modern-day experimental and popular music practices, this course aims to trace the development of technologies used in the production of electronic and computer

derived sound and music alongside the economic, cultural, and social forces that contribute to the development of audiences. The course will focus intently on listening through a series of curated playlists in an effort to unpack style and genre distinctions. Readings and listening examples will be paired with small, hands-on assignments, that demonstrate the effect of music making tools on the process and structure of musical genres and styles ranging from the experimental practices of musique concrete, drone, and harsh noise to the mainstream practices of dub, techno, vaporwave, hyperpop, and hip hop and more

#### Fall 2024: MUSI UN2230

### **MUSI UN3213 Bach Interpretation for Performers. 3.00 points.**

This course will explore the music of Johann Sebastian Bach from the perspective of performance. Attention will be given to Baroque dance forms and the social significance of dance in the 18th century, the art of rhetoric as a driving force for convincing delivery, an exploration of period instruments, and the study of elements of style such as articulation and ornamentation. The course consists of lectures, discussions, guided listening, score analysis, reading assignments, and performance projects. Aside from Bach's scores, we will examine three key 17th- and 18th-century vocal and instrumental treatises, and a wide array of literature on rhetorical style and performance practice. Upon successful completion of the course, students will gain a deeper understanding of interpreting the music of J.S. Bach and Baroque music in general, both as listeners and as performers

#### **Fall 2024: MUSI UN3213**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 3213	001/10080	M W 2:40pm - 3:55pm 620 Dodge Building	Magdalena Baczkowska	3.00	9/14

### **MUSI UN3241 ADVANCED COMPOSITION I. 3.00 points.**

Composition Faculty

Prerequisites: *MUSI V3310* or the instructor's permission. Composition in more extended forms. Study of advanced techniques of contemporary composition. Readings of student works

#### **Fall 2024: MUSI UN3241**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

MUSI 3322	001/11320	M W 1:10pm - 2:25pm 814 Dodge Building	Calder Hannan	3.00	9/20

**MUSI UN3326 Genre in Popular Music. 3.00 points.**

Genre greatly shapes the way music is created, produced, marketed, and consumed. And yet, genre is more than just a tool to categorize music: These groupings often reveal complex socio-cultural constructs that replicate cultural beliefs about identity and society. This course explores genre as a multifaceted concept within 20th- and 21st- century popular music in the U.S. by examining how these categories are socially and musically constructed, defined, and transformed throughout history. This course investigates how genre has changed from the time of vinyl records to streaming platforms through a blend of lectures, discussions, and listening sessions. We will explore how scholars across numerous disciplines conceive of genre in popular music through interdisciplinary readings and writing activities. This course promises to broaden your understanding of genre while enhancing your personal listening practice as we unravel the tapestry to reveal how genre shapes the musical world around us—all the while exploring if genre truly matters. There are no prerequisites, and a prior knowledge of music or ability to read Western music notation is not required

**MUSI UN3400 TOPICS IN MUSIC # SOCIETY. 3.00 points.**

Music Majors and Concentrators.

This course seeks to approach the study of music and society by comparatively studying repertoires from different parts of the world, how the history of ideas and methods of studying such repertoires shaped them, the practices that constitute them and the ways they are understood and used by different peoples. Central to this course is the interrelationship between the constitution of a repertoire and the history of the construction of knowledge about it.

**MUSI GU4108 Critical Approaches to Opera Studies. 3.00 points.**

Why opera now? In what ways can a 400-year-old art form speak to the needs of contemporary society? This seminar provides an introduction to critical opera studies: we will analyze a broad range of lyric repertory (spanning from Monteverdi to Saariaho) while interrogating the debates these works have generated, both historically and in the present day. Topics to be considered include: operatic institutions and conventions; gender and voice; theories of “text” and liveness; modernist staging; the troubling legacies of Empire and exoticism; and the intersections of opera and multimedia (opera on/as film, opera in HD, site-specific opera). Wherever possible, this course will incorporate live performance in New York, engaging the Metropolitan Opera as well as institutions for “indie” opera and new music. While completion of Music Humanities is a suggested pre-requisite, this class welcomes interdisciplinary perspectives. Individual assignments may be tailored to accommodate student interests and backgrounds outside of the field of music

**MUSI GU4122 SONGS OF THE TROUBADOURS. 4.00 points.**

This interdisciplinary seminar approaches the songs of the troubadours as poetic and musical traditions. Together we will develop methods for analysis and interpretation, situate the songs within literary and social history, and address broad issues such as the nature of performance, the interplay between oral transmission and writing, the origins of troubadour poetry, fin'amor, and gender. Students will learn to analyze the poetic and musical structure of the songs and to transcribe and edit them from medieval manuscripts. Weekly assignments in Paden's Introduction to Old Occitan will familiarize students with the language of the texts; one hour a week will be devoted to texts using Paden's book. Students from all departments are welcome.

**Fall 2024: MUSI GU4122**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 4122	001/10083	F 1:00pm - 3:00pm 701a Dodge Building	Susan Boynton	4.00	7/12

**MUSI GU4308 Theory and Analysis of Jazz and Improvisation. 3.00 points.**

What are the traditional definitions of jazz and how do they apply to improvised music in the twenty-first century? This course aims to communicate reliable methods and processes useful when dissecting and evaluating jazz performances and jazz compositions. Students will engage with traditional and fundamental jazz improvisation theory, then extrapolate new modalities reflective of the music happening today; including categorizing music on gradations from minimally to fully improvisational, tonal to harmonically abstract, rhythmically rigid to free, and sonically acoustic to fully synthesized. The class will explore and differentiate between "new complexity" classical compositions and virtuosic free form improvisation, compare US jazz to versions happening in other countries, and to recognize how world music influences affect improvisational tonal systems and improvisational traits.

**Fall 2024: MUSI GU4308**

MUSI 4308	001/10508	M W 4:10pm - 5:25pm 814 Dodge Building	Ole Mathisen	3.00	14/25

**MUSI GU4360 ANALYSIS OF TONAL MUSIC. 3.00 points.**

Detailed analysis of selected tonal compositions. This course, for advanced undergraduates and beginning graduates, is intended to develop understanding of tonal compositions and of theoretical concepts that apply to them, through study of specific works in various forms and styles.

**MUSI GU4418 Music and Fashion. 3.00 points.**

Fashion has been integral to musical performance practices, and music continues to influence fashion. As a result, specific music genres and practitioners are linked to particular fashion trends and movements that represent their persona and appearance. In various cultures around the world, music and fashion play a significant role in marking identity, as practitioners' cultural heritage impacts the choice of costumes they wear during performances in different spaces and times. Spread through live performances and mass-mediated technology, consumers and fans of these practitioners also adopt and integrate these fashion trends into their everyday styles. This class explores Some of the questions: How does fashion become a visual representation of specific music cultures, subcultures, genres, movements, and artists? How does fashion reflect, influence, inspire, evolve, spread, sustain, represent, affect, and communicate musical ideas? To answer these questions, musical fashion icons such as Beyoncé, Prince, Rihanna, Lady Gaga, and David Bowie, and genres like Hip Hop, rock, Opera, K-pop, Afrobeats, and other global genres are examined through written scholarships, analysis of music performances and costumes, and their appearances in events and everyday life. This class explores how fashion trends influence sounds and vice versa, how they mark identity through music, embody symbolic sounds, and attract music consumers and fans who perpetuate these trends.

**Fall 2024: MUSI GU4418**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 4418	001/10189	T 12:10pm - 2:00pm 620 Dodge Building	Ruth Opara	3.00	22/25

**MUSI GU4525 INSTRUMENTATION. 3.00 points.**

Prerequisites: extensive musical background. Analysis of instrumentation, with directional emphasis on usage, ranges, playing techniques, tone colors, characteristics, interactions and tendencies, all derived from the classic orchestral repertoire. Topics will include theoretical writings on the classical repertoire as well as 20th century instrumentation and its advancement. Additional sessions with live orchestral demonstrations are included as part of the course.

**MUSI GU4630 RECORDED SOUND. 3.00 points.**

As music moves into the 21st century, we find ourselves surrounded by an ever-evolving landscape of technological capability. The world of music, and the music industry itself, is changing rapidly, and with that change comes the opening – and closing – of doorways of possibility. What does this shift mean for today's practicing artist or composer? With big label recording studios signing and nurturing fewer and fewer artists, it seems certain that, today, musicians who want to record

and distribute their music need to be able to do much of the recording and production work on their own. But where does one go to learn how to do this – to learn not only the “how to” part of music production, but the historical underpinnings and the development of the music production industry as well? How does one develop a comprehensive framework within which they can place their own artistic efforts? How does one learn to understand what they hear, re-create what they like and develop their own style? This class, “Recorded Sound,” aims to be the answer. It’s goal is to teach artists how to listen critically to music from across history and genres in order to identify the production techniques that they hear, and reproduce those elements using modern technology so they can be incorporated into the artist’s own musical works.

**MUSI GU4810 Sound: Foundations. 3.00 points.**

This foundational course in sound will begin by exploring how listening happens as well the tools necessary capture and present that listening. Through hands-on experimentation and demonstration, this seminar will examine both the technical and semiotic use of sound as amaterial within creative practice. Fundamental studio techniques will be explored including soldering for building cables, microphones, and loudspeakers. We will also explore the building blocks of analog and digital processes for the creation of sound, including microphones (types, patterns, and placement), basic synthesis, and techniques for recording, mixing, editing, and mastering. Through creative projects that implement these skills we will learn by doing. We will study theories of sound and listening that determine or are determined by technology, from the physical and social dimensions of the sounds we use to create, language (sound as a symbol or object), acoustics (sound in space), acousmatics (sound without a visual reference), and psycho-acoustics (sound as cognitive process). This class assumes no prior knowledge or technical skill. Some reading will be assigned and we will look and listen to a lot of work, students are encouraged to participate actively in discussions

**MPP UN1551 WORLD MUSIC ENSEMBLE. 1.00 point.**

In collaboration with the Center for Ethnomusicology, MESAAS, Institute for Medieval Japanese Studies and the Louis Armstrong Jazz Performance Program, the Music Performance Program (MPP) offers students the opportunity to participate in various world music ensembles: Arab Music, Bluegrass, Japanese Gagaku/Hogaku, Klezmer and Latin American Music. Each ensemble requires different levels of experience, so please refer to the World Music section of the Music Performance Program website for more info. Please note the Latin American Music Ensemble focuses on two different Latin music traditions: The Afro-Cuban Ensemble meets in the Fall and the Brazilian Ensemble meets in the Spring.

### **MPP UN1601 Performance Seminar MasterClass. 1.00 point.**

Performance Seminar Masterclass is open to classical musicians of any instrument(s) with the highest commitment to performance. Students are admitted via live audition during the first week of classes in the Fall. Each week, two students perform repertoire of their choice for the class and receive feedback from everyone present. The discussions, moderated by the director of the Music Performance Program, Dr. Magdalena Stern-Baczewska, are designed to provide constructive criticism to the performers and to pose questions related to performance from the perspectives of musical interpretation, career management, professional collaboration, and pedagogy

**MUSI UN2500 WOMEN AND MUSIC. 3.00 points.**

This course explores the relationship between women, music, and performance from a thematic and a cross-cultural perspective. Through the analysis of different case studies, we will investigate different topics from the perspective of ethnomusicology, cultural anthropology, and performance studies. A number of critical questions we will consider include: how does a particular gender ideology constructs and is constructed by musical aesthetics? What are some of the critical roles for women in performance? What is the significance of gender in performances? What does it mean for women to have have and to be the voice? And how is a musical performance bound up with emotions?

**Spring 2025: MUSI UN2500**

### **MUSI UN3171 PARIS FOR ROMANTICS. 3.00 points.**

Prerequisites: Completion of Music Humanities (or the consent of the instructor) is a pre-requisite for this course.

Prerequisites: Completion of Music Humanities (or the consent of the instructor) is a pre-requisite for this course. This course explores Parisian musical life during the long nineteenth century, situating musical discourses, institutions, and forms within the broader landscapes of literary and artistic Romanticism. Topics to be considered include: the musical echoes of the Revolution; operatic genres and theaters; the music of the salons; cultures of consumerism and domestic performance; and issues of nationalism and historicism after 1870. Composers to be considered include: Berlioz, Chopin, Liszt, Gounod, Saint-Saëns, Franck, Massenet, and Debussy. Completion of Music Humanities (or the consent of the instructor) is a pre-requisite for this course.

#### **Spring 2025: MUSI UN3171**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 3171	001/11762	M W 2:40pm - 3:55pm 622 Dodge Building	Julia Doe	3.00	11/15

### **MUSI UN3216 Piano Literature # Performance: 1900 - Present. 3.00 points.**

This course will explore the piano repertoire of the twentieth and twenty-first centuries, with a focus on performance. The course consists of four modules: European piano music prior to WWII, the American pioneers, multiplicity of directions and cultural identities in piano music 1945-present (prepared piano, indeterminacy, integrated serialism, minimalism), and the piano music of Columbia University composers (including electronic music at the Computer Music Center, spectral piano, Center for United States-China Arts Exchange, microtonal music). We will explore the constantly evolving musical notation and performance practices. Through lectures, discussions, reading, listening, analysis, and performance projects, students will gain an understanding of the aesthetic of a wide array of keyboard literature, notation, and performance techniques

### **MUSI UN3239 Undergraduate Composition. 3.00 points.**

This course provides an immersive experience in music composition, focusing on both practical and theoretical aspects within a given instrumentation. Please refer to the topic for the instrumentation for this semester's course. This class is open to students with no prior experience in composition. Students of varying music backgrounds are welcome. Permission of the instructor may be required for enrollment. The class will explore a variety of compositional approaches, including traditional, experimental, and interdisciplinary methods. During the semester, students will complete several creative and theoretical exercises ranging from short composition projects to analytical responses to diverse works. Students will also engage in individual and group feedback sessions as well as in-class readings of selected compositional projects by the performers. The final project will be an original work between 5 and 7 minutes, which will be workshopped, rehearsed, performed in a public concert, and recorded by professional musicians towards the end of the term

#### **Spring 2025: MUSI UN3239**

**MUSI UN3400 TOPICS IN MUSIC # SOCIETY. 3.00 points.**

Music Majors and Concentrators.

This course seeks to approach the study of music and society by comparatively studying repertoires from different parts of the world, how the history of ideas and methods of studying such repertoires shaped them, the practices that constitute them and the ways they are understood and used by different peoples. Central to this course is the interrelationship between the constitution of a repertoire and the history of the construction of knowledge about it.

**MUSI GU4204 Composing for Dance. 3.00 points.**

The course presents tools, techniques, methodologies, and concepts for composing original music for dance (both acoustic and electronic). Composers will develop a work for dance collaborating with choreographers, culminating in a public showing at the end of the semester. Weekly meetings will be used to discuss the unique challenges (both practical and aesthetic) that this type of interdisciplinary collaboration raises, and to troubleshoot potential solutions. Students will examine case studies of collaborative composer/choreographer pairs (especially from the last 75 years), as potential models for working via the study of artist statements, interviews, articles, videos, and classroom discussions with invited guests. No prior experience writing for dance is necessary. Basic familiarity with a digital audio workspace is preferable. For participants

who don't write music or work in sound, a research project either analyzing a composer/choreographer pairing or looking at a topic relating to music and dance more broadly will serve as an equivalent final project (resulting in an academic paper, a podcast, or the production of an educational video)

**Spring 2025: MUSI GU4204**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 4204	001/17273	T 12:10pm - 2:00pm 620 Dodge Building	Zosha Di Castri	3.00	10/12

**MUSI GU4215 Modular Sound Synthesis. 3.00 points.**

Modular Sound Synthesis is a hands-on studio class that explores contemporary techniques for synthesizers both in studio practice and performance while framing them in the historical context in which they developed. The class approaches the fundamentals of sound and synthesis through the perspective of Columbia's Computer Music Center: vintage function generators, suitcase reel-to-reel tape machines, prototype modules, custom devices; and the first programmable music synthesizer, the RCA Mark II. Students will learn to perform and compose on both hardware devices and software emulations, utilizing them as a creative tool for recording and live performance. Topics include oscillators, modulation, sequencers, voltage processing, wave shaping, filters, and LFOs. The course will engage in listening to both historical and contemporary examples to develop critical listening skills. This class is designed as a follow-up to Intro to Digital Music for undergraduates or graduate students interested in integrating modular synthesis within their artistic practice

**Spring 2025: MUSI GU4215**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**MUSI GU4438 Music and Global Africa. 3.00 points.**

This course examines the transatlantic sounds of African music, including Afrobeat, Afrobeats, Amapiano, Chimurenga, Highlife, Kwaito, Makossa, Reggae, and more, to explore the rich cultural roots of African musical traditions and how they navigate and assimilate within the global popular culture sphere. From migration and collaborations to the rise of African artists in the era of advanced technology, the course uncovers how these genres transcend borders, inspire cross-cultural innovation, and influence the global music scene in contemporary times. Critical issues such as cultural appropriation, commodification, gender, health, and authenticity in the ever-evolving global music industry will be explored. By the end of the course, you will have a deep understanding of the complex dynamics driving the influence and dissemination of African music across the world

### **MUSI GU4630 RECORDED SOUND. 3.00 points.**

As music moves into the 21st century, we find ourselves surrounded by an ever-evolving landscape of technological capability. The world of music, and the music industry itself, is changing rapidly, and with that change comes the opening – and closing – of doorways of possibility. What does this shift mean for today's practicing artist or composer? With big label recording studios signing and nurturing fewer and fewer artists, it seems certain that, today, musicians who want to record and distribute their music need to be able to do much of the recording and production work on their own. But where does one go to learn how to do this – to learn not only the "how to" part of music production, but the historical underpinnings and the development of the music production industry as well? How does one develop a comprehensive framework within which they can place their own artistic efforts? How does one learn to understand what they hear, re-create what they like and develop their own style? This class, "Recorded Sound," aims to be the answer. It's goal is to teach artists how to listen critically to music from across history and genres in order to identify the production techniques that they hear, and reproduce those elements using modern technology so they can be incorporated into the artist's own musical works.

### **FILM GU4048 Music, Sound and Image Theory. 3.00 points.**

Some of the most exciting theoretical moving image work in recent years has centered on the problem of the acoustic sign in cinema and especially around the relation between image track and sound "track." This course rethinks the history and theory of cinema from the point of view of sound: effects, dialogue, music. From cinematic sound recording and playback technologies through Dolby sound enhancement and contemporary digital audio experiments. Revisiting basic theoretical concepts from the pov of sound: realism (sound perspective, dubbing), anti-realism (contrapuntal and dissonant effects), genre (the leitmotiv), perception (the synaesthetic effect). The silent to sound divide considered relative to the \*19th\* century Romanticism of the classical Hollywood score associated with the Viennese-trained Max Steiner to the scores of John Williams

**MPP UN1551 WORLD MUSIC ENSEMBLE. 1.00 point.**

In collaboration with the Center for Ethnomusicology, MESAAS, Institute for Medieval Japanese Studies and the Louis Armstrong Jazz Performance Program, the Music Performance Program (MPP) offers students the opportunity to participate in various world music ensembles: Arab Music, Bluegrass, Japanese Gagaku/Hogaku, Klezmer and Latin American Music. Each ensemble requires different levels of experience, so please refer to the World Music section of the Music Performance Program website for more info. Please note the Latin American Music Ensemble focuses on two different Latin music traditions: The Afro-Cuban Ensemble meets in the Fall and the Brazilian Ensemble meets in the Spring.

**MPP UN1601 Performance Seminar MasterClass. 1.00 point.**

Performance Seminar Masterclass is open to classical musicians of any instrument(s) with the highest commitment to performance. Students are admitted via live audition during the first week of classes in the Fall. Each week, two students perform repertoire of their choice for the class and receive feedback from everyone present. The discussions, moderated by the director of the Music Performance Program, Dr. Magdalena Stern-Baczewska, are designed to provide constructive criticism to the performers and to pose questions related to performance from the perspectives of musical interpretation, career management, professional collaboration, and pedagogy

Office location: 708 Philosophy Hall

Office contact: 212-854-3196, [hmd2151@columbia.edu](mailto:hmd2151@columbia.edu)

Director of Undergraduate Studies: Wolfgang Mann, 705 Philosophy Hall; 212-854-7887; [wrm4@columbia.edu](mailto:wrm4@columbia.edu)

Economics-Philosophy Adviser: Jessica Collins, 714  
Philosophy Hall; 212-854-3970; [jessica.collins@columbia.edu](mailto:jessica.collins@columbia.edu)

Undergraduate Administrator: Haley Donovan, 708 Philosophy  
Hall; 212-854-8507; [hmd2151@columbia.edu](mailto:hmd2151@columbia.edu)

## THE STUDY OF PHILOSOPHY

Students interested in philosophy may pursue a major either in philosophy or in economics-philosophy. Because philosophy treats issues fundamental to both the sciences and the humanities, students are also welcome to combine their philosophy major with work in other fields. Before declaring a major in philosophy or economics-philosophy, and before deciding to combine philosophy with another discipline, students should meet with the director of undergraduate studies to formulate the program best for them.

Philosophy majors are given a foundation in logic and philosophical methodology, and are asked to confront fundamental questions in the main areas of philosophy: epistemology and metaphysics, ethics and political philosophy, philosophy of mind and language, and history of philosophy. The department requires that all majors take at least one seminar (PHIL UN3912), designed to allow students to focus on particular philosophical issues or texts in greater depth. Outstanding seniors may also pursue their own philosophical project in a senior thesis.

Over and above the courses required of all majors, there is room for considerable flexibility. Through an appropriate choice of electives from among the department's offerings (and from related courses in other departments), there are special opportunities for focusing more intensively on one or two subfields of philosophy, e.g., logic and the philosophy of mathematics, philosophy of science, ethics and political philosophy, or the history of philosophy. Students should consult with the director of undergraduate studies on how best to pursue such programs.

## THE STUDY OF ECONOMICS-PHILOSOPHY

The Joint Major in Economics and Philosophy is an interdisciplinary one which, while introducing students to the basic methodologies of economics and philosophy, stresses areas of particular concern to both. These include subjects such as rationality and decision making, justice and well-being, freedom and collective choice, and the nature of empirical scientific theories.

There are two advisers for the Joint Major, one in the Department of Economics and one in the Department of Philosophy. Please note that the economics adviser can advise only on the economics requirements and the philosophy adviser can advise only on the philosophy requirements.

Prospective majors are strongly advised to discuss the major early in their sophomore year. Each major is expected to meet

with the departmental advisers in the middle of their junior year and at the beginning of their senior year.

## STUDENT ADVISING

Director of Undergraduate Studies: Wolfgang Mann, 705  
Philosophy Hall; 212-854-7887; [wrm4@columbia.edu](mailto:wrm4@columbia.edu)

Economics-Philosophy Adviser: Jessica Collins, 714  
Philosophy Hall; 212-854-3970; [jessica.collins@columbia.edu](mailto:jessica.collins@columbia.edu)

Undergraduate Administrator: Haley Donovan, 708 Philosophy  
Hall; 212-854-8507; [hmd2151@columbia.edu](mailto:hmd2151@columbia.edu)

## Consulting Advisers

- Students with questions regarding the Philosophy major or concentration should contact the DUS by email to set up an appointment.
- Students interested in joining the Philosophy Undergraduate listserv can email Haley Donovan at [hmd2151@columbia.edu](mailto:hmd2151@columbia.edu).
- Undergraduate Open Houses, Information Events, and Welcome Events will be advertised through our listserv and Department website.

## Enrolling in Classes

- Please note some courses require professor permission to join. If this is the case, students should email the professor as early as possible to join the course.

## Preparing for Graduate Study

- Students interested in pursuing graduate studies should consult with their advisers or the DUS.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

- Coursework in fulfillment of a major or minor in Philosophy must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies. Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

## Advanced Placement

- The Department of Philosophy does not accept any advanced placement credit toward courses in the curriculum.

## Barnard College Courses

- The Columbia and Barnard Philosophy Departments function together as a unit. The courses specifically designed for Barnard students (first-year and senior seminars) do not count towards the Columbia major or

concentration. But all other courses in the Columbia-Barnard joint curriculum do count for the major or concentration, regardless of whether the instructor is associated with Barnard or Columbia.

## Transfer Courses

- Courses taken at other institutions may count only after review and approval by the DUS (a written record of approval must be submitted to 708 Philosophy by the student or DUS). No more than 5 courses taken elsewhere may be applied to the major, and no more than 4 to the concentration.

## Study Abroad Courses

- Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor [or special program or concentration], the DUS will need to confirm that they can be used toward requirements in the major/minor.
- Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.

## Summer Courses

- Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in the department/institute/center guidelines or by permission of the Director of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.
- Two courses taken in summer sessions can count towards the major.

## CORE CURRICULUM CONNECTIONS

- Students may be interested in course offerings in this department that can be taken in fulfillment of the [Global Core requirement / Language requirement / Science requirement] of the Core Curriculum. See the list of approved courses for the requirement on this page of the Bulletin that lists all approved courses to see the list of courses in this department that have been approved for the requirement.

- Core classes such as Contemporary Civilization may not count towards the major.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Thesis Coursework and Requirements

- Undergraduates majoring in Philosophy or Economics-Philosophy may propose to write a senior thesis. Students who wish to write a thesis should approach a faculty member at the end of their junior or beginning of their senior year, and begin working on a proposal early in the fall semester of their senior year. Proposals are due in early December, and will be reviewed by a committee which will include the Director of Undergraduate Studies; students will be notified of the committee's decision within two weeks. Students whose proposals are approved should register for their faculty advisor's section of Supervised Independent Research for the spring term of their senior year. Theses are due in early April.
- See the full policy and procedure concerning senior theses on the departmental webpage: <http://philosophy.columbia.edu/content/senior-thesis-philosophy>

## DEPARTMENT HONORS AND PRIZES

### Department Honors

- Departmental honors are highly competitive. Normally no more than 10% of the majors graduating in the department each year will receive departmental honors. In order to qualify for departmental honors in philosophy, a student must have a grade point average of at least 3.6 in the major.
- For students with a GPA of 3.6 or above, there are two possible routes to consideration:
  - A student may complete a senior thesis; those students who complete senior theses will automatically be considered for honors without having to be nominated.
  - A student may be nominated by a faculty member early in the spring semester of their senior year; nominated students will be invited to submit a writing sample. A nominated student who is also writing a thesis may submit their thesis as the writing sample, or may choose to submit a different work.
- Both the senior thesis and writing samples are due in early April. The departmental honors committee will then review the submitted material and the academic records of the writers, and will report to the full faculty.

- The full faculty will then decide which students to recommend for the departmental honors to the Columbia College and General Studies administrations.

## Academic Prizes

- Columbia College Prizes
  - Adam Leroy Jones Prize
    - Established by Mrs. Leroy Jones in memory of her husband who was Associate Professor of Philosophy and Director of University Admissions from 1909 until 1934, the prize may be awarded to a student in the College for the best essay on a topic in the Philosophy of Science, or in the Foundations of Logic.
- James Gutmann Prize
  - Established in 1987 in honor of James Gutmann, CC'18 and Professor of Philosophy, by his family and friends on the occasion of his 90th birthday. It may be awarded each year to a graduating Columbia College senior in Philosophy who plans to pursue graduate work in the field.
- Lina Kahn Prize
  - Established in 1965 by the family of the late Lina Kahn, who received a Ph.D. in Philosophy in 1916. This annual competition, which is open to graduate students only, awards \$500 to the best paper in metaphysics.

## OTHER IMPORTANT INFORMATION

- Student Organizations
  - Meade Anderson Undergraduate Philosophy Forum
    - Wednesdays 8:00-9:00 pm in 716 Philosophy Hall
    - Join us each week to discuss a topic of philosophical interest! Discussions do not require any background knowledge or preparation. All undergraduates are welcome to attend, and we hope to see you there.
    - The Forum Leaders are Samantha Rosen ([skr2168@barnard.edu](mailto:skr2168@barnard.edu)) and Oscar Lloyd ([oal2113@columbia.edu](mailto:oal2113@columbia.edu)).
- Gadfly
  - The Gadfly is the undergraduate philosophy magazine of Columbia University, which publishes

academic papers, interviews, events, and free-form work.

- <https://www.thegadflymagazine.org>

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

- PHIL UN1001 Intro to Philosophy & PHIL UN1401 Intro to Logic do not count towards the undergraduate major in Philosophy.
- Courses in which a grade of D has been received do not count toward the major or concentration.

## Course Numbering Structure

- No more than one course at the 1000 level can be counted toward the major.
- In order to enroll in one of the 4000-level courses, students must have taken at least four courses in philosophy.
- Students may choose courses prefixed with GR only with the instructor's permission. Additionally, because these seminars are capped, students should register early.

## Guidance for First-Year Students

- Refer to the coursework and majors requirements sections.

## Guidance for Transfer Students

- Courses taken at other institutions may count only after review and approval by the DUS (a written record of approval must be submitted to 708 Philosophy by the student or DUS). No more than 5 courses taken elsewhere may be applied to the major, and no more than 4 to the concentration.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

- PHIL UN2101\* or another course in ancient or medieval philosophy
- PHIL UN2201\* or another course in the history of late medieval or early modern philosophy (e.g. PHIL UN3237 or UN3264)
- PHIL UN3411 or, in exceptional cases, a more advanced course in logic
- At least one course in either metaphysics or epistemology (e.g. PHIL GU4501, UN3601, or a related course to be chosen in consultation with the Director of Undergraduate Studies)
- At least one course in either systematic ethics or social and political philosophy (e.g. PHIL UN2702, UN3701, UN3751, or a related course to be chosen in consultation with the Director of Undergraduate Studies)
- At least one majors' seminar, i.e. UN3912

\* Substituted courses must be selected in consultation with the DUS.

## Major in Philosophy

Students considering a major in philosophy are strongly encouraged to meet with the director of undergraduate studies early in their sophomore year. All majors must consult with the director of undergraduate studies each term before registering

for classes in order to plan and update their individual programs of study.

Students planning to major in philosophy are advised to begin with PHIL UN1010 METHDS/PROB OF PHILOS THOUGHT. Beginning students are especially encouraged to take 2000-level courses, both in the history of philosophy and in systematic philosophy. These courses are typically less specialized and less narrowly focused than higher-numbered ones. More advanced students are encouraged to take 3000-level courses. The department requires that all majors take at least one seminar, PHIL UN3912.

*\*PLEASE NOTE\* PHILUN1401 INTRODUCTION TO LOGIC does not count for credit towards the undergraduate major in philosophy.* \* No more than one course at the 1000-level can be counted toward the major. In order to enroll in one of the 4000-level courses, students must have taken at least four courses in Philosophy.

The major requires a minimum of 30 points in philosophy chosen from courses prefixed with *UN* or *GU*:

PHIL UN2101	HISTORY OF PHILOSOPHY I
PHIL UN2201	HISTORY OF PHILOSOPHY II
PHIL UN3411	SYMBOLIC LOGIC

At least one course in either metaphysics or epistemology e.g., PHIL W3960, or a related course to be chosen in consultation with the director of undergraduate studies.

Select at least one course in either ethics or social and political philosophy from the following:

PHIL UN2702	Contemporary Moral Problems
PHIL UN3701	ETHICS
PHIL UN3751	POLITICAL PHILOSOPHY

A related course to be chosen in consultation with the director of undergraduate studies.

PHIL UN3912	SEMINAR
-------------	---------

- Courses taken pass/fail only count towards the major in unusual circumstances.
- Two courses taken in summer sessions can count towards the major.
- In some instances, courses in other departments can count for credit towards the major. For example, the Religion Department offers courses in philosophy of religion, and the Political Science Department offers courses in political philosophy. Questions about whether courses in other departments will count towards the major should be directed to the DUS.
- The Columbia and Barnard Philosophy Departments function together as a unit. The courses specifically designed for Barnard students (first-year and senior seminars) do not count towards the Columbia major. But all other courses in the Columbia-Barnard joint curriculum do

count for the major, regardless of whether the instructor is associated with Barnard or Columbia.

- Core classes such as Contemporary Civilization may not count towards the major.

## Joint Major in Economics-Philosophy

- An Introductory course. Most often this will be PHIL UN1010 Methods and Problems of Philosophical Thought.
- PHIL UN3411 Symbolic Logic.
- One 3000-level course in moral, political, or social philosophy. (PHIL UN3701 Ethics satisfies this requirement, as do various other courses offered by the Department from time to time. Consult with the Philosophy adviser if you are in any doubt here.)
- One 3000-level course in epistemology, the philosophy of science, or in the philosophy of one of the particular sciences. (PHIL UN3551 Philosophy of Science and PHIL UN3960 Epistemology both satisfy this requirement, as do various other courses offered by the Department from time to time. Consult with the Philosophy adviser if you are in any doubt here.)
- PHIL GU4561 Probability and Decision Theory.
- ECPH UN4950 Senior Seminar in Economics and Philosophy.

Please read *Guidelines for all Economics Majors, Concentrators, and Interdepartmental Majors* in the *Economics* section of this Bulletin.

Economics-Philosophy is an interdisciplinary major that, while introducing students to the basic methodologies of economics and philosophy, stresses areas of particular concern to both. These include subjects such as rationality and decision making, justice and efficiency, freedom and collective choice, and the logic of empirical theories and their testing. Many of the issues are dealt with historically, and classic texts of Plato, Kant, Mill, Marx, and Smith are reviewed.

Two advisers are assigned for the interdepartmental major, one in the Department of Economics and one in the Department of Philosophy. Please note that the Economics adviser can only advise on the Economics requirements and the Philosophy adviser can only advise on the Philosophy requirements.

The Economics-Philosophy major requires a total minimum of 54 points: 25 points in Economics, 16 points in Philosophy, 6 points in Mathematics, 3 points in Statistics, and 4 points in the interdisciplinary seminar as follows:

:

### Economics Core Courses

ECON UN1105	PRINCIPLES OF ECONOMICS
ECON UN3211	INTERMEDIATE MICROECONOMICS
ECON UN3213	INTERMEDIATE MACROECONOMICS
ECON UN3412	INTRODUCTION TO ECONOMETRICS

### Mathematics Sequence

Select a mathematics sequence

### Statistics

Select a statistics course

### Economics Electives

Three electives are required; refer to the Economics section of this bulletin.

### Philosophy Courses

PHIL UN1010	METHDS/PROB OF PHILOS THOUGHT
PHIL UN3411	SYMBOLIC LOGIC
PHIL UN3701	ETHICS (a social or political philosophy course may be substituted, please consult the Philosophy DUS)
PHIL UN3551 or PHIL UN3960	PHILOSOPHY OF SCIENCE EPISTEMOLOGY
PHIL GU4561	PROBABILITY & DECISION THEORY

### Seminar

ECPH GU4950	ECONOMICS & PHILOSOPHY (or another seminar in philosophy or economics approved by advisers in both department)
-------------	--

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Philosophy

Philosophy, as an academic discipline, has significant points of contact with a wide range of other subjects—in the humanities, the social sciences, and the natural sciences. A concentration in philosophy thus can be an attractive option for many students. Those considering becoming concentrators are strongly encouraged to meet with the director of undergraduate studies early in their sophomore year, in order to discuss their specific interests and to plan their programs of study. All concentrators should consult with the director of undergraduate studies each term before registering for courses.

The concentration requires a minimum of 24 points in philosophy, chosen from courses prefixed with UN or GU. There are no specific courses required for the concentration.

Students may choose courses prefixed with *GR* only with the instructor's permission.

PHIL UN3912 is open to junior and senior concentrators who have taken at least four courses in philosophy.

## FALL 2024

### PHIL UN1001 INTRODUCTION TO PHILOSOPHY. 3.00 points.

Survey of some of the central problems, key figures, and great works in both traditional and contemporary philosophy. Topics and texts will vary with instructor and semester

#### Fall 2024: PHIL UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 1001	001/00018	M W 11:40am - 12:55pm 304 Barnard Hall	Francey Russell	3.00	54/80
PHIL 1001	002/00215	T Th 2:40pm - 3:55pm 207 Milbank Hall	Christopher Prodoehl	3.00	16/20
PHIL 1001	003/00216	M W 4:10pm - 5:25pm 203 Diana Center	Caroline Bowman	3.00	19/20

#### Spring 2025: PHIL UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 1001	001/00220	M W 10:10am - 11:25am 302 Barnard Hall	Taylor Carman	3.00	12/20
PHIL 1001	002/00221	T Th 2:40pm - 3:55pm 237 Milbank Hall	Christopher Prodoehl	3.00	18/25

### PHIL UN1010 METHDS/PROB OF PHILOS THOUGHT. 3.00 points.

Critical introduction to philosophical problems, ideas and methods

### PHIL UN2101 HISTORY OF PHILOSOPHY I. 4.00 points.

Corequisites: PHIL V2111 Required Discussion Section (0 points). Exposition and analysis of the positions of the major philosophers from the pre-Socratics through Augustine. This course has unrestricted enrollment

#### Fall 2024: PHIL UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 2101	001/13513	T Th 4:10pm - 5:25pm 141 Uris Hall	Taylor Pincin	4.00	37/60

### PHIL UN2110 PHILOSOPHY # FEMINISM. 3.00 points.

Is there an essential difference between women and men? How do questions about race conflict or overlap with those about gender? Is there a normal way of being queer? Introduction to philosophy and feminism through a critical discussion of these and other questions using historical and contemporary texts, art, and public lectures. Focus includes essentialism, difference, identity, knowledge, objectivity, and queerness

#### Fall 2024: PHIL UN2110

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PHIL 2110	001/12274	T Th 2:40pm - 3:55pm 833 Seeley W. Mudd Building	Christia Mercer	3.00	59/90
PHIL 2110	AU1/18841	T Th 2:40pm - 3:55pm Othr Other	Christia Mercer	3.00	2/2

### PHIL UN2685 INTRO TO PHIL OF LANGUAGE. 4.00 points.

This course gives students an introduction to various topics in the Philosophy of Language

#### Fall 2024: PHIL UN2685

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 2685	001/00019	M W 2:40pm - 3:55pm 418 Barnard Hall	Karen Lewis	4.00	42/80

### PHIL UN3000 BUDDHIST PHILOSOPHY. 3.00 points.

Buddhist philosophers generally agree about what doesn't exist: an enduring, unitary, and independent self. But there is surprisingly little consensus across Buddhist traditions about what does exist and what it's like. In this course, we will examine several Buddhist theories about the nature and structure of reality and consider the epistemological and ethical implications of these radically different pictures of the world. We will analyze and evaluate arguments from some of the most influential Indian Buddhist philosophers from the second to the eleventh centuries, including Nāgārjuna, Vasubandhu, Dignāga, Candrakīrti, Śāntarakṣita, Śāntideva, and Ratnakīrti. Topics will include the existence and nature of the external world, the mind, and the self; practical and epistemological implications of the Buddhist no-self principle; personal identity; the problem of other minds; and causal determinism and moral responsibility

### PHIL UN3264 19TH CENTURY PHILOSOPHY: HEGEL. 3.00 points.

Prerequisites: Phil UN2201 or PHIL UN3251 Examines major themes of Hegels philosophy, with emphasis on social and political thought. Topics include Hegels critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in a rational society. Readings from Kant's Third Critique help explain how Hegels project develops out of Kants transcendental idealism. Some knowledge of Kants moral theory and his Critique of Pure Reason is presupposed. Prerequisite: at least one of PHIL UN2201, PHIL UN2301, or PHIL UN3251

### PHIL UN3353 EUROPEAN SOCIAL PHILOSOPHY. 3.00 points.

Prerequisites: one philosophy course.

Prerequisites: one philosophy course. A survey of European social philosophy from the 18th to the 20th century, with special attention to theories of capitalism and the normative concepts (freedom, alienation, human flourishing) that inform them. Also: the relationship between civil society and the state

#### Fall 2024: PHIL UN3353

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PHIL 3353	001/12275	T Th 10:10am - 11:25am 326 Uris Hall	Axel Honneth	3.00	43/60
PHIL 3353	AU1/18844	T Th 10:10am - 11:25am Othr Other	Axel Honneth	3.00	2/2

**PHIL UN3411 SYMBOLIC LOGIC. 4.00 points.**

Corequisites: PHIL V3413 Required Discussion Section (0 points). Advanced introduction to classical sentential and predicate logic. No previous acquaintance with logic is required; nonetheless a willingness to master technicalities and to work at a certain level of abstraction is desirable

**Fall 2024: PHIL UN3411**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3411	001/12277	M W 10:10am - 11:25am 417 International Affairs Bldg	Tamar Lando	4.00	73/100

**Spring 2025: PHIL UN3411**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3411	001/14173	M W 10:10am - 11:25am 402 Chandler	Achille Varzi	4.00	98/90

**PHIL UN3551 PHILOSOPHY OF SCIENCE. 3.00 points.**

Enrollment limited to 40.

Prerequisites: one philosophy course or the instructor's permission.

Philosophical problems within science and about the nature of scientific knowledge in the 17th-20th centuries. Sample problems: causation and scientific explanation; induction and real kinds; verification and falsification; models, analogies and simulations; the historical origins of the modern sciences; scientific revolutions; reductionism and supervenience; differences between physics, biology and the social sciences; the nature of life; cultural evolution; human nature; philosophical issues in cosmology

**Spring 2025: PHIL UN3551**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3551	001/14175	M W 4:10pm - 5:25pm 330 Uris Hall	David Albert	3.00	30/60

**PHIL UN3601 METAPHYSICS. 4.00 points.**

Corequisites: PHIL V3611 Required Discussion Section (0 points). Systematic treatment of some major topics in metaphysics (e.g. modality, causation, identity through time, particulars and universals). Readings from contemporary authors

**Fall 2024: PHIL UN3601**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3601	001/12278	M W 1:10pm - 2:25pm 702 Hamilton Hall	Achille Varzi	4.00	72/75

**PHIL UN3701 ETHICS. 4.00 points.**

Prerequisites: one course in philosophy.

Corequisites: *PHIL V3711* Required Discussion Section (0 points).

Prerequisites: one course in philosophy. Corequisites: PHIL V3711 Required Discussion Section (0 points). This course is mainly an introduction to three influential approaches to normative ethics: utilitarianism, deontological views, and virtue ethics. We also consider the ethics of care, and selected topics in meta-ethics

**Fall 2024: PHIL UN3701**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3701	001/12279	M W 1:10pm - 2:25pm 517 Hamilton Hall	Michele Moody-Adams	4.00	41/80

**Spring 2025: PHIL UN3701**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3701	001/00163	M W 1:10pm - 2:25pm 405 Milbank Hall	Francey Russell	4.00	50/80

**PHIL UN3751 POLITICAL PHILOSOPHY. 3.00 points.**

Six major concepts of political philosophy including authority, rights, equality, justice, liberty and democracy are examined in three different ways. First the conceptual issues are analyzed through contemporary essays on these topics by authors like Peters, Hart, Williams, Berlin, Rawls and Schumpeter. Second the classical sources on these topics are discussed through readings from Hobbes, Locke, Hume, Marx, Plato, Mill and Rousseau. Third some attention is paid to relevant contexts of application of these concepts in political society, including such political movements as anarchism, international human rights, conservative, liberal, and Marxist economic policies as well as competing models of democracy

**Fall 2024: PHIL UN3751**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3751	001/00020	T Th 1:10pm - 2:25pm 405 Milbank Hall	Frederick Neuhouser	3.00	43/80
PHIL 3751	AU1/18843	T Th 1:10pm - 2:25pm Othr Other	Frederick Neuhouser	3.00	2/2

**PHIL UN3756 Critical Philosophy of Race: What is Race?. 3.00 points.**

This course is a philosophical examination of the meaning and significance of the concept of race. The course will chiefly aim to answer: What do we mean by the term "race"? And why is it often tied to the existence of racism? From where does the concept come? And what role did "race" play in the philosophical thought and the culture of Western modernity? Among the questions that can be asked are, How do concepts of race contribute to the formation and justification of various economic, political, and social institutions and practices, such as slavery, colonialism, and segregation? However, we will also inquire at the end of the course whether "race" is always a destructive concept, or whether it can be re-defined as part of

a liberation project centered on racial identity: the appreciation and celebration of racial difference and solidarity

**PHIL UN3858 CULTIVATING INDIVIDUALITY. 3.00 points.**

Talk about “individuality”, about being (or becoming) “yourself” is all around us. But what exactly does this mean? What is genuine individuality, and how can we develop it, in ourselves (though self-development) and in others (by designing appropriate educational institutions)? What is the relationship between being an individual and being a part of society? Is there a tension between the non-conformism often associated with genuine individuality on the one hand, and the demands of community and good citizenship, on the other? Can educational institutions be designed to fulfill both those demands (to the extent they are distinct)? And how might oppressive social institutions hinder the development of “individuality”? In this course, we will explore these and related questions by drawing on both the classics of philosophy of education (Plato, Rousseau, Nietzsche, Dewey, Du Bois), and on relevant literary material that is in conversation with the philosophical texts (Rilke, Tolstoy, Woolf)

**PHIL UN3768 ALLIES, ADVOCATES, ADVERSARIES. 3.00 points.**

This course will survey political and epistemological questions that are centered around living in a society with oppression, including: What is oppression? What does it mean to be an ally? When is it right to speak for others and advocate for their interests? Do we have a duty to dissent and protest under certain circumstances? What is solidarity and how can we act in solidarity with others?

**PHIL UN3863 HAPPINESS AND WELL-BEING. 3.00 points.**

“What is it to be happy?” Philosophers have passionately debated this question from antiquity until now. Especially in times when happiness seems difficult to find, we naturally want to know what happiness is and how best to secure it. In this course, we will consider happiness in relation to well-being, examining four major theories of well-being (hedonism, desire-fulfillment theories, objective list theories, and eudaimonism/perfectionism). We will gain a nuanced understanding of each view by juxtaposing their ancient and modern advocates and opponents

**PHIL UN3912 SEMINAR. 3.00 points.**

Required of senior majors, but also open to junior majors, and junior and senior concentrators who have taken at least four philosophy courses. This exploration will typically involve writing a substantial research paper. Capped at 20 students with preference to philosophy majors

**Fall 2024: PHIL UN3912**

**PHIL GU4424 MODAL LOGIC. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

**Fall 2024: PHIL GU4424**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 4424	001/12319	M W 1:10pm - 2:25pm 516 Hamilton Hall	Tamar Lando	3.00	15/20

**PHIL GU4495 PERCEPTION. 3.00 points.**

This course addresses the fabulously rich range of issues about the nature of perception, including: perceptual mental representation and its content; computational explanation; justifying beliefs; knowledge and thought about perception; and perception of music. Perception is an interdisciplinary subject par excellence. Readings will be drawn from philosophy and psychology, aesthetics, and artificial intelligence

**PHIL GU4561 PROBABILITY # DECISION THEORY. 3.00 points.**

Examines interpretations and applications of the calculus of probability including applications as a measure of degree of belief, degree of confirmation, relative frequency, a theoretical property of systems, and other notions of objective probability or chance. Attention to epistemological questions such as Hume's problem of induction, Goodman's problem of projectibility, and the paradox of confirmation

**Fall 2024: PHIL GU4561**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 4561	001/12320	Th 12:10pm - 2:00pm 602 Northwest Corner	Jessica Collins	3.00	27/30

**PHIL GU4602 PHILOSOPHICAL TEXTS IN GREEK. 3.00 points.**

Careful reading and translation of a major philosophical text in ancient Greek to be chosen by the course participants in consultation with the instructor. Special attention is to be paid to the linguistic and conceptual problems of translating ancient Greek philosophical texts. Prerequisite: equivalent of at least two years of study of ancient Greek at university level

## SPRING 2024

### PHIL UN1010 METHDS/PROB OF PHILOS THOUGHT. 3.00 points.

Critical introduction to philosophical problems, ideas and methods

### PHIL UN1401 INTRODUCTION TO LOGIC. 3.00 points.

Explicit criteria for recognizing valid and fallacious arguments, together with various methods for schematizing discourse for the purpose of logical analysis. Illustrative material taken from science and everyday life

Spring 2025: PHIL UN1401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 1401	001/00207	T Th 11:40am - 12:55pm	Christopher Prodoehl	3.00	60/80
		408 Zankel			

### PHIL UN2201 HISTORY OF PHILOSOPHY II. 4.00 points.

Prerequisites: PHIL UN2211 Required Discussion Section (0 points). PHIL UN2101 is not a prerequisite for this course. Exposition and analysis of the metaphysics, epistemology, and natural philosophy of the major philosophers from Aquinas through Kant. Authors include Aquinas, Galileo, Gassendi, Descartes, Spinoza, Leibniz, Berkeley, Hume, and Kant. This course has unrestricted enrollment

Spring 2025: PHIL UN2201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 2201	001/00165	T Th 1:10pm - 2:25pm	Caroline Bowman	4.00	69/80
		405 Milbank Hall			

### PHIL UN3131 ARISTOTLE. 3.00 points.

Prerequisites: One philosophy course or permission of the instructor.

Introduction to Aristotle's philosophy through analysis of selected texts.

### PHIL UN3411 SYMBOLIC LOGIC. 4.00 points.

Corequisites: PHILV3413 Required Discussion Section (0 points). Advanced introduction to classical sentential and predicate logic. No previous acquaintance with logic is required; nonetheless a willingness to master technicalities and to work at a certain level of abstraction is desirable

Fall 2024: PHIL UN3411

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**PHIL GU4170 MEDIEVAL PHILOSOPHY. 3.00 points.**

**PHIL GU4431 INTRODUCTION TO SET THEORY. 3.00 points.**

Basic set-theoretic operations and constructions. The axiom of choice. Infinitary arithmetic, ordinal and cardinal. Russell's paradox, Cantor's paradoxes, and other set-theoretic paradoxes. The continuum hypothesis. Axiomatic set theory. Other topics as time permits.

**PHIL GU4337 EARLY TWENTIETH CENT PHILOS. 3.00 points.**

**PHIL GU4810 LATTICES AND BOOLEAN ALGEBRA. 3.00 points.**

Prerequisites: PHIL UN3411 or 4801

Prerequisites: PHIL UN3411 or 4801 This course is designed as an introduction to lattices and Boolean algebras. In the first part of the course, we study partial orders and view lattices both as partial orders and as algebraic structures. We study some basic constructions involving sublattices, products of lattices, and homomorphic images of lattices. In the second part of the course, we study Boolean algebras, with an aim to proving several representation theorems: first, a representation theorem for finite Boolean algebras, and toward the end of the course, the famous Stone Representation Theorem. We end the course with a look at the connection between classical mereology (or the theory of parthood) and complete Boolean algebras

**Spring 2025: PHIL GU4810**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 4810	001/17225	T 6:10pm - 8:00pm 507 Philosophy Hall	Tamar Lando	3.00	11/20

**PHIL GU4481 PHILOSOPHY OF LANGUAGE. 3.00 points.****PHIL GU4501 EPISTEMOLOGY. 3.00 points.****PHIL GU4900 TOPICS IN EARLY MODERN PHILOSOPHY. 3.00 points.**

Open to undergraduates with previous work in the history of philosophy and to graduate students. Focuses either on an important topic in the history of early modern philosophy (e.g. skepticism, causation, mind, body) or on the philosophy of a major figure in the period (e.g. Descartes, Leibniz, Spinoza, Gassendi, Conway)

**ECPH GU4950 ECONOMICS # PHILOSOPHY. 4.00 points.**

Open only to economics-philosophy majors who are in their senior year.

Prerequisites: *ECON W3211*, *ECON W3213*, *ECON W3412*. Students will be contacted by the Economics department for pre-enrollment.

Prerequisites: *ECON W3211*, *ECON W3213*, *ECON W3412*. Students will be contacted by the Economics department for pre-enrollment. Explores topics in the philosophy of economics such as welfare, social choice, and the history of political economy. Sometimes the emphasis is primarily historical and sometimes on analysis of contemporary economic concepts and theories

## PHYSICAL EDUCATION AND INTERCOLLEGIATE ATHLETICS

**Departmental Office:** 336 Dodge Physical Fitness Center; 212-854-3439; [perec.columbia.edu](mailto:perec.columbia.edu)

**Director of Undergraduate Studies:** Director of Physical Education and Recreation, Jeffrey Ryder, 332 Dodge Physical Fitness Center; [phed@columbia.edu](mailto:phed@columbia.edu); 212-854-4001

**Departmental Administrative contact:** 212-854-3439

The Physical Education Department offers a variety of activities in the areas of aquatics, fitness, martial arts, individual/dual sports, team sports, and outdoor education. Most of the activities are designed for the beginner level. Intermediate/advanced courses are offered at selected times. All courses are designed to develop and/or improve skills and knowledge, increase physical activity, and promote well-being. Courses aim

to promote holistic, sustainable opportunities to engage with physical activity and physical well-being concepts. A major goal is to provide a positive, enjoyable experience for students, leading to the development of an active, healthy lifestyle.

The majority of the courses are offered in ten time preferences. However, there are early morning classes, Friday-only classes at Baker Athletics Complex, and specialty courses that utilize off-campus facilities during weekends. A description of the scheduled activities for each time preference is included in the Department of Physical Education [website](#).

A list of the activities for the term is included in the *Directory of Classes* and on the website. Students may select physical education courses during online registration. Students may register for only one section of Physical Education each term.

## PHYSICAL EDUCATION REQUIREMENT

Successful completion of two Physical Education courses is a Columbia College requirement that students are advised to complete by the end of the first year. Students may elect to take one or two additional terms of Physical Education Activities for credit. Students receive 1 point of academic credit for each completed term of physical education for a possible total of 4 points.

For more information on this requirement, please visit the *Core Curriculum*—Physical Education Requirement section of the bulletin.

## MEDICAL CONDITIONS

Students who request to have their Physical Education activities limited or waived because of a medical condition should contact the Director of Undergraduate Studies for Physical Education. In some situations, students may require an evaluation by a clinician at Health Services at Columbia in order to receive a waiver. In consultation with the Director of Physical Education, students may be instructed to contact Dr. Melanie Bernitz, Senior Vice President for Columbia Health, who facilitates these evaluations.

## GRADING

The grading in all physical education courses is Pass/Fail. Students who fulfill the attendance and participation requirement receive a Pass. Those who miss more than the permissible number of classes and who do not drop the course by the official drop deadline receive a W (Withdrawal), UW (Unofficial Withdrawal), or F (Fail). Those who anticipate attendance problems should contact their instructors or the Director of Undergraduate Studies for Physical Education.

## SWIM TEST

All students are also required to pass a swimming test or take beginning swimming for one term to fulfill the swimming requirement. A waiver of the swimming test requirement may

be granted if a student has a disability certified by a medical authority that precludes swimming. Students may also request waivers and accommodations on the grounds of religious observance or gender identity/expression. All requests for waivers and accommodations are reviewed by the Director of Physical Education.

## INTERCOLLEGIATE ATHLETICS

Students who are participating on an intercollegiate team should register for the appropriate team section of PHED UN1005 INTERCOLLEGIATE ATHLETICS. Intercollegiate athletes are responsible for taking the swimming test. Student-athletes who cannot pass the test should take beginner swimming at the first possible opportunity.

Student-athletes who register correctly and participate on a team receive a Pass; those who drop off a team in midterm and still wish to receive academic credit must notify the Physical Education Office and be placed in an activity to complete the attendance requirement. Otherwise, the student must officially drop *Intercollegiate Athletics* or they receive a mark of W (Withdrawal).

## DIRECTOR OF PHYSICAL EDUCATION PROGRAMS

## PHYSICS

### THE PHYSICS DEPARTMENT:

Department website: <https://www.physics.columbia.edu/>

Office location: 704 Pupin Hall

Office contact: 212-854-3366 (Ashley Delphia, Dir. of Academic Administration)

Director of Undergraduate Studies: Jeremy Dodd, [jrd4@columbia.edu](mailto:jrd4@columbia.edu), 212-854-3969

Undergraduate Administrator: Giuseppina (Joey) Cambareri, [gc2019@columbia.edu](mailto:gc2019@columbia.edu), 212-854-3348

### THE STUDY OF PHYSICS

The physics major offers a rigorous preparation in the intellectual developments of modern physics, along with extensive exposure to the mathematical and experimental techniques required to conduct basic and applied research in physics. For the major, the department offers a set of required courses well-suited to prepare students for the most rigorous course of graduate study. These can be supplemented by elective courses in a variety of advanced topics. Although most majors go on to graduate work in physics, the intellectual skills acquired in the study of physics can also provide the basis for work in a variety of other scientific and nonscientific areas.

Research is an extremely important component of the Columbia physics experience. Because the department has a very small student-to-faculty ratio, essentially all physics majors and

concentrators engage in experimental, computational, or theoretical research under the close supervision of a faculty member during part, if not all, of their time at Columbia.

Current programs of study include:

The Physics major

The Astrophysics major

The Biophysics major

The Chemical Physics major

As of Fall 2024, the Department does not offer a Minor in Physics, however a Minor will likely be introduced for the 2025-2026 academic year.

## STUDENT ADVISING

### Consulting Advisers

Students should contact the Director of Undergraduate Studies (DUS) for all advising questions and concerns, however please see the information below that describes appropriate advising contacts for the interdisciplinary majors in Astrophysics, Biophysics and Chemical Physics.

For the Physics major: Jeremy Dodd, [jrd4@columbia.edu](mailto:jrd4@columbia.edu).

For the Astrophysics major: Jeremy Dodd, [jrd4@columbia.edu](mailto:jrd4@columbia.edu), and students should also consult with the Director of Undergraduate Studies in the Astronomy Department. For the Biophysics major: students should consult with the Director of Undergraduate Studies for Biophysics in the Biological Sciences Department.

For the Chemical Physics major: students should consult with the Director of Undergraduate Studies in the Chemistry Department.

The Physics DUS typically holds walk-in office hours each week during the academic year (fall and spring semesters), and may be also be contacted by email. For new students, a Physics Department information session is held during NSOP each fall to help students determine which introductory physics sequence is most appropriate for their program of study. Each spring, the Department hosts an Open House, which focuses on the majors offered in the Department but also provides an opportunity to learn more about research opportunities.

For declared Physics and Astrophysics majors, it is recommended that students consult with the Physics DUS at least once per semester.

### Enrolling in Classes

The Physics Department offers four introductory physics sequences.

- PHYSUN1201, PHYSUN1202 primarily for premed students;
- PHYSUN1401, PHYSUN1402, PHYSUN1403 primarily for SEAS engineering students;

- PHYSUN1601, PHYSUN1602, PHYSUN2601 primarily for physics, applied physics and physical science majors;
- PHYSUN2801, PHYSUN2802 primarily for physics and applied physics majors who have advanced placement in physics and mathematics.

The department can provide more detailed information about these sequences. Note that there are calculus pre-requisites or co-requisites in most cases. Enrollment in the PHYSUN2801, PHYSUN2802 Accelerated Physics sequence is by placement only. Students who have a score of 5 on AP Calculus BC and a score of at least one 4 and one 5 on the two AP Physics C exams place automatically. Other students should take the placement exam during the NSOP Physics Information Session.

Please note that all of the above sequences start in the fall semester (only) each year, with the addition of just one “off-sequence” (spring, summer) offering of the PHYSUN1201, PHYSUN1202 General Physics sequence for premed students.

## Preparing for Graduate Study

A majority of graduating Physics majors pursue graduate study at either the PhD or Masters levels. The Physics major is designed to provide a strong foundation for students who may continue to pursue a PhD. Aside from all of the required courses for the major, students who will pursue graduate study are recommended to take the PHYSGU4003 Advanced Mechanics elective, and they may also choose to take some graduate level courses if they have sufficient preparation.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor [or special program or concentration] must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

### Advanced Placement

The department grants 6 credits for a score of 4 or 5 on BOTH the AP Physics 1 and AP Physics 2 exams, but you are not entitled to any exemptions.

The department grants 3 credits for a score of 4 or 5 on the AP Physics C/MECH exam, but you are not entitled to any exemptions. The amount of credit is reduced to 0 if you take PHYSUN 1001, 1201, 1401 or 1601.

The department grants 3 credits for a score of 4 or 5 on the AP Physics C/E&M exam, but you are not entitled to any exemptions. The amount of credit is reduced to 0 if you take PHYSUN 1001, 1202, 1402 or 1602.

AP, IB or A-level Physics credits are not impacted if you take PHYSUN 2801 or 2802.

Students may earn a maximum of 6 credits in Physics.

## Barnard College Courses

No Barnard courses are accepted as requirements for the Physics major. For the Astrophysics major, see the requirements for that program in the Bulletin.

## Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor [or special program or concentration].

All transfer courses proposed for consideration for the Physics major must be reviewed by the Physics DUS. Students should provide detailed syllabi for review.

## Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor [or special program or concentration], the DUS will need to confirm that they can be used toward requirements in the major/minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.

Physics and Astrophysics majors who are considering studying abroad should consult with the respective DUSes well in advance, since careful planning is required to make sure that students can complete all required courses.

## Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin. No physics

courses currently offered in Summer Term are relevant for the Department's majors.

## CORE CURRICULUM CONNECTIONS

Students may be interested in course offerings in this department that can be taken in fulfillment of the Science requirement of the Core Curriculum. See the list of approved courses for the requirement in this *Bulletin*.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

Information to be added

## DEPARTMENT HONORS AND PRIZES

Information to be added

## OTHER IMPORTANT INFORMATION

The department offers a stand-alone one-semester course for nonscience majors, one introductory sequence in physics intended primarily for preprofessional students, and three introductory sequences in physics for engineering and physical science majors. Students are given credit for courses from only one of the different sequence groups.

Mixing courses across the sequences is strongly discouraged; however, physics majors who begin their studies with PHYS UN1401 INTRO TO MECHANICS # THERMO - PHYS UN1402 INTRO ELEC/MAGNETISM # OPTCS should take PHYS UN2601 PHYSICS III:CLASS/QUANTUM WAVE as the third-semester course.

## Introductory Sequences

### Nonscience Majors:

PHYS UN1001      PHYSICS FOR POETS

### Preprofessional Students:

PHYS UN1201      GENERAL PHYSICS I  
& PHYS UN1202      and GENERAL PHYSICS II

Accompanying laboratory course:

PHYS UN1291      GENERAL PHYSICS I LAB  
& PHYS UN1292      and GENERAL PHYSICS II  
LABORATORY

### Engineering and Physical Science Majors:

Select one of the following sequences with accompanying laboratory course:

#### Sequence A:

PHYS UN1401      INTRO TO MECHANICS #  
& PHYS UN1402      THERMO  
& PHYS UN1403      and INTRO ELEC/MAGNETISM  
# OPTCS  
and INTRO-CLASSCL #  
QUANTUM WAVES

#### Sequence B:

PHYS UN1601  
& PHYS UN1602  
& PHYS UN2601

PHYSICS I:MECHANICS/  
RELATIVITY  
and PHYSICS II: THERMO,  
ELEC # MAG  
and PHYSICS III:CLASS/  
QUANTUM WAVE

#### Sequence C:

PHYS UN2801      ACCELERATED PHYSICS I  
& PHYS UN2802      and ACCELERATED PHYSICS  
II

Sequence A is a self-contained group of three courses, while Sequences B and C anticipate more course work in the Physics Department. Students considering a physics major are strongly encouraged to begin one of these sequences in their first year.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before Fall 2023 may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

As of Fall 2024, the Department does not offer a Minor in Physics, however a Minor will likely be introduced for the 2025-2026 academic year.

All students who are considering majoring in Physics or in Astrophysics are strongly encouraged to begin a relevant

introductory physics sequence in their first semester. In general, the Physics major may not be completed in fewer than six semesters; most students take seven or eight semesters to satisfy all requirements.

## Course Numbering Structure

Course numbers in the Physics Department broadly follow the standard undergraduate schema. Most introductory (first-year) courses are at the 1000- level, with the exception of the PHYSUN2801, PHYSUN2802 Accelerated Physics sequence. The Physics major in particular is rather well-defined in terms of requirements and when they should/could be taken, given necessary pre-requisites and so is rather “sequential”. Note that there are two required two-semester sequences: PHYSUN3007, PHYSUN3008 and PHYSGU4021, PHYSGU4022, which in general should be taken in the fall and spring of a given academic year.

## Guidance for First-Year Students

All students who are considering majoring in Physics or in Astrophysics are strongly encouraged to begin a relevant introductory physics sequence in their first semester.

The Physics Department offers four introductory physics sequences.

PHYSUN1201, PHYSUN1202 primarily for premed students;

PHYSUN1401, PHYSUN1402, PHYSUN1403 primarily for SEAS engineering students;

PHYSUN1601, PHYSUN1602, PHYSUN2601 primarily for physics, applied physics and physical science majors;

PHYSUN2801, PHYSUN2802 primarily for physics and applied physics majors who have advanced placement in physics and mathematics.

The department can provide more detailed information about these sequences. Note that there are calculus pre-requisites or co-requisites in most cases. Enrollment in the PHYSUN2801, PHYSUN2802 Accelerated Physics sequence is by placement only. Students who have a score of 5 on AP Calculus BC and a score of at least one 4 and one 5 on the two AP Physics C exams place automatically. Other students should take the placement exam during the NSOP Physics Information Session.

Please note that all of the above sequences start in the fall semester (only) each year, with the addition of just one “off-sequence” (spring, summer) offering of the PHYSUN1201, PHYSUN1202 General Physics sequence for premed students.

## Guidance for Transfer Students

Information to be added

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

All programs of study require completion of at least one of the introductory physics sequences (described elsewhere).

### Major in Physics

#### Physics Courses

The major in physics requires a minimum of 41 points in physics courses, including:

#### Introductory Sequences

Select one of the following sequences:

Sequence A: Students with a limited background in high school physics may elect to take:

PHYS UN1401 & PHYS UN1402 & PHYS UN2601	INTRO TO MECHANICS # THERMO and INTRO ELEC/MAGNETISM # OPTCS and PHYSICS III:CLASS/ QUANTUM WAVE
---	---

Sequence B:

PHYS UN1601 & PHYS UN1602 & PHYS UN2601	PHYSICS I:MECHANICS/ RELATIVITY and PHYSICS II: THERMO, ELEC # MAG and PHYSICS III:CLASS/ QUANTUM WAVE
---	---

Sequence C: Students with advanced preparation in both physics and mathematics may be eligible to take:

PHYS UN2801 & PHYS UN2802	ACCELERATED PHYSICS I and ACCELERATED PHYSICS II
------------------------------	--

#### Core Physics Courses

PHYS UN3003	MECHANICS
PHYS UN3007	ELECTRICITY-MAGNETISM
PHYS UN3008	ELECTROMAGNETIC WAVES # OPTICS
PHYS GU4021	QUANTUM MECHANICS I
PHYS GU4022	QUANTUM MECHANICS II
PHYS GU4023	THERMAL # STATISTICAL PHYSICS

#### Elective Courses

Select at least six points of the following courses:

PHYS UN3002	From Quarks To the Cosmos: Applications of Modern Physics
PHYS GU4003	ADVANCED MECHANICS
PHYS GU4011	PARTICLE ASTROPHYS # COSMOLOGY
PHYS GU4018	SOLID STATE PHYSICS
PHYS GU4019	MATHEMATICAL METHODS OF PHYSICS
PHYS GU4040	INTRO TO GENERAL RELATIVITY

PHYS GU4050	Introduction to Particle Physics
-------------	----------------------------------

With the permission of the Director of Undergraduate Studies, 4000- or 6000-level courses offered in this or other science departments

#### Laboratory Work at the Intermediate Level \*

Select one of the following options:

Option 1:

PHYS UN3081	INTERMEDIATE LABORATORY WORK (two semesters)
-------------	--

PHYS UN3083	ELECTRONICS LABORATORY
-------------	------------------------

Option 2:

PHYS UN3081	INTERMEDIATE LABORATORY WORK (three semesters)
-------------	--

#### Senior Seminar

PHYS UN3072	SEM IN CURRENT RES. PROBLEMS
-------------	---------------------------------

\* Approved experimental work with a faculty research group may satisfy one semester of the laboratory requirement.

### Mathematics Courses

Calculus through MATH UN1202 CALCULUS IV or MATH UN1208 HONORS MATHEMATICS B; and MATH UN3027 Ordinary Differential Equations or the equivalent.

Recommended cognate courses: MATH UN2010 LINEAR ALGEBRA, MATH UN3007 COMPLEX VARIABLES, and MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS.

### Major in Astrophysics

For astrophysics requirements please see:

<http://bulletin.columbia.edu/columbia-college/departments-instruction/astrophysics/#requirementstext>

### Major in Biophysics

For biophysics requirements please see:

<http://bulletin.columbia.edu/columbia-college/departments-instruction/biological-sciences/#requirementstext>

### Major in Chemical Physics

For chemical physics requirements please see:

<http://bulletin.columbia.edu/columbia-college/departments-instruction/chemistry/#requirementstext>

### Minor in Physics

As of Fall 2024, the Department does not offer a Minor in Physics, however a Minor will likely be introduced for the 2025-2026 academic year.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before Fall 2023. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Concentrations are not available to students who entered Columbia in or after Fall 2024.

### Concentration in Physics

The concentration in physics requires a minimum of 24 points in physics, including one of the introductory sequences.

#### **PHYS UN1001 PHYSICS FOR POETS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school algebra.

Prerequisites: high school algebra. This course does not fulfill the physics requirement for admission to medical school. No previous background in physics is expected. An introduction to physics taught through the exploration of the scientific method, and the application of physical principles to a wide range of topics from quantum mechanics to cosmology

#### **PHYS UN1018 WEAPONS OF MASS DESTRUCTION.**

**3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school science and math.

Prerequisites: high school science and math. A review of the history and environmental consequences of nuclear, chemical, and biological weapons of mass destruction (WMD); of how these weapons work, what they cost, how they have spread, how they might be used, how they are currently controlled by international treaties and domestic legislation, and what issues of policy and technology arise in current debates on WMD. What aspects of the manufacture of WMD are easily addressed, and what aspects are technically challenging? It may be expected that current events/headlines will be discussed in class

#### **PHYS UN1111 ORIGINS AND MEANING. 3.00 points.**

This course is a one-semester journey across cosmological history, from the beginning of time to something akin to its end. We will explore the origin of inanimate physical structures (the cosmos as a whole, as well as that of galaxies, stars, planets, particles, atoms and complex molecules), the origin of life (replicating molecules, the first cells, as well as more complex life forms), the origin of mind (self-reflective conscious awareness) and the origin of culture (language, myth, religion, art, and science). We will then consider what science in particular tells us about the very far future, where we will

encounter the likely demise of all complex matter, all life and all consciousness. In the face of such disintegration we will examine the nature of value and purpose. We will recognize that the deepest understanding of reality emerges from blending all of the accounts we discuss—from the reductionist to the humanist to the cosmological—and only through such amalgamation can we fully grasp the long-standing human search for meaning

#### **Fall 2024: PHYS UN1111**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1111	001/15432	F 2:10pm - 5:00pm 702 Hamilton Hall	Brian Greene	3.00	63/60

#### **PHYS UN1151 Origins and Meaning: Independent Study.**

**1.00 point.**

The proposed independent study is a one-semester course that is in dialogue with the Origins and Meaning, Physics UN1111. Students in the independent study will further explore various issues raised in Origins and Meaning by (a) meeting once per week with the instructor, (b) completing a selection of readings and viewings, and (c) completing an end-of-term writing assignment

#### **Fall 2024: PHYS UN1151**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1151	001/21613		Brian Greene	1.00	17/60

#### **PHYS UN1201 GENERAL PHYSICS I. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: some basic background in calculus or be concurrently taking *MATH V1101x* Calculus I.

Prerequisites: some basic background in calculus or be concurrently taking MATH UN1101 Calculus I. The accompanying laboratory is PHYS UN1291-UN1292 The course will use elementary concepts from calculus. The accompanying laboratory is PHYS UN1291 - UN1292. Basic introduction to the study of mechanics, fluids, thermodynamics, electricity, magnetism, optics, special relativity, quantum mechanics, atomic physics, and nuclear physics

#### **Fall 2024: PHYS UN1201**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1201	001/14617	M W 11:40am - 12:55pm 301 Pupin Laboratories	John Parsons	3.00	166/180
PHYS 1201	002/14618	T Th 2:40pm - 3:55pm 301 Pupin Laboratories	Cory Dean	3.00	154/180

#### **Spring 2025: PHYS UN1201**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1201	001/13441	M W 4:10pm - 5:25pm 428 Pupin Laboratories	Gabriel Perez-Giz	3.00	127/145

**PHYS UN1202 GENERAL PHYSICS II. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *PHYS W1201*, and some background in calculus or be concurrently taking *MATH V1101x* Calculus I.

Prerequisites: This course will use elementary concepts from calculus. Students should therefore have had some high school calculus, or be concurrently enrolled in MATH UN1101. Taken with accompanying lab PHYS UN1291- PHYS UN1292, the sequence PHYS UN1201- PHYS UN1202 satisfies requirements for medical school. Electricity, magnetism, optics, and modern physics

**Spring 2025: PHYS UN1202**

### PHYS UN1601 PHYSICS I:MECHANICS/RELATIVITY. 3.50 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: Corequisite: MATH UN1102 Calculus II or equivalent. Fundamental laws of mechanics, kinematics and dynamics, work and energy, rotational dynamics, oscillations, gravitation, fluids, introduction to special relativity and relativistic kinematics. The course is preparatory for advanced work in physics and related fields

Fall 2024: PHYS UN1601

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1601 001/14656	T Th 10:10am - 11:25am	428 Pupin Laboratories	Jeremy Dodd	3.50	119/150

### PHYS UN1602 PHYSICS II: THERMO, ELEC # MAG. 3.50 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PHYS UN1601 *PHYS W1601*.

Prerequisites: PHYS UN1601 Corequisite: MATH UN1201 or equivalent. Temperature and heat, gas laws, the first and second laws of thermodynamics, kinetic theory of gases, electric fields, direct currents, magnetic fields, alternating currents,

electromagnetic waves. The course is preparatory for advanced work in physics and related fields

Spring 2025: PHYS UN1602

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 1602 001/13447	T Th 10:10am - 11:25am	428 Pupin Laboratories	Kerstin Perez	3.50	107/140

### PHYS UN1603 PHYSICS I:MECHANICS/RELATIVITY-REC. 0.00 points.

Fall 2024: PHYS UN1603

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### PHYS UN2001 SPECIAL RELATIVITY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a working knowledge of high school algebra, trigonometry, and physics. Some familiarity with calculus is useful but not essential.

This course is a comprehensive, one-semester introduction to the essential ideas and mathematical structures underlying Einstein's Special Theory of Relativity. Among the topics covered will be: the relativity of simultaneity, time dilation, Lorentz contraction, velocity combination laws, time dilation over large distances, the Lorentz transformation, spacetime

diagrams, the basic (seeming) paradoxes of special relativity, relativistic equations of motion and  $E = mc^2$ .

**PHYS UN2601 PHYSICS III:CLASS/QUANTUM WAVE. 3.50 points.**

Prerequisites: PHYS UN1402 or PHYS UN1602 *PHYS W1402* or *W1602*.

Prerequisites: PHYS UN1402 or PHYS UN1602 Corequisite: MATH UN1202 or equivalent. Classical waves and the wave equation, geometrical optics, interference and diffraction, Fourier series and integrals, normal modes, wave-particle duality, the uncertainty principle, basic principles of quantum mechanics, energy levels, reflection and transmission coefficients, the harmonic oscillator. The course is preparatory for advanced work in physics and related fields

Fall 2024: PHYS UN2601

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2601	001/14657	T Th 2:40pm - 3:55pm 329 Pupin Laboratories	James McIver	3.50	94/120

**PHYS UN2603 Physics III: Class/Quantum Wave - Rec. 0.00 points.**

Fall 2024: PHYS UN2603

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2603	001/15305	M 5:10pm - 6:00pm 103 Knox Hall	James McIver	0.00	20/25
PHYS 2603	002/15306	T 5:10pm - 6:00pm 313 Pupin Laboratories	James McIver	0.00	22/25
PHYS 2603	003/15307	T 6:10pm - 7:00pm 313 Pupin Laboratories	James McIver	0.00	12/25
PHYS 2603	004/15308	W 5:10pm - 6:00pm 222 Pupin Laboratories	James McIver	0.00	24/25
PHYS 2603	005/15309	W 6:10pm - 7:00pm 222 Pupin Laboratories	James McIver	0.00	15/25

**PHYS UN2699 Experiments in Classical and Modern Physics. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PHYS UN1601 or PHYS UN1401) and (PHYS UN1602 or PHYS UN1402) and PHYS UN2601 *PHYS W1601* (or *W1401*), *W1602* (or *W1402*), and *W2601*.

Laboratory work associated with the three prerequisite lecture courses. Experiments in mechanics, thermodynamics, electricity, magnetism, optics, wave motion, atomic physics, and nuclear physics.

**PHYS UN2801 ACCELERATED PHYSICS I. 4.50 points.**

Prerequisites: Advanced Placement in physics and mathematics, or the equivalent, and the instructor's permission. (A special placement meeting is held during Orientation.)

Prerequisites: Advanced Placement in physics and mathematics, or the equivalent, and the instructor's permission. (A special placement meeting is held during Orientation.) This accelerated two-semester sequence covers the subject matter of PHYS UN1601, PHYS UN1602 and PHYS UN2601, and is intended for those students who have an exceptionally strong background in both physics and mathematics. The course is preparatory for advanced work in physics and related fields. There is no accompanying laboratory; however, students are encouraged to take the intermediate laboratory, PHYS UN3081, in the following year

Fall 2024: PHYS UN2801

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2801	001/14658	T Th 10:10am - 12:00pm 329 Pupin Laboratories	Yury Levin	4.50	32/100

**PHYS UN2802 ACCELERATED PHYSICS II. 4.50 points.**

Prerequisites: PHYS UN2801 *PHYS W2801*.

Prerequisites: PHYS UN2801 This accelerated two-semester sequence covers the subject matter of PHYS UN1601, PHYS UN1602 and PHYS UN2601, and is intended for those students who have an exceptionally strong background in both physics and mathematics. The course is preparatory for advanced work in physics and related fields. There is no accompanying laboratory; however, students are encouraged to take the intermediate laboratory, PHYS UN3081, in the following year

Spring 2025: PHYS UN2802

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 2802	001/13448	T Th 10:10am - 12:00pm 329 Pupin Laboratories	Yury Levin	4.50	27/50
PHYS 2802	AU1/20727	T Th 10:10am - 12:00pm Othr Other	Yury Levin	4.50	1/10

**PHYS UN2803 ACCELERATED PHYSICS I-REC. 0.00 points.**

**PHYS UN2804 ACCELERATED PHYSICS II-REC. 0.00 points.**

Required discussion section for PHYS UN2802 Accelerated Physics II

**PHYS UN3002 From Quarks To the Cosmos: Applications of Modern Physics. 3.5 points.**

This course reinforces basic ideas of modern physics through applications to nuclear physics, high energy physics, astrophysics and cosmology. The ongoing Columbia research programs in these fields are used as practical examples. The course is preparatory for advanced work in physics and related fields.

**PHYS UN3003 MECHANICS. 3.00 points.**

Prerequisites: general physics, and differential and integral calculus.

Prerequisites: general physics, and differential and integral calculus. Newtonian mechanics, oscillations and resonance, conservative forces and potential energy, central forces, non-inertial frames of reference, rigid body motion, an introduction to Lagrange's formulation of mechanics, coupled oscillators, and normal modes

**Spring 2025: PHYS UN3003**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3003	001/13449	T Th 1:10pm - 2:25pm 329 Pupin Laboratories	Cory Dean	3.00	67/75

**PHYS UN3007 ELECTRICITY-MAGNETISM. 3.00 points.**

Prerequisites: general physics, and differential and integral calculus.

Prerequisites: general physics, and differential and integral calculus. Electrostatics and magnetostatics, Laplace's equation and boundary-value problems, multipole expansions, dielectric and magnetic materials, Faraday's law, AC circuits, Maxwell's equations, Lorentz covariance, and special relativity

**Fall 2024: PHYS UN3007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3007	001/14659	M W 10:10am - 11:25am 329 Pupin Laboratories	William Zajc	3.00	69/100

**PHYS UN3008 ELECTROMAGNETIC WAVES # OPTICS. 3.00 points.**

Prerequisites: PHYS UN3008 *PHYS W3007*.

Prerequisites: PHYS UN3008 Maxwell's equations and electromagnetic potentials, the wave equation, propagation of plane waves, reflection and refraction, geometrical optics, transmission lines, wave guides, resonant cavities, radiation, interference of waves, and diffraction

**Spring 2025: PHYS UN3008**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3008	001/13450	M W 10:10am - 11:25am 329 Pupin Laboratories	William Zajc	3.00	66/75

**PHYS UN3072 SEM IN CURRENT RES. PROBLEMS. 2.00 points.**

A detailed study of a selected field of active research in physics. The motivation, techniques, and results obtained to the present, as well as the difficulties and unsolved problems. For Physics majors only. Priority given to seniors; juniors by permission of the instructor

**Fall 2024: PHYS UN3072**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3072	001/14660	M 5:00pm - 6:30pm 414 Pupin Laboratories	Kerstin Perez	2.00	27/26

**PHYS UN3081 INTERMEDIATE LABORATORY WORK. 2.00 points.**

May be repeated for credit by performing different experiments. The laboratory has available fifteen individual experiments, of which two are required per 2 points.

Prerequisites: phys UN2601 or phys un2802 *PHYS W2601* or *PHYS W2802*. Primarily for junior and senior physics majors; other majors must obtain the instructor's permission.

Prerequisites: phys UN2601 or phys un2802 Primarily for junior and senior physics majors; other majors must obtain the instructor's permission. Each experiment is chosen by the student in consultation with the instructor. Each section meets one afternoon per week, with registration in each section limited by the laboratory capacity. Experiments (classical and modern) cover topics in electricity, magnetism, optics, atomic physics, and nuclear physics

**Fall 2024: PHYS UN3081**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3081	001/14661	W 1:10pm - 5:00pm 6th Flr Pupin Laboratories	Elena Aprile	2.00	10/14
PHYS 3081	002/14662	Th 1:10pm - 5:00pm 6th Flr Pupin Laboratories	Elena Aprile	2.00	14/14
PHYS 3081	003/14663	F 1:10pm - 5:00pm 6th Flr Pupin Laboratories	Morgan May	2.00	14/15

**Spring 2025: PHYS UN3081**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3081	003/13451	F 1:10pm - 5:00pm 6th Flr Pupin Laboratories	Morgan May	2.00	16/16

**PHYS UN3083 ELECTRONICS LABORATORY. 3.00 points.**

Enrollment limited to the capacity of the laboratory.

Prerequisites: PHYS UN3003 or PHYS UN3007 *PHYS W3003* or *W3007*. May be taken before or concurrently with this course.

Prerequisites: PHYS UN3003 or PHYS UN3007 May be taken before or concurrently with this course. A sequence of experiments in solid-state electronics, with introductory lectures

**Spring 2025: PHYS UN3083**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3083	001/13452	M W 1:10pm - 4:00pm 5th Flr Pupin Laboratories	John Parsons	3.00	13/14

**PHYS UN3084 Quantum Simulation and Computing Lab. 3.00 points.**

The "Quantum Simulation and Computing Lab" will give students hands-on experience in quantum optics, quantum simulation and quantum computing. The course combines lectures, tutorials, and two lab sections. In one lab section,

students will do experiments with entangled photons. In the second lab section, students will program quantum computers and run algorithms on them using the IBM Qiskit platform. The course starts with a recap of linear algebra and quantum mechanics, followed by an introduction to quantum optics and quantum information. Two-level systems, Bloch sphere, quantum gates, and elementary quantum algorithms will be discussed. Quantum teleportation and quantum key distribution will be introduced as applications of entanglement. The lecture content will be directly applied in experiments with entangled photons. In the following, state-of-the-art quantum algorithms will be discussed, related to cutting-edge research results in quantum computing. This includes quantum Fourier transform, quantum simulation of the Schroedinger equation, and the variational quantum eigensolver (VQE) algorithm. During the course students will do one experimental project with entangled photons and one quantum programming project. Students will be guided to implement a quantum algorithm of their choice and run it on a quantum computer (IBM, IonQ, QuEra)

#### Spring 2025: PHYS UN3084

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3084	001/13459	W F 1:10pm - 2:25pm 307 Uris Hall	Sebastian Will	3.00	17/24

### PHYS UN3500 SUPERVISED READINGS IN PHYSICS. 3.00 points.

Prerequisites: the written permission of the faculty member who agrees to act as supervisor, and the director of undergraduate studies permission. Readings in a selected field of physics under the supervision of a faculty member. Written reports and periodic conferences with the instructor

#### Fall 2024: PHYS UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3500	001/14664		Jeremy Dodd	3.00	1/5

#### Spring 2025: PHYS UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3500	001/13453		Jeremy Dodd	3.00	1/10

### PHYS UN3900 SUPERVISED INDIVIDUAL RESEARCH. 3.00-5.00 points.

Prerequisites: Permission of the departmental representative required. For specially selected students, the opportunity to do a research problem in contemporary physics under the supervision of a faculty member. Each year several juniors are chosen in the spring to carry out such a project beginning in the autumn term. A detailed report on the research is presented by the student when the project is complete

#### Fall 2024: PHYS UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3900	001/14665		Jeremy Dodd	3.00-5.00/20	

#### Spring 2025: PHYS UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 3900	001/13454		Jeremy Dodd	3.00-5.00/20	

### PHYS GU4003 ADVANCED MECHANICS. 3.00 points.

Prerequisites: differential and integral calculus, differential equations, and *PHYS W3003* or the equivalent.

Prerequisites: differential and integral calculus, differential equations, and *PHYS UN3003* or the equivalent. Lagranges formulation of mechanics, calculus of variations and the Action Principle, Hamiltons formulation of mechanics, rigid body motion, Euler angles, continuum mechanics, introduction to chaotic dynamics

#### Spring 2025: PHYS GU4003

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4003	001/13455	T Th 1:10pm - 2:25pm 420 Pupin Laboratories	Brian Cole	3.00	27/50

### PHYS GU4011 PARTICLE ASTROPHYS # COSMOLOGY. 3.00 points.

Prerequisites: (*PHYS UN1403* or *PHYS UN2601* or *PHYS UN2802*) and (*MATH UN1202* or *MATH UN1208*)

Prerequisites: (*PHYS UN1403* or *PHYS UN2601* or *PHYS UN2802*) and (*MATH UN1202* or *MATH UN1208*) students are recommended but not required to have taken *PHYS UN3003* and *PHYS UN3007*. An introduction to the basics of particle astrophysics and cosmology. Particle physics - introduction to the Standard Model and supersymmetry/higher dimension theories; Cosmology – Friedmann-Robertson-Walker line element and equation for expansion of universe; time evolution of energy/matter density from the Big Bang; inflationary cosmology; microwave background theory and observation; structure formation; dark energy; observational tests of geometry of universe and expansion; observational evidence for dark matter; motivation for existence of dark matter from particle physics; experimental searches of dark matter; evaporating and primordial black holes; ultra-high energy phenomena (gamma-rays and cosmic-rays)

### PHYS GU4012 STRING THEORY. 3.00 points.

Prerequisites: *PHYS UN3003* and *PHYS UN3008* and *PHYS GU4021* *PHYS W3003*, *PHYS W3008*, *PHYS W4021*. *PHYS W4023* would be helpful but is not required. Students should have some familiarity with tools for graphical presentation and numeric problem solving such as Mathematica and/or MatLab. This course is intended as an introduction to string theory for undergraduates. No advanced graduate-level preparation is assumed, and the material will be covered at (no higher than) the advanced undergraduate level. Advanced topics such as supersymmetry, T-duality, and covariant quantization will not be covered. The focus will be on the dynamics of classical and quantum mechanical strings, with an emphasis on integrating undergraduate material in classical mechanics, relativity, electrodynamics and quantum mechanics.

**PHYS GU4018 SOLID STATE PHYSICS. 3.00 points.**

Prerequisites: PHYS GU4021 and PHYS GU4023 *PHYS W4021* and *W4023*, or the equivalent.

Prerequisites: PHYS GU4021 and PHYS GU4023 or the equivalent. Introduction to solid-state physics: crystal structures, properties of periodic lattices, electrons in metals, band structure, transport properties, semiconductors, magnetism, and superconductivity

Spring 2025: PHYS GU4018

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4018	001/13456	T Th 2:40pm - 3:55pm 414 Pupin Laboratories	James McIver	3.00	22/30

**PHYS GU4019 MATHEMATICAL METHODS OF PHYSICS. 3.00 points.**

Prerequisites: PHYS UN3003 and PHYS UN3007 and differential and integral calculus; linear algebra; *PHYS W3003* and *PHYS W3007*; or the instructor's permission.

Prerequisites: PHYS UN3003 and PHYS UN3007 and differential and integral calculus; linear algebra; or the instructor's permission. This course will present a wide variety of mathematical ideas and techniques used in the study of physical systems. Topics will include: ordinary and partial differential equations; generalized functions; integral transforms; Green's functions; nonlinear equations, chaos, and solitons; Hilbert space and linear operators; Feynman path integrals; Riemannian manifolds; tensor analysis; probability and statistics. There will also be a discussion of applications to classical mechanics, fluid dynamics, electromagnetism, plasma physics, quantum mechanics, and general relativity

Fall 2024: PHYS GU4019

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4019	001/14666	T Th 10:10am - 11:25am 414 Pupin Laboratories	Alberto Nicolis	3.00	23/40

**PHYS GU4021 QUANTUM MECHANICS I. 3.00 points.**

Prerequisites: PHYS UN3003 and PHYS UN3007 *W3003*, *W3007*, *BC3006*.

Prerequisites: PHYS UN3003 and PHYS UN3007 Formulation of quantum mechanics in terms of state vectors and linear operators. Three dimensional spherically symmetric potentials. The theory of angular momentum and spin. Identical particles and the exclusion principle. Methods of approximation. Multi-electron atoms

Fall 2024: PHYS GU4021

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4021	001/14667	M W 11:40am - 12:55pm 329 Pupin Laboratories	Alfred Mueller, Giuseppina Cambareri	3.00	60/100

**PHYS GU4022 QUANTUM MECHANICS II. 3.00 points.**

Prerequisites: PHYS GU4021. Formulation of quantum mechanics in terms of state vectors and linear operators, three-dimensional spherically symmetric potentials, the theory of angular momentum and spin, time-independent and time-dependent perturbation theory, scattering theory, and identical particles. Selected phenomena from atomic physics, nuclear physics, and elementary particle physics are described and then interpreted using quantum mechanical models

Spring 2025: PHYS GU4022

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4022	001/13457	M W 11:40am - 12:55pm 329 Pupin Laboratories	Alfred Mueller, Giuseppina Cambareri	3.00	69/70

**PHYS GU4023 THERMAL & STATISTICAL PHYSICS. 3.00 points.**

Prerequisites: PHYS GU4021 *PHYS W4021* or the equivalent.

Prerequisites: PHYS GU4021 or the equivalent.

Thermodynamics, kinetic theory, and methods of statistical mechanics; energy and entropy; Boltzmann, Fermi, and Bose distributions; ideal and real gases; blackbody radiation; chemical equilibrium; phase transitions; ferromagnetism

Fall 2024: PHYS GU4023

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4023	001/14668	M W 2:40pm - 3:55pm 420 Pupin Laboratories	Tanya Zelevinsky	3.00	47/50

**PHYS GU4024 Applied Quantum Mechanics. 3 points.**

Prerequisites: (PHYS GU4021 and PHYS GU4022)

In this course, we will learn how the concepts of quantum mechanics are applied to real physical systems, and how they enable novel applications in quantum optics and quantum information. We will start with microscopic, elementary quantum systems – electrons, atoms, and ions – and understand how light interacts with atoms. Equipped with these foundations, we will discuss fundamental quantum applications, such as atomic clocks, laser cooling and ultracold quantum gases – a synthetic form of matter, cooled down to just a sliver above absolute zero temperature. This leads us to manybody quantum systems. We will introduce the quantum physics of insulating and metallic behavior, superfluidity and quantum magnetism – and demonstrate how the corresponding concepts apply both to real condensed matter systems and ultracold quantum gases. The course will conclude with a discussion of the basics of quantum information science – bringing us to the forefront of today's quantum applications.

**PHYS GU4040 INTRO TO GENERAL RELATIVITY. 3.00 points.**

Prerequisites: PHYS UN3003 and PHYS UN3007 *PHYS W3003*, *PHYS W3007* or the equivalent.

