# ACADEMIC CALENDAR

**Columbia College reserves the right to revise or amend this academic calendar, in whole or in part, at any time. Registration and Change of Program periods listed here may be tentative, and students should read all email messages from the Registrar's Office or consult their advising dean in the Berick Center for Student Advising to confirm the most current deadlines. Updated calendar information is also available from the Registrar's Office.**

*Please note that classes and exams missed for travel are not excused.* Travel plans should be scheduled for dates that fall on holidays, on weekends, or after final exams. Students should wait to confirm travel plans until the beginning of the semester when they have confirmed their weekly course schedule (including discussion sections and labs) and their final exam schedule.

## LATE SUMMER DATES AND DEADLINES RELATED TO THE FALL 2024 TERM

August	1	Thursday. Last day for new students entering in Fall 2024 to submit vaccination documentation for measles, mumps, and rubella and to certify meningitis decision via the Columbia Health Patient Portal (secure.health.columbia.edu). Vaccination documentation is due 30 days prior to registration; students are not permitted to register for classes until their submission is reviewed and processed.
	5-9	Monday–Friday. Online registration for Fall 2024 via Student Services Online (SSOL) appointment times: continuing students only.
	12-16	Monday–Friday. Online registration for Fall 2024 via Student Services Online (SSOL) appointment times: continuing students only.
	20-22	Tuesday–Thursday. Online registration for Fall 2024 via Student Services Online (SSOL) appointment times: continuing students only.
	26	Monday. New Student Orientation Program begins for new students entering in Fall 2024.

	30	Friday. Online registration for Fall 2024 via Student Services Online (SSOL) appointment times: entering first-year students only.
	31	Saturday. Fall 2024 online registration for all College students via Student Services Online (SSOL) appointment; all students.
September	1	Sunday. Last day to apply or reapply for the B.A. degree to be awarded in October 2024. Applications received after this date are automatically applied to the next conferral date in February 2025.
	2	<b>Monday. Labor Day. University Holiday.</b>

## FALL TERM 2024

September	3	<b>Tuesday. Classes begin for the 271st academic year.</b> Classes follow a normal Tuesday class schedule.
	3-13	Weekdays only. Fall 2024 Change of Program period by online appointment via Student Services Online (SSOL): all students.
	4	Wednesday. Last day for new Fall 2024 students to submit Student Health History form using the Columbia Health Portal.
	6; 9	Friday; Monday. Deferred examination dates.
	13	Friday. End of Change of Program period. Students must be registered for a minimum of 12 points. Last day to add courses. Last day to drop a Core Curriculum course. Last day to uncover grade for Spring or Summer 2024 course taken Pass/D/Fail.
	15	Sunday. Soft deadline to submit a waiver request from the Columbia Student Health Insurance Plan.
	16–October 8	Weekdays only. "Post Change of Program Add/Drop period" by online appointment via Student Services Online (SSOL). All students can drop courses during this period directly through SSOL. Students can add courses during this period only with permission from an instructor and the Committee on Academic Standing.

	30	Monday. Last day to confirm enrollment, enroll dependents, or request a waiver from the Columbia Student Health Insurance Plan.
October	8	Tuesday. Last day for students to drop Fall courses via Student Services (SSOL). Last day to declare R credit for an individual course.
	16	Wednesday. Award of October degrees.
	17	Thursday. Midterm Date.
November	1	Friday. Last day to apply or reapply for the B.A. degree to be awarded in February 2025. Applications received after this date are automatically applied to the next conferral date of May 2025.
	4	<b>Monday. Academic holiday. No classes held. Administrative offices open.</b>
	5	<b>Tuesday. Election Day. University holiday.</b>
	18-22	Monday–Friday. Online registration for Spring 2025 via Student Services Online (SSOL) appointment: continuing students only.
	27	<b>Wednesday. Academic holiday. No classes held. Administrative offices open.</b>
	28-29	<b>Thursday–Friday. Thanksgiving. University holidays.</b>
December	1	Sunday. Last day to apply or reapply for the B.A. degree to be awarded in May 2025. Applications received after this date are automatically applied to the next conferral date of June 2024.
	2	Monday. Last day to withdraw from an individual course and receive a notation of "W" on the transcript in place of a letter grade.
	9-13	Monday-Friday. Online registration for Spring 2025 courses via Student Services Online (SSOL) appointment: all students.
	9	Monday. Last day of classes. The last day to change a regular course to a Pass/D/Fail course or a Pass/D/Fail course to a regular course.

	11	Wednesday. Last day for new Spring 2025 students to submit vaccination documentation for measles, mumps, and rubella, and to certify meningitis decision online via the Columbia Health Patient Portal ( <a href="https://secure.health.columbia.edu">secure.health.columbia.edu</a> ) Vaccination documentation is due 30 days prior to registration; students are not permitted to register for classes until their documentation is received and processed.
	10-12	Tuesday–Thursday. Study days.
	13–20	Friday–Friday. Final examinations.
	20	Friday. Fall term ends.
		<b>Friday, December 20, 2024–Friday, January 17, 2025. Winter holidays.</b>

## SPRING TERM 2025

January	6	Monday. Last day for new Spring 2025 students to submit Student Health History form using the Columbia Health Patient Portal.
	7-17	Weekdays only. Online registration for Spring 2025 via Student Services Online (SSOL) appointment: all students.
	20	<b>Monday. Martin Luther King, Jr. Day. University holiday.</b>
	21	<b>Tuesday. Classes begin. Classes follow a normal Tuesday class schedule.</b>
	21-31	Weekdays only. Change of Program period by online appointment via Student Services Online (SSOL); all students.
	24; 27	Friday; Monday. Deferred examination dates.
	31	Friday. End of Change of Program period. Students must be registered for a minimum of 12 points. Last day to add Spring courses. Last day to drop a Core Curriculum course. Last day to uncover letter grade for Fall 2024 course taken Pass/D/Fail.
February	1	Saturday. Soft deadline to submit a waiver request from the Columbia Student Health Insurance Plan for Spring 2025 new incoming students.
	12	Wednesday. Award of February 2025 degrees.
	15	Saturday. Last day for new Spring 2025 students to confirm, enroll dependents, or submit a request for a waiver from the Columbia Student Health Insurance Plan.

	25	Tuesday. Last day for students to drop courses via Student Services (SSOL). Last day to declare R credit for an individual course.
March	10	Monday. Midterm date.
	11-14	Tuesday-Friday. Major Declaration.
	17-21	<b>Monday–Friday. Spring recess.</b>
April	15-22	Weekdays only. Online registration for Fall 2025 via Student Services Online (SSOL) appointment: continuing students only.
	28	Monday. Last day to withdraw from an individual course and receive a notation of "W" on the transcript in place of a letter grade.

	6-9	Tuesday-Friday. Study days.
	9-16	Friday–Friday. Final examinations.
	TBA	Deadline for continuing students to apply for financial aid for 2025-2026.
	16	End of Spring 2025 term.
	20	Tuesday. Columbia College Class Day exercises.
	21	Wednesday. Commencement.

## SUMMER DATES AND DEADLINES RELATED TO THE FALL 2025 TERM – TO BE POSTED

# THE ADMINISTRATION AND FACULTY OF COLUMBIA COLLEGE

## **Katrina Armstrong, M.D.**

*Interim President of the University*

## **Angela V. Olinto, Ph.D.**

*Provost of the University*

## **Amy Hungerford, Ph.D.**

*Executive Vice President for Arts and Sciences and Dean of the Faculty of Arts and Sciences*

## **Josef Sorett, Ph.D.**

*Dean of Columbia College and Vice President for Undergraduate Education*

## UNIVERSITY PROFESSORS

### **Richard Axel**

B.A., Columbia University, 1967; M.D., Johns Hopkins University, 1970

### **Jagdish Bhagwati**

B.Com., Bombay University (India), 1954; M.A., University of Cambridge, 1956; Ph.D., Massachusetts Institute of Technology, 1967

### **Martin Chalfie**

A.B., Harvard University, 1969; Ph.D., 1976

### **Ruth S. DeFries**

B.A., Washington University in St. Louis, 1976; Ph.D., Johns Hopkins University, 1980

### **Michael W. Doyle**

A.B., Harvard University, 1970; Ph.D., 1977

### **Nabila El-Bassel**

B.S.W., Tel Aviv University (Israel), 1980; M.S.W., Hebrew University of Jerusalem (Israel), 1983; Ph.D., Columbia University, 1989

### **Wafaa El-Sadr**

M.D., Cairo University (Egypt), 1974; M.P.H., Columbia University, 1991; M.P.A., Harvard University, 1996

### **Saidiya V. Hartman**

B.A., Wesleyan University, 1984; Ph.D., Yale University, 1992

## **Wayne A. Hendrickson**

B.A., University of Wisconsin-River Falls, 1963; Ph.D., Johns Hopkins University, 1968

## **Eric R. Kandel (*emeritus*)**

A.B., Harvard University, 1952; M.D., New York University, 1956

## **Rosalind E. Krauss**

A.B., Wellesley College, 1962; A.M., Harvard University, 1964; Ph.D., 1968

## **Jeffrey D. Sachs**

A.B., Harvard University, 1976; A.M., 1978; Ph.D., 1980

## **Simon Schama**

B.A., University of Cambridge, 1966; M.A., 1969

## **Gayatri Chakravorty Spivak**

B.A., University of Calcutta (India), 1959; M.A., Cornell University, 1962; Ph.D., 1967

## **Joseph Stiglitz**

B.A., Amherst College, 1964; Ph.D., Massachusetts Institute of Technology, 1967; M.A., University of Oxford 1976

## **Gordana Vunjak-Novakovic**

Ph.D., University of Belgrade, 1980

## FACULTY A-Z LISTING

### A

#### **Ryan P. Abernathey**

*Associate Professor of Earth and Environmental Sciences*  
B.A., Middlebury College, 2004; Ph.D., Massachusetts Institute of Technology, 2012

#### **Ishmail Abdus-Saboor**

*Associate Professor of Biological Sciences*  
B.S., North Carolina A&T University, 2006; Ph.D., University of Pennsylvania, 2012

#### **Lee B. Abraham**

*Senior Lecturer in Latin American and Iberian Cultures*  
B.A., Temple University, 1993; M.A., Arizona State University, 1996; Ph.D., University of New Mexico, 2001

#### **Knar Abrahamyan**

*Assistant Professor of Music*  
B.A., Lee University, 2012; B.M., 2012; M.M., 2013; M.M., Indiana University, 2015; Ph.D., Yale University, 2022

#### **Joshua Abrams**

*Lecturer in the Discipline of Biological Sciences*  
B.S., North Carolina State University, 2005; Ph.D., University of Pennsylvania, 2013

#### **Ouijdane Absi**

*Lecturer in Middle Eastern, South Asian, and African Studies*  
B.A., Paris-IV La Sorbonne University, 2001; M.A., 2002

**Lila Abu-Lughod***Joseph L. Battenwieser Professor of Social Science*

B.A., Carleton University (Canada), 1974; A.M., Harvard University, 1978; Ph.D., 1984

**James Eli Adams***Professor of English and Comparative Literature*

B.S., Massachusetts Institute of Technology, 1977; B.A., University of Oxford, 1979; M.A., Cornell University, 1983; Ph.D., 1987

**Rachel E. Adams***Professor of English and Comparative Literature*

B.A., University of California, Berkeley, 1990; M.A., University of Michigan, 1992; Ph.D., University of California, Santa Barbara, 1997

**Hassan Afrouzi Khosroshahi***Assistant Professor of Economics*

B.S., Sharif University of Technology (Iran), 2011; M.S., University of Texas at Austin, 2013; Ph.D., 2017

**Vanessa Agard-Jones***Assistant Professor of Anthropology*

B.A., Yale University, 2000; M.A., Columbia University, 2006; Ph.D., New York University, 2013

**Amol Aggarwal***Associate Professor of Mathematics*

S.B., Massachusetts Institute of Technology, 2015; Ph.D., Harvard University, 2020

**Marcel A. Agüeros***Professor of Astronomy*

B.A., Columbia University, 1996; M.Phil., University of Cambridge, 1998; M.S., University of Washington, 2002; Ph.D., 2006

**Francisca Aguiló Mora***Senior Lecturer in Spanish*

B.A., University of Barcelona, 2002; M.A., University of the Balearic Islands (Spain), 2009; Ph.D., University of Miami, 2016

**Aftab Ahmad***Senior Lecturer in Middle Eastern, South Asian, and African Studies*

B.A., Aligarh Muslim University (India), 1990; M.A., Jawahar Lal Nehru University (India), 1993; M.Phil., 1996; Ph.D., 2000

**May E. Ahmar***Senior Lecturer in Middle Eastern, South Asian, and African Studies*

B.A., American University of Beirut, 1995; M.A., 2001

**Manan Ahmed***Associate Professor of History*

B.Sc., University of Punjab (Pakistan), 1991; B.A., Miami University, 1997; Ph.D., University of Chicago, 2008

**Allison Aitken***Assistant Professor of Philosophy*

A.B., Harvard University, 2013; Ph.D., 2020

**Joseph Albernaz***Assistant Professor of English and Comparative Literature*

B.A., University of North Carolina at Chapel Hill, 2012; Ph.D., University of California, Berkeley, 2018

**David Z. Albert***Frederick E. Woodbridge Professor of Philosophy*

B.S., Columbia University, 1976; Ph.D., Rockefeller University, 1981

**Zeynep Çelik Alexander***Associate Professor of Art History and Archaeology*

Ph.D., Massachusetts Institute of Technology, 2007

**Genevera Allen***Professor of Statistics*

B.A., Rice University, 2006; Ph.D., Stanford University, 2010

**Jafari S. Allen***Professor of African American and African Diaspora Studies*

B.A., New York University, 1998; M.A., Columbia University, 2001; M.Phil., 2002; Ph.D., 2003

**Peter K. Allen***Professor of Computer Science*

B.A., Brown University, 1971; M.A., University of Oregon, 1976; Ph.D., University of Pennsylvania, 1985

**Douglas V. Almond***Professor of Economics and of International and Public Affairs*

B.A., Carleton University, 1993; Ph.D., University of California, Berkeley, 2002

**Muhsin Jassim Al-Musawi***Professor of Middle Eastern, South Asian, and African Studies*

B.A., University of Baghdad, 1966; M.A., Dalhousie University (Canada), 1975; Ph.D., 1978

**Carlos J. Alonso***Morris A. and Alma Schapiro Professor in the Humanities*

B.A., Cornell University, 1975; M.A., Yale University, 1977; Ph.D., 1983

**Irasema Alonso***Lecturer in Economics*

B.A., Universidad Complutense de Madrid (Spain), 1981; M.A., Universitat Autònoma de Barcelona (Spain), 1986; Ph.D., University of Minnesota, 1992

**Isabel Huacuja Alonso***Assistant Professor of Middle Eastern, South Asian and African Studies*

B.A., Cornell University, 2005; M.A., University of Texas at Austin, 2009; Ph.D., 2015

**Irene Alonso-Aparicio**

*Senior Lecturer in Spanish, Latin American and Iberian Cultures*

B.A., University of Granada (Spain), 2001; M.A., Open University of Spain, 2005; Ph.D., University of Granada (Spain) and University of Aachen (Germany), 2011

#### **Hilton Als**

*Associate Professor of Writing in the Faculty of the Arts*

#### **Maria Jose Alves De Abreu**

*Associate Professor of Anthropology*

B.A., University of Coimbra (Portugal), 1998; M.A., SOAS, University of London, 1999; Ph.D., University of Amsterdam, 2009

#### **Tarik Amar**

*Associate Professor of History*

B.A., University of Oxford, 1995; M.Sc., London School of Economics, 1997; Ph.D., Princeton University, 2006

#### **Dima Amso**

*Professor of Psychology*

B.S., Tufts University, 1999; Ph.D., New York University, 2005

#### **Mark M. Anderson**

*Professor of Germanic Languages*

B.A., Wesleyan University, 1978; M.A., Johns Hopkins University, 1981, 1982; Ph.D., 1985

#### **Peter Andolfatto**

*Professor of Biological Sciences*

B.Sc., Simon Fraser University (Canada), 1992; Ph.D., University of Chicago, 1999

#### **Alexandr Andoni**

*Associate Professor of Computer Science*

B.S., Massachusetts Institute of Technology, 2004; M.Eng., 2005; Ph.D., 2009

#### **Stefan Andriopoulos**

*Professor of Germanic Languages*

B.A., University of Regensburg (Germany), 1990; M.A., University of Hamburg, 1994; Ph.D., 1998

#### **Gil Anidjar**

*Professor of Religion*

B.A., Hebrew University of Jerusalem, 1988; M.A., Graduate Theological Union, 1994; Ph.D., University of California, Berkeley, 1998

#### **Bogdan George Apetri**

*Associate Professor of Professional Practice in Film in the Faculty of Arts*

M.F.A., Columbia University, 2006

#### **James H. Applegate**

*Professor of Astronomy*

B.S., Michigan State University, 1976; M.S., Stony Brook University - SUNY, 1978; Ph.D., 1980

#### **Elena Aprile**

*Centennial Professor of Physics*

Laurea, Università degli Studi (Italy), 1978; Ph.D., University of Geneva, 1982

#### **Branka Arsic**

*Charles and Lynn Zhang Professor of English and Comparative Literature*

B.A., University of Belgrade, 1990; M.A., 1995; Ph.D., 1999

#### **Michelle Attner**

*Lecturer in the Discipline of Biological Sciences*

B.A., University of Pennsylvania; Ph.D., Massachusetts Institute of Technology, 2013

#### **Ana Asenjo Garcia**

*Associate Professor of Physics*

B. Sc., Universidad Complutense de Madrid (Spain), 2009; M.Sc., 2010; Ph.D., 2014

#### **Jacqueline Austermann**

*Associate Professor in Earth and Environmental Sciences*

B.Sc., Technische Universität Darmstadt (Germany), 2009; M.Sc., Ludwig Maximilians Universität München (Germany), 2011; Ph.D., Harvard University, 2016

#### **Marco Andres Avella Medina**

*Assistant Professor of Statistics*

B.A., University of Geneva, 2009; M.A., 2011; Ph.D., 2016

#### **Luis A. Avila**

*Senior Lecturer in Chemistry*

M.S., Babes-Bolyai University (Romania), 1982; M.S., Columbia University, Teachers College, 2004; Ph.D., 2006

#### **Richard Axel**

*University Professor*

B.A., Columbia University, 1967; M.D., Johns Hopkins University, 1970

## **B**

#### **Ramin Bahrani**

*Professor of Professional Practice in Film*

B.A., Columbia University, 1997

#### **Zainab Bahrani**

*Edith Porada Professor of Ancient and Near Eastern Art History and Archaeology*

B.A., Indiana University, 1981; M.A., New York University, 1984; Ph.D., 1989

#### **Jushan Bai**

*Professor of Economics*

B.S., Nankai University (China), 1982; M.A., 1985; M.A., Pennsylvania State University, 1988; Ph.D., University of California, Berkeley, 1992

#### **Christopher Baldassano**

*Associate Professor of Psychology*

B.S.E., Princeton University, 2009; Ph.D., Stanford University, 2015

**Marcos Balter**

*Fritz Reiner Professor of Musical Composition*

B.A., Texas Christian University, 2000; M.A., 2002; Ph.D., Northwestern University, 2008

**Dolores Barbazán-Capeáns**

*Lecturer in Spanish*

B.A., University of Santiago de Compostela (Spain), 2005; Ph.D., University of Barcelona (Spain), 2014

**Elazar Barkan**

*Professor of International and Public Affairs*

Ph.D., Brandeis University, 1988

**Erin Barnhart**

*Assistant Professor Biological Sciences*

A.B., Harvard University, 2003; Ph.D., Stanford University, 2010

**Teodolinda Barolini**

*Lorenzo Da Ponte Professor of Italian*

B.A., Sarah Lawrence College, 1972; M.A., Columbia University, 1973; Ph.D., 1978

**Lorena Garcia Barroso**

*Lecturer in Spanish*

B.A., University of Seville (Spain), 2004; B.A., University of Huelva (Spain), 2007; M.Phil., Menéndez Pelayo International University and Cervantes Institute (Spain), 2008; M.A., Complutense University of Madrid (Spain), 2009; B.A., Universidad Complutense de Madrid (Spain), 2011; Ph.D., Graduate Center - CUNY, 2017

**Scott Barrett**

*Lenfest-Earth Institute Professor of Natural Resource Economics*

B.A., University of Massachusetts, 1979; M.A., University of British Columbia, 1983; Ph.D., London School of Economics, 1989

**Dmitri N. Basov**

*Higgins Professor of Physics*

M.S., Moscow Engineering Physics Institute, 1988; Ph.D., Lebedev Physics Institute, Academy of Sciences of Russia, 1991

**Nicholas Baumbach**

*Associate Professor of Film in the Faculty of the Arts*

B.A., Brown University, 1998; Ph.D., Duke University, 2009

**Frederique Baumgartner**

*Senior Lecturer in the Discipline of Art History and Archaeology*

B.A., École du Louvre (France), 1997; M.A., Columbia University, 2003; Ph.D., Harvard University, 2011

**Banu Baydil**

*Senior Lecturer in the Discipline of Statistics*

B.S., Bogazici University (Turkey), 1999; M.S., Sabanci University (Turkey), 2002; M.A., Indiana University-Bloomington, 2005; M.S., Rensselaer Polytechnic Institute, 2010; Ph.D., 2010

**Peter Shawn Bearman**

*Jonathan R. Cole Professor of Sociology*

B.A., Brown University, 1978; A.M., Harvard University, 1982; Ph.D., 1986

**Paul Beatty**

*Professor of Professional Practice of Writing in the Faculty of the Arts*

B.A., Boston University, 1984; M.A., Boston University, 1987; M.F.A., Brooklyn College - CUNY, 1989

**Carol Becker**

*Professor of the Arts*

B.A., University at Buffalo - SUNY, 1968; Ph.D., University of California, San Diego, 1975

**Peter N. Belhumeur**

*Professor of Computer Science*

B.S., Brown University, 1985; S.M., Harvard University, 1991; Ph.D., 1993

**Steven M. Bellovin**

*Percy K. and Vida L. W. Hudson Professor of Computer Science*

B.A., Columbia University, 1972; M.S., University of North Carolina at Chapel Hill, 1977; Ph.D., 1982

**Andrei M. Beloborodov**

*Professor of Physics*

M.Sc., Moscow Institute of Physics and Technology (Russia), 1991; Ph.D., Lebedev Physical Institute (Russia), 1995

**Felice Italo Beneduce**

*Senior Lecturer in Italian*

M.A., University of Connecticut, 2003; Ph.D., 2012

**Naor H. Ben-Yehoyada**

*Associate Professor of Anthropology*

M.A., Tel Aviv University, 2005; Ph.D., Harvard University, 2011

**Courtney J. Bender**

*Tremaine Professor of Religion*

B.A., Swarthmore College, 1991; Ph.D., Princeton University, 1997

**Andres Bendesky**

*Associate Professor of Ecology, Evolution, and Environmental Biology*

M.D., Universidad Nacional Autónoma de México, 2006; Ph.D., Rockefeller University, 2011

**Barry George Bergdoll**

*Meyer Schapiro Professor of Art History and Archaeology*

B.A., Columbia University, 1977; B.A., University of Cambridge, 1979; M.A., 1982; Ph.D., Columbia University, 1986

**Volker Berghahn**

*Seth Low Professor Emeritus of History*

M.A., University of North Carolina at Chapel Hill, 1961; Ph.D., University of London, 1964; Habilitation, University of Mannheim (Germany), 1970

**Timothy Berkelbach**

*Associate Professor of Chemistry*

B.A., New York University, 2009; Ph.D., Columbia University, 2014

**Susan Bernofsky**

*Professor of Writing in the Faculty of the Arts*

B.A., Johns Hopkins University, 1987; M.F.A., Washington University in St. Louis, 1990; Ph.D., Princeton University, 1998

**Michael Carlos Best**

*Associate Professor of Economics*

B.Sc., London School of Economics, 2006; M.Phil., University of Oxford, 2008; Ph.D., London School of Economics, 2014

**Rym Bettaieb**

*Senior Lecturer in Arabic*

M.A., College of Staten Island, 1999; M.Phil., Drew University, 2007; Ph.D., 2013

**Leyre Alejandre Biel**

*Lecturer, Department of Latin American and Iberian Cultures*

B.A., University of Zaragoza (Spain), 2002; M.A., Universitat Oberta de Catalunya (Spain), 2008; M.A., University of Pablo Olavide (Spain), 2012; Ph.D., 2016

**Andrew S. Bienen**

*Associate Professor of Professional Practice in Film in the Faculty of the Arts*

M.F.A., Columbia University, 1996

**Akeel Bilgrami**

*Sidney Morgenbesser Professor of Philosophy*

B.A., Bombay University, 1970; B.A., University of Oxford, 1974; Ph.D., University of Chicago, 1983

**Richard A. Billows**

*Professor of History*

B.A., University of Oxford, 1978; M.A., King's College London, 1979; Ph.D., University of California, Berkeley, 1985

**Sarah Rabea Yeslam Bintyeer**

*Assistant Professor of Middle Eastern, South Asian, and African Studies*

Ph.D., SOAS, University of London, 2010

**Alison Breton Bishop**

*Assistant Professor of Computer Science*

A.B., Princeton University, 2006; Ph.D., The University of Texas at Austin, 2012

**Sandra Black**

*Professor of Economics*

B.A., University of California, Berkeley, 1991; Ph.D., Harvard University, 1997

**Elizabeth S. Blackmar**

*Mary and David Boies Professor of American History*

B.A., Smith College, 1972; Ph.D., Harvard University, 1981

**Allan Blaer**

*Professor Emeritus of Physics*

Ph.D. Columbia University, 1977

**Casey N. Blake**

*Professor of American Studies*

B.A., Wesleyan University, 1978; M.A., University of Rochester, 1981; Ph.D., 1987

**Jose Blanchet Mancilla**

*Professor of Industrial Engineering and Operations Research and of Statistics*

B.Sc., The Instituto Tecnológico Autónomo de México, 2000; M.S., Stanford University, 2001; Ph.D., 2004

**David M. Blei**

*Professor of Statistics and of Computer Science*

B.S., Brown University, 1997; Ph.D., University of California, Berkeley, 2004

**Andrew Blumberg**

*Professor of Mathematics and of Computer Science; Herbert and Florence Irving Professor of Cancer Data Research*

A.B., Harvard University, 1994; A.M., 1998; Ph.D., University of Chicago, 2005

**Diane Bodart**

*David Rosand Associate Professor of Italian Renaissance Art History*

B.A./M.A., Università la Sapienza (Italy), 1994; Ph.D., École des Hautes Études en Sciences Sociales (France), 2003

**Anne D. Bogart**

*Professor of Theatre Arts in the Faculty of the Arts*

M.A., New York University, 1977

**Niall P. Bolger**

*Professor of Psychology*

B.A., Trinity College Dublin, 1980; M.S., Cornell University, 1984; Ph.D., 1987

**Jason E. Bordoff**

*Professor of Professional Practice in the Faculty of International and Public Affairs*

B.A., Brown University, 1994; M.Litt., University of Oxford, 1998; J.D., Harvard University, 2004

**Alexandra Borer**

*Lecturer in French*

M.A., New York University, 2003; M.Phil., 2007; Ph.D., 2001

**Aleksandar Boskovic**

*Senior Lecturer in Bosnian, Croatian, and Serbian*  
B.A., University of Belgrade (Serbia), 2003; M.A., 2006;  
Ph.D., University of Michigan, 2013

**Bruno G. Bosteels**

*Jesse and George Siegel Professor in the Humanities*  
B.A., Katholieke Universiteit Leuven, Belgium, 1989; Ph.D.,  
University of Pennsylvania, 1995

**Clémence Boulouque**

*Carl and Bernice Witten Associate Professor of Jewish and  
Israel Studies*  
Ph.D., New York University, 2014

**Brian Boyd**

*Senior Lecturer in the Discipline of Anthropology*  
M.A., Glasgow University, 1991; Ph.D., University of  
Cambridge, 1996

**Susan Leslie Boynton**

*Professor of Music*  
B.A., Yale University, 1988; M.A., 1991; Diplôme d'études  
médiévales avec grande distinction, Université Catholique de  
Louvain (Belgium), 1992; Ph.D., Brandeis University, 1997

**Travis E. Bradford**

*Professor of Professional Practice in the Faculty of  
International and Public Affairs*  
B.A., Georgia State University, 1992; M.B.A., New York  
University, 1996; M.P.A., Harvard University, 2006

**Lisbeth Kim Brandt**

*Associate Professor of East Asian Languages and Cultures*  
B.A., Smith College, 1984; Ph.D., Columbia University, 1996

**Claudia Breger**

*Villard Professor of German and Comparative Literature*  
Ph.D., Humboldt University, 1996

**Simon A. Brendle**

*Professor of Mathematics*  
Diplom., University of Tübingen (Germany), 1999; Ph.D.,  
2001

**Gustaaf H. Brooijmans**

*Professor of Physics*  
B.S., Universite Catholique de Louvain (Belgium), 1991; M.S.,  
1994; Ph.D., 1998

**Hilary Brougher**

*Professor of Professional Practice in Film in the Faculty of the  
Arts*  
B.A., School of the Visual Arts, 1990

**Christopher L. Brown**

*Professor of History*  
B.A., Yale University, 1990; D.Phil., University of Oxford,  
1994

**Louis E. Brus**

*Samuel Latham Mitchell Professor of Chemistry and Professor  
of Chemical Engineering*  
B.S., Rice University, 1965; Ph.D., Columbia University, 1969

**Greg L. Bryan**

*Professor of Astronomy*  
B.Sc., University of Calgary (Canada), 1989; Ph.D., University  
of Illinois at Urbana-Champaign, 1996

**Julia Bryan-Wilson**

*Professor of Art History and Archaeology*  
B.A., Swarthmore College, 1995; M.A., University of  
California, Berkeley, 1999; Ph.D., 2004

**Matthew E. Buckingham**

*Professor of Professional Practice in Visual Arts in the Faculty  
of the Arts*  
B.A., University of Iowa, 1988; M.F.A., Bard College, 1996

**Richard W. Bulliet**

*Professor Emeritus of History*  
A.B., Harvard University, 1962; A.M., 1964; Ph.D., 1967

**Harmen J. Bussemaker**

*Professor of Biological Sciences and Systems Biology*  
B.A., Utrecht University (Netherlands), 1989; M.Sc., 1991;  
Ph.D., 1995

**C**

**Angelo Cacciuto**

*Professor of Chemistry*  
B.S., University of Cagliari (Italy), 1996; M.S., Syracuse  
University, 2000; Ph.D., 2002

**Christopher J. Caes**

*Senior Lecturer in Polish*  
B.A., Ohio State University, 1993; M.A., 1997; Ph.D.,  
University of California, Berkeley, 2004

**James Calleri**

*Associate Professor of Professional Practice in Theatre Arts in  
the Faculty of the Arts*  
B.A., Trinity University; M.F.A., University of California,  
Irvine, 1990

**Charles W. Calomiris**

*Henry Kaufman Professor of Financial Institutions in the  
Faculty of Business and Professor of International and Public  
Affairs*  
Ph.D., Stanford University, 1985

**Guillermo A. Calvo**

*Professor of International and Public Affairs*  
M.A., Yale University, 1965; M.Phil., 1967; Ph.D., 1974

**Euan Cameron**

*Professor of Religion*  
B.A., University of Oxford, 1979; D.Phil., 1982

**Luis M. Campos**

**Professor of Chemistry**

Ph.D., University of California, Los Angeles, 2006

**Elisheva Carlebach**

*Salo Wittmayer Baron Professor of Jewish History, Culture, and Society*

B.A., Brooklyn College - CUNY, 1976; M.Phil., Columbia University, 1980; Ph.D., 1986

**Luca Carloni**

*Associate Professor of Computer Science*

B.S., University of Bologna (Italy), 1995; M.S., University of California, Berkeley, 1997; Ph.D., 2004

**Allison Jean Carnegie**

*Professor of Political Science*

B.A., University of Southern California, 2006; M.Phil., Yale University, 2011; Ph.D., 2014

**Alessandra M. Casella**

*Professor of Economics and Political Science*

B.A., Bocconi University (Italy), 1983; Ph.D., Massachusetts Institute of Technology, 1988

**Jose A. Castellanoes-Pazos**

*Senior Lecturer in Latin American and Iberian Cultures*

M.D., Universidad Veracruzana (Mexico), 1982; M.A., State University of New York at Albany, 1996; M.Phil., New York University, 2007

**Jo Ann Cavallo**

*Professor of Italian*

B.A., Rutgers University, 1981; M.A., Yale University, 1984; Ph.D., 1987

**Steven E. Chaikelson**

*Professor of Professional Practice in the Theatre Arts in the Faculty of the Arts*

J.D., Columbia University, 1993

**Augustin Chaintreau**

*Associate Professor of Computer Science*

B.Sc., École Normale Supérieure (France), 2001; M.S., Université Pierre-et-Marie-Curie (France), 2002; Ph.D., INRIA-École Normale Supérieure (France), 2006

**Martin Chalfie**

*University Professor*

A.B., Harvard University, 1969; Ph.D., 1976

**Douglas A. Chalmers**

*Professor Emeritus of Political Science*

B.A., Bowdoin College, 1953; M.A., Yale University, 1958; Ph.D., 1962

**Paul Thomas Chamberlin**

*Associate Professor of History*

B.A., Indiana University, 2002; M.A., Ohio State University, 2005; Ph.D., 2009

**Shih-Fu Chang**

*Richard Dicker Professor of Telecommunications and Professor of Computer Science*

B.S., National Taiwan University (Taiwan), 1985; M.S., University of California, Berkeley, 1991; Ph.D., 1993

**George A. Chauncey**

*DeWitt Clinton Professor of American History*

B.A., Yale University, 1977; Ph.D., 1989

**Hannah R. Chazin**

*Assistant Professor of Anthropology*

B.A., University of Chicago, 2008; M.A., 2011; Ph.D., 2016

**Amy Chazkel**

*Bernard Hirschhorn Associate Professor of Urban Studies*

B.A., George Washington University, 1991; M.A., Yale University, 1996; Ph.D., 2002

**Yeon-Koo Che**

*Kelvin J. Lancaster Professor of Economic Theory*

B. Economics, Seoul National University, 1984; M.A., University of Toronto, 1986; Ph.D., Stanford University, 1991

**Xi Chen**

*Associate Professor of Computer Science*

B.S., Tsinghua University (China), 2003; Ph.D., 2007

**Pierre-André Chiappori**

*E. Rowan and Barbara Steinschneider Professor of Economics*

M.A., University of Paris, 1975; D.E.A., 1978; Ph.D., 1981

**Graciela Chichilnisky**

*Professor of Economics*

M.A., University of California, Berkeley, 1970; Ph.D., 1971; Ph.D., 1976

**Lydia B. Chilton**

*Assistant Professor of Computer Science*

S.B., Massachusetts Institute of Technology, 2007; M.Eng., 2009; Ph.D., University of Washington, 2015

**Norman H. Christ**

*Ephraim Gildor Professor of Computational Theoretical Physics*

B.A., Columbia University, 1965; Ph.D., 1966

**Nicholas J. Christopher**

*Professor of Professional Practice in Writing in the Faculty of the Arts*

A.B., Harvard University, 1973

**James Chu**

*Assistant Professor of Sociology*

B.A., M.A., Stanford University, 2011; Ph.D., 2020

**Eunice Chung**

*Lecturer in East Asian Languages and Cultures*

B.A., Korea University, 2006; M.A., Columbia University, 2011

**Alessandra Ciucci**

*Associate Professor of Music*

Diploma in Music, Brooklyn Conservatory of Music, 1998;  
B.A., Columbia University, 1995; Ph.D., Graduate Center -  
CUNY, 2008

**Richard H. Clarida**

*C. Lowell Harriss Professor of Economics and Professor of  
International and Public Affairs*

B.S., University of Illinois, 1979; S.M., Harvard University,  
1983; Ph.D., 1983

**Seth Cluett**

*Lecturer in the Discipline of Music*

B.M., New England Conservatory, 1998; M.F.A., Rensselaer  
Polytechnic Institute, 2003; M.F.A., Princeton University,  
2007; Ph.D., 2013

**Justin Clarke Doane**

*Associate Professor of Philosophy*

B.A., New College of Florida, 2005; Ph.D., New York  
University, 2011

**John H. Coatsworth**

*Professor of International Affairs and Public Affairs and of  
History*

B.A., Wesleyan University, 1963; M.A., University of  
Wisconsin-Madison, 1967; Ph.D., 1972

**Edward Coffman**

*Professor Emeritus of Electrical Engineering and Computer  
Science*

Ph.D., University of California, Los Angeles, 1966

**Jean Louise Cohen**

*Nell and Herbert M. Singer Professor of Contemporary  
Civilization in the Core Curriculum*

B.A., Boston University, 1968; M.A., New School for Social  
Research, 1972; Ph.D., 1979

**Joel E. Cohen**

*Professor of Earth and Environmental Sciences and of  
International and Public Affairs*

Ph.D., Harvard University, 1970

**Steven Alan Cohen**

*Professor of Professional Practice in the Faculty of  
International and Public Affairs*

Ph.D., University at Buffalo - SUNY, 1979

**Yinon Cohen**

*Yosef Hayim Yerushalmi Professor of Israel and Jewish  
Studies*

B.A., Hebrew University of Jerusalem, 1978; M.A., Stony  
Brook - SUNY, 1980; Ph.D., 1983

**Zuleyha Colak**

*Lecturer in Middle Eastern, South Asian, and African Studies*

B.A., Istanbul University (Turkey), 1998; M.A., Marmara  
University (Turkey), 2000; M.A., Indiana University, 2004;  
Ph.D., 2010

**Brian A. Cole**

*Professor of Physics*

B.S., Massachusetts Institute of Technology, 1985; Ph.D., 1992

**Jonathan R. Cole**

*John Mitchell Mason Professor of the University*

Ph.D., Columbia University, 1969

**Michael Cole**

*Howard McP. Davis Professor of Art History*

B.A., Williams College, 1991; M.A., Princeton University,  
1995; Ph.D., 1999

**Sarah Cole**

*Parr Professor of English and Comparative Literature*

B.A., Williams College, 1989; Ph.D., University of California,  
Berkeley, 1997

**Charly J. Coleman**

*Associate Professor of History*

B.A., Trinity University, 1998; Ph.D., Stanford University,  
2005

**John D. Collins**

*Associate Professor of Philosophy*

B.A., University of Sydney (Australia), 1982; Ph.D., Princeton  
University, 1991

**Michael J. Collins**

*Vikram S. Pandit Professor of Computer Science*

B.A., University of Cambridge, 1992; M.Phil., 1993; Ph.D.,  
University of Pennsylvania, 1999

**Juan Pablo Cominguez**

*Lecturer in Latin American and Iberian Cultures*

B.A., Universidad Nacional de Buenos Aires (Argentina),  
2005; M.A., Rutgers University, 2012; Ph.D., 2016

**Roisin Commame**

*Associate Professor of Earth and Environmental Sciences*

B.Sc. University College Dublin, 2003; Ph.D., University of  
Leeds (U.K.), 2009

**Michael I. Como**

*Toshu Fukami Associate Professor of Shinto Studies*

A.B., Harvard University, 1985; Ph.D., Stanford University,  
2000

**Antoine Marcel Compagnon**

*Blanche W. Knopf Professor of French*

Docteur ès Lettres, Paris Diderot University, 1985

**Matthew J. Connelly**

*Professor of History*

B.A., Columbia University, 1990; Ph.D., Yale University, 1997

**Kathleen McKeown Cooper**

*Henry and Gertrude Rothschild Professor of Computer Science*

Ph.D., University of Pennsylvania, 1982

**Shanya Cordis**

*Assistant Professor of African American and African Diaspora Studies*

B.S., Pennsylvania State University, 2009; M.A., University of Texas at Austin, 2013; Ph.D., 2017

**Marina Cords**

*Professor of Ecology, Evolution, and Environmental Biology and of Anthropology*

B.S., Yale University, 1978; Ph.D., University of California, Berkeley, 1984

**Virginia W. Cornish**

*Helena Rubinstein Professor of Chemistry*

B.A., Columbia University, 1991; Ph.D., University of California, Berkeley, 1996

**Ivan Z. Corwin**

*Professor of Mathematics*

A.B., Harvard University, 2006; Ph.D., Courant Institute, New York University, 2011

**Angelina Craig-Florez**

*Senior Lecturer in Latin American and Iberian Cultures*

B.A., Fordham University, 1989; M.A., Columbia University, 1991; M.Phil., 1995; Ph.D., 2002

**Jonathan K. Crary**

*Meyer Schapiro Professor of Modern Art and Theory*

B.A., Columbia University, 1975; M.A., 1978; Ph.D., 1987

**Julie A. Crawford**

*Mark Van Doren Professor of Humanities*

B.A., McGill University (Canada), 1990; Ph.D., University of Pennsylvania, 1998

**Pascale F. Crepon**

*Lecturer in French*

M.A., University of Lausanne (Switzerland), 1998; M.A., University of Minnesota, 2002; Ph.D., 2009

**Zoë Crossland**

*Professor of Anthropology*

B.A., University of Cambridge, 1993; M.A., Michigan State University, 1995; Ph.D., University of Michigan, 2001

**David Antonio Cruz**

*Assistant Professor of Visual Arts*

B.F.A., Pratt Institute, 1998; M.F.A., Yale University, 2009

**Denise Cruz**

*Professor of English and Comparative Literature*

Ph.D., University of California, Los Angeles, 2007

**John P. Cunningham**

*Professor of Statistics*

B.A., Dartmouth College, 2002; M.S., Stanford University, 2006; Ph.D., 2009

**Gerald Leon Curtis**

*Burgess Professor of Political Science*

B.A., University of New Mexico, 1962; M.A., Columbia University, 1964; Ph.D., 1969

**D**

**Hamid Dabashi**

*Hagop Kevorkian Professor of Iranian Studies*

B.A., University of Tehran, 1976; M.A., University of Pennsylvania, 1981; Ph.D., 1984

**Patricia A. Dailey**

*Associate Professor of English and Comparative Literature*

B.A., Sarah Lawrence College, 1988; M.A., University of California, Irvine, 1993; Ph.D., 2002

**Terence N. D'Altroy**

*Loubat Professor of American Archaeology*

B.A., University of Michigan, 1972; M.A., University of California, Los Angeles, 1975; Ph.D., 1981

**Lisa Allyn Dale**

*Lecturer in the Discipline of Climate*

B.A., Cornell University, 1991; M.A., Regis University, 1997; Ph.D., Colorado State University, 2003

**Sarah Zukerman Daly**

*Associate Professor of Political Science*

B.A., Stanford University, 2002; M.S., London School of Economics, 2004; Ph.D., Massachusetts Institute of Technology, 2011

**Nicholas J. Dames**

*Theodore Kahan Professor of Humanities*

B.A., Washington University in St. Louis, 1992; Ph.D., Harvard University, 1998

**Tri Vi Dang**

*Senior Lecturer in the Discipline of Economics*

B.A., University of Frankfurt (Germany), 1996; M.A., 1998; Ph.D., University of Mannheim (Germany), 2005

**E. Valentine Daniel**

*Professor of Anthropology*

B.A., Amherst College, 1971; M.A., University of Chicago, 1973; Ph.D., 1979

**Samuel J. Danishefsky**

*Centennial Professor Emeritus of Chemistry*

B.S., Yeshiva University, 1956; Ph.D., Harvard University, 1962

**Edwidge Danticat**

*Wun Tsun Tam Professor of the Humanities (in African American and African Diaspora Studies)*

B.A., Barnard College, 1990; M.F.A., Brown University, 1993

**Panagiota Daskalopoulos***Professor of Mathematics*B.A., National and Kapodistrian University of Athens, 1986;  
Ph.D., University of Chicago, 1992**Jeremy A. Dauber***Atran Professor of Yiddish Language, Literature, and Culture*A.B., Harvard University, 1995; Ph.D., University of Oxford,  
1999**Lila Davachi***Professor of Psychology*

B.A., Barnard College, 1992; Ph.D., Yale University, 1999

**Jenny M. Davidson***Professor of English and Comparative Literature*

B.A., Radcliffe College, 1993; Ph.D., Yale University, 1999

**Donald R. Davis***Ragnar Nurkse Professor of Economics*B.A., University of California, Berkeley, 1981; M.A.,  
Columbia University, 1989; Ph.D., 1992**Richard A. Davis***Howard Levene Professor of Statistics*

B.A., University of California, San Diego, 1974; Ph.D., 1979

**Francesco de Angelis***Professor of Art History and Archaeology*

Ph.D., Scuola Normale Superiore (Italy), 2003

**Aise Johan de Jong***Professor of Mathematics*B.S., Leiden University (Netherlands), 1987; Ph.D., Radboud  
University Nijmegen (Netherlands), 1992**Rodolfo O. de la Garza***Eaton Professor of Administrative Law and Municipal Science  
and Professor of International and Public Affairs*B.S., University of Arizona, 1964; B.F.T., American Institute  
of Foreign Trade, 1965; M.A., University of Arizona, 1967;  
Ph.D., 1972**Victor H. de la Peña***Professor of Statistics*B.S., University of Texas at El Paso, 1981; M.A., University of  
California, Berkeley, 1984; Ph.D., 1988**Cory R. Dean***Associate Professor of Physics*B.Sc., Queen's University (Canada), 2000; B.Sc., 2001; M.Sc.,  
2004; Ph.D., McGill University (Canada), 2009**Mark Dean***Associate Professor of Economics*B.A., University of Cambridge, 1999; M.Sc., University  
College London, 2000; Ph.D., New York University, 2009**Ruth S. DeFries***University Professor*B.A., Washington University in St. Louis, 1976; Ph.D., Johns  
Hopkins University, 1980**Wijnje E. De Groot***Senior Lecturer in Germanic Languages*M.A., University of Amsterdam (Netherlands), 1982; M.A.,  
1985**Andrew Delbanco***Alexander Hamilton Professor of American Studies and Julian  
Clarence Levi Professor in the Humanities*

A.B., Harvard University, 1973; A.M., 1976; Ph.D., 1980

**Milan Delor***Assistant Professor of Chemistry*

Ph.D., University of Sheffield (England), 2014

**Frederik M. Denef***Professor of Physics*

Ph.D., KU Leuven (Belgium), 1999

**Glenn L. Denning***Professor of Professional Practice in the Faculty of  
International and Public Affairs*

Ph.D., University of Reading (Berkshire), 1985

**Padma B. Desai***Gladys and Roland Harriman Professor Emerita of  
Comparative Economic Systems*B.A., University of Bombay, 1951; M.A., 1953; Ph.D.,  
Harvard University, 1960**Ira J. Deutchman***Professor of Professional Practice in Film in the Faculty of the  
Arts*

B.S., Northwestern University, 1975

**Zosha C. Di Castri***Francis Goelet Assistant Professor of Music Composition*

M.A., Columbia University, 2010; D.M.A., 2014

**Souleymane Bachir Diagne***Professor of French*

B.A., University of Sorbonne, Paris, 1977; Ph.D., 1988

**Jaquira Diaz***Assistant Professor of Writing*B.A., University of Central Florida, 2006; M.F.A., University  
of South Florida, 2012**Margaret K. Dieckmann***Professor of Professional Practice in Film in the Faculty of the  
Arts*

M.A., New York University, 1986

**Lars Dietrich***Associate Professor of Biological Sciences*B.A., University of Konstanz (Germany), 2000; Ph.D.,  
Heidelberg University (Germany), 2004**Mamadou Diouf**

*Leitner Family Professor of African Studies*

B.A., University of Paris-Sorbonne, 1975; Ph.D., 1981

**Thomas A. DiPrete**

*Giddings Professor of Sociology*

B.S., Massachusetts Institute of Technology, 1972; M.A., Columbia University, 1975; Ph.D., 1978

**Maria Diuk-Wasser**

*Professor of Ecology, Evolution, and Environmental Biology*

B.A., Universidad de Buenos Aires, 1996; Ph.D., University of California, Los Angeles, 2003

**Madeleine Dobie**

*Professor of French*

B.A., University of Oxford, 1988; M.A., Yale University, 1991; Ph.D., 1994

**Jeremy R. Dodd**

*Senior Lecturer in Physics*

B.S., University of Edinburgh (United Kingdom), 1985; Ph.D., University College London, 1990

**Thomas W. Dodman**

*Associate Professor of French*

B.A., University College London, 2001; M.A., 2002; Ph.D., University of Chicago, 2011

**Julia Doe**

*Associate Professor of Music*

B.A., Whitman College, 2006; M.A., Yale University, 2010; Ph.D., 2013

**Timothy B. Donnelly**

*Professor of Writing in the Faculty of the Arts*

M.F.A., Columbia University, 1998

**Gary Dorrien**

*Professor of Religion*

Ph.D., Union Graduate School, 1989

**Michael W. Doyle**

*University Professor*

A.B., Harvard University, 1970; Ph.D., 1977

**Geraldine Downey**

*Niven Professor of Human Letters*

B.S., University College Dublin, 1979; M.A., Cornell University, 1983; Ph.D., 1986

**George Dragomir**

*Lecturer in the Discipline of Mathematics*

B.Sc., Al. I. Cuza University (Romania), 2003; M.Sc., McMaster University, 2005; Ph.D., 2011

**Jerónimo Duarte-Riascos**

*Assistant Professor of Latin American and Iberian Studies*

B.Sc., Universidad de los Andes (Columbia), 2009; B.A., 2009; M.A., 2010; M.A., Harvard University, 2012; Ph.D., 2018

**Julien Dubedat**

*Professor of Mathematics*

Ph.D., University of Paris-Sud, 2004

**Joseph P. Dubiel**

*Professor of Music*

A.B., Princeton University, 1974; M.F.A., 1976; Ph.D., 1980

**Bianca Dumitrascu**

*Assistant Professor of Statistics and Herbert and Florence*

*Irving Assistant Professor of Cancer Data Research*

B.S., Massachusetts Institute of Technology, 2013; M.S., Princeton University, 2015; Ph.D., 2019

**Prajit Kumar Dutta**

*Professor of Economics*

B.A., St. Stephen's College (India), 1980; M.A., Delhi School of Economics, 1982; M.A., Cornell University, 1985; Ph.D., 1987

**Laura Duvall**

*Assistant Professor of Biological Sciences*

B.A., University of Pennsylvania, 2007; Ph.D., Washington University in St. Louis, 2012

**Sonya T. Dyhrman**

*Professor of Earth and Environmental Sciences*

B.A., Dartmouth College, 1994; Ph.D., University of California, San Diego, 1999

**Ofer Dynes**

*Leonard Kaye Assistant Professor of Hebrew and Comparative Literature*

Ph.D., Harvard University, 2016

**E**

**Deren Eaton**

*Associate Professor of Ecology, Evolution, and Environmental Biology*

B.Sc., University of Minnesota, 2007; Ph.D., University of Chicago, 2014

**Kathy Hannah Eden**

*Chavkin Family Professor of English Literature; Professor of Classics*

B.A., Smith College, 1974; Ph.D., Stanford University, 1980

**Lena Edlund**

*Associate Professor of Economics*

B.A., Stockholm School of Economics, 1989; Ph.D., 1996

**Brent Hayes Edwards**

*Peng Family Professor of English and Comparative Literature*

B.A., Yale University, 1990; M.A., Columbia University, 1992; Ph.D., 1998

**Stephen A. Edwards**

*Associate Professor of Computer Science*

B.S., California Institute of Technology, 1992; M.S., University of California, Berkeley, 1994; Ph.D., 1997

**Naoki Egami**

*Assistant Professor of Political Science*

B.A., University of Tokyo (Japan), 2015; Ph.D., Princeton University, 2020

**Shigeru Eguchi**

*Senior Lecturer in East Asian Languages and Cultures*

B.A., Ibaraki University (Japan), 1989; M.A., University of Iowa, 1994

**William B. Eimicke**

*Professor of Professional Practice in the Faculty of International and Public Affairs*

Ph.D., Syracuse University, 1973

**Gregory M. Eirich**

*Senior Lecturer in Sociology*

B.A., Fordham University, 2000; M.A., Columbia University, 2005; M.Phil., 2006; Ph.D., 2010

**Peter M. Eisenberger**

*Professor of Earth and Environmental Sciences*

A.B., Princeton University, 1963; Ph.D., Harvard University, 1967

**Goran Ekstrom**

*Newberry Professor of Earth and Environmental Sciences*

B.A., Swarthmore College, 1981; Ph.D., Harvard University, 1987

**Wafaa El-Sadr**

*University Professor*

M.D., Cairo University, 1974; M.P.H., Columbia University, 1991; M.P.A., Harvard University, 1996

**Noam M. Elcott**

*Associate Professor of Art History and Archaeology*

B.A., Columbia University, 2000; M.A., Princeton University, 2004; Ph.D., 2008

**William A. Ellis**

*Professor of Professional Practice in Film in the Faculty of the Arts*

B.A., Stanford University, 1984

**Susan Elmes**

*Andrew Barth Senior Lecturer in the Discipline of Economics*

B.A., New York University, 1984; Ph.D., Princeton University, 1991

**Marwa Elshakry**

*Associate Professor of History*

B.A., Rutgers University, 1995; M.A., Princeton University, 1997; Ph.D., 2003

**Jon Elster**

*Robert K. Merton Professor of the Social Sciences*

M.A., University of Oslo, 1966; Ph.D., University of Paris, 1972

**Matthew Engelke**

*Professor of Religion*

Ph.D., University of Virginia, 2002

**Seyhan Erden**

*Senior Lecturer in the Discipline of Economics*

B.A., Bogazici University (Turkey), 1984; M.B.A., New Hampshire College, 1985; M.A., University of Wisconsin-Milwaukee, 1988; Ph.D., 1993

**Robert S. Erikson**

*Professor of Political Science*

B.A., Lake Forest College, 1963; M.A., University of Illinois, 1966; Ph.D., 1969

**Yaniv Erlich**

*Assistant Professor of Computer Science*

B.S., Tel Aviv University, 2006; Ph.D., Cold Spring Harbor Laboratory, 2010

**Catherine Evtuhov**

*Professor of History*

A.B., Harvard University, 1981; D.E.A., Institut d'Etudes Politiques, Paris, 1983; M.A., University of California, Berkeley, 1985; Ph.D., 1991

**Gil Eyal**

*Professor of Sociology*

B.A., Tel Aviv University, 1989; M.A., 1991; M.A., University of California, Los Angeles, 1992; Ph.D., 1997

**F**

**Laura Fair**

*Professor of Middle Eastern, South Asian and African Studies*

B.A., Northern Illinois University, 1985; M.A., University of Wisconsin-Madison, 1988; Ph.D., University of Minnesota, 1994

**Reem Faraj-Kanjawi**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

B.A., Damascus University (Syria), 1993; M.A., Montclair State University, 2006

**Hannah A. Farber**

*Associate Professor of History*

B.A., Yale University, 2005; M.A., University of California, Berkeley, 2010; Ph.D., 2014

**Steven K. Feiner**

*Professor of Computer Science*

B.A., Brown University, 1973; Ph.D., 1987

**Kevin A. Fellezs**

*Associate Professor of Music and of African American and African Diaspora Studies*

B.A., San Francisco State, 1998; M.A., 2000; Ph.D., University of California, Santa Cruz, 2004

**Maria Q. Feng**

*Rewick Professor of Civil Engineering*

B.S., Southeast University (China), 1982; M.S., University of Electro-Communications (Japan), 1987; Ph.D., University of Tokyo (Japan), 1992

**Catherine Fennell**

*Associate Professor of Anthropology*

B.S., Georgetown University, 1999; M.A., University of Chicago, 2003; Ph.D., 2009

**Priscilla P. Ferguson**

*Professor Emerita of Sociology*

B.A., Mount Holyoke College, 1962; M.A., Columbia University, 1964; Ph.D., 1967

**Peter Jay Fernandez**

*Assistant Professor of Professional Practice of Theatre Arts*

B.F.A., Boston University

**Ana M. Fernandez-Cebrian**

*Assistant Professor of Latin American and Iberian Cultures*

B.A., Universidad de Zaragoza (Spain), 2000; M.A., Princeton University, 2013; Ph.D., 2017

**Barbara J. Fields**

*William R. Shepherd Professor of History*

A.B., Harvard University, 1968; A.M., Yale University, 1972; Ph.D., 1978

**Ronald E. Findlay**

*Ragnar Nurkse Professor Emeritus of Economics*

B.A., University of Rangoon (Burma), 1954; Ph.D., Massachusetts Institute of Technology, 1960

**Stuart J. Firestein**

*Professor of Biological Sciences*

B.S., San Francisco State University, 1983; Ph.D., University of California, Berkeley, 1988

**Albert Fishlow**

*Professor Emeritus of International and Public Affairs*

Ph.D., Harvard University, 1963

**Marcus Folch**

*Associate Professor of Classics*

B.A., Cornell University, 2000; Ph.D., Stanford University, 2006

**Eric Foner**

*DeWitt Clinton Professor of History*

B.A., Columbia University, 1963; B.A., University of Oxford, 1965; Ph.D., Columbia University, 1969

**Pierre Force**

*Professor of French*

Ph.D., University of Paris-Sorbonne, 1987

**Richard C. Ford**

*Emmanuel Roman and Barrie Sardoff Roman Professor of the Humanities*

B.A., Michigan State University, 1966; M.F.A., University of California, Irvine, 1970

**V. Page Fortna**

*Harold Brown Professor of U.S. Foreign and Security Policy*

B.A., Wesleyan University, 1990; A.M., Harvard University, 1995; Ph.D., 1998

**Aaron Andrew Fox**

*Associate Professor of Music*

A.B., Harvard University, 1988; Ph.D., University of Texas at Austin, 1995

**Katherine T. Fox-Glassman**

*Lecturer in Psychology*

B.A., Harvard University, 2005; M.A., M.Phil., Columbia University, 2012; Ph.D., 2015

**Joachim Frank**

*Professor of Biochemistry and Molecular Biophysics and of Biological Sciences*

Ph.D., Technische Universität München (Germany), 1970

**Carmela V. Franklin**

*Professor of Classics*

B.A., Radcliffe College, 1971; Ph.D., Harvard University, 1977

**Federica Franze**

*Senior Lecturer in Italian*

B.A., University of Urbino (Italy), 1999; M.A., Rutgers University, 2003; M.A., 2009; Ph.D., 2009

**Jonathan Freeman**

*Associate Professor of Psychology*

B.A., New York University, 2007; M.S., Tufts University; Ph.D., 2012

**Robert David Friedman**

*Professor of Mathematics*

A.B., Harvard University, 1976; Ph.D., 1981

**Richard A. Friesner**

*William P. Schweitzer Professor of Chemistry*

B.S., University of Chicago, 1973; Ph.D., University of California, Berkeley, 1979

**Walter M. Frisch**

*H. Harold Gumm/Harry and Albert von Tilzer Professor of Music*

B.A., Yale University, 1973; M.A., University of California, Berkeley, 1977; Ph.D., 1981

**Timothy M. Frye**

*Marshall D. Shulman Professor of Post-Soviet Foreign Policy*

B.A., Middlebury College, 1986; M.I.A., Columbia University, 1991; Ph.D., 1997

**Ester Fuchs**

*Professor of International and Public Affairs*  
Ph.D., University of Chicago, 1984

**Kevin Funk**

*Lecturer in Political Science*  
B.A., University of Pittsburgh, 2005; M.A., University of Florida, 2012; Ph.D., 2016

**Melissa Fusco**

*Associate Professor of Philosophy*  
B.A., Stanford University, 2006; Ph.D., University of California, Berkeley, 2015

**G****Aubrey Gabel**

*Associate Professor of French*  
M.A., University of Colorado Boulder, 2009; Ph.D., University of California, Berkeley, 2016

**Jane M. Gaines**

*Professor of Film in the Faculty of the Arts*  
B.S., Northwestern University, 1975; M.A., 1977, Ph.D., 1982

**Meredith Jane Gamer**

*Assistant Professor of Art History and Archaeology*  
Ph.D., Yale University, 2015

**Jacqueline Garci#a Sua#rez**

*Assistant Professor of Latin American and Iberian Cultures*  
B.A., University of Havana (Cuba), 2009; M.A., Pennsylvania State University, 2020; Ph.D., 2022

**Bradford G. Garton**

*Professor of Music*  
B.S., Purdue University, 1979; M.F.A., Princeton University, 1985; Ph.D., 1989

**Tamrat Gashaw**

*Lecturer in the Discipline of Economics*  
B.S., Alemaya University (Ethiopia), 1999; M.A., Addis Ababa University (Ethiopia), 2005; M.A., Western Michigan University, 2008; Ph.D., 2012

**Racquel Gates**

*Associate Professor of Film*  
B.S., Georgetown University, 2002; M.A., University of Chicago, 2003; Ph.D., Northwestern University, 2010

**Roxana Geambasu**

*Associate Professor of Computer Science*  
B.S., Polytechnic University of Bucharest (Romania), 2005; M.S., University of Washington, 2007; Ph.D., 2011

**Andrew E. Gelman**

*Higgins Professor of Statistics and Professor of Political Science*  
S.B., Massachusetts Institute of Technology, 1986; A.M., Harvard University, 1987; Ph.D., 1990

**Pierre Gentine**

*Professor of Earth and Environmental Engineering and of Earth and Environmental Sciences*  
M.Eng., French National Aeronautical and Space Engineering School, Toulouse, France, 2002; M.Sc., Massachusetts Institute of Technology, 2006; Ph.D., 2010

**Giuseppe Gerbino**

*Associate Professor of Music*  
M.A., Duke University, 1996; Ph.D., 2001

**Anna Ghurbanyan**

*Senior Lecturer in the Discipline of Chemistry*  
B.S., Northern Arizona University, 2004; M.S., 2007

**Elena Giorgi**

*Assistant Professor of Mathematics*  
B.Sc., Università di Pisa (Italy), 2013; M.Sc., Université Paris Sud (France), 2014; M.Sc., Ecole Normale Supérieure de Lyon (France), 2015; Ph.D., Columbia University, 2019

**Elise Giuliano**

*Senior Lecturer in the Discipline of Political Science*  
B.A., University of Pennsylvania, 1990; M.A., University of Chicago, 1992; Ph.D., 2000

**Lydia D. Goehr**

*Professor of Philosophy*  
B.A., Manchester University (U.K.), 1982; Ph.D., University of Cambridge, 1987

**Dorian Goldfeld**

*Professor of Mathematics*  
B.S., Columbia University, 1967; Ph.D., 1969

**Steven L. Goldstein**

*Higgins Professor of Earth and Environmental Sciences*  
B.A., Columbia University, 1976; A.M., Harvard University, 1978; M.Phil, Columbia University, 1981; Ph.D., 1986

**Michael Bernhard Golston**

*Professor of English and Comparative Literature*  
B.A., University of New Mexico, 1979; M.A., University of California, Berkeley, 1989; Ph.D., Stanford University, 1998

**Mattieu Gomez**

*Associate Professor of Economics*  
B.S., École Polytechnique (France), 2010; M.Sc. Paris School of Economics and ENSAE, 2011; Ph.D., Princeton University, 2017

**Adela J. Gondek**

*Lecturer in the Discipline of Climate*  
B.A., Goucher College, 1970; Ph.D., Harvard University, 1981

**Ruben L. Gonzalez**

*Professor of Chemistry*  
B.S., Florida International University, 1995; Ph.D., University of California, Berkeley, 2000

**Bette R. Gordon**

*Professor of Professional Practice in Film in the Faculty of the Arts*  
M.F.A., University of Wisconsin-Madison, 1976

**Emilien Gouin-Bonenfant**

*Assistant Professor Economics*  
B.Sc., Université de Montréal, 2013; M.A., University of California San Diego, 2019; Ph.D., University of California San Diego, 2019

**Stathis Gourgouris**

*Professor of Classics and of English and Comparative Literature*  
B.A., University of California, Los Angeles, 1981; M.A., 1984; Ph.D., 1990

**Gautam Gowrisankaran**

*Professor of Economics*  
B.A., Swarthmore College, 1991; M.A., Yale University, 1992; M.Phil., 1993; Ph.D., 1995

**Maria Luisa Gozzi**

*Senior Lecturer in Italian*  
B.A., University of Florence (Italy), 1986; Ph.D., Rutgers University, 1996; M.A., Columbia University, 2012

**Thomas Austin Graham**

*Associate Professor of English and Comparative Literature*  
B.A., University of Virginia, 2000; Ph.D., University of California, Los Angeles, 2010

**Luis A. Gravano**

*Professor of Computer Science*  
B.S., National University of Lujan (Argentina), 1990; M.S., Stanford University, 1994; Ph.D., 1997

**Erik I. Gray**

*Professor of English and Comparative Literature*  
B.A., University of Cambridge, 1994; M.A., Princeton University, 1997; Ph.D., 2000

**Donald P. Green**

*Burgess Professor of Political Science*  
B.A., University of California, Los Angeles, 1983; M.A., University of California, Berkeley, 1984; Ph.D., 1988

**R. Kent Greenawalt**

*University Professor*  
A.B., Swarthmore College, 1958; B.Phil., University of Oxford, 1960; LL.B., Columbia University, 1963

**Brian Greene**

*Professor of Mathematics and of Physics*  
A.B., Harvard University, 1984; D.Phil., University of Oxford, 1987

**Iva Greenwald**

*Da Costa Professor of Biology*  
Ph.D., Massachusetts Institute of Technology, 1982

**Patricia E. Grieve**

*Nancy and Jeffrey Marcus Professor of the Humanities*  
B.A., Purdue University, 1975; M.A., 1977; Ph.D., Princeton University, 1983

**Farah Jasmine Griffin**

*William B. Ransford Professor of English and Comparative Literature and African-American Studies*  
A.B., Harvard University, 1985; Ph.D., Yale University, 1992

**Kevin L. Griffin**

*Professor of Earth and Environmental Sciences and of Ecology, Evolution, and Environmental Biology*  
B.A., Whittier College, 1985; M.E.S., Yale University, 1987; Ph.D., Duke University, 1994

**Eitan Grinspun**

*Associate Professor of Computer Science*  
B.A., University of Toronto, 1997; M.S., California Institute of Technology, 2000; Ph.D., 2003

**Jonathan L. Gross**

*Professor of Computer Science and of Statistics*  
B.S., Massachusetts Institute of Technology, 1964; M.A., Dartmouth College, 1966; Ph.D., 1968

**Yuqi Gu**

*Assistant Professor of Statistics*  
B.S., Tsinghua University (China), 2015; Ph.D., University of Michigan, 2020

**Sunil K. Gulati**

*Michael K. Dakolias Senior Lecturer in the Discipline of Economics*  
B.A., Bucknell University, 1981; M.A., Columbia University, 1983; M.Phil. 1986

**Frank A. Guridy**

*Dr. Kenneth and Kareitha Forde Professor of African American and African Diaspora Studies*  
B.A., Syracuse University, 1993; M.A., University of Illinois at Chicago, 1996; Ph.D., University of Michigan, Ann Arbor, 2002

**Miklos Gyulassy**

*Professor of Physics*  
B.A., University of California, Berkeley, 1970; Ph.D., 1974

**H**

**Georg Friedrich Haas**

*Mac Dowell Professor of Music*  
Diploma in Composition, Hochschule für Musik (Austria), 1979

**Charles J. Hailey**

*Pupin Professor of Physics*  
B.A., Cornell University, 1977; Ph.D., Columbia University, 1983

**Jack Halberstam**

*David Feinson Professor of Humanities*

B.A., University of California, Berkeley, 1985; M.A., University of Minnesota, 1989; Ph.D., University of Minnesota, 1991

**Sarah Haley**

*Professor of History*

B.A., Vassar College, 2001; M.A., Yale University, 2007; Ph.D., 2010

**Wael Hallaq**

*Avalon Foundation Professor in the Humanities*

B.A., University of Haifa (Israel), 1978; M.A., University of Washington, 1979; Ph.D., 1983

**Hilary Anne Hallett**

*Mendelson Family Professor of American Studies; Professor of History*

B.F.A., New York University, 1990; Ph.D., Graduate Center - CUNY, 2005

**Alexander Halliday**

*Professor of Earth and Environmental Sciences*

Ph.D., Newcastle University (U.K.), 1977

**Sarah Hansen**

*Senior Lecturer in Chemistry*

B.A., Earlham College, 2001; M.A., Columbia University, 2009; Ph.D., 2014

**Naama Harel**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

B.A., Tel Aviv University (Israel), 1999; M.A., 2004; Ph.D., University of Haifa (Israel), 2010

**Fredrick C. Harris**

*Class of 1933 Professor of Political Science*

B.A., University of Georgia, 1985; M.A., Northwestern University, 1988; Ph.D., 1994

**Michael Harris**

*Professor of Mathematics*

A.B., Princeton University, 1973; A.M., Harvard University, 1976; Ph.D., 1977

**Phyllis Harris**

*Associate Professor of Professional Practice in the Faculty of the Arts*

B.A., Bennington College, 1961

**Carl Hart**

*Mamie Phipps Clark Professor of Psychology (in Psychiatry)*

B.S., University of Maryland, 1991; M.S., University of Wyoming, 1994, Ph.D., 1996

**Matthew Hart**

*Professor of English and Comparative Literature*

M.A. (Hons.), University of Edinburgh (U.K.), 1996; M.A., University of Sussex (U.K.), 1997; Ph.D., University of Pennsylvania, 2004

**Saidiya V. Hartman**

*Professor of English and Comparative Literature*

B.A., Wesleyan University, 1984; Ph.D., Yale University, 1992

**Christopher W. Harwood**

*Senior Lecturer in Slavic Languages*

B.A., Columbia University, 1990; M.A., 1992; M.Phil., 1995; Ph.D., 2000

**Geoffrey M. Heal**

*Donald C. Waitte III Professor of Social Enterprise in the*

*Faculty of Business and Professor of International and Public Affairs*

B.A., University of Cambridge, 1966; M.A., 1968; Ph.D., 1968

**Alice Heicklen**

*Senior Lecturer in Biological Sciences*

B.A., Penn State University, 1988; M.S., Tel Aviv University (Israel), 1991; Ph.D., Weizmann Institute of Science (Israel), 2000

**Larisa A. Heiphetz**

*Associate Professor of Psychology*

B.A., Pennsylvania State University, 2008; A.M., Harvard University, 2010; Ph.D., 2013

**David John Helfand**

*Professor of Astronomy*

B.A., Amherst College, 1973; M.S., University of Massachusetts, 1973; Ph.D., 1977

**Sidney R. Hemming**

*Arthur D. Storke Memorial Professor of Earth and Environmental Sciences*

B.S., Midwestern University, 1983; M.S., Tulane University, 1986; Ph.D., Stony Brook University - SUNY, 1994

**Wayne A. Hendrickson**

*University Professor*

B.A., University of Wisconsin-River Falls, 1963; Ph.D., Johns Hopkins University, 1968

**Alexander W. Hertel-Fernandez**

*Assistant Professor of International and Public Affairs*

B.A., Northwestern University, 2008; Ph.D., Harvard University, 2016

**Henry S. Hess**

*Professor of Biomedical Engineering*

B.S., Technische Universität Clausthal (Germany), 1993; M.S., Technische Universität Berlin, 1996; Ph.D., Freie Universität Berlin, 1999

**E. Tory Higgins**

*Stanley Schachter Professor of Psychology and Professor of Business*

B.A., McGill University (Canada), 1967; M.A., London School of Economics and Political Science, 1968; Ph.D., Columbia University, 1973

**Elizabeth M.C. Hillman**

*Associate Professor of Biomedical Engineering and of Radiology (Physics)*

M.Sc., University College London, 1998; Ph.D., 2002

**Shigeo Hirano**

*Professor of Political Science*

A.B., Harvard University, 1994; Ph.D., 2003

**Marianne Hirsch**

*William Peterfield Trent Professor of English*

B.A., Brown University, 1970; Ph.D., 1975

**Julia Bell Hirschberg**

*Percy K. and Vida L. W. Hudson Professor of Computer Science*

B.A., Eckert College, 1968; Ph.D., University of Michigan, Ann Arbor, 1976; MSEE, University of Pennsylvania, 1982; Ph.D., 1985

**Oliver Hobert**

*Professor of Biological Sciences and Systems Biology*

Ph.D. Planck Institute (Germany) 1995

**Gil Hochberg**

*Ransford Professor of Hebrew, Comparative Literature and Middle Eastern Studies*

Ph.D., University of California, Berkeley, 2002

**Baerbel Hoenisch**

*Professor of Earth and Environmental Sciences*

Vordipl., Bielefeld University (Germany), 1995; Dipl., University of Bremen (Germany), 1999; Ph.D., 2002

**Heidi L. Holst-Knudsen**

*Senior Lecturer in French*

B.A., Connecticut College, 1987; M.A., Columbia University, 1993; Ph.D., 2001

**Saeed Honarmand**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

B.A., University of Isfahan (Iran), 1980; M.A., Ohio State University, 2004; Ph.D., 2011

**Harrison G. Hong**

*John R. Eckel Jr. Professor of Financial Economics*

B.A., University of California, Berkeley, 1992; Ph.D., Massachusetts Institute of Technology, 1997

**Axel Honneth**

*Jack B. Weinstein Professor of the Humanities*

Ph.D., Freie Universität Berlin, 1982

**Joseph A. Howley**

*Associate Professor of Classics; Paul Brooke Program Chair for Literature Humanities*

B.A., University of Maryland, Baltimore County, 2006;

M.Litt., University of St. Andrews (Scotland), 2007; Ph.D., 2011

**Daniel J. Hsu**

*Assistant Professor of Computer Science*

B.S., University of California, Berkeley, 2004; M.S., University of California, San Diego, 2007; Ph.D., 2010

**Lingjun Hu**

*Senior Lecturer in East Asian Languages and Cultures*

B.A., Xi'an Foreign Language University (China), 2000; M.A., Ohio State University, 2003; M.A., Columbia University, 2018

**Jane Huang**

*Assistant Professor of Astronomy*

B.S., University of Chicago, 2014; M.A., Harvard University, 2016; Ph.D., 2020

**Ana Paula da Silva Huback**

*Senior Lecturer in Latin American and Iberian Cultures*

B.A., Faculdade de Filosofia Santa Doroteia (Brazil), 1997; M.A., Universidade Federal de Minas Gerais (Brazil), 2003; Ph.D., Universidade Federal de Minas Gerais and University of New Mexico, 2007

**Robert Glenn Hubbard**

*Russell L. Carson Professor of Finance and Professor of Economics*

B.A., University of Central Florida, 1979; B.S., 1979; A.M., Harvard University, 1981; Ph.D., 1983

**John D. Huber**

*Professor of Political Science*

B.A., Lawrence University, 1984; M.A., University of Rochester, 1989; Ph.D., 1991

**Pascale Hubert-Leibler**

*Senior Lecturer in French*

B.A., University of Paris III (France), 1979; M.A., 1980; Ph.D., 1984

**Emlyn W. Hughes**

*Professor of Physics*

B.S., Stanford University, 1982; M.A., Columbia University, 1984; Ph.D., 1987

**Ivana Nikolic Hughes**

*Senior Lecturer in Chemistry*

B.S., California Institute of Technology, 1999; M.S., Stanford University, 2000; Ph.D., 2005

**Theodore Q. Hughes**

*The Korea Foundation Professor of Korean Studies in the Humanities in the Department of East Asian Languages and Cultures*

B.A., University of California, San Diego, 1990; M.A., University of California, Los Angeles, 1997; Ph.D., 2000

**Lam Hui**

*Professor of Physics*

B.A., University of California, Berkeley, 1990; Ph.D., Massachusetts Institute of Technology, 1996

**Amy Hungerford**

*Ruth Fulton Benedict Professor of English and Comparative Literature*

B.A./M.A., Johns Hopkins University, 1992; M.A., 1993; Ph.D., 1999

**John F. Hunt**

*Professor of Biological Sciences*

A.B., Harvard University, 1982; Ph.D., Yale, 1993

**David H. Hwang**

*Professor of Theatre Arts in the Faculty of the Arts*

B.A., Stanford University, 1979

**Robert P. Hymes**

*Horace Walpole Carpentier Professor of Oriental Studies*

B.A., Columbia University, 1972; M.A., University of Pennsylvania, 1976; Ph.D., 1979

**I****Annette Insdorf**

*Professor of Film*

B.A., Queens College - CUNY, 1972; Ph.D., Yale University, 1975

**Elizabeth K. Irwin**

*Associate Professor of Classics*

B.A., Columbia University, 1991; M.A., University of Oxford, 1994; Ph.D., University of Cambridge, 1999

**N. Turkuler Isiksel**

*James P. Shenton Associate Professor of the Core Curriculum*

M.A., University of Edinburgh, 2003; M.A., Yale University, 2004; M.Phil., 2006; Ph.D., 2010

**Takatoshi Ito**

*Professor of International and Public Affairs*

Ph.D., Harvard University, 1979

**Marilyn J. Ivy**

*Associate Professor of Anthropology*

B.A., University of Oklahoma, 1975; M.A., University of Hawaii, 1979; M.A., Cornell University, 1982; Ph.D., 1988

**Valentina B. Izmirlieva**

*Professor of Slavic Languages*

B.A., Sofia University, 1986; M.A., 1987; M.A., Ohio State University; Ph.D., University of Chicago, 1999

**J****Karl H. Jacoby**

*Allan Nevins Professor of American Economic History*

A.B., Brown University, 1987; M.A., Yale University, 1992; Ph.D., 1997

**Dhananjay Jagannathan**

*Assistant Professor of Philosophy*

B.A., University of Texas at Austin, 2009; M.Phil., University of Cambridge, 2011; Ph.D., University of Chicago, 2017

**Leslie Jamison**

*Associate Professor of Writing in the Faculty of the Arts*

A.B., Harvard University, 2004; M.F.A., University of Iowa, 2006; M.A., Yale University, 2012

**Suman Jana**

*Assistant Professor of Computer Science*

B.E., Jadavpur University (India), 2003; M.S., University of Utah, 2009; Ph.D., University of Texas at Austin, 2014

**Merit E. Janow**

*Professor of Professional Practice in the Faculty of International and Public Affairs*

J.D., Columbia University, 1988

**Tony Jebara**

*Associate Professor of Computer Science*

B.S., McGill University (Canada), 1996; M.S., Massachusetts Institute of Technology, 1998; Ph.D., 2002

**Margo L. Jefferson**

*Professor of Professional Practice in Writing in the Faculty of the Arts*

M.S., Columbia University, 1971

**Songtao Jia**

*Professor of Biological Sciences*

B.S., Nankai University (China), 1994; Ph.D., University of California, Los Angeles, 2003

**Junyan Jiang**

*Assistant Professor of Political Science*

B.A., University of Hong Kong, 2009; M.A., University of Chicago, 2011; Ph.D., 2016

**Juan P. Jimenez**

*Senior Lecturer in Spanish, Latin American and Iberian Cultures*

B.A., Universidad del Valle (Colombia), 1996; M.A., Washington State University, 2001

**Bradley R. Johnson**

*Assistant Professor of Physics*

B.S. Bethel College, 1996; M.S. University of Minnesota, 1998; Ph.D. University of Minnesota, 2004

**Eleanor B. Johnson**

*Professor of English and Comparative Literature*

B.A., Yale University, 2001; M.A., University of California, Berkeley, 2006; Ph.D., 2009

**David C. Johnston**

*Professor of Political Science*

B.A., Swarthmore College, 1972; Ph.D., Princeton University, 1981

**Kathryn V. Johnston***Professor of Astronomy*

B.A., University of Cambridge, 1991; M.S., University of California, Santa Cruz, 1996; Ph.D., 1996

**Kellie E. Jones***Professor of Art History and of African American and African Diaspora Studies*

Ph.D., Yale University, 1999

**Troels Jorgensen***Professor Emeritus of Mathematics*

Ph.D., University of Copenhagen, 1970

**Branden W. Joseph***Frank Gallipoli Professor of Modern and Contemporary Art*

B.A., Stanford University, 1989; A.M., Harvard University, 1993; Ph.D., 1999

**Jamal Joseph***Professor of Professional Practice in Film in the Faculty of the Arts*

B.A., University of Kansas, 1987

**Marko Jovanovic***Associate Professor of Biological Sciences*

M.Sc., University of Vienna, 2004; Ph.D., University of Zurich, 2010

**Heidi S. Julavits***Professor of Writing*

M.F.A., Columbia University, 1996

**Ji-Young Jung***Senior Lecturer in Korean*

B.A., Kyungpook National University (South Korea), 1996; M.A., Columbia University, Teachers College, 2001; Ed.M., 2002; Ed.D., 2009

**K****Gail E. Kaiser***Professor of Computer Science*

B.S., Massachusetts Institute of Technology, 1979; M.S., Carnegie Mellon University, 1980; Ph.D., 1985

**Nikolas P. Kakkoufa***Senior Lecturer in Modern Greek*

B.A., University of Cyprus, 2008; M.A., 2010; Ph.D., King's College London, 2015

**Daniel D. Kalderon***Professor of Biological Sciences*

B.A., University of Cambridge, 1980; M.A., 1984; Ph.D., University of London, 1984

**Subhashini Kaligotla***Barbara Stoler Miller Associate Professor of Indian and South Asian Art*

B.S., Rutgers University, 1990; M.S., Purdue University, 1992; M.F.A., Columbia University, 2006; Ph.D., 2015

**Thomas S. Kalin***Professor of Professional Practice of Film in the Faculty of the Arts*

M.F.A., Art Institute of Chicago, 1986

**Eric R. Kandel***University Professor*

A.B., Harvard University, 1952; M.D., New York University, 1956

**Georgia Stelios Karagiorgi***Associate Professor of Physics*

B.Sc., Florida Institute of Technology, 2004; M.A., Columbia University, 2007; Ph.D., Massachusetts Institute of Technology, 2010

**Charry Karamanoukian***Senior Lecturer in Armenian, Middle Eastern, South Asian, and African Studies*

B.A., Concordia University (Canada), 1996; M.A., McGill University (Canada), 1998; Ph.D., 2001

**Ioannis Karatzas***Higgins Professor of Applied Probability and Professor of Statistics*

M.S., Columbia University, 1976; M.Phil., 1979; Ph.D., 1980

**Ali Karjoo-Ravary***Richard W. Bulliet Assistant Professor of Islamic History*

B.A., Stony Brook University, 2011; M.A., University of Pennsylvania, 2016; Ph.D., 2018

**Navin Kartik***Professor of Economics*

B.A., Brandeis University, 1999; Ph.D., Stanford University, 2004

**Kimuli K. Kasara***Associate Professor of Political Science*

B.A., University of Oxford, 1999; Ph.D., Stanford University, 2006

**Rebecca Kastleman***Assistant Professor of English and Comparative Literature*

A.B., Harvard University, 2006; A.M., 2014; Ph.D., 2017

**Ira I. Katznelson***Ruggles Professor of Political Science and History*

B.A., Columbia University, 1966; Ph.D., University of Cambridge, 1969

**Laura J. Kaufman***Professor of Chemistry*

B.A., Columbia University, 1997; Ph.D., University of California, Berkeley, 2002

**Sudipta Kaviraj***Professor of Middle Eastern, South Asian, and African Studies*

B.A., Presidency University (India), 1966; M.A., University of Calcutta (India), 1969; Ph.D., Jawaharlal Nehru University (India), 1979

**Peter B. Kelemen**

*Thomas Alva Edison/Con Edison Professor*

A.B., Dartmouth College, 1980; M.S., University of Washington, 1985; Ph.D., 1987

**Darcy B. Kelley**

*Harold Weintraub Professor of Biological Sciences*

B.A., Barnard College, 1970; Ph.D., Rockefeller University, 1975

**John R. Kender**

*Professor of Computer Science*

B.S., University of Detroit, 1970; M.S., University of Michigan, 1972; Ph.D., Carnegie Mellon University, 1980

**Jon Kessler**

*Professor of Visual Arts*

B.F.A., Purchase College - SUNY, 1980

**Alice Kessler-Harris**

*R. Gordon Hoxie Professor of American History in Honor of Dwight D. Eisenhower*

B.A., Goucher College, 1961; M.A., Rutgers University, 1963; Ph.D., 1968

**Mana Kia**

*Associate Professor of Middle Eastern, South Asian, and African Studies*

B.A., Vassar College, 1997; M.A., New York University, 2001; Ph.D., Harvard University, 2011

**Eunji Kim**

*Assistant Professor of Political Science*

B.A., Harvard University, 2011; M.A., The Wharton School, 2017; Ph.D., University of Pennsylvania, 2019

**Jungwon Kim**

*King Sejong Assistant Professor of Korean Studies*

A.M., Harvard University, 2001; Ph.D., 2007

**Martha A. Kim**

*Associate Professor of Computer Science*

A.B., Harvard University, 2002; M.S., University of Washington, 2005; Ph.D., 2008

**Seong Uk Kim**

*Il Hwan and Soon Ja Cho Associate Professor of Korean Culture and Religion*

B.A., Sogang University (South Korea), 1996; M.A., University of Georgia, 2007; Ph.D., University of California, Los Angeles, 2013

**Seth R. Kimmel**

*Associate Professor of Latin American and Iberian Cultures*

B.A., Columbia University, 2001; Ph.D., University of California, Berkeley, 2010

**Robert J. King**

*Professor of Film*

B.A., University of Oxford, 1997; Ph.D., University of California, Los Angeles, 2004