Prerequisites: PHYS UN3003 and PHYS UN3007 or the equivalent. Tensor algebra, tensor analysis, introduction to

Riemann geometry. Motion of particles, fluid, and fields in curved spacetime. Einstein equation. Schwarzschild solution; test-particle orbits and light bending. Introduction to black holes, gravitational waves, and cosmological models

Spring 2025: PHYS GU4040

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4040	001/13458	T Th 4:10pm - 5:25pm 214 Pupin Laboratories	James Hill	3.00	15/40

### PHYS GU4050 Introduction to Particle Physics. 3.00 points.

Prerequisites: PHYS UN2601 or PHYS UN2802

Prerequisites: PHYS UN2601 or PHYS UN2802 or the equivalent. This course covers the Standard Model of Particle Physics, including its conception, successes, and limitations, with the goal of introducing upper-level physics majors to the foundations and current status of particle physics as a field of research. Specific topics to be covered include: historical introduction and review of the Standard Model; particle interactions and particle dynamics; relativistic kinematics; Feynman calculus, quantum electrodynamics, quantum chromodynamics, and weak interactions; electroweak unification and the Higgs mechanism; neutrino oscillations; and beyond-standard model physics and evidence. Along the way, students will research special topics and familiarize themselves with particle physics research

Spring 2025: PHYS GU4050

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHYS 4050	001/13978	M W 1:10pm - 2:25pm 414 Pupin Laboratories	Brian Cole	3.00	15/20

### PHYS GU4051 ADVANCED LABORATORY WORK. 2.00 points.

Prerequisites: the instructors permission. The laboratory has 13 available individual experiments, of which two are required per 2 points. Each experiment requires two (four-hour) laboratory sessions. Registration is limited by the laboratory capacity. May be repeated for credit with different experiment selection. Experiments (classical and modern) cover topics in electricity, magnetism, optics, atomic physics, and nuclear physics

### PHYS GU4998 SUPERVISED READINGS. 3.00 points.

## POLITICAL SCIENCE

### THE POLITICAL SCIENCE DEPARTMENT:

Department website: <http://www.polisci.columbia.edu>

Office location: 710 International Affairs Building

Office contact: 212-854-3707

**Director of Undergraduate Studies:** Prof. Shigeo Hirano, 740 International Affairs Building; 212-854-3955; [sh145@columbia.edu](mailto:sh145@columbia.edu)

**Academic Affairs Coordinator:** Owen Mefford, 710 International Affairs Building; 212-854-3707; [obm2106@columbia.edu](mailto:obm2106@columbia.edu)

## THE STUDY OF POLITICAL SCIENCE

The discipline of political science focuses on issues of power and governance and, in particular, on political institutions, both formal and informal. It also focuses on political behavior, political processes, political economy, and state-society relations.

The field consists of four substantive subfields: *American politics*, which covers such topics as national and local politics, elections, and constitutional law; *comparative politics*, which aims at understanding the political systems of other countries, both by studying individual states and by engaging in cross-national comparisons; *international relations*, which deals with the ways that states and other political actors behave in the international arena, including such topics as security, foreign policies, international organizations, and international economic relations; and *political theory*, which analyzes the history of normative political thought as well as of analytic concepts such as the nature of justice or liberty.

Other broad topics, such as “political economy,” or the study of the relationships between economic and political processes, overlap with the subfields, but also constitute a separate program (see below). Methodology, including statistical analysis and formal modeling, also occupies an important place in the discipline.

## STUDENT ADVISING

### Consulting Advisers

Economics-Political Science Advisers:

Economics: Prof. Susan Elmes, Director of Undergraduate Studies, 1006 International Affairs Building; [se5@columbia.edu](mailto:se5@columbia.edu)

Political Science: Prof. Carlo Prato, 718 International Affairs Building; 212-854-3977; [cp2928@columbia.edu](mailto:cp2928@columbia.edu)

Political Science-Statistics Advisers:

Political Science: Prof. Andrew Gelman, 1255 Amsterdam Ave., Room 1016; 212-851-2164; [gelman@stat.columbia.edu](mailto:gelman@stat.columbia.edu)  
Statistics: Prof. Ronald Neath, 612 West 115th Street, Room 612; 212-853-1398; [rcn2112@columbia.edu](mailto:rcn2112@columbia.edu)  
Statistics: Prof. Gabriel Young, 612 West 115th Street, Room 614; 212-853-1395; [gjy2107@columbia.edu](mailto:gjy2107@columbia.edu)

The Department of Political Science offers a variety of advising resources to provide undergraduate majors and minors with the information and support needed to successfully navigate through the program. These resources are described below.

## Undergraduate Advising

The department trains and employs political science Ph.D. candidates who advise undergraduate students regarding program requirements, course selection, and transfer and study-abroad credits. The advisers are also available to discuss research interests, internships, and post-college plans.

Students can reach the advisers by email at [polisciadvising@columbia.edu](mailto:polisciadvising@columbia.edu).

## Requesting a Faculty Adviser

Students may request a faculty adviser by completing the Faculty Adviser Request Form and submitting it during the first two weeks of the semester. The link to the current adviser request form may be found in the undergraduate forms library on the department website.

Students may consult with their faculty adviser for any substantive issue, but the graduate-student advisers must approve planning forms and confirm that requirements have been fulfilled.

## Director of Undergraduate Studies

The director of undergraduate studies oversees the department's undergraduate programs and is available during office hours. While a student's first stop for advising should be the graduate-student advisers, the director of undergraduate studies is available as an additional resource.

## Economics–Political Science Adviser

Economics–political science majors may consult with the economics–political science adviser during office hours. However, students should also see a graduate-student adviser to discuss major requirements and confirm that requirements have been fulfilled.

## Political Science–Statistics Adviser

Political science–statistics majors may consult with the political science–statistics adviser during office hours. However, students should also see a graduate-student adviser to discuss major requirements and confirm that requirements have been fulfilled.

## Enrolling in Classes

Most undergraduate level courses in political science can be registered for by students at any level. However, seminars, which are smaller, more intensive discussion-based courses centered around a unifying theme or topic, require students to join a waitlist and then receive instructor approval to enroll. This is done to ensure that students in the major most in need of these seminars to fulfill their graduation requirements have priority to access them. Further information on seminars can be found on their page on the department website.

Additionally, undergraduate students may not register directly in SSOL for courses offered in the Graduate School of Arts and

Sciences, which are designated by the prefix "GR." However, qualified students may cross-register for GSAS courses, with instructor permission, following steps outlined on the relevant page on the department website.

## Preparing for Graduate Study

Students interested in graduate study offered by the Department of Political Science should consult the department website's resources on graduate programs, which include M.A., B.A./M.A., and Ph.D. programs. Additionally, the graduate-student advisers can offer advice about and help with graduate school applications.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The department grants credit toward the major for work completed under the College Entrance Examination Board (CEEB) Advanced Placement Program. Students receive 3 academic credits and exemption from POLS UN1201 INTRO TO AMERICAN POLITICS or POLS UN1501 INTRO TO COMPARATIVE POLITICS for scores of 5 in the United States and Comparative Government and Politics AP Exams.

### Barnard College Courses

Barnard College courses may fulfill Columbia major requirements; however, Barnard courses do not follow the Columbia numbering system and cannot be used to determine the subfield within which a course falls. Barnard colloquia are open to students with the permission of the instructor; however, Barnard colloquia may not be used to fulfill the seminar requirement, though they may be used to fulfill subfield or elective requirements. Note that admission to Barnard colloquia is by application to the Barnard Political Science Department only. Please consult with the Barnard Political Science Department for more information.

### Transfer Courses

For the political science major, a maximum of three courses in political science may be transferred from other institutions, including study abroad and AP credit. For the economics–political science and political science–statistics interdisciplinary majors, a maximum of two courses in political science may be transferred from other institutions. For the political science minor, a maximum of one course in political science may be transferred from other institutions. All transfer credits must be approved in writing by the Director of Undergraduate Studies or the graduate-student advisers. Students wishing to count transfer credits toward the major or minor should send the graduate-student advisers their transfer credit report, the syllabi of the courses they want to count toward departmental requirements, and a statement of how they want to apply the transfer credits to the requirements.

## Study Abroad Courses

Study abroad programs are one way students can enrich their Columbia education by spending time immersed in other places and cultures. However, for counting study abroad courses for credit toward a political science major or minor, students should consult the above guidance on transfer courses.

## Summer Courses

Political Science (POLS) summer courses taken through the School of Professional Studies are eligible to count towards the major or minor.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

All majors write a research paper in two seminars or in the Honors Seminar. Seminars are small, discussion-based courses focused on a research topic in political science. Each semester the department offers a wide range of seminars in each subfield. Students are expected to attend and participate in these courses, as well as to write an original research paper. Some students will write a senior thesis in the Honors Seminar. Details about writing a senior thesis are below.

### Senior Thesis Coursework and Requirements

Students may elect to write a thesis for consideration for departmental honors as described below.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

The department offers an honors program for a limited number of seniors who want to undertake substantial research projects and write honors theses. The honors thesis is expected to be about 75 pages in length and of exceptional quality.

Honors students perform research as part of a full-year honors seminar (POLS UN3998-POLS UN3999, 8 points total) during their senior year, in place of the seminar requirement for majors. Honors students may, however, take additional seminars to fulfill other course requirements for the major. Theses are due in late March or early April. To be awarded departmental honors, the student must satisfy all the requirements for the major, maintain a 3.6 GPA in the major, and complete a thesis of sufficiently high quality to merit honors.

The honors seminar director provides general direction for the seminar and supervises all students. Each student also works with a faculty member in his or her major subfield (American politics, comparative politics, international relations, or political theory) and a teaching assistant. The honors seminar

meets weekly for part of the year and addresses general issues involved in research and thesis writing, such as how to develop research questions and projects, methodology, sources of evidence, and outlining and drafting long papers. The sessions are also used for group discussions of students' research and thesis presentations. Students are also expected to meet periodically with the supervising professor and preceptor.

Students who wish to apply to the Honors Seminar must notify the department in writing by the end of the spring semester of the junior year. Please check the department website for the official deadline. Normally no more than 10% of graduating majors receive departmental honors in a given academic year. Applicants are required to have already completed the methods requirement for the major.

In addition, students are encouraged to find a faculty sponsor for their thesis proposal. Research areas for the political science department faculty are listed on the department's website.

Students who are not accepted into the honors seminar or who decide after the application deadline that they would like to write an honors thesis may take one or two semesters POLS UN3901 Independent Research I and POLS UN3902 Independent Research II in order to write a thesis to submit for honors consideration. Any member of the department's full-time faculty may sponsor independent study courses. Part-time faculty are not obligated to sponsor these courses.

Students who choose this path must also complete all the requirements for the major and maintain a minimum major GPA of 3.6. Theses are due in late March or early April, and decisions about departmental honors are announced in May.

### Academic Prizes

The Department of Political Science administers the following prizes and awards. Unless otherwise noted, students do not play an active part in the nomination process. Rather, faculty members nominate students at their own discretion. Departmental prizes are reserved for political science majors.

#### Charles A. Beard Prize

A cash prize awarded every other year to the student who writes the best paper in political science during the academic year.

#### Caroline Phelps Stokes Prize

A cash prize established at the bequest of Caroline Phelps Stokes is awarded to a student who has been a degree candidate at Columbia College or Barnard College for at least one academic year, and who has written the best essay in course or seminar work on the general subject of human rights.

#### Allan J. Willen Memorial Prize

A cash prize awarded to the Columbia College student who writes the best seminar paper on a contemporary American political problem.

### **Edwin Robbins Academic Research/Public Service Fellowship**

The Robbins Fellowship provides a stipend each summer for at least two political science students in Columbia College who will be engaged in research in important matters of politics or policymaking or who will be working, without other compensation, as interns in a governmental office, agency, or other public service organization. Each spring, the department invites students to submit fellowship proposals. Awards are announced in late April or early May.

### **Arthur Ross Foundation Award for Excellence in Political Science**

A cash prize awarded to the GS senior with an outstanding record of accomplishment in the study of political science at Columbia.

### **Phyllis Stevens Sharp Fellowship in American Politics**

The Phyllis Stevens Sharp Endowment Fund provides stipends each year during the summer for one or more Columbia College or School of General Studies students majoring in political science to support research in American politics or policy making, or otherwise uncompensated internships in a government office, agency, or other public service organization. Each spring, the department invites students to submit fellowship proposals. Awards are announced in late April or early May.

## **OTHER INFORMATION**

### **Early Admission to the Master's Degree Program in Political Science for Columbia and Barnard Political Science Undergraduates**

While the Department of Political Science does not offer a joint bachelor of arts/master's degree, it does allow Columbia and Barnard undergraduates to apply for early admission to its master's degree program.

Students should apply during the fall semester of their senior year for admission to the M.A. program in the following fall semester, after completion of the B.A. degree. The department and the Graduate School of Arts and Sciences may award up to one-half residence unit of advanced standing and/or up to three courses (nine to twelve credits) of transfer credit for graduate courses (4000-level and above) taken at Columbia in excess of the requirements for the Columbia bachelor's degree, as certified by the dean of the undergraduate school awarding the bachelor's degree.

For further information about the application process and minimum qualifications for early admission, please contact the director of undergraduate studies.

For further information about requirements for the M.A. degree, see <https://gsas.columbia.edu/degree-programs/ma-programs/political-science>.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students (policies)

Major Planning forms are available on the [department website](#).

#### Policy on Double-Counting Courses

- Policies about double-counting courses to fulfill requirements in more than one major may be found here:
  - [Columbia College](#)
  - [School of General Studies](#)
- Courses in the Core Curriculum do not fulfill requirements for the Political Science major.

#### Policy on Counting Credits outside the Department of Political Science

- Courses taken at other institutions or other Columbia departments may not be used to meet the requirement of a major or minor in political science without the approval of the Director of Undergraduate Studies or the department's undergraduate adviser. Students should secure such approval in advance of registration.

#### Pass/D/Fail and Grading Policy

- Students may use the Pass/D/Fail grading option for only the first course taken in the Department of Political Science.
  - The course used to fulfill the research methods requirement cannot be taken Pass/D/Fail.
- Students must receive a grade of at least C- in order for a course to count towards the major or concentration.

#### AP Credit Policy

- Students who receive transfer credit for one or more AP exams in political science may count a maximum of one AP course toward the major or minor, contingent upon completing an upper-level (3000 or higher) course with a grade of C or higher in the subfield in which the AP exam was taken. All transfer credits must be approved by the Director of Undergraduate Studies or the [undergraduate adviser](#) ([polisciadvise@columbia.edu](mailto:polisciadvise@columbia.edu)).

#### Transfer Credit Policy

- For the political science major, a maximum of three courses in political science may be transferred from other institutions, including study abroad and AP credit. For the economics-political science and political science-statistics interdisciplinary majors, a maximum of two courses in political science may be transferred from other institutions. For the political science minor, a maximum of one course in political science may be transferred from other institutions. All transfer credits must be approved in writing by the Director of Undergraduate Studies or the graduate-student advisers.
- Students wishing to count transfer credits toward the major or minor should send the graduate-student advisers their transfer credit report, the syllabi of the courses they want to count toward departmental requirements, and a statement of how they want to apply the transfer credits to the requirements.

#### Independent Study Policy

- Independent Study (POLS UN3901 INDEPENDENT RESEARCH I in the fall or POLS UN3902 INDEPENDENT RESEARCH II in the spring) taken in fulfillment of course requirements for the major/minor must be taken for at least 3 points of credit.

## Program Planning for all Students

To be planned with the department as soon as the student starts to register for courses toward the major. Students should not wait until they formally declare the major before meeting with an undergraduate adviser during the registration period to plan their programs for the major.

## Course Numbering Structure

The department's course number scheme helps students identify at a glance the level, type, and subfield of a particular course.

### Prefixes and Course Levels

The prefix and first digit of the course number indicates the level of the course.

- UN: courses numbered 1000-3999 are for undergraduates only
- GU: mixed level courses numbered 4000-4999 are open to both undergraduates and graduate students
- GR: courses numbered 5000-9999 are for graduate students

Undergraduates may register for courses designated with a GR prefix by [following the instructions for cross-registration](#).

### Course Numbers and Subfields

Course distribution requirements for both undergraduate and graduate political science programs include depth and breadth with regard to subfields in the discipline. With the exception of undergraduate seminars, the second digit of course numbers indicates the subfield of the course content. Undergraduate seminars are numbered in the UN39xx series, with the third digit indicating subfield.

### Number Scheme for UN Lecture Courses

- X1XX: political theory
- X2XX: American politics
- X5XX: comparative politics
- X6XX: international relations
- X7XX: methodology

### Number Scheme for Undergraduate Seminars

Undergraduate seminars are numbered "UN 39xx." The third digit of the course number indicates subfield.

- All sections of 3911 are seminars in political theory.
- All sections of 3921 are seminars in American politics.
- All sections of 3951 3952 are seminars in comparative politics.
- All sections of 3961 3962 are seminars in international relations.

### Number Scheme for GU and GR Courses

For courses numbered GU4000-4999 and GR5000-9999, the second digit indicates subfield as follows:

- X1XX: political theory
- X2XX: American politics
- X4XX: comparative politics
- X7XX: methodology (see further detail about the scheme for methods courses below)
- X8XX: international relations

### Number Scheme for Graduate Field Survey Courses

All graduate field surveys are numbered at the 6000 level, and are the only 6000-level courses the department offers.

- GR 6101: Issues in Political Theory
- GR 6210-6211: Issues and Debates in American Politics
- GR 6411-6412: Comparative Politics Survey I and II
- GR 6801: Theories of International Relations

### Number Scheme for Methodology Courses

Methods courses may be offered as UN, GU, or GR courses at any level. Their second digit is 7. The third digit in the course number indicates the type of methodology covered in the course.

- X70X: basic tools (math and methods of inquiry)
- X71X: introductory statistics
- X73X: game theory
- X76X: applied empirical methods
- X78X: qualitative methods
- X79X: advanced statistics

## Guidance for First-Year Students

Our [Considering a Political Science Major](#) page has answers to common questions new students may have about the program. The department website also contains plenty of helpful information about advising, placement, course planning, opportunities in the department, and more. If you are interested in studying political science, then it is strongly recommended that you read through the information available there, as well as considering the different available [fields of study](#).

## Guidance for Transfer Students

Our [Considering a Political Science Major](#) page has answers to common questions transfer students may have about the program. The department website also contains plenty of helpful information about advising, placement, course planning, opportunities in the department, and more. If you are interested in studying political science, then it is strongly recommended

that you read through the information available there, as well as considering the different available fields of study.

After familiarizing themselves with the political science program, transfer students should consider submitting a transfer credit request for political science courses taken at their previous institution. Further information about counting transfer credits can be found in the requirements sections in this bulletin or on the department website.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Political Science

#### Course Requirements

Students must choose a **Primary Subfield** and a **Secondary Subfield** to study. The subfields are as follows:

- American Politics (AP)
- Comparative Politics (CP)
- International Relations (IR)
- Political Theory (PT)

The major in political science requires a minimum of 9 courses in political science, to be distributed as follows:

#### Introductory Courses

Students must take two of the following introductory courses:

POLS UN1201	INTRO TO AMERICAN POLITICS
POLS UN1501	INTRO TO COMPARATIVE POLITICS
POLS UN1601	INTERNATIONAL POLITICS
POLS UN1101	POLITICAL THEORY I

NOTE: Introductory courses taken that do not fit into the Primary or Secondary Subfield will be counted in the Political Science Elective category.

#### Primary Subfield

Minimum three courses.

#### Minor Subfield

Minimum two courses.

#### Seminars

Two 4-point 3000-level seminars, at least one of which is in the student's Primary Subfield.

(See "Seminars" section below for more information)

#### Research Methods \*

Minimum one course in research methods. Courses that satisfy the research methods requirement are:

POLS UN3220	LOGIC OF COLLECTIVE CHOICE
POLS UN3289	Media and Data in American Politics
POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS

POLS UN3720	RESEARCH DESIGN: SCOPE AND METHODS
POLS UN3706	EMPIRICAL RESEARCH METHODS IN POLITICAL SCIENCE
POLS UN3768	Experimental Research
POLS GU4710	PRINC OF QUANT POL RESEARCH 1
POLS GU4712	PRINC OF QUANT POL RESEARCH 2
POLS GU4716	Data Science for Political Analytics
POLS GU4720	QUANT METH 1 APPL REG CAUS INF
POLS GU4722	QUANT METH 2 STAT THEO# CAUS INF
POLS GU4724	QUANT METH 3 EXPERIMENTAL METH
POLS GU4726	QUANT METH 4 TOPICS IN METHODS
POLS GU4762	Politics in the Lab
POLS GU4764	Design and Analysis of Sample Surveys
POLS GU4790	Advanced Topics in Quantitative Research
POLS GU4792	Quantitative Methods: Research Topics

#### Political Science Electives

Minimum one course (in any subfield).

\* Students must complete the methods requirement by the end of the junior year. A student may fulfill the research methods requirement with another course inside or outside the department only with the advance written permission of the Director of Graduate Studies or the department's undergraduate adviser. If a course outside the Department of Political Science is used to satisfy the research methods requirement, this same course cannot be used to fulfill requirements of another major, concentration or program.

#### Seminars

Students are expected to take two 3000-level 4-point seminars. They may choose from among the seminars offered, though at least one of the seminars taken must be in the student's Primary Subfield (that in which at least 9 other points have been completed). Entry into seminars requires the instructor's permission.

For detailed seminar registration guidelines, see [the department website](#). Seminars cannot be taken for R credit or Pass/D/Fail.

Barnard colloquia are open to students with the permission of the instructor. However, Barnard colloquia may **not** be used to fulfill the seminar requirement, though they may be used to fulfill subfield or elective requirements. Note that admission to Barnard colloquia is by application to the Barnard Political

Science Department only. Please consult with the Barnard Political Science Department for more information.

## Major in Economics–Political Science

The major in economics-political science is an interdisciplinary major that introduces students to the methodologies of economics and political science and stresses areas of particular concern to both. This program is particularly beneficial to students planning to do graduate work in schools of public policy and international affairs.

Two advisers are assigned for the interdepartmental major, one in the Department of Economics and one in the Department of Political Science. Please note that the economics adviser can only advise on economics requirements and the political science adviser can only advise on political science requirements.

### Course Requirements

For the political science part of the major, students must choose a **Primary Subfield** and a **Secondary Subfield** to study. The corresponding introductory courses in both subfields must be taken, plus two electives in the Primary Subfield and one in the Secondary Subfield. The subfields are as follows:

- American Politics (AP)
- Comparative Politics (CP)
- International Relations (IR)
- Political Theory (PT)

The economics–political science major requires a total of 59 points: 22 points in economics, 17 points in political science, 6 points in mathematics, 6 points in statistical methods, 4 points in a political science seminar, and 4 points in the interdisciplinary seminar as follows:

#### Core Requirements in Economics

Students must take all of the following core economics courses:

ECON UN1105	PRINCIPLES OF ECONOMICS
ECON UN3211	INTERMEDIATE MICROECONOMICS
ECON UN3213	INTERMEDIATE MACROECONOMICS
ECON UN3412	INTRODUCTION TO ECONOMETRICS
or POLS GU4712	PRINC OF QUANT POL RESEARCH 2
ECON GU4370	POLITICAL ECONOMY

#### Core Requirements in Mathematics and Statistics

Students must take all of the following core mathematics and statistics courses:

MATH UN1101	CALCULUS I
MATH UN1201	CALCULUS III
STAT UN1201	CALC-BASED INTRO TO STATISTICS

#### Economics Electives

Students must take two electives at the 3000 level or higher in the Department of Economics.

#### Political Science Courses

Students must choose a Primary Subfield and a Secondary Subfield to study. The subfields are as follows: American Politics (AP), Comparative Politics (CP), International Relations (IR), and Political Theory (PT).

Primary Subfield: Minimum three courses, one of which must be the subfield's introductory course.

Secondary Subfield: Minimum two courses, one of which must be the subfield's introductory course.

#### Seminars

Students must take the following two seminars:

ECPS GU4921	SEMINAR IN POLITICAL ECONOMICS
POLS UN3911	SEMINAR IN POLITICAL THEORY
POLS UN3921	AMERICAN POLITICS SEMINAR
POLS UN3951	COMPARATIVE POLITICS SEMINAR
POLS UN3961	INTERNATIONAL POLITICS SEMINAR

and a Political Science Department seminar, in the student's Primary Subfield. Please select one of the following: \*

\* Students who wish to count toward the political science seminar requirement a course that is not in the above list of approved seminars must obtain permission from the political science Director of Undergraduate studies.

Barnard colloquia may not be used to fulfill the seminar requirement. Note that admission to Barnard colloquia is by application to the Barnard political science department only.

## Major in Political Science–Statistics

The interdepartmental major of political science–statistics is designed for students who desire an understanding of political science to pursue advanced study in this field and who also wish to have at their command a broad range of sophisticated statistical tools to analyze data related to social science and public policy research.

Students should be aware of the rules regarding the use of the Pass/D/Fail option. Courses in which a grade of D has been received do not count toward the major requirements.

Political science–statistics students are eligible for all prizes reserved for political science majors.

The political science–statistics major requires a minimum of 15 courses in political science, statistics, and mathematics, to be distributed as follows:

#### POLITICAL SCIENCE

Primary Subfield

-Students must choose a Primary Subfield to study. Within the subfield, students must take a minimum of three courses, including the subfield's introductory course. The subfields and their corresponding introductory courses are as follows:

American Politics:	
POLS UN1201	INTRO TO AMERICAN POLITICS
Comparative Politics:	
POLS UN1501	INTRO TO COMPARATIVE POLITICS
International Relations:	
POLS UN1601	INTERNATIONAL POLITICS
Political Theory:	
POLS UN1101	POLITICAL THEORY I
-Additionally, students must take one 4-point 3000-level seminar in their Primary Subfield.	
Research Methods	
-Students must take the following two research methods courses:	
POLS GU4710	PRINC OF QUANT POL RESEARCH 1
or POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS
POLS GU4712	PRINC OF QUANT POL RESEARCH 2

## STATISTICS

-Students must take one of the following sequences:

Sequence A — recommended for students preparing for graduate study in statistics <sup>1</sup>

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN2010	LINEAR ALGEBRA
STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4206	STAT COMP # INTRO DATA SCIENCE

or

Sequence B — recommended for students preparing to apply statistical methods to other fields

STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN2102	Applied Statistical Computing
STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN2104	APPL CATEGORICAL DATA ANALYSIS
STAT UN3105	APPLIED STATISTICAL METHODS
STAT UN3106	APPLIED MACHINE LEARNING

Statistics Elective

-Students must take an approved elective in a statistics or a quantitatively oriented course in a social science.

<sup>1</sup>. Students taking Statistics Sequence A may replace the mathematics requirements with both MATH UN1207 HONORS MATHEMATICS A and MATH UN1208 HONORS MATHEMATICS B.

## Minor in Political Science

### Course Requirements

The minor in political science requires a minimum of 5 courses in political science, to be distributed as follows:

#### Introductory Courses

Students must take two of the following introductory courses:

POLS UN1201	INTRO TO AMERICAN POLITICS
POLS UN1501	INTRO TO COMPARATIVE POLITICS
POLS UN1601	INTERNATIONAL POLITICS
POLS UN1101	POLITICAL THEORY I

Political Science Electives

Minimum three courses (in any subfield)

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Political Science

#### Program of Study

To be planned with the department as soon as the student starts to register for courses toward the concentration. Students should not wait until they formally declare the concentration before meeting with an undergraduate adviser during the registration period to plan their programs for the concentration.

#### Concentration Requirements

Students must choose a **Primary Subfield** and a **Secondary Subfield** to study. The subfields are as follows:

- American Politics (AP)
- Comparative Politics (CP)
- International Relations (IR)
- Political Theory (PT)

The concentration in political science requires a minimum of 7 courses in political science, to be distributed as follows:

#### Introductory Courses

Students must take two of the following introductory courses:

POLS UN1201	INTRO TO AMERICAN POLITICS
POLS UN1501	INTRO TO COMPARATIVE POLITICS

POLS UN1601 INTERNATIONAL POLITICS

POLS UN1101 POLITICAL THEORY I

NOTE: Introductory courses taken that do not fit into the Primary or Secondary Subfield will be counted in the Political Science Elective category.

### Primary Subfield

Minimum two courses.

### Secondary Subfield

Minimum two courses.

### Research Methods \*

Minimum one course in research methods. Courses that satisfy the methods requirement are:

POLS UN3220	LOGIC OF COLLECTIVE CHOICE
POLS UN3289	Media and Data in American Politics
POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS
POLS UN3706	EMPIRICAL RESEARCH METHODS IN POLITICAL SCIENCE
POLS UN3720	RESEARCH DESIGN: SCOPE AND METHODS
POLS UN3768	Experimental Research
POLS GU4710	PRINC OF QUANT POL RESEARCH 1
POLS GU4712	PRINC OF QUANT POL RESEARCH 2
POLS GU4720	QUANT METH 1 APPL REG CAUS INF
POLS GU4722	QUANT METH 2 STAT THEO# CAUS INF
POLS GU4724	QUANT METH 3 EXPERIMENTAL METH
POLS GU4726	QUANT METH 4 TOPICS IN METHODS
POLS GU4762	Politics in the Lab
POLS GU4764	Design and Analysis of Sample Surveys
POLS GU4790	Advanced Topics in Quantitative Research
POLS GU4790	Advanced Topics in Quantitative Research
POLS GU4792	Quantitative Methods: Research Topics

### Political Science Electives

Minimum two courses (in any subfield).

\* Students must complete the methods requirement by the end of the junior year. A student may fulfill the research methods requirement with another course inside or outside the department only with the advance written permission of the Director of Graduate Studies or the department's undergraduate adviser. If a course outside the Department of Political Science is used to satisfy the research methods

requirement, this same course cannot be used to fulfill requirements of another major, concentration or program.

## AMERICAN POLITICS

### POLS UN1201 INTRO TO AMERICAN POLITICS. 4.00 points.

Lecture and discussion. Dynamics of political institutions and processes, chiefly of the national government. Emphasis on the actual exercise of political power by interest groups, elites, political parties, and public opinion

#### Fall 2024: POLS UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 1201	001/00036	T Th 5:40pm - 6:55pm 417 International Affairs Bldg	Michael Miller	4.00	315/400

#### Spring 2025: POLS UN1201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 1201	001/13392	M W 8:40am - 9:55am 207 Mathematics Building	Michael Pomirchy	4.00	104/150

### POLS UN3210 JUDICIAL POLITICS. 3.00 points.

This political science course provides an introduction to the politics of judges, courts, and law in the United States. We will evaluate law and courts as political institutions and judges as political actors and policy-makers. The topics we will study include what courts do; how different legal systems function; the operation of legal norms; the U.S. judicial system; the power of courts; constraints on judicial power; judicial review; the origin of judicial institutions; how and why Supreme Court justices make the decisions they do; case selection; conflict between the Court and the other branches of government; decision making and conflict within the judicial hierarchy; the place of courts in American political history; and judicial appointments. We will explore some common but not necessarily true claims about how judges make decisions and the role of courts. One set of myths sees judges as unbiased appliers of neutral law, finding law and never making it, with ideology, biography, and politics left at the courthouse door. Another set of myths sees the judiciary as the "least dangerous branch," making law, not policy, without real power or influence. Our thematic questions will be: How much power and discretion do judges have in the U.S? What drives their decision-making?

#### Spring 2025: POLS UN3210

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3210	001/13393	T Th 10:10am - 11:25am 413 Kent Hall	Jeffrey Lax	3.00	54/70

**POLS UN3213 AMERICAN URBAN POLITICS. 3.00 points.**

This course examines the pattern of political development in urban America, as the country's population has grown in urbanized locations. It explores the process by which cities and suburbs are governed, how immigrants and migrants are incorporated, and how people of different races and ethnicities interact in urbanized settings as well as the institutional relations of cities and suburbs with other jurisdictions of government. The course focuses both on the historical as well as the theoretical understandings of politics in urban areas

Spring 2025: POLS UN3213

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3213	001/13394	M W 6:10pm - 7:25pm 329 Pupin Laboratories	Carlos Vargas-Ramos	3.00	55/90

**POLS UN3220 LOGIC OF COLLECTIVE CHOICE. 3.00 points.**

Much of politics is about combining individual preferences or actions into collective choices. We will make use of two theoretical approaches. Our primary approach will be social choice theory, which studies how we aggregate what individuals want into what the collective wants.; The second approach, game theory, covers how we aggregate what individuals want into what the group gets, given that social, economic, and political outcomes usually depend on the interaction of individual choices. The aggregation of preferences or choices is usually governed by some set of institutional rules, formal or informal. Our main themes include the rationality of individual and group preferences, the underpinnings and implications of using majority rule, tradeoffs between aggregation methods, the fairness of group choice, the effects of institutional constraints on choice (e.g. agenda control), and the implications for democratic choice. Most of the course material is highly abstract, but these abstract issues turn up in many real-world problems, from bargaining between the branches of government to campus elections to judicial decisions on multi-member courts to the allocation of relief funds among victims of natural disasters to the scoring of Olympic events. The collective choice problem is one faced by society as a whole and by the smallest group alike

Fall 2024: POLS UN3220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3220	001/14907	T Th 10:10am - 11:25am 413 Kent Hall	Jeffrey Lax	3.00	30/70

**POLS UN3222 THE AMERICAN CONGRESS. 3.00 points.**

Prerequisites: *POLS W1201* or the equivalent, or the instructor's permission.

Prerequisites: POLS W1201 or the equivalent, or the instructors permission. Inquiry into the dynamics, organization, and policy-making processes of the American Congress. Particular emphasis on the relationship of legislators to

constituents, lobbyists, bureaucrats, the president, and with one another

**POLS UN3225 AMERICAN CONSTITUTIONAL HISTOR. 4.00 points.**

This Course is intended to look at key developments of American History through the prism of Supreme Court decisions and their aftermath. In essence, this Course will address three questions: 1. How did the Supreme Court reflect, and affect, historic patterns of U.S. development, and how did it impact the legal and economic framework of the United States? 2. How did the Supreme Court respond to, or worsen, crises in U.S. history? 3. How did the perception of individual and collective rights and liberties, and of the function and role of Governments -- both Federal and State -- evolve over time?

Spring 2025: POLS UN3225

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3225	001/13395	T Th 1:10pm - 2:25pm 616 Hamilton Hall	Robert Tortoriello	4.00	11/20

**POLS UN3245 RACIAL AND ETHNIC POLITICS. 3.00 points.**

This course examines the role of race in American politics and the political behavior of racial and ethnic minorities in the United States. Topics will include, but are not limited to, minority political participation, segregation, gentrification, group identity, implicit bias, political representation, media effects, and the role of race in political campaigns

**POLS UN3250 VOTING # POLITICAL BEHAVIOR. 3.00 points.**

Spring 2025: POLS UN3250

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3250	001/00891	T Th 5:40pm - 6:55pm L1002 Milstein Center	Michael Miller	3.00	82/100

**POLS UN3255 RACE AND THE US CARCERAL SYSTEM. 3.00 points.**

This course will introduce students to research on the institutions of the US carceral system, including the police, courts, prisons, and immigration control. We will focus on two questions: how race relates to experiences with the institutions of the carceral state, and how those institutions in turn influence racial politics. The main objective is not the accumulation of factual knowledge about this system, but familiarity with theoretical frameworks with which to make and critically assess arguments about the functioning of carceral institutions as they relate to racialized people and the functioning of democracy

Fall 2024: POLS UN3255

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3255	001/14908	M W 4:10pm - 5:25pm 203 Mathematics Building	Andrew McCall	3.00	98/100

**POLS UN3260 LATINO POLITICAL EXPERIENCE. 3.00 points.**

This course focuses on the political incorporation of Latinos into the American polity. Among the topics to be discussed are patterns of historical exclusion, the impact of the Voting Rights Act, organizational and electoral behavior, and the effects of immigration on the Latino national political agenda

**POLS UN3285 FREEDOM OF SPEECH # PRESS. 3.00 points.**

Examines the constitutional right of freedom of speech and press in the United States. Examines, in depth, various areas of law, including extremist or seditious speech, obscenity, libel, fighting words, the public forum doctrine, and public access to the mass media. Follows the law school course model, with readings focused on actual judicial decisions

**POLS UN3290 VOTING AND AMERICAN POLITICS. 3.00 points.**

Elections and public opinion; history of U.S. electoral politics; the problem of voter participation; partisanship and voting; accounting for voting decisions; explaining and forecasting election outcomes; elections and divided government; money and elections; electoral politics and representative democracy.

**Fall 2024: POLS UN3290**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3290	001/14909	T Th 10:10am - 11:25am 402 Chandler	Robert Erikson	3.00	79/100

**POLS GU4240 Great Books on Race, Politics and Society. 4 points.**

This seminar introduces students to classic works on race, social science, and public policy. The course will explore how social scientists have defined and constructed the conditions of black communities and how those definitions and constructions have varied and influenced policy debates over time. Students are required to write an original research paper on a policy area that examines the tensions between individual and structural explanations for the persistence of racial inequality.

**Spring 2025: POLS GU4240**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4240	001/13415	T 12:10pm - 2:00pm 711 International Affairs Bldg	Fredrick Harris	4	11/20

**POLS GU4242 Political Economy of the Public Sector. 3.00 points.**

Virtually all government policies depend on organizations to execute and evaluate them. Effective public management therefore depends crucially on an understanding of how organizations work. This course provides a comprehensive introduction to the institutional basis of public policy and administration. A major theme throughout is that explaining organizational outcomes requires the understanding of the relevant political actors, and the institutions, or “rules of

the game” within which they function. Expanding on this theme will allow us to explain many features of political organizations, including some that may appear (at first glance) to be pathological. The study of organizations is multi-disciplinary in nature, and as a result the course draws upon a range of literature from economics, political science, and psychology. It will focus particularly on applications of behavioral economics and game theory. The course readings and the student assignments will provide ample opportunities for seeing how theoretical arguments are developed and tested. The objective is to give students not only a working knowledge of how public sector organizations work, but also the ability to utilize it across a broad range of settings. The course begins by considering different models of individual and collective behavior. With these tools in place, it then proceeds to study the internal structures of organizations and their management implications. Economic principal-agent theory will guide this discussion. Next, it will examine the impact of the external environment on organizations. Finally, it will consider some prospects for reform

**Spring 2025: POLS GU4242**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4242	001/17619	M W 4:10pm - 5:25pm 603 Hamilton Hall	Michael Ting	3.00	14/25

**AMERICAN POLITICS SEMINARS****POLS UN3921 AMERICAN POLITICS SEMINAR. 4.00 points.**

Priority given to senior majors, followed by junior majors, then all other students.

Prerequisites: the instructor's permission. Pre-registration is not permitted.

Prerequisites: the instructors permission. Pre-registration is not permitted. Seminar in American Politics Seminar. Students who would like to register should join the electronic wait list. For list of topics and descriptions see: <https://polisci.columbia.edu/content/undergraduate-seminars>

## COMPARATIVE POLITICS

**POLS UN1501 INTRO TO COMPARATIVE POLITICS. 4.00 points.**

This course provides a broad overview of the comparative politics subfield by focusing on important substantive questions about the world today. The course is organized around four questions. First, why can only some people depend upon the state to enforce order? Second, how can we account for the differences between autocracies and democracies? Third, what different institutional forms does democratic government take? Finally, are some institutions more likely than others to produce desirable social outcomes such as accountability, redistribution, and political stability?

**Fall 2024: POLS UN1501**

**POLS UN3528 NEW/OLD FORMS OF POL PROTEST. 3.00 points.**

This course will introduce the students to the important topic of political protest. Each week we will address different aspects of the phenomenon: from the determinant to the actors and strategies of protest. We will discuss how the forms of protest have changed and the current role of the internet in general and social media in particular. Finally, we will discuss the role of the state and state repression, in particular censorship in the dynamics of protest. Since this is a comparative politics course, we will cover a range of different countries, including the United States, as well as both democratic and authoritarian regimes

**Spring 2025: POLS UN3528**

**POLS UN3534 AUTOCRACY AND DEMOCRACY. 3.00 points.**

With longstanding democracies in Europe and the US faltering, autocratic regimes in Russia and China consolidating, and hybrid regimes that mix elements of democracy and autocracy on the rise, scholars, policymakers, and citizens are re-evaluating the causes and consequences of different forms of government. This course is designed to give students the tools to understand these trends in global politics. Among other topics, we will explore: How do democracies and autocracies differ in theory and in practice? Why are some countries autocratic? Why are some democratic? What are the roots of democratic erosion? How does economic inequality influence a country's form of government? Is the current period of institutional foment different past periods of global instability? This course will help students keep up with rapidly unfolding events, but is designed primarily to help them develop tools for interpreting and understanding the current condition of democracy and autocracy in the world

**POLS GU4423 POLITICAL ECONOMY ANALYSIS OF ELITES & INSTITUTIONS. 4.00 points.**

This course examines political institutions and elite behavior from a political economy perspective. This course has three core goals. First, the substantive goal is to familiarize students with foundational theoretical arguments and frontier empirical evidence pertaining to central questions in political economy relating to political elite and institutions. Second, the methodological goal is to empower students to implement research designs that can effectively address the substantive questions driving their research. Third, the professionalization goal is to expose students to the academic processes of writing reviews, replicating and extending others' studies, presenting research projects, and writing original research designs or academic papers

**Spring 2025: POLS GU4423**

POLS 4423	001/13416	T Th 2:40pm - 3:55pm 328 Uris Hall	John Marshall	4.00	7/20

**POLS GU4439 State and Society in Ukraine. 4.00 points.**

This course deals with the functioning of the state and society in post-Soviet Ukraine, from its peaceful establishment in 1991 to its affirmation and revision in the crucible of the war with neoimperial Russia since 2014. On the one hand, it examines the formation and subsequent transformation of the state, including the branches of government, the party system, elections, foreign policy, education and social welfare. On the other hand, it discusses various facets of society such as religion, media, language use, gender relations, poverty, racism, etc. In tracing the relations between the state and society on a rocky road from totalitarianism to democracy, particular attention is paid to two upsurges of popular protest against state abuse, namely the Orange and Euromaidan revolution and subsequent attempts to empower society and strengthen its control over the state. No less prominent will be discussions of two military interventions by Russia seeking to keep Ukraine in its sphere of influence, the annexation of Crimea and the instigation of a separatist conflict in the Donbas in 2014, and the full-blown invasion in 2022, and the Ukrainian state and society's responses to these interventions

**POLS GU4453 POLITICS IN RUSSIA. 3.00 points.**

This course begins by studying the late Soviet era—the 1970s through the collapse of the Soviet Union in 1991—in order to understand what kind of political system and political culture Russia inherited. We spend some time analyzing why and how the Soviet Union—a superpower for 75 years—disintegrated suddenly and for the most part, peacefully. Then, the bulk of the course focuses on state-building in the Russian Federation. Russia's effort to construct new political institutions, a functioning economy, and a healthy society represents one of the greatest political dramas of our time. Beginning with Yeltsin's presidency in 1991 and continuing through the current eras of Putin, Medvedev, and Putin again, we consider phenomena such as economic reform, nationalism, separatism, federalism, war, legal reform, civil society, and democratization. The third part of the course addresses Russia's foreign relations. Like its predecessor states, the Russian Empire and the Soviet Union, Russia is concerned with what kind of state it is (or should be) and where it stands in the international order. We will study how Russian elites make sense of Russia's identity, as well as Russia's policies toward the US, Europe, its "near abroad," the Middle East, and China

**POLS GU4455 Russian Politics: How Autocracy Works. 3.00 points.**

This course is designed to give students the tools to understand the politics of post-Soviet Russia through the lens of theories of modern autocracy and by putting Russia in comparative perspective. Among other topics, we will explore: Why did the Soviet Union collapse? Why was economic reform in Russian

in the 1990s so difficult? How does autocracy influence economic development? How does Russia's autocracy work? Why has Russia become increasingly repressive in the Putin era? Why did Russia invade Ukraine in 2022? What are the prospects for political change? How does economic inequality influence a country's form of government? In addition to answering these questions, we will also examine the many difficult challenges in identifying the causes and consequences of studying autocracy. The course not only hopes to use modern theories of autocracy to understand Russia, but also to use the Russian case to build theories of modern autocracy. This course will help students keep up with rapidly unfolding events but is designed primarily to help them develop tools for interpreting and understanding the politics of autocratic Russia

**POLS GU4457 Russian Propaganda Dom # Global Politics. 4.00 points.**

Propaganda is a key tool of contemporary authoritarian politics. Autocrats such as Russia's Vladimir Putin, China's Xi Jinping, or Hungary's Viktor Orbán use state-controlled media to manipulate citizens, and some of them extensively rely on propaganda to undermine democracy in other countries. This course encourages students to think about the specific roles that media and propaganda play in autocracies, focusing on Russia in particular. We will read and discuss cutting-edge empirical research in political science and media studies to understand how autocrats such as Putin manipulate public opinion, why their propaganda can be successful, what its limits are, and how we can spot authoritarian propaganda in practice

**POLS GU4461 Latin American Politics. 4 points.**

This is a lecture class that seeks to introduce students to social scientific analysis while discuss the shifting dynamics of political representation in Latin America. In analyzing political representation in the region, it focuses on demands for political inclusion by different actors and how they were resisted or accepted by established elites in a process that moved from regime change to electoral rotation in power. The course covers these political dynamics and their institutional consequences since the onset of the twentieth century, starting with the Mexican Revolution, until the contemporary period where democracy is the predominant form of government and elections a crucial tool for social and political change. While analyzing the politics of Latin America, we will cover important political science concepts associated with democratic representation, social inclusion and the rule of the law, such as social movement mobilization, political regime change, presidentialism, political party systems, political identities, state capacity, and institutional weakness.

**Fall 2024: POLS GU4461**

**POLS GU4471 CHINESE POLITICS. 3.00 points.**

This course offers a historical and thematic survey of Chinese politics and of salient issues in China's public policy and governance. The first half of the course reviews the patterns and dynamics of political development in China, focusing mainly on the last two hundred years, during which the country has been on a rugged yet fascinating path toward modernity. We will examine major political events including the collapse of the Imperial China, the rise of the Communist Party, the Cultural Revolution, and the post-Mao shift toward reform and opening. The second half of the course will look various special topics, including the structure of the party and the state, the relationship between state and society, the modes of economic development, and the governance of the media and the Internet. Throughout the course, special attention will be paid to how China's domestic political and economic processes intersected with major world events and transnational forces, such as imperialism, world wars, and economic globalization

**Fall 2024: POLS GU4471**

**POLS GU4496 CONTEMPORARY AFRICAN POLITICS. 3.00 points.**

This course aims to teach students what, if any, answers social scientists have to the questions that concern anyone with an interest in African politics: 1) Why have democratic governments flourished in some countries and not others? 2) What institutions may enable Africans to hold their leaders accountable? 3) How do people participate in politics? 4) In what ways do aspiring African political leaders build public support? 5) To what extent does persistent poverty on the continent have political causes? and 6) Why is violence used to resolve some political disputes and not others?

**COMPARATIVE POLITICS SEMINARS****POLS UN3951 COMPARATIVE POLITICS SEMINAR.****4.00 points.**

Priority given to senior majors, followed by junior majors, then all other students.

Prerequisites: *POLS V1501* or the equivalent, and the instructor's permission. Pre-registration is not permitted.

Please see here for detailed seminar registration guidelines: <http://polisci.columbia.edu/undergraduate-programs/seminar-registration-guidelines>.

**INTERNATIONAL RELATIONS****POLS UN1601 INTERNATIONAL POLITICS. 4.00 points.**

This introductory course surveys key topics in the study of international politics, including the causes of war and peace; the efficacy of international law and human rights; the origins of international development and underdevelopment; the politics of global environmental protection; and the future of US-China relations. Throughout the course, we will focus on the interests of the many actors of world politics, including states, politicians, firms, bureaucracies, international organizations, and nongovernmental organizations; the interactions between them; and the institutions in which they operate. By the end of the semester, students will be better equipped to systematically study international relations and make informed contributions to critical policy debates

**POLS UN3619 NAT'L # CONTEMP WORLD POLITICS. 3.00 points.**

The causes and consequences of nationalism. Nationalism as a cause of conflict in contemporary world politics. Strategies for mitigating nationalist and ethnic conflict

Spring 2025: POLS UN3619

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3619	001/13399	M W 10:10am - 11:25am 413 Kent Hall	Jack Snyder	3.00	54/70

**POLS UN3622 Ethnic Conflict. 3.00 points.**

This course explores the origins and dynamics of ethnic conflict through the lens of several different theoretical approaches. How and where does ethnic conflict emerge and why does it endure? Is it greed or grievance, identity or interest? Why do some cases of ethnic tension and racial hatred boil over into bloodshed and carnage, while other conflict situations simmer well below the level of violence? Why are some inter-group conflicts so explosive and intractable while others yield to compromise and resolution? How is ethnic conflict influenced by factors such as religious nationalism, regime type, economic inequality, demographic shifts, and climate change? Leveraging a range of theoretical frameworks, students will engage with historical case studies and grapple with contemporary issues to understand the causes and conditions involved in conflict emergence, continuation, and resolution

Spring 2025: POLS UN3622

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**POLS UN3623 ENDING WAR # BUILDING PEACE. 3.00 points.**

This course provides an introduction to the politics of war termination and peace consolidation. The course examines the challenges posed by ending wars and the process by which parties to a conflict arrive at victory, ceasefires, and peace negotiations. It explores how peace is sustained, why peace lasts in some cases and breaks down in others and what can be done to make peace more stable, focusing on the role of international interventions, power-sharing arrangements, reconciliation between adversaries, and reconstruction

**POLS UN3648 GOVERNING THE GLOBAL ECONOMY. 4.00 points.**

Who governs the world economy? Why do countries succeed or fail to cooperate in setting their economic policies? When and how do international institutions help countries cooperate? When and why do countries adopt good and bad economic policies? This course examines how domestic and international politics determine how the global economy is governed.

We will study the politics of trade, international investment, monetary, immigration, and environmental policies to answer these questions. The course will approach each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence. There will be an emphasis on applying concepts through the analysis of policy-relevant case studies designed specifically for this course

**POLS UN3674 China's Technological Rise. 3.00 points.**

This course examines the causes and consequences of China's rise as an economic and technological great power over the past four decades. It provides a theoretically-informed introduction to the political economy of contemporary China and to major debates surrounding China's relations with the United States and its allies and partners. Topics covered include Chinese industrial and innovation policies, China's capabilities in core technologies like semiconductors and artificial intelligence, the prospects for U.S.-China economic decoupling, the risk of conflict over Taiwan, the future trajectory of China's rise, and more. At the end of this course, students will have a strong understanding of the main features of modern Chinese political economy, how China's positions in the global economy and international system have changed in recent decades, and the implications of these transformations for U.S.-China strategic competition. They will also have learned to critically evaluate prominent theories in political science and international relations as they apply to China

**POLS UN3692 Business # Politics in Globalized World. 3.00 points.**

Companies (or, as we'll mostly refer to them, firms) play a number of important roles in both domestic and international politics; among other activities, they create jobs, engage in trade and investment, create social responsibility programs, lobby governments, and create much of the world's pollution. How should we think about firms as political actors? Why, when, and how do firms attempt to influence policymaking? And when do they succeed? In this course, we will study strategic collaboration, competition, and collusion between firms and governments in a range of settings and policy areas. To do so, we will draw on insights from international relations, economics, and business scholars, and we will frequently engage with current real-world examples of business-government relations. Topics will include (among others) lobbying, corporate social responsibility, taxation and tax avoidance, public-private governance, and corporate influence in foreign policy

Spring 2025: POLS UN3692

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**POLS UN3871 CHINA'S FOREIGN RELATIONS. 4.00 points.**

This course will review and analyze the foreign policy of the People's Republic of China from 1949 to the present. It will examine Beijing's relations with the Soviet Union, the United

States, Northeast Asia, Southeast Asia, and the Third World during the Cold War, and will discuss Chinese foreign policy in light of the end of the Cold War, changes in the Chinese economy in the reform era, the post-Tiananmen legitimacy crisis in Beijing, and the continuing rise of Chinese power and influence in Asia and beyond. This lecture course will analyze the causes and consequences of Beijing's foreign policies from 1949 to the present. Students must register for a mandatory discussion section

**Spring 2025: POLS UN3871**

**POLS GU4814 GLOBAL ENERGY: SECURITY/GEOPOL. 3.00 points.**

The course focuses on the nexus between energy and security as it reveals in the policies and interaction of leading energy producers and consumers. Topics include: Hydrocarbons and search for stability and security in the Persian Gulf, Caspian basin, Eurasia, Africa and Latin America; Russia as a global energy player; Analysis of the impact of Russia's invasion of Ukraine on energy markets, global security, and the future of the energy transition; Role of natural gas in the world energy balance and European energy security; Transformation of the global energy governance structure; Role and evolution of the OPEC; Introduction into energy economics; Dynamics and fundamentals of the global energy markets; IOCs vs NOCs; Resource nationalism, cartels, sanctions and embargoes; Asia's growing energy needs and its geo-economic and strategic implications; Nuclear energy and challenges to non-proliferation regime; Alternative and renewable sources of energy; Climate change as one of the central challenges of the 21st century; Analysis of the policies, technologies, financial systems and markets needed to achieve climate goals. Climate change and attempts of environmental regulation; Decarbonization trends, international carbon regimes and search for optimal models of sustainable development. Special focus on implications of the shale revolution and technological innovations on U.S. energy security

**POLS GU4845 NAT SECURITY STRAT OF MID EAST. 4.00 points.**

At the crossroads of three continents, the Middle East is home to many diverse peoples, with ancient and proud cultures, in varying stages of political and socio-economic development, often in conflict. Following the Arab Spring and subsequent upheaval in Egypt, Syria, Iraq, Yemen, Libya and more, the region is in a state of historic flux. The Sunni-Shia rivalry,

especially between Saudi Arabia and Iran, growing Iranian-Israeli conflict, population explosion, poverty and authoritarian control, Russian ascendance and US retrenchment, are the primary regional drivers today. Together, these factors have transformed the Middle Eastern landscape, with great consequence for the national security of the countries of the region and their foreign relations. The primary source of the world's energy resources, the Middle East remains the locus of the terror-WMD-fundamentalist nexus, which continues to pose a significant threat to both regional and international security. The course surveys the national security challenges facing the region's primary players (Egypt, Saudi Arabia, Iran, Iraq, Syria, Lebanon, Jordan, Israel, the Palestinians and Turkey,) and how the convolutions of recent years have affected them. Unlike many Middle East courses, which focus on US policy in the region, the course concentrates on the regional players' perceptions of the threats and opportunities they face and the strategies they have adopted to deal with them. It thus provides an essential vantage point for those interested in gaining a deeper understanding of a region, which stands at the center of many of the foreign policy issues of our era. The course is designed for those with a general interest in the Middle East, especially those interested in national security issues, students of comparative politics and future practitioners, with an interest in real world international relations and national security

**POLS GU4863 INTERNATIONAL POLITICAL ECONOMY OF DEVELOPING COUNTRIES. 4.00 points.**

This course examines how domestic and international politics influence the economic policies of developing countries. We will critically evaluate different theoretical debates related to foreign economic policymaking in emerging markets, and introduce chief methodological approaches used in contemporary analyses. We will focus attention on different types of cross-border flows: the flow of goods (trade policy), the flow of people (immigration policy), the flow and location of production (foreign investment policy), the flow of capital (financial and monetary policy), and the flow of pollution (environment policy). In the process, we will address several themes that are central to understanding the politics of economic policymaking in emerging economies, including, the legacies of colonialism, trade protectionism and liberalization, globalization and the race to the bottom, the relationship between economic policy and culture, and development and redistribution. There will be an emphasis on applying concepts through the analysis of policy-relevant case studies designed for this course

### **POLS GU4865 INTERNATIONAL POLITICAL ECONOMY. 4.00 points.**

This course explores key frameworks and issue areas within international political economy. It examines the history and key characteristics of (economic) globalization, the theories of international cooperation, as well as the nature and role of international organizations (such as the World Trade Organization) in fostering trade and international economic cooperation. Furthermore, the course discusses the pros and cons of globalization and its implications on domestic policies of nation-states, with a particular focus on the tensions globalization creates and the lines of cleavages between winners and losers from globalization. Finally, the course reflects on the future of globalization and international trade and the challenges faced by national and supranational policy makers

## **POLITICAL THEORY**

### **POLS UN1101 POLITICAL THEORY I. 4.00 points.**

This course considers key questions at the foundation of political thought. What is justice? How do we justify the coercive power of states? Do we have an obligation to obey the government? Who should make and enforce the law? What basic rights and liberties should governments protect? How should our economic system produce and divide wealth and material resources? What are the claims of excluded or marginalized groups and how can these claims be addressed? We explore these questions through the works of several classical and contemporary political thinkers. A major goal of the course is to practice the skills needed to understand a political thinker's arguments and to construct one's own

### **POLS UN3106 Democracy: Principles, Critics and Problems. 3.00 points.**

This course is about democracy: its theory, principles, critics and challenges. After centuries of vilification, democracy acquired the status of the "best" political order thanks also to the defeat of Nazism and fascism, in 1945. The end of the Cold War and the international order created by the victors of World War II caused some major changes in the perception and practice of democracy. The world has become a unified place for financial markets and a borderless space for the implementation of hegemonic projects. Openness and globalization put pressure on the ideal and practice of democracy, however. On the one hand, democracy seems to be the solution to all problems so much so that "democracy" now means everything on the right side of history. On the other hand, it seems instead to be a source of problems, and many (even democrats) criticize it for being inefficient in decision-making, subject to the prejudices of increasingly uninformed and ignorant voters, and finally a system that breeds corruption. The goal of this course is to understand this conundrum. What are the basic principles of democracy and the main objections raised against it? In what sense does democracy embody universal values? Is it desirable that democracy contains partisanship with competence? Is populism a fate of modern democracies? These questions will guide us in understanding the promises of democracy and the disappointments of democrats. We will begin our intellectual journey with the ancient vision of democracy and its early critics, then explore the modern trajectory of democratic theory and finally contemporary populist transformations

### **POLS UN3112 GANDHI, KING # POLS OF NONVIOLENCE. 4.00 points.**

Since Gandhi's experiments in mass satyagraha over a century ago, nonviolence has become a staple of protest politics across the globe. From the Occupy movements to the Arab Spring to Movement for Black Lives, it might even be entering a new phase of revitalization. At the same time, what exactly nonviolence is and what it can accomplish in politics is very much under debate. This course aims to understand the

politics of nonviolence by examining the political ideas and political careers of its most well-known twentieth-century advocates, M.K. Gandhi and Martin Luther King, Jr. Though still venerated as founding figures of nonviolent protest, Gandhi and King have come to be remembered in ways that can misconstrue how they understood and practiced nonviolent politics. To many, Gandhi is a saintly idealist, who wanted to imbue politics with the spirit of ahimsa, truth, and conscience. Likewise, King is taken to be a spokesman for interracial brotherhood and Christian love. While partly true, these images also downplay the political side of their nonviolence – the techniques of organizing and strategies of protest that made their movements successful. We will examine the evolution of Gandhi's and King's political thinking in relation to the movements they led – the Indian independence movement and the civil rights movement in the US. We will consider how the theory and practice of nonviolence evolved and changed as it moved from one context to another. We will be especially focused on understanding the dynamics of nonviolent protest

### **POLS UN3141 Humans, Nature and the Future: an Introduction to Environmental Political Theory. 3.00 points.**

This course is about how we understand humans and their relationship to nature – and about how these understandings influence the ways we design our societies, run our democracies, and make plans for the future. We'll focus on two central themes. First: how does introducing a concern for 'the environment' (or the Earth, or ecology) deepen, and often complicate, our understanding of key concepts in political theory? Second: given that 'the environment' is an interdisciplinary issue, how do we understand the relationship between the ideas and conversations we have in political theory, and the ideas and conversations people are having in other disciplines? (For example: climate science.) There is no single prerequisite course for this one, but we will be assuming that you are familiar with the field of political theory in general. This is important, because many of our discussions will aim to map concepts and conversations from environmental political theory onto broader political theory conversations (which requires you to be familiar with those conversations!). Ideally, you'll have taken a political theory survey before you take this course. If you haven't, but you still think you've got the background necessary to participate fully in the class, please get in touch

### **POLS GU4110 RECENT CONTINENTAL POL THOUGHT. 4.00 points.**

This course will compare and contrast the theories of the political, the state, freedom, democracy, sovereignty and law, in the works of the following key 20th and 21st century continental theorists: Arendt, Castoriadis, Foucault, Habermas, Kelsen, Lefort, Schmitt, and Weber. It will be taught in seminar format

### **POLS GU4132 POLIT THOUGHT-CLASSICAL AND MEDIEVAL. 3.00 points.**

Prerequisites: Contemporary Civilization or a comparable introduction to political theory course. This course examines ancient political thought from its origins in the archaic Greek polis through the development of classical Greek political philosophy and the transmission and adaptation of Greek political ideas in the Hellenistic, Roman, and early Christian traditions. Our texts will include major ancient works of political theory by Plato, Aristotle, and Cicero as well as works of poetry, drama, history, and ethical and natural philosophy that offer insight into ancient thought on politics. We will approach these texts not only as reflections on the ancient democratic, oligarchic, monarchical, and republican political systems they address, but also as foundations for modern political discourse that still prompt us to consider the questions they raise—questions about the ideal form of government in theory, and the best form in practice; about the nature of law and justice, and the relationship between law and custom, science, or religion; about the rule of law, and the rights and obligations of an individual citizen living in a participatory state; and about the reach of empire, and the implications when a self-governing people attempts to direct the affairs of non-citizens or of other states

## **RESEARCH METHODS**

### **POLS UN3704 RESEARCH DESIGN: DATA ANALYSIS. 3.00 points.**

This course examines the basic methods data analysis and statistics that political scientists use in quantitative research that attempts to make causal inferences about how the political world works. The same methods apply to other kinds of problems about cause and effect relationships more generally. The course will provide students with extensive experience in analyzing data and in writing (and thus reading) research papers about testable theories and hypotheses. It will cover basic data analysis and statistical methods, from univariate and bivariate descriptive and inferential statistics through multivariate regression analysis. Computer applications will be emphasized. The course will focus largely on observational data used in cross-sectional statistical analysis, but it will consider issues of research design more broadly as well. It will assume that students have no mathematical background beyond high school algebra and no experience using computers for data analysis

**Fall 2024: POLS UN3704**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3704	001/14914	M W 8:40am - 9:55am 401 Chandler	Vincent Dorie	3.00	26/35

### **POLS UN3720 RESEARCH DESIGN: SCOPE AND METHODS. 4.00 points.**

This class aims to introduce students to the logic of social scientific inquiry and research design. Although it is a course in political science, our emphasis will be on the science part rather than the political part — we'll be reading about interesting substantive topics, but only insofar as they can teach us something about ways we can do systematic research. This class will introduce students to a medley of different methods to conduct social scientific research

**Fall 2024: POLS UN3720**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3720	001/17424	T Th 6:10pm - 7:25pm 413 Kent Hall	Michael Pomirchy	4.00	53/70

**Spring 2025: POLS UN3720**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 3720	001/13401	T Th 4:10pm - 5:25pm 326 Uris Hall	Abdullah Aydogan	4.00	65/70

**POLS UN3768 Experimental Research. 4.00 points.**

Randomized experimentation is an important methodology in political science. In this course, we will discuss the logic of experimentation, its strengths and weaknesses compared to other methodologies, and the ways in which experimentation has been -- and could be -- used to investigate political phenomena. Students will learn how to interpret, design, and execute experiments

**PSAM UN3707 Persuasion at scale: causal inference, machine learning, and evidence-based understanding of the information environment. 3.00 points.**

By employing statistical and computational methods, including randomized controlled trials, natural experiments, and machine learning techniques, students will engage directly with real-world data to uncover the intricacies of persuasion across different sectors, including but not limited to quantifying the effects of partisan media, social media, and political campaigns. The course will also delve into the historical evolution of these persuasive techniques, providing students with a rich contextual background to better understand current trends and anticipate future developments. This course fulfills the quantitative methods requirement for the Political Science major

**Spring 2025: PSAM UN3707**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSAM 3707	001/17626	M W 11:40am - 12:55pm 313 Fayerweather	Chris Wiggins, Eunji Kim	3.00	62/70

**POLS GU4700 MATH # STATS FOR POLI SCI. 4.00 points.**

This course presents basic mathematical and statistical concepts that are essential for formal and quantitative analysis in political science research. It prepares students for the graduate-level sequence on formal models and quantitative political methodology offered in the department. The first half of the course will cover basic mathematics, such as calculus and linear algebra. The second half of the course will focus on probability theory and statistics. We will rigorously cover the topics that are directly relevant to formal and quantitative analysis in political science such that students can build both intuitions and technical skills. There is no prerequisite since this course is ordinarily taken by Ph.D. students in their first semester. The course is aimed for both students with little exposure to mathematics and those who have taken some courses but wish to gain a more solid foundation. NOTE: This course does not satisfy the Political Science Major/Concentration research methods requirement

**Fall 2024: POLS GU4700**

-----------	-----------	--	-------------------	------	------

**POLS GU4702 Qualitative and Mixed Methods of Research Design and Inquiry. 4.00 points.**

This course covers research methods and research design in political science. We cover concrete and practical issues of conducting research that are useful for all types of empirical political science research: picking a topic, generating hypotheses, case selection, measurement issues, and the ethics of research; with a focus on qualitative and mixed-methods tools such as: interviews, fieldwork, case studies, archival research, ethnographic work, designing and conducting experiments, coding data and working with data sets, combining quantitative and qualitative methods, etc. The course is designed for several audiences in Political Science, including: PhD students MA students undertaking a major research project or intending to continue on to the PhD Advanced undergraduates writing or contemplating an honors thesis, or another major research project

**POLS GU4710 PRINC OF QUANT POL RESEARCH 1. 4.00 points.**

This course examines the basic methods of data analysis and statistics, through multivariate regression analysis, that political scientists use in quantitative research that attempts to make causal inferences about how the political world works. The same methods apply to other kinds of problems about cause and effect relationships more generally. The course will provide students with extensive experience in analyzing data and in writing (and thus reading) research papers about testable theories and hypotheses

**Fall 2024: POLS GU4710**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4710	001/16962	T Th 4:10pm - 5:25pm 332 Uris Hall	Abdullah Aydogan	4.00	36/50

**POLS GU4712 PRINC OF QUANT POL RESEARCH 2. 4.00 points.**

Prerequisites: *POLS W4710* or the equivalent.

Prerequisites: *POLS W4710* or the equivalent. This course will intensively examine some of the data analysis methods which deal with problems occurring in the use of multiple regression analysis. It will stress computer applications and cover, as needed, data coding and data processing. Emphasis will also be placed on research design and writing research reports. The course assumes that students are familiar with basic statistics, inference, and multiple regression analysis and have analyzed data using computer software (e.g., any standard statistical programs on micro-computers or larger machines -- Stata, "R", SPSS, SAS, etc.). Students will be instructed on the use of the microcomputers and the R and Stata statistical software program(s) available as freeware (R) or in the CUIT computer labs (Stata; several campus locations) or through SIPA. The lectures and required discussion section will emphasize the use of "R." Students may use whatever computer programs

they prefer for all data analysis for the course. There may be an additional fee for classroom instructional materials

**Spring 2025: POLS GU4712**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4712	001/13417	T Th 10:10am - 11:25am 520 Mathematics Building	Benjamin Goodrich	4.00	20/30

**POLS GU4716 Data Science for Political Analytics. 3.00 points.**

Prerequisites: (POLS GU4714) or

The digital revolution has created previously unimaginable opportunities to learn about political behavior and institutions. It has also created new challenges for analyzing the massive amounts of data that are now easily accessible. Open source software has reduced barriers and inequities in coding, but it also requires different kinds of effort to employ optimally the latest innovations. Harnessing the power of political data is more critical than ever, given the threats that misinformation and alternative “facts” present to democratic forms of government. This course will teach students both essential tools and general strategies of data science within the domain of politics. Whether students’ goals are to analyze political behavior for academic or professional purposes, successful analysis requires skills for handling a wide array of issues that stand in the way of creating knowledge and insights from data. This course prioritizes breadth over depth in the sense that we will introduce a broad range of topics relevant for data science to develop basic skills and form a foundation that students can build on. More complete mastery of these skills will require additional engagement beyond this course

**Fall 2024: POLS GU4716**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4716	001/15862	T Th 2:40pm - 3:55pm 703 Hamilton Hall	Gregory Wawro	3.00	33/40
POLS 4716	AU1/20956	T Th 2:40pm - 3:55pm Othr Other	Gregory Wawro	3.00	2/2

**POLS GU4720 QUANT METH 1 APPL REG CAUS INF. 4.00 points.**

Fitting and understanding linear regression and generalized linear models, simulation, causal inference, and the basics of design of quantitative studies. Computation in R. Textbook: Regression and Other Stories by Gelman, Hill, and Vehtari

**Fall 2024: POLS GU4720**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4720	001/15418	M W 10:10am - 11:25am 603 Hamilton Hall	Andrew Gelman	4.00	23/40

**POLS GU4722 QUANT METH 2 STAT THEO#CAUS INF. 4.00 points.**

This course is the second course in the graduate-level sequence on quantitative political methodology offered in the Department

of Political Science. Students will learn (1) a framework and methodologies for making causal inferences from experimental and observational data, and (2) statistical theories essential for causal inference. Topics include randomized experiments, estimation under ignorability, instrumental variables, regression discontinuity, difference-indifferences, and causal inference with panel data. We also cover statistical theories, such as theories of ordinary least squares and maximum likelihood estimation, by connecting them to causal inference methods. This course builds on the materials covered in POLS 4700 and 4720 or their equivalent (i.e., probability, statistics, linear regression, and logistic regression)

**Spring 2025: POLS GU4722**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4722	001/13419	T Th 4:10pm - 5:25pm 304 Hamilton Hall	Naoki Egami	4.00	28/30

**POLS GU4724 QUANT METH 3 EXPERIMENTAL METH. 4.00 points.**

In this course, we will discuss the logic of experimentation, its strengths and weaknesses compared to other methodologies, and the ways in which experimentation has been — and could be — used to investigate social phenomena. Students will learn how to interpret, design, and execute experiments. Special attention will be devoted to field experiments, or randomized trials conducted in real-world settings. Prerequisites: Students should have taken at least one or two semesters of statistics. Some understanding of probability, hypothesis testing, and regression are assumed. Familiarity with statistical software such as R is helpful. We will be working with data in class throughout the term. The examples used in the textbook and lectures are written in R, and R tutorials will be taught in special sessions early in the term

**Fall 2024: POLS GU4724**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4724	001/15263	T Th 4:10pm - 5:25pm 307 Uris Hall	Donald Green	4.00	18/40

**POLS GU4726 QUANT METH 4 TOPICS IN METHODS. 4.00 points.**

This course is the fourth course in the graduate-level sequence on quantitative political methodology offered in the Department of Political Science. Students will learn a variety of advanced topics in quantitative methods for descriptive and causal inference, such as simulated-data experimentation, statistical graphics, experimental design, Bayesian inference, multilevel modeling, ideal-point and measurement-error models, and time/spatial/network models. This course builds on the materials covered in POLS 4700, 4720, 4722, and 4724, or their equivalent courses (i.e., probability, statistics, linear regression, logistic regression, causal inference with observational and experimental data, and knowledge of the statistical computing environment R)

**Spring 2025: POLS GU4726**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4726	001/13421	M W 10:10am - 11:25am 903 School Of Social Work	Andrew Gelman	4.00	10/30

**POLS GU4730 GAME THEORY # POLIT THEORY. 4.00 points.**

Prerequisites: POLS W4760 or equivalent level of calculus.

Prerequisites: POLS GU4700 or equivalent level of calculus.

Introduction to noncooperative game theory and its application to strategic situations in politics. Topics include solution concepts, asymmetric information, and incomplete information. Students should have taken POLS GU4700 or have equivalent background in calculus. Permission of instructor required

**Spring 2025: POLS GU4730**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4730	001/13423	M W 4:10pm - 6:00pm 602 Northwest Corner	John Huber	4.00	15/30

**POLS GU4732 RESEARCH TOPICS IN GAME THEORY. 4.00 points.**

Prerequisites: POLS W4730 or the instructors permission.

Advanced topics in game theory will cover the study of repeated games, games of incomplete information and principal-agent models with applications in the fields of voting, bargaining, lobbying and violent conflict. Results from the study of social choice theory, mechanism design and auction theory will also be treated. The course will concentrate on mathematical techniques for constructing and solving games. Students will be required to develop a topic relating political science and game theory and to write a formal research paper

**Fall 2024: POLS GU4732**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4732	001/17641	M W 10:10am - 11:25am 307 Uris Hall	Carlo Prato	4.00	8/15

**POLS GU4762 Politics in the Lab. 4 points.**

The purpose of this course is to give students the chance to write an original research paper applying the methodology of lab experiments to political science questions. Experiments have become a standard tool in testing and refining theories, but designing and interpreting economic experiments requires care and practice.

**Spring 2025: POLS GU4762**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
POLS 4762	001/14557	T 10:10am - 12:00pm 407 Mathematics Building	Alessandra Casella	4	12/12

**POLS GU4768 Experimental Research: Design, Analysis and Interpretation. 4 points.**

Prerequisites: one or two semesters of statistics; basic understanding of probability, hypothesis testing, and regression are assumed. Basic familiarity with statistical software (Stata and R) is helpful but not required.

In this course, we will discuss the logic of experimentation, its strengths and weaknesses compared to other methodologies, and the ways in which experimentation has been -- and could be -- used to investigate social phenomena. Students will learn how to interpret, design, and execute experiments.

**SENIOR HONORS SEMINAR****POLS UN3998 HONORS SEMINAR. 4.00 points.**

Prerequisites: admission to the departmental honors program.

Preclinical Adviser: Prof. E'mett McCaskill;  
[e.mccaskill@columbia.edu](mailto:e.mccaskill@columbia.edu)Administrative Manager: Joanna Borchert-Kopczuk, 406 Schermerhorn Hall; 212-854-3940; [jb2330@columbia.edu](mailto:jb2330@columbia.edu)Undergraduate Curriculum Assistant: Erin Murphy, 406 Schermerhorn Hall; 212-854-8859; [psych-uca@columbia.edu](mailto:psych-uca@columbia.edu)**THE STUDY OF PSYCHOLOGY**

The Department of Psychology offers students a comprehensive curriculum in psychological science, including research methods, cognition, neuroscience, developmental, social, and clinical areas. The curriculum prepares majors for graduate education in these fields and also provides a relevant background for social work, education, medicine, law, and business. Psychology course offerings are designed to meet the varying needs and interests of students, from those wishing to explore a few topics in psychology or to fulfill the science requirement, to those interested in majoring in Psychology or in Neuroscience and Behavior.

**STUDENT ADVISING**

The Department of Psychology offers a variety of advising resources to provide prospective and current undergraduate majors and concentrators with the information and support needed to successfully plan their programs. An overview of these resources is provided on the Psychology Undergraduate Advising Resources website.

Students are encouraged to consult with Peer, Faculty, and Program Advisers as they plan their course of study in Psychology or Neuroscience and Behavior. Faculty and Peer Advisers are important contacts for general advice on class choices, research opportunities, and post-graduation plans. For definitive answers to questions regarding major requirements and other aspects of your degree, including transfer credit, current and prospective majors should consult their Program Adviser (Director of Undergraduate Studies) or

the [Undergraduate Curriculum Assistant](#) in the departmental office. [Program Adviser assignments](#) and contact information are provided on the departmental website. For additional information about program, faculty, peer, and pre-clinical advising, please see the [Psychology Undergraduate Advising Resources website](#).

## Enrolling in Classes

### Major Requirement Checklist

Prior to the start of their final semester, all seniors must submit a [Major Requirement Checklist](#) showing all major courses they have taken and those they plan to take. The Psychology department evaluates each checklist to determine whether or not the course plan completes the major requirements and then notifies the student accordingly. If the student's course plan changes, or if it does not satisfy the major requirements, a revised checklist must be submitted. Departmental approval of an accurate and up-to-date checklist will help ensure completion of all major requirements on time for graduation.

### Non-Psychology Courses

Some courses offered outside of the Psychology departments can count toward major requirements (e.g., courses taken in the Statistics Department; cognate courses offered through Philosophy, Business, Law, etc.). A maximum of 2 such non-PSYC courses may be applied toward the major. Courses offered in the Barnard Psychology or Neuroscience departments do not count toward this limit.

### Overlapping Courses

Students cannot receive credit for two courses—one completed at Columbia and one at another institution (including Barnard)—if those courses have largely overlapping content. For example, [PSYC UN1001 THE SCIENCE OF PSYCHOLOGY](#) is similar in content to introductory psychology courses offered at many other institutions, including Barnard; only one such course will receive credit. Similarly, [PSYC UN2630 SOCIAL PSYCHOLOGY](#) and [PSYC BC1138 Social Psychology](#) have overlapping content; only one will receive credit. Please refer to the table of [Overlapping Courses](#) for a partial list of courses at Columbia and Barnard that are known to overlap.

## Preparing for Graduate Study

Most graduate programs in psychology, including those in clinical psychology, require:

An undergraduate course in introductory psychology:

PSYC UN1001	THE SCIENCE OF PSYCHOLOGY
A course in statistics such as one of the following:	
PSYC UN1610	STATISTICS-BEHAVIORAL SCIENTISTS
PSYC UN1660	Advanced Statistical Inference
STAT UN1001	INTRO TO STATISTICAL REASONING

STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS
A laboratory course in research methods such as one of the following:	
PSYC UN1420	RESEARCH METHODS - HUMAN BEHAVIOR
PSYC UN1450	RESEARCH METHODS - SOCIAL COGNITION # EMOTION
PSYC UN1455	RESEARCH METHODS: SOCIAL/PERSONALITY
PSYC UN1490	RESEARCH METHODS - COGNITION/DECISION MAKING

Students should also take a variety of more advanced undergraduate courses and seminars. Students interested in PhD programs in any area of psychology are strongly encouraged to become involved in a research lab, and may wish to participate in the Senior Thesis Advanced Research program (STAR). To join STAR, students must apply by the early fall of their junior year.

Students interested in clinical psychology should obtain experience working in a community service program in addition to supervised individual research experience. Students should consult the department's pre-clinical adviser, [Prof. E'mett McCaskill](#), and attend the department's pre-clinical advising events for more information. Additional resources to help prepare students for graduate study in psychology, and for careers in clinical psychology, are available on the [Department of Psychology's website](#). Students may also sign-up for the [preclinical advising listserv](#) to receive emails about events and relevant information.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The Psychology Department accepts a score of 5 on the AP Psychology exam, or a score of 7 on the Higher Level IB Psychology exam, to meet the Science of Psychology requirement. The AP/IB Psychology exam does not count as a course towards their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course to fulfill the required number of courses for their program.

The College Board Advanced Placement (AP) statistics scores do not satisfy the statistics requirement. Students who have completed AP statistics may opt to take a more advanced statistics course to fulfill this requirement with the approval of one of the Psychology Program Advisors.

## Barnard College Courses

A maximum of 5 courses counted toward the major may be from outside of the Columbia Psychology Department ("outside Columbia Psych" includes both Barnard and transfer courses, as well as courses in other departments including Statistics).

The table of [approved Barnard psychology courses](#) indicates which courses have been approved for specific requirements of the psychology major. To seek approval for a course not on the approved list to be applied to a specific requirement, students must contact their program advisor. All Barnard Psychology courses not on the approved list for a specific requirement may be applied as elective credit towards the 11 courses needed for the major requirements.

Barnard Lab courses do not count towards the Research Methods requirement of the Psychology Major or Concentration.

## Transfer Courses

For a course taken outside of Columbia or Barnard to be able to count toward the Psychology Major or the Neuroscience & Behavior Major, the following must be true:

- The course should be substantially similar in content and/or learning objectives to one offered at Columbia.
- The course must have been approved for at least 3 points of credit by GS or CC.
- The grade received must be a B- or better.
- The course must have been taken for a grade (no Pass/Fail).
- The course must have been taken within the past 7 years.

If a course taken at another institution overlaps with a course taken at Columbia, only one will be applied towards the major. Please consult your Program Advisor if you are considering registering for a Columbia or Barnard course that is similar to a transfer course you plan to count toward your major.

### Psychology Major

- Up to 3 transfer courses may be counted toward the Psychology Major. Approval of transfer credits on a student's Entrance Credit Report toward general requirements for the bachelor's degree does not grant approval of these credits toward the psychology major. Once your school has approved your transfer courses, you then need to confirm whether they can fulfill psychology requirements using the [Major Requirement Substitution Form](#).
- Online or hybrid transfer courses may only be applied towards elective credit for the major. All transfer courses applied to specific major requirements (e.g., Introductory

Psychology, Groups 1 – 3, etc.) must have been taken fully in person.

- Students who have completed an introductory psychology course at another institution should submit a Major Requirement Substitution Request (see procedure, below) to verify whether or not this course meets departmental standards to count towards the major. If transfer credit toward the major is not approved, the student must enroll in PSYC UN1001 or PSYC BC1001 to complete this major requirement.
- Statistics courses taken anywhere other than Columbia or Barnard may not count toward the major. Psychology majors will benefit from taking statistics here no matter how well they did in previous intro stats courses. If you are entering Columbia with extensive statistics coursework, your Program Advisor will help you find an appropriate advanced statistics course that can meet the Statistics Requirement of your major.
- The Psychology Department allows students to meet the Science of Psychology requirement with a score of 5 on the AP Psychology exam, or a score of 7 on the Higher Level IB Psychology exam. The AP/IB Psychology exam does not count as a course towards their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course to fulfill the required number for their major.
- College Board Advanced Placement (AP) statistics exam scores may not be used to satisfy the statistics requirement of the Psychology Major.

### Psychology Concentration

- The same guidelines for transferring courses to count toward the Psychology Major apply to the concentration, except that the maximum number of transfer courses that may count toward the concentration is 2.

### Neuroscience & Behavior Major

- The Neuroscience & Behavior major is co-sponsored by the Department of Psychology and the Department of Biological Sciences. In addition to one year of college general chemistry, eleven courses are required to complete the Neuroscience & Behavior major: seven from the Department of Biological Sciences and five from the Department of Psychology (commonly referred to as P1-P5). Please, consult [this page](#) for additional information on the major requirements for the Neuroscience and Behavior Major.
- Students should consult their [Program Advisor](#) in the Psychology department before registering for psychology courses offered outside the department. With the Advisor's approval, a maximum of one psychology course from another institution, including Barnard, may be applied

toward the psychology portion of the Neuroscience & Behavior major.

- Transfer courses taken in any modality (in-person, online, or hybrid) may be eligible to count toward P1. Transfer courses must have been taken fully in-person to be eligible to count for P2-P5.
- Students who wish to obtain credit for a course taken at Barnard or at another institution should complete the [Major Requirement Substitution Form](#). To be approved for the major, the course should be substantially similar to one offered by this department and approved for this major, and the grade received must be a C- or better if from Barnard, or B- or better if from another institution.
- The Psychology Department allows students to meet the Science of Psychology requirement with a score of 5 on the AP Psychology exam, or a score of 7 on the Higher Level IB Psychology exam. The AP/IB Psychology exam does not count as a course for their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course to fulfill the required number of courses for their major.
- Statistics courses taken anywhere other than Columbia or Barnard may not be counted toward the N&B major; AP Statistics also is not able to count toward the Statistics (i.e., P3) requirement. Students who have completed a statistics course elsewhere are encouraged to fulfill the P3 requirement either with an intermediate/advanced stats course offered at Columbia, or by taking a PSYC UN1400-level research methods course.

## Study Abroad Courses

Students planning to study abroad should consult with their Program Advisor (see above) prior to selecting their courses to see which ones are likely to be able to count toward major requirements. The official process of approving study-abroad courses to count toward your major can begin once you have completed your study abroad semester(s); however, your Program Advisor can give you their best guess for what can and cannot count.

**Psychology majors:** We recommend that you plan to meet most, if not all, of your major requirements while at Columbia. The Psychology Major is quite small in terms of course requirements, to allow for students to explore electives that complement their major coursework. This also allows for students studying abroad to spend that semester focusing on courses that you wouldn't have had the chance to take at Columbia.

**Neuroscience & Behavior majors:** It can be difficult to fit a study-abroad semester in to the N&B major because the Biology requirements include two year-long course sequences. N&B majors looking to study abroad should consult with

their advisors as early as possible to see if it will be feasible to complete all of your major requirements.

## Summer Courses

Any course offered by the Psychology Department during the Summer Session is applicable toward the same major requirement(s) as the corresponding course of that same number offered during the academic year. For instance, [PSYC S1001](#) The Science of Psychology meets the same major requirements as does [PSYC UN1001](#) THE SCIENCE OF PSYCHOLOGY.

## CORE CURRICULUM CONNECTIONS

[PSYC UN1001](#) THE SCIENCE OF PSYCHOLOGY and any PSYC course in the 2200- or 2400-level may be used to partially fulfill the science requirement. 2600-level courses and some other psychology courses, including [PSYC BC1001](#) INTRODUCTION TO PSYCHOLOGY and other Barnard psychology courses, may not be used to fulfill the science requirement.

All 3- and 4-point courses numbered in the 32xx, 34xx, 42xx, and 44xx can partially fulfill the science requirement. For more detailed information regarding psychology courses that may be applied toward the science requirement, see the [Core Curriculum](#) section in this bulletin.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

All qualified students are welcome to apply to join a research lab and contribute to ongoing projects. Students may volunteer to work in a lab, register for supervised individual research ([PSYC UN3950](#) Supervised Individual Research), or participate in the department's [Senior Thesis Advanced Research \(STAR\) Program](#). Information on [faculty research](#) is available on the departmental website. Students are advised to read about research laboratories on [faculty lab sites](#) and visit the professor's office hours to discuss opportunities. At the beginning of the fall term, the department also hosts a Lab-Preview event for students to learn about [research opportunities](#) for the upcoming semester.

## Undergraduate Research in Courses

No more than 4 points of [PSYC UN3950](#) Supervised Individual Research or [PSYC UN3920](#) HONORS RESEARCH may be taken in any one term, and no more than 2 courses' worth (8 points total) of research and field work courses may be applied toward the major. "Research and field work courses" include: [PSYC UN3950](#) SUPERVISED INDIVIDUAL RESEARCH, [PSYC BC3466](#) FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER, [PSYC BC3473](#) CLINICAL FIELD PRACTICUM, [PSYC BC3592](#) Senior Research Seminar and [PSYC BC3599](#) Individual Projects. Research courses must be taken for 3 or 4 points in order to count toward the major.

(See above for further restrictions on applying Barnard courses toward the psychology major).

## Senior Thesis Coursework and Requirements

Students with strong interests in psychological/neuroscientific research are encouraged to apply for admission to the Psychology Department's Psych/Neuro Senior Thesis Advanced Research (STAR) program in the fall of their junior year or the equivalent, such that they will be able to participate in the three consecutive semesters (spring - fall - spring) that are required in the program.

Important: Students will need to confirm that a professor has agreed to mentor them before being admitted into the program. Therefore, interested applicants should reach out to potential mentors to find a lab placement before applying. Tip: The best way to ensure finding a mentor is to get involved in that mentor's research before asking if they can provide mentoring/supervision on your thesis. Please read through all the information below before submitting your application.

Students interested in engaging in a Psych/Neuro Senior Thesis:

The series includes:

1. Enrolling in a 3-semester Senior Thesis Advanced Research series, which includes a weekly seminar and research commitment, that must occur consecutively in your Junior year spring semester and Senior year (fall & spring), or equivalent [NOTE: this research course includes performing intensive, independent research with a lab mentor, writing a final thesis, and giving an oral presentation of the thesis at the end of the 3rd semester]
2. Enrolling in a one-semester methods course (PSYC UN1920, UN1420/21, UN1450/51, UN1455/56, UN1490/91) in any semester during undergrad (i.e., before or during the series). Students are strongly encouraged to complete this methods training during or before the spring of their junior year (or equivalent).

The application is due in mid fall, and decisions are communicated in time for admitted students to register to begin Psych/Neuro Senior Thesis Advanced Research-related classes in the spring.

The application process comprises the following steps:

1. Identifying a lab sponsor: If you think you might be interested in applying, you should start reaching out to labs that you're interested in well in advance of the application deadline to see if they might have openings for research assistants and if they'd be willing to mentor you in your research. Keep in mind that mentoring a student is a significant commitment on the part of a professor, and so it may be difficult to identify a professor who can provide mentorship. Successful applicants typically demonstrate how their own research interests fall in line with those of

their proposed sponsor and attest that their faculty member/PI has agreed to sponsor them. Once you have secured a position in a lab, you and your mentor will need to fill out the [mentor agreement form](#).

2. Complete the online application: The application will be made available on our psychology department [website](#), and comprises a few relatively short questions asking students to describe their previous coursework and research-related experiences and to write about their intended research interests.

## Undergraduate Research Outside of Courses

Most students who work in psychology labs do so either on a volunteer basis or as a paid Research Assistant. See [here](#) for more information on getting involved in a psychology lab.

## DEPARTMENT HONORS AND PRIZES

All students aspiring to graduate with Academic Honors must enroll in the Psychology Department's Psych/Neuro Senior Thesis Advanced Research (STAR) program. However, acceptance to and participation in this program does not automatically result in earning academic honors (see requirements for academic honors below).

Note the students majoring in Neuroscience & Behavior may earn academic honors through the Department of Biological Sciences instead. (Please check their website for more details on that process.)

## Department Honors

The Psych/Neuro Senior Thesis Advanced Research program is open to students majoring in Psychology or Neuroscience & Behavior and includes the following:

Senior Thesis Advanced Research Seminar ([UN3930](#)): This is a two-hour, 1-4 credit course that meets biweekly, during which students present and discuss their ongoing research. Students in the course also attend the [Psychology Department's Colloquium Series](#), which features researchers from outside the Department speaking on a variety of topics in Psychology/Neuroscience. The seminar and colloquia always take place on Wednesdays from 4:10 - 6:00 p.m. Students in the Psych/Neuro Senior Thesis Advanced Research program enroll in this course during the spring of their junior year and during the fall and spring of their senior years, or the equivalent.

Senior Thesis Research: Starting in the spring of their junior year and continuing through senior year, all students in the Psych/Neuro Senior Thesis Advanced Research program conduct research under the supervision of a Psychology Department faculty member or a faculty member/principal investigator in a psychology- or neuroscience-focused lab outside the department, including at Barnard College, the Zuckerman Mind Brain Behavior Institute, Columbia Business

School, Columbia University Irving Medical Center, and other research institutions in the area.

**Research Methods Course:** To fulfill this requirement, students should complete a methods course (PSYC UN1920 The How-To's of Research; PSYC UN1420/21 Research Methods: Human Behavior; PSYC UN1450/51 Research Methods: Social Cognition & Emotion; PSYC UN1455/56 Research Methods: Social & Personality Psychology; PSYC UN1490/91 Research Methods: Cognition & Decision-making).

**Senior Thesis:** Students in the Psych/Neuro Senior Thesis Advanced Research program complete an original research project under the supervision of their faculty advisor. Senior students present their research orally at the last colloquium of the Spring term, and also submit a written senior thesis.

**Eligibility for Departmental Honors:**

Students participating in the Psych/Neuro Senior Thesis Advanced Research program are also eligible to receive academic honors when they graduate, provided they 1) complete all components of the program, 2) earn a GPA in the major of 3.6 or higher at the time of graduation, and 3) are recommended by the Psychology department faculty. Please note that academic honors can be awarded to no more than 10% of the graduating class each year, so while only students who have participated in this senior thesis research intensive are eligible to receive academic honors, not everyone in the Senior Thesis Advanced Research program will receive academic honors.

## OTHER IMPORTANT INFORMATION

### Email Communication

The department maintains an e-mail distribution list with the UNIs of all declared majors and concentrators. Students are held responsible for information sent to their Columbia e-mail addresses. Students should read these messages from the department regularly and carefully. They are intended to keep students informed about deadlines, requirements, events, and opportunities. Prospective majors or concentrators who would like to be added to the e-mail distribution list should contact the Undergraduate Curriculum Assistant in the departmental office.

### Online Information

The Department of Psychology [website](#) provides access to a wide variety of information for majors and prospective majors. Among other useful resources, students will find syllabi posted for most lecture and lab courses and for many advanced seminars. Students should read the on-line course syllabi prior to registering for psychology courses. For assistance in finding all necessary resources, students should contact the undergraduate curriculum assistant ([psych-uca@columbia.edu](mailto:psych-uca@columbia.edu)).

### Grade Requirements for the Major

A grade of C-, or higher, must be earned and revealed on your transcript in any Columbia or Barnard course — including

the first — that is used to satisfy the major or concentration requirements.

Courses taken on a Pass/D/Fail basis may not be used to satisfy the major or concentration requirements unless the grade of P is uncovered by the Registrar's deadline. Students may petition to have their P/D/F grades uncovered after the registrar's deadline for the following courses only: PSYC UN1001 Science of Psychology, and PSYC UN1610 Introductory Statistics for Behavioral Scientists.

Courses taken for a P grade may not be used to satisfy the major or concentration requirements, except for P grades earned in the Spring 2020 semester, and during semesters when CC and GS enact exceptions allowing P grades to count for major requirements.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

Majors and concentrators in psychology and majors in neuroscience and behavior should begin planning a program of study as early as possible. All necessary forms and information are available in [Program Planning Tips](#). All majors and concentrators in [Psychology](#) and majors in [Neuroscience and Behavior](#) should complete a [Major Requirement Checklist \(MRC\)](#) before consulting a program adviser to discuss program plans. At minimum, all students must submit a [Major Requirement Checklist](#) prior to the start of their final semester, so that graduation eligibility can be certified. Once the MRC is submitted, the Undergraduate Curriculum Assistant and the DUS's will review your curriculum plans and advise if changes need to be made.

### Program Planning for all Students

The department's [program goals](#) start with the development of a solid knowledge base in psychological science. Consistent with the value psychology places on empirical evidence, courses at every level of the curriculum nurture the development of skills in research methods, quantitative literacy, and critical thinking, and foster respect for the ethical values that undergird the science of psychology.

Most of these [program goals](#) are introduced in [PSYC UN1001 THE SCIENCE OF PSYCHOLOGY](#), the recommended first psychology course required for all majors that satisfies the prerequisite for most 2000-level courses. These goals are extended and reinforced in our statistics (1600-level) and research methods (1400-level) research methods courses, as well as in the 2000-level lecture courses and 3000- and 4000-level seminars. Each of the 2000-level lecture courses enables students to study systematically, and in greater depth, one of the content areas introduced in [PSYC UN1001 THE SCIENCE OF PSYCHOLOGY](#). These lecture courses are

the principal means by which psychology majors satisfy the distribution requirements, ensuring not only depth but also breadth of coverage across three central areas of psychology: (1) perception and cognition, courses in the 2200s, (2) psychobiology and neuroscience, courses in the 2400s, and (3) social, personality, and abnormal psychology, courses in the 2600s. To complete the major, students take one or more advanced seminars and are encouraged to participate in supervised research courses, where they have the opportunity to explore research questions in depth and further develop their written and oral communication skills.

## Course Numbering Structure

Course numbers reflect the structure of the Psychology curriculum:

- The 1000-level comprises introductions to psychology, introductory research methods courses, and statistics. [PSYC UN1001 THE SCIENCE OF PSYCHOLOGY](#) is an introductory course with no prerequisites, which can serve as the prerequisite for most of the 2000-level courses. [PSYC UN1021 Science of Psychology: Explorations and Applications](#) is an alternative version of [PSYC UN1001 THE SCIENCE OF PSYCHOLOGY](#) and fulfills the same requirements. The 1400s contain the research methods laboratory courses, and the 1600s contain statistics courses; these two course types are designed to prepare students to be able to understand, critique, and conduct the types of research found in many psychology and neuroscience labs.
- The 2000-level comprises lecture courses that are introductions to areas within psychology; most require [PSYC UN1001 THE SCIENCE OF PSYCHOLOGY](#) as a prerequisite.
- The 3000-level comprises more advanced and specialized undergraduate courses; most are given in a seminar format and require instructor permission.
- The 3900s are the courses providing research opportunities for undergraduates.
- The 4000-level comprises advanced seminars suitable for both advanced undergraduates and graduate students, and require instructor permission.

Subcategories within the 2000-, 3000-, and 4000-levels correspond to the three groups in our distribution requirement for undergraduate Psychology majors:

1. Perception and cognition (2200s, 3200s, and 4200s),
2. Psychobiology and neuroscience (2400s, 3400s, and 4400s), and
3. Social, personality, and abnormal psychology (2600s, 3600s, and 4600s).

Additionally, we designate Integrative and Applied courses using x800s (e.g., GU4880) and Advanced Topics in Psychology Research using the x900s (e.g., UN1910, UN1920, UN1930, UN1990, GU4930)

Note that Barnard psychology courses do not follow the same numbering scheme.

## Guidance for First-Year Students

Students with no prior psychology coursework should start by taking PSYC 1001 The Science of Psychology. PSYC 1001 or an equivalent introductory psychology course is a prerequisite to almost every other PSYC course, with the exception of PSYC 2630 Social Psychology.

Students who have taken an introductory psychology course may enroll in any PSYC course for which they meet the prerequisites. The best courses for students just starting out are a statistics course (PSYC 1610 is recommended) or any of the 2000-level PSYC lecture courses.

## Guidance for Transfer Students

Approval of transfer credits on a student's Entrance Credit Report toward general requirements for the B.A. degree does not grant approval of these credits toward the psychology major. Students must apply for written approval of transfer credit towards the major by submitting the [Major Requirement Substitution Form](#) and supporting documentation. This form, along with additional information about transfer credits can be found on the [Transfer Credit page of our website](#).

### Requirements for Transfer Courses

For a course taken outside of Columbia or Barnard to be able to count toward the Psychology Major or the Neuroscience & Behavior Major, the following must be true:

- The course should be substantially similar in content and/or learning objectives to one offered at Columbia.
- The course must have been approved for at least 3 points of credit by GS or CC.
- The grade received must be a B- or better.
- The course must have been taken for a grade (no P grades).
- The course must have been taken within the past 7 years.
- If a course taken at another institution overlaps with a course taken at Columbia, only one will be applied towards the major. Please consult your Program Advisor if you are considering registering for a Columbia or Barnard course that is similar to a transfer course you plan to count toward your major.

### Psychology Major

Up to 3 transfer courses may be applied toward the psychology major. Any transfer courses thus applied count toward the

limit of 5 courses from outside the Columbia Psychology Department.

Students who have completed an introductory psychology course at another institution should submit a Major Requirement Substitution Request (see procedure, below) to verify whether or not this course meets departmental standards to count towards the major. If transfer credit toward the major is not approved, the student must enroll in PSYC UN1001 or PSYC BC1001 to complete this major requirement.

Statistics courses taken anywhere other than Columbia or Barnard may not count toward the major. Psychology majors will benefit from taking statistics here no matter how well they did in previous intro stats courses. If you are entering Columbia with extensive statistics coursework, your Program Advisor will help you find an appropriate advanced statistics course that can meet the Statistics Requirement of your major.

To count transfer courses toward a specific requirement of the major (e.g., Science of Psych; one of the Distribution Requirements), courses must have been taken fully in-person. Transfer courses taken online (or in hybrid format) are only eligible to count toward the elective portion of the major.

The Psychology Department allows students to meet the Science of Psychology requirement with a score of 5 on the AP Psychology exam, or a score of 7 on the Higher Level IB Psychology exam. The AP/IB Psychology exam does not count as a course or towards their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course to fulfill the required number of courses for their major.

College Board Advanced Placement (AP) statistics exam scores may not be used to satisfy the statistics requirement of the Psychology Major.

### Psychology Concentration

The same guidelines for transferring courses to count toward the Psychology Major apply to the concentration, except that the maximum number of transfer courses that may count toward the concentration is 2.

### Neuroscience & Behavior Major

The Neuroscience & Behavior major is co-sponsored by the Department of Psychology and the Department of Biological Sciences. In addition to one year of college general chemistry, eleven courses are required to complete the Neuroscience & Behavior major: seven from the Department of Biological Sciences and five from the Department of Psychology (commonly referred to as P1-P5). Please, consult [this page](#) for additional information on the major requirements for the Neuroscience and Behavior Major.

Students should consult their [Program Advisor](#) in the Psychology department before registering for psychology courses offered outside the department. With the Advisor's

approval, a maximum of one psychology course from another institution, including Barnard, may be applied toward the psychology portion of the Neuroscience & Behavior major. Transfer courses taken in any modality (in-person, online, or hybrid) may be eligible to count toward P1. Transfer courses must have been taken fully in-person to be eligible to count for P2-P5. Students who wish to obtain credit for a course taken at Barnard or at another institution should complete the [Major Requirement Substitution Form](#). To be approved for the major, the course should be substantially similar to one offered by this department and approved for this major, and the grade received must be a C- or better if from Barnard, or B- or better if from another institution.

The Psychology Department allows students to meet the Science of Psychology requirement with a score of 5 on the AP Psychology exam, or a score of 7 on the Higher Level IB Psychology exam. The AP/IB Psychology exam does not count as a course or toward a student's points total for their program; students placing out of the Science of Psychology requirement in this way will need to take an additional course to fulfill the required number for their major.

Statistics courses taken anywhere other than Columbia or Barnard may not be counted toward the N&B major; AP Statistics also is not able to count toward the Statistics (i.e., P3) requirement. Students who have completed a statistics course elsewhere are encouraged to fulfill the P3 requirement either with an intermediate/advanced stats course offered at Columbia, or by taking a PSYC UN1400-level research methods course.

## UNDERGRADUATE PROGRAMS OF STUDY

### Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors

#### Double Majors/Concentrations

All students attempting to complete double majors, double concentrations, or a combination of a major and a concentration should consult the college rules for double counting of [courses](#).

#### Overlapping Courses

Students cannot receive credit for two courses—one completed at Columbia and one at another institution (including Barnard)—if those courses have largely overlapping content. For example, PSYC UN1001 THE SCIENCE OF PSYCHOLOGY is similar in content to introductory psychology courses offered at many other institutions, including Barnard; only one such course will receive credit. Similarly, PSYC UN2630 SOCIAL PSYCHOLOGY and PSYC BC1138 Social Psychology have overlapping content; only one will receive credit. Please refer to the table of [Overlapping Courses](#) for a partial list of courses at Columbia and Barnard that are known to overlap.

### Grade Requirements for the Major

A grade of C- or higher must be earned and revealed on the transcript in any Columbia or Barnard course, including the first, that is used to satisfy the major requirements. The grade of P is not accepted for credit towards the [Psychology major](#), [Psychology concentration](#), or [Neuroscience and Behavior major](#). Courses taken on a Pass/D/Fail basis may not be used to satisfy the major or concentration requirements unless the grade of P is uncovered by the Registrar's deadline. Students may petition to have their P/D/F grades uncovered after the registrar's deadline for the following three courses only: PSYC UN1001 Science of Psychology, PSYC UN1010 Mind, Brain, & Behavior (no longer offered), and PSYC UN1610 Introductory Statistics for Behavioral Scientists. Courses taken for a P grade may not be used to satisfy the major or concentration requirements, except for P grades earned in the Spring 2020 semester.

### Major Requirement Checklist

Prior to the start of their final semester, all seniors must submit a [Major Requirement Checklist](#) showing all major courses they have taken and those they plan to take. The Psychology department evaluates each checklist to determine whether or not the course plan completes the major requirements and then notifies the student accordingly. If the student's course plan changes, or if it does not satisfy the major requirements, a revised checklist must be submitted. Departmental approval of an accurate and up-to-date checklist will help ensure completion of all major requirements on time for graduation.

### Major in Psychology

Please read [Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors](#) (p.       ) above.

#### Major Requirements

Students must complete 11 courses in Psychology or an approved cognate discipline. To count toward the major, a course must be taken for 3 or more points. At least 6 of the 11 courses must be in the Columbia Psychology Department.

These 11 courses must include:

1. Introductory Psychology Course
2. One Statistics course
3. One Research Methods course
4. One Group I Course
5. One Group II Course
6. One Group III Course
7. One course meeting the Seminar requirement

8. One course meeting the integrative/applied Special Elective requirement
9. Enough PSYC electives to complete 11 courses

Each course may fulfill only one of these major requirements. See below for details on each of these requirements.

#### The Introductory Psychology Course

- [PSYC UN1001](#) THE SCIENCE OF PSYCHOLOGY

#### A Statistics Course

Select one of the following:

- [PSYC UN1610](#) STATISTICS-BEHAVIORAL SCIENTISTS
- [PSYC UN1660](#) Advanced Statistical Inference
- [STAT UN1001](#) INTRO TO STATISTICAL REASONING
- [STAT UN1101](#) INTRODUCTION TO STATISTICS (formerly STAT W1111)
- [STAT UN1201](#) CALC-BASED INTRO TO STATISTICS (formerly STAT W1211)

#### A Research Methods Course

Select one of the following:

- [PSYC UN1420](#) RESEARCH METHODS - HUMAN BEHAVIOR
- [PSYC UN1450](#) RESEARCH METHODS - SOCIAL COGNITION & EMOTION
- [PSYC UN1455](#) RESEARCH METHODS: SOCIAL/ PERSONALITY
- [PSYC UN1490](#) RESEARCH METHODS - COGNITION/ DECISION MAKING

Majors are strongly advised to complete the statistics and research methods requirements, in that order, by the end of their junior year. Students are advised to verify the specific prerequisites for research methods courses, most of which require prior completion of a statistics course.

#### Distribution Requirement

One course (3 points or more) must be taken from each of the following three groups (in addition to the introductory, statistics, and research methods courses described above):

- Group I—Perception and cognition: courses numbered in the 2200s, 3200s, or 4200s.

- Group II—Psychobiology and neuroscience: courses numbered in the 2400s, 3400s, or 4400s. Also [PSYC UN1010](#) Mind, Brain and Behavior (no longer offered).
- Group III—Social, personality, and abnormal: courses numbered in the 2600s, 3600s, or 4600s.

Research Methods courses do not fulfill any of the Group distribution requirements.

#### Seminar Requirement

Students must complete one course meeting the Seminar requirement. A seminar course must be taken for 3 or more points.

All courses offered through the Columbia Psychology Department and numbered in the 3200s, 3400s, 3600s, 4200s, 4400s, and 4600s count toward the seminar requirement. Not all Barnard courses taught in a seminar format fulfill this requirement—see Barnard Courses, below, for more information.

Seminars are usually taken in the junior and senior year as a culmination of the major program, but any students who have met the prerequisites and gain the instructor's permission to join the course may enroll. Enrollment in all seminar courses requires the instructor's permission; students are advised to contact instructors at least one month prior to registration to request seminar admission. Note that honors, senior thesis research intensive, and supervised individual research courses ([PSYC UN3910](#) HONORS SEMINAR, [PSYC UN3920](#) HONORS RESEARCH, [PSYC UN3930](#) Senior Thesis Advanced Research Seminar, and [PSYC UN3950](#) Supervised Individual Research) will not meet the seminar requirement.

For those completing the new major requirements, no course may be counted twice in fulfillment of the above major requirements: separate courses must be taken to fulfill the seminar requirement and each distribution group.

#### Special Elective

The Special Elective encompasses a wide range of courses: those that cut across and connect different sub-disciplines within psychology; those that integrate psychology with other disciplines; those that apply psychology to real-world problems; those that dig deeper into advanced statistics and methods topics; and those that offer hands-on experience with psychology research.

The courses listed [here](#) are pre-approved to count toward the Special Elective requirement. If you would like to count a course that does not appear on the list, please contact your [Program Advisor](#) prior to enrolling.

#### Electives

Additional psychology courses ("electives") must be taken for a total of 11 courses.

Once a student has met the specific requirements of the major, any other psychology or approved cognate courses that they take to complete the 11-course minimum are considered electives.

As described below, these may include a limited number of research courses, transfer courses, and Barnard psychology courses not approved for specific requirements.

No course may be counted twice in fulfillment of the above major requirements.

### **Old Major Requirements (for students who entered Columbia prior to Fall 2020)**

Students must complete 30 or more points to complete the Psychology Major. Those 30 points must include:

1. Introductory Psychology Course
2. One Statistics course
3. One Research Methods course
4. One Group I Course
5. One Group II Course
6. One Group III Course
7. One course meeting the Seminar requirement
8. Enough PSYC electives to complete 30 points

## **Major in Neuroscience and Behavior**

Please read [Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors](#) above.

The department cosponsors an interdepartmental major in neuroscience and behavior with the Department of Biological Sciences. For assistance in planning the psychology portion of the neuroscience and behavior major, refer to the [Program Planning Tips website](#) and use the appropriate [major requirement checklist](#).

No course may be counted twice in fulfillment of the biology or psychology requirements described below. Many graduate programs in neuroscience also require one year of calculus, one year of physics, and chemistry through organic.

### **Required Courses**

In addition to one year of college general chemistry, eleven courses are required to complete the major—six from the Department of Biological Sciences and five from the Department of Psychology. For the definitive list of biology requirements, see the [Department of Biological Sciences website](#).

\*NOTE: For students entering in Fall 2024 or later, two biology elective courses will be required. For students entering prior to Fall 2024, one biology elective course will be required.

### **Required Chemistry Courses**

One year of college chemistry is required prior to taking Introductory Biology.

### **Required Biology Courses**

1. [BIOL UN2005](#) INTRO BIO I: BIOCHEM, GEN, MOLEC
2. [BIOL UN2006](#) INTRO BIO II: CELL BIO, DEV/PHYS
3. [BIOL UN3004](#) NEUROBIO I: CELLULAR # MOLECULAR
4. [BIOL UN3005](#) NEUROBIO II: DEVPT # SYSTEMS
5. Two additional 3000- or 4000-level biology course from a [list approved by the biology adviser](#) to the program.  
\*NOTE: For students entering in Fall 2024 or later, two biology elective courses will be required. For students entering prior to Fall 2024, one biology elective course will be required.\*

### **Required Psychology Courses**

1. [PSYC UN1001](#) THE SCIENCE OF PSYCHOLOGY
2. [PSYC UN2430](#) COGNITIVE NEUROSCIENCE or [PSYC UN2450](#) BEHAVIORAL NEUROSCIENCE or [PSYC UN2470](#) Fundamentals of Human Neuropsychology
3. One statistics or research methods course from the following:
  - [PSYC UN1420](#) RESEARCH METHODS - HUMAN BEHAVIOR
  - [PSYC UN1450](#) RESEARCH METHODS - SOCIAL COGNITION # EMOTION
  - [PSYC UN1455](#) RESEARCH METHODS: SOCIAL/PERSONALITY
  - [PSYC UN1490](#) RESEARCH METHODS - COGNITION/DECISION MAKING
  - [PSYC UN1610](#) STATISTICS-BEHAVIORAL SCIENTISTS
  - [PSYC UN1660](#) Advanced Statistical Inference
  - [PSYC UN1920](#) The How-Tos of Research
  - [PSYC UN1950](#) Neuroscience Methods: Cells and Circuits
  - [STAT UN1101](#) INTRODUCTION TO STATISTICS (formerly STAT W1111)
  - [STAT UN1201](#) CALC-BASED INTRO TO STATISTICS (formerly STAT W1211)

- Please note, STAT UN1001 does not count towards the Neuroscience & Behavior major.

4. One additional 2000- or 3000-level psychology lecture course from the approved list [here](#).

\*Please make careful note of this list, as courses not listed here will not count towards the P4 requirement.

5. One advanced psychology seminar from the approved list [here](#)

Note: Students wishing to use a seminar course not listed above to meet the P5 seminar requirement must contact their psychology adviser before enrolling to request permission for an exception. Generally speaking, permission for such exceptions is only granted when there is a compelling case related to the student's research or area of study. Students requesting permission to use a course not on this list must ensure that their substantive coursework in the seminar (generally their final paper) is on a neuroscience-focused topic.

#### Exceptions to Biology Requirements

Any exceptions must be approved in advance by a biology adviser and students must receive an email notification of that approval. Students may substitute Barnard College courses only with prior permission from a Biology Department adviser.

### A note on double counting and multiple programs

All students attempting to complete double majors, double concentrations, or a combination of a major and a concentration should consult the college rules for double counting of [courses](#).

The psychology department does not place additional restrictions on double counting. Students with questions about double counting should consult their academic advisor.

Psychology program advisors do not advise about double counting.

Students may not double-major in both Psychology and Neuroscience & Behavior, since both of these programs are housed in the same department.

Because of the overlap between the Cognitive Science major and both Psychology and Neuroscience & Behavior, students should not plan to pursue a double major in those two programs.

### Minor in Psychology

The Psychology Department does not currently offer any minors.

SEAS students pursuing a minor in Psychology should consult with their SEAS advisors; the Columbia Psychology Department does not administer that program.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Psychology

Please read [Guidelines for all Psychology Majors, Concentrators, and Interdepartmental Majors](#) above.

#### Concentration Requirements

Students must complete 7 courses in Psychology or an approved cognate discipline. To count toward the concentration, a course must be taken for 3 or more points. The following requirements must be met:

#### 1. [PSYC UN1001](#) THE SCIENCE OF PSYCHOLOGY

2. A Statistics or Research Methods course ([PSYC UN1610](#) STATISTICS-BEHAVIORAL SCIENTISTS, [STAT UN1001](#) INTRO TO STATISTICAL REASONING, [STAT UN1101](#) INTRODUCTION TO STATISTICS, [STAT UN1201](#) CALC-BASED INTRO TO STATISTICS, or a Research Methods course in the PSYC 14xx's)

3. Either 3 courses in one group, or 1 course in each of the 3 groups: Group I - Cognition & Perception; Group II - Psychobiology & Neuroscience; Group III - Social, Personality, & Abnormal

4. Additional elective courses in psychology to complete the 7-course requirement

Restrictions on research credits, Barnard credits, non-psychology courses, and transfer credits are modified from those of the psychology major as follows:

- No more than 2 transfer courses from other institutions can be applied toward the concentration.
- No more than 3 total courses from outside Columbia (Barnard and/or transfer) can be applied to the concentration.
- A maximum of 1 non-PSYC course can count toward concentration requirements (e.g., courses taken in the Statistics Department; cognate courses offered through Philosophy, Business, Law, etc.).
- No more than 1 semester of [PSYC UN3950](#) SUPERVISED INDIVIDUAL RESEARCH or other supervised research course (taken for 3 or 4 points) can count towards the concentration.

Except as noted above, other regulations outlined in the [Psychology Major section](#) regarding grades, transfer credits, and overlapping courses also apply toward the Psychology Concentration.

Old Concentration Requirements (for students entering Columbia prior to Fall 2020)

A concentration in psychology requires a minimum of 18 points, including PSYC UN1001 THE SCIENCE OF PSYCHOLOGY or PSYC UN1021 Science of Psychology: Explorations and Applications and courses in at least two of the three groups listed under “Distribution Requirement” for the psychology major.

Restrictions on research credits, Barnard credits, and transfer credits are modified from those of the psychology major as follows:

1. Only 4 points total may be applied toward the concentration from research or field-work courses, including: PSYC UN3950 Supervised Individual Research, PSYC UN3920 HONORS RESEARCH PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER, PSYC BC3473 CLINICAL FIELD PRACTICUM, PSYC BC3592 Senior Research Seminar, and PSYC BC3599 Individual Projects;
2. Only 5 points from Barnard (including PSYC BC1001 INTRODUCTION TO PSYCHOLOGY) may be applied toward the concentration.
3. Only 5 points total (including any Barnard points) from approved psychology courses taken at other institutions may be applied toward the concentration

Barnard Lab courses do not count towards the Research Methods requirement of the Psychology Major or Concentration.

### **PSYC UN1001 THE SCIENCE OF PSYCHOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Enrollment may be limited. Attendance at the first two class periods is mandatory.

Prerequisites: **BLOCKED CLASS. EVERYONE MUST JOIN WAITLIST TO BE ADMITTED** Broad survey of psychological science including: sensation and perception; learning, memory, intelligence, language, and cognition; emotions and motivation; development, personality, health and illness, and social behavior. Discusses relations between the brain, behavior, and experience. Emphasizes science as a process of discovering both new ideas and new empirical results. PSYC UN1001 serves as a prerequisite for further psychology courses and should be completed by the sophomore year

#### **Fall 2024: PSYC UN1001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1001	001/10689	T Th 1:10pm - 2:25pm 501 Schermerhorn Hall	Patricia Lindemann	3.00	176/200

PSYC 1001	002/13843	M W 11:40am - 12:55pm 501 Schermerhorn Hall	Sarah DeMoya	3.00	166/200
-----------	-----------	--	--------------	------	---------

PSYC 1001	003/10670	M W 10:10am - 11:25am 501 Schermerhorn Hall	Nora Isacoff	3.00	154/200
-----------	-----------	--	--------------	------	---------

#### **Spring 2025: PSYC UN1001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1001	001/11791	T Th 1:10pm - 2:25pm 501 Schermerhorn Hall	Patricia Lindemann	3.00	207/224
PSYC 1001	002/11792	T Th 10:10am - 11:25am 501 Schermerhorn Hall	John Thorp	3.00	198/225
PSYC 1001	AU1/18826	T Th 1:10pm - 2:25pm Othr Other	Patricia Lindemann	3.00	5/5
PSYC 1001	AU2/18827	T Th 10:10am - 11:25am Othr Other	John Thorp	3.00	4/5

### **PSYC UN1021 Science of Psychology: Explorations and Applications. 3.00 points.**

UN1021 offers a broad introductory survey of psychological science, discussing relations between the brain, behavior, and experience, with regard to topics including: sensation and perception; learning, memory, language, and cognition; emotions and motivation; development, personality, health and well-being, and social behavior. The course emphasizes science as a process of discovering both new ideas and new empirical results -- and the ways in which psychological research can be used to address real-world challenges

### **PSYC UN1420 RESEARCH METHODS - HUMAN BEHAVIOR. 4.00 points.**

Attendance at the first class is mandatory. Fee: \$70.

Prerequisites: *PSYC W1001* or *PSYC W1010*, and a statistics course (*PSYC W1610* or the equivalent), or the instructor's permission.

Prerequisites: PSYC UN1001 and a statistics course (PSYC UN1610 or the equivalent), or the instructor's permission.

Corequisites: PSYC UN1421 Introduction to the techniques of research employed in the study of human behavior. Students gain experience in the conduct of research, including design of simple experiments, observation and measurement techniques, and the analysis of behavioral data

#### **Fall 2024: PSYC UN1420**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1420	001/14751	M 4:10pm - 6:00pm 200b Schermerhorn Hall	John Thorp	4.00	37/37

#### **Spring 2025: PSYC UN1420**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 1420 001/11801	M 4:10pm - 6:00pm	Patricia Lindemann	4.00	46/52
	614 Schermerhorn Hall			

### PSYC UN1421 RESEARCH METHODS-HUM BEHAV LAB. 0.00 points.

Limited enrollment in each section.

Corequisites: PSYC UN1420

Corequisites: PSYC UN1420

#### Fall 2024: PSYC UN1421

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1421 001/14791		M 6:10pm - 8:00pm	John Thorp	0.00	19/19
		200b Schermerhorn Hall			
PSYC 1421 002/14792		T 6:10pm - 8:00pm	John Thorp	0.00	18/19
		200c Schermerhorn Hall			

#### Spring 2025: PSYC UN1421

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1421 001/11809		M 6:10pm - 8:00pm	Patricia Lindemann	0.00	16/20
		200b Schermerhorn Hall			
PSYC 1421 002/11810		M 6:10pm - 8:00pm	Patricia Lindemann	0.00	15/15
		200c Schermerhorn Hall			
PSYC 1421 003/11814		T 2:10pm - 4:00pm	Patricia Lindemann	0.00	15/15
		200c Schermerhorn Hall			

### PSYC UN1450 RESEARCH METHODS - SOCIAL COGNITION # EMOTION. 4.00 points.

Attendance at the first class is essential. Priority given to psychology majors. Fee: \$70.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, and a statistics course (*PSYC W1610* or the equivalent), or the instructor's permission.

Corequisites: PSYC UN1451

An introduction to research methods employed in the study of human social cognition and emotion. Students gain experience in the design and conduct of research, including ethical issues, observation and measurement techniques, interpretation of data, and preparation of written and oral reports

#### Fall 2024: PSYC UN1450

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1450 001/14844		M 10:10am - 12:00pm	Kevin Ochsner	4.00	48/55
		332 Uris Hall			

### PSYC UN1451 RESEARCH METHODS - SOCIAL COGNITION # EMOTION - LAB. 0.00 points.

Limited enrollment in each section.

Corequisites: PSYC UN1450

An introduction to research methods employed in the study of human social cognition and emotion. Students gain experience in the design and conduct of research, including ethical issues, observation and measurement techniques, interpretation of data, and preparation of written and oral reports

#### Fall 2024: PSYC UN1451

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1451 001/14847		W 10:10am - 12:00pm	Kevin Ochsner	0.00	18/18
		467 Ext Schermerhorn Hall			
PSYC 1451 002/14850		W 10:10am - 12:00pm	Kevin Ochsner	0.00	17/15
		608 Lewisohn Hall			
PSYC 1451 003/14852		W 12:10pm - 2:00pm	Kevin Ochsner	0.00	14/18
		200c Schermerhorn Hall			

### PSYC UN1455 RESEARCH METHODS: SOCIAL/ PERSONALITY. 4.00 points.

Fee: \$70.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, and a statistics course (*PSYC W1610* or the equivalent), or the instructor's permission.

Corequisites: PSYC UN1456

Prerequisites: PSYC UN1001 or PSYC UN1010 and a statistics course (*PSYC UN1610* or the equivalent), or the instructors permission. Corequisites: PSYC UN1456 Methodology and procedures of personality and social psychological research and exercises in data analysis and research design. Ethical issues in psychological research. Statistical concepts such as parameter estimation and testing, measurement reliability and validity, merits and limitations of correlational and experimental research designs, and empirical evaluation of theories

#### Spring 2025: PSYC UN1455

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1455 001/11816		M 10:10am - 12:00pm	Niall Bolger	4.00	32/35
		200b Schermerhorn Hall			

### PSYC UN1456 RESEARCH METHODS:SOCIAL/ PERSONALITY. 0.00 points.

Limited enrollment in each section.

Corequisite: PSYC UN1455

#### Spring 2025: PSYC UN1456

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1456 001/11817		W 10:10am - 12:00pm	Niall Bolger	0.00	18/15
		200b Schermerhorn Hall			
PSYC 1456 002/11819		W 2:10pm - 4:00pm	Niall Bolger	0.00	14/15
		200b Schermerhorn Hall			

**PSYC UN1490 RESEARCH METHODS - COGNITION/DECISION MAKING. 4.00 points.**

Corequisites: PSYC UN1491

Corequisites: PSYC UN1491 Prerequisites: Science of Psychology (PSYC 1001) or Mind, Brain, - Behavior (PSYC 1010) or equivalent intro psych course, plus an introductory statistics course. Introduces research methods employed in the study of the cognitive and social determinants of thinking and decision making. Students gain experience in the conduct of research, including: design of simple experiments; observation and preference elicitation techniques; the analysis of behavioral data, considerations of validity, reliability, and research ethics; and preparation of written and oral reports. Note: Fee: \$70.

Attendance at the first class is essential

**PSYC UN1491 RESEARCH METHODS - COGNITION/DECISION LAB. 0.00 points.**

Prerequisites: (PSYC UN1001 or PSYC UN1010) and (PSYC UN1610 or STAT UN1001 or STAT UN1101 or STAT UN1201)

Corequisites: PSYC UN1490

Prerequisites: PSYC UN1001 and (PSYC UN1610 or STAT UN1001 or STAT UN1101 or STAT UN1201) Or equivalent introductory psychology and statistics courses. Corequisites: PSYC UN1490 Required lab for PSYC UN1490

**PSYC UN1610 STATISTICS-BEHAVIORAL SCIENTISTS. 4.00 points.**

Lecture and lab. Priority given to psychology majors. Fee \$70.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*. Recommended preparation: one course in behavioral science and knowledge of high school algebra.

Corequisites: PSYC UN1611

Prerequisites: PSYC UN1001 or PSYC UN1010

Recommended preparation: one course in behavioral science and knowledge of high school algebra. Corequisites: PSYC UN1611 Introduction to statistics that concentrates on problems from the behavioral sciences

**Fall 2024: PSYC UN1610**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1610	001/10692	T Th 11:40am - 12:55pm 200b Schermerhorn Hall	Katherine Fox-Glassman	4.00	39/40

**Spring 2025: PSYC UN1610**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1610	001/12985	T Th 10:10am - 11:25am 233 Seeley W. Mudd Building	Christopher Baldassano	4.00	49/45

**PSYC UN1611 STATISTICS-BEHAVIORAL SCIENTISTS-LAB. 0.00 points.**

Limited enrollment in each section.

Corequisites: PSYC UN1610

Corequisites: PSYC UN1610 Required lab section for PSYC UN1610

**Fall 2024: PSYC UN1611**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1611	001/10678	Th 4:10pm - 6:00pm 200b Schermerhorn Hall	Katherine Fox-Glassman	0.00	17/15
PSYC 1611	002/10681	Th 6:10pm - 8:00pm 200c Schermerhorn Hall	Katherine Fox-Glassman	0.00	16/15
PSYC 1611	003/18784	F 12:10pm - 2:00pm 200b Schermerhorn Hall	Katherine Fox-Glassman	0.00	6/15

**Spring 2025: PSYC UN1611**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 1611	001/13859	Th 2:10pm - 4:00pm 200b Schermerhorn Hall	Christopher Baldassano	0.00	18/15
PSYC 1611	002/13860	Th 4:10pm - 6:00pm 200b Schermerhorn Hall	Christopher Baldassano	0.00	17/15
PSYC 1611	003/13862	Th 4:10pm - 6:00pm 200c Schermerhorn Hall	Christopher Baldassano	0.00	15/15

**PSYC UN1910 Research Ethics in Psychology. 4 points.**

Prerequisites: (PSYC UN1001) or

This course explores the ethical theory, principles, codes and standards applicable to research in psychology and the complexities inherent in ethical research practice.

**PSYC UN1930 Behavioral Data Science. 4 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course covers the basic skills and knowledge needed to address psychological research questions using data science methods. Topics cover the full scope of a behavioral data science research project including data acquisition, data processing, and data analysis.

**PSYC UN1990 Global Behavioral Science. 4.00 points.**

This course builds on fundamentals of psychological and behavioral science by exploring reproducibility and replication on a global level. Students will learn from a wide range of studies and their real-world implications

**PSYC UN2215 Cognition and the Brain. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

**Not offered during 2023-2024 academic year.**

Prerequisites: *PSYC W1001* or *PSYC W1010* (recommended) or the instructor's permission.

How mental activities -- particularly human cognitive processes -- are implemented in the brain, with some emphasis on methods and findings of neuroscience. Topics include long term and working memory, attention and executive processes, concepts and categorization, decision making, and language.

**PSYC UN2220 COGNITION: MEMORY AND STRESS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Attendance at the first class is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructors permission. Memory, attention, and stress in human cognition

**Fall 2024: PSYC UN2220**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2220	001/10668	M W 1:10pm - 2:25pm 602 Hamilton Hall	Janet Metcalfe	3.00	49/75

**PSYC UN2235 THINKING AND DECISION MAKING. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: an introductory course in psychology.

Prerequisites: an introductory course in psychology. Models of judgment and decision making in both certain and uncertain or risky situations, illustrating the interplay of top-down (theory-driven) and bottom-up (data-driven) processes in creating knowledge. Focuses on how individuals do and should make decisions, with some extensions to group decision making and social dilemmas

**Spring 2025: PSYC UN2235**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2235	001/11826	T Th 11:40am - 12:55pm 501 Schermerhorn Hall	Katherine Fox-Glassman	3.00	117/120

**PSYC UN2250 Evolution of Cognition. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 or *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

A systematic review of different forms of cognition as viewed in the context of the theory of evolution. Specific topics include the application of the theory of evolution to behavior, associative learning, biological constraints on learning, methods for studying the cognitive abilities of animals, levels of representation, ecological influences on cognition, and evidence of consciousness in animals.

**PSYC UN2280 Developmental Psychology. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Enrollment may be limited. Attendance at the first two classes is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the equivalent.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the equivalent. Introduction to the scientific study of human

development, with an emphasis on psychobiological processes underlying perceptual, cognitive, and emotional development

**Fall 2024: PSYC UN2280**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2280	001/10695	T Th 4:10pm - 5:25pm 501 Schermerhorn Hall	Nim Tottenham	3.00	135/150

**PSYC UN2420 ANIMAL BEHAVIOR. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 or *PSYC W1001* or *PSYC W1010*, or a college-level biology course, or the instructor's permission.

Introduction to behavioral systems, evolution of behavioral traits, and analysis of behavior. Topics include reproductive and social behavior, mating systems, competition, cooperation, communication, learning, development and the interplay of genes and environment.

**PSYC UN2430 COGNITIVE NEUROSCIENCE. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology This course provides an in-depth survey of data and models of a wide variety of human cognitive functions.

Drawing on behavioral, neuropsychological, and neuroimaging research, the course explores the neural mechanisms underlying complex cognitive processes, such as perception, memory, and decision making. Importantly, the course examines the logic and assumptions that permit us to interpret brain activity in psychological terms

**Fall 2024: PSYC UN2430**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2430	001/10671	M W 2:40pm - 3:55pm 501 Schermerhorn Hall	Alfredo Spagna	3.00	104/130

**Spring 2025: PSYC UN2430**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2430	001/13711	T Th 1:10pm - 2:25pm 614 Schermerhorn Hall	Lila Davachi	3.00	97/120

**PSYC UN2440 Language and the Brain. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Introduction to psychological research on human language and communication and to brain mechanisms supporting language processing. Topics include comprehension and production of speech sounds, words and sentences; reading and writing; bilingualism; communication behavior.

**PSYC UN2450 BEHAVIORAL NEUROSCIENCE. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructors permission. Examines the principles governing neuronal activity, the role of neurotransmitter systems in memory and motivational processes, the presumed brain dysfunctions that give rise to schizophrenia and depression, and philosophical issues regarding the relationship between brain activity and subjective experience

**Spring 2025: PSYC UN2450**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2450	001/11829	M W 10:10am - 11:25am 614 Schermerhorn Hall	Sarah DeMoya	3.00	72/72

**PSYC UN2460 DRUGS AND BEHAVIOR. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *PSYC W1001* or *PSYC W1010*, or the equivalent.  
Prerequisites: PSYC W1001 or PSYC W1010, or the equivalent. The effects of psychoactive drugs on the brain and behavior**Fall 2024: PSYC UN2460**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2460	001/10698	T Th 8:40am - 9:55am 501 Schermerhorn Hall	Carl Hart	3.00	118/150

**PSYC UN2470 Fundamentals of Human Neuropsychology. 3.00 points.**

Fundamentals of Human Neuropsychology is an intermediate-level lecture course, which explores how the analysis of lesion patterns extended across brain networks has offered invaluable insights on the relationship between brain and behavior and deepened our understanding of the causal relationships between brain lesions and their clinical consequences

**PSYC UN2480 The Developing Brain. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Brain development across the life span, with emphasis on fetal and postnatal periods. How the environment shapes brain development and hence adult patterns of behavior.

**PSYC UN2610 INTRODUCTION TO PERSONALITY. 3.00 points.**

Prerequisites: an introductory psychology course.

A survey of the important methods, findings, and theories in the field of personality research.

**Fall 2024: PSYC UN2610**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2610	001/10691	T Th 10:10am - 11:25am 141 Uris Hall	Usha Barahmand	3.00	40/60

**PSYC UN2620 ABNORMAL BEHAVIOR. 3.00 points.**

Prerequisites: An introductory psychology course. Examines definitions, theories, and treatments of abnormal behavior

**Fall 2024: PSYC UN2620**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2620	001/10697	T Th 4:10pm - 5:25pm 301 Uris Hall	E'mett McCaskill	3.00	198/210

**Spring 2025: PSYC UN2620**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2620	001/11831	F 1:10pm - 3:40pm 329 Pupin Laboratories	Jeffrey Cohen	3.00	76/100

**PSYC UN2630 SOCIAL PSYCHOLOGY. 3.00 points.**

Surveys important methods, findings, and theories in the study of social influences on behavior. Emphasizes different perspectives on the relation between individuals and society.

**Fall 2024: PSYC UN2630**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2630	001/10694	T Th 2:40pm - 3:55pm 501 Schermerhorn Hall	Tory Higgins	3.00	90/150

**PSYC UN2640 INTRO TO SOCIAL COGNITION. 3.00 points.**

Prerequisites: an introductory course in psychology or the instructor's permission.

Prerequisite: An introductory psychology course. An introduction to basic concepts in social cognition, an approach to understanding social judgment and behavior by investigating the underlying mental processes. Topics include attitudes, identity, and prejudice, among others

**PSYC UN2650 INTRO TO CULTURAL PSYCHOLOGY. 3.00 points.**

Prerequisites: none; some basic knowledge of social psychology is desirable.

A comprehensive examination of how culture and diversity shape psychological processes. The class will explore psychological and political underpinnings of culture and diversity, emphasizing social psychological approaches. Topics include culture and social cognition, group and identity formation, psychology of multiculturalism, stereotyping, prejudice, and gender. Applications to real-world phenomena discussed.

**PSYC UN2670 Social Development. 3 points.**Prerequisites: *PSYC W1001* or *PSYC W1010*, or the equivalent.

This lecture course introduces students to the study of typical human social development with a particular focus on genetic, familial and peer influences on the development of social behaviors during early childhood.

**PSYC UN2690 Frontiers of Justice. 4.00 points.**

Frontiers of Justice is designed to encourage students and equip them with the skills to become active and effective “Change Agents” within their academic institutions and larger communities. Oriented by the question, What does justice look like?, this course aims to raise political and social awareness and engagement with the challenges facing New York City and strengthen ties between Columbia University, disadvantaged communities, and city government agencies and community organizations. Through sharing ideas about how to make structural and systemic change in ways that integrate science, law, politics, history, narrative and community engagement, the course is intended to support students in working to break down racial and ethnic barriers and toward a more fair and just society

**PSYC UN3270 COMPUT APPROACHES-HUMAN VISION. 3.00 points.**

This course will be offered in Fall 2016.

Prerequisites: some background in psychology and/or neurophysiology (e.g., *PSYC W1001*, *PSYC W1010*, *PSYC W2230*, *PSYC W2450*; *BIOL W3004* or *BIOL W3005*) is desirable. See instructor if you have questions about your background. Some background in mathematics and computer science (e.g., calculus or linear algebra, a programming language) is highly recommended.

Prerequisites: some background in psychology and/or neurophysiology (e.g. *PSYC UN1001*, *PSYC UN1010*, *PSYC UN2230*, *PSYC UN2450*; *BIOL UN3004* or *BIOL UN3005*) is desirable. See instructor if you have questions about your background. Some background in mathematics and computer science (e.g. calculus or linear algebra, a programming language) is highly recommended. Study of human vision--both behavioral and physiological data--within a framework of computational and mathematical descriptions. Please contact Prof. Graham by e-mail (nvg1@columbia.edu) if you are interested in this course

**PSYC UN3280 Seminar In Infant Development. 3 points.**

Prerequisites: a course in perception, cognition or developmental psychology, and the instructor's permission. Analysis of human development during the first year of life, with an emphasis on infant perceptual and cognitive development.

**PSYC UN3290 Self: A Cognitive Exploration (Seminar). 4 points.**

**Not offered during 2023-2024 academic year.**

Prerequisites: *PSYC W1001* or *PSYC W1010*, or the equivalent, plus the instructor's permission.

What does it mean to have a sense of self? Is it uniquely human? Taking a cognitive perspective, we will discuss these

questions as well as self-reflective and self-monitoring abilities, brain structures relevant to self-processing, and disorders of self. We will also consider the self from evolutionary, developmental, neuroscience, and psychopathological perspectives.

**PSYC UN3445 THE BRAIN AND MEMORY. 4.00 points.**

Prerequisites: (*PSYC UN1010*) or

Prerequisites: (*PSYC UN1010*) or Equivalent introductory course in neuroscience or cognitive psychology and the instructors permission This seminar will give a comprehensive overview of episodic memory research: what neuroimaging studies, patient studies, and animal models have taught us about how the brain creates, stores, and retrieves memories

**PSYC UN3450 Evolution of Intelligence, Animal Communication, # Language. 3.00 points.**

Prerequisites: *PSYC W1001* or *PSYC W1010*, and the instructor's permission.

Prerequisites: *PSYC UN1001*, and the instructors permission.

A systematic review of the evolution language covering the theory of evolution, conditioning theory, animal communication, ape language experiments, infant cognition, preverbal antecedents of language and contemporary theories of language

**Fall 2024: PSYC UN3450**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3450	001/10688	T 2:10pm - 4:00pm 405 Schermerhorn Hall	Herbert Terrace	3.00	3/15

**PSYC UN3481 CRITICAL PERIODS IN BRAIN. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (*PSYC UN1010* or

The majority of our mental capacities—ranging from basic sensory functions to more advanced social, emotional and cognitive capabilities—take many years to develop and are highly influenced by environmental signals encountered during particular developmental ‘critical periods’. In this seminar we will explore examples of these periods across diverse brain systems and behaviors, ranging from vision and audition to social, emotional and cognitive development, by considering each example in the context of human brain function and behavior as well as at the level of more detailed neurobiological mechanisms underlying these changes elucidated by studies using non-human animal systems.

**PSYC UN3496 NEUROSCIENCE AND SOCIETY. 3.00 points.**

Prerequisites: Science of Psychology (*PSYC 1001*) or Mind, Brain, # Behavior (*PSYC 1010*), or equivalent introductory psychology course. Students who have not taken one of these courses may also be admitted with instructor permission.

This course investigates the ways in which research in human neuroscience both reflects and informs societal issues. Topics include how neuroscience research is interpreted and applied

in areas such as healthcare, education, law, consumer behavior, and public policy

**PSYC UN3615 Children at Risk (Lecture). 4 points.**

Prerequisites: *PSYC W1010*, *PSYC W2280*, *PSYC W2620*, or *PSYC W2680*, and the instructor's permission.

Considers contemporary risk factors in children's lives. The immediate and enduring biological and behavioral impact of risk factors.

**Fall 2024: PSYC UN3615**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3615	001/10686	T 4:10pm - 6:00pm 200b Schermerhorn Hall	Geraldine Downey, Bianca Marlin	4	24/35
PSYC 3615	JE1/21729	Th 6:00pm - 8:30pm  Othr Other	Geraldine Downey	4	8/8

**PSYC UN3620 SEM-DEVELOPMNTL PSYCHOPATHOLGY. 4.00 points.**

Prerequisites: at least two of the following courses: (UN1001, UN1010, UN2280, UN2620, UN2680, UN3280) and the instructor's permission. Developmental psychopathology posits that it is development itself that has gone awry when there is psychopathology. As such, it seeks to understand the early and multiple factors contributing to psychopathology emerging in childhood and later in life. We will use several models (e.g. ones dominated by biological, genetic, and psychological foci) to understand the roots of mental illness

**Fall 2024: PSYC UN3620**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3620	001/10700	W 10:10am - 12:00pm 423 Kent Hall	Hannah Hoch	4.00	15/15

**Spring 2025: PSYC UN3620**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3620	001/11839	T 10:10am - 12:00pm 522b Kent Hall	Hannah Hoch	4.00	15/15

**PSYC UN3621 Creativity and the Good Life. 4 points.**

Prerequisites: PSYC UN1001 or

Is it possible to make sense of something as elusive as creativity? Yes, it is. This seminar will review the latest science of creativity, and how creativity is relevant to everyday life, society, and the good life. A wide variety of perspectives within the field will be highlighted, including different theories of the creative process and ways of assessing creativity.

**PSYC UN3623 TOPICS IN CLINICAL PSYCHOLOGY. 4.00 points.**

Prerequisites: (PSYC UN1001)

Prerequisites: (PSYC UN1001) Instructor permission required. A seminar for advanced undergraduate students exploring different areas of clinical psychology. This course will provide you with a broad overview of the endeavors of clinical

psychology, as well as discussion of its current social context, goals, and limitations

**Fall 2024: PSYC UN3623**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3623	001/10679	Th 4:10pm - 6:00pm 405 Schermerhorn Hall	Jeffrey Cohen	4.00	15/15
PSYC 3623	002/10701	W 12:10pm - 2:00pm 200b Schermerhorn Hall	Irit Felsen	4.00	17/18

**Spring 2025: PSYC UN3623**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3623	001/11843	Th 10:10am - 12:00pm 200b Schermerhorn Hall	Usha Barahmand	4.00	13/15
PSYC 3623	002/11844	W 12:10pm - 2:00pm 200b Schermerhorn Hall	Irit Felsen	4.00	13/15

**PSYC UN3624 Adolescent Mental Health: Causes, Correlates, Consequences. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 and

Prerequisites: PSYC UN1001 and Prior coursework in Abnormal Psychology and Research Methods strongly preferred. Adolescence is a peak period for the onset of mental disorders and suicidal behaviors. The seminar is designed to enhance understanding of topics including, prevalence, etiology, risk factors, mechanisms, prevention and treatment approaches, and ethical considerations related to clinical research

**Fall 2024: PSYC UN3624**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3624	001/10682	T 10:10am - 12:00pm 602 Northwest Corner	Randy Auerbach	4.00	16/15

**PSYC UN3625 CLINICAL NEUROPSYCHOLOGY. 3.00 points.**

Prerequisites: an introductory course in neuroscience, like *PSYC W1010* or *PSYC W2450*, and the instructor's permission.

Prerequisites: an introductory course in neuroscience, like PSYC UN1010 or PSYC UN2450, and the instructor's permission. Analysis of the assessment of physical and psychiatric diseases impacting the central nervous system, with emphasis on the relationship between neuropathology and cognitive and behavioral deficits

**Spring 2025: PSYC UN3625**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3625	001/11845	T 4:10pm - 6:00pm 200b Schermerhorn Hall	E'mett McCaskill	3.00	14/18

**PSYC UN3661 Happiness Studies Seminar. 3 points.**

The aim of the course is to introduce students to the field of happiness studies. Drawing on research from the field of psychology, systems thinking, psychology, neuroscience, and other disciplines, the course explores key components of personal, interpersonal, and societal happiness.

**PSYC UN3680 SOCIAL COGNITIVE NEUROSCIENCE. 3.00 points.**

**Not offered during 2023-2024 academic year.**

Prerequisites: at least two of the following courses: *PSYC W1001*, *PSYC W1010*, *PSYC W2630*, *PSYC W3410*, *PSYC W3480*, *PSYC W3485*; and the instructor's permission.

Social cognitive neuroscience seeks to integrate the theories and methods of its parent disciplines, social psychology and cognitive neuroscience. As such, it seeks to explain social and emotional behavior at three levels of analysis: The social level, which includes descriptions of experience, behavior, and context; the cognitive level, which specifies information processing (i.e. psychological) mechanisms; and the neural level, which specifies neural systems that instantiate these processes. The course begins with foundational concepts (multilevel analyses of behavior, converging evidence, the evolution of the human brain), which students use to analyze findings in number of core content domains (including emotional appraisal, emotion regulation, person perception, social affiliation and rejection, individual differences).

Prerequisites: Course equivalents of at least two of the following courses (*W1001*, *W1010*, *W2630*, *W3410*, *W3480*, *W3485*) and/or the instructor's permission

**PSYC UN3690 The Self in Social Context (Seminar). 4 points.**

Prerequisites: *PSYC W1001* or *W1010*, or the equivalent, and the instructor's permission.

This course centers on understanding the self embedded in the social context. We will integrate knowledge from various areas of psychology (developmental, cognitive, social cognition) with a main focus in social psychology. This course will provide the opportunity to gain an understanding of research in the following areas: the development of self in a social context, the relationship between the self and the broader socio-cultural context, the impact of self-involvement on social/cognitive processes, and contemporary research on individual differences.

**PSYC UN3691 Interpersonal Cognition Seminar: Close Relationships, Identity, and Memory. 4 points.**

Prerequisites: *PSYC UN2630* or *PSYC UN2640*

What makes people 'click'? How does interpersonal closeness develop? How do close relationships influence our thought processes, behaviors, and identities? How do our conversations with relationship partners change our memories of events and our perceptions of reality? And finally, what are the implicit and explicit cognitive mechanisms underlying these processes?

The primary objective of this course will be to provide you with the relevant literature, theoretical background, methodological proficiency, and critical thinking and communication skills to articulate your own answers to these questions, and to propose future studies in the field.

**PSYC UN3910 HONORS SEMINAR. 1.00 point.**

Prerequisites: open to students in the honors program only.

Discussion of a variety of topics in psychology, with particular emphasis on recent developments and methodological problems. Students propose and discuss special research topics

**PSYC UN3920 HONORS RESEARCH. 1.00-4.00 points.**

May be repeated for additional credit.

Prerequisites: open to students in the honors program only.

Prerequisites: open to students in the honors program only.

Except by special permission of the director of undergraduate studies, no more than 4 points of individual research may be taken in any one term. This includes both *PSYC UN3950* and *PSYC UN3920*. No more than 12 points of *PSYC UN3920* may be applied toward the honors program in psychology. Special research topics arranged with the instructors of the department leading toward a senior honors paper

**PSYC UN3950 SUPERVISED INDIVIDUAL RESEARCH. 0.00-4.00 points.**

1-4 points. May be repeated for credit. Prerequisites: the instructors permission. Except by special permission of the director of undergraduate studies, no more than 4 points of individual research may be taken in any one term. This includes both *PSYC UN3950* and *PSYC UN3920*. No more than 8 points of *PSYC UN3950* may be applied toward the psychology major, and no more than 4 points toward the concentration. Readings, special laboratory projects, reports, and special seminars on contemporary issues in psychological research and theory

**Fall 2024: PSYC UN3950**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3950	001/14944		Mariam Aly	0.00-4.00/5

**PSYC GU4202 Theories of Change in Human Development. 4.00 points.**

What are the agents of developmental change in human childhood? How has the scientific community graduated from nature versus nurture, to nature and nurture? This course offers students an in-depth analysis of the fundamental theories in the study of cognitive and social development

**Fall 2024: PSYC GU4202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202 001/10699		W 10:10am - 12:00pm 405 Schermerhorn Hall	Dima Amso	4.00	14/15

**Spring 2025: PSYC GU4202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202 001/11848		W 10:10am - 12:00pm 405 Schermerhorn Hall	Dima Amso	4.00	15/15

**PSYC GU4222 The Cognitive Neuroscience of Aging (Seminar). 4 points.**

Prerequisites: courses in introductory psychology and cognitive psychology; and the instructor's permission.

Comprehensive overview of various conceptual and methodologic approaches to studying the cognitive neuroscience of aging. The course will emphasize the importance of combining information from cognitive

experimental designs, epidemiologic studies, neuroimaging, and clinical neuropsychological approaches to understand individual differences in both healthy and pathological aging.

**PSYC GU4223 MEMORY # EXEC FUNCT:LIFESPAN. 4.00 points.**

Prerequisites: the instructor's permission, plus *PSYC W1001* or *PSYC W1010*, or the equivalent. Optimal preparation will include some background in experimental design and statistics. Prerequisites: the instructors permission, plus *PSYC UN1001* or *PSYC UN1010*, or the equivalent. Optimal preparation will include some background in experimental design and statistics. Memory and executive processing are critical cognitive functions required for successfully navigating everyday life. In lifespan studies, both exhibit relatively long developmental trajectories followed by stasis and then relative decline in old age. Yet, neither memory nor executive function is a unitary construct. Rather, each is comprised of separable components that may show different developmental trajectories and declines or maintenance at older ages. Moreover, memory is malleable and is a reconstruction of past experience, not an exact reproduction. We will discuss a range of topics related to the development, maintenance and potential decline in memory and executive function from infancy through old age

**PSYC GU4224 Consciousness and Cognitive Science. 4.00 points.**

Our human experience is rich: the thrill of falling in love, the spark of a new idea, the zing of table salt, the sharpness of pain. For thousands of years, philosophers, artists, and religious scholars have tried to explain our subjective experience. More recently, neuroscientists and artificial intelligence experts have contributed to this discussion, weighing in on whether we are “more than meat” (as Descartes famously put it), and whether computers can ever be sentient. In this class, we will begin with the big questions and an interdisciplinary overview of consciousness, then delve into psychology’s role. Using literature from perception, memory, emotion, metacognition, attention, and symbolic development, among other areas of psychology, we will see what empirical evidence can tell us about who we are, what we are able to know, and why we even have an experience of the world at all

Spring 2025: PSYC GU4224

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4224	001/11865	T 12:10pm - 2:00pm	Nora Isacoff	4.00	15/15
		200c Schermerhorn Hall			

**PSYC GU4225 CONSCIOUSNESS # ATTENTION. 4.00 points.**

Prerequisites: the instructor's permission; some basic knowledge of cognitive science and neuroanatomy is desirable, but not necessary.

Modern theories attempt to characterize the human mind in terms of information processing. But machines that process information do not seem to feel anything; a computer may for instance receive inputs from a video camera, yet it would

be hard to imagine that it sees or experiences the vividness of colors like we do. Nobody has yet provided a convincing theory as to how to explain the subjective nature of our mental lives in objective physical terms. This is called the problem of consciousness, and is generally considered to be one of the last unsolved puzzles in science. Philosophers even debate whether there could be a solution to this problem at all. Students in this course may be recruited for participation in a voluntary research study. Students who choose not to participate in the study will complete the same course requirements as those who do, and an individual's choice will not affect their grade or status as a student in the course

**PSYC GU4229 ATTENTION AND PERCEPTION. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010) or

Prerequisites: (PSYC UN1010) or Equivalent introductory course in neuroscience or cognitive psychology This seminar aims to provide an in-depth overview of neuroscientific knowledge regarding two critical cognitive functions: attention and perception. For each topic, results from behavioral studies are combined with those from recent neurocognitive approaches – primarily neuropsychological and functional brain imaging studies – that reveal the underlying neural networks and brain mechanisms

**PSYC GU4232 Production and Perception of Language. 4 points.**

Prerequisites: two courses in Psychology and the instructor's permission.

Topics include phonetic expression, motoric and perceptual organization, speech codes and memory codes, spoken word recognition, phrase formation, and the effects of context in perception and production.

**PSYC G4230 Sensation and Perception (Seminar). 3 points. Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission; some background in perception is required.

Topics on the perception of space. Discussions, reviews, and recent literature.

**PSYC GU4235 SPECIAL TOPICS IN VISION. 3.00 points.**

This course will be offered in Fall 2016. May be repeated for additional credit.

Prerequisites: the instructor's permission. Please contact Prof. Graham by e-mail ([nvg1@columbia.edu](mailto:nvg1@columbia.edu)) if you are interested in this course.

Prerequisites: the instructors permission. Please contact Prof. Graham by e-mail ([nvg1@columbia.edu](mailto:nvg1@columbia.edu)) if you are interested in this course

**PSYC GU4236 Machine Intelligence. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course will survey historical and modern developments in machine intelligence from fields such as psychology, neuroscience, and computer science, and from intellectual movements such as cybernetics, artificial intelligence, neural networks, connectionism, machine learning, and deep learning. The emphasis is on the conceptual understanding of topics. The course does not include, nor require background in, computer programming and statistics. A crucial aspect of the seminar is for students to become informed consumers of applications of artificial intelligence

**PSYC GU4239 COG NEURO NARRATIVE FILM. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010 or

Prerequisites: (PSYC UN1010 or Equivalent introductory course in neuroscience or cognitive psychology This seminar will provide a broad survey of how narrative stories, films, and performances have been used as tools to study cognition in psychology and neuroscience

**PSYC GU4242 Evolution of Language (seminar). 3.00 points.**

Prerequisites: PSYC UN1001 or

This seminar will consider the evolution of language at the levels of the word and grammar, in each instance, phylogenetically and ontogenetically. Since humans are the only species that use language, attention will be paid to how language differs from animal communication.

**PSYC GU4244 LANGUAGE AND MIND. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 and

Prerequisites: PSYC UN1001 and Preferably, an additional course in psychology, focusing on cognition, development, or research methods. Instructor permission required. This seminar explores the relationship between language and thought by investigating how language is mentally represented and processed; how various aspects of language interact with each other; and how language interacts with other aspects of cognition including perception, concepts, world knowledge, and memory. Students will examine how empirical data at the linguistic, psychological, and neuroscientific levels can bear on some of the biggest questions in the philosophy of mind and language and in psychology

Fall 2024: PSYC GU4244

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4244	001/10703	W 2:10pm - 4:00pm 200c Schermerhorn Hall	Nora Isacoff	4.00	14/15

**PSYC GU4250 Evolution of Intelligence, Cognition, and Language (Seminar). 3 points.**

Prerequisites: *PSYC W1001* or *PSYC W1010* or the equivalent, based on instructor assessment, plus one of the instructors' permission.

How did language evolve and why are human beings the only species to use language? How did the evolution of social intelligence, in particular, cooperation, set the stage for the origin of language and consciousness? We will explore how psychologists, philosophers, neuroscientists, anthropologists, biologists and computational scientists, among others, have collaborated during recent years to produce important insights in the evolution of intelligence, consciousness and language.

**PSYC GU4265 AUDITORY PERCEPTION. 3.00 points.**

Prerequisites: PSYC UN1010

Prerequisites: PSYC UN1010 PSYC UN1010 or equivalent; background in statistics/research methods recommended  
How does the human brain make sense of the acoustic world? What aspects of auditory perception do humans share with other animals? How does the brain perform the computations necessary for skills such as sound localization? How do we focus our auditory attention on one voice in a crowd? What acoustic cues are important for speech perception? How is music perceived? These are the types of questions we will address by studying the basics of auditory perception from textbook readings and reviews, and reading classic and current literature to understand scientific progress in the field today

Spring 2025: PSYC GU4265

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4265	001/11871	Th 4:10pm - 6:00pm 405 Schermerhorn Hall	Sarah Woolley	3.00	13/15

**PSYC GU4270 COGNITIVE PROCESSES. 3.00 points.**

Prerequisites: For undergraduates: one course in cognitive psychology or cognitive neuroscience, or the equivalent, and the instructors permission. Metacognition and control processes in human cognition. Basic issues include the cognitive mechanisms that enable people to monitor what they know and predict what they will know, the errors and biases involved in self-monitoring, and the implications of metacognitive ability for peoples self-determined learning, behavior, and their understanding of self

Spring 2025: PSYC GU4270

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4270	001/13508	T 12:10pm - 2:00pm 405 Schermerhorn Hall	Janet Metcalfe	3.00	9/15

**PSYC GU4280 CORE KNOWLEDGE. 4.00 points.**

Prerequisites: For undergraduates: courses in introductory psychology, cognitive or developmental psychology, and the instructor's permission.

Prerequisites: For undergraduates: courses in introductory psychology, cognitive or developmental psychology, and the instructors permission. Core Knowledge explores the origins and development of knowledge in infants and children, with an additional emphasis on evolutionary cognition. In this course, we will examine evidence from cognitive psychology,

developmental psychology, comparative psychology, neuroscience, and linguistics to look at the child's conception of objects, number, space, language, agency, morality and the social world. We will look at which aspects of knowledge are uniquely human, which are shared with other animals, and how this knowledge changes as children develop

**Spring 2025: PSYC GU4280**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4280	001/11872	W 2:10pm - 4:00pm	Koleen McCrink	4.00	14/15
		302 Fayerweather			

**PSYC GU4281 The Psychology of Curiosity. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or

Prerequisites: PSYC UN1001 or equivalent introductory psychology course What is curiosity and how do we study it? How does curiosity facilitate learning? This course will explore the various conceptual and methodological approaches to studying curiosity and curiosity-driven learning, including animal and human studies of brain and behavior

**Spring 2025: PSYC GU4281**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4281	001/13509	W 2:10pm - 4:00pm	Janet Metcalfe	4.00	14/15
		405 Schermerhorn Hall			

**PSYC GU4282 The Neurobiology and Psychology of Play. 4 points.**

CC/GS: Partial Fulfillment of Science Requirement

Play is a highly rewarding activity that is considered critical to cognitive, social, and emotional development. How do we define play and how do we study it? How does play help humans and other animals learn about their world and prepare them for adulthood? This course will examine the latest developments in the field of play from various methodological approaches to understand the relationship between play, learning, and normative development.

**PSYC GU4287 DECISION ARCHITECTURE. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN2235) or

Prerequisites: (PSYC UN2235) or an equivalent course on judgment and decision making ,AND the instructors permission This course reviews current research in the domain of decision architecture: the application of research in cognitive and social psychology to real-world situations with the aim of influencing behavior. This seminar will discuss recent and classic studies, both of decision theory and of applied decision research, to explore the effectiveness—as well as the limitations—of a selection of these behavioral “nudges.”

**PSYC GU4289 THE GAMES PEOPLE PLAY: PSYCH OF STRAT DEC. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN2235) or

Prerequisites: (PSYC UN2235) or equivalent course on judgment and decision-making A seminar course exploring strategic decision making (also known as behavioral game theory). This course examines the psychology underlying situations in which outcomes are determined by choices made by multiple decision makers. The prime objective will be to examine the use of experimental games to test psychological theories

**PSYC GU4420 Animal Cognition (Seminar). 3 points.**

Prerequisites: For undergraduates: the instructor's permission.

Seminar concerning a nonverbal animal's use of internal representations of past experience as a basis for action. Topics include how representations are formed, what aspects of experience are encoded, how information is stored, and how it is used later to guide behavior.

**PSYC GU4430 Learning and the Brain (Seminar). 4 points.**

Prerequisites: courses in introductory psychology and/or neuroscience, and the instructor's permission.

What are the neural mechanisms that support learning, memory, and choices? We will review current theories in the cognitive neuroscience of human learning, discuss how learning and decision making interact, and consider the strengths and weaknesses of two influential methods in the study of human brain and behavior—functional imaging and patient studies.

**PSYC GU4435 NON-MNEMONIC FUNC OF MEMORY SYSTEMS. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010) or

Prerequisites: (PSYC UN1010) or equivalent introductory course in neuroscience or cognitive psychology The past decade has produced an extraordinary amount of evidence that challenges the classic view of a “medial temporal lobe memory system”, namely, the idea that the medial temporal lobe plays a necessary role in long-term memory but not other cognitive functions. This course will introduce these challenges to the traditional perspective by exploring functions of the so-called memory system in domains outside of long-term memory

**PSYC GU4440 TOPICS-NEUROBIOLOGY # BEHAVIOR. 3.00 points.**

Prerequisites: the instructors permission. Examines current topics in neurobiology and behavior

**Fall 2024: PSYC GU4440**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4440	JE1/21730	M 6:00pm - 8:30pm	Shai Berman,	3.00	16/16
		Othr Other	Tessa Montague		

**Spring 2025: PSYC GU4440**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4440	001/11873	M 6:10pm - 8:00pm	Carl Hart	3.00	10/15

405 Schermerhorn  
Hall**PSYC GU4470 PSYCH # NEUROPSYCH OF LANGUAGE. 4.00 points.**

Prerequisites: the instructor's permission. A course in the psychology of language or linguistics is highly recommended. This seminar surveys current theories of language production. We will examine psycholinguistic and neuroimaging studies of word and sentence production conducted with monolingual and bilingual speakers, and individuals with acquired language impairments.

**Fall 2024: PSYC GU4470**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4470	001/10685	T 4:10pm - 6:00pm 405 Schermerhorn Hall	Michele Miozzo	4.00	6/15

**PSYC GU4480 PSYCHOBIOLOGY OF INFANT DEVPT. 4.00 points.**

Prerequisites: (PSYC UN1001 or PSYC UN1010) and *PSYC W1001* or *W1010*, a course in developmental psychology, and the instructor's permission.

Prerequisites: (PSYC UN1001 or PSYC UN1010) and a course in developmental psychology, and the instructors permission. The focus of the seminar is on human development during the fetal period and early infancy. We will examine the effects of environmental factors on perinatal perceptual, cognitive, sensory-motor, and neurobehavioral capacities, with emphasis on critical conditions involved in both normal and abnormal brain development. Other topics include acute and long term effects of toxic exposures (stress, smoking, and alcohol) during pregnancy, and interaction of genes and the environment in shaping the developing brain of high-risk infants, including premature infants and those at risk for neurodevelopmental disorders such as Sudden Infant Death Syndrome

**Spring 2025: PSYC GU4480**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4480	001/12982	T 4:10pm - 6:00pm 200c Schermerhorn Hall	William Fifer, Morgan Firestein	4.00	15/15

**PSYC GU4482 Neural Plasticity. 4.00 points.**

This seminar provides an overview of the mechanisms and behaviors associated with neural plasticity. Students will obtain a basic working knowledge of the different types of neural plasticity, and how these affect cognition and behaviors

**Fall 2024: PSYC GU4482**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4482	001/10684	T 2:10pm - 4:00pm 516 Hamilton Hall	Tina Kao	4.00	12/15

**Spring 2025: PSYC GU4482**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4482	001/11875	T 10:10am - 12:00pm	Tina Kao	4.00	15/15

200c Schermerhorn  
Hall**PSYC GU4486 Emotional Brain Development. 4.00 points.**

Prerequisites: courses in developmental psychology, and either research methods or affective neuroscience, and the instructor's permission.

There is nothing more important to us than the feelings that we have. But where do our emotions come from and why do we sometimes feel differently from our peers? The reason usually involves an understanding of one's developmental history. This course uses a developmental approach to address emotional brain-behavior relationships. We will discuss theoretical papers and empirical work that covers typical and atypical behavior and the neurobiology that supports behavioral change across age. A translational approach is taken that uses animal models and human examples to illustrate these developmental trajectories. We will cover experimental approaches during discussion of each topic

**Spring 2025: PSYC GU4486**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4486	001/17232	T 2:10pm - 4:00pm 507 Hamilton Hall	Nim Tottenham	4.00	15/20

**PSYC GU4490 Inheritance (Seminar). 4 points.**

Prerequisites: basic knowledge of biology and neuroscience recommended; the instructor's permission required.

Explores the concept of inheritance and the mechanisms through which inheritance is mediated. Will focus on the generational transmission of physiology and behavior, but will also consider the inheritance of culture and language.

**PSYC GU4491 The Parental Brain. 4.00 points.**

This course will provide an overview of the field of parental and social biology, with an emphasis on changes in the adult rodent brain surrounding childbirth and caretaking behavior. We will explore how the experience of parenthood prepares the brain for survival of offspring. We will also discuss the dynamic between caregivers and parents in order to provide the structure necessary to rear young. This course will illustrate the fortitude of molecular, behavioral and circuit level investigations in concert to unveil mechanisms of social learning

**Fall 2024: PSYC GU4491**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4491	001/10683	T 12:10pm - 2:00pm 200c Schermerhorn Hall	Bianca Marlin	4.00	22/25
PSYC 4491	JE1/21808	Th 6:00pm - 8:30pm Othr Other	Rajyashree Sen, Thiago Arzua	4.00	15/15

**PSYC GU4493 Stress and the Brain. 4.00 points.**

This course will use clinical studies and experimental research on animals to understand the impact of stress during various periods of development on brain function and behavior. We will address the long- and short-term consequences of stress on

cognition, emotion, and ultimately psychopathology through investigating how various stressors can induce neurobiological and behavioral outcomes through genetic, epigenetic, and molecular mechanisms in the brain

**Spring 2025: PSYC GU4493**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4493	001/11876	F 2:10pm - 4:00pm 200c Schermerhorn Hall	Jennifer Blaze	4.00	11/15

**PSYC GU4498 BEHAVIORAL EPIGENETICS. 4.00 points.**

Prerequisites: basic background in neurobiology (for instance *PSYC W1010, W2450, W2460, W2480, and G4499*) and the instructor's permission.

Prerequisites: basic background in neurobiology (for instance *PSYC UN1010, UN2450, UN2460, UN2480, and GU4499*) and the instructors permission. This course will provide an overview of the field of epigenetics, with an emphasis on epigenetic phenomena related to neurodevelopment, behavior and mental disorders. We will explore how epigenetic mechanisms can be mediators of environmental exposures and, as such, contribute to psychopathology throughout the life course. We will also discuss the implications of behavioral epigenetic research for the development of substantially novel pharmacotherapeutic approaches and preventive measures in psychiatry

**Fall 2024: PSYC GU4498**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4498	001/10665	F 2:10pm - 4:00pm 200c Schermerhorn Hall	Jennifer Blaze	4.00	12/15

**PSYC GU4612 Frontiers of Justice. 4.00 points.**

Frontiers of Justice is designed to encourage students and equip them with the skills to become active and effective "Change Agents" within their academic institutions and larger communities.. Oriented by the question, What does justice look like?, this course aims to raise political and social awareness and engagement with the challenges facing New York City and strengthen ties between Columbia University, disadvantaged communities, and city government agencies and community organizations. Through sharing ideas about how to make structural and systemic change in ways that integrate science, law, politics, history, narrative and community engagement, the course is intended to support students in working to break down racial and ethnic barriers and toward a more fair and just society

**Spring 2025: PSYC GU4612**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4612	001/13351	T 6:10pm - 8:00pm 200b Schermerhorn Hall	Peter Dixon	4.00	18/20

**PSYC GU4615 PSYCH OF CULTURE & DIVERS. 4 points.**

**Spring 2025: PSYC GU4615**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4615	001/15713	Th 10:10am - 12:00pm 405 Schermerhorn Hall	Valerie Purdie-Greenaway	4	15/21

**PSYC GU4627 Seminar in Anxiety, Obsessive-Compulsive, and Related Disorders. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or

This seminar course will focus on the etiology and phenomenology of anxiety disorders, obsessive-compulsive disorder (OCD), and OCD-related disorders, as well as their evidence-based treatments

**PSYC GU4630 ADV SEM CURRENT PERS THRY. 3.00 points.**

Open to psychology graduate students and advanced undergraduate psychology majors.

Prerequisites: the instructor's permission.

Critical review and analysis of basic and enduring issues in personality theory, assessment, and research.

**Spring 2025: PSYC GU4630**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4630	001/11878	M 10:10am - 12:00pm 405 Schermerhorn Hall	Svetlana Komissarouk	3.00	0/15

**PSYC GU4635 The Unconscious Mind (Seminar). 4 points.**

Prerequisites: the instructor's permission; some basic knowledge of social psychology is desirable.

Discussion of the unconscious mind from the perspective of social cognition, with an emphasis on both theoretical and empirical background, as well as current issues in measuring automatic processing. Topics include: implicit memory systems; unconscious attitudes, goals and behavior, emotions, and decision making; the activation and deactivation of knowledge systems; and priming.

**PSYC GU4645 CULTR,MOTIVATN,PROSOCIAL BEHAV. 4.00 points.**

Prerequisites: Some knowledge of Research Methods, Statistics, and Social Psychology, plus Instructors Permission. Reviews and integrates current research on three important topics of social psychology: culture, motivation, and prosocial behavior. Discussions and readings will cover theoretical principles, methodological approaches, and the intersection of these three topics. Students will write a personal research proposal based on the theories presented during the seminar

**Fall 2024: PSYC GU4645**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 4645 001/10666 M 10:10am - 12:00pm Svetlana Komissarouk 4.00 10/15  
405 Schermerhorn Hall

**PSYC GU4670 THRY-SOCIAL/PERSONALITY PSYCH. 3.00 points.**

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. Comparison of major theoretical perspectives on social behavior. The nature of theory construction and theory testing in psychology generally. Exercises comparing the predictions of different theories for the same study are designed to acquire an appreciation of how to operationalize theories and an understanding of the various features of a good theory

**PSYC GU4672 MORAL PSYCHOLOGY. 4.00 points.**

Prerequisites: Two courses in psychology, including at least one course with a focus on social and/or developmental psychology, and permission of the instructor.

Prerequisites: Two courses in psychology, including at least one course with a focus on social and/or developmental psychology, and permission of the instructor. Review of theories and current research on moral cognition and behavior. Topics include definitions of morality, the development of moral cognition, the role that other aspects of human experience (e.g. emotion, intentions) play in moral judgments, and the relationship between moral psychology and other areas of study (e.g. religious cognition, prejudice and stereotyping, the criminal justice system)

**PSYC GU4673 Political Psychology. 4 points.**

This seminar will explore what psychology (mostly social and cognitive) can tell us about politics. The class aims to provide a broad introduction to ideas and methods in the field of political psychology, as well as a deep understanding of a few specific topics.

**PSYC GU4682 FAQs ABOUT LIFE:APPL OF PSYC RSCH TO EVE. 4.00 points.**

Prerequisites: Two courses in psychology, with at least one focusing on statistics and/or research methods in psychology, and permission of the instructor. Review of basic psychological research that is relevant to questions people frequently encounter during the course of everyday life. Potential topics for this seminar include research on decision-making, emotion, and/or interpersonal relationships

Fall 2024: PSYC GU4682

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4682	001/10712	W 2:10pm - 4:00pm 405 Schermerhorn Hall	Larisa Solomon	4.00	8/15

**PSYC GU4685 The science of me, you and us: understanding emotion, the self and social connections. 3.00 points.**

Prerequisite: Course equivalents of at least two of the following courses: UN1001, UN2430, UN2630, UN3410, UN3480,

UN3485; and/or instructor's permission. Why do we feel the way we do, how do we understand ourselves and others, and how does this relate to our social relationships? In this course, we tackle questions like these using an integrative approach that blends social psychology, affective science and neuroscience to uncover how our emotions and social interactions work. To do this, we will draw on multiple types of data to examine human behavior at multiple levels, connecting our social and emotional lives (what we experience and how we act) to cognitive processes (how our minds process information) and underlying neural mechanisms (what's happening in the brain). Across the semester, the course is split into three parts, each one building on insights from the prior section. Part 1 starts with the premise that emotions are at the root of everything we do, exploring where they come from and how we can understand and manage them. Part 2 turns the focus outwards, examining how we make sense of other people and form connections with them. With these two foundational building blocks in place, Part 3 uses what we have learned to understand what happens when things go awry and we end up with momentary - or long-lasting - bouts of anxiety, depression, or loneliness – and what we can do to overcome them and lead a happy and fulfilling life. The overarching goal is to build a nuanced understanding of how and why we think and feel the way we do – about ourselves, other people and our connections to them – that can inform both scientific and personal explorations of what it means to be human

Spring 2025: PSYC GU4685

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4685	001/11880	T 2:10pm - 4:00pm 405 Schermerhorn Hall	Kevin Ochsner	3.00	15/20
PSYC 4685	002/20381		Kevin Ochsner	3.00	7/15

**PSYC GU4686 Barriers and Levers for Behavior Change. 4 points.**

Prerequisites: (PSYC UN1001 or PSYC UN1010) and Seminar course exploring individual, social, and cultural barriers and levers for behavior change, with a focus on social issues, such as motivating pro-environmental action, encouraging positive health behavior change, and promoting charitable giving.

**PSYC GU4690 SOCIAL FACTORS # PSYCHOPATHLOGY. 3.00 points.**

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. Reviews and integrates current research on the role of social factors in psychopathology. The immediate and long-term effects of chronic and traumatic stressors originating outside the family (e.g. natural disasters, chronic poverty) and inside the family (e.g. family violence, divorce, parental psychopathology) on psychopathology

Fall 2024: PSYC GU4690

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

PSYC 4690 JE1/21731      W 9:00am - 12:00pm      Marya Schock      3.00      4/4  
Othr Other

**PSYC GU4695 Psychology of Close Relationships (Seminar). 3 points.**

Prerequisites: Research Methods, statistics, social psychology, and the instructor's permission.

Introduction to leading theoretical perspectives employed by social psychologists in the study of close romantic relationships. Exploration of relationship-relevant constructs (e.g., love, commitment, intimacy, breakups) through the lenses offered by these different theories, and with a critical reading of recent research findings in this field.

**PSYC GU4880 In Service of Equity: Examining Developmental Science through the Lens of Policy. 4.00 points.**

Urie Bronfenbrenner (1974) wrote, "We have now come the full circle and returned to our starting point—issues of social policy as points of departure for the identification of significant theoretical and scientific questions concerning the development of the human organism as a function of interaction with its enduring environment—both actual and potential." This course is designed to examine emotional and cognitive development through the lens of existing financial, social, and educational policies. We will examine the influence - on child development - of inequities in education, household socioeconomic status and poverty, neighborhood socioeconomic status and poverty, access to prenatal care, parental incarceration rates, and systemic racism

**PSYC GU4930 Fundamentals of Human Brain Imaging: from theory to practice. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Fundamentals of human brain imaging is a new advanced course open to undergraduates students from the Psychology, Neuroscience, Engineering, and Statistics Departments, that traces the key steps of the recent "neuroimaging revolution", and introduces the various methodologies and associated analytic approaches that are now available in the field of cognitive neuroscience. Specifically, the course develops around three main questions, currently under-represented in our undergraduate curriculum: 1) What is the advantage to study human cognition using correlational methodologies (e.g., EEG, MEG, fMRI)? 2) Which is the particular contribution of each method in the understanding of brain/behavior relationship? 3) Which are the most common ways to approach the analyze the neuroimaging data? By promoting an inclusive environment and implementing active learning strategies, this course stimulates critical thinking and fosters collaboration among students from different departments

## REGIONAL STUDIES

### EAST CENTRAL EUROPEAN CENTER

<http://ece.columbia.edu/>

**Director:** Prof. Jessica Merrill, [jem2159@columbia.edu](mailto:jem2159@columbia.edu)

**Related Departments:** Anthropology, Economics, History, Political Science, Slavic Languages and Literatures, and Sociology.

**Language Requirement:** Two years or demonstrated reading knowledge of one of the following languages: Czech, Hungarian, Polish, Romanian, Russian, Bosnian/Croatian/Serbian, or Ukrainian.

The regional studies major is designed to give undergraduates the general mastery of a discipline and at the same time permit them to do specialized work in the history and cultures of a particular geographic area through the associated institutes of the Faculty of Arts and Sciences. It is an interdisciplinary major in which students divide their work between the associated institute and an appropriate academic department. Students plan their programs with the consultant of the associated institute they have selected.

## MAJOR IN REGIONAL STUDIES

The major in regional studies requires a minimum of 36 points, of which 18 must be credited by the associated institute, i.e. East Central European Center, and an additional 18 must be in one of the College departments designated as relevant by the institute. Six points of seminar work approved by the institute are required of all majors and are included in the total of 36 points.

## Language Study

Courses taken to satisfy the institute's language requirement are not counted toward the 18 institute points.

A current list of courses available to students interested in East Central European studies can be obtained from the [Center](#), 1228 International Affairs Building.

## RELIGION

### THE RELIGION DEPARTMENT:

Department website: <https://religion.columbia.edu/>

Office location: 80 Claremont, Suite 103

Office contact: 212-854-4122

Director of Undergraduate Studies: Professor Yannik Thiem, 80 Claremont; 212-851-4128; [yannik.thiem@columbia.edu](mailto:yannik.thiem@columbia.edu)

Undergraduate Administrator: NA

## THE STUDY OF RELIGION

The Religion Department's curriculum is designed to engage students in critical, comparative, and interdisciplinary exploration of religious worlds and phenomena in a variety of contexts and at the intersection with various dimensions of culture (such as race, gender, sexuality, class, disability, politics, ethics, popular culture, museums, media, technology). The curriculum aims to prepare students to contribute actively to timely discussions about religion, religious difference, and its roles in a globally connected world.

Apart from preparing for graduate education in religion and adjacent fields, majors, concentrators, and minors also find the Study of Religion to provide them with relevant background and skills for careers in a variety of fields: Education, media, computer science, law, business, medicine, and social work. Religion course offerings are designed to meet the varying needs and interests of students, from those wishing to explore a few topics to complement their other studies or to fulfill global core requirements, to those interested in pursuing a minor or major in Religion.

## STUDENT ADVISING

### Consulting Advisers

Professor Yannik Thiem, 80 Claremont; 212-851-4128;  
yannik.thiem@columbia.edu

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

All majors are encouraged to pursue both depth and breadth by constructing a program of study in consultation with the Director of Undergraduate Studies and with a member of the faculty in an area in which they have particular interest. The program should include courses in a variety of religious traditions.

### Senior Thesis Coursework and Requirements

Students who write a senior thesis may include a term of individually supervised research as one of the courses for their major.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Students who write a senior thesis and maintain a GPA of 3.66 or above in the major may be considered for departmental honors. Writing a senior thesis qualifies a student for consideration for departmental honors but does not assure it.

Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## Academic Prizes

The Peter Awn Undergraduate Prize is awarded annually to the most outstanding paper or substantial project submitted by an undergraduate in any course or seminar in Religion in the prior year.

## PROFESSORS

Gil Anidjar  
Courtney Bender  
Beth Berkowitz (Barnard)  
Elizabeth Castelli (Barnard)  
Matthew Engelke (Chair)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Course Numbering Structure

The numbering structure indicates primarily different orientations of the courses. Students pursuing a degree in Religion are not expected to take courses sequentially moving from lower number courses to higher number courses. Generally, only 4000-level-advanced seminar courses expect students to have completed some prior coursework in Religion or adjacent relevant fields.

Courses are numbered by level and type:

1000-level: Gateway lecture course on "How to think about and with 'religion' as a category of inquiry"

2000-level: Courses surveying strands of studying religious practice specified by

- Geography (e.g. China)
- Historical period (e.g. Colonial North America)
- Communities (e.g. Judaism)
- Thematics (e.g. magic, gender, capitalism)

3000-level: Intermediate courses focusing on a particular topic in a specific context

4000-level: Advanced seminar focusing on a particular topic, involving student research. (Typically students complete at least one other course in Religion and parts of the Core before taking a seminar. But if there is a seminar that is of special interest to you, contact the DUS and/or instructor and ask. You might be a good fit.)

### Guidance for First-Year Students

There will be an orientation meeting for prospective and new minors in the fall and spring and fall. At these meetings peers and faculty will be available for consultations. As the faculty member who is currently advising and certifying majors and concentrators, the DUS will also take on the ongoing advising and the certification for graduation of the students minoring in Religion.

The Columbia Minor in Religion follows a nodal curriculum, which makes it possible for students to enter the program at any point.

### Guidance for Transfer Students

Students may apply to count up to two courses of transfer credit toward fulfilling the Department of Religion requirements. Requests are reviewed and granted by the DUS.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

- 1 gateway course (1000 level)

### Major in Religion

All majors are encouraged to pursue both depth and breadth by constructing a program of study in consultation with the Director of Undergraduate Studies. The program should include courses in a variety of religious traditions. Students who write a senior thesis may include a term of individually supervised research as one of the courses for their major.

#### Courses

For the major the following 9 courses are required:

- 1 gateway course (1000 level)
- 2 introductory courses (2000 level)
- 2 intermediate courses (3000 level)
- 2 seminars (4000 level)
- 1 additional course at any level
- RELI UN3199 Theory (Columbia students should to take Theory through the Columbia Religion Department offered every Fall Semester)

Students majoring in Religion at Columbia are expected to take their RELI UN3199 Theory requirement at Columbia (offered every fall). For the remaining eight courses, any course listed as RELI offered at Columbia or Barnard may be counted toward the Major in Religion. There is no limitation on how many courses taken at Barnard can be counted toward the Minor in Religion at Columbia.

Requests for counting courses taken outside of Religion to be counted toward fulfilling the Department of Religion requirements are reviewed and granted by the DUS on a case-by-case basis.

### Minor in Religion

All Minors in Religion are encouraged to pursue their interests in the Study of Religion as it best complements their other studies at Columbia by constructing a program of study in consultation with the Director of Undergraduate Studies.

#### Courses

The Minor in Religion consists of five (5) courses (min. 16 points) in Religion:

- One (1) course at the 1000-level (alternatively RELI UN3199 Theory can count toward this requirement)

- Four (4) courses of any level, it is strongly recommended that students include one seminar among these electives.

Any course listed as RELI offered at Columbia or Barnard may be counted toward the Minor in Religion. There is no limitation on how many courses may be taken at Barnard that can be counted toward the Minor in Religion at Columbia.

#### Transfer Credits

Students may apply to count up to one course of transfer credit toward fulfilling the Department of Religion requirements. Requests are reviewed and granted by the DUS.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Religion

To be planned in consultation with the Director of Undergraduate Studies and with a member of the faculty in an area in which the student has a particular interest. The program should include some study in a Variety of topics and traditions in the study of religion.

#### Courses

For the concentration the following 7 courses are required:

- 1 Gateway Course at the 1000-level
- 2 Courses at the 2000-level
- 2 Courses at the 3000 level
- 1 Seminar at the 4000-level
- RELI UN3199 Theory

Students pursuing a Concentration in Religion at Columbia are expected to take their RELI UN3199 Theory requirement at Columbia (offered every fall). For the remaining six courses, any course listed as RELI offered at Columbia or Barnard may be counted toward the Concentration in Religion. There is no limitation on how many courses taken at Barnard can be counted toward the Concentration in Religion at Columbia.

Students may apply to count up to two courses taken outside of Religion toward fulfilling the Department of Religion requirements. Requests are reviewed and granted by the DUS on a case-by-case basis.

#### Transfer Credits

Students may apply to count up to one course of transfer credit toward fulfilling the Department of Religion requirements. Requests are reviewed and granted by the DUS.

## SPRING 2025

### **RELI UN1612 Religion and the History of Hip Hop. 4.00 points.**

This is an undergraduate lecture course introducing students to the study of religion through an engagement with the history of hip hop music. More specifically, this course is organized chronologically to narrate a history of religion in the United States (circa 1970 to the present day) by mapping the ways that a variety of religious ideas and practices have animated rap music's evolution and expansion during this time period. While there are no required prerequisites for the course, prior coursework in religious studies, African American studies, and/or popular music is helpful.

### **RELI UN2305 ISLAM. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An introduction to the Islamic religion in its premodern and modern manifestations. The first half of the course concentrates on "classical" Islam, beginning with the life of the Prophet, and extending to ritual, jurisprudence, theology, and mysticism. The second half examines how Muslims have articulated Islam in light of colonization and the rise of a secular modernity. The course ends with a discussion of American and European Muslim attempts at carving out distinct spheres of identity in the larger global Muslim community.

### **RELI UN2312 Religion and Nasty Women. 4.00 points.**

Used in 2016 by then presidential candidate, Donald Trump, in reference to his female opponent, Hillary Clinton, the phrase "nasty woman" has become a badge of honor and a rallying cry for women's empowerment. The origin of the word "nasty," attested in the 14th century, indicates highly unpleasant qualities- nauseating or unclean, in a literal or figurative way. It also came to evoke indecency and obscenity- and religious traditions have a long history of such depiction of women. After introducing some key texts on the otherness and objectification of women (including by Aristotle, Beauvoir, Kristeva, Nussbaum, and Butler), we will examine a number of female characters- goddesses, prostitutes, and virgins - in the Mesopotamian, Greek, Jewish, Christian, Buddhist, Hindu, and Islamic corpus that fit the definition of nasty. We will also analyze some of the underlying tropes of impurity and danger that characterize nastiness involving bodily fluids, sexuality, and knowledge. Spanning theology, literature, movies, and popular culture the course aims to be a survey of religious-based misogyny as well as women's responses in their pursuit of agency.