**Jonathan Kingslake**

*Associate Professor of Earth and Environmental Sciences*

Ph.D. University of Sheffield (U.K.), 2013

**David Kipping**

*Associate Professor of Astronomy*

M.A., University of Cambridge, 2006; M.Sc., 2007; Ph.D., 2011

**Binnie Kirshenbaum**

*Professor of Professional Practice in Writing in the Faculty of the Arts*

M.F.A., Brooklyn College - CUNY, 1984

**David A. Klass**

*Associate Professor of Professional Practice in Film in the Faculty of the Arts*

B.A., Yale University, 1982; M.A., University of Southern California, 1988

**Alexandra G. Kleeman**

*Assistant Professor of Writing in the Faculty of the Arts*

A.B., Brown University, 2007; M.A., University of California, Berkeley, 2008; M.F.A., Columbia University, 2012

**Holger A. Klein**

*Lisa and Bernard Selz Professor of Medieval Art History in the Department of Art History and Archaeology*

M.A., Courtauld Institute, 1994; Ph.D., University of Bonn (Germany), 2000

**Liza Knapp**

*Roberta and William Campbell Professor of the Humanities*  
A.B., Harvard University, 1977; Ph.D., Columbia University, 1985

**Jeffrey T. Koberstein**

*Percy K. and Vida L.W. Hudson Professor of Chemical Engineering*

B.S., University of Wisconsin, 1974; Ph.D., University of Massachusetts, 1979

**Rebecca A. Kobrin**

*Russell and Bettina Knapp Associate Professor of American Jewish History*

B.A., Yale University, 1994; Ph.D., University of Pennsylvania, 2002

**Bruce M. Kogut**

*Sanford C. Bernstein & Co. Professor of Leadership and Ethics*

B.A., University of California, Berkeley, 1975; M.I.A., Columbia University, 1978; Ph.D., Massachusetts Institute of Technology, 1983

**Folarin Kolawole**

*Assistant Professor of Earth and Environmental Sciences*  
B.Tech., Federal University of Technology, Akure (F.U.T.A.), Nigeria, 2008; M.Sc., Oklahoma State University, 2017; Ph.D., University of Oklahoma, 2020

**Wojciech Kopczuk**

*Professor of Economics and of International and Public Affairs*

B.A., University of Warsaw, 1996; M.Sc., 1996; M.A., University of Michigan, 1998; Ph.D., 2001

**Adam J. Kosto**

*James R. Barker Professor of Contemporary Civilization*  
B.A., Yale University, 1989; Ph.D., Harvard University, 1996

**Mariusz S. Kozak**

*Associate Professor of Music*  
B.M., University of New Mexico, 2006; M.M., Eastman School of Music, 2002; M.M., University of New Mexico, 2006; Ph.D., University of Chicago, 2012

**Samory Kpotufe**

*Professor of Statistics*  
B.A., University of Denver, 1999; Ph.D., University of California, San Diego, 2010

**Rosalind E. Krauss**

*University Professor*  
Ph.D., Harvard University, 1969

**Janet L. Kraynak**

*Senior Lecturer in Art History and Archaeology*  
B.A., Vassar College, 1987; Ph.D., The Graduate Center, City University of New York, 1993; Ph.D., Massachusetts Institute of Technology, 2001

**Paul B. Kreitman**

*Associate Professor of East Asian Languages and Cultures*  
B.A., University of Oxford, 2006; Ph.D., Princeton University, 2015

**Nikolaus Kriegeskorte**

*Professor of Psychology*  
M.A., Universität zu Köln (Germany), 1999; Ph.D., Universiteit Maastricht (Netherlands), 2004

**Brian H. Kulick**

*Professor of Professional Practice in the Faculty of the Arts*  
M.F.A., Carnegie Mellon University, 1987

**L****Elisabeth A. Ladenson**

*Professor of French*  
B.A., University of Pennsylvania, 1982; M.A., Columbia University, 1988; Ph.D., 1994

**Paul F. Lagunes**

*Assistant Professor of International and Public Affairs*

Ph.D., Yale University, 2012

**Meredith Landman**

*Lecturer in Slavic Languages*  
B.A., University of California, Santa Cruz, 1997; Ph.D., University of Massachusetts Amherst, 2006

**Tamar Lando**

*Associate Professor of Philosophy*  
B.A., Stanford University, 2002; M.A., University of California, Berkeley, 2008; Ph.D., 2012

**Jennifer La'O**

*Associate Professor of Economics*  
S.B., Massachusetts Institute of Technology, 2005; Ph.D., 2010

**Laura Landwebber**

*Professor of Biochemistry and Molecular Biophysics and of Biological Sciences (in Systems Biology)*  
A.B., Princeton University, 1989; M.A., Harvard University, 1991; Ph.D., 1993

**Dorothea S. Lasky**

*Associate Professor of Writing in the Faculty of the Arts*  
B.A., Washington University in St. Louis, 2000; M.F.A., University of Massachusetts-Amherst, 2004; M.E.D., Harvard University, 2006; E.D.D., University of Pennsylvania, 2012

**Victor D. Lavalle**

*Associate Professor of Practice in Writing in the Faculty of the Arts*  
M.F.A., Columbia University, 1998

**Jeffrey R. Lax**

*Professor of Political Science*  
B.A., Yale University, 1995; M.A., New York University, 1996; Ph.D., 2001

**Elizabeth Leake**

*Professor of Italian*  
B.A., University of California, Berkeley, 1989; M.A., 1993; Ph.D., 1998

**Eugenia Y. Lean**

*Professor of East Asian Languages and Cultures*  
B.A., Stanford University, 1990; M.A., University of California, Los Angeles, 1996; Ph.D., 2001

**Jack Lechner**

*Associate Professor of Professional Practice in Film in the Faculty of the Arts*  
B.A. Yale University, 1984

**Ana Paulina Lee**

*Associate Professor of Latin American and Iberian Cultures*  
B.A., Binghamton University - SUNY, 2001; M.A., New York University, 2007; Ph.D., University of Southern California, 2014

**Beom Lee**

*Lecturer in East Asian Languages and Cultures*

B.A., Hanyang University (Korea), 1988; M.A., 1990; M.A., Columbia University, 2002; M.Ed., 2005

**Jennifer Lee**

*Julian Clarence Levi Professor of Social Sciences*

B.A., Columbia University, 1990; M.A., 1995; Ph.D., 1998

**Sokbae Lee**

*Professor of Economics*

B.A., Seoul National University, 1996; M.A., 1998; Ph.D., University of Iowa, 2002

**Adam Leeds**

*Assistant Professor of Slavic Languages*

B.A., University of Chicago, 2005; Ph.D., University of Pennsylvania, 2016

**Agnieszka Legutko**

*Senior Lecturer in Yiddish, Germanic Languages*

M.A., Jagiellonian University (Poland), 2002; M.A., Columbia University, 2006; M.Phil., 2008; Ph.D., 2012

**James L. Leighton**

*Professor of Chemistry*

B.S., Yale University, 1987; Ph.D., Harvard University, 1994

**Yuri Levin**

*Professor of Physics*

B.Sc., University of Melbourne (Australia), 1993; Ph.D., California Institute of Technology, 1999

**George E. Lewis**

*Edwin H. Case Professor of Music*

B.A., Yale University, 1974

**Allison B. Lewko**

*Assistant Professor of Computer Science*

A.B., Princeton University, 2006; Ph.D., University of Texas at Austin, 2012

**Chao Li**

*Associate Professor of Mathematics*

B.S., Tsinghua University (China), 2010; Ph.D., Harvard University, 2015

**Feng Li**

*Professor of East Asian Languages and Cultures*

M.A., Institute of Archaeology (China), 1986; Ph.D., University of Chicago, 2000

**Yike Li**

*Lecturer in Chinese in the Department of East Asian Languages and Cultures*

B.A., Beijing Language and Culture University, 2009; M.A., 2016

**Natasha J. Lightfoot**

*Associate Professor of History*

B.A., Yale University, 1999; M.A., New York University, 2002; Ph.D., 2007

**Mark Lilla**

*Professor of the Humanities*

B.A., University of Michigan, 1978; M.P.P., Harvard University, 1980; Ph.D., 1990

**Francesco Lin**

*Associate Professor of Mathematics*

B.Sc., Università di Pisa (Italy), 2012; M.Sc., 2012; Ph.D., Massachusetts Institute of Technology, 2016

**Mark E. Lincicome**

*Associate Professor of East Asian Languages and Cultures*

B.A. Bowdoin College, 1976; Ph.D. University of Chicago, 1985

**Patricia G. Lindemann**

*Senior Lecturer in the Discipline of Psychology*

B.A., Wesleyan University, 1987; Ph.D., Columbia University, 2000

**Elliot Lipnowski**

*Associate Professor of Economics*

B.Math., University of Waterloo (Canada), 2010; M.A., New York University, 2014; Ph.D., 2016

**Mark Lipovetsky (Liederman)**

*Professor of Slavic Languages*

B.A. /M.A., Ural State University (Russia), 1986; Ph.D., Ural State University (Russia), 1989; D.Sc., Ural State Pedagogical University (Russia), 1996

**Samuel P. Lipsyte**

*Professor of Writing*

B.A., Brown University, 1990

**Chiu-Chu Melissa Liu**

*Professor of Mathematics*

B.S., National Taiwan University, 1996; Ph.D., Harvard University, 2002

**Jingchen Liu**

*Professor of Statistics*

B.S., Peking University (China), 2003; Ph.D., Harvard University, 2008

**Lening Liu**

*Professor of East Asian Languages and Cultures*

B.A., Shaanxi Normal University (China), 1982; M.A., 1985; Ph.D. University of Florida, 1996

**Lydia H. Liu**

*Wun Tsun Tam Professor in the Humanities*

B.A., Northwestern Normal University (China), 1979; M.A., Shandong University (China), 1983; Ph.D., Harvard University, 1990

**Qingmin Liu**

*Professor of Economics*

B.A., Peking University (China), 2002; Ph.D., Stanford University, 2007

**Reyes Llopis-Garcia**

*Senior Lecturer in Latin American and Iberian Cultures*  
B.A., Universidad Nebrija (Spain), 2002; M.A., 2002; Ph.D., 2009

**Shaw-Hwa Lo**

*Professor of Statistics and of Biostatistics*  
B.S., National Taiwan University, 1975; M.A., University of California, Santa Barbara, 1978; Ph.D., University of California, Berkeley, 1981

**Kyoko Loetscher**

*Senior Lecturer in Japanese, East Asian Languages and Cultures*  
B.A., Aoyama Gakuin University (Japan), 1987; M.A., Ohio State University, 1993

**Po-Ling Loh**

*Associate Professor of Statistics*  
B.S., California Institute of Technology, 2009; M.S., University of California, Berkeley, 2013; Ph.D., 2014

**Claudio W. Lomnitz**

*Campbell Family Professor of Anthropology*  
B.A., Universidad Autónoma Metropolitana Iztapalapa (Mexico), 1978; M.A., Stanford University, 1979; Ph.D., 1987

**Austin Long**

*Associate Professor of International and Public Affairs*  
B.S., Georgia Institute of Technology, 1998; M.S., 2002; Ph.D., Massachusetts Institute of Technology, 2010

**Nicola G. López**

*Associate Professor of Professional Practice in Visual Arts in the Faculty of the Arts*  
B.A., Columbia University, 1998; M.F.A., 2004

**Yao Lu**

*Professor of Sociology*  
B.A., Fudan University (China), 2003; M.A., University of California, Los Angeles, 2005; Ph.D., 2008

**Daniel Luban**

*Assistant Professor of Political Science*  
B.A., Swarthmore College, 2006; M.Phil., University of Cambridge (U.K.), 2008; M.A., University of Chicago, 2011; Ph.D., 2016

**Edward Luck**

*Professor of Professional Practice in the Faculty of International and Public Affairs*  
Ph.D. Columbia University, 2001

**David B. Lurie**

*Associate Professor of East Asian Languages and Cultures*  
A.B., Harvard University, 1993; M.A., Columbia University, 1996; Ph.D., 2001

*Professor of Classics*

B.A., University of Oxford, 1991; M.A., Princeton University, 1992; D.Phil., University of Oxford, 1997

**Mohammad Ali Arian Maleki**

*Associate Professor of Statistics*  
M.S., Stanford University, 2010; Ph.D., 2010

**Tal G. Malkin**

*Associate Professor of Computer Science*  
Ph.D., Massachusetts Institute of Technology, 2000

**Mahmood Mamdani**

*Herbert Lehman Professor of Government and Professor of Anthropology*  
B.A., University of Pittsburgh, 1967; M.A., Fletcher School of Law, 1968; M.A.L.D., 1969; Ph.D., Harvard University, 1974

**Sita Mani**

*Lecturer in the Discipline of Theatre Arts in the Faculty of the Arts*

**James L. Manley**

*Julian Clarence Levi Professor of the Life Sciences*  
B.S., Columbia University, 1971; Ph.D., Stony Brook University - SUNY, 1976

**Gregory Mann**

*Professor of History*  
B.A., University of Georgia, 1993; Ph.D., Northwestern University, 2000

**Wolfgang Rainer Mann**

*Professor of Philosophy*  
A.B., Princeton University, 1978; Ph.D., 1987

**Karuna Mantena**

*Professor of Political Science*  
B.S.c, London School of Economics, 1995; M.A., University of Essex, 1996; Ph.D., Harvard University, 2004

**Ellen L. Marakowitz**

*Senior Lecturer in Anthropology*  
B.A., Michigan State University, 1980; M.A., Columbia University, 1987; Ph.D., 1993

**Benjamin M. Marcus**

*Professor of Writing in the Faculty of the Arts*  
M.F.A., Brown University, 1991

**Sharon Marcus**

*Orlando Harriman Professor of English*  
B.A., Brown University, 1986; Ph.D., Johns Hopkins University, 1995

**Laurence Marie**

*Lecturer in French*  
Ph.D., Paris-Sorbonne University, 2008

**Szabolcs Marka**

*Walter O. LeCroy, Jr. Associate Professor of Physics*

Diploma, Lajos Kossuth University (Hungary), 1993; Ph.D., Vanderbilt University, 1999

**Bianca Jones Marlin**

*Herbert and Florence Irving Assistant Professor of Cell Research (in Psychology and Neuroscience) at the Mortimer B. Zuckerman Mind Brain Behavior Institute*  
B.S., St. John's University, 2009; Ph.D., New York University, 2015

**John Marshall**

*Associate Professor of Political Science*  
B.A., University of Oxford, St. Anne's College, 2008; M.Sc., University of Oxford, 2010; Ph.D., Harvard University, 2016

**Paraskevi Martzavou**

*Lecturer in Classics*  
B.A., Aristotle University of Thessaloniki (Greece), 1992; M.A., École Pratique des Hautes Études (France), 1998; Ph.D., 2008

**Caroline Marvin**

*Lecturer in Psychology*  
B.A., Yale University, 2001; M.A., Courtauld Institute of Art (United Kingdom), 2002; Ph.D., Columbia University, 2016

**Miya J. Masaoka**

*Assistant Professor of Professional Practice in Visual Arts in the Faculty of the Arts*  
B.A., San Francisco State University, 1991; M.A., Mills College, 1994

**Joseph A. Massad**

*Professor of Middle Eastern, South Asian, and African Studies*  
B.A., University of New Mexico, 1987; M.A., 1989; M.Phil., Columbia University, 1994; Ph.D., 1998

**Eric Matheis**

*Lecturer in French*  
B.A., University of Kansas, 1989; M.A., Columbia University, 2001; Ph.D., 2014

**Robert D. Mawhinney**

*Professor of Physics*  
B.S., University of South Florida, 1980; A.M., Harvard University, 1982; Ph.D., 1987

**Mark A. Mazower**

*Ira D. Wallach Professor of History*  
B.A., University of Oxford, 1981; M.A., Johns Hopkins University, 1983; Ph.D., University of Oxford, 1988

**Malgorzata Mazurek**

*Associate Professor of Polish Studies*  
M.A., University of Warsaw, 2004; Ph.D., 2008

**Andrew McCall**

*Assistant Professor of Political Science*

B.A., Truman State University, 2010; University of Oxford, 2012; M.A., University of California, Berkeley, 2017; Ph.D., 2019

**Shane A. McCrae**

*Associate Professor of Writing in the Faculty of the Arts*  
B.A., Linfield College, 2002; M.F.A., University of Iowa, 2004; J.D., Harvard University, 2007; M.A., University of Iowa, 2012

**Stephanie McCurry**

*R. Gordon Hoxie Professor of American History in Honor of Dwight D. Eisenhower*  
B.A., University of Western Ontario, 1981; M.A., University of Rochester, 1983; Ph.D., Binghamton University - SUNY, 1988

**Ann E. McDermott**

*Esther and Ronald Breslow Professor of Biological Chemistry and Professor of Biological Sciences and of Chemical Engineering*  
B.S., Harvey Mudd College, 1981; M.A., 1985; Ph.D., University of California, Berkeley, 1987

**James McIver**

*Assistant Professor of Physics*  
Ph.D., Harvard University, 2014

**Matthew P. McKelway**

*Takeo and Itsuko Atsumi Professor of Japanese Art History*  
B.A., Amherst College, 1989; M.A., Columbia University, 1991; M.Phil., 1997; Ph.D., 1999

**Galen A. McKinley**

*Professor of Earth and Environmental Sciences*  
B.S., Rice University, 1995; Ph.D., Massachusetts Institute of Technology, 2002

**Jerry F. McManus**

*Professor of Earth and Environmental Sciences*  
B.A., Columbia University, 1989; M.A., 1992; M.Phil., 1996; Ph.D., 1997

**V. Faye McNeill**

*Professor of Chemical Engineering and of Earth and Environmental Sciences*  
B.S., California Institute of Technology, 1999; M.S., 2001; Massachusetts Institute of Technology; Ph.D., 2005

**John H. McWhorter**

*Associate Professor of Slavic Languages*  
B.A., Rutgers University, 1985; M.A., New York University, 1987; Ph.D., Stanford University, 1993

**Tey Meadow**

*Associate Professor of Sociology*  
B.A., Barnard College, 1999; J.D., Fordham University School of Law; Ph.D., New York University, 2011

**Alberto Medina**

*Professor of Latin American and Iberian Cultures*

B.A., University of Salamanca (Spain), 1991; M.A., University of Southern California, 1994; Ph.D., New York University, 2000

**Eric R. Mendelsohn**

*Professor of Professional Practice in Film*

B.F.A., Purchase College - SUNY, 1986

**Susan E. Mendelsohn**

*Lecturer in English and Comparative Literature*

B.A., American University, 1996; M.A., University of Texas at Austin, 1998; Ph.D., 2012

**Edward Mendelson**

*Lionel Trilling Professor in the Humanities*

B.A., University of Rochester, 1966; M.A., Johns Hopkins University, 1968; Ph.D., 1969

**Yuan-Yuan Meng**

*Senior Lecturer in East Asian Languages and Cultures*

B.A., National Taiwan Normal University (Taiwan), 1988; M.A., Columbia University, 1992; M.A., 2013; M.Ed., 2018

**Duncan N. L. Menge**

*Associate Professor of Ecology, Evolution, and Environmental Biology*

Ph.D., Princeton University, 2008

**William H. Menke**

*Professor of Earth and Environmental Sciences*

B.S., Massachusetts Institute of Technology, 1976; M.S., 1976; Ph.D., Columbia University, 1982

**Maria Ignacia Mercadal Alborno**

*Assistant Professor of International and Public Affairs*

Ph.D., University of Chicago, 2016

**Christia Mercer**

*Gustave M. Berne Professor of Philosophy*

B.A., Brooklyn College - CUNY, 1974; M.A., Rutgers University, 1978; M.A., Princeton University, 1984; Ph.D., 1989

**Jessica E. Merrill**

*Associate Professor of Slavic Languages*

B.A., Northwestern University, 2003; M.A., University of California, Berkeley, 2007; Ph.D., 2012

**Brinkley M. Messick**

*Professor of Anthropology and of Middle Eastern, South Asian, and African Studies*

B.A., University of Pennsylvania, 1969; M.A., Princeton University, 1974; Ph.D., 1978

**Janet A. Metcalfe**

*Professor of Psychology*

B.Sc., University of Toronto, 1975; M.A., 1977; Ph.D., 1982

**Brian D. Metzger**

*Professor of Physics*

B.S., University of Iowa, 2003; M.A., University of California, Berkeley, 2005; Ph.D., 2009

**Meghan Meyer**

*Assistant Professor of Psychology*

B.A., Emory University, 2004; M.A., Ecole Normale Supérieure, 2006; Ph.D., University of California, Los Angeles, 2014

**Tatiana Mikhailova**

*Lecturer in Russian in the Department of Slavic Languages*

M.A., Ural State University, 1986

**Jeffery F. Milarsky**

*Senior Lecturer in Music*

B.M., The Julliard School, 1988; M.M., 1990

**Elizabeth A. Miller**

*Associate Professor of Biological Sciences*

B.Sc. (Hons), University of Melbourne (Australia), 1993; Ph.D., La Trobe University (Australia), 1999

**Andrew J. Millis**

*Professor of Physics*

A.B., Harvard University, 1982; Ph.D., Massachusetts Institute of Technology, 1986

**Denise Milstein**

*Senior Lecturer in Sociology*

B.A., Brown University, 1997; M.A., Columbia University, 2002; M.Phil., 2003; Ph.D., 2007

**Wei Min**

*Professor of Chemistry*

B.S., Peking University (China), 2003; Ph.D., Harvard University, 2008

**Vishal Misra**

*Professor of Computer Science*

B.S., Indian Institute of Technology, Bombay, 1992; M.S., University of Massachusetts, 1996; Ph.D., 2000

**Timothy P. Mitchell**

*William B. Ransford Professor of Middle Eastern, South Asian, and African Studies and Professor of International and Public Affairs*

B.A., University of Cambridge, 1977; M.A., Princeton University, 1979; Ph.D., 1984

**Henri C. Mitterand**

*Professor Emeritus of French*

Docteur ès Lettres, Ecole normale supérieure (France), 1969

**Tatiana Mocanu**

*Assistant Professor of Economics*

B.Sc., Otto-von-Guericke University (Germany), 2013; M.Sc., University of Bonn (Germany), 2015; Ph.D., University of Illinois at Urbana-Champaign, 2022

**Naeem Mohaiemen**

*Associate Professor of Visual Arts*

B.A., Oberlin College, 1993; M.A., Columbia University, 2015; Ph.D., 2019

**Graciela R. Montaldo**

*Professor of Latin American and Iberian Cultures*

B.A., Universidad de Buenos Aires, 1984; Ph.D., 1990

**Michele M. Moody-Adams**

*Joseph Straus Professor of Political Philosophy and Legal Theory*

B.A., Wellesley College, 1978; B.A., University of Oxford, 1980; A.M., Harvard University, 1986; Ph.D., 1986

**Rosalind C. Morris**

*Professor of Anthropology*

B.A., University of British Columbia (Canada), 1986; M.A., York University (Canada), 1989; Ph.D., University of Chicago, 1994

**Yves Mousallam**

*Assistant Professor of Earth and Environmental Sciences*

B.Sc., University of Ottawa, 2008; M.Sc., 2010; Ph.D., University of Cambridge, 2013

**Alfred H. Mueller**

*Enrico Fermi Professor of Physics*

B.S., Iowa State University, 1961; Ph.D., Massachusetts Institute of Technology, 1965

**Debashree Mukherjee**

*Associate Professor of Middle Eastern, South Asian and African Studies*

Ph.D. New York University, 2015

**Sumit Mukherjee**

*Associate Professor of Statistics*

B.A., Indian Statistical Institute (India), 2007; M.A., 2009; Ph.D., Stanford University, 2014

**Dipali Mukhopadhyay**

*Assistant Professor of International and Public Affairs*

B.A., Yale University, 2002; M.A., Tufts University, 2005; Ph.D., 2010

**Robert A. Mundell**

*University Professor Emeritus*

Ph.D., Massachusetts Institute of Technology, 1956

**Bahia Munem**

*Lecturer in the Discipline of Race and Ethnic Studies, and in the Department of Latin American and Iberian Cultures*

B.A., Rutgers University; M.A., 2014; Ph.D., 2016

**Maria Victoria Murillo**

*Professor of Political Science and of International and Public Affairs*

B.A., University of Buenos Aires, 1991; A.M., Harvard University, 1994; Ph.D., 1997

**Mary Pollard Murray**

*Associate Professor of English and Comparative Literature*

B.A., Columbia University, 1994; M.Phil., University of Cambridge, 1996; Ph.D., Yale University, 2004

**Stephen D. Murray**

*Lisa and Bernard Selz Professor of Medieval Art History in the Department of Art History and Archaeology*

B.A., University of Oxford, 1967; M.A., University of London, 1969; Ph.D., 1973

**John C. Mutter**

*Professor of Earth and Environmental Sciences and of International and Public Affairs*

B.S., University of Melbourne (Australia), 1969; M.S., University of Sydney (Australia), 1978; Ph.D., Columbia University, 1982

**Ioannis Mylonopoulos**

*Associate Professor of Art History and Archaeology*

B.A., National and Kapodistrian University of Athens, 1991; Ph.D., Heidelberg University (Germany), 2001

## N

**Shahid Naeem**

*Professor of Ecology, Evolution, and Environmental Biology*

B.A., University of California, Berkeley, 1979; M.A., 1984; Ph.D., 1988

**Suresh Naidu**

*Jack Wang and Echo Ren Professor of Economics*

M.A., University of Massachusetts Amherst, 2004; Ph.D., University of California, Berkeley, 2010

**Abdul Nanji**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

A.A., Corning Community College, 1966; B.A., State University of New York, College at New Paltz, 1969; M.A., 1975

**Abhay Pasupathy Narayan**

*Professor of Physics*

Ph.D., Cornell University, 2004

**Andrew J. Nathan**

*Class of 1919 Professor of Political Science*

A.B., Harvard University, 1963; A.M., 1965; Ph.D., 1971

**Gerald Navratil**

*Thomas Alva Edison Professor*

B.S., California Institute of Technology, 1973; M.S., University of Wisconsin-Madison, 1974; Ph.D., 1976

**Shree K. Nayar**

*T.C. Chang Professor of Computer Science*

B.S., Birla Institute of Technology (India), 1984; M.S., North Carolina State University, 1986; Ph.D., Carnegie Mellon University, 1990

**Fumiko Nazikian**

B.A., Iwate University (Japan), 1979; M.A., Tokyo Gakugei (Japan), 1984; M.A., Australian National University, 1986; Ph.D., University of Sydney, 1994

**Ronald Charles Neath**

*Lecturer in Statistics*

B.S., University of California, Davis, 1991; M.S., 1992; Ph.D., University of Minnesota, 2006

**Frances Negrón-Muntaner**

*Julian Clarence Levi Professor in the Humanities*

B.S., University of Puerto Rico, 1986; M.A., Temple University, 1991; Ph.D., Rutgers University, 2000

**Joao Nemi Neto**

*Senior Lecturer in Latin American and Iberian Cultures*

B.A., University of São Paulo (Brazil), 2000; M.A., 2007; M.Phil., The Graduate Center, City University of New York, 2012; Ph.D., 2015

**Lara J. Nettelfield**

*Senior Lecturer in Political Science*

B.A., University of California, 1995; M.A., Columbia University, 1999; M.Phil., 2001; Ph.D., 2006

**Meredith K. Nettles**

*Professor of Earth and Environmental Sciences*

A.B., Harvard University, 1995; M.S., University of Arizona, 2000; Ph.D., Harvard University, 2005

**Fay W. Ng**

*Senior Lecturer in Chemistry*

B.S., University of California, 1992; M.A., Yale University, 1993; Ph.D., Columbia University, 1997

**Serena Ng**

*Edwin W. Rickert Professor of Economics*

B.A., University of Western Ontario (Canada), 1980; M.A., 1982; M.A., Princeton University, 1992; Ph.D., 1993

**Mae Ngai**

*Lung Family Professor of Asian American Studies and Professor of History*

B.A., Empire State College - SUNY, 1992; M.A., Columbia University, 1993; M.A., 1995; Ph.D., 1998

**Lien-Hang Nguyen**

*Dorothy Borg Associate Professor of the History of American-East Asian Relations*

B.A., University of Pennsylvania, 1996; Ph.D., Yale University, 2008

**Phuong Chung Nguyen**

*Lecturer in Vietnamese*

B.A., Hanoi University, 2000; M.A., Hanoi National University, 2007

**Alberto Nicolis**

*Associate Professor of Physics*

Laurea, Pisa University (Italy), 1999; Diploma, Scuola Normale Superiore, Pisa (Italy), 1999; Ph.D., 2003

**Jason Nieh**

*Professor of Computer Science*

B.S., Massachusetts Institute of Technology, 1989; M.S., Stanford University, 1990; Ph.D., 1999

**Miharu Nittono**

*Senior Lecturer in East Asian Languages and Cultures*

B.A., Waseda University (Japan), 1980; M.A., 1983; M.A., Columbia University, 1991; M.Ed., 2001; Ed.D., 2003

**Jack R. Norton**

*Professor of Chemistry*

A.B., Harvard University, 1967; Ph.D., Stanford University, 1972

**Lynn I. Nottage**

*Professor of Theatre Arts in the Faculty of the Arts*

B.A., Brown University, 1986; M.F.A., Yale University, 1989

**Youssef Nouhi**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

M.A., University of Ottawa (Canada), 1996; M.A., University of Southern California, 2003

**Steven M. Nowick**

*Professor of Computer Science and of Electrical Engineering*

B.A., Yale University, 1976; M.A., Columbia University, 1979; Ph.D., Stanford University, 1993

**Colin P. Nuckolls**

*Sheldon and Dorothy Buckler Professor of Material Science in the Department of Chemistry*

B.S., University of Texas at Austin, 1993; Ph.D., Columbia University, 1998

**Michael Nutter**

*David N. Dinkins Professor of Professional Practice and Public Affairs*

B.S. University of Pennsylvania, 1979

**Marcel Nutz**

*Professor of Mathematics; Professor of Statistics*

Diploma Mathematics, ETH Zurich (Switzerland), 2007; Ph.D., 2010

**O**

**Jose A. Ocampo**

*Professor of Professional Practice in the Faculty of International and Public Affairs*

B.A., University of Notre Dame, 1972; Ph.D., Yale University, 1976

**Kevin N. Ochsner**

*Professor of Psychology*

B.A., University of Illinois, 1991; A.M., Harvard University, 1995; Ph.D., 1998

**Brendan Andrew O’Flaherty**

*Professor of Economics*

B.A., Harvard University, 1973; A.M., 1977; Ph.D., 1980

**Sharyn L. O’Halloran**

*George Blumenthal Professor of Political Economy and Professor of International and Public Affairs*

B.A., University of California, San Diego, 1985; M.A., 1988; Ph.D., 1991

**Keiko Okamoto**

*Lecturer in East Asian Languages and Cultures*

B.A., International Christian University (Japan), 1970; M.A., Columbia University, 1999

**Andrei Okounkov**

*Samuel Eilenberg Professor of Mathematics*

B.S., Moscow State University (Russia), 1993; Ph.D., 1995

**Angela V. Olinto**

*Professor of Astronomy and of Physics*

B.S., Pontifícia Universidade Católica (Brazil), 1981; Ph.D., Massachusetts Institute of Technology, 1987

**Paul E. Olsen**

*Arthur D. Storke Memorial Professor of Earth and Environmental Sciences*

B.A., Yale University, 1978; Ph.D., 1983

**Robert G. O’Meally**

*Zora Neale Hurston Professor of English and Comparative Literature*

A.B., Stanford University, 1970; A.M., Harvard University, 1971; Ph.D., 1975

**Ruth Opara**

*Assistant Professor of Music*

B.A./B.Ed., University of Nigeria, 2007; M.A., University of Louisville, Kentucky, 2012; Ph.D., University of Colorado, Bolder, 2017

**Benjamin S. Orlove**

*Professor of International and Public Affairs*

Ph.D., University of California, Berkeley, 1975

**Sebastian Otero**

*Assistant Professor of Economics*

B.A., Pontificia Universidad Católica de Chile, 2012; M.A., 2013; Ph.D., Stanford University, 2022

**Jonathan S. Owen**

*Associate Professor of Chemistry*

B.S., University of Wisconsin-Madison, 2000; Ph.D., California Institute of Technology, 2005

*Professor of Astronomy*

M.S., Utrecht University (Netherlands), 1984; Ph.D., 1987

**Matthew I. Palmer**

*Senior Lecturer in the Discipline of Ecology, Evolution and Environmental Biology*

B.S., Cornell University, 1996; Ph.D., Rutgers University, 2005

**Patrizia Palumbo**

*Senior Lecturer in Italian*

B.A., University of Turin (Italy), 1988; M.A., Columbia University, 1990; M.Phil., 1992; Ph.D., 1996

**Orhan Pamuk**

*Robert Yik-Fong Tam Professor in the Humanities*

B.A., University of Istanbul, 1976

**Arvind Panagariya**

*Jagdish N. Bhagwati Professor of Indian Political Economy*

Ph.D., Princeton University, 1978

**Liam Paninski**

*Professor of Neuroscience and of Statistics*

B.Sc., Brown University, 1999; Ph.D., New York University, 2003

**Christos H. Papadimitriou**

*Donovan Family Professor of Computer Science*

B.S. Athens Polytechnic, 1972; M.S., Princeton University, 1974; Ph.D., 1976

**Deborah A. Paredes**

*Associate Professor of Writing in the Faculty of the Arts*

B.A., Trinity University, 1993; Ph.D., Northwestern University, 2002

**Ah-Hyung Park**

*Lenfest Earth Institute Associate Professor of Climate Change*

B.A.S., University of British Columbia (Canada), 1998; M.A.S., 2000; Ph.D., Ohio State University, 2005

**Jisuk Park**

*Lecturer in East Asian Languages and Cultures*

B.A., University of Aichi (Japan), 2000; M.A., University of Wisconsin-Madison, 2002

**Edward C. Parker**

*Professor of Professional Practice in Theatre Arts in the Faculty of the Arts*

M.F.A., Columbia University, 1998

**Gerard F. Parkin**

*Professor of Chemistry*

B.A., University of Oxford, 1981; Ph.D., 1985

**John A. Parsons**

*Professor of Physics*

B.S., McMaster University (Canada), 1985; M.S., University of Toronto, 1986; Ph.D., 1990

**Michael J. Passaro**

*Associate Professor of Professional Practice in Theatre Arts in the Faculty of the Arts*

B.A., New York University, 1984; M.A., 1988

**Esther Pasztory**

*Lisa and Bernard Selz Professor Emerita of Pre-Columbian Art History and Archaeology*

B.A., Barnard College, 1965; M.A., Columbia University, 1967; Ph.D., 1971

**Christopher A.B. Peacocke**

*Johnsonian Professor of Philosophy*

B. Phil., University of Oxford, 1974; M.A., 1971; Ph.D., 1979

**Susan G. Pedersen**

*Gouverneur Morris Professor of History*

A.B., Harvard University, 1982; Ph.D., 1989

**Itshack G. Pe'er**

*Associate Professor of Computer Science*

B.S., Tel Aviv University, 1991; M.S., 1995; Ph.D., 2002

**John Pemberton, IV**

*Associate Professor of Anthropology*

B.A., Wesleyan University, 1970; M.A., 1972; M.A., Cornell University, 1981; Ph.D., 1989

**Feniosky A. Pena-Mora**

*Edwin Howard Armstrong Professor of Civil Engineering and Engineering Mechanics, Professor of Earth and Environmental Engineering, and of Computer Science*

M.S., Massachusetts Institute of Technology, 1991; Med.Sc.D., 1994

**Tao Peng**

*Lecturer in Chinese*

B.A., Hunan Normal University, 2003; M.Ed., Beijing Language and Culture University, 2009; Ph.D., University of California, Riverside, 2002

**Kerstin Perez**

*Lavine Family Associate Professor of the Natural Sciences*

M.S., California Institute of Technology, 2008; Ph.D., 2011

**Julie S. Peters**

*M. Gordon Garbedian Professor of English and Comparative Literature*

A.B., Yale University, 1981; Ph.D., Princeton University, 1986

**Tsevt Petrova**

*Lecturer in Political Science*

B.A., Cornell University, 2003; M.P.A., Cornell Institute for Public Affairs, 2005; Ph.D., Cornell University, 2011

**Anne Pfeifer**

*Assistant Professor of Germanic Languages*

B.A., Columbia University, 2004; M.A., University of Toronto, 2008; Ph.D., Yale University, 2015

**Gregory M. Pflugfelder**

*Associate Professor of East Asian Languages and Cultures*

A.B., Harvard University, 1981; M.A., Waseda University (Japan), 1984; Ph.D., Stanford University, 1996

**John D. Phan**

*Associate Professor of East Asian Languages and Cultures*

B.A., Saint Olaf College, 2002; M.A., Columbia University, 2005; Ph.D., Cornell University, 2012

**Justin H. Phillips**

*Eaton Professor of Political Science*

B.A., Lewis and Clark College, 1998; Ph.D., University of California, San Diego, 2005

**Kimberly Phillips-Fein**

*Robert Gardiner-Kenneth T. Jackson Professor of History*

B.A., University of Chicago, 1997; M.A., Columbia University, 1999; M. Phil., 2001; Ph.D., 2005

**Duong Hong Phong**

*Professor of Mathematics*

A.B., Princeton University, 1973; M.A., 1974; Ph.D., 1976

**Pablo A. Piccato**

*Professor of History*

B.A., Universidad Nacional Autónoma de México, 1990; Ph.D., University of Texas at Austin, 1997

**Noemie Pinardon-Touati**

*Assistant Professor of Economics*

M.Sc., HEC Paris, 2015; M.Phil., Université Paris-Saclay and Paris School of Economics, 2016; Ph.D., HEC Paris, 2022

**Aron Pinczuk**

*Professor of Applied Physics and of Physics*

Licenciado, University of Buenos Aires, 1962; Ph.D., University of Pennsylvania, 1969

**Eleonora Pistis**

*Assistant Professor of Art History and Archaeology*

Ph.D., Università Iuav di Venezia (Italy), 2011

**Caterina L. Pizzigoni**

*Associate Professor of History*

Laurea, University of Milano (Italy), 1996; Ph.D., King's College London, 2002

**Terry A. Plank**

*Arthur D. Storke Memorial Professor of Earth and Environmental Sciences*

A.B., Dartmouth College, 1985; M.A., Columbia University, 1987; M.Phil., 1991; Ph.D., 1993

**Pawel Polack**

*Assistant Professor of Statistics*

Ph.D. Swiss Finance Institute, 2014

**Lorenzo M. Polvani**

*Professor of Applied Physics and Applied Mathematics and of Earth and Environmental Sciences*

B.Sc., McGill University (Canada), 1981; M.S., 1982; Ph.D., Massachusetts Institute of Technology, 1988

**Cristian Pop-Eleches**

*Associate Professor of International and Public Affairs*  
A.B., Harvard University, 1998; A.M., 2000; Ph.D., 2003

**Ross Posnock**

*Anna S. Garbedian Professor of the Humanities*  
B.A., Kenyon College, 1974; M.A., Johns Hopkins University, 1976; Ph.D., 1980

**Elizabeth Povinelli**

*Franz Boas Professor of Anthropology*  
B.A., St. John's College, 1984; M.Phil., Yale University, 1988; Ph.D., 1991

**Andrea Prat**

*Richard Paul Richman Professor of Business and Professor of Economics*  
Ph.D., Stanford University, 1997

**Carlo Prato**

*Associate Professor of Political Science*  
B.A., Bocconi University, 2004; M.S., 2006; Ph.D., Northwestern University, 2012

**Kenneth Prewitt**

*Carnegie Professor of Public Affairs*  
Ph.D., Yale University, 1968

**Mary Ann Price**

*Senior Lecturer in the Discipline of Biological Sciences*  
B.S., University of Montevallo, 1987; Ph.D., John Hopkins University, 1992

**Frances Pritchett**

*Professor Emerita of Middle Eastern, South Asian, and African Studies*  
B.A., Radcliff College, 1969; M.A., University of California, Berkeley, 1973; Ph.D., University of Chicago, 1981

**Carol L. Prives**

*Da Costa Professor of Biology*  
B.Sc., McGill University (Canada), 1962; Ph.D., 1968

**Philip E. Protter**

*Professor of Statistics*  
B.A., Yale University, 1971; Ph.D., University of California, San Diego, 1975

**Ron M. Prywes**

*Professor of Biological Sciences*  
B.A., University of Pennsylvania, 1979; Ph.D., Massachusetts Institute of Technology, 1984

**Molly F. Przeworski**

*Alan H. Kempner Professor of Biological Sciences*  
A.B., Princeton University, 1994; Ph.D., University of Chicago, 2000

**Valerie J. Purdie-Greenaway**

*Professor of Psychology*  
B.A., Columbia University, 1993; Ph.D., Stanford University, 2005

**G. Michael Purdy**

*Professor of Earth and Environmental Sciences*  
B.S., Imperial College London, 1969; M.S., 1970; Ph.D., University of Cambridge, 1974

**Mary E. Putman**

*Professor of Astronomy*  
B.S., University of Wisconsin, 1996; Ph.D., 2001

**Q**

**Shaoyan Qi**

*Senior Lecturer in Chinese, East Asian Languages and Cultures*  
B.A., Huazhong University of Science and Technology (China), 1999; M.A., State University of New York, 2002; M.A., Villanova University, 2004

**Ying Qian**

*Associate Professor of East Asian Languages and Cultures*  
Ph.D. Harvard University, 2013

**Raquel Queiroz**

*Assistant Professor of Physics*  
B.Sc., Universidade Técnica de Lisboa (Portugal), 2009; M.Sc., Imperial College London (United Kingdom), 2010; Ph.D., University of Stuttgart (Germany), 2015

**Sophie C. Queuniet**

*Senior Lecturer in French*  
M.A., Université Sorbonne Nouvelle (France), 1991; M.A., Yale University, 1993; M.Phil., 1993; Ph.D., 1999

**Austin E. Quigley**

*Brander Matthews Professor of Dramatic Literature*  
B.A., University of Nottingham (U.K.), 1967; M.A., University of Birmingham (U.K.), 1969; Ph.D., University of California, Santa Cruz, 1971

**R**

**Daniel Rabinowitz**

*Professor of Statistics*  
B.A., University of California, Santa Cruz, 1985; Ph.D., Stanford University, 1991

**Sailakshmi Ramgopal**

*Assistant Professor of History*  
B.A., Northwestern University, 2006; Ph.D., University of Chicago, 2016

**Rakesh Ranjan**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

M.A., University of Delhi (India), 1985; M.Phil., 1988; Ph.D., 1997

**Maureen Elizabeth Raymo**

*G. Unger Vetlesen Professor of Earth and Climate Science*  
Sc.B., Brown University, 1982; M.A., Columbia University, 1985; M.Phil., 1988; Ph.D., 1989

**Shana Redmond**

*Professor of English and Comparative Literature*  
B.A., Macalester College, 2002; M.A., M.Phil., Yale University, 2006; Ph.D., 2008

**Adam D. Reich**

*Professor of Sociology*  
B.A., Brown University, 2004; M.A., University of California, Berkeley, 2007; Ph.D., 2012

**David R. Reichman**

*Centennial Professor of Chemistry*  
B.A., University of Chicago, 1992; Ph.D., Massachusetts Institute of Technology, 1997

**Ricardo Reis**

*Professor of Economics*  
B.Sc., London School of Economics, 1999; Ph.D., Harvard University, 2004

**Rodrigo Reis Soares**

*Lemann Professor of Brazilian Public Policy and International and Public Affairs*  
B.A., Federal University of Minas Gerais (Brazil), 1994; M.A., Pontifical Catholic University of Rio de Janeiro, 1997; Ph.D., University of Chicago, 2002

**Irina Reyfman**

*Professor of Slavic Languages*  
Diploma, University of Tartu (Estonia), 1973; Ph.D., Stanford University, 1986

**Aaron J. Ritzenberg**

*Senior Lecturer in English and Comparative Literature*  
B.A., Haverford College, 1998; M.A., Brandeis University, 2003; Ph.D., 2006

**Richard G. Robb**

*Professor of Professional Practice in the Faculty of International and Public Affairs*  
Ph.D., University of Chicago, 1985

**Bruce William Robbins**

*Old Dominion Foundation Professor in the Humanities*  
A.B., Harvard University, 1971; A.M., 1976; Ph.D., 1980

**Joyce Trina Robbins**

*Lecturer in Statistics*  
B.S.E., Princeton University, 1989; M.A., Tel Aviv University (Israel), 1994; Ph.D., Columbia University, 2002

**Camille Robcis**

*Professor of French*

B.A., Brown University, 1999; Ph.D., Cornell University, 2007

**Samuel K. Roberts**

*Associate Professor of History and of Sociomedical Sciences*  
A.B., University of Virginia, 1995; M.A., Princeton University, 1997; Ph.D., 2001

**Lauren Robertson**

*Associate Professor of English and Comparative Literature*  
B.A., St. John's College, 2008; Ph.D., Washington University in St. Louis, 2016

**Ailsa A. Roell**

*Professor of International and Public Affairs*  
Ph.D., Johns Hopkins University, 1983

**Diana P. Romero**

*Senior Lecturer in Spanish*  
B.A., Universidad de Los Andes (Colombia), 1994; M.A., University of Maryland, 1998; Ph.D., 2009

**Francisco Rosales-Varo**

*Senior Lecturer in Latin American and Iberian Cultures*  
M.A., University of Granada (Spain), 1991; Ph.D., 1998

**David K. Rosner**

*Ronald H. Lauterstein Professor of Sociomedical Sciences and Professor of History*  
B.A., City College of New York - CUNY, 1968; M.A., University of Massachusetts Boston, 1972; Ph.D., Harvard University, 1978

**Alan Ross**

*Assistant Attending of Classics*  
B.A., University College London, 2005; M.St., University of Oxford, 2006; Ph.D., 2011

**Carol Howe Rounds**

*Senior Lecturer in Italian*  
B.A., Columbia University, 1984; M.A., 1986; Ph.D., 1992

**Kenneth A. Ross**

*Professor of Computer Science*  
B.S., University of Melbourne (Australia), 1986; Ph.D., Stanford University, 1991

**David J. Rothman**

*Bernard Schoenberg Professor of Social Medicine and Professor of History*  
B.A., Columbia University, 1958; A.M., Harvard University, 1959; Ph.D., 1964

**Carol Rovane**

*Violin Family Professor of Philosophy; Carnoy Family Program Chair for Contemporary Civilization*  
Ph.D., University of Chicago, 1983

**Tomislav Rovis**

*Samuel Latham Mitchill Professor of Chemistry*  
B.Sc., University of Toronto, 1990; Ph.D., 1998

**Xavier S. Roy***Professor of Chemistry*

Ph.D., University of British Columbia (Canada), 2011

**Daniel S. Rubenstein***Associate Professor of Computer Science*

Ph.D., University of Massachusetts Amherst, 2000

**Dustin R. Rubenstein***Professor of Ecology, Evolution, and Environmental Biology*

B.A., Dartmouth College, 1999; Ph.D., Cornell University, 2006

**Jose P. Ruiz Campillo***Senior Lecturer in Latin American and Iberian Cultures*

B.A., University of Granada (Spain), 1987; M.A., 1993; Ph.D., 1999

**Guadalupe Ruiz-Fajardo***Senior Lecturer in Latin American and Iberian Cultures*

B.A., University of Granada (Spain), 1984; M.A., 1986; Ph.D., 1992

**Cynthia G. Rush***Associate Professor of Statistics*

B.S., University of North Carolina at Chapel Hill, 2010; M.A., Yale University, 2011; Ph.D., 2016

**Alessandra Russo***Professor of Latin American and Iberian Cultures*

Laurea, University of Bologna (Italy), 1996; M.A., École des Hautes Études en Sciences Sociales (France), 1997; Ph.D., 2006

**Maureen Ryan***Professor of Professional Practice of Film in the Faculty of the Arts*

M.F.A., Columbia University, 1992

**S****Emmanuelle M. Saada***Professor of French*

Ph.D., École des Hautes Études en Sciences Sociales (France), 2001

**Giulia Sacca***Assistant Professor of Mathematics*

B.S., Sapienza Università di Roma (Italy), 2006; M.S., 2008; Ph.D., Princeton University, 2013

**Jeffrey D. Sachs***University Professor*

A.B., Harvard University, 1976; A.M., 1978; Ph.D., 1980

**Evan D. Sadler***Associate Professor of Economics*

B.A., Princeton University, 2009; Ph.D., New York University, 2015

**Abolfazl Safikhani***Associate Professor of Economics*

Ph.D. Michigan State University, 2015

**Alessandra Saggin***Senior Lecturer in Italian*

M.A., University of Pisa (Italy), 1990

**Ozgur Sahin***Professor of Biological Sciences and of Physics*

B.S., Bilkent University (Turkey), 2001; M.S., Stanford University, 2003; Ph.D., 2005

**Xavier Sala-i-Martin***Jerome H. and Matthew S. Grossman Professor of Development Economics*

Licenciao Ciencias Economicas, Universitat Autònoma de Barcelona (Spain), 1985; A.M., Harvard University, 1987; Ph.D., 1990

**Bernard Salanié***Sami Mnaymneh Professor of Economics*

B.A., École Polytechnique (France), 1984; M.A., École Nationale de la Statistique et de l'Administration Économique (France), 1986; Ph.D., École des Hautes Études en Sciences Sociales (France), 1992

**Dalibor Sames***Associate Professor of Chemistry*

B.S., Charles University (Czech Republic), 1990; Ph.D., University of Arizona, 1996

**Vasile Ovidiu Savin***Professor of Mathematics*

M.S., University of Pittsburgh, 1999; Ph.D., University of Texas at Austin, 2003

**Simon M. Schama***University Professor*

M.A., University of Cambridge, 1969

**James A. Schamus***Professor of Professional Practice in Film in the Faculty of the Arts*

A.B., University of California, Berkeley, 1982; M.F.A., 1987; Ph.D., 2003

**Jose A. Scheinkman***Charles and Lynn Zhang Professor of Economics*

B.A., Universidade Federal do Rio de Janeiro (Brazil), 1969; M.S., Instituto de Matemática Pura e Aplicada (Brazil), 1970; M.A., Rochester University, 1973; Ph.D., 1974

**David Schiminovich***Professor of Astronomy*

B.Sc., Yale University, 1989; Ph.D., Columbia University, 1998

**Wolfram Schlenker***Associate Professor of International and Public Affairs and Economics*

Ph.D., University of California, Berkeley, 2003

**Jutta Schmiere-Heller***Senior Lecturer in Germanic Languages*

B.A., Westfälische Wilhelms-Universität Münster (Germany), 1996; M.A., 1996; M.A., Montclair State University, 2009

**Stephanie Schmitt-Grohé***Professor of Economics*

Vordiplom, Westfälische Wilhelms-Universität Münster (Germany), 1987; M.B.A., Baruch College - CUNY, 1989; Ph.D., University of Chicago, 1994

**Christopher H. Scholz***Professor of Applied Physics and Applied Mathematics and of Earth and Environmental Sciences*

B.S., University of Nevada, 1964; Ph.D., Massachusetts Institute of Technology, 1967

**Henning G. Schulzrinne***Julian Clarence Levi Professor of Mathematical Methods and Computer Science and Professor of Electrical Engineering*

B.S., Technische Universität Darmstadt (Germany), 1984; M.S., University of Cincinnati, 1987; Ph.D., University of Massachusetts Amherst, 1992

**Seth R. Schwartz***Lucius N. Littauer Professor of Classical Jewish Civilization*

B.A., Yeshiva University, 1979; M.A., Columbia University, 1981; M.Phil., 1982; Ph.D., 1985

**David A. Scott***Ruth and William Lubic Professor of Anthropology*

B.S., University of West Indies (Jamaica), 1980; M.A., New School for Social Research, 1983; Ph.D., 1989

**Guy Sella***Professor of Biological Sciences*

B.S., Tel Aviv University, 1993; M.S., Hebrew University, 1997; Ph.D., Tel Aviv University, 2001

**Ahmet Tunç #en***Assistant Professor of History*

B.A., Sabanc# University (Turkey), 2006; M.A., 2008; M.A., University of Chicago, 2010; Ph.D., 2016

**Bodhisattva Sen***Professor of Statistics*

B.Stat., Indian Statistical Institute (India), 2002; M.Stat., 2004; M.S., University of Michigan, 2007; Ph.D., 2008

**Neslihan Senocak***Associate Professor of History*

B.A., Middle East Technical (Turkey), 1994; Ph.D., Bilkent University (Turkey), 2002

**Rocco A. Servedio***Professor of Computer Science*

A.B., Harvard University, 1993; S.M., 1997; Ph.D., 2001

**Stephen R. Sestanovich***Kathryn and Shelby Cullom Davis Professor for the Practice of International Diplomacy*

Ph.D., Harvard University, 1978

**Lakshminarasimhan Kahil Sethumadhavan***Associate Professor of Computer Science*

Ph.D., University of Texas at Austin, 2007

**Michael H. Shaevitz***Professor of Physics*

B.S., Ohio State University, 1969; M.S., 1971; Ph.D., 1975

**Neel Shah***Assistant Professor of Chemistry*

B.S., New York University, 2008; Ph.D., Rockefeller University, 2013

**Avinoam Shalem***Riggio Professor of Art History*

Ph.D., University of Edinburgh, 1995

**Aziza Shanazerova***Assistant Professor of Religion*

B.A., Tashkent State University of Oriental Studies (TashkentPoland), 2007; M.A., 2008; Indiana University, 2013; Ph.D., 2019

**Wei Shang***Wm. Theodore and Fanny Brett de Bary and Class of 1941 Collegiate Professor of Asian Humanities, and Du Family Professor of Chinese Culture*

B.A., Peking University (China), 1982; M.A., 1984; Ph.D., Harvard University, 1994

**James Shapiro***Larry Miller Professor of English and Comparative Literature*

B.A., Columbia University, 1977; M.A., University of Chicago, 1978; Ph.D., 1982

**<Jill S. Shapiro***Senior Lecturer in the Discipline of Ecology, Evolution and Environmental Biology*

B.A., Barnard College, 1980; M.A., Columbia University, 1982; Ph.D., 1995

**Robert Y. Shapiro***Wallace S. Sayre Professor of Government and Professor of International and Public Affairs*

B.S., Massachusetts Institute of Technology, 1974; M.A., University of Chicago, 1977; Ph.D., 1982

**Teresa Christine Sharpe***Senior Lecturer in Sociology*

B.A., University of California, Berkeley, 1994; M.A., 2001; Ph.D., 2010

**Michael P. Sheetz***Professor Emeritus of Cell Biology*

B.A., Albion College, 1968; Ph.D., California Institute of Technology, 1972

**Yuri I. Shevchuk***Senior Lecturer in Slavic Languages*

M.A., Kyiv State University (Ukraine), 1983; Ph.D., 1987;

M.A., The New School, 1996

**Zhongqi Shi***Senior Lecturer in East Asian Languages and Cultures*

B.A., Beijing Language and Culture University (China), 2002;

M.A., 2005; Ph.D., Columbia University, 2018

**Haruo Shirane***Shincho Professor of Japanese Literature*

B.A., Columbia University, 1974; M.A., University of

Michigan, 1977; Ph.D., Columbia University, 1983

**Daphna Shohamy***Kavli Professor of Brain Science; Professor of Psychology*

B.A., Tel Aviv University, 1996; Ph.D., Rutgers University,

2003

**Gary Shteyngart***Professor of Writing in the Faculty of the Arts*

B.A., Oberlin College, 1995; M.F.A., Hunter College - CUNY,

2001

**David Sidorsky***Professor Emeritus of Philosophy*

B.A., New York University, 1948; M.A., 1952; Ph.D.,

Columbia University, 1962

**Shelly A. Silver***Professor of Professional Practice*

B.F.A., Cornell University, 1980

**Oliver Simons***Professor of Germanic Languages*

M.A., Humboldt-University (Germany), 1999; Ph.D., 2005

**Audra Simpson***Professor of Anthropology*

B.A., Concordia University (Canada), 1993; M.A., McGill

University (Canada), 1996; Ph.D., 2004

**Lorenzo Sironi***Associate Professor of Astronomy*

Ph.D., Princeton University, 2011

**Elaine R. Sisman***Anne Parsons Bender Professor of Music*

B.A., Cornell University, 1972; M.F.A., Princeton University,

1974; Ph.D., 1978

**Michael Skelly***Associate in Music Performance*

B.A. Columbia University, 1997

**Samuel Skippon***Lecturer in French*

M.Phil., Sorbonne University (France), 1994; M.A., New York

University, 2002

**Yana Skorobogatov***Gladys and Roland Harriman Assistant Professor of Russian and Soviet History*

B.A., University of California, Berkeley, 2009; M.A.,

University of Texas, Austin, 2012; Ph.D., University of

California, Berkeley, 2018

**Joseph R. Slaughter***Associate Professor of English and Comparative Literature*

B.A., University of Florida, 1989; M.A., University of Texas at

Austin, 1994; Ph.D., 1998

**Mario Small***Quetelet Professor of Social Science*

B.A., Carleton College, 1996; M.A., Harvard University, 1998;

Ph.D., 2001

**Mikhail Smirnov***Senior Lecturer in Mathematics*

B.S., M.S., Moscow University (Russia), 1989; M.A.,

Princeton University, 1992; Ph.D., 1995

**Pamela H. Smith***Seth Low Professor of History*

B.A., University of Wollongong (Australia), 1979; Ph.D.,

Johns Hopkins University, 1991

**Sable Smith***Assistant Professor of Visual Arts*

B.A., Oglethorpe University, 2011; M.F.A. Parsons, The New

School for Design, 2013

**Alla A. Smyslova***Senior Lecturer in Slavic Languages*

M.A., Moscow State Pedagogical Institute of Foreign

Languages (Russia); M.A., Indiana University at Bloomington;

Ph.D., Bryn Mawr College

**Jack L. Snyder***Robert and Renee Belfer Professor of International Relations*

A.B., Harvard University, 1973; Ph.D., Columbia University,

1981

**Adam H. Sobel***Professor of Applied Physics and Applied Mathematics and of Earth and Environmental Sciences*

B.A., Wesleyan University, 1989; M.A., Massachusetts

Institute of Technology, 1997; Ph.D., 1998

**Michael E. Sobel***Professor of Statistics*

B.A., Florida State University, 1972; M.S., University of

Wisconsin-Madison, 1975; M.A., 1978; Ph.D., 1980

**Sean C. Solomon***William B. Ransford Professor of Earth and Planetary Science*

B.S., California Institute of Technology, 1966;

Ph.D., Massachusetts Institute of Technology, 1971

**Josef Sorett**

*Professor of Religion and of African American and African Diaspora Studies*

B.S., Oral Roberts University, 1996; M.Div., Boston University, 2000; Ph.D., Harvard University, 2008

**Naoko Sourial**

*Assistant Professor, Department of Political Science*

B.A., University of Tokyo (Japan), 2015; Ph.D. Princeton University, 2020

**Alfredo Spagna**

*Lecturer in the Discipline of Psychology*

B.A., Sapienza, University of Rome (Italy), 2006; M.A., 2010; Ph.D., 2013

**Edward A. Spiegel**

*Rutherford Professor of Astronomy*

B.A., University of California, Los Angeles, 1952; M.S., University of Michigan, 1954; Ph.D., 1958

**Maura Spiegel**

*Senior Lecturer in English and Comparative Literature*

B.A., Bennington College, 1976; Ph.D., Columbia University, 1993

**Marc W. Spiegelman**

*Arthur D. Storke Memorial Professor of Earth and Environmental Sciences and Professor of Applied Physics and Applied Mathematics*

A.B., Harvard University, 1985; Ph.D., University of Cambridge, 1989

**Barbara Spinelli**

*Senior Lecturer in Italian*

B.A., University of Perugia (Italy), 1989; M.A., University of Venice (Italy), 2001

**Gayatri Chakravorty Spivak**

*University Professor*

B.A., University of Calcutta (India), 1959; M.A., Cornell University, 1962; Ph.D., 1967

**James Stafford**

*Assistant Professor of History*

B.A., University of Oxford, 2010; M.Phil., University of Cambridge, 2012; Ph.D., 2016

**Joanna R. Stalnaker**

*Professor of French*

Ph.D., New York University, 2002

**Michael F. Stanislawski**

*Nathan J. Miller Professor of Jewish History*

A.B., Harvard University, 1973; A.M., 1975; Ph.D., 1979

**Amy A. Starecheski**

*Senior Lecturer in the Discipline of Sociology*

B.A. Columbia University, 1999; M.A., 2005; Ph.D., City University of New York, 2014

**David C. Stark**

*Arthur Lehman Professor of Sociology and International Affairs*

A.B., Princeton University, 1972; A.M., Harvard University, 1977; Ph.D., 1982

**Ursula M. Staudinger**

*Robert N. Butler Professor*

M.A., Friedrich-Alexander University of Erlangen-Numberg (Germany), 1984; Ph.D., Freie Universität Berlin, 1988

**Benjamin A. Steege**

*Associate Professor of Music and Music Humanities Program Chair*

B.A., Columbia University, 2000; Ph.D., Harvard University, 2007

**Clifford S. Stein**

*Professor of Industrial Engineering and Operations Research and of Computer Science*

Ph.D., Massachusetts Institute of Technology, 1992

**Deborah T. Steiner**

*Jay Professor of Greek and Latin Languages*

A.B., Harvard University, 1982; M.Litt., University of Oxford, 1984; Ph.D., University of California, Berkeley, 1991

**Alma Steingart**

*Assistant Professor of History*

B.A., Columbia University, 2006; Ph.D., Massachusetts Institute of Technology, 2013

**Alfred Stepan**

*Wallace S. Sayre Professor Emeritus of Government, Professor Emeritus of Political Science, and Dean Emeritus of the Faculty of International and Public Affairs*

B.A., Notre Dame University, 1958; B.A., Balliol College (U.K.), 1960; M.A., 1960; Ph.D., Columbia University, 1969

**Nancy Leys Stepan**

*Professor Emeritus of History*

Ph.D., University of California, Los Angeles, 1971

**Anders G. Stephanson**

*Andrew and Virginia Rudd Family Foundation Professor of History*

B.A., University of Gothenburg (Sweden), 1975; B.Phil., University of Oxford, 1977; Ph.D., Columbia University, 1986

**Rhiannon Stephens**

*Professor of History*

B.A., University of London, 2000; M.A., Northwestern University, 2002; Ph.D., 2007

**Magdalena A. Stern-Baczewska**

*Senior Lecturer in the Discipline of Music*

B.M., The New School, 2001; M.M., 2003; DMA., Manhattan College of Music, 2008

**Alan G. Stewart**

*Professor of English and Comparative Literature*

B.A., University of Cambridge, 1988; Ph.D., 1993

**Dustin D. Stewart**

*James P. Shenton Associate Professor of the Core Curriculum*  
B.A., Baylor University, 2001; M.A., 2004; Ph.D., University of Texas, 2013

**Joseph E. Stiglitz**

*University Professor*  
B.A., Amherst College, 1964; Ph.D., Massachusetts Institute of Technology, 1967

**Brent R. Stockwell**

*William R. Kenan, Jr. Professor of Biological Sciences, Professor of Chemistry and Professor of Pathology and Cell Biology*  
B.A., Cornell University, 1994; Ph.D., Harvard University, 1999

**Salvatore J. Stolfo**

*Professor of Computer Science*  
B.S., Brooklyn College - CUNY, 1974; M.S., New York University, 1976; Ph.D., 1979

**Paul Strohm**

*Anna S. Garbedian Professor Emeritus of the Humanities*  
B.A., Amherst College, 1960; M.A., University of California, Berkeley, 1962; Ph.D., 1966

**Zoë S. Strother**

*Riggio Professor of African Art; Jonathan Sobel and Marcia Dunn Program Chair for Art Humanities*  
B.A., Bryn Mawr College, 1982; M.A., Yale University, 1984; M.A., 1987; Ph.D., 1992

**Joowon Suh**

*Senior Lecturer in East Asian Languages and Cultures*  
B.A., Sogang University (Korea), 1990; M.A., 1993; M.A., Columbia University, 1998; M.Ed., 2000; Ed.D., 2007

**Chiara Superti**

*Lecturer in Political Science*  
B.A., University of Bologna (Italy), 2006; M.P.I.A., University of California, 2009; Ph.D., Harvard University, 2015

**Peter M. Susser**

*Senior Lecturer in Music*  
B.A., Bennington College, 1981; M.M., Manhattan School of Music, 1984; DMA, Columbia University, 1994

**Tomi Suzuki**

*Professor of East Asian Languages and Cultures*  
B.A., University of Tokyo, 1974; M.A., 1977; Ph.D., Yale University, 1988

**Jan Svejnar**

*James T. Shotwell Professor of Global Political Economy*  
B.S., Cornell University, 1974; M.A., Princeton University, 1976; Ph.D., 1979

**Mariame I. Sy**

*Senior Lecturer in Middle Eastern, South Asian, and African Studies*

M.A., East Stroudsburg University, 1996; M.A., University of California, Los Angeles, 2003; Ph.D., 2007

**Sarah M. Sze**

*Professor of Visual Arts in the Faculty of the Arts*  
B.A., Yale University, 1991; M.F.A., School of Visual Arts, 1997

**T**

**Chikako Takahashi**

*Lecturer in Japanese*  
M.A., Teachers College, Columbia University, 2012; Ph.D., Stony Brook University, 2020

**Simon Tavare**

*Professor of Statistics and of Biological Sciences*  
B.Sc., University of Sheffield (U.K.), 1974; M.S., 1975; Ph.D., 1979

**Mark C. Taylor**

*Professor of Religion*  
B.A., Wesleyan University, 1968; Ph.D., Harvard University, 1973; Doktorgrad, University of Copenhagen, 1981

**Pietro Tebaldi**

*Assistant Professor of Economics*  
B.A., Bocconi University (Italy), 2009; M.Sc., 2011; Ph.D., Stanford University, 2016

**Makeda Tekle-Smith**

*Assistant Professor of Chemistry*  
B.A., Pomona College, 2014; Ph.D., Columbia University, 2019

**Dennis Tenen**

*Associate Professor of English and Comparative Literature*  
B.A., University of Michigan, 2001; Ph.D., Harvard University, 2011

**Herbert S. Terrace**

*Professor of Psychology*  
B.A., Cornell University, 1957; M.A., 1958; Ph.D., Harvard University, 1961

**Michael Thaddeus**

*Professor of Mathematics*  
A.B., Harvard University, 1988; D.Phil., University of Oxford, 1992

**Yannik Thiem**

*Associate Professor of Religion*  
B.A., University of Tuebingen (Germany), 1998; M.A., 2002; Th.D., 2004; M.A., University of California, Berkeley, 2004; Ph.D., 2009

**Marissa Thompson**

*Assistant Professor of Sociology*

B.S.E., University of Pennsylvania, 2016; M.A., Stanford University, 2019; Ph.D., 2021

#### **Calvin Thrall**

*Assistant Professor of Political Science*

B.A., Temple University, 2017; Ph.D., University of Texas at Austin, 2022

#### **Jiang Tianqi**

*Lecturer in East Asian Languages and Cultures*

B.A., Northwestern University, 2010; M.A., Beijing Language and Culture University (China), 2013; Ph.D., 2019

#### **Michael M. Ting**

*Professor of International and Public Affairs and of Political Science*

S.B., Massachusetts Institute of Technology, 1992; A.M., Harvard University, 1995; Ph.D., Stanford University, 1999

#### **Rirkrit Tiravanija**

*Professor of Professional Practice in Visual Arts in the Faculty of the Arts*

B.A., Ontario College of Art (Canada), 1984; M.A., School of the Art Institute of Chicago, 1986

#### **T. Colm Toibin**

*Irene and Sidney B. Silverman Professor of the Humanities*

B.A., University College Dublin, 1975

#### **Maya Tolstoy**

*Professor of Earth and Environmental Sciences*

B.Sc., University of Edinburgh, 1988; Ph.D., University of California, San Diego, 1994

#### **Raju Tomer**

*Assistant Professor of Biological Sciences*

B. Tech - M. Tech Dual Degree, Indian Institute of Technology, Delhi, 2004; Ph.D., European Molecular Biology Laboratory, 2010

#### **Pier Mattia Tommasino**

*Associate Professor of Italian*

B.A., Università degli Studi, Pisa (Italy), 2002; M.A., Università degli Studi, Urbino (Italy), 2003; Ph.D., Scuole Normale Superiore, Pisa (Italy), 2009

#### **Liang Tong**

*William R. Kenan, Jr. Professor of Biological Sciences*

B.S., Peking University (China), 1983; Ph.D., University of California, Berkeley, 1989

#### **Adam Tooze**

*Kathryn and Shelby Cullom Davis Professor of History;*

*Director of the European Institute*

Ph.D., London School of Economics, 1996

#### **Gerard Torrats-Espinoso**

*Assistant Professor of Sociology*

B.S., Polytechnic University of Catalonia (Spain), 2004; MPP, Harvard University, 2014; Ph.D., New York University, 2019

#### **Maria Tosches**

*Assistant Professor Biological Sciences*

Ph.D., Scuola Normale Superiore (Italy), 2012

#### **Nim Tottenham**

*Professor of Psychology*

B.A., Barnard College, 1996; Ph.D., University of Minnesota, 2005

#### **Lisa Trever**

*Lisa and Bernard Selz Associate Professor of Pre-Columbian Art History and Archaeology*

B.A., Yale University, 2000; M.A., University of Maryland, 2005; A.M., Harvard University, 2007; Ph.D., 2013

#### **Sonam Tsering**

*Senior Lecturer in East Asian Languages and Cultures*

B.A., University of London (United Kingdom), 2005

#### **Takuya Tsunoda**

*Assistant Professor of Japanese Visual Culture*

B.A., Waseda University, 2002; M.A., Columbia University, 2005; M.A., 2008; Ph.D., Yale University, 2015

#### **Philip Michael Tuts**

*Professor of Physics*

B.S., Massachusetts Institute of Technology, 1974; Ph.D., Stony Brook University - SUNY, 1979

#### **Gray Tuttle**

*Leila Hadley Luce Associate Professor of Modern Tibetan Studies*

Ph.D., Harvard University, 2002

## **U**

#### **Elsa Ubeda**

*Lecturer in Latin American and Iberian Cultures*

B.A., University of Barcelona (Spain), 2002; M.A. Menéndez Pelayo International University (Spain), 2009

#### **Yasutomo Uemura**

*Professor of Physics*

B.S., University of Tokyo, 1977; M.S., 1979; D.Sc., 1982

#### **Joseph C. Ulichny**

*Senior Lecturer in the Discipline of Chemistry*

B.S., University of Scranton, 2006; M.A., Columbia University, 2008

#### **Eric Jean-Paul Urban**

*Professor of Mathematics*

Ph.D., University of Paris-Sud, 1994

#### **Nadia Urbinati**

*Kyriakos Tsakopoulos Professor of Political Theory and Hellenic Studies*

Laurea, University of Bologna (Italy), 1977; Master, University of Parma (Italy), 1980; Ph.D., European University Institute of Florence (Italy), 1989

**Maria Uriarte**

*Professor of Ecology, Evolution, and Environmental Biology*  
B.A., University at Albany - SUNY, 1986; M.A., Yale University, 1995; Ph.D., Cornell University, 2002

**Martin Uribe**

*Robert A. Mundell Professor of Economics*  
B.A., Universidad Nacional de Córdoba (Argentina), 1987; M.A., University of Centro de Estudios Macroeconómicos de Argentina, 1989; Ph.D., University of Chicago, 1994

**Miguel S. Urquiola**

*Professor of Economics and of International and Public Affairs*

B.A., Swarthmore College, 1992; Ph.D., University of California, Berkeley, 2000

**V****Alison M. Vacca**

*Gevork M. Avedissian Associate Professor of Armenian History and Civilization*  
B.A., Nazareth College of Rochester, 2006; Ph.D., University of Michigan, 2013

**James J. Valentini**

*Henry L. and Lucy G. Moses Professor*  
B.S., University of Pittsburgh, 1972; M.S., University of Chicago, 1973; Ph.D., University of California, Berkeley, 1976

**Paolo Valesio**

*Guiseppe Ungaretti Professor Emeritus of Italian Literature*  
Ph.D., University of Bologna (Italy), 1969

**Marc Van De Mierop**

*Miriam Champion Professor of History*  
B.A., Katholieke Universiteit Leuven (Belgium), 1978; M.A., Yale University, 1980; Ph.D., 1983

**Anne Margrete Nicolien van Delft**

*Assistant Professor of Statistics*  
B.Sc., Maastricht University (Netherlands), 2011; M.Sc., 2012; Ph.D., 2016

**Karen R. Van Dyck**

*Kimon A. Doukas Professor of Hellenic Studies*  
B.A., Wesleyan University, 1983; M.A., Aristotelian University (Greece), 1985; D.Phil., University of Oxford, 1990

**Vladimir Vapnik**

*Professor of Computer Science*  
Ph.D., Institute of Control Sciences (Russia), 1964

**Achille C. Varzi**

*John Dewey Professor of Philosophy*  
Laurea Hons., University of Trento (Italy), 1982; M.A., University of Toronto, 1983; Ph.D., 1994

**Thibault Vatter**

*Assistant Professor of Statistics*

B.Sc., Swiss Federal Institute of Technology, 2010; M.Sc., 2012; Ph.D., HEC Lausanne, 2016

**Diane Vaughan**

*Professor of Sociology and of International and Public Affairs*  
B.A., Ohio State University, 1973; M.A., 1974; Ph.D., 1979

**Yamil Velez**

*Assistant Professor of Political Science*  
B.A., Florida State University, 2010; M.A., Stony Brook University, 2012; Ph.D., 2015

**Latha Venkataraman**

*Professor of Applied Physics and Chemistry*  
B.S., Massachusetts Institute of Technology, 1993; M.S., Harvard University, 1997; Ph.D., 1999

**Venkat Venkatasubramanian**

*Samuel Ruben-Peter G. Viele Professor of Engineering*  
Ph.D., Cornell University, 1984

**Sudhir A. Venkatesh**

*William B. Ransford Professor of Sociology*  
B.A., University of California, San Diego, 1988; M.A., University of Chicago, 1992; Ph.D., 1997

**Eric A. Verhoogen**

*Professor of International and Public Affairs and of Economics*

A.B., Harvard University, 1991; M.A., University of Massachusetts Amherst, 1998; Ph.D., University of California, Berkeley, 2004

**Gauri Viswanathan**

*Class of 1933 Professor of English and Comparative Literature*  
B.A., University of Delhi (India), 1971; M.Ed., Columbia University, 1984; Ph.D., 1985

**Katja Vogt**

*Professor of Philosophy*  
B.A., University of Munich (Germany), 1990; M.A., 1992; Ph.D., 1996

**Katharina Volk**

*Professor of Classics*  
M.A., University of Munich (Germany), 1994; M.A., Princeton University, 1996; Ph.D., 1999

**Dorothea von Mücke**

*Gebhard Professor of German Language and Literature*  
Staatsexamen Germanistik, University of Mannheim (Germany), 1981; M.A., Stanford University, 1983; Ph.D., 1988

**Tomas Vu-Daniel**

*LeRoy Neiman Professor of Professional Practice in Visual Arts in the Faculty of the Arts*  
B.F.A., University of Texas at El Paso, 1988; M.F.A., Yale University, 1990

**Gordana Vunjak-Novakovic***University Professor*

Ph.D., University of Belgrade, 1980

**W****David Walker***Higgins Professor of Earth and Environmental Sciences*

B.A., Oberlin College, 1968; A.M., Harvard University, 1970; Ph.D., 1972

**Nicole B. Wallack***Senior Lecturer in English and Comparative Literature*

B.A., McGill University (Canada), 1988; M.A., University of Edinburgh (United Kingdom), 1989; Ph.D., New York University, 2004

**Wendy S. Walters***Associate Professor of Writing*

B.A., University of Michigan, 1992; M.F.A., Cornell University, 1995; M.A., 1997; Ph.D., 2000

**Hailong Wang***Lecturer in East Asian Languages and Cultures*

B.A., Jiangsu Normal University (China); M.A., Shanghai Normal University (China); M.A., Columbia University, 1993

**Mu-Tao Wang***Professor of Mathematics*

M.S., National Taiwan University, 1992; Ph.D., Harvard University, 1998

**Zhirong Wang***Senior Lecturer in East Asian Languages and Cultures*

B.A., Peking University (China), 1987; Ph.D., University of Wisconsin-Madison, 2003

**Christopher J. Washburne***Professor of Music*

B.A., University of Wisconsin, 1986; M.A., Columbia University, 1992; Ph.D., 1999

**Ebonya Washington***Laurans A. and Arlene Mendelson Professor of Economics; Professor of International and Public Affairs*

B.A., Brown University, 1995; Ph.D., Massachusetts Institute of Technology, 2003

**Michael J. Waters***Assistant Professor of Art History and Archaeology*

B.F.A., University of Illinois at Urbana-Champaign, 2005; M. Arch. History, University of Virginia, 2007; Ph.D., Institute of Fine Arts, New York University, 2015

**Gregory J. Wawro***Professor of Political Science*

B.A., Pennsylvania State, 1990; Ph.D., Cornell University, 1997

**Elke U. Weber***Jerome A. Chazen Professor of International Business and Professor of Psychology*

B.A., York University (Canada), 1980; Ph.D., Harvard University, 1984

**Hannah Weaver***Associate Research Scholar in the Department of English and Comparative Literature*

B.A., Boston University, 2009; M.A., University of Toronto (Canada), 2014; A.M., Harvard University, 2015; Ph.D., 2019

**Lance D. Weiler***Associate Professor of Professional Practice in Film in the Faculty of Arts***David E. Weinstein***Carl Sumner Shoup Professor of Japanese Economics*

B.A., Yale University, 1985; M.A., University of Michigan, 1988; Ph.D., 1991

**Michael I. Weinstein***Professor of Applied Mathematics and of Mathematics*

Ph.D., New York University, 1982

**Omri Weinstein***Assistant Professor of Computer Science*

B.Sc., Tel Aviv University, 2010; Ph.D., Princeton University, 2015

**Renata Maria Wentzcovitch***Professor of Material Science and Applied Physics, and Earth and Environmental Science*

B.S., University of São Paulo, 1980; M.S., 1982; Ph.D., University of California, Berkeley, 1988

**Jennifer Ann Wenzel***Professor of English and Comparative Literature and of Middle Eastern, South Asian, and African Studies*

B.A., University of Texas at Austin, 1990; M.A., Indiana University, 1992; Ph.D., University of Texas, Austin, 1998

**Bruce Western***Bryce Professor of Sociology and Social Justice*

B.A., University of Queensland (Australia), 1987; M.A., University of California, Los Angeles, 1990; Ph.D., 1993

**Harrison C. White***Giddings Professor Emeritus of Sociology*

B.Sc., Massachusetts Institute of Technology, 1950; Ph.D., 1955; Ph.D., Princeton University, 1960

**Joshua D. Whitford***Associate Professor of Sociology*

B.A., University of Wisconsin-Madison, 1993; M.S., 1997; Ph.D., 2003

**Sebastian Will***Associate Professor of Physics*

Diplom., Johannes Gutenberg University Mainz 2006; Ph.D., 2011

**Gareth D. Williams**

*Anthon Professor of Latin Language and Literature*  
B.A., University of Cambridge, 1986; Ph.D., 1990

**Jack J. Willis**

*Assistant Professor of Economics*  
B.A., University of Cambridge, 2006; M.A., Paris School of Economics, Université Paris I, 2009; Ph.D., Harvard University, 2017

**Mabel O. Wilson**

*Nancy and George Rupp Professor of Architecture, Planning and Preservation; Professor of African American and African Diaspora Studies*  
B.S., University of Virginia, 1985; M.Arch, Columbia University, 1991; Ph.D., New York University, 2007

**Andreas Wimmer**

*Lieber Professor of Political Philosophy*  
M.A., University of Zurich, 1989; D.Phil., 1992

**Jason M. Wingard**

*Professor of Professional Studies*  
B.A., Stanford University, 1995; M.A., Emory University, 1996; Ed.M., Harvard University, 1997; Ph.D., University of Pennsylvania, 2000

**Michael Witgen**

*Professor of History*  
B.A., Texas Christian University, 1988; M.A., University of Washington, 1998; Ph.D., 2004

**Peter G. Woit**

*Senior Lecturer in Mathematics*  
A.B., M.A., Harvard University, 1979; Ph.D., Princeton University, 1985

**Michael Woodford**

*John Bates Clark Professor of Political Economy*  
A.B., University of Chicago, 1977; J.D., Yale University, 1980; Ph.D., Massachusetts Institute of Technology, 1983

**Sarah Woolley**

*Professor of Psychology*  
B.A., University of Colorado, 1991; Ph.D., University of Washington, 1999

**Henryk Wozniakowski**

*Professor Emeritus of Computer Science*  
M.S., University of Warsaw, 1969; Ph.D., 1972

**Chen Wu**

*Senior Lecturer in East Asian Languages and Cultures*  
B.A., Fudan University (China), 2006; M.A., 2009; M.A., University of Wisconsin-Madison, 2011; Ph.D., 2016

**Eugene Wu**

*Assistant Professor of Computer Science*  
Ph.D., Massachusetts Institute of Technology, 2014

**X****Jia Xu**

*Senior Lecturer in Chinese, East Asian Languages and Cultures*  
B.A., Beijing Language and Culture University, 2005; M.Ed., 2009

**Jin Xu**

*Jane and Leopold Swergold Associate Professor of Chinese Art History*  
B.A., Renmin University (China); M.A., Peking University (China); Ph.D., University of Chicago, 2017

**Y****Lili Yamasaki**

*Senior Lecturer in the Discipline of Biological Sciences*  
B.S., University of Michigan, 1982; Ph.D., University of Texas at San Antonio, 1991

**Ling Yan**

*Senior Lecturer in East Asian Languages and Cultures*  
B.A., Northwest University, 1986; M.A., Northwestern Polytechnical University (China), 1996; Ph.D., University of Kansas, 2005

**Jian Yang**

*Professor of Biological Sciences*  
M.S., Academia Sinica (Taiwan), 1985; Ph.D., University of Washington, 1991

**Junfeng Yang**

*Associate Professor of Computer Science*  
B.S., Tsinghua University (China), 2000; M.S., Stanford University, 2002; Ph.D., 2008

**Zhaohua Yang**

*Sheng Yen Assistant Professor of Chinese Buddhism*  
Ph.D., Stanford University, 2013

**Mihalis Yannakakis**

*Percy K. and Vida L.W. Hudson Professor of Computer Science*  
Dipl., National Technical University of Athens, 1975; M.S., Ph.D., Princeton University, 1979

**Keren Yarhi-Milo**

*Adlai E. Stevenson Professor of International Relations*  
B.A., Columbia University, 2003; Ph.D., University of Pennsylvania, 2010

**Tuncel M. Yegulalp**

*Professor Emeritus of Mining in the Department of Earth and Environmental Engineering*  
Eng.Sc.D., Columbia University, 1968

**David M. Yerkes**

*Professor of English and Comparative Literature*

B.A., Yale University, 1971; B.A., University of Oxford, 1973; D.Phil., 1976

### **Hyunkyu Yi**

*Lecturer in East Asian Languages and Cultures*

B.A., Yonsei University (Korea), 1982; M.A., 1987

### **Zhiliang Ying**

*Professor of Statistics*

B.S., Fudan University (China), 1982; M.A., Columbia University, 1984; Ph.D., 1987

### **Gabriel J. Young**

*Lecturer in Statistics*

B.S., Metropolitan State University of Denver, 2009; M.S., Colorado State University, 2012; Ph.D., 2016

### **Chun-Fang Yu**

*Sheng Yen Professor Emerita of Chinese Buddhism and Professor Emerita of East Asian Languages and Cultures*  
Ph.D., Columbia University, 1973

### **Ming Yuan**

*Professor of Statistics*

B.S., University of Science and Technology of China, 1997; M.S., 2000; M.S., University of Wisconsin-Madison, 2003; Ph.D., 2004

### **Yi Yuan**

*Lecturer in the Discipline of East Asian Languages and Cultures*

B.A., East China Normal University, 2004; M.A., 2007; M.A., Columbia University, 2013; Ph.D., 2020

### **Rafael Yuste**

*Professor of Biological Sciences and of Neuroscience*  
M.D., Autónoma de Madrid, 1987; Ph.D., Rockefeller University, 1992

## **Z**

### **William A. Zajc**

*I.I. Rabi Professor of Physics*

B.S., California Institute of Technology, 1975; Ph.D., University of California, Berkeley, 1982

### **Konstantina Zanou**

*Associate Professor of Italian*

B.A., National School of Dramatic Art, Greece, 1997; B.A., National and Kapodistrian University of Athens, 2000; M.A., Birkbeck College, University of London, 2002; Ph.D., University of Pisa (Italy), 2007; European Doctorate, École Normale Supérieure (France), 2008

### **Tanya Zelevinsky**

*Professor of Physics*

S.B., Massachusetts Institute of Technology, 1999; A.M., Harvard University, 2001; Ph.D., 2004

### **Madeleine H. Zelin**

*Dean Lung Professor of Chinese Studies*

B.A., Cornell University, 1970; Ph.D., University of California, Berkeley, 1979

### **James E.G. Zetzel**

*Anthon Professor Emeritus of the Latin Language and Literature*

A.B., Harvard University, 1968; A.M., 1970; Ph.D., 1973

### **Changxi Zheng**

*Assistant Professor of Computer Science*

M.S., Cornell University, 2010; Ph.D., 2012

### **Tian Zheng**

*Professor of Statistics*

B.Sc., Tsinghua University (China), 1998; M.A., Columbia University, 2000; Ph.D., 2002

### **Xiaoyang Zhu**

*Howard Family Professor of Nanoscience in the Department of Chemistry*

B.S., Fudan University (China), 1984; Ph.D., University of Texas at Austin, 1989

### **Alan Ziegler**

*Professor of Professional Practice*

B.A., Union College, 1970; M.A., City College of New York - CUNY, 1974

### **Eliza Zingesser**

*Associate Professor of French*

B.A., Smith College, 2005; M.A., Princeton University, 2008; Ph.D., 2012

## **BOARD OF VISITORS 2024–25**

Alisa Amarosa Wood '01, BUS'08, Chair  
Michael J. Schmidtberger, Esq. '82, LAW'85, Vice Chair  
Dean Josef Sorett

Jonathan D. Bram '87  
Leslie Gittess Brodsky '88  
Germaine Choe '95  
Maurice Coleman '91, SIPA'99  
James H. Dignan '91  
Michele A. Esposito '96  
Michelle Estilo Kaiser M.D., M.P.H., '87, PH92, PH97  
Jenny Fan Raj '00  
Andrew A. Fink '91, LAW'94  
Dede Gardner '90  
Michelle Jacobson Goldberg '91  
Robert J. Grey '72  
Alicia Guevara '94  
Peter A. Hatch '92  
Britta Wilson Jacobson '96  
Mojdeh L. Khaghan, Esq. '88, LAW'91  
Nicholas Paul Leone '88  
Ji Liu  
Christopher J. McGowan '92  
Eric A. Mendelson '87, BUS'89

Rachel Esther Neuhut M.D., '03, PS07  
 Jen Maxfield Ostfeld '99, JRN'00  
 Vijay Mohan '01  
 Luis Penalver '89  
 Renan Pierre '86, SEAS'87  
 John A. Rogovin '83  
 Teresa M. Saputo-Crerend '87, BUS'92  
 Michael S. Satow '88  
 Mozelle W. Thompson Esq. '76, SIPA'79, LAW'81  
 Anthony Tutrone '86  
 Sharmila H. Tuttle '96, SIPA'05  
 William A. von Mueffling '90, BUS'95  
 Raymond H. Yu '89, SEAS90

## OFFICERS OF COLUMBIA COLLEGE 2024-2025

### **Josef Sorett**

*Dean of Columbia College and Vice President for Undergraduate Education*  
 B.S., Oral Roberts University, 1996; M.Div., Boston University, 2000; Ph.D., Harvard University, 2008

### **Corey S. Aronstam**

*Senior Associate Dean for Columbia College Development and Deputy Vice President for Development, Columbia College and Arts and Sciences*  
 B.A., Nazareth College, 1998; M.B.A., Wagner College, 2001

### **Lisa Hollibaugh**

*Dean of Academic Affairs*  
 B.A., Rice University, 1990; M.A., Columbia University, 1996; Ph.D., 2005

### **Jessica Marinaccio**

*Dean of Undergraduate Admissions and Financial Aid*  
 A.B., Harvard University, 1991; M.Ed., 1994

### **Shannon P. Marquez**

*Dean of Undergraduate Global Engagement*  
 B.S., Prairie View A&M University, 1992; M.Eng., Texas A&M University, 1993; Ph.D., University of North Carolina at Chapel Hill, 1998

### **James T. McMenamin, Jr.**

*Senior Associate Dean for Columbia College Development and Senior Director of Principal Gifts, Office of Alumni and Development*  
 B.A., Johns Hopkins University, 1971

### **Andrew Plaa**

*Dean of Advising, James H. and Christine Turk Berick Center for Student Advising*  
 B.A., McGill University (Canada), 1983; M.A., Columbia University, 1986; M.Phil., 1987; Ph.D., 1994

### **Kavita Sharma**

*Dean of Career Education*

B.Sc., University of Southampton, 1989; M.Sc., London School of Economics, 1991; M.A., Teachers College, Columbia University, 2012

### **Elizabeth Albes**

*Advising Dean, James H. and Christine Turk Berick Center for Student Advising*  
 B.A., Johns Hopkins University, 2007; M.A., Columbia University, 2014; M.A., 2017; M.Phil. 2019; Ph.D., 2022

### **Melinda Aquino**

*Associate Dean of Multicultural Affairs, Undergraduate Student Life*  
 B.A., University of Florida, 1998; M.A., University of Miami, 2001; M.A., New York University, 2005; M.S., Columbia University, 2012

### **Veronica Bjorkman**

*Director of Family Outreach and Support*  
 B.A., University of Alaska Fairbanks, 2012; M.A., Eastern Kentucky University, 2015

### **Marcela D. Calidonio**

*Advising Dean, James H. and Christine Turk Berick Center for Student Advising*  
 B.A., Columbia University, 2006

### **Scott W. Carpenter**

*Associate Dean, The Center for Undergraduate Global Engagement*  
 B.A., Dickinson College, 1995; M.A., New York University, 1996; M.Phil., 1999

### **Angie Carrillo**

*Associate Dean, James H. and Christine Turk Berick Center for Student Advising*  
 B.A., University of California, Los Angeles, 1999; M.A., Teachers College, Columbia University, 2000; Ed.M., 2007

### **Cindy Cogdill**

*Advising Dean, James H. and Christine Turk Berick Center for Student Advising*  
 B.S., Southeast Missouri State University, 1983; M.S.Ed., Southern Illinois University, 1988

### **Jason Collado**

*Assistant Dean, James H. and Christine Turk Berick Center for Student Advising*  
 B.A., University at Albany, SUNY, 1997; M.S., 2000

### **Manoushka Constant**

*Senior Advising Dean, James H. and Christine Turk Berick Center for Student Advising*

# FEES, EXPENSES, AND FINANCIAL AID

## ESTIMATED EXPENSES FOR THE ACADEMIC YEAR

An itemized estimate of the cost of attending Columbia College for the **2024–2025 academic year** of nine months is as follows:

Tuition	\$68,000
Mandatory Fees	\$3,170
Average Room and Board Cost	\$17,580
Books and Personal Expenses	\$3,992
Travel	varies
<b>Total</b>	<b>\$92,742 + Travel</b>

There is an additional charge of \$570 for new students who are required to attend Orientation.