### **RELI UN2406 Chinese Religious Traditions - Discussion. 0.00 points.**

This course provides a chronological and thematic introduction to Chinese religions from their beginnings until modern times. It examines distinctive concepts, practices and institutions in the religions of China. Emphasis will be placed on the diversity and unity of religious expressions in China, with readings drawn from a wide-range of texts: religious scriptures, philosophical texts, popular literature and modern historical and

ethnographic studies. Special attention will be given to those forms of religion common to both “elite” and “folk” culture: cosmology, family and communal rituals, afterlife, morality and mythology. The course also raises more general questions concerning gender, class, political patronage, and differing concepts of religion

**Fall 2024: RELI UN2406**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 2406	001/21171	W 4:10pm - 5:00pm 101 80 Claremont	Saila Sri Kambhatla	0.00	11/15
RELI 2406	002/21172	W 5:10pm - 6:00pm 101 80 Claremont	Saila Sri Kambhatla	0.00	8/15

**RELI UN3312 “The Scientific Buddha”: Buddhism and Science in China and Beyond. 4.00 points.**

The relationship between religion and science, and by extension between Buddhism and science, have been long investigated by scholars and practitioners attempting to understand questions regarding the nature of reality, knowledge, and experience. While the meeting of Buddhism and Western science dates back to the nineteenth century, the discourse of “encounter” between these two systems of knowledge intensified with the Dalai Lama’s suggestion to institutionalize a dialogue between Buddhist practitioners and Western scientists in 1987. This seminar examines this on-going dialogue from its beginning in China about 200 years ago through today

**RELI UN3415 Climate, Religion, and the Anthropocene. 4.00 points.**

This course examines intersections between religious life and climate change in a comparative and global perspective. In recent years, the idea of the Anthropocene—the period of geological time during which human activity has become the primary force shaping the Earth’s climate—has abounded in both academic and popular literature. This focus on human agency over the climate raises questions about the extent to which humans share equally responsibility for and vulnerability to climate change, as well as differing understandings of human relationships and responsibilities toward the environment. This course uses religion as a lens to examine the role of humans in both creating ecological destruction and efforts to repair and rework relationships with the natural world. We will draw on primary texts from religious traditions around the world in a bid to unsettle human-centric and universalist narratives of the Anthropocene. By the end of the semester, students will have deepened and nuanced their understandings of the notoriously vexed categories of religion and the Anthropocene, and come away with new ways of thinking about the climate crisis

**RELI UN3500 BUDDHIST ETHICS. 3.00 points.**

**RELI GU4175 Queer Theory Meets Religion. 4.00 points.**

Within religious traditions there are lively discourses of queering these traditions and while religious studies had to catch up, by now there are sizable bodies of queer studies in religion. But theological and religious studies queer discourses rarely reach queer theory in general. Moreover, when queerness

and religion are studied together, we usually take queerness primarily as a quality of lives, bodies, and desires and then study how religious traditions and discourses succeed or fail in targeting or supporting queer lives or studies articulate how religious traditions can be recovered through queer readings. We will inquire into the shapes and logics animating queer theory’s religion trouble and wonder about what ways of thinking we preempt when queerness and religion are confined to pertaining to lived bodies and traditions respectively. What happens when we think with “queerness” and “religion” as dimensions irreducible to bodies or traditions? How is it that in the interdisciplinarity of queer theory, religion and religious studies remain largely unthought? To think through some of these questions, we will ask how religion and queerness might be understood as methodologies for examining how truth and affect converge and sediment in the sensibilities and infrastructures orienting how we experience the world around us. We will turn to both religious studies and queer theory to examine two interrelated sets of questions: 1) How are meaning-making and investments with value bound up with gender, race, sexual desires, ability, coloniality, class, age, climate and environmental factors? And 2) what potentials for knowing, acting, living differently are afforded by differing practices, rituals, architectures, and aesthetics of transmitting, refashioning, and institutionalizing knowledge systems?

**RELI GU4216 Religion and Capitalism: Faith and the American Market. 4.00 points.**

Is the market a religious system? Can we consider “capitalism” to be a key arena in which the relationship between the religious and the secular is both negotiated and performed? In this course, students will explore the complicated relationship between faith and the market, the religious and the secular, and the evolution of vice and virtue as they relate to economic thriving in the United States. While no hard and fast rules for thinking about the relationship between right conduct and material interests cut across all religious and philosophical traditions, human agents invest real faith into currency, into markets, and into the reigning economic order to bring about increased opportunities, wealth, and freedom to people across the globe. Throughout this semester, we will chart both the long shadows and the future trajectories of these beliefs from our American perspective

**Spring 2025: RELI GU4216**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4216	001/13966	M 10:10am - 12:00pm 201 80 Claremont	Andrew Jungclaus	4.00	12/15

**RELI GU4223 Dreams. 4.00 points.**

This seminar for advanced undergraduates and graduate students investigates the significance of dreams in multiple cultural and historical contexts with a focus on Tibetan Buddhism. Dreams and dreaming are vital aspects of Tibetan Buddhist meditative practice, visionary experience, poetry, narratives, as well as visual arts. Students in the seminar will explore a range of materials that 1) guide Buddhist practitioners

to cultivate certain types of dreams, and 2) narrate dream experiences that the dreamer has deemed worth recording, and 3) situate Tibetan Buddhist examples in broader contexts of religious and psychological perspectives, with an emphasis on Freud and Jung's treatment of dreams. According to Buddhist sources, a dream might be significant because the dreamer understands it to be revelatory, foretelling the future, or it might be recorded simply because the dreamer finds the dream in some way compelling, troubling, or funny. In life writing, dreams often highlight crucial moments in the writer's life experience. Just as psychoanalysts make use of dreams to engage with analysands, Tibetan medical texts instruct doctors to pay close attention to patients' dreams in the process of diagnosis. Tibetan ritual texts guide meditators in techniques for lucid dreaming. Visionary dreams are recorded in great aesthetic detail. Narratives of dreams and dreamscapes are an important part of biographies and life writing in general. We will also consider European and American treatments of dreams and lucid dreaming, including psychoanalytic, philosophical approaches to dreaming. A significant element of the course is a daily dream journal

**Fall 2024: RELI GU4223**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4223	001/20963	M 12:10pm - 2:00pm 101 80 Claremont	Dominique Townsend	4.00	15/15

**RELI GU4326 SUFISM IN SOUTH ASIA. 4.00 points.**

Sufism or tassawuf has misleadingly been described as the mystical side of Islam, implying that it is somehow detached from the material world. Throughout the history of Islam, Sufi ideas, practices, and institutions have borne a complex, intimate, and sometimes fraught relationship with other aspects of Islamic tradition and practice, a relationship that has also been profoundly impacted by Orientalist scholarship in the colonial period and by global reformist currents in the postcolonial period. This seminar for advanced undergraduates and graduate students is an interdisciplinary investigation of how Sufism has been affected by the historical, sociocultural, political, and everyday environments in which it is experienced and practiced, with a particular focus on South Asia. Eclectic in approach, we will begin by considering how Sufism has been construed and even constructed by scholars, considering how modern notions of the self, religion, and the political have shaped scholarly understandings of what Sufism is. Focusing on bodily practices and well known individual Sufis who lived in South Asia during different historical periods, we will use them as a vehicle for understanding Sufi experience within the context of the evolving Sufi orders within specific local spaces. We will consider why Sufism has become such a target of controversy and ambivalence among Muslims in the modern world and trace some of the changing controversies and tensions that Sufis have struggled with over time, focusing on their understandings of self, society and reality

**RELI GU4260 Time. 4.00 points.**

Concepts and sensibilities surrounding time and temporality are major aspects of people's sense of reality and "how the world works." Questions that we will explore in this course include such as the following: How are concepts and senses of time shaped in different contexts? How do they change? What role do ritual practices as well as distinctions such as between sacred and profane times play in shaping senses of time? In what ways are times and temporalities experienceable and in what ways do they elude perception? How are concepts of time and space connected? How is time political and how do its political valences become tangible or remain elusive? In our inquiries we will pay attention to where practices and concepts that seem obviously associated with religion make their appearance and what assumptions make that classification seem obvious. We will also examine how conceptual tools of religious studies might aid us in understanding how conceptions and sensibilities regarding time and temporality emerge, are transmitted, and transformed in and through communities of practice. While this seminar is open to interested students from all disciplines, our work in this course specifically falls into the "zone of inquiry" of "time and history" of the Religion Department's graduate programs. "Zones of inquiry" seek to introduce students to a particular cluster of key concepts and various theoretical elaborations of those concepts, in order to aid students in honing their ability to reflect critically on and develop further the central concepts that they derive from and bring to the specific traditions and phenomena that they study in their own research. A main goal of this course will therefore be to deepen our conceptual and analytical acumen and expand our theoretical resources at the intersection of religious studies and theories of time and temporality

**RELI GU4307 BUDDHISM # DAOISM IN CHINA. 4.00 points.**

Prerequisites: one course on Buddhism or Chinese religious traditions is recommended, but not required, as background. In recent decades, the study of the so-called "Buddho-Daoism" has become a burgeoning field that breaks down the traditional boundary lines drawn between the two Chinese religious traditions. In this course we will read secondary scholarship in English that probes the complex relationships between Buddhism and Daoism in the past two millennia. Students are required not only to be aware of the tensions and complementarity between them, but to be alert to the nature of claims to either religious purity or mixing and the ways those claims were put forward under specific religio-historical circumstances. The course is organized thematically rather than chronologically. We will address topics on terminology, doctrine, cosmology, eschatology, soteriology, exorcism, scriptural productions, ritual performance, miracle tales and visual representations that arose in the interactions of the two religions, with particular attention paid to critiquing terms such as "influence," "encounter," "dialogue," "hybridity," "syncretism," and "repertoire." The course is designed for both advanced undergraduate and graduate students in the fields of East Asian religion, literature, history, art history, sociology and

anthropology. One course on Buddhism or Chinese religious traditions is recommended, but not required, as background

**Spring 2025: RELI GU4307**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4307	001/17349	Th 4:10pm - 6:00pm 101 80 Claremont	Zhaohua Yang	4.00	14/22

**RELI GU4616 TECHNOLOGY,RELIGION,FUTURE. 4.00 points.**

This seminar will examine the history of the impact of technology and media on religion and vice versa before bringing into focus the main event: religion today and in the future. We'll read the classics as well as review current writing, video and other media, bringing thinkers such as Eliade, McLuhan, Mumford and Weber into dialogue with the current writing of Kurzweil, Lanier and Taylor, and look at, among other things: ethics in a Virtual World; the relationship between Burning Man, a potential new religion, and technology; the relevance of God and The Rapture in Kurzweil's Singularity; and what will become of karma when carbon-based persons merge with silicon-based entities and other advanced technologies

**Spring 2025: RELI GU4616**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4616	001/13967	Th 4:10pm - 6:00pm 201 80 Claremont	David Kittay	4.00	22/25

**RELI GU4626 READING (IN THEORY). 3.00 points.**

This reading-intensive course will engage, over time with essential texts of the current critical canon. Offered over a series of semesters, it is aimed at developing a practice of reading: close or distant, and always attentive. Let us say: slow reading. What does it mean to read? Where and when does reading start? Where does it founder? What does reading this author (Freud, for example) or that author (say, Foucault) do to the practice of reading? Can we read without misreading? Can we read for content or information without missing the essential? Is there such a thing as essential reading? Favoring a demanding and strenuous exposure to the text at hand, this course promises just that: a demanding and strenuous exposure to reading. The course can be repeated for credit

## FALL 2024

**RELI UN1310 GOD. 3.00 points.**

What is religion? And what does God have to do with it? This course will seek to engage a range of answers to these questions. The class is not a survey of all religious traditions. Rather, it will address religion as a comparative problem between traditions as well as between scholarly and methodological approaches. We will engage the issue of perspective in, for example, the construction of a conflict between religion and science, religion and modernity, as well as some of the distinctions now current in the media between

religion, politics, economics and race. And we will wonder about God and gods.

**Fall 2024: RELI UN1310**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 1310	001/10193	T Th 2:40pm - 3:55pm 616 Martin Luther King Building	Gil Anidjar	3.00	20/50

**RELI UN3199 THEORY. 4.00 points.**

An exploration of alternative theoretical approaches to the study of religion as well as other areas of humanistic inquiry. The methods considered include: sociology, anthropology, philosophy, hermeneutics, psychoanalysis, structuralism, genealogy, and deconstruction. (Previous title: Juniors Colloquium)

**Fall 2024: RELI UN3199**

**RELI UN3401 MUSLIMS IN DIASPORA-DISC. 0 points.**

Corequisites: RELI UN3407

Discussion section associated with RELI UN3407-MUSLIMS IN DIASPORA.

**RELI UN3517 Queer Theory, Religion, and Their Discontents. 3.00 points.**

For the most part queer studies and religious studies have met each other with great suspicion and little interest in the conceptual resources of the respectively other field. Our guiding questions will be: What does religion have to do with queerness? What does queerness have to do with religion? Queer theory and activists, unless they already identify as religious, often have little or little good to say about religion. Conversely, many religious traditions intensively regulate gender, sex, sexuality, and especially queerness. This course will explore how religious studies can enrich queer theory and how queer theory can reshape our thinking about religious studies. But beyond the mutual disinterest, anxieties, and animosities, queer studies and religious studies share actually a whole range of core interests and questions, such as embodiment, sexuality, gender-variability, coloniality, race appearing as religious identity and religious identity as gendered, as well as the role of catastrophe, utopia, and redemption in our experience of the world. We will examine questions about religion come to the fore when we paying especially attention to queerness, gender, sexuality, pleasure, pain, and desire. Equally, we will examine how queer discourses mobilize religious and theological images and ideas, especially where these images and ideas are no longer clearly recognizable as having religious origins.

Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to gender, sexuality, desire, and embodiment in our everyday lives and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should experience this course as enlarging the set of critical tools at their hands for creative and rigorous thinking

**Fall 2024: RELI UN3517**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN3519 Embodiment: (Re)Defining the Human. 4.00 points.**

Please note this course is for a GSAS Teaching Scholar. With the rise of climate change, technological advances, and an abundance of everyday existential crises, you might be wondering what it means to be human in 2023. In this course, we begin with the claim that in order to understand “human being” in a time of critical discourse regarding the Anthropocene, we must explore embodiment. Starting with Cartesian Dualism and its legacy, we will progress to contemporary critiques and move into speculative understandings of embodiment and its role in human being in religious studies, philosophy, literature, and anthropology. We will think about how we define what it means to be human, who exactly this “we” is who gets to do the defining, and what happens to us and our worlds when we forget about or attempt to overcome embodiment. This course has several interactive components and utilizes media such as podcasts, films, comics, and practical engagement in addition to a wide variety of academic reading assignments

**RELI UN3901 GUIDED READING AND RESEARCH. 1.00-4.00 points.**

Prerequisites: the instructors permission

**RELI GU4217 American Religions in extremis. 4.00 points.**

This seminar focuses on historical, sociological, and first-hand accounts of a diverse set of American non-conformist religious and spiritual groups (including MOVE, the Branch Davidians at Waco, Father Divine's International Peace Mission, the Oneida Perfectionists, and Occupy and others). Diverse in their historical origins, their activities, and their ends, each of the groups sought or seeks to offer radically new ways of living, subverting American gender, sexuality, racial, or economic norms. The title of this seminar highlights the ways that these groups explain their reasons for existing (to themselves or others) not as a choice but as a response to a system or society out of whack, at odds with the plans of the divine, or at odds with nature and survival. Likewise, it considers the numerous ways that these same groups have often found themselves the targets of state surveillance and violence

**Fall 2024: RELI GU4217**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4217	001/10525	W 4:10pm - 6:00pm 201 80 Claremont	Courtney Bender	4.00	16/20

**RELI GU4325 Sufism. 4 points.**

Prerequisites: Permission of instructor.

This is a seminar for advanced undergraduate and graduate students who wish to gain an understanding of the richness of Sufism (Islamic mysticism). We will examine the historical origins, development and institutionalization of Sufism, including long-standing debates over its place within the wider Islamic tradition. By way of a close reading of a wide range of primary and secondary sources, we will examine Sufi attitudes toward the body, Sufi understandings of lineage, power and religious authority, as well as the continued importance of Sufism in the modern world

**RELI GU4376 A Political Introduction to the Christian Scriptures. 4.00 points.**

In this course we will examine the New Testament canon and the twenty-seven texts that comprise it in light of their respective literary genres, their Jewish antecedents and Greco-Roman influences, which will include their historical, social, cultural, political and economic contexts, and the ways these factors impinged upon their various dimensions of meaning. Various modes of biblical interpretation, both ancient and contemporary, will be explored. A major emphasis will be on the ways select texts are utilized, misconstrued and weaponized in the public sphere in this contemporary moment

**Fall 2024: RELI GU4376**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4376	001/10526	W 12:10pm - 2:00pm 101 80 Claremont	Obery Hendricks	4.00	14/20

**RELI GU4535 BUDDHIST CONTEMPLATIVE SCIENCES. 4.00 points.**

Prerequisites: the instructor's permission.

Buddhist arts and sciences traditionally are divided into the interconnected disciplines of ethics (##la), wisdom/philosophy (prajñ#), and “meditation” or experiential cultivation (sam#dhi/bh#van#). This seminar course introduces the latter discipline, thus complementing and completing Prof. Yarnall's Columbia seminars on Buddhist Ethics (RELI UN3500) and Indo-Tibetan Buddhist Philosophy (RELI GU4630), either of which—in addition to his introductory lecture course on Indo-Tibetan Buddhism (RELI UN2205)—are encouraged as prerequisites. This course will provide a detailed presentation of key Buddhist contemplative sciences, including: stabilizing meditation (#amatha); analytic insight meditation (vipa#yan#); cultivation of the four immeasurables, and form and formless trances; mind cultivation (lo jong); mindfulness meditation; Zen meditation; great perfection (dzogchen); and the subtle body-mind states activated and transformed through advanced tantric yoga techniques. These arts and sciences will be explored both

within their traditional interdisciplinary frameworks, as well as in dialog with related contemporary disciplines, including: cognitive sciences, neuroscience, psychology, psychiatry, philosophy, epistemology, and so forth. To be conducted in a mixed lecture/seminar format (active, prepared participation required)

**RELI GU4547 Sacrifice. 4.00 points.**

This seminar provides an overview of sacrifice in both theory and practice. The concept of sacrifice, and its contestation, allows us to explore a range of issues and institutions related to the (often violent) act of “giving up,” or exchange. What must a sacrifice be, and how do its instantiations—for God; for country; for kin; for love; for rain; etc.—take shape? Readings are drawn from a range of sources, including Biblical texts and commentaries, the anthropological record, critical theory, comparative literature, and work on race and gender. The seminar aims to provide students with a strong foundation for relating sacrifice to broader concerns with the body, media/mediation, religion, politics, and kinship

## ALL COURSES (INCLUDING THOSE NOT OFFERED IN THE CURRENT ACADEMIC YEAR)

**RELI UN1310 GOD. 3.00 points.**

What is religion? And what does God have to do with it? This course will seek to engage a range of answers to these questions. The class is not a survey of all religious traditions. Rather, it will address religion as a comparative problem between traditions as well as between scholarly and methodological approaches. We will engage the issue of perspective in, for example, the construction of a conflict between religion and science, religion and modernity, as well as some of the distinctions now current in the media between religion, politics, economics and race. And we will wonder about God and gods.

**Fall 2024: RELI UN1310**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN1312 Religion in Black America: An Introduction. 4 points.**

Religion has been a complicated and contested, yet central, organizing force in the making of black life in the America. At the same time, African American religious life has been the subject of much scrutiny throughout the history of the United States, serving arguments that advocated abolition, emancipation and full enfranchisement, but also functioning as evidence to justify enslavement and second-class citizenship. To better understand such phenomena, this course provides a chronological survey that introduces students to a range of ideas and practices, individuals and institutions, as well as important themes and topics in African American (thus

American) religious history. Primary attention is given to Afro-Protestantism in the United States; however, throughout the course attention is directed to religious diversity and varying religious traditions/practices in different diasporic locales. By the end of the semester students will be expected to possess a working knowledge of major themes/figures/traditions in African American religious life, as well as key questions that have shaped the study thereof.

**RELI UN1320 Losing My Religion. 3.00 points.**

The R.E.M. lead singer Michael Stipe explained that the phrase “losing my religion” in the song of the same title does not refer to what we might commonly understand by “religion.” Rather it cites the expression used in the Southern U.S. for losing one’s temper, feeling frustrated, exasperated, and desperate. The loss present in John Legend and Common’s song “Glory” from the movie *Selma* are the lives lost to the unattenuated history of racist violence and in the struggle against structural white supremacy. In this context, for Blacks “freedom is like religion.” Like religion. Even if the song does not shy away from Christian theological tropes, “religion” here too remains elusive. Living through a major global pandemic as we are (although arguably, racism and capitalism are also ongoing—albeit mostly unacknowledged—global pandemics), we are witnessing the losses attributable to Covid-19 precipitating changing practices and rituals of marking losses, mourning, and building community in the present. Apart from impacting practices that we generally term “religious,” loss and living with losses also reveal what may have been our individual and collective “religion” lost and what may emerge as the “religions” we hew to newly or nonetheless. In this course we will explore how various meanings of “religion” might offer us conceptual tools for thinking about loss, community, and damaged life. We will examine how religious practices change in relation to losses and reflect on losses of religion both personally (e.g., because one’s hitherto familiar value system breaks down) and collectively (e.g., the forced conversions and suppression of religious traditions by colonialism). We will track how loss and rituals surrounding loss can change how history, time, space, and meaning are experienced. We will ask what if anything comes after or alongside loss, especially given the perdurance of loss that is brought about by centuries of systemic violence. Given the circumstances of our moment, we will also take time to reflect on the (hopefully only temporary) loss of face-to-face communal learning in a shared classroom and what new rituals of virtual learning mean for building communities and relating to others and the world. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and to challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to loss, damaged life, community, complicated and violent pasts, the precarity of the present, vanishing futures and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should

experience this course as enlarging the set of critical tools at their disposal for creative and rigorous thinking

**RELI UN1452 Animals and Religion. 4.00 points.**

Religion features animals everywhere, from the lion lying with the lamb in biblical prophecy, to the beasts that populate many myths, to beliefs in the transmigration between human and animal souls, to legislations and rituals for animal slaughter, to religious responses to animal suffering, to a range of positions on meat-eating and vegetarianism, and the list keeps going. “Animals and Religion” introduces you to the many different ways that the world’s religious traditions approach nonhuman beings — the creatures we call “animals.” We will address animals in the big “world religions” such as Buddhism, Hinduism, and the “Abrahamic” traditions, as well as in local and indigenous traditions and in secular spiritualities, from antiquity to today. We will conduct our inquiry under the shadow of species extinction, factory farming, and other forms of species-based oppression. The course will explore how religious traditions are obstacles as well as rich resources in contemporary thinking about the question of the animal and in the choices we make regarding fellow creatures

Spring 2025: RELI UN1452

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 1452	001/00505	T Th 10:10am - 11:25am 325 Milbank Hall	Beth Berkowitz	4.00	24/30

**RELI UN1610 RELIGION AND POPULAR CULTURE. 3.00 points.**

When we hear “pop culture,” we often think of it in comparison to a “high culture.” In reality, popular culture is something that everyone has easy access to, and represents a common language of the people. Religion permeates American popular culture in surprising ways, and is part of national vocabulary. In addition, religious communities turn to popular culture as a way to preserve their own identities and uniqueness in the face of homogenization and assimilation. The course will attempt to cover a diversity of voices and perspectives. It is important to understand how context plays a role in the interpretation and practice of faith, as well as to witness the tension between the theology and the manifestation of belief. We are not interested in determining if a particular understanding is right or wrong. Rather, we want to understand the role religion plays in society and for the individual. You will be expected to be critical and engaged. My hope is that you will also be creative and daring, and push us all into a better understanding of the material

**RELI UN1612 Religion and the History of Hip Hop. 4.00 points.**

This is an undergraduate lecture course introducing students to the study of religion through an engagement with the history of hip hop music. More specifically, this course is organized chronologically to narrate a history of religion in the United States (circa 1970 to the present day) by mapping the ways that a variety of religious ideas and practices have animated rap music’s evolution and expansion during this time period. While there are no required prerequisites for the course, prior

coursework in religious studies, African American studies, and/or popular music is helpful

**RELI UN1615 Vampires. 3 points.**

Do you believe in vampires? Like ghosts and zombies, vampires circulate in a secularized world and few are those who would speak of a “vampire religion.” This course will attempt to do that. It will ask about the ubiquitous figure of the vampire, insofar as it evokes the ancient and the archaic, the modern and the postmodern. With Bram Stoker’s *Dracula* as our guide, and with the help of film, we will explore the religious significance of vampires and what they mean for the salvation — or perdition — of the soul. We will wonder about vampires and sexuality, vampires and media, vampires and (geo-)politics, and even vampires and the economy.

**RELI UN1620 RELIGION # THE MOVIES. 4.00 points.**

This class is an introduction to both film and religious studies and aims to explore their interaction. Ranging from auteurs to blockbusters, the course will analyze movies that make use of the sacred and of religious themes, figures or metaphors. The course will probe the definitions and boundaries of religion -as theology, myth, ideology- and will show students how religion remains a critical presence in the arts, even in a secular guise. We will look at the ways in which popular culture can serve religious functions in contemporary society and examine how faith is represented in popular culture

Spring 2025: RELI UN1620

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN1621 Religion and the Movies: Discussion. 0.00 points.**

Discussion section for Religion and the Movies

**RELI UN2101 Religion and the Climate Crisis. 3.00 points.**

This course examines the work of religious ideas—and ideas about religion—in creating, mediating, and responding to climate change. We will use religion as a lens for examining the role of humans in creating ecological destruction and efforts to repair and rework relationships with the natural world. The course draws on primary texts from and literature about a wide range of religious traditions in a bid to unsettle universalist narratives about both the environment and climate change. Students will encounter a variety of religious philosophies of the environment and interrogate the role that shifting ideas about religion have played in the emergence of the climate crisis. Throughout the course, questions of colonialism will be central in understanding how we think about religion and cultivating attitudes toward the environment. By the end of the semester, students will have deepened and nuanced their understandings of the notoriously vexed category of religion and come away with new ways of thinking about the climate crisis. Overall, this course will provide a strong grounding in both the study of religion and the environmental humanities

**Spring 2025: RELI UN2101**

**RELI UN2205 BUDDHISM: INDO-TIBETAN. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Buddhist teachings came to Tibet relatively late in the history of Buddhism's travels through Asia. Tibetan emperors adopted Buddhism from India around the eighth century, which sounds like a long time ago now, but by that time Buddhism was already well established in parts of South, Southeast, Central, and East Asia. In addition to being known as a tradition of renunciants and forest dwelling philosophers, Buddhism was associated with cosmopolitanism—literacy, the arts, architecture, higher education and beyond. Tibetan rulers, like so many rulers before them, turned to Buddhism after amassing power through warfare and violence, and they became interested in Buddhism's methods for cultivating wisdom and compassion as antidotes to ignorance and selfishness. They were also curious about whether Buddhism could help justify and support their claims to power. Because Buddhism was already a complex system, Tibetans were able to uniquely integrate all three of the major traditions of Theravada, Mahayana, and Vajrayana Buddhism. Thanks to the hard work of Tibetan and Indian translators and artists with imperial support, monks and nuns followed the rules of the earliest disciples of Buddha, philosophers pored over Indian Buddhist treatises, and ritualists fine-tuned the tantric, esoteric, intensive path to liberation from dissatisfaction and suffering. The new expressions of Buddhism that emerged in Tibet have shaped religion, education, literary production, the arts, and language across a massive and diverse swath of Asia, from northern India to Nepal, Bhutan, Mongolia, and areas of Western China. More recently, Tibetan Buddhism has spread across

the globe. In this course, by analyzing primary textual sources in translation as well as visual and material culture, we will investigate the history and practice of Tibetan Buddhism in all its complexity, from its earliest origins to the present. There are no prerequisites for this introductory lecture

**Spring 2025: RELI UN2205**

**RELI UN2301 ISLAM-DISCUSSION. 0.00 points.****RELI UN2304 CHRISTIANITY. 3.00 points.**

Survey of Christianity from its beginnings through the Reformation. Based on lectures and discussions of readings in primary source translations, this course will cover prominent developments in the history of Christianity. The structure will allow students to rethink commonly held notions about the evolution of modern Christianity with the texture of historical influence

**RELI UN2305 ISLAM. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An introduction to the Islamic religion in its premodern and modern manifestations. The first half of the course concentrates on "classical" Islam, beginning with the life of the Prophet, and extending to ritual, jurisprudence, theology, and mysticism. The second half examines how Muslims have articulated Islam in light of colonization and the rise of a secular modernity. The course ends with a discussion of American and European Muslim attempts at carving out distinct spheres of identity in the larger global Muslim community

**RELI UN2306 INTRO TO JUDAISM. 4.00 points.**

A historical overview of Jewish belief and practice as these have crystallized and changed over the centuries. Special attention to ritual and worship, the forms of religious literature, central concepts, religious leadership and institutions, Israel among the nations

**Fall 2024: RELI UN2306**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN2312 Religion and Nasty Women. 4.00 points.**

Used in 2016 by then presidential candidate, Donald Trump, in reference to his female opponent, Hillary Clinton, the phrase “nasty woman” has become a badge of honor and a rallying cry for women’s empowerment. The origin of the word “nasty,” attested in the 14th century, indicates highly unpleasant qualities- nauseating or unclean, in a literal or figurative way. It also came to evoke indecency and obscenity- and religious traditions have a long history of such depiction of women. After introducing some key texts on the otherness and objectification of women (including by Aristotle, Beauvoir, Kristeva, Nussbaum, and Butler), we will examine a number of female characters- goddesses, prostitutes, and virgins - in

the Mesopotamian, Greek, Jewish, Christian, Buddhist, Hindu, and Islamic corpus that fit the definition of nasty. We will also analyze some of the underlying tropes of impurity and danger that characterize nastiness involving bodily fluids, sexuality, and knowledge. Spanning theology, literature, movies, and popular culture the course aims to be a survey of religious-based misogyny as well as women’s responses in their pursuit of agency

**RELI UN2313 Religion and Nasty Women - Discussion. 0 points.**

Used in 2016 by then presidential candidate, Donald Trump, in reference to his female opponent, Hillary Clinton, the phrase “nasty woman” has become a badge of honor and a rallying cry for women’s empowerment.

The origin of the word “nasty,” attested in the 14th century, indicates highly unpleasant qualities- nauseating or unclean, in a literal or figurative way. It also came to evoke indecency and obscenity- and religious traditions have a long history of such depiction of women.

After introducing some key texts on the otherness and objectification of women (including by Aristotle, Beauvoir, Kristeva, Nussbaum, and Butler), we will examine a number of female characters- goddesses, prostitutes, and virgins - in the Mesopotamian, Greek, Jewish, Christian, Buddhist, Hindu, and Islamic corpus that fit the definition of nasty. We will also analyze some of the underlying tropes of impurity and danger that characterize nastiness involving bodily fluids, sexuality, and knowledge. Spanning theology, literature, movies, and popular culture the course aims to be a survey of religious-based misogyny as well as women’s responses in their pursuit of agency.

**RELI UN2315 Japanese Religious Traditions. 3 points.**

Study of the development of the Japanese religious tradition in the premodern period. Attention given to the thought and practices of Shinto, Buddhism, and Confucianism; the interaction among these religions in Japanese history; the first encounter with Christianity.

**RELI UN2316 HINDUISM - DISCUSSION. 0.00 points.**

**RELI UN2322 Introduction to Islamic Law. 3.00 points.**

The platform of every modern “Islamist” political party calls for the implementation of “the shari’a.” This term is invariably (and incorrectly) interpreted as an unchanging legal code dating back to 7th century Arabia. In reality, Islamic law is an organic and constantly evolving human project aimed at ascertaining God’s will in a given historical and cultural context. This course offers an introduction to the major concepts in Islamic law including its basic method and its interactions with modernity. The first part of the semester is dedicated to “classical” Islamic jurisprudence, concentrating on the manner in which jurists used the Qur’an, the Sunna (the model of the Prophet), and rationality to articulate a coherent legal system.

The second part of the course focuses on those areas of the law that engender passionate debate and controversy in the contemporary world. Specifically, we examine the discourse surrounding gender (marriage, divorce, and personhood) and crime/punishment. The course ends by directly engaging issues associated with modernity with a particular focus on science (evolution) and medicine (medical ethics). This class is designed as a broad introduction to the Islamic law with case studies scattered throughout the semester. The format of individual class sessions will vary from topic to topic but students should anticipate \*extensive\* participation

**RELI UN2335 RELI IN BLACK AMERICA:AN INTRO. 4.00 points.**

Religion has been a complicated and contested, yet central, organizing force in the making of black life in the America. At the same time, African American religious life has been the subject of much scrutiny throughout the history of the United States, serving arguments that advocated abolition, emancipation and full enfranchisement, but also functioning as evidence to justify enslavement and second-class citizenship. To better understand such phenomena, this course provides a chronological survey that introduces students to a range of ideas and practices, individuals and institutions, as well as important themes and topics in African American (thus American) religious history. Primary attention is given to Afro-Protestantism in the United States; however, throughout the course attention is directed to religious diversity and varying religious traditions/practices in different diasporic locales. By the end of the semester students will be expected to possess a working knowledge of major themes/figures/traditions in African American religious life, as well as key questions that have shaped the study thereof

**RELI UN2405 CHINESE RELIGIOUS TRADITIONS. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course provides a chronological and thematic introduction to Chinese religions from their beginnings until modern times. It examines distinctive concepts, practices and institutions in the religions of China. Emphasis will be placed on the diversity and unity of religious expressions in China, with readings drawn from a wide-range of texts: religious scriptures, philosophical texts, popular literature and modern historical and ethnographic studies. Special attention will be given to those forms of religion common to both “elite” and “folk” culture: cosmology, family and communal rituals, afterlife, morality and mythology. The course also raises more general questions concerning gender, class, political patronage, and differing concepts of religion

**RELI UN2415 Religions of Harlem. 3 points.**  
**Not offered during 2023-2024 academic year.**

Through a range of field exercises and classroom guests, this course will introduce students to the rich religious history of Harlem, while also challenging them to document and analyze the diversity of Harlem's contemporary religious scene.

**RELI UN2506 From Exodus to the Coronavirus: Scriptures and Narratives of Religious Responses to Epidemics. 4.00 points.**

The purpose of this course is to offer an overview of religious responses to epidemics and pandemics, mostly in a monotheistic tradition, and to engage with the questions of collective guilt, collective mourning, divine justice (or lack thereof), and the societal disruption that such illnesses create or expose as well as persecution and discrimination. The questions raised will help us find parallels with these times of pandemics and put our current times into perspective, but also contextualize and reflect on the nuances of past events and responses

**RELI UN2507 From Exodus to the Coronavirus: Scriptures and Narratives of Religious Responses to Epidemics - Discussion. 0.00 points.**

The purpose of this course is to offer an overview of religious responses to epidemics and pandemics, mostly in a monotheistic tradition, and to engage with the questions of collective guilt, collective mourning, divine justice (or lack thereof), and the societal disruption that such illnesses create or expose as well as persecution and discrimination. The

questions raised will help us find parallels with these times of pandemics and put our current times into perspective, but also contextualize and reflect on the nuances of past events and responses

**RELI UN2670 MAGIC AND MODERNITY. 3.00 points.**

This course introduces students to the cultural history of magic: as an idea, as a practice, and as a tool with which wield power and induce wonder. Magic, as we will explore, is a modern concept, the contours of which have been shaped by its relations with religion and science, always against larger backdrops—of the Enlightenment, Romanticism, (post) colonialism, and (post) secularism. Readings are drawn from philosophy, anthropology, religious studies, sociology, drama, literature, history, history of science, and political theory. Cases and readings focus on everything from medieval England to post-socialist Mozambique. Throughout the term, a recurring theme will be whether, and to what extent, magic is incompatible with modernity—or, actually, integral to its constitution. By the end of this course, students should be familiar with a variety of ways in which magic has been understood since the early modern era, in a wide range of settings and cultural contexts. By tracing understandings of magic, students should also come away with an appreciation of how the authority of being “modern” is constructed (and contested) in relation to contemporary valuations of reason, science, enchantment, and the imagination

**RELI UN2779 INTRODUCTION TO NATIVE AMERICAN RELIGIOUS TRADITIONS. 3.00 points.**

There are over 800 distinct Native American nations currently within the borders of the United States. This course offers a broad introduction to the diversity of American Indian religious systems and their larger functions in communities and in history. We will explore general themes in the study of Native American religious traditions as well as look at some specific examples of practices, ideas, and beliefs. Of particular importance are the history and effects of colonialism and missionization on Native peoples, their continuing struggles for religious freedom and cultural and linguistic survival, and the ways in which American Indians engage with religion and spirituality, both past and present, to respond to social, cultural, political, and geographical change

**RELI UN2780 INTRODUCTION TO NATIVE AMERICAN RELIGIOUS TRADITIONS- Discussion. 0.00 points.**

REQUIRED DISCUSSION SECTION FOR RELI UN2779

**RELI UN3020 Science Saves. 4.00 points.**

Some of the most significant and influential imaginings about the future have come out of religious movements. Today the scales of authoritative power to inform us about our collective futures seem to have shifted, many would say properly so, in

favor of the sciences. Promises about the future, however, are never just predictions which may or may not come to pass. They are claims to power and authority (who has the power to describe and create the future), expressions of values (what kinds of dispositions, attitudes, and behaviors are considered proper in this future), and producers of future social worlds (who is permitted to participate in this future). Whether or not science discourses are attuned to it, the sciences have learned a lot from religion when it comes to selling salvation. Therefore, we do well to study the various intersections of science, technology, society, and religion. In this course, we will examine the utopian claims of science and technology, both past and present, to explore and understand how that authority is produced and structured, the kinds of values encoded within these claims, and the people, things, entities, and institutions who are included in or excluded from these potential futures. This course specifically aims to equip students with the ability to discern claims about the future, understand what is lurking between the lines, critically examine its consequences and intentions, and contextualize such claims about the future within alternative or competing claims, all in the hope that such critical attention produces visions of the future, and assemblages of science and technology, which are more democratic, just, and equitable

**Fall 2024: RELI UN3020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN3027 Muslims of New York. 3.00 points.**

Looking at both historical and lived realities of Muslims in NYC, moving from the African Burial Ground in lower Manhattan to Harlem as Mecca. The course would engage both with cultural production, such as music, plays, and street art, and living communities around the Barnard campus

**RELI UN3107 Psychoanalysis and the ‘Eew’ Factor. 3.00 points.**

Curious about ambivalences and how we might attend to what we would rather not know, the late psychoanalyst Muriel Dimen took an interest in what she called the “eew! factor,” the visceral reaction of disgust and revulsion that is usually far more ambivalent than we like to think. Laced with attraction and excitement, relegated often to the unconscious, the “eew! factor” will provide us a lens for thinking with psychoanalysis about desires, bodies, social and moral boundaries, power, violence, ethics, and their ambivalences. Conceptions of purity and pollution, taboo and transgression work to establish norms and boundaries, while also rendering the forbidden exceptional, threatening, alluring, and powerful. We will attend to the dynamics of transference and countertransference to think through the ambivalences of attraction, pleasure, embarrassment, revulsion, and shame that surround investments in and rejections of queerness, racialization, religion, and institutions. We will examine how value and power do and don’t accrue around taboos and transgressions and to secrecy

and revelations. In light of the affective intensities of the “eew! factor” that seems never far in our everyday negotiations of social, moral, and bodily boundaries, we will also ask what ordinariness and a lack of exceptionality in relation to the “eew!” might look like, if it is even possible

**RELI UN3202 RELIGION IN EARLY AMERICA. 4.00 points.**

This course examines religion in North America from the 1500s through the early 1800s with a focus on colonial projects, race and slavery, and gender. We begin with comparing Spanish and French Catholic and English Protestant colonies, missionary efforts, and systems of enslavement as well as how religion factored into Native Americans and African people’s survival and resistance. The second part of the class turns to the 1700s and the emergence of religious revivals and evangelicalism alongside increasing religious variety in the British colonies of North America. Finally, we examine the early United States (1790s-1850s) and ask how disestablishment, imperial ambitions, new religious movement, and debates over the “slavery question” transformed the religious landscape. While focused on religious history (and primarily different Christian traditions), the category of “religion” itself and theoretical frameworks for studying religion are also integral to the class

**Fall 2024: RELI UN3202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN3203 RELIGION IN THE MODERN US. 4.00 points.**

This course examines the history of religion in the United States from the Civil War to the present through thematic units

focused on the legal structures of religious freedom; race, religion, and nationality; healing, aesthetics, and embodiment; and, finally, religion and politics. Over the course of the semester, students will explore various religious communities as well as the ways social, political, and economic factors have shaped those traditions – and how religious communities have in turn shaped US society, politics, and culture. Students will also be introduced to key themes and debates in the field of American religious studies

**Spring 2025: RELI UN3203**

**RELI UN3204 Religion, Sexuality, and Truth. 3 points.**

The extent of Michel Foucault engagement with Christianity has only recently come to light with the publication of his lectures from the early 1980s. These lectures constitute, in many ways, the culmination of Foucault's work on power, sexuality, subjectivity and the discursive operations whereby knowledge is produced. In this course, we will appreciate the depth and originality of Foucault's critical account of Christianity and examine the major role it occupied in his thought on subjects such as sexuality, governmentality, truth telling, confession, and judicial forms. We will understand Foucault's work along with the crucial role he ascribed to Christianity in forming the history of the present.

**RELI UN3206 RELIGION IN THE ARCHIVE. 4.00 points.**

Students must sign up for a discussion section on Fridays, 10:10-11:25. **Not offered during 2023-2024 academic year.**

In Religion in the Archive, students will conduct archival research and create digital humanities projects that “remix” and decolonize a missionary archive: the Papers of Matilda Calder Thurston (1875-1958), an American missionary who helped establish the first four-year women's college in China, Ginling College in Nanjing. Thurston's papers belong to the Missionary Research Library housed at Burke Library. The class will meet twice a week for lectures addressing the history of American and Chinese religions and focused on theoretical questions of imperialism, gender, conversion, and modernization. Students will also engage with debates about the archive/archiving, the digital humanities, and what it means to present scholarly research to a public audience. During the Friday recitation, students will conduct archival research and scan archival documents, to embed metadata, to work with a database program, and to design a website and/or produce a podcast.

**RELI UN3207 In the Margins of the Middle Ages: Religious Minorities in the Medieval Latin West. 4.00 points.**

This course investigates marginal religious groups, including apostates, heretics, Jews, magicians, Muslims, etc. against the backdrop of Christianity in medieval Western Europe. Through examining various types of primary textual and pictorial sources including papal letters, penitential handbooks, lawyers'

commentaries, autobiographies, manuscript illuminations, paintings, etc., the class will facilitate students to rethink the socio-historical situation of religious minorities, the defining of religious boundaries in history, and the echoes of such defining in the contemporary world. (No prerequisites)

**RELI UN3208 Aaahh Real Monsters: Critical Monster Studies. 3.00 points.**

This course examines the major issues and themes of critical monster studies. It explores questions about how we conceive and understand monsters theoretically, historically, socially, and culturally. Is there a quintessential monster category? Or are monsters constructed? How do social, cultural, and religious factors affect our perception of monsters and the idea of monstrosity? What roles do monsters fill in determining how people construct and deconstruct their communities? Are monsters members of the community? What does the idea of monstrosity imply about the limits of what is possible in nature? Are monsters just supernatural or are there natural monsters? And what do modern depictions of monsters in popular media have to say about how our perception of monsters is changing? Together, we explore all of these questions and orient students into the burgeoning field of critical monster studies

**RELI UN3210 MILLENNIUM: APOCALYPSE AND UTOPIA. 3.00 points.**

Study of apocalyptic thinking and practice in the western religious tradition, with a focus on American apocalyptic religious movements and their relation to contemporary cultural productions, as well as notions of history and politics

**RELI UN3213 Religion In Early America- Discussion. 0.00 points.**

This course accompanies RELI UN3203: Religion in the Modern US to examine the history of religion in the United States from the Civil War to the present through thematic units focused on the legal structures of religious freedom; race, religion, and nationality; healing, aesthetics, and embodiment; and, finally, religion and politics. Over the course of the semester, students will explore various religious communities as well as the ways social, political, and economic factors have shaped those traditions – and how religious communities have in turn shaped US society, politics, and culture. Students will also be introduced to key themes and debates in the field of American religious studies

**RELI UN3225 Religion and Capitalism: Faith and the American Market. 3 points.**

Is the market a religious system? Can we consider "capitalism" to be a key arena in which the relationship between the religious and the secular is both negotiated and performed? In

this course, students will explore the complicated relationship between faith and the market, the religious and the secular, and the evolution of vice and virtue as they relate to economic thriving in the United States. While no hard and fast rules for thinking about the relationship between right conduct and material interests cut across all religious and philosophical traditions, human agents invest real faith into currency, into markets, and into the reigning economic order to bring about increased opportunities, wealth, and freedom to people across the globe. Throughout this semester, we will chart both the long shadows and the future trajectories of these beliefs from our American perspective.

In this course, students will develop a strong foundational knowledge of the key theorists who have defined these relationships for generations before applying a critical lens to a number of global themes (the construction of race, the power of class, and the policing of gender) in an American context. To this end, our syllabus will be split into three units, each anchored by a particular theorist central to the academic study of religion (Max Weber, Karl Marx, and Michel Foucault) and followed by a number of case study texts that will bring their constructs and lenses into more lively debate and discussion.

#### **RELI UN3230 PHILOSOPHY OF RELIGION. 3.00 points.**

This course in the Philosophy of Religion will consider the relationship between faith and reason, religion and morality, religion and art, and religion and technology. Attention will be devoted to an exploration of comparative interpretations of God or the divine in the western philosophical and theological traditions and Zen Buddhism as well as the interrelation of interpretations of God, self, and world. The course will conclude with a consideration of the question of life after death in philosophy, literature, and information technology

#### **RELI UN3232 Museums and Sacred Things. 4 points.**

This course invites students to consider how museums create, curate, collect, and engage with sacred things, including things that are recognizably religious, things that become “sacred” through the processes of museum collection and display, visitors to museums, and even museum spaces themselves. This course focuses on the American context, and American museums. We will first consider the particular social and political contexts in which museums and museum practices developed and responded to sacred things, and the contexts in which “religion” serves as a valuable if often implicit classification structure. We will then focus on the ways in which things deemed sacred are engaged by museums and encountered by museumgoers, with particular attention to the ways that museumgoers, museum architecture, and religious communities all interact in relation so object. In this class, students will learn to thoughtfully ask question and evaluate the role that museums as public institutions play in shaping public and private understandings and experiences of religion, the sacred, and spirituality.

#### **RELI UN3260 Sociology of Religion. 3 points.**

Prerequisites: prior coursework in religion or sociology is highly encouraged.

This course introduces classical and contemporary theoretical and empirical approaches to the sociological study of religion, including secularization and secularity, religious identity formation, and sociological approaches to religious practice and meaning. Special focus will be on contemporary American topics, including religion and transnationalism, the role of religious actors and discourses in American politics, law and economics, and everyday religious practice.

#### **RELI UN3303 Judaism and Translation in the Medieval and Early Modern Mediterranean. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The course explores both the practice of translation (the rendering of texts from one language to another) and the idea of translation (as a medium of cultural transmission) in the medieval and early modern Mediterranean.

**RELI UN3304 Memory and Violence in Shi'i Islam. 4 points.****Not offered during 2023-2024 academic year.**

Why do humans insist on remembering and often memorializing violence? And how do they decide when violence is worth remembering or not? This course ponders these questions through a case study by examining the martyrdom of Husayn b. Ali (d. 680), grandson of the Prophet Muhammad and the third Imam in Shi'i Islam. We will explore the many ways in which this violent event has acquired meaning for people around the world from the seventh century until today using the lens of "collective memory" and its role in community formation. There are no prerequisites, but background knowledge of Middle Eastern history will be very helpful.

**RELI UN3309 Modern Islamic Thought. 4 points.**

Who speaks for Islam and Muslims today? Is an "Islamic Reformation" necessary? Is there a Muslim "clergy"?

What makes certain religious voices and institutions more authoritative than others? This course explores questions such as how can we conceptualize "authority" and the ways in which religious authorities are constructed in Islam in the modern and post-modern age. What sorts of shifts have occurred at centers of Islamic learning in the modern period? How may some of major influential orientations to Islamic thought today be characterized? How are American Muslims thinkers influenced by modern Islamic thought from Muslim majority countries and how are they developing their own body of thought? What are some of the major debates in contemporary American Muslim thought regarding violence, gender, race and economic justice?

**RELI UN3312 "The Scientific Buddha": Buddhism and Science in China and Beyond. 4.00 points.**

The relationship between religion and science, and by extension between Buddhism and science, have been long investigated by scholars and practitioners attempting to understand questions regarding the nature of reality, knowledge, and experience. While the meeting of Buddhism and Western science dates back to the nineteenth century, the discourse of "encounter" between these two systems of knowledge intensified with the Dalai Lama's suggestion to institutionalize a dialogue between Buddhist practitioners and Western scientists in 1987. This seminar examines this on-going dialogue from its beginning in China about 200 years ago through today

**RELI UN3313 Quran- Discussion. 0.00 points.**

This is the discussion section for RELI UN3314: QURAN

Spring 2025: RELI UN3313

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

302 Milbank Hall					

**RELI UN3314 QURAN. 4.00 points.**

This course conceives of the Qur'ān as a living text in constant flux through interactions with other religious traditions. It

focuses on developing an understanding of the Qur'ān's form, style, and content through a close reading of comparable religious texts. Major topics covered include the Qur'ānic theory of prophecy, its treatment of the Biblical tradition (both that of the Hebrew Bible and the New Testament), and its perspective on pre-Islamic pagan religion. The central goals of the course include the ability to (a) analyze primary religious sources in a critical and objective manner and (b) construct coherent arguments based on concrete evidence. In a class of this nature, class members will naturally hold or develop a wide variety of opinions about the topics covered. The goal is not to adopt a single opinion concerning the interpretation of a particular text, but rather to support personal conclusions in a clear logical manner

Spring 2025: RELI UN3314

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 3314	001/00511	M W 2:40pm - 3:55pm 203 Diana Center	Najam Haider	4.00	23/30

**RELI UN3315 Readings in Kabbalah. 3 points.**

This course will serve to provide a wide but detailed exploration of Jewish Mysticism, raising questions about its connection to other Jewish traditions, the kind of symbolism and hermeneutics at stake, and the conception of God, man and world we are dealing with, amongst other major ideas.

**RELI UN3317 Deep Tantra: Sex, Violence, Ritual. 4.00 points.**

This course is an introduction to the tantric traditions of premodern India (c. 300 - 1000 CE) with a particular emphasis on the history of #aivism (pronounced "Shaivism") – that is, religious currents associated with scriptures called tantras that were believed to have been revealed by the god #iva (pronounced "Shiva"). #aivism is generally considered to be one of the many strands that make up Hinduism, but we will explore, both historically and thematically, the aspects that made tantric #aivism unique, including its ritual use of sex and violence. Our exploration into the tantric world will seek to make sense of these and other types of practices within the broader religious context of traditional South Asia. We will also examine how aspects of tantric religion became an important religious context for a variety of communities and the ways in which tantric #aivism transformed other religious groups

**RELI UN3318 Humor, Joy, and Happiness in Judaism. 4.00 points.**

Jewish history is plagued with tragedies and suffering. It only makes sense, then, that scholars of Jewish Studies tend to focus on moments of hardship and pain. But do disasters and the despair tell the whole story? What gets missed when we prioritize despair and misery and cast aside allegedly "lighter" and more "positive" themes? Such questions are the engine that runs this seminar. Here, students are invited to rethink the cultural roles of joy in Judaism, take Jewish humor seriously, and ponder whether happiness in Judaism is distinct from what we find in other religious traditions. "Joy, Humor, and Happiness in Judaism" is not, however, a feel-good course.

Throughout the semester, through careful readings of primary sources (in translation) and contemporary theories, we will explore how so-called positive emotions, moods, and affects are inextricable from the most “serious” aspects of religion, politics, and the human experience, such as identity formation, violence, gender norms, and power

**RELI UN3321 Religion and Climate Crisis: India. 4.00 points.**

Connections between dramatic climate assaults and religious practices and perspectives, taking Hindu India as an example: glaciers and floods, extreme weather, overpopulation, air and water pollution, deforestation. Hindu contexts, causes, and responses

**RELI UN3322 Religion # Climate Crisis: India - Discussion. 0.00 points.**

This is the discussion section for RELI UN3321. You must register for that course before registering for this course

**RELI UN3323 Religion and Medicine in South Asia: Psychiatry # the Politics of Madness. 4.00 points.**

In this course, students will come to see the imbrication of religion, power, and mental illness across South Asia by examining experiences of suffering and its management; the history of psychiatry in the British colonial era and its afterlives; and the relationship of religion to concepts of mental and emotional disorder. Students will identify models for medical structures of care, healing, and treatments in the context of religion, ritual, and quotidian life. Topics include diagnostic processes and the creation of categories, stigma and models of clinical care, hysteria, spirit possession, pharmaceuticals, and the relationship of trauma to political structures. This course has three sections: 1) the first portion undertakes a brief historical survey of medical disciplines and institutions in South Asia (such as the development of Ayurveda, Yun#n# #ibb, and the rise of the b#m#rist#n); 2) the second portion of the course focuses on the rise of the asylum (sometimes called the p#gal kh#na) in tandem with psychiatry and its twinned consequence: the pathologization of asceticism by British colonial technologies of discipline; 3) the final portion examines the relationship between British colonialism and psychoanalysis with the introduction of this western discipline to the subcontinent. This course will take critical stock of historical structures throughout South Asia claiming to provide care (such as family, caste, healthcare, mental asylums, colonialism, educational systems, pensions, and much more). As a result, students come to consider concepts of social suffering, biopolitics, biosociality, political subjectivity, and postcolonial disorder. Primary source material will include the following: ##stra, ethnography, clinical studies, poetry, scripture, ritual texts across Islamic, Hindu, Buddhist, and Jain traditions

214 Milbank Hall					

**RELI UN3340 EARLY CHRISTIANITY. 3.00 points.**

Examines the competing currents within early Christianity, with emphasis placed on the literary and social expressions of Christian belief and identity. Topics to be covered include persecution and martyrdom, debates over authority and religious experience, orthodoxy and heresy, and asceticism and monasticism, among others

**RELI UN3357 I and We in the Christian East: The Making of Identity. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course will provide a survey of Christian history in the eastern Mediterranean and Near East from roughly the fourth to the eleventh centuries with particular attention to religion and identity. How would the various Christians in this era answer the questions: “Who am I?” “Who are we?” How did their understanding of the divine influence their understanding of themselves and how was this identity enacted through writing and ritual? Though our focus will be on this period, we will also consider the framing of the history of “Eastern” Christianity into the modern period. No prerequisites.

**RELI UN3401 MUSLIMS IN DIASPORA-DISC. 0 points.**

Corequisites: RELI UN3407

Discussion section associated with RELI UN3407-MUSLIMS IN DIASPORA.

**RELI UN3406 Space, Narrative, and Religion in India. 3 points.**

**Not offered during 2023-2024 academic year.**

**Course Description:** This course is fundamentally about sacred places and the stories that people tell about and within them. We will explore the role that narratives – mythological, historical, personal, and academic – have played in the creation, maintenance and conceptualization of sacred spaces in South Asia. Each class in the first section of the course is devoted to a particular site or category of sites, and examines the roles that religious texts and iconography play in the traditions with which the sites are associated. In the second section of the course, we will consider ethnographic perspectives on religious journeys. Finally, in the third section, we will focus on the idealization of region or nation as a sacred space, and examines the manner in which narratives are invoked to formulate identities and to negotiate conflicts and differentials of power.

As we navigate these topics, we will explore answers to the following questions: How are spaces made “sacred”? What are the multiple types of narratives that come to be associated with sacred spaces, and what roles do they play in their production? How are such narratives transmitted, and for whom? How do religious practitioners utilize these spaces and their narratives in order to negotiate various facets of daily life, and in order to situate themselves within the religious landscape of South Asia?

**RELI UN3407 Muslims in Diaspora. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Consideration of controversies surrounding mosque-building, headscarves, honor killing, and other publicized issues that expose tensions surrounding citizenship and belonging for Muslims in North America and Europe. Exploration of film and other media representations of Muslims in the West. There will be additional meeting times for film screenings

**RELI UN3413 Muslims in the West. 3.00 points.**

Contemporary Western Muslims around the world face a number of challenges today. What are some of the major issues that some Western Muslim communities are negotiating? What can we learn from particular narratives of Muslims in the West, including during slavery in the US and at the turn of the twentieth century? How did Islam spread among African Americans in the mid-twentieth century and what does contemporary Muslim American thought look like today? How do the histories, beliefs and practices vary among contemporary diasporic Muslims especially in relationship to their circumstances and their negotiations of questions relating to race, class, and gender? What do some of the major divisions in theology and politics look like among contemporary Muslims along conservative and progressive lines? Who are some of the major voices and movements contesting for authority today and what positions do they take? This course aims to explore these questions and more through close readings and discussions of primary sources coupled with secondary academic works

Fall 2024: RELI UN3413

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI UN3414 Changing Places. 4.00 points.**

Globalization, climate, migration, surveillance, homelessness, and virtualization are changing the places where people live, work, love, pray, struggle, and die. This course explores the presuppositions and implications of intersecting vectors that are pushing society to the edge of collapse. The inquiry begins with a consideration of the contemporary status of the four ancient elements – earth, air, water, and fire, and proceeds to explore displacements in cities and the country and replacements in churches, temples, mosques, woods, gardens, and cemeteries. Have we passed the tipping point, or is recovery still possible?

**RELI UN3415 Climate, Religion, and the Anthropocene. 4.00 points.**

This course examines intersections between religious life and climate change in a comparative and global perspective. In recent years, the idea of the Anthropocene—the period of geological time during which human activity has become the primary force shaping the Earth’s climate—has abounded in both academic and popular literature. This focus on human agency over the climate raises questions about the extent to which humans share equally responsibility for and vulnerability to climate change, as well as differing understandings of human

relationships and responsibilities toward the environment. This course uses religion as a lens to examine the role of humans in both creating ecological destruction and efforts to repair and rework relationships with the natural world. We will draw on primary texts from religious traditions around the world in a bid to unsettle human-centric and universalist narratives of the Anthropocene. By the end of the semester, students will have deepened and nuanced their understandings of the notoriously vexed categories of religion and the Anthropocene, and come away with new ways of thinking about the climate crisis

**RELI UN3425 Judaism and Courtly Literature in Medieval and Early Modern Iberia and Italy. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The course explores secular Jewish literature composed in the medieval and Early Modern Mediterranean in the context of its Arabic and Romance-language counterparts. After examining the literary, linguistic and philosophical backdrop of Jews in the Islamic Empire, we will focus on poetry and prose of al-Andalus, Christian Spain and Italy. We will look at examples of how Jews depicted themselves and how Christian and *converso* thinkers portrayed Jews. In addition, we will consider two crossover writers, one Jew in Spain and one in Italy, whose compositions in Castilian and Italian were accepted and integrated into Christian society. Historical materials will accompany textual examples, which span the eleventh through sixteenth centuries.

**RELI UN3430 Indigenous Religious Histories. 4 points.**

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of *lacking* religion; as pagan, barbarian, non-modern, and without history or civilization.

Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, the history of anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative.

**RELI UN3500 BUDDHIST ETHICS. 3.00 points.****RELI UN3501 Introduction To the Hebrew Bible. 3 points.**

An introduction, by critical methods, to the religious history of ancient Israel against the background of the ancient Near East.

**RELI UN3511 Tantra in South Asia, East Asia & the West. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An introduction to the history, literature, and ideology of Tantra and Tantric texts, deities, rituals, and traditions, proceeding chronologically from the early centuries C.E. to current forms of Tantric practice, and primarily covering India, China, and Japan. Attention will also be given to contemporary iterations of Tantra in the West. Questions of definition, transmission, patronage, gender, and appropriation link the various sections of the course. Readings include primary texts, secondary sources, local case studies, and art historical material.

**RELI UN3517 Queer Theory, Religion, and Their Discontents. 3.00 points.**

For the most part queer studies and religious studies have met each other with great suspicion and little interest in the conceptual resources of the respectively other field. Our guiding questions will be: What does religion have to do with queerness? What does queerness have to do with religion? Queer theory and activists, unless they already identify as religious, often have little or little good to say about religion. Conversely, many religious traditions intensively regulate gender, sex, sexuality, and especially queerness. This course will explore how religious studies can enrich queer theory and how queer theory can reshape our thinking about religious studies. But beyond the mutual disinterest, anxieties, and animosities, queer studies and religious studies share actually a whole range of core interests and questions, such as embodiment, sexuality, gender-variability, coloniality, race appearing as religious identity and religious identity as gendered, as well as the role of catastrophe, utopia, and redemption in our experience of the world. We will examine questions about religion come to the fore when we paying especially attention to queerness, gender, sexuality, pleasure, pain, and desire. Equally, we will examine how queer discourses mobilize religious and theological images and ideas, especially where these images and ideas are no longer clearly recognizable as having religious origins. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to gender, sexuality, desire, and embodiment in our everyday lives and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should experience this course as enlarging the set of critical tools at their hands for creative and rigorous thinking

**Fall 2024: RELI UN3517**

**RELI UN3518 Buddhism in East Asian Medical Cultures. 3 points.**

This seminar introduces students to the intersections between Buddhism and medicine in East Asia in the premodern period. The course begins with Buddhist ideas and practices concerning health and disease in ancient India over two millennia ago, and follows the eastward transmission of these concerns and activities into China, Korea, and Japan until roughly the 16<sup>th</sup> century. In addition to secondary studies representing the latest research in this burgeoning field, this course gives special attention to critical readings of shorter selections of primary sources translated into English, including sutras, monastic regulations, recipe collections, liturgical documents, and longevity manuals. Reading these selections through multiple methodological frameworks—social history, history of the body, and material culture, students will gain an appreciation of the rich diversity that characterized Buddhist healthcare practices before the introduction of Western medicine. A fundamental premise of this course is that different currents of Buddhism constituted medical cultures in their own right, a perspective that will help us to complicate conventional notions of both “religion” and “medicine.” We will aim to achieve a nuanced understanding of the ways that healing concerns shaped how monks and nuns related to actors of other therapeutic communities, and therefore emphasis is placed on the social and cultural contexts in which Buddhist medical practices were embedded. Students will thereby acquire a basic grounding in East Asian Buddhism to complement our particular concern with the dynamics of medical history. Previous coursework in Buddhism or East Asian religion is thus recommended but not required.

**RELI UN3519 Embodiment: (Re)Defining the Human. 4.00 points.**

Please note this course is for a GSAS Teaching Scholar. With the rise of climate change, technological advances, and an abundance of everyday existential crises, you might be wondering what it means to be human in 2023. In this course, we begin with the claim that in order to understand “human being” in a time of critical discourse regarding the Anthropocene, we must explore embodiment. Starting with Cartesian Dualism and its legacy, we will progress to contemporary critiques and move into speculative understandings of embodiment and its role in human being in religious studies, philosophy, literature, and anthropology. We will think about how we define what it means to be human, who exactly this “we” is who gets to do the defining, and what happens to us and our worlds when we forget about or attempt to overcome embodiment. This course has several interactive components and utilizes media such as podcasts, films, comics,

and practical engagement in addition to a wide variety of academic reading assignments

**RELI UN3521 Muslim Masculinities. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This interdisciplinary course explores a variety of Muslim modes of masculinity as they have developed over time and as they have varied across different regions of the Islamic World. Students examine and problematize the social and cultural construction of masculinity in various parts of the Islamic world, including in the Middle East, South Asia, Sub-Saharan Africa, and in the Muslim diasporas of Europe and the Americas. In trying to understand the complex ways in which men and manhood are made in Islamic societies we will center our attention on the perceptions of bodily and social differences in Muslims' larger articulations of gender and sexuality. A particular focus will be on the relationship between masculinity and violence against women and non-Muslims.

**RELI UN3522 MUSLIM MASCULINITIES-DISC. 0 points.**

Discussion section for RELI UN3521 - MUSLIM MASCULINITIES

**RELI UN3575 EVANGELICALISM. 3.00 points.**

Crossing denominations and encompassing a range of theological commitments, evangelical Christianity can be described as a theological disposition, a mode of hermeneutical practice, a theological-aesthetic sensibility, a mass spiritual movement, a practice of cultivating sacred affect, an errand to the world, and a genre of revivalism. This multidisciplinary seminar will emphasize the role of popular media in constituting an evangelical public, the gendered nature of evangelical subjectivity, the role of sex and sexuality in evangelical self-definition, and the ways that evangelical theological categories have shaped what we think of as "the secular" in the United States.

**RELI UN3606 Religion and Media in America. 3 points.**

This course examines the role of media in shaping religious identities, beliefs, practices, and institutions using case studies from American history and contemporary American culture. For the purpose of this course, the term media will be interpreted broadly to mean any technique or technology designed to communicate information such as verbal discourses, written texts, visual representations, ritual gestures, sacred objects, and telecommunication technologies. In foregrounding media, we will examine how religious beliefs and practices have been remembered, disseminated, translated, and contested in the American context. Just as important, we will examine how religious groups have negotiated their American identity through media practices and their narrative content.

As we will see, acts of transmission such as writing, mapping, broadcasting, and televising play essential parts in drawing and erasing communal boundaries from both within and without. With this in mind, we will not be attempting to identify what

religion is, so much as the ways in which historical actors understood themselves to be religious. We will find that what counts as religion varies, sometimes dramatically, across times, spaces, and cultures; "America" is similarly unstable and contested. Our job, then, will be to understand the role of media and mediation in constituting their contours.

**RELI UN3612 The Religious History of Hip Hop. 3 points.**

This is an undergraduate lecture course introducing students to the study of religion through an engagement with the history of hip hop music. More specifically, this course is organized chronologically to narrate a history of religion in the United States (from 1970 to the present day) by mapping the ways that a variety of religious ideas and practices have animated rap music's evolution and expansion during this time period. While there are no required prerequisites for the course, prior coursework in religious studies, African American studies, and/or popular music is helpful.

**RELI UN3625 Hippie Physics, Counterculture, Cyberculture. 3.00 points.**

The world inside your smartphone may not be all that it seems. Everything from your e-banking app to your TikTok algorithm can be traced back to the Woodstock-going, acid-taking, love (not war)-making attitude that permeated the youth (in spite of the generations before) in counterculture America. Today's technosphere grew out of the convergence of the post-World War II and Cold War military-industrial complex and the 1960s counterculture. Resistance to the war in Viet Nam, the Civil Rights movement, and the spread of Buddhist thought created social unrest and political disorder. (Almost) simultaneously, a counter counterculture emerged – conservative Christians joined forces with right wing and libertarian politicians to resist sex, drugs, and rock-and-roll, and promote a religiously, politically, and racially "purified" America. Sound familiar? In the midst of this turmoil, groups of physicists who had dropped out (but not necessarily tuned in) gathered in San Francisco and Palo Alto garages to create a technological revolution that continues to transform the world. This course will explore this seminal period through a consideration of music, films, and books of this era, as well as the technological and philosophical implications that quantum physics has on our society and culture today

**RELI UN3630 Religion and Black Popular Cultures. 3 points.**

As an exploration of the relationship between religion, race, and popular culture, the course will begin with theoretical readings that expose students to a variety of definitions of and approaches to each of these categories. After tackling these theoretical concerns, the remainder of the course will entail a cross genre and thematic engagement with the terrain of black popular culture(s) in which students will be challenged to apply new theoretical resources in order to interpret a wide range of "religious" phenomena.

**RELI UN3671 Religion and Human Rights. 4.00 points.**

What is the relationship between religion and human rights? How have different religious traditions conceived of “the human” as a being worthy of inherent dignity and respect, particularly in moments of political, military, economic, and ecological crisis? How and why have modern regimes of human rights privileged some of these ideas and marginalized others? What can these complicated relationships between religion and human rights explain some of the key crises in human rights law and politics today, and what avenues can be charted for moving forward? In this class, we will attempt to answer these questions by first developing a theoretical understanding of some of the key debates about the origins, trajectories, and legacies of modern human rights’ religious entanglements. We will then move on to examine various examples of ideas about and institutions for protecting “humanity” from different regions and histories. Specifically, we will examine how different societies, organizations, and religious traditions have addressed questions of war and violence; freedom of belief and expression; gender and sexual orientation; economic inequality; ecology; and the appropriate ways to punish and remember wrongdoing. In doing so, we will develop a repertoire of theoretical and empirical tools that can help us address both specific crises of human rights in various contexts, as well as the general crisis of faith and observance of human rights as a universal norm and aspiration for peoples everywhere

**RELI UN3755 AFRICAN-AMERICAN RELIGION. 3.00 points.****RELI UN3881 Indigenous Peoples in International Law I. 4.00 points.**

How did European-Christians justify the colonization of the Americas? Did these justifications vary between different European empires, and between the Protestant and Catholic faiths, and if so, how? Do these justifications remain in effect in modern jurisprudence and ministries? This class explores these questions by introducing students to the Doctrine of Discovery. The Doctrine of Discovery is the defining legal rationale for European Colonization in the Western Hemisphere. The Doctrine has its origins in a body of ecclesiastic, legal, and philosophical texts dating to the late-fifteenth century, and was summarized by Chief Justice John Marshall of the United States Supreme Court, in the final, unanimous decision the judiciary issued on the 1823 case *Johnson v. M’Intosh*. Students will be introduced to the major, primary texts that make up the Doctrine, as well as contemporary critical studies of these texts and the Doctrine in general

**RELI UN3901 GUIDED READING AND RESEARCH.**

1.00-4.00 points.

Prerequisites: the instructors permission

**RELI GU4001 Curating Islam in NYC. 4.00 points.**

This course focuses on the ways in which museums conceptualize, contextualize, curate and display Islamic art. In the process, it interrogates the degree to which the orientalist past and the secular present shapes our understanding of the Muslim world. Students will not just engage with material objects from Muslim societies but also consider the choices museums make about their display and presentation. These choices, in turn, speak to the role of museums in defining a specific understanding of the “sacred.” Finally, students will learn to thoughtfully and critically pose questions about the roles that museums as public institutions play in sharpening public and private understandings of Islam. The course begins with a general discussion of material objects in the study of religion. This is followed by a broad survey of Islamic Art which both describes and critiques the category as it has been framed in the Academy. Students then visit a number of museums to learn about the style and content of their Islamic collections. The course concludes by engaging a different kind of curation, namely oral histories in the Brooklyn Museum

**RELI GU4002 CURATING ISLAM IN NEW YORK CITY. 4.00 points.**

This course focuses on the ways in which museums conceptualize, contextualize, curate and display Islamic art. In the process, it interrogates the degree to which the orientalist past and the secular present shapes our understanding of the Muslim world. Students will not just engage with material objects from Muslim societies but also consider the choices museums make about their display and presentation. These choices, in turn, speak to the role of museums in defining a specific understanding of the “sacred.” Finally, students will learn to thoughtfully and critically pose questions about the

roles that museums as public institutions play in sharpening public and private understandings of Islam. The course begins with a general discussion of material objects in the study of religion. This is followed by a broad survey of Islamic Art which both describes and critiques the category as it has been framed in the Academy. Students then visit a number of museums to learn about the style and content of their Islamic collections. The course concludes by engaging a different kind of curation, namely oral histories in the Brooklyn Museum

**RELI GU4105 RELIGION LAB. 4.00 points.**

In their research, scholars of religion employ a variety of methods to analyze texts ranging from historical documents to objects of visual culture. This course acquaints students with both the methods and the materials utilized in the field of religious studies. Through guided exercises, they acquire research skills for utilizing sources and become familiarized with dominant modes of scholarly discourse. The class is organized around a series of research scavenger hunts that are due at the start of each week's class and assigned during the discussion section (to be scheduled on the first day of class). Additional class meeting on Thursdays

Fall 2024: RELI GU4105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4105	001/00355	W 12:10pm - 2:00pm 111 Milstein Center	Meghan Hartman	4.00	4/15

**RELI GU4120 GENDER IN ANC CHRISTIANITY. 4.00 points.**

This seminar considers the difference gender makes in interpreting ancient Christian texts, ideas, and practices. Topics will include gender hierarchy and homoeroticism, prophecy and authority, outsiders' views of Christianity, bodily pieties such as martyrdom and asceticism, and gender politics in the establishment of church offices. Emphasis will be placed on close readings of primary sources and selected scholarly framings of these sources

**RELI GU4160 GNOSIS. 4.00 points.**

**RELI GU4172 Confession. 4.00 points.**

This seminar explores the idea and practice of "confession" in a range of manifestations (in legal and judicial contexts, in religious practice, in memoir/autobiography, in political and personal reckoning with the past, in art and popular culture, among others) and from a variety of disciplinary perspectives (media studies, history, theology, literature, psychoanalysis, art history, and journalism). As the sacramental practice of confession recedes from significance within traditional religious contexts, the social practice of confession expands into new arenas. This seminar is devoted to theorizing this shifting terrain through the critical examination of a variety of primary sources and scholarly interventions

**RELI GU4175 Queer Theory Meets Religion. 4.00 points.**

Within religious traditions there are lively discourses of queering these traditions and while religious studies had to catch up, by now there are sizable bodies of queer studies in

religion. But theological and religious studies queer discourses rarely reach queer theory in general. Moreover, when queerness and religion are studied together, we usually take queerness primarily as a quality of lives, bodies, and desires and then study how religious traditions and discourses succeed or fail in targeting or supporting queer lives or studies articulate how religious traditions can be recovered through queer readings. We will inquire into the shapes and logics animating queer theory's religion trouble and wonder about what ways of thinking we preempt when queerness and religion are confined to pertaining to lived bodies and traditions respectively. What happens when we think with "queerness" and "religion" as dimensions irreducible to bodies or traditions? How is it that in the interdisciplinarity of queer theory, religion and religious studies remain largely unthought? To think through some of these questions, we will ask how religion and queerness might be understood as methodologies for examining how truth and affect converge and sediment in the sensibilities and infrastructures orienting how we experience the world around us. We will turn to both religious studies and queer theory to examine two interrelated sets of questions: 1) How are meaning-making and investments with value bound up with gender, race, sexual desires, ability, coloniality, class, age, climate and environmental factors? And 2) what potentials for knowing, acting, living differently are afforded by differing practices, rituals, architectures, and aesthetics of transmitting, refashioning, and institutionalizing knowledge systems?

**RELI GU4202 TIME,MODERNITY,DEATH. 4.00 points.**

The notion of modernity in the West implies a distinctive interpretation of temporality and subjectivity, which grows out of theological and philosophical traditions. Lutheran Protestantism, as developed by Hegel, Kierkegaard, and Heidegger, created the conditions for both the construction and the deconstruction of modernism and its extension in postmodernism. The course will examine these two trajectories by considering their contrasting interpretations of the relationship of human selfhood to time and death. On the one hand, the death of God leads to a radical immanence in which human subjectivity either is absolutized as the will to power or mastery that dominates or negates all difference and otherness, or is repressed by universal structures and infrastructures for which individual subjects are unknowing and unwitting vehicles. On the other hand, human subjectivity appears to be finite because its irreducible singularity is always given by an other that can be neither known nor controlled.

The course will conclude by considering the alternative psychological, political, and ethical implications of these two contrasting positions.

**RELI GU4204 Religions of the Iranian World. 4 points.**

This course is a seminar open to undergraduate and graduate students who wish to gain an understanding of the diverse religious traditions of the Iranian world from ancient to contemporary times. This subject has often been organized around the assumption that a continuous tradition of an Iranian national religious heritage can be identified and traced through

from ancient, Zoroastrian to medieval Islamic traditions, and then ultimately to contemporary Shi'ite and minority Zoroastrian and Baha'i traditions. This perspective has presumed that such a legacy has been constitutive and determinative for Iranians' sense of national identity and for their core religious world-view. From the outset, this course aims to problematize and ultimately overturn this approach, first of all, by historicizing the very idea of Iran and by challenging the assumption that an Iranian identity was even recognizable before the twentieth century, much less constitutive of some unbroken traditions of religious thought or practice. While there may be some persistent threads in language, mythic heritage, and religiosity that one can observe throughout the Iranian plateau and Central Asia across the centuries, it is more useful to examine these as part of a larger matrix of exchanges with adjacent cultural and religious systems. Students will examine a series of interrelated themes that are key to the studies of religion in the Iranian world. While the course does cover material that progresses roughly chronologically from the first millennium BCE to contemporary times, it is not a systematic historical survey. Each week will focus on a cluster of scholarly works and related primary sources on focused topics related to the successive religious traditions in Iran, the Mazdaen dualist traditions, Islam, and Baha'ism.

**RELI GU4205 Love, Translated: Hindu Bhakti. 4 points.**

Hindu poetry of radical religious participation-bhakti-in translation, both Sanskrit (the Bhagavad Gita) and vernacular. How does such poetry/song translate across linguistic divisions within India and into English? Knowledge of Indian languages is welcome but not required. Multiple translations of a single text or poet bring to light the choices translators have made.

**RELI GU4206 HISTORY, TIME, AND TRADITION. 4 points.**

In *Refashioning Futures*, David Scott asks if the accurate reconstruction of the past of an identity is the crucial point of a theoretical intervention. He ponders, instead, if such a historicist analysis should be followed by an emphatic "But so what?" The importance of asking "so what?" is that it allows us to begin to refuse, Scott writes, "history its subjectivity, its constancy, its eternity" and "interrupt its seemingly irrepressible succession, causality, its sovereign claim to determinacy" (105) The question "so what?" requires, in other words, we answer for history's prominence and providence as well as consider other possible formations of community, temporality, and inheritance not anchored by the weight of 'history'.

This seminar examines the overwhelming hold of "history" in the present by considering Scott's poignant "But so what?" We will begin by examining the problem-space of 'history' itself and how 'history' emerged as the foundation to understanding and ordering religious life globally. We will explore the wide-ranging effects of Enlightenment rationality and Orientalist knowledge production as well as consider the imbrication of history with theology and the secular. This section of the course

will help develop a shared set of concepts and problematics, which we will continuously encircle throughout. We will then examine how scholars have troubled this historical conscription, reorienting our understandings of temporality, tradition, and the past. The last half of the course, therefore, considers a range of different methods and theories that undo the importance of 'history' while remaining attuned to questions of the past, time, and inheritance

**RELI GU4207 Religion and the Afro-Native Experience. 4.00 points.**

African Americans and Native Americans have a shared history of racial oppression in America. However, the prevailing lenses through which scholars understand settler colonialism, religion, and black and indigenous histories focus overwhelmingly on the dynamics between Europeans and these respective groups. How might our understanding of these subjects change when viewed from a different point of departure, if we center the history of entanglements between black and native lives? How does religion structure the overlapping experiences of Afro-Native peoples in North America? From political movements in Minneapolis, Oakland, and New York City to enslavement from the Cotton Belt to the Rio Grande, this class will explore how Africans, Native Americans, and their descendants adapted to shifting contexts of race and religion in America. The course will proceed thematically by examining experiences of war, dislocation, survival, and diaspora

Spring 2025: RELI GU4207

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4207	001/00515	W 2:10pm - 4:00pm 223 Milbank Hall	Tiffany Hale	4.00	15/15

**RELI GU4209 Religion, Politics and Culture in Contemporary Black America. 4.00 points.**

This course examines the period commonly referred to as the "post-Civil Rights era"—that is, from the 1960s up through the current moment: a span of time also theorized through the related rhetorics of "postmodern," "postcolonial" and "post-Soul. We will explore the inter-workings of religion, politics and culture (as they converge and diverge) in contemporary black life. Attention will be given to formal religious traditions (i.e. Christianity, Islam, African-derived traditions), but also to a range of ideas about religion and/or spirituality as they are revealed in the artistic expression, politics and activism, and popular culture and media. Taking analytical cues from critical race theory, questions of agency, power and difference will be fore-grounded, as witnessed in how religious discourses and practices negotiate such categories as race, class, gender and sexuality. Ultimately, bringing together developments within the inter-disciplinary fields of black studies and the study of religion, ultimately this class will examine the ways in which various ideas about "religion" shape and circulate across various forms of black political organizing and cultural expression in our current moment. This seminar is open undergraduates and graduate students. While there are no require pre-requisites, students are expected have some prior

background in religious studies and/or African American Studies

**RELI GU4212 Modern Buddhism. 4 points.**

What most Americans and Europeans call 'Buddhism' today is in fact a hybrid tradition dating back to the 19th century. It owes as much to European philosophy and esoteric thought as to Asian traditions themselves and appeared in the context of decolonization. This course will survey the history of this recent tradition, identifying cultural and political trends that contributed to its creation in various geographical areas. Readings include several primary texts by important proponents of Modern Buddhism. The texts should also be read in comparison with the appropriate scholarly works on the Asian traditions they supposedly draw on. One course on Buddhism or East Asian Religions is recommended, but not required, as background.

**RELI GU4213 Islam and the Secular: Rethinking Concepts of Religion in North-Western Africa and the Middle East. 4.00 points.**

The class offers a critical discussion of the conceptual apparatus of the anthropology of Islam and secularism and of the ways in which it shapes recent interventions in history and theory but also in Islamic studies with a particular focus on North-Western Africa and the Middle East. The questions that will be examined during the class read as follows: 1. What is Islam: a religion or a cultural formation, a discursive tradition or a way of life? How is one to construct a definition of Islam beyond orientalist legacies? Can one define Islam anthropologically outside the tradition itself? 2. How did French and British Empires transform or destroyed Islamic institutions while governing Muslims in the Middle East and North-West Africa? Are these colonial technologies Christian or secular and is there a significant difference between Christian slavery and secular colonialism? To what extent is secularism reducible to an imperial ideology or to Christianity itself? 3. How did Muslims respond to the challenge of modernity and to European imperial hegemony? How can one think philosophically within the Islamic tradition after the hegemony of Europe and colonialism?

**RELI GU4214 African and North African Philosophy: An Introduction. 3.00 points.**

What is African philosophy? Is a theory African simply because it is rooted in the political present of the continent? Is it African because it corresponds to an African cultural singularity or simply because his authors and inventors come from or live in Africa? This class will examine a) how religious traditions shape African theory b) how the influence of colonial anthropology on concepts of African culture and tradition can be challenged c) how African theory relates to African politics of decolonization, in North and "sub-Saharan" Africa. The major dialectical problem we will examine during the class is the ongoing contradiction between claims of authenticity and demands of liberation, traditionalism and modernity, religion and secularism, culturalism and Marxism

**RELI GU4215 Hinduism Here. 4 points.**

Historical, theological, social and ritual dimensions of "lived Hinduism" in the greater New York area. Sites selected for in-depth study include worshipping communities, retreat centers, and national organizations with significant local influence. Significant fieldwork component

**RELI GU4216 Religion and Capitalism: Faith and the American Market. 4.00 points.**

Is the market a religious system? Can we consider "capitalism" to be a key arena in which the relationship between the religious and the secular is both negotiated and performed? In this course, students will explore the complicated relationship between faith and the market, the religious and the secular, and the evolution of vice and virtue as they relate to economic thriving in the United States. While no hard and fast rules for thinking about the relationship between right conduct and material interests cut across all religious and philosophical traditions, human agents invest real faith into currency, into markets, and into the reigning economic order to bring about increased opportunities, wealth, and freedom to people across the globe. Throughout this semester, we will chart both the long shadows and the future trajectories of these beliefs from our American perspective

**Spring 2025: RELI GU4216**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4216	001/13966	M 10:10am - 12:00pm 201 80 Claremont	Andrew Jungclaus	4.00	12/15

**RELI GU4217 American Religions in extremis. 4.00 points.**

This seminar focuses on historical, sociological, and first-hand accounts of a diverse set of American non-conformist religious and spiritual groups (including MOVE, the Branch Davidians at Waco, Father Divine's International Peace Mission, the Oneida Perfectionists, and Occupy and others). Diverse in their historical origins, their activities, and their ends, each of the groups sought or seeks to offer radically new ways of living, subverting American gender, sexuality, racial, or economic norms. The title of this seminar highlights the ways that these groups explain their reasons for existing (to themselves or others) not as a choice but as a response to a system or society out of whack, at odds with the plans of the divine, or at odds with nature and survival. Likewise, it considers the numerous ways that these same groups have often found themselves the targets of state surveillance and violence

**Fall 2024: RELI GU4217**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4217	001/10525	W 4:10pm - 6:00pm 201 80 Claremont	Courtney Bender	4.00	16/20

**RELI GU4218 Heidegger and the Jews. 4 points.**

The conundrum of Martin Heidegger and the Jews continues. The recent publications of Heidegger's *Black-Notebooks* reignited the debate over his ties to the National Socialist party and his personal anti-Semitism. These notebooks reveal that

Heidegger establishes a *philosophical* case for his prejudices against Jews, one which arguably cuts to the very heart of his thinking. And yet, many of his closest and most brilliant students were Jewish, and it is becoming increasingly clear that his philosophy has left an indelible mark on twentieth century Jewish thought. This course is divided into two units: In the first unit we will become familiar with some central themes of Heidegger's thought and explore the question of the philosophical grounding of his political failing. In the second unit we will examine a variety of responses to Heidegger by Jewish thinkers who, in different ways and for different purposes, both profited greatly from his philosophical innovations and levelled profound criticism of his thought and actions. The animating question the course will attempt to answer is: Is it possible, as one student of Heidegger's had suggested, to think with and against Heidegger?

**RELI GU4219 Colonialism and religion in South Asia. 4 points.**

This course examines the conceptual trouble wrought by colonial rule in relation to boundaries, both of tradition and identity. We will begin by examining the category of 'religion' and how it emerged as an object of inquiry to understand and order life in the South Asian subcontinent. By exploring the wide-ranging effects of Orientalist knowledge production premised on secular historicity, this section of the course will help develop a shared set of concepts, which we will continuously encircle throughout. We will then question the role of this knowledge/power nexus in creating and reifying both notions of 'fluid' and 'communal' boundaries by studying the internal coherence and colonial inflection of several religious traditions in the subcontinent (Hinduism, Sikhism, Islam, and Buddhism). In concluding, we will consider how colonialism shifted the parameters of selfhood, creating new grounds, as well as reifying old ones, from which subjects came to contest the parameters of a given tradition.

**RELI GU4220 Political Theology. 4 points.**

This reading-intensive course will engage the notion of "political theology," a phrase that emerges within the Western tradition (Varro, Augustine) and has become instrumental in thinking and institutionalizing the distinction between religion and politics over the course of the twentieth century. We will take as our point of departure the key texts that have revived this notion (Schmitt, Kantorowicz), and engage their interpretation of the Bible and of Augustine and medieval followers. We will then examine the role of Spinoza and Moses Mendelsohn, the extension of the notion of religion to "the East" (Said, Grosrichard, Asad), and conclude with some of the current debates over secularization in the colonizing and colonized world.

The main part of the course will be dedicated to the question of religion as it informs our thinking of disciplinary divisions. Is religion a sphere than can be isolated? How did it become so? What are the effects of this isolation?

**RELI GU4222 Heidegger and Derrida. 4 points.**

This seminar will explore the relationship between Heidegger and Derrida through a close reading of texts in which they consider common questions and issues. Works from both early and late Heidegger will be considered. An examination of Derrida's writings on Heidegger reveals how he simultaneously appropriates and criticizes Heidegger in developing his critique of the western philosophical and theological tradition. Special attention will be paid to their contrasting interpretations of time and their alternative accounts of the work of art. This course is a sequel to Hegel and Kierkegaard, though the previous course is not a prerequisite for this seminar.

**RELI GU4223 Dreams. 4.00 points.**

This seminar for advanced undergraduates and graduate students investigates the significance of dreams in multiple cultural and historical contexts with a focus on Tibetan Buddhism. Dreams and dreaming are vital aspects of Tibetan Buddhist meditative practice, visionary experience, poetry, narratives, as well as visual arts. Students in the seminar will explore a range of materials that 1) guide Buddhist practitioners to cultivate certain types of dreams, and 2) narrate dream experiences that the dreamer has deemed worth recording, and 3) situate Tibetan Buddhist examples in broader contexts of religious and psychological perspectives, with an emphasis on Freud and Jung's treatment of dreams. According to Buddhist sources, a dream might be significant because the dreamer understands it to be revelatory, foretelling the future, or it might be recorded simply because the dreamer finds the dream in some way compelling, troubling, or funny. In life writing, dreams often highlight crucial moments in the writer's life experience. Just as psychoanalysts make use of dreams to engage with analysands, Tibetan medical texts instruct doctors to pay close attention to patients' dreams in the process of diagnosis. Tibetan ritual texts guide meditators in techniques for lucid dreaming. Visionary dreams are recorded in great aesthetic detail. Narratives of dreams and dreamscapes are an important part of biographies and life writing in general. We will also consider European and American treatments of dreams and lucid dreaming, including psychoanalytic, philosophical approaches to dreaming. A significant element of the course is a daily dream journal

**Fall 2024: RELI GU4223**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI GU4224 Dialectics: Theology and Philosophy between Europe and Africa. 4 points.**

What is dialectical reason? Is it still a mode of theological reasoning, as many critiques have argued, or a revolutionary form of secular critique? To what degree did it shape the language of revolutionary Marxism both in Europe and Africa, as the work of Fanon notably testifies? How does it still define the horizon of contemporary philosophy, French theory and postcolonial thinking? The class will address this question.

Beginning with Hegel, it will trace the becoming of his legacy in Marx, Fanon, Sartre and contemporary issues in French theory and African philosophy.

**RELI GU4227 Empire and Decolonization in North Africa: Race, Religion, Climate. 4.00 points.**

The course examines crucial debates in colonial and decolonial studies from a North African point of view, with a particular focus on Algeria. What does it mean to rethink conceptually and globally about empire and decoloniality from the point of view of North Africa ; a region which is often marginalized in both postcolonial and decolonial theory? The questions that will guide us throughout the class read as follows: 1) How is one to rethink the Maghreb without either reducing it to the history of French colonialism or downplaying the impact of colonialism on North Africa? How can binaries of direct rule and indirect rule, settler colonialism in Algeria and protectorates in Morocco and Tunisia be challenged in order to understand the postcolonial Maghreb as a unit? 2) Can one think about the historicity of the Maghreb without taking the destruction of Al-Andalus and its influence on the birth of race as a point of departure? Does the Christian racialization of Jews and Muslims through the notion of a purity of blood permeate the French colonization of the Maghreb? Is French colonialism in North Africa secular or Christian? How does secularity emerge in the midst of this history by reconfiguring the legacy of the Crusades? 3) How are Muslims and particularly Sufi orders involved in the practices of resistance against French colonial violence? How are traditional Islamic languages and practices of sainthood or the longing of the Mahdi redeployed in this situation? How do these practices and languages of resistance transform themselves with the construction of anticolonial nationalism? How can one rethink decolonization by analyzing how Algiers became the capital of Third World resistance at a global scale? 4) How do contemporary debates about Islam, tradition and modernity deploy themselves in the Maghreb and particularly in Morocco? How do these debates shape our understanding of decolonization?

**RELI GU4228 South Asia and the Secular. 4 points.**

This seminar explores different contestations and inflections of the secular in South Asia. We will begin by tracing a genealogy of the secular, which gave rise to a particular discursive grammar. Grounding ourselves in this formative space of the secular, we will study the constitutive nature of imperialism within the secular by examining the disciplining and conscripting role of Orientalism and the colonial state. Though noting these changes produced by colonial rule, this course also explores the arguments scholars of South Asia have made distinguishing between “secularisms” and the production of a tolerant and cosmopolitan South Asian orientation. In conjunction and against these possibilities, rather than consider the religious retrograde or communal, we will consider the continual striving toward political autonomy through disputation in the parameters of a given tradition—which resist incorporation into a broader pluralist or syncretic Indic model.

**RELI GU4255 Hegel, Information, “Artificial” Intelligence. 4.00 points.**

The development of high-speed computers, artificial neural networks, miniaturized sensors, mobile phones, and Big Data has created the conditions for the transformation of artificial intelligence. These changes are not only transforming the world but are also recasting long-standing distinctions like nature/culture, natural/artificial, body/mind, complexity/simplicity, and organism/machine that have shaped human thought and life for centuries. This refiguring of opposites as irreducibly interrelated was anticipated by Kant’s notion of self-organization and developed systematically by Hegel. This course will approach current forms of artificial intelligence through Kant’s interpretation of self-organization and Hegel’s dialectical logic and will reread Hegel’s system through “natural” and “artificial” neural networks, complex systems, and information theory. If nature and culture are inextricably interrelated, then is “artificial” intelligence really artificial, and is “nature” every merely natural? What are the implications of these developments for the understanding of human “nature” that has shaped the Anthropocene since the time of Galileo, Newton, and Descartes?

**RELI GU4260 Time. 4.00 points.**

Concepts and sensibilities surrounding time and temporality are major aspects of people’s sense of reality and “how the world works.” Questions that we will explore in this course include such as the following: How are concepts and senses of time shaped in different contexts? How do they change? What role do ritual practices as well as distinctions such as between sacred and profane times play in shaping senses of time? In what ways are times and temporalities experienceable and in what ways do they elude perception? How are concepts of time and space connected? How is time political and how do its political valences become tangible or remain elusive? In our inquiries we will pay attention to where practices and concepts that seem obviously associated with religion make their appearance and what assumptions make that classification seem obvious. We will also examine how conceptual tools of religious studies might aid us in understanding how conceptions and sensibilities regarding time and temporality emerge, are transmitted, and transformed in and through communities of practice. While this seminar is open to interested students from all disciplines, our work in this course specifically falls into the “zone of inquiry” of “time and history” of the Religion Department’s graduate programs. “Zones of inquiry” seek to introduce students to a particular cluster of key concepts and various theoretical elaborations of those concepts, in order to aid students in honing their ability to reflect critically on and develop further the central concepts that they derive from and bring to the specific traditions and phenomena that they study in their own research. A main goal of this course will therefore be to deepen our conceptual and analytical acumen and expand our theoretical resources at the intersection of religious studies and theories of time and temporality

**RELI GU4304 Krishna. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Study of a single deity in the Hindu pantheon as illuminated in art, music, dance, drama, theological treatises, patterns of ritual, and texts both classic and modern. Special attention to Krishna's consort Radha, to Krishna's reception in the West, and to his portrayal on Indian television.

**RELI GU4305 SECULAR # SPIRITUAL AMERICA. 4.00 points.**

Prerequisites: Majors and concentrators receive first priority. Are Americans becoming more secular or more spiritual (not religious), or both? What are the connections between secularism and what is typically called non-organized religion or the spiritual in the United States? We will address these questions by looking at some of the historical trajectories that shape contemporary debates and designations (differences) between spiritual, secular and religious.

**RELI GU4307 BUDDHISM # DAOISM IN CHINA. 4.00 points.**

Prerequisites: one course on Buddhism or Chinese religious traditions is recommended, but not required, as background. In recent decades, the study of the so-called "Buddho-Daoism" has become a burgeoning field that breaks down the traditional boundary lines drawn between the two Chinese religious traditions. In this course we will read secondary scholarship in English that probes the complex relationships between Buddhism and Daoism in the past two millennia. Students are required not only to be aware of the tensions and complementarity between them, but to be alert to the nature of claims to either religious purity or mixing and the ways those claims were put forward under specific religio-historical circumstances. The course is organized thematically rather than chronologically. We will address topics on terminology, doctrine, cosmology, eschatology, soteriology, exorcism, scriptural productions, ritual performance, miracle tales and visual representations that arose in the interactions of the two religions, with particular attention paid to critiquing terms such as "influence," "encounter," "dialogue," "hybridity," "syncretism," and "repertoire." The course is designed for both advanced undergraduate and graduate students in the fields of East Asian religion, literature, history, art history, sociology and anthropology. One course on Buddhism or Chinese religious traditions is recommended, but not required, as background  
Spring 2025: RELI GU4307

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4307	001/17349	Th 4:10pm - 6:00pm 101 80 Claremont	Zhaohua Yang	4.00	14/22

**RELI GU4308 Jewish Philosophy and Kabbalah. 4 points.**

The purpose of this seminar is to study the interactions between two major intellectual trends in Jewish History, the philosophical and the mystical ones. From the medieval period to the twenty-first century, we will discuss their interactions, polemics and influences. We will compare Philosophy and Kabbalah in light of their understanding of

divine representation and in light of their respective Theology and conception of God.

**RELI GU4311 Fanon: Religion, Race, Philosophy in Africa and beyond. 4 points.**

This class will examine the work of Fanon through its sources, its context and its contemporary interpretations.

**RELI GU4314 Bhakti Poets. 4.00 points.**

Hindu poetry of radical religious participation—bhakti—in translation: poets of different regions, genders, and theological leanings. Knowledge of the original languages is not expected. Music, art, and performance play a role

**RELI GU4315 Sufis and the Qur'an. 4 points.**

This course is a seminar for advanced undergraduates and graduate students who wish to gain an understanding of the complexity and richness of the Sufi exegetical tradition. the Qur'an has been the main source of of inspiration and contemplation for Sufis for centuries....

**RELI GU4317 Islam in Southeast Asia. 4.00 points.**

Despite the fact that a fifth of the world's Muslim population lives in Southeast Asia, the region is often considered peripheral to or insignificant for the study of Islam more broadly. In this course, we will not only learn about Islamic thought and practice in the history and present of this important part of the Islamic world; we will also reflect on issues that, while grounded in the Southeast Asian context, illustrate a variety of key Islamic Studies issues. The first half of the course will provide a historical overview over the development of Islam in Southeast Asia while the second half will focus on contemporary issues. The Malay-Indonesian world, home to 90% of Southeast Asia's Muslims, will be our primary focus. Our approach will be interdisciplinary, incorporating anthropological, historical, and media studies approaches. Students in this class are expected to have some prior knowledge of Islam

**RELI GU4318 INTERPRETING BUDDHIST YOGA. 4.00 points.**

Students and scholars approaching a vast amount of primary and secondary literature, as well as accounts and anthropological and sociological studies of Buddhism as a lived religion, are faced with an array of stories, data, theories and practices, many of which appear to be inconsistent with others. We try to make sense of these by interpreting them. The art or science of interpretation – "hermeneutics" after Hermes – has a long history in Asia and in the West. Buddhism itself has a tradition of hermeneutics, as does each of the Western religious traditions and Western philosophy and law, starting with Plato and Aristotle, becoming "romantic" with Schleiermacher, and "modern" with Heidegger, Gadamer, and Ricoeur. Today's Western hermeneutics has become largely de-regionalized from specific subject areas, and has been extended to the interpretation of all human experience. After a grounding in traditional Buddhist and Western hermeneutic principles, we will focus on a number of aspects of Buddhism, including the central question of whether there is a "self" or not, and on

esoteric Buddhist yoga, Tantra, central to several of the better-known forms of Buddhism today, including Tibetan Buddhism. Here we will witness the confluence and, sometimes, collision of traditional Buddhist and Tantric hermeneutics focusing in large part on “spiritual” concerns, and the Western tradition, with its emphasis on economics, power, and gender. In thinking about which interpretations are “right” -- indeed, whether any interpretation can be “right,” and, if so, “how much?” -- we will consider the cultures in which these scriptures and practices originated, as well as ourselves and our own contemporary perspectives, insights, presuppositions and prejudices. A primary concern of hermeneutics is the interpretation of so-called “objective” physical and subjective mental realities. In thinking about the hermeneutics of outer and inner time and space, towards the end of the semester we will consider whether the “objective” and the “subjective” intersect, how much, and look at some descriptions of quantum mechanics and the role of observation of physical reality there, and analogize and contrast those to and with some Buddhist systems of philosophy and practice

**Fall 2024: RELI GU4318**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**RELI GU4322 EXPLORING THE SHARIA: ISLAMIC LAW. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The platform of every modern “Islamist” political party calls for the implementation of “the shari’a.” This term is invariably (and incorrectly) interpreted as an unchanging legal code dating back to 7th century Arabia. In reality, Islamic law is an organic and constantly evolving human project aimed at ascertaining God’s will in a given historical and cultural context. This course offers a detailed and nuanced look at the Islamic legal methodology and its evolution over the last 1400 years. The first part of the semester is dedicated to “classical” Islamic jurisprudence, concentrating on the manner in which jurists used the Qur’an, the Sunna (the model of the Prophet), and rationality to articulate a coherent legal system. The second part of the course focuses on those areas of the law that engender passionate debate and controversy in the contemporary world. Specifically, we examine the discourse surrounding Islamic family (medical ethics, marriage, divorce, women’s rights) and criminal (capital punishment, apostasy, suicide/martyrdom) law. The course ends by discussing the legal implications of Muslims living as minorities in non-Islamic countries and the effects of modernity on the foundations of Islamic jurisprudence. This class is designed for students interested in a close examination of the Islamic legal system; it is not a broad introduction to the Islamic religion. The format of the class will vary from topic to topic but students should anticipate \*extensive\* participation through in-class debates

**RELI GU4324 American Scriptures. 4.00 points.**

What is scripture? How is cannon created? How do particular communities find meaning in varying works of literature? In this seminar, we will explore a number of influential American texts not simply in order to understand how they address questions of the holy and divine presence but also for how they provide creative ways of considering questions that have dogged Americans for centuries. In so doing, we will place literary works in conversation with contemporary theological trends and present-day scholarship on these connections. The course’s main thematic focus will be on government and collective rights; racial difference and questions of theodicy; children’s literature and disciplinary formation; the American libertarian streak; how best to care for the self; and humanity’s connection to nature. Students will examine a variety of texts – from the Declaration of Independence to Carl Sagan and Moby Dick – to better understand what matters to Americans and what do the literary artifacts we leave behind say about our current civilizational moment. This course will have succeeded in its goals if by its end your operative definition of religion has been significantly jumbled, challenged, and complicated. While many of our historical actors will use the term in different ways, this course is invested not in identifying what is or is not properly “religious,” but rather in examining how ideas operate in the world for the people to whom they’re important. To a certain extent, we must take seriously the claims made by religious actors of God acting in their lives. But in terms of analysis, religion for us will be a fluid concept, one that evades simple definition, and that is always “real” in terms of its effects on belief, action, and identity

**RELI GU4325 Sufism. 4 points.**

Prerequisites: Permission of instructor.

This is a seminar for advanced undergraduate and graduate students who wish to gain an understanding of the richness of Sufism (Islamic mysticism). We will examine the historical origins, development and institutionalization of Sufism, including long-standing debates over its place within the wider Islamic tradition. By way of a close reading of a wide range of primary and secondary sources, we will examine Sufi attitudes toward the body, Sufi understandings of lineage, power and religious authority, as well as the continued importance of Sufism in the modern world

**RELI GU4326 SUFISM IN SOUTH ASIA. 4.00 points.**

Sufism or tassawuf has misleadingly been described as the mystical side of Islam, implying that it is somehow detached from the material world. Throughout the history of Islam, Sufi ideas, practices, and institutions have borne a complex, intimate, and sometimes fraught relationship with other aspects of Islamic tradition and practice, a relationship that has also been profoundly impacted by Orientalist scholarship in the colonial period and by global reformist currents in the postcolonial period. This seminar for advanced undergraduates and graduate students is an interdisciplinary investigation of how Sufism has been affected by the historical, sociocultural, political, and everyday environments in which it experienced

and practiced, with a particular focus on South Asia. Eclectic in approach, we will begin by considering how Sufism has been construed and even constructed by scholars, considering how modern notions of the self, religion, and the political have shaped scholarly understandings of what Sufism is. Focusing on bodily practices and well known individual Sufis who lived in South Asia during different historical periods, we will use them as a vehicle for understanding Sufi experience within the context of the evolving Sufi orders within specific local spaces. We will consider why Sufism has become such a target of controversy and ambivalence among Muslims in the modern world and trace some of the changing controversies and tensions that Sufis have struggled with over time, focusing on their understandings of self, society and reality

**RELI GU4334 Islam vs. Music: From Qawwali to Hip Hop. 4.00 points.**

This course interrogates seminal issues in the academic study of Islam through its representation in various forms of popular musical expression. The class is structured around key theoretical readings from a range of academic disciplines ranging from art history and anthropology to comparative literature and religion. The course begins with an exploration of the links between religion and popular culture (hooks). This is followed by an exploration of the connection between Muslim Sufi-inflected practices in South Asia and the ubiquity of Qawwali across Pakistan and India. The course then shifts to Orientalism frameworks (Said) through a case study involving the songs in two competing versions of Aladdin. These frameworks are then tied to the racial scaffolding that informed the conversion (to various forms of Islam) of a wave of mid 20th century American Jazz musicians. The second half of the course examines Hip Hop through the lens of race, immigration, and colonialism. Finally, the class examines the spread of Hip Hop to a global audience as a powerful means for expressing the marginalization of immigrant/colonized Muslim communities

**RELI GU4345 World Religions. 4.00 points.**

(1) We begin with a study for the Parliament of the World's Religions (PWR), held at the Columbian Exhibition at Chicago in 1893, because it is so often regarded as one of the great annunciatory moments for the field. A number of the 19th-century European "founding fathers" were invited or present, as was Swami Vivekananda, who has been at least as significant as any of them for the development of the field as a global idea. The PWR's American location broadens Tomoko Masuzawa's magisterial description of the "invention of world religions" by initially shifting attention away from its European base. It also introduces us to the element of display involved in announcing this idea and to one of its most important institutional partners: the University of Chicago. (2) In the second part of the course we investigate the consolidation/invention of the conceptual entities that comprise "world religions," as well as debates about just how many of them they are, and by what principle of accounting: To exemplify the production of "isms" that are said to comprise the world religions, we investigate the conceptual origins of Hinduism, Buddhism, Islam, the Judeo-Christian Tradition, and most recently The Indigenous. (3)

At the end we consider an institution founded around the idea of World Religions—Harvard's Center for the Study of World Religions—and wonder how it compares to what has been done at Columbia and its neighbor institutions in New York: the Interfaith Center of New York, the Jewish Theological Seminary, and Union Theological Seminary. (4) The course includes a workshop (2/21) in which we discuss various materials we might use if we ourselves were asked to teach a "world religions" course. We conclude with a mini-conference (4/24) in which you present your work and respond to that of others. There are two possibilities for the sort of work you might do, as listed below. Whichever you choose, please discuss your intentions with me by Friday, February 23. A two-page proposal and draft bibliography are due by midnight that day. OPTIONS: (a) You can do a research paper on some aspect of the course—possibly extending to areas about which we have not specifically read and talked. (b) Or, if you wish, you can design your own World Religions course, providing a syllabus with all its constituent parts and a 7-8 double-spaced paper explaining why you have structured the course as you have. Be sure to say how you envision the group of students you'll be working with. As part of your preparation, discuss the contents and approach of your course with members—or in some way affiliates (even apostates!)—of at least three of the religious groups or traditions involved

**RELI GU4355 AFR AM PROPHETIC POL TRADITION. 4.00 points.**

Through a wide range of readings and classroom discussions, this course will introduce students to the crucial role that the unique African-American appropriation of the Judeo-Christian prophetic biblical tradition has played -- and continues to play -- in the lives of black people in America

**RELI GU4365 Revolutionary Women and Political Islam. 4 points.**

Muslim female reformers and revolutionaries were at the forefront of many of the 20th and early 21st centuries' historic socio-political and religious movements across the Global South. Members of diverse classes, families, and ethnic communities, many worked within the tenets of Islam in multiple ways to construct religious identity and work towards achieving and demanding civil and political rights. Yet the myriad theoretical and popular discourses underpinning emergent and longstanding women's movements within revolutionary contexts are frequently overlooked. Moreover, representations of Muslim women too often rely on essentialist, ahistorical, static, victim-centered, and Orientalist descriptions and analyses. As a result, shades of difference in interpretation, ideology, practice, and culture are minimized. This course situates Muslim women as complex, multidimensional actors engaged in knowledge production and political and feminist struggles. We will read key texts and analyses from scholars and activists writing on religion, gender, sexuality, family planning, and women's status in the contemporary Global South. The following questions will emerge in our discussions: "When is a hejab just a hejab?," "Do Muslim Women Really Need Saving?," and "What is an

‘Islamic Feminist’ and Should We Care?’” Readings include memoirs, editorials, ethnographies, and political treatises, as well as historical scholarship from North Africa, the Gulf, the Levant, and Southeast Asia.

**RELI GU4376 A Political Introduction to the Christian Scriptures. 4.00 points.**

In this course we will examine the New Testament canon and the twenty-seven texts that comprise it in light of their respective literary genres, their Jewish antecedents and Greco-Roman influences, which will include their historical, social, cultural, political and economic contexts, and the ways these factors impinged upon their various dimensions of meaning. Various modes of biblical interpretation, both ancient and contemporary, will be explored. A major emphasis will be on the ways select texts are utilized, misconstrued and weaponized in the public sphere in this contemporary moment

Fall 2024: RELI GU4376

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4376	001/10526	W 12:10pm - 2:00pm 101 80 Claremont	Obery Hendricks	4.00	14/20

**RELI GU4377 Islam in the Soviet Union and Successor States. 4.00 points.**

This seminar is designed for advanced undergraduate and graduate students seeking to develop an understanding of Islam in the Soviet Union and its successor states. The Soviet experience drastically altered the ways Central Asian Muslims practice Islam. This course explores the various ways in which Central Asian Muslims practiced Islam during the Soviet era and the lasting impacts of that period on contemporary Central Asia. Topics covered include the Soviet campaign against Islam, Soviet Islamic authorities, the growth of international Islamic networks in post-Soviet Central Asia, emerging Islamic movements, and common Islamic practices like pilgrimage and Islamic healing. Additionally, we will read theoretical and topical articles on comparable Islamic practices in various regions of the Muslim world to provide a broader perspective on Central Asia. All of the readings for this course will be in English. Prior course work related to Islam or the Soviet Union is recommended, but not required

Fall 2024: RELI GU4377

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4377	001/15067	T 6:10pm - 8:00pm 201 80 Claremont	Aziza Shanazarova	4.00	11/20

**RELI GU4407 Living Together: North American (Religious) Experiments. 3.00 points.**

The purpose of this seminar is to study historical communal religious experiments in the United States. It will engage with the questions of religious counter-cultures, and in particular the ways that communal religious groups challenge mainstream economic, political, gender, racial, and sexual norms through fashioning alternative modes of living together. The seminar will concentrate on study and analysis of texts, practices, and materials from two religious groups, the Shakers and Father

Divine’s International Peace Mission. The questions raised in considering these two historical groups will be refocused in a final unit that compares these communities to the comparatively short lived and “secular” Occupy movement, and brings the issues and challenges of alternative forms of living into the present moment

**RELI GU4411 RELIGION, MIND/SCIENCE FICTION. 4.00 points.**

While not yet fully recognized as a literary or philosophical genre, science fiction, through the “dislocation” it operates, raises (or amplifies) questions that have long been the preserve of religion, metaphysics, or philosophy, and it has brought some of these questions into the realm of popular culture. Science fiction is often perceived as hostile to religion, yet it often blurs the boundaries between science and religion. Recent SF, unlike the traditional “space opera,” revolves around the relations between the human mind and Artificial Intelligence — a challenge that our fast-evolving technoscientific society is confronting with a new sense of urgency. This course examines overlapping issues and questions shared by religion and SF

**RELI GU4412 RECOVERING PLACE. 4.00 points.**

**RELI GU4416 Empire and Secularization in Africa: Reform, Mission, Islam. 4 points.**

This course examines how Empires paved the way to a new form of domination in Africa. Secularizing processes will be analyzed in relation to imperial histories in Africa. From the Expedition in Egypt to the Berlin Conference, Empires in Africa were both secular and religious. We will examine the multiple ways in which Empires colonized Africa by encountering, regulating or transforming African religious traditions. The class will compare historical geographies of “North Western” and “North Eastern” Africa by focusing on the Maghreb and West Africa but also on Egypt and Sudan. We will examine the relations of Empires with Islam and Christian missions in Africa. We will also examine how African uprisings challenge and challenged Imperial and State powers both before and during the Panafrikan movement. We will eventually look at both Imperial and Anti-Imperial legacies in Africa today.

**RELI GU4417 Recovering Place. 4.00 points.**

During the late 20th and early 21st centuries, the intersection of multiple disruptions has led to the loss of a sense of place. This has resulted in pervasive alienation and disorientation, which has led to a desire a growing desire to recover place. This course will examine the interplay between Displacement (Migration, Virtualization, Surveillance, Climate, Globalization) and Replacement (City, Rivers, Forests, Country). Special attention will be given to Displacement and Replacement in New York City. Students will have the opportunity to write a term paper or to create a project in an alternative medium

**RELI GU4418 On African Theory: Religion, Philosophy, Anthropology. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

What is African Theory? Is a theory African simply because it is rooted in the political present of the continent? Is it African because it corresponds to an African cultural singularity or simply because its authors and inventors come from or live in Africa? This class will examine some central aspects of both African and African philosophy. We will study a) how religious traditions shape African theory b) how the influence of colonial anthropology on concepts of African culture and tradition can be challenged c) how African theory relates to African politics of decolonization, in North and "sub-Saharan" Africa. The major dialectical problem we will examine during the class is the ongoing contradiction between claims of authenticity and demands of liberation, traditionalism and modernism, religion and secularism, culturalism and Marxism.

**RELI GU4420 RELIGIOUS WORLDS OF NEW YORK. 4.00 points.**

**RELI GU4425 Climate, Religion and Colonialism. 4.00 points.**

This course examines intersections between religion and climate through the lens of colonialism. In recent years, scholars across the humanities, social sciences, and physical sciences have suggested that the climate crisis dates to the advent of European colonialism in the 16th and 17th centuries. This literature argues that colonial projects involved the remaking of landscapes via "terraforming," seeking to inscribe European imaginaries on the land and extract value from it, while violently suppressing and destroying local and Indigenous lifeworlds. At the same time, a longstanding body of literature has investigated the relationship between colonialism and religion, focusing on missionary efforts to remake religious subjects and subjectivities and draw boundaries between true religion and its opposites, "paganism" and "superstition." This course seeks to understand these two processes within the same frame, examining how colonial projects entailed simultaneous efforts to subjugate, extract value from, and transform people and landscapes. By the end of the semester, students will have deepened and nuanced their understandings of climate, religion, and colonialism, and come away with new ways of thinking about the climate crisis

Fall 2024: RELI GU4425

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4425	001/15078	W 12:10pm - 2:00pm 201 80 Claremont	Raffaella Taylor-Seymour	4.00	16/20

**RELI GU4509 CRIME/PUNISHMENT-JEWISH CULTRE. 4.00 points.**

Jews have stood on every imaginable side of criminal justice: accuser and accused; prosecutor, defendant, and defender; judge and judged; spectator; storyteller; journalist; critic; advocate. How did Jews approach these various roles, and what notions of crime, criminality, punishment, and justice did they bring with them? This course crosses chronological eras, geographical regions, and academic disciplines to explore configurations of crime and punishment in Jewish cultures. It strives to achieve a balance in its coverage of Ashkenaz

vs. Sefarad; ancient, late ancient, medieval, modern, and contemporary Judaism; the specific and historical vs. the philosophical and theoretical; and varieties of sex, race, and gender. The role of classical Jewish texts, theology, and community in shaping Jewish approaches to criminal justice will all be considered

Fall 2024: RELI GU4509

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4509	001/00356	T 2:10pm - 4:00pm 113 Milstein Center	Beth Berkowitz	4.00	19/20

**RELI GU4513 BUDDHISM AND NEUROSCIENCE. 4.00 points.**

With the Dalai Lamas marked interest in recent advances in neuroscience, the question of the compatibility between Buddhist psychology and neuroscience has been raised in a number of conferences and studies. This course will examine the state of the question, look at claims made on both sides, and discuss whether or not there is a convergence between Buddhist discourse about the mind and scientific discourse about the brain

**RELI GU4514 Defining Marriage. 4 points.**

This seminar examines the changing purpose and meaning of marriage in the history of the United States from European colonization through contemporary debates over gay marriage. Topics include religious views of marriage, interracial marriage, and the political uses of the institution.

**RELI GU4515 Reincarnation and Technology. 4 points.**

A seminar exploring reincarnation, resurrection, and their contemporary cyber-relatives, uploading and simulation.

We'll explore Abrahamic, Amerind, Chinese, Greek, and Indian accounts, the Tibetan Buddhist reincarnation tradition and methodology in detail, and contemporary research on reincarnation, near-death, and out-of-body experiences. We will then turn to contemporary developments in science, religion, and philosophy concerning uploading consciousness to computer media and the probability that we are living a simulation. We will investigate whether religious traditions are consistent with or expressive of simulated reality, and the application of karma to all of the above.

**RELI GU4516 The Politics of Freud in the Postcolony. 4 points.**

This seminar examines the legacies of psychoanalysis through a critical exploration of how its concepts, practices and institutes have operated in colonial and postcolonial contexts. Weekly discussions will look at how practicing therapists, activists, anthropologists and others have extended, subverted and displaced psychoanalytic thought within non-European histories and imaginaries. Topics include challenges to the universality of the Oedipus emerging from early 20<sup>th</sup> century anthropologist's studies of kinship in Papua New Guinea, legacies of a self-made South Asian psychoanalyst's challenges to Freudian orthodoxies, and the study of a psychoanalysis of racism forged out of a Martinican psychiatrist's encounters with colonial neuroses in Algeria. We will also explore how

psychoanalytic concepts have been deployed in debates about repression and sexuality in daily life during the Cultural Revolution and the psychic legacies of Maoism in contemporary China. In addition to reading the work of Freud and his critics, we will encounter primary materials—religious texts, movies, novels—that have been subjected to psychoanalytically-inflected interpretations. While attending to the cultural, racial and political assumptions suffusing psychoanalysis, our seminar will also show how variously situated authors have given this tradition new applications and meanings.

**RELI GU4517 After the Human. 4.00 points.**

The advent of high-speed computing, Big Data, new forms of Artificial Intelligence, and global networking is rapidly transforming all aspects of life. Implants, transplants, genetic engineering, cloning, nanotechnology, cyborgs, hybrids, prostheses, mobile phones, tracking devices and wearable devices. The Internet of Things and the Internet of Bodies are becoming interconnected to transform what once was known as human being. These developments raise fundamental questions about what comes after the human. This course considers the philosophical and theological implications of this question by addressing the following issues: Natural vs. Artificial, Treatment vs. Enhancement, the Artificial Intelligence Revolution, Ubiquitous Computing, the Internet of Things, the Singularity, Extended Mind and Superintelligence, Internet of Bodies and Superorganisms, Death and After Life. Students will have the option of writing a term paper or doing a project related to the course readings

**RELI GU4519 Gender, Islam and Society in North Africa. 4.00 points.**

This course provides a range of perspectives for the study of gender and Islam in North Africa, foregrounding the entangled genealogies of religious, political and feminist thought across the region. Through lectures, readings, documentaries, and class discussions, students will be introduced to important conceptual and empirical frameworks related to the construction of religion and gender in the region. A significant part of this course will explore gendered experiences within sacred texts, rituals, political praxis and social expression. The course will also explore the different women's rights movements, with particular focus on the emergence of female Muslim activism. We will examine how feminism is shaped and/or challenged by the encounter with Islam, and look at the strategies and activism(s) of Muslim feminists and how they contribute to the development of civil society, social justice and feminist re-interpretation of religious texts. Students will be encouraged to think broadly across social, political and embodied ideas of gender and Islam, and therefore develop new avenues for capturing and interpreting the complexities of gender and religious subjectivity

**RELI GU4524 UNCONSCIOUS AND JEWISH THOUGHT. 4.00 points.**

This survey aims to reflect on the specific dialogue between faith and theories of the mind. After an overview of pre-

Freudian notions of the unconscious, the course will examine Freud's 1896 Theory of the unconscious mind and the key analytical concepts which display similarities between psychoanalysis and Jewish thought, from Talmudic hermeneutics to Kabbalah studies. We will explore the unconscious through readings from Leibnitz, Schelling, Goethe, von Hartmann, Freud, Jung, as well as its preludes and echoes in the Talmud and in the writings of Azriel of Gerona, the Magid of Mezrich, Krochmal, Leiner, Lou Andreas Salome, Scholem, Idel, Wolfson

**RELI GU4526 Food and Sex in Premodern Chinese Buddhism. 4 points.**

This course is an upper-level seminar on appetite and its management, designed for advanced undergraduates and graduate students. Our focus will be on the appetites of food hunger and sexual desire, and how Chinese Buddhist teachings propose to manage these. Food and sex are separate domains of experience, but as the primary objects of bodily appetites, they are analogous. Eating and sex both involve a direct and substantive interaction with the material world that is driven by powerful desires. In Buddhist teachings, these desires are said to bind us to the cycle of rebirth (*saṃsāra*) and to shape the actions (karma), both mental and corporeal, that constitute our moral engagement with the phenomenal world. Hence it is important to know how a Buddhist on the path out of suffering is to manage these activities. What do monastic codes stipulate? What disciplines did lay Buddhists undertake? How are transgressions identified and handled? How do ancient Chinese and Daoist ideas inform the development of Chinese Buddhist attitudes toward sex and diet? How did Chinese Buddhist monastics come to adopt a meatless diet? How do religions use food and sex as tools for determining one's ritual purity (i.e., moral worth)? We will explore these and related topics. Despite the common perception of Buddhism as a world-denying religion focused on transcending bodily needs, Chinese Buddhists (and their Indian or Central Asian counterparts) engaged in numerous body practices with worldly benefit, while at the same time mitigating the dangers of desire through various doctrinal and practical means. This course is an exploration of those means.

**RELI GU4528 Religion and the Sexed Body. 4.00 points.**

This seminar will examine how bodily practices associated with gender and sexualities are cultivated, regulated, and articulated within various religious traditions and how these practices have been influenced by global processes, including colonialism, the accelerating movement of people and technologies, and modern secularism and identity politics. Throughout the course we will tack back and forth between theoretical works and ethnographic/historical writing, in order to articulate what is probably the most difficult aspect of original research: how to bring together “high theory” and primary sources ranging from field research to data drawn from a variety of media

**RELI GU4535 BUDDHIST CONTEMPLATIVE SCIENCES. 4.00 points.**

Prerequisites: the instructor's permission.

Buddhist arts and sciences traditionally are divided into the interconnected disciplines of ethics (prajñā), wisdom/philosophy (samādhi/bhavanā). This seminar course introduces the latter discipline, thus complementing and completing Prof. Yarnall's Columbia seminars on Buddhist Ethics (RELI UN3500) and Indo-Tibetan Buddhist Philosophy (RELI GU4630), either of which—in addition to his introductory lecture course on Indo-Tibetan Buddhism (RELI UN2205)—are encouraged as prerequisites. This course will provide a detailed presentation of key Buddhist contemplative sciences, including: stabilizing meditation (śamatha); analytic insight meditation (vipaśyanā); cultivation of the four immeasurables, and form and formless trances; mind cultivation (lojong); mindfulness meditation; Zen meditation; great perfection (dzogchen); and the subtle body-mind states activated and transformed through advanced tantric yoga techniques. These arts and sciences will be explored both within their traditional interdisciplinary frameworks, as well as in dialog with related contemporary disciplines, including: cognitive sciences, neuroscience, psychology, psychiatry, philosophy, epistemology, and so forth. To be conducted in a mixed lecture/seminar format (active, prepared participation required)

**RELI GU4547 Sacrifice. 4.00 points.**

This seminar provides an overview of sacrifice in both theory and practice. The concept of sacrifice, and its contestation, allows us to explore a range of issues and institutions related to the (often violent) act of “giving up,” or exchange. What must a sacrifice be, and how do its instantiations—for God; for country; for kin; for love; for rain; etc.—take shape? Readings are drawn from a range of sources, including Biblical texts and commentaries, the anthropological record, critical theory, comparative literature, and work on race and gender. The seminar aims to provide students with a strong foundation for relating sacrifice to broader concerns with the body, media/mediation, religion, politics, and kinship

**RELI GU4562 Wittgenstein and Religion. 4 points.**

Ludwig Wittgenstein is one of the most important philosophers of the twentieth century, and probably one of the most widely read by non-philosophers. His influence on a number of intellectual disciplines (philosophy, politics, theology, social science, history, etc.) has been considerable. This course will focus on Wittgenstein's own writings and their reception, with a focus on the study of religion and anthropology.

**RELI GU4565 Women and Islam. 4.00 points.**

This course is a comprehensive engagement with Islamic perspectives on women with a specific focus on the debates about woman's role and status in Muslim societies. Students will learn how historical, religious, socio-economic and political factors influence the lives and experiences of Muslim women. A variety of source materials (the foundational texts of Islam, historical and ethnographic accounts, women's and gender studies scholarship) will serve as the framework for lectures. Students will be introduced to women's religious lives and a variety of women's issues as they are reported

and represented in the works written by women themselves and scholars chronicling women's religious experiences. We will begin with an overview of the history and context of the emergence of Islam from a gendered perspective. We will explore differing interpretations of the core Islamic texts concerning women, and the relationship between men and women: who speaks about and for women in Islam? In the second part of the course we will discuss women's religious experiences in different parts of the Muslim world. Students will examine the interrelationship between women and religion with special emphasis on the ways in which the practices of religion in women's daily lives impact contemporary societies. All readings will be in English. Prior course work in Islam or women's studies is recommended, but not required

**Fall 2024: RELI GU4565**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4565	001/10297	T 2:10pm - 4:00pm 201 80 Claremont	Aziza Shanazarova	4.00	9/20

**RELI GU4611 The Lotus Sutra in East Asian Buddhism. 4 points.**

Prerequisites: open to students who have taken one previous course in either Buddhism, Chinese religions, or a history course on China or East Asian.

The course examines some central Mahayana Buddhist beliefs and practices through an in-depth study of the Lotus sutra. Schools (Tiantai/Tendai, Nichiren) and cultic practices such as sutra-chanting, meditation, confessional rites, and Guanyin worship based on the scripture. East Asian art and literature inspired by it.

**RELI GU4613 Silence. 4 points.**

We live in a world of noise where incessant buzz and endless chatter are used as strategies of distraction deployed for political and economic purposes. Increasingly invasive technologies leave little time for quiet reflection and thoughtful deliberation. As the volume rises, silence becomes either a tactic for repression or a means of resistance.

This course will consider the question of silence from the perspectives of theology, philosophy, literature, politics, and art. Special attention will be paid to the role silence plays in different religious traditions. An effort will be made to create a dialogue among philosophical, theological literary, artistic, and film treatments of silence.

Questions to be considered include: How does the importance of silence change with time and place? What are the theological and metaphysical presuppositions of different interpretations of silence? What is the relation of changing technologies to the cultivation of, or resistance to silence? What are the psychological dimensions of different kinds of silence? What is the pedagogical value of silence? How can silence be expressed in music, the visual arts, and architecture? How does the importance of silence change in different social, political, and

economic circumstances? Do we need more or less silence today?

**RELI GU4615 Media and Religion. 4 points.**

Typewriters, trains, electricity, telephones, telegraph, stock tickers, plate glass, shop windows, radio, television, computers, Internet, World Wide Web, cell phones, tablets, search engines, big data, social networks, GPS, virtual reality, Google glass. The technologies turn back on their creators to transform them into their own image. This course will consider the relationship between mechanical, electronic, and digital technologies and different forms of twentieth-century capitalism. The regimes of industrial, consumer, and financial shape the conditions of cultural production and reproduction in different ways. The exploration of different theoretical perspectives will provide alternative interpretations of the interplay of media, technology, and religion that make it possible to chart the trajectory from modernity to postmodernity and beyond.

**RELI GU4616 TECHNOLOGY,RELIGION,FUTURE. 4.00 points.**

This seminar will examine the history of the impact of technology and media on religion and vice versa before bringing into focus the main event: religion today and in the future. We'll read the classics as well as review current writing, video and other media, bringing thinkers such as Eliade, McLuhan, Mumford and Weber into dialogue with the current writing of Kurzweil, Lanier and Taylor, and look at, among other things: ethics in a Virtual World; the relationship between Burning Man, a potential new religion, and technology; the relevance of God and The Rapture in Kurzweil's Singularity; and what will become of karma when carbon-based persons merge with silicon-based entities and other advanced technologies

Spring 2025: RELI GU4616

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4616	001/13967	Th 4:10pm - 6:00pm 201 80 Claremont	David Kittay	4.00	22/25

**RELI GU4617 Image Theories in Chinese Religions. 4 points.**

What does "image" mean in Chinese intellectual traditions? How did proponents of different religious persuasions construe the relationship between images and their referents differently and how did such construal change over time? Why did the practice of fashioning images often give rise to controversies in Chinese history? What makes images the object of adoration as well as destruction? Throughout the course, we will tackle these questions from diverse perspectives. The first half of the course examines a variety of accounts from Chinese indigenous classics and treatises. The second half looks at how discourses of the image further diversified after the arrival of Buddhism in China.

**RELI GU4619 Islam in Popular Culture. 4.00 points.**

This course interrogates seminal issues in the academic study of Islam through its popular representation in various forms of

media from movies and television to novels and comic books. The class is structured around key theoretical readings from a range of academic disciplines ranging from art history and anthropology to comparative literature and religion. The course begins by placing the controversies surrounding the visual depiction of Muhammad in historical perspective (Gruber). This is followed by an examination of modern portrayals of Muslims in film that highlights both the vilification of the "other" (Shaheen) and the persistence of colonial discourses centered on the "native informant" (Mamdani). Particular emphasis is given to recent pop cultural works that challenge these simplistic discourses of Islam. The second half of the course revisits Muhammad, employing an anthropological framework (Asad) to understand the controversies surrounding Salman Rushdie's *Satanic Verses*. The obsession with a gendered depiction of Islam is then examined through an anthropological framework that sheds light on the problems of salvation narratives (Abu Lughod). The course ends with a look at the unique history of Islam in America, particularly the tension between immigrant and African-American communities

**RELI GU4620 RELIGIOUS WORLDS OF NEW YORK. 4.00 points.**

**RELI GU4621 Religion and Media. 4.00 points.**

This is a course designed for students interested in media and their connections to religious traditions and practices. This includes a consideration of specific mediums, including print, photography, radio, television, film, and the internet. But there is also an important manner in which media technologies have to be understood in relation to the more elementary senses they express (hearing, sight, etc). We therefore investigate media as both a broad conceptual category and as specific technologies of communication. So lots on books, TV, phones and the like, but also presence, auras, connection, distance, broadcasting, and immediacy. Course texts will include a combination of conceptual works as well as case studies drawn from major religious traditions. The learning goals of the course are: (1) to introduce seminal interpretive and methodological issues in the contemporary study of media/mediation; (2) to study some theoretical classics in the fields of media studies and religious studies, to provide a foundation for further reading; (3) to introduce new writing in the field; and (4) to encourage students to think of ways in which the issues and authors surveyed might provide models for their own interests and research. This course is geared toward graduate students and upper-level undergraduates. Some background in religious studies and/or media studies is helpful but not required

Fall 2024: RELI GU4621

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4621	001/15066	Th 2:10pm - 4:00pm 201 80 Claremont	Matthew Engelke	4.00	16/15

**RELI GU4626 READING (IN THEORY). 3.00 points.**

This reading-intensive course will engage, over time with essential texts of the current critical canon. Offered over a series of semesters, it is aimed at developing a practice of

reading: close or distant, and always attentive. Let us say: slow reading. What does it mean to read? Where and when does reading start? Where does it founder? What does reading this author (Freud, for example) or that author (say, Foucault) do to the practice of reading? Can we read without misreading? Can we read for content or information without missing the essential? Is there such a thing as essential reading? Favoring a demanding and strenuous exposure to the text at hand, this course promises just that: a demanding and strenuous exposure to reading. The course can be repeated for credit

### **RELI GU4630 INDO-TIBETAN BUDDHIST PHILOSOPHY. 4.00 points.**

Examination of topics in the religious philosophy of Tibet

Spring 2025: RELI GU4630

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4630	001/13968	Th 2:10pm - 4:00pm 201 80 Claremont	Thomas Yarnall	4.00	12/15
RELI 4630	002/20171		Thomas Yarnall	4.00	1/1

### **RELI GU4637 TALMUDIC NARRATIVE. 4.00 points.**

This course examines the rich world of Talmudic narrative and the way it mediates between conflicting perspectives on a range of topics: life and death; love and sexuality; beauty and superficiality; politics and legal theory; religion and society; community and non-conformity; decision-making and the nature of certainty. While we examine each text closely, we will consider different scholars' answers – and our own answers – to the questions, how are we to view Talmudic narrative generally, both as literature and as cultural artifact?

### **RELI GU4807 DIVINE HUMAN ANIMAL. 4.00 points.**

This course focuses on thinking with animals (Levi-Strauss) through the lens of the religious imagination. The concentration will be primarily on Western religious cultures, especially Judaism and the question of Jewishness

### **RELI GU4990 Directed Readings. 1.00-4.00 points.**

Topics chosen in consultation between members of the staff and students. It may be used for grad students to enroll for an additional credit for enrollment in a 3000 level course

Fall 2024: RELI GU4990

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 4990	001/00945		Meghan Hartman	1.00-4.00/5	

### **RELI GU4996 Religion and the Indian Wars. 4.00 points.**

The frontier is central to the United States' conception of its history and place in the world. It is an abstract concept that reflects the American mythos of progress and is rooted in religious ideas about land, labor, identity, and ownership. Throughout the nineteenth century, these ideas became more than just abstractions. They were tested, hardened, and revised by US officials and the soldiers they commanded on American battlefields. This process took the form of the Civil War and the series of U.S. military encounters with Native Americans

known as the Indian Wars. These separate yet overlapping campaigns have had profound and lasting consequences for the North American landscape and its peoples. This course explores the relationship between religious ideology and state violence in the last half of nineteenth century. Organized chronologically and geographically, we will engage with both primary sources and classic works in the historiography of the Indian Wars to examine how religion shaped federal policy and race relations from the start of the Civil War through approximately 1910

### **RELI GU4997 Global Indigenous Religious Histories-Discussion. 0.00 points.**

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of lacking religion; as pagan, barbarian, non-modern, and without history or civilization. Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative

### **RELI GU4998 RELIGION AND THE INDIAN WARS. 4.00 points.**

The frontier is central to the United States' conception of its history and place in the world. It is an abstract concept that reflects the American mythology of progress and is rooted in religious ideas about land, labor, and ownership. Throughout the nineteenth century, these ideas became more than just abstractions. They were tested, hardened, and revised by U.S. officials and the soldiers they commanded on American battlefields. This violence took the form of the Civil War as well as the series of U.S. military encounters with Native Americans known as the Indian Wars. These separate yet overlapping campaigns have had profound and lasting consequences for the North American landscape and its peoples. This course explores the relationship between religious ideology and violence in the last half of nineteenth century. Organized chronologically and geographically, we will engage with both primary sources and classic works in the historiography of the Indian Wars to examine how religion shaped U.S. policy and race relations from the start of the Civil War through approximately 1910

## SLAVIC LANGUAGES

### THE DEPARTMENT OF SLAVIC LANGUAGES

Department website: <http://www.columbia.edu/cu/slavic/>

Office location: 708 Hamilton Hall

Office contact: 212-854-3941

**Director of Undergraduate Studies:** Prof. Adam Leeds, 715 Hamilton Hall; [al3604@columbia.edu](mailto:al3604@columbia.edu)

#### Language Program Directors:

**Bosnian, Serbian, and Croatian:** Aleksandar Boskovic; [ab3865@columbia.edu](mailto:ab3865@columbia.edu)

**Czech:** Christopher W. Harwood; [cwh4@columbia.edu](mailto:cwh4@columbia.edu)

**Polish:** Christopher J. Caes; [cc4038@columbia.edu](mailto:cc4038@columbia.edu)

**Russian:** Marina N. Tsylyna; [mt3750@columbia.edu](mailto:mt3750@columbia.edu)

**Ukrainian:** Yuri I. Shevchuk; [sy2165@columbia.edu](mailto:sy2165@columbia.edu)

## THE STUDY OF SLAVIC AND EASTERN EUROPEAN LANGUAGES AND CULTURES

The Department of Slavic Languages and Literatures is devoted to the study of the cultures, literatures, and languages of Russia and other Slavic peoples and lands. We approach our study and teaching of these cultures with an eye to their specificity and attention to their interaction with other cultures, in history and in the contemporary global context. We focus not only on the rich literary tradition, but also on the film, theater, politics, art, music, media, religious thought, critical theory, and intellectual history of Russians and other Slavs. Our approach is interdisciplinary.

Students who take our courses have different interests. Many of our courses are taught in English with readings in English and have no prerequisites. As a consequence, our majors and concentrators are joined by students from other literature departments, by students of history and political science who have a particular interest in the Slavic region, and by others who are drawn to the subject matter for a variety of intellectual and practical reasons.

We provide instruction in Russian at all levels (beginning through very advanced), with a special course for heritage speakers. To improve the proficiency of Russian learners and speakers, we offer a number of literature and culture courses in which texts are read in the original and discussion is conducted in Russian. We offer three levels of other Slavic languages: Bosnian-Croatian-Serbian, Czech, Polish, and Ukrainian (with additional courses in culture in English). All language courses in the Slavic Department develop the four basic language skills (speaking, listening, reading, and writing) and cultural understanding.

Our department prides itself on the intellectual vitality of its program and on the sense of community among students and faculty. As they explore Russian and Slavic languages, literatures, and cultures, students develop not only their specific knowledge and cultural understanding, but also the capacity for critical thought, skills in analyzing literary and other texts, and the ability to express their ideas orally and in writing. Our graduates have used their knowledge and skills in different ways: graduate school, Fulbright and other fellowships, journalism, publishing, law school, NGO work, public health, government work, and politics. Our faculty is proud of its students and graduates.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Thesis Coursework and Requirements

A senior thesis is not required for any Slavic major. Students who wish to undertake a thesis project should

confer with the director of undergraduate studies during the registration period in April of their junior year and register to take RUSS UN3595 SENIOR SEMINAR in the fall term of their senior year. Students can opt to expand the thesis into a two-semester project register for RUSS UN3998 SUPERVISED INDIVIDUAL RESEARCH, with their thesis adviser, in the spring term of their senior year. Senior Seminar may satisfy one elective requirement; the optional second semester of thesis work adds one course to the 15 required for the major

## Undergraduate Research Outside of Courses

The Harriman Institute provides financial support towards research projects and travel for undergraduate students from Barnard College, Columbia College, and the School of General Studies through a variety of grants and fellowship awards. Please consult the Harriman website for more information.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Students who have a grade point average of at least 3.6 in courses taken for the major and who have submitted a senior thesis of outstanding quality will be considered for departmental honors. Normally no more than 10 percent of the graduating majors may be awarded departmental honors in any given year. For more information, consult the Director of Undergraduate Studies no later than the change-of-program period in the fall term of your senior year.

### Academic Prizes

#### Robert A. Maguire Prize in Slavic Studies

A cash prize awarded annually to an undergraduate of high academic distinction and promise in an area of study concerned with Russian or another Slavic culture, including literature, music, art, religion, or cultural history. Established in honor of Professor Robert A. Maguire.

The award is meant to perpetuate Professor Maguire's legacy and to ensure that his name remains a prominent feature in the landscape of Slavic Studies at Columbia.

That Robert Maguire's legacy should be associated with excellence seems more than appropriate. Robert Maguire's standards were the highest, and he held himself to them above all. Extraordinary language proficiency, scrupulous analysis of both the words on the page and the culture behind each word, inspired interpretation, and luminous writing were the hallmarks of his work. The Maguire Prize identifies these qualities with Robert Maguire and honors the remarkable students who attain them not only with a tangible award but by linking their names with his. Robert Maguire made the Columbia department one of the top Slavic departments in the country. By awarding a prize bearing his name to the top

student in that department, we recognize both the student's achievements and Robert Maguire's.

Importantly, the Robert A. Maguire Prize will be available to students not only in Russian literature and not only in Slavic literatures more broadly, but also in the other disciplines that address those cultures. Robert Maguire himself was as accomplished in Polish as he was in Russian, and his commitment to music was as profound as his love of language and literature. Even beyond his own breadth, though, lies Robert Maguire's conviction that no single aspect of a culture exists in isolation; he team-taught courses with historians, he educated himself in Slavic religious culture, and he worked for years on the relationship between word and visual image. It is reasonable to assume that he would want a prize bearing his name to include rather than exclude the fields adjacent to his own.

#### Pushkin Poetry Prize

The Pushkin Poetry Prize, which is funded by a 1958 bequest of Dr. John Paul Mihaly, is awarded for the best translation of a Russian poem into English. Both graduate and undergraduate students are eligible. You may submit one or two short poems or one extended poem. (Collaborative translations are allowed if both translators are Columbia students.)

The amount of the award is \$250. A panel of two judges will review the translations, and the winner will be announced at the end of the academic year.

#### Dobro Slovo

Dobro Slovo was established at UC Berkeley on October 29, 1926, to recognize academic achievements of Slavic students. In 1963 the National Slavic Honor Society – Dobro Slovo – was founded with the help and encouragement of the American Association of Teachers of Slavic and East European Languages (AATSEEL). The present-day Society recognizes the academic excellence of students studying Slavic languages and literatures and helps to foster scholarly interest in Slavic life and culture.

There are now over 130 local chapters with a total membership of 6,200. Dobro Slovo serves as a means for the recognition of academic excellence in the study of Slavic languages, literature, history, and culture. The Society serves as an incentive for scholarly interest in Slavic life and culture. The National Slavic Honor Society has been patterned after other existing honorary organizations. The Key of the Society is as representative of academic excellence in Slavic studies as the Phi Beta Kappa is for academic studies as a whole.

Qualifications for student membership are:

1. The student must have completed two years (or equivalent) of study of Slavic languages, literature, culture, or related subjects with a minimum average grade of 85% (B) or its letter or point equivalent.
2. The minimum overall academic average should be 80% (B) or its letter or point equivalent

3. The student must indicate an active and continuing interest in Slavic languages, literature, culture or related fields of Slavic studies.

The Chapter Faculty Advisor is responsible for determining the eligibility of all candidates.

Members receive:

National recognition for academic excellence  
Personalized Membership Card  
8 ½ x 11 Membership Certificate (suitable for framing)  
A Society Pin

## OTHER IMPORTANT INFORMATION

### Slavic Culture at Columbia Outside of the Classroom

All interested students are welcome to take part in departmental activities, such as conversation hours, Slavic student organizations, the department's various film series (Russian, East Central European, Central Asian, and Ukrainian), and the country's first undergraduate journal of Eastern European and Eurasian Culture, *The Birch*. The Slavic Department has close ties to the Harriman Institute and the East Central European Center, which sponsor lectures, symposia, performances, and conferences.

### Study and Research Abroad

The Slavic Department strongly encourages all students to spend a semester, summer, or year abroad if at all possible. A summer or a semester studying in an academic institution in your target country can be extraordinarily rewarding, not only for your language proficiency but for learning firsthand about the country's culture and intellectual life. If Russian is your focus, you can now choose from a vast array of programs in cities ranging from the highly Westernized Moscow and St. Petersburg to more "off the beaten track" locations such as Vladimir or Irkutsk. If you are interested in another Slavic language, opportunities abound for studying in Eastern and Central European countries such as the Czech Republic, Poland, Hungary, or the Baltics.

Various possibilities for study abroad exist, and any of our faculty are happy to provide you with information about these programs and to advise you about which one best fits your academic interests. If you think that you might wish to study abroad, you should plan your academic program carefully to make sure that you will be able to fit in all your major requirements. To talk over your plans, and to determine which courses in the study abroad program may be approved for major credit on your Columbia College transcript, you should meet with the Director of Undergraduate Studies (Columbia students) or your academic adviser (Barnard students).

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Consulting Advisors

For questions regarding the major and the minors, students should contact the Director of Undergraduate Studies: Adam E. Leeds, [al3604@columbia.edu](mailto:al3604@columbia.edu)

For questions regarding language courses, students should contact:

Bosnian, Serbian, and Croatian: Aleksandar Boskovic, [ab3865@columbia.edu](mailto:ab3865@columbia.edu)

Czech: Christopher W. Harwood, [cwh4@columbia.edu](mailto:cwh4@columbia.edu)

Polish: Christopher J. Caes, [cc4038@columbia.edu](mailto:cc4038@columbia.edu)

Russian: Marina N. Tsylyna, [mt3750@columbia.edu](mailto:mt3750@columbia.edu)

Ukrainian: Yuri I. Shevchuk, sy2165@columbia.edu

## Guidance for First-Year Students

The Department offers the Russian placement test twice a year: in August and early December. The Placement test consists of two parts – written (grammar and essay—about two hours) and oral (a 20-minute individual interview). Students who need a reading proficiency exam, or who have particular questions about placing into/out of Russian language courses including heritage courses, should contact the Director of the Russian Language Program Subject with the subject line: “Placement Test”.

The written part of the Russian Placement Test must be completed between the second and first week before classes begin. The test will be administered online and will be accessible starting from two weeks before class begin. See the department website for exact dates.

To take the test, you must be added to the Canvas course and access the course page using CU UNI. Please, contact the Director of the Russian Language Program in advance to be added to the course.

The oral part will be held in person the week before class. The interviews will be conducted remotely via Zoom and in-person at Hamilton Hall, room 709.

For placement in other languages, please contact the appropriate language instructor.

For AP credit policy, see below.

## Coursework Taken Outside of Columbia

Barnard students should consult the Barnard Bulletin, and the Barnard Director of Undergraduate Studies, as requirements differ between Barnard and Columbia departments.

Transfer students or students with prior study of a language taught by the department should take the language placement exam and/or consult with the appropriate language instructor, as detailed above.

For other questions regarding credits for transferring students, for coursework performed while studying abroad, or summer courses, please contact the Director of Undergraduate Studies.

A score of 5 on the AP/NEWL Russian exam satisfies the foreign language requirement. Upon successful completion of a 3-point 3000 level (or higher) course at Columbia, the Department of Slavic Languages will award 3 points of AP credit, provided the grade in the course is a B or better. Courses taught in English may not be used to earn AP credit. No credit or placement is given for the SAT II Subject test. If you wish to continue with Russian at Columbia, you should take the departmental placement test and speak with the Russian program director prior to registration to ensure proper placement.

## Preparing for Graduate Study

Students who intend to pursue graduate study in Slavic and Eastern European languages and/or literatures should consult with the Director of Graduate Studies. They are strongly encouraged to take four years of language study, and avail themselves of any other opportunities for advanced language study, including study abroad and summer courses, as well as to consider writing a senior thesis.

## UNDERGRADUATE PROGRAMS OF STUDY

### Survey Courses for All Programs

The Department requires students to take one or more survey courses for most of its programs of study (i.e., majors, minors, and formerly concentrations), as detailed below. The following list are courses that are recognized as surveys.

**RUSS UN3220** Literature and Empire (19<sup>th</sup>-century literature)

**RUSS UN3221** Literature and Revolution (20<sup>th</sup>-century literature)

**RUSS UN3223** Magical Mystery Tour: The Legacy of Old Rus'

**SLCL UN3001** Slavic Cultures

**RUSS GU4006** Russian Religious Thought, Praxis, and Literature

**CLSL GU4011** Experimental Cultures

**CLRS GU4022** Russia and Asia: Orientalism, Eurasianism, Internationalism

**CLSL GU4075** Soviet and Post-Soviet, Colonial Post-Colonial Film

**RUSS GU4107** Russian Literature and Culture in the New Millennium

**HSSL GU4280** Religion in Russia: Culture, History and Institution.

This list is subject to change. Students may petition the DUS to have some other appropriate course counted as a “survey” in special circumstances.

---

## MAJOR IN RUSSIAN LANGUAGE AND CULTURE

The program consists of 15 courses, 8 of which meet language requirements. Of the remaining 7 courses, 2 are introductory surveys, and the other 5 are electives, chosen in consultation with the director of undergraduate studies. The course requirements are distributed as follows:

### Course List

- Eight semesters of coursework in Russian language (from First- through Fourth-year Russian) or the equivalent
- Two survey courses, one of which two of which must be in Russian literature (RUSS UN3220 and RUSS UN3221)
- Five additional courses in Russian culture, history, literature, art, film, music, or in linguistics. At least one of the selected courses should be taught in Russian.

*To complement these courses, students are urged to spend a semester, year, or summer, studying abroad. The Russian Language Coordinator is available to help you choose a suitable program.*

## MAJOR IN RUSSIAN LITERATURE AND CULTURE

The goal of this major is to make students conversant with a variety of Russian literary, historical and theoretical texts in the original, and to facilitate a critical understanding of Russian literature, culture, and society. It is addressed to students who would like to complement serious literary studies with intensive language training, and is especially suitable for those who intend to pursue an academic career in the Slavic field.

The program of study consists of 15 courses, distributed as follows:

### Course List

- Six semesters of coursework in Russian language (from first- through third-year Russian) or the equivalent.
- Three surveys, two of which must be in Russian literature (RUSS UN3220 and RUSS UN3221). (See list above.)
- Six additional courses in Russian literature, culture, history, film, art, music, or in advanced Russian language, chosen in consultation with the director of undergraduate studies. At least one course should be taught in Russian.

*Students considering graduate study in Russian literature are strongly advised to complete four years of language training.*

## MAJOR IN SLAVIC STUDIES

This flexible major provides opportunities for interdisciplinary studies within the Slavic field. Students are encouraged to choose one target language (Bosnian-Croatian-Serbian, Czech, Polish, Russian, or Ukrainian), though there are possibilities for studying a second Slavic language as well. Generally, the major has one disciplinary focus in history, political science, economics, religion, anthropology, sociology, art, film, or music. In addition, this program allows students to focus on a particular Slavic (non-Russian) literature and culture or to do comparative studies of several Slavic literatures, including Russian. Students should plan their program with the director

of undergraduate studies as early as possible, since course availability varies from year to year.

The program of study consists of 15 courses, distributed as follows:

Six semesters of coursework in one Slavic language (from first- through third-year Russian, Bosnian-Croatian-Serbian, Czech, Polish, or Ukrainian) or the equivalent.

Two relevant courses in Russian, East/Central European or Eurasian history.

Two relevant literature or culture courses in Slavic, preferably related to the target language.

Five additional courses with Slavic content in history, political science, economics, literature, religion, anthropology, sociology, art, film, or music, chosen in consultation with the director of undergraduate studies. Two of these electives may be language courses for students who opt to include a second Slavic language in their program.

Altogether students should complete four courses in a single discipline, including, if appropriate, the required history or literature/culture courses.

## MINOR IN SLAVIC AND EASTERN EUROPEAN LANGUAGE AND CULTURE

The minor in Slavic and Eastern European Language and Culture provides a foundation for future engagement with the languages, literatures, and cultures of Eastern Europe.

The minor requires a total of **seven** courses, including two as prerequisites, or between twenty-one and twenty-four points.

- The minor requires **as a prerequisite** two semesters of language at the introductory level (or demonstration of equivalent proficiency via departmental placement examination or prior coursework), either

RUSS UN1101x – UN1102y, First Year Russian I and II, or

RUSS UN3430x-UN3431y: Russian for Heritage Speakers I and II, or

BCRS UN1101x-UN1102y: Elementary Bosnian/Croatian/Serbian, I and II, or

CZCH UN1101x-UN1102y: Elementary Czech, I and II, or

POLI UN1101x-UN1102y: Elementary Polish, I and II, or

UKRN UN1101x-UN1102y: Elementary Ukrainian, I and II.

- Two further semesters of language, either

RUSS UN2101x-UN2102y: Second-year Russian, I and II, or

BCRS UN2101x-UN2102y: Intermediate Bosnian/Croatian/Serbian, I and II, or

CZCH UN2101x-UN2102y: Intermediate Czech, I and II, or

POLI UN2101x-UN2102y: Intermediate Polish, I and II, or

UKRN UN2101x-UN2102y: Intermediate Ukrainian, I and II

*If a student places out of the intermediate level of the language, they are expected to take either two further courses in the language or two further electives of their choice.*

Students must take one course that the department considers a “survey.” (See list above.)

Finally, students must take two other elective courses from our department, which may be language courses. (Extra-departmental courses are discouraged and subject to approval by the DUS).

## MINOR IN SLAVIC AND EASTERN EUROPEAN CULTURE

The minor in Slavic and Eastern European Culture provides a foundation for future engagement with the literatures and cultures of Eastern Europe.

The minor requires a total of five courses, with no prerequisites, or between fifteen and twenty points.

Students must take two courses that the department considers a “survey.” (See list above.)

Students must take three other elective courses from our department. (Extra-departmental courses are discouraged and subject to approval by the DUS).

## CONCENTRATIONS FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Russian Language and Culture

This program is intended for students who aim to attain proficiency in the Russian language. Intensive language training is complemented by an array of elective courses in Russian culture that allow students to achieve critical understanding of contemporary Russian society and of Russian-speaking communities around the world. Since this concentration emphasizes language acquisition, it is not appropriate for native Russian speakers.

The program of study consists of 10 courses, distributed as follows:

Six semesters of coursework in Russian language (from first-through third-year Russian) or the equivalent.

Select one of the surveys. (See list above.)

### Concentration in Slavic (Non-Russian) Language and Culture

This program is intended for students who aim to attain proficiency in a Slavic language other than Russian. Intensive language training is complemented by an array of elective courses in Slavic cultures that allow students to achieve critical understanding of the communities that are shaped by the Slavic language of their choice. Since this concentration emphasizes language acquisition, it is not appropriate for native speakers of the target language.

The program of study consists of 10 courses, distributed as follows:

Six semesters of coursework in one Slavic language (from first-through third-year Bosnian-Croatian-Serbian, Czech, Polish, or Ukrainian) or the equivalent.

Four additional courses in Slavic literature, culture or history, or in linguistics, chosen in consultation with the director of undergraduate studies; at least two should be directly related to the target language of study.

### Concentration in Russian Literature and Culture

The goal of this concentration is to make students conversant with a variety of Russian literary texts and cultural artifacts that facilitate a critical understanding of Russian culture. It is addressed to students who would like to combine language training with study of the Russian literary tradition.

The program of study consists of 10 courses, distributed as follows:

Four semesters of coursework in Russian language (first- and second-year Russian) or the equivalent.

Select two surveys; one of which must be a literature survey (RUSS UN3220 or RUSS UN3221). (See list above.)

Four additional courses in Russian literature, culture, and history, chosen in consultation with the director of undergraduate studies.

### Concentration in Slavic Studies

This flexible concentration provides opportunities for interdisciplinary studies within the Slavic field. Students are encouraged to choose one target language (Bosnian-Croatian-Serbian, Czech, Polish, Russian, or Ukrainian), and one disciplinary focus in history, political science, economics, religion, anthropology, sociology, art, film, or music. In addition, this program allows students to focus on a particular Slavic (non-Russian) literature and culture, or to

do comparative studies of several Slavic literatures, including Russian.

The program of study consists of 10 courses, distributed as follows:

Four semesters of coursework in one Slavic language (first- and second-year Bosnian-Croatian-Serbian, Czech, Polish, Russian, or Ukrainian) or the equivalent.

One relevant course in Russian, East/Central European or Eurasian history.

Altogether students should complete three courses in a single discipline, including, if appropriate, the required history or literature/culture courses.

## Concentration in Russian Literature

This concentration is addressed to serious literature students who would like to pursue Russian literature but have no training in Russian. It allows students to explore the Russian literary tradition, while perfecting their critical skills and their techniques of close reading in a variety of challenging courses in translation.

The program of study consists of 8 courses, with no language requirements, distributed as follows:

The two literature surveys RUSS UN3220 and RUSS UN3221. (See list above.)

Six additional courses, focused primarily on Russian literature, culture, and history, though courses in other Slavic literatures are also acceptable if approved by the director of undergraduate studies.

Relevant literature courses from other departments may count toward the concentration only if approved by the director of undergraduate studies.

## SENIOR THESIS COURSEWORK AND REQUIREMENTS

A senior thesis is not required for any Slavic major. Students who wish to undertake a thesis project should confer with the director of undergraduate studies during the registration period in April of their junior year and register to take *RUSS UN3595 SENIOR SEMINAR* in the fall term of their senior year. Students can opt to expand the thesis into a two-semester project register for *RUSS UN3998 SUPERVISED INDIVIDUAL RESEARCH*, with their thesis adviser, in the spring term of their senior year. *Senior Seminar* may satisfy one elective requirement; the optional second semester of thesis work adds one course to the 15 required for the major.

## BOSNIAN/CROATIAN/SERBIAN LANGUAGE AND LITERATURE

### BCRS UN1101 ELEM BOSNIAN/CROATIAN/SERBIAN. 4.00 points.

Essentials of the spoken and written language. Prepares students to read texts of moderate difficulty by the end of the first year

Fall 2024: BCRS UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 1101	001/10751	W 10:10am - 11:25am 351a International Affairs Bldg	Aleksandar Boskovic	4.00	4/12
BCRS 1101	001/10751	T F 10:10am - 11:25am 352c International Affairs Bldg	Aleksandar Boskovic	4.00	4/12

### BCRS UN1102 ELEM BOSNIAN/CROATIAN/SERBIAN. 4.00 points.

Essentials of the spoken and written language. Prepares students to read texts of moderate difficulty by the end of the first year

Spring 2025: BCRS UN1102

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 1102	001/13728	W 10:10am - 11:25am 352b International Affairs Bldg	Aleksandar Boskovic	4.00	8/12
BCRS 1102	001/13728	T F 10:10am - 11:25am 352c International Affairs Bldg	Aleksandar Boskovic	4.00	8/12

### BCRS UN2101 INTER BOSNIAN/CROATIAN/SERBIAN. 4.00 points.

Prerequisites: BCRS UN1102 *BCRS W1102* or the equivalent.

Prerequisites: BCRS UN1102 or the equivalent. Readings in Serbian/Croatian/Bosnian literature in the original, with emphasis depending upon the needs of individual students

Fall 2024: BCRS UN2101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BCRS 2101	001/10752	T W F 11:40am - 12:55pm 352b International Affairs Bldg	Aleksandar Boskovic	4.00	6/12

### BCRS UN2102 INTER BOSNIAN/CROATIAN/SERBIAN. 4.00 points.

Prerequisites: BCRS UN1102 *BCRS W1102* or the equivalent.

Prerequisites: BCRS UN1102 or the equivalent. Readings in Serbian/Croatian/Bosnian literature in the original, with emphasis depending upon the needs of individual students. This course number has been changed to BCRS 2102

Spring 2025: BCRS UN2102

---------------	---------------------	----------------	------------	--------	------------

BCRS 2102 001/13722	W 11:40am - 12:55pm 352b International Affairs Bldg	Aleksandar Boskovic	4.00	7/12
BCRS 2102 001/13722	T F 11:40am - 12:55pm 352c International Affairs Bldg	Aleksandar Boskovic	4.00	7/12

### **BCRS GU4002 YUGOSLAV#POST-YUGOSLAV CINEMA. 3.00 points.**

This course investigates the complex relationship between aesthetics and ideology in Yugoslav and post-Yugoslav cinema. Specifically, it examines the variety of ways in which race, ethnicity, gender inequality, and national identity are approached, constructed, promoted, or contested and critically dissected in film texts from the Socialist Federative Republic of Yugoslavia (SFRY) and its successor states (Bosnia, Croatia, Serbia, FYR Macedonia). The course has four thematic units and is organized chronologically.

### **BCRS GU4331 ADV BOSNIAN/CROATIAN/SERBIAN. 3.00 points.**

Prerequisites: BCRS UN2102 *BCRS W2102*.

Prerequisites: BCRS UN2102 Further develops skills in speaking, reading, and writing, using essays, short stories, films, and fragments of larger works. Reinforces basic grammar and introduces more complete structures

### **BCRS GU4332 ADV BOSNIAN/CROATIAN/SERBIAN. 3.00 points.**

Prerequisites: BCRS UN2102 *BCRS W2102*.

Prerequisites: BCRS UN2102 Further develops skills in speaking, reading, and writing, using essays, short stories, films, and fragments of larger works. Reinforces basic grammar and introduces more complete structures

Spring 2025: BCRS GU4332

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

## **COMPARATIVE LITERATURE - CZECH**

### **CLCZ GU4020 Czech Culture Before Czechoslovakia. 3 points.**

An interpretive cultural history of the Czechs from earliest times to the founding of the first Czechoslovak republic in 1918. Emphasis on the origins, decline, and resurgence of Czech national identity as reflected in the visual arts, architecture, music, historiography, and especially the literature of the Czechs.

### **CLCZ GU4030 POSTWAR CZECH LITERATURE. 3.00 points.**

A survey of postwar Czech fiction and drama. Knowledge of Czech not necessary. Parallel reading lists available in translation and in the original

### **CLCZ GU4035 THE WRITERS OF PRAGUE. 3.00 points.**

After providing an overview of the history of Prague and the Czech lands from earliest times, the course will focus on works by Prague writers from the years 1895-1938, when the city was a truly multicultural urban center. Special attention will be given to each of the groups that contributed to Prague's cultural diversity in this period: the Austro-German minority, which held disproportionate social, political and economic influence until 1918; the Czech majority, which made Prague the capital of the democratic First Czechoslovak Republic (1918-1938); the German- and Czech-speaking Jewish communities, which were almost entirely wiped out between 1938 and 1945; and the Russian and Ukrainian émigré community, which—thanks in large part to support from the Czechoslovak government—maintained a robust, independent cultural presence through the 1920s and early 1930s. Through close reading and analysis of works of poetry, drama, prose fiction, reportage, literary correspondence and essays, the course will trace common themes that preoccupied more than one Prague writer of this period. In compiling and comparing different versions of cultural myth, it will consider the applicability of various possible definitions of the literary genius loci of Prague

Spring 2025: CLCZ GU4035

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLCZ 4035	001/11535	T Th 2:40pm - 3:55pm 609 Hamilton Hall	Christopher Harwood	3.00	7/18

### **CLCZ GU4038 PRAGUE-SPRING 1968-FILM # LIT. 3.00 points.**

The course explores the unique period in Czech film and literature during the 1960s that emerged as a reaction to the imposed socialist realism. The new generation of writers (Kundera, Skvorecky, Havel, Hrabal) in turn had an influence on young emerging film makers, all of whom were part of the Czech new wave

## **COMPARATIVE LITERATURE - POLISH**

### **CLPL GU4042 Bestsellers of Polish Literature. 3 points.**

A study of the 20th-century Polish novel during its most invigorated, innovative inter-war period. A close study of the major works of Kuncewiczowa, Choromanski, Wittlin, Unilowski, Kurek, Iwaszkiewicz, Gombrowicz, and Schulz. The development of the Polish novel will be examined against the background of new trends in European literature, with emphasis on the usage of various narrative devices. Reading knowledge of Polish desirable but not required. Parallel reading lists are available in the original and in translation.

### **CLPL GU4040 Mickiewicz. 3 points.**

The Polish literary scene that in this particular period stretched from Moscow, Petersburg, and Odessa, to Vilna, Paris, Rome. The concept of exile, so central to Polish literature of the 19th-century and world literature of the 20th will be introduced and discussed. The course will offer the opportunity to see

the new Romantic trend initially evolving from classicism, which it vigorously opposed and conquered. We will examine how the particular literary form - sonnet, ballad, epic poem and the romantic drama developed on the turf of the Polish language. Also we will see how such significant themes as madness, Romantic suicide, Romantic irony, and elements of Islam and Judaism manifested themselves in the masterpieces of Polish poetry. The perception of Polish Romanticism in other, especially Slavic, literatures will be discussed and a comparative approach encouraged. Most of the texts to be discussed were translated into the major European languages. Mickiewicz was enthusiastically translated into Russian by the major Russian poets of all times; students of Russian may read his works in its entirety in that language. The class will engage in a thorough analysis of the indicated texts; the students' contribution to the course based on general knowledge of the period, of genres, and/or other related phenomena is expected.

**CLPL GU4300 The Polish Novel After 1989. 3 points.**

This seminar is designed to offer an overview of Post-1989 Polish prose. The literary output of what is now called post-dependent literature demonstrates how political transformations influenced social and intellectual movements and transformed the narrative genre itself. The aesthetic and formal developments in Polish prose will be explored as a manifestation of a complex phenomenon bringing the reassessment of national myths, and cultural aspirations. Works by Dorota Maslowska, Andrzej Stasiuk, Pawel Huelle, Olga Tokarczuk, Magdalena Tulli and others will be read and discussed. Knowledge of Polish not required.

**CLPL GU4301 Survey of Polish Literature and Culture. 3 points.**

This course introduces and explores key works, traditions, and tendencies in Polish literature and culture from the Middle Ages to the present. Focusing in particular on the monuments of Polish literature, the course embeds them in historical context and places them in dialog with important ideas and trends in both Polish and European culture of their time. The aim is to engender and establish an understanding of Poland's position on the literary and cultural map of Europe. In addition to literature, works of history, political science, film, and the performing arts will be drawn on for course lecture and discussion. No prerequisites. Readings in English.

## COMPARATIVE LITERATURE - SLAVIC

**CLSL UN3304 How To Read Violence: The Literature of Power, Force and Brutality from 20th Century Russia and America. 3 points.**

This course seeks to understand how authors and filmmakers in the 20th century communicate the experience of violence to their audiences. We will discuss how fragmentation, montage, language breakdown and other techniques not only depict violence, but reflect that violence in artistic forms. We will also ask what representing violence does to the artistic work. Can the attempt to convey violence become an act of violence in itself? We will consider texts from Vladimir

Mayakovsky, John Dos Passos, Andrei Platonov, Vasiliy Grossman, Allen Ginsberg, Anna Akhmatova, Richard Wright, Cormac McCarthy, Vladimir Sorokin, as well as films from Sergei Eisenstein, Alexei Balabanov and Quentin Tarantino. Full course description and syllabus available at [readingviolence.weebly.com](http://readingviolence.weebly.com).

**CLSL GU4000 Hebrew: History, Politics, Culture, Literature. 3.00 points.**

This class offers an introduction to Hebrew culture from a historical and literary perspective, focusing on the intersection of linguistic ideology, and literary and cultural creativity. What, we will ask, is the relationship between what people think about Hebrew and what they write in Hebrew? We will investigate the manners in which Hebrew was imagined – as the language of God, the language of the Jews, the language of the patriarchy, the language of secularism, the language of Messianism, the language of nationalism, a dead language, a diasporic Eastern European language, a local Middle Eastern Language, ext., and how these conflicting imaginaries informed Hebrew creativity. This class does not require prior knowledge of Hebrew. Students proficient in Hebrew, Yiddish, Arabic, Ladino, and/or European languages are encouraged to contact the instructor in advance for supplementary material in these languages

**CLSL GU4003 Central European Drama in the Twentieth Century. 3 points.**

Focus will be on the often deceptive modernity of modern Central and East European theater and its reflection of the forces that shaped modern European society. It will be argued that the abstract, experimental drama of the twentieth-century avant-garde tradition seems less vital at the century's end than the mixed forms of Central and East European dramatists.

**CLSL GU4004 Introduction to Twentieth-Century Central European Fiction. 3 points.**

This course introduces students to works of literature that offer a unique perspective on the tempestuous twentieth century, if only because these works for the most part were written in "minor" languages (Czech, Polish, Hungarian, Serbian), in countries long considered part of the European backwaters, whose people were not makers but victims of history. Yet the authors of many of these works are today ranked among the masters of modern literature. Often hailing from highly stratified, conservative societies, many Eastern and Central European writers became daring literary innovators and experimenters. To the present day, writers from this "other" Europe try to escape history, official cultures, politics, and end up redefining them for their readers. We will be dealing with a disparate body of literature, varied both in form and content. But we will try to pinpoint subtle similarities, in tone and sensibility, and focus, too, on the more apparent preoccupation with certain themes that may be called characteristically Central European.

**CLSL GU4008 Slavic Avant-Garde Surfaces. 3 points.**

This lecture course will provide a punctual survey of the major trends and figures in the interwar visual culture and avant-garde poetry of the Soviet Russia and East Central Europe (Poland, Czechoslovakia, Hungary, and Yugoslavia), including the opulent field of their intersection. Topics include various interfaces of visual culture and graphic arts, such as public spaces, walls, propaganda trains, windows, postcards, posters, books, and screens. The course will address the innovative use of typography and photography, typophoto and photomontage, as well as the short written and hybrid genres such as manifesto, cinépoetry, photo essay, and photo frescoes. We will discuss poets and artists such as Mayakovsky, Lissitsky, Rodchenko, Klutis, Vertov, Teige, Nezval, Sutnar, Štirsky, Szczuka, Stern, Themersons, Kassák, Kertész, Moholy-Nagy, Goll, Micińska, Vučko, Matijević. Each session will include a lecture followed by discussion.

**CLSL GU4010 What We Do in the Shadows: A History of the Night in Eastern Europe. 3.00 points.**

This course looks at nighttime as an object of inquiry from an experiential, historical, religious, literary, and cultural perspectives, introducing the students with the growing field of night studies. It covers the Early Modern and the Modern Periods and centers primarily on Eastern Europe and East Central Europe, with a secondary focus on Jewish Literature and Culture in these regions. The course caters for students who are interested in night studies, in the history and culture of Eastern Europe, students who are interested in Jewish (Hebrew and Yiddish) Studies, as well as students who are interested in the intersection of history and literature

**CLSL GU4011 Experimental Cultures. 3.00 points.**

This seminar course will provide a punctual survey of trends and figures in the experimental cultures of East Central Europe. Formations include the avant-gardes (first, postwar, and postcommunist); experimental Modernisms and Postmodernisms; alternative film, media, and visual culture; and formally inventive responses to exceptional historical circumstances. Proceeding roughly chronologically from early twentieth to early twenty-first centuries, we will examine expressionist/surrealistic painting and drama; zenithist hybrid genres such as cinépoetry and proto-conceptualist writing; mixed-media relief sculpture; post-conceptual art; experimental and animated film; and avant-garde classical music. In terms of theory, we will draw on regional and global approaches to artistic experimentation ranging from Marxist and other theories of value through discourses of the body and sexuality in culture to contemporary affect theory. The course will be taught in English with material drawn primarily from Poland, Yugoslavia, Czechoslovakia, and Hungary. Each session will include a lecture followed by discussion

Boskovic

**CLSL GU4012 Holocaust Literature: Critical Thinking in Dark Times. 3.00 points.**

How do you write literature in the midst of catastrophe? To whom do you write if you don't know whether your readership will survive? Or that you yourself will survive? How do you theorize society when the social fabric is tearing apart? How do you develop a concept of human rights at a time when mass extermination is deemed legal? How do you write Jewish history when Jewish future seems uncertain? This course offers a survey of the literature and intellectual history written during World War II (1939-1945) both in Nazi occupied Europe and in the free world, written primarily, but not exclusively, by Jews. We will read novels, poems, science fiction, historical fiction, legal theory and social theory and explore how intellectuals around the world responded to the extermination of European Jewry as it happened and how they changed their understanding of what it means to be a public intellectual, what it means to be Jewish, and what it means to be human. The aim of the course is threefold. First, it offers a survey of the Jewish experience during WWII, in France, Russia, Poland, Latvia, Romania, Greece, Palestine, Morocco, Iraq, the USSR, Argentina, and the United States. Second, it introduces some of the major contemporary debates in holocaust studies. Finally, it provides a space for a methodological reflection on how literary analysis, cultural studies, and historical research intersect

Fall 2024: CLSL GU4012

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLSL 4012	001/13510	W 10:10am - 12:00pm 616 Hamilton Hall	Offer Dynes	3.00	16/16

**CLSL GU4016 Socialist World Literature. 3.00 points.**

This course researches the potentiality and development of a Socialist World Literature. Students will learn about the more contemporary constructions of World Literature in the West, and then look at how the Soviet Union and its satellites potentially crafted an alternative to the contemporary construction. The class will then examine whether the Soviet version addressed some of the criticism of the contemporary definitions of World Literature, particularly through addressing the colonialism and nationalism. Students will learn about the complex history of World Literature and its definitions, reading the major theorists of the concept as well as the major critics. They will also create their own arguments about World Literature in a highly-scaffolded major project due at the end of the term. All readings will be provided online

**CLSL GU4017 The Central European Grotesque. 3.00 points.**

Central Europe is home to large number of authors, artists, and directors who made use of the critical power of the grotesque. Beginning from the fin-de-siècle and moving to the contemporary moment, students will get to know a wide range of grotesque art from Central Europe as well as several of the critical approaches to the subject. The course should be of

interest to anyone studying Central European culture, as well as students interested in cultural studies more generally. Students will learn to identify and analyze examples of the grotesque through a variety of theoretical lenses. They will also enrich their knowledge of Central European literature and culture

### **CLSL GU4075 POST COLONIAL/POST SOV CINEMA.**

**3.00 points.**

The course will discuss how filmmaking has been used as an instrument of power and imperial domination in the Soviet Union as well as on post-Soviet space since 1991. A body of selected films by Soviet and post-Soviet directors which exemplify the function of filmmaking as a tool of appropriation of the colonized, their cultural and political subordination by the Soviet center will be examined in terms of postcolonial theories. The course will focus both on Russian cinema and often overlooked work of Ukrainian, Georgian, Belarusian, Armenian, etc. national film schools and how they participated in the communist project of fostering a «new historic community of the Soviet people» as well as resisted it by generating, in hidden and, since 1991, overt and increasingly assertive ways their own counter-narratives. Close attention will be paid to the new Russian film as it re-invents itself within the post-Soviet imperial momentum projected on the former Soviet colonies

**Fall 2024: CLSL GU4075**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **CLSS GU4101 Balkan as a Metaphor. 3 points.**

This seminar for graduate and advanced undergraduate students has two main objectives. First, it is to critically assess competing and conflicting conceptions of the Balkans, Balkanism, and Balkanization. Second, it engages with border studies, a vast and thriving field that makes sense of widely different and constantly changing definitions of the border. The course's case studies focus on the region of the former Yugoslavia across the disciplines currently recognized as the humanities and social sciences. We will examine what those disciplinary borders do to the different types of borders we have chosen to analyze. We will discuss the concepts of copy and imitation in relation to Balkan arts and politics in the contemporary globalized world. We will explore documentary film and performance art representations of how refugees, migrant minorities, and borderline populations counter marginalizations and trauma.

### **CLSL GU4995 Central European Jewish Literature: Assimilation and Its Discontents. 3 points.**

Examines prose and poetry by writers generally less accessible to the American student written in the major Central European languages: German, Hungarian, Czech, and Polish. The problematics of assimilation, the search for identity, political commitment and disillusionment are major themes, along with the defining experience of the century: the Holocaust; but because these writers are often more removed from their

Jewishness, their perspective on these events and issues may be different. The influence of Franz Kafka on Central European writers, the post-Communist Jewish revival, defining the Jewish voice in an otherwise disparate body of works.

## **COMPARATIVE LITERATURE - RUSSIAN**

### **CLRS UN3314 The Story, She Told: Women's Autofiction # Life Writing in Russian. 3.00 points.**

In her 1975 essay *The Laughter of Medusa*, Hélène Cixous compared women's writing—in French, “écriture féminine”—to the unexplored African continent. To date, literary criticism has been grappling with the distinct qualities of literary works, crafted by women. This course offers a survey of main autofictional works and memoirs, written originally in the Russian language within the last 100 years. We will start our journey with the tumults of the WW1 and the Bolshevik Revolution, the Civil War, through the WW2, the Soviet dissident movement, the emigration waves into Israel and the United States, the advent of a post-socialist Russia in 1991—in order to arrive at the two plus decades of Vladimir Putin's presidency. We will consider the ways in which each author transposes and conveys her own—and others' memories—through the medium of autofiction, defined by Serge Doubrovsky, who coined the term in French, as “the adventure of the language, outside of wisdom and the syntax of the novel.” All selected works, with very few exceptions, are available in English; no reading knowledge of Russian is required. No prerequisites

### **CLRS UN3316 Queer and Loathing: Literature, Homophobia, and Russian Identity. 3.00 points.**

Over the past decade, official Russian rhetoric has posed queerness as the product of cultural and moral degradation in Western countries, framing Russia's domestic legal homophobia and revanchist foreign policy as heroic resistance to a deformed and despotic Western sociopolitical order. According to this narrative, queer identity is a recent and unwelcome Western import to Russia, something fundamentally alien to Russianness. Our course draws together a wide array of cultural artifacts, accrued from the 19th-century up to now, which tell a starkly different story. A story of lives that defied expectation—and of the pains and pleasures that such defiance entailed. There is heroism in this story, but its ‘heroes’ often don't fit the moniker, flouting our expectations much as they did those of their contemporaries. Spanning three centuries, and media of every kind, we will work to uncover the history of gender and sexual difference that the present Russian regime seeks to obscure and erase. What were these lives, and who were these people? How did they understand themselves, and how can we understand them today? What did they endure, what were their joys, and what did they create? In attempting to answer these questions, we will trace the cultural roots of Russia's present-day anti-queer ideology, and consider the structures of power that have shaped its national identity. Existing scholarship will provide us with context for our readings, while critical tools drawn from feminist philosophy

and queer theory help us to deepen our reflections. There are no prerequisites for this course. No knowledge of Russian is required

**Spring 2025: CLRS UN3316**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLRS 3316	001/17182	M W 11:40am - 12:55pm 614 Martin Luther King Building	Uma Payne	3.00	6/11

**CLRS UN3309 Fact and Fiction: The Document in Russian and American Literature. 3 points.**

"Truth is stranger than fiction," wrote Mark Twain in 1897. It is an axiom more relevant today than ever before, as more and more writers draw on "true events" for their literary works. Svetlana Alexievich, 2015 winner of the Nobel Prize for Literature, goes so far as to insist that "there are no borders between fact and fabrication, one flows into the other" in contemporary literature. In this course we read works from Russian and American literature that dance along this line between fact and fiction. Sometimes called "creative non-fiction," "literary journalism," or "documentary prose," these works (Sergei Tretiakov, Viktor Shklovsky, Truman Capote, Tom Wolfe, John McPhee, Artem Borovik, and others) blur the boundaries between documentary evidence and literary art. No prerequisites.

**CLRS GU4011 DOSTOEVSKY, TOLSTOY # ENG NOVEL. 3.00 points.**

A close reading of works by Dostoevsky (Netochka Nezvanova; The Idiot; A Gentle Creature) and Tolstoy (Childhood, Boyhood, Youth; Family Happiness; Anna Karenina; The Kreutzer Sonata) in conjunction with related English novels (Bronte's Jane Eyre, Eliot's Middlemarch, Woolf's Mrs. Dalloway). No knowledge of Russian is required

**CLRS GU4017 Chekhov [English]. 3 points.**

A close reading of Chekhov's best work in the genres on which he left an indelible mark (the short story and the drama) on the subjects that left an indelible imprint on him (medical science, the human body, identity, topography, the nature of news, the problem of knowledge, the access to pain, the necessity of dying, the structure of time, the self and the world, the part and the whole) via the modes of inquiry (diagnosis and deposition, expedition and exegesis, library and laboratory, microscopy and materialism, intimacy and invasion) and forms of documentation (the itinerary, the map, the calendar, the photograph, the icon, the Gospel, the Koan, the lie, the love letter, the case history, the obituary, the pseudonym, the script) that marked his era (and ours). No knowledge of Russian required.

**CLRS GU4022 Russia and Asia: Orientalism, Eurasianism, Internationalism. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores the formation of Russian national and imperial identity through ideologies of geography, focusing on

a series of historical engagements with the concept of "Asia." How has the Mongol conquest shaped a sense of Russian identity as something distinct from Europe? How has Russian culture participated in Orientalist portrayals of conquered Asian lands, while simultaneously being Orientalized by Europe and, indeed, Orientalizing itself? How do concepts of Eurasianism and socialist internationalism, both arising in the early 20th century, seek to redraw the geography of Russia's relations with East and West? We will explore these questions through a range of materials, including: literary texts by Russian and non-Russian writers (Pushkin, Lermontov, Tolstoy, Solovyov, Bely, Blok, Pilnyak, Khlebnikov, Planotov, Xiao Hong, Kurban Said, Aitimatov, Iskander, Borsky); films (Eisenstein, Tarkovsky, Kalatozov, Paradjanov, Mikhalkov); music and dance (the Ballets Russes); visual art (Vereshchagin, Roerich); and theoretical and secondary readings by Chaadaev, Said, Bassin, Trubetskoy, Leontiev, Lenin, and others.

**CLRS GU4036 Nabokov and Global Culture. 3 points.**

In 1955, an American writer of Russian descent published in Paris a thin book that forever shaped English language, American culture, and the international literary scene. That book, of course, was Vladimir Nabokov's *Lolita*.

We will speak of exile, memory and nostalgia, of hybrid cultural identities and cosmopolitan elites, of language, translation and multilingualism. All readings will be in English.

**CLRS GU4037 Poets, Rebels, Exiles: 100 Years of Russians and Russian Jews in America. 3.00 points.**

Poets, Rebels, Exiles examines the successive generations of the most provocative and influential Russian and Russian Jewish writers and artists who brought the cataclysm of the Soviet and post-Soviet century to North America. From Joseph Brodsky—the bad boy bard of Soviet Russia and a protégé of Anna Akhmatova, who served 18 months of hard labor near the North Pole for social parasitism before being exiled—to the most recent artistic descendants, this course will interrogate diaspora, memory, and nostalgia in the cultural production of immigrants and exiles

**Fall 2024: CLRS GU4037**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLRS 4037	001/11476	Th 2:10pm - 4:00pm 707 Hamilton Hall	Anna Katsnelson	3.00	5/25

**CLRS GU4038 DOSTOEVSKY, DEMONS, DICKENS. 3.00 points.**

A study of Dostoevsky and Dickens as two writers whose engagement in the here and now was vital to their work and to their practice of the novel. Readings from Dostoevsky cluster in the 1870s and include two novels, Demons (1872) and The Adolescent (1876), and selections from his Diary of a Writer. Readings from Dickens span his career and include, in addition to David Copperfield (1850), sketches and later essays.

**CLRS GU4039 Chekhov and Others. 3.00 points.**

We will explore Anton Chekhov's work on its own terms, in its cultural context, and in relation to the work of others, especially Anglophone writers who responded, directly or indirectly, to Chekhov and his work. Readings by Chekhov include selected stories (short and long), his four major plays, and Sakhalin Island, his study of the Russian penal colony. There are no prerequisites. Knowledge of Russian is not required; all readings in English. Students who know Russian are encouraged to read Chekhov's work in Russian. The course will be comparative as it addresses Chekhov on his own and in relation to anglophone writers. The course is open to undergraduates (CC, GS, BC) and graduates in GSAS and other schools. The attention to how Chekhov writes may interest students in the School of the Arts

Spring 2025: CLRS GU4039

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLRS 4039	001/11540	M W 2:40pm - 3:55pm 717 Hamilton Hall	Liza Knapp	3.00	28/50

**CLRS GU4040 The Future is Red (White and Blue): Modernity and Social Justice in U.S. and U.S.S.R.. 4 points.**

In the 1920s, the Soviet Union and the U.S. emerged as growing world powers, offering each other two compelling, if often opposed, versions of modernity. At the same time, each country saw its intercontinental rival as an attractive, but dangerous "other": a counterexample of the road not taken, and a foil for its own ideology and identity. From the 1920s to the heat of the Cold War, Some of the USSR's most prominent public figures came to the U.S. and several American intellectuals, progressive activists, and officials traveled to the Soviet experiment. This course examines the cultural images of the American and Soviet "other" in the texts that resulted from these exchanges. We will read works about America from Sergei Esenin, Vladimir Mayakovsky, Ilya Il'f and Evgeny Petrov, and poems, essays, and novels about Russia by Langston Hughes, Claude McKay, Louise Bryant, W.E.B. Du Bois, John Steinbeck, and others. Each of these texts attempts to grapple with what it means to be modern—both technologically advanced and socially liberated—in different national contexts and under different proclaimed ideologies.

**CLRS GU4111 Narrative and Repetition: Circling in Time and Space. 3.00 points.**

An introduction to central concepts in narrative theory: plot, archetype, myth, story vs. discourse, Freudian analysis, history and narrative, chronotype and personal narrative. These are explored in the context of sustained investigation of a particular plot device: the time loop. Examples come from Russian modernist fiction, Soviet and American science fiction, and film. We compare being stuck in a time loop with being lost in space - a theme found in personal narratives shared orally and online, as well as in literary fiction. Students develop a final paper topic on time loop narrative of their choice

**CLRS GU4113 Impossible Worlds in Russian and English Ficiton. 3.00 points.**

It is often remarked that narratives constrain. The pressure to fit knowledge to a plot structure can limit understanding. This course explores the problem of narrative structure by focusing on the storyworld. We ask, can distorting the time and space of a fictional world enable new knowledge? We consider fictions set in other places (heterotopias), stories without endings, genre hybrids, time travel, 4D space. In addition to texts, units focus on oral storytelling, and image and game based narrative. The syllabus is historical and comparative, contrasting (primarily) Russophone and Anglophone works drawn from the 19th-20th centuries. Our investigation of impossible worlds is supported throughout by readings in narrative theory. The course thus also provides an introduction to Bakhtinian, structuralist, and cognitive narrative studies. No prerequisites. All assigned reading is provided in English

**CLRS GU4213 Cold War Reason: Cybernetics and the Systems Sciences. 3.00 points.**

The Cold War epoch saw broad transformations in science, technology, and politics. At their nexus a new knowledge was proclaimed, cybernetics, a putative universal science of communication and control. It has disappeared so completely that most have forgotten that it ever existed. Its failure seems complete and final. Yet in another sense, cybernetics was so powerful and successful that the concepts, habits, and institutions born with it have become intrinsic parts of our world and how we make sense of it. Key cybernetic concepts of information, system, and feedback are now fundamental to our basic ways of understanding the mind, brain and computer, of grasping the economy and ecology, and finally of imagining the nature of human life itself. This course will trace the echoes of the cybernetic explosion from the wake of World War II to the onset of Silicon Valley euphoria

Fall 2024: CLRS GU4213

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLRS 4213	001/11518	M 2:10pm - 4:00pm 613 Hamilton Hall	Adam Leeds	3.00	9/15

**CLRS GU4214 The Road to Power: Marxism in Germany and Russia. 3.00 points.**

Before Marxism was an academic theory, it was a political movement, but it was not led by Marx. This course examines the years in between, when a new generation began the task of building the organizations, practices, and animating theories that came to define "Marxism" for the twentieth century. Two of the most important such organizations were the German and Russian Social Democratic Parties. Responding to dramatically different contexts, and coming to equally different ends, they nevertheless developed organically interconnected. This course selects key episodes from the road to power of both parties, from their founding to the Russian Revolution— what might be called the "Golden Age" of Marxism. This course is open to all undergraduates who have completed Contemporary Civilization

**Spring 2025: CLRS GU4214**

**CLRS GU4215 Thinking Socialism: The Soviet Intelligentsia After Stalin. 3.00 points.**

While Soviet Union after the second World War is often figured as a country of “stagnation,” in contrast to the avant garde 1920s and the tumult of Stalin’s 1930s, this figure is currently being re-evaluated. Political calm belied a rapidly changing society. The period developed a Soviet culture that was indubitably educated, modern, and mass. Despite, or within, or against the ever changing and ambiguous boundaries, censors, and dogmas, Soviet intellectuals generated cultural productions that reflected upon, processed, and critiqued the reality in which they lived and created. This course examines the development of this late Soviet “intelligentsia,” the first that was fully a product of Soviet society itself. Against a background of social history, we will select developments in various realms of cultural production for further examination, which from year to year may include philosophy, literature, political culture and ideology, art, and science

**CZECH LANGUAGE AND LITERATURE****CZCH UN1101 ELEMENTARY CZECH I. 4.00 points.**

### **POLI GU4051 Movements in Polish Cinema. 3 points.**

This course introduces and explores three separate movements in Polish post-World War II cinema – the “Polish School” of 1955–1965, the “Cinema of Moral Concern” of 1976–1981, and the “New Naïveté,” of 1999–2009. Each of these currents adopted a loosely conceived, historically specific aesthetic and ideological platform, which they sought to put into practice artistically in order to exert a therapeutic and a didactic influence on the culture and society of their time.