Information on planning and managing educational expenses is contained at <https://sfs.columbia.edu/>

## FEES

The following fees, prescribed by statute for each Fall or Spring term, are subject to change at any time at the discretion of the Trustees. The fees shown are those in effect during the 2024–2025 academic year.

University charges, such as tuition and fees, residence halls, and dining plans, are due and payable in full by the date announced before the beginning of each term. To check on an account balance, log in to [Student Services Online \(SSOL\)](#) or call 212-854-4400. A late payment penalty is assessed on payments received after the due date.

It is the policy of the University to withhold all University services, including registration, diplomas, and official transcripts, until all financial obligations have been met.

### Tuition 2024–2025

There is a flat tuition charge for all Columbia College students, including visitors, regardless of the number of credits a student is taking. Students who are enrolled for eight terms must pay the flat tuition, regardless of the number of credits they are taking. **The charge for 2024–2025 is \$34,000 a term.**

Postgraduate special students and degree candidates enrolled for a ninth term are billed according to the per-point system; the per-point cost is \$2,188.

### Late Registration Fee

Students who register after the scheduled period (see *Academic Calendar*) are charged a late registration fee of \$100.

### Mandatory Fees\*

Student Life Fee*	\$1,782
Columbia Health and Related Services Fee	\$1,388
<b>Total</b>	<b>\$3,170</b>

\*Students registered in Columbia College (Fall Term): \$891;  
Students registered in Columbia College (Spring Term): \$891

### Document Fee

All first-time registrants at Columbia University are charged a one-time document fee of \$105, which thereafter allows them to order transcripts and enrollment and degree certifications, and to receive the mailing of the original diploma at no additional charge. This fee appears on the first Student Account Statement of the Fall term.

### International Services Charge

All students holding a non-resident visa are charged an international services charge of \$160 each term, totaling \$320 for academic year 2024–2025. This fee supports the University's services to international students.

## Columbia Health and Related Services Fee and Student Health Insurance Premiums

### Columbia Health and Related Services Fee

The Columbia Health and Related Services Fee is paid by all\* students (including hybrid, online only, and study abroad students) for access to the health and well-being resources, programs, and services provided by Columbia Health and our partners. This mandatory, non-refundable fee cannot be waived and is not pro-rated.

- One-on-one conversations and workshops on stress, sleep, time management, alcohol and drug education, wellness coaching, pet therapy, HIV testing and treatment counseling, birth control education and counseling, PrEP and PEP consultation, sexual health peer counseling, and gender affirming care coordination through [Alice! Health Promotion](#), including the Gay Health Advocacy Project (GHAP)
- Online and in-person academic, classroom, campus, housing, and event accommodations for students with disabilities (including chronic conditions and temporary injuries) and non-clinical consultations around academic difficulties related to attention issues or learning difficulties through [Disability Services](#)
- Crisis counseling, intervention, advocacy, connection to resources, online orders of protection, accompaniment for survivors and co-survivors of violence, as well as

violence prevention trainings and workshops through [Sexual Violence Response](#)

- Guidance around health insurance enrollment, submitting a waiver request, benefits, claims, and other insurance matters through the [Student Health Insurance Team](#)
- Support for complying with University immunization requirements through the [Immunization Compliance Office](#)
- No out-of-pocket cost flu vaccines and confidential HIV Testing
- Public health infrastructure and support programs such as campus policy and contact tracing for infection disease outbreaks routine and urgent medical care, nutrition, travel medicine, immunizations (most at no-cost), sexual health services, reproductive and gynecological services, LGBTQ + health care, on-campus laboratory (fee may apply if not on the Columbia Plan), acupuncture, sports medicine, and much more through [Medical Services](#)
- in-person and virtual short-term individual counseling, referrals for longer term therapy, virtual support spaces, in-person support groups, urgent mental health concerns drop-ins, and problem-solving/coping skills drop-ins, medication consultation, and emergency consultation through [Counseling and Psychological Services](#)

\*Part-time and half-time domestic students who are not on the Columbia University Student Health Insurance Plan pay a reduced fee, but can elect to [upgrade to the full-time fee](#) to access the full range of resources, programs, and services.

The Columbia Health and Related Services Fee is billed separately for each term. The periods of coverage and fees for 2024–2025 are as follows:

Fall Term	August 15, 2024– December 31, 2024	\$694
Spring Term	January 1, 2025– August 14, 2025	\$694

### Student Health Insurance Premiums

To ensure students have access to high-quality healthcare while at Columbia, University policy requires all full-time students and all international students to have health insurance coverage that meets University requirements, in addition to the on-campus programs and services provided by Columbia Health. Columbia University offers the Columbia Student Health Insurance Plan (Columbia Plan), administered and underwritten by Aetna Student Health. Please visit the [Columbia Health Insurance page](#) for plan benefits and cost.

### International students

Navigating the U.S. healthcare system can be complex. To help ensure that international students have access to the highest quality of care on- and off-campus, Columbia University requires all international students to enroll in the **Columbia**

**Student Health Insurance Plan.** On a limited case-by-case basis, international students may qualify for a waiver.

### Waivers and exceptions

Students who have an alternate insurance plan that meets established criteria set by the University may submit a request for a waiver. Visit the Columbia Health website for more information about [waiver](#) criteria.

Waiver and exception requests are **due at least two weeks before the enrollment deadline** (September 30 for Fall enrollment; February 15 for new Spring enrollment; or June 15 for new Summer enrollment). All requests are considered, but approval is not guaranteed. Students who do not submit a request for a waiver in a timely manner will be charged the insurance premium on their term bill and are responsible for these charges.

Students must confirm their enrollment or submit a waiver request on the Columbia Health Patient Portal **every year**. Students will receive reminders through their Columbia email.

Please contact the Student Health Insurance Team with any questions. They can be reached via [studentinsurance@columbia.edu](mailto:studentinsurance@columbia.edu), or by visiting the office on the 3rd Floor of John Jay Hall.

### HEALTH INSURANCE PREMIUM BY SEMESTER

Fall Term	August 15, 2024– December 31, 2024	\$1,888
Spring Term	January 1, 2025– August 14, 2025	\$3067

### Withdrawal and Adjustment of Fees

Withdrawal is defined as the dropping of one's entire program in a given term as opposed to dropping a portion of one's program (see *Academic Regulations*). Any student withdrawing from the College must notify the [Center for Student Advising](#) in writing; **notification to instructors or failure to attend classes does not constitute an official withdrawal from the College and will result in failing grades in all courses.**

A student who withdraws is charged a withdrawal fee of \$75. In addition, students will be charged a housing fee once they leave a university residence. All application fees, late fees, and other special fees are not refundable if the student withdraws after the first 30 days of classes, and any coverage remains in effect until the end of the term. **Students who withdraw or are dismissed from the University and are on the Columbia Student Health Insurance Plan** will be terminated from the insurance plan and receive a pro-rated refund of any remaining premium as a credit to their student account. As with other University fees, the Columbia Health and Related Services Fee is non-refundable and not pro-rated.

### Medical Leave

Students who are on an approved medical leave of absence are eligible to remain on the Columbia Student Health Insurance Plan for a cumulative maximum of two semesters during the course of the student's entire enrollment within a particular school at Columbia, regardless of the length of program.

Medical leaves must be approved by the student's academic unit and reflected in the Student Information System. Upon written notification from the academic unit granting medical leave, the Student Health Insurance Office will contact the student via their Columbia email address to determine whether the student wishes to remain enrolled in the Columbia Student Health Insurance Plan.

Students who do not reply within 14 days will be automatically terminated from the plan, effective at the end of the month in which the Student Health Insurance Office is notified or at the conclusion of the semester, whichever comes first.

Any adjustment to the tuition that the student has paid is determined by the date of withdrawal. Students receiving financial aid are not entitled to any portion of a refund until all Title IV financial aid programs are credited and all outstanding charges have been paid.

Each term, students are required to register for a full program of courses (minimum of 12 points), by the end of the Change of Program period, i.e., by the end of the second week of classes. Students who are not registered for at least 12 points by the end of the Change of Program period will be withdrawn from Columbia College.

### Fall and Spring Term Tuition Refund Schedule

For the purposes of tuition proration, a week is defined as beginning on Monday and ending on Sunday. Also note that the official Change of Program period normally ends on a Friday.

Description	Charge Assessed
No Registration	\$0
1st and 2nd week	Document fee <b>for new students only</b> , plus \$75 Withdrawal fee
3rd week	10% tuition, fees, plus \$75 Withdrawal fee
4th week	20% tuition, fees, plus \$75 Withdrawal fee
5th week	30% tuition, fees, plus \$75 Withdrawal fee
6th week	40% tuition, fees, plus \$75 Withdrawal fee
7th week	50% tuition, fees, plus \$75 Withdrawal fee
8th week	60% tuition, fees, plus \$75 Withdrawal fee

9th week onwards

100% tuition, fees, plus \$75  
Withdrawal fee

There is no difference in the proration schedule of a school or program charging per-point or flat rate tuition.

**Website:** <http://cc-seas.financialaid.columbia.edu>

Columbia is committed to meeting the full demonstrated financial need for all admitted students. Financial aid is available for all four undergraduate years, provided that students continue to demonstrate financial need.

All applicants who are citizens or permanent residents of the United States, who are students granted refugee visas by the United States, or who are undocumented students in the United States, are considered for admission in a need-blind manner.

International students who did not apply for financial aid in their first year are not eligible to apply for financial aid in any subsequent years. Foreign transfer candidates applying for aid must understand that such aid is awarded on an extremely limited basis. Columbia does not give any scholarships for academic, athletic, or artistic merit.

The following listing of named scholarship funds have been generously donated by alumni, parents, and friends of Columbia College and are the cornerstone of the College's need-based and full need financial aid program. More than fifty percent of Columbia College students receive a Columbia Grant toward their demonstrated need and are eligible to receive named scholarship. The commitment of the Columbia College community enables the College to maintain an economically, ethnically, and racially diverse student body.

For more information on how to support the named scholarship program at Columbia College, please contact:

(2002) Gift of Bernard Sunshine CC'46, P: CC'79, GSAS'83, GSAS'89, GSAS'91 and Marjorie H. Sunshine LS'69, P: CC'79, GSAS'83, GSAS'89, GSAS'91.

**SUSTAINABLE DEVELOPMENT SCHOLARSHIP ENDOWMENT FUND**  
(2010) Gift of Joseph H. Ellis CC'64 and Barbara Ellis BC'64, GSAS'65.

**SWERGOLD FAMILY SCHOLARSHIP FUND**

(1990) Gift of Leopold Swergold CC'62.

**ANNA WARE AND MACRAE SYKES SCHOLARSHIP FUND**  
(1963) Gift of Macrae Sykes CC'33 ^ in honor of his mother, Anna G. Collins ^ P: CC'33 ^.

**SZAKMARY FAMILY SCHOLARSHIP**  
(2022) Gift of Dr. Gary Szakmary CC'72, P: CC'04 and Mrs. Katharina Szakmary P: CC'04.

**ROBERT J. SZARNICKI FAMILY SCHOLARSHIP FUND**  
(2000) Gift of Robert J. Szarnicki CC'65 ^.

**AGNES CHI-CHEN LIN SZE COLUMBIA BUSINESS SCHOOL CLASS OF 1945 SCHOLARSHIP FUND**  
(2015) Gift of Morgan Sze in memory of his mother, Agnes C. Lin Sze BUS'45.

## T

**THE LEAH G. AND CHRISTOPHER K. TAHBAZ FAMILY SCHOLARSHIP FUND**  
(2015) Gift of Christopher K. Tahbaz CC'86, LAW'90.

**DANIEL TAMKIN AND CINDY CARDINAL SCHOLARSHIP FUND**  
(2009) Gift of Daniel S. Tamkin CC'81, P: CC'12 and Lucinda M. Cardinal BC'83, P: CC'12.

**THE ANGELO TARALLO MEMORIAL SCHOLARSHIP FUND**  
(2005) Gift of Patricia Tarallo W: CC'61, LAW'64.

**ABRAHAM TAUB SCHOLARSHIP FUND**  
(1991) Bequest of Abraham Taub CP 1922, GSAS 1927.

**WALLACE TAYLOR MEMORIAL SCHOLARSHIP FUND**  
(1992) Gift of the Senior Society of Sachems in honor of the seventy-fifth anniversary of its founding and the alumnus credited with founding the society, Wallace Taylor CC 1916 ^.

**WILLIAM TOWSON TAYLOR SCHOLARSHIP FUND**  
(1976) Bequest of William T. Taylor CC 1921, LAW 1923 and gift of various donors in his memory.

**DR. JOSEPH F. TEDESCO SCHOLARSHIP FUND**  
(2004) Bequest of Vera L. Tedesco.

**TEPLER FAMILY SCHOLARSHIP FUND**  
(2013) Gift of Isidore Tepler CC'76, P: CC'18.

**PAWAN AND SHRUTI TEWARI FAMILY GOLDMAN SACHS SCHOLARSHIP FUND**  
(2019) Gift of Pawan Tewari BUS'94, P: CC'20 and Shruti Tewari SIPA'94, P: CC'20.

**FRANKLIN A. THOMAS SCHOLARSHIP FUND**  
(2008) Gift of Franklin A. Thomas CC'56, LAW'63, '79 HON.

**BRIAN AND SABINE THOMSON FAMILY SCHOLARSHIP FUND**

(2017) Gift of Brian J. Thomson CC'89.

#### EDGAR G. THOMSEN SCHOLARSHIP FUND

(1973) Bequest of Grace Brinkerhoff Thomassen in memory of her husband, Edgar G. Thomssen CC 1907.

#### BLANCHE S. THORMAN SCHOLARSHIP FUND

(1972) Bequest of Blanche S. Thorman.

#### THE ISABEL AND IRVING N. TOLKIN MEMORIAL SCHOLARSHIP FUND

(1983) Gift of Isabel Tolkin ^ P: CC'54, CC'60, GSAPP'62 and various donors in memory of Isabel's husband, Irving N. Tolkin P: CC'54, CC'60, GSAPP'62, and later renamed in memory of Isabel and Irving.

#### LAURIE J. AND JEFFREY D. TOLKIN SCHOLARSHIP FUND

(2000) Gift of Jeffrey D. Tolkin CC'79, LAW'81 and Laurie J. Tolkin BC'79, DM'83.

#### LILLIAN AND TRYGVE H. TONNESSEN SCHOLARSHIP FUND

(1989) Gift of Trygve H. Tonnessen CC'39, GSAS'51 ^.

#### ELIZA TRIPP MEMORIAL SCHOLARSHIP FUND

(1979) Bequest of W. Arthur Tripp CC 1909.

#### LOTTIE A. TRIPP SCHOLARSHIP FUND

(1979) Bequest of W. Arthur Tripp CC 1909.

#### MARGUERITE AND JOSEPH A. TRISKA MEMORIAL SCHOLARSHIP FUND

(1983) Gift of Theodore H. Elliott.

#### TRUST BRIDGE PARTNERS SCHOLARSHIP FUND

(2009) Gift of Shujun Li.

#### KYRIAKOS TSAKOPOULOS SCHOLARSHIP FUND IN HONOR OF EUGENE ROSSIDES

(2005) Gift of Kyriakos Tsakopoulos CC'93 in honor of his grandfather, Kyriakos Tsakopoulos.

#### THE TUKMAN FAMILY SCHOLARSHIP FUND

(2007) Gift of Lois and Melvin Tukman P: CC'89, BUS'98.

#### TUNG FAMILY SCHOLARSHIP FUND

(2023) Gift of Chiu Fai Tung P: CC'25.

#### ANTHONY AND AMY TUTRONE SCHOLARSHIP

(2019) Gift of Amy and Anthony D. Tutrone CC'86.

#### 25TH REUNION SCHOLARSHIP

(2017) Gift of various donors in honor of the twenty-fifth anniversary of their graduation.

#### ARTHUR S. TWITCHELL SCHOLARSHIP FUND

(1995) Bequest of Arthur C. Twitchell.

## U

#### NERGIS DARIUS UDWADIA SCHOLARSHIP FUND

(2023) Gift of Navroz Darius Udwadia CC'97.

#### US STEEL SCHOLARSHIP FUND

(2002) Gift of USX.

(1987) Gift of William E. Collin CC 1924 ^ in honor of Morris W. Watkins CC 1924, GSAS 1928 ^.

#### ROBERT WATT SCHOLARSHIP FUND

(1976) Gift of various donors in memory of Robert W. Watt CC 1916.

#### LEONARD S. WEBER (CC '47) AND MORTON A. WEBER (CC '42) MEMORIAL SCHOLARSHIP

(2018) Bequest of Joan Weber in memory of her husband, Leonard S. Weber CC'47, and brother-in-law, Morton A. Weber CC'42.

#### GEORGE E. WEIGL SCHOLARSHIP FUND

(1982) Bequest of George E. Weigl BUS'31.

#### JOSHUA H. AND DONNA WEINER SCHOLARSHIP FUND

(1998) Gift of Joshua H. Weiner CC'36 ^ and Donna Weiner W: CC'36.

#### WEINSTEIN FAMILY SCHOLARSHIP

(2022) Gift of Stephen H. Weinstein CC'91.

#### ARTHUR S. AND MARIAN E. WEINSTOCK SCHOLARSHIP FUND

(1995) Gift of Arthur S. Weinstock CC'41^ and Marian E.K. Weinstock ^.

#### GEORGE J. AND FRANCES K. WEINSTOCK SCHOLARSHIP FUND

(2006) Gift of Arthur S. Weinstock CC'41 ^ in memory of his parents, Frances K. and George J. Weinstock P: CC'41 ^.

#### EDWARD S. WEISIK SCHOLARSHIP FUND

(2004) Bequest of Edward S. Weisik CC'37.

#### RABBI SHELDON J. WELTMAN, PH.D., SCHOLARSHIP FUND

(1992) Bequest of Rabbi Sheldon J. Weltman CC'58.

#### WEST END SCHOLARSHIP FUND

(1998) Gift of Katherine A. Gardner JRN'81; Kirk W. Michel BUS'79, P: BUS'15; and Joseph F. Spiegel.

#### H. A. WHEELER SCHOLARSHIP FUND

(1923) Gift of H. A. Wheeler Class of 1880 Arts and Mines.

#### THE JOHN AND MARY JO WHITE SCHOLARSHIP

(2008) Gift of John W. and Mary Jo White LAW'74, P: CC'08, LAW'15.

#### JOSEPH THOMAS WIDOWFIELD SCHOLARSHIP FUND

(1994) Bequest of Joseph T. Widowfield CC'83.

#### MARK HINCKLEY WILLES SCHOLARSHIP FUND

(1989) Gift of Mark H. Willes CC'63, BUS'67.

#### THE WILLNER FAMILY SCHOLARSHIP FUND

(2002) Gift of Jane and David Bloomgarden, and Joseph H. Willner VPS'77.

#### GEORGE LEO WINGSHEE MEMORIAL SCHOLARSHIP FUND

(2004) Gift of Donna W. Loo P: CC'11, GS'16.

#### RICHARD E. WITTEN SCHOLARSHIP FUND

(2005) Gift of Richard E. Witten CC'75, P: CC'10, BUS'15, LAW'15.

#### ABBEY AND ERIC WOLF FAMILY SCHOLARSHIP

(2023) Gift of Dr. Eric Jay Wolf CC'97, PS'02 and Dr. Abbey Rachel Wolf.

#### WOLF FAMILY SCHOLARSHIP FUND

(2011) Gift of Sherri P. Wolf CC'90, P: CC'21, CC'24 and Douglas R. Wolf CC'88, P: CC'21, CC'24.

#### BEN D. WOOD SCHOLARSHIP FUND

(1986) Bequest of Benjamin D. Wood CC 1922, GSAS 1924.

#### GORDON W. WOOD SCHOLARSHIP FUND

(1992) Gift of Gordon W. Wood CC'43, SEAS'48 ^.

#### WALTER WOODS SCHOLARSHIP FUND

(1997) Bequest of Norma E. Woods in memory of her husband, Walter Woods.

#### THE WOODWORTH FAMILY SCHOLARSHIP FUND

(2021) Bequest of Jay Woodworth CC'65, BUS'67 ^.

#### KENNETH AND THOMAS WRIGHT SCHOLARSHIP FUND

(2008) Gift of Kenneth B. Wright CC'74.

#### DAVID WU AND FRED WANG FUND

(2010) Gift of Fred W. Wang SEAS'95 and Weiming D. Wu SEAS'02.

#### THE WU AND YAN FAMILY SCHOLARSHIP FUND

(2023) Gift of The Wu and Yan Family Foundation.

#### X

#### XU FAMILY SCHOLARSHIP FUND

(2014) Gift of an anonymous donor.

#### LIU XU SCHOLARSHIP FUND

(2006) Gift of an anonymous donor.

### Y

#### PHILIP C. YACOS MEMORIAL SCHOLARSHIP FUND

(1986) Gift of Helen N. Yacos-Obuhanych ^ P: CC'80 ^ and various donors in memory of Helen's son, Philip C. Yacos CC'80.

#### YAGODA FAMILY SCHOLARSHIP FUND

(2016) Gift of Scott R. Yagoda CC'86, LAW'92, P: CC'20, CC'25.

#### FREDERIC AND ANNA YANG SCHOLARSHIP FUND

(2015) Gift of Hong A. Yang BUS'98 and Frederic S. Yang BUS'97.

#### HEIDI YANG-VEN SCHOLARSHIP FUND

(2021) Gift of Heidi Yang CC'93.

#### YATRAKIS SCHOLARSHIP FUND

(2009) Gift of Demetrios P. Yatrakis CC'05, BUS'10.

#### ONG YEE SCHOLARSHIP FUND

(2010) Gift of Danny O. Yee CC'77, P: CC'15 and Stephanie W. Yee PS'82, P: CC'15.

#### YEH AND CHU FAMILY SCHOLARSHIP

(2022) Gift of Huoy Yeh and Sherman Chu CC'82, SEAS'83.

#### KENNETH YIM FAMILY FUND

(2011) Gift of Kenneth K.L. Yim SEAS'73, BUS'75, P: CC'11, SEAS'10.

#### SAMUEL YIN SCHOLARSHIP FUND

(2005) Gift of Samuel Yin CC'76.

#### YI-CHANG YIN AND WAN-HUNG CHANG YIN SCHOLARSHIP FUND

(2000) Gift of Samuel Yin CC'76.

#### THE WILLIAM H. YOKEL SCHOLARSHIP FUND

(2007) Bequest of William H. Yokel CC'44.

#### YOON FAMILY SCHOLARSHIP FUND

(2022) Gift of Mr. Suk Joong Yoon CC'93 and Ms. Yiyoun Kim.

#### YOUNG ALUMNI SCHOLARSHIP FUND

(2016) Gift of young alumni from Columbia College.

#### YIU FAMILY SCHOLARSHIP FUND

(2021) Gift of Yuk Wai Lam and Michael Yiu P: CC'23.

#### THE YU FAMILY FUND

(2005) Gift of Kyung-Sun Yu P: CC'09, CC'13.

#### YU FAMILY SCHOLARSHIP FUND

(2014) Gift of Raymond Yu CC'89, SEAS'90, P: CC'21, CC'23, CC'25 and Amy H. Yu TC'07, TC'12, P: CC'21,

CC'23, CC'25 and Bong Y. ^ and May W. Yu P: CC'88, CC'89, SEAS'90.

#### BONG AND MAY YU SCHOLARSHIP FUND

(2016) Gift of Bong Y. ^ and May W. Yu P: CC'88, CC'89, SEAS'90.

#### RAYMOND YU AND DR. YA-NING (AMY) HSU SCHOLARSHIP FUND

(2019) Gift of Raymond Yu CC'89, SEAS'90, P: CC'21, CC'23, CC'25 and Amy H. Yu TC'07, TC'12, P: CC'21, CC'23, CC'25.

#### TUNG LI AND HUI HSI YUAN MEMORIAL SCHOLARSHIP FUND

(1967) Gifts of various donors in memory of Tung Li Yuan CC 1922 and later renamed in memory of Hui Hsi and Tung Li Yuan CC 1922.

### Z

#### VICTOR AND BETTY ZARO SCHOLARSHIP FUND

(1995) Gift of Victor J. Zaro CC'42 ^.

#### TIMOTHY ZARO SCHOLARSHIP FUND

(1998) Gift of Victor J. Zaro CC'42 ^ in honor of Timothy Zaro.

#### VICTOR J. ZARO SCHOLARSHIP FUND

(1996) Gift of Victor J. Zaro CC'42 ^.

#### JESSICA ZAUNER MEMORIAL SCHOLARSHIP FUND

(2006) Gift of Anton Zauner CC'73, BUS'75, P: CC'08 ^, BUS'11 and Anna E. Zauner GS'79, P: CC'08 ^, BUS'11 in memory of their daughter, Jessica Zauner CC'08.

#### JOSEPH C. ZAVATT SCHOLARSHIP FUND—COLUMBIA COLLEGE

(2006) Bequest of Anna Maas Zavatt in memory of her husband, Joseph C. Zavatt CC 1922, LAW 1924.

#### ZBT—STANLEY I. FISHEL, CC'34 SCHOLARSHIP FUND

(2004) Gift of Delta ZBT Corporation.

#### FRANK JOSEPH ZDENOVEC SCHOLARSHIP FUND

(1949) Bequest of Frank J. Zdenovec.

#### ZEPHYR SCHOLARSHIP FUND

(2022) Gift of an anonymous donor.

#### MITCHELL ZHANG SCHOLARSHIP

(2022) Gift of Mitchell Zhang CC'17.

#### THE ZICKLER FAMILY SCHOLARSHIP FUND

(2008) Gift of Leo E. Zickler CC'58.

#### PEARL AND ARTHUR ZIPSER SCHOLARSHIP

(2022) Gift of Dr. Nina Zipser CC'94 and Mr. David Laibson.

#### DAVID AND RAY MOONEY ZWERLING SCHOLARSHIP FUND

(1991) Gift of L. Steven Zwerling CC'60, GSAS'61 and Leonard J. Zwerling CC'65 in honor of their parents, Ray M. and David Zwerling P: CC'60, CC'65, GSAS'61, on their anniversary.

<sup>^</sup> *Deceased; P: Parent; W: Widow*

# ACADEMIC REQUIREMENTS

**In order to graduate from Columbia College with a Bachelor of Arts (B.A.) degree, a student must successfully complete a minimum of 124 points of academic coursework, which must include the full Core Curriculum and all requirements for a major. Additionally, a student must have earned a cumulative grade point average of 2.0 or higher to be eligible to graduate.**

Students are expected to complete the B.A. degree in eight full-time semesters. The last two semesters must be taken while enrolled in the College for study on Columbia's Morningside campus or on one of the Columbia-sponsored international programs.

## ACADEMIC CREDIT

A point of academic credit is awarded to a student for coursework based on the successful completion of a certain number of contact hours with an instructor in class and a certain number of hours of coursework done outside of class. Generally speaking, one point of academic credit denotes 14 hours of in-class work and approximately 28 hours of out-of-class work. Most undergraduate courses carry between 3 and 5 points of academic credit.

Every Columbia College student must complete 124 points of academic credit to earn the B.A. degree from Columbia College. To complete this number of credits over 8 semesters, students will need to complete an average of 15.5 credits per semester, which typically represents 4 to 5 academic courses per term (of courses that are worth between 3 and 5 points of credit each). According to the expectations of workload per credit hour noted above, a 15.5-credit academic course load will require a minimum of 46.5 hours of work per week, spent attending class and doing homework.

All courses listed in this *Bulletin* are open to Columbia College students and carry credit that can be earned toward the B.A. degree. If students are interested in courses that are not listed in this *Bulletin*, it is important that they consult their advising dean in the Berick Center for Student Advising to confirm that the course will carry credit toward the B.A. degree.

It is expected that every course that a student takes is adding to the student's education, increasing the student's knowledge, and improving the student's skills. Therefore, students may not earn credit for a course more than once, except in the case of a course that has been approved to be taken more than once (e.g., certain music performance courses, certain research courses).

- Retaking a course: If a student receives a failing grade in a course and therefore does not receive credit for it, the

student may take the class again and earn credit for the second instance of the course. In the very rare circumstance in which a student has earned credit for a course and feels it necessary to retake the course to show a stronger performance, the grades for both instances of the course will appear on the transcript, but only the first instance of the course will earn credit and only the final grade earned in the first instance of the course will count towards the overall GPA as measured by the degree audit report that students can access through Vergil/SSOL.

- Duplicative coursework: Students may not earn credit multiple times for course content that is essentially duplicative, as in the following cases:
  - Students cannot take two courses that have essentially the same function within the structure of the undergraduate curriculum. For example, credit cannot be earned for two first-term calculus courses, even if one is more theoretical in approach than the other. Similarly, credit cannot be earned for two comparable terms of a science or foreign language even if one has a Barnard course number and the other a Columbia course number.
  - If students have been granted academic credit through advanced standing credit (AP, IB, GCE, etc.), they may not take the equivalent course(s) at Columbia for credit. If students do take the equivalent course(s) at Columbia, they will need to forfeit the advanced standing credit previously granted. For more information, see Academic Regulations—Placement and Advanced Standing.
  - If students have been granted academic credit through transfer credit for coursework at another college or university, they may not take the equivalent course(s) at Columbia for credit. If students do take the equivalent course(s) at Columbia, they will need to forfeit the transfer credit previously granted.

## THE CORE CURRICULUM

The Core Curriculum (p. 91) represents the College's approach to general education requirements:

- Six shared courses, in which all students study the same content and learn foundational academic habits of mind and habits of work;
- Discipline-specific courses chosen by students from lists of approved courses, in which students learn specific content that conveys ways of knowing and understanding; and
- The Physical Education requirement.

### Literature Humanities

HUMA CC1001 & HUMA CC1002	Literature Humanities I and Literature Humanities II
------------------------------	---

### Frontiers of Science

SCNC CC1000	FRONTIERS OF SCIENCE
-------------	----------------------

### University Writing

ENGL CC1010	UNIVERSITY WRITING
<b>Contemporary Civilization</b>	
COCI CC1101 & COCI CC1102	CONTEMP WESTERN CIVILIZATION I and CONTEMP WESTRN CIVILIZATION II
<b>Art Humanities</b>	
HUMA UN1121	MASTERPIECES OF WESTERN ART
<b>Music Humanities</b>	
HUMA UN1123	Music Humanities
<b>Science Requirement</b>	
In addition to Frontiers of Science (listed in the shared courses above), two courses from the list of approved courses that meet the guidelines of the Science Requirement	
<b>Global Core Requirement</b>	
Two courses from the list of approved courses that have met the guidelines of the Global Core Requirement	
<b>Foreign Language Requirement</b>	
The successful completion of the "Intermediate II" (or equivalent) level in a single language or the exemption from the requirement through approved exam scores (i.e., advanced placement exams or departmental placement exams).	
<b>Physical Education</b>	
Two courses and a swimming test	

**All of the courses in the full Core Curriculum must be taken for a letter grade (i.e., the Pass/D/Fail option may not be applied) – with the exception of courses for the Physical Education requirement, which are offered only on a "pass/withdrawal" basis.**

**Students are required to complete Frontiers of Science, both semesters of Literature Humanities, and University Writing in the first year. Students who do not successfully complete all of these requirements by the end of the first year will be placed on academic probation.**

**All students are required to take Contemporary Civilization in their sophomore year.** For pedagogical reasons, the College considers Literature Humanities a prerequisite for Contemporary Civilization; therefore, all Columbia College students must complete Literature Humanities prior to taking Contemporary Civilization. (Columbia Engineering students, who may also enroll in Contemporary Civilization, have been given an exception to this sequence because of the structure of their curriculum.)

**Students are encouraged to complete Art Humanities and Music Humanities by the end of the junior year.**

Courses taken to fulfill the Core Curriculum must be taken in Columbia College – with the exception of the Foreign Language Requirement, which, in some instances and as determined by the relevant academic department at Columbia, may be satisfied at Barnard College.

If students plan to take courses at an approved study abroad program that seem to fulfill the stated goals of the Global Core or Science requirements, students may petition the Committee on the Global Core or the Committee on Science Instruction – through their advising dean in the [Berick Center for Student Advising](#) – to ask if the course might be approved for the relevant requirement. Also, if a student has fallen behind on the required number of credits and requirements to be in good academic standing, the student may be able to petition the [Committee on Academic Standing](#) to take approved courses at another institution during the summer in order to regain good academic standing.

## THE MAJOR

**All Columbia College students must complete a major.** By requiring both breadth and depth of study in one particular discipline or field, the major ensures intensive study in a single academic program, typically through a combination of introductory courses, methods courses, advanced seminars, and possibly a senior capstone experience such as a thesis. Majors are designed and offered by a variety of Columbia departments, institutes, centers, and programs, and are described in the departmental sections of this *Bulletin* (see [Departments, Programs, and Courses](#)).

Students select individual majors based on their own particular aims and needs. A major is not designed to produce professionally trained specialists for one profession or another; in fact, students often pursue careers that are not dependent on the specific content of their majors. Rather, the major provides a particular way of understanding and of working that students can translate into any number of professional contexts.

In the first and sophomore years, students can consult a network of advisers as they consider their choice of a major; this network includes faculty members in academic departments and programs, advising deans in the [Berick Center for Student Advising](#), and advisers in the Center for Career Education. **Students declare a major through an online declaration process in their fourth semester (i.e., spring semester of sophomore year).** Students are not permitted to declare a major before this time. Some majors will also require departmental review at the time of declaration, and students should consult with the DUS of their department to confirm that they can complete their major by the end of their 8th semester. Information about the process for declaring a major is sent to students in the spring of the sophomore year by the [Berick Center for Student Advising](#).

**Every student is responsible for completing the requirements for a major within eight full-time semesters.** Students should complete the requirements for a major that are in effect as of the time that they declare the major in their sophomore year. Students are expected to be active in consulting advisers in the major, especially the relevant director of undergraduate studies for each major.

The requirements for a major are determined by the faculty of the relevant academic department or program, and each department or program has one or more faculty members designated as a director of undergraduate studies. **A director of undergraduate studies (DUS) for a department or program provides advising on the individual courses and the programs of study for undergraduates in that department or program, and DUS can offer guidance to students who are prospective majors, who are declared majors, or who are simply taking a course in the department or program.**

Students can find information about all majors available to them in the pages of this *Bulletin* and on the websites of individual departments, institutes, and centers. Students should familiarize themselves with the requirements of any academic programs by reading through the requirements for their proposed major and by directing questions to the relevant director of undergraduate studies.

**All courses taken to complete a major, whether they are designated as required or elective within the major, must be taken for a letter grade and must be passed with a grade of C- or higher.** Some academic departments permit an exception to this policy, allowing the first one-term course taken by the student in his or her eventual major to be taken for a mark of "Pass." Students should consult the director of undergraduate studies (DUS) for any permissions or restrictions on grading options for the major.

The size and structure of a major can vary from one department/program to the next, and students may need to understand these details and distinctions as early as possible. For example:

- Some majors require that certain introductory courses be completed before the start of the junior year.
- Some majors have different minimum and maximum points allowed for a concentration or a major.
- Majors may have different policies on whether students can fulfill one requirement with a grade of D or a mark of "Pass."

A student can change majors at any time as long as the requisite departmental approval is received, the requirements have been or can be fulfilled, and students can still graduate by the end of their eighth semester. If a student decides to change a major, the student must file a new declaration form online or in hard copy with the advising dean in the Berick Center for Student Advising.

Independent majors (i.e., programs of study designed by a student) are not permitted for Columbia College students.

## MINORS

Most students graduate from Columbia College with one program of study – i.e., with one major. Majors vary in the

number and type of required courses, and students may find that they have very full programs of study each semester with the mix of courses to fulfill a major and courses to fulfill the Core Curriculum. To the extent that students have additional space in their programs of study for elective coursework, they might choose to take a mix of liberal arts courses in a variety of departments, or they might give their elective coursework shape by declaring another program of study. While students can declare a second major, more often students who wish to pursue another program of study will opt to a secondary course of study in the form of an academic minor.

Smaller than a major program of study, an academic minor typically requires between 5 and 9 courses to complete, and it offers students the opportunity to increase their exposure to the breadth of the liberal arts curriculum in ways that are curated by the faculty's expertise and interests. The goals and structures of a minor can vary, and may have one of the following purposes:

- an introduction to a discipline, stopping short of the advanced work of a major;
- a cluster of courses that introduce students to a topic through multiple approaches;
- an advanced offering for students who have previous preparation in order to pursue a particular focus of study that builds on departmental strengths and specializations;
- a complement to an existing major, such as a subfield in a cognate department; or
- an interdisciplinary program including courses in one or more departments/programs.

Students can find information about all minors available to them in the pages of this *Bulletin* and on the websites of individual departments, institutes, and centers. Students should familiarize themselves with the requirements of any academic programs by reading through the requirements for minors and by directing questions to the relevant director of undergraduate studies.

Students can declare a minor at the same time that they declare a major, in the Spring semester of their sophomore year, or they can declare a minor at a later point if they determine that they have the interest and space in their program of study to complete one. Information about the process for declaring a major is sent to students in the spring of the sophomore year by the Berick Center for Student Advising.

## SPECIAL PROGRAMS

In certain cases, the College has partnered with Columbia's professional schools or affiliated programs to offer a special program of study that goes beyond the liberal arts curriculum offered to College students. If a student completes one of these programs, it will appear on the student's transcript as a "special program." Therefore, a special program can only be pursued

as a second program of study; a student pursuing a special program must also complete a major in order to earn the B.A. degree.

## MAXIMUM NUMBER OF PROGRAMS OF STUDY

Most students graduate from Columbia College with one program of study – i.e., with one major. Majors vary in the number and type of required courses, and students may find that they have very full programs of study each semester with the mix of courses to fulfill a major and courses to fulfill the Core Curriculum.

To the extent that students have additional space in their programs of study for elective coursework, they might choose to take a mix of liberal arts courses in a variety of departments, or they might give their elective coursework shape by declaring another program of study. While students can declare a second major, more often students who wish to pursue another program of study will opt to a secondary course of study in the form of an academic minor or a special program (described above).

Students must complete their degree requirements within eight semesters (including the terms that transfer students have spent at other institutions), and students will not be awarded additional semesters for the purposes of completing an additional program of study.

The maximum number of programs that a student can declare is three, subject to the following conditions:

1. Students may declare a maximum of three programs of study (a program of study defined as a major, a minor, or a special program).
2. A student may not declare more than two majors.
3. A student may not declare more than two minors.
4. If a student wishes to declare more than one program of study, the coursework for the additional program(s) of study should fit comfortably within the expected course load of 4-5 courses per semester. Students will not be permitted to petition regularly to exceed the 18-credit point limit in order to pursue additional programs of study.

If a student decides to pursue multiple programs of study, they may not both be governed by the same offering unit (department, institute, or center). For example, a student may not declare two majors, or a major and a minor, in Russian Language and Culture and in Slavic Studies, both of which are housed in the Department of Slavic Languages. Similarly, a student may not declare programs in Mathematics and in Applied Mathematics, both of which are governed by the Department of Mathematics. All joint majors are considered as governed by both offering units: for example, the Economics-Political Science major is governed by both the Economics department and the Political Science department, so that a

student may not declare programs in both Political Science and Economics-Political Science.

## POLICY ON DOUBLE-COUNTING COURSES TOWARD REQUIREMENTS

If a student chooses to declare more than one program of study (some combination of major, minor, or special program, subject to the conditions noted above), the student can, in certain situations, apply one course to two programs of study (“double-counting”). There are three conditions under which students may apply one course to two programs of study, and depending on the declared programs of study, some or all of these conditions may apply:

1. If two programs of study require the same fundamental skills as prerequisite for all further study in those programs, students may double-count those fundamental courses to both programs of study. The Committee on Instruction has defined this fundamental coursework as any of the following courses:
  - a. elementary and intermediate foreign language courses;
  - b. the calculus sequence (I through IV, Accelerated Multivariable Calculus, or Honors A and B);
  - c. introductory courses in Statistics (STAT UN1101 or UN1201); and
  - d. the introductory course in computer programming (COMS W1004).
  - e. If faculty members feel that other courses should be included in this category, those courses would need to be explicitly approved by the Committee on Instruction for double-counting.
2. In addition to double-counting any of the courses described in #1 above, students may double-count courses toward programs of study (major or minor) that are taken to fulfill three parts of the Core Curriculum: (1) the Global Core requirement and/or (2) the Science requirement and/or (3) the Language requirement. Note: The shared courses of the Core Curriculum – specifically, Art Humanities, Contemporary Civilization, Frontiers of Science, Literature Humanities, Music Humanities, and University Writing – may not be double-counted with any major or minor.
3. In addition to double-counting any courses described in #1 and #2 above, students pursuing two programs of study may double-count a maximum of two classes of any type, if the classes are already approved to fulfill a requirement for each program of study. Students should not petition Directors of Undergraduate Studies for substitutions to major or minor requirements in order to create opportunities for double-counting. Offering departments, institutes, or centers may

choose to restrict the double-counting of particular courses, and such restrictions cannot be appealed.

If any of the conditions above happens to apply to three declared programs, the “double-counting” will apply across the three programs of study.

## SUPERVISED INDEPENDENT STUDY

It is sometimes possible for students to pursue independent advanced work on a topic for credit under the supervision of a faculty member. Students must develop a plan of study with a faculty adviser that details the workload of the independent study (i.e., the weekly reading and/or research, and the assignments that will be submitted and assessed), as well as the plan for regular meetings with the faculty member in fulfillment of the required contact hours between instructor and student. Students must also obtain the approval of the department; approval depends on the quality of the proposal, the student’s qualifications, and the availability of an appropriate faculty adviser. Independent study may earn variable credit (between 1 and 6 credits), depending on the planned workload and meeting schedule; the department can determine the appropriate number of credits.

## ACADEMIC ADVISING

### Planning an Academic Program

A student’s “academic program” is the full complement of courses in which the student is registered in an academic term—the combination of subjects, topics, and credits that a student plans to complete in a given semester.

When planning an academic program for each semester, students should ensure the following:

1. Students are thoroughly familiar with the requirements for the degree – including the full Core Curriculum and the requirements for a major – and with the College regulations, all of which are detailed in this *Bulletin* (see details above in section on “Majors”);
2. Students plan to complete University Writing (ENGL CC1010), Frontiers of Science (SCNC CC1000), Masterpieces of Western Literature and Philosophy I & II (HUMA CC1001-HUMA CC1002) during the first year, as well as Introduction to Contemporary Civilization in the West (COCI CC1101 -COCI CC1102) by the end of the sophomore year (see details above in section on “Core Curriculum”);
3. Students prepare to declare a major in their fourth term (i.e., spring semester of sophomore year).

In particular, students should note that some majors require that certain introductory courses be completed before the start of the junior year. For example, students considering a major in the sciences should focus on required introductory

science courses in their first two years, in addition to Core requirements; students considering a concentration or major in the humanities and social sciences should try to take, in their first two years, a combination of Core requirements and introductory level courses in the department(s) in which they are interested in majoring. Similarly, study abroad, professional programs, and graduate schools have a range of requirements that must be successfully completed at prescribed times during the undergraduate career.

When planning their academic program, students are expected to consult with their advising deans in the [Berick Center for Student Advising](#) and with the faculty advisers in the relevant academic departments.

### Advising Deans

Advising deans in the [Berick Center for Student Advising](#) advise students on general graduation requirements and monitor students’ progress toward completing the Core Curriculum. Advising deans guide and support undergraduates at Columbia College as they navigate their academic and co-curricular lives at Columbia University. Students are assigned an advising dean in the summer before matriculation.

Productive advising is built on a partnership in which the student and the adviser work together: the spirit of an ideal advising partnership is one of mutual engagement, responsiveness, and dedication. Regular advising conversations - the fundamental building blocks of the partnership - enable an adviser to serve as a knowledgeable resource, reliable guide, and a source for referrals, so that students may make the most of all the opportunities available to them inside and outside the classroom during their time at the College.

Students can make appointments with their advising deans using the [online appointment system](#). While students have assigned advising deans, students may make appointments with any of the advisers in the [Berick Center for Student Advising](#), and students may also attend walk-in hours in person or virtually to speak to an “adviser of the day” during business hours. Students who wish to change assigned advising deans are encouraged to make an appointment with Andrew Plaa, Dean of Advising, who can make new adviser assignments.

### Directors of Undergraduate Studies

[Directors of Undergraduate Studies \(DUS\)](#), and other faculty in academic departments, advise students on the requirements for majors, minors, and special programs.

Students should feel free to consult a DUS as early as possible to discuss the goals, content, and shape of a program of study (major, minor, or special program). The DUS can advise prospective majors or minors on the specific requirements for a program of study, can spell out options for paths through the program of study, and can suggest the most appropriate courses for a student’s academic program. When a student has decided to declare a particular program of study, the DUS can

confirm that the student is on track to complete the program of study on time and can also advise the student on finding related opportunities in the field in areas such as research, internships, jobs, etc.

Under no circumstances will students be granted more than 8 semesters to complete a secondary course of study (i.e., a minor or a special program or second major), so it is important for students to actively consult their advising deans and the relevant directors of undergraduate studies to confirm their academic progress as they plan each semester.

## ADVISING FOR FIRST-YEAR STUDENTS

In the summer before matriculating to Columbia College, each incoming student receives the [Academic Planning Guide for New Students](#), which is designed to assist incoming students in planning and creating their academic programs. Incoming students will also receive information by email about opportunities to talk with their advising dean during that summer, and students should read the [Academic Planning Guide for New Students](#) carefully prior to their first advising appointment.

Each incoming first-year student will be preregistered for a section of Literature Humanities for the Fall term. Each student will also be preregistered for either a section of Frontiers of Science or a section of University Writing. Therefore, students will have two courses assigned to their Fall academic programs when they arrive on campus, and they will register themselves for the remaining courses during the New Student Orientation Program and/or during the Change of Program period (i.e., the first two weeks of classes).

For the Spring term of the first year, students will be pre-registered in the section of Literature Humanities that corresponds with their Fall section (i.e., usually with the same instructor at the same time of the week), but it will be possible to change sections if schedule conflicts arise. First-year students who have taken University Writing in the Fall will be pre-registered in a section of Frontiers of Science in the Spring. First-year students who have taken Frontiers of Science in the Fall will register themselves for a section of University Writing in the Spring.

All incoming first-year students are expected to meet with their advising deans in the [Berick Center for Student Advising](#) during the summer (in person, by phone, or online), during the New Student Orientation Program (NSOP), and/or in the first two weeks of the term (Change-of-Program period) in order to discuss their fall course selections, their transition to college, and their short- and long-term goals, and to learn about other advising resources and offices available to them at Columbia.

Students are expected to stay in touch regularly with their advising deans in the [Berick Center for Student Advising](#) throughout their time at Columbia.

## REQUIREMENTS FOR TRANSFER STUDENTS

All academic requirements noted above and elsewhere in this *Bulletin* apply to students who transfer into Columbia College as sophomores or juniors, with the following considerations for their status as transfer students:

In order to graduate from Columbia College with a Bachelor of Arts (B.A.) degree, all transfer students must successfully complete a minimum of 124 points of academic credit, which must include the full [Core Curriculum](#) – with the exception of CC1000 Frontiers of Science, though three courses from the approved Science Requirement list must be completed. In addition, transfer students must satisfy all requirements for a major –or, for transfer students who matriculated prior to Fall 2024, all requirements for a concentration – and the overall GPA for all coursework completed must be 2.0 or higher.

Transfer students are expected to complete the B.A. degree in six full-time semesters (for students entering Columbia College in the sophomore year) or four full-time semesters (for students entering Columbia College in the junior year). The last two semesters must be taken while enrolled in the College for study on this campus or on one of the [Columbia-sponsored international programs](#).

Class standing for students transferring to Columbia College is determined prior to matriculation and is based on the number of terms and credits completed at the home institution. Twelve credits is the equivalent of one full-time term. A transfer student's class standing will remain in place for the duration of the student's time in Columbia College, regardless of future credits earned. Once they have matriculated, transfer students may be assigned additional advanced standing like Advanced Placement, International Baccalaureate and other standardized examination credit, but their class status will remain the same. This policy remains in place even when students are eligible to graduate in less than eight terms.

Upon admission to Columbia College, transfer students should familiarize themselves with the regulations pertaining to their special status (see [Academic Regulations—Regulations for Transfer Students](#)).

# CORE CURRICULUM

## The Center for the Core Curriculum

[core-curriculum@columbia.edu](mailto:core-curriculum@columbia.edu)

The Core Curriculum is the heart of the Columbia College education. The central intellectual mission of the Core is to provide all students with wide-ranging perspectives, a deeper understanding of history, and critical and creative thinking skills through the study of literature, science, philosophy, music, and art.

The Core was the first college general education program in the United States, launched as a single course, *Contemporary Civilization*, in 1919 with the goal of preparing students to grapple with “the insistent problems of the present.” In a context of global crisis, social reform, and widespread debates about the aims and methods of higher learning, Columbia College offered *Contemporary Civilization* as a bold experiment in what philosopher John Dewey called “progressive education.” That is, rather than focusing on the transmission of knowledge and the development of expertise, *Contemporary Civilization* would provide students with a space to develop their own ideas and create knowledge collectively at the intersection of historical consciousness and self-awareness.

In the century that followed, the Core evolved considerably, adding *Literature Humanities* in 1937 and *Art Humanities* and *Music Humanities* a decade later. That same year, 1947, a new course in *Asian Humanities* was introduced, adding a further global dimension to the curriculum. What is now called the Global Core — formerly Major Cultures — became a requirement in 1990. After decades of failed attempts to include scientific inquiry in the curriculum, *Frontiers of Science* was launched as a Core requirement in 2004. Together, these Core courses explore the stories, ideas, images, sounds, and discoveries through which we make ourselves intelligible to one another.

Each course in the Core undergoes regular review and revision to respond to the ever-changing challenges of our modern world and to incorporate a growing number of perspectives and experiences. Through all of these changes, the Core has provided an enriching liberal arts experience of community, active learning, and interdisciplinary inquiry in the larger context of a research university. The Core creates a shared intellectual experience for students that is rooted in mutual respect, fostering close and lasting intellectual relationships with peers and faculty through discussion. This community extends across course sections, class years, and even generations.

Working in small seminars, students engage actively with difficult works and concepts early in their college careers,

preparing them for more advanced academic work in their chosen fields of study. The general academic skills that students develop in Core classes are useful in a range of contexts, counterbalancing the specialization of chosen majors. Most importantly, Core courses give students the opportunity to experiment with ideas, pursue their own inquiries, develop their own perspectives, and critique the shared opinions and social practices of our world through an understanding of their histories. In this way, the Core prepares students for a lifetime of critical and creative intelligence.

The Center for the Core Curriculum, located in 202 Hamilton, provides administrative support to faculty and students in Art Humanities, Contemporary Civilization, Frontiers of Science, Literature Humanities, and Music Humanities. The Center can be contacted at [core-curriculum@columbia.edu](mailto:core-curriculum@columbia.edu).

The Committee on the Core Curriculum manages the academic elements of the Core, with faculty representatives from Art Humanities, Contemporary Civilization, Frontiers of Science, Literature Humanities, Music Humanities, University Writing, and the Global Core, as well as administrators and student representatives from Columbia College and General Studies. In the 2024-25 academic year, the following members will comprise the Committee:

## Committee on the Core Curriculum

Josef Sorett  
Dean of Columbia College  
208 Hamilton; 212-854-2443  
[js3119@columbia.edu](mailto:js3119@columbia.edu)

Ruben L. Gonzalez Jr.  
Professor of Chemistry  
Chair of Frontiers of Science  
614 Havemeyer; 212-854-1096  
[rlg2118@columbia.edu](mailto:rlg2118@columbia.edu)

To Be Announced  
Chair of the Committee on Global Core

Lisa Hollibaugh  
Dean of Academic Affairs  
202 Hamilton Hall; 212-851-9814  
[lkh5@columbia.edu](mailto:lkh5@columbia.edu)

Joseph A. Howley  
Associate Professor of Classics  
Paul Brooke Program Chair for Literature Humanities  
601 Hamilton; 212-854-7856  
[jah2220@columbia.edu](mailto:jah2220@columbia.edu)

Ivana Nikolic Hughes  
Director of Frontiers of Science  
Senior Lecturer in the Discipline of Chemistry  
625 Pupin; 212-854-2202  
[ih2194@columbia.edu](mailto:ih2194@columbia.edu)

Larry Jackson  
*Associate Dean of Academic Affairs, Core Curriculum and Undergraduate Programs*  
 202 Hamilton; 212-854-9625  
[lj2504@columbia.edu](mailto:lj2504@columbia.edu)

Caroline Marvin  
*Dean of Academic Affairs, Columbia School of General Studies*  
 612 Lewisohn; 212-854-3608  
[cbm2118@columbia.edu](mailto:cbm2118@columbia.edu)

Ioannis Mylonopoulos  
*Associate Professor of Art History and Archaeology*  
 Chair of Art Humanities  
 804 Schermerhorn; 212-854-0170  
[jm3193@columbia.edu](mailto:jm3193@columbia.edu)

Carol Rovane  
*Violin Family Professor of Philosophy*  
 Carnoy Family Program Chair for Contemporary Civilization  
 711 Philosophy; 212-854-8618  
[cr260@columbia.edu](mailto:cr260@columbia.edu)

Benjamin A. Steege  
*Associate Professor of Music*  
 Chair of Music Humanities  
 621 Dodge; 212-854-8191  
[bas39@columbia.edu](mailto:bas39@columbia.edu)

Nicole B. Wallack  
*Senior Lecturer in the Discipline of English and Comparative Literature*  
 Director of Undergraduate Writing Program  
 310 Philosophy; 212-854-3886  
[nw2108@columbia.edu](mailto:nw2108@columbia.edu)

# LITERATURE HUMANITIES

## Chair for Literature Humanities

Prof. Joseph A. Howley

Associate Professor of Classics

Paul Brooke Program Chair for Literature Humanities

[jah2220@columbia.edu](mailto:jah2220@columbia.edu)

## Literature Humanities Website

*HUMA CC1001* and *HUMA CC1002* “Literature Humanities” or “Lit Hum,” as it is popularly known, is a year-long course that offers Columbia College students the opportunity to engage in intensive study and discussion of significant works. A part of the Core Curriculum since 1937, *Literature Humanities* is not a survey with a fixed syllabus, but an ever-evolving series of carefully selected readings that reward both first encounters and long study. Whether classwork focuses attention on the formal elements of the text, its importance to literary history, or on its significance to contemporary culture and issues, the goal is to consider a range of perspectives across time and cultures that can enhance our understanding of the world and foster a deeper sense of empathy, while also developing crucial skills in close reading, critical thinking, writing, and academic discussion through the analysis of literary works.

Instructors from a range of departments and disciplines meet with groups of approximately twenty-two students for four hours a week in order to discuss texts by Enheduanna, Homer, Sappho, Aeschylus, Plato, Vergil, Augustine, Ibn ‘Arabi, Marie de France, Dante, Montaigne, Shakespeare, Sor Juana Inés de la Cruz, Austen, Woolf, Morrison, and Rankine, as well as Hebrew Scriptures, Gospels, and Gilgamesh.

## REGISTRATION PROCEDURE

All information concerning registration in *HUMA CC1001-HUMA CC1002* is included in the registration materials sent to students. All first-year students are preregistered in *Literature Humanities*. Students can change their section during their registration period prior to the start of the semester and the change of program period during the first two weeks of the semester.

All Core Curriculum courses, including *Literature Humanities*, must be taken for a letter grade. Students may not drop or withdraw from *Literature Humanities* after the Core drop deadline, which is also the end of the Change-of-Program period (p. 4). For more information, see *Registration—Dropping Core Courses*.

## COURSES OF INSTRUCTION

### **HUMA CC1001 Literature Humanities I. 4.00 points.**

Taught by members of the Departments of Classics; English and Comparative Literature; French; German; Italian; Middle

Eastern, South Asian, and African Studies; Philosophy; Religion; Slavic Languages; and Latin American and Iberian Cultures; as well as members of the Society of Fellows. Major works by over twenty authors, ranging in time, theme, and genre, from Homer to Virginia Woolf. Students are expected to write at least two papers, to complete two examinations each semester, and to participate actively in class discussions

### **Fall 2024: HUMA CC1001**

**Chair for Contemporary Civilization**  
Prof. Carol Rovane  
*Violin Family Professor of Philosophy*  
cr260@columbia.edu

The purpose of *COCI CC1101-COCI CC1102 “Contemporary Civilization,”* or “CC,” as it is popularly known, is to introduce students to a range of issues concerning the kinds

of communities—political, social, moral, and religious—that human beings construct, and the values that inform and define such communities. Founded in 1919 to prepare students to confront "the insistent problems of the present," *Contemporary Civilization* has evolved continuously while remaining a constant element of the Columbia College curriculum. The course asks students to read texts that offer a wide range of perspectives, to experiment with ideas, follow their own inquiries, and present their own perspectives about the issues that these texts raise. In doing so, students develop their skills as thinkers and communicators.

The aim of *Contemporary Civilization* is not to endorse or celebrate the often conflicting—and sometimes troubling—ideas of the authors studied in class, but rather to engage with them critically. By exploring a range of perspectives, students will gain a better sense of the ideas that have shaped the world they have inherited, develop the power to imagine experiences and understand opinions different from their own, and test their own values in a way that may strengthen them or prompt revision. The ultimate goal of *Contemporary Civilization* is to foster a community in which students can share their perplexity, deepen their understanding of the world and their place within it, recognize the limits of their own perspectives and experiences, and engage respectfully with one another across their differences.

Because *Contemporary Civilization* is a year-long course, readings are necessarily selective. Every three years, faculty revise the syllabus, and many instructors supplement readings with their own selections. The factors that lead to the adoption of a text include historical influence, the demonstrated ability of a text to provoke productive discussion, and the relevance of a text's ideas to the pressing problems of the present. Among the authors currently required in the course are Plato, Aristotle, Augustine, Aquinas, Christine de Pizan, Machiavelli, Descartes, Hobbes, Locke, Rousseau, Smith, Kant, Bentham, Wollstonecraft, Tocqueville, J.S. Mill, David Walker, Douglass, Sojourner Truth, Marx, Darwin, Nietzsche, Du Bois, Gandhi, Ambedkar, Fanon, Arendt, Foucault, the Combahee River Collective, Barbara Fields, Sadiya Hartman, Dipesh Chakrabarty, Kyle Powys White, as well as the Bible and The Qur'an.

## REGISTRATION PROCEDURE

All information concerning registration in *COCI CC1101-COCI CC1102* is included in the registration materials sent to students. Students normally take *Contemporary Civilization* in their second year at Columbia.

All Core Curriculum courses, including *Contemporary Civilization*, must be taken for a letter grade. Students may not drop or withdraw from *Contemporary Civilization* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 4)). For more information, see *Registration—Dropping Core Courses*.

## COURSES OF INSTRUCTION

### COCI CC1101 CONTEMP WESTERN CIVILIZATION I. 4.00 points.

Taught by members of the Departments of Anthropology, Classics, English and Comparative Literature, French, German, History, Latin American and Iberian Cultures, Middle Eastern, South Asian, and African Studies, Philosophy, Political Science, Religion, Slavic Languages, and Sociology; and members of the Society of Fellows. A study in their historical context of major contributions to the intellectual traditions that underpin contemporary civilization. Emphasis is on the history of political, social, and philosophical thought. Students are expected to write at least three papers to complete two examinations, and to participate actively in class discussions

**COCI CC1102 CONTEMP WESTRN CIVILIZATION II.****4.00 points.**

Taught by members of the Departments of Anthropology, Classics, English and Comparative Literature, French, German, History, Middle East and Asian Languages and Cultures, Philosophy, Political Science, Religion, Slavic Languages, and Sociology; and members of the Society of Fellows. A study in their historical context of major contributions to the intellectual traditions that underpin contemporary civilization. Emphasis is on the history of political, social, and philosophical thought. Students are expected to write at least three papers to complete two examinations, and to participate actively in class discussions

## ART HUMANITIES

### Chair of Art Humanities

Ioannis Mylonopoulos

Associate Professor of Art History and Archaeology

[jm3193@columbia.edu](mailto:jm3193@columbia.edu)

### Art Humanities Website

HUMA UN1121 “*Art Humanities*” has been a degree requirement for all College students and an integral part of the Core Curriculum since 1947. It helps students develop their visual literacy through looking at, thinking about, and engaging in critical discussion of the visual arts. It is not a historical survey, but an analytical study of a limited number of monuments and artists. The course focuses on the formal structure of works of architecture, sculpture, painting, and other media, as well as the historical contexts in which these works were made and understood. Among the topics on the syllabus are the Parthenon, Cordoba Mosque-Cathedral and Amiens Cathedral, and works by Raphael, Sofonisba, Anguissola, Michelangelo, Gian Lorenzo Bernini, Luisa Roldán, Rembrandt van Rijn, Clara Peeters, Jacques-Louis David, Angelica Kauffman, Francisco Goya, Claude Monet, Edouard Manet, Mary Cassatt, Berthe Morisot, Pablo Picasso, Romare Bearden, Frank Lloyd Wright, Le Corbusier, Andy Warhol, Jean-Michel Basquiat, and Cindy Sherman. In addition to discussion-based class meetings, all sections of Art Humanities make extensive use of the vast resources of New York City through field trips to museums, buildings, and monuments.

## REGISTRATION PROCEDURE

All information concerning registration in HUMA UN1121 MASTERPIECES OF WESTERN ART is included in the registration materials sent to students. It is the expectation of the College that all students complete *Art Humanities* by the end of their third year.

All Core Curriculum courses, including *Art Humanities*, must be taken for a letter grade. Students may not drop or withdraw from *Art Humanities* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 4)). For more information, see *Registration—Dropping Core Courses*.

## COURSES OF INSTRUCTION

### HUMA UN1121 MASTERPIECES OF WESTERN ART.

#### 3.00 points.

Discussion and analysis of the artistic qualities and significance of selected works of painting, sculpture, and architecture from the Parthenon in Athens to works of the 20th century

## MUSIC HUMANITIES

### Chair of Music Humanities

Prof. Benjamin Steege  
[bas39@columbia.edu](mailto:bas39@columbia.edu)

### Music Humanities Website

The focus of *Music Humanities* is on the many forms of the Western musical imagination in art music, through works studied in their historical and cultural contexts. The specific goals of the course are to awaken and encourage active, critical, and comparative listening practices, to provide tools to respond verbally to a variety of musical idioms, and to create engagement with the debates about the character and purposes of music that have occupied composers and musical thinkers since ancient times. The extraordinary richness of musical life in New York is an integral part of the course.

The course moves chronologically from the Middle Ages to the present, examining the choices and assumptions of composers, their patrons, audiences, and performers, and exploring what we can and can't know about how music of the past may have sounded. Students' critical perceptions and articulate responses

to the music, and to the source readings that are a hallmark of the Core, will be a vital part of the class.

## REGISTRATION PROCEDURE

All information concerning registration in HUMA UN1123 Music Humanities is included in the registration materials sent to students. It is the expectation of the College that all students complete *Music Humanities* by the end of their third year.

All Core Curriculum courses, including *Music Humanities*, must be taken for a letter grade. Students may not drop or withdraw from *Music Humanities* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 4)). For more information, see *Registration—Dropping Core Courses*.

## EXEMPTION FROM MUSIC HUMANITIES

Although all Columbia students are expected to take *Music Humanities*, there are some students who enter with exceptional musical backgrounds that may qualify them for exemption. Exemption from *Music Humanities* may be obtained by passing an Exemption Exam. In the case of transfer students, exemption may also be obtained by filing a course substitution request.

### Exemption Exam

The Exemption Exam is offered on the first Friday of the fall semester by the Music Department (621 Dodge Hall). Students who matriculate in the spring semester should take the exam in the following fall term. Students may take the exam only once during their first year at Columbia. If they do not pass the exam, they must enroll in a section of *Music Humanities*.

### Course Substitution

In addition to the Exemption Exam, students with approved transfer credit have the option of requesting exemption on the basis of a similar music course passed with a grade of B or higher at another college or university. This exemption must be requested during the student's first semester at Columbia. Petitions submitted in subsequent semesters will not be considered by the Center for the Core Curriculum.

## FRONTIERS OF SCIENCE

### Chair of Frontiers of Science

Prof. Ruben Gonzalez  
[rlg2118@columbia.edu](mailto:rlg2118@columbia.edu)

### Frontiers of Science Website

*SCNC CC1000 FRONTIERS OF SCIENCE* and *SCNC CC1100 FRONTIERS OF SCIENCE-DISC* is a one-semester course that integrates modern science into the Core Curriculum. The course includes lectures and seminar sections. On Mondays throughout the semester, each of Columbia's leading scientists present

a mini-series of lectures. During the rest of the week, senior faculty and Columbia post-doctoral science fellows (research scientists selected for their teaching abilities) lead seminar sections limited to twenty-two students to discuss the lecture and its associated readings, and to debate the implications of the most recent scientific discoveries. *Frontiers of Science* satisfies one of the three required courses of the science requirement for Columbia College.

## REGISTRATION PROCEDURE

All information concerning registration in *SCNC CC1000 FRONTIERS OF SCIENCE* is included in the registration materials sent to students. All first-year students are preregistered in *Frontiers of Science*. Prospective science majors may petition the Committee on Science Instruction to be allowed to postpone taking *Frontiers of Science* until their sophomore year, if they are enrolled in the following courses during their first-year in the College:

1. Literature Humanities (HUMA CC1001);
2. A mathematics course;
3. A language course at the elementary II level or above;
4. One of the following science major sequences:
 

CHEM UN2045 & CHEM UN2046	INTENSVE ORGANIC CHEMISTRY and INTENSVE ORG CHEM- FOR 1ST YEAR (formerly CHEM W3045-CHEM W3046)
PHYS UN1601 & PHYS UN1602	PHYSICS I:MECHANICS/ RELATIVITY and PHYSICS II: THERMO, ELEC # MAG
PHYS UN2801 & PHYS UN2802	ACCELERATED PHYSICS I and ACCELERATED PHYSICS II

Students wishing to petition to postpone should do so in the Berick Center for Student Advising located in 403 Lerner.

All Core Curriculum courses, including *Frontiers of Science*, must be taken for a letter grade. Students may not drop or withdraw from *Frontiers of Science* after the Core drop deadline (which is also the end of the Change-of-Program period (p. 4)). For more information, see *Registration—Dropping Core Courses*.

## COURSES OF INSTRUCTION

**SCNC CC1000 FRONTIERS OF SCIENCE. 4.00 points.**

Corequisites: SCNC CC1100

Corequisites: SCNC CC1100 The principal objectives of *Frontiers of Science* are to engage students in the process of discovery by exploring topics at the forefront of science and to inculcate or reinforce the specific habits of mind that inform a scientific perspective on the world. Sample topics include the brain and behavior, global climate change, relativity, and

biodiversity, among others. Taught by members of natural science departments and Columbia Science Fellows

[uwp@columbia.edu](mailto:uwp@columbia.edu)

Undergraduate Writing Website

ENGL CC1010 UNIVERSITY WRITING is a one-semester seminar designed to facilitate students' entry into the intellectual life of the university by teaching them to become more capable and independent academic readers and writers. The course emphasizes habits of mind and skills that foster students' capacities for critical analysis, argument, revision, collaboration, meta-cognition, and research. Students read and discuss essays from a number of fields, complete regular informal reading and writing exercises, compose several longer essays, and devise a research-based project of their own design.

## COURSES OF INSTRUCTION

**ENGL CC1010 UNIVERSITY WRITING. 3.00 points.**

ENGL CC/GS1010: University Writing, is a one-semester seminar designed to facilitate students' entry into the intellectual life of the university by teaching them to become more capable and independent academic readers and writers. The course emphasizes habits of mind and skills that foster students' capacities for critical analysis, argument, revision, collaboration, meta-cognition, and research. Students read and discuss essays from a number of fields, complete regular informal reading and writing exercises, compose several longer essays, and devise a research-based project of their own design. Courses of Instruction ENGL CC1010 University Writing. 3 points. ENGL CC/GS1010: University Writing (3 points) focuses on developing students' reading, writing, and thinking, drawing from readings on a designated course theme that carry a broad appeal to people with diverse interests. No

University Writing class presumes that students arrive with prior knowledge in the theme of the course. We are offering the following themes this year: UW: Contemporary Essays, CC/GS1010.001-.099 UW: Readings in American Studies, CC/GS1010.1xx UW: Readings in Gender and Sexuality, CC/GS1010.2xx UW: Readings in Film and Performing Arts, CC/GS1010.3xx UW: Readings in Urban Studies, CC/GS1010.4xx (will be sharing 400s with Human Rights) UW: Readings in Climate Humanities, CC/GS1010.5xx (will be sharing 500s with Data # Society) UW: Readings in Medical Humanities, CC/GS1010.6xx UW: Readings in Law # Justice, CC/GS1010.7xx UW: Readings in Race and Ethnicity, CC/GS1010.8xx University Writing for International Students, CC/GS1010.9xx For further details about these classes, please visit: <http://www.college.columbia.edu/core/uwp>

#### Fall 2024: ENGL CC1010

## WRITING CENTER

The Undergraduate Writing Program sponsors [The Writing Center](#) in 310 Philosophy, which offers individual writing instruction and consultations to undergraduate and graduate students enrolled in Columbia University courses. Students may visit the center to work on any writing project, academic or non-academic, and at any stage in the writing process. Students may use the Writing Center's online scheduling system to make appointments and view drop-in hours.

## FOREIGN LANGUAGE REQUIREMENT

### General Information:

Academic Affairs

[cc-academic@columbia.edu](mailto:cc-academic@columbia.edu)

### [The Foreign Language Requirement Website](#)

The foreign language requirement forms part of Columbia College's mission to prepare students to be tomorrow's conscientious and informed citizens. Knowledge of another's language and literature is the most important way to begin to know a country and people. The study of a foreign language:

1. Introduces students to world cultures, also making them aware of their own culture within that context;
2. Informs students of the differences in structure, grammar, and syntax that distinguish languages from each other, and clarifies the intimate links between language and cultural meaning;
3. Contributes to the development of students' critical, analytical, and writing skills.

The requirement may be satisfied in one of the following ways:

1. Satisfactory completion of the second term of an intermediate language sequence.
2. Demonstration of an equivalent competence through the appropriate score on the SAT II Subject Test or Advanced Placement Tests.
3. Demonstration of an equivalent competence through the College's own placement tests (consult the department through which the language is offered).
4. The successful completion of an advanced level foreign language or literature course that requires *2102* or the equivalent as a prerequisite. This course must be taken for a letter grade.
5. Students whose native language is not English are not required to take an additional foreign language or an achievement test if they have completed the secondary school requirement in the native language.

Because success in learning a foreign language is dependent on the full engagement of the students enrolled in a language course, all terms of language instruction/conversation courses, whether being used toward fulfillment of the foreign language requirement or not, must be taken in order and for a letter grade. These courses may not be taken for a grade of Pass/D/Fail.

Students wishing to satisfy the requirement in any other language should consult with their advising dean. In some instances, equivalent language courses offered at Barnard College and in the School of General Studies may be used to satisfy the requirement, however, students should speak with the Columbia department to ensure that courses from these schools are approved for the requirement.

Any student who wishes to submit a language course taken at another institution in fulfillment of the language requirement must pass a departmental placement examination.

In order to ensure that students achieve foreign-language proficiency without a significant break in progress, this requirement must be completed before a student can be eligible to study abroad, even if the language of instruction of the study-abroad program is English. For students seeking to study abroad in other languages, more advanced foreign-language study is usually required (see *Special Programs*).

The following languages are offered in the College toward satisfaction of the requirement:

- **Akkadian**  
*Language Resource Center*
- **Arabic**  
*Middle Eastern, South Asian, and African Studies*
- **Armenian**  
*Middle Eastern, South Asian, and African Studies*

## GLOBAL CORE REQUIREMENT

### Committee on Global Core

[globalcore@columbia.edu](mailto:globalcore@columbia.edu)

**General Information**, Academic Affairs  
[cc-academic@columbia.edu](mailto:cc-academic@columbia.edu)

[Global Core Requirement Website](#)

The Global Core requirement asks students to engage directly with the variety of civilizations and the diversity of traditions that, along with the West, have formed the world and continue to interact in it today. Courses in the Global Core typically explore the cultures of Africa, Asia, the Americas, and the Middle East in an historical context. These courses are organized around a set of primary materials produced in these traditions and may draw from texts or other forms of media, as well as from oral sources or performance, broadly defined.

Global Core courses fall into two categories, and can be, on occasion, a hybrid of the two types: those with a comparative, multidisciplinary, or interdisciplinary focus on specific cultures or civilizations, tracing their existence across a significant span of time, and may include Europe and/or the U.S.; and those that address a common theme or set of analytic questions comparatively (and may include Europe and the U.S.). The Global Core requirement consists of courses that examine areas not the primary focus of Literature Humanities and Contemporary Civilization and that, like other Core courses, are broadly introductory, interdisciplinary, and temporally and/or spatially expansive.

Students must complete two courses from the approved list of Global Core courses for a letter grade.

## Global Core Navigator

The Global Core Navigator is a sortable list which allows students to search for approved Global Core courses based on academic approach, region, temporal period, and academic department.

## FALL 2025

Last updated on March 28, 2025.

### African- American Studies

AFAS UN1001	INTRO TO AFRICAN-AMER STUDIES

## ALL APPROVED COURSES: OFFERED ABROAD

*Not all courses are taught each academic year. Below is the full list of all courses offered abroad through Columbia-sponsored programs that are approved for the Global Core Requirement, regardless of semester offered. For more information, consult the [Office of Global Programs](#). Last updated on March 14, 2025.*

**Columbia Athens Global Center**

GRKM OC3936	Columbia Summer Global Core: The Athens Experience (Effective beginning Summer 2025)
-------------	--

**Center for the Study of Ethnicity and Race**

CSER OC3928	Colonization/Decolonization (Effective beginning Summer 2017; taught in Mexico City)
-------------	--

**Columbia in Amman and Paris: Middle Eastern and North African Studies (MENA) Program**

MENA OC4100	Migration, Displacement and Diaspora in the French and North African Context (taught in Paris, effective beginning Summer 2017) (formerly Maghreb-Mashrek: East and West)
-------------	---

**Columbia in Amman and Tunis: Middle Eastern and North African Studies**

MENA OC4101	Culture/ History Seminar of the Middle East- North Africa Summer Program in Amman & Tunis (Effective beginning Summer 2019)
-------------	---

**Columbia Global Seminar in Istanbul**

Not offered during the Spring 2018 semester

CLGM OC3920	The World Responds to the Greeks: Modernity, Postmodernity, Globality (Effective beginning Spring 2015; taught in Istanbul)
-------------	---

**Columbia in London- Queen Mary University**

CLEN OC3500	LONDON IN POSTCOLONIAL FICTION: 'WE ARE HERE BECAUSE YOU WERE THERE' (Effective beginning Fall 2018))
-------------	---

**Latin American and Caribbean Studies (Global Scholars Program)**

LCRS OC3501 Latin American Cities (Effective beginning Summer 2017)

**Columbia Summer Program in Tunis and Istanbul: Democracy and Constitutional Engineering**

Not offered during the Spring 2018 semester

POLS OC3545	Comparative Democratic Processes (Effective beginning Summer 2015; taught in Istanbul)
-------------	--

**Columbia Summer Program in Venice**

CLIA OC4600	Mediterranean Humanities II in Venice (Effective beginning Summer 2025. Students may only receive Global Core credit for either CLIA GU4500 or CLIA OC4600; not both.)
-------------	--

**Slavic Languages - Office of Global Programs**

Not offered during the Spring 2018 semester

CLSL OC4001	The Muslim and the Christian in Balkan Narratives ((Effective beginning Summer 2016; taught in Istanbul))
-------------	---

**Reid Hall in Paris**

AHIS OC4652	The Black Voices of Black Model: New Perspectives for the Histories of Art (Effective beginning Summer 2019)
-------------	--

CLEN OC3245	Black Americans and the City of Light: A Seminar (effective Summer 2020)
-------------	--

FILM OC4225	Arab & African Filmmaking (Effective beginning Summer 2019)
-------------	---

FREN OC3330	Paris Noir (same as FREN OC3817-Black Paris- course number effective beginning Summer 2021)
-------------	---

FILM GU4330	(Effective beginning Summer 2024- to be offered in Reid Hall, Paris)
-------------	--

FREN OC3719	VIOLENCE BY AND AGAINST WOMEN (Effective beginning Spring 2019)
-------------	---

FREN OC3817	Black Paris (Effective Spring 2017; taught in Paris)
-------------	--

CLFR OC3821	CITY DIPLOMACY (Effective beginning Spring 2021)
-------------	--

FREN OC3821	"Blackness" in French: from Harlem to Paris and Beyond ((Effective beginning Summer 2018))
-------------	--

HIST UN3136	France and the African Diaspora (Effective beginning Summer 2024- To be offered in Reid Hall, Paris)
-------------	--

WMST OC3550	WOMEN # SOCIETY - SEX-TRADE ECONOMY (Effective Spring 2016, will not be offered Spring 2018; taught in Paris)
-------------	---

FMST GU4325	Waves on New Shores: New Cinema in France, Japan, and Brazil (effective beginning Summer 2022)
-------------	--

## SCIENCE REQUIREMENT

General Information: Academic Affairs, [cosi@columbia.edu](mailto:cosi@columbia.edu)

The objective of the science component of Columbia College's Core Curriculum is identical to that of its humanities and social science counterparts, namely to help students "to understand the civilization of their own day and to participate effectively in it." The science component is intended specifically to provide students with the opportunity to learn what kinds of questions are asked about nature, how hypotheses are tested against experimental or observational evidence, how results of tests are evaluated, and what knowledge has been accumulated about the workings of the natural world.

**All students in Columbia College must complete three courses in fulfillment of the science requirement. The three courses must be distributed across the three categories detailed below: Science A, Science B, and Science C.**

**Each of the three courses must carry at least 3 points of credit. All courses used to satisfy the science requirement must be taken for a letter grade.**

Students should pay careful attention to the prerequisites and instructor approvals required for certain courses. Prerequisite and instructor approval requirements can be found in the course descriptions for each course located in specific departments' sections of this bulletin.

While students are not required to complete a two-term sequence, students may choose to do so, if the two courses together will fulfill both Science B and Science C. For this reason, the Committee on Science Instruction has indicated recommended sequences below. Unless otherwise noted, the first course in the sequence must be taken before the second course in the sequence.

**Transfer students** may be able to apply transfer credit for science coursework taken elsewhere to the Science requirement. One of the three required science courses must be taken at Columbia, and the coursework taken to fulfill the three-semester science requirement must be distributed across the categories of Science B and Science C.