- 
- The “Polish School,” which was characterized by a blend of Italian neorealist and Polish Romantic or absurdist/existentialist styles, sought to represent and work through the national trauma of World War II in a context in which political censorship prevented the direct address of such issues. It includes the early work of world-renowned director Andrzej Wajda, as well as works by prominent filmmakers such as Andrzej Munk, Jerzy Kawalerowicz, and Wojciech Has.
- 
- The “Cinema of Moral Concern,” which drew on and combined the techniques of West European “cinemas of truth” with those of the New Hollywood, was in the forefront of the cultural ferment of the late 70s, which was devoted to the establishment of an underground civil society outside the institutions of the communist state and led up to the founding of the trade union Solidarity. It includes early

work by internationally recognized filmmakers Krzysztof Kieślowski, Krzysztof Zanussi, and Agnieszka Holland.

- 
- The “New Naïveté” drew on a broad variety of Hollywood and international styles, seeking to transform the legacy of Solidarity’s anti-communist “revolution of the spirit” into contemporary forms of cultural capital in order to lay the foundations for “capitalism with a human face.” Among filmmakers active in this movement are Krzysztof Krauze, Robert Gliński, and Piotr Trzaskalski.
- 

Screening approximately one film a week, we will view at least five works from each movement, examining and discussing their individual formal and aesthetic principles and ideological investments, their relation to their respective movement as a whole, and their impact on the culture of their day.

**RUSS UN3105 Real World Russian. 3 points.**

Prerequisites: (RUSS UN2102)

This content-based course has three focal points: 1) communicative skills 1) idiomatic language; 3) cross-cultural awareness.

The course is designed to help students further develop all of their language skills with particular focus on communicative and information processing skills, as well as natural student collaboration in the target language. The materials and assignments that will be used in class allow to explore a broad range of social, cultural, and behavioral contexts and familiarize students with idiomatic language, popular phrases and internet memes, developments of the colloquial language, and the use of slang in everyday life.

On each class students will be offered a variety of content-based activities and assignments, including, information gap filling, role-play and creative skits, internet search, making presentations, and problem-solving discussions. Listening comprehension assignments will help students expand their active and passive vocabulary and develop confidence using natural syntactic models and idiomatic structures.

Students will be exposed to cultural texts of different registers, which will help them enhance their stylistic competence. Students will learn appropriate ways to handle linguo-social situations, routines, and challenges similar to those they come across when traveling to Russia. They will explore various speech acts of daily communication, such as agreement/disagreement, getting and giving help, asking for a favor, expressing emotions, and so forth. Part of class time will be devoted to nonverbal communication, the language of gestures, emotional phonetics and intonation.

**RUSS UN3107 Russian Through Theater. 2.00 points.**

Russian Through Theater is a content-based language course designed for students who already have the equivalent of

two semesters of college-level Russian and want to continue exploring their path as Russian language learners. This course is experimental in that it combines elements of traditional language learning with theatricality and creativity. A stress-free learning environment will stimulate language skills and fluency. Staging skits, theatrical pieces, short at first and longer by the end of the semester, will encourage students to focus on phonetics, intonation contour, and idiomatic expressions. In addition to performing skits and short plays, the course includes various forms of improvisation. Reading, listening and speaking - these three essential skills of language learning are constantly practiced. Incorporating theater into language learning not only makes the process enjoyable but also creates a rich, immersive environment that supports language development holistically. Various performative and ludic models, offered by the theater productions -- rehearsed and improvised alike -- will help students with shaping a language persona, a skill that students may use in life situations. This skill adds confidence to their conduct of language and allows to communicate effectively with limited linguistic knowledge. Classes will be conducted primarily in Russian, with sporadic instruction in English when necessary for clarification of assignments or for better understanding of terminology used during mini-lectures

## RUSSIAN LITERATURE (IN ENGLISH)

**RUSS UN3220 LITERATURE # EMPIRE (19C LIT). 3.00 points.**

Explores the aesthetic and formal developments in Russian prose, especially the rise of the monumental 19th-century novel, as one manifestation of a complex array of national and cultural aspirations, humanistic and imperialist ones alike. Works by Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov. Knowledge of Russian not required

**Fall 2024: RUSS UN3220**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RUSS 3220	001/00652	T Th 10:10am - 11:25am 202 Milbank Hall	John Wright	3.00	25/30

**RUSS UN3221 LIT # REVOLUTION (20TH C LIT). 3.00 points.**

The revolutionary period (1905-1938) in Russia was not only one of extreme social upheaval but also of exceptional creativity. Established ideas about individuality and collectivity, about how to depict reality, about language, gender, authority, and violence, were all thrown open to radical questioning. Out of this chaos came ideas about literature and film (just for example) which have shaped Western thought on these subjects to this day. In this course we will study a variety of media and genres (poetry, manifestos, film, painting, photomontage, the novel, theoretical essays) in an effort to gain a deep understanding of this complex and fascinating period in Russian cultural history

**Spring 2025: RUSS UN3221**

Laboratories

**RUSS UN3222 TOLSTOY AND DOSTOEVSKY. 3.00 points.**

Two epic novels, Tolstoy's War and Peace and Dostoevsky's The Brothers Karamazov, will be read along with selected shorter works. Other works by Tolstoy include his early Sebastopol Sketches, which changed the way war is represented in literature; Confession, which describes his spiritual crisis; the late stories Kreutzer Sonata and Hadji Murad; and essays on capital punishment and a visit to a slaughterhouse. Other works by Dostoevsky include his fictionalized account of life in Siberian prison camp, The House of the Dead; Notes from the Underground, his philosophical novella on free will, determinism, and love; A Gentle Creature, a short story on the same themes; and selected essays from Diary of a Writer. The focus will be on close reading of the texts. Our aim will be to develop strategies for appreciating the structure and form, the powerful ideas, the engaging storylines, and the human interest in the writings of Tolstoy and Dostoevsky. No knowledge of Russian is required

**Spring 2025: RUSS UN3222**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RUSS 3222	001/11528	M W 10:10am - 11:25am 303 Hamilton Hall	Liza Knapp	3.00	32/40

**RUSS UN3223 Magical Mystery Tour: The Legacy of Old Rus'. 3 points.**

Winston Churchill famously defined Russia as "a riddle wrapped in a mystery inside an enigma." This course aims at demystifying Russia by focusing on the core of its "otherness" in the eyes of the West: its religious culture. We will explore an array of texts, practices and pragmatic sites of Russian religious life across such traditional divides as medieval and modern, popular and elite, orthodox and heretical. Icons, liturgical rituals, illuminated manuscripts, magic amulets, religious sects, feasting and fasting, traveling practices from pilgrimages to tourism, political myths and literary mystification, decadent projects of life-creation, and fervent anticipation of the End are all part of the tour that is as illuminating as it is fun. No knowledge of Russian required.

**RUSS UN3230 Tricksters in World Culture: Mockery, Subversion, Rebellion. 3.00 points.**

Tricksters constitute one of the universal themes or tropes in mythology and folklore of many cultures. Through the discussions of ancient Greek, Native-American, African, Paleo-Asiatic, Scandinavian, African-American, Muslim and Jewish myths and folklore about tricksters, the course will telescope the cultural functions of the comedic transgression as a form of social critique; it will also highlight cynicism, its productive and dangerous aspects. Then we'll introduce different historical subtypes of tricksters, such as a fool, jester, holy fool, kynik, picaro, con artist, female and queer tricksters, thus moving through premodern and early modern periods. Each type of the trickster is illustrated by literary examples from different

world cultures (European and non-European alike) as well as theoretical works of Mikhail Bakhtin, Michel Foucault, Giorgio Agamben, and Peter Sloterdijk. Finally, the role of the trickster in modernity will be discussed through the case of Soviet tricksters, who had become true superstars manifesting the resistance to repressive political ideology by the means of “cynical reason”. **FORMAT** The class consists of lectures and group discussions. On a typical week, the first class will be a lecture for all students; for the second class of the week, you will be divided into 3 sections and have separate sessions (all three at the same time in different rooms) led by Teaching Assistants. Assignments for group discussions are listed on the syllabus along with others. We will not break the class in discussion sections before Week 3. The distribution of students between discussion sections will be announced in class after the beginning of the semester. This course is a co-requisite of RUSS UN3232

**Fall 2024: RUSS UN3230**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **RUSS GU4006 Russian Religious Thought, Praxis, and Literature. 3 points.**

This course examines the interaction of religious thought, praxis, and literature in the nineteenth and early twentieth centuries. As the Russian Empire sought to define its place in the world, many Russian writers and thinkers turned to religious experience as a source of meaning. A varied body of work emerged as they responded to the tradition of Russian Orthodoxy. The goals of this course are to acquaint students with key texts of Russian religious thought and to give students the knowledge and tools required for critical inquiry into the religious dimension of Russian literature and culture.

### **RUSS GU4013 Late Tolstoy (Beyond Anna Karenina): Thinker, Writer, Activist, Pacifist, Humanitarian, and Mortal. 4 points.**

The focus of the course is Tolstoy's work in the last 35 years of his life. On finishing *War and Peace* and *Anna Karenina*, Tolstoy swore off the kind of literature and decided to devote himself to what he believed would be more meaningful work. This work included confessions, letters, tracts, critiques, proclamations, invectives, exposes, meditations, and gospel, and as more fiction, some of which is overly didactic and some which is, like his earlier fiction, more covertly so.

### **RUSS GU4046 The Trickster in the Modern Russian Lit. 3.00 points.**

“Trickster” does not simply mean “deceiver” or “rogue” (the definition of trickster according to the Oxford Encyclopedic English Dictionary), but rather “creative idiot”, to use Lewis Hyde’s expression. This hero unites the qualities of characters who at first sight have little in common — the “selfish buffoon” and the “culture hero”; someone whose subversions and

transgressions paradoxically amplify the culture-constructing effects of his (and most often it is a “he”) tricks. The trickster is a typical comic protagonist – it is enough to recollect Renard the Fox from the medieval *Roman de Renard*, Panurge from François Rabelais’ *The Life of Gargantua and of Pantagruel*, Cervantes’ *Sanch# Panza*, Beaumarchais’s *Figaro*, Gogol’s *Khlestakov*, Mark Twain’s *Tom Sawyer* and *Huckleberry Finn*, Yaroslav Hašek’s *Švejk*, Charlie Chaplin’s *Tramp*, Max Bialystock in *Mel Brooks’ Producers*, *Bart Simpson* and *Borat* (Sacha Baron Cohen), as well as *Jon Stewart* and *Stephen Colbert* along with many other comical characters of the same genre – to confirm this self-evident thesis

### **RUSS GU4107 RUSS LIT/CULTR-NEW MILLENNIUM. 3.00 points.**

This course examines most representative works of Russian literature and culture since the 1990s and until the present moment. While discussing recent novels, short stories, dramas, poems, and films, we will address the issues of politics, re-assessment of history, gender, family, national identity, violence and terrorism. No knowledge of Russian is expected

### **RUSS GU4126 Remediating Protest: Transgressive Aesthetics in Soviet # Post-Soviet Culture. 3.00 points.**

In the past ten years the authoritarian regime in Russia has rendered political protest exceedingly dangerous but it has not immobilized the cultural forms of dissent shaping contemporary anti-war resistance. From a feminist performance in a church to satirical documentary and whimsical trial speeches, contemporary artists, journalists, and activists have been creating the language of protest essential to understanding post-Soviet space. Why has protest in the post-Soviet region been taking these specific aesthetic forms? Taking our point of departure from Rancière’s idea of resistance – signifying both firm persistence and a practice yielding change – we will explore how contemporary post-Soviet protest genres rely on the communication strategies that return to Soviet parody, poetic form, underground art, and dissident practices of cultural distribution. Looking at laughter as a transgressive communicative device, we will search for the reverberations of Soviet satire in Russian and Belorussian stand-up, as well as in less obvious genres, such as the recent documentary work by Alexey Navalny. We will focus on mimesis as a tool of resistance in Soviet underground art and contemporary performative practices. Exploring the aesthetics of testimony rooted in Soviet show trials, we will examine how Soviet journalistic prose and, later, contemporary theater reclaimed its devices. We will study the persistence of bodily tropes and language of violence in women’s prose, drama, contemporary feminist poetry and feminist performance from Russia and Belarus. Finally, we will discuss how dissident practices of samizdat and tamizdat helped create cultural networks in Soviet Russia and beyond as we reflect on the use of new media platforms and technologies of digital activism in post-Soviet space. Rather than searching for instances of direct influence between cultural producers, we will examine how protest strategies are shaped and remediated while activating multiple layers of cultural memory. Students will learn to annotate

images and videos online, write blog posts and carry out an independent research project in consultation with the instructor. At the end of the course they have a choice of presenting the project in the form of a paper or a multimedia digital piece. Enrollment is open to upper level undergraduate and graduate students. All primary and secondary readings are in English or have subtitles

### **RUSS GU4453 Women and Resistance in Russia. 3 points.**

Cultural and political history of women and resistance in Russia, from the Putin era to medieval saints. Explores forms and specificity of female resistance in Russia across history. Addresses questions of historical narrative in light of missing sources. Material includes: prose by Svetlana Alexievich, Lydia Chukovskaya, Lidiya Ginzburg, Alexandra Kollontai, Masha Gessen, Anna Politkovskaia, and Pussy Riot's Nadezhda Tolokonnikova; poetry by Anna Akhmatova, Marina Tsvetaeva and Sophia Parnok; films by Kira Muratova; visual art by Natalia Goncharova and fellow "amazons" of the Russia Avant Garde, together with memoirs, saint's lives, letters, diaries, and urban legend. Final project: curating a museum exhibit.

**Prerequisites:** Open to undergraduate and graduate students. No Russian required for the undergraduate students. Graduate students are expected to do the readings in Russian.

## **RUSSIAN LITERATURE**

### **RUSS UN3332 Vvedenie v russkuiu literaturu: Scary Stories. 3 points.**

For non-native speakers of Russian.

**Prerequisites:** two years of college Russian or the instructor's permission. The course is devoted to the reading, analysis, and discussion of a number of Russian prose fiction works from the eighteenth to twentieth century. Its purpose is to give students an opportunity to apply their language skills to literature. It will teach students to read Russian literary texts as well as to talk and write about them. Its goal is, thus, twofold: to improve the students' linguistic skills and to introduce them to Russian literature and literary history. A close study in the original of the "scary stories" in Russian literature from the late eighteenth century. Conducted in Russian.

### **RUSS UN3333 VVEDENIE V RUSSKUIU LITERATURU. 3.00 points.**

For non-native speakers of Russian.

**Prerequisites:** two years of college Russian or the instructor's permission. **Prerequisites:** two years of college Russian or the instructor's permission. RUSS 4338	001/11538	T Th 2:40pm - 3:55pm 607 Hamilton Hall	Irina Reyfman	3.00	6/18

### **RUSS GU4340 Chteniia po russkoi literature: Bulgakov. 3.00 points.**

The course is devoted to reading and discussing of Mikhail Bulgakov's masterpiece Master i Margarita. Classes are conducted entirely in Russian

### **RUSS GU4344 ADV RUSSIAN THROUGH HISTORY. 3.00 points.**

**Prerequisites:** RUSS UN3101 and RUSS UN3102 three years of college Russian or the equivalent.

**Prerequisites:** RUSS UN3101 and RUSS UN3102 Third-Year Russian I and II, or placement test. A language course designed to meet the needs of those foreign learners of Russian as well as heritage speakers who want to develop further their reading, speaking, and writing skills and be introduced to the history of Russia

### **RUSS GU4345 ADV RUSSIAN THROUGH HISTORY. 3.00 points.**

**Prerequisites:** three years of Russian.

**Prerequisites:** three years of Russian. This is a language course designed to meet the needs of those foreign learners of Russian as well as heritage speakers who want to further develop their reading, listening, speaking, and writing skills and be introduced to the history of Russia

## **SLAVIC CULTURE**

### **SLCL UN3001 SLAVIC CULTURES. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The history of Slavic peoples - Russians, Czechs, Poles, Serbs, Croats, Ukrainians, Bulgarians - is rife with transformations, some voluntary, some imposed. Against the background of a schematic external history, this course examines how Slavic peoples have responded to and have represented these transformations in various modes: historical writing, hagiography, polemics, drama and fiction, folk poetry, music, visual art, and film. Activity ranges over lecture (for historical background) and discussion (of primary sources)

**Fall 2024: SLCL UN3001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SLCL 3001	001/10732	T Th 2:40pm - 3:55pm 330 Uris Hall	Jessica Merrill, Christopher Harwood	3.00	39/60

**SLCL UN3100 FOLKLORE PAST # PRESENT. 3.00 points.**

An introduction to the concept of folklore as an evolving, historical concept, and to primary source materials which have been framed as such. These are translated from Bosnian, Chukchi, Czech, Finnish, German, Polish, Russian, Serbian, Tuvan, Ukrainian, Yiddish, Yupik languages, and others. Geographical range is from South-Eastern Europe to the Russian Far East. We learn about particular oral traditions, their social mechanisms of transmission and performance, their central themes and poetics. Attention is paid to the broader sociopolitical factors (Romantic nationalism, colonization) which have informed the transcription, collection and publication of these traditions. For the final project, students learn how to conduct an ethnographic interview, and to analyze the folklore of a contemporary social group. Our goal is to experientially understand—as folklorists and as members of folk groups ourselves—the choices entailed in transcribing and analyzing folklore

**SLCL GU4002 Folklore Past and Present. 3.00 points.**

This course moves from Serbia and Bosnia, to Ukraine and the Czech lands, through Poland to Russia and Finland and then on to the southern Siberian steppes and finally the Russian Far East. Along the way, the course is divided into three major thematic and theoretical units. *Epics and Ballads: History, Performance, Identity* Our first focus is on historical songs in the context of Romantic nationalism. We will explore why people (philologists) began to write these down, and how they were they edited and organized into print books. We discuss what these publications meant in the context of Romantic nationalist movements for political autonomy from the Ottoman or Hapsburg Empires. Given the stakes, some scholars were (maybe too) creative with their material. We will ask: What makes an epic text authentic, as opposed to an invented tradition, or even a fake? Throughout, we will pay attention to how traditions of oral performance were learned and transmitted within specific communities of artists, such as Ramadan performers, upper-class Bosnian women, and Ukrainian minstrels. *Words in Context: Poetry, Power, Positioning* Our second unit begins with the theoretical

redefinition of folklore in the 20th c. Folklore is no longer defined by who performs it (e.g. peasants), but by its characteristics of variation and localization. We begin with a genre that anyone can perform—the proverb. To understand the power of small forms we need place them in their real-world context. We learn about ethnographic interviewing methods aimed at eliciting the local meanings of folklore. We consider relationship between the body and verbal folklore in south Siberian shamanism and in the performance of charms by folk healers in Russia and Finland. In order to bring the study of folklore home, to us at Columbia, we consider campus legends and folklore of the COVID-19 pandemic. This unit provides students with the tools needed to design and carry out their own mini-ethnography, which serves as the final project for the course. *Oral Narrative: Legends, Fairytales, Cross-Cultural Motifs* Our last major unit is dedicated to folk narrative—the memorate (personal narrative), the legend and the fairytale. We begin with Russian memorates about nature and house spirits. Narratives told as true events (memorates, legends) are contrasted with the genre of the fairy tale. We learn about how fairy tales were typically performed and collected in Russia in the 19th c., and then turn to 20th c. theoretical lenses for understanding them—structuralism and psychoanalysis (delving into the meaning of Baba Yaga, the witch living in a hut on chicken legs). In the last two weeks we consider the global spread of tales and legends. We compare variants of a tale which has been found across Eurasia, consider the role of globalization in contemporary children's folklore, as well as the internet as a medium for sharing scary stories

**Spring 2025: SLCL GU4002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SLCL 4002	001/17181	T 6:10pm - 8:00pm 609 Hamilton Hall	Jessica Merrill	3.00	22/24

**HNGR GU4028 Modern Hungarian Prose in Translation: Exposing Naked Reality. 3 points.**

This course introduces students to representative examples of an essentially robust, reality-bound, socially aware literature. In modern Hungarian prose fiction, the tradition of nineteenth-century "anecdotal realism" remained strong and was further enlivened by various forms of naturalism. Even turn-of-the century and early twentieth-century modernist fiction is characterized by strong narrative focus, psychological realism, and an emphasis on social conditions and local color. During the tumultuous decades of the century, social, political, national issues preoccupied even aesthetics-conscious experimenters and ivory-tower dwellers. Among the topics discussed will be "populist" and "urban" literature in the interwar years, post-1945 reality in fiction, literary memoirs and reportage, as well as late-century minimalist and postmodern trends.

**HNGR GU4050 The Hungarian New Wave: Cinema in Kadarist Hungary [In English]. 3 points.**

**Not offered during 2023-2024 academic year.**

Hungarian cinema, like film-making in Czechoslovakia, underwent a renaissance in the 1960's, but the Hungarian

new wave continued to flourish in the 70's and film remained one of the most important art forms well into the 80's. This course examines the cultural, social and political context of representative Hungarian films of the Kadarist period, with special emphasis on the work of such internationally known filmmakers as Miklos Jancso, Karoly Makk, Marta Meszaros, and Istvan Szabo. In addition to a close analysis of individual films, discussion topics will include the "newness" of the new wave in both form and content (innovations in film language, cinematic impressionism, allegorical-parabolic forms, auteurism, etc.), the influence of Italian, French, German and American cinema, the relationship between film and literature, the role of film in the cultures of Communist Eastern Europe, the state of contemporary Hungarian cinema. The viewing of the films will be augmented by readings on Hungarian cinema, as well as of relevant Hungarian literary works.

## SLAVIC LITERATURES

### SLLT GU4000 EURASIAN EXILES & LIT IN N.Y.. 3

#### *points.*

Eurasian Exiles and Literature in New York examines Eurasian exile literature in the United States and especially New York over the course of four emigration waves: so called Second Wave writers who fled the Russian Revolution (Vladimir Nabokov), the Third Wave exiles, who came after World War II (Joseph Brodsky and Sergei Dovlatov), the exile literature of the last Soviet generation who came as refugees in the late 1970s and early 1980s (Gary Shteyngart, Irina Reyn), and the perestroika and post-Soviet diaspora, who came to New York after 1991. All four waves drew upon a rich Russian cultural heritage and influences that they encountered abroad to create innovative work: new topoi and urban fiction as well as unique images of New York. All four have complicated and fascinating engagements with American society and the cultures of New York City, and also with the Russian and Eurasian émigré communities, vibrant worlds unto themselves. The initial waves drew mainly on East European themes and were still attached to Russia while the latter were increasingly concerned with non-Russian nationalities like Bukharan Jews, Georgians, and Tajiks. The course looks closely and critically at the meanings of "exile" and "Eurasia," as well as the poetics of exilic and urban writing; it asks whether we can still speak of exiles and exile fiction in the postSoviet age of globalization, social media, and unprecedented migration.

## UKRAINIAN LANGUAGE AND LITERATURE

### UKRN UN1101 ELEMENTARY UKRAINIAN I. 4.00

#### *points.*

Designed for students with little or no knowledge of Ukrainian. Basic grammar structures are introduced and reinforced, with equal emphasis on developing oral and written communication skills. Specific attention to acquisition of high-frequency vocabulary and its optimal use in real-life settings

#### Fall 2024: UKRN UN1101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**UKRN GU4001 Advanced Ukrainian I. 3 points.**

The course is for students who wish to develop their mastery of Ukrainian. Further study of grammar includes patterns of word formation, participles, gerunds, declension of numerals, and a more in-depth study of difficult subjects, such as verbal aspect and verbs of motion. The material is drawn from classical and contemporary Ukrainian literature, press, electronic media, and film. Taught almost exclusively in Ukrainian.

**UKRN GU4002 Advanced Ukrainian II. 3 points.**

The course is for students who wish to develop their mastery of Ukrainian. Further study of grammar includes patterns of word formation, participles, gerunds, declension of numerals, and a more in-depth study of difficult subjects, such as verbal aspect and verbs of motion. The material is drawn from classical and contemporary Ukrainian literature, press, electronic media, and film. Taught almost exclusively in Ukrainian.

**UKRN GU4006 Advanced Ukrainian Through Literature, Media, and Politics. 3.00 points.**

This course is organized around a number of thematic centers or modules. Each is focused on stylistic peculiarities typical of a given functional style of the Ukrainian language. Each is designed to assist the student in acquiring an active command of lexical, grammatical, discourse, and stylistic traits that distinguish one style from the others and actively using them in real-life communicative settings in contemporary Ukraine. The styles include literary fiction, scholarly prose, and journalism, both printed and broadcast

**Fall 2024: UKRN GU4006**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
UKRN 4006	001/10736	M W 1:10pm - 2:25pm 614 Martin Luther King Building	Yuri Shevchuk	3.00	1/12

**UKRN GU4007 Advanced Ukrainian Through Literature, Media and Politics II. 3.00 points.**

This course is organized around a number of thematic centers or modules. Each is focused on stylistic peculiarities typical of a given functional style of the Ukrainian language. Each is designed to assist the student in acquiring an active command of lexical, grammatical, discourse, and stylistic traits that distinguish one style from the others and actively using them in real-life communicative settings in contemporary Ukraine. The styles include literary fiction, scholarly prose, and journalism, both printed and broadcast

**Spring 2025: UKRN GU4007**

**UKRN GU4033 FIN DE SIECLE UKRAINIAN LIT. 3.00 points.**

The course focuses on the emergence of modernism in Ukrainian literature in the late 19th century and early 20th

century, a period marked by a vigorous, often biting, polemic between the populist Ukrainian literary establishment and young Ukrainian writers who were inspired by their European counterparts. Students will read prose, poetry, and drama written by Ivan Franko, the writers of the Moloda Muza, Olha Kobylianska, Lesia Ukrainka, and Volodymyr Vynnychenko among others. The course will trace the introduction of feminism, urban motifs and settings, as well as decadence, into Ukrainian literature and will analyze the conflict that ensued among Ukrainian intellectuals as they shaped the identity of the Ukrainian people. The course will be supplemented by audio and visual materials reflecting this period in Ukrainian culture. Entirely in English with a parallel reading list for those who read Ukrainian

**Spring 2025: UKRN GU4033**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
UKRN 4033	001/11868	T Th 1:10pm - 2:25pm 609 Hamilton Hall	Mark Andryczyk	3.00	6/18

**UKRN GU4037 SOV UKRAINIAN MODERNISM: REV, REB, EXPER. 3.00 points.**

This course studies the renaissance in Ukrainian culture of the 1920s - a period of revolution, experimentation, vibrant expression and polemics. Focusing on the most important developments in literature, as well as on the intellectual debates they inspired, the course will also examine the major achievements in Ukrainian theater, visual art and film as integral components of the cultural spirit that defined the era. Additionally, the course also looks at the subsequent implementation of the socialist realism and its impact on Ukrainian culture and on the cultural leaders of the renaissance. The course treats one of the most important periods of Ukrainian culture and examines its lasting impact on today's Ukraine. This period produced several world-renowned cultural figures, whose connections with the 1920s Ukraine have only recently begun to be discussed. The course will be complemented by film screenings, presentations of visual art and rare publications from this period. Entirely in English with a parallel reading list for those who read Ukrainian

**UKRN GU4054 CREATING ID-CONTEMP UKRN CULT. 3.00 points.**

This course presents and examines post-Soviet Ukrainian literature. Students will learn about the significant achievements, names, events, scandals and polemics in contemporary Ukrainian literature and will see how they have contributed to Ukraine's post-Soviet identity. Students will examine how Ukrainian literature became an important site for experimentation with language, for providing feminist perspectives, for engaging previously-banned taboos and for deconstructing Soviet and Ukrainian national myths. Among the writers to be focused on in the course are Serhiy Zhadan, Yuri Andrukhovych, Oksana Zabuzhko and Taras Prokhasko. Centered on the most important successes in literature, the course will also explore key developments in music and visual art of this period. Special focus will be given to how

the 2013/2014 Euromaidan revolution and war are treated in today's literature. By also studying Ukrainian literature with regards to its relationship with Ukraine's changing political life, students will obtain a good understanding of the dynamics of today's Ukraine and the development of Ukrainians as a nation in the 21st century. The course will be complemented by audio and video presentations. Entirely in English with a parallel reading list for those who read Ukrainian

## SOCIOLOGY

### THE SOCIOLOGY DEPARTMENT:

Department website: <https://sociology.columbia.edu/>

Office location: 501 Knox Hall

Office contact: 501 Knox Hall; 212-853-1909

<http://www.sociology.columbia.edu>

Director of Undergraduate Studies: Teresa Sharpe, 501 Knox;  
[ts2785@columbia.edu](mailto:ts2785@columbia.edu)

Undergraduate Administrator: Winston Gordon, 501 Knox;  
[wg2339@columbia.edu](mailto:wg2339@columbia.edu)

### THE DEPARTMENT OF SOCIOLOGY

Sociology is the study of society. In examining patterns of association, sociologists explore the interactions of people, communities, and organizations. In this sense, sociology is not the study of people; it is the study of the relationships among people. This study includes the associations between people and the products of human interaction, such as organizations, technologies, economies, cities, culture, media, and religion. In the kinds of questions it asks, sociology is a deeply humanist discipline and sociologists demand the analytic rigor of scientific investigation.

In training students in our department, we encourage them to ask big questions and we work to give them the tools to provide answers. These tools might mean ethnographic observation, pouring through historical archives, looking at census data, analyzing social networks, or interviewing people from various walks of life.

As a bridging discipline that seeks the scientific exploration of questions that matter to human communities, such as inequality and social injustice, sociology addresses many of the same areas of life as our neighboring social science disciplines. Yet we often approach these areas quite differently. For example, problems of economic and political life are a central concern to sociologists. Rather than explore these as independent or particular features of society, we seek to embed them within the complex whole of the social world. Students will find the Department of Sociology to be a broad, demanding department that provides its students with the conceptual and

methodological tools to make sense of the opportunities and social problems of the global communities in which we live.

### DEPARTMENT HONORS AND PRIZES

In order to be considered for departmental honors, majors must have a minimum GPA of 3.6 overall and 3.8 in courses in the Department of Sociology. In addition, students must produce an exceptional honors thesis in the two-semester Senior Seminar (SOCI UN3995-SOCI UN3996 SENIOR SEMINAR).

In order to register for the Senior Seminar, students must have completed SOCI UN3010 METHODS FOR SOCIAL RESEARCH and have had their research project accepted by the faculty member teaching the Senior Seminar. Submissions of research projects are due by May 1 preceding the seminar. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## MAJOR IN SOCIOLOGY

The major in sociology requires a minimum of 30-31 points as follows:

### Core Courses

The following three courses are required (10 points):

SOCI UN1000	THE SOCIAL WORLD
SOCI UN3000	SOCIAL THEORY
SOCI UN3010	METHODS FOR SOCIAL RESEARCH

### Elective Courses

Select six courses (20-21 points) in the Department of Sociology, to include at least three lecture courses (2000- or 3000-level, 3 points each) and at least two seminars (4 points each). The sixth course could be either a lecture course (to a total of 30 points) or a seminar (to a total of 31 points). For students taking the two-semester Senior Seminar, the sixth course must be a seminar. Some examples of electives include: \*

SOCI UN3020	Social Statistics
SOCI UN3213	Sociology of African American Life
SOCI UN3235	SOCIAL MOVEMENTS
SOCI UN3490	MISTAKE, MISCONDUCT, DISASTER
SOCI UN3285	ISRAELI SOC # ISR-PLS CONFLICT
SOCI UN3264	The Changing American Family
SOCI UN3900	Societal Adaptations to Terrorism
SOCI UN3914	INEQUALITY, POVERTY # MOBILITY
SOCI UN3931	Sociology of the Body
SOCI UN3974	SOCI OF SCHOOLS,TEACH,LEARNING
SOCI UN3995	Senior Seminar
SOCI UN3996	SENIOR SEMINAR

\* These may include the two-semester *Senior Seminar* (SOCI UN3995-SOCI UN3996).

## MINOR IN SOCIOLOGY

The minor in sociology requires the Social World, Social Theory, and 3 elective courses (the elective courses must be 3 or 4 units):

### Core Courses

The following courses are required for the minor in Sociology

SOCI UN1000	THE SOCIAL WORLD
SOCI UN3000	SOCIAL THEORY

### Electives

Select three courses (10 points) in the Department of Sociology. Some examples of electives include:

SOCI UN3020	Social Statistics
SOCI UN3212	Methods of Social Research
SOCI UN3235	SOCIAL MOVEMENTS
SOCI UN1203	The Social Animal in the Digital Age
SOCI UN3285	ISRAELI SOC # ISR-PLS CONFLICT
SOCI UN3675	ORGANIZING INNOVATION
SOCI UN3914	INEQUALITY, POVERTY # MOBILITY

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Sociology

The concentration in sociology requires a minimum of 20 points as follows:

### Core Courses

The following three courses are required (10 points):

SOCI UN1000	THE SOCIAL WORLD
SOCI UN3000	SOCIAL THEORY
SOCI UN3010	METHODS FOR SOCIAL RESEARCH

### Elective Courses

Select three courses (10 points) in the Department of Sociology, one of which must be a seminar. Some examples of electives include:

SOCI UN3900	Societal Adaptations to Terrorism
SOCI UN3914	INEQUALITY, POVERTY # MOBILITY
SOCI UN3915	Stigma and Discrimination
SOCI UN3931	Sociology of the Body
SOCI UN3974	SOCI OF SCHOOLS,TEACH,LEARNING
SOCI UN3985	Queer Practice

SOCI UN3995	Senior Seminar
SOCI UN3996	SENIOR SEMINAR

## FALL 2024

### **SOCI UN3000 SOCIAL THEORY. 4.00 points.**

Prerequisites: Sophomore standing.

Prerequisites: Sophomore standing. Required for all sociology majors. Prerequisite: at least one sociology course of the instructor's permission. Theoretical accounts of the rise and transformations of modern society in the 19th and 20th centuries. Theories studied include those of Adam Smith, Tocqueville, Marx, Durkheim, Max Weber, Roberto Michels. Selected topics: individual, society, and polity; economy, class, and status; organization and ideology; religion and society; moral and instrumental action

#### **Fall 2024: SOCI UN3000**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3000	001/10913	M W 2:40pm - 3:55pm 330 Uris Hall	Ryan Hagen	4.00	50/60

#### **Spring 2025: SOCI UN3000**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3000	001/00080	T Th 11:40am - 12:55pm L1003 Barnard Hall	Andrew Anastasi	4.00	50/60

### **SOCI UN1000 THE SOCIAL WORLD. 4.00 points.**

Identification of the distinctive elements of sociological perspectives on society. Readings confront classical and contemporary approaches with key social issues that include power and authority, culture and communication, poverty and discrimination, social change, and popular uses of sociological concepts. Please note you must also register for a discussion section to take this course

#### **Fall 2024: SOCI UN1000**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 1000	001/10902	M W 10:10am - 11:25am Cin Alfred Lerner Hall	David Knight	4.00	135/180

#### **Spring 2025: SOCI UN1000**

SOCI 3011	001/00083	W 5:10pm - 6:00pm 323 Milbank Hall	Katy Habr	0.00	33/30
SOCI 3011	002/00084	Th 5:10pm - 6:00pm 222 Milbank Hall	Eva Chen	0.00	16/30

### **SOCI UN3265 SOCIOLOGY OF WORK # GENDER. 3.00 points.**

This course examines gender as a flexible but persistent boundary that continues to organize our work lives and our home lives, as well as the relationship between the two spheres. We will explore the ways in which gender affects how work is structured; the relationship between work and home; the household as a place of paid (and unpaid) labor; and how changes in the global economy affect gender and work identities

#### **Spring 2025: SOCI UN3265**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3265	001/10950	T Th 10:10am - 11:25am Ren Kraft Center	Teresa Sharpe	3.00	84/100

### **SOCI UN3921 HIGHER EDUCATION AND INEQUALITY. 4 points.**

Prerequisites: (SOCI UN1000)

Higher education in the U.S. is going through a period of rapid change. State support is shrinking, student debt is increasing,

full-time faculty are being replaced by adjuncts, and learning outcomes are difficult to measure, at best. This class will try to make sense of these changes. Among other questions, it will ask whether higher education is a source of social mobility or a means of class reproduction; how the college experience differs by race, class, and type of college attended; how the economics of higher education have led to more expensive college and more student loans; and how we might make college better. We will consider several different points of view on the current state of U.S. higher education: that of students who apply to and attend college, that of colleges and universities, and that of society at large. As part of this course, students will conduct research on their own universities: Columbia College or Barnard College.

#### Fall 2024: SOCI UN3921

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3921	001/10919	M 10:10am - 12:00pm 119 Milstein Center	Teresa Sharpe	4	18/19

#### **SOCI UN3960 SEMINAR - PROBLEMS OF LAW # SOCIETY. 4.00 points.**

This course addresses basic contemporary social issues from several angles of vision: from the perspective of scientists, social scientists, legal scholars, and judges. Through the use of case studies, students will examine the nature of theories, evidence, facts, proof, and argument as found in the work of scientists and scholars who have engaged the substantive issues presented in the course

#### **SOCI UN3996 SENIOR SEMINAR. 3.00-4.00 points.**

Prerequisites: required methods and theory courses for the major, and the instructor's permission.

Prerequisites: required methods and theory courses for the major, and the instructors permission. Students wishing to qualify for departmental honors must take W3996y. Students carry out individual research projects and write a senior thesis under the supervision of the instructor and with class discussion. Written and oral progress reports

#### Fall 2024: SOCI UN3996

SOCI 1000	001/10949	T Th 2:40pm - 3:55pm 417 International Affairs Bldg	Adam Reich	4.00	253/270

#### **CSER UN1040 CRIT APPRO-STUDY OF ETH # RACE.**

#### **3.00 points.**

This course provides an introduction to central approaches and concepts animating the investigation of race and ethnicity. We will not treat either of these categories of difference as a given, nor as separable from other axes of social difference. Rather, we will apply an interdisciplinary and intersectional framework to illuminate how these concepts have come to emerge and cohere within a number of familiar and less familiar socio-cultural and historical contexts. We will consider how racial and ethnic differentiation as fraught but powerful processes have bolstered global labor regimes and imperial expansion projects; parsed, managed, and regulated populations; governed sexed and gendered logics of subject and social formation; and finally, opened and constrained axes of self-understanding, political organization, and social belonging. Special attention will be given to broadening students understanding of racial and ethnic differentiation beyond examinations of identity. Taken together, theoretical and empirical readings, discussions, and outside film screenings will prepare students for further coursework in race and ethnic studies, as well as fields such as literary studies, women's studies, history, sociology, and anthropology

#### **SOCI UN2208 CULTURE IN AMERICA. 3.00 points.**

An examination of the diverse values, meanings and identities that comprise American pluralism, the moral and political clashes and communities that emerge from them, and the sociological concepts that make sense of them. Part One explores larger macro-themes (American exceptionalism; individualism and community; religion and secularism; pleasure and restraint in post-Puritan America; race, immigration and identity). Part Two explores the interplay between these large themes and cultural polarization in post-Trump America, with special focus on the cultural forces at play in the 2024 presidential election: red states, blues states and cultural sorting; changing conceptions of liberalism and conservatism; class divisions and the global rise of cultural populism; the concept of "epistemic tribes" and media silos; fights over religion and race, sexuality and family; the current war on "wokeness" and the debate on free expression

**Fall 2024: SOCI UN2208**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 2208	001/00077	T Th 10:10am - 11:25am 418 Barnard Hall	Jonathan Rieder	3.00	33/45

**SOCI UN2235 Sexuality in Social Context. 4.00 points.**

Despite the ubiquity of sexual imagery in contemporary Western popular culture, most people regard sexuality to be an intimate topic that concerns the drives, experiences and pleasures of individuals. In this course, we will examine the social and pluralistic character of sexual desires, meanings, practices and politics, their variations, cultural locations, institutional determinants and even geopolitical dimensions. We will begin by surveying some of the most influential theoretical works from psychoanalysis, sexology and early sociological writings on sexualities, paying particular attention to how they undergird more contemporary social thought. We then move on to examine the influence of queer theoretical critique on sociological thinking about heterosexuality, whiteness, sexual diversity, and cross-national differences in the interrelationships between gender and sexuality. We will end the course by looking at three discrete topics within the larger sociological subfield of sexuality studies: global sex work, the ethics of participants observation in sexual; communities and contemporary discourses of sexual consent (the last with a particular focus on campus sexual cultures)

**SOCI UN3000 SOCIAL THEORY. 4.00 points.**

Prerequisites: Sophomore standing.

Prerequisites: Sophomore standing. Required for all sociology majors. Prerequisite: at least one sociology course of the instructor's permission. Theoretical accounts of the rise and transformations of modern society in the 19th and 20th centuries. Theories studied include those of Adam Smith, Tocqueville, Marx, Durkheim, Max Weber, Roberto Michels. Selected topics: individual, society, and polity; economy, class, and status; organization and ideology; religion and society; moral and instrumental action

**SOCI UN3120 Trust and Mistrust in Science and Expertise. 4 points.**

Skepticism about science and expertise is evident today in multiple arenas and clearly can no longer be considered a passing phenomenon. From climate change to vaccines; from mammograms to Coronavirus testing; from opposition to rules regulating acceptable levels of carcinogens to AI algorithms purporting to yield better decisions than human experts; the challenges to the authority of experts come from both sides of the political spectrum and take multiple forms. Most discussions of the challenges to expertise start from the question of mistrust. They ask why do people mistrust science and experts given their obvious and well-documented successes and their contribution to immense improvements in collective well-being? This way of posing the question inevitably leads to the conclusion that people mistrusting experts are irrational, uninformed or duped. This, however, may not be the most productive way to pose the question. For the social scientist, mistrust is not the puzzle, trust is. It is not surprising that people would tend to mistrust decisions taken in locales far removed from their daily lives, that are supported by forms of knowledge and technical arrangements that can be relatively opaque and difficult to grasp. It is not surprising especially since these decisions impact some individuals and groups adversely, while benefitting others. Finally, every now and then, but predictably so, it becomes obvious in hindsight that the wrong decisions were taken. Under these circumstances it is far more puzzling, counter-intuitive and difficult to understand why, how, and under what conditions people do trust science and experts. If we want to understand mistrust, and ultimately arrive at a more balanced arrangement of the relations between experts and laypeople, we need to begin by asking what is trust? How is it typically organized and secured? What sustains trust in experts and scientists? Only after we have some grasp of the mechanisms by which trust is cultivated, can we hope to have an explanation of the contemporary atmosphere of mistrust, that does not deteriorate into mere name-calling ("climate denial," "anti-vaxxers," etc.) This course will be organized, accordingly, in two parts. In the first part, we will consider different approaches to trust, and specifically for how trust in science and experts is elicited and secured. The second half of the course will be dedicated to examining contemporary case studies of mistrust in science and experts, while exploring different "engines of crisis": the demand for parity between doctors and patients/parents, especially in the case of vaccinations; the emergence of "risk" as the central topic of the politics of expertise, especially as regarding environmental pollution; the strategic manufacturing of ignorance ("agnotology") by tobacco manufacturers and by opponents of climate change research; the replacement of expert judgment with "black-boxed" algorithms in forensics and risk assessment; the legitimization crisis of regulatory science; and the rejection of dependence on experts in the name of an ethics of "care of self."

**SOCI UN3121 Trust and Mistrust in Science and Expertise - DISC. 0.00 points.**

Discussion Section for SOCI 3120UN - TRUST AND MISTRUST IN SCIENCE AND EXPERTISE. Skepticism about science and expertise is evident today in multiple arenas and clearly can no longer be considered a passing phenomenon. From climate change to vaccines; from mammograms to Coronavirus testing; from opposition to rules regulating acceptable levels of carcinogens to AI algorithms purporting to yield better decisions than human experts; the challenges to the authority of experts come from both sides of the political spectrum and take multiple forms. Most discussions of the challenges to expertise start from the question of mistrust. They ask why do people mistrust science and experts given their obvious and well-documented successes and their contribution to immense improvements in collective well-being? This way of posing the question inevitably leads to the conclusion that people mistrusting experts are irrational, uninformed or duped. This, however, may not be the most productive way to pose the question. For the social scientist, mistrust is not the puzzle, trust is. It is not surprising that people would tend to mistrust decisions taken in locales far removed from their daily lives, that are supported by forms of knowledge and technical arrangements that can be relatively opaque and difficult to grasp. It is not surprising especially since these decisions impact some individuals and groups adversely, while benefitting others. Finally, every now and then, but predictably so, it becomes obvious in hindsight that the wrong decisions were taken. Under these circumstances it is far more puzzling, counter-intuitive and difficult to understand why, how, and under what conditions people do trust science and experts

**SOCI BC3219 RACE, ETHNICITY # SOCIETY. 3.00 points.**

Examines the social construction of race and ethnicity in the United States from colonial period to present. Analyzes how capitalist interests, class differences, gender, immigration, and who "deserves" the full rights and privileges of citizenship, shape boundaries between and within racial and ethnic groups. Also considers how racism affects resource access inequities between racial groups in education, criminal justice, media, and other domains. Explores factors underpinning major social change with an eye toward discerning social conditions necessary to create and sustain just social systems

Fall 2024: SOCI BC3219

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3219	001/00144	T Th 1:10pm - 2:25pm 328 Milbank Hall	Angela Simms	3.00	31/45

**SOCI UN3324 Global Urbanism. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Using classical texts about cities (do they still work for us?) and on the diverse new literatures on cities and larger subjects with direct urban implications, we will use a variety of data sets to get a detailed empirical information, and draw on two large ongoing research projects involving major and minor

global cities around the world (a total of over 60 cities are covered in detail as of 2008). Students will need to register for a discussion section as well; details to be announced.

**SOCI UN3235 SOCIAL MOVEMENTS. 4.00 points.**

Prerequisites: One introductory course in Sociology suggested.

Prerequisites: One introductory course in Sociology suggested.

Social movements and the theories social scientists use to explain them, with emphasis on contemporary American activism. Cases include the Southern civil rights movement, Black Lives Matter, contemporary feminist mobilizations, LGBTQ activism, immigrant rights and more recent forms of grassroots politics

Fall 2024: SOCI UN3235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3235	001/00733	T Th 8:40am - 9:55am 328 Milbank Hall	Debra Minkoff	4.00	19/45

**SOCI UN3321 Global Urbanism Discussion Section. 0 points.**

Discussion Section for "Global Urbanism" SOCI UN3324

**SOCI UN3675 ORGANIZING INNOVATION. 4.00 points.**

This course examines major innovations in organizations and asks whether innovation itself can be organized. We study a range of forms of organizing (e.g. bureaucratic, post-bureaucratic, and open architecture network forms) in a broad variety of settings: from fast food franchises to the military-entertainment complex, from airline cockpits to Wall Street trading rooms, from engineering firms to mega-churches, from scientific management at the turn of the twentieth century to collaborative filtering and open source programming at the beginning of the twenty-first. Special attention will be paid to the relationship between organizational forms and new digital technologies

Fall 2024: SOCI UN3675

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3675	001/10915	T Th 10:10am - 11:25am Ren Kraft Center	David Stark	4.00	49/75

**SOCI UN3900 Societal Adaptations to Terrorism. 4 points.**

Prerequisites: Junior or Senior standing

Examines how countries have adjusted to the threat of terrorism. How the adaptation reflects the pattern of terrorist attacks, as well as structural and cultural features of the society. Adaptations by individuals, families, and organizational actors.

**SOCI UN3914 INEQUALITY, POVERTY # MOBILITY. 4.00 points.**

This is an undergraduate seminar in social stratification. The course focuses on the current American experience with socioeconomic inequality and mobility. The goals of the course are to understand how inequality is conceptualized and measured in the social sciences, to understand the structure of inequality in the contemporary U.S. to learn the principal theories and evidence for long term trends in inequality, to

understand the persistence of poverty and the impact of social policies on American rates of poverty, and to understand the forces that both produce and inhibit intergenerational social mobility in the U.S. Given the nature of the subject matter, a minority of the readings will sometimes involve quantitative social science material. The course does not presume that students have advanced training in statistics, and any readings sections that contain mathematical or statistical content will be explained in class in nontechnical terms as needed. In these instances, our focus will not be on the methods, but rather on the conclusions reached by the author concerning the research question that is addressed in the text

Fall 2024: SOCI UN3914

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3914	001/10918	T 2:10pm - 4:00pm 509 Knox Hall	Thomas DiPrete	4.00	15/20

**SOCI BC3916 CROSSOVER CULTURE. 4.00 points.**

The rise of crossover culture: racially segregated markets and genres; organizational environments and the rise of independent labels; the creative process and black-white conflict and connection; the emergence of rock as a white genre; civil rights, Black Power, and the politics of soul; cultural borrowing and the postracial ethos

Fall 2024: SOCI BC3916

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3916	001/00142	T 2:10pm - 4:00pm 407 Barnard Hall	Jonathan Rieder	4.00	15/15

**SOCI BC3920 ADV TOPICS GENDER # SEXUALITY. 4.00 points.**

This research and writing-intensive seminar is designed for senior majors with a background and interest in the sociology of gender and sexuality. The goal of the seminar is to facilitate completion of the senior requirement (a 25-30 page paper) based on ;hands on; research with original qualitative data. Since the seminar will be restricted to students with prior academic training in the subfield, students will be able to receive intensive research training and guidance through every step of the research process, from choosing a research question to conducting original ethnographic and interview-based research, to analyzing and interpreting ones findings. The final goal of the course will be the production of an original paper of standard journal-article length. Students who choose to pursue their projects over the course of a second semester will have the option of revisiting their articles further for submission and publications

Fall 2024: SOCI BC3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3920	001/00140	W 4:10pm - 6:00pm 318 Milbank Hall	Elizabeth Bernstein	4.00	7/12

**SOCI BC3925 Adv Topics Law # Society. 4.00 points.**

The course will focus on a single topic within US law-and-society scholarship: either the profession of lawyering

or the criminalization of immigration. We will critically examine existing research, and then create our own. With the support of their peers and instructor, students will design and complete substantial independent research projects. Limited to sociology majors with senior standing (except in exceptional circumstances), and having taken SOCI UN3217 Law and Society is strongly preferred. Fulfills the Research Paper Option for the senior requirement in sociology at Barnard

**Spring 2025: SOCI BC3925**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3925	001/00910	Th 2:10pm - 4:00pm 912 Milstein Center	Deborah Becher	4.00	0/16

**SOCI UN3926 Race, Place, and the United States. 4.00 points.**

The course analyzes the relationship between race/ethnicity and spatial inequality, emphasizing the institutions, processes, and mechanisms that shape the lives of urban dwellers. It surveys major theoretical approaches and empirical investigations of racial and ethnic stratification in several urban cities, and their concomitant policy considerations

**SOCI UN3937 Sociology of Human Rights. 4.00 points.**

Sociology came to the study of human rights much later than law, philosophy, or political science. In this course, you'll learn (1) what constitutes a sociology of human rights and (2) what sociology, its classics, and its diverse methods bring to the empirical study and theory of human rights. We'll explore the history, social institutions and laws, ideas, practices, and theories of human rights. We'll become familiar with the social actors, social structures, and relationships involved in practices such as violation, claims-making, advocacy, and protection. We'll consider how social, cultural, political, and economic forces affect human rights issues. We'll learn about the questions sociologists ask, starting with the most basic (but far from simple) question, "what is a human right?" We'll tackle key debates in the field, considering – for instance – whether human rights are universal and how human rights relate to cultural norms/values, national sovereignty, and national security. Finally, we'll apply the concepts we've learned to a wide range of issues (ex: how racial, ethnic, gender, and other social inequalities relate to human rights), rights (ex: LGBTQ rights, the rights of laborers, the rights of refugees), and cases (ex: enslavement, the separation of children from their families, circumcision, sterilization, the use of torture). We'll consider human rights cases in the United States and across the globe, and how events and actions in one place relate to human rights violations in another

**SOCI BC3946 GLOBAL HEALTH, POLITICS, AND SOCIETY. 4.00 points.**

What is global health? Where do global health disease priorities come from, and how do the ways that we understand disease shape how we respond to it? What happens when good ideas and good intentions go wrong? This course critically examines the politics of global health and its impact on local institutions and people. Drawing on social science research, the course will

address three main themes: 1) how global health priorities are defined and constructed, 2) how our understandings of disease influence our response to that disease, and 3) how efforts to respond to disease intersect with people on the ground, sometimes in unexpected ways. We will examine the global health industry from the vantage point of different institutions and actors – international organizations, governments, local healthcare institutions, healthcare workers, and people living with or at risk of various illnesses like HIV/AIDS, malaria, cancer, and Ebola. A primary goal of this course is to help you to develop skills in critical thinking in relation to global health issues and their impact on society. Students will demonstrate their knowledge through individual writing, class discussion, presentations, and a final research project

**Fall 2024: SOCI BC3946**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3946	001/00743	Th 4:10pm - 6:00pm 501 Diana Center	Amy Zhou	4.00	13/15

**SOCI UN3974 SOCI OF SCHOOLS,TEACH,LEARNING. 4.00 points.**

In this class we will examine the school as a central institution in modern society, and we will grapple with an important question in the sociology of education: what role to schools play in reinforcing or challenging broader patterns of social inequality? We will pay special attention to the ways in which students class, race/ethnicity and gender shape their educational experiences. We will also look at how schools are organized, how schools construct differences among students, and how schools sort kids into different (and unequal) groups. Finally we will explore the types of interventions - at both the individual and organizational levels - that can mitigate inequality in educational achievement and help low-income students to succeed. One such intervention that has shown promise is tutoring in academic and social and behavioral skills, and interventions that strengthen self-affirmation. A major component of this class is your experience as a tutor. You will be trained as tutors to work with students from local high schools both through in-person tutoring and through tutoring using social networking technologies. Throughout the semester we will combine our academic learning with critical reflection on our experience in the field. Because you will be working with NYC high school students, we will pay special attention to how NYC high schools are organized and how current issues in education play out in the context of NYC schools

**SOCI UN3996 SENIOR SEMINAR. 3.00-4.00 points.**

Prerequisites: required methods and theory courses for the major, and the instructor's permission.

Prerequisites: required methods and theory courses for the major, and the instructors permission. Students wishing to qualify for departmental honors must take W3996y. Students carry out individual research projects and write a senior thesis under the supervision of the instructor and with class discussion. Written and oral progress reports

**Fall 2024: SOCI UN3996**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 3996	001/10922	Th 2:10pm - 4:00pm	James Chu	3.00-4.00	2/15
501d Knox Hall					

**Spring 2025: SOCI UN3996**

509 Knox Hall					

**SOCI GU4801 Israel and the Palestinians. 4.00 points.**

The seminar will examine the main political, economic, and social processes that have been shaping contemporary Israel. The underlying assumption in this seminar is that much of these processes have been shaped by the 100-year Israeli-Arab/Palestinian conflict. The first part of the course will accordingly focus on the historical background informing the conflict and leading to the Palestinian refugee problem and establishment of a Jewish, but not Palestinian, state in 1948. The second part of the seminar focuses on Israel's occupation of the West Bank (and Gaza) and the settlement project, as well as on USA's role and its impact on the conflict, the occupation, and Israel. These topics did not get much academic attention until recently, but as researchers began to realize that the Occupation and the West Bank settlements are among the most permanent institutions in Israel, they have come under the scrutiny of academic research. The third part the seminar will concentrate on the development of the conflict after the establishment of Israel and its effects on sociological processes and institutions in contemporary Israel. Analyzing patterns of continuity and change in the past seven decades, we will discuss immigration and emigration patterns, as well as issue relating to ethnicity, gender, religion and politics, and the Israeli military

**Spring 2025: SOCI GU4801**

**STATISTICS****DEPARTMENT OF STATISTICS:**

Department website: <https://stat.columbia.edu/>

Office location: 1005 SSW (1255 Amsterdam Avenue);

Office contact: 212-851-2132

Director of Undergraduate Studies:

Ronald Neath, 615 Watson (612 West 115th Street), 212-853-1398;

[rcn2112@columbia.edu](mailto:rcn2112@columbia.edu)

Director of Academic Administration:

Dood Kalicharan, 1003 SSW (1255 Amsterdam), 212-853-1398; [dk@stat.columbia.edu](mailto:dk@stat.columbia.edu)

**THE STUDY OF STATISTICS**

Statistics is the art and science of study design and data analysis. Probability theory is the mathematical foundation for the study of statistical methods and for the modeling of random phenomena. The Statistics major builds on a foundation in probability and statistical theory to provide practical training in statistical methods, study design, and data analysis. The Statistics major is an appropriate background for graduate study in statistics, social science, epidemiology and public health, genetics, and economics; or for professional work in such areas as drug development, health policy, marketing, opinion polling, insurance, banking and finance, and government.

The Department offers several introductory courses.

- Students interested in learning statistical concepts, with a goal of being educated consumers of statistics, should take **STAT UN1001 INTRO TO STATISTICAL REASONING**. This course is designed for students who have taken a pre-calculus course, and the focus is on general principles.
- Students seeking an introduction to applied statistics should take **STAT UN1101 INTRODUCTION TO STATISTICS**. This course is designed for students who wish to learn to conduct statistical analyses, but do not have a background in calculus; the focus is on the implementation of statistical methods, rather than the underlying theory. It is recommended for pre-med students, and students considering the applied track of the statistics minor.
- Students seeking a more mathematically rigorous treatment of the subject should take **STAT UN1201 CALC-BASED INTRO TO STATISTICS**. This course is designed for students who have taken a semester of college calculus or the equivalent, and the focus is on preparation for further study in probability and statistical theory and methods. It is recommended for students considering the statistics major, or the theoretical track of the minor.
- Students seeking a one-semester calculus-based survey of probability and statistical theory should take **STAT GU4001 INTRODUCTION TO PROBABILITY AND STATISTICS**. This course is designed for students who have taken calculus, and is meant as a terminal course. It provides an abridged version of the material covered in the two-semester sequence **STAT GU4203 PROBABILITY THEORY** and **STAT GU4204 STATISTICAL INFERENCE**. While some mathematically mature students may take the 4203--4204 sequence as an introduction to the field, it is generally recommended that students prepare for it by taking **STAT UN1201 CALC-BASED INTRO TO STATISTICS**.

The Department offers a Major in Statistics, a Minor in Statistics, and interdisciplinary majors with Computer Science, Economics, Mathematics, and Political Science. The major consists of mathematical and computational prerequisites, an introductory course, five core courses in probability and theoretical and applied statistics, plus three electives. The training provided by the undergraduate major is comparable to a master's degree in statistics. The applied track of the minor is suitable for students preparing for academic or professional work in fields where data analysis skills are valued; it can be completed without the mathematical prerequisite required for the major. Students who are more mathematically inclined can opt for the theoretical track, and complete a minor by taking courses from the core sequence of the statistics major.

## Enrolling in Classes

Students may wish to consult the following guidelines when undertaking course planning.

- It is advisable to take **STAT UN1101 INTRODUCTION TO STATISTICS** and **STAT UN2102 Applied Statistical Computing** before taking any of the more advanced minor courses: **STAT UN2103 APPLIED LINEAR REG ANALYSIS**, **STAT UN2104 APPL CATEGORICAL DATA ANALYSIS**, **STAT UN3104 Applied Bayesian Analysis**, **STAT UN3105 APPLIED STATISTICAL METHODS**, and **STAT UN3106 APPLIED MACHINE LEARNING**.
- It is advisable to take **STAT UN1201 CALC-BASED INTRO TO STATISTICS**, **STAT GU4203 PROBABILITY THEORY**, **STAT GU4204 STATISTICAL INFERENCE**, and **STAT GU4205 LINEAR REGRESSION MODELS** in sequence.
- Courses in stochastic analysis should be preceded by **STAT GU4203 PROBABILITY THEORY**, and for many students, it is advisable to take **STAT GU4207 ELEMENTARY STOCHASTIC PROCESS** before embarking on **STAT GU4262 Stochastic Processes for Finance**, **STAT GU4264 STOCHASTIC PROCESSES-APPLICTNS I**, or **STAT GU4265 STOCHASTIC METHODS IN FINANCE**.

- Most of the statistics courses numbered from 4221 to 4234 are best preceded by [STAT GU4205 LINEAR REGRESSION MODELS](#).
- The data science courses [STAT GU4206 STAT COMP # INTRO DATA SCIENCE](#), [STAT GU4241 STATISTICAL MACHINE LEARNING](#), and [STAT GU4242 Advanced Machine Learning](#) should be taken in sequence.

## Preparing for Graduate Study

The [BA/MA option](#) allows current Columbia undergraduate students (Columbia College, SEAS, the School of General Studies, and Barnard) the opportunity to complete both the bachelor's degree and the master's degree (BA/MA) in a shorter period of time, thus providing an option that is financially advantageous. The BA/MA in Statistics is open to students from all majors.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies.

Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

## Advanced Placement

Columbia College and the School of General Studies award 3 points of credit for a score of 5 on the AP statistics exam.

Students who are required to take STAT UN1101 for their major should check with their major advisor to determine whether this credit provides exemption from their requirement.

Students pursuing a major that requires STAT UN1201 should plan to take that course at Columbia, even if they scored a 5 on the AP statistics exam. AP credit cannot be used to satisfy a requirement for STAT UN1201.

## Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor.

No more than two DUS-approved STAT courses toward a Statistics major may be fulfilled with transfer credit.

Not more than one DUS-approved STAT course toward a Statistics joint major or a Statistics minor may be fulfilled with transfer credit.

## Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor, the DUS will need to confirm that they can be used toward requirements in the major/minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses, including limits on the number of approved STAT course that can be applied to the major/minor.

## Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the Statistics major or minor.

More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## UNDERGRADUATE RESEARCH

Matriculated students who will be undergraduates at Columbia College, Barnard College, the School of General Studies, or the School of Engineering and Applied Sciences may apply to the Department's summer internship program. Students work under the supervision of Statistics Department faculty mentors.

The internship provides a summer housing allowance and a stipend. Applicants should send a brief statement of interest and a copy of their transcript to the Statistics DUS by the end of March to be considered. If summer project descriptions are posted on the Department's website, please indicate your preferred project(s) in your statement of interest.

Students seeking research opportunities with Statistics Department faculty during the academic year are advised to be entrepreneurial and proactive: identify congenial faculty whose research is appealing, request an opportunity to meet, and provide some indication of previous coursework when asking for a project.

## DEPARTMENT HONORS

Students are considered for department honors on the basis of GPA and the comprehensiveness and difficulty of their coursework in Statistics and related disciplines. Generally, no more than 10% of graduating majors receive departmental honors in a given academic year.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Selecting a first course in Statistics:

- Students interested in learning statistical concepts, with a goal of being educated consumers of statistics, should take STAT UN1001 INTRO TO STATISTICAL REASONING. This course is designed for students who have taken a pre-calculus course, and the focus is on general principles.
- Students seeking an introduction to applied statistics should take STAT UN1101 INTRODUCTION TO STATISTICS. This course is designed for students who wish to learn to conduct statistical analyses, but do not have a background in calculus; the focus is on the implementation of statistical methods, rather than the underlying theory. It is recommended for pre-med students, and students considering the applied track of the statistics minor.
- Students seeking a more mathematically rigorous treatment of the subject should take STAT UN1201 CALC-BASED INTRO TO STATISTICS. This course is designed for students who have taken a semester of college calculus or the equivalent, and the focus is on preparation for further study in probability and statistical theory and methods. It is recommended for students considering the statistics major, or the theoretical track of the minor.
- Students seeking a one-semester calculus-based survey of probability and statistical theory should take STAT GU4001 INTRODUCTION TO PROBABILITY AND STATISTICS. This course is designed for students who have taken calculus, and is meant as a terminal course. It provides an abridged version of the material covered in the two-semester sequence STAT GU4203 PROBABILITY THEORY and STAT GU4204 STATISTICAL INFERENCE. While some mathematically mature students may take the 4203--4204 sequence as an

introduction to the field, it is generally recommended that students prepare for it by taking STAT UN1201 CALC-BASED INTRO TO STATISTICS.

## Course Numbering Structure

The 1000-level courses (STAT UN1001, STAT UN1101 and STAT UN1201) are introductory courses. Most students will begin their study of statistics with one of these three courses.

The 2000-level courses (STAT UN2102, STAT UN2103 and STAT UN2104) are courses in computational and applied statistics, with STAT UN1101 or STAT UN1201 as a prerequisite. These are important courses in the minor program; students pursuing a statistics major will learn this material by studying the more mathematical treatment given in the 4000-level courses.

The 3000-level courses (STAT UN3104, STAT UN3105 and STAT UN3106) introduce more specialized statistical methods which build on the material introduced in STAT UN2102 and STAT UN2103. While the statistical methods covered in these courses can be quite advanced, the mathematical level remains modest. Again, these courses are part of the minor curriculum, and students completing a statistics major will learn this material elsewhere in the statistics curriculum.

STAT GU4001 is a one-semester calculus-based course in probability and statistics, intended for students who seek a mathematically rigorous course, but do not intend to major or minor in statistics (for most, this will be a terminal course).

The 4200-level courses are intended for students majoring in statistics and related disciplines.

Courses numbered 4203 through 4207 introduce fundamental material in probability theory, statistical inference, data analysis, and statistical computing; these courses comprise the core of the statistics major.

Courses numbered 4221 through 4234 cover specialized statistical data analysis techniques, and are possible electives for students in the statistics major.

Courses numbered 4241 through 4243 introduce modern tools in machine learning and data science.

Courses numbered between 4261 and 4265 cover statistical and probabilistic theory and methods in modern finance.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Statistics

The major should be planned with the director of undergraduate studies. Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major. The major requires 14 courses, as follows:

Mathematics Prerequisite (four courses)

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN2010	LINEAR ALGEBRA

Computer Science Requirement (one course). Choose one of the following

COMS W1004	Introduction to Computer Science and Programming in Java
ENGI E1006	INTRO TO COMP FOR ENG/APP SCI
STAT UN2102	Applied Statistical Computing

Statistical prerequisite (one course)

STAT UN1201	CALC-BASED INTRO TO STATISTICS
-------------	--------------------------------

Core courses in probability and statistics (five courses):

STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4206	STAT COMP # INTRO DATA SCIENCE
STAT GU4207	ELEMENTARY STOCHASTIC PROCESS

Electives (three courses):

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or an advanced quantitative course in a social science. At least one elective must be a Statistics Department course numbered between 4221 and 4291

- The mathematics prerequisite can also be satisfied by taking the Honors Mathematics A and B sequence, MATH UN1207 and MATH UN1208.
- Students preparing for graduate study in statistics are encouraged to replace two electives with MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

### Major in Data Science

In response to the ever increasing importance of “big data” in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications of AI and machine learning. The Department of Computer Science and the Department of Statistics jointly offer a Data Science major that emphasizes the interface between the two disciplines.

The major requires 18 courses, as follows. (Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major.)

Notes:

The mathematics prerequisite can also be satisfied by taking the Honors Mathematics A and B sequence, MATH UN1207 and MATH UN1208.

#### Mathematical Prerequisites

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
or MATH UN1205	ACCELERATED MULTIVARIABLE CALC
MATH UN2010	LINEAR ALGEBRA

#### Statistics Required Courses

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4241	STATISTICAL MACHINE LEARNING
or COMS W4771	MACHINE LEARNING

#### Statistics Electives

Select two of the following courses:

STAT UN3106	APPLIED MACHINE LEARNING
STAT GU4206	STAT COMP # INTRO DATA SCIENCE
STAT GU4243	APPLIED DATA SCIENCE
STAT GU4224	BAYESIAN STATISTICS
STAT GU4242	Advanced Machine Learning

#### Computer Science Introductory Courses

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI
COMS W1007	

And select one of the following courses:

COMS W3134	Data Structures in Java
COMS W3136	ESSENTIAL DATA STRUCTURES
COMS W3137	HONORS DATA STRUCTURES # ALGOL

#### Computer Science Required Courses

COMS W3203	DISCRETE MATHEMATICS
CSOR W4231	ANALYSIS OF ALGORITHMS I

#### Computer Science Electives

Select three of the following courses:

COMS W3261	COMPUTER SCIENCE THEORY
COMS W4236	INTRO-COMPUTATIONAL COMPLEXITY

COMS W4252	INTRO-COMPUTATIONAL LEARN THRY
COMS W4111	INTRODUCTION TO DATABASES
COMS W4130	
Any COMS W47xx course EXCEPT W4771	

## Major in Economics-Statistics

Please read *Requirements for all Economics Majors, Concentrators, and Interdepartmental Majors* in the [Economics](#) (p. 517) section of this Bulletin.

The major in Economics-Statistics provides students with a grounding in economic theory comparable to that of the general economics major, but also exposes students to a more rigorous and extensive statistics training. This program is recommended for students with strong quantitative skills and for those contemplating graduate studies in economics.

Two advisers are assigned for the interdepartmental major, one in the Department of Economics and one in the Department of Statistics. The economics adviser can only advise on economics requirements and the statistics adviser can only advise on statistics requirements.

Students should be aware of the rules regarding the use of the Pass/D/Fail option. Courses in which a grade of D has been received do not count toward the major requirements.

The economics-statistics major requires 18 courses, as follows:

Notes:

- The mathematics prerequisite can also be satisfied by taking the Honors Mathematics A and B sequence, MATH UN1207 and MATH UN1208.

#### Economics Core Courses

Complete the Economics core courses.

#### Economics Electives

Select three electives at the 3000-level or above, of which no more than one may be a Barnard course.

#### Mathematics

Select one of the following sequences:

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN2010	CALCULUS I and CALCULUS II and CALCULUS III and LINEAR ALGEBRA
MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN2010	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and LINEAR ALGEBRA
MATH UN1207 & MATH UN1208	HONORS MATHEMATICS A and HONORS MATHEMATICS B

**Statistics**

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS

One elective from among courses numbered STAT GU4206 through GU4266.

**Computer Science**

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
COMS W1007	
ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI
STAT UN2102	Applied Statistical Computing

**Seminar**

ECON GU4918	SEMINAR IN ECONOMETRICS
-------------	-------------------------

## Major in Mathematics-Statistics

This major program is designed to prepare students for: (1) a career in industries, such as finance and insurance, that require a high level of mathematical sophistication and a substantial knowledge of probability and statistics; and (2) graduate study in quantitative disciplines.

The major requires 14 courses, as follows. (Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major.):

**Mathematics**

Select one of the following sequences:

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN2010	LINEAR ALGEBRA
MATH UN2500	ANALYSIS AND OPTIMIZATION

OR

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1205	ACCELERATED MULTIVARIABLE CALC
MATH UN2010	LINEAR ALGEBRA
MATH UN2500	ANALYSIS AND OPTIMIZATION

OR

MATH UN1207	HONORS MATHEMATICS A
MATH UN1208	HONORS MATHEMATICS B

MATH UN2500	ANALYSIS AND OPTIMIZATION
-------------	---------------------------

**Statistics required courses**

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS

**And select one of the following courses:**

STAT GU4207	ELEMENTARY STOCHASTIC PROCESS
STAT GU4262	Stochastic Processes for Finance
STAT GU4264	STOCHASTIC PROCESSES-APPLICTNS I
STAT GU4265	STOCHASTIC METHODS IN FINANCE

**Computer Science**

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI

COMS W1007

or an advanced Computer Science offering in programming

**Electives**

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

- Notes:
- The mathematics prerequisite can also be satisfied by taking the Honors Mathematics A and B sequence, MATH UN1207 and MATH UN1208.
- Students preparing for doctoral study in mathematics or statistics are encouraged to take MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

## Major in Political Science-Statistics

The interdepartmental major of political science-statistics is designed for students who desire an understanding of political science to pursue advanced study in this field and who also wish to have at their command a broad range of sophisticated statistical tools to analyze data related to social science and public policy research.

Students should be aware of the rules regarding the use of the Pass/D/Fail option. Courses in which a grade of D has been received do not count toward the major requirements.

The political science-statistics major requires a minimum of 6 courses in political science, and 7 or 8 courses in statistics & mathematics, to be distributed as follows:

### Political Science

Students must choose a primary subfield to study. Within the subfield, students must take a minimum of three courses, including the subfield's introductory course. The subfields and their corresponding introductory courses are as follows:

American Politics:

POLS UN1201	INTRO TO AMERICAN POLITICS
-------------	----------------------------

Comparative Politics:

POLS UN1501	INTRO TO COMPARATIVE POLITICS
-------------	-------------------------------

International Relations:

POLS UN1601	INTERNATIONAL POLITICS
-------------	------------------------

Political Theory:

POLS UN1101	POLITICAL THEORY I
-------------	--------------------

Additionally, students must take a 4-point seminar in their primary subfield.

### Research Methods

Students must take the following two research methods courses:

POLS GU4710	PRINC OF QUANT POL RESEARCH 1
or POLS UN3704	RESEARCH DESIGN: DATA ANALYSIS
POLS GU4712	PRINC OF QUANT POL RESEARCH 2

### Statistics

Select one of the following two sequences.

Sequence recommended for students preparing for graduate study in statistics.

MATH UN1101	CALCULUS I
-------------	------------

MATH UN1102	CALCULUS II
-------------	-------------

MATH UN2010	LINEAR ALGEBRA
-------------	----------------

STAT UN1201	CALC-BASED INTRO TO STATISTICS
-------------	--------------------------------

STAT GU4203	PROBABILITY THEORY
-------------	--------------------

STAT GU4204	STATISTICAL INFERENCE
-------------	-----------------------

STAT GU4205	LINEAR REGRESSION MODELS
-------------	--------------------------

STAT GU4206	STAT COMP # INTRO DATA SCIENCE
-------------	--------------------------------

Students taking the first track may replace the Mathematics prerequisites with both of MATH UN1207 and MATH UN1208

or

Sequence recommend for students preparing to apply statistical methods in the social sciences.

STAT UN1101	INTRODUCTION TO STATISTICS
-------------	----------------------------

STAT UN2102	Applied Statistical Computing
-------------	-------------------------------

STAT UN2103	APPLIED LINEAR REG ANALYSIS
-------------	-----------------------------

STAT UN2104	APPL CATEGORICAL DATA ANALYSIS
-------------	--------------------------------

STAT UN3105	APPLIED STATISTICAL METHODS
-------------	-----------------------------

STAT UN3106	APPLIED MACHINE LEARNING
-------------	--------------------------

Statistics elective:

Students must take an approved elective in a statistics or a quantitatively oriented course in a social science.

### Minor in Statistics

The minor requires five courses, distributed as follows.

Students should select one of the following two tracks.

The requirements for the Applied track of the statistics minor are:

Introduction to statistics (one course): Choose one of the following

STAT UN1101 INTRODUCCION TO STATISTICS

STAT UN1201 CALC-BASED INTRO TO STATISTICS

Applied statistics core (two courses): Take both of the following

STAT UN2102 Applied Statistical Computing

STAT UN2103 APPLIED LINEAR REG ANALYSIS

Statistics electives (two courses): Choose any two of the following

STAT UN2104 APPL CATEGORICAL DATA ANALYSIS

STAT UN3104 Applied Bayesian Analysis

STAT UN3105 APPLIED STATISTICAL METHODS

STAT UN3106 APPLIED MACHINE LEARNING

The requirements for the Theoretical track are:

Introduction to Statistics (one course)

STAT UN1201 CALC-BASED INTRO TO STATISTICS

Probability and statistics core (three courses)

STAT GU4203 PROBABILITY THEORY

STAT GU4204 STATISTICAL INFERENCE

STAT GU4205 LINEAR REGRESSION MODELS

Elective (one course)

One additional STAT course numbered 4206 through 4261

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before the 2023-2024 academic year. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Concentrations are not available to students who entered Columbia in or after Fall 2024.

### Concentration in Statistics

The concentration requires 6 courses in statistics, as follows.

Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count towards the concentration.

STAT UN1101 INTRODUCTION TO STATISTICS

STAT UN2102 Applied Statistical Computing

STAT UN2103 APPLIED LINEAR REG ANALYSIS

STAT UN2104 APPL CATEGORICAL DATA ANALYSIS

STAT UN3105 APPLIED STATISTICAL METHODS

STAT UN3106 APPLIED MACHINE LEARNING

(Students may replace courses nominally required for the concentration by approved Statistics Department courses.)

### INTRODUCTORY COURSES

Students interested in statistical concepts, but who do not anticipate undertaking statistical analyses, should take STAT UN1001 Introduction to Statistical Reasoning. Students seeking an introduction to applied statistics or preparing for the concentration should take STAT UN1101 Introduction to Statistics (without calculus). Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN1201 Calculus-based Introduction to Statistics. Students seeking a one-semester calculus-based survey should take STAT GU4001 Introduction to Probability and Statistics. The undergraduate seminar STAT UN1202 features faculty lectures prepared with undergraduates in mind; students may attend without registering.

#### STAT UN1001 INTRO TO STATISTICAL REASONING. 3.00 points.

A friendly introduction to statistical concepts and reasoning with emphasis on developing statistical intuition rather than on mathematical rigor. Topics include design of experiments,

descriptive statistics, correlation and regression, probability, chance variability, sampling, chance models, and tests of significance

#### Fall 2024: STAT UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 1001	001/15145	T Th 10:10am - 11:25am 313 Fayerweather	Pratyay Datta	3.00	50/75
STAT 1001	002/15159	M W 6:10pm - 7:25pm 717 Hamilton Hall	Anthony Donoghue	3.00	63/75
STAT 1001	003/15146	M W 8:40am - 9:55am 517 Hamilton Hall	Musa Elbulok	3.00	44/75

#### STAT UN1010 Statistical Thinking For Data Science. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

The advent of large scale data collection and the computer power to analyze the data has led to the emergence of a new discipline known as Data Science. Data Scientists in all sectors analyze data to derive business insights, find solutions to societal challenges, and predict outcomes with potentially high impact. The goal of this course is to provide the student with a rigorous understanding of the statistical thinking behind the fundamental techniques of statistical analysis used by data scientists. The student will learn how to apply these techniques to data, understand why they work and how to use the analysis results to make informed decisions. The student will gain this understanding in the classroom and through the analysis of real-world data in the lab using the programming language Python. The student will learn the fundamentals of Python and how to write and run code to apply the statistical concepts taught in the classroom

#### STAT UN1101 INTRODUCTION TO STATISTICS. 3.00 points.

Prerequisites: intermediate high school algebra. Designed for students in fields that emphasize quantitative methods. Graphical and numerical summaries, probability, theory of sampling distributions, linear regression, analysis of variance, confidence intervals and hypothesis testing. Quantitative reasoning and data analysis. Practical experience with statistical software. Illustrations are taken from a variety of fields. Data-collection/analysis project with emphasis on study designs is part of the coursework requirement

**Fall 2024: STAT UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 1101	001/15160	T Th 6:10pm - 7:25pm 602 Hamilton Hall	Dobrin Marchev	3.00	77/86
STAT 1101	002/15161	M W 8:40am - 9:55am 309 Havemeyer Hall	Alex Pijyan	3.00	152/200

**Spring 2025: STAT UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 1101	001/13989	T Th 10:10am - 11:25am 501 Northwest Corner	Wayne Lee	3.00	88/160
STAT 1101	002/13991	M W 6:10pm - 7:25pm 614 Schermerhorn Hall	Ha Nguyen	3.00	103/120

**STAT UN1201 CALC-BASED INTRO TO STATISTICS.****3.00 points.**

Prerequisites: one semester of calculus. Designed for students who desire a strong grounding in statistical concepts with a greater degree of mathematical rigor than in STAT W1111. Random variables, probability distributions, pdf, cdf, mean, variance, correlation, conditional distribution, conditional mean and conditional variance, law of iterated expectations, normal, chi-square, F and t distributions, law of large numbers, central limit theorem, parameter estimation, unbiasedness, consistency, efficiency, hypothesis testing, p-value, confidence intervals, maximum likelihood estimation. Serves as the pre-requisite for ECON W3412

**Fall 2024: STAT UN1201**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 1201	001/15162	T Th 8:40am - 9:55am 501 Northwest Corner	Banu Baydil	3.00	142/160

417 International  
Affairs Bldg

**STAT UN1202 UNDERGRADUATE SEM/STATISTICS.****1.00 point.**

Prerequisites: Previous or concurrent enrollment in a course in statistics would make the talks more accessible. Prepared with undergraduates majoring in quantitative disciplines in mind, the presentations in this colloquium focus on the interface between data analysis, computation, and theory in interdisciplinary research. Meetings are open to all undergraduates, whether registered or not. Presenters are drawn from the faculty of department in Arts and Sciences, Engineering, Public Health and Medicine

**Fall 2024: STAT UN1202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 1202	001/15165	F 10:10am - 12:00pm 308a Lewisohn Hall	Ronald Neath	1.00	10/25

**STAT GU4001 INTRODUCTION TO PROBABILITY AND STATISTICS. 3.00 points.**

Prerequisites: Calculus through multiple integration and infinite sums. A calculus-based tour of the fundamentals of probability theory and statistical inference. Probability models, random variables, useful distributions, conditioning, expectations, law of large numbers, central limit theorem, point and confidence interval estimation, hypothesis tests, linear regression. This course replaces SIEO 4150

**Fall 2024: STAT GU4001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4001	001/15171	M W 6:10pm - 7:25pm 301 Pupin Laboratories	Arian Maleki	3.00	94/200

**Spring 2025: STAT GU4001**

STAT 4001	002/14004	M W 1:10pm - 2:25pm 517 Hamilton Hall	Sumit Mukherjee	3.00	39/86

**APPLIED STATISTICS CONCENTRATION COURSES**

The applied statistics sequence, together with an introductory course, forms the concentration in applied statistics. STAT UN2102 Applied statistical computing may be used to satisfy the computing requirement for the major, and the other concentration courses may be used to satisfy the elective requirements for the major. (Students who sat STAT GU4205 Linear Regression for the major would find that they have covered essentially all of the material in STAT UN2103 Applied Linear Regression Analysis.

**STAT UN2102 Applied Statistical Computing. 3.00 points.**

Corequisites: An introductory course in statistic (STAT UN1101 is recommended).

Corequisites: An introductory course in statistic (STAT UN1101 is recommended). This course is an introduction to R programming. After learning basic programming component, such as defining variables and vectors, and learning different data structures in R, students will, via project-based assignments, study more advanced topics, such as conditionals, modular programming, and data visualization. Students will also learn the fundamental concepts in computational complexity, and will practice writing reports based on their data analyses

**Fall 2024: STAT UN2102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2102	001/15166	T Th 4:10pm - 5:25pm 517 Hamilton Hall	Alex Pijyan	3.00	71/86

**Spring 2025: STAT UN2102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2102	001/13996	T Th 4:10pm - 5:25pm 428 Pupin Laboratories	Alex Pijyan	3.00	97/120

**STAT UN2103 APPLIED LINEAR REG ANALYSIS. 3.00 points.**

Prerequisites: An introductory course in statistics (STAT UN1101 is recommended). Students without programming experience in R might find STAT UN2102 very helpful.

Develops critical thinking and data analysis skills for regression analysis in science and policy settings. Simple and multiple linear regression, non-linear and logistic models, random-effects models. Implementation in a statistical package.

Emphasis on real-world examples and on planning, proposing, implementing, and reporting

**Fall 2024: STAT UN2103**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2103	001/15167	M W 2:40pm - 3:55pm 602 Hamilton Hall	Ronald Neath	3.00	41/86

**Spring 2025: STAT UN2103**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2103	001/13998	M W 6:10pm - 7:25pm 717 Hamilton Hall	Daniel Rabinowitz	3.00	54/85

**STAT UN2104 APPL CATEGORICAL DATA ANALYSIS. 3.00 points.**

Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful. This course covers statistical models and methods for analyzing and drawing inferences for

problems involving categorical data. The goals are familiarity and understanding of a substantial and integrated body of statistical methods that are used for such problems, experience in analyzing data using these methods, and proficiency in communicating the results of such methods, and the ability to critically evaluate the use of such methods. Topics include binomial proportions, two-way and three-way contingency tables, logistic regression, log-linear models for large multi-way contingency tables, graphical methods. The statistical package R will be used

**Spring 2025: STAT UN2104**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 2104	001/13999	M W 8:40am - 9:55am 717 Hamilton Hall	Ronald Neath	3.00	45/86

**STAT UN3105 APPLIED STATISTICAL METHODS. 3.00 points.**

Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful. This course is intended to give students practical experience with statistical methods beyond linear regression and categorical data analysis. The focus will be on understanding the uses and limitations of models, not the mathematical foundations for the methods. Topics that may be covered include random and mixed-effects models, classical non-parametric techniques, the statistical theory causality, sample survey design, multi-level models, generalized linear regression, generalized estimating equations and over-dispersion, survival analysis including the Kaplan-Meier estimator, log-rank statistics, and the Cox proportional hazards regression model. Power calculations and proposal and report writing will be discussed

**Fall 2024: STAT UN3105**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 3105	001/15169	M W 2:40pm - 3:55pm 717 Hamilton Hall	Wayne Lee	3.00	21/86

**STAT UN3106 APPLIED MACHINE LEARNING. 3.00 points.**

Prerequisites: STAT UN2103. Students without programming experience in R might find STAT UN2102 very helpful.

Prerequisites: STAT UN2103. Students without programming experience in R might find STAT UN2102 very helpful.

This course is a machine learning class from an application perspective. We will cover topics including data-based prediction, classification, specific classification methods (such as logistic regression and random forests), and basics of neural networks. Programming in homeworks will require R

**Spring 2025: STAT UN3106**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 3106	001/14000	T Th 2:40pm - 3:55pm 602 Hamilton Hall	Wayne Lee	3.00	36/86

**FOUNDATION COURSES**

The calculus-based foundation courses for the core of the statistics major. These courses are GU4203 Probability Theory, GU4204 Statistical Inference, GU4205 Linear Regression, GU4206 Statistical Computing and Introduction to Data Science, and GU4207 Elementary Stochastic processes. Ideally, students would take Probability theory or the equivalent before taking either Statistical Inference or Elementary Stochastic Processes, and would have taken Statistical Inference before, or at least concurrently with taking Linear Regression Analysis, and would have taken Linear Regression analysis before, or at least concurrently, with taking the computing and data science course. A semester of calculus should be taken before Probability, additional semesters of calculus are recommended before Statistical Inference, and a course in linear algebra before Linear Regression is strongly recommended. For the more advanced electives in stochastic processes, Probability Theory is an essential prerequisite, and many students would benefit from taking Elementary Stochastic Processes, too. Linear Regression and the computing and data science course should be taken before the advanced electives in machine learning and data science. Linear Regression is a strongly recommended prerequisite, or at least co-requisite, for the remaining advanced statistical electives.

STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4206	STAT COMP # INTRO DATA SCIENCE
STAT GU4207	ELEMENTARY STOCHASTIC PROCESS

**ADVANCED STATISTICS COURSES**

Advanced statistics courses combine theory with methods and practical experience in data analysis. Undergraduates enrolling in advanced statistics courses would be well-advised to have completed STAT GU4203 (Probability Theory), GU4204 (Statistical Inference), and GU4205 (Linear Regression).

**STAT GU4221 TIME SERIES ANALYSIS. 3.00 points.**

Prerequisites: STAT GU4205 or the equivalent. Least squares smoothing and prediction, linear systems, Fourier analysis, and spectral estimation. Impulse response and transfer function. Fourier series, the fast Fourier transform, autocorrelation function, and spectral density. Univariate Box-Jenkins modeling and forecasting. Emphasis on applications. Examples from the physical sciences, social sciences, and business. Computing is an integral part of the course

**Fall 2024: STAT GU4221**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4221	001/15182	T Th 2:40pm - 3:55pm 312 Mathematics Building	Rongning Wu	3.00	12/35

**Spring 2025: STAT GU4221**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4221	001/14018	Sa 10:10am - 12:40pm 301 Uris Hall	Franz Rembart	3.00	14/45

**STAT GU4222 NONPARAMETRIC STATISTICS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: STAT GU4204 or the equivalent.  
Prerequisites: STAT GU4204 or the equivalent. Statistical inference without parametric model assumption. Hypothesis testing using ranks, permutations, and order statistics. Nonparametric analogs of analysis of variance. Non-parametric regression, smoothing and model selection

**Spring 2025: STAT GU4222**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4222	001/14019	M W 5:30pm - 6:45pm 903 School Of Social Work	Arian Maleki	3.00	1/25

**STAT GU4223 MULTIVARIATE STAT INFERENCE. 3.00 points.**

Prerequisites: STAT GU4205 or the equivalent.  
Prerequisites: STAT GU4205 or the equivalent. Multivariate normal distribution, multivariate regression and classification; canonical correlation; graphical models and Bayesian networks; principal components and other models for factor analysis; SVD; discriminant analysis; cluster analysis

**STAT GU4224 BAYESIAN STATISTICS. 3.00 points.**

Prerequisites: STAT GU4204 or the equivalent.  
This course introduces the Bayesian paradigm for statistical inference. Topics covered include prior and posterior distributions: conjugate priors, informative and non-informative priors; one- and two-sample problems; models for normal data, models for binary data, Bayesian linear models; Bayesian computation: MCMC algorithms, the Gibbs sampler; hierarchical models; hypothesis testing, Bayes factors, model selection; use of statistical software. Prerequisites: A course in the theory of statistical inference, such as STAT GU4204 a course in statistical modeling and data analysis, such as STAT GU4205

**Fall 2024: STAT GU4224**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4224	001/15183	M W 6:10pm - 7:25pm 428 Pupin Laboratories	Ronald Neath	3.00	24/35

**Spring 2025: STAT GU4224**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4224	001/14020	T Th 7:40pm - 8:55pm 301 Uris Hall	Dobrin Marchev	3.00	15/30

### STAT GU4231 SURVIVAL ANALYSIS. 3.00 points.

Prerequisites: STAT GU4205 or the equivalent.

Prerequisites: STAT GU4205 or the equivalent. Survival distributions, types of censored data, estimation for various survival models, nonparametric estimation of survival distributions, the proportional hazard and accelerated lifetime models for regression analysis with failure-time data. Extensive use of the computer

#### Spring 2025: STAT GU4231

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4231	001/17402	F 1:10pm - 3:40pm 903 School Of Social Work	Zhiliang Ying	3.00	1/15

### STAT GU4232 GENERALIZED LINEAR MODELS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: STAT GU4205 or the equivalent.

Prerequisites: STAT GU4205 or the equivalent. Statistical methods for rates and proportions, ordered and nominal categorical responses, contingency tables, odds-ratios, exact inference, logistic regression, Poisson regression, generalized linear models

### STAT GU4233 Multilevel Models. 3 points.

Theory and practice, including model-checking, for random and mixed-effects models (also called hierarchical, multi-level models). Extensive use of the computer to analyse data.

### STAT GU4234 SAMPLE SURVEYS. 3.00 points.

Prerequisites: STAT GU4204 or the equivalent. Introductory course on the design and analysis of sample surveys. How sample surveys are conducted, why the designs are used, how to analyze survey results, and how to derive from first principles the standard results and their generalizations. Examples from public health, social work, opinion polling, and other topics of interest

#### Spring 2025: STAT GU4234

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4234	001/14021	T Th 2:40pm - 3:55pm 312 Mathematics Building	Rongning Wu	3.00	6/25

### STAT GU4241 STATISTICAL MACHINE LEARNING. 3.00 points.

Prerequisites: STAT GU4206.

Prerequisites: STAT GU4206. The course will provide an introduction to Machine Learning and its core models and algorithms. The aim of the course is to provide students of statistics with detailed knowledge of how Machine Learning methods work and how statistical models can be brought to

bear in computer systems - not only to analyze large data sets, but to let computers perform tasks that traditional methods of computer science are unable to address. Examples range from speech recognition and text analysis through bioinformatics and medical diagnosis. This course provides a first introduction to the statistical methods and mathematical concepts which make such technologies possible

#### Spring 2025: STAT GU4241

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4241	001/14024	M W 10:10am - 11:25am 140 Uris Hall	Samory Kpotufe	3.00	15/50

### STAT GU4261 STATISTICAL METHODS IN FINANCE. 3.00 points.

Prerequisites: STAT GU4205 or the equivalent. A fast-paced introduction to statistical methods used in quantitative finance. Financial applications and statistical methodologies are intertwined in all lectures. Topics include regression analysis and applications to the Capital Asset Pricing Model and multifactor pricing models, principal components and multivariate analysis, smoothing techniques and estimation of yield curves statistical methods for financial time series, value at risk, term structure models and fixed income research, and estimation and modeling of volatilities. Hands-on experience with financial data

#### Fall 2024: STAT GU4261

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4261	001/15185	F 10:10am - 12:40pm 301 Pupin Laboratories	Hammou El Barmi	3.00	8/35

#### Spring 2025: STAT GU4261

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4261	001/14031	Sa 10:10am - 12:40pm 309 Havemeyer Hall	Zhiliang Ying	3.00	18/25

### STAT GU4263 STAT INF/TIME-SERIES MODELLING. 3.00 points.

Prerequisites: STAT GU4204 or the equivalent. STAT GU4205 is recommended. Modeling and inference for random processes, from natural sciences to finance and economics. ARMA, ARCH, GARCH and nonlinear models, parameter estimation, prediction and filtering. This is a core course in the MS program in mathematical finance

#### Fall 2024: STAT GU4263

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4263	001/15186	T Th 6:10pm - 7:25pm 301 Pupin Laboratories	Alberto Gonzalez Sanz	3.00	1/35
STAT 4263	002/15187	Sa 10:10am - 12:40pm 301 Uris Hall	Franz Rembart	3.00	5/35

**STAT GU4291 ADVANCED DATA ANALYSIS. 3.00 points.**

Prerequisites: STAT GU4205 and at least one statistics course numbered between GU4221 and GU4261. This is a course on getting the most out of data. The emphasis will be on hands-on experience, involving case studies with real data and using common statistical packages. The course covers, at a very high level, exploratory data analysis, model formulation, goodness of fit testing, and other standard and non-standard statistical procedures, including linear regression, analysis of variance, nonlinear regression, generalized linear models, survival analysis, time series analysis, and modern regression methods. Students will be expected to propose a data set of their choice for use as case study material

**Fall 2024: STAT GU4291**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4291	001/15149	F 5:10pm - 7:40pm 417 International Affairs Bldg	Demissie Alemayehu	3.00	1/35

**Spring 2025: STAT GU4291**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
STAT 4291	001/14034	F 10:10am - 12:40pm 309 Havemeyer Hall	Gabriel Young	3.00	5/25

**ACTUARIAL SCIENCES COURSES**

Only students preparing for a career in actuarial sciences should consider the courses in this section. Such students may also be interested in courses offered through the School of Professional Studies M.S. Program in Actuarial Science, but must check with the academic advisors in their schools to know whether they are allowed to register for those courses. Students majoring in statistics and preparing for a career in actuarial science may take STAT GU4282 (Regression and Time Series Analysis) in place of the major requirement STAT GU4205 (Linear Regression Analysis).

STAT GU4281	Theory of Interest
STAT GU4282	Linear Regression and Time Series Methods

**ADVANCED DATA SCIENCE COURSES**

In response to the ever growing importance of "big data" in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications at the interface between computer science and statistics. The Department offers a sequence that begins with the core course STAT GU4206 (Statistical Computing and Introduction to Data Science) and continues with the advanced electives GU4241 (Statistical Machine Learning) and GU4242 (Advanced Machine Learning), and also the advanced elective STAT GU4243 (Applied Data Science). Undergraduate students without experience in programming would likely benefit from

taking the statistical computing and data science course before attempting GU4241, GU4242, or GU4243.

STAT GU4241	STATISTICAL MACHINE LEARNING
STAT GU4242	Advanced Machine Learning
STAT GU4243	APPLIED DATA SCIENCE
STAT GU4702	Exploratory Data Analysis and Visualization

**ADVANCED STOCHASTIC PROCESSES COURSES**

The stochastic processes electives in this section have STAT GU4203 (Probability Theory) or the equivalent as prerequisites. Most students would also benefit from taking STAT GU4207 (Elementary Stochastic Processes) before embarking on the more advanced stochastic processes electives.

STAT GU4262	Stochastic Processes for Finance
STAT GU4264	STOCHASTIC PROCESSES-APPLIED I
STAT GU4265	STOCHASTIC METHODS IN FINANCE

**SUSTAINABLE DEVELOPMENT****THE SUSTAINABLE DEVELOPMENT PROGRAM:**

Department website: <http://sdev.ei.columbia.edu>

Office location: The Earth Institute, 2910 Broadway, Hogan Hall, B-Level, New York, NY 10025

**Co-Directors of Undergraduate Studies:**

Leah Aronowsky, 212-854-3830; [la2438@columbia.edu](mailto:la2438@columbia.edu)

Joerg Schaefer, 845-365-8703, [schaefer@ldeo.columbia.edu](mailto:schaefer@ldeo.columbia.edu)

**Undergraduate Administrator:** Sylvia Montijo; [smontijo@climate.columbia.edu](mailto:smontijo@climate.columbia.edu)

**THE STUDY OF SUSTAINABLE DEVELOPMENT**

Sustainable development is founded on the premise that human well-being should advance without irreparable harm to ecosystems and the vital services they provide, without depleting essential resources, and without posing risks to future generations. The term "sustainable" refers to managing the world's economy in a manner consistent with the continued healthy functioning of Earth's ecosystems, oceans, atmosphere and climate. In this context, "development" refers to continued

social, political, and economic progress aimed at improving the well-being of the global community, especially for the poorest people.

#### Academic Programs

The Earth Institute—in collaboration with Columbia College, the School of General Studies, the School of International and Public Affairs, and the Departments of Earth and Environmental Science; Ecology, Evolution, and Environmental Biology; and Earth and Environmental Engineering—offers a major and a special concentration in sustainable development.

These programs are designed to: engage students in this emergent interdisciplinary discussion, provide knowledge of the theory and practice of sustainable development, stimulate a critical examination of historical and conceptual antecedents, provide experience in the complex challenges of sustainable development through direct engagement, and help them imagine alternative futures for our rapidly changing world. With help from the Earth Institute faculty, courses are specifically created to address the very real and complex issues of development as they relate to the interactions of the natural and social systems.

The major focuses heavily on the sciences and provides students with a working knowledge of issues on a range of interacting subject areas. After declaring the major, students are assigned an academic adviser from within the Earth Institute, who advises on class selection and career development. Students benefit from a support system of faculty, advisers, and program managers, and have access to a multitude of resources for internships, study abroad programs, and career development.

The special concentration is intentionally more flexible, but its structure allows students to benefit from the cross-disciplinary courses and to build the expertise to allow them to address the fundamental issue of how to move towards a trajectory of sustainability.

The sustainable development program is structured to ensure that students graduate with the skills and knowledge to enable them to advance professionally in the public, private, governmental, and nonprofit sectors, and to pursue advanced degrees. Those interested in sustainable development are encouraged to participate in lectures, conferences, and other programs sponsored by the Earth Institute.

## STUDENT ADVISING

#### Co-Directors of Undergraduate Studies:

- Leah Aronowsky, 212-854-3830; [la2438@columbia.edu](mailto:la2438@columbia.edu)
- Joerg Schaefer, 845-365-8703, [schaefer@ldeo.columbia.edu](mailto:schaefer@ldeo.columbia.edu)

#### Undergraduate Administrator:

- Sylvia Montijo; [smontijo@climate.columbia.edu](mailto:smontijo@climate.columbia.edu)

## Consulting Advisers

Prospective students can declare the major or special concentration using the online declaration system.

Please direct any program questions to Sylvia Montijo ([smontijo@climate.columbia.edu](mailto:smontijo@climate.columbia.edu)), who is located in the Earth Institute's offices in [Hogan Hall](#).

#### Columbia College

Columbia College students typically declare their major or concentration (and any special concentration) through the Center for Student Advising during the spring semester of their sophomore year. More information is available on the Center for Student Advising [website](#).

#### School of General Studies

General Studies students may declare a major or concentration during the months of March and October. Additional details are available on the General Studies [website](#).

Program staff are available to discuss requirements, course substitutions and registration. Please direct these questions to Sylvia Montijo; [sm4084@columbia.edu](mailto:sm4084@columbia.edu)

## Enrolling in Classes

The sustainable development foundation courses should be taken first and students should then work with the program adviser on further course selection and sequencing. The major in sustainable development requires a minimum of 15 courses and a practicum as [follows](#) (p. 1000).

Students should take the following foundational courses in their first year at Columbia:

- EESC UN2330 Science for Sustainable Development (offered in fall)—this course satisfies the science core requirement
- SDEV UN2300 Challenges of Sustainable Development (offered in spring)

#### Course Substitution:

If you would like to have a course count for credit that was taken outside of the listed program requirements, the course must first go through a review and approval process. This includes electives not listed on the pre-approved list, transfer credits, study abroad, and Columbia courses not explicitly listed on the requirements list. To request approval, you must submit a course substitution form, linked below, to Sylvia Montijo at [sm4084@columbia.edu](mailto:sm4084@columbia.edu).

#### Restrictions:

- Requests for course substitutions will not be accepted beyond the first semester of your senior year. You may need

to return for an additional semester to complete the program requirements.

- Substitutions for the foundational courses (EESC 2330 Science for Sustainable Development and SDEV UN2300 Challenges of Sustainable Development) are not allowed.

Reviews are completed on a monthly basis and your decision will be e-mailed to you. A maximum of 4 course substitutions are permitted for majors and 2 course substitutions for special concentrators. The limit excludes the approval of elective courses.

#### Practicum Substitution:

Students in both the sustainable development major and special concentration are required to complete a Practicum. If a student wishes to substitute the Practicum requirement with a related internship or independent study, he/she will need to submit this form for pre-approval by the program directors. If your internship/independent study is pre-approved, you will need to enroll in the SDEV UN3998 Independent Study course during the same semester you undertake the approved internship/project OR the semester immediately following the completion of the internship/study. If you complete 42.5 contact hours, you are eligible to register for 1 credit. If you complete 85 contact hours or more, you are eligible to register for 2 credits. At the end of the semester you are enrolled in SDEV 3998, you will be asked to submit a Practicum Substitution Application to Sylvia Montijo at sm4084@columbia.edu. If you have successfully completed the application and received a passing grade, your internship/project will fulfill the practicum requirement. Please note only unpaid internships/independent studies are eligible for practicum credit.

### Preparing for Graduate Study

Accelerated 5 Year Program: Sustainable Development (B.A.) and Sustainability Management (M.S.)

Launched in Fall 2015 this companion degree program — offered in collaboration with The Earth Institute, Columbia College, the School of General Studies and the School of Professional Studies — allows students to earn both a bachelor's and a master's degree in just five years. Students are trained to become sustainability practitioners who understand the complex environmental challenges facing the world. They develop practical skills in management, quantitative analysis, and sustainability to transform the way that organizations do business.

Building upon the strong foundation of their undergraduate coursework, Sustainable Development students who are accepted into the Sustainability Management program will learn to draw from interdisciplinary perspectives in general, as well as develop specific skills and knowledge in financial management, quantitative analysis, public policy, and the physical dimensions of sustainability. Students will receive practical professional training to help them to understand the

systematic and organizational role of sustainability in any organization.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor [or special program or concentration] must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

### Advanced Placement

To ensure their advanced placement credits are transferred to Columbia, students are encouraged to work closely with their advising dean. For consideration of major credit, students must submit a course petition form, available [here](#), for review by the program's Co-Directors.

### Barnard College Courses

Several Barnard College courses have been approved for program requirements in the major, special concentration, and minor. See program requirements page for more details. Students must submit a course substitution form, available [here](#), to have additional Barnard coursework reviewed for program credit.

### Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor or special program or concentration.

- A maximum of 4 course substitutions are permitted for majors and 2 course substitutions for special concentrators. The limit excludes the approval of elective courses. No course substitutions are permitted for minors.
- Students must submit a course petition form, available [here](#), for review by the program's Co-Directors for any transfer coursework.

### Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor

[or special program or concentration], the DUS will need to confirm that they can be used toward requirements in the major/minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.

Study abroad and internships are strongly encouraged as a basis for thesis research and to provide students with practical experience and enhanced global awareness. The Global Fellows in Sustainable Development Program provides funding for students to further their studies off campus in the form of fieldwork and research.

## Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

The Senior Research Seminar, offered jointly with Barnard College, can be taken in the Spring/Fall or Fall/Spring sequence and includes guided, independent, in-depth research as well as discussions about scientific presentations and posters, data analysis, library research methods, and scientific writing culminating in the senior thesis. Each student is responsible for oral research presentations and an extended written report on a related subject of his or her choice. Completing a senior thesis with a B+ or better in both seminar courses is required for departmental honors. As of spring 2024, over 70+ students have completed a thesis with the sustainable development program. A list of past SDEV senior theses are [here](#).

## Undergraduate Research in Courses

SDEV 4101 Qualitative Research Methods

This course will provide an overview of social science research methods, with a focus on building a toolkit for undergraduate students. We begin with an overview of the science of knowing. How do we generate scientific hypotheses in the social sciences, and then how can we find out whether those hypotheses are accurate? An exploration of a range of qualitative research methods will occupy the majority of our class time, including interviewing, case studies, questionnaires, surveys, coding, and participant observation. Toward the end of the course we consider how mixed methods allow for the integration of quantitative tools in the social sciences. Throughout, students will both study and practice these

research methods, experimenting to better understand the strengths and challenges associated with each approach. The course will end with poster presentations in which students share their own research and justify the methods they have employed.

## Senior Thesis Coursework and Requirements

The Senior Research Seminar, offered jointly with Barnard College, can be taken in the Spring/Fall or Fall/Spring sequence and includes guided, independent, in-depth research as well as discussions about scientific presentations and posters, data analysis, library research methods, and scientific writing culminating in the senior thesis. Each student is responsible for oral research presentations and an extended written report on a related subject of his or her choice. Completing a senior thesis with a B+ or better in both seminar courses is required for departmental honors. As of spring 2024, over 70+ students have completed a thesis with the sustainable development program.

## Undergraduate Research Outside of Courses

The Climate School offers undergraduate students research assistant opportunities. Undergraduates from Columbia University serve as research assistants on projects related to climate and sustainable development and the environment with distinguished faculty and researchers at the cutting edge of this burgeoning field.

While research assistant positions at Columbia University are generally awarded to graduate students, this program instead aims to present undergraduates with a unique opportunity to be involved in research at a high level and to gain valuable experience and skills for their future academic and professional careers.

More information on student opportunities through the Climate School can be found [here](#).

## DEPARTMENT HONORS AND PRIZES

### • Department Honors

Sustainable Development majors who wish to be considered for departmental honors must:

1. Have a grade point average of at least 3.7 in their major courses.
2. Take two courses of the senior thesis seminar.
3. Receive at least a B+ in both senior thesis courses.

### • Academic Prizes

Stuart Gaffin Award for Leadership and Engagement

The Stuart Gaffin Award for Leadership and Engagement honors an individual or group of students in their senior year who will graduate with either a major or special concentration degree from the Undergraduate Program in

Sustainable Development. The award commemorates Professor Stuart Gaffin, who taught the Workshop in Sustainable Development from 2009-2019. Award selections will be based on nominating and supporting letters from students, faculty, and staff. Awardees will be selected based on demonstrated leadership and service in the spirit of sustainable development either on or off campus. The award honors leadership, impact, engagement, and dedication, all of which were characteristic of Professor Gaffin's contributions to our Columbia community.

#### Phi Beta Kappa

Each year 10% of graduating seniors are nominated for this honor (2% in fall and 8% in spring). Students are chosen based on the breadth, depth and rigor of their academic achievements, as well as recommendations from faculty members on their intellectual promise, character, and achievement both in and out of the classroom.

## OTHER IMPORTANT INFORMATION

- [Collaborative Research Grant](#)

The [Collaborative Research Grant](#), launched in 2017, provides undergraduate and masters students with an opportunity to work alongside Columbia University faculty on a research project of the student's choosing. Students may apply for funding for up to two semesters (fall/spring or spring/fall), which will enable them to explore the research project more fully than a typical one semester project would allow. Applications will be accepted from students from a variety of backgrounds and departments as long as the research focuses on an area related to environmental sustainability.

- Denning Global Fellows in Sustainable Development

The Denning Global Fellows in Sustainable Development Program supports field research for current Columbia undergraduates studying sustainable development, either as a major or as a special concentration. This field research may take the form of actual fieldwork, unpaid research assistantships, study abroad opportunities\*, theses, senior seminar projects, or independent studies. Funding will only be awarded for activities that explicitly fulfill degree requirements, and/or further an individual's studies in sustainable development. Ideally, fieldwork should provide an opportunity to conduct research and hone practical skills in data collection, analysis, and project management. Awards will vary in amount according to individual project needs. Current full-time Columbia students in the Undergraduate Program in Sustainable Development are eligible, provided they are in good academic standing. Learn more about previous Global Fellows [here](#).

## SUSTAINABLE DEVELOPMENT FACULTY

Susana Adamo (Center for International Earth Information Network)

Satyajit Bose (School of International and Public Affairs)

Steve Cohen (The Earth Institute; School of International and Public Affairs)

Lisa Dale (The Earth Institute; Ecology, Evolution, and Environmental Biology)

Ruth DeFries (Ecology, Evolution, and Environmental Biology) (Co-Director)

Paul Gallay (Ecology, Evolution and Environmental Biology)

Francesco Fiondella (International Research Institute for Climate and Society)

Michael Gerrard (Center for Climate Change Law and Columbia Law School)

Adela Gondek (Ecology, Evolution and Environmental Biology)

Radley Horton (Center for Climate Systems Research)

Joyce Klein-Rosenthal (The Earth Institute)

Jacqueline Klopp (The Earth Institute)

Upmanu Lall (Columbia Water Center; International Research Institute for Climate and Society)

Kytt McManus (Center for International Earth Science Information Network)

Rachel Moresky (Population and Family Health)

John Mutter (Earth and Environmental Sciences; School of International and Public Affairs)

Linda Pistolesi (Center for International Earth Science Information Network)

Jason Smerdon (Lamont-Doherty Earth Observatory) (Co-Director)

Martin Stute (Lamont-Doherty Earth Observatory)

Phil Weinberg (Ecology, Evolution and Environmental Biology)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before the 2023-2024 academic year may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

A minimum of 15 courses and a practicum are required, for a total of approximately 47 points, to complete the major. Students will take courses within the following framework:

- I. SDEV Foundation
- II. Basic Disciplinary Foundation (Natural Science, Social Science, Quantitative Foundation)
- III. Analysis and Solutions to Complex Problems
- IV. Skills/Actions
- V. Elective
- VI. Practicum
- VII. Workshop

For a full list of previously approved electives, please visit the sustainable development program [website](#).

Note:

Please visit the Sustainable Development website for requirements [majors](#).

### Course Numbering Structure

- 1000-2000-level courses are intended to be introductory (such as the Social Science sequence or the Foundation coursework).
- 3000-4000-level courses cover more advanced sustainable development concepts, such as the Skills/Actions, Complex Problems, or Elective requirements. Approved courses in the MS in Sustainability Management are also offered at the 4000-level.

- 5000-level courses are additional master's level courses (i.e., Climate and Society courses).
- 6000-level and above are PhD courses.

### Guidance for First-Year Students

Students must first be accepted into Columbia College or the School of General Studies to be eligible to declare the Sustainable Development program. Prospective students should review the course requirements and schedule an appointment with the program administrators to discuss any questions regarding the requirements. Prospective students can declare the major or special concentration using the online declaration system.

### Guidance for Transfer Students

Transfer students are advised to submit [course petitions](#) to have their prior coursework reviewed for major credit. Course petitions will not be accepted for foundation coursework (SDEV 2300 Challenges of Sustainable Development and EESC 2330 Science for Sustainable Development).

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

#### Major:

A minimum of 15 courses and a practicum are required, for a total of approximately 47 points, to complete the major. Students will take courses within the following framework:

- I. SDEV Foundation
- II. Basic Disciplinary Foundation (Natural Science, Social Science, Quantitative Foundation)
- III. Analysis and Solutions to Complex Problems
- IV. Skills/Actions
- V. Elective
- VI. Practicum
- VII. Workshop

A letter grade of C- or better is needed in all program related courses in order to satisfy the requirements for the major. P/F grades are only permitted in SDEV 3998.

For course descriptions and scheduling, check out the sustainable development [Bulletin](#).

#### Special concentration:

The special concentration is intentionally more flexible than the major, given that students have their major classes as well. However, its structure allows students to benefit from the program's cross-disciplinary courses and to build the expertise

that will allow them to address the fundamental issue of how to move toward a trajectory of sustainability.

A minimum of nine courses and a practicum are required for the special concentration. Students will take courses within the following framework:

- I. SDEV Foundation
- II. Natural Science Systems
- III. Social Science Systems
- IV. Analysis and Solutions to Complex Problems
- V. Skills/Actions
- VI. Practicum
- VII. Workshop

A letter grade of C- or better is needed in all program related courses in order to satisfy the requirements for the special concentration. P/F grades are only permitted in SDEV 3998.

For course descriptions and scheduling, check out the sustainable development [Bulletin](#).

## Major in Sustainable Development

A minimum of 15 courses and a practicum are required, for a total of approximately 47 points, to complete the major. Students will take courses within the following framework:

### Sustainable Development Foundation

SDEV UN1900 INTRO TO SUSTAINABLE DEVPT SEM (Beginning fall 2023, SDEV 1900 Introduction to Sustainable Development is no longer a required course for students in the major and special concentration. See note below.)<sup>1</sup>

SDEV UN2300 CHALLENGES OF SUSTAINABLE DEV

EESC UN2330 SCIENCE FOR SUSTAINABLE DEVPT

### Basic Disciplinary Foundation

Select one of the following science sequences. NOTE: Associated labs are required for Physics and Environmental Biology sequence.

CHEM UN1403 & CHEM UN1404 GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES

EEEB UN2001 & EEEB UN2002 ENVIRONMENTAL BIOLOGY I and ENVIRONMENTAL BIOLOGY II (EESC UN2310 is a co-requisite with EEEB UN2002)

EESC UN1600 & EESC UN2100 EARTH RESOURCES # SUSTAIN DEV and EARTH'S ENVIRO SYST: CLIM SYST

EESC UN1600 & EESC UN2200 EARTH RESOURCES # SUSTAIN DEV and EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

EESC UN1600 & EESC UN2300 EARTH RESOURCES # SUSTAIN DEV and EARTH'S ENVIRO SYST: LIFE SYST (EESC UN2310 is co-requisite with EESC UN2300)

EESC UN2100 & EESC UN2200 EARTH'S ENVIRO SYST: CLIM SYST and EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

EESC UN2100 & EESC UN2300 EARTH'S ENVIRO SYST: CLIM SYST and EARTH'S ENVIRO SYST: LIFE SYST (EESC UN2310 is co-requisite with EESC UN2300)

EESC UN2200 & EESC UN2300 EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH and EARTH'S ENVIRO SYST: LIFE SYST (EESC UN2310 is co-requisite with EESC UN2300)

PHYS UN1201 & PHYS UN1202 GENERAL PHYSICS I and GENERAL PHYSICS II (LABS PHYS 1291 and PHYS 1292 also required)

Select two of the following social science courses:

ANTH UN1002 THE INTERPRETATION OF CULTURE

ANTH UN1003 The Environment

ANTH UN2004 INTRO TO SOC # CULTURAL THEORY

ANTH BC2427 ANTHROPOLOGY OF CLIMATE CHANGE

ECON UN1105 PRINCIPLES OF ECONOMICS

HIST UN2222 NATURE # POWER: ENV HIST NORTH AMERICA

POLS UN1201 INTRO TO AMERICAN POLITICS (Students can take POLS 1201 or SDEV 2050)

POLS UN1501 INTRO TO COMPARATIVE POLITICS (Students can take POLS 1501 OR POLS 1601)

POLS UN1601 INTERNATIONAL POLITICS  
SDEV UN2000 INTRO TO ENVIRONMENTAL LAW

SDEV UN2050 ENVIRONMENTAL POLICY AND GOVERNANCE

SDEV UN3400 HUMAN POPULATIONS # SDEV

SOCI UN1000 THE SOCIAL WORLD

Select one of the following quantitative foundations courses:

EEEB UN3005 INTRO-STAT-ECOLOGY # EVOL BIOL

EESC BC3017	ENVIRONMENTAL DATA ANALYSIS
STAT S1101	INTRODUCTION TO STATISTICS (this course is approved as a quantitative foundations course starting Spring 2024)
STAT UN1101	INTRODUCTION TO STATISTICS (this course is approved as a quantitative foundations course starting Spring 2024)
STAT UN1201	CALC-BASED INTRO TO STATISTICS
MATH UN2015	Linear Algebra and Probability (This course is approved as a quantitative foundations course starting Fall 2022. This course replaces MATH UN2010 Linear Algebra as an option for this requirement.)
<b>Analysis and Solutions to Complex Problems</b>	
Select two of the following courses:	
ANTH BC3932	CLIM CHNG/GLOBAL MIGR/HUM RGT
CIEE E3260	ENGINEERING FOR COMMUNITY DEVELOPMENT
EAEE W4304	Closing the carbon cycle
ECIA W4100	MGMT # DEVPT OF WATER SYSTEMS
EEEB G4135	Urban Ecology and Design
EESC BC3032	Agricultural and Urban Land Use: Human-Environment Interactions
EESC GU4600	EARTH RESOURCES # SUSTAIN DEV
HIST UN3712	African Climate and History
HIST GU4811	Encounters with Nature: The History and Politics of Environment, Health and Development in South Asia and Beyond
PUBH UN3100	FUNDAMENTALS OF GLOBAL HEALTH
PUBH GU4200	Environment, Health, and Justice: Concepts and Practice
SDEV UN3330	Ecological and Social Systems for Sustainable Development
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3360	DISASTERS AND DEVELOPMENT
SDEV UN3366	ENERGY LAW
SDEV UN3410	Cities # Sustainability
URBS UN3565	Cities in Developing Countries: Problems and Prospects
SDEV GU4250	CLIMATE CHANGE: RESILIENCE # ADAPTATION

### The Summer Ecosystems Experience for Undergraduates (SEE-U) \*

SDEV GU4650	Building Climate Justice: Co-Creative Coastal Resilience Planning
-------------	---

#### Skills/Actions

Select two of the following courses:

EAEE E4257	ENVIR DATA ANALYSIS # MODELING
EESC GU4050	GLOBAL ASSMT-REMOTE SENSING
EESC BC3050	BIG DATA WITH PYTHON
SDEV UN2320	ECON # FIN MTHDS FOR SDEV
SDEV UN3390	GIS FOR SUSTAINABLE DEVELOPMNT
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV
SOCI UN3010	METHODS FOR SOCIAL RESEARCH
SUMA PS4100	Sustainability Management
SDEV GU4101	QUAL RESEARCH METHODS SDEV

#### SDEV GU4240 Science Communication

### The Summer Ecosystems Experience for Undergraduates (SEE-U) \*

#### Practicum

Select one of the following courses:

SDEV GU4500	SUSTAINABILITY AND THE MEANING OF PLACE ON CUTTYHUNK ISLAND
SDEV GU4550	The New York City Watershed: From Community Displacement to Collaboration and Climate Adaptation
INAF U4420	Oil, Rights and Development
SDEV UN3998	SUPERVISED INDIVIDUAL RESEARCH
SUMA PS4310	Practicum in Innovation Sustainability Leadership
SUMA PS4734	Earth Institute Practicum

#### Electives

Select two courses from the following areas. Courses can be combined across Areas 2-5 only. If you select Area 1, you must complete two thesis courses and these will fulfill the elective requirement:

Area 1: Senior Thesis Sequence (EESC BC3800/ EESC BC3801 and EESC UN3901) \*\*

Area 2: Upper level courses from the approved electives list (see link in footnotes to access list) \*\*\*

Area 3: Additional courses listed under Analysis and Solutions to Complex Problem

Area 4: Additional courses listed under Skills/Actions

Area 5

SDEV UN3310	ETHICS OF SUSTAINABLE DEVPT
-------------	-----------------------------

SDEV GU4050	US WATER # ENERGY POLICY
SDEV GU4350	PUBLIC LANDS IN THE AMERICAN WEST
SDEV GU4600	SPECIAL TOPICS IN SDEV # CLIMATE
<b>Capstone Workshop</b>	
SDEV UN3280	WORKSHOP IN SUSTAINABLE DEVPT
SDEV UN3550	BANGLADSH:LIFE-TECT ACTV DELTA
SDEV GU4400	Sustainable Development in Rwanda

! Beginning fall 2023, SDEV 1900 Introduction to Sustainable Development is no longer a required course for students in the major and special concentration. SDEV 1900 will continue to be offered every year. Please reach out to Sylvia Montijo (smontijo@climate.columbia.edu) with any questions about this change.

\* The Summer Ecosystem Experiences for Undergraduates (SEE-U): Please note that students in the major or the special concentration who take SEE-U as a 6-point course can use 3 points towards the Complex Problems requirement and 3 points towards the Skills/Action requirement. If SEE-U is taken for 3 points, it can only count as one Complex Problems class.

\* If choosing the senior thesis option to fulfill the elective requirements, students must take both courses in the senior thesis sequence.

\* For a full list of previously approved electives, please visit the sustainable development program website: <https://sdev.ei.columbia.edu/content/approved-electives-list>

Please visit the Sustainable Development website for requirements:

Majors: <http://sdev.ei.columbia.edu/curriculum/major/>

## Major in Climate and Sustainability

The major in Climate and Sustainability is a joint major between the Undergraduate Program in Sustainable Development and DEES, and requires a minimum of 46.5 points, distributed as follows:

### Climate and Sustainability Foundations

Two courses:

SDEV UN2300	CHALLENGES OF SUSTAINABLE DEV
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

### Basic Disciplinary Foundations

Five courses:

#### A. Natural Science Courses (2):

#### Required:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
-------------	--------------------------------

#### One of the following:

EESC UN1201	Environmental Risks and Disasters
EESC UN1600	EARTH RESOURCES # SUSTAIN DEV
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

### B. Social Science Courses (2):

#### Required:

SDEV UN2100	Introduction to Climate Justice
-------------	---------------------------------

#### One of the following:

EESC UN1201	Environmental Risks and Disasters
EESC UN1600	EARTH RESOURCES # SUSTAIN DEV
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

### C. Quantitative Foundations Course (1):

#### One of the following:

STAT UN1201	CALC-BASED INTRO TO STATISTICS
MATH UN2010	LINEAR ALGEBRA
EEEB UN3005	INTRO-STAT-ECOLOGY # EVOL BIOL
EESC BC3017	ENVIRONMENTAL DATA ANALYSIS

Note: Taking Introduction to Statistics and Calculus separately will not fulfill the quantitative requirement.

## Climate and Sustainability: Complexities and Analyses

Four courses:

#### Two courses form the following:

SDEV GU4250	CLIMATE CHANGE: RESILIENCE # ADAPTATION
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3366	ENERGY LAW
ANTH BC3932	CLIM CHNG/GLOBAL MIGR/HUM RGT
EESC GU4235	SEA LEVEL CHANGE
EAEE E4304	CLOSING THE CARBON CYCLE

One of the following Natural Science courses:

EESC GU4220	GLACIOLOGY
EESC GU4235	SEA LEVEL CHANGE

EESC GU4330	INTRO-TERRESTRIAL PALEOCLIMATE
EESC GU4835	Wetlands and Climate Change
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4923	Biological Oceanography
EESC GU4925	INTRO TO PHYSICAL OCEANOGRAPHY
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY
EAEE E4304	CLOSING THE CARBON CYCLE

One of the following Social Science courses:

ANTH BC3932	CLIM CHNG/GLOBAL MIGR/ HUM RGT
ANTH UN3861	Anthropology of the Anthropocene
POLS GU4814	GLOBAL ENERGY: SECURITY/ GEOPOL
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3366	ENERGY LAW
SDEV GU4050	US WATER # ENERGY POLICY
ECON BC3039	Environmental and Natural Resource Economics

## Electives

Select two courses from the following areas. If you select Area 1, you must complete two thesis courses, and these will fulfill the elective requirement:

### Area 1:

EESC UN3901	SENIOR SEMINAR
-------------	----------------

### Area 2:

Additional courses listed under the Climate and Sustainability: Complexities and Analysis requirement.

### Area 3:

Additional quantitative or qualitative methods or skills courses:

STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN3105	APPLIED STATISTICAL METHODS
STAT UN3106	APPLIED MACHINE LEARNING
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4207	ELEMENTARY STOCHASTIC PROCESS
EAEE E4257	ENVIR DATA ANALYSIS # MODELING
EESC BC3050	BIG DATA WITH PYTHON

SDEV UN3390	GIS FOR SUSTAINABLE DEVELOPMNT
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV
SDEV GU4101	QUAL RESEARCH METHODS SDEV

## Practicum

### One course:

SDEV UN3998	SUPERVISED INDIVIDUAL RESEARCH
SDEV GU4500	SUSTAINABILITY AND THE MEANING OF PLACE ON CUTTYHUNK ISLAND
SDEV GU4550	The New York City Watershed: From Community Displacement to Collaboration and Climate Adaptation
SUMA PS4734	Earth Institute Practicum

## Capstone Workshop

### One course:

SDEV UN3280	WORKSHOP IN SUSTAINABLE DEVPT
SDEV UN3550	BANGLADSH:LIFE-TECT ACTV DELTA
SDEV GU4400	Sustainable Development in Rwanda

## Minor in Sustainable Development

The minor in Sustainable Development consists of five courses, enabling students to augment their education with critical interdisciplinary skills and knowledge needed to address the urgent and complex challenges of sustainable development.

### Minor Course Requirements

1. EESC 2330 Science for Sustainable Development (3 credits)
2. SDEV 2300 Challenges of Sustainable Development (3 credits)
3. One course from Analysis & Solutions to Complex Problems Requirement Area (3 credits)
4. Second course from Analysis & Solutions to Complex Problems Requirement Area (3 credits)
5. One course from Skills/Actions Requirement Area (3 credits)

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before the 2023-2024 academic year. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic

Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study. Concentrations are not available to students who entered Columbia in or after Fall 2024.

## Special Concentration in Sustainable Development

The sustainable development foundation courses should be taken first and students should then work with the program adviser on further course selection and sequencing.

The special concentration in sustainable development requires a minimum of 9 courses and a practicum as follows:

### Sustainable Development Foundation

SDEV UN1900	INTRO TO SUSTAINABLE DEVPT SEM (Beginning fall 2023, SDEV 1900 Introduction to Sustainable Development is no longer a required course for students in the major and special concentration. See note below.) <sup>1</sup>
SDEV UN2300	CHALLENGES OF SUSTAINABLE DEV
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT

### Natural Science Systems

Select one of the following courses. NOTE: Associated labs are required for Physics and Environmental Biology sequence.

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
EEEB UN1001	Biodiversity
EEEB UN2002	ENVIRONMENTAL BIOLOGY II (EESC UN2310 is co-requisite with EEEB UN2002)
EESC UN1003	Climate and Society: Case Studies
EESC UN1011	Earth: Origin, Evolution, Processes, Future
EESC UN1030	OCEANOGRAPHY
EESC UN1201	Environmental Risks and Disasters
EESC UN1600	EARTH RESOURCES # SUSTAIN DEV
EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST (EESC UN2310 is co-requisite with EESC UN2300)
PHYS UN1201 & PHYS UN1291	GENERAL PHYSICS I and GENERAL PHYSICS I LAB

### Human Science Systems

Select one of the following courses:

ANTH UN1002	THE INTERPRETATION OF CULTURE
-------------	-------------------------------

ANTH UN1003	The Environment
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ANTH BC2427	ANTHROPOLOGY OF CLIMATE CHANGE
ECON UN1105	PRINCIPLES OF ECONOMICS
HIST UN2222	NATURE # POWER: ENV HIST NORTH AMERICA
POLS UN1201	INTRO TO AMERICAN POLITICS (Students can take POLS 1201 OR SDEV 2050)
POLS UN1501	INTRO TO COMPARATIVE POLITICS (Students can take POLS 1501 OR POLS 1601)
POLS UN1601	INTERNATIONAL POLITICS
SDEV UN2000	INTRO TO ENVIRONMENTAL LAW
SDEV UN2050	ENVIRONMENTAL POLICY AND GOVERNANCE
SDEV UN3400	HUMAN POPULATIONS # SDEV
SOCI UN1000	THE SOCIAL WORLD

### Analysis and Solutions to Complex Problems

Select two of the following courses:

ANTH BC3932	CLIM CHNG/GLOBAL MIGR/HUM RGT
CIEE E3260	ENGINEERING FOR COMMUNITY DEVELOPMENT
EAEE W4304	Closing the carbon cycle
ECIA W4100	MGMT # DEVPT OF WATER SYSTEMS
EEEB G4135	Urban Ecology and Design
EESC BC3032	Agricultural and Urban Land Use: Human-Environment Interactions
EESC GU4600	EARTH RESOURCES # SUSTAIN DEV
HIST GU4811	Encounters with Nature: The History and Politics of Environment, Health and Development in South Asia and Beyond
PUBH UN3100	FUNDAMENTALS OF GLOBAL HEALTH
PUBH GU4200	Environment, Health, and Justice: Concepts and Practice
SDEV UN3330	Ecological and Social Systems for Sustainable Development
SDEV UN3355	CLIMATE CHANGE AND LAW
SDEV UN3360	DISASTERS AND DEVELOPMENT
SDEV UN3366	ENERGY LAW
SDEV UN3410	Cities # Sustainability
URBS UN3565	Cities in Developing Countries: Problems and Prospects
The Summer Ecosystem Experiences for Undergraduates (SEE-U) <sup>*</sup>	

SDEV GU4650 Building Climate Justice: Co-Creative Coastal Resilience Planning

#### Skills/Actions

Select one of the following courses:

EAE E4257	ENVIR DATA ANALYSIS # MODELING
EESC BC3050	BIG DATA WITH PYTHON
EESC GU4050	GLOBAL ASSMT-REMOTE SENSING
SDEV UN2320	ECON # FIN MTHDS FOR SDEV
SDEV UN3390	GIS FOR SUSTAINABLE DEVELOPMNT
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV
SDEV GU4101	QUAL RESEARCH METHODS SDEV
SDEV GU4240	Science Communication
SUMA PS4100	Sustainability Management
SOCI UN3010	METHODS FOR SOCIAL RESEARCH

The Summer Ecosystem Experiences for Undergraduates (SEE-U) \*

#### Practicum

Select one of the following courses:

SDEV GU4500	SUSTAINABILITY AND THE MEANING OF PLACE ON CUTTYHUNK ISLAND
SDEV GU4550	The New York City Watershed: From Community Displacement to Collaboration and Climate Adaptation
INAF U4420	Oil, Rights and Development
SDEV UN3998	SUPERVISED INDIVIDUAL RESEARCH
SUMA PS4310	Practicum in Innovation Sustainability Leadership

SUMA PS4734 Earth Institute Practicum

#### Capstone Workshop

SDEV UN3280	WORKSHOP IN SUSTAINABLE DEVPT
SDEV UN3550	BANGLADSH:LIFE-TECT ACTV DELTA
SDEV GU4400	Sustainable Development in Rwanda

! Beginning fall 2023, SDEV 1900 Introduction to Sustainable Development is no longer a required course for students in the major and special concentration. SDEV 1900 will continue to be offered every year. Please reach out to Sylvia Montijo (smontijo@climate.columbia.edu) with any questions about this change.

\* The Summer Ecosystem Experiences for Undergraduates (SEE-U): Please note that students in the major or the special concentration who take SEE-U as a 6-point course can use

3 points towards the Complex Problems requirement and 3 points towards the Skills/Action requirement. If SEE-U is taken for 3 points, it can only count as one Complex Problems class.

For Sustainable Development Website for Special Concentrators: <http://sdev.ei.columbia.edu/curriculum/special-concentration/>

#### SDEV UN1900 INTRO TO SUSTAINABLE DEVPT SEM. 1.00 Point.

The course is designed to be a free flowing discussion of the principals of sustainable development and the scope of this emerging discipline. This course will also serve to introduce the students to the requirements of the undergraduate program in sustainable development and the content of the required courses in both the special concentration and the major. The focus will be on the breadth of subject matter, the multidisciplinary nature of the scholarship and familiarity with the other key courses in the program. Offered in the Fall and Spring

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	11134	Jason Smerdon	T 11:40am - 12:55pm 644 Seeley W. Mudd Building

#### SDEV UN2000 INTRO TO ENVIRONMENTAL LAW. 3.00 Points.

The course provides an overview of environmental law for students without a legal background. It examines U.S. statutes and regulations regarding air, water, hazardous and toxic materials, land use, climate change, endangered species, and the like, as well as international environmental issues. After completing the course students should be equipped to understand how the environmental laws operate, the role of the courts, international treaties and government agencies in implementing environmental protection, and techniques used in addressing these issues

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	11121	Lisa Garcia	M W 4:10pm - 5:25pm 616 Martin Luther King Building

#### SDEV UN2050 ENVIRONMENTAL POLICY AND GOVERNANCE. 3.00 Points.

Sustainability is a powerful framework for thinking about business, economics, politics and environmental impacts. An overview course, Environmental Policy # Governance will focus specifically on the policy elements of sustainability. With an emphasis on the American political system, the course will begin by exploring the way the American bureaucracy addresses environmental challenges. We will then use the foundations established through our understanding of the US system to study sustainable governance at the international level. With both US and international perspectives in place, we will then address a range of specific sustainability issues including land use, climate change, food and agriculture, air

quality, water quality, and energy. Over the course of the semester, we will study current events through the lens of sustainability policy to help illustrate course concepts and theories

### **SDEV UN2100 Introduction to Climate Justice. 3.00 Points.**

Today, it's impossible to talk about the climate crisis without talking about justice. Thanks to the continued activism of grassroots and frontline community organizers, progressive NGOs, and coalitions of small island states, climate politics are now deeply linked to questions of social justice and equity. This course introduces students to key topics and issues in climate justice in order to gain a foundational understanding of the field. Themes and topics include: theoretical frameworks of climate justice; climate justice and gender; the justice dimensions of climate adaptation and managed retreat; energy democracy and just transitions; the question of culpability and who should be held responsible for causing global warming; and historical efforts to codify justice considerations at international institutions like the UN

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	17275	Leah Aronowsky	T 4:10pm - 6:00pm 308a Lewisohn Hall

### **SDEV UN2300 CHALLENGES OF SUSTAINABLE DEV. 3.00 Points.**

This course provides an introduction to the field of sustainable development, drawing primarily from social science and policy studies. It offers a critical examination of the concept of sustainable development, showing how factors like economics, population, culture, politics and inequality complicate its goals. Students will learn how different social science disciplines (political science, demography, economics, geography, history, law, and sociology) approach challenges of sustainable development across a variety of topics (fisheries, climate change, air pollution, consumption, energy, conservation, and water management). The course provides students with some of the fundamental concepts, vocabulary, and analytical tools to pursue and think critically about sustainable development. Offered in the Spring

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	11125	Lisa Dale	T Th 10:10am - 11:25am 142 Uris Hall

### **SDEV UN2320 ECON # FIN MTHDS FOR SDEV. 3.00 Points.**

Prerequisites: Principles of Economics and one semester of calculus. The objective of this course is to introduce students to the skills and methods necessary to understand and evaluate the economic and financial aspects of sustainable development. Throughout the course, students will compare competing objectives and policies through the prism of economic # financial reasoning. Environmental economics and finance are broad areas covering all the multi-faceted and complex

interactions between the economic system and the natural environment. Financial markets are the primary source of signals used to direct economic activity in a capitalist global economy. Economic activity is the primary determinant of the quality and sustainability of the natural environment. Students interested in sustainable development who are unfamiliar with economics and who do not develop a facility with economic and financial concepts are severely handicapped in their efforts to increase the level of environmental responsibility embedded in economic activity. This course is intended to provide students with a flying introduction to key analytical concepts required to understand topics in environmental economics and finance and to introduce them to selected topics within the field. The first part of the course (the Analytical Toolbox) is designed to provide a set of portable skills for two sets of students: a) those who will work in fields specifically devoted to sustainable development who, as part of their work, will need to engage with sources of economic # financial information and with discourses where sustainable development is not a focus; and b) students who may end up following careers in organizations where sustainability is not the primary objective. The topics and readings in the second part of the course were chosen to facilitate a critical engagement with the broad intellectual framework underlying sustainable development from the perspective of economics and finance. The topics are intended to create a community of intellectual discourse on sustainable development that will spill over beyond the classroom to the conversations of students and alumni that will far outlive graduation. Offered in the Fall

### **SDEV UN3280 WORKSHOP IN SUSTAINABLE DEVPT. 4.00 Points.**

Open to sustainable development seniors only.

The upper level undergraduate Sustainable Development Workshop will be modeled on client based graduate-level workshops, but with more time devoted to methods of applied policy analysis and issues in Sustainable Development. The heart of the course is the group project on an issue of sustainable development with a faculty advisor providing guidance and ultimately grading student performance. Students would receive instruction on methodology, group work, communication and the context of policy analysis. Much of the reading in the course would be project-specific and identified by the student research teams. Offered in Fall and Spring

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	11135	Jenna Lawrence	M W 2:10pm - 4:00pm 303 Hamilton Hall
Fall 2024	002	11136	Radley Horton	T Th 12:10pm - 2:00pm 610 Martin Luther King Building
Spring 2025	001	11131	Jenna Lawrence	M W 2:10pm - 4:00pm 606 Lewisohn Hall

Spring 2025    002    11789    Sharon Mathews    T Th 4:10pm - 6:00pm  
302  
Fayerweather

### **SDEV UN3310 ETHICS OF SUSTAINABLE DEVPT. 3.00 Points.**

Aiming to improve human conditions within many diverse environments, sustainable development seeks to create, increase and perpetuate benefit and to cease, rectify and reverse harm. Sustainable development is consequently inextricable from the fabric of ethics, woven with determinations of benefit and harm to the existence and well-being of both humans and nonhumans. Underlying such determinations are those of self- and other-regarding motivation and behavior; and underlying these are still others, of sensitivity and rationality in decision-making, whether individual, social or public. Sustainable development is interlaced with and contingent upon all these determinations, at once prescriptive and judgmental, which can be called the ethics of sustainable development. This course is divided into four main sections, of which two are intended to show the ethical fallacies of unsustainable development, and two, the ethical pathways of sustainable development. The first section focuses upon ethically problematic basic assumptions, including human (species) hegemony, happy (hedonic) materialism, and selective (data) denial. The second focuses upon ethically problematic ensuing rationalizations, including those pertaining to damages, victims, consequences and situations of climatic, chemical, biological and ecological harm. The third section responds to these rationalizations with ethically vital considerations of earth justice, environmental justice, culturally-based ethics, and sector-based ethics (water, food, place and climate ethics). Finally, the fourth section responds to the initial, longstanding problematic assumptions with a newly emergent ethical paradigm, comprising biotic wholeness, environmental integrity and the deliberative zero-goal. Tying all sections together is the central theme: to be sustainable, development must be ethical. Reflecting the collaborative quality of the field of sustainable development, the course extends to readings whose authors have all pursued their work at intersections of science and ethics, environment and ethics, policy and ethics, business and ethics, and sustainable development and ethics

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	15886	Adela Gondek	T Th 1:10pm - 2:25pm 608 Martin Luther King Building

### **SDEV UN3330 Ecological and Social Systems for Sustainable Development. 3 Points.**

Prerequisites: *SDEV W2300* Challenges of Sustainable Development; *EESC W2330* Science for Sustainable Development.

The course focuses on basic principles in understanding ecological and social relationships and then focuses on three current topics central to Sustainable Development for in-depth

study. Examples of topics to be covered are: conservation of biodiversity, payments for ecosystem services, and the ecology of food production. The emphasis will be on the multiple perspectives— environmental, social and economic—required to understand and develop solutions to problems in sustainable development. These topics will undoubtedly vary from year to year, as the course keeps pace with current topics.

### **SDEV UN3355 CLIMATE CHANGE AND LAW. 3.00 Points.**

Enrollment limited to 15.

The purpose of this course is to provide students with a broad introduction to the field of climate law in the United States and at the international level. The course begins with an overview of the causes and effects of global climate change and the methods available to control and adapt to it. We then examine the negotiation, implementation and current status of the United Nations Framework Convention on Climate Change, the Kyoto Protocol, and the Copenhagen Accord. The focus then turns to the past and proposed actions of the U.S. Congress, the executive branch and the courts, as well as regional, state and municipal efforts. The Clean Air Act, the National Environmental Policy Act and the Endangered Species Act will receive special attention. We evaluate the various legal tools that are available to address climate change, including cap-and-trade schemes; carbon taxation; command-and-control regulation; litigation; securities disclosures; and voluntary action. The roles of energy efficiency, renewable energy sources, carbon capture and sequestration, and forestry and agriculture each receive close attention. Implications for international human rights, international trade, environmental justice, and international and intergenerational equity are discussed. The course concludes with examination of the special challenges posed by China; proposals for adaptation and geoengineering; and business opportunities and the role of lawyers. Offered in the Spring

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	17516	Sheila Foster	T 1:10pm - 3:40pm 326 Uris Hall
Spring 2025	001	11908	Michael Gerrard	M W 2:50pm - 4:10pm 106 Jerome L Greene Hall

### **SDEV UN3360 DISASTERS AND DEVELOPMENT. 3.00 Points.**

Prerequisites: *EESC 2330*; *SDEV W2300*. Human welfare status is very unevenly distributed throughout the globe - some of us live very comfortable lives, others remain in desperate poverty showing little progress away from their condition. Between are countries that are rapidly developing and converging toward the welfare of the richest. At all levels of economic development human activities place significant pressure on the environment and threatens all of Earth's vital functions and support systems for human life. This challenge requires timely responses based on solid understanding of the

human/environment interface, technological and economic approaches to mitigate adverse effects on the environment, and routes to understanding the complex dynamics of the coupled human/natural systems that can chart a pathway to improvement in the lives of the poorest and continued well-being for those who have achieved prosperity without forcing natural systems into decline or massive fluctuation. This course offers undergraduate students, for the first time, a comprehensive course on the link between natural disaster events and human development at all levels of welfare. It explores the role that natural disasters might have and have had in modulating development prospects. Any student seriously interested in sustainable development, especially in light of climate change, must study the nature of extreme events - their causes, global distribution and likelihood of future change. This course will cover not only the nature of extreme events, including earthquakes, hurricanes, floods and droughts but also their transformation into disaster through social processes. It will ultimately help students to understand the link between such extreme events, the economic/social shock they represent and development outcomes. The course will combine careful analysis of the natural and social systems dynamics that give rise to disasters and examine through group learning case studies from the many disasters that have occurred in the first decade of the 21st century. Offered in the Spring (odd years only)

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	14160	John Mutter, Sonali Deraniyagala	M W 6:10pm - 7:25pm 332 Uris Hall

### **SDEV UN3366 ENERGY LAW. 3.00 Points.**

This course concerns the regulation of energy, energy resources, and energy facilities. Among the topics will be the regulation of rates and services; the roles of the Federal Energy Regulatory Commission and the state public utility commissions; and the interaction with environmental law. Attention will be devoted to energy resources (such as oil, natural gas and coal) and to generating, transmission and distribution facilities. The current and future roles of renewable energy, energy efficiency, and nuclear energy will receive special attention, as will the regulation and deregulation of electricity

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	11161	Michael Gerrard	W 4:20pm - 6:10pm 104 Jerome L Greene Hall

### **SDEV UN3390 GIS FOR SUSTAINABLE DEVELOPMNT. 3.00 Points.**

This course is designed to provide students with a comprehensive overview of theoretical concepts underlying GIS systems and to give students a strong set of practical skills to use GIS for sustainable development research. Geographic Information Systems (GIS) are a system of computer software, data and analysis methods used to create, store, manage,

digital information that allow us to create maps and dynamic models to analyze the physical and social processes of the world. Through a mixture of lectures, readings, focused discussions, and hands-on exercises, students will acquire an understanding of the variety and structure of spatial data and databases, gain knowledge of the principles behind raster and vector based spatial analysis, and learn basic cartographic principles for producing maps that effectively communicate a message. Student will also learn to use newly emerging web based mapping tools such as Google Earth, Google Maps and similar tools to develop on-line interactive maps and graphics. The use of other geospatial technologies such as the Global Positioning System will also be explored in this class. Case studies examined in class will draw examples from a wide ranges of GIS applications developed to assist in the development, implementation and evaluation of sustainable development projects and programs. On completion of the course, students will: 1. use a variety of GIS software programs to create maps and reports; 2. develop a sound knowledge of methods to search, obtain, and evaluate a wide variety of spatial data resources; 3. develop skills needed to determine best practices for managing spatial data resources; 4. use GIS to analyze the economic, social and environmental processes underlying the concept of building a sustainable world; 5. Gain an understanding of the limits of these technologies and make assessments of uncertainty associated with spatial data and spatial analysis models. Offered in the fall and spring

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	11162	Kytt MacManus	M 10:10am - 11:25am 327 Uris Hall
Fall 2024	001	11162	Kytt MacManus	W 10:10am - 12:25pm 703 Hamilton Hall
Spring 2025	001	12980	Linda Pistolesi	T 10:10am - 11:25am 252 Engineering Terrace
Spring 2025	001	12980	Linda Pistolesi	Th 10:10am - 12:25pm 252 Engineering Terrace

### **SDEV UN3400 HUMAN POPULATIONS # SDEV. 3.00 Points.**

Population processes and their outcomes in terms of population size and distribution have a fundamental role in sustainable development and also broad policy implications. This course will introduce students to the scientific study of human populations as a contribution toward understanding social structure, relations, and dynamics, as well as society-nature interactions. The aim is to offer a basic introduction to the main theories, concepts, measures, and uses of demography. The course will cover the issues of population size, distribution and composition, and consumption, at different scales from global to regional to local, as well as the implications for population-

environment relationships. It will also address the fundamental demographic processes of mortality, fertility and migration, including their trends and transitions. We will consider these topics in the context of economic development, sustainability and cultural change. The course will also include an overview of basic demographic techniques and tools used for identifying, managing, analyzing and interpreting population data, and an introduction to population projections. Lab sessions will supplement readings and lectures by enabling students to explore data sources, calculate rates, and graphically represent demographic data. Offered in the Fall (even years).

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	14709	Susana Adamo	T Th 10:10am - 11:25am 304 Hamilton Hall

#### **SDEV UN3410 Cities # Sustainability. 3.00 Points.**

In an increasingly urban world, sustainable development is not possible without achieving sustainability in cities. This course explores the challenges and opportunities of sustainable development policy-making at the urban level through the study of local efforts to address climate change, provide access to clean water, and develop renewable energy resources, among other topics. Students will gain a more detailed understanding of how cities' histories, land use patterns, and economies influence urban resource use, and how cities have attempted to change those impacts. Using case studies of local sustainability initiatives, students examine how a city's governance structure, political dynamics, and administrative capacity affect policy outcomes. Consideration of the equity implications of urban sustainability efforts is integral to the course

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	11692	Deborah Morris	T 6:10pm - 8:00pm 401 Hamilton Hall

#### **SDEV UN3450 SPATIAL ANALYSIS FOR SDEV. 3.00 Points.**

Priority given to sustainable development senior and juniors.

This is an intermediate course in spatial modeling developed specifically for students in the Undergraduate Sustainable Development program. This course will provide a foundation for understanding a variety of issues related to spatial analysis and modeling. Students will explore the concepts, tools, and techniques of GIS modeling and review and critique modeling applications used for environmental planning and policy development. The course will also offer students the opportunity to design, build and evaluate their own spatial analysis models. The course will cover both vector and raster based methods of analysis with a strong focus on raster-based modeling. We will draw examples from a wide range of applications in such areas as modeling Land Use and Land Cover for biodiversity and conservation, hydrological modeling, and site suitability modeling. The course will consist

of lectures, reading assignments, lab assignments, and a final project

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	11136	Kytt MacManus	M 10:10am - 11:25am 327 Uris Hall
Spring 2025	001	11136	Kytt MacManus	W 10:10am - 12:25pm 606 Martin Luther King Building

#### **SDEV UN3550 BANGLADSH:LIFE-TECT ACTV DELTA. 4.00 Points.**

Open to sustainable development seniors only.

This course will explore the interaction of riverine processes, water and hydrology, sedimentary processes, tectonics, land subsidence and sea level rise, environmental issues, cultural setting, and sustainable development in the world's largest delta. The course will explore both the hazards and resources for life in this dynamic environment through lectures, a field trip to Bangladesh during Spring Break and guest lecturers in earth and social sciences. During the field trip, we will be joined by Dhaka University professors and students, providing experience in cross-cultural collaboration, as well as translators to interviews and discussions with Bangladeshis. By the end of the course, students will develop a quantitative understanding of the multiple earth sciences issues. It will also provide a perspective on the mixture of competing earth science, social, historical and political issues that must be addressed in order to effectively address environmental issues. Students should acquire an ability to assess competing claims and projections for future environmental change

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	17277	Michael Steckler	T 12:10pm - 2:00pm 308a Lewisohn Hall

#### **SDEV UN3998 SUPERVISED INDIVIDUAL RESEARCH. 1.00-3.00 Points.**

Sustainable development majors and special concentrators must register for this independent study to use internship hours for the practicum credit. Students must consult with their program adviser and department before registering. Offered fall, spring and summer

Term	Section	Call Number	Instructor	Times/ Location
Fall 2024	001	11164	Adela Gondek	
Spring 2025	001	11142	Adela Gondek	

#### **SDEV GU4015 Complexity Science. 3 Points.**

The Complexity Course is a survey of techniques, applications, and implications of complexity science and complex systems. This course aims to be both an introduction for students from other fields, and a forum for continued discussion within the complexity community. Topics include systems dynamics, chaos, scaling, fatted distributions, fractals, information

theory, emergence, criticality, agentbased models, graph theory, and social networks.

**SDEV GU4050 US WATER # ENERGY POLICY. 3.00 Points.**

Course Summary: Water, one of humankind's first power sources, remains critically important to the task of maintaining a sustainable energy supply, in the United States and elsewhere. Conversely, the need to provide safe drinking water and keep America's rivers clean cannot be met without access to reliable energy supplies. As the impact of climate disruption and other resource constraints begins to mount, the water/energy nexus is growing increasingly complex and conflict-prone. Essential Connections begins by examining the development of America's water and energy policies over the past century and how such policies helped to shape present-day environmental law and regulation. Our focus then turns to the current state of US water and energy resources and policy, covering issues such as oil and gas exploration, nuclear energy, hydroelectric power and renewables. We also examine questions of inclusion and equity in connection with the ways in which communities allocate their water and energy resources and burdens along racial, ethnic and socioeconomic lines. The third and final section of the course addresses the prospects for establishing water and energy policies that can withstand climate disruption, scarcity and, perhaps most importantly, America's seemingly endless appetite for political dysfunction. By semester's end, students will better understand the state of America's energy and water supply systems and current efforts to cope with depletion, climate change and related threats affecting these critical, highly-interdependent systems. As a final project, students will utilize the knowledge gained during the semester to create specific proposals for preserving and enhancing the sustainability of US water and energy resources

**SDEV GU4101 QUAL RESEARCH METHODS SDEV. 3.00 Points.**

Students of sustainable development are faced with an array of global challenges that warrant scholarly inquiry. Social science questions are particularly well suited for qualitative research. This course will provide an overview of social science research methods, with a focus on building a toolkit for undergraduate students. We begin with an overview of the science of knowing. How do we generate scientific hypotheses in the social sciences, and then how can we find out whether those hypotheses are accurate? An exploration of a range of qualitative research methods will occupy the majority of our class time, including interviewing, case studies, questionnaires, surveys, coding, and participant observation. Toward the end of the course we consider how mixed methods allow for the integration of quantitative tools in the social

sciences. Throughout, students will both study and practice these research methods, experimenting to better understand the strengths and challenges associated with each approach. The course will end with poster presentations in which students share their own research and justify the methods they have employed

**SDEV GU4250 CLIMATE CHANGE: RESILIENCE # ADAPTATION. 3.00 Points.**

This course will offer a focused study of climate change adaptation policy, exploring dimensions of adaptation across sectors and scales. With a thematic focus on pervasive global inequities, students will also consider challenges associated with international development and disaster risk management. An inter-disciplinary framework will enrich the course, and students will learn about perspectives from the natural sciences, law, architecture, anthropology, humanitarian aid, and public policy. The online intensive version of this course will combine synchronous and asynchronous learning: twice weekly live discussion sessions will be matched with assigned readings, recorded lectures and videos

**SDEV GU4325 Plants, Animals and Personhood. 3.00 Points.**

This course is intended to be an opportunity to review the relation between the word "person" and plants and animals, with whom humans abide in a biosphere with no natural boundaries or territories. While personhood is a recognition of human capability and agency, we have not taken many steps in the direction of recognizing the capability and agency of plants and animals. Moreover, it is clear that we have diminished many of their functions and even annihilated many of their entire populations. Nonetheless, there is movement to change this. In our course, three major features of personhood are explored: standing, rights and identity. Each of these three features are divided into two types: legal and spiritual standing, juridical and birth rights, and empirical and narrative identities. Animals and plants are discussed in the context of each of the six types; and are discussed in that order (animals first and plants second) because the movement to change the existing conditions has been more active in relation to animals than to plants. The growing tendency to blend both plant personhood and animal personhood into environmental or Nature personhood will also be explored. The overall aim is to help reverse the deleterious conditions generated by the Anthropocene, in which we, and the plants and animals, struggle to live

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	18639	Adela Gondek	T Th 1:10pm - 2:25pm 313 Pupin Laboratories

**SDEV GU4350 PUBLIC LANDS IN THE AMERICAN WEST. 3.00 Points.**

The course fulfills the "complex problems" major requirement for the Undergraduate Program in Sustainable Development (UPSD). The American West is perhaps best known for the

dramatic landscapes managed through a web of federal land management agencies. Indeed, western states have a land base that is at least 35% public, and competing interests vie for limited resources and navigate a complex bureaucracy. Less well understood are the dynamics that arise from the interactions among different land ownership categories: federal, state, and private. Working landscapes are essential pieces of the cultural heartbeat of the region. This course will focus on: 1) the history of western settlement, highlighting the ways in which early Westerners divided up the land base and allocated resources; 2) the agencies in charge of managing federal public land including the U.S. Forest Service, U.S. Bureau of Land Management, and U.S. Park Service; and 3) state and private land, with a particular interest in the State Land Board. We will explore the legal and regulatory framework that guides land-use decisions, and study enduring resource access conflicts. Pulling from both academic scholarship and the gray literature in political science, environmental sciences, law, and organizational behavior, this course provides an interdisciplinary overview of governance challenges in the American West. Academic Schedule The course will start on Tuesday, May 31st and meet on Tuesdays/Wednesdays/Thursdays on Zoom (likely from 2-5 pm EST each day). The week of June 12th-19th the course will take place in the field in Colorado. The final week will be on Zoom on Tuesday, Wednesday Thursday, again likely from 2-5 pm EST each day. The course ends on Thursday, June 23rd. Modality The course will be offered in a hybrid format. The first two weeks and final (fourth) week of the class will be held entirely on Zoom. We will meet three times per week (Tues/Wed/Thurs) for three hours each session. Week three of the course (June 12-19) will be held in person in Colorado. There, we have the opportunity to visit a broad spectrum of land use types including federally managed forest and grasslands, protected parks, state land board parcels, and private ranches. Student will have some access to local leaders who will accompany us on various field trips to offer their perspectives. The class will participate in many kinds of field activities including hiking in federally designated Wilderness areas, visiting an oil and gas well on public lands, exploring an area recently burned by wildfire, and meeting with rural ranchers. To enroll in this course, you must apply to the Columbia Summer Field Course: Public Lands in the American West through the Center for Undergraduate Global Engagement (UGE)

#### **SDEV GU4400 Sustainable Development in Rwanda. 4.00 Points.**

This travel course will give students the opportunity to explore what sustainable development means in the context of Sub-Saharan Africa. Satisfying the workshop requirement for SDEV majors, the course is organized around two projects that students will tackle in teams. Ahead of traveling to Rwanda, three main activities will structure the course. First, students will learn about colonial history and current sustainable development efforts in Sub-Saharan Africa. Second, they will be organized into teams to pursue preliminary research on one of two projects. Third, they will be paired with an

undergraduate student at the University of Rwanda and begin regular correspondence using WhatsApp. The travel week will be held over spring break. We will be based in the capitol city Kigali, with some in-country travel to explore beyond the urban core. Students will work in teams alongside their University of Rwanda peers to advance the goals of their project. When we return to the U.S., the final weeks of the class will be devoted to focused team work, as students complete their projects

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	11151	Lisa Dale	T 12:10pm - 2:00pm 212d Lewisohn Hall

#### **SDEV GU4420 Oil, Rights & Development. 1.00 Point.**

The Simulation class has as its purpose to familiarize and inform the student participants with the real-life interests, objectives, constraints, working and strategies of the range of stakeholders concerned or engaged with a large natural resource development project (oil) in a developing and civil war torn country. It challenges the students, as members of pre-assigned teams with different goals and objectives, as well as values, to seek ways to reconcile, to the extent possible, through discussion and negotiation the different and even conflicting interests, goals and strategies of the multiple stakeholders. These stakeholders include the governing parties, opposition parties, local and international NGOs, local and international media and think tanks, as well as two oil companies, including one from an authoritarian country, competing for the oil development contract

#### **SDEV GU4500 SUSTAINABILITY AND THE MEANING OF PLACE ON CUTTYHUNK ISLAND. 1.00 Point.**

In this class, students will travel to Cuttyhunk Island in Massachusetts to explore issues of history, sustainability, and climate change. It will serve to address the one-credit practicum requirement in the Undergraduate Program in Sustainable Development. The overarching question students will ask is: what does it mean to inhabit a place well? To answer this, students will read a selection of literary, historical, and scientific texts while performing physical labor including meal preparation and oyster cultivation on Cuttyhunk Island and assuming responsibility for their classmate community through self-governance. Taught in collaboration with faculty at the Gull Island Institute, the course enables students to critically investigate multiple ways in which knowledge of place is produced and to explore how such knowledge informs, and ought to inform, practices of sustainable development. In traveling to Cuttyhunk Island, students will take up a standpoint from which to consider their own learning goals and develop approaches to more fruitfully engaging the places of Manhattan Island and the Columbia University campus in the course of their SDEV studies. The class will use the physical setting of islands, and the conjunction of seminar with labor, self-governance, and everyday life, to connect different kinds of knowledge across boundaries of discipline and tradition, thought, and embodied practice. Students will analyze written

texts, but they will also be challenged to read and interpret a piece of the landscape, an object, or ecosystem through their immersive experience on Cuttyhunk Island. Readings will investigate the natural and human histories of the Buzzards Bay region, contemporary sustainability efforts on Cuttyhunk, as well as the wider assumptions and categories that shape the ideas of sustainability and habitability: what models of action and agency are entailed in these concepts? What relationships between humans and non-human (beings and environments) do such concepts presuppose? Finally, what skills, structures, and actions are necessary to make places habitable, and inhabit them well?

### **SDEV GU4501 History of the Climate Crisis. 4.00 Points.**

The climate crisis is a defining feature of contemporary life. How did we get here? This course considers the historical, social, ethical, and political life of global warming in an effort to better understand the present climate age. Themes and topics include: the origins of fossil fuel-based energy systems and the cultural life of oil; the history of climate science and the geopolitics of climate knowledge production; the emergence of climate change as a global political issue; debates about political responses to climate change versus market-based approaches; the question of culpability and who should be held responsible for causing global warming; and the recent emergence of a global climate justice movement and its relationship to racial justice and indigenous rights movements

### **SDEV GU4550 The New York City Watershed: From Community Displacement to Collaboration and Climate Adaptation. 1.00 Point.**

The New York City Watershed: From Community Displacement to Collaboration and Climate Adaptation brings students to the Catskill Mountains in upstate New York to learn first hand from researchers and practitioners who help supply over ten million New Yorkers with safe and abundant drinking water while also working to build social, economic and environmental capital in the towns and villages located in the watershed surrounding the city's reservoirs – all against a backdrop of increasing climate-related disruption. The class will learn how New York City and a coalition of upstate watershed communities worked to end nearly a century of mutual resentment, displacement and extraction by entering into the Watershed Agreement of 1997, which has become a widely renowned model for collaborative and equitable water resources management planning in the twenty-five years since its completion. Students will engage with several of the Watershed Agreement's original negotiators and with the local elected officials, agency staff and non-profit leaders who implement its signature "multi-barrier" strategy for drinking

water protection through open space preservation, support for sustainable farming practices and investments in clean water infrastructure and sustainable economic growth in watershed communities. They will also learn how increases in storm intensity and warming driven by climate change threaten to upset the delicate balance between New York City's need for safe drinking water and the socio-economic interests of upstate watershed communities. Upon completion of the course, students will better understand the challenges involved in creating and implementing collaborative, multi-stakeholder plans for water resource management and host community benefits in today's increasingly climate-disrupted world

Fall 2024	001	11165	Ruth DeFries	

### **SDEV GU4600 SPECIAL TOPICS IN SDEV # CLIMATE. 3.00 Points.**

A novel course on the history of understanding of global climate crisis during the Cold War period and a role of science in the agenda of global climate change aims to demonstrate the connections of present state of knowledge and policy with the trajectory of the past. How much this past (s) could and should be useful is the focus of the discussions in the class. The discussions are based on historical narratives, including the history of institutional landscape of science, impacts of individual scientists, imaginaries of the future in the past. All narratives are imbedded in a larger socio-economic and political context. The unique dimension of the course is the inclusion of Soviet climate science which is considered as a global force with a significant knowledge circulations and participation in international organizations. The course is useful for climate students as well as for history and political science students

### **SDEV GU4650 Building Climate Justice: Co-Creative Coastal Resilience Planning. 3.00 Points.**

This course will educate students and support effective coastal resilience planning and climate justice through social and data science learning and data acquisition and analysis, making use of emerging technologies and best practices for collaboration with environmental and climate justice practitioners. Instruction is provided in two areas: i. Climate adaptation planning # climate justice; and, ii. Data science: acquisition, analysis and visualization. Students and instructors will work with participating community-based climate and environmental justice organizations to collect and analyze biological, geographic and socio-economic data relevant to local resilience needs. Once this data has been acquired or generated and quality-assured, the students and community partner organizations will prepare it for presentation to federal, state and local planning officials, to help ensure that the resilience goals and related concerns identified by our community partners will be fully reflected in future planning by those officials. Upon completion of the course, students will better understand the challenges involved in creating and implementing collaborative, data-informed, multi-stakeholder plans for coastal resilience and ecosystem restoration in today's increasingly climate-disrupted world. Successful completion

of this course will partially fulfill the Analysis and Solutions to Complex Problems coursework requirement within the Undergraduate Major in Sustainable Development

### **SDEV GU4660 Biodiversity and the Climate Crisis. 3.00 Points.**

The ‘twin crises’ of biodiversity and climate change are inextricably linked. Biodiversity, much like climate, is a fundamental characteristic of our Earth system and includes not only individual plant, animal, and microbial species, but also their ecological interactions at local, regional, and global scales. Climate change is exacerbating biodiversity loss, which further reduces ecosystem resilience and efficiency, jeopardizing the delivery of services essential to human well-being such as water purification, flood control, soil fertility, pollination and seed dispersal, temperature moderation, direct material and non-material benefits, carbon sequestration, control of non-indigenous species, and regulation of zoonotic diseases. In this course we will use a combination of lectures, student-led discussions, and research papers to explore these interconnections, focusing on food security, habitat types, tipping points, equity, and how biodiversity can both support and be affected by climate mitigation and adaption strategies

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	18238	Jenna Lawrence	M 4:10pm - 6:00pm 607 Hamilton Hall

### **SDEV GU4670 ENVIRONMENTAL JUSTICE: A LEGAL FRAMEWORK FOR ADVOCACY. 3.00 Points.**

The primary goals of environmental justice advocacy are to ensure the equitable treatment and meaningful participation of historically impacted communities in environmental and climate related matters. The movement is deeply rooted in civil rights, human rights, and environmental law. In this course, we will explore the legal framework that advances environmental justice on the local, state, and federal levels. Our course will also explore the interdependent relationship between environmental justice and sustainability. Students will take a hands-on approach to environmental justice and will develop key advocacy skills that practitioners use for the communities that they serve. This course will engage students in a critical analysis of existing environmental justice issues to develop a holistic approach for more effective advocacy

Term	Section	Call Number	Instructor	Times/ Location
Spring 2025	001	11693	Christine Appah-Gyamfi	F 12:00pm - 2:00pm

### **SDEV GU4680 Climate and Sustainable Water Systems. 3.00 Points.**

Sustainable water supply, essential for life, is complex and challenging, particularly in the context of climate change. Changing climate affects the availability and quality of water globally. In turn, human use of water produces greenhouse gasses (GHGs) that further exacerbate climate change. Spanning global and individual scale, this course will examine changing interactions of climate and water, implications for human water supply, and steps toward greater sustainability. Part 1 of the course establishes baseline understanding of natural and human water systems in the context of climate change. What it takes to transform water from its source to “fit-for-purpose” water for domestic, commercial, industrial, and agricultural uses will be examined. The implications of climate change for water systems and the impacts of water development on climate change will also be assessed. The growing challenges of water security, water quality, and water affordability/accessibility will be considered, along with institutional models for water delivery. Part 2 will delve into pathways toward more sustainable water supplies, with emphasis on safe and affordable drinking water. Means of adaptation and resilience will be explored, from evolving human uses to optimizing water storage and delivery. Throughout Part 2, case studies will bring concepts to reality, engaging students in further exploring strategies and actions to address crucial issues for water sustainability. Practicing leaders from the water field will bring real-world perspectives as guest speakers, sharing direct experience with a specific problem, and engaging with the class in a broader discussion of the issues, led by the instructor

## URBAN STUDIES

The Urban Studies is housed at Barnard College, with Columbia History Professor Amy Chazkel providing advising for Columbia College students. All information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.

[Urban Studies at Columbia](#)

Columbia Adviser: Prof. Amy Chazkel; [ac2227@columbia.edu](mailto:ac2227@columbia.edu)

713 Milstein Learning Center  
212-854-4073 | [urbanstudies@barnard.edu](mailto:urbanstudies@barnard.edu)

**Department Assistant:** Valerie Coates | [vcoates@barnard.edu](mailto:vcoates@barnard.edu)

### THE FIELD OF URBAN STUDIES

The Barnard–Columbia Urban Studies program enables students to explore and understand the dynamics of cities and urbanization. Students engage the city as an amalgam of social, spatial, historical, cultural, and environmental phenomena. Students study the evolution of urban forms and social structures, which create opportunities and constraints for the exercise of human agency. They examine the city in different historical and comparative contexts, as well as in the human imagination.

Majors build an intellectual foundation that combines broad, interdisciplinary coursework and in-depth focus on a particular sub-field. The core courses expose students to the diversity of urban studies as a field, while the methods and Junior Seminar requirements introduce them to the challenge of doing original research. This prepares them for their independent senior thesis project, undertaken over the entirety of their final year. We encourage our majors to use New York City as a laboratory, and many courses draw on the vast resources of the city and include an off-campus experience.

### STUDENT LEARNING OUTCOMES

Having successfully completed the major in Urban Studies, the student will be able to:

- Describe and explain urban phenomena and relations from multiple theoretical and methodological perspectives.

- Identify and analyze diverse urban issues and problems, including their complex causes and the systems that frame their potential resolution.
- Evaluate approaches to collecting and analyzing diverse empirical data about cities.
- Design and conduct research on a particular urban issue or problem, including developing and defending a research question, conducting original research, considering its risks to subjects, analyzing data using recognized techniques, and interpreting results.
- Develop an extensive, clear, and carefully argued piece of writing.

### STUDENT ADVISING

#### Advising Resources

- Prospective Columbia College majors should consult with **Amy Chazkel**, Bernard Hirschhorn Associate Professor of Urban Studies
- Prospective General Studies majors should consult with **Aaron Passell**, Associate Director of Urban Studies.
- Please send email to [urbanstudies@barnard.edu](mailto:urbanstudies@barnard.edu) to subscribe to the Urban Studies listserv.
- Urban Studies hosts Program Planning meetings in the Fall and Spring semesters and an Open House for prospective and current majors. Scheduling information for these events is disseminated via the listserv.

### GUIDANCE FOR FIRST-YEAR STUDENTS

URBS UN1515 INTRODUCTION TO URBAN STUDIES is recommended for first-year students who are considering or would like to explore a major in Urban Studies.

### COURSEWORK TAKEN OUTSIDE OF BARNARD

#### Advanced Placement Credit

- Urban Studies does not offer course exemptions for Advanced Placement or other exam scores.

#### Columbia College Courses

- Courses may be taken at Columbia College or Barnard College to fulfill major requirements.

#### Transfer Credit

- When students transfer to Barnard from other institutions, their coursework is first evaluated for college elective credit by the Registrar's Office. If approved, departments can consider these courses for credit toward the major or minor.
- There is no fixed maximum number of credits that transfer students may apply to the Urban Studies major, as long as

the majority of major requirements are fulfilled at Barnard/Columbia.

Students should present course descriptions, syllabi, and proposals to count transfer credits toward major requirements to the Director for approval.

## Study Abroad Credit

- Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Global Engagement) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus.
- Classes taken abroad through other institutions or programs are treated as transfer credit and are subject to the same policies as other transfer courses. Accordingly, there will be a limit on the number of study abroad courses that can be counted toward the major or minor.
- To receive credit toward the major or minor for a study abroad course (whether taken through a Columbia program or another institution/program), students must submit a Study Abroad Approval form through Slate and obtain the approval of the Chair or departmental representative.
- Urban Studies majors can generally count two to three courses taken in a recognized abroad program toward major requirements. Students should present course descriptions, syllabi, and proposals to count abroad credits toward major requirements to the Director for approval before going abroad.

## Summer Credit

- Summer courses at Barnard are equivalent to those taken during the academic year. Courses that have been approved for the fulfillment of departmental requirements will automatically count toward the major.
- Courses taken at other institutions (including Columbia) are considered transfer credit and are subject to the same policies governing other transfer courses. To receive credit for a summer course taken at another institution, students must submit a Summer Course form through Slate and have it approved by both the Registrar's Office and the Chair or department representative.
- Urban Studies students should present course descriptions, syllabi, and proposals to count summer credits toward major requirements to the Director for approval, preferably before taking summer courses.

## SENIOR CAPSTONE PROJECT

### The Senior Capstone Project

- All Urban Studies majors are required to complete a senior thesis. Most do so within the year-long course URBS UN3992 URBAN STUDIES SENIOR SEMINAR and URBS UN3993 URBAN STUDIES SENIOR SEMINAR.
- Those graduating off-cycle (and other in specific circumstances) may complete the thesis requirement

using two advanced seminars, usually in their area of specialization (in place of the Senior Seminar), and submit two expanded essays (20-25 pages) from those courses (in place of the thesis).

**The Urban Studies is housed at Barnard College, with Columbia History Professor Amy Chazkel providing advising for Columbia College students. All information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

## MAJOR IN URBAN STUDIES

A minimum of 42 credits is required to complete the Urban Studies major. The major in Urban Studies is comprised of seven curricular requirements:

### Requirement U: Introduction to Urban Studies (1 course)

URBS UN1515 INTRODUCTION TO URBAN STUDIES

### Requirement A: Urban-Related Social Sciences (3 courses)

*One course* dealing primarily with urban subject matter from *each of three* of the following disciplines: Anthropology, Economics, History, Political Science, Sociology. For students declaring a major in Urban Studies after Spring 2018, one of the three courses *must* be History.

Each course should be chosen from the following disciplines: Anthropology, Economics, History, Political Science, Public Health, Sociology, or Urban Studies and be focused on urban issues. The three courses must be selected from three separate disciplines and they must appear on the Urban Studies approved list to fulfill the 'A' requirement for the major (if a course does not appear on the list that you believe should, please contact the Associate Director). Each course should also be taken with a different professor (i.e. you may not use two courses with the same professor to fulfill two of your A requirements). We recommend that you complete at least two of your three 'A' courses before taking the Junior Seminar, but this is not a hard requirement.

### Requirement B: Urban-Related Non-Social Science (1 course)

One course dealing primarily with urban subject matter from a discipline not listed above (such as Architecture, Art History, English, Environmental Science, etc.)

### Requirement C: Methods of Analysis (1 course)

One course in methods of analysis, such as URBS UN2200. Methods courses in related disciplines will also be considered for the requirement. Please consult the [program website](#) or the Associate Director

### Requirement D: Specialization (5 courses)

Five or more courses in a specialization from one of the participating departments. Barnard College students can double-count one A, B, or C course toward this requirement (only one of five), with the approval of the Director; Columbia College and General Studies students cannot double-count courses. Barnard majors also have specific requirements for each specialization, which are outlined in detail on the program website, [urban.barnard.edu](http://urban.barnard.edu).

### Requirement E: Junior Seminar (1 course)

We recommend that you complete at least two of your three 'A' courses before taking the Junior Seminar, but this is not a hard requirement.

#### URBS UN3545 JUNIOR SEMINAR IN URBAN STUDIES

Multiple sections of this course are taught each semester by various faculty on different topics. For more information, please consult the [program website](#) or the Associate Director.

### Requirement F: Senior Seminar (2 courses)

An original senior thesis written in conjunction with a two-semester research seminar on a topic of your choice.

URBS UN3992 URBAN STUDIES SENIOR SEMINAR  
 URBS UN3993 URBAN STUDIES SENIOR SEMINAR

Students who, for some reason, will not be able to complete the Fall-Spring Senior Seminar sequence should consult with the Associate Director about alternatives.

### Other Important Information

A complete list and courses that fulfill requirements A–E can be found on the program's website, [urban.barnard.edu](http://urban.barnard.edu).

Appropriate substitutions may be made for courses listed above with the approval of the Associate Director.

### Minor and Concentration

There is no minor in Urban Studies.

There is no concentration in Urban Studies.

**The Urban Studies is housed at Barnard College, with Columbia History Professor Amy Chazkel providing advising for Columbia College students. All information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

**URBS UN1515 INTRODUCTION TO URBAN STUDIES. 3.00 points.**

This course is intended to be both an interdisciplinary introduction to the city and to the field of Urban Studies. As an introduction to the city, the course will address a variety of questions: What is a city? How did cities develop? How do cities function socially, politically, and economically? Why do people live in cities? What are some of the major issues facing cities in the early twenty-first century, and how can cities address these issues? As an introduction to the interdisciplinary field of Urban Studies, the course will present models of how scholars approach cities from a variety of disciplinary viewpoints, including architecture, planning, law, sociology, history, archaeology, anthropology, political science, public policy, and geography. Students will learn some of the major concepts in the field of Urban Studies, and will study the works of leading scholars in the field. Students in the course will approach cities from a number of disciplines, not only through the reading, but also through assignments that take place in different locations throughout New York City

**URBS UN2520 INTRODUCTION TO URBAN PLANNING. 3.00 points.**

This course is a basic introduction to the field and practice of urban planning in the United States. The course will focus on key concepts in planning history, theory, and practice, including the various conflicts and dilemmas planners face, stakeholders involved in urban planning, and the tools and methods that planners use to address challenges in the built environment. The core questions that this class will return to throughout the semester are: How does planning take place, and whose interest(s) does planning serve? How does planning (re)produce social inequities? Planning is often framed as a technical

exercise to rationalize the built environment and create more “livable” cities. However, planning is not value-neutral. As we will examine throughout the course of the semester, power relations fundamentally shape the planning profession, and planning decisions have contributed to racial, economic, and gender inequalities and spatial segregation in cities throughout the United States. We will also explore debates about how to encourage more inclusive cities and engage in more ethical planning practice. The course is divided into six sections. In Part I, we will explore foundational concepts in urban planning, such as how previous scholars have defined urban planning and urban space. In Part II, we will explore the historical context in which the planning profession emerged and key moments in planning history. In Part III, we will examine normative models of planning, or how the planning profession conceives of itself. In Part IV, we will learn about the different technical tools that planners use to regulate urban development and key debates surrounding these tools. In Part V, we will interrogate the role of the planner, the role of power relations in planning, and how planning decisions have resulted in racial, class, and gender exclusion in the built environment. In Part VI, we will contemplate future directions in planning

**Spring 2025: URBS UN2520**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**URBS UN3308 INTRO TO URBAN ETHNOGRAPHIES. 3.00 points.**

What is ethnography and what makes ethnography “urban”? This course explores how social scientists use ethnography to analyze questions and dilemmas often associated with urban settings. We will combine close readings of ethnographies with field-based inquiry, including our own studies of urban public space. Through both our readings and our field exercises, we will focus on the methods at the heart of ethnography: observation and participant-observation. As we read other scholars’ work, we will ask how the author uses ethnographic tools to explore issues that are suitable for intensive fieldwork. We will assess which kinds of research problems and theoretical perspectives are a good fit with ethnography and the roles that ethnography can play in transdisciplinary research projects. You will apply what you have learned about research to design your own pilot fieldwork. The ethnographies that we read together will examine intersections of housing, race, and class in urban communities. You are welcome to extend this focus to your own fieldwork, but it’s not required to do so. This is a writing-intensive course, and we will devote a considerable portion of class time to workshop your individual projects

### URBS UN3310 RACE. SPACE, URB SCHOOLS. 3.00 points.

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory

### URBS UN3315 METROPOLITICS OF RACE # PLACE. 3.00 points.

This class explores how racism and racialized capitalism and politics shape the distribution of material resources among cities and suburbs in metropolitan areas and the racial and ethnic groups residing in them. Readings and discussion focus on the history of metropolitan area expansion and economic development, as well as contemporary social processes shaping racial and ethnic groups' access to high-quality public goods and private amenities. We address racial and ethnic groups' evolving political agendas in today's increasingly market-driven socio-political context, noting the roles of residents; federal, state, and local governments; market institutions and actors; urban planners, activist organizations, foundations, and social scientists, among others. Here is a sample of specific topics: race/ethnicity and who "belongs" in what "place;" inequitable government and market investment across racial and ethnic communities over time and "sedimentation effects" (for example, the "redlining" of Black communities leading to their inability to access loan and credit markets and the resulting wealth gap between Blacks and Whites);

gentrification processes; creating sufficient, sustainable tax bases; and suburban sprawl. Assignments will include two short response papers, mid-term and final exams, and another project to be determined

### URBS UN3351 URBAN ELSEWHERE: EXPLORING A WORLD OF CITIES. 4.00 points.

We live in an increasingly urbanized world. But what does it mean to be "urban"? As urbanization reaches more corners of the globe, its forms and processes become increasingly diverse. Urban Elsewheres is dedicated to investigating this diversity and to exploring the implications that unfamiliar urban phenomena might have for how we understand urbanization—both elsewhere in the world and in our own backyards. Through a comparative engagement with case studies drawn from around the world, this course will challenge some of our most deeply held, common sense assumptions about urbanization. Students will be asked to stretch the conceptual limits of urbanization and explore the social and political possibilities of an expanded urbanism. In doing so, the course will engage with the many of the most heated theoretical debates about urbanization, equipping students with a set of comparative analytical tools with which to explore the wider field of urban studies

### URBS UN3450 NEIGHBORHOOD # COMMUNITY DVLP. 3.00 points.

New York City is made up of more than 400 neighborhoods. The concept of neighborhoods in cities has had many meanings and understandings over time. Equally complex is the concept

of community used to describe the people attached to or defined by neighborhood. While neighborhood can be interpreted as a spatial, social, political, racial, ethnic, or even, economic unit; community often refers to the group of stakeholders (i.e. residents, workers, investors) whose interests directly align with the conditions of their environment. Community development is “a process where these community members come together to take collective action and generate solutions to common problems” that result from the changing contexts in their neighborhoods. Using a variety of theories and approaches, residents organize themselves or work with community development practitioners on the ground to obtain safe, affordable housing, improve the public realm, build wealth, get heard politically, develop human capital, and connect to metropolitan labor and housing markets. To address the ever-changing contexts of neighborhoods, community development organizations are taking on new roles and adapting (in various cases) to larger forces within the city, region and nation such as disinvestment, reinvestment, increased cultural diversity, an uncertain macroeconomic environment, and changes in federal policy. For more than a century, city-dwellers—and especially New Yorkers—have been tackling these challenges. This course will examine both historic and contemporary community building and development efforts, paying special attention to approaches which were shaped by New York City. This urban center, often described as a “city of neighborhoods,” has long been a seedbed for community-based problem-solving inventions. The course will focus on the theories (why?), tools (how?), and actors (who?) within the field of community development practice and is organized around important sectors (housing, econom

#### **URBS UN3451 URBAN ENVIRONMENTAL JUSTICE: GENDER, RACE, CLASS AND THE ENVIRONMENT. 3.00 points.**

In this course we will explore urban environmental inequalities through the lens of environmental justice. The concept of environmental justice has risen in prominence in the language of environmental activism, politics, and policymaking. Informed by critical studies of the environment, we will address the broad question of why, for some, the environment is representational of a healthy lifestyle and source of prosperity, while for others it is a source of risk and harm. Our course of study invites students to critically analyze environmental justice case studies and to develop an understanding of the complex relationships among urban populations and the social, political, and economic processes that lead to environmental inequality. We will also explore how racism is foundational to environmental exploitation and consider why global struggles for racial justice are crucial for protecting both people and the earth. We will pay particular attention to how environmental health inequalities are linked to race, class, gender, and nation.

Drawing from academic texts, films, and photo essays we will explore how urban planning and economic development policies create environmental inequalities in the US and globally

#### Spring 2025: URBS UN3451

#### **URBS UN3452 HOUSING POLICY IN THE UNITED STATES. 4.00 points.**

How should we define housing? As a concept, housing is both simple and complex. As a physical concept, housing provides shelter, and it is durable and visible. Yet, housing is more than just its physical components. As a social concept, housing is a clear insignia of social status and can be an investment vehicle to accumulate and hoard wealth. Additionally, housing (and housing policy) both amplifies and reinforces larger patterns of racial and economic bias witnessed in wider society. This course examines the institutional, economic, regulatory, and political factors that affect the production, subsidization, and siting of housing in the United States. We will trace the varied policy approaches that local, state, and federal governments have leveraged to deliver affordable housing over time. Throughout the course, we will pay particular attention to how U.S. housing policy historically is built on a segregationist ideology, often linking the presence of non-white and low-income households with neighborhood instability and as a threat to stable property values. We will also explore the various approaches that the public sector has pursued to attempt to undo the racially segregated housing market of its own making. The course is divided into three sections. Part I reviews how previous scholars have defined housing, provides a brief introduction to housing policy history, and introduces the basics of supply and demand in housing markets and housing finance. Part II examines various approaches to provide affordable housing at the federal, state, and local level and how these approaches have evolved over time. Part III examines contemporary housing policy debates. Since this class is an upper-level seminar, students should expect to read about 150 pages of reading per week and to listen to a podcast or watch a select movie on specific weeks. Students will be expected to complete all of the assigned readings before class. Class time primarily will be devoted to class discussions, so students should plan to formulate thoughts about the readings before class and to participate actively in class discussions each week

#### **URBS UN3480 From Homelessness to Foreclosure: NYC Geographies of Shelter and Home. 4 points.**

This course will examine the social, political, and economic elements that have aligned in New York City to produce the most expansive infrastructure of homeless shelters in the United States, as well as ongoing changes in the city’s homeless policy since the housing foreclosure crisis. While we will focus primarily on the past 30 to 40 years in New York City, we

will consider the history of homelessness and housing in the United States since the Great Depression. Major themes will include criminalization, origin myths, and representations of people who are experiencing homelessness. Key questions will include: In what ways is the current geography of homelessness the result of historical patterns of racism and discrimination? How does studying homelessness provide insight into the ways urban spaces are made? Why have shelters become the primary public response to homelessness in New York? How are race and gender central to the project of building a shelter infrastructure in New York? How are shelters experienced by those living in them? What are some of the ways people living in shelters organize to advocate for their rights and to resist mainstream representations?