**Unless otherwise indicated, students may not use Barnard College courses to fulfill the Columbia College science requirement.**

## SCIENCE A

Students who enter the College as first-year students are required to take [SCNC CC1000](#) Frontiers of Science during their first or second semester (whichever term in which they are not taking [ENGL CC1010](#) University Writing)

## SCIENCE B

All College students must complete at least one course offered by one of the following seven Columbia University science departments. (Unless otherwise indicated, students may not use Barnard College courses to fulfill the Columbia College science requirement.)

*Courses in the list that are designed for non-science majors are noted with an asterisk.*

### Astronomy

ASTR UN1234	UNIVERSAL TIMEKEEPER (*)
ASTR UN1403	EARTH, MOON, AND PLANETS (*)
ASTR UN1404	STARS, GALAXIES # COSMOLOGY (*)

PHYS UN1402	INTRO ELEC/MAGNETISM # OPTCS
PHYS UN1403	INTRO-CLASSCL # QUANTUM WAVES
PHYS UN1601	PHYSICS I:MECHANICS/ RELATIVITY
PHYS UN1602	PHYSICS II: THERMO, ELEC # MAG

Any 3-point PHYS course numbered 2000 or higher

**Psychology**

PSYC UN1001	THE SCIENCE OF PSYCHOLOGY (*)
PSYC UN1010	Mind, Brain and Behavior (*)
PSYC UN1021	Science of Psychology: Explorations and Applications (*)

Any PSYC course in the 2200- or 2400-level may be used to fulfill the science requirement

All 3- and 4-point courses numbered in the 32xx, 34xx, 42xx, and 44xx can partially fulfill the science requirement

With prior departmental approval, some additional courses may also be used to partially fulfill the science requirement

PLEASE NOTE: 2600-level and some other psychology courses, including PSYC BC1001 INTRODUCTION TO PSYCHOLOGY and other Barnard psychology courses, **may not** be used to fulfill the science requirement

## SCIENCE C

All College students must complete one course from the following list of courses, which includes the courses in Science Category B plus a number of courses in other Columbia University academic departments and programs. (Unless otherwise indicated, students may not use Barnard College courses to fulfill the Columbia College science requirement.)

*Courses in the list that are designed for non-science majors are noted with an asterisk.*

## SUMMER SESSION COURSES

Students who wish to take summer courses to fulfill the Science requirement may do so through the Summer Session offered by the School of Professional Studies (SPS).

For policies regarding summer study, see the [Academic Regulations—Summer Study](#) section of this Bulletin.

For a list of summer courses approved for the science requirement, students should consult the annually updated [List of Approved Summer Courses](#).

## PHYSICAL EDUCATION REQUIREMENT

### General Information

Physical Education Department  
Dodge Physical Fitness Center  
212-854-3439

### [Physical Education Website](#)

All Columbia College students must complete a two-semester Physical Education requirement and pass a swim test in order to graduate.

Students may register for only one Physical Education course in a single semester. Students may elect to take additional semesters of Physical Education for academic credit after the minimum requirement of 2 credits has been fulfilled, up to a maximum of 4 points of credit for Physical Education courses that can count towards the B.A. degree.

Dance courses at Barnard College can be taken to fulfill the two-semester Physical education requirement.

Grades for Physical Education courses are generally based on attendance and participation. To pass a course, students must fulfill the attendance and participation requirements outlined by each section and available on the physical education website. **Students who are absent more than the permissible number of times are withdrawn from the course, unless they complete and file a drop form by the official deadline to drop a course.**

If students will miss a class meeting in order to observe a major religious holiday, they are responsible for arranging make-up classes with the instructor or departmental representative prior to the holiday.

### The Swim Test Requirement

The swim test requirement can be fulfilled either by passing a swim test or by taking a one-semester PHED swimming course for beginners.

Students may request a waiver for the swim test for reasons of disability or for reasons of religious observance. A waiver

related to a disability that precludes swimming must be certified by Columbia Health. A waiver related to religious observance that precludes swimming must be approved by the director of the Physical Education program. All requests for waivers and accommodations are reviewed by the director of the Physical Education program.

## INTERCOLLEGIATE ATHLETICS

### Intercollegiate Athletes and the Physical Education and Swim Test Requirement

To fulfill the two-semester Physical Education requirement, a rostered student-athlete who intends to participate in an intercollegiate sport should register for the appropriate section of **PHED UN1005 INTERCOLLEGIATE ATHLETICS**. Intercollegiate athletes may earn up to 4 points of credit of PHED UN1005 toward the degree.

Student-athletes who leave the team in mid-term but still wish to receive academic credit must notify the Physical Education Office and be placed in another physical education course to complete the attendance requirement.

Student-athletes are responsible for fulfilling the swim requirement according to the guidance noted above.

### Eligibility for Intercollegiate Athletics

Any student in the College who is pursuing the undergraduate program or a combined program toward a first degree is eligible for intercollegiate athletics. To be eligible for athletic activities, the student must make appropriate progress toward the degree as defined by the NCAA, the Ivy League, and Columbia University. These criteria are monitored by the Center for Student Advising and certified by the Office of the Registrar.

Questions about athletic eligibility should be referred to the appropriate advising dean or the compliance office in the Department of Intercollegiate Athletics and Physical Education.

For more information, visit [www.gocolumbialions.com](http://www.gocolumbialions.com).

# ACADEMIC REGULATIONS

## ATTENDANCE IN COURSES

Attendance in all class meetings, laboratory periods and other required events for a course is a basic expectation of all students enrolled in the course, whether or not attendance is noted as a requirement on a course syllabus.

Instructors may take attendance into account in assessing a student's performance in a course. In many courses, particularly those with the requirement of regular participation, multiple absences could lead to a failing grade for the course, even before the conclusion of the semester.

Students are accountable for absences that result from enrolling in a course after the semester begins.

For related information about attendance, see [Columbia University Policies—Religious Holidays](#).

## POINTS OF CREDIT PER TERM

Every Columbia College student must complete 124 points of academic credit to earn the B.A. degree from Columbia College. To complete this number of credits over 8 semesters, students will need to complete an average of 15.5 credits per semester, which typically represents 4 to 5 academic courses (each of 3 or more credits) per term.

A student's "academic program" is the full complement of courses in which the student is registered in an academic term—the combination of subjects, topics, and credits that a student plans to complete in a given semester.

**A full-time course load is defined as an academic program carrying 12-18 points per semester.**

- All Columbia College students are required to be full-time students and must therefore be registered for a minimum of 12 points of credit per term. Columbia College students are not permitted to enroll as part-time students.
- Any student who has not registered for at least 12 points of credit by the end of the [Change of Program period](#) may be withdrawn from Columbia College.
- An exception to this policy can be made for students in their final term who need fewer than 12 points of credit to complete their degree requirements, with the understanding that they will still be viewed as full-time students and will be responsible for full-time tuition and fees and for all other rules that apply to full-time students. Students in this scenario may petition the Committee on Academic Standing to register for fewer than 12 points and should consult with their advising

deans in the [Berick Center for Student Advising](#). If they are approved to take fewer than 12 points of credit, they will still be considered full-time students of Columbia College and be responsible for all relevant tuition and fees.

- Students may not enroll in more than 18 points of credit unless they petition the Committee on Points in the Berick Center for Student Advising and receive permission to do so.
- Students in their first semester at Columbia (i.e., first-year students and new transfer students in their first semester) may not petition to register for more than 18 points.

## LENGTH OF CANDIDACY

**Students are expected to earn the Bachelor of Arts (B.A.) degree at Columbia College in eight Fall and Spring semesters.**

Students may continue to take required coursework for the B.A. degree past the eighth semester only with permission from the Committee on Academic Standing, after first discussing such requests with their advising deans in the [Berick Center for Student Advising](#). Study beyond the eighth term is granted only for students who have found themselves in emergent circumstances beyond their control which have prevented them from completing the degree in eight terms.

**Note: Study beyond the eighth term is not granted for the purposes of changing a major or of completing a second program of study (e.g., a minor, special program, or second major).**

## PROGRESS TOWARD THE DEGREE

At the end of each Fall and Spring semester, the Committee on Academic Standing reviews the records of all students enrolled in Columbia College to determine whether students are in good academic standing or whether academic action is warranted—including academic warning, academic probation, suspension and dismissal.

### Good Academic Standing

To be considered in good academic standing, students achieve the following in each academic term:

- Complete a minimum of 12 points of credit of academic coursework;
- Achieve a term minimum grade point average of 2.0 (a "C" average);
- Achieve a cumulative grade point average of 2.0 (a "C" average);

- Make expected progress in the required Core Curriculum courses;
- Make expected progress in the coursework toward a declared major; and
- Make adequate progress in the number of cumulative credits required to be earned in eight semesters—i.e., the minimum of 124 credits for the Bachelor of Arts degree.
  - Students are expected to complete their degrees in eight semesters. Students who do not make adequate progress toward the degree may be placed on academic probation.
  - Adequate progress toward the degree is defined according to cumulative earned credits, as noted by the number of credits listed in the column of the chart below titled “Threshold for Academic Probation.”:

Semester	Points for typical progress	Threshold for academic probation
1	12	<12
2	31	<24
3	46	<38
4	62	<52
5	77	<70
6	93	<88
7	108	<106
8	124	

## Academic Warning and Probation

**Students may be placed on academic warning for the following reasons:**

- earning a term grade point average of 2.0, or just over 2.0, such that there is concern that the student may lose good academic standing if performance does not improve.
- earning a cumulative grade point average of 2.0, or just over 2.0, such that there is concern that the student may lose good academic standing if performance does not improve.

Students may also be placed on academic warning for completing fewer cumulative points than expected for the number of terms completed at Columbia College, such that it will be difficult for the student to complete the degree in eight semesters. Students in this situation should still be able to graduate in eight semesters without having to take more than the maximum of 18 points of coursework per semester.

The action of academic warning does not remain on a student’s record.

**Students may be placed on academic probation for the following reasons:**

- completing fewer than the required minimum of 12 points of credit in a term;
- earning a term grade point average below 2.0;
- earning a cumulative grade point average below 2.0;
- failing a Core Curriculum class; or
- failing to complete Frontiers of Science, Literature Humanities (both semesters), or University Writing in their first year.

Students may also be placed on academic probation for failing to make satisfactory progress toward the degree, according to the thresholds noted in the table above.

Students who are on academic probation are not eligible to study abroad.

The action of academic probation remains on a student’s record for internal use only. The status of academic probation is not noted on students’ transcripts.

**Students may not appeal the actions of academic warning or academic probation.**

Students and parents/guardians are notified when students are placed on academic probation. The advising deans in the [Berick Center for Student Advising](#) provide support to help students who are on academic action return to good standing.

## Academic Suspension/Dismissal

Students who fail to improve after being on academic probation, as well as students with extremely poor records during a single term, may be suspended and required to withdraw from Columbia College for at least one year. Conditions for readmission are specified at the time of suspension. If a student is readmitted after having been suspended and again fails to achieve satisfactory grades or to make normal progress toward the degree, the student may be dismissed from the College.

Students are notified by email and express mail of the actions of suspension or dismissal, and they will have a limited time in which to appeal the decision.

The decision of the appeals committee is final.

The actions of academic suspension or academic dismissal remain on students’ records and are recorded on the students’ transcripts.

Parents and/or guardians are notified when students are suspended or dismissed for academic reasons.

International students with F-1 or J-1 status are not allowed to remain in the United States while suspended or dismissed from the University. Any international student who is dismissed or suspended should immediately contact the [International](#)

Students and Scholars Office (ISSO) to discuss available options.

## GRADUATION

The B.A. degree can be awarded three times during the year: in February, in May, and in October. Under special circumstances, a B.A. degree scheduled to be awarded in May may be awarded in June instead.

Columbia College holds its Class Day exercises in May. This ceremony is presided over by the Dean of Columbia College, and each graduating senior is individually acknowledged and congratulated by the Dean.

The University holds its Commencement ceremony for all schools of Columbia University in May (see Academic Calendar). This ceremony is presided over by the President of Columbia University, and the President officially confers the Bachelor of Arts degree upon all students graduating from Columbia College.

## Application or Renewal of Application for the Degree

In order to receive the Bachelor of Arts degree from Columbia College, students who are on track to complete all requirements for the degree must apply for the degree.

General deadlines for applying for graduation are September 1 for October degrees; November 1 for February degrees; and December 1 for May degrees. When a deadline falls on a weekend or holiday, the deadline moves to the next business day.

The application for the degree is available on the Registrar's website. Students may complete the degree application form electronically and submit it to [diplomas@columbia.edu](mailto:diplomas@columbia.edu). Alternative instructions for submitting the application for the degree are noted on the form.

Students who fail to earn the degree by the conferral date for which they applied must file another application for a later conferral date.

## Diplomas

Diplomas are mailed to students after the degree has been officially conferred. There is no charge for the preparation and conferral of an original diploma. Students' names will be printed exactly as they appear on their transcript. Students are advised to check their transcript and email the Office of the University Registrar at [registrar@columbia.edu](mailto:registrar@columbia.edu) if corrections are needed.

If students wish to change the name noted on the transcript, they must submit the Name Change Affidavit. The affidavit must be notarized and filed by the deadline to submit the application for degree.

If a graduate's Columbia diploma is lost or damaged, there will be a charge of \$100 for a replacement diploma. Note that replacement diplomas carry the signatures of current University officials. Applications for replacement diplomas are available through the Office of the University Registrar.

Additional Information:

- Application for Degree or Certificate — University Registrar
- Graduation and Diplomas — University Registrar
- Commencement Week
- GradZone

## REGULATIONS FOR TRANSFER STUDENTS

All academic regulations noted in this *Bulletin* apply to students who transfer into Columbia College as sophomores or as juniors, with the following special considerations for their status as transfer students:

### Transfer Credit toward the Degree

Every Columbia College student must complete 124 points of academic credit to earn the B.A. degree from Columbia College. In order to receive the Columbia College degree, transfer students must complete a minimum of 60 points while enrolled in the College - which can include credits earned on Columbia-sponsored study abroad programs.

**Transfer students may apply a maximum of 64 points taken elsewhere toward advanced standing at the College.** Credit granted on the basis of Advanced Placement, International Baccalaureate and other standardized examinations is counted toward the 64-point maximum, as are credits earned at Columbia in the summer prior to matriculation and on study-abroad programs outside of Columbia. Credit is not granted for college courses taken while in high school.

Transfer students receive credit for non-Columbia courses that are substantially similar to Columbia College courses only when the grades received are C- or better. Once a transfer student is admitted, a credit review is conducted by the Berick Center for Student Advising and a tentative credit evaluation is sent to the student. A final credit evaluation is conducted once the student has matriculated at Columbia College and has submitted a final official transcript for coursework taken elsewhere.

Class standing for students transferring to Columbia College is determined prior to matriculation and is based on the number of terms and credits completed at the home institution. Twelve credits is the equivalent of one full-time term. **A transfer student's class standing will remain in place for the duration of the student's time in Columbia College, regardless of future credits earned.** Once they have

matriculated, transfer students may be assigned additional advanced standing like Advanced Placement, International Baccalaureate and other standardized examination credit, but their class status will remain the same. This policy remains in place even when students are eligible to graduate in less than eight terms.

## Transfer Credit toward Academic Requirements

Course descriptions and syllabi may be requested by Columbia College in order for certain courses to be considered for transfer credit and/or for certain courses to be considered for exemption to Columbia College requirements. Transfer students should consult with their advising deans in the [Berick Center for Student Advising](#), where all appropriate approvals will be coordinated with the relevant academic departments.

The Core Curriculum is the cornerstone of undergraduate academic life at Columbia. Even those transferring in with advanced credit should expect to take most of the coursework in the Core Curriculum, if not all of it. Students are very rarely exempt from the shared Core classes like Literature Humanities, Contemporary Civilization, Art Humanities and Music Humanities.

## Degree Completion

**Transfer students are expected to complete the requirements for the B.A. degree in eight undergraduate Fall and Spring semesters, inclusive of terms completed at other colleges or universities before entering Columbia. Transfer students cannot petition for extended time to complete the degree.**

Some majors may be difficult for transfer students to complete due to the number of credits required, the specific course sequencing, and the number of terms remaining for transfer students to complete all requirements for the Core Curriculum and for the major. There is no guarantee that a transfer student can complete every major offered. Transfer students must declare a major that they are capable of completing in the time available to them while at Columbia College.

Study beyond the eighth term is not granted for the purposes of changing a major or of completing a second program of study (i.e., a minor or a special program or a second major).

Transfer students should be especially careful when planning their academic schedules and are strongly urged to seek out guidance from their advising deans in the [Berick Center for Student Advising](#) and the relevant departmental [Directors of Undergraduate Studies](#).

## EXAMINATIONS

### Midterm Examinations

Midterm examinations are given during the course of each term. Although the term “midterm exam” might suggest one exam

that occurs halfway through the term, a midterm exam can be given anytime between the beginning and the end of the term. Midterm examinations are scheduled by each instructor, based on the pedagogical structure of a course. Therefore, while many midterm exams may be scheduled around the midpoint of a term (e.g., late October or mid-March), midterm exams may also fall earlier or later in the term (what we might call instead a “term-time exam”), and a course may require multiple exams during the course of the semester. Students should consult the syllabus of each course in which they are registered for the schedule of required midterm exams.

**Midterm exams missed for travel are not excused**, unless the travel is approved by Athletics for a Varsity athletics team (with advance notice given to the instructor) or if the travel is for a personal emergency (with notice given to the instructor as early as possible). Travel plans should be scheduled for dates that fall on holidays or on weekends.

### Final Examinations

Final examinations are given at the end of each term. During the first weeks of a Fall or Spring term, the Registrar’s Office issues a Projected University Examination Schedule which presents the likely schedule of final examinations for the semester. The Registrar’s Office will then issue the definitive University-wide Final Exam Schedule typically in early to mid-November for a Fall term and early to mid-April for a Spring term.

**Final exams missed for travel are not excused.** Travel plans should be scheduled for dates that fall on holidays, on weekends, or after final exams. Students should wait to confirm plans to leave campus for winter break until they have confirmation of their weekly course schedule (including discussion sections and labs) and of their final exam schedule, in order to ensure that they will be present for all final exams.

Students can view the Projected University Examination Schedule and the University-wide Final Exam Schedule in their Student Services Online (SSOL) accounts by clicking on “Schedule,” then “My Exam Schedule.” Students who have trouble locating a class on either list should contact the instructor to make sure the class has an exam.

### Rescheduling Final Exams

#### • Instructor Final Exam Conflicts

Under certain rare circumstances, it may be necessary for an instructor to reschedule a final exam. Any change to the day or time assigned by the Master University Examination Schedule must be agreed upon by the instructor and the students enrolled in the class. All students unable to take the exam at the new agreed-upon time must be given a make-up exam at a time that they are able to attend.

## • Student Final Exam Conflicts

Students may request a change of schedule for a final exam under either of the following two circumstances:

1. if a student is enrolled in two or more classes whose final exams are scheduled by the Master University Examination Schedule to be held at the same time; and/or
2. if a student has three exams scheduled on any given calendar day (*i.e.*, between 9:00 a.m. and 10:00 p.m. on the same calendar date).

Students in either circumstance should meet with their advising deans in the Berick Center for Student Advising *as soon as possible after the final exam schedule is published* in order to initiate the process for arranging a make-up exam.

## Failure to Complete a Final Exam

If a student does not take a final exam, or begins but does not complete a final exam, a grade of zero or F may be factored for that portion of the final grade. Make-up examinations are not guaranteed for any student who does not take or does not finish a final exam.

## Incompletes

Students facing medical, personal, or family emergencies at the time of a final exam or at the due date of a final paper or project may petition the Committee on Academic Standing for permission to complete the final exam, paper, or project at a later date. Students will receive a temporary mark of IN (Incomplete) until the work is completed. For more information, see the Grades section of this *Bulletin*.

## GRADES

The grading system used by Columbia College is as follows:

A+, A, A-	Excellent
B+, B, B-	Good
C+, C, C-	Fair
D	Poor but passing
F	Failure to pass (a final grade, not subject to reexamination)

Other notations may appear on students' transcripts as well:

P	A grade of Pass (P) used to cover a letter grade of C- or higher, if a student has elected the Pass/D/Fail grading option for the course. Restrictions on this option are detailed below.
W	A voluntary withdrawal from a course, initiated by the student. The deadline to withdraw from a course varies among the undergraduate schools.

Additionally, the following notations can be used by instructors for students of Columbia College or General Studies:

AR	A temporary mark submitted by an instructor if a student is experiencing extraordinary circumstances and more time is needed to determine the final grade for the class.
AR YC	A temporary mark submitted by an instructor for the Fall term grade in a continuous year-long course. When the final grade is calculated at the end of the academic year, the AR <sup>YC</sup> should be changed to a grade so that the Fall and Spring grades for the two semesters are identical.

## Report of Grades

Grades are available to view on SSOL on the first business day after they are submitted by the instructor. Paper and electronic transcripts may be ordered via SSOL. Students who find discrepancies in, or have questions about their records should contact their academic advisor.

## Grade Point Average Calculation

The Registrar calculates a cumulative grade point average for external purposes, such as official transcripts. The Registrar also calculates term and cumulative grade point averages for internal purposes, such as determining eligibility for the Dean's List.

When the Registrar computes a student's Columbia College grade point average, only grades earned while enrolled in Columbia College in the Fall and Spring terms (including Columbia-owned study abroad programs) and in Columbia-owned summer programs (including the Columbia School of Professional Studies Summer Sessions and Columbia-owned summer study abroad programs) are counted. Courses are weighted according to the number of credits.

The following scale is used:

Grade	GPA Equivalent
A+	4.33
A	4.0
A-	3.67
B+	3.33
B	3.0
B-	2.67
C+	2.33

C	2.0
C-	1.67
D	1.0
F	0

## The Pass/D/Fail Option

The purposes of the Pass/D/Fail option are to encourage students to take courses of interest to them outside of their field of specialization and to permit those who have not decided upon a major to test their talents in a particular field that may be of interest.

**The Pass/D/Fail option cannot be utilized for courses taken in fulfillment of the Core Curriculum or, for the most part, for courses taken in fulfillment of a major.** Students can use the Pass/D/Fail option for elective coursework and, in a few cases, for the introductory course in a major or minor (see departmental guidelines for details).

Students elect the Pass/D/Fail option for a course through their SSOL accounts, and students can select or deselect the Pass/D/Fail option up until the deadline that occurs on the last day of classes of a Fall or Spring term.

- Instructors assign all students in their class letter grades. Instructors are not informed if a student in their class elects to use the Pass/D/Fail option for the class.
- If a student has elected the Pass/D/Fail option for a class and receives a letter grade of C- or higher in the course, the letter grade will be covered by a mark of P. The mark of P is not included in the calculation of grade point averages.
- If a student has elected the Pass/D/Fail option for a class and receives a letter grade of D or F, the D or F remains on the transcript and is included in the calculation of grade point averages.

In order to encourage students to engage fully in the courses they elect to take for a grade of Pass/D/Fail, students are allowed to uncover a grade of P in SSOL until the end of the Change of Program period of the following semester.

- Students have until the end of the Change of Program period in the Spring semester to uncover the grade of a course taken in the previous Fall term, and until the end of the change of program period in the Fall semester to uncover the grade of a course taken in the previous Spring or Summer term.
- Seniors who graduate in May have until June 1 to uncover the grade of a course taken in their final Spring semester.
- Students who wish to uncover a grade of P can do so during these time periods through their SSOL accounts.

## The Grade of D

As noted above, the grade of D is considered “poor but passing”—i.e., poor understanding of the course material and therefore unsatisfactory progress in the curriculum. Therefore, no more than six points of credit earned with the grade of D may be credited toward the degree in any academic year – the academic year being inclusive of the Fall, Spring, and Summer terms. No more than 12 points of credit earned with the grade of D may be cumulatively credited toward the 124 credits required for the degree credit. These credits will be given only for courses taken at Columbia; transfer credit will not be awarded for courses taken elsewhere with a grade of D.

In general, courses completed with a grade of D will not count toward a major or minor. The decision of whether a course with a grade of D may be used to satisfy the requirements for a major or minor is made by the director of undergraduate studies of the relevant department or program.

In any given semester, the grade of D precludes the attainment of Dean’s List status (see Academic Honors, Prizes, and Fellowships—Dean’s List).

## The Mark of W (Withdrawal)

Students may **drop** a course from their academic programs by the fifth week of a Fall or Spring term, as long as they remain registered in a minimum of 12 points of coursework. If a student drops a course under these conditions, the course will be removed from the student’s transcript.

After the drop deadline and until the Monday of the last full week of classes of a Fall or Spring term, if a student has a compelling reason to stop taking a course, the student can **withdraw** from the course. If a student withdraws from a course, the course will remain on the student’s transcript with a mark of W, indicating official withdrawal from that course after the drop deadline. This notation is permanent and will remain on the transcript even if the student repeats the course. No points of academic credit are earned for classes with a mark of W.

Students must complete a minimum of 12 points of coursework in a term to be considered in good academic standing. If a student withdraws from a course and then completes fewer than 12 credits, the student may face academic action, such as academic probation, suspension, or dismissal. Students who do not make adequate progress toward the degree – i.e., an average of 15.5 points per term – may also face academic probation, suspension, or dismissal.

It is therefore important for students to consult their advising deans when considering the option of withdrawing from a course. If the option to withdraw still seems to be the best course of action, students should submit a completed Columbia College Acknowledgement of Course Withdrawal form to their advising deans. A withdrawal will be official only after these steps are taken; failure to attend classes does not constitute

dropping or withdrawing from a course, nor does a student's communication to the instructor of intent to withdraw. Students who stop attending classes without dropping or officially withdrawing are assigned the letter grade earned by factoring a zero or F for any missing work.

In any given semester, the mark of W precludes the attainment of Dean's List status (see [Academic Honors, Prizes, and Fellowships—Dean's List](#)).

## The Mark of AR (Administrative Referral)

The AR is a temporary notation for the transcript when an instructor needs additional time and/or additional consultation in order to determine a student's final grade for a course. The instructor should then consult the student's advising dean in the [Berick Center for Student Advising](#), for help in determining an appropriate final grade. The instructor has ultimate authority over the final grade awarded.

The AR notation is also used while a student applies for an Incomplete. If the Incomplete is approved, the instructor will submit a mark of AR for the student.

## The Mark of IN (Incomplete)

The IN is a temporary notation for the transcript approved by the Committee on Academic Standing for students who, due to serious extenuating circumstances, cannot complete their coursework or are unable to take a final examination by the end of the term. An IN is typically granted only in cases of severe illness (as certified by a healthcare practitioner or by Columbia Health) or extreme personal or family emergencies.

**Students may not arrange unofficial incompletes or extended deadlines simply through consultation with their instructors; any incomplete must be officially approved by the Committee on Academic Standing.**

- Students will be granted an IN only by first speaking with their advising deans and then filing a petition with the Committee on Academic Standing. Petition forms are available in the [Berick Center for Student Advising](#).
- To be granted an IN, students should have completed all work for the relevant class with the exception of the final paper, project or exam. If a student has additional uncompleted work in the class in addition to the final paper, project, or exam, an IN may not be granted.
- For classes that require a final paper or project, petitions must be submitted no later than the last day of classes. For classes that require a final examination, petitions must be submitted no later than the day before the exam.

If an instructor is willing to entertain an incomplete, pending approval by the Committee on Academic Standing, the instructor should submit a temporary grade of AR, along with a contingency grade that represents the grade that the student would earn if the final grade were calculated at the time of

grade submissions—i.e., the grade that the student would earn if the missing work were included in the calculation with a zero.

Students who are granted an IN are assigned a deadline for completion of the incomplete paper or project or a date by which a deferred examination must be taken. Those who fail to meet the assigned deadline or who miss the deferred examination will receive the contingency grade indicated by the instructor. All other marks of IN that remain unresolved by the end of one calendar year will be converted to the contingency grade or will be converted to a grade of F.

Students who receive the grade of IN, approved in advance by the Committee on Academic Standing, may be considered for Dean's List only after all IN grades are changed to letter grades (see [Academic Honors, Prizes, and Fellowships—Dean's List](#)).

Questions about incompletes may be directed to the advising deans in the [Berick Center for Student Advising](#).

## The Mark of R (Registration Credit)

The mark of R (Registration Credit) is given when a student, with the approval of the course instructor and the Committee on Academic Standing, regularly attends and participates in a course without the requirement to submit work for evaluation (*i.e.*, auditing a course).

The R credit option is available only to Columbia College seniors under the following conditions:

1. The course(s) will be taken in the last two terms of the student's attendance in Columbia College.
2. The course(s) will not count toward the 124 points of credit required for the Bachelor of Arts degree.
3. The course(s) will not fulfill a requirement of the Core Curriculum or a requirement of a major or a minor or a special program.
4. The student has the permission of the instructor of the course **and** the approval of the Committee on Academic Standing.

There may be additional conditions set by the course instructor, who may wish to require the completion of a certain type or amount of work in order to earn the R credit. The exact nature of any required coursework should be determined by the instructor when the student petitions for an R for the course. An instructor may give a grade of F to a student who has not completed this required work.

The deadline for registering for R credit is the same deadline as the deadline to drop any course that is not part of the shared Core Curriculum – i.e., the drop deadline that falls during the fifth week of classes of a Fall or Spring term. Students should consult the academic calendar in the [Bulletin](#) for the exact deadline each term to register for R credit.

Courses taken for R credit do not receive any points of academic credit, and they are not factored in the calculation of a student's GPA.

## The Mark of YC (Year Course)

The YC is a notation given at the end of the first term of a year-long course in which the full year's work must be completed before a qualitative grade can be assigned. The YC notation for the first term must be approved by the Berick Center for Student Advising, so the instructor will submit a notation of AR[YC], which will be converted to a YC upon request by the instructor.

The final grade given at the end of the second term of the year-long course is the grade for the entire course; therefore, when the final grade is assigned at the end of the second term, the instructor should submit a request to change the YC for the first term of the course to the same grade as that given in the second term. In any given semester, the mark of YC precludes the attainment of Dean's List status until the grade for the entire year's coursework is awarded (see [Academic Honors, Prizes, and Fellowships—Dean's List](#)).

Students may be able to receive credit toward the Columbia College degree, and possibly advanced placement within Columbia programs of study, through college-level work taken before matriculating to Columbia College.

The College grants credit for up to one semester of college-level work (a maximum of 16 points) completed before matriculation at Columbia College, subject to specific conditions and guidelines.

- This credit could be awarded for exams taken during secondary school, such as advanced-level examinations such as College Board Advanced Placement examinations (AP), Higher Level International Baccalaureate examinations (IB), General Certificate of Education Advanced Level examinations (A-Levels), or other national diploma programs.
- This credit could also be awarded for courses taken at other colleges or universities after the completion of secondary school and before matriculation to Columbia.
- Whether the advanced credit is awarded for college-level exams or college coursework or a combination thereof, the maximum amount of credit that will be awarded is 16 points.

Academic credit toward the Bachelor of Arts from Columbia College for this advanced-level work is awarded upon completion of the first year at Columbia and is determined in accordance with College and departmental policies. Students wishing to arrange advanced credit must meet with their advising dean in the [Berick Center for Student Advising](#) and provide the relevant transcript or certification.

Students who wish to receive advanced credit in any academic subject – including advanced placement in, or exemption from, the language requirement – may not take courses at Columbia that cover similar or more basic material than the advanced work already completed. For example, students cannot receive AP credit for a foreign language (which assumes a proficiency at the same level as “Intermediate II” or similar level in a language) and also take a class for credit in that language at the “Intermediate II” level or lower. Also, students may not receive credit for two exams that cover the same material (e.g., Calculus AP and Mathematics GCE Advanced Level Exam).

In some cases, advanced credit is awarded only when students successfully complete a higher-level course in the same field of study.

For information about advanced standing for transfer students, see [Academic Regulations—Regulations for Transfer Students](#).

## COURSEWORK TAKEN AT OTHER COLLEGES OR UNIVERSITIES

Entering first-year students are not granted credit for courses taken at other colleges or universities prior to their graduation from secondary school.

Entering first-year students may receive a maximum of 6 points of academic credit toward the Bachelor of Arts degree from Columbia College for college courses taken after their graduation from secondary school and prior to matriculation at Columbia. In order to receive this credit, students must submit for each relevant course taken elsewhere an official university or college transcript and the syllabus of the course(s) to their advising deans in the [Berick Center for Student Advising](#). Final determination will be made by the dean of advising.

## ADVANCED PLACEMENT (AP) EXAMINATIONS

Students can earn up to a maximum of 16 points of academic credit toward the Bachelor of Arts degree from Columbia College for College Board Advanced Placement (AP) examinations with certain scores.

**Note: Credit earned through AP scores cannot be used toward exemption from any of the shared Core Curriculum courses, the Global Core Requirement, or the Science Requirement.**

**Credit earned through AP scores may be used toward satisfying the Foreign Language Requirement**, according to the rules of the appropriate language department (see [The Core Curriculum—Foreign Language Requirement](#)). Students who wish to receive advanced credit toward, or exemption from, the language requirement may not take courses at Columbia that cover similar or more basic material than the advanced work already completed.

Individual academic departments regularly review the Advanced Placement curriculum and determine appropriate placements, credit, and/or exemptions. Students should refer to a department's pages in this *Bulletin* (linked below) for specific information on possible credits granted, possible advanced placement, and possible course exemptions.

Students entering in the 2024-2025 academic year may be awarded AP credit for the following subjects:

Subject	Department
Biology	Biological Sciences
Chemistry	Chemistry
Computer Science	Computer Science
Economics	Economics
English	English and Comparative Literature
French	French and Romance Philology
German	German Languages
Government and Politics	Political Science
History	History
Italian	Italian
Latin	Classics
Mathematics	Mathematics
Physics	Physics
Psychology	Psychology
Spanish	Latin American and Iberian Cultures
Statistics	Statistics

For further information about the application of AP credits, students should consult with their advising dean in the [Berick Center for Student Advising](#).

## INTERNATIONAL BACCALAUREATE

Students can earn up to a maximum of 16 points of academic credit toward the Bachelor of Arts degree from Columbia College for Higher Level International Baccalaureate (IB) examinations with scores of 6 or 7, if the academic discipline of the examination is represented in the academic offerings of Columbia College.

**Credit earned through IB scores cannot be used toward exemption from any of the shared Core Curriculum courses, the Global Core Requirement, or the Science Requirement.**

**Credit earned through IB scores may be used toward satisfying the Foreign Language Requirement**, according to the rules of the appropriate language department (see [The Core Curriculum—Foreign Language Requirement](#)). Students who wish to receive advanced credit or exemption for the language requirement may not take courses at Columbia that

cover similar or more basic material than the advanced work already completed.

For further information about the application of IB credits, students should consult with their advising dean in the [Berick Center for Student Advising](#).

## BRITISH ADVANCED LEVEL EXAMINATIONS

Students can earn up to a maximum of 16 points of academic credit (6 credits each) toward the Bachelor of Arts degree from Columbia College for GCE British Advanced Level (A-Levels) examinations with a grade of A or B, if the academic discipline of the examination is represented in the academic offerings of Columbia College.

**Credit earned through A-Levels scores cannot be used toward exemption from any of the shared Core Curriculum courses, the Global Core Requirement, or the Science Requirement.**

**Credit earned through A-Levels scores may be used toward satisfying the Foreign Language Requirement**, according to the rules of the appropriate language department (see [The Core Curriculum—Foreign Language Requirement](#)). Students who wish to receive advanced credit or exemption for the language requirement may not take courses at Columbia that cover similar or more basic material than the advanced work already completed.

For further information on the application of A-Levels credits, students should consult with their advising dean in the [Berick Center for Student Advising](#).

## OTHER NATIONAL SYSTEMS

Students can earn up to a maximum of 16 points of academic credit toward the Bachelor of Arts degree from Columbia College for diplomas earned in certain national systems of college-level curriculum as part of a high school curriculum.

For further information, students should consult with their advising deans in the [Berick Center for Student Advising](#).

## ADVANCED PLACEMENT IN LANGUAGE STUDY

Students who wish to begin foreign language studies at a level above “Elementary I” (or its equivalent) may be placed into a more advanced level based on placement exams taken at Columbia or based on certain test scores on standardized tests.

Most language programs at Columbia will offer placement exams for new students during the New Student Orientation Program (NSOP). Exact times and dates of exams will be provided to students shortly before NSOP begins. Returning students who wish to take a placement exam but who are not participating in NSOP should contact the relevant Columbia language program before the beginning of each term to inquire

about opportunities to take a placement exam. Based on the assessment of the placement exam, students may be placed into a more advanced level of language study or may be exempted from the Language requirement of the Core Curriculum.

It may also be possible for incoming first-year students to be placed into upper levels of language study on the basis of scores on the following tests:

- SAT II: Subject Tests
- Advanced Placement (AP) examinations
- Higher Level International Baccalaureate (IB) examinations
- Certain diplomas issued by national systems for college-level curriculum

Individual departments regularly review the Advanced Placement curriculum and determine appropriate placements, credit, and/or exemptions; students should refer to a department's pages in this *Bulletin* for specific information on possible credits granted, advanced placement, and course exemptions.

In some cases, advanced credit/placement is awarded only when students successfully complete a higher-level course in the same foreign language.

Students with scores on these exams should consult their advising dean in the [Berick Center for Student Advising](#) and should ensure that the scores have been sent through official channels to Columbia College.

## COURSES TAKEN IN OTHER COLUMBIA UNDERGRADUATE SCHOOLS

Columbia College students may take any course for credit listed in this *Bulletin*, in the General Studies *Bulletin*, or in the Barnard College *Course Catalogue* without any special approval for enrollment, unless special approval by an individual instructor or department is required and noted in the course description.

Columbia College students may take **a maximum of four courses for credit toward the Bachelor of Arts degree from Columbia College that are offered by the Fu Foundation School of Engineering and Applied Science (SEAS)**, and only if space is available in those courses.

- This four-course limit does not apply to courses offered by the Computer Science Department, which offers a major and a minor for Columbia College students.
- This four-course limit does not apply to students who are pursuing the [3-2 Combined Plan program](#) with SEAS.

## COURSES TAKEN IN THE GRADUATE SCHOOL OF ARTS AND SCIENCES

Columbia College students may take courses offered by the Graduate School of Arts and Sciences if the instructors of the courses give explicit permission, in order to ensure the students' preparation for the course. Students will typically be required to have previous coursework in the field or topic of the course(s).

If students enrolled in graduate-level courses wish to use the courses to fulfill requirements for a major or minor, the relevant director of undergraduate studies must give explicit approval for those courses to fulfill requirements in the major or minor.

## COURSES TAKEN IN OTHER SCHOOLS OF COLUMBIA UNIVERSITY

Columbia College students may take a **maximum of four courses for credit toward the Columbia College Bachelor of Arts degree in the professional schools at Columbia University listed below**, with the requisite permissions. These courses will count as elective credit toward the 124 points necessary for the B.A. degree.

Columbia College students may also take courses in the professional schools at Columbia University listed below for credit that goes beyond the 124 points necessary for the B.A. degree, if they receive permission to do so from their advising deans from the [Berick Center for Student Advising](#).

Columbia College students enrolled in courses in these professional schools must follow the policies established by those schools; they must have the permission of the instructor of the course to enroll; and, in some instances, they must have the permission of the school in which the course is offered to enroll officially in the course.

Following is a list of schools and programs that allow undergraduates to register for courses, with their policies regarding the enrollment of Columbia College students. Students who wish to take a course in a Columbia school not listed below should consult with their advising deans in the [Berick Center for Student Advising](#).

### Columbia University Graduate School of Architecture, Planning and Preservation

Qualified Columbia College students may enroll in graduate seminars and lectures offered by the Graduate School of Architecture, Planning and Preservation (GSAPP), if the instructors approve and if space is available. Columbia College students are not permitted to enroll in any studio courses in GSAPP. Further details can be found on this website: <https://www.arch.columbia.edu/cross-registration>.

## Columbia University School of the Arts

Qualified Columbia College students may enroll in graduate courses offered by the School of the Arts if the instructors approve and if space in the courses is available.

## Columbia Business School

The Business School offers courses that are designed specifically for undergraduates, which are listed in the section of this *Bulletin* titled *Departments, Programs, and Courses—Business*. These courses do not count towards the limit of four professional school courses that can be taken for credit towards the Columbia College degree.

Columbia College seniors may be able to take other courses offered by the Business School if instructors approve, if space is available, and if the students have completed the required prerequisites. For these courses, students must follow the cross-registration guidelines of the Business School. Note that registration deadlines for these classes are often earlier than the College registration and Change of Program deadlines.

## Columbia University School of International and Public Affairs

The School of International and Public Affairs (SIPA) offers open enrollment courses to all Columbia students if space is available. Students interested in registering for a SIPA Open Enrollment Course at the 6000-level or above must receive instructor permission and then should complete and submit, along with documentation indicating instructor permission, a SIPA registration request form to the SIPA Registration office on the 6th floor of the International Affairs Building. If the class is not full, approval may be granted.

## Columbia University School of Journalism

Columbia College students may enroll in certain courses offered by the School of Journalism if the instructors approve and if space is available.

Students can see cross-listed courses and access the necessary permission form on the cross-registration page of the School of Journalism's website: [journalism.columbia.edu/cross-registration](http://journalism.columbia.edu/cross-registration).

## Columbia Law School

In general, Columbia College students are not permitted to enroll in courses offered through the Law School. Exceptions to this policy may be granted under the following circumstances:

1. Law School courses may be taken by students in the Accelerated Interdisciplinary Legal Education (AILE) program. Students must have signed permission from the Law School Office of the Assistant Dean of Academic Services, 500 William and June Warren Hall.
2. Faculty in the Law School sometimes open a small number of spaces in their seminars to Columbia College seniors,

to be selected through an application process. Such opportunities will be shared with students if they become available.

## Columbia University School of Professional Studies

**Columbia College students are not permitted to enroll during the academic year—i.e., Fall and Spring terms—in courses offered through the School of Professional Studies**, unless those courses have been individually approved by the Committee on Instruction for specific degree programs (e.g., the major in Sustainable Development, in which case the specific courses are noted on the program's website).

The School of Professional Studies (SPS) is responsible for the Summer Session at Columbia University; therefore, **Columbia College students are permitted to enroll in undergraduate classes offered in the Summer Session by the School of Professional Studies**. For information on taking courses at Columbia during the summer, please see the Summer Study section in this *Bulletin* below. Note that not all courses offered by SPS in the Summer Session will be open to undergraduates, and not all courses will count towards the 124 credits required for the Bachelor of Arts degree from Columbia College. Students interested in summer courses offered by the SPS should consult with their advising deans in the Berick Center for Student Advising before completing their enrollment.

## Columbia Mailman School of Public Health

The Mailman School of Public Health offers courses designed for undergraduates through the Special Concentration in Public Health, which are listed in the section of this *Bulletin* titled Departments, Programs, and Courses—Public Health. These courses do not count towards the limit of four professional school courses that can be taken for credit towards the Columbia College degree.

Qualified Columbia College students may enroll in other courses offered by the Mailman School of Public Health – if instructors approve, if space is available, and if the relevant department at Mailman gives permission. Students must complete the Public Health Cross Registration Application Form and receive signed permission from the department, as well as from the School of Public Health's Office of Student Affairs, 722 West 168 Street, Suite 1014. Once School of Public Health permissions are secured, students must also receive signed permission from the Berick Center for Student Advising, before proceeding to register for the course at the Registrar's Office.

## Columbia University School of Social Work

Columbia College students may enroll in courses offered by the School of Social Work if instructors approve and if space is available.

## Teachers College, Columbia University

In general, Columbia College students may not enroll in courses offered by Teachers College. Exceptions to this policy may be granted under the following circumstances:

1. In rare instances, a student's faculty adviser may deem a course offered by Teachers College as essential to the student's undergraduate major. Students with such permission from their faculty adviser should submit a petition to Academic Affairs, 202 Hamilton.
2. In certain instances, instrumental music instruction in a particular instrument may be available at Teachers College and not through the Music Department. If students are accepted into the music instruction program at Teachers College, they will be charged per credit for the course over and above their tuition as full-time Columbia College students. Students should submit a petition to Andrew Plaa, dean of Advising in the Berick Center for Student Advising.

## SUMMER STUDY

### Columbia Summer

Normally, students may earn credit toward the Bachelor of Arts degree from Columbia College through summer coursework only for courses taken in the Columbia Summer.

Columbia College students may enroll in a maximum of 8 points of credit in any Columbia Summer session (or in overlapping sessions), and may earn a maximum of 16 credits in any Columbia Summer session.

**Not all courses offered in the Summer Session are accepted by Columbia College for credit.** Students should consult their advising dean in the Berick Center for Student Advising for advice on which courses can be taken for credit, and students should also consult the annually updated List of Approved Summer Courses.

The Columbia University School of Professional Studies (SPS) is responsible for Columbia Summer, so students who take courses in the Summer Session do so by enrolling directly in SPS. Therefore, Columbia College students enrolled in Summer Session courses offered by SPS are, during the course of their enrollment in those summer courses, subject to the policies and procedures of SPS, which may differ from the policies and procedures that govern their undergraduate coursework in the College in the Fall and Spring semesters. Columbia College students interested in summer coursework should consult their advising dean in the Berick Center for Student Advising for information on the different policies and procedures governing Columbia Summer.

Columbia College students enrolled in coursework in Columbia Summer may utilize the Pass/D/Fail option only under the following circumstances:

- Columbia College students may utilize the Pass/D/Fail option a maximum of twice during a year that spans Fall, Spring, and Summer. Students have the opportunity to use the Pass/D/Fail option one time during the Fall semester and one time during the Spring semester.
- Students who have not utilized one or both of these Pass/D/Fail option(s) in the previous academic year may elect, in the summer immediately following, to take one course in a Summer session on a Pass/D/Fail basis.
- For additional information on and restrictions governing Pass/D/Fail credit, see the Academic Regulations—Exams and Grades section of this *Bulletin*.

Students who wish for summer coursework to count toward their major or minor must receive permission from the director of undergraduate studies of their major department.

## Summer Study Outside Columbia University

In general, Columbia College students may not take courses toward the Bachelor of Arts degree from Columbia College during the summer at another college or university outside Columbia University, except in the case of approved study abroad programs.

In some circumstances, permission may be granted to students to take courses in the summer toward the Bachelor of Arts degree from Columbia College during the summer at another college or university. Those circumstances include the following:

- A student has fallen behind in credits and wishes to catch up on coursework in order to make adequate progress toward the degree in the expected eight Fall and Spring semesters.
- A student wishes to take a course that is a prerequisite for a course that should be taken in the following fall for the student's major or minor.
- A student wishes to take a language course toward the Foreign Language requirement. Students should note that introductory and intermediate language courses are only approved pending the successful completion of the departmental placement test into the next higher level language course. Students are responsible for arranging departmental testing upon return to campus in the Fall. If students do not place into the next level of the language course, credit will not be granted. Students who elect to discontinue study of the language or do not take the relevant departmental placement test will not be granted credit for the summer courses taken.

Students who wish to take summer coursework in one of the above categories should discuss their study plans with their advising dean in the Berick Center for Student Advising.

Students should then go through the following steps for approval for summer coursework taken elsewhere:

1. Obtain a copy of Columbia College's Pre-Approval for a Course Taken at Another U.S. Institution form, available in the [Berick Center for Student Advising](#).
2. Carefully read the following procedures to apply for such credit.
3. Complete the approval request form, outlining their reasons for taking summer courses and listing the specific courses in which they wish to enroll.
4. Submit the completed approval request form to the advising dean.

Once submitted to students' advising deans in the [Berick Center for Student Advising](#), the Committee on Academic Standing reviews requests for approval. Students should secure pre-approval prior to enrolling in courses at other institutions, to avoid the loss of time and expense of enrolling in a course that is ultimately not approved.

Students may not receive credits for study abroad during the summer except in Columbia-sponsored programs or approved foreign-language, archaeology, and field-studies programs. Students seeking summer study abroad credits must receive permission from the [Center for Undergraduate Global Engagement](#), 606 Kent.

Approval to receive College credit for summer school courses does not ensure approval of the course to fulfill a Core Curriculum requirement or a major or minor requirement.

- Students who wish for summer coursework to count toward their major or minor must receive permission from the director of undergraduate studies of their major department, prior to taking the course.
- Students applying for summer school credit for courses that they wish to use in partial fulfillment of the science or Global Core requirements must submit the relevant course approval petition to their advising dean in the [Berick Center for Student Advising](#) for approval by the appropriate faculty committee, prior to taking the course.
- For the Global Core requirement, only non-Columbia study abroad courses taken in the Summer can be considered by petition. Courses taken on Columbia's campus must be pre-approved by the Committee on the Global Core in order to fulfill part of the Global Core requirement.

## STUDY OUTSIDE COLUMBIA UNIVERSITY IN THE ACADEMIC YEAR

In general, Columbia College students may not take courses for credit toward the Bachelor of Arts degree from Columbia

College at another college or university during the academic year (i.e., Fall or Spring). Permission to study at another school for a term or a year is granted only for study at institutions outside of the United States, as part of an [approved study abroad program](#), or for study through one of the established [domestic study-away programs](#). Exceptions may be granted for study during the summer. See the [Summer Study](#) section for more information.

Students may not be simultaneously enrolled at Columbia College and at another institution of higher education. Students who are enrolled at Columbia College yet matriculate into another institution of higher education and/or are considered a degree-seeking student at another college or university will be withdrawn from Columbia with no opportunity to return and complete the Columbia College degree.

## LEAVES OF ABSENCE AND WITHDRAWALS FROM COLUMBIA COLLEGE

Students can request a leave of absence prior to the start of a term or during the term. When a student takes a leave of absence during a term, this action is also considered a withdrawal, defined as the dropping of one's entire academic program in a given term after the first day of classes of the term and, as a result, withdrawing from Columbia College.

**Withdrawing from Columbia College after the start of the semester can have implications for financial aid, and students are strongly advised to talk with their advising deans and with the Office of Financial Aid about any financial consequences of a necessary withdrawal.**

**Any student withdrawing from Columbia College must notify the [Berick Center for Student Advising](#) in writing; it is not sufficient for a withdrawal to notify instructors of plans to withdraw or to stop attending classes.** Absence from classes without officially withdrawing from Columbia College can result in failing grades in all courses.

## VOLUNTARY MEDICAL LEAVE OF ABSENCE

A medical leave is granted to a student whose health condition interferes with successful full-time study. A leave can be granted for a minimum of one term and a maximum of two years. Unless a student is granted an exception due to extenuating circumstances, a student will be permanently withdrawn after the maximum time period of two years.

Students must consult with their advising deans in the [Berick Center for Student Advising](#) to initiate a leave, and then provide medical documentation to support the request. Medical leaves must be accompanied by an individualized assessment of students' individual healthcare needs.

While on leave, students must be actively engaged in a course of medical treatment that leads to recovery. In addition,

students are required to continue to access their Columbia email, which is the official means of communication by the University.

**When applying for readmission to Columbia College, students must provide medical documentation supporting their readmission.** Normally, students may only return in the Fall or Spring term. Only in rare circumstances will students be readmitted from medical leave to enroll in courses for the Columbia Summer Session.

All questions about medical leaves should be addressed to the students' advising deans in the [Berick Center for Student Advising](#).

## Academic Standing and Transcript Notations

Students who take a leave while in good academic standing will return in good academic standing; students who take a leave while on academic action will return on academic action.

When a leave begins when a term is already in session, the student's transcript will reflect the action of withdrawal and the date of withdrawal for the semester in question. If the date of withdrawal for a medical leave is on or before the Columbia College withdrawal deadline (November 14 for Fall 2024 and March 27 for Spring 2025), the student's transcript will not reflect the individual courses attempted during the term. If the date of withdrawal for a leave begins after the Columbia College withdrawal deadline, individual courses will remain on the transcript.

Ordinarily, Columbia College students who are authorized to withdraw for medical reasons after the withdrawal deadline will receive a mark of W for each of their courses for the term. These notations indicate an authorized withdrawal from the courses.

In rare cases, when a student must leave for medical reasons beyond the relevant deadline, a student and advising dean in the [Berick Center for Student Advising](#) can work together with the faculty to determine whether an Incomplete would be a more appropriate notation on the transcript.

- In order to be eligible for an Incomplete, the student must have completed all work for the course except the final paper, exam, or project. The student must also obtain the approval of the relevant advising dean(s) in the [Berick Center for Student Advising](#) as well as the appropriate faculty member(s). Students should consult with their advising deans in the [Berick Center for Student Advising](#) for more details.
- Students who have been approved for authorized Incompletes in the last semester before their medical leave must complete the work of each course upon their return to campus by the end of the Change of Program period of their first semester after being readmitted. If the work is not completed by the end of the Change of Program period of the term in which the student returns, the grade may

convert to the contingency grade or to an F. Due dates for incomplete work should be determined in consultation with the advising dean in the Berick Center for Student Advising upon notification of readmission.

When students begin a leave after the Columbia College withdrawal deadline, they should be aware of the overall number of credits that must be completed to remain in good academic standing in future semesters. Students should keep in mind that Columbia College students should complete an average of 15.5 points per term to remain in good academic standing. Students should consult with their advising deans in the [Berick Center for Student Advising](#) to learn whether or not they will fall below the low points threshold (see section on Academic Standing) established for Columbia College students and, if so, work with their advising deans and departments to create a reasonable academic plan to ensure the timely completion of their degree.

**Students are not permitted to earn transferable credits toward the degree while on medical leave from the University, as the purpose of the leave is to regain full health in order to return and resume full-time study.**

In some cases, healthcare practitioners may recommend that students take courses at home institutions as part of the recovery process. It is recommended that students follow the advice of their healthcare practitioners; however, they should make their decisions knowing that coursework taken elsewhere while on medical leave may not be transferred back to Columbia to count towards their degree.

**If a student matriculates at another institution in a degree program while on leave from Columbia, the student will be considered to have transferred to another institution and will be permanently withdrawn from Columbia College.**

## • READMISSION FROM MEDICAL LEAVE OF ABSENCE

Students must complete all parts of the following readmission procedures by the following deadlines:

- **Fall term readmission – June 1**
- **Spring term readmission – November 1**
- **Summer term readmission – not permitted**

In order to begin the readmission process, students must first discuss their plans with their advising deans in the [Berick Center for Student Advising](#) and then submit the following letters to their advising deans by email or fax:

1. **Request for readmission:** This letter should review the circumstances that led to the leave, describe in detail any activities pursued while away, explain why studies can now be successfully resumed, and outline a plan for continued

support. The letter should also indicate whether or not campus housing will be required.

## 2. **Letter from medical practitioner supporting**

**readmission:** This letter should describe the treatment prescribed for the student and progress made by the student, provide an evaluation of the student's readiness to return to full-time study at Columbia, and outline the recommended continued care plan upon readmission.

The Medical Leave Readmission Committee is composed of representatives of Columbia Health, the Berick Center for Student Advising, and other key offices of the College and the University. It meets in June and November to consider readmission requests for the Fall and Spring terms, respectively. Committee review is not guaranteed if documentation is submitted after the stated deadlines. Students will receive notification regarding one of the following three outcomes of the committee's assessment of readmission requests:

1. Applicants are approved for an interview by a Columbia Health practitioner. Pending the results of the interview, a student may be officially readmitted or denied readmission and will be notified of a decision by the Berick Center for Student Advising by letter and email. In some cases, the medical professionals on the readmission committee may decide an interview is not necessary before readmitting the student.
2. Additional information is requested.
3. Readmission is denied. Students may reapply the following semester for readmission. The decisions made by the Medical Leave Readmission Committee are final and cannot be appealed.

Once officially readmitted, students will be provided an online registration appointment in order to enroll for the coming term. Normally, students will be able to register in late August for the Fall and in mid-January for the Spring term. In addition, students who are guaranteed housing upon readmission may submit a housing application by following the instructions in their readmission letter. Students on leave cannot participate in housing lotteries before being formally readmitted.

Students must address all financial or other obligations to the University that may still be outstanding from the beginning of their leave. If holds have been placed on their account, these holds must be cleared before they can enroll in classes or move into housing. If, after being readmitted for the following semester, a student cannot register by the end of the Change of Program period of that semester, then the student will be placed on another leave of absence.

Students are urged to meet with their advising deans in the Berick Center for Student Advising and, if they live in campus housing, a Residential Life staff member, during the first two weeks of their return to campus, to ensure a smooth transition back to the campus community.

## VOLUNTARY PERSONAL LEAVE OF ABSENCE (NONMEDICAL)

A voluntary leave of absence may be granted by the Committee on Academic Standing to undergraduate students who request a temporary withdrawal from Columbia College for a nonmedical reason during the semester. Students do not need to petition the Committee on Academic Standing if they request a voluntary leave of absence prior to the start of the semester. Students considering a voluntary leave must discuss this option in advance with their advising deans in the Berick Center for Student Advising.

Voluntary leaves are granted for a period of one to four semesters. Students should be in good academic standing at the time of the leave, and should be able to complete their degree in a total of eight semesters.

When a leave begins after a term is in session, the student's transcript will reflect the action of withdrawal and the date of withdrawal. If the date of withdrawal for a personal leave is on or before the Columbia College withdrawal deadline (November 14 for Fall 2024 and March 27 for Spring 2025), the student's transcript will not reflect the individual courses attempted during the term.

Normally, if a voluntary leave of absence begins after the Columbia College withdrawal deadline, the student's transcript will include all courses attempted, with each course receiving a mark of W (indicating authorized withdrawal). In certain circumstances, a student may qualify for an Incomplete for a course, and the remaining work for the course would have to be completed by the end of the Change of Program period of the semester in which the student returns to Columbia. If the Incomplete is not completed by that time, the contingency grade or a W will be inserted as the final grade.

Students may not take courses for transferable credit while on leave. If a student matriculates at another institution in a degree program while on leave from Columbia, the student will be considered to have transferred to another institution and will be permanently withdrawn from Columbia College. Students who choose to take voluntary leaves are not guaranteed housing upon return to the University. International students should contact the International Students and Scholars Office to ensure that a leave will not jeopardize their ability to return to Columbia College.

To return to Columbia College, students must notify the Berick Center of Student Advising by June 1 for the Fall term or November 1 for the Spring term. Students must request readmission in writing and submit a statement describing their readiness to return.

## FAMILY EMERGENCY LEAVE OF ABSENCE

Columbia College students who must leave the university for urgent family reasons that necessitate a semester-long absence

(e.g., family death or serious illness in the family) may request an emergency family leave of absence. Documentation of the serious nature of the emergency must be provided. Students must request an emergency family leave of absence from their advising deans in the [Berick Center for Student Advising](#).

When an emergency family leave begins after a term is in session, the student's transcript will reflect the action of withdrawal and the date of withdrawal. If the date of withdrawal for an emergency family leave of absence is on or before the Columbia College withdrawal deadline (November 14 for Fall 2024 and March 27 for Spring 2025), the student's transcript will not reflect the individual courses attempted during the term. Normally, if an emergency family leave begins after the Columbia College withdrawal deadline, the student's transcript will include all courses attempted, with each course receiving a mark of W (indicating authorized withdrawal). In certain circumstances, a student may qualify for an Incomplete for a course, and the remaining work for the course would have to be completed by the end of the Change of Program period of the semester in which the student returns to Columbia. If the Incomplete is not completed by that time, the contingency grade or a W will be inserted as the final grade.

To return to Columbia College, students must notify the [Berick Center of Student Advising](#) by June 1 for the Fall term or November 1 for the Spring term. Students must request readmission in writing and submit a statement describing their readiness to return. Once readmission is granted, housing will be guaranteed.

## FAILURE TO GRADUATE

**Students who fail to graduate by their final semester have, in effect, been withdrawn from the College and therefore must apply for readmission within a two-year period in order to have an opportunity to complete the degree.** If they do not complete their degree within two years, then they may be permanently withdrawn.

To apply for readmission, students must have successfully completed no fewer than 90 points of academic credit and earned a GPA of no less than 2.0. Students must fulfill the degree and major requirements in place at the point of original matriculation.

Readmission will be predicated upon the assessment of the student's ability to successfully complete the degree within one calendar year. Inquiries regarding readmission should be directed to the [Berick Center for Student Advising](#).

## READMISSION

In general, students seeking readmission to Columbia College must submit evidence that they have achieved the purposes for which they left. Consequently, specific readmission procedures are determined by the reasons for the withdrawal. Policy statements outlining the readmission procedures for voluntary or medical leaves of absences are available in the [Berick Center](#)

for [Student Advising](#). Students should consult their advising deans for further information.

Students applying for readmission should complete all parts of the appropriate readmission procedures by June 1 for the Fall term or November 1 for the Spring term. Once an international student with F-1 or J-1 status is readmitted, the student should contact the [International Students and Scholars Office](#) to obtain a new visa certificate (form I-20 or form DS-2019).

**Students may not take courses for transferable credit while on leave. If a student matriculates at another institution in a degree program while on leave from Columbia, the student will be considered to have transferred to another institution and will be permanently withdrawn from Columbia College.**

## THE COMMITTEE ON INSTRUCTION

The undergraduate curriculum for Columbia College, and all attendant policies, are managed by the Committee on Instruction, which is co-chaired by the Dean of Columbia College and the Dean of the School of General Studies and which has twelve faculty members representing the three academic divisions (humanities, social sciences, and natural sciences), as well as faculty representatives from Barnard College, the Fu Foundation School of Engineering and Applied Science, and the School of the Arts.

This *Bulletin* reflects in its annual publication the curriculum and policy recommendations approved by the Committee on Instruction.

## THE COMMITTEE ON ACADEMIC STANDING

The policy and regulations approved by the faculty Committee on Instruction are implemented and administered for Columbia College students by the [Committee on Academic Standing](#), composed of advising deans, an associate dean of advising, and the dean of advising of the Berick Center for Student Advising. The Committee on Academic Standing is expected to uphold the recommendations and policies established by the Committee on Instruction, the University Senate, or the faculty as a whole.

## DEGREE REQUIREMENTS

Columbia College policy requires students to fulfill the general degree requirements (i.e., all Core Curriculum coursework and any general elective credit) that are stated in the *Bulletin* of the first year of their matriculation at Columbia College, and to fulfill the major requirements that are stated in the *Bulletin* at the time that students declare their major (typically in the second year of study).

## MODIFICATION OF REQUIREMENTS

The requirements for the degree may be modified or waived in individual and rare cases only with the approval of the dean

of Academic Affairs of Columbia College, acting on behalf of the faculty Committee on Instruction of Columbia College. Students wishing to petition for a modification of degree requirements should discuss their requests with their advising deans in the Berick Center for Student Advising.

# REGISTRATION

Student Service Center, 212-854-4400, [ssc@columbia.edu](mailto:ssc@columbia.edu)

## REGISTRATION AND ENROLLMENT POLICIES PUBLISHED BY THE OFFICE OF THE REGISTRAR

**"Registration"** is the systematic process by which eligible students reserve a seat for themselves in current or future classes. Students use the Vergil/SSOL system to register for courses at Columbia. Students receive informational emails from the Registrar's Office each semester that detail the procedures for registration for the term.

**"Enrollment"** is the completion of the registration process, and affords the full rights and privileges of student status. Enrollment is accomplished by the payment or other satisfaction of tuition and fees and by the satisfaction of other obligations to the University.

Registration alone does not guarantee enrollment; nor does registration alone guarantee the right to participate in a class. In some cases, students need to obtain the approval of the instructor or of a representative of the department offering the course. Students may also be required to attend the first few class sessions prior to official registration or to confirm official registration. Please check the course information in the [Departments, Programs, and Courses](#) section of this *Bulletin* and the course information noted in the Directory of Classes for any approvals required to register for a particular course.

To comply with current and anticipated Internal Revenue Service mandates, the University requires all students who have a Social Security Number (SSN) at the time of admission to report it. The University recognizes that international students are not eligible to apply for a SSN unless they are employed and that not all students will be eligible to obtain a SSN during their program of study. **Newly admitted students who do not have Social Security numbers should obtain one well in advance of first registration.** International students who will be employed on-campus should follow the ISSO instructions for applying for a SSN soon after their arrival in the United States. International students should consult with the [International Students and Scholars Office](#) for more information.

According to University regulations, each person who completes registration is considered a student of the University during the term for which they register, unless the student's connection with the University is officially severed by withdrawal or otherwise. No student registered or enrolled in any school/college of the University shall at the same time be registered or enrolled in any other school/college, either of the University or of any other institution, unless there is an existing

registration agreement between the two schools. Students who wish to register or enroll in another institution must receive specific authorization from the dean/director of the school/college in which the student is first registered.

The privileges of the University are not available to any student until they have completed registration. A student who is not officially registered for a University course may not attend the course, with the possible exception of a course in which students are required to attend the first few class sessions prior to official registration. No student may register after the stated period unless he or she obtains the consent, written or electronic, of the appropriate dean or director.

The University reserves the right to withhold the privilege of registration or any other University privilege from any person with an unpaid debt to the University. Students who are permitted to enroll after the beginning of the term are responsible for any absences incurred due to the late enrollment.

## COLLEGE REGISTRATION POLICIES AND PROCEDURES

Registration instructions are emailed to all students by the Office of the Registrar in advance of each registration period. Students are expected to register for courses during the time periods explicitly identified by the Office of the Registrar.

All Columbia College students must be registered for a minimum of 12 points of credit in any given semester. Each Columbia College student must be registered for at least 12 points of credit by the close of the Change of Program period (i.e., the end of the second week of classes in the Fall or Spring term).

Students who are registered for fewer than 12 points by this time will be withdrawn from the College. An exception to this rule can be a graduating senior who needs fewer than 12 points of credit to complete the Bachelor of Arts degree from the College; a student in this situation may petition the [Committee on Academic Standing](#) for permission to register for fewer than 12 points of credit, with the understanding that they will be viewed as full-time students who are responsible for paying full-time tuition and for all other rules that apply to full-time students in the College.

Some classes may be blocked for online registration and require written approval; students should check [Vergil](#) or the Directory of Classes for approval information. Courses blocked from online registration require additional approval, either in SSOL or through an academic adviser. A completed Registration Adjustment Form, with all necessary approvals confirmed, may be required. A student cannot use the Registration Adjustment Form to register for a course if the course is not blocked from online registration or if the student is eligible to join the course Wait List. Students should speak with their academic advisers to learn more information about this process.

A student's ability to register for courses may be put on hold by various offices within the University. Students can check for holds in their [Vergil/SSOL](#) accounts. Note: Only the office that places the hold has the ability to remove it.

Students are responsible for ensuring that their academic programs are in accordance with the College and University policies noted here. The Committee on Academic Standing in the [Berick Center for Student Advising](#) is tasked with upholding the academic policies of the College and will make changes to students' registration if the students fail to ensure that their academic programs comply with these policies set by the faculty. Questions about registration should be directed to the [Berick Center for Student Advising](#).

## EARLY REGISTRATION PERIODS

Current students first have the opportunity to register for classes during the early registration period in the preceding semester: early registration for Fall classes occurs during one week in the previous April, and early registration for Spring classes occurs during one week in the previous November.

After that early registration period, there are [certain weeks](#) before the beginning of the term designated for registration changes, during which students can continue to add and drop classes for the upcoming semester. A complete list of registration periods can be found on [the Registrar's website](#).

## CHANGE-OF-PROGRAM PERIOD

The first two weeks of a Fall term or a Spring term are known as the "[change of program](#)" period, when students can continue to add and drop classes in order to finalize their academic programs for the term.

The deadline for adding a course in a Fall or Spring semester will always be the second Friday of the term (i.e., the end of the second week of classes).

## STUDENT REGISTRATION APPOINTMENT TIMES

During registration weeks, students are assigned registration "[appointment times](#)" – i.e. windows of time on weekdays when students can perform registration activities through Vergil/SSOL.

Students' individual registration times are listed in Vergil/Student Services Online (SSOL) and registration dates are noted on the Academic Calendar in this *Bulletin*. Students should also consult the [Registrar's website](#) for additional information.

During early registration, these appointment times are assigned based on seniority, with the current seniors (in Fall) or rising seniors (in Spring) given appointment times on Monday; the current juniors (in Fall) or rising juniors (in Spring) added on Tuesday; the current sophomores (in Fall) or rising sophomores (in Spring) added on Wednesday; and current first-year students

(in Fall) added on Thursday. Within that structure, most students' appointment times are randomly assigned.

## SSOL COURSE WAITLISTS

Most courses have [electronic waitlists](#) attached to them in SSOL – although there are some courses (for instance, courses in the Core Curriculum) that will not have electronic waitlists. If a course is full and has an attached electronic waitlist, students may choose to add themselves to the waitlist within SSOL. Waitlist activity will continue until the Thursday evening prior to the last day of the Change of Program Period at 9:30pm EST.

Electronic waitlists may be automated or self-managed:

- If a course's electronic waitlist is automated, when a space opens on the course roster during a registration period, the student at the top of the waitlist will automatically be added to the course roster. The student will receive notification that registration for the course has been successful, and the update to the course roster and electronic waitlist will occur overnight and be reflected on SSOL the following day.
- If a course's electronic waitlist is self-managed, the instructor or the relevant department/program will select the students from the waitlist who can register for the course. The criteria for selection will vary from course to course: there may be priority for declared majors, graduating seniors, first-year students, students who have submitted successful applications, etc. If additional materials must be submitted for consideration for selection, students will typically receive an automated email with details when they add themselves to the self-managed electronic waitlist.

## REGISTRATION LIMITS AND PETITION PROCESSES

Students are allowed to register for a maximum of 18 points of credit in any Fall or Spring term. If a student's academic program contains more than 18 credits after the student is admitted into one or more class(es) from waitlists, the student must adjust the academic program to bring their registration into alignment with the 18-credit semester cap by dropping one or more course(s) by the end of the Change of Program period.

If a student has a compelling reason to register for more than 18 credits in a term, the student can petition the [Committee on Points and Programs](#) for permission to exceed the credit limit. Students are not allowed to exceed the 18-credit limit in their first semester as matriculated students, whether they are entering first-year students or entering transfer students.

Students may not register for courses whose meeting times overlap. If a student's academic program contains classes whose meeting times overlap after the student is admitted into one or more class(es) from waitlists, the student must adjust the academic program to bring their registration into alignment

with this regulation by dropping one of the overlapping courses by the end of the Change of Program period.

## DROPPING A COURSE

Students may drop a course from their academic program through the deadline noted during the fifth week of classes. Until this deadline, students can drop a course themselves online via Student Services Online (SSOL), although they are encouraged to talk with their advising dean about their choice to drop in order to consider all of their options.

If a course is successfully dropped before this deadline, the course will be removed from the student's program and transcript.

**Note: The five shared Core Curriculum courses – Art Humanities, Contemporary Civilization, Frontiers of Science, Literature Humanities, and have their own particular drop deadline, which coincides with the end of the Change of Program Period at the end of the first two weeks of classes. See “Dropping or Withdrawing from Core Curriculum Courses” below.**

When considering the option to drop from a course, students should be aware that, in order to remain in good academic standing, they must successfully complete no fewer than 12 points in a given semester. Students who do not earn at least 12 points per term will be placed on academic probation, or be suspended or dismissed. Students who do not make adequate progress to the degree (an average of 15.5 points per term) will also face academic probation, suspension, or dismissal.

Neither failure to attend classes nor a student's personal communication to an instructor of intent to drop will constitute dropping from a course. Students who stop attending classes without dropping or officially withdrawing are assigned the letter grade earned by factoring a zero or F for any missing work.

## WITHDRAWING FROM A COURSE

After the drop deadline has passed, students may remove themselves from a course by withdrawing from the course. The deadline to withdraw from a course is the Monday of the last full week of a Fall or Spring term. If a student successfully withdraws from a course after the drop deadline and before the withdrawal deadline, the course will remain on the student's program and transcript with a notation of “W”, with no credit or final grade earned.

To withdraw from a class, students must first meet with their advising dean in the Berick Center for Student Advising to discuss their choice to withdraw in order to consider all of their options. Students must then submit a Columbia College Acknowledgment of Course Withdrawal form to their advising dean in the Berick Center for Student Advising.

After the course withdrawal deadline, students may not withdraw from any course and will receive the letter grade

earned in the course. In cases that have been referred for disciplinary action through the Dean's Discipline process, a student may not drop or withdraw from the course in question without a successful petition to the Committee on Academic Standing.

*When considering the option to withdraw from a course, students should be aware that, in order to remain in good academic standing, they must successfully complete no fewer than 12 points in a given semester.* Students who do not earn at least 12 points per term will be placed on academic probation, or be suspended or dismissed. Students who do not make adequate progress to the degree (an average of 15.5 points per term) will also face academic probation, suspension, or dismissal.

Neither failure to attend classes nor a student's personal communication to an instructor of intent to withdraw will constitute dropping or withdrawing from a course. Students who stop attending classes without dropping or officially withdrawing are assigned the letter grade earned by factoring a zero or F for any missing work.

## DROPPING OR WITHDRAWING FROM CORE CURRICULUM COURSES

The shared courses in the Core Curriculum – i.e., Art Humanities, Contemporary Civilization, Frontiers of Science, Literature Humanities, Music Humanities, and University Writing – have their own drop deadline that is separate from the standard drop deadline for other courses. The deadline to drop one of the shared Core Curriculum courses is the end of the Change of Program period-i.e., the end of the first two weeks of classes.

After the Change of Program Period, students cannot drop or withdraw from a Core Curriculum course. Students who have compelling mitigating circumstances for withdrawing from a Core Curriculum course must petition the Committee on Academic Standing for permission to do so. It is possible that students who receive a W in a Core Curriculum course may be placed on academic probation.

All first-year students are required to complete Frontiers of Science, Literature Humanities (both semesters), and University Writing successfully by the end of the first year. Students who do not complete one or more of these three courses will be placed on academic probation; therefore, students considering dropping or withdrawing from a Core Curriculum course should consult their advising deans before taking any action. For more details, see the section on Core Curriculum in this *Bulletin*.

## DECLARING THE PASS/D/FAIL OPTION USING THE REGISTRATION SYSTEM

The Pass/D/Fail option is available only for certain courses in a students' program. Students should refer to Academic Regulations—Exams and Grades listed in this *Bulletin* for more information regarding this grading option.

The deadline for declaring the Pass/D/Fail option for a course is the final day of classes in a Fall or Spring term. Up until this deadline, students may elect to change their course grading options for eligible courses from letter grading to Pass/D/Fail or from Pass/D/Fail to letter grading online via Student Services Online (SSOL). The Pass/D/Fail option can be applied only under certain conditions, which are detailed in the section on "Grades" in the Academics Regulations section of this *Bulletin*.

# STUDY ABROAD

## THE CENTER FOR GLOBAL ENGAGEMENT

The Columbia University Center for Undergraduate Global Engagement (UGE) develops and supports academic and co-curricular opportunities for global learning and engagement for all undergraduates. These opportunities include study abroad, global internships, global service-learning, global research and global courses on campus and abroad. UGE enhances access and support for undergraduates to global opportunities and brings students and faculty together in a central location that creates a hub of global activity at Columbia, allowing students to better connect and learn about potential programs.

UGE works closely with faculty in their global research and teaching in order to enhance the visibility of their work and to increase their access to opportunities to build their global networks and to build students' global competencies. This work also allows faculty and staff to share their global and regional expertise and advice, and collaborate on the development, implementation and assessment of new and existing undergraduate global programs and opportunities for global engagement across Columbia and around the world.

### Center for Undergraduate Global Engagement

212-854-2559

[uge@columbia.edu](mailto:uge@columbia.edu)

Studying in a foreign country for a semester, a full year, or a summer, represents a significant enhancement to the Columbia College education. Study abroad expands the boundaries of the institution and offers students the opportunity to gain first-hand experience of the larger global community of which we are all members. Students engaged in international study discover insights into other cultures, develop new perspectives, and learn to reflect on how their own culture has shaped their understanding of the world. Students interested in studying abroad should visit the [Center for Undergraduate Global Engagement](#) as early as possible to discuss their academic goals and to develop a plan for integrating international study into their curriculum.

## ELIGIBILITY

The College maintains the authority over students' participation in study abroad programs and upholds standards for all potential candidates. To be eligible for participation in a Columbia-approved study abroad program, students must meet the following criteria:

- Students must have a minimum cumulative GPA of 3.0, inclusive of the semester before going abroad.

- Students must have at least junior standing for study abroad in a Fall and/or Spring semester. Students in any class year can study abroad during the summer.
- Students must have made satisfactory progress toward completion of the Core Curriculum; specifically, students must have completed Contemporary Civilization (both semesters), Frontiers of Science, Literature Humanities (both semesters), and University Writing.
- Students must be in good academic and disciplinary standing. A review of each student's academic and disciplinary records is conducted as part of the required clearance process. Students on academic or disciplinary probation are not permitted to study abroad during the term of their probation.

It is generally possible to arrange for study in most foreign countries through programs sponsored by Columbia or by other institutions, or through direct application to foreign universities. Such studies may be approved for one to two terms in the junior year or during any summer term.

## CREDIT AND GRADING

### Columbia-Sponsored Programs

Students who enroll in the following Columbia-sponsored programs receive direct Columbia credit for their courses. The grades earned in their studies are reflected on their official transcripts and cumulative GPA.

#### Columbia-sponsored programs include the following:

- Berlin Consortium for German Studies
- Consortium for Advanced Studies in Cuba
- Kyoto Center for Japanese Studies

### Non-Columbia Study Abroad Programs

Credit earned through approved programs run by other institutions is applied toward the degree as transfer credit when the student returns to the College, upon receipt of appropriate transcripts and other supporting materials. Grades earned in courses through approved programs run by other institutions are not reflected on the transcript or in the cumulative GPA. College transfer students should note that they are permitted no more than 60 points of outside credit, and that approved programs run by other institutions would be considered outside credit (see *Academic Regulations*—Regulations for Transfer Students).

All students are reminded that the final 30 credits required for the degree must be taken while enrolled in the College for study on Columbia's New York campus or on one of the Columbia-sponsored programs abroad. Any exceptions require special permission from the Committee on Academic Standing.

In addition, the following conditions apply for credit for courses taken during study abroad:

1. Courses taught abroad in subjects that are typically taught at Columbia in the professional schools – e.g., business, education, journalism – may not be eligible for credit. Students should confirm ahead of time whether such courses could receive credit toward the Bachelor of Arts degree offered by Columbia College.
2. Transfer credit is not awarded for courses taken on a Pass/Fail basis in outside programs. The minimum grade necessary for transfer of credit is C-.

## STUDY ABROAD CLEARANCE

Students must be cleared to study on approved programs by the Center for Undergraduate Global Engagement by October 1 for the Spring semester and by March 1 for the Fall semester or full academic year. Students must register with this office before November 15 for the Spring semester and April 15 for the Fall semester or the full academic year.

## UNDERGRADUATE INTERNATIONAL TRAVEL POLICY

All matriculated undergraduates who wish to participate in Columbia-Led, Columbia-Facilitated and/or Recognized international travel must first be cleared to participate in such program and are then *required* to obtain School Sponsorship at least 4 weeks prior to departure, in accordance with the Undergraduate International Travel Policy.

## TUITION AND FINANCES

**When studying abroad during the Fall and/or Spring semesters, students remain enrolled at the College and tuition is paid to Columbia.** Columbia, in turn, pays the academic tuition and fees of the overseas program, while students are financially responsible for room, board, and any miscellaneous costs. Students receiving financial aid at Columbia remain eligible for aid when they study abroad with Columbia's approval during Fall and/or Spring semesters.

Students may direct financial aid and study abroad inquiries to Financial Aid and Educational Planning, 212-854-3711; [ugrad-finaid@columbia.edu](mailto:ugrad-finaid@columbia.edu).

Since the Summer term is not a required part of the academic year of Columbia College, financial aid policies for Columbia College students are not applicable during the summer, and students who wish to study abroad on approved program in summer will be responsible for the full costs of tuition and fees, along with room, board, and any miscellaneous expenses. Students should contact Financial Aid and Educational Planning to understand if any federal financial aid may be available. Scholarships may be available for certain programs; interested students are encouraged to consult the Center for Undergraduate Global Engagement.

For a full list of semester and study abroad opportunities, please visit the Undergraduate Global Engagement website: <https://global.undergrad.columbia.edu/>.

## VIRTUAL EXCHANGE

### Global Columbia Collaboratory

The Global Columbia Collaboratory works with students and the Columbia global network from around the world to create a space for global learning. Framed by the United Nations Sustainable Development Goals, it serves as a platform for virtual exchange opportunities for all involved to learn, reflect, and work collaboratively on projects and ideas relevant to today's world.

Selected participants for the Collaboratory will participate in theme-based global seminars from faculty and experts drawn from Columbia's global networks; exchange perspectives and reflect together on the global challenges framed by the global seminar; and develop ideas with potential to impact today's society. Participants will be coached through the ideation process with support from the broader Columbia global network to help bring student projects to fruition.

Students interested in applying to Columbia-sponsored programs abroad should consult with the Center for Undergraduate Global Engagement.

Columbia College students who enroll in the Columbia-sponsored programs listed below have the same access to the financial aid they would have if they were enrolled in classes in New York.

## EAST ASIA

### Japan: The Kyoto Consortium for Japanese Studies

The Kyoto Consortium for Japanese Studies (KCJS) offers an intensive, two-semester academic program primarily for undergraduates who wish to do advanced work in Japanese language and Japanese studies. The program is open to qualified students who have completed one or more years of college-level Japanese at the time of enrollment.

The KCJS curriculum provides intensive Japanese language study and the opportunity to choose from a broad spectrum of social sciences and humanities courses on pre-modern and contemporary Japan. The program takes advantage of the numerous social and cultural resources of Kyoto by incorporating into the curriculum field trips, guest speakers, and research projects based on local field work.

For program information, students may consult [global.undergrad.columbia.edu/program/kcjs-semester](https://global.undergrad.columbia.edu/program/kcjs-semester) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)). Students are also advised to consult with the director of undergraduate studies in the Department of East Asian Languages and Cultures.

## EUROPE

### France: Columbia in Paris

Established in 1966, the Columbia Program in Paris at Reid Hall offers semester, academic-year, and summer study-abroad options that challenge students to step outside the boundaries of a traditional French language program and use French as a means to further their understanding of their own area of study. Students with a good command of the French language refine their speaking and writing skills through intensive language training and by taking selected disciplinary courses taught in French specifically for the program at Reid Hall and in the French university system at partner institutions: Institut d'Etudes Politiques (Sciences Po), University of Paris I (Panthéon Sorbonne), and the University of Paris IV (Sorbonne). Opportunities for participating in directed research are also available. An English-based curriculum is available in the fall term and the summer, while immersive French programs run throughout the year.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)).

### Germany: Berlin Consortium for German Studies

Established in 2005, Berlin Consortium for German Studies (BCGS) provides students with the opportunity to enroll in courses at the Freie Universität Berlin (FU Berlin) for the fall semester or a full academic year. The program begins with a six-week intensive language practicum which, in conjunction with a weekly cultural program, prepares students for study at the FU Berlin. Upon completion of the practicum, students enroll in one course taught by the BCGS directors on a topic such as cultures, politics, history, literature, theater, or cinema; and for at least two, possibly more, FU Berlin courses.

The FU Berlin offers a wide range of courses in the humanities, social sciences, and natural sciences. Students majoring in a variety of disciplines may choose from an array of appropriate courses. An English-based curriculum is available in the spring term, while immersive German programs are offered in the fall, spring, and full academic year.

For program information, students may consult [global.undergrad.columbia.edu/program/bcgs](http://global.undergrad.columbia.edu/program/bcgs) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)). Students are also advised to consult with the [director of undergraduate studies](#) in the [Department of Germanic Languages](#).

### United Kingdom: Columbia in London Program

The Columbia in London Program is a collaboration with Columbia's Department of English and Comparative Literature, in partnership with Queen Mary University of

London (QMUL), one of the UK's most prestigious academic institutions.

Each fall, the program is led by a Columbia faculty member whose research directly engages the literary culture of London. That faculty member will offer a version of the Global Seminar that will enable participating students to study literary texts in their immediate geographical and cultural settings, transforming their relationship to their objects of study and encouraging them to develop a wider range of reading practices and research methodologies. In addition to regular class meetings, the Global Seminar will involve regular outings, designed to complement and enhance the readings and classroom discussions.

In addition to the Global Seminar, students will also enroll alongside local students in courses offered by the host institution. QMUL offers programs across a broad range of disciplines, including physical and natural sciences, business and management, engineering, humanities, and social sciences.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([reidhall@columbia.edu](mailto:reidhall@columbia.edu)).

## LATIN AMERICA AND THE CARIBBEAN

### Cuba: The Consortium for Advanced Studies in Cuba

The Consortium for Advanced Studies Abroad (CASA) program in Cuba is a collaborative initiative involving eight U.S. universities: Brown, Columbia, Cornell, Dartmouth, Johns Hopkins, Northwestern, University of Pennsylvania, and Vanderbilt University. CASA-Cuba provides students with a unique opportunity to have direct access to Cuba's leading institution of higher learning, the University of Havana, and to Casa de Las Américas, the Cuban government's premier research institution on Caribbean and Latin American studies, Cuban culture, and the arts. Comprehensive student services support the academic and social experience. The program runs in both fall and spring semesters.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)).

Summer study abroad provides a meaningful complement to the College curriculum and can help students prepare for semester- or year-long overseas programs.

Columbia College students who enroll in the Columbia-sponsored summer programs listed below earn direct credit for their courses. A number of virtual non-credit programs are also available through the Center for Undergraduate Global Engagement.

For a full list of summer study abroad opportunities, please visit the Undergraduate Global Engagement website: [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu).

## SUMMER STUDY ABROAD APPROVAL

Students seeking to study abroad during the summer must be approved by the [Center for Undergraduate Global Engagement](#).

If students take foreign language courses abroad in non-Columbia programs, credit for those courses will be awarded only under the following conditions:

- Credits for language study at the elementary and intermediate levels are awarded after the student takes a placement exam with the relevant Columbia department or program and shows sufficient proficiency in the language. Credits for more advanced levels of language study are accepted for academic credit upon review by the appropriate language department.
- The only other courses in non-Columbia summer programs abroad that can be taken for credit are courses that have been approved by a Columbia department or program to fulfill a requirement for a major or concentration. These courses must be taken abroad in a foreign language.
- Limited exceptions can be made for awarding credit for summer courses taught in English. College credit may be granted if the course offers a unique experience, such as specialized field-work or research, where the study-abroad site functions as a constituent part of the course. In such cases, the program must be approved by the [Center for Undergraduate Global Engagement](#). Departmental approval is required and the course must satisfy major or concentration requirements.

## RECENT COLUMBIA-SPONSORED SUMMER PROGRAMS ABROAD

### France: Columbia Summer in Paris

The five- or six-week program offers modules at several levels designed to allow students to work together in small classes to integrate language and cultural studies and to progress in French while using Paris as a learning lab for language, culture, and extracurricular activities.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)).

### France : Columbia Summer Core in Paris: Art Humanities and Music Humanities

This six-week program enables students to complete two [Core Curriculum](#) courses, *Art Humanities* and *Music Humanities*, in Paris. The program emphasizes the musical and visual cultures of Paris. Day trips to important sites in the region, such

as Chartres and Giverny, will complement the excursions to monuments and musical performances within Paris.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)).

### France : Columbia Summer Undergraduate Math Research Program in Paris

This four- to six-week program provides for intensive mathematical research with students and faculty from Columbia and the Université Denis Diderot in Paris.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)).

### Italy: Columbia Summer in Venice

This six-week program is based at Columbia's Casa Muraro in Venice and uses an interdisciplinary approach to understanding Italian culture and society through study of its language, literature/film, art history and conservation, and opera. Students are given the opportunity to gain a deeper appreciation of the rich Venetian culture, traditions, and history.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu) ([ogp@columbia.edu](mailto:ogp@columbia.edu)).

### Japan: Columbia Summer Practicum: Global Neuroscience

This program gives students the opportunity to acquire first-person knowledge on how the scientific method works, by diving into the field of Human Neuroscience. The program allows students to develop a network of international researchers with whom they will learn to design, conduct, and analyze research studies that draw on current state-of-the-art technological advances in neuroscience. The program includes participation in a week-long neuroscience conference which rotates between different international cities.

For program information, students may consult [global.undergrad.columbia.edu/studyabroad/search/columbia-programs](http://global.undergrad.columbia.edu/studyabroad/search/columbia-programs) and email [uge@columbia.edu](mailto:uge@columbia.edu).

### Japan: Kyoto Consortium for Japanese Studies Program in Modern and Classical Japanese

This six- or eight-week program offers intensive training in modern and classical Japanese for students who have completed at least one year for Modern Japanese or three years for Classical Japanese, or the equivalent. A rich co-curricular program complements the academic program and introduces students to local peers as well as traditional and contemporary Japanese culture and society.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu).

### **United Kingdom: Columbia Summer Research Practicum in Global Behavioral Science (GLOBES)**

This three-week program provides students an immersive learning experience focused on reproducible behavioral research across languages and settings. Students will travel to Cambridge and work with international researchers on a new research question each summer. The objective is for students to get hands-on experience in carrying out behavioral science research, from study development to dissemination, while participating in a large, international collaboration, resulting in a publication co-authored by the students.

For program information, students may consult [global.undergrad.columbia.edu](http://global.undergrad.columbia.edu) and email [uge@columbia.edu](mailto:uge@columbia.edu).

### **Global Columbia Collaboratory: Environmental Humanities and Global Health / Sustainable Development**

The Education for Sustainable Development programs of the Global Columbia Collaboratory offer the opportunity to virtually engage with a small group of Columbia University students, as well as faculty, students, and community organizations abroad over fifteen weeks in the summer. The program includes an in-country portion in various locations for durations from one to three weeks. For program information, students may consult [global.undergrad.columbia.edu/studyabroad/search/columbia-programs](http://global.undergrad.columbia.edu/studyabroad/search/columbia-programs) and email [uge@columbia.edu](mailto:uge@columbia.edu).

## **EXCHANGE PROGRAMS**

In order to provide the richest and most immersive experience possible to its students, Columbia has established a network of exchange agreements with international institutions. With an exchange agreement, Columbia students may study at a partner institution; in exchange, students from the foreign institution may study at Columbia. At the partner institutions, students enroll in regular courses alongside local students, live in campus housing, have an academic adviser, and have access to all university facilities and resources.

Currently, Columbia has undergraduate exchanges with the following institutions:

- Bocconi University
- Bo#aziçi University
- Hong Kong University of Science and Technology
- University of Hong Kong

Students who plan to apply to these programs should consult with the [Center for Undergraduate Global Engagement](#).

## **CREDIT AND GRADING**

As with other types of study abroad programs, all academic work completed abroad counts toward the Columbia degree, and students may take classes toward the major with the department's approval.

## **TUITION AND FINANCES**

Columbia College students who attend these exchange programs have the same access to financial aid they would have if they were enrolled in classes on Columbia's New York campus. Columbia students pay their usual Columbia tuition and are responsible for non-academic costs abroad.

Students may direct financial aid and study abroad inquiries to the [Financial Aid and Educational Financing](#); 212-854-3711; [ugrad-finaid@columbia.edu](mailto:ugrad-finaid@columbia.edu).

# SPECIAL PROGRAMS

## Preprofessional Advising

**Berick Center for Student Advising**  
[preprofessional@columbia.edu](mailto:preprofessional@columbia.edu)

Medical, dental, and other health professional schools prefer that undergraduates complete a four-year program of study culminating in a bachelor's degree. All health professional schools require prerequisite coursework, but the specific coursework can vary somewhat from program to program and school to school. This coursework can be completed during the undergraduate years along with the Core Curriculum and the major.

## MAJORS FOR STUDENTS PREPARING FOR HEALTH PROFESSIONAL SCHOOL

There is no major preferred by medical school admissions committees. Students are encouraged to pursue a major in any field that appeals to them. Students majoring in a non-science area may wish to pursue additional coursework in a science area, or perhaps a minor in a science field, that overlaps with the coursework for their premedical requirements in order to demonstrate their interest and aptitude in the sciences. Students should work closely with their advising deans and preprofessional advisers from the Berick Center for Student Advising, as well as their departmental major adviser in planning a program that meets their interests.

## PREMEDICAL REQUIREMENTS

It is very important to note that each medical school in the United States and Canada individually determines its own entrance requirements, including prerequisite coursework or expected competencies. Each medical school also sets its own rules regarding acceptable courses or course equivalents. It is therefore essential that students confirm the premedical requirements for each medical school to which they intend to apply.

In addition to medical school course requirements, medical schools currently require applicants to sit for the Medical College Admissions Test (MCAT). Students preparing for medical school are advised to take the following courses, as they will meet the prerequisites for most medical schools and will prepare applicants for the MCAT:

- 1 year of General Chemistry and General Chemistry Lab;
- 1 year of Organic Chemistry and Organic Chemistry Labs;
- 1 year of Introductory Biology and Biology Lab;

- 1 year of General Physics and Physics Labs;
- 1 semester Biochemistry;
- 1 semester of Introductory Psychology

At Columbia, the following courses correspond to the above requirements:

### Chemistry

Select one of the following three options:

#### Option 1:

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I- LECTURES and GENERAL CHEMISTRY II- LECTURES
CHEM UN1500	GENERAL CHEMISTRY LABORATORY

#### Option 2: for students who place into the accelerated track:

CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN1507 or CHEM UN1500	INTENSVE GENERAL CHEMISTRY-LAB GENERAL CHEMISTRY LABORATORY

#### Option 3: available to students depending on results of placement exam:

CHEM UN1507	INTENSVE GENERAL CHEMISTRY-LAB
CHEM UN2045 & CHEM UN2046	INTENSVE ORGANIC CHEMISTRY and INTENSVE ORG CHEM- FOR 1ST YEAR (formerly CHEM W3045-W3046)
CHEM UN2545	INTENSIVE ORGANIC CHEM LAB

### Organic Chemistry

CHEM UN2443 & CHEM UN2444	ORGANIC CHEMISTRY I- LECTURES and ORGANIC CHEMISTRY II-LECTURES (formerly CHEM W3443-W3444)
CHEM UN2493 & CHEM UN2494	ORGANIC CHEM. LAB I TECHNIQUES and ORGANIC CHEM. LAB II SYNTHESIS

### Biology

BIOL UN2005 & BIOL UN2006	INTRO BIO I: BIOCHEM, GEN, MOLEC and INTRO BIO II: CELL BIO, DEV/PHYS
BIOL UN2501	CONTEMPORARY BIOLOGY LAB (or other Biology laboratory approved by premedical adviser)

### Physics

Select one of the following three options:

#### Option 1:

PHYS UN1201 & PHYS UN1202	GENERAL PHYSICS I and GENERAL PHYSICS II
------------------------------	---

PHYS UN1291  
& PHYS UN1292      GENERAL PHYSICS I LAB  
and GENERAL PHYSICS II  
LABORATORY

**Option 2:**

PHYS UN1401  
& PHYS UN1402      INTRO TO MECHANICS #  
THERMO  
and INTRO ELEC/MAGNETISM  
# OPTCS

Or

PHYS UN1601  
& PHYS UN1602      PHYSICS I:MECHANICS/  
RELATIVITY  
and PHYSICS II: THERMO,  
ELEC # MAG

Also select one of the following laboratories:

PHYS UN1291  
& PHYS UN1292      GENERAL PHYSICS I LAB  
and GENERAL PHYSICS II  
LABORATORY

PHYS UN1493      INTRO TO EXPERIMENTAL  
PHYS-LAB

PHYS UN1494      INTRO TO EXPERIMENTAL  
PHYS-LAB

PHYS UN2699      Experiments in Classical and  
Modern Physics

PHYS UN3081      INTERMEDIATE  
LABORATORY WORK

**Option 3:**

PHYS UN2801  
& PHYS UN2802      ACCELERATED PHYSICS I  
and ACCELERATED PHYSICS  
II

Also select one of the following laboratories:

PHYS UN1493      INTRO TO EXPERIMENTAL  
PHYS-LAB

PHYS UN1494      INTRO TO EXPERIMENTAL  
PHYS-LAB

PHYS UN2699      Experiments in Classical and  
Modern Physics

PHYS UN3081      INTERMEDIATE  
LABORATORY WORK

**Biochemistry**

BIOL GU4501      Biochemistry  
or BIOC UN3300      BIOCHEMISTRY

**Psychology**

PSYC UN1001      THE SCIENCE OF  
PSYCHOLOGY

While these courses are recommended for MCAT preparation, students should note the following additional information:

- **English:** Most medical schools require one year of English, emphasizing skill acquisition in writing. Columbia College students fulfill this requirement with UNIVERSITY WRITING (ENGL CC1010) and *Masterpieces of Western Literature and Philosophy (Literature Humanities)* (HUMA CC1001-HUMA CC1002).
- **Mathematics:** Although not required by most medical schools, calculus is required for Columbia chemistry sequences and therefore all premedical students should

have successfully completed the equivalent of one semester of Calculus. Medical schools that do have a mathematics requirement typically expect one semester of calculus and one semester of statistics. Any Columbia calculus and statistics classes will meet the requirement and it is sometimes possible to use AP credit toward this requirement.

- **Biochemistry:** An increasing number of medical schools require one semester of biochemistry. While Columbia's introductory biology sequence covers many foundational concepts of biochemistry, which may prepare students for the MCAT, many medical schools will require a course in Biochemistry prior to matriculation.
- **Advanced Biology:** A small number of schools require more than one year of introductory biology and many of these recommend specific advanced level classes.
- **Social and Behavioral Science:** A number of schools have begun to add social and behavioral science courses into their requirements, including, but not limited to, psychology and sociology.

Students should note that medical schools' stated prerequisites are subject to change from year to year and it is the responsibility of students to confirm the prerequisite requirements for each of the medical schools to which they intend to apply. Most medical schools list their requirements in greater detail on their individual websites. More information can also be found from the [Association of American Medical Colleges \(AAMC\)](#).

Students interested in preparing for other health professions, including dental school, should consult a pre-health advisor in the Berick Center for Student Advising about curricular planning.

## BARNARD COURSES

While it is preferred that students complete their premedical requirements with Columbia College courses, students may take premedical requirements at Barnard if course prerequisites have been satisfied in advance. However, students should keep in mind that the Columbia Biology and Chemistry Departments may not accept Barnard courses toward their departments' concentrations and majors. Students should consult their departmental advisers before registering for a Barnard course.

## STUDENTS WITH ADVANCED PLACEMENT

Advanced Placement (AP) credit is accepted by some health professional schools, but not all. Students are responsible for monitoring the requirements of each school to which they intend to apply.

Generally, students with AP credit are strongly advised to take further courses in the field in which they have received such credit.

## APPLICATION TO HEALTH PROFESSION PROGRAMS

For many health professions programs, students apply for admission more than a year in advance of matriculation. Most Columbia students take time between undergraduate and health profession school and thus wait to apply to these schools until after graduating. Students who are interested in going directly on to health professional school following graduation should complete all prerequisite courses which will prepare them for application by the end of the junior year.

Students planning to apply to medical or dental school should meet with preprofessional advisers prior to application and plan to go through the Premedical Advisory Committee process the year they plan to apply. For more information regarding this process, please consult with a preprofessional adviser in the Berick Center for Student Advising ([preprofessional@columbia.edu](mailto:preprofessional@columbia.edu)).

## CLINICAL AND RESEARCH EXPOSURE

Preprofessional Advising maintains an online list of many different clinical volunteer and research opportunities across New York City and beyond. These opportunities can offer students the chance to explore the health professions and to interact with patients, and these experiences are viewed by medical schools as essential preparation. Students are therefore strongly encouraged to spend time volunteering or working in clinical and research environments before applying to medical school.

## THE FU FOUNDATION SCHOOL OF ENGINEERING AND APPLIED SCIENCE

### The Combined Plan (3-2) Program

The Combined Plan (3-2) Program is a dual degree program that provides Columbia College students the opportunity to earn a Bachelor of Arts degree from Columbia College and a Bachelor of Science degree from The Fu Foundation School of Engineering and Applied Science in five years.

Columbia College students must apply in their junior year to The Fu Foundation School of Engineering and Applied Science. In order to apply, students must have completed or be in the process of completing the prerequisite coursework for the relevant Engineering program of study, which will include the following:

#### Mathematics

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN1202	CALCULUS I and CALCULUS II and CALCULUS III and CALCULUS IV
--	--

or

MATH UN1101 & MATH UN1102 & MATH UN1207 & MATH UN1208 & MATH UN1202	CALCULUS I and CALCULUS II and HONORS MATHEMATICS A and HONORS MATHEMATICS B and CALCULUS IV
---	--

or

MATH UN1101 & MATH UN1102 & MATH UN1205 & MATH UN1202	CALCULUS I and CALCULUS II and ACCELERATED MULTIVARIABLE CALC and CALCULUS IV
--	---

#### Chemistry

CHEM UN1403	GENERAL CHEMISTRY I- LECTURES
-------------	----------------------------------

Some Engineering minors also require CHEM UN1404

#### Physics

Select one of the following three sequences:

PHYS UN1401 & PHYS UN1402	INTRO TO MECHANICS # THERMO and INTRO ELEC/MAGNETISM # OPTCS
------------------------------	---

or

PHYS UN1601 & PHYS UN1602	PHYSICS I:MECHANICS/ RELATIVITY and PHYSICS II: THERMO, ELEC # MAG
------------------------------	---

or

PHYS UN2801 & PHYS UN2802	ACCELERATED PHYSICS I and ACCELERATED PHYSICS II
------------------------------	--

Some programs require a third semester of Physics

#### Computer Science

Select one of the following two courses, depending on program:

ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI
------------	-----------------------------------

COMS W1004	Introduction to Computer Science and Programming in Java
------------	---

#### Economics

ECON UN1105	PRINCIPLES OF ECONOMICS
-------------	-------------------------

#### Laboratory Requirement (choose one of the following)\*:

PHYS UN1494	INTRO TO EXPERIMENTAL PHYS-LAB
-------------	-----------------------------------

CHEM UN1500	GENERAL CHEMISTRY LABORATORY
-------------	---------------------------------

\*Note that some majors require a specific lab in either Chemistry or Physics, or both

As a condition for admission to the 3-2 program, students must have also completed the requirements for a Columbia College major, as well as any additional pre-curricular requirements for the specific engineering major (see specific requirements on the Undergraduate Admissions website).

Students with more than 35 transfer credits are not eligible for the 3-2 program.

If accepted into the 3-2 program, students will be enrolled at the Fu Foundation School of Engineering and Applied Science in the fourth and fifth years of study. During those years, the students must complete the requirements for a major in the Fu Foundation School of Engineering and Applied Science in consultation with a faculty advisor for their engineering department. Students eligibility for housing and financial aid will continue throughout these years of study.

Each Fall, Undergraduate Admissions conducts information sessions in which students meet with the Combined Plan Program administrator. For more information, students should contact their advising deans in the [Berick Center for Student Advising](#), or [combinedplan@columbia.edu](mailto:combinedplan@columbia.edu).

### The 4+1 Program with Columbia College

The 4+1 Program provides students in The Fu Foundation School of Engineering and Applied Science (SEAS) the opportunity to obtain a Bachelor of Arts degree from Columbia College, in addition to their Bachelor of Science (B.S.) degree from SEAS, through the completion of one additional year of study. Students in the 4+1 program must complete four years of study and complete all requirements for the Bachelor of Science degree in engineering before enrolling in the fifth year of study in Columbia College.

The fifth year of study commences in the Fall semester, and students are required to conclude their studies after two full-time semesters of enrollment. Students must earn a minimum of 31 credits while enrolled at Columbia College

SEAS students who are interested in the 4+1 Program must declare their interest in the spring of their sophomore year and plan their next three years of study with the program adviser.

The program is selective, and admission is based on the following factors:

1. Granting of the B.S. at SEAS at the end of the fourth year
2. Completing all Columbia College [Core Curriculum](#) requirements by the end of the fourth year at SEAS
3. Maintaining a minimum GPA of 3.0 in Columbia College Core courses as well as those courses counting toward the Columbia College major
4. Creating a plan to complete a Columbia College major or concentration by the end of their fifth year that is approved by the appropriate [director of undergraduate studies](#).

For more information, students may contact their advising dean in the [Berick Center for Student Advising](#).

## THE GRADUATE SCHOOL OF ARTS & SCIENCES

The [B.A./M.A. option](#) allows Columbia College students to enroll in graduate-level courses at Columbia and apply the earned credit toward a Columbia Master of Arts (M.A.).

Only students who have been accepted by the Graduate School of Arts & Sciences into a B.A./M.A. program will be allowed to count graduate-level courses taken as an undergraduate toward the requirements for the M.A. Coursework taken toward the B.A./M.A. option is subject to the following guidelines:

1. The credit for the coursework must be in excess of the 124 points required for the B.A. degree.
2. A course used to fulfill a requirement for the B.A. degree may not be counted toward graduate credit.
3. The student must obtain the approval of both the graduate department(s) offering the course(s) and the undergraduate department in which they are majoring.
4. The maximum amount of graduate credit that an undergraduate can earn toward the M.A. degree requirement in the Graduate School of Arts & Sciences is 0.50 Residence Unit. For more information on the Residence Units for graduate programs, please consult the [relevant website](#) of the Graduate School of Arts & Sciences.

Students who are interested in pursuing the B.A./M.A. option must consult the director of graduate studies (DGS) or program director of their intended M.A. program before applying: this consultation is a required part of the application process and must take place before a B.A./M.A. application may be submitted. Students should then plan to apply officially at least two months prior to the semester in which they intend to begin taking courses that will count toward the M.A., and it is important to note that some academic programs have more specific application deadlines.

## THE JUILLIARD SCHOOL

Columbia College students who are exceptionally talented musicians have access to instrumental, composition, and voice instruction at The Juilliard School through two distinct programs.

### The Cross-Registration Program

The Cross-Registration Program allows Columbia College students to enroll concurrently in weekly instrumental (classical and jazz), composition, and vocal instruction at The Juilliard School. The Cross-Registration Program covers weekly instruction only; ensembles and classes at Juilliard are generally not open to participants in the Cross-Registration Program.

Applicants to the Cross-Registration Program may be incoming first-year students or continuing students in Columbia College. In addition to being accepted by Columbia College, Students

interested in the Cross-Registration Program must submit a [Juilliard Application for Admission](#), including pre-screening materials, and must audition successfully to be accepted into the Cross-Registration Program.

Students in the Cross-Registration Program may participate in the program for up to four years of study. Annual juries will be held at Juilliard at the end of each academic year to determine that students are eligible to continue in the program.

Students participating in the Cross-Registration Program have the option of applying to the Joint B.A./M.M. Program in their junior year (see details below).

### The Joint B.A./M.M. Program

The Joint B.A./M.M. Program allows students to earn a Bachelor of Arts degree from Columbia College and a Master of Music degree from The Juilliard School in five years. While instrumentalists and composers are expected to complete the dual degree program in five years, voice students may need six years of study to complete the program, depending on preparation.

Students interested in the Joint B.A./M.M. Program must have participated in the Cross-Registration Program for at least one year to be eligible to apply. Interested students must apply to the joint degree program in their junior year at the College. To be considered for the program, Columbia College students must have completed by the end of junior year 94 points of coursework, including all [Core Curriculum](#) requirements and all requirements for a major. There are no prerequisite courses for the courses in the M.M. program at Juilliard that are required to qualify for admission to the Joint B.A./M.M. Program, but students considering the program are encouraged to complement their cross-registration instruction at Juilliard with music classes and participation in ensembles at Columbia.

If accepted to Joint B.A./M.M. Program, students will become full-time graduate students at Juilliard in their fourth year and will be subject to Juilliard's financial aid policies. While it may be possible to complete 1-2 courses required for the B.A. degree at Columbia College in the fourth year, students must receive permission to do so from the College and will not be eligible for financial aid from Columbia College in that fourth year.

Eligible students should submit the [Juilliard Application for Admission](#) by the appropriate deadline. The pre-screening (if applicable) is waived, and live auditions are held at The Juilliard School in early March.

Students who wish to pursue the joint program should consult with Alex España, Associate Dean, in the [Berick Center for Student Advising](#).

## THE LAW SCHOOL

### Accelerated Interdisciplinary Legal Education Program

The Accelerated Interdisciplinary Legal Education (AILE) Program provides Columbia College students with outstanding records the opportunity to earn a Bachelor of Arts degree from Columbia College and a Juris Doctor degree from Columbia Law School in six years.

To be eligible to apply, students must have enrolled in all six semesters of study for the B.A. from Columbia College on Columbia's New York campus. Students with semesters of transfer credit or study abroad credit, even from Columbia programs, are not eligible to apply to the joint program.

Applicants to the program must have completed by the end of junior year 93 points of credit toward the B.A., including all Columbia College [Core Curriculum](#) requirements and also the requirements for a major. After formal admission to the Law School, students are withdrawn from the College to become full-time Law School students in their fourth year, and are subject to the financial aid and housing policies of the Law School from that point forward. In the fifth and sixth years of study (*i.e.*, the second and third years at the Law School), students must complete 12 points of coursework through the Graduate School of Arts and Sciences, and the coursework must have the prior approval of the student's pre professional adviser.

Interested students should submit an application in the spring of their junior year to the [Preprofessional Advising](#) in the [Berick Center for Student Advising](#). Columbia College may nominate one or two juniors each year for consideration, and the final admission determination is made by the Law School Admissions Committee. Prospective participants in this program must take the [Law School Admission Test \(LSAT\)](#) or Graduate Record Examination (GRE) no later than the February administration of either exam in the year of intended enrollment.

AILE students receive Columbia College and Law School degrees at the same time, at the end of six years. AILE students must apply for the B.A. degree the term before they expect to graduate with the J.D. degree. Students should inform their advising deans in the [Berick Center for Student Advising](#) of their plans to graduate in the sixth year in order to be considered that year for honors and Phi Beta Kappa from the College.

For more information, students may contact [Preprofessional Advising](#), [preprofessional@columbia.edu](mailto:preprofessional@columbia.edu).

## THE MAILMAN SCHOOL OF PUBLIC HEALTH

The 4+1 program between Columbia College and the Columbia Mailman School of Public Health is a dual degree program

that allows students to earn a Bachelor of Arts (B.A.) degree from Columbia College and a Master of Public Health degree (M.P.H.) from the Mailman School of Public Health (Mailman) in five years.

Students accepted into the program spend the Fall term of their fourth year taking the multidisciplinary Public Health Core Curriculum at Mailman, then complete their undergraduate coursework for the College's B.A. degree in the spring semester of their senior year. After graduation from the College, students in the program enroll full-time at Mailman and engage in coursework, thesis work, and a practicum. The practicum takes place in the summer following the academic year of coursework and thesis work at Mailman.

College students may apply to the program in their junior year. The application requires a personal statement and three letters of recommendation (two letters from academic instructors). The deadline for application is December 1st. Applicants must have a minimum cumulative GPA of 3.5, and are expected to have taken at least one semester of calculus, statistics or other appropriate quantitative course. Particular M.P.H. disciplines – specifically, the Biostatistics program and the Environmental Health Sciences program – have additional prerequisites. More information can be found on the Mailman website.

For more information, students may contact their advising dean in the Berick Center for Student Advising.

## THE SCHOOL OF INTERNATIONAL AND PUBLIC AFFAIRS

### The International Affairs Five-Year Program

The International Affairs Five-Year Program offers Columbia College students the opportunity to earn both a Bachelor of Arts degree (B.A.) and a Master of International Affairs degree (M.I.A.) from the School of International and Public Affairs (SIPA) in five years.

If admitted to the joint program, students complete their senior year at Columbia College by taking mostly graduate-level courses that are approved by SIPA to count toward the M.I.A. degree, in addition to any remaining courses needed to complete their B.A. requirements.

To be eligible for the program, students must have, by the end of their junior year, been enrolled in Columbia College for at least four semesters, completed a minimum of 93 credits, achieved competence in a modern foreign language, and completed all Columbia College Core Curriculum requirements. They must also have satisfied all requirements for a major, with the possible exception of two courses (*i.e.*, needing no more than 6-8 credits to complete the major or concentration). These two courses toward the major may be taken during the senior year while completing 24 points of other coursework that will be accepted by SIPA.

One 3-point course approved by SIPA may be taken in the junior year. It may be possible to take courses toward the M.I.A. degree during the summer between the junior and senior year with prior approval.

To move formally into the M.I.A. program in the fifth year of study, students must receive the B.A. from the College with a satisfactory GPA. Upon formal admission to SIPA after their senior year, students may apply for housing and financial aid through SIPA.

Interested students should apply to this joint program during their junior year through the School of International and Public Affairs Admissions Office. Admission to the joint Five-Year Program does not constitute immediate admission to SIPA; students remain Columbia College students through their senior year.

For more information, students may contact their advising deans in the Berick Center for Student Advising.

### Public Administration Five-Year Program

The Public Administration Five-Year Program is a dual degree program that offers students the opportunity to earn a Bachelor of Arts degree (B.A.) from Columbia College and a Master of Public Administration degree (M.P.A.) from the School of International and Public Affairs in five years.

Once admitted to the joint program, students complete their senior year at Columbia College by taking mostly graduate-level courses that are approved by SIPA to count toward the M.P.A.

To be eligible for the program, students must have, by the end of their junior year, been enrolled in Columbia College for at least four semesters, completed a minimum of 93 credits, achieved competence in a modern foreign language, and completed all Columbia College Core Curriculum requirements. They must also have satisfied all requirements for a major, with the possible exception of two courses (*i.e.*, needing no more than 6-8 credits to complete the major or concentration). These two courses toward the major may be taken during the senior year while completing 24 points of other coursework that will be accepted by SIPA.

One 3-point course approved by SIPA may be taken in the junior year. It may be possible to take courses toward the M.P.A. degree during the summer between the junior and senior year, with prior approval.

To move formally into the M.P.A. program in the fifth year of study, students must receive the B.A. from the College with a satisfactory GPA. Upon formal admission to SIPA after their senior year, students may apply for housing and financial aid through SIPA.

Interested students apply during their junior year through the School of International and Public Affairs Admissions Office. Admission to the joint Five-Year Program does not constitute

immediate admission to SIPA; students remain Columbia College students through their senior year.

For more information, students may contact their advising dean in the [Berick Center for Student Advising](#).

**Please note: This Columbia College Bulletin page will be updated as information on exchange programs is confirmed. Thank you.**

# ACADEMIC HONORS, PRIZES, AND FELLOWSHIPS

## DEAN'S LIST

During each academic term, students who have earned a minimum GPA of 3.6 or better in 12 or more points of letter credit in the preceding term are placed on the Dean's List.

The grade P is considered neutral when the averages are figured, and the dividing factor is reduced by the number of points taken for Pass credit. Students who have received grades of D, F, W (or UW pre-Spring 2014) during the term are not eligible for consideration. In any given semester, the mark of YC (year course) precludes the attainment of Dean's List status until the grade for the entire year's coursework is awarded. Students who receive the grade of IN (incomplete), **approved in advance** by the Committee on Academic Standing, are eligible for Dean's List only after all IN grades are changed to letter grades. Students who have been found responsible by the Office of Student Conduct and Community Standards for a violation of academic integrity will not be eligible for the Dean's List during the term of the sanction.

## COLLEGE (LATIN) HONORS

The Bachelor of Arts degree will be awarded with honors in three categories (*cum laude*, *magna cum laude*, *summa cum laude*) to the top 25 percent of the graduating class. Honors are determined by an undergraduate student's cumulative GPA for all work at Columbia, with the top 5 percent of the graduating class being awarded *summa cum laude*, the next 10 percent being awarded *magna cum laude*, and the remaining 10 percent awarded *cum laude*.

College honors are the highest academic recognition awarded by the College. There is no separate consideration of honors for October or February graduates. The honor is officially noted on the diploma and transcript of students who have graduated. October and February graduates may ask the Registrar to add an honors notation to an already issued diploma.

Both academic standing and disciplinary standing are taken into consideration when awarding College honors.

Latin Honors are calculated based on student academic achievement in all semesters at Columbia, including the final semester. Since final grades for seniors for spring semester classes can be submitted only a few days before graduation, and those grades must be part of a student's transcript to be eligible, Latin Honors are typically announced following graduation.

## VALEDICTORIAN AND SALUTATORIAN

The Committee on Honors, Awards, and Prizes reviews the academic records of the most exceptional students nominated by the faculty for Valedictorian and Salutatorian. Selection is based not on GPA alone, but on the breadth, depth, rigor of academic program, high quality of academic achievement, departmental recommendations, and outstanding academic work beyond that which is required for the degree.

The Committee on Honors, Awards, and Prizes considers both academic standing and disciplinary standing within the College when awarding Valedictorian and Salutatorian.

## DEPARTMENTAL HONORS

Departmental honors may be established and awarded by any Columbia College department or academic program, and is recorded on a student's final transcript. Students should consult with their director of undergraduate studies no later than the beginning of the first term of their senior year if they wish to be considered for departmental honors. Students who are awarded departmental honors are notified by their department in mid-May. Not all departments and programs offer departmental honors.

College guidelines for departmental honors include the following four criteria:

Departmental honors are awarded to no more than 10%, or, in small departments, one member, of the graduating majors (including all October, February, and May degrees);

A grade point average (GPA) of at least 3.6 in major courses is expected for a student to be considered for departmental honors;

An honors thesis or equivalent project of high quality should be required by each department or academic program in order to receive departmental honors;

Academic departments and programs consider both academic standing and disciplinary standing within the College when awarding departmental honors. Please note that special concentrations are not eligible for consideration for departmental honors.

## PHI BETA KAPPA

This academic society was founded in 1776 to recognize and celebrate friendship, morality, and learning. The Columbia College Delta chapter was formed in 1869. Each year, 10% of the senior class are inducted into Phi Beta Kappa by faculty who are members of the society. Two percent are elected in the fall and the other eight percent are elected in the spring. Selection is based not only on academic achievement, but also on evidence of intellectual promise, character, and achievement outside the classroom. Academic achievement is measured by the strength and rigor of the chosen academic program, as

well as by grades and faculty recommendations. Students may not apply for Phi Beta Kappa nor may they solicit faculty for recommendations.

As with graduation honors, October and February graduates are considered along with May graduates. Election to Phi Beta Kappa is noted on a student's transcript.

The faculty Phi Beta Kappa selection committee considers both academic standing and disciplinary standing within the College when electing new members to the society.

While prizes are typically awarded annually, they are done so at the discretion of respective selection committees. Hence, should a selection committee decide, in a particular year, that there are no suitable candidates, the prize will not be awarded. Unless otherwise noted, these prizes are awarded to Columbia College students only.

## GENERAL PRIZES

### ALUMNI ASSOCIATION ACHIEVEMENT AWARD

(1947) A trophy, in the form of a Columbia lion, awarded annually to the member of the senior class who is judged to be most outstanding for qualities of mind, character, and service to the College.

### ALUMNI PRIZE

(1858) Awarded annually by the Alumni Association to the senior judged by classmates to be the most faithful and deserving.

### CHARLES H. BJORKWALL PRIZE

(1937) Established by Ottilie Emma Bjorkwall in memory of her brother, Dr. Charles H. Bjorkwall. Awarded annually to a member of the senior class for unselfish service to the College community.

### EDWARD SUTLIFF BRAINARD MEMORIAL PRIZE

(1920) Established by Miss Phebe Sutliff in memory of her nephew, Edward Brainard Sutliff, CC 1921. Awarded annually to the member of the graduating class who is judged by classmates to be most worthy of distinction for qualities of mind and character.

### JAMES CHRISTOPHER CARALEY MEMORIAL PRIZE

(1984) Established in memory of James Christopher Caraley, 1959–1979, CC'81, by his family and friends. Awarded annually to that member of the junior class who has demonstrated the greatest commitment to the value of preservation of the natural environment or of world peace and order.

### ROBERT LINCOLN CAREY MEMORIAL PRIZE

(1967) A trophy, in the form of a lion, awarded annually by the Alumni Association to the senior who, through a combination of leadership qualities as exercised in the non-athletic extracurricular program of Columbia College and outstanding achievement in the academic program of the

College, best exemplifies the ideals that Robert Lincoln Carey sought to engender in the students of Columbia College.

### STANLEY I. FISHEL/ZETA BETA TAU PRIZE

Established in honor of Stanley I. Fishel, CC'34, who was president of ZBT while at Columbia and later national president, and who believed in the important role fraternities can play in the development of undergraduates. Awarded to an undergraduate fraternity member who has demonstrated leadership, academic achievement, and participation in athletics or other campus activities.

### RICHARD H. FOX MEMORIAL PRIZE

(1927) Established by Mr. and Mrs. Leon S. Fox in memory of their son, Richard H. Fox, CC 1921. Awarded to the senior who, in the judgment of the King's Crown Advisory Committee, has shown to the College the greatest interest and helpfulness. The student must have participated in some nonathletic activities and must be one who combines intelligence with a kindly interest in his or her fellows.

### ROBERT SHELLLOW GERDY PRIZE

(1969) Established by Mr. and Mrs. Irving Gerdy in memory of their son, Robert Shellow Gerdy, CC'39. Awarded to that member of the graduating class who, throughout the undergraduate years, has made a significant contribution as a member of the staff of one or more College student publications, especially *Jester*, *Columbia Review*, and *Spectator*.

### ROBERT HARRON AWARD

(1972) Established by his friends in memory of Robert Harron. Awarded annually to a member of the junior class for qualities of grace and generosity.

### KING'S CROWN AWARD

(1916) Gold and silver insignia in the form of King's Crowns, each distinguished by a device symbolic of a particular activity, awarded annually by the King's Crown Advisory Committee in recognition of significant participation in any activity under its jurisdiction. Conferred each spring on the basis of written nominations solicited from the governing board of each eligible organization.

### MILCH PRIZE

(1948) Established by Dr. and Mrs. Henry Milch. Awarded annually to the member of the junior class who, by leadership in extracurricular as well as scholastic activities, has, in the judgment of teachers and classmates, done the most to enhance the reputation of Columbia College.

### LEONARD A. PULLMAN MEMORIAL PRIZE

(1965) A certificate and the inscription of the student's name on a plaque in Alfred Lerner Hall, awarded annually to a member of the senior class who displays those qualities of outstanding scholarship and significant service to the College exemplified in the life of Leonard Pullman, CC'62.

The recipient must occupy a position of responsibility in a nonathletic Columbia College activity.

#### **CHARLES M. ROLKER, JR. PRIZE**

(1909) Established by Mrs. C. M. Rolker in memory of her son, Charles M. Rolker, Jr., CC 1907. Awarded annually to the member of the graduating class who is judged by classmates to be most worthy of special distinction because of scholarship, participation in student activities, or in any combination thereof.

#### **VAN AM PRIZE**

(1925) Established by the Class of 1898 on the occasion of its twenty-fifth anniversary. Awarded to the member of the sophomore class who is most distinguished for service, character, and courtesy in relations with faculty members, fellow students, and visitors. A donation is presented to the student activity of the winner's choice.

#### **JAMES J. VALENTINI PRIZE**

(2022) This prize is awarded to the Columbia College senior who, through participation and leadership in College student activities, has demonstrated the qualities and competencies of Beginner's Mind: an openness and willingness to hear different perspectives and a curiosity and desire to learn. It was established in honor of James J. Valentini, former Dean of the College.

### **GENERAL ACADEMIC PRIZES**

#### **ALBERT ASHER GREEN MEMORIAL PRIZE**

(1913) Established by Mr. and Mrs. Asher Green in memory of their son, Albert Asher Green, CC 1914, this prize is awarded to the senior who has been a student in good standing in the College for at least three years and who has made the best record of scholarship.

#### **DAVID B. TRUMAN ALUMNI AWARD**

(1970) Established in honor of David B. Truman, former Dean of the College, this award acknowledges the Columbia College student who has made the most distinguished contribution to the academic affairs of the College.

### **PRIZES IN THE CORE CURRICULUM**

#### **JOSHUA A. FEIGENBAUM PRIZE IN LITERATURE HUMANITIES**

(2004) Established by Joshua Feigenbaum and awarded to a student who is judged by the faculty to have exhibited excellence in Literature Humanities.

#### **WALLACE A. GRAY PRIZE IN LITERATURE HUMANITIES**

(2004) Established in memory of the late Professor Wallace Gray and awarded annually to the Columbia College undergraduate who is judged by the faculty to have written the best essay in Literature Humanities.

#### **DEAN HAWKES MEMORIAL PRIZE IN THE HUMANITIES**

(1943) Established by a committee of the Class of 1943 in memory of Dean Herbert E. Hawkes, this prize is awarded annually to the member of the junior class who is judged to be the most deserving on the basis of work in the humanities.

#### **JONATHAN THRONE KOPIT PRIZE IN LOGIC AND RHETORIC**

(1997) Established by Mrs. Ina Cohen in memory of her husband, Jonathan Throne Kopit, CC '68, this prize is awarded annually to the Columbia College student who, in the opinion of the departmental committee, has made the most significant progress in University Writing.

#### **JAMES P. SHENTON PRIZE IN CONTEMPORARY CIVILIZATION**

(2004) Established by the Committee on the Core and the Office of the Dean of the College in memory of Professor James P. Shenton, CC '49 and GSAS '55, this prize is awarded annually to the Columbia College undergraduate who is judged by the faculty to have written the best essay in Contemporary Civilization.

### **PRIZES IN THE HUMANITIES**

#### **DINO BIGONGIARI PRIZE**

(1954) Established by the former students and friends of Professor Dino Bigongiari, awarded annually to the senior who has written an outstanding essay on Italian civilization or whose work in the regular Italian courses is judged most worthy of distinction.

#### **BUNNER PRIZE**

(1896) Established by friends of the late Henry Cuyler Bunner, this prize is awarded to the candidate for a degree in Columbia University who has submitted the best essay on a topic dealing with American literature. The topic to be selected in connection with course or seminar work in American literature and approved by the chairman of the Bunner Prize Committee.

#### **DOUGLAS GARDNER CAVERLY PRIZE**

(1994) Established in memory of Douglas Gardner Caverly, CC '68, by his family and friends, this prize is awarded for outstanding performance by a graduating major in Classics.

#### **DEUTSCHER VEREIN PRIZE IN GERMAN**

(1917) This prize is awarded annually to the junior or senior who submits the winning essay on a prescribed topic in German literature.

#### **EARLE PRIZE IN CLASSICS**

(1907) Established in memory of Mortimer Lamson Earle, CC 1886, lecturer and professor in the Department of Classics, this prize is awarded for excellence in sight translation of passages of Greek and Latin. Only candidates for the degree of Bachelor of Arts may compete.

#### **JAMES GUTMANN PRIZE IN PHILOSOPHY**

(1987) Established in honor of James Gutmann, this prize is awarded to a graduating Columbia College senior in Philosophy who plans to pursue graduate work in the field.

#### **ADAM LEROY JONES PRIZE IN LOGIC**

(1934) Established by Mrs. Adam Leroy Jones in memory of her husband, who was Associate Professor of Philosophy and Director of University Admissions, 1909–1934. This prize is awarded to a student in the College for the best essay on any topic in the philosophy of science or in the foundation of logic. It may be either a topic connected with seminar work in the Department of Philosophy or one approved by the Jones Prize Committee.

#### **HELEN AND HOWARD R. MARRARO PRIZE**

(1972) Established in honor of Professor Howard R. Marraro, this prize is awarded to an undergraduate of high academic distinction and promise in an area of study concerned with Italian culture, including art, music, comparative literature, history, economics, government, or in any other academic discipline.

#### **BENJAMIN F. ROMAINÉ PRIZE FUND**

(1922) Gift of Benjamin F. Romainé to provide an annual prize for proficiency in Greek language and literature.

#### **ERNEST STADLER PRIZE FOR THE EXCELLENCE IN THE STUDY OF CLASSICAL ANTIQUITY**

(2006) Established by Dr. Richard A. Brooks, CC'53, and Dr. Eva Stadler Brooks, BC'53, in memory of Dr. Stadler Brooks' father, Ernest Stadler, who had a life-long commitment to the study of classical antiquity. This prize may be awarded annually to a graduating senior of Columbia College who is judged by the faculty to have demonstrated academic excellence through coursework and the writing of a senior essay on some aspect of the history or culture of the classical world.

### **PRIZES IN THE SOCIAL SCIENCES**

#### **CHARLES A. BEARD PRIZE IN POLITICAL SCIENCE**

(1963) Established by the Honorable Albert Levitt, this prize is awarded to the student who writes the best paper in political science during the academic year.

#### **CARL B. BOYER MEMORIAL PRIZE**

(1978) Established by Mrs. Carl B. Boyer in memory of her husband, this prize is awarded annually to the Columbia undergraduate who writes the best essay on any topic in the history of science or mathematics as judged by a faculty committee.

#### **SHANLEY & CHAMBERLAIN PRIZE**

(2019) Annual award for best undergraduate essay in the areas of the American presidency, Congress, or public policy.

#### **CHANLER HISTORICAL PRIZE**

(1877) Established at the bequest of J. Winthrop Chanler, CC 1847, this prize is awarded to the senior who submits the best essay on a topic dealing with the history of civil government in America. The topic to be selected is done in conjunction

with seminar work in one of the social science departments and approved by the chairperson of the Chanler Prize Committee.

#### **TARAKNATH DAS FOUNDATION AWARD**

(1957) Awarded annually to a student in Columbia College, the School of General Studies, or Barnard College for excellence in Asian studies, particularly in the history and culture of India.

#### **ALBERT MARION ELSBERG PRIZE**

(1912) Established by Mrs. Albert Elsberg in memory of her son, Albert Marion Elsberg, this prize is awarded to a student with sophomore, junior, or senior standing who has demonstrated excellence in modern history.

#### **SANFORD S. PARKER PRIZE**

(1980) Funded by the family and friends in memory of Sanford S. Parker, CC'37, this prize is awarded to a Columbia College senior going on to graduate study in economics who shows promise of doing original work and has already demonstrated boldness of thought and a commitment to excellence, whose interests are wide, heart kind, and spirit generous.

#### **CAROLINE PHELPS STOKES PRIZE**

(1910) Established at the bequest of Caroline Phelps Stokes, this prize is awarded to a student who has been a degree candidate for at least one academic year at Columbia College or Barnard College, and who has written the best essay on any topic concerning the rights of man. The topic is to be selected in connection with course or seminar work and approved by the Stokes Prize Committee.

#### **ALAN J. WILLEN MEMORIAL PRIZE**

(1968) Established by classmates and friends of Alan J. Willen, CC'64, in his memory, this prize is awarded to the Columbia College student who writes the best seminar paper on a contemporary American political problem. The selection is made jointly by representatives of the Departments of History and Political Science.

#### **MYRA KRAFT PRIZE FOR SUPERIOR ACADEMIC ACHIEVEMENT IN THE STUDY OF HUMAN RIGHTS**

(2013) Established to honor the memory of Myra Kraft, beloved wife of Robert Kraft, CC'63 and Trustee Emeritus, this prize is awarded to the Columbia College student majoring in Human Rights who has the highest grade point average and a superior record of academic achievement in Human Rights.

### **PRIZES IN THE NATURAL AND PHYSICAL SCIENCES**

#### **ALFRED MORITZ MICHAELIS PRIZE**

(1926) Established by Mrs. Jeanette Michaelis in memory of her son, Alfred Moritz Michaelis, CC 1920, this prize is awarded to the member of the graduating class who has completed with the most proficiency the sequence of courses in physics that corresponds most nearly to the sequence given by the late Professor George V. Wendell.

**PROFESSOR VAN AMRINGE MATHEMATICAL PRIZE**

(1910) Established by George G. DeWitt, CC 1867, this prize is awarded to three College students (a first-year, a sophomore, and a junior) who are deemed most proficient in the mathematical subjects designated during the year of the award.

**JOHN DASH VAN BUREN, JR. PRIZE IN MATHEMATICS**

(1906) Established by Mrs. Louise T. Hoyt in memory of her nephew, John Dash Van Buren, Jr., CC 1905, this prize is awarded to the degree candidate who writes the best examination on subjects prescribed by the Department of Mathematics.

**PRIZES IN THE CREATIVE AND PERFORMING ARTS****SEYMOUR BRICK MEMORIAL PRIZE**

(1969) Established by Mrs. Seymour Brick and her son, Richard, in honor of their husband and father, Seymour Brick, CC'34, this prize is awarded to the Columbia College student who submits the best one-act or full-length play as judged by the Department of English and Comparative Literature.

**KAREN OSNEY BROWNSTEIN WRITING PRIZE**

(1991) Established by Neill H. Brownstein, CC'66, in memory of Karen Osney Brownstein, this prize is awarded to a graduating senior in Columbia College who has written a single piece or a body of work so distinguished in its originality of concept and excellence of execution that it fairly demands the award, support, and recognition the prize intends.

**GEORGE WILLIAM CURTIS PRIZE**

(1902) Established by the late Samuel Putnam Avery, CC 1896, an associate of George William Curtis, this prize is awarded to students in the College for excellence in the public delivery of English orations.

**ROBERT W. GOLDSBY FUND**

(2019) Awarded to the Columbia College student who demonstrates excellence in the dramatic arts.

**PHILOLEXIAN CENTENNIAL WASHINGTON PRIZE**

(1902) Gift of J. Ackerman Coles, CC 1864. This prize is awarded once every four years to the student in the college who shall be deemed most worthy, upon delivery of an original address on a subject concerning public affairs.

**PHILOLEXIAN PRIZE FUND**

(1904) A gift of the Philolexian Society, the income from which shall be used for prizes in Columbia College for debating, essays, short stories, and poetry.

**AUSTIN E. QUIGLEY PRIZE**

(2010) The Austin E. Quigley prize for outstanding artistic and intellectual achievement may be awarded to a Columbia College senior majoring in Drama and Theatre Arts. Named in honor of Columbia College's dean from 1995-2009, the prize is

funded by Nobel Laureate Richard Axel, CC '67 and University Professor of Biochemistry and Molecular Biophysics.

**THE LOUIS SUDLER PRIZE IN THE ARTS**

(1983) Awarded annually to a senior who, in the opinion of the Faculty, has demonstrated excellence of the highest standards of proficiency in performance or execution or in the field of composition in one of the following general areas of performing and creative arts: music, theatre, painting, sculpture, design, architecture, film or dance.

**VAN RENSSELAER PRIZE**

(1926) Gift of Maximilian Foster, this prize is awarded to the candidate for a degree in Columbia University who is the author of the best example of English lyric verse.

**GEORGE EDWARD WOODBERRY PRIZE**

(1935) Established by the Woodberry Society of New York, this prize is awarded every second year to an undergraduate student in Columbia University for the best original poem.

**DEPARTMENT PRIZES****African American and African Diaspora Studies****ELLA BAKER AWARD FOR OUTSTANDING ACADEMIC ACHIEVEMENT****RALPH JOHNSON BUNCHE AWARD FOR LEADERSHIP AND SERVICE****Art History and Archaeology****SENIOR THESIS PRIZE IN ART HISTORY AND ARCHAEOLOGY****Biological Sciences****THE BRIDGES AND STURTEVANT PRIZE IN BIOLOGICAL SCIENCES****CHARLES A. CARMAN FELLOWSHIP**

(1949) Established by friends and former students of Harry J. Carman GS 1919, former dean of Columbia College, this fellowship is awarded annually to a Columbia College senior who exhibits intellectual promise for advanced study.

**JARVIS AND CONSTANCE DOCTOROW FELLOWSHIP**

(2005) Established by the Jarvis and Constance Doctorow Foundation, this fellowship is awarded annually to a Columbia College senior for one year of study at St. Edmund Hall, Oxford University.

#### **HENRY EVANS TRAVELLING FELLOWSHIP**

(1928) Established by Mrs. Henry Evans in memory of her husband, Henry Evans CC 1881, this fellowship is awarded annually to graduating seniors at Columbia College who are planning to undertake a research project of a creative nature that requires travel rather than formal graduate study.

#### **HOLTHUSEN-SCHINDLER ENDOWMENT FUND**

(2000) Established through a bequest from the estate of Lenore S. Holthusen GS'51, the widow of Hen Holthusen CC 1915, LAW 1917, this scholarship is awarded to graduates of Columbia College who continue their education at Columbia Law School.

#### **EURETTA J. KELLETT FELLOWSHIPS**

(1932) Established through a bequest from the estate of Eurette Jane Schlegel, this fellowship is awarded to Columbia College seniors who have shown exceptional proficiency in the study of liberal arts for one or two consecutive years of study at Oxford University or Cambridge University.

### **SPECIAL UNDERGRADUATE FELLOWSHIPS**

#### **BEESEN GLOBAL EXPERIENCE TRAVEL FELLOWSHIPS**

(2015) Established by Charles F. Beesen LS'58, this fellowship is awarded annually to undergraduate students of Columbia College and Barnard who are not native speakers of French for summer study abroad in Paris.

#### **THE CLASS OF 1939 SUMMER RESEARCH FELLOWSHIP**

(1989) Established by the Class of 1939 in honor of the 50th anniversary of their graduation, this fellowship grants students the opportunity to pursue their intellectual goals, gain valuable research experience, and cultivate stronger relationships with faculty members.

#### **THE COMER UNDERGRADUATE SUMMER RESEARCH FELLOWSHIP IN CLIMATE SCIENCES**

(2023) This fellowship supports undergraduate students participating in summer research projects related to sustainability and climate. First-generation, low-income and/or underrepresented students are particularly encouraged to apply. The fellowship seeks to create meaningful new research opportunities, with the ultimate goal of encouraging a more diverse community of students who seek to pursue graduate study or professional engagement in climate related fields.

#### **HERBERT DERESIEWICZ SUMMER RESEARCH FELLOWSHIP**

(2011) Established by Robert Leslie Deresiewicz CC'79, P: CC'13, CC'16, in memory of his father Herbert Deresiewicz

SEAS'48, SEAS'52, P: CC'79, CC'85, BC'78, GSAS'90, GSAS'93, GSAS'98, JRN'87, PT'79, a long time SEAS faculty member and department chairman who held a deep and abiding love for undergraduate teaching. This fellowship is awarded to a Columbia College or SEAS student for full-time laboratory research on the Morningside Heights campus in biological sciences, biomedical engineering, chemistry or chemical engineering.

#### **INTERNATIONAL AFFAIRS FELLOWSHIP FUND**

(2019) Established by an anonymous donor, this fellowship is awarded to Columbia College juniors majoring in political science proposing summer research focusing on international relations, human rights, or regional studies.

#### **SOLOMON AND SEYMOUR FISHER CIVIL LIBERTIES FELLOWSHIP**

(1989) Established by Solomon Fisher, CC'36, LAW'38, P: CC'62, GSAS'68 and Seymour Fisher, CC'45, this fellowship is awarded annually to a Columbia College student for work during the summer at the Legal Department of the American Civil Liberties Union National Office in New York City.

#### **KLUGE FELLOWS SUMMER RESEARCH GRANT**

(1988) Established by John Kluge, CC'37, P: CC'05 this fellowship. Administered by the Columbia University Scholars Program (CUSP) [Summer Enhancement Fellowships](#), grants are awarded competitively to students from underrepresented groups for independent research projects during the summer under the sponsorship of a faculty member. The application process includes a series of seminars and workshops.

#### **RICHARD LEWIS KOHN TRAVELLING FELLOWSHIP**

(1959) Established in memory of Richard Lewis Kohn CC'60 from gifts of various donors, this fellowship is awarded annually to a Columbia College student for study during the junior year in Great Britain.

#### **MYRA KRAFT PRIZE FOR EXCEPTIONAL PRACTICAL EXPERIENCE IN HUMAN RIGHTS ADVOCACY**

(2013) Established by Robert Kraft CC'63, P: CC'94, in memory of his wife Myra Kraft P: CC'94, this prize is awarded to the rising Columbia College senior majoring in human rights for a summer or one-term human rights internship.

#### **MELLON MAYS UNDERGRADUATE FELLOWSHIP**

(1996) Awarded in the spring semester of the sophomore year to undergraduates who wish to pursue a Ph.D., whose research interests display a commitment to diversifying humanistic fields of study, and whose intellectual and social commitments embody those of the late Dr. Benjamin Mays. The fellowship supports a two-year academic enhancement program funded by the Andrew W. Mellon Foundation.

#### **NOBUHISA AND MARCIA ISHIZUKA GLOBAL FELLOWSHIP IN EAST ASIAN STUDIES**

(2015) Established by Nobuhisa Ishizuka CC'82, LAW'86 this fellowship is awarded annually to a Columbia College student for an international experience studying Japanese language and culture.

#### **PRESIDENTIAL GLOBAL FELLOWSHIP**

(2014) Established by Lee C. Bollinger, Columbia University's 19th president, the fellowship is awarded to first-year undergraduates (CC, SEAS, GS) for participation in global engagement opportunities.

#### **SANFORD S. PARKER PRIZE SUMMER FELLOWSHIPS**

(1980) Funded by the family and friends of Sanford S. Parker CC'37, this prize is awarded to Columbia College juniors who aspire to conduct summer research projects. Recipients will show promise of doing original work, and demonstrate boldness of thought and a commitment to excellence.

#### **RICHARD AND BROOKE KAMIN RAPAPORT SUMMER MUSIC PERFORMANCE FELLOWSHIP**

(1993) Established by Brooke Kamin Rapaport and Richard A. Rapaport CC'69, P: CC'22, this music fellowship is awarded to Columbia College students who are particularly gifted in musical performance, composition or conducting.

#### **ARTHUR ROSE TEACHING ASSISTANTSHIP**

(1958) Established by Mr. and Mrs. Bennett Rose in memory of their son, Arthur Rose. This fellowship is awarded to a senior in Columbia College whose work supports the faculty in one of the departments that contribute to the courses in Contemporary Civilization and the Humanities.

#### **THE PHYLLIS STEVENS SHARP FELLOWSHIP IN AMERICAN POLITICS**

(2005) Established by John Stevens Sharp CC'79, GSAS'80, GSAS'82, this fellowship is awarded to Columbia College students majoring in political science for research in American politics or policy making or uncompensated internships in a government office, agency, or other organization serving the public.

#### **SUMMER UNDERGRADUATE RESEARCH FELLOWSHIP**

Awarded to undergraduate students for hands-on biology related laboratory research on either the Morningside campus or in the biomedical labs at Columbia's Health Sciences. The fellowship provides for one summer of full time research.

#### **RICHMOND B. WILLIAMS TRAVELLING FELLOWSHIP**

(1988) Established through a bequest from the estate of Richmond B. Williams CC'1925, JRN'1925, this fellowship is awarded to Columbia College juniors majoring in English for a summer research project requiring foreign travel.

#### **YATRAKIS SUMMER RESEARCH FELLOWSHIP**

(2019) Established in honor of Kathryn B. Yatrakis GSAS'76, GSAS'81, P: CC'94, CC'96, CC'05 by her family, this

fellowship is awarded to Columbia College students for summer research in urban studies.

## **SPECIAL ENDOWMENTS**

#### **CLASS OF 1954 URBAN NEW YORK PROGRAM ENDOWMENT**

(1981) Established by the Class of 1954, this fund enables students and faculty to jointly experience cultural events through the Urban New York Program.

#### **ARNOLD I. KISCH, M.D., AND VICTORIA L. J. DAUBERT, PH.D FUND FOR STUDENTS TO EXPERIENCE OPERA IN N.Y.C.**

(1993) Created for students to experience opera in New York City within the Urban New York Program.

#### **VALENTINI ENDOWMENT FUND FOR THE COLUMBIA COLLEGE JOURNEY**

(2021) Established in honor of James J. Valentini's tenure as dean of Columbia College, this fund provides support for students pursuing experiences beyond the classroom, including unpaid or low-paid internships, research opportunities with Columbia faculty or faculty at other institutions, community engagement opportunities and summer study abroad.

# STANDARDS AND DISCIPLINE

All members of Columbia University's community are expected to conduct themselves in ways that are honest and that respect the rights of others at all times. Dean's Discipline refers to the process through which Columbia College responds to allegations of student academic or behavioral misconduct. The primary aim of the Dean's Discipline process is to educate students about the impact their behavior may have on their own lives as well as on the greater community, and therefore it is not designed as an adversarial or legal process.

The Dean's Discipline process is initiated when the College or University receives a report that a student has allegedly violated Columbia College or University policies or local, State, or Federal laws. Students may be subject to Dean's Discipline for any activity that occurs on or off campus that impinges on the rights of other students and community members.

The Center for Student Success and Intervention (CSSI) is responsible for all disciplinary affairs concerning Columbia College students that are not reserved to some other office or organization within the College or University. CSSI uses a "360-degree lens" approach to its work with students, which includes matters of student conduct, intervention case management, and student support initiatives.

Columbia College students are expected to familiarize themselves with [Standards and Discipline](#) and the comprehensive list of policies and expectations available on the [Center for Student Success and Intervention](#) website.

## ACADEMIC INTEGRITY

A Columbia College education has two complementary elements: the intellectual development of bodies of knowledge and habits of mind, and the overall development of moral character and personal ethics. These elements are supported by a commitment to academic integrity.

Academic integrity defines an intellectual community and its educational mission. As members of the intellectual community of Columbia College, students are expected to respect and acknowledge the intellectual work of others and denote clearly how their own work relates to that of others.

Columbia College provides support for students as they learn and practice the tenets of academic integrity in their undergraduate studies through the office of [Academic Integrity](#), a part of the office of Students and Family Support. The office of Academic Integrity provides training on academic integrity for all incoming students to the College through

mandatory online programs for new students and through a variety of programs throughout the academic year. The office's [website](#) provides detailed information for students on the policies around academic integrity, including the student Honor Code that governs all academic work, the various forms of academic dishonesty that students should avoid, and resources for students to utilize in their own work. Students with questions are encouraged to contact the office at [ugrad-integrity@columbia.edu](mailto:ugrad-integrity@columbia.edu).

Violating the standards of academic integrity severely inhibits a student's opportunity to mature academically, professionally, and socially. Consequently, a violation of academic integrity is one of the most serious offenses a student can commit at the University.

Violations of academic integrity may be intentional or unintentional and can include, but are not limited, to:

- Academic Dishonesty, Facilitation of
- Assistance, Unauthorized
- Bribery
- Cheating
- Collaboration, Unauthorized
- Dishonesty
- Ethics, Honor Codes, and Professional Standards, Violation of
- Failing to Safeguard Work
- Giving or Taking Academic Materials, Unauthorized
- Obtaining Advanced Knowledge
- Plagiarism
- Sabotage
- Self-Plagiarism
- Test Conditions, Violation of
- Use of Artificial Intelligence Tools, Unauthorized

Violations of the policies regarding the above categories will be subject to Dean's Discipline.

## ACADEMIC INTEGRITY IN THE VIRTUAL AND HYBRID CLASS ENVIRONMENT

The Columbia undergraduate classroom, whether real or virtual, is a vital and dynamic space for learning, sustained by the expectation that the class experience is shared only by participants in the course. The free and respectful exchange of ideas is the foundation of teaching and learning and can occur

only if all course participants agree as a matter of academic integrity (subject to standard penalties) to respect the guidelines established below.

To support and sustain the class experience, the Columbia undergraduate Committee on Instruction sets forth the following expectations, pertaining both to course materials and to course meetings:

- Course materials, including handouts, readings, slides, and attendant materials must not be broadly shared, distributed, or sold outside the course environment (including on social media) without permission of the instructor. They must be understood as the product of instructors' intellectual work, and treated as their property.
- The contents of class discussion and breakout rooms may not be circulated outside the classroom, in whole or in part, for non-educational purposes (e.g., on social media) or outside the Columbia community. Students are expected to respect the complex dynamics of class discussion and use discretion when repeating the ideas of others outside of the classroom. The audio and visual recordings of class discussion and breakout rooms belong to the course participants and must be understood in the context of the course. This is especially crucial to protect the identity of speakers; in certain circumstances, failure to do so could be a form of bullying and could endanger course participants.
- Recordings of class sessions must not be shared, in whole or in part, with those outside the class. Students are not permitted to record any portion of class sessions without the explicit consent of the instructor.

Violations of the policies regarding the above categories will be subject to Dean's Discipline.

## BEHAVIORAL STANDARDS

University policy regarding behavior standards have been developed for the purposes of maintaining a safe and healthy educational environment. Categories of prohibited conduct include, but are not limited to, the following:

- Unauthorized Access/Egress
- Prohibited use of Alcohol
- Collusion
- Prohibited use of Columbia University Identification Card
- Violation of Columbia University Non-Discrimination Statement
- Unauthorized Use of Columbia Identity (or affiliated organizations)
- Unauthorized Copying and/or Distribution
- Disruptive Behavior

- Endangerment
- Endangerment to Animals
- Failure to Comply
- Falsification
- Violation of Fire Safety Policies
- Harassment
- Hazing
- Violation of Illegal Drugs Policy
- Violation of Information Technologies Policies
- Violation of the Laws
- Retaliation
- Sales and Solicitation
- Violation of University Smoking Policy
- Unauthorized Surveillance/Photography
- Theft
- Violation of University Policies
- Vandalism/Damage to Property
- Weapons

Violations of the policies regarding the above categories will be subject to Dean's Discipline.

# COLUMBIA UNIVERSITY POLICIES

Since policies and procedures are subject to change, please check the [Columbia University website](#) for the most current information.

## RESERVATION OF UNIVERSITY RIGHTS

This *Bulletin* is intended for the guidance of current Columbia students and faculty, as well as for the guidance of persons applying for or considering application for admission to Columbia College of Columbia University.

In general, this *Bulletin* sets forth the manner in which the University intends to proceed with respect to the matters set forth herein, but the University reserves the right to depart without notice from the terms of this *Bulletin*. The *Bulletin* is not intended to be, and should not be, regarded as a contract between the University and any student or other person.

Valuable information to help students, faculty, and staff understand some of the policies and regulations of the University can now be found in [University Policies](#), which includes information on the following:

- Additional Policy Sources for the Columbia Community
- Central Administration of the University's Academic Programs
- Consumer Information
- Crime Definitions in Accordance with the Federal Bureau of Investigation's Uniform Crime Reporting Program
- Essential Resources:
  - Campus Safety and Security
  - Disability Services
  - Ombuds Office
  - Transcripts and Certifications
- FERPA - Policy on Access to Student Records under the Federal Family Educational Rights and Privacy Act (FERPA) of 1974, as Amended
- Gender-Based Misconduct Policies for Students
- Information Technology Policies

- International Travel Planning Policy
- Involuntary Leave of Absence Policy
- Military Leave of Absence Policy
- Non-Retaliation Policy
- Policies on Alcohol and Drugs
- Policies and Procedures on Nondiscrimination and Harassment
- Policy on Partisan Political Activity
- Protection of Minors
- Social Security Number Reporting
- Student Email Communication Policy
- University Event Policies
- University Regulations (Including Rules of University Conduct)
- Use of Hoverboards on University Campus and Property
- Use of Unmanned Aircraft Systems on University Campus and Property
- Voluntary Leave of Absence Policy
- Involuntary Leave of Absence Policy

## STUDENT GRIEVANCE POLICIES AT COLUMBIA UNIVERSITY

Columbia University is committed to fostering intellectual inquiry in a climate of academic freedom and integrity. Its members, students, and faculty alike, are expected to uphold these principles and exhibit tolerance and respect for others. The following procedures are part of a process to ensure that student concerns about experiences in the classroom or with faculty are addressed in an informed and appropriate manner.

**Please note that the policies and processes listed here are meant to address any potential concerns about a faculty member's *professional conduct and behavior* toward students in the classroom or in other instructional settings. Potential concerns about *grades awarded by a faculty member* are covered by separate policies and procedures, which can be found on the College's website under "Academics".**

Columbia believes that both students and faculty have the right to express their views freely, within an atmosphere of tolerance and civility. Faculty may present students with ideas and interpretations that surprise, and even offend them. But they must do so in an environment that is open to divergent views. Faculty, of course, must not discriminate on the basis

of race, gender, sexual orientation, disability, religion, or other inappropriate categories.

The University offers several avenues of assistance to students who feel that their professors have not lived up to these responsibilities. These range from informal counseling and mediation to formal grievance processes. It is a violation of University policy to retaliate against any student who brings a grievance procedure in good faith.

## The Ombuds Office

When students encounter problems that they feel they cannot discuss with their professors, they may, instead, turn to the University Ombuds Office (<http://ombuds.columbia.edu>) for information, clarification of University policies, and confidential advice. The Ombuds Officer may refer students to other offices for further assistance or engage in informal mediation at the request of students. The Ombuds Officer does not have the authority to conduct formal investigations.

## Deans and Department Chairs

Students may also approach the chair of the department in which their course is given for advice and assistance in resolving problems with individual faculty. If they are not satisfied with the assistance they receive or consider the chair to be part of the problem, they may seek assistance from the dean of the School within which they are enrolled or the dean or vice president overseeing the School within which the course is offered. The deans and vice presidents are authorized to conduct formal investigation of student complaints against their professors and, when they consider it appropriate, provide relief to the student or impose sanctions against the professor in a manner that is consistent with the University's disciplinary policies for faculty. The form such investigations take is left to the discretion of the deans and vice presidents.

## Office of Equal Opportunity and Affirmative Action

When students believe that they have been the victims of discrimination or sexual harassment by faculty, they may seek assistance from the Office of the Associate Provost for Equal Opportunity and Affirmative Action (<http://eoaa.columbia.edu>). As described in the University's Policy Statement on Discrimination and Sexual Harassment, the Associate Provost for Equal Opportunity and Affirmative Action is empowered to conduct investigations of their complaints, with certain exceptions, as well as provide confidential advice and engage in informal mediation. The Associate Provost may exercise those responsibilities herself or delegate them to a designee. If at any time a complaint is filed with a governmental agency or court, the University procedures must cease immediately.

See the list below for links to school-specific guidance.

[Faculty of Arts and Sciences](#)

## Columbia College

## GRADUATION

The B.A. degree is typically awarded three times during the year: in February, May, and October. Under special circumstances, a degree scheduled to be awarded in May may be awarded in June instead.

Each May, the College celebrates the students who have completed the requirements for the Bachelor of Arts degree from Columbia College in its Class Day ceremony. Information on the College's Class Day is shared each Spring with students who have completed or will complete the requirements for the Bachelor of Arts degree in the academic year ending that May.

Each May, the University confers degrees on the students who have completed the requirements for the Bachelor of Arts degree from Columbia College in the University-wide Commencement ceremony (see [Academic Calendar](#)). For complete Commencement information, please visit the official [Columbia University Commencement website](#).

Diplomas are mailed to students after the degree has been officially conferred by the University.

## Graduation Requirements

You should consult with your academic advisor within your school or department to be sure all of your graduation requirements have been met. In order to be eligible to graduate, Columbia College students must have completed 124 points of academic credit, which must include the full Core Curriculum and all requirements for a major, and must have a cumulative GPA of 2.0 or higher.

Students in Columbia College can use the Degree Audit Report (DAR) through [SSOL](#). The DAR is used by both students and staff as a tool to help track students' progress toward the degree. The DAR is a tool for advising and is not considered the equivalent of an official transcript by the College or the University.

Note: Deans and advisors are the final authorities on whether graduation requirements have been met.

## Degree/Certificate Application

**In order to be considered for a degree or certificate, you must file an application with your school or department.**

You should submit the Application for Degree or Certificate by the appropriate deadline.

For 2024-2025, the dates are:

September 1, 2024 - Degrees conferred October 16, 2024

November 1, 2024 - Degrees conferred February 12, 2025

January 1, 2025 - Degrees conferred May 21, 2025

March 1, 2025 - Degrees conferred June 30, 2025

Columbia College students should consult the section **Academic Regulations—Graduation** above for more details on applying for the Bachelor of Arts and on receiving the diploma of the degree.

Additional Information:

- [Graduation and Diplomas — University Registrar](#)
- [Commencement Week](#)
- [GradZone](#)

## IMMUNIZATION REQUIREMENTS

Before students are permitted to register for classes, there are several immunization requirements that all students—regardless of credit load—must complete. For this reason, a hold is placed on registration for all incoming students.

***Documentation is upon admission or at least 30 days prior to a student's scheduled registration date.***

1. Measles, Mumps, and Rubella (MMR): New York State public health law and University policy requires that all students born on or after January 1, 1957 document immunity to measles, mumps, and rubella.
2. Meningitis decision: New York State public health law and University policy requires that students certify their decision about receiving the meningococcal meningitis vaccine (menACWY) on the Patient Portal. Those indicating they have received the vaccine must upload documentation showing the vaccine was received in the last 10 years.

### **Submit Documentation**

Submit the University immunization form and all proof/documentation via the [Columbia Health Patient Portal](#) (Immunization Record section under Medical Clearances). All documentation must be in English or accompanied by a certified translation.

Records may also be sent via other options as outlined on the Columbia Health website, though records submitted outside of the Patient Portal process may experience significantly longer processing times.

All forms are processed in the order in which they are received.

Columbia University does not expedite processing of late forms. As such, any delays in submitting or an incomplete submission will result in registration delays.

### ***Exemptions***

Columbia University is committed to providing a safe, inclusive, and supportive experience for all students and recognizes medical contraindications to vaccination as well as student observance of their faith as it pertains to the practice of immunization.

To request a medical or religious exemption, please complete the appropriate request forms, read the required Vaccine Information, attach all supplemental materials, and upload all documents to the [Columbia Health Patient Portal](#) (Upload Immunization Record section under Medical Clearances) prior to the deadline. Note that students requesting an exemption must submit separate forms for each vaccine exemption request. Learn more about exemption requests on the [Immunization Compliance](#) page.

For information about these requirements visit the [Immunization Compliance](#) page, or email [immunizationcompliance@columbia.edu](mailto:immunizationcompliance@columbia.edu).

## IMMUNIZATION RECOMMENDATIONS

[Columbia Health](#) recommends that students receive all routine childhood vaccinations, an updated tetanus booster, vaccination for Hepatitis B (three-dose series), and varicella (chicken pox). These vaccines are available at [Columbia Health](#) Medical Services.

Students who have paid the Columbia Health & Related Services Fee are not charged for the following vaccines when administered at Columbia Health Medical Services:

1. Measles, Mumps and Rubella (MMR)\*
2. Hepatitis A
3. Hepatitis B
4. Hepatitis Combination A and B
5. Influenza
6. Meningococcal Meningitis
7. Pneumococcal (if clinically indicated)
8. Tetanus-Diphtheria
9. Tetanus-Diphtheria-Pertussis
10. Varicella
11. Up-to-date COVID-19 vaccination (strongly recommended)

For all other vaccinations, students are charged for the cost of the vaccine. Vaccinations are available to students who have not paid the Columbia Health & Related Services Fee for a minimal cost.

\*MMR vaccine cost will be charged if it is administered to meet pre-matriculation immunization requirements.

## NOTICE OF NON-DISCRIMINATION

Columbia University is committed to providing a learning, living, and working environment free from unlawful discrimination and to fostering a nurturing and vibrant community founded upon the fundamental dignity and worth of all of its members. Consistent with this commitment, and with all applicable laws, it is the policy of the University not to tolerate unlawful discrimination in any form and to provide persons who feel that they are victims of discrimination with mechanisms for seeking redress.

The University prohibits any form of discrimination against any person on the basis of race, color, sex, gender, pregnancy, religion, creed, marital status, partnership status, age, sexual orientation, gender identity, gender expression, national origin, disability, military status, or any other legally protected status in the administration of its educational policies, admissions policies, employment, scholarship and loan programs, and athletic and other University-administered programs.

Nothing in this policy shall abridge academic freedom or the University's educational mission. Prohibitions against discrimination and discriminatory harassment do not extend to statements or written materials that are relevant and appropriately related to the subject matter of courses.

Inquiries or complaints regarding any form of discrimination or harassment may be directed to:

Title IX Coordinator/Section 504 Officer for Columbia University, [Office of Equal Opportunity and Affirmative Action](#)

Department of Education, Office for Civil Rights (New York Office), [OCR.NewYork@ed.gov](mailto:OCR.NewYork@ed.gov)

## RELIGIOUS HOLIDAYS

It is the policy of the University to respect its members' religious beliefs. In compliance with New York State law, each student who is absent from school because of his or her religious beliefs will be given an equivalent opportunity to register for classes or make up any examination, study, coursework or class requirements that he or she may have missed because of such absence on any particular day or days.

No student will be penalized for absence due to religious beliefs, and alternative means will be sought for satisfying the academic requirements involved.

Officers of Administration and of Instruction responsible for scheduling of academic activities or essential services are expected to avoid conflict with religious holidays as much as possible. If a suitable arrangement cannot be worked out between the student and the instructor involved, they should consult the appropriate dean or director. If an additional appeal is needed, it may be taken to the Provost.

## STUDENT POLICIES AND PROCEDURES ON DISCRIMINATION AND HARASSMENT, GENDER-BASED MISCONDUCT POLICIES FOR STUDENTS AND CONSENSUAL ROMANTIC AND SEXUAL RELATIONSHIPS

Columbia University is committed to providing a learning, living, and working environment free from discrimination, harassment and gender-based and sexual misconduct. Consistent with this commitment and with applicable laws, the University does not tolerate discrimination, harassment, or gender-based sexual misconduct in any form and it provides students who believe that they have been subjected to conduct or behavior of this kind with mechanisms for seeking redress. All members of the University community are expected to adhere to the applicable policies, to cooperate with the procedures for responding to complaints of discrimination, harassment and gender-based and sexual misconduct, and to report conduct or behavior they believe to be in violation of these policies to the [Office of Equal Opportunity and Affirmative Action](#).

Columbia University's [Sexual Respect](#) website ([sexualrespect.columbia.edu](http://sexualrespect.columbia.edu)) provides additional information and resources for students, faculty, and staff. Students who attend Barnard College and Teachers College as well as Columbia University are covered by these policies. The use of the term "gender-based misconduct" includes sexual assault, sexual harassment, gender-based harassment, stalking, and intimate partner violence.

Complaints against students for other forms of discrimination and harassment are processed in accord with the policies and procedures found on the website for the Columbia Gender-Based Misconduct Office ([genderbasedmisconduct.columbia.edu](http://genderbasedmisconduct.columbia.edu)).

Complaints against employees and third parties affiliated with the University for discrimination and harassment are processed in accord with the [Employment Policies and Procedures on Discrimination, Harassment, Sexual Assault, Domestic Violence, and Stalking](#). The use of the term "discrimination and harassment" includes discrimination, discriminatory harassment, gender-based harassment, stalking, intimate partner violence, sexual harassment, and sexual assault.

Columbia University maintains policies regarding consensual romantic and sexual relationships between faculty and students, and staff and students. The [Policy on Romantic and Sexual Relationships between Faculty/Staff and Undergraduate Students](#) states that no faculty or staff member shall initiate or accept sexual or romantic advances or engage in a romantic or sexual relationship with any undergraduate student enrolled in Columbia College, the Fu Foundation School of Engineering

and Applied Science, the School of General Studies, or Barnard College or other affiliate of Columbia, regardless of whether the faculty member has a supervisory role over the student.

For further information and assistance, contact:

Office of Equal Opportunity and Affirmative Action,  
[eoaa.columbia.edu](http://eoaa.columbia.edu)

Gender-Based Misconduct Office,  
[genderbasedmisconduct.columbia.edu](http://genderbasedmisconduct.columbia.edu)

## Additional Resources

Columbia offers a number of confidential resources to students who believe they have been subjected to discrimination, harassment or gender-based or sexual misconduct and who do not wish to report to the University:

Columbia Health Sexual Violence Response and Rape Crisis/Anti-Violence Support Center (Confidential),  
[health.columbia.edu/svr](http://health.columbia.edu/svr), 24/7/365 Helpline: 212-854-4357 (HELP)

Columbia Health Medical Services (Confidential),  
[health.columbia.edu/medical](http://health.columbia.edu/medical), 212-854-7426

Columbia Health Counseling and Psychological Services (Confidential), [health.columbia.edu/cps](http://health.columbia.edu/cps), 212-854-2878

Ombuds Office, [ombuds.columbia.edu](http://ombuds.columbia.edu), 212-854-1493

Office of the University Chaplain, [ouc.columbia.edu](http://ouc.columbia.edu), 212-854-1234

## UNDERGRADUATE INTERNATIONAL TRAVEL POLICY

All matriculated undergraduates participating in Columbia-Led, Columbia-Facilitated and/or Columbia-Recognized international travel **will be required to obtain School Sponsorship** at least 4 weeks prior to departure.

Application for School Sponsorship is comprised of the following steps. All steps must be completed prior to travel departure:

1. Complete and Submit a **School Sponsorship Request Form** - including all travel destinations and side trips while abroad.
2. Complete **Pre-Departure Orientation**.
3. Abide by all University requirements, including:
  - a. Register all travel with the University's international travel assistance services – International SOS (ISOS).
  - b. Maintain a health insurance policy that will also provide coverage outside the U.S. for routine, urgent, and emergent care (such as the Columbia Student Health Insurance Plan).

4. Complete the **Assumption of Risk, Waiver and Release Form**, which must be signed by the undergraduate.

5. Complete or adhere to any additional safety protocol measures recommended by the Undergraduate Travel Review Committee.

Undergraduates are expected to begin the application for School Sponsorship **as soon as an opportunity that would require international travel has been secured, and submit a completed application no later than 4 weeks prior to departure.**

Once School Sponsorship is approved and issued, undergraduates may continue their work with a sponsoring unit/program to begin/continue their preparation for a specific Columbia-Led, Columbia-Facilitated and/or Recognized travel program.

Undergraduates are required to immediately notify the Undergraduate Travel Review Committee should any changes to their location occur during the duration of their travel so their School Sponsorship file may be updated.

The undergraduate schools reserve the right to revoke sponsorship, support and funding if any step of the School Sponsorship process is not completed or acknowledged prior to departure and/or if the Undergraduate Travel Review Committee determines after review that the travel would be imprudent, based on assessment of the risk variables involved and/or the particular facts of the application. The purchase of travel protection insurance is strongly recommended to potentially mitigate financial loss in case of trip cancellation or interruption.

If a country or region is placed on the medium, high, or extreme risk list during travel, the Undergraduate Travel Review Committee will assess the risks of remaining in or departure from the country or region. Undergraduates will be advised of the risks and, if necessary, provided a recommended course of action. The undergraduate schools reserve the right to revoke sponsorship, support and funding should the undergraduate not follow the recommendations of the Undergraduate Travel Review Committee (UTRC).

The full Undergraduate International Travel Policy can be found on the UTRC website: [www.cc-seas.columbia.edu/travelpolicy/policy](http://www.cc-seas.columbia.edu/travelpolicy/policy).

## VETERANS BENEFITS AND TRANSITION ACT OF 2018

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent nor delay the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources available to other students who have satisfied their tuition and fee bills to the institution, including but not limited to access to classes, libraries, or other institutional facilities.

However, to qualify for this provision, such students may be required to:

- Produce the Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

## DEPARTMENTS, PROGRAMS, AND COURSES

This section contains a description of the curriculum of each department in the College, along with information regarding degree requirements for majors and concentrators, including course descriptions, registration information, elective courses, and suggestions about courses and programs in related fields.

Columbia College students should use the school Bulletin for academic planning purposes, as not all courses listed on the University-wide *Directory of Classes* and *Vergil* are open to Columbia College students.

The College reserves the right to withdraw or modify the courses of instruction or to change the instructors at any time.

## THE STUDY OF AFRICAN AMERICAN AND AFRICAN DIASPORA STUDIES

The African American studies curriculum explores the historical, cultural, social, and intellectual contours of the development of people of African descent. The curriculum enables students to master the basic foundations of interdisciplinary knowledge in the humanities and social sciences in the Courses examine the cultural character of the African diaspora; its social institutions and political movements; its diversity in thought, belief systems, and spiritual expressions; and the factors behind the continuing burden of racial inequality. During their junior and senior years of study, students focus their research within a specific discipline or regional study relevant to the African diaspora.

Students should consider a major in African American and African Diaspora studies if they are interested in careers where strong liberal arts preparation is needed, such as fields in the business, social service, or government sectors. Depending on one's area of focus within the major, the African American and African Diaspora studies program can also prepare individuals for career fields like journalism, politics, public relations, and other lines of work that involve investigative skills and working with diverse groups. A major in African American and African Diaspora studies can also train students in graduate research skills and methods, such as archival research, and is very useful for individuals who are considering an advanced graduate degree such as the Ph.D.

## DEPARTMENTAL HONORS

The requirements for departmental honors in African American and African Diaspora studies are as follows:

1. All requirements for major must be completed by graduation date;
2. Minimum GPA of 3.6 in the major;
3. Completion of senior thesis—due to the director of undergraduate studies on the first Monday in April.

A successful thesis for departmental honors must be selected as the most outstanding paper of all papers reviewed by the thesis committee in a particular year. The Thesis Evaluation Committee is comprised of department faculty and led by the director of undergraduate studies. The thesis should be of superior quality, clearly demonstrating originality and excellent scholarship, as determined by the committee. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## THE AFRICAN AMERICAN AND AFRICAN DIASPORA STUDIES DEPARTMENT THESIS

Although the senior thesis is a prerequisite for consideration for departmental honors, all African American and African Diaspora studies majors are strongly encouraged to consider undertaking thesis work even if they are ineligible or do not wish to be considered for departmental honors. The senior thesis gives undergraduate majors the opportunity to engage in rigorous, independent, and original research on a specific topic of their choosing, the result of which is a paper of 35-60 pages in length.

The senior thesis must be written under the supervision of at least one faculty member. Should the thesis writer elect to have more than one thesis adviser (either from the outset or added on during the early stages of research), these faculty in the aggregate comprise the Thesis Committee, of which one faculty member must be designated chair. In either case, it is incumbent upon the thesis writer to establish with the thesis chair and committee a reasonable schedule of deadlines for submission of outlines, chapters, bibliographies, drafts, etc.

In many cases, thesis writers may find that the most optimal way in which to complete a thesis is to formally enroll in an AFAS independent study course with their thesis adviser as the instructor. **All third year students interested in writing a thesis should notify the director of undergraduate studies and submit the name of the faculty adviser ideally by October 1, but certainly no later than the end of the fall semester of their junior year.** In close consultation with the thesis adviser, students develop a viable topic, schedule of meetings, bibliography, and timeline for completion (including schedule of drafts and outlines).

## DEPARTMENTAL PRIZES

### **Ralph Johnson Bunche Award for Leadership and Service**

The Bunche Award recognizes an undergraduate who has demonstrated a tremendous capacity for leadership and provided distinguished service to the Institute for Research in African American Studies.