**URBS UN3545 JUNIOR SEMINAR IN URBAN STUDIES.**  
**4.00 points.**

Prerequisites: Non-majors admitted by permission of instructor. Students must attend first class. Enrollment limited to 16 students per section. General Education Requirement: Historical Studies.

## Cross-listed Courses

**ARCH UN3502 URBANIZING CHINA. 4 points.**

This course investigates the dramatic urban transformation that has taken place in mainland China over the last four decades. The speed and scale of this transformation have produced emergent new lifeways, settlement patterns, and land uses that increasingly blur the distinction between urban and rural areas. At the same time, Chinese society is still characterized by rigid, administrative divisions between the nation's urban and rural sectors, with profound consequences for people's lives and livelihoods. The course therefore examines the intersection between the rapid transformation of China's built environment and the glacial transformation of its administrative categories. We will take an interdisciplinary approach to this investigation, using perspectives from architecture, history, geography, political science, anthropology, urban planning, and cultural studies, among other disciplines.

The course is divided into two parts: Over the first five weeks, we will consider the historical context of China's urbanization and its urban-rural relations, including the imperial, colonial, and socialist periods, as well as the current period of reform. In the remainder of the semester, we will turn our focus to contemporary processes of urbanization, with a particular emphasis on the complex interrelationship between urban and rural China. This portion of the semester is organized into three two-week units on land and planning, housing and demolition, and citizenship and personhood.

**ARCH GU4300 The Just City: Global Debates in Urban Planning and Policy. 4.00 points.**

Urbanization is inherently unequal, inscribing social, economic, environmental, and political unevenness into the spatial fabric of the city. But the distribution of such inequality is not inevitable. Urbanization is a product of the collective decisions we make (or choose not to make) in response to the shared challenges we face in our cities. And, thus, the patterns of urbanization can be changed. This is the task of urban planning and the starting point for this advanced seminar, which asks how we can reshape our cities to be more just—to alleviate inequality rather than compound it. In embarking on this effort, we face numerous “wicked” problems without clear-cut solutions. The approaches one takes in addressing urban inequality are therefore fundamentally normative—they are shaped by one's place in the world and one's view of it. The central challenge in addressing inequality is thus establishing a

basis for collective action amongst diverse actors with differing—and sometimes conflicting—values and views. In other words, planning the just city a matter of both empathy and debate. In this course, we will endeavor to develop informed positions that can help us engage with others as a basis for taking collective action. The course is organized into four 3-week modules, each of which addresses a dimension of the just city: equity, democracy, diversity, and sustainability. In the first week of each module, we will discuss how the issue has been understood in history and theory (with an emphasis on tradeoffs between different priorities and values); in the second week, we will apply this discussion to a global case study prepared and presented by a team of students; and in the third week, we will hold an in-class debate to determine what should be done. Specific case studies vary each year

**HIST UN1786 History of the City in Latin America. 4.00 points.**

This course covers the historical development of cities in Latin America. Readings, lectures, and discussion sections will examine the concentration of people in commercial and political centers from the beginnings of European colonization in the fifteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; changing power dynamics in modern Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; planned versus unplanned cities and the rise of informal economies; the way changing legal and political rights regimes have affected urban life; and the constant tension between tradition and progress through which urban society was formed. There are no prerequisites for this course. Attendance at weekly Discussion Sections required

**HIST UN2689 COLONIAL CITIES OF THE AMERICAS. 4.00 points.**

This course examines the history of cities in the Americas in the colonial era, c. 1500-1800, organized around three large themes. First, we study the precolonial origins of American urban systems, focusing especially on Mesoamerica and the Andes, and exploring questions of urban continuity, disruption and change, and the forms of indigenous cities. Second, we

study various patterns of city foundations and city types across the Americas, examining Spanish, Portuguese, British, Dutch and French colonial urban systems. Third, we focus on the cities more closely by looking at key issues such as urban form, built environment, social structure. Specific themes include a critical analysis of the Spanish colonial grid, the baroque city, and 18th-century urban reforms, as well as race and class, urban slavery, and urban disease environments.

**HIST UN3277 History of Urban Crime and Policing in Latin America in Global Perspective. 4 points.**

This seminar will examine the social construction of criminality and the institutions that developed to impose and enforce the criminal law as reflections of Latin American society throughout the region's history, with a particular emphasis on the rise of police forces as the principal means of day-to-day urban governance. Topics include policing and urban slavery; policing the urban "underworld"; the changing cultural importance of police in urban popular culture; the growth of scientific policing methods, along with modern criminology and eugenics; policing and the enforcement of gender norms in urban public spaces; the role of urban policing in the rise of military governments in the twentieth century; organized crime; transitional justice and the contemporary question of the rule of law; and the transnational movement of ideas about and innovations in policing practice. In our readings and class discussions over the course of the semester, we will trace how professionalized, modern police forces took shape in cities across the region over time. This course actually begins, however, in the colonial period before there was anything that we would recognize as a modern, uniformed, state-run police force. We will thus have a broad perspective from which to analyze critically the role of police in the development of Latin American urban societies—in other words, to see the police in the contemporary era as contingent on complex historical processes, which we will seek to understand.

**HIST GU4012 HISTORY OF THE CITY IN LATIN AMERICA. 4.00 points.**

This course covers the historical development of cities in Latin America. Readings examine the concentration of people in commercial and political centers from the beginnings of European colonization in the sixteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; cities as sites

of imperial power and their post-colonial role in nation-building; changing power dynamics in modern Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; the complexity and historical development of urban segregation; the rise of informal economies; and the constant tension between tradition and progress through which urban societies have formed. Reading knowledge of Spanish and/or Portuguese will be helpful but is not required. Open to both undergraduate and graduate students; graduate students will be given additional reading and writing assignments

## VISUAL ARTS

### THE VISUAL ARTS DEPARTMENT:

Department website: <http://arts.columbia.edu/visual-arts>

Office location: 310 Dodge Hall Office contact: 212-854-4065, [visualarts@columbia.edu](mailto:visualarts@columbia.edu)

**Director of Undergraduate Studies:** Sable Elyse Smith, [ss5501@columbia.edu](mailto:ss5501@columbia.edu)

**Undergraduate Administrator:** Calvin Kim, [csk2179@columbia.edu](mailto:csk2179@columbia.edu)

### THE STUDY OF VISUAL ARTS

The Visual Arts Program in the School of the Arts offers studio art classes as a component of a liberal arts education and as a means to an art major, minor, and joint major with the Art History and Archaeology Department.

Courses in which a grade of D has been received do not count toward the major or minor / concentration requirements.

Only the first course a student takes in the department may be taken for a grade of Pass/D/Fail.

### Registration

Undergraduate Visual Arts courses are set as waitlist only. If you are interested in taking a Visual Arts course, please add your name to the waitlist of the course in which you are interested, complete the Google form the program will send you, and attend the first day of the class. Due to the limited size of our classes and often high demand, you will be replaced if you are not present and on time the first two days.

### STUDENT ADVISING

#### Consulting Advisers

- Please contact the DUS via email with any advising questions.

- If you are interested in the Undergraduate Open House please complete this [form](#).

- To view the Visual Arts Major Worksheet please download the form located [here](#).

- To view the Visual Arts Combined Major Worksheet please download the form located [here](#).

- To view the Visual Arts Minor Worksheet please download the form located [here](#).

\*Please note you can access these forms when logged into your CU email address.

### Enrolling in Classes

#### Prerequisites

**Basic Drawing, UN1000 is a prerequisite for:**

Painting I, UN2100

Collage Mixed Media, UN3010

Painting II, UN3101

Painting III, UN3102

Figure Painting, UN3120

**Painting I UN2100 is a prerequisite for:**

Painting II, UN3101

Painting III, UN3102

Figure Painting, UN3120

**Intaglio I UN2420 or Relief I UN2430 is a prerequisite for:**

Drawing Into Print UN3412

Intaglio II, UN3421 (only Intaglio I, UN2420 is pre-req)

Advanced Printmaking UN4400

**Ceramics I UN2200 is a prerequisite for:**

Ceramics II, UN3201

**Sculpture I UN2300 is a prerequisite for:**

Sculpture II, UN3301 (or the Instructor's permission)

Sculpture III, UN3302

Making Without Objects, UN4310

**Silkscreen I UN2440 is a prerequisite for:**

Silkscreen II, UN3441

**Intro to Moving Image UN3500 is a prerequisite for:**

Advanced Moving Image, UN4501

**Departmental approval is required for:**

Senior Thesis I, UN3900

Visiting Critic I, UN3910

**Senior Thesis I, UN3900 is required for:**

Senior Thesis II, UN3901

**Visiting Critic I, UN3910 is required for:**

Visiting Critic II, UN3911

## Preparing for Graduate Study

Contact the DUS to schedule an appointment for advising regarding this process at the end of their sophomore year.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor in Visual Arts must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

### Advanced Placement

The department does not accept any advanced placement credit toward courses in its curriculum.

### Barnard College Courses

Barnard courses can be considered as transfer credit at the discretion of the Director of Undergraduate Studies.

### Transfer Courses

- When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor [or special program or concentration].

- No more than 12 points from any other degree-granting institution will be counted as points toward the Visual Arts major. Approval is required by the Director of Undergraduate Studies.

- Please complete the appropriate worksheet (major/ Combined Major/ Concentration) before scheduling a conversation with the DUS.

### Study Abroad Courses

- Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are

treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor [or special program or concentration], the DUS will need to confirm that they can be used toward requirements in the major/minor.

- Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.

### Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

not applicable

### Senior Thesis Coursework and Requirements

Senior Thesis consists of four 2-point classes taken over two semesters and is considered the capstone experience of the Visual Arts major. They are listed in the fall semester as Senior Thesis I (2 points) and Visiting Critic I (2 points), and in the spring semester as Senior Thesis II (2 points) and Visiting Critic II (2 points). Please note that each semester, Senior Thesis and Visiting Critic run concurrently as one class taught by two faculty members. Weekly meetings include group discussions and presentations, one-on-one and group critiques, and field trips.

#### REQUIREMENTS:

##### All applicants must:

- Be either a Visual Arts Major or a Combined Major in Art History and Visual Arts (note: Combined Art History and Visual Arts Majors may only apply for one of the two semesters)

- Be two semesters from completing their undergraduate requirements for graduation. It is strongly advised that majors have completed 18 points of required Visual Arts Program courses before entering Senior Thesis.

- Complete the Visual Arts Portfolio Review.

##### Applicants are asked to demonstrate:

- A commitment to developing your own unique artistic voice.

This should be evident in the selection and quality of work in your presented Portfolio and in your demonstrated ability to synthesize the discrete artistic experiences you have had over the past three years—through classes and otherwise, into something greater than the sum of the parts.

- The ability to evaluate your own artwork, identifying the beginnings of the material, formal, and conceptual interests that make your work your own

- The sense of purpose, enthusiasm and vision needed to successfully embark upon a Senior Thesis in Visual Art.

## Undergraduate Research Outside of Courses

Not applicable

## DEPARTMENT HONORS AND PRIZES

### Department Honors

In March the program receives a list of Seniors that are eligible for Departmental honors. The list is distributed to the Visual Arts full-time faculty and they vote for who the recipients should be based on the quality of their work.

### Academic Prizes

- In December students are notified of the Visual Arts program's ability to nominate three Visual Arts students in their Junior year to apply for Yale's Norfolk summer program. It's a wonderful opportunity to spend a summer immersed in art-making, surrounded by talented peers and supported by dedicated faculty.

Students submit the following for review by the full-time faculty:

- 10 images of your work (with either captions or an Image List that includes Title / Year / Medium / Dimensions or a 30 second video if you time based work. A video showing 2D work will not be considered
- a short statement describing your 'art practice' (200 words maximum)
- a list of all Visual Arts studio classes taken at Columbia, including the current semester. Please list: Course Title, Semester Enrolled and Instructor
- Students must be able to attend the full program

## PROFESSORS

Matthew Buckingham  
Jon Kessler  
Shelly Silver  
Sarah Sze

Rirkrit Tiravanija  
Tomas Vu-Daniel

## ASSOCIATE PROFESSORS

Naeem Mohaiemen

## ASSISTANT PROFESSORS

Daphne Arthur (one-year appointment)  
David Antonio Cruz  
Delphine Fawundu (Director of Graduate Studies)  
Kenny Rivero (one-year appointment)  
Sable Elyse Smith (Director of Undergraduate Studies)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

- Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study."

- Students who entered Columbia in or before the 2023-2024 academic year may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

### Course Numbering Structure

- 1000-level: entry level courses
- 2000-level, intermediate level courses
- 3000-level, advanced level courses
- 4000-level, advanced entry level graduate courses

### Guidance for First-Year Students

Please reach out to our DUS at [ss5501@columbia.edu](mailto:ss5501@columbia.edu) for any advising needs.

### Guidance for Transfer Students

Please reach out to our DUS at [ss5501@columbia.edu](mailto:ss5501@columbia.edu) for any advising needs.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Visual Arts

Visual Arts majors require 35 to 36 points. 32 points must be completed within the Visual Arts program consisting of seven 3-point Visual Arts studio courses; two 4-point semesters in the Senior Project; one 3-point Colloquium course and one 3 to 4-point 20th Century Art History course.

Students declare their majors online during the major declaration period in their sophomore year. After meeting with their college academic adviser, students must complete the [majors worksheet](#) and meet with the DUS to secure their signature. Please review the worksheet for detailed information regarding all Visual Arts major requirements. You can only access the worksheet with your Columbia email address.

### Joint Major in Visual Arts and Art History

Visual Arts and Art History combined majors require 46 points. 21 points must be completed within the Visual Arts program consisting of seven 3-point Visual Arts studio courses. 25 points are to be completed within the Art History department consisting of one 4-point Major's Colloquium (AHIS UN3000) and seven 3-point related courses totaling 21 points.

To declare a Visual Arts and Art History joint major students must complete the [joint majors worksheet](#) and meet with the DUS to secure their signature. Please review the worksheet for detailed information regarding all Visual Arts and Art History joint major requirements. You can only access the worksheet with your Columbia email address.

### Minor in Visual Arts

Visual Arts minors require 15 to 16 points. 12 points (four 3-point courses) must be completed within the Visual Arts program and one 3 to 4-point 20th Century Art History course. To declare a Visual Arts minor students must complete the [minor worksheet](#) and meet with the DUS to secure their signature. Please review the worksheet for detailed information. You can only access the worksheet with your Columbia email address.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before the 2023-2024 academic year. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study. Concentrations are not available to students who entered Columbia in or after Fall 2024.

### Concentration in Visual Arts

Visual Arts concentrators require 21 to 22 points. 18 points (six 3-point courses) must be completed within the Visual Arts program and one 3 to 4-point 20th Century Art History course. Two of the Visual Arts courses must be Basic Drawing UN1000 or UN1004 and Sculpture I UN2300 or Ceramics I UN2200. Please review the [concentration worksheet](#) for detailed information. You can only access the worksheet with your Columbia email address.

## DRAWING

### VIAR UN1000 BASIC DRAWING. 3.00 points.

(Formerly R1001) The fundamentals of visual vocabulary and handling of drawing materials including charcoal, compressed charcoal, pencil, pen, ink, and brushes. Various conceptual and practical approaches to image-making are explored as formal issues such as line, volume, contrast, and composition are emphasized. Class assignments are accompanied by discussions and critiques. Students draw largely from observation, working with a variety of sources that may include still-life objects and the human figure. Portfolio required at the end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### Fall 2024: VIAR UN1000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 1000	001/10615	M W 9:30am - 12:00pm 501 Dodge Building	Juan David Hernandez Diaz	3.00	15/18
VIAR 1000	002/11321	M W 2:00pm - 4:30pm 501 Dodge Building	Rachel LaBine	3.00	16/18
VIAR 1000	003/11322	Th 10:00am - 4:00pm 501 Dodge Building	Naomi Safran-Hon	3.00	14/18

#### Spring 2025: VIAR UN1000

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 1000	001/15097	M 10:00am - 4:00pm 501 Dodge Building	Ruby Amanze	3.00	14/18

### VIAR UN2001 DRAWING II. 3.00 points.

Prerequisites: (VIAR UN1000) *VIAR R1000*.

Prerequisites: (VIAR UN1000) Examines the potential of drawing as an expressive tool elaborating on the concepts and techniques presented in VIAR UN1001. Studio practice emphasizes individual attitudes toward drawing while acquiring knowledge and skills from historical and cultural precedents. Portfolio required at the end

#### Spring 2025: VIAR UN2001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2001	001/15102	T 10:00am - 4:00pm	Daphne Arthur	3.00	9/18

Building

### **VIAR UN2021 POPULAR # HISTORICAL GESTURES: FIGURE DRAWING. 3.00 points.**

Popular and Historical Gestures explores the fundamental properties of figure drawing and portraiture through the lens of pop culture and historical gestures and poses. Students examine the figure in painting, documentary photography, art history, and literature, and then use these examples as sources for live model sessions, studio practice, and discussions. Students will work on self-directed projects and from live models. There are one-on-one and group discussions, as well as individual critiques with the instructor. Class time will include image presentations, discussions, museum trips, individual and group critiques, and in-class independent work time. Each class will begin with a homework critique and a discussion, lecture, or demonstration structured around a specific goal. Students will then work individually. Each class will end with brief individual and group critiques to allow students to see and discuss each other's work

#### **Fall 2024: VIAR UN2021**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2021	001/11345	T 10:00am - 4:00pm	David Cruz	3.00	7/16
		501 Dodge Building			

### **VIAR UN3010 COLLAGE: MIXED MEDIA. 3.00 points.**

Prerequisites: (VIAR UN1000) *VIAR R1000*.

Prerequisites: (VIAR UN1000) (Formerly R3515) This course approaches drawing as an experimental and expressive tool. Students will explore the boundaries between drawing and sculpture and will be encouraged to push the parameters of drawing. Collage, assemblage and photomontage will be used in combination with more traditional approaches to drawing. The class will explore the role of the imagination, improvisation, 3-dimensional forms, observation, memory, language, mapping, and text. Field trips to artists' studios as well as critiques will play an important role in the course. The course will culminate in a final project in which each student will choose one or more of the themes explored during the semester and create a series of artworks. This course is often taught under the nomenclature Drawing II - Mixed Media

#### **Fall 2024: VIAR UN3010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3010	001/11379	F 10:00am - 4:00pm	Diana Cooper	3.00	11/18
		501 Dodge Building			

#### **Spring 2025: VIAR UN3010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3010	001/15111	Th 10:00am - 4:00pm	Diana Cooper	3.00	6/18
		501 Dodge Building			

### **VIAR UN3011 PROBLEMS IN DRAWING. 3.00 points.**

Prerequisites: VIAR R1000. (Formerly R4005) Students will connect with the very heart of the Western Art tradition, engaging in this critical activity that was the pillar of draftsmanship training from the Renaissance on through the early Modern Era. This pursuit is the common thread that links artists from Michelangelo and Rubens to Van Gogh and Picasso. Rigorous studies will be executed from plaster casts of antique sculptures, and pedagogical engravings. Students will confront foundational issues of academic training; assessing proportion and tonal value, structure and form. Hours will be spent on a single drawing pushing to the highest degree of accuracy in order develop a means for looking at nature. There is a focus on precision and gaining a thorough understanding of the interaction between light and a surface. This approach emphasizes drawing by understanding the subject and the physical world that defines it. While this training has allowed great representational artists of the past to unlock the poetry from the world around them and continues to inspire a surging new realist movement, it can also serve as a new way of seeing and a launching point for achieving creative goals. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### **Spring 2025: VIAR UN3011**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3011	001/15112	T 5:00pm - 9:00pm	Edward Minoff	3.00	11/18
		501 Dodge Building			

## **PAINTING**

### **VIAR UN2100 PAINTING I. 3.00 points.**

Prerequisites: (VIAR UN1000) *VIAR R1000*.

Prerequisites: (VIAR UN1000) (Formerly R3201) Introduction of the fundamental skills and concepts involved in painting. Problems are structured to provide students with a knowledge of visual language along with a development of expressive content. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### **Spring 2025: VIAR UN2100**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2100	001/15103	T 10:00am - 4:00pm	Kenny Rivero	3.00	9/15
		401 Dodge Building			

### **VIAR UN3101 PAINTING II. 3.00 points.**

Prerequisites: (VIAR UN1000) and (VIAR UN2100)

Prerequisites: (VIAR UN1000) and (VIAR UN2100)

(Formerly R3202) Painting II: Extension of VIAR UN2100

This course explores the transition of representational form towards abstraction in the early 20th century (Cubism) with full consideration to recent movements such as geometric abstraction, organic abstraction, gestural abstraction, color field and pattern painting. Students will be encouraged to find

dynamic approaches to these classic tropes of 20th and 21st century abstraction

**Fall 2024: VIAR UN3101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3101	001/11381	T 10:00am - 4:00pm 401 Dodge Building	Esteban Cabeza de Baca	3.00	7/16

**VIAR UN3102 PAINTING III: Advanced Painting. 3.00 points.**

Prerequisites: (VIAR UN1000) and (VIAR UN2100) *VIAR R1000* and *VIAR R2100*

Prerequisites: (VIAR UN1000) and (VIAR UN2100) Painting III: Advanced study in painting will be a material inquiry into the consequential concepts, histories, and critical language embedded in making painting's historical past and its' present. Is painting now a singular "medium"? How do facture, scale, form and a multitude of image-making options, regardless of "style", accrue as to create meaning? Participants are expected to present work weekly, as Individual studio or group critiques. These will be augmented by readings of selected historical essays and contemporaneous writings, as well as visual presentations on a rotating basis

**Spring 2025: VIAR UN3102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3102	001/15114	F 10:00am - 4:00pm 401 Dodge Building	Eric Mack	3.00	9/16

**VIAR UN3103 Advanced Painting: Process. 3 points.**

Prerequisites: VIAR UN1000 and VIAR UN2100

In this advanced course, students develop their own individual painting practice through experimentation, risk taking, and rigorous evaluation of the interwoven questions of material and content in their work. A special emphasis is based on what we can do with the process of painting, and its vast and ever changing array of procedures, substrates, approaches, and techniques. How can painting materialize your response to what you encounter visually, intellectually, poetically, psychologically, politically, and culturally? "Painting" is open in the class, and expansion and integration of other materials is fully acceptable. The course consists of directed but open assignments, presentations on historical and contemporary work, introduction to new materials, readings, individual and group critiques, and visits to working artists' studios, museums/galleries.

**VIAR UN3104 Painting III: Advanced Painting. 3.00 points.**

This advanced painting class will consider contemporary painting in the context of traditional genres, exploring both continuity and discontinuity between contemporary painting and the tradition out of which it arose. Questions considered will include: Do traditional genres such as the history painting, the still-life, the nude, the portrait, the landscape painting have any relevance to contemporary painting? If not, where have

these genres migrated to in our contemporary culture? Does contemporary painting exist solely as a cliché of art production, a hand-made status symbol and luxury commodity or can an argument be made for painting as an individual revolt against mass culture? Is painting's appeal simply due to nostalgia for a now-obsolete technology of representation or does its enduring popularity result from a desire for the physical/personal in a screen-based world? How are contemporary artists using painting today and what critical strategies are available to painters today? Students will be expected to present artwork weekly for individual and group critiques. The course will use an expanded definition of painting so students should feel free to experiment with other media as desired. Students will be required to research historical and contemporary (both art and mass culture) examples of the various genres and to create visual presentations of their research. Supplemental readings will be assigned weekly. Students will spend the last month working on a project of their choice

**VIAR UN3120 FIGURE PAINTING. 3.00 points.**

Prerequisites: VIAR R1000 and VIAR R2100. (Formerly R3210) Course provides the experience of employing a wide range of figurative applications that serve as useful tools for the contemporary artist. Non-Western applications, icon painting, and the European/American traditions are presented. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Spring 2025: VIAR UN3120**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3120	001/15115	W 10:00am - 4:00pm 401 Dodge Building	Esteban Cabeza de Baca	3.00	9/16

**VIAR UN3121 Figure Painting: Alternative Source Material. 3.00 points.**

This class is designed to introduce you not only to the subject of painting the human figure and its expressive potential, but also to focus on the art and craft of Painting. We will be painting the figure from secondary source material that can include photos, other artworks, clay models etc. The focus will be on figurative narration. We will be learning to see color, and use paint in response to that. Painting is a way to account for, express and communicate what you have seen with your eyes, mind or in your imagination. You will be introduced to different approaches to the craft of painting, and will by the end of the semester be more free and confident in interpreting your inner and outer vision. We will also be looking at paintings made in different times and places and discuss how and why they look the way they do. You will also be designing and carrying out your own independent project to be completed by the final critique

## PHOTOGRAPHY

### VIAR UN1701 INTRO DARKROOM PHOTOGRAPHY. 3.00 points.

Introductory course to analog photographic tools, techniques, and photo criticism. This class explores black & white, analog camera photography and darkroom processing and printing. Areas covered include camera operations, black and white darkroom work, 8x10 print production, and critique. With an emphasis on the student's own creative practice, this course will explore the basics of photography and its history through regular shooting assignments, demonstrations, critique, lectures, and readings. No prior photography experience is required

#### Fall 2024: VIAR UN1701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 1701	001/11323	M W 9:30am - 12:00pm 106 Watson Hall	Matthew Buckingham	3.00	10/14

### VIAR UN1702 INTRO DIGITAL PHOTOGRAPHY. 3.00 points.

Since Walter Benjamin's concept of "work of art in the age of mechanical reproduction" (1935), photography has been continuously changed by mechanical, and then digital, means of image capture and processing. This class explores the history of the image, as a global phenomenon that accompanied industrialization, conflict, racial reckonings, and decolonization. Students will study case studies, read critical essays, and get hands-on training in capture, workflow, editing, output, and display formats using digital equipment (e.g., DSLR camera) and software (e.g., Lightroom, Photoshop, Scanning Software). Students will complete weekly assignments, a midterm project, and a final project based on research and shooting assignments. No Prerequisites and no equipment needed. All enrolled students will be able to check out Canon EOS 5D DSLR Camera; receive an Adobe Creative Cloud license; and get access to Large Format Print service

#### Fall 2024: VIAR UN1702

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 1702	001/11344	T Th 1:00pm - 3:30pm 106 Watson Hall	Joao Pina	3.00	14/12

#### Spring 2025: VIAR UN1702

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

### VIAR UN1703 AI # PHOTOGRAPHY. 3.00 points.

As far back as Walter Benjamin's "work of art in the age of mechanical reproduction" (1935), photography has always been challenged by mechanical means of image processing. Photographers and Institutions have first resisted and then (mostly) embraced each of these changes. This class explores Artificial Intelligence Photography as the latest in a series of earthquakes in the history of the photographic image, accompanying the desires of business, globalization, and science. This class seeks an ethically guided, globally representative model for photography and artificial intelligence. Debates around authorship and creativity (e.g., Supreme Court case with Andy Warhol) now face a radically new context of an "authorless" photograph. As crowdsourced imagemaking begins, the bias of massive datasets have taken techno-utopians by surprise, underlining that the task of building an equitable image-bank of the world cannot be left to algorithms and entrepreneurs. This class will explore the ethics and aesthetics of Artificial Intelligence and Imagery. There will be equal emphasis on reading and writing papers, as there will be on learning new software and tools

#### Fall 2024: VIAR UN1703

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 1703	001/13778	M W 1:30pm - 4:00pm 106 Watson Hall	Naeem Mohaiemen	3.00	5/12

### VIAR UN2703 Advanced Darkroom Photography. 3.00 points.

Advanced analog photography & darkroom printing. Students will work with analog cameras and learn how to refine black-and-white printing techniques, produce larger prints, etc. Emphasis will be placed on the editing, sequencing, and display of images while cultivating a theoretical and historical context to situate the work. Students will engage with an array of photographic practices through presentations, critiques, guest artist lectures and printing assignments. This course will explore critical issues in contemporary photography and advanced camera and production techniques through regular shooting assignments, demonstrations, critique, lectures, readings, and field trips. Prerequisites: Intro Darkroom Photography (Columbia) or equivalent experience

#### Spring 2025: VIAR UN2703

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2703	001/15110	T Th 9:30am - 12:00pm 212 Dodge Building	Dana Buhl	3.00	13/14

### VIAR UN3100 ARCHIVE PHOTOGRAPHY. 3.00 points.

When millions of images are made every day, how can a photographer create an original body of work? This class proposes that parsing humanity's existing shared archive of images is more relevant than generating new images.

Following models such as Nepal Picture Library, Magnum Foundation, Drik/Majority World, and Arab Image Foundation, contemporary photography has remapped its practice around the reimagining and explanation, of the archival object.

This class explores many archives—family albums, historical photographs, government records, fragile maps, musical albums, and flea market collectibles. We will use a series of lens-based technologies, starting from the flatbed scanner and Photoshop retouching and radiating outward. We will explore archive concerns, including consent, ownership, privacy, circulation, respect, and political impact. Students will explore display forms, including slide shows, zines, books, and exhibitions. There will be a strong complement of reading and writing in this class around the theory and practice of archives from the Western North and Global South

**Spring 2025: VIAR UN3100**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3100	001/17184	M W 1:00pm - 3:30pm 106 Watson Hall	Naeem Mohaiemen	3.00	11/15

**VIAR GU4702 Photography: Advanced Photo III Seminar. 3 points.**

Prerequisites: VIAR UN1700

This course will explore the Artists book as an essential medium of contemporary artistic and lens based practice. Lectures and presentations will consider the mediums historical roots in Dadaism, Constructivism and Fluxus to enliven an expansive consideration of the books essential principles — scale, material, touch and dissemination. Students are exposed to a variety of approaches and viewpoints through presentations by guest photographers, writers, curators, publishers as well as class trips to archives, museums and galleries. Using various research methodologies with a distinct focus on image and text students will explore narrative development, sequencing, repetition and pacing. Each student will propose, develop and produce a unique editioned artists book during this course.

**VIAR GU4704 Photo III: Photobook. 3.00 points.**

Prerequisites: VIAR UN1700 and VIAR UN2701

This course will explore the photobook as a central medium of contemporary lens-based practice. Students are exposed to a variety of approaches and viewpoints through historical lectures, class trips, and presentations by guest photographers, curators, critics, editors, graphic designers, etc. Each student will propose, develop, and produce editioned books during this course. This course requires reading, independent research, and work outside of class time

**Spring 2025: VIAR GU4704**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 4704	001/15153	M W 9:30am - 12:00pm 106 Watson Hall	Benjamin Salesse	3.00	11/14

## PRINTMAKING

**VIAR UN2420 PRINTMAKING I: INTAGLIO. 3.00 points.**

(Formerly R3401) Enables the student to realize concepts and visual ideas in a printed form. Basic techniques are introduced and utilized: the history and development of the intaglio process; demonstrations and instruction in line etching, relief, and dry point. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Fall 2024: VIAR UN2420**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2420	001/11366	M W 2:30pm - 5:00pm 210 Dodge Building	Jennifer Nuss	3.00	9/9

**Spring 2025: VIAR UN2420**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2420	001/15108	M W 2:30pm - 5:00pm 210 Dodge Building	Jennifer Nuss	3.00	12/14

**VIAR UN2430 PRINTMAKING I: RELIEF. 3.00 points.**

(Formerly R3411) Printmaking I: Relief introduces woodcut and other relief techniques. Given the direct quality of the process, the class focuses on the students personal vision through experimentation with this print medium. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Fall 2024: VIAR UN2430**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 2430	001/11369	M W 9:30am - 12:00pm 210 Dodge Building	Nathan Catlin	3.00	8/9

**VIAR UN2440 PRINTMAKING I: SILKSCREEN. 3.00 points.**

(Formerly R3413) Printmaking I: Silkscreen introduces silkscreen and other silkscreen techniques. Given the direct quality of the process, the class focuses on the students personal vision through experimentation with this print medium. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

### **VIAR UN3410 PRINTMAKING I: PHOTOGRAVURE. 3.00 points.**

Prerequisites: VIAR UN1400 or VIAR UN2420 or VIAR UN1700 *VIAR R1400*, *VIAR R2420*, or *VIAR R1700*.

Prerequisites: VIAR UN1400 or VIAR UN2420 or VIAR UN1700 (Formerly R3417) The purpose of this course is to incorporate the photomechanical intaglio printmaking process into the student's own work, and in turn, for them to capitalize on its usage as part of their visual arts language. The students will learn the polymer plate process known as Solar Plate and structure it to the concepts they are creating and investigating. By integrating it into conventional intaglio techniques and combining them into finished works, the student's printmaking lexicon will be expanded. This course is a concise study and practice of the process of photoetching, also known as photoengraving, utilizing non-toxic photo-polymer plates, thus reducing the exposure to harmful chemicals used in other photomechanical printmaking processes. This also coincides with the transitioning of the print studio into a Green workplace

### **VIAR UN3412 PRINTMAKING: DRAWING INTO PRINT. 3.00 points.**

Prerequisites: VIAR UN2420 or VIAR UN2430 *VIAR R2420*, or *VIAR R2430*.

Prerequisites: VIAR UN2420 or VIAR UN2430 note that VIAR UN2430 was formerly R3420. The objective of the course is to provide students with an interdisciplinary link between drawing, photography and printmaking through an integrated studio project. Students will use drawing, printmaking and collage to create a body of work to be presented in a folio format. In the course, students develop and refine their drawing sensibility, and are encouraged to experiment with various forms of non-traditional printmaking. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### **Fall 2024: VIAR UN3412**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3412	001/11387	T 10:00am - 4:00pm 210 Dodge Building	Tomas Vu Daniel	3.00	4/8

### **VIAR UN3421 PRINTMAKING II: INTAGLIO. 3.00 points.**

Prerequisites: VIAR UN2420 *VIAR R2420*.

Prerequisites: VIAR UN2420 (Formerly R3402) Continues instruction and demonstration of further techniques in intaglio. Encourages students to think visually more in the character of the medium, and personal development is stressed. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### **Fall 2024: VIAR UN3421**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

### **VIAR UN3422 Printmaking on, through, # below the matrix. 3.00 points.**

This course offers to the student who may find an examination of printmaking an asset to their art practice. The course will cover several printmaking processes like relief, intaglio, silkscreen, and monotype. In addition, we will discuss printmaking concepts such as repetition, matrix, original/translation, reproducibility, and multiple considering the works produced in class. We will involve a separate in-depth study of each process by alternating studio time, demonstrations, field trips, individual and group critiques. Through the printmaking processes, students will explore assignments and projects and be encouraged to incorporate them into their own body of work

#### **Spring 2025: VIAR UN3422**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3422	001/15124	T 10:00am - 4:00pm 210 Dodge Building	Craig Zammiello	3.00	6/10

### **VIAR UN3431 PRINTMAKING II: RELIEF. 3.00 points.**

Prerequisites: VIAR UN2430 *VIAR R2430*.

Prerequisites: VIAR UN2430 (Formerly R3412) Printmaking II: Relief continues instruction and demonstration of further techniques in woodcut. Encourages students to think visually more in the character of the medium, and personal development is stressed. Individual and group critiques. Portfolio required at end. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### **Fall 2024: VIAR UN3431**

**EXPANDED PRACTICE | SCULPTURE****VIAR UN2200 CERAMICS I. 3.00 points.**

(Formerly R3130) This studio course will provide the students with a foundation in the ceramic process, its history, and its relevance to contemporary art making. The course is structured in two parts. The first centers on the fundamental and technical aspects of the material. Students will learn construction techniques, glazing and finishing methods, and particulars about firing procedures. This part of the course will move quickly in order to expose the students to a variety of ceramic processes. Weekly assignments, demonstrations, and lectures will be given. The second centers on the issue of how to integrate ceramics into the students current practice. Asking the question of why we use ceramics as a material and, further, why we choose the materials we do to make art. Rigorous group and individual critiques focusing on the above questions will be held. The goal of this course is to supply the students with the knowledge and skill necessary to work in ceramics and enough proficiency and understanding of the material to enable them to successfully incorporate it into their practice. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Fall 2024: VIAR UN2200**

**VIAR UN2300 SCULPTURE I. 3.00 points.**

(Formerly R3330) The fundamentals of sculpture are investigated through a series of conceptual and technical projects. Three material processes are introduced, including wood, metal, and paster casting. Issues pertinent to contemporary sculpture are introduced through lectures, group critiques, discussions, and field trips that accompany class assignments. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Fall 2024: VIAR UN2300**

**VIAR UN3201 CERAMICS II. 3.00 points.**

Prerequisites: (VIAR UN1000) and (VIAR UN2100) Painting III: Advanced study in painting will be a material inquiry into the consequential concepts, histories, and critical language embedded in making painting's historical past and its' present. Is painting now a singular "medium"? How do facture, scale, form and a multitude of image-making options, regardless of "style", accrue as to create meaning? Participants are expected to present work weekly, as Individual studio or group critiques. These will be augmented by readings of selected historical essays and contemporaneous writings, as well as visual presentations on a rotating basis

**Spring 2025: VIAR UN3201**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3201	001/15118	Th 10:00am - 4:00pm 315 Prentis Hall	Patrice Washington	3.00	4/6

**VIAR UN3301 SCULPTURE II. 3.00 points.**

Prerequisites: VIAR UN2300 or the instructors permission. (Formerly R3331) Continuation of VIAR UN2300. The objective of the class is to engage in in-depth research and hands on studio projects related to a specific theme to be

determined by each student. Each student is expected to complete class with four fully realized and thematically linked works. Wood, metal, and plaster will be provided for this class but video, sound, performance and various mixed media approaches are highly encouraged. In addition, lecture and field trips will be part of the course. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Spring 2025: VIAR UN3301**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3301	001/15119	T 10:00am - 4:00pm 315 Prentis Hall	Calvin Siegel	3.00	7/7

**VIAR UN3302 SCULPTURE III. 3.00 points.**

Prerequisites: VIAR R2300. (Formerly R3332) Sculpture III is an invitation for immersive sculpting. The class will explore the idea of experiences and construction of contexts as central research topics. The class becomes a laboratory space to explore various techniques to heighten body awareness and spatial sensibility. Through assignments and workshops, the students will practice how to digest these sensory experiences through their studio practice. Historical precedents for art outside the usual mediums and venues will be our reference points to investigate how our own work may take part in a generative process that evolves the definition of sculpture. The assignments in the first half of the semester point the students to performance, site specificity, and sound, that utilize New York City's odd spots and professionals. While building such common experiential platforms, the class will also build language for a dialogic space, through weekly in-class discussions lead by the instructor, guests, and rotating panels of the students. As the semester progresses, the emphasis will gradually be shifted from experiential learning to intensive studio work on a final project, where the students are asked to pay close attention to how various methods and fields of subjects combine. The resulting project has to be the best work you have ever done. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

**Spring 2025: VIAR UN3302**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3302	001/15120	T 10:00am - 4:00pm 315 Prentis Hall	Calvin Siegel	3.00	0/2

**VIAR GU4600 Performance Art. 3.00 points.**

What happens to a body stilled in space, when it takes a shape and holds it? How does its relationship to public space change? How is its transformation attenuated when the body is in formation with other bodies, a breathing still life of people and props? This performance art course will use the question of a body's stillness as a platform to create interdisciplinary projects that exist between dance, sculpture, collaborative movement, and performance art. Through core readings and case study presentations, we will discuss unique possibilities of representation and challenges this form enables, and the prominent role it has been taking within the visual arts in recent years. Students will engage with a variety of aesthetic strategies

and formal techniques such as movement workshops, sensory exercises, video, wearable sculptures, collaboration, scores, and group meditation. Studio work will focus on concrete intersections between the body and the object, and case studies chosen to encourage students to think of movement as a form of resistance, and to consider the political implication of collaborative work that unfolds over time. Performativity in the context of this class is widely defined, and no prior experience is required

**Spring 2025: VIAR GU4600**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 4600	001/15152	F 10:00am - 4:00pm 101 Prentis Hall	Liz Laser	3.00	11/16

**VIAR GU4310 MAKING WITHOUT OBJECTS. 3.00 points.**

Prerequisites: VIAR UN2300

Prerequisites: VIAR UN2300 (Formerly R3302) Laboratory in Relational Art; Sculpture without Objects The purpose of this class will be to explore the function of Relational Aesthetics in contemporary art practice and to develop ideas about the role of context in art, as the students develop their own site-specific works and research historical precedents for art designed to be exhibited in non-traditional venues. This course will also prepare students for professional work preparing art for venues of that type. This class will be structured around studio work, with an emphasis on the development and production of a final site-specific project. In order to foster students' growth and ongoing investigation into the nature of contemporary sculpture, the class will also be comprised of slide lectures, visits to local artists' studios, and galleries, as well as various public art projects throughout the city. As the semester progresses, the emphasis will gradually be shifted from research to intensive studio work on a final project, often a proposal for a site-specific work in a non-traditional venue. Generally, the first half of each class session will be dedicated to lecture and discussion, while the second half will be dedicated to individual studio work and critique

**Fall 2024: VIAR GU4310**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 4310	001/11465	M 10:00am - 4:00pm 315 Prentis Hall	Rirkrit Tiravanija	3.00	12/16

## MOVING IMAGE

**VIAR UN3500 Intro to Moving Image: Video, Film & Art. 3 points.**

Beginning Video is an introductory class on the production and editing of digital video. Designed as an intensive hands-on production/post-production workshop, the apprehension of technical and aesthetic skills in shooting, sound and editing will be emphasized. Assignments are developed to allow students to deepen their familiarity with the language of the moving image medium. Over the course of the term, the class will explore the language and syntax of the moving image, including fiction,

documentary and experimental approaches. Importance will be placed on the decision making behind the production of a work; why it was conceived of, shot, and edited in a certain way. Class time will be divided between technical workshops, viewing and discussing films and videos by independent producers/artists and discussing and critiquing students projects. Readings will be assigned on technical, aesthetic and theoretical issues. Only one section offered per semester. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>.

#### Fall 2024: VIAR UN3500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

VIAR 3500	001/15126	M 10:00am - 4:00pm 101 Prentis Hall	Hinda Weiss	3	9/14

#### VIAR GU4300 Ways of Making: Special Topics. 1.50 point.

This course seeks to build upon (or expand) skills learned in sculpture I. This workshop based course allows students more access to the shops to continue to develop those introductory skills while focusing on specific materials and processes. In this course students will complete one self directed project and a number of inclass short assignments and exercises providing a greater exposure to sculptural practice and processes. Acting as both a bridge to and support for more advanced inquiry into making

#### Fall 2024: VIAR GU4300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 4300	001/11464	W 10:00am - 11:30am 315 Prentis Hall	Andrew Brehm	1.50	11/14

#### VIAR GU4501 Advanced Moving Image: Video, Film # Art. 3.00 points.

Prerequisites: (VIAR UN3500) VIAR UN3500 Intro to Moving Image: Video, Film # Art or prior experience in video or film production. Advanced Moving Image: Video, Film # Art is an advanced, intensive project-based class on the production of digital video. The class is designed for advanced students to develop an ambitious project or series of projects during the course of the semester. Through this production, students will fine-tune shooting and editing skills as well as become more sophisticated in terms of their aesthetic and theoretical approach to the moving image. The class will follow each student through proposal, dailies, rough-cut and fine cut stage. The course is organized for knowledge to be shared and accumulated, so that each student will learn both from her/his own process, as well as the processes of all the other students. Additional screenings and readings will be organized around the history of video art and the problematics of the moving image in general, as well as particular issues that are raised by

individual student projects. NOTE: There is only one section offered per semester. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

#### VIAR GU4504 Advanced Moving Image: Video, Film, Art # Movement. 3.00 points.

Advanced Moving Image: Video, Film, Art # Movement is an advanced moving image class which centers on the use of both established and emergent digital technologies as a medium for exploration and artistic expression. The focus will be on artworks that reference the body/bodies in movement, the creation of Avatars and the designing of environments and spatial narratives. Existing works from this emergent area will be shown to give cultural and historical context, seen through a personal and political lens. The course will be intensive and hands-on, the apprehension of technical and aesthetic skills will be utilized to create works based on the individual or collective expression of the artist/s. Students are encouraged to explore areas of personal interest and to incorporate this research into their production work. Taking an active role in class discussions and production teamwork is required. The course is offered to both graduate and undergraduate students. It is expected that at the end of the course students will have gained an active knowledge of core concepts and techniques useful in working with performance capture within an art context

#### Spring 2025: VIAR GU4504

## VISUAL ARTS MAJOR REQUIREMENTS

#### VIAR UN3800 SEM IN CONTEMP ART PRACTICE. 3.00 points.

(Formerly R4601) New York City is the most abundant visual arts resource in the world. Visits to museums, galleries, and studios on a weekly basis. Students encounter a broad cross-section of art and are encouraged to develop ideas about what is seen. The seminar is led by a practicing artist and utilizes this perspective. Columbia College and General Studies Visual Arts Majors must take this class during their junior year. If the class is full, please visit <http://arts.columbia.edu/undergraduate-visual-arts-program>

Prerequisites: the instructor's permission. See requirements for a major in visual arts. *VIAR R3910* is the prerequisite for *VIAR R3911*.

Corequisites: VIAR UN3900

Prerequisites: Department approval required. See requirements for a major in visual arts. VIAR UN3910 is the prerequisite for VIAR UN3911. Corequisites: VIAR UN3900 (Formerly R3921) Students are required to enroll in both semesters (VIAR UN3910 and VIAR UN3911). A second opinion is provided to the senior students regarding the development of their senior project. Critics consist of distinguished visitors and faculty. Issues regarding the premise, methodology, or presentation of the students ideas are discussed and evaluated on an ongoing basis

**Fall 2024: VIAR UN3910**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3910	001/11398		Emily Henretta	2.00	17/17

**Spring 2025: VIAR UN3910**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3910	001/15132		Emily Henretta	2.00	4/4

**VIAR UN3911 VISITING CRITIC II. 2.00 points.**

Prerequisites: VIAR UN3910 Department approval required. See requirements for a major in visual arts. Corequisites: VIAR

UN3901 (Formerly R3922) Students are required to enroll in both semesters (VIAR UN3910 and VIAR UN3911). A second opinion is provided to the senior students regarding the development of their senior project. Critics consist of distinguished visitors and faculty. Issues regarding the premise, methodology, or presentation of the students ideas are discussed and evaluated on an ongoing basis

**Spring 2025: VIAR UN3911**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
VIAR 3911	001/15133		Emily Henretta	2.00	15/16

## WOMEN'S AND GENDER STUDIES

### INSTITUTE FOR THE STUDY OF SEXUALITY AND GENDER:

Department website: <https://issg.columbia.edu/>

Office location: 763 Schermerhorn Extension

Office contact: 212-854-3277, [issg@columbia.edu](mailto:issg@columbia.edu)

Director of Undergraduate Studies: Professor [Elizabeth Povinelli](#), [ep2122@columbia.edu](mailto:ep2122@columbia.edu)

### UNDERGRADUATE PROGRAM

Located within the Institute for the Study of Sexuality and Gender, and taught in cooperation with Barnard College's Department of Women's, Gender, and Sexuality Studies, the program in Women's and Gender Studies provides students with a culturally and historically situated, theoretically diverse, and transnational understanding of feminist and queer scholarship as it engages multiple disciplines.

The program introduces students to key feminist and queer discourses on the cultural and historical representation of nature, power, and the social construction of difference. It encourages students to engage in the debates regarding the ethical and political issues of equality and justice that emerge in such discussion, and links the questions of gender and sexuality to those of racial, ethnic, and other kinds of social difference.

Through sequentially organized courses in Women's, Gender, and Sexuality Studies, as well as approved elective courses in a wide range of departments, the degree provides a thoroughly interdisciplinary framework, methodological training, and substantive guidance in specialized areas of research. Small classes taught by our core faculty members and mentored thesis writing give students an education that is both comprehensive and tailored to individual needs.

Graduates leave the program with critical reading, writing, and analytical skills, and gain the tools they need to analyze systems of power operating at personal, national, and international

levels. While this prepares some for future scholarly work in the field of Women's, Gender, and Sexuality studies, others take these skills and apply them to careers and future training in a variety of fields, including: law, public policy, social work, community organizing, public health, film, journalism, medicine, and other professions where gender and sexuality are currently being reimagined and there is a need for critical and creative interdisciplinary thought.

## STUDENT ADVISING

Director of Undergraduate Studies: Professor Elizabeth Povinelli, ep2122@columbia.edu

### Consulting Advisers

For advising inquiries, students should contact the Director of Undergraduate Studies, Professor Elizabeth Povinelli, at ep2122@columbia.edu to schedule an appointment.

To stay informed about departmental updates and events, students can sign up for the listserv by emailing issg@columbia.edu. The listserv releases a weekly newsletter every Thursday, providing information about course offerings, internship opportunities, research projects, and other relevant announcements.

ISSG hosts various events throughout the year, including an annual welcome party for students every fall semester. To view current and previous events, students can visit the [ISSG Events Page](#).

### Enrolling in Classes

Certain courses within the WGSS major may have prerequisite coursework that students are expected to have completed or pursue before enrolling. These prerequisites are designed to ensure students have the necessary background knowledge and skills to succeed in the course. Students should review the course descriptions and program requirements on the [ISSG Courses](#) page to determine if any prerequisite coursework applies to their desired courses.

### Preparing for Graduate Study

For personalized guidance on preparing for graduate study in WGSS, schedule an appointment with the WGSS Director of Undergraduate Studies. They can offer tailored advice based on your academic and career aspirations, helping you navigate the path to advanced study in the field.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor [or special program or concentration] must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or substitutions permitted by the Director

of Undergraduate Studies should be confirmed in writing by email to the student.

### Barnard College Courses

All Barnard courses are treated as part of the available curriculum and accepted in the major/minor.

### Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor [or special program or concentration].

Transfer courses can be considered as transfer credit at the discretion of the Director of Undergraduate Studies. Once degree credit has been confirmed by Columbia, students should contact the Director of Undergraduate Studies (DUS) to request a review of transfer credit. Please provide course syllabi for each transfer course you wish to apply toward your degree requirements to the DUS.

### Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor [or special program or concentration], the DUS will need to confirm that they can be used toward requirements in the major/minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.

### Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

Building a strong foundation in research questions and methods is integral to advancing one's understanding of Women's, Gender, and Sexuality Studies (WGSS). Through coursework, students have the opportunity to develop critical research skills while exploring key topics in the field. Here are some courses that introduce students to research methods and their significance:

WMST UN1001 Introduction to Women's and Gender Studies (or WMST UN3125 Introduction to Sexuality Studies) provides an overview of key concepts, theories, and methodologies in WGSS. Students engage with interdisciplinary approaches to studying gender, sexuality, and identity, laying the groundwork for future research endeavors.

WMST UN3311 Feminist Theory delves into the complexities of feminist thought and theory, equipping students with analytical tools to critically evaluate and conduct research within feminist frameworks. Through readings, discussions, and assignments, students explore various feminist perspectives and methodologies.

### Senior Thesis Coursework and Requirements

The senior thesis is an independent research project conducted under the guidance of a faculty advisor. It allows students to delve deeply into a specific area of interest within WGSS, applying the research skills and methodologies acquired throughout their undergraduate studies to produce an original scholarly work.

Senior thesis students must be WGSS majors and should meet with the Director of Undergraduate Studies (DUS) to ensure they fulfill all requirements before graduation. Eligible students typically begin working on their thesis in the fall of their senior year in WMST UN3521 Senior Seminar I.

For WGSS students awarded honors, participation in WMST UN3522 Senior Seminar II in the spring of their senior year provides an opportunity to further develop their thesis research and writing under faculty guidance.

## DEPARTMENT HONORS AND PRIZES

### Undergraduate Honors

Typically, honors in Women's, Gender, and Sexuality Studies will be awarded to students with (1) a grade point average of at least 3.6 or higher in Women's, Gender, and Sexuality Studies or related courses, (2) a senior thesis that has been recommended for honors by the professor of the senior seminar and the student's faculty advisor, and (3) approval by the College.

A limited number of students are granted this standing, and final approval originates from the Dean's Office. However, the Undergraduate Director, in consultation with the senior seminar professor and the student's faculty advisor, may propose honors for an extraordinary academic performance, with final approval resting with the College.

### Undergraduate Awards & Prizes

ISSG honors undergraduates with three annual prizes recognizing outstanding intellectual achievement: the Queer Studies Award, the Women's and Gender Studies Award, and the Feminist to the Core Essay Prize.

The Queer Studies Award, inaugurated in 1994, honors an undergraduate for excellence in research and writing in Queer Studies. Winning submissions demonstrate clarity, originality, ambition, and are informed by or engaged in critical issues in Queer Studies.

The Women's and Gender Studies Award, inaugurated in 2007, honors an undergraduate for excellence in research and writing in the fields of Women's and Gender Studies. Winning submissions demonstrate clarity, originality, ambition, and are informed by or engaged in critical issues in Women's and Gender Studies.

The Feminist to the Core Essay Prize, inaugurated in 2017, is awarded annually to the undergraduate who is judged by the ISSG prize committee to have written the best essay on any topic in Feminist or Queer Studies in one of the following Core courses:

- Literature Humanities
- Contemporary Civilization
- Art Humanities
- Music Humanities

Undergraduates are invited to compete for all three awards in a given year, but may not submit the same essay for consideration for multiple awards. Prize applications can be accessed on the [ISSG Undergraduate Awards and Prizes](#) page.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of a major or a minor. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before the 2023-2024 academic year may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

### Course Numbering Structure

Our course numbering system is designed to indicate the level of specialization and prerequisites associated with each course:

- 1000-level Courses: Introductory, providing foundational knowledge for students new to the subject.

- 2000-level Courses: Intermediate, building upon foundational concepts and delving deeper into specific topics.
- 3000-level Courses: Intermediate to Advanced, typically seminars, most requiring prerequisite coursework or prior knowledge and exploring complex themes and methodologies.
- 4000-level Courses: Advanced undergraduate and first year graduate courses. Typically taken by graduate students; advanced students (juniors and seniors) or those with extensive background.

## Guidance for First-Year Students

Consider enrolling in either WMST UN1001 INTRO-WOMEN # GENDER STUDIES or WMST UN3125 INTRO TO SEXUALITY STUDIES. These courses provide a comprehensive introduction to key concepts and theories in the field.

Check course availability and prerequisites when registering for classes. Be sure to plan your schedule accordingly, keeping introductory courses in mind.

Schedule an appointment with the ISSG Director of Undergraduate Studies for personalized advice tailored to your interests and goals. They can help you plan your academic trajectory and navigate your first year effectively.

## Guidance for Transfer Students

Consider starting with either WMST UN1001 INTRO-WOMEN # GENDER STUDIES or WMST UN3125 INTRO TO SEXUALITY STUDIES. These courses provide a comprehensive introduction to key concepts and theories in the field. Prioritize classes that match your interests and degree requirements.

Transfer Credit Evaluation: After Columbia confirms degree credit, contact the ISSG DUS to review transfer courses and submit syllabi for evaluation.

You may need to complete your degree in a compressed timeline. Work closely with the ISSG DUS to ensure timely graduation.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Women's, Gender, and Sexuality Studies

Total Number of Courses in Major: 11

Total Points for Major: 37-43 points

WMST UN1001	INTRO-WOMEN # GENDER STUDIES
or WMST UN3125	INTRO TO SEXUALITY STUDIES

WMST UN3311	FEMINIST THEORY
WMST UN3514	HIST APPROACHES TO FEM QUESTNS
WMST UN3521	SENIOR SEMINAR I
WMST UN3915	GENDER, SEXUALITY # POWER IN TRANSNATIONAL PERSPECTIVES

Six approved Elective Courses on women, gender, and/or sexuality in consultation with the director of undergraduate studies.\*

\* Electives will be selected in coordination with the Director of Undergraduate Studies to best suit students' specific interests and to provide them with the appropriate range of courses. Students are encouraged to take a broad interdisciplinary approach. The Director of Undergraduate Studies will help students fine-tune their academic program in conjunction with ISSG courses, cross-listed courses, and other courses offered at Columbia.

## Minor in Women's, Gender, and Sexuality Studies

Number of Courses in Minor: 5

Total Points for Minor: 15-20 points

WMST UN1001	INTRO-WOMEN # GENDER STUDIES
or WMST UN3125	INTRO TO SEXUALITY STUDIES

Four Elective Courses on women's, gender, and/or sexuality studies selected in consultation with the ISSG Director of Undergraduate Studies (12-16 pts.)\*

\* Electives will be selected in coordination with the Director of Undergraduate Studies to best suit students' specific interests and to provide them with the appropriate range of courses. Students are encouraged to take a broad interdisciplinary approach. The Director of Undergraduate Studies will help students fine-tune their academic program in conjunction with ISSG courses, cross-listed courses, and other courses offered at Columbia.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before the 2023-2024 academic year. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin

dated the academic year when the student was a sophomore and declared programs of study.

Concentrations are not available to students who entered Columbia in or after Fall 2024.

## Concentration in Women's and Gender Studies

The same requirements as for the major, with the exception of WMST UN3521 SENIOR SEMINAR I.

## Special Concentration Program for Those Majoring in Another Department

WMST UN1001 INTRO-WOMEN # GENDER STUDIES or WMST UN3125 INTRO TO SEXUALITY STUDIES; plus four additional approved elective courses on gender.

## FALL 2024

**WMST BC1006 Introduction to Environmental Humanities. 3.00 points.**

**COURSE DESCRIPTION** This course introduces students to key concepts and texts in environmental humanities, with an emphasis on interdisciplinary studies of race, gender, sexuality, capital, nation, and globalization. The course examines the conceptual foundations that support humanistic analyses of environmental issues, climate crisis, and the ethics of justice and care. In turn, this critical analysis can serve as the basis for responding to the urgency of calls for environmental action. **LEARNING OBJECTIVES** Students will learn what difference humanistic studies make to understanding environmental issues and climate crisis. The course will prepare students to: Identify humanistic methods and how they contribute to understanding the world; Demonstrate critical approaches to reading and representing environments; Engage ethical questions related to the environment; and Apply concepts from the course to synthesize the student's use of humanistic approaches to address urgent environmental questions

**Fall 2024: WMST BC1006**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 1006	001/00192	M W 8:40am - 9:55am 504 Diana Center	Daniel Sander, Ashley Dawson	3.00	33/70

**WMST BC2140 Critical Approaches in Social and Cultural Theory. 3.00 points.**

This course examines the conceptual foundations that support feminist and queer analyses of racial capitalism, security and incarceration, the politics of life and health, and colonial and postcolonial studies, among others. Open to all students; required for the major in Women's, Gender, and Sexuality Studies (WGSS) and the Interdisciplinary Concentration or Minor in Race and Ethnicity (ICORE/MORE)

**Fall 2024: WMST BC2140**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 2140	001/00135	M 2:10pm - 4:00pm LI001 Milstein Center	Alexander Pittman	3.00	28/35

**Spring 2025: WMST BC2140**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 2140	001/00021	F 2:10pm - 4:00pm LI001 Milstein Center	Alexander Pittman	3.00	26/35

**WMST BC2150 INTERSECTIONAL FEMINISMS. 3.00 points.**

Enrollment for this class is by instructor approval and an application is required. Please fill out the form here: <https://forms.gle/bPsV7rcf5RWB35PM9> This introductory course for the Interdisciplinary Concentration or Minor in Race and Ethnicity (ICORE/MORE) as well as Majors/Minors in Women's, Gender, and Sexuality Studies (WGSS) is open to all students. We focus on the critical study of social difference as an interdisciplinary practice, using texts with diverse modes of argumentation and evidence to analyze social differences as fundamentally entangled and co-produced. Because of the interdisciplinary nature of this course, the professor will frequently be joined by other faculty and guest speakers who bring distinct disciplinary and subject matter expertise. Some keywords for this course include hybridity, diaspora, borderlands, migration, and intersectionality

**Fall 2024: WMST BC2150**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 2150	001/00022	T 10:10am - 11:25am 504 Diana Center	Manijeh Moradian	3.00	47/55

WMST 2150	001/00427	T 4:10pm - 5:25pm 405 Milbank Hall	Renee Hill	3.00	52/70

**WMST UN3152 Queer/Trans Holocaust History. 4.00 points.**

The Holocaust is one of the most researched horrors of the Modern past. Yet, the study of queer and trans Holocaust histories is relatively new. This upper-level course covers the key analytics that the Holocaust has generated within the historical discipline, but from the position of queer and trans scholarship. It attends to the varying and uneven experiences of queer and trans people under Nazism, but equally fronts new methods and conclusions about the Holocaust, state and individual violence, social hygiene practices, the role of sex within society, identity formations, and the relationship of the present to the past

**Fall 2024: WMST UN3152**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3152	001/15077	M 12:10pm - 2:00pm	Zavier Nunn	4.00	12/18

754 Ext

Schmerhorn Hall

**WMST UN3311 FEMINIST THEORY. 4.00 points.**

Prerequisites: Feminist Texts I, or II, and the instructor's permission.

This course explores the formation of desire, sexuality, and subjectivity through the frameworks of feminist epistemologies (the question of what we can know) and feminist ethics (the question of how to be responsible within our relationships and local and global communities). We will reflect on the tension between the limits of what we can know about ourselves and others and the imperative to care for each other and remain accountable for our individual and collective actions and inaction. We will investigate how our deepest emotions, intimate encounters, and secret fantasies are formed by larger social and political contexts. In turn, we will also question how these intimate relationships with ourselves and our companions may be seen as feminist acts of resistance, disruption, and creation. Objective I: to closely engage diverse feminist perspectives in late-twentieth- and twenty-first-century phenomenology, existentialism, Marxism, queer theory, critical race theory, and psychoanalysis. Objective II: to begin to locate your own feminist perspective within the intersection of your unique experiences and the larger historical and social contexts that form you and which you may seek to transform

**Fall 2024: WMST UN3311**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3311	001/00575	T 12:10pm - 2:00pm 214 Milbank Hall	Rebecca Jordan-Young	4.00	17/18

**WMST BC3504 GENDERED CONTROVERSIES. 4.00 points.**

Love and sex have long been studied as historical constructs influenced by social, political, and economic dimensions. This course aims to expand this discourse by incorporating the often-overlooked lens of technological mediation. Beginning with the premise that romantic love is deeply shaped by the affordances of the technology of the time, a critical awareness of technological mediation in romance—especially of digital technologies, i.e. online dating, social media, or cybersex—allows for a deeper understanding of how social categories such as gender, race, class, ability, or sexuality are technologically-mediated, thereby informing our societal and cultural perceptions of love, dating, and sex. Sandra Moyano-Ariza is Term Assistant Professor of WGSS and Research Director at BCRW. Her research works at the intersection of pop culture, philosophy, and digital technologies, with interests in the fields of media studies and digital scholarship, contemporary feminist theory, critical race theory, posthumanism, and affect theory

**Fall 2024: WMST BC3504**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3504	001/00595	M 4:10pm - 6:00pm 308 Diana Center	Sandra Moyano-Ariza	4.00	24/24

**WMST UN3521 SENIOR SEMINAR I. 4.00 points.**

The Senior Seminar in Women's Studies offers you the opportunity to develop a capstone research paper by the end of the first semester of your senior year. Senior seminar essays take the form of a 25-page paper based on original research and characterized by an interdisciplinary approach to the study of women, sexuality, and/or gender. You must work with an individual advisor who has expertise in the area of your thesis and who can advise you on the specifics of method and content. Your grade for the semester will be determined by the instructor and the advisor. Students receiving a grade of B or higher in Senior Seminar I will be invited to register for Senior Seminar II by the Instructor and the Director of Undergraduate Studies. Senior Seminar II students will complete a senior thesis of 40-60 pages. Please note, the seminar is restricted to Columbia College and GS senior majors

Fall 2024: WMST UN3521

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3521	001/11745	W 12:10pm - 2:00pm 754 Ext Schermerhorn Hall	Jack Halberstam	4.00	7/10

**WMST UN3525 Senior Seminar I (Barnard). 4.00 points.**

Prerequisites: Permission of instructor. Enrollment limited to senior majors.

Student-designed capstone research projects offer practical lessons about how knowledge is produced, the relationship between knowledge and power, and the application of interdisciplinary feminist methodologies

Fall 2024: WMST UN3525

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3525	001/00576	Th 12:10pm - 2:00pm 202 Milbank Hall	Manijeh Moradian	4.00	7/20
WMST 3525	002/00836	W 4:10pm - 6:00pm 205 Barnard Hall	Jacqueline Orr	4.00	8/8

**WMST UN3915 GENDER, SEXUALITY & POWER IN TRANSNATIONAL PERSPECTIVES. 4.00 points.**

Enrollment limited to 15.

Prerequisites: Critical Approaches or the instructor's permission.

This course considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist and queer movements that have emerged to address contemporary gendered and sexual inequalities. Topics include political economy, global care chains, sexuality, sex work and trafficking, feminist and queer politics, and human rights. If it is a small world after all, how do forces of globalization shape and redefine the relationship between gender, sexuality, and powerful institutions like the state? And, if power swirls everywhere, how are transnational power dynamics reinscribed in gendered bodies? How is the body represented in discussions of nationalism and in the political economy of globalization? These questions will frame this course by highlighting how

gender, sexuality, and power coalesce to impact the lives of individuals in various spaces including workplaces, the academy, the home, religious institutions, the government, and civil society, and human rights organizations. This course will enable us to think transnationally, historically, and dynamically, using gender and sexuality as lenses through which to critique relations of power and the ways that power informs our everyday lives and subjectivities

Fall 2024: WMST UN3915

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3915	001/13512	W 2:10pm - 4:00pm 754 Ext Schermerhorn Hall	Tara Gonsalves	4.00	19/18

**WMST GU4000 GENEALOGIES OF FEMINISM. 4.00 points.**

Genealogies of Feminism: Course focuses on the development of a particular topic or issue in feminist, queer, and/or WGSS scholarship. Open to graduate students and advanced undergraduates, though priority will be given to students completing the ISSG graduate certificate. Topics differ by semester offered, and are reflected in the course subtitle. For a description of the current offering, please visit the link in the Class Notes

Fall 2024: WMST GU4000

Fall 2024: WMST W4308

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 4308	001/00594	W 10:10am - 12:00pm 502 Diana Center	Rebecca Jordan-Young	4.00	8/18

**WMST GU4336 GENDER AND SEXUALITY IN YIDDISH LITERATURE. 4.00 points.**

Early publications in Yiddish, a.k.a. the *mame loshn*, 'mother tongue,' were addressed to "women and men who are like women," while famous Yiddish writer, Sholem Aleichem, created a myth of "three founding fathers" of modern Yiddish literature, which eliminated the existence of Yiddish women writers. As these examples indicate, gender has played a significant role in Yiddish literary power dynamics. This course will explore representation of gender and sexuality in modern Yiddish literature and film in works created by Sholem Aleichem, Sholem Asch, Fradl Shtok, Sh. An-sky, Malka Lee, Anna Margolin, Celia Dropkin, Isaac Bashevis Singer, Kadya Molodowsky, Troim Katz Handler, and Irena Klepfisz. You will also acquire skills in academic research and digital presentation of the findings as part of the Mapping Yiddish New York project that is being created at Columbia. No knowledge of Yiddish required

**Fall 2024: WMST GU4336**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 4336	001/00556	T 4:10pm - 6:00pm 306 Milbank Hall	Agnieszka Legutko	4.00	9/20

**AFEN BC3815 SHANGE # DIGITAL STORYTELLING. 4.00 points.**

Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at: <http://bit.ly/ShangeWorlds>. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Women's Studies. Please note that this is a yearlong course; students who are accepted into this course will need to take its second half, AFEN BC3816, in the spring semester.

Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at: <https://bit.ly/AFEN3815>. A poet, performance artist, playwright and novelist, Shange's stylistic innovations in drama, poetry and fiction and attention to the untold lives of black women have made her an influential figure throughout American arts and in feminist history. We will examine Shange's works through the dual lenses of "embodied knowledge" and historical context. In conjunction with our multidisciplinary analysis of primary texts, students will be introduced to archival research in Ntozake Shange's personal archive at Barnard College. Thus the seminar provides an in-depth exploration of Shange's work and milieu as well as an introduction to digital tools, public research and archival practice. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Women's Studies. You can find more information and apply for the course at <https://bit.ly/AFEN3815>

**AFRS BC3021 Queer Caribbean Critique. 4.00 points.**

This seminar analyzes the different critical approaches to studying same-sex desire in the Caribbean region. The region's long history of indigenous genocide, colonialism, imperialism, and neo-liberalism, have made questions about "indigenous" and properly "local" forms of sexuality more complicated than in many other regions. In response, critics have worked to recover and account for local forms of same-sex sexuality and articulated their differences in critical and theoretical terms outside the language of "coming out" and LGBT identity politics. On the other hand, critics have emphasized how outside forces of colonialism, imperialism, and the globalization of LGBT politics have impacted and reshaped Caribbean same-sex desires and subjectivities. This course studies these various critical tendencies in the different contexts

of the Anglophone, Francophone, Hispanophone, and Dutch Caribbean

**ANTH UN3811 TOXIC. 4.00 points.**

It is no secret by now that we live in a toxic sea. Every day, in every place in this world, we are exposed to an unknown number of contaminants, including those in the places that we live, the air that we breathe, the foods that we eat, the water that we drink, the consumer products that we use, and in the social worlds that we navigate. While we are all exposed, the effects of these exposures are distributed in radically unequal patterns, and histories of racialization, coloniality, and gendered inequality are critical determinants of the risks to wellness that these toxic entanglements entail. Scientists use the term body burden to describe the accumulated, enduring amounts of harmful substances present in human bodies. In this course, we explore the global conditions that give rise to local body burdens, plumbing the history of toxicity as a category, the politics of toxic exposures, and the experience of toxic embodiment. Foregrounding uneven exposures and disproportionate effects, we ask how scientists and humanists, poets and political activists, have understood toxicity as a material and social phenomenon. We will turn our collective attention to the analysis of ethnographies, memoirs, maps, film, and photography, and students will also be charged with creating visual and narrative projects for representing body burden of their own

**CLEN UN3790 Caribbean Radicalisms in New York, 1890-1990. 4.00 points.**

New York City has been closely linked to the Caribbean from at least the seventeenth century. Presently, nearly 25% of its inhabitants are of Caribbean descent. In addition, according to a 2021 New York City Office of Immigrants report, five of the top countries of origin of the city's new immigrants were born in a Caribbean country: Dominican Republic (421,920, number 1), Jamaica (165,260, number 3), Guyana (136,180, number 4); Trinidad and Tobago (85,680, number 8), and Haiti (78,250, number 9). In addition, Puerto Ricans, who are colonial migrants, number 1.2 million or 9% of the city's population. During the late nineteenth and twentieth centuries, New York City was a pivotal space for Caribbean radical praxis understood here as political action and thought shaped by the Caribbean experiences of enslavement, coloniality, and diaspora. These interventions deeply transformed not only New York but multiple other contexts in Latin America, Africa,

and Europe, and a broad range of movements including anti-colonial, anti-racist, feminist, and queer. To better understand the impact of Caribbean radical figures and thought in New York and beyond, we will examine texts from a broad range of writers and thinkers, including Jesús Colón, Julia de Burgos, Hubert Harrison, Alexis June Jordan, Audre Lorde, José Martí, Malcolm X, Manuel Ramos Otero, Clemente Soto Vélez, and Arthur Schomburg

**CLGM UN3650 Mental health in Literature from antiquity to futurity. 3.00 points.**

This seminar explores the relationship between literature, culture, and mental health. It pays particular emphasis to the poetics of emotions structuring them around the five stages of grief: denial, anger, bargaining, depression, acceptance and the concept of hope. During the course of the semester, we will discuss a variety of content that explores issues of race, socioeconomic status, political beliefs, abilities/disabilities, gender expressions, sexualities, and stages of life as they are connected to mental illness and healing. Emotions are anchored in the physical body through the way in which our bodily sensors help us understand the reality that we live in. By feeling backwards and thinking forwards, we will ask a number of important questions relating to literature and mental health, and will trace how human experiences are first made into language, then into science, and finally into action. The course surveys texts from Homer, Ovid, Aeschylus and Sophocles to Virginia Woolf, Sylvia Plath, C.P. Cavafy, Dinos Christianopoulos, Margarita Karapanou, Katerina Anghelaki-Rooke, Katerina Gogou etc., and the work of artists such as Toshio Matsumoto, Yorgos Lanthimos, and Anohni

**ENGL UN2200 Out of the Ordinary: Aesthetics, Power, Bodies. 3.00 points.**

This course examines twentieth-century literature, film, and music in order to explore the many and complex ways that beauty, power, and bodily identity co-articulate experiences that lie beyond the ordinary. Reading novels, essays, and poetry alongside musical interludes, we will think about bodies, power, and beauty together. This class explores the wide beyond, the other side of the everyday, the hum of being that can be discerned only in certain musical performances, the terror and pleasure that course through certain works of fiction, and the fragmented self that fails to cohere in extraordinary acts of memoir. From these pieces and unfinished conversations, we intend to collaboratively develop fresh insights on the nature of beauty and identity under increasingly draconian and profit-driven forms of knowledge and power

**Fall 2024: ENGL UN2200**

**ENGL UN3477 New Suns: Worlding in Black Speculative Fiction. 4.00 points.**

This course takes Octavia E. Butler's enigmatic expression, "There's nothing new under the sun, but there are new suns" as a guide for exploring the politics of Black speculative fiction, science fiction, and fantasy. With literary, sonic, visual, and cinematic examples, including works from Pauline Hopkins, W.E.B. DuBois, Samuel Delany, Wangechi Mutu, Janelle Monae, Sun Ra, Saul Williams, and others, this class considers the contexts of possibility for re/imagining Black pasts, presents and futures. Paying particular attention to how Black speculative fiction creates new worlds, social orders, and entanglements, students will develop readings informed by ecocriticism, science and technology studies, feminist, and queer studies. We will consider the multiple meanings and various uses of speculation and worlding as we encounter and interpret forms of utopian, dystopian, and (post)apocalyptic thinking and practice. No prerequisites

**Fall 2024: ENGL UN3477**

**ENGL GU4462 Gender and Resistance in Early Modern Literature. 4.00 points.**

This class will focus on early modern literature's fascination with the relationship between women, gender, and political resistance in the early modern period. The works we will read together engage many of the key political analogies of the

period, including those between the household and the state, the marital and the social contract, and rape and tyranny. These texts also present multiple forms of resistance to gendered repression and subordination, and reimagine sexual, social, and political relationships in new and creative ways. Readings will include key classical and biblical intertexts, witchcraft and murder pamphlets, domestic conduct books, defenses of women, poetry (by William Shakespeare, Aemilia Lanyer and Lucy Hutchinson), drama (*Othello*, *The Winter's Tale*, and *Gallathea*), and fiction (by Margaret Cavendish). The class will also include visits to The Morgan Library, Columbia's Rare Book and Manuscript Library, and The Metropolitan Museum of Art

**FILM GU4940 QUEER CINEMA. 3.00 points.**

This course examines themes and changes in the (self-)representation of lesbians, gay men, bisexuals, and transgender people in cinema from the early sound period to the present. It pays attention to both the formal qualities of film and filmmakers' use of cinematic strategies (*mise-en-scene*, editing, etc.) designed to elicit certain responses in viewers and to the distinctive possibilities and constraints of the classical Hollywood studio system, independent film, avant-garde cinema, and world cinema; the impact of various regimes of formal and informal censorship; the role of queer men and women as screenwriters, directors, actors, and designers; and the competing visions of gay, progay, and antigay filmmakers. Along with considering the formal properties of film and the historical forces that shaped it, the course explores what cultural analysts can learn from film. How can we treat film as evidence in historical analysis? We will consider the films we see as evidence that may shed new light on historical problems and periodization, and will also use the films to engage with recent queer theoretical work on queer subjectivity, affect, and culture

**Fall 2024: FILM GU4940**

**FREN GU4022 How to Love: Medieval French and Arabic. 3.00 points.**

How did people conceive of and talk about love on either side of the Pyrenees? This course will explore the many faces of desire in medieval French, Occitan, Arabic, Hebrew and Romance (proto-Spanish) literature to ask a broader question: what would be our understanding of lyric poetry, often taken to originate with the troubadours, if we incorporated the poems and songs of Al-Andalus? After anchoring ourselves in history, we will survey the major events and trends that attended the

emergence of new poetic and musical forms both in Andalusia and in France between the 8th and the 14th centuries. We will study how these works were composed, read, performed, and transmitted. Weekly readings will combine scholarship with primary texts exploring the many facets of erotic experience: from sexual contact to love from afar, love as madness, love mediated by birds, rejection of marriage, gender fluidity and queerness. We will also think about the literary forms in which these themes are expressed, including dawn songs, bilingual love poems, treatises on achieving female orgasm, conduct manuals, and hybrid texts combining prose and verse. Translations will be provided for most material, but reading knowledge of modern French is required

**GERM GU4350 GERMAN FILM AFTER 1945. 3.00 points.**

This introduction to German film since 1945 (in its European contexts) deploys a focus on feelings as a lens for multifaceted, intersectional investigations of cinematic history. We will explore how feelings have been gendered and racialized; how they overlap with matters of sex (as closely associated with political revolt in Western Europe, while considered too private for public articulation in the socialist East, especially when queer); and how they foreground matters of nation and trauma (for example via the notions of German 'coldness' and inability to mourn the Holocaust). Simultaneously, the focus on feelings highlights questions of mediality (cinema as a prototypically affective medium?), genre and avant-garde aesthetics: in many films, 'high-affect' Hollywood cinema intriguingly meets 'cold' cinematic modernism. In pursuing these investigative vectors through theoretical readings and close film analysis, the course connects affect, gender, queer, and cultural studies approaches with cinema studies methodologies. The films to be discussed span postwar and New German Cinema, East German DEFA productions, the 'Berlin School' of the 2000s, and contemporary transnational cinema

**HIST UN2523 HEALTH INEQUALITY: MODERN US. 4.00 points.**

Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics since the turn of the twentieth century. Topics to be examined will include, but will not be limited to, black women's health organization and care; HIV/AIDS politics, policy, and community response; benign neglect; urban renewal and gentrification; medical abuses and the legacy of Tuskegee;

tuberculosis control; and environmental justice. There are no required qualifications for enrollment, although students will find the material more accessible if they have had previous coursework experience in United States history, pre-health professional (pre-med, pre-nursing, or pre-public health), African-American Studies, Women and Gender Studies, Ethnic Studies, or American Studies

**RELI UN3517 Queer Theory, Religion, and Their Discontents. 3.00 points.**

For the most part queer studies and religious studies have met each other with great suspicion and little interest in the conceptual resources of the respectively other field. Our guiding questions will be: What does religion have to do with queerness? What does queerness have to do with religion?

Queer theory and activists, unless they already identify as religious, often have little or little good to say about religion. Conversely, many religious traditions intensively regulate gender, sex, sexuality, and especially queerness. This course will explore how religious studies can enrich queer theory and how queer theory can reshape our thinking about religious studies. But beyond the mutual disinterest, anxieties, and animosities, queer studies and religious studies share actually a whole range of core interests and questions, such as embodiment, sexuality, gender-variability, coloniality, race appearing as religious identity and religious identity as gendered, as well as the role of catastrophe, utopia, and redemption in our experience of the world. We will examine questions about religion come to the fore when we paying especially attention to queerness, gender, sexuality, pleasure, pain, and desire. Equally, we will examine how queer discourses mobilize religious and theological images and ideas, especially where these images and ideas are no longer clearly recognizable as having religious origins. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to gender, sexuality, desire, and embodiment in our everyday lives and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should experience this course as enlarging the set of critical tools at their hands for creative and rigorous thinking

**RELI GU4565 Women and Islam. 4.00 points.**

This course is a comprehensive engagement with Islamic perspectives on women with a specific focus on the debates about woman's role and status in Muslim societies. Students will learn how historical, religious, socio-economic and political factors influence the lives and experiences of Muslim women. A variety of source materials (the foundational texts of Islam, historical and ethnographic accounts, women's and gender studies scholarship) will serve as the framework for lectures. Students will be introduced to women's religious lives and a variety of women's issues as they are reported and represented in the works written by women themselves and scholars chronicling women's religious experiences. We will begin with an overview of the history and context of the emergence of Islam from a gendered perspective. We will explore differing interpretations of the core Islamic texts concerning women, and the relationship between men and women: who speaks about and for women in Islam? In the second part of the course we will discuss women's religious experiences in different parts of the Muslim world. Students will examine the interrelationship between women and religion with special emphasis on the ways in which the practices of

religion in women's daily lives impact contemporary societies. All readings will be in English. Prior course work in Islam or women's studies is recommended, but not required

**WMST UN3155 Global Histories of the Trans Present. 3.00 points.**

Are trans people new? Is sex binary? Can sex change? These questions and their precedents have monopolized gendered politics and have taken on global significance in recent years. Following Foucault's formulation of a history of the present—a genealogy of how we got here—this course is a history of the trans present in that it charts the ways in which sex and gender have been ontologized across borders and contexts, often in ways which regulate and police bodies within borders. It historicises the divisive discourses that animate present day politics, showing that sexual dimorphism's legitimacy has been continually contested in different ways and from different standpoints for centuries, and that arguing for or against the universality of sex/gender is a move that people across left/right and liberal/illiberal political lines have historically made. The path towards trans' contemporary inception is not only uneven, including many discontinuities as well as continuities. It is

also global and disturbing, requiring the violence of empire, eugenics, and slavery to cleave sexual dimorphism into two, whose "binary logic" trans then seeks to muddy and muddle—in ways which sometimes yield to ideas of what sex and gender "really are". Trans people do have a history. And it is longer than transphobes would like us to believe. But it is not a pleasant or necessarily radical history. It is also not solely the history of people who are trans. Rather, this history is plural and fractious, and is a history of everyone who has ever existed in a world where gender and sex are operating concepts

**WMST UN3514 HIST APPROACHES TO FEM QUESTNS. 4.00 points.**

This course will provide students with a comparative perspective on gender, race, and sexuality by illuminating historically specific and culturally distinct conditions in which these systems of power have operated. Beginning in the early modern period, the course seeks to destabilize contemporary notions of gender and sexuality and instead probe how race, sexuality, and gender have functioned as mechanisms of differentiation embedded in historically contingent processes. Moving from "Caliban to Comstock," students will probe historical methods for investigating and critically evaluating claims about the past. In making these inquiries, the course will pay attention to the intersectional nature of race, gender, and sexuality and to strategic performances of identity by marginalized groups. This semester, we will engage research by historians of sexuality, gender, and capitalism to critically reflect on the relationship between critical studies of the past and debates about reproductive justice, bodily autonomy, and gay and lesbian rights in our contemporary moment

**WMST GU4220 Bodies of Transformation. 4.00 points.**

Engaging trans studies, disability studies, histories of science, ecocriticism, posthumanism, queer and postcolonial theory, this class contends with how bodies and bodies of knowledge change over time. Bodies of Transformation takes a historiographic approach to the social, political, and cultural underpinnings of corporeal meaning, practice and performance in the 19th and 20th centuries. Animating questions include: what is the corporeal real? how does bodily transformation map the complex relationships between coercion and choice? how might one approach nonhuman interiority?

**WMST GU4325 Embodiment and Bodily Difference. 4 points.**

At once material and symbolic, our bodies exist at the intersection of multiple competing discourses, including the juridical, the techno-scientific, and the biopolitical. In this course, we will draw upon a variety of critical interdisciplinary literatures—including feminist and queer studies, science and technology studies, and disability studies—to consider some of

the ways in which the body is constituted by such discourses, and itself serves as the substratum for social relations. Among the key questions we will consider are the following: What is natural about the body? How are distinctions made between presumptively normal and pathological bodies, and between psychic and somatic experiences? How do historical and political-economic forces shape the perception and meaning of bodily difference? And most crucially: how do bodies that are multiply constituted by competing logics of gender, race, nation, and ability offer up resistance to these and other categorizations?

**ANTH UN3465 WOMEN, GENDER POL-MUSLIM WORLD. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Practices like veiling, gendered forms of segregation, and the honor code that are central to Western images of Muslim women are also contested issues throughout the Muslim world. This course examines debates about gender, sexuality, and morality and explores the interplay of political, social, and economic factors in shaping the lives of men and women across the Muslim world, from the Middle East to Europe. The perspective will be primarily anthropological, although special attention will be paid to historical processes associated with colonialism and nation-building that are crucial to understanding present gender politics. We will focus on the sexual politics of everyday life in specific locales and explore the extent to which these are shaped by these histories and the power of representations mobilized in a global world in the present and international political interventions. In addition to reading ethnographic works about particular communities, we read memoirs and critical analyses of the local and transnational activist movements that have emerged to address various aspects of gender politics and rights

**MUSI UN2500 WOMEN AND MUSIC. 3.00 points.**

This course explores the relationship between women, music, and performance from a thematic and a cross-cultural perspective. Through the analysis of different case studies, we will investigate different topics from the perspective of ethnomusicology, cultural anthropology, and performance studies. A number of critical questions we will consider include: how does a particular gender ideology constructs and is constructed by musical aesthetics? What are some of the critical roles for women in performance? What is the significance of

gender in performances? What does it mean for women to have have and to be the voice? And how is a musical performance bound up with emotions?

**Spring 2025: MUSI UN2500**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
MUSI 2500	001/11761	M W 8:40am - 9:55am 622 Dodge Building	Alessandra Ciucci	3.00	10/24
MUSI 2500	AU1/20315	M W 8:40am - 9:55am Othr Other	Alessandra Ciucci	3.00	3/3

**SOCI GU4049 Workshop in Gender and Sexuality II. 2.00 points.**

The Gender/Sexuality Workshop is a forum for Ph.D. students interested in social science topics broadly related to gender and sexuality. In particular, it will provide an opportunity for students share and refine their own works in progress by getting feedback from other students in the workshop. The workshop is geared towards students conducting empirical work, from ethnographies and interview-based projects to archival research to other kinds of critical quantitative work that attempts to theorize gender/sexuality. We will take an expansive view of gender and sexuality as a mode of classifying people and a structure that organizes social life, including work that uses gender/sexuality as a lens to interrogate other social structures such as empire, capitalism, science and knowledge, states and governance, and more. The G/S Workshop will meet biweekly (every other week) over the course of Spring 2025

**Spring 2025: SOCI GU4049**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOCI 4049	001/11475	Th 2:10pm - 4:00pm 754 Ext Schermerhorn Hall	Tara Gonsalves	2.00	7/20

**WMST BC1050 WOMEN AND HEALTH. 3.00 points.**

Combines critical feminist and anti-racist analyses of medicine with current research in epidemiology and biomedicine to understand health and health disparities as co-produced by social systems and biology

**Spring 2025: WMST BC1050**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 1050	001/00024	M W 1:10pm - 2:25pm LI002 Milstein Center	Cecelia Lie-Spahn	3.00	85/90

**WMST BC2140 Critical Approaches in Social and Cultural Theory. 3.00 points.**

This course examines the conceptual foundations that support feminist and queer analyses of racial capitalism, security and incarceration, the politics of life and health, and colonial and postcolonial studies, among others. Open to all students; required for the major in Women's, Gender, and Sexuality Studies (WGSS) and the Interdisciplinary Concentration or Minor in Race and Ethnicity (ICORE/MORE)

**Fall 2024: WMST BC2140**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 2140	001/00135	M 2:10pm - 4:00pm LI001 Milstein Center	Alexander Pittman	3.00	28/35

**Spring 2025: WMST BC2140**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 2140	001/00021	F 2:10pm - 4:00pm LI001 Milstein Center	Alexander Pittman	3.00	26/35

**WMST BC2150 INTERSECTIONAL FEMINISMS. 3.00 points.**

Enrollment for this class is by instructor approval and an application is required. Please fill out the form here: <https://forms.gle/bPsV7rcf5RWB35PM9> This introductory course for the Interdisciplinary Concentration or Minor in Race and Ethnicity (ICORE/MORE) as well as Majors/Minors in Women's, Gender, and Sexuality Studies (WGSS) is open to all students. We focus on the critical study of social difference as an interdisciplinary practice, using texts with diverse modes of argumentation and evidence to analyze social differences as fundamentally entangled and co-produced. Because of the interdisciplinary nature of this course, the professor will frequently be joined by other faculty and guest speakers who bring distinct disciplinary and subject matter expertise. Some keywords for this course include hybridity, diaspora, borderlands, migration, and intersectionality

**Fall 2024: WMST BC2150**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 2150	001/00022	T 10:10am - 11:25am 504 Diana Center	Manijeh Moradian	3.00	47/55

WMST 2150	001/00427	T 4:10pm - 5:25pm 405 Milbank Hall	Renee Hill	3.00	52/70

**WMST BC3138 AFFECT AND ACTIVISM. 4.00 points.**

From love to anger to disappointment to hope, political activism mobilizes emotions towards certain ends but also generates new affective states and feelings along the way. This advanced seminar will familiarize students with feminist, anti-racist and queer scholarship on affect, feelings and emotion as intrinsic to politics and as crucial for understanding how political thought and action unfold in contingent and often unexpected ways. Mixing theoretical and cultural texts with case studies, we will look at how affect permeates structures of power and domination, embodiment and identity, and collective activist projects concerned with gender and sexual liberation. Students will have an opportunity to read theories of affect as well as to "read" activist movements for affect by working with archival documents (such as zines, manifestos, and movement ephemera) and other primary sources (such as memoir, photography and documentary film)

**Spring 2025: WMST BC3138**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WMST 3138	001/00022	T 12:10pm - 2:00pm 318 Milbank Hall	Manijeh Moradian	4.00	14/14

**WMST BC3315 ART, RESEARCH, STORY. 4.00 points.**

Art, Research, Story draws on a range of materials from the social sciences, the visual arts, social theory, history, and digital media to ask three interrelated questions: • What can we learn from exploring—and disrupting—the borders between creativity and social research? Between making ‘art’ and understanding social structure, politics, or history? • How does the way we tell a story also shape what that story tells? How is what we learn from a story partly about the form that the story takes? • What methods can feminist researchers and artists use to both analyze society, and move us to want to change society and ourselves? The class will create a space of study, experiment, and (serious!) play that allows us to engage these questions, while also discovering new questions that emerge from our collective conversations. The syllabus offers many resources to inspire us: scholarly writings, digital art, live performance, poetry, graphic novels, hip hop, and photography. But our most valuable resource is our own collective curiosity and engagement, which we will use to understand the burgeoning transdisciplinary field of arts-based research practices

**WMST BC3512 Art/Work: Sex, Aesthetics, and Capitalism. 4 points.**

How can performances, theatrical texts, and other art/media objects illuminate the operations of gender, sexuality, and race in global capitalism? Drawing from a range of artistic media and critical traditions, we explore how aesthetic thought can help us analyze the sexual, racial, and national character of contemporary labor and life.

**WMST GU4330 SWANA Diasporas: Culture, Politics and Identity Formation in a Time of War. 4.00 points.**

In this class we will study South-West Asian and North African (SWANA) diasporic populations, social movements and cultural production that have responded to the multi-faceted ramifications of the 21st century war on terror. We will focus on diverse Arab, Iranian, and Afghan diasporas in the United States, where 19th and 20th century legacies of racism, xenophobia, Islamophobia and Orientalism combined in new ways to target these groups after the September 11th, 2001 attacks. Drawing on an interdisciplinary array of texts, including ethnography, fiction, feminist and queer theory, social movement theory, and visual and performance art, we will look at how the “war on terror” has shaped the subjectivities and self-representation of SWANA communities. Crucially, we will examine the gender and sexual politics of Islamophobia and racism and study how scholars, activists and artists have sought to intervene in dominant narratives of deviance, threat, and backwardness attributed to Muslim and other SWANA populations. This course takes up the politics of naming, situating the formation of “SWANA” as part of an anti-colonial

genealogy that rejects imperial geographies such as “Middle East.” We will ask how new geographies and affiliations come into being in the context of open-ended war, and what new political identities and forms of cultural production then become possible