The award is named in honor of Ralph Johnson Bunche (1901-1971), the highest American official in the United Nations. For his conduct of negotiations leading to an armistice in the First Arab-Israeli War, he received the Nobel Peace Prize in 1950; he was the first African American recipient of this honor.

### **Ella Baker Award for Outstanding Academic Achievement**

The Ella Baker Prize is awarded annually to an undergraduate who has demonstrated academic excellence, intellectual commitment to the field of African American Studies and who has written a thesis that advances our understanding of the African American experience.

The award is named for the brilliant activist, organizer, leader and Harlem resident, Ella Baker. Baker served as a field secretary for the NAACP before organizing the Southern Christian Leadership Conference under the leadership of Dr. Martin Luther King. Following her departure from SCLC she helped student activists organize the Student Non-violent Coordinating Committee. She would serve as an important mentor to these young people throughout the rest of her life.

## SENIOR FACULTY

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### **Governed Electives**

The "governed electives" category must include courses from at least three different departments, providing an interdisciplinary background in the field of African-American Studies. (Note: you cannot count one of your governed electives within your designated area of study).

### **Designated Area of Study**

A Designated Area of Study, preferably within a distinct discipline (for example, history, politics, sociology, literature, anthropology, psychology, etc.). Students may also select courses within a particular geographical area or region or an interdisciplinary field of study.

Any of the departmental disciplines (history, political science; sociology, anthropology, literature, art history; psychology, religion, music, etc.)

Any of the pertinent area studies (African Studies; Caribbean/Latin American; Gender Studies; etc.).

Please note that the major/concentrator is not allowed to "create" or "make up" a designated area of study without the

direct approval of the Director of Undergraduate Studies, and that such approval must be sought before the student has embarked on the course of designated area of study, and that such approval will be granted only in very rare and exceptional cases. Under no circumstances should the major/concentrator hope to take a series of courses only later to “create” a Designated Area of Study around these courses.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in African American and African Diaspora Studies

A minimum of twenty-seven (27) points is required for the completion of the major. The major should be arranged in consultation with the director of undergraduate studies. Students interested in majoring should plan their course of study no later than the end of their sophomore year.

#### Core Requirements

All majors must complete to satisfaction the core required courses. The core requirements are:

- (1) Introduction to African-American Studies - 4 Points
- (2) Major Debates in African-American Studies - 4 Points
- (3) Governed Elective - 4 Points
- (4) Governed Elective - 4 Points
- (5) Senior Seminar - 4 Points
- (6) Designated Area of Study Course (DAS) - 3 Points
- (7) DAS or Senior Pro Seminar - 4 Points

### Minor in African American and African Diaspora Studies

The minor in African American and African Diaspora Studies requires five courses for 16-20 points.

Students are required to complete:

- (1) Introduction to African-American Studies - 4 Points
- (2) Social Science Elective
- (3) Humanities Elective
- (4) Designated Area of Study Course (DAS)
- (5) Designated Area of Study Course (DAS)

Students should consult with the DUS for assistance in designing their minor as soon as they declare. Introduction to African American Studies should be taken as early as possible since it provides the basic foundation for both the major and minor and introduces other areas of study; some students will have taken it prior to declaring the minor. The Social Science and Humanities electives are designed to give students a sense of interdisciplinary breadth. The designated area of study courses will give them the intellectual depth in a subfield, subject or geographic area and many be taken as they advance in the minor.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in African American and African Diaspora Studies

A minimum nineteen (19) points is required for the completion of the concentration.

#### Core Requirements

All concentrators must complete to satisfaction the core required courses. The core requirements are:

- (1) Introduction to African-American Studies - 4 Points
- (2) Governed Elective - 4 Points
- (3) Governed Elective - 4 Points
- (4) Senior Seminar - 4 Points
- (5) Designated Area of Study Course (DAS) - 3-4 Points

### AFAS UN1001 INTRO TO AFRICAN-AMER STUDIES. 4.00 points.

Prerequisites: Students need to register for a section of AFAS UN1010, the required discussion section for this course.

From the arrival of enslaved Africans to the recent election of President Barack Obama, black people have been central to the story of the United States, and the Americas, more broadly. African Americans have been both contributors to, and victims of, this “New World” democratic experiment. To capture the complexities of this ongoing saga, this course offers an inter-disciplinary exploration of the development of African-American cultural and political life in the U.S. but also in relationship to the different African diasporic outposts of the Atlantic world. The course will be organized both chronologically and thematically, moving from the “middle passage” to the present so-called “post-racial” moment—drawing on a range of classical texts, primary sources, and more recent secondary literature—to grapple with key questions, concerns, and problems (i.e. agency, resistance, culture, etc.) that have preoccupied scholars of African-American history, culture, and politics. Students will be introduced to a range of disciplinary methods and theoretical approaches (spanning the humanities and social sciences), while also attending to the critical tension between intellectual work and everyday life, which are central to the formation of African-American Studies as an academic field. This course will engage specific social formations (i.e. migration, urbanization, globalization, etc.), significant cultural/political developments (i.e. uplift ideologies, nationalism, feminism, Pan-Africanism, religion/spirituality, etc.), and hallmark moments/movements (i.e. Harlem Renaissance, Civil Rights movement, etc.). By the end of the semester, students will be expected to possess a working knowledge of major themes/figures/traditions, alongside a range of cultural/political practices and institutional arrangements, in African-American Studies

### **AFAS UN1002 Major Debates in African-American Studies. 4.00 points.**

Prerequisites: Students must register for discussion section, AFAS UN1003. This course will focus on the major debates in African-American Studies from the role of education to the political uses of art. The class will follow these debates historically with attention to the ways in which earlier discussions on migration and emigration, for example, were engaged with the specific historical conjuncture in which they took place as well as in the myriad ways in which earlier debates continue to resonate today. There will be a mix of primary documents and secondary sources and commentary

### **AFAS UN1003 Blackness and Frenchness: A Radical Genealogy. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

How have Black radicals embraced the French language and, at times, Frenchness without espousing France's dominance and its doctrines of assimilation? This course explores the watershed moments from the past three centuries that redefine the articulations of blackness in French, in France and beyond—from revolutionary or constitutional independence in the post-colony to recent social movements in continental Europe. In addition to the opening inquiry, guiding questions for this course include but are not limited to the following. What kinds of state-sanctioned backlash in France have ensued in the face of affirmative reclamations of blackness (e.g. Négritude and Afroféminisme)? And, what are the historical linkages between Black radicalism in France and the United States? Through an intra-imperial and inter-imperial lens, this course will center contributions from Black writers, artists, and intellectuals of divergent colonial histories with especial consideration to those for whom French and France is their native language and land.

### **AFAS UN3030 AFRICAN-AMERICAN MUSIC. 3.00 points.**

This course focuses on a central question: how do we define "African-American music"? In attempting to answer this question, we will be thinking through concepts such as authenticity, representation, recognition, cultural ownership, appropriation, and origin(s). These concepts have structured the ways in which critics, musicians and audiences have addressed the various social, political and aesthetic contexts in which African-American music has been composed (produced), performed (re-produced) and heard (consumed)

### **AFAS UN3943 Senior Pro Seminar. 4.00 points.**

This course is a seminar for seniors to either write a formal proposal for a capstone project or to begin the research process for a Senior Thesis, which will be written in the Spring semester. This interdisciplinary course provides the necessary structure needed to complete either goal. This will be an interactive class in which students are required to participate and actively engage in each meeting

### **AFAS UN3936 Black Intellectuals Seminar. 4 points.**

AFAM Major/Concentrator required course

This undergraduate seminar examines a diverse group of black intellectuals' formulations of ideologies and theories relative to racial, economic and gender oppression within the context of dominant intellectual trends. The intellectuals featured in the course each contributed to the evolution of black political thought, and posited social criticisms designed to undermine racial and gender oppression, and labor exploitation around the world. This group of black intellectuals' work will be analyzed, paying close attention to the way that each intellectual inverts dominant intellectual trends, and/or uses emerging social scientific disciplines to counter racism, sexism, and classism. This seminar is designed to facilitate an understanding of the black intellectual tradition that has emerged as a result of African-American thinkers' attempts to develop a unified response to an understanding of the black condition. This course explores of a wide range of primary and secondary sources from several different periods, offering students opportunity to explore the lives and works of some of the most important black intellectuals. We will also consider the way that period-specific intellectual phenomenon-such as Modernism,

Marxism, Pan-Africanism, and Feminism-combined with a host of social realities.

**AFAS UN3940 SENIOR THESIS SEMINAR. 4.00 points.**

The Senior Seminar will afford thesis writers the chance to workshop their idea, conduct research and/or interviews, work with the IRB protocols (if necessary), learn to work with archival materials, and perform other research activities prior to writing the thesis. Students who choose to write a capstone paper or conduct a capstone project can choose an elective course the following semester. The Thesis Seminar, conducted in the spring semester, is a workshop-oriented course for Senior Thesis writers organized around honing their writing skills while providing guidance to students in their field/disciplinary-specific projects. For example, a student may choose to write a historical biography of an artist while another may pursue a sociological study of the effects of mass incarceration on voting rights. The instructor of the Thesis Seminar, working with a faculty adviser (dependent on the specific field of inquiry in the thesis), will provide feedback and supervise the writing schedule of the students

**AFAS GU4031 POPULAR MUSIC/PROTEST MOVEMENTS. 4.00 points.**

Open to graduate students and limited advanced undergraduates.

This course will examine the relationship between popular music and popular movements. We will be taking a historical, as well as a thematic, approach to our investigation as a way to trace various legacies within popular music that fall under the rubric of "protest music" as well as to think about the ways in which popular music has assisted various communities to speak truth to power. We will also consider the ways in which the impact of the music industry has either lessened or enhanced popular music's ability to articulate "protest" or "resistance" to hegemonic power.

**AFAS GU4035 Criminal Justice and the Carceral State in the 20th Century United States. 4 points.**

To apply for course enrollment, please contact Prof. Samuel Roberts (skroberts@columbia.edu).

This course provides an introduction to historical and contemporary concepts and issues in the U.S. criminal justice system, including state violence; the evolution of modern policing; inequality and criminal justice policy; drug policy as urban policy; and the development of mass incarceration and the "carceral continuum." The writing component to this course is a 20-25 page research paper on a topic to be developed in consultation with the instructor. This course has been approved

for inclusion in the African-American Studies and History undergraduate curricula.

**AFAS GU4037 Third World Studies. 4 points.**

Introduction to third world studies; an introduction to the methods and theories that inform the field of third world studies (aka ethnic studies), including imperialism, colonialism, third world liberation movements, subjectivities, and racial and social formation theories;

**AFAS GU4080 Black Feminist Imaginaries: Practices and Poethics. 4.00 points.**

This seminar will focus on theories, practices, and literature of Black thought and Black feminist imaginaries. We will read some of the significant Black feminist scholarship and literature that have emerged over the past three centuries with particular attention to Black feminist theorizing of the intersections of race and gender. The bulk of our reading will concentrate on 20th and 21st century texts with particular attention to the ways that Black feminists (even those retroactively so-named) have long insisted on the material, social, and spiritual significance of Black lives, Black life, and Black thought. In this course, we will read across genre and field to consider the myriad discourses in which Black feminist theorizing has intervened. The list of writers, artists, and thinkers whose work will guide our interrogations include Phillis Wheatley, Rebecca Cox Jackson, Zora Neale Hurston, Fanny Lou Hamer, Johnetta B. Cole, Audre Lorde, Angela Davis, Hortense Spillers, June Jordan, Toni Cade Bambara, Toni Morrison, Lucille Clifton, Susan Lori Parks, Saidiya Hartman, Adrienne Piper, Daphne Brooks, and Carrie Mae Weems, among others. Central to the course investigations is Carolyn Martin Shaw's description in "Disciplining the Black Female Body: Learning Feminism in Africa and the United States": "The individual, the social agent or actor, is a product of culture and produces culture. An individual's subjectivity is determined by that which he or she is subject to (such as laws, language, and stories) and that which he or she is subject of (such as personal decisions, actions, and stories). What holds together fragmentary cultures and part societies? I find the term discourse useful for thinking about linkages and articulations within and across "part societies." And across fields. Black feminist imaginaries offer discourses which intervene in dominating narrative, language, image, and knowledge structures. Multiple areas of knowledge and knowledge production must be brought to bear. We will read and think through how Black feminist imaginaries may reframe our understandings of the individual, the state, and the state of things

**ENGL GU4621 HARLEM RENAISSANCE. 3.00 points.**

(Lecture). This course will focus on the arts of the Harlem Renaissance as experiments in cultural modernity and as forms of incipient political empowerment. What was the Harlem Renaissance? Where and when did it take place? Who were its major players? What difference did it make to everyday Harlemites? What were its outposts beyond Harlem itself? Was there a rural HR? An international HR? As we wonder about these problems of definition, we will upset the usual literary/historical framework with considerations of music and painting of the period. How to fit Bessie Smith into a frame with W.E.B. Du Bois? Ellington with Zora Neale Hurston? Aaron Douglas with Langston Hughes? Where is Harlem today? Does it survive as more than a memory, a trace? Is it doomed to be black no more? How does Harlem function in our national/(international?) imagination? Has the Harlem Renaissance's moment come and gone? What continuities might we detect? What institutions from the early twentieth century have endured?

**ENGL GU4622 AFRICAN AMERICAN LITERATURE II. 3.00 points.**

(Lecture). This survey of African American literature focuses on language, history, and culture. What are the contours of African American literary history? How do race, gender, class, and sexuality intersect within the politics of African American culture? What can we expect to learn from these literary works? Why does our literature matter to student of social change? This lecture course will attempt to provide answers to these

questions, as we begin with Zora Neale Hurstons *Their Eyes Were Watching God* (1937) and Richard Wrights *Native Son* (1940) and end with Melvin Dixons *Loves Instruments* (1995) with many stops along the way. We will discuss poetry, fiction, drama, and non-fictional prose. Other authors include Ralph Ellison, James Baldwin, Gwendolyn Brooks, Malcom X, Ntzoake Shange, Audre Lorde, and Toni Morrison. There are no prerequisites for this course. The formal assignments are two five-page essays and a final examination. Class participation will be graded

**AFAS UN3001 SING A BLACK GIRL'S SONG: THE NON FICTION WRITING OF NTOZAKE SHANGE. 4.00 points.**

This undergraduate seminar offers an in-depth exploration of the nonfiction work of the renowned African-American poet and playwright Ntozake Shange, whose archives are at Barnard College, her alma mater. Through readings, discussion, and visits to her archives, students will probe this lesser-examined aspect of Shange's oeuvre, including her essays on her life, the arts, food, and other artists and creators. This course invites participants to engage critically with Shange's essays and personal writings while delving into her archive. Students will identify key themes and literary techniques in Shange's nonfiction and the historical and cultural context in which she wrote these works. We will examine how Shange's nonfiction contributes to her broader work and her perspectives on history, gender, feminism, and race as they intersect in her life as a Black woman artist. Students will develop critical thinking skills through close reading, analysis, and discussion of Shange's nonfiction and will improve their writing skills by composing reflections and essays on Shange's works. They will develop research skills and gain insights into Shange's creative process through firsthand engagement with Shange's archive at Barnard

## AMERICAN STUDIES

### AMERICAN STUDIES DEPARTMENT:

Department website: <https://americanstudies.columbia.edu/>

Office location: 319-321 Hamilton; 212-854-6698

Office contact: 212-854-6698, [amerianstudies@columbia.edu](mailto:amerianstudies@columbia.edu)

Director: Prof. Hilary Hallett, 319 Hamilton; 212-854-6698; [hah2117@columbia.edu](mailto:hah2117@columbia.edu)

Assistant Director: Michael Gately, 319 Hamilton; 212-854-6544; [mg3898@columbia.edu](mailto:mg3898@columbia.edu)

Associate Director: Robert Amdur, 311 Hamilton; 212-854-4049; [rla2@columbia.edu](mailto:rla2@columbia.edu)

Administrative Assistant: Arelis Herrera, 319 Hamilton; 212-854-6698; [ah3115@columbia.edu](mailto:ah3115@columbia.edu)

## THE STUDY OF AMERICAN STUDIES

The Center for American Studies offers students the opportunity to explore the experiences and values of the people of the United States as embodied in their history, literature, politics, art, and other enduring forms of cultural expression. The Center views civic education as its primary mission, sponsoring seminars and public programs that enhance students' understanding of the fundamental ideas and vocabulary of public discourse in American culture, history, and politics. The Center is the institutional home of the American Studies program, which offers an interdisciplinary, seminar-based curriculum designed to be open and flexible while preparing students for a life of active citizenship.

## STUDENT ADVISING

Each American Studies major or concentrator chooses an academic adviser who monitors their progress through graduation. Students work with advisors to develop programs tailored to their particular interests. Advisors approve Plan of Study forms and provide general guidance regarding the major and concentration. Each student is expected to meet with an advisor at least once a semester.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Research Project

The final requirement for the major in American Studies is completion of a senior essay, to be submitted in the spring of senior year.

Alternatively, students may fulfill this requirement by taking an additional seminar in which a major paper is required or by writing an independent essay under the supervision of a faculty member. Seniors who wish to do a senior research project are required to take the Senior Project Colloquium the fall of the senior year.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Students with a 3.6 minimum GPA in the major and an outstanding senior project are considered for honors. Normally no more than 10% of graduating majors receive departmental honors in a given year.

### Academic Prizes

- Best Senior Thesis in American Studies
- Shenton Award; Outstanding Community Service

## SEMINAR FACULTY

- Hilary A. Hallett
- Roosevelt Montás

- Casey N. Blake
- Lynne Breslin
- Ryan Carr
- Jeremy A. Dauber

- James Shapiro (English and Comparative Literature)
- Michael J. Witgen (History)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students may choose American Studies as an undergraduate major or a concentration. A minimum of 9 courses is required to complete the major, 7 courses to complete the concentration. Coursework for both consists of a combination of required courses (see degree requirements below) and an individualized program of study.

Although students generally declare their major or concentration in the spring of their sophomore year, you may

want to take electives early on in areas that interest you but that will later connect with the American Studies major.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in American Studies

A minimum of nine courses is required to complete the major.

Please note that as of January 2018 Major requirements have changed, beginning with the Class of 2020. Please consult with the department if there are any questions.

#### Two American Studies Core courses.

The following two courses are ordinarily required:

AMST UN1010	INTRO TO AMERICAN STUDIES
HIST UN2478	US INTELLECTUAL HIST 1865-PRES
or AMST UN3930	Topics in American Studies

Please note, the AMST UN3930 section MUST be Freedom and Citizenship in the U.S. to count towards the core course requirement

#### Two seminars in American Studies

AMST UN3930	Topics in American Studies
AMST UN3931	Topics in American Studies

#### Additional Courses

Four courses drawn from at least two departments, one of which must be in History and one of which must deal primarily with some aspect of American experience before 1900. (A course in U.S. History before 1900 would fulfill both requirements.)

#### Senior Research Project

The final requirement for the major in American Studies is completion of a senior essay, to be submitted in the spring of senior year. Alternatively, students may fulfill this requirement by taking an additional seminar in which a major paper is required or by writing an independent essay under the supervision of a faculty member. Seniors who wish to do a senior research project are required to take the Senior Project Colloquium AMST UN3920 in the fall of the senior year.

### Minor in American Studies

A minimum of five courses is required to complete the minor. Minors will be required to take the core introductory course required for Majors, one American Studies seminar, and three additional courses:

#### One American Studies Core course

Minors are required to take the core lecture course  
AMST UN1010 INTRO TO AMERICAN STUDIES

This course is an interdisciplinary exploration of the values and cultural expressions of the people of the United States from the Puritans to our own time. Students will examine a variety of works in literature, history, and cultural criticism, with an eye to understanding how Americans of different

backgrounds, living at different times and in different locations, have understood and argued about the meaning and significance of American national identity. Lectures and readings will give particular attention to the sites—real and imagined—where Americans have identified the promise and perils of American life. Two lectures each week and a required weekly discussion section.

### One seminar in American Studies

Chosen from among the 3000-level AMST seminars. Normally, eight or nine seminars are offered each semester.

Recent offerings include:

The Supreme Court in American History  
 Shakespeare in America  
 American Jewish Literature  
 Freedom and Citizenship in the United States  
 Douglass and Lincoln  
 Gender History and American Film  
 American Cultural Criticism  
 Immigrant New York  
 The Problem of Class in American Literature and Culture  
 A Tale of Two Cities: New York, San Francisco, and Urban Identity  
 Tocqueville: The American Mind  
 Race, Poverty, and American Criminal Justice  
 Equity in Higher Education  
 Museums, Memory, and American Public Culture  
 Hollywood's Cinema of the 1970s  
 Languages of America  
 The Graphic Novel (AMST UN 3933)  
 Journalism and Democracy: The 2024 Election (AMST UN3937)

### Additional Courses

In addition to the introductory course and one American Studies seminar, every Minor is required to take three additional courses on American history, culture, or politics. As with our Majors, these courses can be drawn from a wide range of departments. All courses must be approved by the student's American Studies advisor. A representative list includes:

AFAS UN1001, Introduction to African American Studies  
 CSER UN3940, Comparative Study of Constitutional Challenges  
 ENGL UN2826, American Modernism  
 ENGL BC3180, American Literature, 1800-1870  
 ENGL BC3183, American Literature Since 1945  
 ENGL UN3241, African American Literature: The Essay  
 ENGL UN3351, The Family in Film and Memoir  
 ENGL UN3832, New York Intellectuals  
 HIST UN1488, Indigenous History of North America  
 HIST UN1512, The Battle for North America  
 HIST UN2432, U.S. Era of Civil War and Reconstruction  
 HIST UN2523, Health Inequality: Modern U.S.  
 HIST UN2533, U.S. Lesbian and Gay History  
 HIST UN2535, History of the City of New York

HIST UN2540, History of the South  
 HIST UN2565, American History at the Movies  
 HIST UN2587, Sports and Society in the Americas  
 HIST UN2679, The Atlantic Slave Trade  
 HIST UN3501, Indians and Empires in North America  
 HIST GU4518, Columbia University and Slavery  
 HIST GU4933, American Radicalism in the Archives  
 POLS UN1201, Introduction to American Politics  
 POLS UN3100, Justice  
 POLS UN3213, American Urban Politics  
 POLS UN3222, The American Congress  
 POLS UN3255, Race and the U.S. Carceral System  
 POLS UN3290, Voting and American Politics  
 RELI UN1612, Religion and the History of Hip Hop  
 RELI GU4217, American Religions in Extremis  
 SOCI UN3265, The Sociology of Work and Gender

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in American Studies

A minimum of 7 courses is required to complete the concentration. Please consult with the department if there are any questions.

#### Two American Studies Core courses.

The following are ordinarily required:

AMST UN1010	INTRO TO AMERICAN STUDIES
HIST UN2478	US INTELLECTUAL HIST 1865-PRES
or AMST UN3930	Topics in American Studies

Please note, the AMST UN3930 section MUST be Freedom and Citizenship in the U.S. to count towards the core course requirement

#### Additional Courses

Select five additional courses drawn from at least two departments, one of which must be in History, and one of which must deal with the period before 1900.

### AMST UN3920 SENIOR PROJECT COLLOQUIUM. 1.00 point.

Required for American studies students who intend to do a senior research project

This course is for American studies majors planning to complete senior projects in the spring. The course is designed to help students clarify their research agenda, sharpen their questions, and locate their primary and secondary sources. Through class discussions and a workshop peer review process, each member of the course will enter spring semester with a completed bibliography that will provide an excellent foundation for the work of actually writing the senior essay. The colloquium will meet every other week and is required for

everyone planning to do a senior research project. Application due June 15. See American Studies website

#### Fall 2024: AMST UN3920

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AMST 3920	001/12725	W 4:10pm - 6:00pm 317 Hamilton Hall	Hilary-Anne Hallett	1.00	11/15

#### AMST UN3930 Topics in American Studies. 4 points.

Please refer to the Center for American Studies website for course descriptions for each section.  
[americanstudies.columbia.edu](http://americanstudies.columbia.edu)

#### Fall 2024: AMST UN3930

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AMST 3930	001/14527	T 10:10am - 12:00pm 317 Hamilton Hall	James Stephen Shapiro	4	9/18
AMST 3930	002/14528	M 6:10pm - 8:00pm 317 Hamilton Hall	Benjamin Rosenberg	4	15/18

#### AMST UN3937 JOURNALISM AND DEMOCRACY: THE 2024 ELECTION. 4.00 points.

The 2024 presidential election poses a dramatic test of both our political system and the media that covers it. The campaign offers us an opportunity to examine, in real time, the critical role the press plays in our democracy and how it has been disrupted in an era dominated by social media and hyper-partisanship. We'll look back at some iconic pieces of political reporting and compare them to the landscape journalists face today. How are groups that were underrepresented (or misrepresented) in legacy media changing the discourse? Is objectivity obsolete? And what happens to the decisions voters make when disinformation is rampant, and the fact base is under assault? Join waitlist and attend first class for instructor's permission

#### Fall 2024: AMST UN3937

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AMST 3937	001/12723	W 2:10pm - 4:00pm 317 Hamilton Hall	Caroline Miller	4.00	17/18

#### AMST UN3931 Topics in American Studies. 4 points.

Please refer to the Center for American Studies for section descriptions

#### Fall 2024: AMST UN3931

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AMST 3931	001/12727	T 12:10pm - 2:00pm 317 Hamilton Hall	Jeremy Dauber	4	9/18

AMST 3931	005/17213	Th 4:10pm - 6:00pm 317 Hamilton Hall	Cathleen Price	4	10/18

## ANCIENT STUDIES

### THE DEPARTMENT OF CLASSICS:

Department website: <https://classics.columbia.edu/>

Office location: 617 Hamilton Hall

Office contact: 212-854-3902, [classics@columbia.edu](mailto:classics@columbia.edu)  
([videogameugrad@columbia.edu](mailto:videogameugrad@columbia.edu))

Director of Undergraduate Studies: Professor Nikolas Kakkoufa, [Nk2776@columbia.edu](mailto:Nk2776@columbia.edu)

Undergraduate Administrator: Colleen Swift, [cks2142@columbia.edu](mailto:cks2142@columbia.edu)

### THE STUDY OF ANCIENT STUDIES

The Interdisciplinary Program in Ancient Studies is administered by Classics

Classics is the study of the civilizations of ancient Greece and Rome (c. 900 BCE to 500 CE): their languages, literature, history, philosophy, art, and ways of life. The purpose of this program is to enable the student to explore the cultural context of the ancient Mediterranean as a whole while concentrating on one specific Mediterranean or Mesopotamian culture. Central to the concept of the program is its interdisciplinary approach, in which the student brings the perspectives and methodologies of at least three different disciplines to bear on his or her area of specialization.

Faculty participating in the program are scholars specializing in all aspects of ancient culture and civilization from the Departments of Anthropology; Art History and Archaeology; Classics; History; Middle Eastern, South Asian, and African

Studies; Philosophy; and Religion, ensuring that a wide variety of approaches are available.

## STUDENT ADVISING

### Consulting Advisers

Students should consult with the DUS who will direct them to the appropriate faculty advisor for their research interest area.

Director of Undergraduate Studies: Professor Nikolas Kakkoufa, [Nk2776@columbia.edu](mailto:Nk2776@columbia.edu)

### Enrolling in Classes

Students starting in the Major should start with the language placement exam to determine the appropriate language level for their prior knowledge. Exams are administered in late August by the Department of Classics. Students who cannot take the exam should contact the Director of Undergraduate Studies to make arrangements.

For those students who are starting the major without prior knowledge of the ancient languages please start at the beginning of the sequence (1000 level) in one of the ancient languages and speak to the Director of Undergraduate Studies to determine your best course of study.

### Preparing for Graduate Study

<https://classics.columbia.edu/preparation-for-graduate-study>

Students who are considering graduate work in Classics should be aware that because our Classics major is not a pre-professional degree, simply fulfilling the normal major requirements will not guarantee admission to a graduate program. By far the most important element in preparation for graduate school admission is a good command of both the Latin and the Greek languages, so students who wish to go to graduate school should attempt to reach the advanced level in both languages. The two courses at the intermediate level required in the secondary language for the Classics major are not enough for admission to most graduate programs, and the language requirements of both Classical Studies and Ancient Studies are well below the level normally necessary for graduate school admission. The importance of languages holds not only for students wishing to study ancient literature, but also for those interested primarily in other aspects of the ancient world (history, art, philosophy, religion, etc.), because it is not possible to pursue advanced research successfully unless one can make use of the primary sources. Students who have not done the requisite amount of language work and wish to go to graduate school can enroll in a post-baccalaureate program (either at Columbia or at another institution) to do one or two years of intensive language work before starting graduate school.

While knowledge of Latin and Greek is the most important factor in graduate school admission, it is by no means the only one. Students considering graduate work are also advised to

write a senior thesis (and not to substitute the thesis for any of the other advanced courses). If possible, it is a good idea to use some of your summers (especially the one between junior and senior year) on a relevant activity such as archaeological fieldwork experience, travel and/or study in Greece or Italy, learning French or German, improving your Latin or Greek, or working as a research assistant for a Classicist. It is also useful to get high scores on the GRE test, and these are best achieved by obtaining and studying information on the types of questions asked on the test and taking practice tests.

The department does offer a combined BA/MA program in Classics allowing them to complete the MA in Classics within one year of receiving their BA.

The array of graduate degrees on offer in the US and abroad can be bewildering—including master's and doctoral programs in Classics and a variety of related subjects—and the character and quality of graduate programs differs widely. It is therefore important to gather information and seek advice.

If you are considering graduate work, you should discuss your plans with the Director of Undergraduate Studies and other faculty members no later than the beginning of the fall semester before you hope to apply (i.e., typically the fall of your senior year).

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The department grants 3 credits for a score of 5 on the Latin AP exam, which also satisfies the foreign language requirement, upon successful completion (with a grade of B or higher) of a Latin class at the 3000-level or higher.

### Barnard College Courses

The Department of Classics at Columbia and the Department of Classics and Ancient Studies at Barnard College work closely together. Students may take courses at Barnard to count towards the Major or Minor. Students at Barnard should speak to their advisor at Barnard regarding Columbia courses as the departments are distinct and the requirements for their respective majors are different.

### Transfer Courses

Students transferring to Columbia should contact the Director of Undergraduate Studies to discuss equivalencies and what level of courses they wish to take.

### Study Abroad Courses

Seeing the ancient sites and monuments is an important part of the study of antiquity, and there are a number of ways to acquire some familiarity with the physical remains of Greek and Roman civilization. The Intercollegiate Center for Classical Studies in Rome offers in each term an excellent one-semester program, usually taken in the junior year, and the College

Year in Athens offers a wide variety of courses ranging from language and literature to history, art, and archaeology. During the summer there are more options, including the outstanding Summer Sessions of the American School for Classical Studies in Athens. A listing of fieldwork opportunities is published annually by the Archaeological Institute of America.

## Summer Courses

Courses are offered over the summer by the department providing opportunities to study the ancient languages over the summer.

Courses are also offered in Classical Civilization including Worlds of Alexander and Classical Mythology.

## CORE CURRICULUM CONNECTIONS

Faulty and Graduate Instructors from the Department of Classics Teach in the Core, usually Literature Humanities and Contemporary Civilization.

Some Classics courses can be used to count toward the Global Core requirement as noted in the course information.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

Students should consult with the Director of Undergraduate Studies, Professor Nikolas Kakkoufa at [nk2776@columbia.edu](mailto:nk2776@columbia.edu). Students can register for Directed readings with a faculty member

### Senior Thesis Coursework and Requirements

Students are required to take the Major Seminar UN3996 as part of the program. The course focuses on the preparation for the Senior Thesis and methods in the field of Classics. Currently students have the option to participate in a trip abroad to sites in the ancient world.

### Undergraduate Research Outside of Courses

Students are encouraged to participate in the Ancient Play put on yearly by the Barnard Columbia Ancient Drama Group.

Columbia runs its own archeological summer program at Hadrian's Villa in Tivoli. Contact Professor Francesco de Angelis.

Students wanting Columbia or Barnard credit for work done abroad should discuss their plans with the director of undergraduate studies at an early date to enable them to incorporate experience abroad most practically into their programs here.

The Department is able to support a limited number of students to study ancient languages over the summer through the

Comager Fund and the Undergraduate Latin fund. Interested students should contact the Director of Undergraduate Studies.

Undergraduate students can apply to the SNFPHI Summer Research Internship in Public Humanities and Hellenic Studies. This six week internship invites undergraduate students to explore public humanities, gain hands-on experience with its objectives, methods, and outcomes, and pursue a group project that connects research on Greece with a broad public audience. The internship is structured around: (1) a seminar in Hellenic Studies in which students explore aspects of modern Greek history and culture relevant to their internship research, (2) a workshop in which students are trained in the methods and tools of public-facing research, and (3) a group project in which students work closely with Columbia faculty and public humanities partners in Greece

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Departmental Honors are awarded for overall outstanding performance in the Classics.

### Academic Prizes

The department offers two prize competitions yearly (Earle and Romaine) in sight translation of Greek and Latin. These prizes are awarded on the basis of examinations given each spring.

Two prizes are given to graduating Columbia College seniors:

- The Caverly Prize is awarded annually for outstanding performance by a graduating Columbia College major.
- The Stadler Prize is awarded annually to a graduating senior of Columbia College who is judged by the faculty to have demonstrated academic excellence through course work and the writing of a senior essay on some aspect of the history or culture of the classical world.

## OTHER IMPORTANT INFORMATION

Students interested in majoring in Ancient Studies should reach out to the Department early in their academic career. Students should contact the Director of Undergraduate Studies with any questions.

Students participating in dual degree programs should contact the Director of Undergraduate Studies.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

The Classics department also participates in the interdepartmental Ancient Studies major, which is designed for

students whose interests encompass the ancient Mediterranean as a whole rather than the Greco-Roman world in particular.

## Course Numbering Structure

In both Greek and Latin prerequisites are the course with the number before in the sequence. Students can test out of the prerequisite with a placement test or through the Director of Undergraduate Studies.

In both languages the sequence is as follows:

1101: Elementary I

1102: Elementary II

1121: Intensive Elementary

2101: Intermediate I

2102: Intermediate II

For 2101 Either 1102 or 1121 is required as a prerequisite or a placement test.

## Guidance for First-Year Students

The director of undergraduate studies is responsible for overseeing the path of study followed by each student in classics or classical studies. Through close interaction with the director of undergraduate studies, as well as with other faculty members where appropriate, each major is strongly encouraged to debate the strengths and weaknesses of his or her own trajectory of study even as the requirements for the major are being completed.

Students should contact the director of undergraduate studies with any questions about the classics majors and course offerings. The director of undergraduate studies can provide students with a worksheet to help in planning their progress toward major requirements.

## Guidance for Transfer Students

Students should contact the director of undergraduate studies with any questions about the classics majors and course offerings. The director of undergraduate studies can provide students with a worksheet to help in planning their progress toward major requirements.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Ancient Studies

The major in ancient studies requires 12 courses (a minimum of 36 points), two of which must be:

#### Major Seminar

ANCS UN3996	THE MAJOR SEMINAR
-------------	-------------------

#### Senior Thesis

ANCS UN3998	DIRCTD RSRCH-ANCIENT STUDIES I
-------------	--------------------------------

The selected program of study for the major must collectively satisfy the following criteria:

#### Language Study \*

Select two courses of an ancient language at or above the intermediate level, i.e., 1200-level or above.

#### Fundamental Breadth \*\*

Select two introductory courses on some aspect of the ancient Mediterranean. Some examples include:

HIST UN1010	ANCIENT GREEK HIST, 800-146 BC
-------------	--------------------------------

AHIS UN3248	Greek Art and Architecture
-------------	----------------------------

AHIS UN3250	Roman Art and Architecture
-------------	----------------------------

PHIL UN2101	HISTORY OF PHILOSOPHY I
-------------	-------------------------

CLLT UN3132	Classical Myth
-------------	----------------

#### Advanced Study

Select two advanced courses on the ancient Mediterranean, typically at the 3000- or 4000-level.

#### Cultural Concentration

Select four courses on the culture of the language chosen, including one history course.

\* The minimum language requirement must be completed by the end of the first semester of the student's senior year, so that the student is equipped to use sources in the original language in their thesis. Students are strongly urged to begin study of an ancient language as soon as possible and to complete more than the minimum requirements, since the best way to gain an understanding of a culture is through the actual words of its people. Those considering graduate work on the ancient world should also be aware that most graduate schools require more than two years of undergraduate language training for admission.

The language offered in fulfillment of this requirement should generally match the student's area of cultural concentration; special arrangements are available with other universities for students whose cultural concentration require languages not normally taught at Columbia.

Students entering with expertise in their chosen languages are placed in advanced courses as appropriate but are still required to complete at least two semesters of language courses at Columbia; exceptions to this policy may be made in the case of languages not normally taught at Columbia. Language courses at the 1100-level may not be counted toward the major. Language courses, including those at the 1100-level, must be taken for a letter grade.

\*\* Relevant introductory courses are offered by the Department of Classics or from offerings in the Programs or Departments of Ancient Studies, Art History and Archaeology, History, Philosophy, or Religion. Students should confirm a course's relevance with the director of undergraduate studies as soon as possible.

## THE STUDY OF ANTHROPOLOGY

Anthropology at Columbia is the oldest department of anthropology in the United States. Founded by Franz Boas in 1896 as a site of academic inquiry inspired by the uniqueness of cultures and their histories, the department fosters expansiveness of thought and independence of intellectual pursuit.

Cross-cultural interpretation, global socio-political considerations, a markedly interdisciplinary approach, and a willingness to think otherwise have formed the spirit of anthropology at Columbia. Boas himself wrote widely on pre-modern cultures and modern assumptions, on language, race, art, dance, religion, politics, and much else, as did his remarkable graduate students including, Ruth Benedict, Zora Neal Hurston, Edward Sapir, Manuel Gamio, Alfred Kroeber, Ella Deloria and Margaret Mead, among others.

In these current times of increasing global awareness, a spirit of mindful interconnectedness guides the department. Professors of anthropology at Columbia today write widely on colonialism and postcolonialism; on matters of gender, theories of history, knowledge, and power; on language, law, magic, mass-mediated cultures, modernity, and flows of capital and desire; on nationalism, ethnic imaginations, and political contestations; on material cultures and environmental conditions; on ritual, performance, and the arts; and on semiotics, linguistics, symbolism, and questions of representation. Additionally, they write across worlds of similarities and differences concerning the Middle East, China, Africa, the Caribbean, Japan, Latin America, South Asia, Europe, Southeast Asia, North America, and other increasingly transnational and technologically virtual conditions of being.

The Department of Anthropology traditionally offered courses and majors in three main areas: sociocultural anthropology, archaeology, and biological/physical anthropology. While the sociocultural anthropology program now comprises the largest part of the department and accounts for the majority of faculty and course offerings, archaeology is also a vibrant program within anthropology whose interests overlap significantly with those of sociocultural anthropology. Biological/physical anthropology has shifted its program to the Department of Ecology, Evolution, and Environmental Biology. The Anthropology Department enthusiastically encourages cross-disciplinary dialogue across disciplines as well as participation in study abroad programs.

### Sociocultural Anthropology

At the heart of sociocultural anthropology is an exploration of the possibilities of difference and the craft of writing. Sociocultural anthropology at Columbia has emerged as a compelling undergraduate liberal arts major. Recently, the number of majors in sociocultural anthropology has more than tripled.

Students come to sociocultural anthropology with a wide variety of interests, often pursuing overlapping interests in, for example, performance, religion, writing, law, ethnicity, mass-media, teaching, language, literature, history, human rights, art, linguistics, environment, medicine, film, and many other fields, including geographical areas of interest and engagement. Such interests can be brought together into provocative and productive conversation with a major or concentration in sociocultural anthropology. The requirements for a major in sociocultural anthropology reflect this intellectual expansiveness and interdisciplinary spirit.

### Archaeology

Archaeologists study the ways in which human relations are mediated through material conditions, both past and present. Particular emphases in the program include the development of ancient states and empires, especially in the indigenous Americas; the impact of colonial encounters on communities in the American Southwest, the Levant and Africa; and human-animal relations in prehistory, religion and ritual, and the archaeology of the dead.

Themes in our teaching include the political, economic, social, and ideological foundations of complex societies; and archaeological theory and its relationship to broader debates in social theory, technology studies, and philosophy. Faculty members also teach and research on questions of museum representations, archaeological knowledge practices, and the socio-politics of archaeology. The program includes the possibility of student internships in New York City museums and archaeological fieldwork in the Americas and elsewhere.

In addition to the Major/Minor in Archaeology within the Anthropology Department, students can choose the interdisciplinary Major/Minor in Archaeology. All students with interests in archaeology are invited to sign up to the [undergraduate archaeology list serv](#) and are welcome to events organized by the Center for Archaeology.

## STUDENT ADVISING

Majors and concentrators should consult the director of undergraduate studies when entering the department and devising programs of study. Students may also seek academic advice from any anthropology faculty member, as many faculty members hold degrees in several fields or positions in other departments and programs at Columbia. All faculty in the department are committed to an expansiveness of thought and an independence of intellectual pursuit and advise accordingly.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### UNDERGRADUATE RESEARCH AND SENIOR THESIS

### DEPARTMENT HONORS AND PRIZES

Anthropology majors with a minimum GPA of 3.6 in the major who wish to write an honors thesis for departmental honors consideration may enroll in [ANTH UN3999 SENIOR THESIS SEM IN ANTHROPOL](#). Students should have a preliminary concept for their thesis prior to course enrollment. Normally no more than 10% of graduating majors receive departmental honors in a given academic year.

## PROFESSORS

Nadia Abu El-Haj (Barnard)  
 Lila Abu-Lughod  
 Partha Chatterjee, Professor Emeritus of Anthropology  
 Myron L. Cohen, Professor Emeritus of Anthropology  
 Zoe Crossland  
 Terence D'Altroy  
 Ralph L. Holloway, Professor Emeritus of Anthropology

## ADJUNCT RESEARCH SCHOLAR GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Grading

No course with a grade of D or lower can count toward the major or concentration. Only the first course that is to count toward the major or concentration can be taken Pass/D/Fail.

### Courses

Courses offered in other departments count toward the major and concentration only when taught by a member of the Department of Anthropology. Courses from other departments not taught by anthropology faculty must have the approval of the director of undergraduate studies in order to count toward the major or concentration.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

No one course is required for all Programs. ANTH 1002 is required for the Major and the Entry-Level Minor, but not for the Advanced Minor.

### Major in Anthropology

*The requirements for this program were modified on January 29, 2016.*

The program of study should be planned as early as possible in consultation with the director of undergraduate studies.

The anthropology major requires 30 points in the Department of Anthropology.

### Sociocultural Focus

Students interested in studying sociocultural anthropology are required to take the following courses:

ANTH UN1002	THE INTERPRETATION OF CULTURE
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ANTH UN2005	THE ETHNOGRAPHIC IMAGINATION

### Archaeology Focus

Students interested in studying archaeological anthropology are required to take the following courses:

ANTH UN1002	THE INTERPRETATION OF CULTURE
ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
ANTH UN2028	THINK LIKE AN ARCHAEOLOGIST

NOTE: Students wishing to pursue an interdisciplinary major in archaeology should see the *Archaeology* section of this Bulletin.

### Biological/Physical Focus

Students interested in studying this field should refer to the major in evolutionary biology of the human species in the Department of Ecology, Evolution, and Environmental Biology.

### Minor in Anthropology

The minor in Anthropology allows students to choose between two paths:

ANTH UN1002 THE INTERPRETATION OF CULTURE **OR**  
Two 2000-level courses

In addition: any four (4) courses (or 3 courses, in the case of 2x2000 level) in the Anthropology department, in ethnomusicology, or taught by an Anthropology instructor Columbia or Barnard, regardless of department.

### OR

ANTH UN2004 INTRO TO SOC # CULTURAL THEORY **and**

ANTH UN2005 THE ETHNOGRAPHIC IMAGINATION

In addition: any three (3) courses in the Anthropology department, in ethnomusicology, or taught by an Anthropology instructor at Columbia or Barnard, regardless of department.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Anthropology

The anthropology concentration requires 20 points in the Department of Anthropology.

### Sociocultural Focus

Students interested in studying sociocultural anthropology are required to take the following course:

ANTH UN1002	THE INTERPRETATION OF CULTURE
-------------	-------------------------------

### Archaeology Focus

Students interested in studying archaeological anthropology are required to take the following course:

ANTH UN2028

THINK LIKE AN  
ARCHAEOLOGIST**Biological/Physical Focus**

Students interested in pursuing study in this field should refer to the concentration in evolutionary biology of the human species in the Department of Ecology, Evolution, and Environmental Biology.

**FALL 2024****SOCIOCULTURAL ANTHROPOLOGY****ANTH UN1002 THE INTERPRETATION OF CULTURE.****3.00 points.**

The anthropological approach to the study of culture and human society. Case studies from ethnography are used in exploring the universality of cultural categories (social organization, economy, law, belief system, art, etc.) and the range of variation among human societies

**Fall 2024: ANTH UN1002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ANTH UN1007 THE ORIGINS OF HUMAN SOCIETY.****3.00 points.**

Mandatory recitation sections will be announced first week of classes.

An archaeological perspective on the evolution of human social life from the first bipedal step of our ape ancestors to the establishment of large sedentary villages. While traversing six million years and six continents, our explorations will lead us to consider such major issues as the development of human sexuality, the origin of language, the birth of "art" and religion, the domestication of plants and animals, and the foundations of social inequality. Designed for anyone who happens to be human

**Fall 2024: ANTH UN1007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 1007	001/00005	T Th 11:40am - 12:55pm 304 Barnard Hall	Camilla Sturm	3.00	71/90

**ANTH UN2004 INTRO TO SOC # CULTURAL THEORY.****3.00 points.**

This course presents students with crucial theories of society, paying particular attention at the outset to classic social theory of the early 20th century. It traces a trajectory of writings essential for an understanding of the social: from Saussure,

Durkheim, Mauss, Weber, and Marx, on to the structuralist ethnographic elaboration of Claude Levi-Strauss and the historiographic reflections on modernity of Michel Foucault. We revisit periodically, reflections by Franz Boas, founder of anthropology in the United States (and of Anthropology at Columbia), for a sense of origins, an early anthropological critique of racism and cultural chauvinism, and a prescient denunciation of fascism. We turn as well, also with ever-renewed interest in these times, to the expansive critical thought of W. E. B. Du Bois. We conclude with Kathleen Stewart's *A Space on the Side of the Road*--an ethnography of late-twentieth-century Appalachia and the haunted remains of coal-mining country--with its depictions of an uncanny otherness within dominant American narratives

**Fall 2024: ANTH UN2004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 2004	001/10726	M W 10:10am - 11:25am 633 Seeley W. Mudd Building	John Pemberton	3.00	34/60

**ANTH UN2017 Mafias and Other Dangerous Affiliations.****3.00 points.**

Regimes of various shapes and sizes tend to criminalize associations, organizations, and social relations that these ruling powers see as anathema to the social order on which their power depends: witches, officers of toppled political orders, alleged conspirators (rebels, traitors, terrorists, and dissidents), gangsters and mafiosi, or corrupt officers and magnates. Our main goal will be to understand how and under what conditions do those with the power to do so define, investigate, criminalize and prosecute those kinds of social relations that are cast as enemies of public order. We will also pay close attention to questions of knowledge – legal, investigative, political, journalistic, and public – how doubt, certainty, suspicion and surprise shape the struggle over the relationship between the state and society. The main part of the course is organized around six criminal investigations on mafia-related affairs that took place from the 1950s to the present (two are undergoing appeal these days) in western Sicily. After the introductory section, we will spend two weeks (four meetings) on every one of these cases. We will follow attempts to understand the Mafia and similarly criminalized organizations, and procure evidence about it. We will then expand our inquiry from Sicily to cases from all over the world, to examine questions about social relations, law, the uses of culture, and political imagination.

\*Although this is a social anthropology course, no previous knowledge of anthropology is required or presumed. Classroom lectures will provide necessary disciplinary background

**Fall 2024: ANTH UN2017**

**ANTH UN2028 THINK LIKE AN ARCHAEOLOGIST.****4.00 points.**

\$25 mandatory lab fee.

This course provides a comprehensive introduction to methods and theory in archaeology – by exploring how archaeologists work to create narratives about the past (and the present) on the basis on the material remains of the past. The course begins with a consideration of how archaeologists deal with the remains of the past in the present: What are archaeological sites and how do we ‘discover’ them? How do archaeologists ‘read’ or analyze sites and artifacts? From there, we will turn to the question of how archaeologists interpret these materials traces, in order to create narratives about life in the past. After a review of the historical development of theoretical approaches in archaeological interpretation, the course will consider contemporary approaches to interpreting the past

**Fall 2024: ANTH UN2028**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 2028	001/10347	M W 10:10am - 11:25am 310 Fayerweather	Hannah Chazin	4.00	43/90

**ANTH UN3007 ARCHAEOLOGY BEFORE THE BIBLE. 3.00 points.**

Please note that this is not a class on “biblical archaeology”. It is a course about the politics of archaeology in the context of Israel/Palestine, and the wider southwest Asia region. This course provides a critical overview of prehistoric archaeology in southwest Asia (or the Levant - the geographical area from Lebanon in the north to the Sinai in the south, and from the middle Euphrates in Syria to southern Jordan). It has been designed to appeal to anthropologists, historians, and students interested in the Ancient Mediterranean and Middle Eastern Studies. The course is divided into two parts. First, a social and political history of archaeology, emphasizing how the nature of current theoretical and practical knowledge has been shaped and defined by previous research traditions and, second, how the current political situation in the region impinges upon archaeological practice. Themes include: the dominance of “biblical archaeology” and the implications for Palestinian archaeology, Islamic archaeology, the impact of European contact from the Crusades onwards, and the development of prehistory

**Fall 2024: ANTH UN3007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 3007	001/10397	T Th 11:40am - 12:55pm 414 Pupin Laboratories	Brian Boyd	3.00	13/35

**ANTH UN3040 ANTHROPOLOGICAL THEORY. 4.00 points.**

Open to majors; all others with instructor's permission.

Prerequisites: an introductory course in anthropology.

Comprehensive and in-depth engagement with foundational and contemporary theoretical concepts and texts in Anthropology. Required of all Barnard students majoring in Anthropology (including specialized tracks). Permission of instructor required for non-majors. Not open to First Year students. Prerequisite: an introductory (1000 level) course in Anthropology

**Fall 2024: ANTH UN3040**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 3040	001/00098	M W 10:10am - 11:25am 202 Milbank Hall	Alexander Maier, Brian Larkin	4.00	29/35

**ANTH UN3091 Disability. 4.00 points.**

This course centers disability in its many manifestations and meanings – as an embodied, social, and cultural experience, as an organizing discourse in local and global contexts, as an analytic framework, and as a position from which to approach, think about, and engage in the world. Together, we will seek to understand disability in diverse settings and contexts through ethnographic texts, autobiography, documentary film, and essays, drawing primarily from works in anthropology but also more broadly from the interdisciplinary traditions known as (Critical) Disability Studies. Throughout the semester, we will move between considering disability in more and less specific and categorical terms. We will ask what the stakes are – intellectually, socially, politically - for different ways of doing, thinking, and representing disability. What becomes apparent when we consider, say, the experiences of deaf young adults in India working together to learn Indian Sign Language, or physically disabled adults in the United States whose disabilities must be situated within histories of racialized poverty and urban neglect? What happens – what are the resonances and the tensions – when we put these settings into conversation? Through our engagements with materials analyzing these and many other instances, we will think together about what it means to study and think with disability from different disciplinary perspectives, different methods, and different media

**Fall 2024: ANTH UN3091**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ANTH UN3356 EARTH WORKS: Anthropology, Art, Extraction. 3.00 points.**

This undergraduate seminar is offered to students interested in the anthropological analysis of extractive economies and the social and political forms associated with them, as well as the arts through which they have been made the object of both investment and resistance. The course this semester will be focused on mining, and is organized along three axes: 1) mineral object; 2) socioeconomic form; and 3) aesthetics, with the latter including the arts of artisanal extraction, and literary, visual and media artistic practice

**Fall 2024: ANTH UN3356**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 3356	001/10302	Th 4:10pm - 6:00pm 963 Ext Schermerhorn Hall	Rosalind Morris	3.00	8/25

**ANTH UN3663 The Ancient Table: Archaeology of Cooking and Cuisine. 4.00 points.**

Prerequisites: None Humans don't just eat to live. The ways we prepare, eat, and share our food is a complex reflection of our histories, environments, and ideologies. Whether we prefer coffee or tea, cornbread or challah, chicken breast or chicken feet, our tastes are expressive of social ties and social boundaries, and are linked to ideas of family and of foreignness. How did eating become such a profoundly cultural experience? This seminar takes an archaeological approach to two broad issues central to eating: First, what drives human food choices both today and in the past? Second, how have social forces shaped practices of food acquisition, preparation, and consumption (and how, in turn, has food shaped society)? We will explore these questions from various evolutionary, physiological, and cultural viewpoints, highlighted by information from the best archaeological and historic case studies. Topics that will be covered include the nature of the first cooking, beer-brewing and feasting, writing of the early recipes, gender roles and 'domestic' life, and how a national cuisine takes shape. Through the course of the semester we will explore food practices from Pleistocene Spain to historic Monticello, with particular emphasis on the earliest cuisines of China, Mesoamerica, and the Mediterranean

**Fall 2024: ANTH UN3663**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 3663	001/00100	W 12:10pm - 2:00pm 214 Milbank Hall	Camilla Sturm	4.00	15/15

**ANTH UN3723 American Material Culture. 4 points. Not offered during 2023-2024 academic year.**

This seminar provides an intensive introduction to material culture analysis and its potential contributions to the study of American history. As such, our focus is methodological. In seminar discussions, we will consider both (1) key texts that give intellectual shape to the central questions in modern material culture studies and (2) published case studies demonstrating how to engage in serious object-based research. Seminar discussions will be supplemented by visits to three NYC museums (the American Museum of Natural History, the 9/11 Museum, and the Tenement Museum) as well as three laboratory practicums. Designed for both Archaeology/Anthropology and American Studies majors, as well as other students interested in using the methods of material culture analysis in original research projects. (Depending on the student's choice of a research paper topic, this seminar also fulfills either the pre-1800, the 19<sup>th</sup> century, or the post-1900 Foundations requirement of the American Studies major.) No prerequisites.

**Fall 2024: ANTH UN3723**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ANTH UN3811 TOXIC. 4.00 points.**

It is no secret by now that we live in a toxic sea. Every day, in every place in this world, we are exposed to an unknown number of contaminants, including those in the places that we live, the air that we breathe, the foods that we eat, the water that we drink, the consumer products that we use, and in the social worlds that we navigate. While we are all exposed, the effects of these exposures are distributed in radically unequal patterns, and histories of racialization, coloniality, and gendered inequality are critical determinants of the risks to wellness that these toxic entanglements entail. Scientists use the term body burden to describe the accumulated, enduring amounts of harmful substances present in human bodies. In this course, we explore the global conditions that give rise to local body burdens, plumbing the history of toxicity as a

category, the politics of toxic exposures, and the experience of toxic embodiment. Foregrounding uneven exposures and disproportionate effects, we ask how scientists and humanists, poets and political activists, have understood toxicity as a material and social phenomenon. We will turn our collective attention to the analysis of ethnographies, memoirs, maps, film, and photography, and students will also be charged with creating visual and narrative projects for representing body burden of their own

**Fall 2024: ANTH UN3811**

**ANTH UN3888 ECOCRITICISM FOR THE END TIMES. 4.00 points.**

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. This seminar aims to show what an anthropologically informed, ecocritical cultural studies can offer in this moment of intensifying ecological calamity. The course will not only engage significant works in anthropology, ecocriticism, philosophy, literature, politics, and aesthetics to think about the environment, it will also bring these works into engaged reflection on living in the end times (borrowing cultural critic Slavoj Zizeks phrase). The seminar will thus locate critical perspectives on the environment within the contemporary worldwide ecological crisis, emphasizing the ethnographic realities of global warming, debates on nuclear power and energy, and the place of nature. Drawing on the professors long experience in Japan and current research on the aftermath of the Fukushima Daiichi nuclear power plant disaster, the seminar will also take care to unpack the notion of end times, with its apocalyptic implications, through close considerations of works that take on the question of ecocatastrophe in our times. North American and European perspectives, as well as international ones (particularly ones drawn from East Asia), will give the course a global reach

**CSER UN3935 Historical Anthropology of the US-Mexico Border. 4 points.**

Beginning in the 1980s, border crossing became an academic rage in the humanities and the social sciences. This was a consequence of globalization, an historical process that reconfigured the boundaries between economy, society, and culture; and it was also a primary theme of post-modernist aesthetics, which celebrated playful borrowing of multiple and diverse historical references. Within that frame, interest in the US-Mexican border shifted dramatically. Since that border is the longest and most intensively crossed boundary between a rich and a poor country, it became a paradigmatic point of reference. Places like Tijuana or El Paso, with their rather seedy reputation, had until then been of interest principally to local residents, but they now became exemplars of post-modern “hybridity,” and were meant to inspire the kind of transnational scholarship that is required in today’s world. Indeed, the border itself became a metaphor, a movable imaginary boundary that marks ethnic and racial distinction in American and Mexican cities. This course is an introduction to the historical formation of the US-Mexican border.

**ANTH UN3976 ANTHROPOLOGY OF SCIENCE. 4.00 points.**

**Not offered during 2023-2024 academic year.**

This course examines specific debates in the history and philosophy of science, and in science and technology studies (STS), with a view towards exploring the relationships among science, technology and society. The first half of the course engages methodological questions and theoretical debates concerning the nature of epistemology, and the significance of social interests, material agency, laboratory and social practices, and “culture(s)” in the making of scientific knowledge. The second half delves more specifically into the ways in which sciences and technologies are both embedded in and shape contemporary social and political practices and imaginaries

**ANTH UN3999 SENIOR THESIS SEM IN ANTHROPOL. 4.00 points.**

Enrollment limited to 15. Open to CC and GS majors in Anthropology only.

Prerequisites: The instructor's permission. Students must have declared a major in Anthropology prior to registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students must communicate/meet with thesis instructor in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term.

Prerequisites: The instructors permission. Students must have declared a major in Anthropology prior to registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students must communicate/meet with thesis instructor in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. This two-term course is a combination of a seminar and a workshop that will help you conduct research, write, and present an original senior thesis in anthropology. Students who write theses are eligible to be considered for departmental honors. The first term of this course introduces a variety of approaches used to produce anthropological knowledge and writing; encourages students to think critically about the approaches they take to researching and writing by studying model texts with an eye to the ethics, constraints, and potentials of anthropological research and writing; and gives students practice in the seminar and workshop formats that are key to collegial exchange and refinement of ideas. During the first term, students complete a few short exercises that will culminate in a substantial draft of one discrete section of their senior project (18-20 pages) plus a detailed outline of the expected work that remains to be done (5 pages). The spring sequence of the anthropology thesis seminar is a writing intensive continuation of the fall semester, in which students will have designed the research questions, prepared a full thesis proposal that will serve as a guide for the completion of the thesis and written a draft of one chapter. Only those students who expect to have completed the fall semester portion of the course are allowed to register for the spring; final enrollment is contingent upon successful completion of first semester requirements. In spring semester, weekly meetings will be devoted to the collaborative refinement of drafts, as well as working through issues of writing (evidence, voice, authority etc.). All enrolled students are required to present their project at a symposium in the late spring, and the final grade is based primarily on successful completion of the thesis/ capstone

project. Note: The senior thesis seminar is open to CC and GS majors in Anthropology only. It requires the instructor's permission for registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students should communicate with the thesis instructor and the director of undergraduate study in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. Enrollment limit is 15. Requirements: Students must have completed the requirements of the first semester of the sequence and seek instructor approval to enroll in the second

**ANHS GU4001 THE ANCIENT EMPIRES. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The principal goal of this course is to examine the nature and histories of a range of early empires in a comparative context. In the process, we will examine influential theories that have been proposed to account for the emergence and trajectories of those empires. Among the theories are the core-periphery, world-systems, territorial-hegemonic, tributary-capitalist, network, and IEMP approaches. Five regions of the world have been chosen, from the many that could provide candidates: Rome (the classic empire), New Kingdom Egypt, Qin China, Aztec Mesoamerica, and Inka South America. These empires have been chosen because they represent a cross-section of polities ranging from relatively simple and early expansionist societies to the grand empires of the Classical World, and the most powerful states of the indigenous Americas. There are no prerequisites for this course, although students who have no background in Anthropology, Archaeology, History, or Classics may find the course material somewhat more challenging than students with some knowledge of the study of early societies. There will be two lectures per week, given by the professor

**ANTH GU4196 Mexico's Disappeared Practicum. 4.00 points.**

This practicum is an exercise in engaged pedagogy. The academic work we do will be conducted for the benefit of the cause of Mexico's now over 110,000 disappeared persons. Students will be engaged in a sustained research effort to development a "context analysis" of disappearances in the state of Zacatecas (Mexico)-- an exercise in social study that focuses on the economic, political, social, and criminological context in which disappearances occur. Research is done in coordination with Mexico's National Commission for the Search of the Disappeared. Alongside the practical, real-world, objective, this Practicum is designed to perfect research skills in the social sciences **PREREQUISITE:** Spanish language comprehension is compulsory for 60# of those enrolled

**ARCHAEOLOGY****ANTH UN1007 THE ORIGINS OF HUMAN SOCIETY. 3.00 points.**

Mandatory recitation sections will be announced first week of classes.

An archaeological perspective on the evolution of human social life from the first bipedal step of our ape ancestors to the establishment of large sedentary villages. While traversing six million years and six continents, our explorations will lead us to consider such major issues as the development of human sexuality, the origin of language, the birth of "art" and religion, the domestication of plants and animals, and the foundations of social inequality. Designed for anyone who happens to be human

**ANTH UN2031 Corpse Life: Anthropological Histories of the Dead [Previously Archaeologies of Death and . 4 points. CC/GS/SEAS: Partial Fulfillment of Global Core Requirement**

The awareness of mortality seems to be a peculiarly human affliction, and its study has been a key theme of 20<sup>th</sup> century philosophy. This class will address the question of human finitude from outside of the western philosophical tradition. Anthropologists have shown that humans deal with the challenge of death in diverse ways, which nevertheless share some common themes. During the semester we'll look at case studies from across the world and over time and also explore the ethics and politics of disturbing the dead. The evidence of past human mortuary assemblages will provide some of

our key primary texts. We'll analyze famous burials such as those of Tutankhamun, the Lord of Sipan, and Emperor Qin's mausoleum, containing the celebrated terracotta warriors, but we'll also consider less well-known mortuary contexts. We will also critically examine the dead body as a privileged site for anthropological research, situating its study within the broader purview of anthropological theories of the body's production and constitution.

**ANTH UN3007 ARCHAEOLOGY BEFORE THE BIBLE. 3.00 points.**

Please note that this is not a class on "biblical archaeology". It is a course about the politics of archaeology in the context of Israel/Palestine, and the wider southwest Asia region. This course provides a critical overview of prehistoric archaeology in southwest Asia (or the Levant - the geographical area from Lebanon in the north to the Sinai in the south, and from the middle Euphrates in Syria to southern Jordan). It has been designed to appeal to anthropologists, historians, and students interested in the Ancient Mediterranean and Middle Eastern Studies. The course is divided into two parts. First, a social and political history of archaeology, emphasizing how the nature of current theoretical and practical knowledge has been shaped and defined by previous research traditions and, second, how the current political situation in the region impinges upon archaeological practice. Themes include: the dominance of "biblical archaeology" and the implications for Palestinian archaeology, Islamic archaeology, the impact of European contact from the Crusades onwards, and the development of prehistory

**ANTH UN3151 Living with Animals: Anthropological Perspective. 4 points.**

This course examines how humans and animals shape each other's lives. We'll explore the astounding diversity of human-animal relationships in time and space, tracing the ways animals have made their impact on human societies (and vice-versa). Using contemporary ethnographic, historical, and archaeological examples from a variety of geographical regions and chronological periods, this class will consider how humans and animals live and make things, and the ways in which humans have found animals "good to think with". In this course, we will also discuss how knowledge about human-animal relationships in the past might change contemporary and future approaches to living with animals.

**ANTH BC3234 Indigenous Place-Thought. 4.00 points.**

This seminar considers what it means to be of a place and to think with and be committed to that place—environmentally, politically, and spiritually. After locating ourselves in our own particular places and place-based commitments, our attention

turns to the Indigenous traditions of North America, to accounts of tribal emergence and pre-colonial being, to colonial histories of land dispossession, to ongoing struggles to protect ecological health and land-based sovereignty, to the epistemological and moral systems that have developed over the course of many millennia of living with and for the land, and to the contributions such systems might make to our collective future. The seminar's title is borrowed from an essay on "Indigenous place-thought" by Mohawk/Anishinaabe scholar Vanessa Watts

**ANTH UN3663 The Ancient Table: Archaeology of Cooking and Cuisine. 4.00 points.**

Prerequisites: None Humans don't just eat to live. The ways we prepare, eat, and share our food is a complex reflection of our histories, environments, and ideologies. Whether we prefer coffee or tea, cornbread or challah, chicken breast or chicken feet, our tastes are expressive of social ties and social boundaries, and are linked to ideas of family and of foreignness. How did eating become such a profoundly cultural experience? This seminar takes an archaeological approach to two broad issues central to eating: First, what drives human food choices both today and in the past? Second, how have social forces shaped practices of food acquisition, preparation, and consumption (and how, in turn, has food shaped society)? We will explore these questions from various evolutionary, physiological, and cultural viewpoints, highlighted by information from the best archaeological and historic case studies. Topics that will be covered include the nature of the first cooking, beer-brewing and feasting, writing of the early recipes, gender roles and 'domestic' life, and how a national cuisine takes shape. Through the course of the semester we will explore food practices from Pleistocene Spain to historic Monticello, with particular emphasis on the earliest cuisines of China, Mesoamerica, and the Mediterranean

**ANTH GU4175 WRITING ARCHAEOLOGY. 3.00 points.**

Prerequisites: the instructor's permission.

Like fiction archaeology allows us to visit other worlds and to come back home again. In this class we'll explore different genres of archaeological texts. How do writers contribute to the development of narratives about the past, what are the narrative tricks used by archaeologists, novelists and poets to evoke other worlds and to draw in the reader? What is lost in the translation from the earth to text, and what is gained? There is an intimacy to archaeological excavation, an intimacy that is rarely captured in archaeological narratives. What enlivening techniques might we learn from fictional accounts, and where might we find narrative space to include emotion and affect, as well as the texture and grain of encounters with the traces of the past? How does archaeological evidence evoke a particular response, and how do novels and poems work to do the same thing? What is the role of the reader in bringing a text to life?

Enrollment limit is 15. Priority: Anthropology graduate students, archaeology senior thesis students.

**ANTH GU4345 NEANDERTHAL ALTERITIES. 3.00 points.**

Enrollment priorities: Graduate students, and 3rd & 4th year undergraduates only

Using The Neanderthals partly as a metaphorical device, this course considers the anthropological, philosophical and ethical implications of sharing the world with another human species. Beginning from a solid grounding in the

archaeological, biological and genetic evidence, we will reflect critically on why Neanderthals are rarely afforded the same reflexive capacities, qualities and attributes - agency- as anatomically modern humans, and why they are often regarded as lesser or nonhuman animals despite clear evidence for both sophisticated material and social engagement with the world and its resources. Readings/materials are drawn from anthropology, philosophy, ethics, gender studies, race and genetics studies, literature and film

### ANTH BC2012 LAB METHODS ARCHAEOLOGY. 4.00 points.

Only the most recent chapters of the past are able to be studied using traditional historiographical methods focused on archives of textual documents. How, then, are we to analyze the deep history of human experiences prior to the written word? And even when textual archives do survive from a given historical period, these archives are typically biased toward the perspectives of those in power. How, then, are we to undertake analyses of the past that take into account the lives and experiences of all of society’s members, including the poor, the working class, the colonized, and others whose voices appear far less frequently in historical documents? From

its disciplinary origins in nineteenth century antiquarianism, archaeology has grown to become a rigorous science of the past, dedicated to the exploration of long-term and inclusive social histories. “Laboratory Methods in Archaeology” is an intensive introduction to the analysis of archaeological artifacts and samples in which we explore how the organic and inorganic remains from archaeological sites can be used to build rigorous claims about the human past. The 2022 iteration of the course centers on assemblages from two sites, both excavated by Barnard’s archaeological field program in the Taos region of northern New Mexico: (1) the Spanish colonial site of San Antonio del Embudo founded in 1725 and (2) the hippie commune known as New Buffalo, founded in 1967. Participants in ANTH BC2012 will be introduced to the history, geology, and ecology of the Taos region, as well as to the excavation histories of the two sites. Specialized laboratory modules focus on the analysis of chipped stone artifacts ceramics, animal bone, glass, and industrial artifacts. The course only demands participation in the seminars and laboratory modules and successful completion of the written assignments, but all students are encouraged to develop specialized research projects to be subsequently expanded into either (1) a senior thesis project or (2) a conference presentation at the Society for American Archaeology, Society for Historical Archaeology, or Theoretical Archaeology Group meeting

### ANTH BC3223 Gender Archaeology. 4.00 points.

This seminar critically reexamines the ancient world from the perspective of gender archaeology. Though the seedlings of gender archaeology were first sown by of feminist archaeologists during the 70’s and 80’s, this approach involves far more than simply ‘womanizing’ androcentric narratives of past. Rather, gender archaeology criticizes interpretations of the past that transplant contemporary social roles onto the archaeological past, casting the divisions and inequalities of today as both timeless and natural. This class challenges the idea of a singular past, instead championing a turn towards multiple, rich, messy, intersectional pasts. The ‘x’ in ‘archaeology’ is an explicit signal of our focus on this diversity of pasts and a call for a more inclusive field of practice today

**ANTH UN3465 WOMEN, GENDER POL-MUSLIM WORLD. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Practices like veiling, gendered forms of segregation, and the honor code that are central to Western images of Muslim women are also contested issues throughout the Muslim world. This course examines debates about gender, sexuality, and morality and explores the interplay of political, social, and economic factors in shaping the lives of men and women across the Muslim world, from the Middle East to Europe. The perspective will be primarily anthropological, although special attention will be paid to historical processes associated with colonialism and nation-building that are crucial to understanding present gender politics. We will focus on the sexual politics of everyday life in specific locales and explore the extent to which these are shaped by these histories and the power of representations mobilized in a global world in the present and international political interventions. In addition to reading ethnographic works about particular communities, we read memoirs and critical analyses of the local and transnational activist movements that have emerged to address various aspects of gender politics and rights

**ANTH UN3604 As If: Anthropologies of the Future. 4.00 points.**

This seminar engages--through science fiction and speculative fiction, film, and companion readings in anthropology and beyond—a range of approaches to the notion of the “future” and to the imagination of multiple futures to come. We will work through virtual and fictive constructions of future worlds, ecologies, and social orders “as If” they present alternative possibilities for pragmatic yet utopian thinking and dreaming in the present (and as we’ll also consider dystopian and “heterotopian” possibilities as well)

**Spring 2025: ANTH UN3604**

**ANTH UN3665 The Politics of Care. 4.00 points.**

Semester: What are the consequences of entrenched inequalities in the context of care? How might we (re)imagine associated practices as political projects? Wherein lie the origins of utopic and dystopic visions of daily survival? How might we track associated promises and failures as they travel across social hierarchies, nationalities, and geographies of care? And what do we mean when we speak of “care”? These questions define the scaffolding for this course. Our primary goals throughout this semester are threefold. First, we begin by interrogating the meaning of “care” and its potential relevance as a political project in medical and other domains. Second, we will track care’s associated meanings and consequences across a range of contents, including urban and rural America, an Amazonia borderland, South Africa, France, and Mexico. Third, we will address temporal dimensions of care, as envisioned and experienced in the here-and-now, historically, and in a futuristic world of science fiction. Finally, and most importantly, we will remain alert to the relevance of domains of difference relevant to care, most notably race, gender, class, and species. Upper level seminar; 4 points Summer: What do we mean when we speak of “care”? How might we (re)imagine practices of care as political and moral projects? What promises, paradoxes, or

failures surface amid entrenched inequalities? And what hopes, desires, and fears inform associated utopic and dystopic visions of daily survival? These questions will serve as a scaffolding of sorts for this course, and our primary goals are fourfold. First, we will begin by interrogating the meaning of “care” and its potential relevance as a political project in medical and other domains. Second, we will track care’s associated meanings and consequences across a range of contents, communities, and geographies of care. Third, we will remain alert to the temporal dimensions of care, as envisioned and experienced historically, in the here-and-now, and in the futuristic world of science fiction. Finally, we will consider the moral underpinnings of intra-human alongside interspecies care. Enrollment limited to 10; 4 points

**ANTH UN3851 Theatricality # the Political. 4.00 points.**

This course addresses the articulation between theatricality and the political from a cross-cultural and trans-historical perspective. From the Renaissance theater to the profuse baroque, to the modernizing logics and aesthetics, to so-called “neo-baroque”, the course addresses logics and grammars within past and present dramaturgies of the social. How do certain theatrical traditions articulate with various power formations? How do these connect and complicate the relation between power and resistance, colonialism and liberation, center and periphery, particular and universal, actors and audiences? What technical apparatuses, cultural structures, ethical dispositions and bodily repertoires are mobilized? And how do old and new media technologies reconfigure protocols of stage-form in ancient and contemporary political theater?

**ANTH UN3861 Anthropology of the Anthropocene. 4 points.**

Enrollment limited to 20. Priority given to majors in Anthropology.

This course focuses on the political ecology of the Anthropocene. As multiple publics become increasingly aware of the extensive and accelerated rate of current global environmental change, and the presence of anthropogenesis in ever expanding circumstances, we need to critically analyze the categories of thought and action being developed in order to carefully approach this change. Our concern is thus not so much the Anthropocene as an immutable fact, inevitable event, or definitive period of time (significant though these are), but rather for the political, social, and intellectual consequences of

this important idea. Thus we seek to understand the creativity of “The Anthropocene” as a political, rhetorical, and social category. We also aim to examine the networks of capital and power that have given rise to the current state of planetary change, the strategies for ameliorating those changes, and how these are simultaneously implicated in the rhetorical creation of “The Anthropocene”.

**ANTH BC3868 ETHNOGRAPHIC FIELD RESEARCH IN NYC. 4.00 points.**

This course provides the aspiring anthropologist with an array of primarily qualitative methodological tools essential to successful urban fieldwork. As such, it is a practicum of sorts, where regular field assignments help build one’s ability to record and analyze social behavior by drawing on several key data collection techniques. Because we have the luxury of inhabiting a large, densely populated, international city, this class requires that you take a head-first plunge into urban anthropology. The NYC area will define the laboratory for individually- designed research projects. Be forewarned, however! Ethnographic engagement involves efforts to detect social patterns, but it is often a self-reflexive exercise, too. Readings provide methodological, analytical, and personal insights into the skills, joys, and trials that define successful field research

### ANTH UN3880 LISTENINGS: AN ETHNOG OF SOUND. 4.00 points.

Prerequisites: the instructor's permission.

We explore the possibilities of an ethnography of sound through a range of listening encounters: in resonant urban soundscapes of the city and in natural soundscapes of acoustic ecology; from audible pasts and echoes of the present; through repetitive listening in the age of electronic reproduction, and mindful listening that retraces an uncanniness inherent in sound. Silence, noise, voice, chambers, reverberation, sound in its myriad manifestations and transmissions. From the captured souls of Edison's phonography, to everyday acoustical adventures, the course turns away from the screen and dominant epistemologies of the visual for an extended moment, and does so in pursuit of sonorous objects. How is it that sound so moves us as we move within its world, and who or what then might the listening subject be?

### ANTH BC3932 CLIM CHNG/GLOBAL MIGR/HUM RG. 4.00 points.

While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third, the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific. Human Rights elective

### ANTH UN3947 TEXT, MAGIC, PERFORMANCE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. This course pursues interconnections linking text and performance in light of magic, ritual, possession, narration, and related articulations of power. Readings are drawn from classic theoretical writings, colonial fiction, and ethnographic accounts. Domains of inquiry include: spirit possession, trance states, séance, ritual performance, and related realms of cinematic projection, musical form, shadow theater, performative objects, and (other) things that move on their own, compellingly. Key theoretical concerns are subjectivity - particularly, the conjuring up and displacement of self in the form of the first-person singular I - and the haunting power of repetition. Retraced throughout the course are the uncanny shadows of a fully possessed subject --within ritual contexts and within everyday life

**ANTH UN3999 SENIOR THESIS SEM IN ANTHROPOL. 4.00 points.**

Enrollment limited to 15. Open to CC and GS majors in Anthropology only.

Prerequisites: The instructor's permission. Students must have declared a major in Anthropology prior to registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students must communicate/meet with thesis instructor in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term.

Prerequisites: The instructors permission. Students must have declared a major in Anthropology prior to registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students must communicate/meet with thesis instructor in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. This two-term course is a combination of a seminar and a workshop that will help you conduct research, write, and present an original senior thesis in anthropology. Students who write theses are eligible to be considered for departmental honors. The first term of this course introduces a variety of approaches used to produce anthropological knowledge and writing; encourages students to think critically about the approaches they take to researching and writing by studying model texts with an eye to the ethics, constraints, and potentials of anthropological research and writing; and gives students practice in the seminar and workshop formats that are key to collegial exchange and refinement of ideas. During the first term, students complete a few short exercises that will culminate in a substantial draft of one discrete section of their senior project (18-20 pages) plus a detailed outline of the expected work that remains to be done (5 pages). The spring sequence of the anthropology thesis seminar is a writing intensive continuation of the fall semester, in which students will have designed the research questions, prepared a full thesis proposal that will serve as a guide for the completion of the

thesis and written a draft of one chapter. Only those students who expect to have completed the fall semester portion of the course are allowed to register for the spring; final enrollment is contingent upon successful completion of first semester requirements. In spring semester, weekly meetings will be devoted to the collaborative refinement of drafts, as well as working through issues of writing (evidence, voice, authority etc.). All enrolled students are required to present their project at a symposium in the late spring, and the final grade is based primarily on successful completion of the thesis/ capstone project. Note: The senior thesis seminar is open to CC and GS majors in Anthropology only. It requires the instructor's permission for registration. Students must have a 3.6 GPA in the major and a preliminary project concept in order to be considered. Interested students should communicate with the thesis instructor and the director of undergraduate study in the previous spring about the possibility of taking the course during the upcoming academic year. Additionally, expect to discuss with the instructor at the end of the fall term whether your project has progressed far enough to be completed in the spring term. If it has not, you will exit the seminar after one semester, with a grade based on the work completed during the fall term. Enrollment limit is 15. Requirements: Students must have completed the requirements of the first semester of the sequence and seek instructor approval to enroll in the second

#### ANTH GU4143 ACCUSATION. 3.00 points.

This course examines the politics and practices of collective accusation in comparative perspective. It treats these phenomena in their relation to processes of political and economic transition, to discourses of crisis, and to the practices of rule by which the idea of exception is made the grounds for extreme claims on and for the social body-usually, but not exclusively, enacted through forms of expulsion. We will consider the various theoretical perspectives through which forms of collective accusation have been addressed, focusing on psychoanalytic, structural functional, and poststructuralist readings. In doing so, we will also investigate the difference and possible continuities between the forms and logics of accusation that operate in totalitarian as well as liberal regimes. Course readings will include both literary and critical texts

#### ANTH GU4283 Anthropology of the Sister. 4.00 points.

Classical anthropological theory placed the muted sister at its core, in a theory of kinship originating in the traffic of women among men. Political theory placed the invisible sister at its core by coding democracy as fraternity. Psychoanalytic theory placed the forbidden sister at its core with the theory of incest taboo. Tragic theory placed the self-effacing sister at its core in the Sophoclean figures of Antigone and Ismene. Popular (Hollywood) cinematic production placed the absent sister at its core, with its relentless circulation of narratives in which a 'band of brothers' finds its moral purpose in the rescue of someone else's sister. And yet, and within these traditions, the sister arose in the interstices as a phantasmatic figure of extraterritorial and insurrectionary possibility. If feminisms have, on occasion, attempted to both mobilize and contain this possibility in a discourse of sisterhood, much more remains to be thought. This course explores the figure of the sister in its muted, invisible, forbidden, self-effacing and absented forms—and moves to consider the radical possibilities that emerged therefrom in Social and Political Theory, Literary Fiction, Drama and Cinema

#### ANTH GU4345 NEANDERTHAL ALTERITIES. 3.00 points.

Enrollment priorities: Graduate students, and 3rd & 4th year undergraduates only

Using The Neanderthals partly as a metaphorical device, this course considers the anthropological, philosophical and ethical implications of sharing the world with another human species. Beginning from a solid grounding in the archaeological, biological and genetic evidence, we will reflect critically on why Neanderthals are rarely afforded the same reflexive capacities, qualities and attributes - agency- as anatomically modern humans, and why they are often regarded as lesser or nonhuman animals despite clear evidence for both sophisticated material and social engagement with the world and its resources. Readings/materials are drawn from anthropology, philosophy, ethics, gender studies, race and genetics studies, literature and film

### ANTH BC2012 LAB METHODS ARCHAEOLOGY. 4.00 points.

Only the most recent chapters of the past are able to be studied using traditional historiographical methods focused on archives of textual documents. How, then, are we to analyze the deep history of human experiences prior to the written word? And even when textual archives do survive from a given historical period, these archives are typically biased toward the perspectives of those in power. How, then, are we to undertake analyses of the past that take into account the lives and experiences of all of society's members, including the poor, the working class, the colonized, and others whose voices appear far less frequently in historical documents? From its disciplinary origins in nineteenth century antiquarianism, archaeology has grown to become a rigorous science of the past, dedicated to the exploration of long-term and inclusive social histories. "Laboratory Methods in Archaeology" is an intensive introduction to the analysis of archaeological artifacts and samples in which we explore how the organic and inorganic remains from archaeological sites can be used to build rigorous claims about the human past. The 2022 iteration of the course centers on assemblages from two sites, both excavated by Barnard's archaeological field program in the Taos region of northern New Mexico: (1) the Spanish colonial site of San Antonio del Embudo founded in 1725 and (2) the hippie commune known as New Buffalo, founded in 1967. Participants in ANTH BC2012 will be introduced to the history, geology, and ecology of the Taos region, as well as to the excavation histories of the two sites. Specialized laboratory modules focus on the analysis of chipped stone artifacts ceramics, animal bone, glass, and industrial artifacts. The course only demands participation in the seminars and laboratory modules

and successful completion of the written assignments, but all students are encouraged to develop specialized research projects to be subsequently expanded into either (1) a senior thesis project or (2) a conference presentation at the Society for American Archaeology, Society for Historical Archaeology, or Theoretical Archaeology Group meeting

Spring 2025: ANTH BC2012

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 2012	001/00637	T Th 4:10pm - 6:00pm 954 Ext Schermerhorn Hall	Severin Fowles	4.00	17/15

### ANTH UN2028 THINK LIKE AN ARCHAEOLOGIST. 4.00 points.

\$25 mandatory lab fee.

This course provides a comprehensive introduction to methods and theory in archaeology – by exploring how archaeologists work to create narratives about the past (and the present) on the basis on the material remains of the past. The course begins with a consideration of how archaeologists deal with the remains of the past in the present: What are archaeological sites and how do we 'discover' them? How do archaeologists 'read' or analyze sites and artifacts? From there, we will turn to the question of how archaeologists interpret these materials traces, in order to create narratives about life in the past. After a review of the historical development of theoretical approaches in archaeological interpretation, the course will consider contemporary approaches to interpreting the past

Fall 2024: ANTH UN2028

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 2028	001/10347	M W 10:10am - 11:25am 310 Fayerweather	Hannah Chazin	4.00	43/90

### ANTH BC3223 Gender Archaeology. 4.00 points.

This seminar critically reexamines the ancient world from the perspective of gender archaeology. Though the seedlings of gender archaeology were first sown by of feminist archaeologists during the 70's and 80's, this approach involves far more than simply 'womanizing' androcentric narratives of past. Rather, gender archaeology criticizes interpretations of the past that transplant contemporary social roles onto the archaeological past, casting the divisions and inequalities of today as both timeless and natural. This class challenges the idea of a singular past, instead championing a turn towards multiple, rich, messy, intersectional pasts. The 'x' in 'archaeology' is an explicit signal of our focus on this diversity of pasts and a call for a more inclusive field of practice today

Spring 2025: ANTH BC3223

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 3223	001/00646	W 10:10am - 12:00pm 111 Milstein Center	Camilla Sturm	4.00	15/16

### ANTH GU4346 LAB TECHNIQUES IN ARCHAEOLOGY. 3.00 points.

"Laboratory Methods in Archaeology" is an intensive introduction to the analysis of archaeological artifacts and samples in which we explore how the organic and inorganic remains from archaeological sites can be used to build rigorous claims about the human past. In 2023, this course will focus on pre-contact and post-contact assemblages from the New York-metro area, including materials from the legacy collections of Ralph Solecki. Participants will be introduced to the history, geology, and ecology of the New York area and specialized laboratory modules focus on the analysis of chipped stone artifacts, ceramics, animal bone, glass, and a range of post-contact artifacts. The course only demands participation in the seminars and laboratory modules and successful completion of the written assignments, but all students are encouraged to develop specialized research projects to be subsequently expanded into either (1) a thesis project or (2) a conference presentation at the Society for American Archaeology, Society for Historical Archaeology, or Theoretical Archaeology Group meeting

### PHYSICAL ANTHROPOLOGY

#### ANTH GU4148 HUMAN SKELETAL BIOLOGY II. 3.00 points.

Enrollment limit is 12 and Instructor's permission required.

Recommended for archaeology and physical anthropology students, pre-meds, and biology majors interested in the human skeletal system. Intensive study of human skeletal materials using anatomical and anthropological landmarks to assess sex, age, and ethnicity of bones. Other primate skeletal materials and fossil casts used for comparative study

## ARCHAEOLOGY

### THE INTERDEPARTMENTAL MAJOR IN ARCHAEOLOGY

Center website: <https://archaeology.columbia.edu>

Office location: 965 Schermerhorn Extension

Office contact: [archaeology@columbia.edu](mailto:archaeology@columbia.edu)

Director of Undergraduate Studies: Prof. Hannah Chazin, [hc2986@columbia.edu](mailto:hc2986@columbia.edu)

Center for Archaeology Administrator: Tiffany Pinnock, [tp2837@columbia.edu](mailto:tp2837@columbia.edu)

### THE STUDY OF ARCHAEOLOGY

Archaeology is the study of the material conditions inhabited and acted upon by people in the past and present. As an academic discipline, archaeology has come to mean many things to different generations of scholars, yet all approaches share in common a focus on the physical remains of the past and on the interpretive acts that enliven these remains and are challenged by them. Investigation of the past through the study of material remains is entangled with historiography, politics, and individual and collective memory, and is implicated in the production of present-day communities and identities. At Columbia, archaeology is a multidisciplinary field practiced by faculty and students in the humanities, social sciences, and natural sciences.

Archaeology is everywhere! Students and faculty at Columbia have done archaeological fieldwork and research program around the world, including: Argentina, Peru, Central America, the North American Southwest, New York City, upstate New York, the UK, France, Italy, Greece, Turkey, Egypt, Yemen, Israel, Palestine, Armenia, and Madagascar. Archaeologists at Columbia also work with professionals at a wide range of institutions in New York. Among the institutions at which students in particular programs may conduct research, or work on internships, are the American Museum of Natural History, the Brooklyn Museum, the Metropolitan Museum of Art, the Museum of the City of New York, the National Museum of the American Indian, the New York Botanical Garden, and the South Street Seaport Museum.

The inter-departmental major in archaeology is an interdisciplinary program that allows students to take archaeology classes from a wide range of departments at Columbia and Barnard, including Anthropology, Art History, Classics, EALAC, History, EEEB and others. Students can put together a major that reflects their particular interests. This major has a strong focus on lab and field skills, as well as on questions of interpretation and theory.

Interdepartmental Major in Archaeology

Interdepartmental Minor in Archaeology

Interdepartmental Concentration in Archaeology

## STUDENT ADVISING

Director of Undergraduate Studies: Prof. Hannah Chazin,  
[hc2986@columbia.edu](mailto:hc2986@columbia.edu)

### Consulting Advisers

Students should consult with the Director of Undergraduate Studies for Archaeology to discuss the major, minor, or concentration and for help with planning a course of study and selecting classes.

Students interested in archaeology should sign up for the archaeology list-serv, for announcements about courses, events, and summer research opportunities: <https://listserv.cuit.columbia.edu/scripts/wa.exe?SUBED1=ARCY-UND&A=1>

Advising events such as open houses and welcome events, as well as Friday Open Lab hours will be announced on the listserv.

Other information about advising and the major and minor can be found on the CCA's website:

<https://archaeology.columbia.edu/undergraduate/major/>

<https://archaeology.columbia.edu/undergraduate/minor/>

### Enrolling in Classes

Majoring or minoring in archaeology does not require any prerequisite coursework.

Requirements for enrolling in specific archaeology courses will vary by department and instructor.

### Preparing for Graduate Study

Students interested in pursuing graduate study in archaeology or other disciplines that include archaeologists are encouraged to consult with the Director of Undergraduate Studies or other archaeology faculty at Columbia and Barnard.

Requirements and preparation for graduate study in archaeology are discipline-specific and vary between archaeology, art history, anthropology, classics, and other regional studies departments and programs. Some programs of study may require language training and language courses may be counted as part of the "related courses" for the major.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor must be taken at Columbia University unless

explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or

substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

### Advanced Placement

Advanced Placement credits are not accepted towards the major or the minor in archaeology.

### Barnard College Courses

Courses taken at Barnard are treated as part of the available curriculum and count towards the major/minor, as long as they meet the relevant criteria to count towards the major/minor.

### Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated

for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor.

Up to two courses for the major may be fulfilled with transfer credit.

Students are allowed to apply 1 course (up to 4 credits) of transfer coursework to the minor.

For both the major and the minor, students may undertake a fieldwork course (usually done in the summer) that offers credit through another university and that will be counted towards the program of study, separately from any prior transfer courses.

### Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia

instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor, the DUS will need to confirm that they can be used toward requirements in the major/minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia, and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major/minor, and they must be approved by the DUS.

### Summer Courses

Students doing summer field school courses that are affiliated with other universities need to get pre-approval from the Director of Undergraduate Studies. Students will need to provide a syllabus for the course prior to approval and will need

to submit their transcript after completion of the course. See the section on “Transfer Courses” for more detailed information.

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research Courses

The interdepartmental major encourages students to explore the wide-range of field and laboratory methods used by archaeologists. Think like an Archaeologist (UN2028), one of required introductory courses, introduces students to the basics of archaeological research and methods.

Students majoring in archaeological can take a wide range of courses to fulfill the field

Work/internship and laboratory class requirements – and should consult with the Director of Undergraduate Studies about the available courses and individual research interests.

### Senior Thesis Coursework and Requirements

Writing a senior thesis is optional, but recommended for students who are interested in pursuing a graduate degree or who want to be eligible for departmental honors.

Thesis topics should be discussed with a faculty adviser during the junior year, allowing time for planning, research, and travel during the following summer. In the senior year, students may register for two semesters of senior thesis study with their adviser (e.g., ANTH 3997 or AHIS 3997–3998), to cover the writing of the thesis, the final draft of which must be submitted by March 25th.

### Undergraduate Research Outside of Courses

Most semesters the Columbia Center for Archaeology runs open lab hours on Fridays, where students can drop in and volunteer on faculty and graduate student research projects. Announcements about the open lab will be circulated on the archaeology listserv: <https://listserv.cuit.columbia.edu/scripts/wa.exe?SUBED1=ARCY-UND&A=1>

Students interested in summer fieldwork opportunities and internships in archaeology should sign up for the archaeology listserv: <https://listserv.cuit.columbia.edu/scripts/wa.exe?SUBED1=ARCY-UND&A=1>

Or visit: <https://archaeology.columbia.edu/undergraduate/fieldwork/>

Information about funding for fieldwork and internships can be found here: <https://archaeology.columbia.edu/resources/funding-opportunities/>

## DEPARTMENTAL HONORS AND PRIZES

### Department Honors

To be considered for departmental honors, majors must:

1. Have grade point average of at least 3.6 in major courses
2. Completed an honors thesis or equivalent project of high quality

### Academic Prizes

The Ralph and Rose Solecki Award is given in honor of the eminent Columbia archaeologists. The Award is given to a student, chosen by the faculty, who has made a significant contribution to the life of the archaeological community at Columbia and/or Barnard in the preceding year. The Solecki award is usually made to a graduating student, but it is open to all students in archaeology regardless of their status.

The award comes with a small sum of money intended for books.

## OTHER IMPORTANT INFORMATION

The Archaeology program at Columbia is housed in the Center for Archaeology and taught by faculty who come from a range of different backgrounds. The interdepartmental major/minor in archaeology was developed as a truly interdisciplinary approach to archaeology, taking advantage of the full scope of archaeological expertise on offer at Columbia University.

In addition, it is also possible to study archaeology as part of majoring in Anthropology or Art History, among other options.

If you are not sure which course of study to choose, make an appointment to talk with the Director of Undergraduate Studies.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before Fall 2023 may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Because of its interdisciplinary structure, the archaeology major, minor, and concentration can be tailored to students' individual interests (within the structure of the requirements). A wide variety of courses may be eligible for the major/minor, and students are encouraged to:

- Consult regularly with the Director of Undergraduate Studies
- Sign up for the listserv to receive a bulletin with archaeology courses being offered in the upcoming term: <https://listserv.cuit.columbia.edu/scripts/wa.exe?SUBED1=ARCY-UND&A=1>
- Use the progress planning tools available on the CCA website

Major: <https://archaeology.columbia.edu/undergraduate/major/>

Minor: <https://archaeology.columbia.edu/undergraduate/minor/>

Concentration: <https://archaeology.columbia.edu/undergraduate/concentration/>

Broadly speaking, classes can count towards the major if they have an archaeological component. This can include:

- Classes that with material culture with an orientation towards the past. This could be architecture, monuments, landscape as well as material that has been excavated or collected during survey. It can also include the recent past, as long as the orientation is material in outlook.
- Any class that reads archaeological theory
- Classes on the history of human evolution or on human skeletal biology

Courses can count as related courses (fulfilling the specific requirements of the major and the concentration) if the student can case that it is relevant to their individual course of study.

Classes that count as related rather than as part of the major include:

- Classics or history classes that deal only with textual analysis and do not incorporate any study of material objects.
- Geology classes that have no connection with the human past
- Palaeontology
- Classes on primates, ecology, etc.
- Language classes

Student interested in archaeology are encouraged to consider introductory courses in Earth and environmental sciences, environmental biology, and/or chemistry for their Core Curriculum science requirement.

### Course Numbering Structure

Course numbering structures will vary by department, so students are encouraged to consult the specific bulletin entry for departments offering specific archaeology courses.

For the purposes of the major, "upper-level courses" generally refers to courses that are 3000-level or higher. Other courses may be approved for this requirement after consultation with the DUS.

### Guidance for First-Year Students

First year students are encouraged to take one or two of the introductory classes offered

each year (ANTH 1007, ANTH 1008, or ANTH 2028).

## Guidance for Transfer Students

Transfer students are encouraged to meet with the Director of Undergraduate Studies for

Archaeology to discuss their plan to complete the major/minor and any transfer credits that might be applied.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

Students interested in the major, minor, and concentration in archaeology should take some combination of the three introductory courses:

THINK LIKE AN ARCHAEOLOGIST (ANTH 2028)

THE ORIGINS OF HUMAN SOCIETY (ANTH 1007)

THE RISE OF CIVILIZATION (ANTH 1008)

Majors: Two of the three introductory courses

Minors: Must take ANTH 2028, and either ANTH 1007 or 1008

Concentration: One of the three introductory courses\*

\* An additional introductory course can be counted towards the requirement for upper-level courses for the concentration

---

## Major in Archaeology

The major requires a minimum of 30 points within the major and 9 points of related courses, as follows:

- Two of the three introductory courses (6 points):

ANTH1007 The Origins of Human Society

ANTH1008 The Rise of Civilization

ANTH2028 Think like an Archaeologist

- Two upper-level courses from different regions of the world, planned in consultation with the DUS
- Three additional upper-level courses, planned in consultation with the DUS
- Participation in four to six weeks in Columbia-affiliated field projects, independent study in excavation or other field projects, or a relevant museum internship and/or lab work.\*

- One laboratory course in archaeology (or its equivalent in the field), as approved by the DUS)

- A capstone seminar in archaeology, preferably taken in the junior or senior year. World Archaeology (ANTH 3993 – taught alternate years) or a substitute seminar to be decided with the advance approval of the Director of Undergraduate Studies.\*\*

- 9 points of related courses, planned in consultation with the DUS

Students majoring in archaeology may choose to write a senior thesis. Thesis topics should be discussed with a faculty adviser during the junior year, allowing time for planning, research, and travel during the following summer. In the senior year, students may register for two semesters of senior thesis study with their adviser (e.g., ANTH 3997 or AHIS 3997–3998), to cover the writing of the thesis.

\* The field, school, project, or internship must be approved in advance by the program advisers, and arrangements should be made in advance with the director of undergraduate studies for credits to be accepted as part of the degree. For more information, see the Center for Archaeology website.

\*\* Students who are writing a thesis may substitute a thesis seminar for this requirement.

## Minor in Archaeology

The minor consists of five courses in total (for a range of 16-19 credits). There are no prerequisites for the minor.

Across the 5 courses required for the minor, students must take courses in at least two different departments.

Students minoring in archaeology are required to take the introductory method and theory course:

- ANTH2028 Think like an Archaeologist

Students are also required to take one of the other introductory courses:

- ANTH1007 The Origins of Human Society
- ANTH1008 The Rise of Civilization

Students can select three other archaeology courses, in consultation with the DUS, with the recommendation that one of the courses be a 3000-level course or higher.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE FALL 2023

### Concentration in Archaeology

The concentration in archaeology requires a total of 21 points, within anthropology, art history and archaeology, and other approved departments, with no more than four courses being taken within any single department.

Requirements for the concentration are as follows:

Any one of the three introductory courses:

- ANTH1007 The Origins of Human Society
- ANTH1008 The Rise of Civilization
- ANTH2028 Think like an Archaeologist

One seminar or colloquium in in the Departments of Anthropology, Art History and Archaeology, Classics, or History, as approved by the program advisers.

Three upper-level courses, two of which must cover different regions of the world

One related course, planned with DUS in accordance with the student's individual interests and academic goals

---

### ANTH UN2028 THINK LIKE AN ARCHAEOLOGIST.

**4.00 points.**

\$25 mandatory lab fee.

This course provides a comprehensive introduction to methods and theory in archaeology – by exploring how archaeologists work to create narratives about the past (and the present) on the basis on the material remains of the past. The course begins with a consideration of how archaeologists deal with the remains of the past in the present: What are archaeological sites and how do we ‘discover’ them? How do archaeologists ‘read’ or analyze sites and artifacts? From there, we will turn to the question of how archaeologists interpret these materials traces, in order to create narratives about life in the past. After a review of the historical development of theoretical approaches in archaeological interpretation, the course will consider contemporary approaches to interpreting the past

**Fall 2024: ANTH UN2028**

## THE STUDY OF ARCHITECTURE

Studying Architecture at Barnard College, Columbia College, and General Studies leads to a liberal arts degree – a Bachelor of Arts with a major in Architecture, and Barnard College is the administrative location for all undergraduate architecture studies at Columbia University and its partner institutions. A liberal arts education in architecture holds a unique position in academia and in relation to the discipline. If the goal of a professional education in architecture is to enable students to participate directly in the world as an architect – a liberal arts education asks that students consider the broader and myriad conditions in which architecture is conceived and practiced and,

in turn, to understand how architecture inevitably alters those conditions. Students are asked to confront and interpret the complex social, cultural, political, and environmental processes that weave through architectural design and urbanism. The purpose of an undergraduate liberal arts degree in architecture is to educate students to think about the world through architecture.

The Architecture curriculum introduces design at a variety of scales, acknowledging that integrated design thinking is effective for problem-solving at any scale and in any discipline. Students will experiment with full-scale installations and devices and make small-scale models of the built environment from which they extract, interpret, and invent new possibilities of inhabitation and use. The curriculum intentionally balances the traditions of handcrafted representation with evolving digital technologies of architectural design and communication.

The Architecture major complements, and makes great use of its University setting. With access to superb libraries, research centers, graduate programs, and abundant intellectual resources, our students have the opportunity to follow their creative instincts to great depth and breadth – and they do. The major takes full advantage of New York City, utilizing it as a site for many design and research projects that explore the social, cultural, and environmental histories that have shaped the city. Architecture students study with peers from countries around the world in one of the most diverse cities in the world. A large majority of Architecture students expand their education by interning in Architecture or a related field during their undergraduate studies. Alumni of the Department are leaders in architecture and design fields around the world. The faculty teaching in the undergraduate program are dedicated teachers who are also at the forefront of practice and research and are similarly drawn to New York City as a nexus of global design thinking.

Students interested in obtaining a professional degree in Architecture continue on to graduate programs after their undergraduate degree, and students from the Barnard Columbia program have enjoyed enormous success in their admissions to the most competitive graduate programs in the country. Students who study Architecture as undergraduates have also pursued graduate degrees in a variety of disciplines including Urban Planning, Law, and Media and Communications.

## MISSION

The Architecture major establishes an intellectual context for students to interpret the relation of form, space, program, materials, and media to human life and thought. Through the Architecture curriculum, students participate in the ongoing shaping of knowledge about the built environment and learn to see architecture as one among many forms of cultural production. At the same time, the major stresses the necessity of learning disciplinary-specific tools, methods, terms and critiques. Thus, work in the studio, lecture or seminar asks that students treat architecture as a form of research and speculation

which complement the liberal arts mission of expansive thinking.

## STUDENT LEARNING OUTCOMES

Students in the Architecture Majors who fully engage with the curriculum should be able to complete the following outcomes:

- Apply integrated design thinking to specific problems in and beyond the discipline.
- Visually communicate architectural concepts and research using discipline-specific techniques in multiple media.
- Verbally present independent, group or assigned research, in multiple media formats.
- Organize and concisely write in a variety of formats including reports, case studies, synthetic overviews, etc.
- Understand and critically interpret major buildings and themes of Architectural history and theory.
- Be intellectually prepared for graduate studies in architecture and related disciplines.

## PROGRAMS OF STUDY

There are a few distinctions between the opportunities for students at Barnard College, Columbia College, The Fu Foundation School of Engineering and Applied Science (SEAS), and the School of General Studies to study architecture at an undergraduate level.

**Barnard College** students can major in [Architecture](#) (also referred to as the studio major), major in the [History and Theory of Architecture](#), or minor in [Architecture](#) through our department.

**Columbia College** students can major or minor in [Architecture](#) through our department. Columbia students who wish to pursue the History and Theory of Architecture major can do so through Columbia's Department of Art History and Archaeology.

**The School of General Studies** students can major or minor in [Architecture](#) through our department. General Studies students who wish to pursue the History and Theory of Architecture major can do so through Columbia's Department of Art History and Archaeology.

**The Fu Foundation School of Engineering and Applied Science (SEAS)** students may complete a minor in [Architecture](#).

## STUDENT ADVISING

### Advising Resources

#### Advising Appointments

Our department offers weekly advising appointments for students who are interested in our courses and potentially pursuing an architecture major or minor. If you have any

questions or need help interpreting departmental requirements for the [major or minor](#), please [sign up for an appointment](#) with one of our faculty advisors. [Faculty advising appointments](#) are offered throughout the fall and spring and are open to anyone who is interested in learning more about our department. During the summer break, current and prospective students are instead invited to submit their questions by email to [architecture@barnard.edu](mailto:architecture@barnard.edu).

### Major and Minor Advising

After a student has officially declared their major in architecture, they will be assigned a permanent faculty advisor in our department who will meet with them once per semester to review their progress in the major. Although minors are not formally assigned to a faculty advisor, we welcome and encourage our minors to [meet with our faculty advisors](#) to address any questions.

### Major and Minor Requirements Worksheets

Major and minor worksheets are intended to help students plan their coursework and the completion of their program of study. You can download major and minor worksheets [here](#).

### The Architecture Department Newsletter

Our department distributes a biweekly newsletter for architecture students. Students who are enrolled in one of our courses or who have declared the major in architecture are automatically subscribed to this newsletter. Those who are not in our courses and wish to subscribe to our newsletter can do so [here](#).

### Architecture Program Planning Meetings

Our department hosts two program planning meetings per year, one in October and another in April. At these meetings, students can learn about our course offerings, the course application process, and the major and minor requirements. Information about upcoming program planning meetings can be found on our [website's events calendar](#).

## Guidance for First-Year Students

For first-year students who are interested in architecture and design, we offer the following course, which prioritizes first-year students:

### ARCH UN1010 Design Futures: New York City

In addition to taking Design Futures: NYC, first-year students are encouraged to refer to our [program planning lists](#) and review any lecture courses that can count towards the architecture major and minor requirements. First-year students are discouraged from applying for admission to our introductory-level studios Architectural Design: Systems and Materials or Architectural Design: Environments and Mediations; these courses are more appropriate for second and third-year students, and those students will be given priority for admission to these studios. Similarly, our required lecture course for the major, ARCH UN3117 Modern Architecture in the World, can be taken at any time but is generally

recommended for the sophomore year as a companion course to the first two studios.

Please note that first-year students interested in majoring in architecture should not enroll in ARCH UN1020 Introduction to Architectural Design & Visual Culture, as this course is intended for third and fourth-year students minoring in architecture or non-majors interested in an architecture studio. This course will not count toward the architecture major.

To learn more about our courses and department, first-year students are strongly encouraged to sign up for our [faculty advising appointments](#).

## Enrolling in Courses

### Course Applications

Many architecture courses require an application. To receive full consideration for admission, you must fill out the course application in advance and also join the online course waitlist during an early registration period.

Please note that our department will only review applications and process admissions during specific weeks, with priority given to those who apply and join the waitlists during one of the early registration periods.

Admission to our courses is at the discretion of the department and instructor. If a student is admitted from the waitlist, their status on SSOL will change to "Approved." The transition from the waitlist to the class list will occur automatically overnight.

Due to very limited space in our courses, it is possible that a student who has applied and joined the waitlist during an early registration window will remain on the waitlist until the start of classes. Once the semester begins, students who remain on the waitlist for any of our courses must attend the first class session and speak with the instructor to inquire about available spots.

To learn more about our course application process, please visit our [website](#).

## PREPARATION FOR GRADUATE STUDY

Students who wish to pursue graduate study in architecture or related fields are strongly encouraged to sign up for our faculty [advising appointments](#) in their junior or senior year.

## COURSEWORK TAKEN OUTSIDE OF BARNARD (FOR BARNARD STUDENTS ONLY)

Our department offers studio, lecture, seminar, and project-based courses that can be counted toward a major or minor in architecture. Courses taught by our department are often supplemented by courses from other departments, colleges, and schools at Columbia University, such as the Columbia Art History Department, the Barnard Art History Department,

and the Barnard and Columbia Urban Studies Program. Some courses taught at The Graduate School of Architecture, Planning, and Preservation (GSAPP) may also be approved to count toward the architecture major or minor each term. All courses taught outside our department are primarily taken to fulfill the major or minor's lecture, seminar, and workshop requirements.

Before each semester begins, our department reviews all upcoming undergraduate courses and publishes a list of classes that fulfill the requirements for the architecture major and minor. These lists, known as 'Program Planning Lists,' are typically released a semester in advance at our program planning meetings.

Once available, our Program Planning Lists are uploaded to [this page](#) on our website.

Additionally, our department reviews all upcoming graduate courses at the GSAPP that are open for cross-registration by undergraduate students and publishes a list detailing how those courses can fulfill the architecture major and minor requirements. This list, known as the [B+C|A List of GSAPP Courses Approved for the Architecture Majors and Minor](#), undergoes updates each semester and is always published during the first week of classes.

Once available, our list of approved GSAPP courses is uploaded to [this page](#) on our website.

If you have any questions about using either of these lists, please [schedule an appointment](#) with one of our faculty advisors.

## Advanced Placement Credit

Our department does not grant any course exemptions for AP or other exam scores.

## Columbia College Courses

Select courses offered at Columbia College and other schools at Columbia University may be used for credit toward the major or minor. These courses have been approved by the Department Chair and are noted on our ['Program Planning Lists'](#) each semester. Students may request consideration for courses not on this list through consultation with their major advisor and/or the Department Chair, particularly in fulfilling their 'Specialization' within the major.

## Transfer Credit

When students wish to transfer credit to Barnard from other institutions, their coursework is first evaluated for college elective credit by the Registrar's Office. If they are approved, departments can consider these courses for credit toward the major or minor.

The use of transfer courses toward the major requirements is determined on a case-by-case basis. Typically, no more than 3 transfer courses will be allowed to fulfill the major

requirements, primarily in the ‘Specialization’ category within the major.

Students requesting a review of up to three courses for transfer credits should refer to our [Request for Exemption from Architecture Major or Minor Requirements](#) form.

## Study Abroad Credit

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia’s Center for Global Engagement) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus.

Classes taken abroad through other institutions or programs are treated as transfer credit and are subject to the same policies as other transfer courses. Accordingly, there will be a limit on the number of study abroad courses taken at other institutions that can be counted toward the major or minor. Typically, no more than 3 transfer courses will be allowed to fulfill the major requirements

To receive credit toward the major or minor for a study abroad course (whether taken through a Columbia program or another institution/program), students must submit a Study Abroad Approval form through Slate and obtain the approval of the Department Chair. Students majoring in architecture must also meet with their major advisor to discuss how to apply any courses taken abroad to their major requirements.

## Summer Credit

Summer courses at Barnard are equivalent to those taken during the academic year. Courses that have been approved for the fulfillment of departmental requirements will automatically count toward the major and minor.

Courses taken at other institutions (including Columbia) are considered transfer credit and are subject to the same policies governing other transfer courses. To receive major or minor credit for a summer course taken at another institution, students must submit a Summer Course form through Slate and have it approved by both the Registrar’s Office and the Department Chair.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA (FOR COLUMBIA & GENERAL STUDIES STUDENTS ONLY)

Our department offers studio, lecture, seminar, and project-based courses that can be counted toward a major or minor in architecture. Courses taught by our department are often supplemented by courses from other departments, colleges, and schools at Columbia University, such as [The Graduate School of Architecture, Planning, and Preservation \(GSAPP\)](#), the Columbia Art History Department, the Barnard Art History Department, and the Barnard and Columbia Urban Studies Program. Courses taught outside our department are primarily

taken to fulfill the major's lecture, seminar, and workshop requirements.

Before each semester begins, our department reviews all upcoming undergraduate courses and publishes a list of classes that fulfill the requirements for the architecture major and minor. These lists, known as 'Program Planning Lists,' are typically released a semester in advance at our program planning meetings.

Once available, our Program Planning Lists are uploaded to [this page](#) on our website. If you have any questions about using these lists, please [schedule an appointment](#) with one of our faculty advisors.

Additionally, our department reviews all graduate courses at the GSAPP that are open for cross-registration by undergraduate students and publishes a list detailing how those courses can fulfill the architecture major and minor requirements. This list, known as the [B+C|A List of GSAPP Courses Approved for the Architecture Majors and Minor](#), undergoes updates each fall and spring and is always published during the first week of classes.

Once available, our list of approved GSAPP courses is uploaded to [this page](#) on our website.

If you have any questions about using either of these lists, please [schedule an appointment](#) with one of our faculty advisors.

## Advanced Placement Credit

Our department does not grant any course exemptions for AP or other exam scores.

## Barnard College Courses

Courses offered by our department, along with other select courses at Barnard College and other schools at Columbia University, may be used for credit toward the major or minor. These courses have been approved by the Department Chair and are noted on our ‘[Program Planning Lists](#)’ each semester. Students may request consideration for courses not on this list through consultation with their major advisor and/or the Department Chair, particularly in fulfilling their ‘Specialization’ within the major.

## Transfer Credit

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major or minor.

The use of transfer courses toward the major requirements is determined on a case-by-case basis. Typically, no more than 3 transfer courses will be allowed to fulfill the major requirements, primarily in the ‘Specialization’ category within the major.

Students requesting a review of up to three courses for transfer credits should refer to our [Request for Exemption from Architecture Major or Minor Requirements](#) form.

## Study Abroad Credit

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia’s Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major or minor, the student’s major advisor will need to confirm that they can be used toward requirements in the major or minor.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia and are subject to the same policies as other transfer courses. Accordingly, the number of study abroad courses taken at other institutions that can be counted toward the major or minor will be limited. Typically, no more than 3 transfer courses will be allowed to fulfill the major requirements

Students majoring in architecture should meet with their major advisor, while those minoring in architecture should consult the DUS. These meetings are necessary to discuss the application of study abroad courses—whether through a Columbia program or another institution—to their program of study requirements and to obtain credit toward their major or minor.

## Summer Courses

Summer courses in architecture at Barnard are equivalent to those taken during the academic year. Courses that have been approved for the fulfillment of departmental requirements will automatically count toward the major and minor.

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major/minor only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

Students must meet with their major advisor or the DUS for permission to receive major or minor credit for a summer course taken at Columbia.

## Core Curriculum Connections

Students may be interested in course offerings that can be taken to fulfill the architecture major and the Global Core requirement of the Core Curriculum. The list of approved

courses for the Global Core requirement is on [this page](#) of the Bulletin.

## RESEARCH METHODS IN ARCHITECTURE AND THE SENIOR CAPSTONE PROJECT

### Coursework in Research Methods

The following lecture and seminar courses are required for the architecture major and will introduce students to the major questions and research methods in architecture.

ARCH UN3117 Modern Architecture in the World  
ARCH UN3901 Senior Seminar

### Other Research Opportunities

Independent Study provides an opportunity for students to work one-on-one with an architecture faculty member on directed research or projects. Typically, Independent Study is reserved for students at an advanced level within their major who have demonstrated initiative and serious engagement with the material in their previous coursework. To learn more about the application process, please visit our [website](#).

### The Senior Capstone Project

In their senior year, architecture majors are required to take ARCH UN3901 Senior Seminar. The major also requires that seniors submit a design portfolio and a writing sample before graduation. The portfolio includes representative work from all design studios and the writing sample is a research paper or essay from a senior-level architecture seminar or architecture-related course. Final submissions are archived in the department, design portfolios are displayed at the end-of-the-year show, and both the portfolio and the writing sample are evaluated and used to award graduation honors.

## DEPARTMENTAL HONORS AND PRIZES

### Departmental Honors

Each spring, our department nominates graduating architecture majors for departmental honors in recognition of academic excellence within the architecture major.

The senior graduation materials, which include a portfolio and research paper from an architecture course, are evaluated and used to award honors, prizes, and awards.

For Columbia College students, graduating seniors must have a grade point average of at least 3.6 in classes for the major to be eligible for departmental honors. For Barnard College and The School of General Studies students, there is no minimum GPA to be eligible for departmental honors.

## Academic Awards and Prizes

Several awards and prizes are sponsored by Barnard College, Columbia College, and the School of General Studies that graduating architecture majors may be nominated for. Students do not apply for these awards; recipients are selected by the departmental faculty and committees. The senior graduation materials, which include a portfolio and research paper from an architecture course, are evaluated and used to award these prizes.

### **Barnard College Scholarships, Fellowships, and Prizes (BC Students Only):**

[The Alpha Zeta Club Graduate Scholarship](#)

[The Josephine Paddock Fellowship](#)

[The Ethel Stone LeFrak Prize](#)

See [here](#) for a complete list of Barnard College Scholarships, Fellowships, and Prizes.

### **Columbia College and School of General Studies Prizes (CC and GS Students Only):**

[The Louis Sudler Prize in the Arts](#)

See [here](#) for a complete list of Columbia College Scholarships, Fellowships, and Prizes.

### **Architecture Department Awards (All Architecture Students):**

Graduating architecture majors are also eligible for the following departmental awards:

The Marcia Meade Design Award

The Portfolio Design Award

## OTHER IMPORTANT INFORMATION

### Double Counting Courses

We strongly encourage students to book an appointment with their major advisor to discuss the applicable rules around "double counting" courses towards two majors or two categories of requirements (e.g., the architecture major and the Foundations Requirements (Barnard) or The Core (Columbia)).

Below, we have also linked the specific web pages that address double-counting at each school:

**The Columbia College Bulletin:** [Academic Requirements](#) —> The Departmental Concentration or Major —> Policy on Double-Counting Courses toward Requirements

**The Barnard College Bulletin:** Curriculum --> Requirements for the Liberal Arts Degree --> [Foundations](#)

**The School of General Studies Bulletin:** The Core —> [General Guidelines](#)

The department of Architecture is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.

## FULL-TIME FACULTY

### **Chair and Director of Undergraduate Studies in Architecture:**

[Karen Fairbanks](#) (Claire Tow Professor of Professional Practice in Architecture)

### **Assistant Professors:**

[Ignacio G. Galán](#)

[Ralph Ghoche](#)

[Anooradha Iyer Siddiqi](#)

[Nick Smith](#) (Assistant Professor in Architecture and Assistant Professor in Urban Studies)

### **Professors of Professional Practice in Architecture:**

[Kadambari Baxi](#)

## ADJUNCT FACULTY

### **Adjunct Professors:**

Joeb Moore

Madeline Schwartzman

Suzanne Stephens

### **Adjunct Assistant Professors:**

Mark Bearak

Amina Blacksher

Eliana Dotan

Lindsay Harkema

Andrea Johnson

Annie Kountz

Clara Kraft

Leah Meisterlin

Nick Roseboro

Todd Rouhe

Michael Schissel

Fred Tang

Irina Verona

The department of Architecture is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.

Our Undergraduate Programs of Study

**[THE MAJOR IN ARCHITECTURE](#) (p. 224)**

**[THE MAJOR IN THE HISTORY AND THEORY OF ARCHITECTURE](#)**

## THE MINOR IN ARCHITECTURE

### THE MAJOR IN ARCHITECTURE

**The major in architecture is open to Barnard College students, Columbia College students, and General Studies students.**

**The required courses for the major are broken down into four categories: Studios; Lectures, Seminars, and Workshops; Senior Courses; and courses for the Specialization.**

#### Studio Courses

Four studio courses, to be taken one per semester (studio courses have limited enrollment and priority is given to Architecture majors):

ARCH UN2101	ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS
ARCH UN2103	ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS
ARCH UN3201	ADVANCED ARCHITECTURAL DESIGN I
ARCH UN3202	ADVANCED ARCHITECTURAL DESIGN II

#### Lecture, Seminar, and Workshop Courses \*

Five courses following the distribution requirement below:

ARCH UN3117	MOD ARCHITECTURE IN THE WORLD
-------------	-------------------------------

Architectural Elective: History

Architectural Elective: Society, Environment, and the Global

Architectural Elective: Design, Media, and Technology

Architectural Elective

#### Senior Courses \*

ARCH UN3901

Elective Architecture seminar (another Senior Seminar in the Department, Advanced Architectural Research and Design, or Independent Research)

#### Specialization Courses

All majors are asked to complement their work with a thematic unit (three courses) called the "specialization." Each student develops a specific specialization that broadens their architectural studies in one of the following areas or combination of areas: History, Society, Environment, Global, Design, Media, and Technology. Courses may be taken from across various departments. All majors, in consultation with their advisers, will develop a short (100 word) description of their specialization and advisers will approve their course selections. Students can request and develop other areas of specialization with adviser approval.

#### Graduation Requirements

The major also requires that students submit a portfolio and a writing sample before graduation. The design portfolio includes representative work from all design studios and the writing sample is a paper or essay from a senior level architecture or architecture-related course. Final submissions are archived in the department, the portfolios are displayed at the end of the year show, and both are used to award graduation honors.

Before each semester begins, our department reviews all available undergraduate courses and publishes a list of approved classes that fulfill the requirements for the architecture major and minor. These lists, known as our 'Program Planning Lists,' are typically released during our program planning meetings, and uploaded to [this page](#) on our website. If you have any questions about using these lists, please [schedule an appointment](#) with one of our faculty advisors.

### THE MAJOR IN THE HISTORY AND THEORY OF ARCHITECTURE

**The History and Theory of Architecture major emphasizes research and writing in Architectural History. This program of study is only open to Barnard College students. Columbia College and General Studies students who are interested in majoring in architectural history should contact the [Department of Art History and Archaeology at Columbia University](#).**

**The History and Theory of Architecture major consists of 14 courses, distributed as follows:**

#### Studio Courses

1-2 studio courses, to be taken one per semester:

ARCH UN1020	INTRO-ARCH DESIGN/VIS CULTURE
ARCH UN2101	ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS
ARCH UN2103	ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS

#### Lecture, Seminar, and Workshop Courses\*

7-8 lecture, seminar, and workshop courses:

ARCH UN3117	MOD ARCHITECTURE IN THE WORLD
-------------	-------------------------------

Architectural Elective: History

Architectural Elective: Society, Environment, and the Global

Architectural Elective: Design, Media, and Technology

3 to 4 Architectural Electives - any lecture, seminar, or workshop offered by the Architecture Department or an approved course from a related department

\*Note: Studios, Lectures, Seminars, and Workshops must total to 9 courses

### Specialization

3 courses for the specialization:

Each student develops a specialization that broadens the reach of their architectural studies and supports their thesis. All majors, in consultation with their advisers, will develop a short (100 word) description of their specialization and advisers will approve their course selections.

### Senior Courses\*

2 courses for the senior course requirement:

ARCH UN3901

ARCH UN3998 INDEPENDENT STUDY

All senior History and Theory of Architecture majors are required to enroll in one semester of Senior Seminar and to write a thesis which can be done through enrolling in Independent Study (ARCH UN3997 or ARCH UN3998). Please consult with your major adviser for planning your thesis.

**Before each semester begins**, our department reviews all available undergraduate courses and publishes a list of approved classes that fulfill the requirements for the architecture major and minor. These lists, known as our 'Program Planning Lists,' are typically released during our program planning meetings and uploaded to [this page](#) on our website. If you have any questions about using these lists, please [schedule an appointment](#) with one of our faculty advisers.

## THE MINOR IN ARCHITECTURE

**The minor in Architecture is open to Barnard College students, Columbia College students, General Studies students, and SEAS students at Columbia University.**

**The Architecture minor consists of five courses, structured as follows:**

### Studio Courses

Students must complete at least one of the following studio courses and may apply up to three toward the minor:

ARCH UN1020	INTRO-ARCH DESIGN/VIS CULTURE
ARCH UN2101	ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS
ARCH UN2103	ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS

### Lecture, Seminar, and Workshop Courses\*

Students must complete the following lecture course:

ARCH UN3117

MOD ARCHITECTURE IN THE WORLD

The remaining courses for the minor (a minimum of one, or up to three, depending on the total number of studio courses completed) may include any lecture, seminar, or workshop offered by the Architecture Department or an approved course from a related department, as listed in our program planning list.

**The department of Architecture is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

## ACADEMIC YEAR 2024-2025 COURSES

Most architecture courses have a restriction on online enrollment (meaning that you will automatically appear on the wait list when you try to register online) and require an application in order to be admitted. Links to our applications are available on our [website](#). For a complete list of courses across the university that have been approved to fulfill various architecture major and minor requirements, please refer to our [program planning list](#). For any questions, please sign up for a [faculty advising appointment](#).

## FALL 2024 COURSES

### ARCH UN1010 DESIGN FUTURES: NEW YORK CITY. 3.00 points.

How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design in contemporary culture -- from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences

#### Fall 2024: ARCH UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 1010	001/00557	F 1:10pm - 4:25pm 501 Diana Center	Hua Tang	3.00	19/20
ARCH 1010	002/00558	F 1:10pm - 4:25pm 502 Diana Center	Annie Kountz	3.00	16/20
ARCH 1010	003/00559	F 1:10pm - 4:25pm 111 Milstein Center	Clara Kraft Isono	3.00	16/20

#### Spring 2025: ARCH UN1010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

ARCH 1010	001/00818	F 1:10pm - 4:25pm 501 Diana Center	Richard Rouhe	3.00	18/20
ARCH 1010	002/00819	F 1:10pm - 4:25pm 502 Diana Center	Xiaoxi Chen	3.00	6/20
ARCH 1010	003/00820	F 1:10pm - 4:25pm 504 Diana Center	Andrea Johnson	3.00	15/20

### **ARCH UN1020 INTRO-ARCH DESIGN/VIS CULTURE. 3.00 points.**

Introductory design studio to introduce students to architectural design through readings and studio design projects. Intended to develop analytic skills to critique existing media and spaces. Process of analysis used as a generative tool for the students own design work. Must apply for placement in course. Priority to upperclass students. Class capped at 16

#### **Fall 2024: ARCH UN1020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 1020	001/00560	M W 1:10pm - 3:00pm 116 Lewisohn Hall	Richard Rouhe	3.00	8/14
ARCH 1020	002/00799	T Th 4:10pm - 6:00pm 116 Lewisohn Hall	Nicholas Chapman	3.00	9/14

#### **Spring 2025: ARCH UN1020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 1020	001/00821	M W 1:10pm - 3:00pm 116 Lewisohn Hall	Madeline Schwartzman	3.00	10/14
ARCH 1020	002/00822	T Th 9:00am - 10:50am 116 Lewisohn Hall	Angela Keele	3.00	12/14

### **ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS. 4.50 points.**

This architectural design studio explores material assemblies, techniques of fabrication, and systems of organization. These explorations will be understood as catalysts for architectural analysis and design experimentation. Both designed objects and the very act of making are always embedded within a culture, as they reflect changing material preferences, diverse approaches to durability and obsolescence, varied understandings of comfort, different concerns with economy and ecology. They depend on multiple resources and mobilize varied technological innovations. Consequently, we will consider that making always involves making a society, for it constitutes a response to its values and a position regarding its technical and material resources. Within this understanding, this studio will consider different cultures of making through a number of exercises rehearse design operations at different scales—from objects to infrastructures

#### **Fall 2024: ARCH UN2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2101	001/00561	T Th 9:00am - 11:50am 404 Diana Center		4.50	16/16
ARCH 2101	002/00562	M W 9:00am - 11:50am 404 Diana Center	Richard Rouhe	4.50	16/16

#### **Spring 2025: ARCH UN2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2101	001/00823	M W 9:00am - 11:50am 404 Diana Center	Michael Schissel	4.50	16/16

### **ARCH UN2103 ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS. 4.50 points.**

This architectural design studio course explores modes of visualization, technologies of mediation and environmental transformations. These explorations will be used as catalysts for architectural analysis and design experimentation. Introducing design methodologies that allow us to see and to shape environmental interactions in new ways, the studio will focus on how architecture may operate as a mediator – an intermediary that negotiates, alters or redirects multiple forces in our world: physical, cultural, social, technological, political etc. The semester will progress through three projects that examine unique atmospheric, spatial and urban conditions with the aid of multimedia visual techniques; and that employ design to develop creative interventions at the scales of an interface, space and city

#### **Fall 2024: ARCH UN2103**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2103	001/00563	M W 10:00am - 12:50pm 404 Diana Center	Madeline Schwartzman	4.50	15/16

#### **Spring 2025: ARCH UN2103**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2103	001/00824	M W 9:00am - 11:50am 404 Diana Center	Mariah Smith	4.50	16/16
ARCH 2103	002/00831	T Th 9:00am - 11:50am 404 Diana Center	Lindsay Harkema	4.50	16/16

### **ARCH UN2530 Life Beyond Emergency: Domesticities of Displacement, Inhabitations of Migration. 3.00 points.**

Life Beyond Emergency examines constructed environments and spatial practices in contexts of displacement, within the connected histories of colonialism and humanitarianism in the postcolonial world. People migrating under duress, seeking refuge, practicing mutual aid, and sheltering in governmental or nongovernmental settings invest architecture with a critical heritage value and imaginaries of life beyond emergency. The course considers a politics and poetics of an architecture of partitions, borders, and camps: territories and domesticities of concern to authorities and inhabited by ordinary people forging solidarities and futures. We will investigate the connected histories and theories of humanitarianism and colonialism, which have not only shaped lives as people inhabit spaces of emergency, but produced rationales for the construction of landscapes and domesticities of refuge, enacted spatial violence and territorial contestations, and structured architectural knowledge. The course examines iconic forms such as refugee camps in relation to histories of colonial institutions such as archives and prisons. From Somalia to Palestine to Bangladesh and beyond, our inquiry into contested 'borderlands' where

the greatest number of people have been forced to migrate as ‘refugees’ invites students to interrogate normalized discourses and spaces in order to imagine and analyze emergency environments as constructions that people have resisted, endured, and transcended

**Fall 2024: ARCH UN2530**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 2530	001/00063	M W 1:10pm - 2:25pm 504 Diana Center	Anooradha Siddiqi	3.00	40/60

**ARCH UN3120 CITY, LANDSCAPE, # ECOLOGY. 3.00 points.**

City, Landscape, Ecology is a thematically driven course that centers on issues and polemics related to landscape, land settlement and ecology over the past two centuries. The course interrogates our changing attitudes to nature from the 18th century to the present, focusing on the artistic and architectural responses to these perceptions. It aims to demonstrate the important role that artists and architects have played, and are to play, in making visible the sources of environmental degradation and in the development of new means of mitigating anthropogenic ecological change. City, Landscape, Ecology is divided into three parts. Part I explores important episodes in the history of landscape: picturesque garden theory, notions of “wilderness” as epitomized in national and state parks in the United States, Modern and Postmodern garden practices, and the prevalence of landscape in the work of artists from the 1960s to the present. The purpose here is to better understand the role that territorial organization plays in the construction of social practices, human subjectivities, and technologies of power. We then turn to ecology and related issues of climate, urbanization and sustainability in Part II. Here we will look at the rise of ecological thinking in the 1960s; approaches to the environment that were based on the systems-thinking approach of the era. In the session “Capitalism, Race and Population Growth” we examine the history of the “crisis” of scarcity from Thomas Robert Malthus, to Paul R. Ehrlich (The Population Bomb, 1968) to today and look at questions of environmental racism, violence and equity. The course concludes with Part III (Hybrid Natures). At this important juncture in the course, we will ask what is to be done today. We’ll examine the work of contemporary theorists, architects, landscape architects, policy makers and environmentalists who have channeled some of the lessons of the past in proposing lasting solutions to our land management and ecological crises of the present and future

**Fall 2024: ARCH UN3120**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 3120	001/00062	M W 2:40pm - 3:55pm 504 Diana Center	Ralph Ghoche	3.00	55/60

**ARCH UN3201 ADVANCED ARCHITECTURAL DESIGN I. 4.50 points.**

Prerequisites: ARCH V3101 and ARCH V3103. Open to architecture majors or with permission of instructor.

Prerequisites: ARCH UN2101 and ARCH UN2103. Advanced Architectural Design I explores the role of architecture and design in relationship to climate, community, and the environment through a series of design projects requiring drawings and models. Field trips, lectures, and discussions are organized in relation to studio exercises. A portfolio of design work from the prerequisite courses ARCH UN2101 and ARCH UN2103 will be reviewed the first week of classes

**Fall 2024: ARCH UN3201**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ARCH 3201	001/00564	M W 9:00am - 11:50am 116 Lewisohn Hall	Karen Fairbanks, Irina Verona, Michael Schissel, Eliana Dotan	4.50	42/42

**ARCH UN3211 ADVANCED ARCHITECTURAL RESEARCH AND DESIGN. 4.50 points.**

Prerequisites: ARCH V3202 and permission of the department chair. Enrollment limited as space permits.

Application required: A design portfolio and application is required for this course. The class list will be announced before classes start. Advanced Architectural Research and Design is an opportunity for students to consider international locations and address contemporary global concerns, incorporating critical questions, research methods, and design strategies that are characteristic of an architect’s operations at this scale

--------------	-----------	---	----------------------	------	-------

**ARCH UN3502 URBANIZING CHINA. 4 points.**

This course investigates the dramatic urban transformation that has taken place in mainland China over the last four decades. The speed and scale of this transformation have produced emergent new lifeways, settlement patterns, and land uses that increasingly blur the distinction between urban and rural areas. At the same time, Chinese society is still characterized by rigid, administrative divisions between the nation's urban and rural sectors, with profound consequences for people's lives and livelihoods. The course therefore examines the intersection between the rapid transformation of China's built environment and the glacial transformation of its administrative categories. We will take an interdisciplinary approach to this investigation, using perspectives from architecture, history, geography, political science, anthropology, urban planning, and cultural studies, among other disciplines.

The course is divided into two parts: Over the first five weeks, we will consider the historical context of China's urbanization and its urban-rural relations, including the imperial, colonial, and socialist periods, as well as the current period of reform. In the remainder of the semester, we will turn our focus to contemporary processes of urbanization, with a particular emphasis on the complex interrelationship between urban and rural China. This portion of the semester is organized into three two-week units on land and planning, housing and demolition, and citizenship and personhood.

ARCH 3997	006/00572		Anooradha Siddiqi	1.00-4.00/3	

**ARCH GU4305 ABOLITION ARCHITECTURE. 4.00 points.**

This seminar introduces students to architectural and environmental histories of abolition through constructed environments, spatial practices, and texts from the eighteenth century to the present. The course locates abolition in social movements and historical discourses, examining the roles that both reform and radical refusal have played in struggles for spatial justice by considering debates around enslavement, prisons, and borders. The course situates abolition as a significant intersectional feminist problem, and conceptually core to the consideration of race in global architectural history. We examine individual and collective works of architecture, art, landscape, and material culture, which highlight incarceration and the production of enclosure within the institutions that have shaped them in various parts of the world, and as elements of the formation of space, power, and knowledge in colonial and postcolonial contexts. The seminar is structured around multiple full-book engagements. We will closely read three texts that are foundational to the literature on abolition and architecture: *Are Prisons Obsolete?* by Angela Y. Davis; *Golden Gulag: Prisons, Surplus, Crisis, and Opposition in Globalizing California* by Ruth Wilson Gilmore; and *Marking Time: Art in the Age of Mass Incarceration* by Nicole Fleetwood. These readings are complemented by articles and other shorter texts, and works of art and architecture, which help to contextualize and draw out the themes of the course. Each student leads seminars on the readings and builds on this foundation by engaging in independent research, culminating in a long-format paper that intervenes in the discourse or frames a narrative, presenting an architectural history of abolition

**SPRING 2025 COURSES**

The course schedule listed below may be subject to change. Please revisit this page and the online Directory of Classes in November to confirm our spring course information.

**ARCH UN1010 DESIGN FUTURES: NEW YORK CITY. 3.00 points.**

How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design

in contemporary culture -- from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences

**Fall 2024: ARCH UN1010**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS. 4.50 points.**

This architectural design studio explores material assemblies, techniques of fabrication, and systems of organization. These explorations will be understood as catalysts for architectural analysis and design experimentation. Both designed objects and the very act of making are always embedded within a culture, as they reflect changing material preferences, diverse approaches to durability and obsolescence, varied understandings of comfort, different concerns with economy and ecology. They depend on multiple resources and mobilize varied technological

innovations. Consequently, we will consider that making always involves making a society, for it constitutes a response to its values and a position regarding its technical and material resources. Within this understanding, this studio will consider different cultures of making through a number of exercises rehearse design operations at different scales—from objects to infrastructures

**Fall 2024: ARCH UN2101**

**ARCH UN2103 ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS. 4.50 points.**

This architectural design studio course explores modes of visualization, technologies of mediation and environmental transformations. These explorations will be used as catalysts for architectural analysis and design experimentation. Introducing design methodologies that allow us to see and to shape environmental interactions in new ways, the studio will focus on how architecture may operate as a mediator – an intermediary that negotiates, alters or redirects multiple forces in our world: physical, cultural, social, technological, political etc. The semester will progress through three projects that examine unique atmospheric, spatial and urban conditions with the aid of multimedia visual techniques; and that employ design to develop creative interventions at the scales of an interface, space and city

**Fall 2024: ARCH UN2103**

**ARCH UN3117 MOD ARCHITECTURE IN THE WORLD. 4.00 points.**

Prerequisites: Designed for but not limited to sophomores; enrollment beyond 60 at the discretion of the instructor.  
Prerequisites: Designed for but not limited to sophomores; enrollment beyond 60 at the discretion of the instructor.

Modern Architecture in the World is an introduction to different arenas in which architecture's modern condition has been disputed in the last two centuries across different geographies. The course will address significant transformations in the built environment as well as the forms of practice, epistemic frameworks, and ideologies that led them. It will also attend to the forms of labor and economies that engendered new structures and organizations of space, the material resources and industries mobilized in their construction, the identities and forms of power they represented and imposed, the manifold embodiments that they hosted and shaped, the diverse socialites and politics they supported, and the ecologies they negotiated. The course is organized around a number of key themes, with each class covering episodes spanning the whole period under consideration, up until the present. In this way, it will question the existence of a single line of development, a master narrative, or a teleological line of progress and will highlight instead the multiple, simultaneous, conflicting, and branching genealogies unfolding throughout the period. Students will gain knowledge of key buildings, artifacts, trends, and schools as they relate to those genealogies. Each lecture will emphasize contending and shifting positions across geographies within the arenas explored, understanding hegemonic trends as well as dissenting positions. While different locations around the world will be highlighted in each class, the course positions modern architecture in the world by privileging an exploration of the cultural and material networks and hierarchies characteristic of the period—with attention to colonialism, coloniality, migration, resource extraction, and war, among others

## ART HISTORY AND ARCHAEOLOGY

### THE DEPARTMENT OF ART HISTORY AND ARCHAEOLOGY

Department website: <https://arthistory.columbia.edu/>

Office location: 826 Schermerhorn Hall

Office contact: 212-854-4505

Director of Undergraduate Studies: Professor Barry Bergdoll, [bgb1@columbia.edu](mailto:bgb1@columbia.edu)

Undergraduate Administrator: Emily Benjamin, [eb3061@columbia.edu](mailto:eb3061@columbia.edu)

## THE STUDY OF ART HISTORY

A major, minor, or concentration in the Department of Art History and Archaeology lays the basis for pursuing a variety of careers in and beyond the scholarly pursuit of the history of art, museum work, and work in the commercial art world of galleries and auction houses. The visual study of the world around us continues to increase in importance as global

communication becomes more often based in visual media, and understanding the sources and significance of images that form a common language of communication is crucial for anyone who aspires to play an active part in society. Art History majors have gone on to graduate education as well as careers in law, medicine, business, and academe, among others.

Critical study teaches not only the particulars of the art, archaeology, and architecture under study, but also the broader analytical and synthetic skills needed for mature, reasoned, and inventive solutions to broad-based questions in any field, with particular emphasis on the analysis of visual culture. As one of the largest Art History departments in the world, the Columbia–Barnard faculty include specialists in the art and architecture of an impressive spectrum of cultures and geographies from the Ancient Near East to Contemporary Global Art History. The curriculum offers coursework in the Pre-Columbian New World; in the art and architecture of Africa, of the Indian Subcontinent, of China, of Japan; in addition to many aspects of the art and architecture of North America and Europe, including African-American and diasporic art, and the art of First Nations in the Americas. Methodological approaches offered by the curriculum are equally diverse, including courses which explicitly address issues of gender and race. Several members of the faculty have extensive curatorial experience and regularly offer courses which comprise instruction in the history of collecting, display, and museum practices. Department courses take advantage of the extraordinary cultural resources of New York City and often involve museum assignments and trips to local monuments.

Surveys and advanced lecture courses offered by the Columbia and Barnard art history departments cover art history from antiquity to the present and introduce students to a wide range of materials and methodologies. Limited-enrollment seminars have a narrower focus than lectures and offer intensive instruction in research and writing. The opportunity for advanced research or a senior thesis is available to students who qualify.

The department offers three majors: Art History, History & Theory of Architecture, and a combined Art History+Visual Arts major; as well as two minors/concentrations: Art History, and History & Theory of Architecture.

## STUDENT ADVISING

Director of Undergraduate Studies (DUS): Professor Barry Bergdoll, [bgb1@columbia.edu](mailto:bgb1@columbia.edu)

Undergraduate Administrator: Emily Benjamin, [eb3061@columbia.edu](mailto:eb3061@columbia.edu)

## Consulting Advisers

Students should email the DUS and/or the Undergraduate Program Coordinator for questions regarding the major, minor,

or concentration. The department does not assign individual advisors to majors or minors/concentrators. The DUS makes the final decisions on all matters concerning the major, minor, or concentration, including transfer course requests.

Please email the Undergraduate Program Coordinator if you would like to be added to the Art History and Archaeology listserv.

The department holds Open House events in the fall and spring for interested students. The department also holds an Information Session in the spring for students interested in writing a Senior Thesis.

Please refer to the department website for the major, minor, and concentration course requirement checklists: <https://arthistory.columbia.edu/content/planning-sheets-forms-undergraduates>

## Enrolling in Classes

Students may enroll in lectures at the 1000-level, 2000-level, and 4000-level during registration periods. There are no prerequisites for these courses.

Students interested in enrolling in seminars at the 3000-level must submit an online application by the deadlines in April (for seminars taking place in the fall) and November (for seminars taking place in the spring). Students interested in enrolling in seminars at the 4500-level must submit an online application by the deadlines in January (for seminars taking place in the fall) and November (for seminars taking place in the spring). Links to these applications are included with the course descriptions on the department website. Specific deadlines are included on the website as well and are also circulated via the listserv. Once the seminar instructor has determined their class roster, accepted students will be instructed to join the SSOL wait-list so that the department can enroll them in the course.

## Preparing for Graduate Study

Students with questions about pursuing graduate study should email the DUS.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major, minor, or concentration must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the DUS. Exceptions or substitutions permitted by the DUS should be confirmed in writing by email to the student.

## Advanced Placement

The department does not grant credit for Advanced Placement or International Baccalaureate courses.

## Barnard College Courses

Many art history courses offered in the Art History Department at Barnard are treated as part of the available curriculum for the major, minor, and concentration requirements. Please refer to the Undergraduate Field Distribution Chart, linked from this page, to confirm which courses may count: <https://arthistory.columbia.edu/content/major-requirements>

## Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major, minor, or concentration program.

No more than three transfer courses may be counted toward the major or the concentration. No more than one transfer course may be counted toward the minor.

Students should fill out and email a Transfer Credit Request Form with the required attachments (syllabus, unofficial transcript, and example of written work for the course) to the Undergraduate Program Coordinator. The DUS will make the decision on whether the course may count. The form can be found here: <https://arthistory.columbia.edu/content/planning-sheets-forms-undergraduates>

## Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by the department as fulfilling requirements in the major, minor, or concentration, the DUS will need to confirm that they can be used toward the requirements.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia and are subject to the same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major, minor, or concentration, and they must be approved by the DUS.

## Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major, minor, or concentration only as articulated in the Department of Art History and Archaeology guidelines or by permission of the DUS. Please refer to the Undergraduate Field Distribution Chart, linked from this page, to confirm which Summer Term courses may count toward the major, minor, or concentration requirements: <https://arthistory.columbia.edu/content/major-requirements>

More general policies about Summer coursework can be found in the Academic Regulations section of this Bulletin.

## CORE CURRICULUM CONNECTIONS

Students may be interested in course offerings in Art History that can be taken in fulfillment of the Global Core requirement of the Core Curriculum. See the list of approved courses on [this page of the Bulletin](#).

While Art Humanities does not count toward the major, minor, or concentration requirements, students intending to declare one of these programs are encouraged to enroll in Art Humanities in their first or second year.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

At the heart of the major is the Majors Colloquium (AHIS UN3000 INTRO LIT/METHODS OF ART HIST) which introduces students to different methodological approaches to Art History and critical texts that have shaped the discipline. This course also prepares students for the independent research required in seminars and advanced lecture courses, and should be taken during junior year.

Sign-up information for Art History majors will be circulated via the department listserv.

The Majors Colloquium cannot be substituted by a transfer course.

### Senior Thesis Coursework and Requirements

The Senior Thesis is an optional project open to Art History, History & Theory of Architecture, and combined Art History + Visual Arts majors. It is a year-long project encompassing the senior year, as well as the summer before, and will consume

much of winter break and all of spring break. Substantial research and preparation is completed in the summer before the senior year. Submitting a senior thesis qualifies students to compete for departmental honors and (indirectly) strengthens dossiers for university honors. It is also an opportunity for students interested in graduate school to build their academic resumes and experience the intensity and rewards of graduate-style research.

All thesis writers are required to enroll in the year#long (YC) course AHIS UN3002 Senior Thesis Seminar, which is offered as a 3#point seminar in the fall and a 3#point seminar in the spring. This 6#point year#long seminar may substitute for a single elective lecture course. Students receive a grade at the end of the spring term which is applied to both semesters of the seminar. If a student withdraws after the fall term, they will receive a P/F grade for the fall term which cannot be applied to the major.

Securing faculty sponsorship is critical. Speaking with potential advisors during the spring semester of junior year (or earlier) is highly recommended. With approval of the DUS, students may work with a faculty sponsor outside the department. Written confirmation from the advisor is due in May of junior year. In August, students who have secured faculty sponsorship must submit the Senior Thesis Proposal based on research completed over the summer, which includes a proposal of about 400 words, an annotated bibliography, and the signature of the faculty sponsor.

Prospective thesis writers should have a GPA of at least 3.7 in art history courses and should have completed at least six courses counting toward the major requirements, preferably including at least one seminar. The DUS reviews the applications with the goal of ensuring that the student has the academic qualifications to succeed and has identified a credible project. Deadlines will be posted on the department website and circulated on the listserv.

## Undergraduate Research Outside of Courses

Students interested in exploring a specific topic with a faculty member may choose to pursue an independent study project. Students should contact the faculty member who they would like to work with directly. If the faculty member agrees to supervise the independent study, the faculty member will contact the Undergraduate Program Coordinator to have the student registered. Students may complete an independent study project for 3 points. Independent studies typically count toward lecture credit; exceptions may be made with the approval of the DUS.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

To be considered for departmental honors, students must have a GPA of at least 3.7 in classes for the major and have submitted a senior thesis of distinction. The faculty of the Department of Art History and Archaeology submits recommendations to the Committee on Honors, Awards, and Prizes for confirmation. Normally, no more than ten percent of the graduating majors in the department receive departmental honors.

### Academic Prizes

The Senior Thesis Prize is awarded annually for a senior thesis of superior distinction.

The Judith Lee Stronach Memorial Prize is awarded for outstanding contributions in art history or archaeology by a General Studies student.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before the 2023-2024 academic year may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements

section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

When selecting courses in the Department of Art History and Archaeology, students should keep in mind the specifics of course types, distribution requirements, and required coursework as outlined below.

### Course Numbering Structure

1000-level courses are broad survey lectures open to all undergraduate students. They do not count toward a historical or geographical requirement, though they may count as an elective lecture (or as a required course for HTAC programs, in the case of AHIS UN1007).

2000-level courses are survey lectures focusing on a particular subject area. They are open to all students.

3000-level courses are seminars open to undergraduate students only. Seminars

are limited enrollment classes which offer students the opportunity to explore a topic in depth with the instruction of a faculty member who is an expert in that field. Seminars typically require intensive reading and discussion, culminating in an extended research paper and oral presentation. Students must submit an application to be considered for enrollment in a seminar.

4000-4499-level courses are advanced bridge lectures open to undergraduate and graduate students. While instructor approval is not required, undergraduates are expected to have some background in the subject of the course.

4500-4999-level courses are advanced bridge seminars open to undergraduate and graduate students. As with undergraduate seminars, these courses require an application. Advanced knowledge within a field is typically expected. If you have questions about the suitability of a course, please contact the instructor to discuss your qualifications.

### Guidance for First-Year Students

There is no required sequence for completing a major, minor, or concentration in the department. However, first-year students interested in declaring one of these programs are encouraged to take Art Humanities in their first or second year. Students are also encouraged to take several 1000- and/or 2000-level survey lectures before applying for seminars in their junior and senior years.

### Guidance for Transfer Students

There is no required sequence for completing a major, minor, or concentration in the department. However, transfer students interested in declaring one of these programs are encouraged to take Art Humanities earlier rather than later. Transfer

students who want to transfer coursework in art history from a previous institution toward their program of study are strongly encouraged to meet with the Undergraduate Program Coordinator as soon as possible to submit these requests.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

#### Major in Art History

The major in Art History requires 11 total courses and can range from 36 to 43 points depending on which classes a student takes to fulfill the requirements.

Students must take three art history courses covering three of four distinct historical periods; two art history courses covering two of five distinct geographic regions; any two additional elective courses in art history; two art history seminars; a studio art course; and the Majors Colloquium. These courses may be taken in any order, though the seminars and the Colloquium are usually taken in junior and/or senior year.

The four historical period distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The five geographic region distribution categories are Africa; Asia; Europe/N. America/Australia; Latin America; and Middle East.

The Majors Colloquium should be taken during junior year. Sign-up information will be circulated via the department listserv. The Majors Colloquium cannot be substituted by a transfer course.

The studio art requirement can be fulfilled by any studio course in the Visual Arts Department. It may be taken Pass/Fail.

The Senior Thesis is an optional project open to Art History, History and Theory of Architecture, and Art History+Visual Arts majors. All thesis writers are required to enroll in the year# long (YC) course AHIS UN3002 Senior Thesis Seminar, which is offered as a 3#point seminar in the fall and a 3#point seminar in the spring. This 6#point year#long seminar may substitute for a single elective lecture course. Please refer to the Overview page for more information about the Senior Thesis.

#### Major in History and Theory of Architecture

The major in History and Theory of Architecture requires 11 total courses and can range from 37 to 43 points depending on which classes a student takes to fulfill the requirements.

Students must take AHIS UN1007 Introduction to the History of Architecture; ARCH UN1020 Introduction to Architectural Design and Visual Culture; three art/architectural history courses covering three of four distinct historical periods; one art/architectural history course covering one of four distinct geographic regions; any additional elective course in art/architectural history; two art/architectural history seminars;

and the Majors Colloquium. These courses may be taken in any order, though the seminars and the Colloquium are usually taken in junior and/or senior year. Three courses (not counting AHIS UN1007, ARCH UN1020, the Majors Colloquium, or the seminars) must focus on architectural history.

The four historical period distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The four geographic region distribution categories are Africa; Asia; Latin America; and Middle East.

The Majors Colloquium should be taken during junior year. Sign-up information will be circulated via the department listserv. The Majors Colloquium cannot be substituted by a transfer course.

ARCH UN1020 Introduction to Architectural Design and Visual Culture may be taken Pass/Fail.

The Senior Thesis is an optional project open to Art History, History and Theory of Architecture, and Art History+Visual Arts majors. All thesis writers are required to enroll in the year# long (YC) course AHIS UN3002 Senior Thesis Seminar, which is offered as a 3#point seminar in the fall and a 3#point seminar in the spring. This 6#point year#long seminar may substitute for a single elective lecture course. Please refer to the Overview page for more information about the Senior Thesis.

#### Combined Major in Art History+Visual Arts

The combined major in Art History+Visual Arts requires 16 total courses and can range from 49 to 57 points depending on which classes a student takes to fulfill the requirements. This is a large major and students are encouraged to begin coursework toward the major in sophomore year. Please contact the Visual Arts Department with questions on enrolling in studio courses and the Department of Art History and Archaeology with questions on art history courses. The DUS/Undergraduate Program Coordinator of both departments should be made aware of any transfer courses.

Students must take three art history courses covering three of four distinct historical periods; two art history courses covering two of five distinct geographic regions; any two additional elective courses in art history; seven three-point studio art courses including Basic Drawing and either Ceramics I or Sculpture I; the Majors Colloquium; and either a senior project in visual arts or a seminar in art history. These courses may be taken in any order, though the seminar, Majors Colloquium, and (optional) senior project in Visual Arts are usually taken in junior and/or senior year.

The four historical period distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The five geographic region distribution categories are Africa; Asia; Europe/N. America/Australia; Latin America; and Middle East.

The Majors Colloquium should be taken during junior year. Sign-up information will be circulated via the department

listserv. The Majors Colloquium cannot be substituted by a transfer course.

The art history Senior Thesis is an optional project open to Art History, History and Theory of Architecture, and Art History + Visual Arts majors. All thesis writers are required to enroll in the year-long (YC) course AHIS UN3002 Senior Thesis Seminar, which is offered as a 3-point seminar in the fall and a 3-point seminar in the spring. This 6-point year-long seminar may substitute for a single elective lecture course. Please refer to the Overview page for more information about the Senior Thesis.

## Minor in Art History

The minor in Art History requires 5 total courses and can range from 15 to 20 points depending on which classes a student takes to fulfill the requirements.

Students must take three art history courses covering three of four distinct historical periods; one art history course covering one of four distinct geographic regions; and any additional elective course in art history. At least one seminar is encouraged, though not required.

The four historical period distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The four geographic region distribution categories are Africa; Asia; Latin America; and Middle East.

## Minor in History and Theory of Architecture

The minor in History and Theory of Architecture requires 5 total courses and can range from 16 to 20 points depending on which classes a student takes to fulfill the requirements.

Students must take AHIS UN1007 Introduction to the History of Architecture; three art/architectural history courses covering three of four distinct historical periods; and one art/architectural history course covering one of four distinct geographic regions. Three courses (not counting AHIS UN1007) must focus on architectural history. At least one seminar is encouraged, though not required.

The four historical distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The four geographic distribution categories are Africa; Asia; Latin America; and Middle East.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

Concentrations are available to students who entered Columbia in or before the 2023-2024 academic year. The requirements for the Bachelor of Arts degree, and the role of the concentration in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year

when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Concentrations are not available to students who entered Columbia in or after Fall 2024.

## Concentration in Art History

The concentration in Art History requires 7 total courses and can range from 21 to 28 points depending on which classes a student takes to fulfill the requirements.

Students must take three art history courses covering three of four distinct historical periods; two art history courses covering two of five distinct geographic regions; and any two additional elective courses in art history. These courses may be taken in any order.

The four historical period distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The five geographic region distribution categories are Africa; Asia; Europe/N. America/Australia; Latin America; and Middle East.

## Concentration in History and Theory of Architecture

The concentration in History and Theory of Architecture requires 7 total courses and can range from 22 to 28 points depending on which classes a student takes to fulfill the requirements.

Students must take AHIS UN1007 Introduction to the History of Architecture; three art/architectural history courses covering three of four distinct historical periods; one art/architectural history course covering one of four distinct geographic regions; and any two additional elective courses in art/architectural history. These courses may be taken in any order. Three courses (not counting AHIS UN1007) must focus on architectural history.

The four historical period distribution categories are pre-400 CE; 400-1400 CE; 1400-1700 CE; and 1700-Present. The four geographic region distribution categories are Africa; Asia; Latin America; and Middle East.

## FALL 2024 UNDERGRADUATE AND BRIDGE LECTURES

*UNDERGRADUATE LECTURES: 2000-level courses.*

*Attendance at first class meeting is strongly recommended.*

*BRIDGE LECTURES: 4000-level courses. Open to graduate and advanced undergraduate students. Attendance at first class is strongly recommended.*

### AHIS UN1007 Introduction to the History of Architecture. 4.00 points.

This course is required for architectural history and theory majors, but is also open to students interested in a general introduction to the history of architecture, considered on a global scale. Architecture is analyzed through in-depth case

studies of key works of sacred, secular, public, and domestic architecture from both the Western canon and cultures of the ancient Americas and of the Hindu, Buddhist, and Islamic faiths. The time frame ranges from ancient Mesopotamia to the modern era. Discussion section is required

**Fall 2024: AHIS UN1007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 1007	001/11523	T Th 2:40pm - 3:55pm 614 Schermerhorn Hall	Michael Waters	4.00	67/90

**AHIS UN2405 TWENTIETH CENTURY ART. 4.00 points.**

The course will examine a variety of figures, movements, and practices within the entire range of 20th-century art—from Expressionism to Abstract Expressionism, Constructivism to Pop Art, Surrealism to Minimalism, and beyond—situating them within the social, political, economic, and historical contexts in which they arose. The history of these artistic developments will be traced through the development and mutual interaction of two predominant strains of artistic culture: the modernist and the avant-garde, examining in particular their confrontation with and development of the particular vicissitudes of the century's ongoing modernization. Discussion section complement class lectures. Course is a prerequisite for certain upper-level art history courses

**Fall 2024: AHIS UN2405**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 2405	001/11525	T Th 4:10pm - 5:25pm 301 Pupin Laboratories	Alexander Alberro	4.00	83/150

**AHIS UN2415 History Painting and Its Afterlives. 3.00 points.**

This course will study the problematic persistence of history painting as a cultural practice in nineteenth century Europe, well after its intellectual and aesthetic justifications had become obsolete. Nonetheless, academic prescriptions and expectations endured in diluted or fragmentary form. We will examine the transformations of this once privileged category and look at how the representation of exemplary deeds and action becomes increasingly problematic in the context of social modernization and the many global challenges to Eurocentrism. Selected topics explore how image making was shaped by new models of historical and geological time, by the invention of national traditions, and by the emergence of new publics and visual technologies. The relocation of historical imagery from earlier elite milieus into mass culture forms of early cinema and popular illustration will also be addressed

**Fall 2024: AHIS UN2415**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 2415	001/11526	T Th 4:10pm - 5:25pm 612 Schermerhorn Hall	Jonathan Crary	3.00	23/35

**AHUM UN2604 ARTS OF CHINA, JAPAN AND KOREA. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Introduces distinctive aesthetic traditions of China, Japan, and Korea--their similarities and differences--through an examination of the visual significance of selected works of painting, sculpture, architecture, and other arts in relation to the history, culture, and religions of East Asia

**Fall 2024: AHUM UN2604**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHUM 2604	002/15336	T Th 11:40am - 12:55pm 832 Schermerhorn Hall	Yeongik Seo	3.00	17/22
AHUM 2604	003/21002	M W 11:40am - 12:55pm 807 Schermerhorn Hall	Yi-bang Li	3.00	20/22

**Spring 2025: AHUM UN2604**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHUM 2604	001/15695	T Th 2:40pm - 3:55pm 832 Schermerhorn Hall	Yeongik Seo	3.00	22/22

**AHIS UN2622 Introduction to East Asian Art: China, Japan, and Korea. 4.00 points.**

This lecture course, with two weekly lectures and additional section meetings, surveys the broad outlines of the artistic traditions of China, Korea, and Japan, introducing key concepts, such as multiplicity, impermanence, and transmediality, through a diversity of forms of visual expression in painting, sculpture, bronze, ceramics, lacquer, and architecture. The weekly lectures and discussions will explore interregional relations and influence in order to discover not only the features that make each geographical tradition distinct, but also closely interconnected. Among the key themes to be examined are the archaeology of ancient East Asia, the development of Buddhist art, the arts of landscape and narrative painting, woodblock prints, and finally East Asia after modernity

**Fall 2024: AHIS UN2622**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 2622	001/20929	M W 2:40pm - 3:55pm 807 Schermerhorn Hall	Matthew McKelway	4.00	42/60

**AHIS GU4027 Architecture in Western Europe 1066-1399. 3.00 points.**

This course explores architecture in Western Europe during the Middle Ages. The time frame starts with the conquest of England in 1066 and ends with the appointment of Gothic experts in 1399 to advise on the construction of Milan Cathedral towards the end of the Middle Ages. The first

historical event coincides with the creation of architecture of a bewildering scale while the second reflects the end of building without architectural treatises or architectural theory - in a modern sense. The course will also introduce students to new digital technologies such as laser scanning and photogrammetry for the study of medieval architecture. No preliminary knowledge of medieval history or architectural history is needed, and no knowledge of digital technologies or specific computer skills is expected. The monuments selected belong to a period that starts when architecture moved away from Roman antique models and ends just before the re-adoption of Classical standards in the Renaissance. In this course the originality of medieval architecture, its relationship with earlier and later monuments, and the dramatic effort involved in its creation will be discussed. Major themes of medieval society such as pilgrimages, crusades, piety, the cult of relics, and the social and intellectual context of the Middle Ages are also part of this lecture. In the first weeks, important concepts of medieval society and its architecture will be presented in combination with a number of new technologies recently adopted in the field. These introductory classes will offer the foundations needed to understand artistic and architectural developments in the Middle Ages. While the course will focus on architecture, different media are included when they provide valuable information on the artistic and cultural context to which buildings belong. New technologies serve as a basis for a critical discussion about the changes in method introduced by new media and technologies in the field of architectural history

**Fall 2024: AHIS GU4027**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 4027	001/11531	M W 11:40am - 12:55pm 612 Schermerhorn Hall	Stefaan Van Liefferinge	3.00	36/45

**AHIS GU4093 Sacred Space in South Asia. 3.00 points.**

“Sacred” space in the Indian subcontinent was at the epicenter of human experience. This course presents Buddhist, Hindu, Islamic, and Jain spaces and the variety of ways in which people experienced them. Moving from the monumental stone pillars of the early centuries BCE to nineteenth century colonial India, we learn how the organization and imagery of these spaces supported devotional activity and piety. We discuss too how temples, monasteries, tombs, and shrines supported the pursuit of pleasure, amusement, sociability, and other worldly interests. We also explore the symbiotic relationship between Indic religions and kingship, and the complex ways in which politics and court culture shaped sacred environments. The course concludes with European representations of South Asia’s religions and religious places

**Fall 2024: AHIS GU4093**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 4093	001/11532	M W 10:10am - 11:25am 807 Schermerhorn Hall	Subhashini Kaligotla	3.00	26/45

**AHCE W4149 The Roman Art of Engineering: Traditions of Planning, Construction, and Innovation. 3.00 points.**

Interdisciplinary study of ancient Roman engineering and architecture in a course co-created between Arts & Sciences and Engineering. Construction principles, techniques, and materials: walls, columns, arches, vaults, domes. Iconic Roman buildings (Colosseum, Pantheon, Trajan’s Column) and infrastructure (roads, bridges, aqueducts, baths, harbors, city walls). Project organization. Roman engineering and society: machines and human labor; engineers, architects, and the army; environmental impact. Comparisons with current practice as well as cross-cultural comparisons with other pre-modern societies across the globe. A Columbia Cross-Disciplinary Course

**Fall 2024: AHCE W4149**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHCE 4149	001/14152	M W 4:10pm - 5:25pm 501 Schermerhorn Hall	Francesco de Angelis, Julius Chang	3.00	50/100

## FALL 2024 UNDERGRADUATE AND BRIDGE SEMINARS

*UNDERGRADUATE SEMINARS: 3000-level courses.*

*Open to undergraduate students only. Interested students must submit an online application (April deadline for fall courses, November deadline for spring courses). Visit the ["Courses" page on the department website](#) to find a list of undergraduate seminars and links to application forms.*

*BRIDGE SEMINARS: 4500-level courses. Open to graduate and advanced undergraduate students. Applications are due in August for fall courses, and January for spring courses. Visit the ["Courses" page on the department website](#) to find a list of bridge seminars and links to application forms.*

**AHIS UN3239 Medieval and Renaissance Venice. 4.00 points.**

This undergraduate travel seminar investigates the architecture, urbanism, and visual culture of Venice from its origins in the early medieval period to the sixteenth century, with particular focus on major religious and civic monuments. While San Marco and the adjacent Palazzo Ducale will be a core concern, Venetian monuments large and small will receive attention. Further emphasis will be placed on saintly relics as markers of cultural and religious identity, the invention and visual manifestation of cult traditions, and changes in Venice’s sacred topography as a result of its expansions on the mainland and in the Eastern Mediterranean

**Fall 2024: AHIS UN3239**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3239	001/15420	T 4:10pm - 6:00pm 930 Schermerhorn Hall	Michael Waters, Holger Klein	4.00	12/12

**AHIS UN3313 Women Painters in Europe, 1500-1750. 4 points.**

Histories of European Renaissance and Baroque art once narrated a story involving almost only male actors: it was men who made the period's paintings and sculptures, men who purchased them, and men who left their views on art for posterity. That characterization of the field is no longer quite so true, and one of the most significant changes in the field is that female painters now feature in every survey of the period. The aim of this course is to look comparatively at the painterly works produced by women across the early modern period and at the way those pictures have been treated in the scholarly literature from the last several decades.

**Fall 2024: AHIS UN3313**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3313	001/18756	Th 10:10am - 12:00pm 934 Schermerhorn Hall	Michael Cole	4	7/10

**AHIS UN3413 NINETEENTH-CENTURY CRITICISM. 4.00 points.**

Prerequisites: junior or senior standing, and the instructor's permission.

This course examines a diverse selection of social and aesthetic responses to the impacts of modernization and industrialization in nineteenth-century Europe. Using works of art criticism, fiction, poetry, and social critique, the seminar will trace the emergence of new understandings of collective and individual experience and their relation to cultural and historical transformations. Readings are drawn from Friedrich Schiller's *Letters On Aesthetic Education*, Mary Shelley's *The Last Man*, Thomas Carlyle's "Signs of the Time," poetry and prose by Charles Baudelaire, John Ruskin's writings on art and political economy, Flora Tristan's travel journals, J.-K. Huysmans's *Against Nature*, essays of Walter Pater, Nietzsche's *Birth of Tragedy* and other texts

**Fall 2024: AHIS UN3413**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3413	001/11530	M 4:10pm - 6:00pm 930 Schermerhorn Hall	Jonathan Crary	4.00	8/10

**AHIS UN3466 AIDS Is Contemporary. 4.00 points.**

This seminar examines two intertwined propositions. One is the undisputable fact that the global HIV/AIDS pandemic is ongoing and that the disease continues to shape the way artists and activists grapple with public health, national policy, and medical injustice. The other is my own polemic-in-formation, which is that the eruption of AIDS in the 1980s was the threshold event that inaugurated what is now understood to be "the contemporary" within the art world. Rather than periodize the start of "the contemporary" with the 1989 fall of the Berlin Wall, as has become conventional, we will investigate how the AIDS crisis precipitated a sudden urgency that more decisively

marks this transition, in particular around the promiscuous inclusion of non-fine art forms such as demonstration posters, zines, and handmade quilts. We will read foundational texts on HIV/AIDS organizing and look at interventions with graphic design, wheat-pasting, ashes action protests, body maps, embroidery, performance-based die-ins, voguing, film/video, and photography. We will consider: the inextricability of queer grief, anger, love, and loss; lesbian care; the trap of visibility; spirituality and death; activist exhaustion; the role played by artists of color within ACT-UP; and dis/affinities across the US, Latin America, and South Africa. Our investigations will be bookended by two critical exhibitions, *Witness: Against Our Vanishing* (Artists Space, 1989) and *Exposés* (Palais de Tokyo, 2023). Authors and artists/collectives include: Aziz Cuchar, Bambanani Women's Group, Feliciano Centurion, Douglas Crimp, Ben Cuevas, Felix Gonzalez-Torres, Darrel Ellis, fierce pussy, Elisabeth Lebovici, José Leonilson, Nicolas Moufarrege, Marlon Riggs, Matthew Wong, and the Visual AIDS archive. We will conclude with feminist, queer, and collaborative artistic work made during the (also ongoing) Covid-19 pandemic. In small groups, students will lead discussions of our texts and the final project will be a collectively curated virtual exhibition

**Fall 2024: AHIS UN3466**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 3466	001/15947	T 2:10pm - 4:00pm 930 Schermerhorn Hall	Julia Bryan-Wilson	4.00	16/16

**AHIS UN3471 The Harlem Renaissance # Black Modernism. 4.00 points.**

The Harlem Renaissance marks a pivotal era in art history, where Black artists, writers, and intellectuals redefined cultural and artistic expression. This course, "The Harlem Renaissance # Black Modernism," explores the dynamic factors that fueled this vibrant period, including the aftermath of the Reconstruction era, the Great Migration, and the influential contributions of key artists and thinkers. Throughout the course, we will examine the diverse artistic practices that emerged not only in Harlem but across broader networks in both the US and abroad, underscoring the movement's widespread impact. By situating the Harlem Renaissance within its broader contexts – such as histories of Black queer and feminist thought and transatlantic modernism — we will gain a deeper understanding of its lasting significance. Through weekly readings, discussions, and site visits, students will engage with the multifaceted legacy of the Harlem Renaissance and of Black modernist art more generally, analyzing their influence on contemporary discussions of art and culture. By the end of the course, students will have a comprehensive grasp of how this cultural renaissance shaped and continues to influence artistic production in ongoing ways

**Fall 2024: AHIS UN3471**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

934 Schermerhorn  
Hall

**AHIS GU4574 Picturing a New World: Illustrated Manuscripts in Early Colonial Mexico and Peru. 4 points.**

In this research seminar we will delve into the texts and images of four remarkable illustrated manuscripts created during the first century of the Spanish colonization of Mexico and Peru. Created by various agents—Spanish friars and indigenous authors and artists—these four bodies of work constitute some of the earliest and most important historical sources on the pre-Hispanic world of what is now Latin America, its history, and its traditions. But beyond their service as chronicles or ethnographies, these manuscripts can be examined as contested sites for the colonial negotiation of identity, culture, politics, and faith.

Our corpus includes the Mercedarian friar Martín de Murúa's ca. 1590 and 1613 manuscripts on the history of the Incas and Peru, the native Andean author and artist Felipe Guaman Poma de Ayala's 1615 "New Chronicle and Good Government," addressed to King Philip III in protest of Spanish colonial conditions in Peru, and the bilingual "Florentine Codex" compiled in Mexico in the 1570s by Nahua scribes and painters under the supervision of the Franciscan friar Bernardino de Sahagún.

This bridge seminar is open to undergraduate and graduate students.

Enrollment is by application. Spanish reading ability is highly recommended.

**Fall 2024: AHIS GU4574**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**AHIS GU4646 FOUCAULT AND THE ARTS. 4.00 points.**

Michel Foucault was a great historian and critic who helped change the ways research and criticism are done today – a new 'archivist'. At the same time, he was a philosopher. His research and criticism formed part of an attempt to work out a new picture of what it is to think, and think critically, in relation to Knowledge, Power, and Processes of Subjectivization. What was this picture of thought? How did the arts, in particular the visual arts, figure in it? How might they in turn give a new image of Foucault's kind of critical thinking for us today? In this course, we explore these questions, in the company of Deleuze, Agamben, Rancière and others thinkers and in relation to questions of media, document and archive in the current 'regime of information'. The Seminar is open to students in all disciplines concerned with these issues

**Fall 2024: AHIS GU4646**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
AHIS 4646	001/11533	W 4:10pm - 6:00pm 807 Schermerhorn Hall	John Allan Rajchman	4.00	22/25

**AHIS GU4746 Architecture, Labor, Industry, and the (long) "American Century". 4.00 points.**

From the industrial outposts up and down the eastern seaboard of the United States, across the Mississippi Delta, over the Great Lakes from Erie, Pennsylvania to Buffalo, Toronto, Detroit, and Chicago, over the western plains to Edmonton, Oklahoma City, Omaha, and from there to the technology centers of Vancouver, Seattle, and Silicon Valley, the sites of large-scale industry changed American society over two centuries. Just as gas flares mark subterranean oil deposits under the Texas plains, industrial buildings materialize complex networks of architecture, labor, and industry. They transform seemingly immaterial economic forces into concrete things through the labor of lots and lots of people. They are "fruiting bodies" that blossom from networks of money, labor, and natural resources, where human beings transform raw materials into consumer products. As industry moved across the North American continent, it took shape in buildings designed to optimize resources, improve manufacturing, and provide employment. From Amoskeag, New Hampshire to Silicon Valley, factories grew and changed in a continuous collective design process focused on throughput or flow. These buildings were also tied to urban development and large-scale housing; in studying industrial buildings, we also necessarily study cities, neighborhoods, and company towns. In addition, industrial buildings are meant to improve on the ones that came before them, and to give way to the optimizations of ones that come after. Factory design thus reflects a tangible belief in technical progress. Factories are embedded in society diachronically, across time, and synchronically, across space. They are not singularities; they are inherently relational buildings, like other forms of vernacular architecture. In classes that move chronologically through this terrain, we also focus on two questions: first, how has industrial architecture been situated within architectural history? Second, what happens when we study building design with the kind of heightened synchronic-diachronic awareness that industrial building demands? Industrial architecture is closely connected to capitalism. Studying it reveals architecture's role in that social organization in a new light. We will survey and closely study buildings to address these and other questions

**CLST GU4515 Connecting Histories: Roman Conquests and Coinage. 4.00 points.**

Aimed at advanced undergraduate and graduate students, this course aims to introduce coinage and the study of coins as historical disciplines and to provide a survey of the production and use of coinage in the Roman world from the third century BCE to the 1st century CE, with specific emphasis on the Late Republican coinage and the local coinages issued in the early Roman provinces. Over the course of the second and first centuries BCE, Rome conquered most of the Mediterranean world in a whirlwind of military campaigns. However, despite the unrivaled military power achieved during the second and first centuries BCE, one of the most surprising factors in the development of Roman domination of the Mediterranean world is that the Romans conquered and ruled most of it without imposing their coinage on the conquered. Therefore, it becomes even more important to research how local coinages converged—at least partly—to create compatible monetary systems across the Roman Empire. The students will have direct access to the world-class numismatic collections at the American Numismatic Collection (over 300,000 Roman and Greek pieces) and to the Olcott collection of Roman coins housed in the RBML in Butler Library (over 4,000 Roman pieces)

**AHIS UN2129 Before Rome: The Art and Architecture of Italy's Peoples in the First Millennium BCE. 3.00 points.**

This course explores the rich artistic traditions of the peoples living in Italy—the Etruscans, Italics, Greeks, Celts—from their emergence in the early first millennium BCE to their eventual absorption within the system of “Roman” art. While the arts of Etruria will form the backbone of the course, its conceptual focus will be on the densely entangled web that connected the diverse visual landscapes and creative practices of the Italian peninsula both to each other and to external centers of artistic production, from Cyprus and Carthage to Syria and the cultures of northern Europe. In addition to intercultural connectivity—imports and exports, convergences and divergences, parallels and unique features—special attention will be paid to the socio-political and religious dimensions of art and architecture. Both iconic and non-canonical objects will be examined, ranging from furniture and weaponry to anatomical votives and mythological paintings. This lecture is the first in a three-year cycle that also includes “Roman Art and Architecture” and “Rome Beyond Rome.”

### **AHIS UN2309 EARLY MODERN ARCHITECTURE (1550-1799). 3.00 points.**

This course examines the history of early modern architecture from a European perspective outward. It starts with the time of Michelangelo and Palladio and ends in the late eighteenth century. It addresses a number of transhistorical principal issues and analytical approaches while focusing on to a series of roughly chronological thematic studies. Travelling across courts, academies, streets, and buildings devoted to new institutions, this course examines the cultural, material, urban, social, and political dimensions of architecture, as well as temporal and geographic migrations of architectural knowledge. Topics will also include: the resurgence of interest in antiquity; the longue durée history of monuments; changes in building typology; the patronage and politics of architecture; technological developments and building practice; architectural theory, books, and the culture of print; the growth of capital cities; the creation of urban space and landscape; the formalization of architectural education; and the changing status of the architect.

#### **Spring 2025: AHIS UN2309**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **AHIS UN2311 Baroque Imperial Spain (17th Century). 3 points.**

The course will survey Baroque art in Hapsburg Spain, considered in the wide geographical context of the extended and dispersed dominions of the different crowns of the Spanish monarchy, which connected the Iberian Peninsula with Italy, Flanders and the New World. It will concern visual art in its various media, mainly painting, sculpture and architecture, but also tapestries, prints, armor, goldsmithery and ephemeral decoration, among others. Works of the main artists of the period will be introduced and analyzed, giving attention to the historical and cultural context of their production and reception. The course will particularly focus on the movement of artists, works and models within the Spanish Hapsburg territories, in order to understand to what extent visual arts contributed to shaping the political identity of this culturally composite empire.

#### **Spring 2025: AHIS UN2311**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **AHIS UN2409 Nineteenth-Century Architecture. 4.00 points.**

This course revisits some of the key moments in the architecture of the nineteenth century with the goal of understanding the relationship between these developments and a global modernity shaped by old and new empires. In doing so, it assumes a particular methodological stance. Rather than attempting to be geographically comprehensive, it focusses on the interdependencies between Europe and its colonies; instead of being strictly chronological, it is arranged around a constellation of themes that are explored through a handful of projects and texts. Reading of primary sources from the period under examination is a crucial part of the course. Students will have the opportunity to hone their critical skills by reading, writing, and conducting research toward a final paper. Discussion section required

### **AHIS UN2425 Visual Activism. 4.00 points.**

How has visual culture played a role within the social movements of the last several decades, such as #BlackLivesMatter and Extinction Rebellion? How, we might ask, is activism made visible; how does it erupt (or disappear) with collective fields of vision? Drawing upon Black South African queer photographer Zanele Muholi's term "visual activism" as a flexible rubric that encompasses both formal practices and political strategies, this lecture class interrogates contemporary visual cultures of dissent, resistance, and protest as they span a range of ideological positions. We will examine recent developments in and around recent intersections of art and politics from around the world, looking closely at performances, photographs, feminist dances, graffiti, murals, street art, posters, pussy hats, and graphic interventions, with a special focus on tactics of illegibility and encodedness. Topics include visual responses to structural racisms, global climate change, indigenous land rights, state violence, gentrification, forced migration, and queer/trans issues

**AHIS UN2702 PRE-COLUMBIAN ART AND ARCHITECTURE. 3.00 points.**

The Western Hemisphere was a setting for outstanding accomplishments in the visual arts for millennia before Europeans set foot in the so-called "New World." This course explores the early indigenous artistic traditions of what is now Latin America, from early monuments of the formative periods (e.g. Olmec and Chavín), through acclaimed eras of aesthetic and technological achievement (e.g. Maya and Moche), to the later Inca and Aztec imperial periods. Our subject will encompass diverse genre including painting and sculpture, textiles and metalwork, architecture and performance. Attention will focus on the two cultural areas that traditionally have received the most attention from researchers: Mesoamerica (including what is today Mexico, Guatemala, Belize, El Salvador, and Honduras) and the Central Andes (including Ecuador, Peru, and Bolivia). We will also critically consider the drawing of those boundaries—both spatial and temporal—that have defined "Pre-Columbian" art history to date. More than a survey of periods, styles, and monuments, we will critically assess the varieties of evidence—archaeological,

epigraphic, historical, ethnographic, and scientific—available for interpretations of ancient Latin American art and culture

**AHIS UN2804 Mediterranean Artistic Interactions in the Middle Ages and the Early Modern Era. 4.00 points.**

Transcultural studies are, today, part of any undergraduate curriculum in the field of humanities. In our contemporary mobile society, transculturality becomes a major phenomenon for understanding the driving power behind the creation of art, style, fashion and social behavior. The Medieval world was no less mobile, and the idea of the 'Global' has its roots in ancient times. In this course the medieval Mediterranean basin as space of interactions and the port/trade cities around it will serve as the exemplary arena, in which the constant interactions between Asia, Europe and Africa contributed to the mobility of aesthetic notions and novel ideas

**AHIS GU4089 NATIVE AMERICAN ART. 4.00 points.**

This course looks closely at objects and images produced by Native North Americans across history. Grounding our study in essays and guest lectures from Native scholars, we will investigate the significance of the works and how and to whom meaning is communicated. Beginning with an introduction that links aesthetics and worldview using the conventional organizing principle of the culture area, we quickly move on to case studies that take up key issues that persist for Native people living under settler colonialism today, including questions of sovereignty, self-expression, transformation and representation. Along the way, we will also tackle historiographic questions about how knowledge about Native art has been produced in universities and museums and how Indigenous people have worked to counter those discourses

**SPRING 2025 UNDERGRADUATE AND BRIDGE SEMINARS***UNDERGRADUATE SEMINARS: 3000-level courses.*

*Open to undergraduate students only. Interested students must submit an online application (April deadline for fall courses, November deadline for spring courses). Visit the "Courses" page on the department website to find a list of undergraduate seminars and links to application forms.*

*BRIDGE SEMINARS: 4500-level courses. Open to graduate and advanced undergraduate students. Applications are due in August for fall courses, and January for spring courses. Visit*

the "Courses" page on the department website to find a list of bridge seminars and links to application forms.

### **AHIS UN3105 Sacred Spaces # Divine Images Transformed. 4.00 points.**

This seminar will explore the profound transformation of art and architecture connected to the religious practices of both polytheists and monotheists that occurred across the Middle East when much of the region was under Roman rule. Sacred spaces we will focus on include the Temples of Bel and Baalshamin at Palmyra (destroyed in 2015) and Jupiter Heliopolitanus at Baalbek, the recently discovered synagogues at Migdal (Magdala), and the temples, housechurch, and synagogue at Dura-Europos. We will delve into topics such as possible cult continuity between the Iron Age and the Hellenistic and Roman periods, the creation of new deities, the roles of priests, aniconism and figural sculpture, and the construction and adornment of buildings to meet the specific needs of the cults of various deities, Judaism, and Christianity. We will explore and challenge traditional categories such as "Roman" and "provincial" art/architecture. Key questions to consider include the following: how were individuals/communities' personal, civic, and religious identities expressed in art/architecture that was influenced by interaction with Roman culture broadly, but also highly localized? The approach is interdisciplinary: we will study architecture, sculpture, mosaics, wall paintings, votive dedications, and inscriptions, and read Jane Lightfoot's 2003 translation of Lucian's *De Dea Syria* (On the Syrian Goddess). Discussion of current and future responses to the destruction of archaeological sites and monuments and looting, as well as the intertwining of cultural and humanitarian crises, will also form an important part of the course and prepare students to engage in contemporary debates. Our visit to the Yale University Art Gallery will provide students with the outstanding opportunity to examine sculptures and wall paintings from Dura-Europos first-hand and give presentations in the gallery

### **AHIS UN3318 Books and Architecture. 4 points.**

This seminar investigates architectural books as both carriers of knowledge and objects. Through the analysis of books, prints and drawings, as well as of their production, circulation and reception, this course explores how different figures have thought, discussed and written about architecture in Europe from the mid-Sixteenth Century to the end of the Eighteenth Century. The objects of investigation include architectural treatises, but also prints and books of various natures that contain architectural information. By questioning the stability of these media, the seminar aims to explore their mutability over time and place. It explores how these objects' meanings were shaped by their makers, by the material manipulations of their owners, and by their physical proximity to other works on

desks and library shelves. The seminar examines architectural theory's relationships with practice and with contemporary debates on society, as well as fields of knowledge such as literature, music, philosophy and science. It aims to understand how media have shaped the migration of architectural knowledge, the construction of Western architectural canons, and the developments of the architect's profession. At the same time, the object-based analysis of the rare books kept at the Avery Library will allow the class to address questions related to architectural representation, different architectural media, and printing technology. Students will learn how to deal with the complex relationships between texts and images, between drawings and prints, and between the 'architecture' of a book and its content.

#### **Spring 2025: AHIS UN3318**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **AHIS UN3402 Introduction to Design History. 4.00 points.**

This course offers an introduction to the history of design from the eighteenth century through the twenty-first century, with emphasis placed on the twentieth century. Attention will be paid to a wide range of design specializations, including industrial design and product design, fashion and textile design, automotive design, and graphic design. Proceeding in roughly chronological order, it will explore key themes in the history of design, including matters of taste and etiquette, social reform, the production of value, design education, branding and marketing, and recent trends in sustainable, speculative, and digital design. The course also considers the relationship between design and other modes of material production, including architecture, fine art, and craft

**AHIS UN3429 American Architecture: Skyscrapers # Urbanism. 4.00 points.**

This course will examine the distinctly American invention of the building type the “skyscraper” and its evolution and impact from the 1870s to today. We will approach the subject through a range of lenses – historiographical, critical, and methodological – exploring tall buildings and their history as objects of design, products of technology, sites of construction, investments in real estate, and places of work and residence. Throughout, the urban dimension will be key in our critical analysis. Classroom sessions, for the most part, will be organized as lectures and discussions of assigned readings. There will also be sessions outside the classroom, including a visit to the drawing collection of Avery Architectural & Fine Arts Library and to The Skyscraper Museum, as well as a walking tour of Midtown Manhattan

Spring 2025: AHIS UN3429

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**AHIS UN3438 Land and Landscape. 4.00 points.**

How did land—a primary source of economic value—become separated from landscape—an object of aesthetic enjoyment—in Enlightenment Europe and its colonies? This course examines the moment between the mid eighteenth and the mid nineteenth centuries when the physical and conceptual demarcations of land from landscape coincided with the emergence of political economic discourses, on the one hand, and the formulation of aesthetics as a separate branch of philosophical inquiry, on the other. Re-examining well-known moments in landscape history, the course aims to ask: What does a global modernity fueled as much by agriculturalization as by industrialization look like? How can this theoretical recalibration help construct new historical ontologies of such key concepts as nature, culture, and environment? What might this examination reveal about the vexed relationship between politics and aesthetics? And what are the historical interdependencies between economic value and aesthetic value?

Spring 2025: AHIS UN3438

**AHIS UN3791 Epic India: The Rama Story in Visual Art. 4.00 points.**

The epic story of Rama (Ramayana) is one of the most influential tales of the Indian subcontinent. It has been told and experienced in a stunning range of media across time and space: from epic verse and lyric poetry to painting, narrative sculpture, film, graphic novels, and puppet theater. While Valmiki’s Sanskrit Ramayana of ca. 500 BCE is acknowledged as the first, writers have recounted the tale in the polyglot array of Indic languages, from Kashmiri to Telugu, and infused it

with the values and interests of their own time and place. The story’s flexibility and capaciousness has encouraged social contestation and given voice to the concerns of disenfranchised social groups, including women and Dalits. This seminar will examine a generous array of South Asia’s visual Ramayana traditions from the ancient to the modern, encompassing temple relief sculpture, painted courtly manuscripts, and comic book and film Ramayanas. Reading a selection of primary texts alongside we consider this tale’s immense capacity to represent the gamut of human experience, both private and public, and its continued resonance for artists, writers, performers, and their publics

Spring 2025: AHIS UN3791

**AHIS GU4518 Greek Sanctuaries. 4.00 points.**

In every culture there exist highly specific features, which, in their interplay, create its quintessence. In terms of Greek antiquity, temples are generally considered one of these significant cultural parameters. One easily tends, however, to forget that temples are simply a small part – and not even an essential one – of so-called sacred or religious spaces. It is the sanctuary with its precinct wall, temples, sacred groves, divine images, offerings, and – above all – the altar or altars that constitutes the central and transcendent spatial element of ancient Greek religion. Nevertheless, despite their primarily religious function, Greek sanctuaries were never simply cultic spaces; every single one of them was to various degrees an integral part of its social, political, and economic context. The occasionally problematic interpretive model of the “polis religion” makes it absolutely clear that Greek sanctuaries cannot be studied and properly understood, if they are not examined beyond the constraints of religion. Aim of the seminar is to understand the forms and functions of architecture and dedicatory objects in Greek sanctuaries while analyzing these religious, social and political spaces as the centers in which Greek aesthetics, Greek identity, and ultimately Greek culture were shaped

Spring 2025: AHIS GU4518

**AHIS GU4534 Pastel and the Enlightenment. 4.00 points.**

This seminar takes as its hypothesis that pastel, an artistic medium whose rise to prominence in eighteenth-century Europe was as spectacular as it was short-lived, offers a particularly productive lens through which to consider some of the fundamental aesthetic, social, and cultural debates that helped shape Enlightenment thought. To test this hypothesis, we will study the work of celebrated pastel practitioners such

as Rosalba Carriera, Maurice-Quentin de La Tour, Jean-Étienne Liotard, and John Russell, in dialogue with primary sources authored by artists, art critics, art theoreticians, and philosophers, whose thought found provocative responses in the luminous, fragile, and ultimately modern surfaces of pastels. Topics of discussion will include: color in the discourse on art; craft in Diderot and d'Alembert's *Encyclopédie*; pastel, cosmetics, and identity; the art market and the debate on luxury; and new understandings of the self. These discussions will be informed by recent scholarship on eighteenth-century art engaging with questions of materiality, identity, and consumption, among others

**Spring 2025: AHIS GU4534**

### **AHIS GU4741 Art and Theory in a Global Context. 4.00 points.**

What is "globalization"? How does it change the way we think about or show art today? What role does film and media play in it? How has critical theory itself assumed new forms in this configuration moving outside post-war Europe and America? How have these processes helped change with the very idea of 'contemporary art'? What then might a transnational critical theory in art and in thinking look like today or in the 21st century? In this course we will examine this cluster of questions from a number of different angles, starting with new questions about borders, displacements, translations and minorities, and the ways they have cut across and figured in different regions, in Europe or America, as elsewhere. In the course of our investigations, we will look in particular at two areas in which these questions are being raised today -- in Asia and in Africa and its diasporas. The course is thus inter-disciplinary in nature and is open to students in different fields and areas where these issues are now being discussed

### **AHIS GU4946 Historicism # Restoration in European Arch.. 4.00 points.**

The aim of this seminar is to explore the relationship between changing theories of historical change and the practice of architecture in the long nineteenth century from the ideas of progress that animated architectural theory and design in the European Enlightenment to the critiques of historicism and of revivalism in the avant-gardes of the early twentieth century. It is the hypothesis of this seminar that during the period one of the dominant themes of architectural form making was the notion that all understanding is historically conditioned, that an understanding of the past evolution of architectural form was necessary to defining current practices and preparing for

the future, increasingly a subject of anxiety in this crucial period industrializing modernity. This relationship between theory and practice will not be considered uniquely in the realm of the history of ideas, however. Rather we will strive to "historicize historicism," and to examine the political, social and economic stakes and settings of historicist architectural practices primarily in France, Britain, and Germany. Issues of nationalism, colonialism, the discourses of progress, of natural science, and of evolution must necessarily overlap with our joint research. A key theme that runs throughout the course is the relationship between ideas of defining an appropriate historically based style for modern practice and the rise of a culture of restoration (rather than repair) of the newly defined category of the historical monument. As a result the course will be punctuated by a series of pairs that look at a single practitioner's practices between newly conceived construction and restoration

**Spring 2025: AHIS GU4946**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

## ASTRONOMY

### THE ASTRONOMY DEPARTMENT:

Department website: <https://www.astro.columbia.edu/>

Office location: 1328 Pupin

Office contact: 212-854-3278

Director of Undergraduate Studies:

Professor Frederik (Frits) Paerels, 1022 Pupin,  
[frits@astro.columbia.edu](mailto:frits@astro.columbia.edu)

### THE STUDY OF ASTRONOMY AND ASTROPHYSICS

Astronomy is, at once, the oldest science and one of the most vibrant fields of modern research. Its goal is to construct testable, quantitative, coherent models of the universe (the UNItY of the diVERSE) and its contents-galaxies, stars, and planets. The department offers two majors, both of which require a solid grounding in the mathematics and physics necessary for the pursuit of the discipline.

### STUDENT ADVISING

Professor Frederik (Frits) Paerels (DUS), 1022 Pupin,  
[frits@astro.columbia.edu](mailto:frits@astro.columbia.edu)

### Consulting Advisers

We mostly do advising on an individual basis. You can stop by during office hours (changing, check the department

Undergraduate Advising page: <https://www.astro.columbia.edu/content/undergraduate>), or you can make an appointment with the DUS (email). The DUS encourages you to come by in person and talk, and limit 'email advising'. We get to know you better that way (and you us), and the DUS can talk much faster than he can type.

You can sign up for our general department events email list: send email to [listserv@lists.columbia.edu](mailto:listserv@lists.columbia.edu) and include this line in the body of the message (not the subject line): subscribe astro-events (your first name)(your last name). All information important to undergraduate students (events, opportunities, meetings, curriculum, etc.) is sent to the undergraduate email list; to subscribe, send email to [listserv@lists.columbia.edu](mailto:listserv@lists.columbia.edu) and include this line in the body of the message (not the subject line): subscribe astro-ugs (your first name)(your last name). Consider joining the society of undergraduate students in astronomy: <https://blueshift.astro.columbia.edu>. To sign up to their mailing list, send email to [listserv@lists.columbia.edu](mailto:listserv@lists.columbia.edu), and include this line in the body of the message (not the subject line): subscribe blueshift (your first name)(your last name).

Throughout the year, we typically have a number of advising events, and those will be announced through the undergraduate and blueshift mailing lists: a general advising session on applying to graduate school (early Fall; mainly for juniors and seniors, but everyone is welcome), a general advising session on how to become involved in research in astronomy and astrophysics (early Fall), a general Department Open House (in the weeks before Major Declaration, early Spring).

You can find a one-page undergraduate astronomy flyer here:

<https://www.astro.columbia.edu/sites/default/files/content/docs/undergrad%20flyer.pdf>

You can find a suggested schedule of courses for the major (but note that this is not a mandatory or necessary time sequence; it's meant to help you start thinking):

<https://www.astro.columbia.edu/sites/default/files/content/docs/Suggested%20Sequence%20of%20Courses%20for%20Majors.pdf>

## Enrolling in Classes

There are no specific steps, prerequisites, or placement tests to enroll in any astronomy classes, other than the ones that are listed in the Bulletin (e.g. you should have taken basic calculus before enrolling in the Introductory Physics Sequence, and the Introduction to Astrophysics sequence).

## Preparing for Graduate Study

The astrophysics major is designed as preparation for graduate study and consists of a standard physics major sequence; a yearlong introduction to astrophysics (typically taken in the sophomore year, but open to first-years with adequate preparation in calculus and physics); and two required courses covering advanced topics in astronomy. Research, in the

form of summer internships and/or term-time independent projects, which can lead to a senior thesis, is strongly encouraged. For a research thesis, students should enroll in the parallel, two-semester sequence ASTR UN3997-ASTR UN3998 INDEPENDENT RESEARCH, preferably in their senior year. Students begin the research project in the fall and complete the written thesis in the spring.

The astronomy major provides a basis for further study in the field, but is also designed to be compatible with liberal arts students who pursue other careers and those wishing to combine astronomy with related sciences other than physics, such as chemistry or geology. It requires only two physics courses beyond the introductory sequence and can be completed easily if begun in the sophomore year.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The standard CC rules for AP credit apply. If you are wondering whether AP Physics can be counted: our standard advice is to take the Intro Physics sequence anyway, unless special circumstances apply.

### Barnard College Courses

1000-level Astronomy courses taken at Barnard are equivalent to 1000-level courses at Columbia. When working on an Astrophysics Major, you may replace the Physics 4021/4022 Quantum Mechanics I, II sequence by: BC 3006 Quantum Physics plus Physics 4023 Statistical Physics.

### Transfer Courses

The standard Columbia College (and School of General Studies) rules with regard to transfer credit apply.

### Study Abroad Courses

If you are considering studying abroad for a semester, come talk to the DUS. We can find courses that will fulfill Columbia requirements at many institutions (and may even be able to tell you about individual instructors in astrophysics courses...). Students have taken courses as far afield as Tokyo and Istanbul.

### Summer Courses

The department usually teaches one 1000-level Summer course (Astronomy 1403 or 1404).

## CORE CURRICULUM CONNECTIONS

In a deep sense: connections everywhere. In a narrow sense: no connection.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

You are encouraged to undertake an original research project, especially if you want to prepare for graduate school. You can enroll in Astronomy 3997 (Fall semesters) or 3998 (Spring semesters) for a semester-long research project, for 3 credits. The general expectation is that this will take about as much time as taking a regular 3-credit class (about a day per week).

### Senior Thesis Coursework and Requirements

#### Undergraduate Research Outside of Courses

Many students use one Summer (sometimes multiple Summers) to conduct research. The Department usually organizes a informational meeting in the Fall semester on how you can go about finding opportunities (sign up for the department undergraduate mailing list to receive announcements).

## DEPARTMENT HONORS AND PRIZES

The Department of Astronomy does not have Departmental Honors or Prizes. The Department has a Research Fellowship for Astronomy or Astrophysics Majors at CC, BC, and GS, the Bell-Burnell Fellowship, to carry out research in the Summer between the junior and senior years.

## PROFESSORS

Marcel Agüeros  
James Applegate  
Greg Bryan (Chair)  
Zoltan Haiman  
Jules P. Halpern (*emeritus*)  
David J. Helfand  
Kathryn Johnston

Rebecca Oppenheimer (Hayden Planetarium)  
Michael Shara (Hayden Planetarium)  
Ruth Angus (Hayden Planetarium)

## ADJUNCT SENIOR RESEARCH SCIENTIST

Melissa K. Ness

## ON LEAVE

Prof. Bryan, Johnston (Spring 2025)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

If you are interested in pursuing a Major in Astronomy or Astrophysics, make an appointment with the DUS to discuss a course of study, and do this early. The programs can in principle be completed in two years- but only if you have already completed almost all other requirements. Most students prefer to start on Major-required courses in their first and/or second year. You can find an example schedule here: <https://www.astro.columbia.edu/sites/default/files/content/docs/Suggested%20Sequence%20of%20Courses%20for%20Majors.pdf>

There is an implied progressive structure to some of the courses: for instance, taking the Introductory Physics Sequence means you should have taken basic Calculus. Likewise, starting on the Introduction to Astrophysics sequence means you know basic, calculus-based physics. If in doubt about the flexibility of the schedule, talk to the DUS.

Courses in which the grade of D has been received do not count toward the major, minor, or concentration requirements.

### Course Numbering Structure

The 1000-level courses do not use calculus (but they are quantitative!), and are meant to provide an overview of fields of astronomy and astrophysics for non-major students. They can all count towards fulfilling the science requirements for non-science majors. With one exception (see under the Astronomy Major), the 1000-level courses can not be counted towards the credits for an Astrophysics or Astronomy Major.

The 2000-level courses (Introduction to Astrophysics I and II) provide an overview of astrophysics at the introductory professional level: calculus based, physics-based.

3000-level courses in the Astronomy department are more advanced electives. They generally assume you are familiar with the content of the 2000-level courses. Most 3000-level courses, as well as ASTR GU4260 MODELING THE UNIVERSE, are offered every other year. Students should inquire with the director of undergraduate studies if they have

specific questions on the course schedule. ASTR UN3996 Current Research in Astrophysics is a one-point course offered in the fall, designed to introduce majors to research methods and topics. It requires students to attend the department colloquia and a seminar designed to help students understand the colloquium topic. The 3000-level courses need not be taken in any particular order.

4000-level courses are aimed at advanced undergraduates and beginning graduate students.

## Guidance for First-Year Students

If you think you may want to pursue a Major in Astronomy or Astrophysics, come talk to the DUS. If you have to make quick decisions by yourself: the rule of thumb is: start with the Math requirements, the next priority is Introductory Physics, then Astrophysics and Astronomy.

## Guidance for Transfer Students

The standard Columbia College rules for transfer credit apply. You should contact the DUS as soon as you know you are transferring to plan for what will probably be a tight program (depending in what year you transfer, but especially when you start as a junior).

If you are considering applying to graduate school, we need to make sure, in particular, that you get to do an individual research project.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

Common to both the Astronomy and the Astrophysics Major are the Calculus sequence and an Introductory Physics sequence (the Physics 1400, 1600, or 2800 series).

### Major in Astronomy

#### Mathematics

Calculus sequence through MATH UN1202 Calculus IV or MATH UN1208 Honors Mathematics IV

#### Astronomy

Select one of the following options:

##### Option 1:

Two 3-point 1000-level astronomy courses

12 points in astronomy at the 2000-level or above

##### Option 2:

ASTR UN2001      INTRO TO ASTROPHYSICS I  
& ASTR UN2002      and INTRO TO  
                                 ASTROPHYSICS II

9 points in astronomy at the 3000-level or above

#### Physics

Select one of the following physics sequences:

#### Sequence 1:

PHYS UN1401      INTRO TO MECHANICS #  
& PHYS UN1402      THERMO  
& PHYS UN1403      and INTRO ELEC/MAGNETISM  
                                 # OPTCS  
                                 and INTRO-CLASSCL #  
                                 QUANTUM WAVES

#### Sequence 2:

PHYS UN1601      PHYSICS I:MECHANICS/  
& PHYS UN1602      RELATIVITY  
& PHYS UN2601      and PHYSICS II: THERMO,  
                                 ELEC # MAG  
                                 and PHYSICS III:CLASS/  
                                 QUANTUM WAVE

#### Sequence 3:

PHYS UN2801      ACCELERATED PHYSICS I  
& PHYS UN2802      and ACCELERATED PHYSICS  
                                 II

#### Additional Physics Courses

Two physics courses at the 3000-level or above

Students contemplating graduate study are advised to include at least two of these physics courses:

PHYS UN3003      MECHANICS  
PHYS UN3007      ELECTRICITY-MAGNETISM  
PHYS GU4021      QUANTUM MECHANICS I  
& PHYS GU4022      and QUANTUM MECHANICS  
                                 II

One of these may be substituted for 3 points of astronomy.

### Major in Astrophysics

Students considering an Astrophysics major are encouraged to meet with the director of undergraduate studies. If possible, it is useful to start the physics sequence in the first year.

#### Mathematics

Calculus sequence through MATH UN1202 Calculus IV or MATH UN1208 Honors Mathematics IV

#### Astronomy

ASTR UN2001      INTRO TO ASTROPHYSICS I  
& ASTR UN2002      and INTRO TO  
                                 ASTROPHYSICS II

6 points in astronomy at the 3000-level or above

#### Physics

Select one of the following physics sequences:

##### Sequence 1:

PHYS UN1401      INTRO TO MECHANICS #  
& PHYS UN1402      THERMO  
& PHYS UN1403      and INTRO ELEC/MAGNETISM  
                                 # OPTCS  
                                 and INTRO-CLASSCL #  
                                 QUANTUM WAVES

##### Sequence 2:

PHYS UN1601 & PHYS UN1602 & PHYS UN2601	PHYSICS I:MECHANICS/ RELATIVITY and PHYSICS II: THERMO, ELEC # MAG and PHYSICS III:CLASS/ QUANTUM WAVE
---	---

**Sequence 3:**

PHYS UN2801 & PHYS UN2802	ACCELERATED PHYSICS I and ACCELERATED PHYSICS II
------------------------------	--

**Additional Physics Courses**

PHYS UN3003	MECHANICS
PHYS UN3007	ELECTRICITY-MAGNETISM
PHYS UN3008	ELECTROMAGNETIC WAVES # OPTICS
PHYS GU4021 & PHYS GU4022	QUANTUM MECHANICS I and QUANTUM MECHANICS II

OR

PHYS BC3006 & PHYS GU4023	QUANTUM PHYSICS and THERMAL # STATISTICAL PHYSICS
------------------------------	---

## Joint Minor -- Earth and Space

Note that the information on this page is identical to the information on the corresponding page for the Department of Earth and Environmental Sciences.

The minor in Earth and Space requires a minimum of 15 points, distributed as follows:

**Introductory Course**

3 points minimum (one course):

One of the following:

ASTR UN1453	ANOTHER EARTH
ASTR BC1753	LIFE IN THE UNIVERSE
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

**Astronomy Courses**

6 points minimum (two courses):

Two of the following:

ASTR UN1403	EARTH, MOON, AND PLANETS
ASTR UN1404	STARS, GALAXIES # COSMOLOGY
ASTR UN1420	Galaxies and Cosmology
ASTR UN1836	STARS AND ATOMS

Or the following ASTR sequence:

ASTR UN2001	INTRO TO ASTROPHYSICS I
ASTR UN2002	INTRO TO ASTROPHYSICS II

**DEES Courses**

6 points minimum (two courses):

One of the following:

EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
-------------	---

EESC UN3201	SOLID EARTH DYNAMICS
-------------	----------------------

Plus one of the following:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
-------------	-----------------------------------

EESC UN3101	Geochemistry for a Habitable Planet
-------------	--

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Astronomy

An extra 3 points of physics can substitute for 3 points of astronomy, as long as the course submitted is at the equivalent or higher level. The concentration requirements are as follows:

**Mathematics**

9 points of mathematics

**Astronomy**

15 points of astronomy, nine of which must be at or above the 2000-level

**Physics**

9 points of physics

## FALL 2024

**ASTR UN1403 EARTH, MOON, AND PLANETS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond. This course is similar to ASTR BC 1753. You cannot enroll in both courses and receive credit for both

**Fall 2024: ASTR UN1403**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1403	001/14142	M W 1:10pm - 2:25pm 326 Uris Hall	James Applegate	3.00	41/75

**ASTR UN1420 Galaxies and Cosmology. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Galaxies contain stars, gas dust, and (usually) super-massive black holes. They are found throughout the Universe, traveling through space and occasionally crashing into each other. This

course will look at how these magnificent systems form and evolve, and what they can tell us about the formation and evolution of the Universe itself. You cannot enroll in ASTR UN1420 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

#### Fall 2024: ASTR UN1420

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1420	001/14143	T Th 10:10am - 11:25am 303 Uris Hall	Mary Putman	3	54/75

#### ASTR UN1453 ANOTHER EARTH. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

This course cannot be taken for credit if BC1753 has been taken.

This course will explore the unique properties of Earth, compared to other planets in the Solar System, and the possibility of Earth-like planets around other stars. The basics of the Solar System, gravity, and light will be covered, as well as the geology and atmospheres of the terrestrial planets. The properties of Earth that allowed life to develop and whether life can develop on other planets will be discussed. Finally, the discovery of planets beyond our Solar System and the likelihood of another Earth will be a key component of the course

#### Fall 2024: ASTR UN1453

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1453	001/14144	T Th 2:40pm - 3:55pm 702 Hamilton Hall	Nicholas Lubner	3.00	62/80

#### ASTR UN1836 STARS AND ATOMS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both

#### Fall 2024: ASTR UN1836

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1836	001/14612	T Th 8:40am - 9:55am 517 Hamilton Hall	Kathryn Johnston	3.00	36/80

#### Spring 2025: ASTR UN1836

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

ASTR 1836	001/14275	T Th 1:10pm - 2:25pm 702 Hamilton Hall	James Applegate	3.00	50/80
-----------	-----------	---	-----------------	------	-------

#### ASTR UN1903 ASTRONOMY LAB I. 1.00 point.

Laboratory for ASTR UN1403. Projects include observations with the departments telescopes, computer simulation, laboratory experiments in spectroscopy, and the analysis of astronomical data. Lab 1 ASTR UN1903 - goes with ASTR BC1753, ASTR UN1403 or ASTR UN1453

#### Fall 2024: ASTR UN1903

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1903	001/10391	M 6:00pm - 9:00pm 1402 Pupin Laboratories	Greg Bryan, Sally Jiang	1.00	9/12
ASTR 1903	002/14613	T 7:00pm - 10:00pm 1402 Pupin Laboratories	Greg Bryan, Abigail Moran	1.00	11/12

#### Spring 2025: ASTR UN1903

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1903	001/11204	M 6:00pm - 9:00pm 1402 Pupin Laboratories	Greg Bryan, Stephen Coffey	1.00	20/20
ASTR 1903	002/11205	T 7:00pm - 10:00pm 1402 Pupin Laboratories	Greg Bryan, Justin Vega	1.00	19/20

#### ASTR UN1904 ASTRONOMY LAB II. 1.00 point.

Laboratory for ASTR UN1404. Projects include use of telescopes, laboratory experiments in the nature of light, spectroscopy, and the analysis of astronomical data. Lab 2 ASTR UN1904 - goes with ASTR BC1754 or ASTR UN1404 (or ASTR UN1836 or ASTR UN1420)

#### Fall 2024: ASTR UN1904

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1904	001/10392	W 6:00pm - 9:00pm 1402 Pupin Laboratories	Lori Porter, Greg Bryan	1.00	12/12

#### Spring 2025: ASTR UN1904

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1904	001/11206	W 6:00pm - 9:00pm 1402 Pupin Laboratories	Greg Bryan, Fred Angelo Garcia	1.00	8/14

#### ASTR UN2001 INTRO TO ASTROPHYSICS I. 3.00 points.

Prerequisites: a working knowledge of calculus. Corequisites: a course in calculus-based general physics. First term of a two-term calculus-based introduction to astronomy and astrophysics. Topics include the physics of stellar interiors, stellar atmospheres and spectral classifications, stellar energy generation and nucleosynthesis, supernovae, neutron stars, white dwarfs, and interacting binary stars

**Fall 2024: ASTR UN2001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2001	001/14145	T Th 2:40pm - 3:55pm 304 Hamilton Hall	Jane Huang	3.00	23/40

**ASTR UN2900 FRONTIERS OF ASTROPHYSICS. 1.00 point.**

Several members of the faculty each offer a brief series of talks providing context for a current research topic in the field and then present results of their ongoing research. Opportunities for future student research collaboration are offered. Grading is Pass/Fail

**Fall 2024: ASTR UN2900**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2900	001/14146	F 10:10am - 11:25am 420 Pupin Laboratories	Greg Bryan	1.00	42/46

**ASTR UN3101 MODERN STELLAR ASTROPHYSICS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. Introductory astronomy is not required, but some exposure to astronomy is preferable. In the first half of the course, we will examine the physics of stellar interiors in detail, leading us to develop models of stellar structure and consider how stars evolve. In the second half of the course, we will discuss special topics, such as pre-main sequence evolution, the late stages of stellar evolution, and supernovae and compact objects.

**Fall 2024: ASTR UN3101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3101	001/14147	M W 1:10pm - 2:25pm 325 Pupin Laboratories	Marcel Agueros	3.00	10/25

**ASTR UN3601 RELATIVITY, BLACK HOLES, COSMOLOGY. 3.00 points.****Fall 2024: ASTR UN3601**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3601	001/14614	T Th 1:10pm - 2:25pm 307 Uris Hall	Frederik Paerels	3.00	30/35

**ASTR UN3986 ASTROSTATISTICS. 3.00 points.**

Astronomers live in era of “big data”. Whilst astronomers of a century ago collected a handful of photographic plates each night, modern astronomers collect thousands of images encoded by millions of pixels in the same time. Both the volume of data and the ever present desire to dig deeper into data sets has led to a growing interest in the use of statistical methods to interpret observations. This class will provide an introduction to the methods commonly used in understanding astronomical data

sets, both in terms of theory and application. It is one six classes the department offers every fourth semester

**Fall 2024: ASTR UN3986**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3986	001/14861	T Th 10:10am - 11:25am 1332 Pupin Laboratories	David Kipping	3.00	16/25

**ASTR UN3997 INDEPENDENT RESEARCH. 3.00 points.**  
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration. Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration. A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Senior majors in astronomy or astrophysics wishing to do a senior thesis should make arrangements in May of their junior year and sign up for a total of 6 points over their final two terms. Both a substantial written document and an oral presentation of thesis results are required

**Fall 2024: ASTR UN3997**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3997	001/14149		Frederik Paerels	3.00	11/15

**SPRING 2025****ASTR UN1234 UNIVERSAL TIMEKEEPER. 3.00 points.**  
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school algebra and latent curiosity are assumed.

The goal of the course is to illustrate — and perhaps even inculcate — quantitative and scientific reasoning skills. The subject material employed in this task is the study of atoms and their nuclei which, through a wide variety of physical and chemical techniques, can be used to reconstruct quantitatively the past. Following an introduction to atoms, light, and energy, we will explore topics including the detection of art forgeries, the precise dating of archeological sites, a reconstruction of the development of agriculture and the history of the human diet, the history of past climate (and its implications for the future), the history and age of the Earth, and the history of the Universe. The course has no required text. Readings of relevant articles and use of on-line simulations will be required.

**Spring 2025: ASTR UN1234**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1234	001/14272	M W 2:40pm - 3:55pm 402 Chandler	David Helfand	3.00	44/80
ASTR 1234	AU1/18497	M W 2:40pm - 3:55pm Othr Other	David Helfand	3.00	6/6

**ASTR BC1753 LIFE IN THE UNIVERSE. 3.00 points.**

An introductory course intended primarily for nonscience majors. This interdisciplinary course focuses on the subject of Life in the Universe. We will study historical astronomy, gravitation and planetary orbits, the origin of the chemical elements, the discoveries of extrasolar planets, the origin of life on Earth, the evolution and exploration of the Solar System, global climate change on Venus, Mars and Earth, and the Search for Extraterrestrial Life (SETI). You cannot receive credit for this course and for ASTR UN1403 or ASTR UN1453. Can be paired with the optional Lab class ASTR UN1903

**Spring 2025: ASTR BC1753**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1753	001/00430	T Th 2:40pm - 3:55pm 408 Zankel	Nicholas Lubner	3.00	142/140

**ASTR UN1836 STARS AND ATOMS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both

**Fall 2024: ASTR UN1836**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1836	001/14612	T Th 8:40am - 9:55am 517 Hamilton Hall	Kathryn Johnston	3.00	36/80

**Spring 2025: ASTR UN1836**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1836	001/14275	T Th 1:10pm - 2:25pm 702 Hamilton Hall	James Applegate	3.00	50/80

**ASTR UN1903 ASTRONOMY LAB I. 1.00 point.**

Laboratory for ASTR UN1403. Projects include observations with the departments telescopes, computer simulation, laboratory experiments in spectroscopy, and the analysis of astronomical data. Lab 1 ASTR UN1903 - goes with ASTR BC1753, ASTR UN1403 or ASTR UN1453

**Fall 2024: ASTR UN1903**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1903	001/10391	M 6:00pm - 9:00pm 1402 Pupin Laboratories	Greg Bryan, Sally Jiang	1.00	9/12
ASTR 1903	002/14613	T 7:00pm - 10:00pm 1402 Pupin Laboratories	Greg Bryan, Abigail Moran	1.00	11/12

**Spring 2025: ASTR UN1903**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1903	001/11204	M 6:00pm - 9:00pm 1402 Pupin Laboratories	Greg Bryan, Stephen Coffey	1.00	20/20
ASTR 1903	002/11205	T 7:00pm - 10:00pm 1402 Pupin Laboratories	Greg Bryan, Justin Vega	1.00	19/20

**ASTR UN1904 ASTRONOMY LAB II. 1.00 point.**

Laboratory for ASTR UN1404. Projects include use of telescopes, laboratory experiments in the nature of light, spectroscopy, and the analysis of astronomical data. Lab 2 ASTR UN1904 - goes with ASTR BC1754 or ASTR UN1404 (or ASTR UN1836 or ASTR UN1420)

**Fall 2024: ASTR UN1904**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1904	001/11206	W 6:00pm - 9:00pm 1402 Pupin Laboratories	Greg Bryan, Fred Angelo Garcia	1.00	8/14

**ASTR UN2002 INTRO TO ASTROPHYSICS II. 3.00 points.**

Prerequisites: a working knowledge of calculus.

Prerequisites: a working knowledge of calculus. Corequisites: the second term of a course in calculus-based general physics. Continuation of ASTR UN2001; these two courses constitute a full year of calculus-based introduction to astrophysics. Topics include the structure of our galaxy, the interstellar medium, star clusters, properties of external galaxies, clusters of galaxies, active galactic nuclei, and cosmology

**Spring 2025: ASTR UN2002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2002	001/14277	M W 1:10pm - 2:25pm 602 Northwest Corner	Frederik Paerels	3.00	28/30

### ASTR UN2910 Introduction to Research Skills in Astrophysics. 1.00 point.

Participation in research is an essential component of a complete undergraduate science education, and is mandatory for those students wishing to go on to the PhD. This course is designed to introduce students to doing astronomy beyond the classroom. It will cover basic topics including but not limited to: coding in astronomy, utilizing international archives, manipulating data, running simulations, reading academic papers, making and giving presentations, academic culture, time management, working in collaborations, and career paths. Students will engage in first-hand research on a specific astronomical topic in order to put their skills to practice. By the end of the course, students should be fully prepared to enter a summer research internship and make the most of their time there. We encourage students considering majoring in Astronomy or Astrophysics who are interested in astrophysical research to take this course. Priority will be given to those interested in majoring in Astrophysics who have no prior research experience. Students should have taken at least one semester of college-level physics and have a knowledge of calculus. No prior experience in python coding is required

Spring 2025: ASTR UN2910

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2910	001/14279	F 10:00am - 1:00pm 1332 Pupin Laboratories	Alexandra Masegian	1.00	13/12

### ASTR UN3103 GALAXIES. 3.00 points.

Prerequisites: one year of calculus-based general physics.  
Prerequisites: one year of calculus-based general physics.  
Galaxies fill the universe with structure. They are bound objects that harbor stars, gas, dust and dark matter. This course will discuss the content and structure of galaxies. It will start with the Milky Way, a rotating spiral galaxy, with a particular emphasis on the properties of the interstellar medium. Dwarf galaxies, the building blocks of larger galaxies, will subsequently be discussed, followed by spiral, elliptical and irregular galaxies. The formation and evolution of these different galaxy types will be an important focus of the course, as well as the environment in which the galaxies reside. We will intersperse reviews of current papers on galaxies throughout the semester

Spring 2025: ASTR UN3103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3103	001/14281	M W 10:10am - 11:25am 602 Northwest Corner	Mary Putman	3.00	9/25
ASTR 3103	AU1/18498	M W 10:10am - 11:25am Othr Other	Mary Putman	3.00	3/3

### ASTR UN3105 EXOPLANETS AND ASTROBIOLOGY. 3.00 points.

Prerequisites: One year of calculus-based physics.

The emerging field of extrasolar planets and astrobiology will be covered at a quantitative level, with a major emphasis on astrophysical phenomena and techniques. The subject will be introduced through an investigation of current planetary formation theories and approaches to planet detection, including what we currently know about extrasolar planets and detailed reference to state-of-the-art studies. An astronomer's view of the origin of life and extreme biology will be developed and applied to questions of cosmo-chemistry, observable life-signatures, habitable zones and other astrophysical constraints on the development of organisms.

Spring 2025: ASTR UN3105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3105	001/14283	T Th 2:40pm - 3:55pm 307 Uris Hall	Jane Huang	3.00	10/30

### ASTR UN3646 OBSERVATIONAL ASTRONOMY. 3.00 points.

Prerequisites: one year of general astronomy.

Prerequisites: one year of general astronomy Introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on ground-based methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs and at Harriman Observatory. The radio-astronomy portion consists mostly of computer labs. In research projects, students also work on the analysis of data obtained at National Observatories

Spring 2025: ASTR UN3646

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3646	001/14285	Th 7:00pm - 9:30pm 1402 Pupin Laboratories	David Schiminovich	3.00	20/20

### ASTR UN3998 INDEPENDENT RESEARCH. 3.00 points.

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration.

Prerequisites: the instructors permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty members endorsement, is required for registration. A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Senior majors in astronomy or astrophysics wishing to do a senior thesis should make arrangements in May of their junior year and sign up for a total of 6 points over their final two terms. Both a substantial written document and an oral presentation of thesis results are required

**Spring 2025: ASTR UN3998**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3998	001/14289		Marcel Agueros	3.00	11/15

**ASTR GR6013 Stars and Planets. 3.00 points.**

An in-depth exploration of the physical processes governing the structure, formation, and evolution of stellar and planetary systems, with emphasis on the underlying astrophysical principles

**Spring 2025: ASTR GR6013**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 6013	001/15336	M W 1:10pm - 2:25pm 1332 Pupin Laboratories	Michael Shara	3.00	11/20

**ASTR GR8003 ASTROPHYSICAL FLUID DYNAMICS. 3.00 points.****Spring 2025: ASTR GR8003**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 8003	001/14291	M W 10:10am - 11:25am 1332 Pupin Laboratories	Lorenzo Sironi	3.00	9/20

**ASTR GR9002 GRADUATE SEMINAR. 3.00 points.****Spring 2025: ASTR GR9002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 9002	001/14293	F 2:00pm - 4:00pm 1332 Pupin Laboratories	Kishalay De	3.00	17/20

**ASTR GR9004 RESEARCH PROFESSIONAL DEVELOPMENT SEMINAR II. 3.00 points.**

This two-semester course aims to help our students acquire the foundational skills for a successful and satisfying professional life. The course will consist of three themes: 1) Discussing greatest hits and frontiers in the field 2) The research process, using the projects that participating students are currently working on. 3) Navigating science and careers: considering the people and institutions that make up the field, the frameworks in place that support them and the culture that pervades them; career pathways

**Spring 2025: ASTR GR9004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 9004	001/14296		David Kipping	3.00	11/15

**ALL COURSES (INCLUDING THOSE NOT OFFERED IN ACADEMIC YEAR 2024-2025)****ASTR UN1234 UNIVERSAL TIMEKEEPER. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school algebra and latent curiosity are assumed.

The goal of the course is to illustrate — and perhaps even inculcate — quantitative and scientific reasoning skills. The subject material employed in this task is the study of atoms and their nuclei which, through a wide variety of physical and chemical techniques, can be used to reconstruct quantitatively the past. Following an introduction to atoms, light, and energy, we will explore topics including the detection of art forgeries, the precise dating of archeological sites, a reconstruction of the development of agriculture and the history of the human diet, the history of past climate (and its implications for the future), the history and age of the Earth, and the history of the Universe. The course has no required text. Readings of relevant articles and use of on-line simulations will be required.

**Spring 2025: ASTR UN1234**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1234	001/14272	M W 2:40pm - 3:55pm 402 Chandler	David Helfand	3.00	44/80
ASTR 1234	AU1/18497	M W 2:40pm - 3:55pm Othr Other	David Helfand	3.00	6/6

**ASTR S1403D Earth, Moon, and Planets. 3 points.**

May be counted toward the science requirement for most Columbia University undergraduate students. The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond.

**ASTR UN1403 EARTH, MOON, AND PLANETS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond. This course is similar to ASTR BC 1753. You cannot enroll in both courses and receive credit for both

**Fall 2024: ASTR UN1403**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1403	001/14142	M W 1:10pm - 2:25pm 326 Uris Hall	James Applegate	3.00	41/75

**ASTR UN1404 STARS, GALAXIES & COSMOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Distances to, and fundamental properties of, nearby stars; nucleosynthesis and stellar evolution; novae and supernovae; galaxies; the structure of the universe and theories concerning

its origin, evolution, and ultimate fate. You can only receive credit for ASTR UN1404 if you have not taken ASTR BC1754, ASTR UN1420 or ASTR UN1836

### **ASTR UN1453 ANOTHER EARTH. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course cannot be taken for credit if BC1753 has been taken.

This course will explore the unique properties of Earth, compared to other planets in the Solar System, and the possibility of Earth-like planets around other stars. The basics of the Solar System, gravity, and light will be covered, as well as the geology and atmospheres of the terrestrial planets. The properties of Earth that allowed life to develop and whether life can develop on other planets will be discussed. Finally, the discovery of planets beyond our Solar System and the likelihood of another Earth will be a key component of the course

Fall 2024: ASTR UN1453

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1453	001/14144	T Th 2:40pm - 3:55pm 702 Hamilton Hall	Nicholas Luber	3.00	62/80

### **ASTR UN1420 Galaxies and Cosmology. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Galaxies contain stars, gas dust, and (usually) super-massive black holes. They are found throughout the Universe, traveling through space and occasionally crashing into each other. This course will look at how these magnificent systems form and evolve, and what they can tell us about the formation and evolution of the Universe itself. You cannot enroll in ASTR UN1420 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

Fall 2024: ASTR UN1420

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1420	001/14143	T Th 10:10am - 11:25am 303 Uris Hall	Mary Putman	3	54/75

### **ASTR UN1610 THEOR-UNIVERS:BABYLON-BIG BANG. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Milestones in the science of cosmology over the past 6000 years. Skylore and observation in ancient cultures. The twin revolutions of the Greeks: Pythagoras and Ptolemy; and Aristotle, Aquinas, and the Great Chain of Being. The scientific revolution: the impersonal and deterministic world-order of Newton, Laplace, and Kelvin. The erosion of that world-order by mathematics and experiment in the 20th century (relativity, quantum physics, dark matter, and the expanding universe). Today's searches for a new grand order in the Universe, which can cope - or maybe not - with these blows to yesterday's comfortable wisdom

### **ASTR BC1753 LIFE IN THE UNIVERSE. 3.00 points.**

An introductory course intended primarily for nonscience majors. This interdisciplinary course focuses on the subject of Life in the Universe. We will study historical astronomy, gravitation and planetary orbits, the origin of the chemical elements, the discoveries of extrasolar planets, the origin of life on Earth, the evolution and exploration of the Solar System, global climate change on Venus, Mars and Earth, and the Search for Extraterrestrial Life (SETI). You cannot receive credit for this course and for ASTR UN1403 or ASTR UN1453. Can be paired with the optional Lab class ASTR UN1903

Spring 2025: ASTR BC1753

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1753	001/00430	T Th 2:40pm - 3:55pm 408 Zankel	Nicholas Luber	3.00	142/140

### **ASTR BC1754 Stars, Galaxies, and Cosmology. 3 points.**

BC: Fulfillment of General Education Requirement:

Quantitative and Deductive Reasoning (QUA).

Prerequisites: Recommended preparation: A working knowledge of high school algebra.

Corequisites: Suggested parallel laboratory course: ASTR C 1904y.

Examines the properties of stars, star formation, stellar evolution and nucleosynthesis, the Milky Way and other galaxies, and the cosmological origin and evolution of the universe. Students may not receive credit for both ASTR BC 1754 and ASTR C1404.

### **ASTR UN1836 STARS AND ATOMS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both

-----------	-----------	---	------------	------	-------

**ASTR UN2002 INTRO TO ASTROPHYSICS II. 3.00 points.**

Prerequisites: a working knowledge of calculus.

Prerequisites: a working knowledge of calculus. Corequisites: the second term of a course in calculus-based general physics. Continuation of ASTR UN2001; these two courses constitute a full year of calculus-based introduction to astrophysics. Topics include the structure of our galaxy, the interstellar medium, star clusters, properties of external galaxies, clusters of galaxies, active galactic nuclei, and cosmology

**Spring 2025: ASTR UN2002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2002	001/14277	M W 1:10pm - 2:25pm 602 Northwest Corner	Frederik Paerels	3.00	28/30

**ASTR UN2900 FRONTIERS OF ASTROPHYSICS. 1.00 point.**

Several members of the faculty each offer a brief series of talks providing context for a current research topic in the field and then present results of their ongoing research. Opportunities for future student research collaboration are offered. Grading is Pass/Fail

**Fall 2024: ASTR UN2900**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 2900	001/14146	F 10:10am - 11:25am 420 Pupin Laboratories	Greg Bryan	1.00	42/46

**ASTR UN3101 MODERN STELLAR ASTROPHYSICS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.

Introductory astronomy is not required, but some exposure to astronomy is preferable. In the first half of the course, we will examine the physics of stellar interiors in detail, leading us to develop models of stellar structure and consider how stars evolve. In the second half of the course, we will discuss special topics, such as pre-main sequence evolution, the late stages of stellar evolution, and supernovae and compact objects.

**Fall 2024: ASTR UN3101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3101	001/14147	M W 1:10pm - 2:25pm 325 Pupin Laboratories	Marcel Agueros	3.00	10/25

**ASTR UN3102 Planetary Dynamics and Physics of the Solar System. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

The physics and astrophysics of planets, comets, asteroids, natural and artificial satellites, and pretty much anything in the Solar System - including the Sun. Detailed study of the Earth's atmosphere and oceans: circulations, climate, and weather. Orbital dynamics. The emerging science of extrasolar planets. The origin, evolution, and eventual fate of planets.

### **ASTR UN3103 GALAXIES. 3.00 points.**

Prerequisites: one year of calculus-based general physics.  
Prerequisites: one year of calculus-based general physics.  
Galaxies fill the universe with structure. They are bound objects that harbor stars, gas, dust and dark matter. This course will discuss the content and structure of galaxies. It will start with the Milky Way, a rotating spiral galaxy, with a particular emphasis on the properties of the interstellar medium. Dwarf galaxies, the building blocks of larger galaxies, will subsequently be discussed, followed by spiral, elliptical and irregular galaxies. The formation and evolution of these different galaxy types will be an important focus of the course, as well as the environment in which the galaxies reside. We will intersperse reviews of current papers on galaxies throughout the semester

Spring 2025: ASTR UN3103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ASTR 3103	AU1/18498	M W 10:10am - 11:25am Othr Other	Mary Putman	3.00	3/3

### **ASTR UN3105 EXOPLANETS AND ASTROBIOLOGY. 3.00 points.**

Prerequisites: One year of calculus-based physics.  
The emerging field of extrasolar planets and astrobiology will be covered at a quantitative level, with a major emphasis on astrophysical phenomena and techniques. The subject will be introduced through an investigation of current planetary formation theories and approaches to planet detection, including what we currently know about extrasolar planets and detailed reference to state-of-the-art studies. An astronomer's view of the origin of life and extreme biology will be developed and applied to questions of cosmo-chemistry, observable life-signatures, habitable zones and other astrophysical constraints on the development of organisms.

Spring 2025: ASTR UN3105

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3105	001/14283	T Th 2:40pm - 3:55pm 307 Uris Hall	Jane Huang	3.00	10/30

### **ASTR UN3106 The Science of Space Exploration. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one semester course in introductory astronomy or astrophysics (e.g., ASTR W1403, ASTR W1404, ASTR

W1420, ASTR W1836, ASTR W2001, ASTR W2002, ASTR BC1753, and ASTR BC1754). Ability in mathematics up to and including calculus is strongly urged.

How and why do humans explore space? Why does it require such extraordinary effort? What have we found by exploring our Solar System? We investigate the physics and biological basis of space exploration, and the technologies and science issues that determine what we can accomplish. What has been accomplished in the past, what is being explored now, and what can we expect in the future? How do space scientists explore the Solar System and answer science questions in practice? What do we know about solar systems beyond our own?

### **ASTR UN3273 HIGH ENERGY ASTROPHYSICS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. No previous astronomy background required.

A survey of the most energetic and explosive objects in the Universe and their radiation. Topics include: techniques of X-ray and gamma-ray astronomy; observations of neutron stars (pulsars) and black holes; accretion disks and relativistic jets; supernovae, supernova remnants, gamma-ray bursts, quasars and active galactic nuclei; clusters of galaxies; cosmic rays and neutrinos.

### **ASTR UN3602 PHYSICAL COSMOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.  
Prerequisites: one year of calculus-based general physics.  
The standard hot big bang cosmological model and modern observational results that test it. Topics include the Friedmann equations and the expansion of the universe, dark matter, dark energy, inflation, primordial nucleosynthesis, the cosmic microwave background, the formation of large-scale cosmic structures, and modern cosmological observations

### **ASTR UN3646 OBSERVATIONAL ASTRONOMY. 3.00 points.**

Prerequisites: one year of general astronomy.

Prerequisites: one year of general astronomy  
Introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on ground-based methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs and at Harriman Observatory. The radio-astronomy portion consists mostly of computer labs. In research projects, students also work on the analysis of data obtained at National Observatories

Spring 2025: ASTR UN3646

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3646	001/14285	Th 7:00pm - 9:30pm 1402 Pupin Laboratories	David Schiminovich	3.00	20/20

**ASTR UN3985 Statistics and the Universe (Seminar). 3 points.**

Essential statistical methods will be applied in a series of case studies and research projects taken from the latest advances in cosmology, astronomy and physics. Statistics of measurement and detection, fundamentals of hypothesis testing, classifications, data modeling, time-series analysis, correlation and clustering will be explored through hands-on investigation using data from recent experiments and surveys.

**ASTR UN3996 Current Research in Astrophysics. 1 point.**

Prerequisites: two semesters of astronomy classes and two semesters of physics classes.

The goal of this course is to introduce astronomy and astrophysics majors to the methods and topics of current astronomical research. The course will also help with the development of critical thinking skills. Each week, the topic of the course will be centered on the subject of the Astronomy department colloquium; this may include research on planets, stars, galaxies or cosmology. There will be two required meetings per week: the first will be to discuss papers related to the colloquium (time TBD), and the second will be the colloquium itself (at 4:15 pm each Wednesday). Grading is Pass/Fail.

**ASTR UN3997 INDEPENDENT RESEARCH. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration.

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration. A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Senior majors in astronomy or astrophysics wishing to do a senior thesis should make arrangements in May of their junior year and sign up for a total of 6 points over their final two terms. Both a substantial written document and an oral presentation of thesis results are required

Fall 2024: ASTR UN3997

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3997	001/14149		Frederik Paerels	3.00	11/15

**ASTR UN3998 INDEPENDENT RESEARCH. 3.00 points.**

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of

the proposed project or reading, with the supervising faculty member's endorsement, is required for registration.

Prerequisites: the instructor's permission. For an independent research project or independent study, a brief description of the proposed project or reading, with the supervising faculty member's endorsement, is required for registration. A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project is required at its completion (note that a two-term project can be designed such that the grade YC is given after the first term). Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 3998	001/14289		Marcel Agueros	3.00	11/15

**ASTR GU4260 MODELING THE UNIVERSE. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.

Prerequisites: one year of calculus-based general physics. The goal of this course is to provide a basic hands-on introduction to the practice and theory of scientific computing with applications in astronomy and astrophysics. The course will include an introduction to programming, as well as a sampling of methods and tools from the field of scientific computing. The course will include a hands-on project in which students use numerical methods to solve a research problem. Students who are interested in participating in research projects are strongly encouraged to take the course in their sophomore or junior year

**ASTR GU4302 General Relativity, Black Holes, and Cosmology. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Einstein's General Theory of Relativity replaced Newtonian gravity with an elegant theory of curved spacetime. Einstein's theory led to unforeseen and unnerving predictions of singularities and cosmological instabilities. Nearly a century later, these mathematical oddities have been confirmed astrophysically in the existence of black holes, an expanding universe, and a big bang. The course will cover Einstein's General Theory, beginning with special relativity, with an emphasis on black holes and the big bang.

**ASTR GU4303 ASTROSTATISTICS. 3.00 points.**

Astronomers live in era of "big data". Whilst astronomers of a century ago collected a handful of photographic plates each night, modern astronomers collect thousands of images encoded by millions of pixels in the same time. Both the volume of data and the ever present desire to dig deeper into data sets has led to

a growing interest in the use of statistical methods to interpret observations. This class will provide an introduction to the methods commonly used in understanding astronomical data sets, both in terms of theory and application. It is one six classes the department offers every fourth semester

**ASTR GR6001 RADIATIVE PROCESSES. 3.00 points.**

Prerequisites: 3000-level electromagnetic theory and quantum mechanics.

Prerequisites: 3000-level electromagnetic theory and quantum mechanics. Radiation mechanisms and interaction of radiation with matter. Applications of classical and semiclassical radiation theory and atomic physics to astrophysical settings. Radiative transfer, polarization, scattering, line radiation, special relativity, bremsstrahlung, synchrotron radiation, inverse compton scattering, ionization losses, shocks and particle acceleration, plasma processes, atomic structure and spectroscopic terms, radiative transitions and oscillator strengths, curve of growth, molecular spectra

**ASTR GR6003 GALAXIES. 3.00 points.**

An introduction to the study of galaxies, from both observational and theoretical perspectives The course will review our current understanding of the formation and evolution of galaxies through descriptions of: their structure and dynamics; the gas and stellar populations they contain; and what we know about the distribution of dark matter within them.

**ASTR GR6005 PHYSICAL COSMOLOGY LEC. 3.00 points.**

### THE DEPARTMENT OF BIOLOGICAL SCIENCES:

Department website: <http://www.biology.columbia.edu>  
Office location: 600 Sherman Fairchild Center  
Office contact: 212-854-4581, [biology@columbia.edu](mailto:biology@columbia.edu)  
Director of Undergraduate Studies: Alice Heicklen, [ah2289@columbia.edu](mailto:ah2289@columbia.edu)  
Undergraduate Administrator: Ellie Siddens, [mes2314@columbia.edu](mailto:mes2314@columbia.edu)

## THE STUDY OF BIOLOGICAL SCIENCES

The department offers broad training in basic biological disciplines, with an emphasis in cell and molecular biology. Students have many opportunities to participate in ongoing projects in research laboratories. All the biology-related majors require one year of introductory biology, plus additional courses as detailed in the major requirements and listed on the websites provided above.

The usual one-year introductory biology sequence is [BIOL UN2005](#) INTRO BIO I: BIOCHEM,GEN,MOLEC-BIOL [UN2006](#) INTRO BIO II:CELL BIO,DEV/PHYS, taken in the sophomore year, after one year of general chemistry. For more details, see Introductory Courses under [Requirements—Major in Biology](#). All students interested in biology are encouraged to take [BIOL UN1908](#) First Year Seminar in Biology in the fall semester of their first year.

Biology: Dr. Deborah Mowshowitz; dbm2@columbia.edu

Psychology: Dr. Alfredo Spagna, as5559@columbia.edu

## Enrolling in Classes

Registration for each term occurs within designated periods. Within these periods, you will be assigned specific registration appointment times. For continuing students, your appointment times will generally be available on Student Services Online (SSOL) two weeks prior to the registration period, but specific registration instructions are announced by each school in advance of each registration period.

- Check appointment times
- Register

Students can also check the Directory of Classes by looking for “B” under Departments and selecting “Biological Sciences”.

## Preparing for Graduate Study

Advisor for students applying to graduate school or looking for bio-related jobs. (Students applying to medical school should consult the pre-professional office.)

Dr. Molly Przeworski; mp3284@columbia.edu

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

If you got a 5 on the AP biology test, you get 3 points of credit toward graduation. Students with a 5 on

the AP should take BIOL UN2005 INTRO BIO I: BIOCHEM, GEN, MOLEC and BIOL UN2006 INTRO BIO II: CELL BIO, DEV/PHYS.

BIOL UN2005-UN2006 is not a repeat of AP bio. It demands not only more detail but more thought and application of knowledge to problem-solving than the usual AP course. It is narrower but deeper than the usual introductory biology course. You may review this exam from a previous year of UN2005 and compare your answers with the exam key. This will give you an idea of what makes UN2005/6 a unique Intro Bio sequence. If you still feel that you are sufficiently prepared, please consult a biology advisor who on rare occasions can give permission to place out of Intro Bio I and II. You will still be required to take 6 biology courses at Columbia if you place out of Intro Bio.

## Barnard College Courses

Barnard courses may not be substituted for the required Columbia courses without advance permission from the advisor. Students may not use Barnard courses for the biology minor.

## Transfer Courses

Transfer credits for the majors, concentrators, and the biology minor are not automatically granted. Students should email their Biology advisor with a transcript and the syllabi from their previous institution to request transfer credit. Transfer credit for Introductory Biology is rarely granted. You can read more about transfer credits in this FAQ. Students may not use transfer courses for the biology minor.

## Study Abroad Courses

If you are planning to study abroad, please meet with your Advisor before you go. You'll need prior approval for any majors, concentrators, and biology minor courses that you take abroad. Students may not use study abroad courses for the biology minor.

## Summer Courses

The Department of Biological Sciences offers limited summer courses. Check the Directory of Classes for Summer course information.

## CORE CURRICULUM CONNECTIONS

Unfortunately, most biology courses are not suitable for most nonscience majors. There are two biology courses in the dept that are designed primarily for nonscientists: Science and Society (BIOL UN1360), and Interpreting Scientific Evidence (BIOL UN2300).

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

#### SURF

First-year students, sophomores, and juniors are eligible for the department's paid internship program (SURF). This program is competitive; the department cannot assure every eligible student a place in any given summer.

A faculty committee headed by Dr. Alice Heicklen then matches selected students to appropriate labs. The deadline for SURF applications is at the beginning of the spring semester.

SURF students must submit a report on their work at the end of the summer session and participate in the following year's annual Undergraduate Research Symposium.

Although it does not carry any academic credit, SURF can be used toward the lab requirement for majors and toward graduation with honors.

Current detailed descriptions of the SURF program and the application procedure are available at SURF's website, <https://biology.columbia.edu/content/surf>.

For more information on the Amgen Scholarship Program, please visit <https://biology.columbia.edu/content/amgen-scholars-program>. Applications to all of these programs are through SURF.

#### UN3500

Students can get academic credit for working in a lab, by registering for BIOL UN3500 Independent Research. This is not to be confused with SURF or the Amgen Scholars Program, which fulfill the biology major lab requirement but does not confer academic credit. Generally students register for 3 or 4 credits. A general rule is 4 hours lab time/week/credit, i.e. register for 3 credits for 12 hours of lab time/week and 4 credits from 16 hours of lab time/week. You will need to find a lab to work in. Please make it clear to the head of the lab whether you need to work 12 or 16 hours/week. If you are taking this class for a lab requirement, you need to take it for a letter grade. You will be required to write a research paper at the end of the semester. (See [UN3500](#) requirements.)

While it's nice to be able to get credit for your lab experience, keep in mind that this means that you're making a commitment to work there for the entire semester.

### Senior Thesis Coursework and Requirements

The biology-related majors in the Department of Biological Sciences do not include a Senior Thesis.

### Undergraduate Research Outside of Courses

Please see the [Undergraduate Research](#) page on the department website for advice and information on undergraduate research.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Students must apply for departmental honors. Applications are due no later than one day before spring break of their senior year. For details, please visit the departmental website at <https://biology.columbia.edu/content/honors-biological-sciences>.

### Academic Prizes

#### Bridges and Sturtevant Prize

This prize results from an anonymous donation in 2011 establishing an endowment for the prize. Bridges and Sturtevant were certainly amazing Columbia undergrads who were true pioneers of modern genetics. Alfred Sturtevant is recounted to have taken time off from studying for classes one weekend to work on understanding some crosses. The result was his figuring out that genes were arranged in a row on a chromosome.

The prize description reads: "Columbia shall .... award an annual prize to be known as the Bridges and Sturtevant Prize in Biological Sciences in honor of Calvin Bridges and Alfred Sturtevant. Their pioneering studies as Columbia College undergraduates - using the fruit fly *Drosophila melanogaster* in Thomas Hunt Morgan's laboratory - laid the basis for our understanding of genes and the way they behave. Each year the prize will be awarded to one or more graduating seniors whose experimental or computational research is deemed to have been both highly original and fruitful by a committee of faculty to be selected by the Chair of Biological Sciences."

Faculty members in the Dept. of Biological Sciences can nominate student(s) for the prize. A committee of faculty members decide who will receive the award.

It is awarded yearly, just before graduation.

Awarded to a graduating senior whose research has been deemed highly original and fruitful.

Each student is awarded a monetary prize.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students majoring or minoring in Biology or Related Fields:

1. Review the requirements for your desired major/minor detailed in the links below. Please email Ellie Siddens

(mes2314@columbia.edu) to go over the progress of your major completion.

2. Fill out a [major planning form](#) as far as you can, using the checklist and the information in [the bulletin](#). Include both courses you have completed AND courses you plan to take to complete your major.
3. Consult the appropriate [departmental adviser](#) to discuss any variances from the normal guidelines. Your adviser will then email any approved variances from the normal requirements to the biology departments administrator, Ellie Siddens, who will approve your major completion for graduation.
4. Visit the [Major Declaration Page](#) during the Major Declaration Period (usually Spring Break of your Sophomore year) to officially declare your major.

For students majoring in Biochemistry or Neuroscience & Behavior (joint majors), you should consult advisers in both departments to plan your program, each regarding their specific courses (e.g. biology course exceptions will need to be approved by a biology adviser, chemistry course exceptions will need to be approved by a chemistry adviser).

Returning students should check the departmental website for any last-minute changes and/or additional information. See especially undergraduate updates and list of department courses. All major and minor requirements are detailed on the website and links provided below.

## Double Majoring/Minoring

The Department of Biological Sciences offers five undergraduate majors (Biology, Biophysics, Biochemistry, Computational Biology, and Neuroscience and Behavior), along with a Biology Minor, across two schools: Columbia College and General Studies. Students can only choose one major/minor within the Department. You may not major in Biology/ Biochemistry/ Biophysics/ Computational Biology/ Neuroscience & Behavior and have a Biology Minor.

You cannot major in:

- Biochemistry & also major / minor in chemistry
- Biophysics & also major / minor in physics
- Computational biology & also major / minor in computer science or major/minor in math
- Neuroscience & also major / minor in psychology

Students can only double count two of the following fundamental courses for both a biology-related major/minor and any other major / minor they pursue: General Chemistry I & II or Calc I & II.

Biochemistry (BIOL UN3300 or BIOL GU4501) cannot be counted for a biology-related major / minor and for any other major / minor.

## Course Numbering Structure

NOTE: Numbering does not reflect difficulty but rather whether UGs & graduate students have different requirements:

3000 – Only UGs register

4000 – UGs and graduate students perform the same

5000 – Only graduate students register, requires additional work beyond the 3000 course; 3000 (UGs) & 5000 (Grad.) are different versions of the same course, i.e. same time, location, and lectures

## Guidance for First-Year Students

Please see the [FAQs for First-Year Students](#).

## Guidance for Transfer Students

Please see the [FAQs for Transfer Students](#).

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

All majors and the minor should start with General Chemistry 1 & 2 in their first year at Columbia. This is a required prerequisite before you may begin the Introductory Biology sequence.

All biology-related majors: at least 4 biology or biochemistry courses and at least 18 credits of the total (biology, biochemistry, math, physics, and chemistry) must be taken at Columbia. Barnard courses may not be substituted for the required Columbia courses without advance permission from the adviser. The two required core courses should be taken at Columbia. Courses covering the same topics as Bio dept core courses, but taken elsewhere, are counted as electives, not as core courses.

### Exceptions to Requirements

Students must get written permission in advance for any exceptions to the requirements listed below. For the exceptions to be applied toward graduation, the student must get the exception approved by the faculty adviser, who will then send an e-mail explaining the exceptions to mes2314@columbia.edu.

### Grade Requirements for the Major

A grade of C- or higher must be earned and revealed on your transcript for any course – including the first – to be counted toward the major, minor, or concentration requirements. The grade of P is not acceptable. A course that was taken Pass/D/Fail may be counted if and only if the P is uncovered by the Registrar's deadline.

Please note that a few exceptions are applicable for the following terms:

- All courses in Spring 2020 were taken with mandatory Pass/Fail grades.
- Further exceptions are allowed for 2020-2021, when students can opt to take one course Pass/Fail during the Fall 2020, Spring 2021, and Fall 2021 semesters, without any restrictions - this can be in a course required for their major or minor.
- In Spring 2024, students could opt to take two major/minor courses Pass/Fail.

If you are concerned about a P grade counting for the major, please consult with your adviser.

## **COURSES**

### **Non-Major Courses**

The following biology-related courses do not count towards the major or as one of the 4 courses that all biology majors must take at Columbia University. This list is not exhaustive, and you should discuss your major courses with your biology adviser.

- BIOL UN1004 Foundations of Biology
- BIOL UN1130 Genes and Development
- BIOL UN1360 Science and Society
- BIOL UN1908 First-year seminar in biology
- BIOL UN2300 Interpreting Scientific Evidence
- BIOL UN3920 Ignorance
- BIOL UN3995 Topics in Biology: Crossroads in Bioethics
- BIOL GU4305 Seminar in Biotechnology
- BIOL GU4506 Biochemistry in XR: Mixed Reality
- BIOT GU4160 Biotechnology Law
- BIOT GU4180 Entrepreneurship in Biotech
- BIOT GU4200 Biopharmaceutical Development & Regulation
- BIOT GU4201 Seminar in Biotech Development & Regulation
- BIOT GR5170 Intro to Management Principles
- CMLS UN3965 Precision Medicine: Biology
- Any course beginning with the HPSC, SCNC, or BIOT prefix
- All Barnard Courses

### **Repeating Biology Courses**

Introductory biology I & II (BIOL UN2005/6 & BIOL UN2401/2) may only be taken twice, this includes taking two exams, W, D and F. You may petition to take intro bio I or II

a third time. 3000 & 4000 level biology courses may only be taken once. You may petition to take the same course a second time.

### **Prerequisites**

Course prerequisites are strictly enforced. Prerequisites must be taken before the course, not after or concurrently. Biology courses taken before the completion of any of its prerequisites, even with instructor approval, are not counted toward the major, minor, or interdepartmental majors. Exemptions from a prerequisite requirement may only be made, in writing, by the department's director of undergraduate studies. Credits from a course taken prior to the completion of its prerequisites are not counted towards the major requirements. As a consequence, students are required to complete additional, specific courses in biology at the direction of the director of undergraduate studies.

### **4+1 Programs**

A B- or better in both introductory biology I & II (BIOL UN2005 & BIOL UN2006) are required to be eligible for any 4+1 programs.

## **Major in Biology**

### **General Information**

The requirements for the biology major include courses in biology, chemistry, physics, and mathematics.

The required biology courses are one year of introductory biology, two core courses in biology, two 3-point electives in biology, and an appropriate lab experience. See below for details.

The required courses outside the biology department are chemistry through organic (plus labs), one year of college-level physics (plus lab), and the completion of one year of college-level mathematics (usually calculus).

Alternative sequences to the above may be arranged in special circumstances, but only with the permission of a departmental adviser or the director of undergraduate studies obtained in advance. For example, selected courses at the Columbia-Presbyterian Medical Center are open to advanced undergraduates with adviser approval. Credit toward the major for courses not listed in the Columbia College Bulletin must be discussed in advance with a departmental adviser or the director of undergraduate studies. Students are responsible for notifying the department of all exceptions either in writing or by e-mail as explained above.

Students planning graduate work in biology should keep in mind that physical chemistry and statistics are important for many graduate programs.

### **Introductory Courses**

The usual one-year introductory biology sequence is BIOL UN2005 INTRO BIO I:

BIOCHEM,GEN,MOLEC-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS, taken in the sophomore year.

Other sequences require permission in advance from a departmental adviser or the director of undergraduate studies. Students with a strong background in chemistry or molecular biology may take BIOL UN2005 INTRO BIO I: BIOCHEM,GEN,MOLEC-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS in their first year; the permission of one of the instructors is required.

Premedical students usually take BIOL UN2005 INTRO BIO I: BIOCHEM,GEN,MOLEC-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS after a year of general chemistry.

Students with advanced placement in biology are expected to take BIOL UN2005 INTRO BIO I: BIOCHEM,GEN,MOLEC as their initial biology course, because BIOL UN2005 INTRO BIO I: BIOCHEM,GEN,MOLEC-BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS is taught at a level of detail and depth not found in most advanced placement courses.

### Core Courses

Two out of the following six departmental core courses are required:

BIOL UN3022	DEVELOPMENTAL BIOLOGY
BIOL UN3031	GENETICS
BIOL UN3041	CELL BIOLOGY
BIOL GU4501	Biochemistry
or BIOL UN3300	Biochemistry
BIOL GU4512	Molecular Biology
BIOL GU4560	EVOL IN THE AGE OF GENOMICS

### Laboratory Courses

A laboratory experience in biology is required. It may be fulfilled by completing any one of the following options:

#### **Option 1:**

Select one of the following 5-point laboratory courses:

BIOL UN3058	PROJECT LAB IN MICROBIOLOGY
BIOL UN3052	PROJECT LAB-MOLECULAR GENETICS

#### **Option 2:**

BIOL UN2501	CONTEMPORARY BIOLOGY LAB
-------------	--------------------------

Select an additional 3-point lab such as BIOL UN3040, a 5-point project lab, or a Barnard lab. Barnard labs must be approved by a Biology Major Adviser.

#### **Option 3:**

Two terms of BIOL UN3500 (3 or 4 credits per term), including the submission of a satisfactory research report at the end of each semester

#### **Option 4:**

Completion of all the requirements for one session of the Summer Undergraduate Research Fellowship (SURF). An additional semester of BIOL UN3500 in the same research lab is recommended but not required. Summer lab work under other auspices may not be substituted for the SURF Program.

### Upper-Level Elective Courses

Select two additional courses, carrying at least 3 points each, from any of the 3000- or 4000- level lecture courses. BIOL UN3500 INDEP BIOLOGICAL RESEARCH cannot be used as one of the courses to satisfy the upper-level elective course requirement. Any course not listed below must be approved by a biology adviser to count toward the major.

Two additional 3000 or 4000 level biology lecture courses from the following:

BIOL UN3004	NEUROBIO I:CELLULAR # MOLECLR
BIOL UN3005	NEUROBIO II: DEVPT # SYSTEMS
BIOL UN3006	PHYSIOLOGY
BIOL UN3019	Brain Evolution
BIOL UN3022	DEVELOPMENTAL BIOLOGY
BIOL UN3025	NEUROGENETICS
BIOL UN3031	GENETICS
BIOL UN3041	CELL BIOLOGY
BIOL UN3073	CELLULAR/MOLECULAR IMMUNOLOGY
BIOL UN3300	Biochemistry
BIOL UN3320	Regulation of Behaviors for Survival
BIOL UN3404	The Global Threat of Antimicrobial Resistance
BIOL UN3560	EVOL IN THE AGE OF GENOMICS
or BIOL GU4560	EVOL IN THE AGE OF GENOMICS
BIOL UN3799	MOLECULAR BIOLOGY OF CANCER
or BIOL GU4799	MOLECULAR BIOLOGY OF CANCER
BIOL GU4001	ADVANCED GENETIC ANALYSIS
BIOL GU4002	Macromolecular Structure # Interactions
BIOL GU4034	BIOTECHNOLOGY
BIOL GU4035	SEMINAR IN EPIGENETICS
BIOL GU4036	Transformative Concepts in Systems Biology
BIOL GU4075	BIOLOGY AT PHYSICAL EXTREMES
BIOL GU4080	ANCIENT AND MODERN RNA WORLDS
BIOL GU4193	Stem Cell Biology and Applications
BIOL GU4290	BIOLOGICAL MICROSCOPY
BIOL GU4300	DRUGS AND DISEASE

BIOL GU4310 - Virology	
BIOL GU4323	BIOPHYSICAL CHEMISTRY I
CHEM GU4324	BIOPHYSICAL CHEMISTRY II
BIOL GU4402	Biological Image Computing
BIOL GU4501	Biochemistry
BIOL GU4510	Genomics of Gene Regulation
BIOL GU4512	Molecular Biology
BIOL GU4551	A Structural View of Biology
BIOL GU4600	CELL SIGNALING
BIOL GU4777	From Curiosity to Cure – Case Studies in Cool Biochemistry

Note: SCNC, HPSC & BIOT (many of which are listed on the biology website) courses do not count towards the Major.

### **Chemistry**

All majors must take chemistry through organic including labs. One of the following three groups of chemistry courses is required:

#### **Option 1:**

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES
CHEM UN1500 & CHEM UN1501	GENERAL CHEMISTRY LABORATORY and GENERAL CHEMISTRY LAB-LECTURE
CHEM UN2443 & CHEM UN2444	ORGANIC CHEMISTRY I-LECTURES and ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493 & CHEM UN2494	ORGANIC CHEM. LAB I TECHNIQUES and ORGANIC CHEM. LAB II SYNTHESIS

#### **Option 2:**

For students who qualify for intensive chemistry	
CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN1507	INTENSVE GENERAL CHEMISTRY-LAB
CHEM UN2444 & CHEM UN2443	ORGANIC CHEMISTRY II-LECTURES and ORGANIC CHEMISTRY I-LECTURES
CHEM UN2495 & CHEM UN2496	ORGANIC CHEM. LABORATORY I and ORGANIC CHEM. LABORATORY II

#### **Option 3:**

For students who qualify for first year organic chemistry	
CHEM UN1507	INTENSVE GENERAL CHEMISTRY-LAB

CHEM UN2045 & CHEM UN2046	INTENSVE ORGANIC CHEMISTRY and INTENSVE ORG CHEM-FOR 1ST YEAR
CHEM UN2495 & CHEM UN2496	ORGANIC CHEM. LABORATORY I and ORGANIC CHEM. LABORATORY II
OR	
CHEM UN2545	INTENSIVE ORGANIC CHEM LAB

### **Physics**

Students must take two terms of physics including the accompanying labs. The usual choices are PHYS UN1201-PHYS UN1202 GENERAL PHYSICS II and PHYS UN1291-PHYS UN1292 GENERAL PHYSICS II LABORATORY. Higher-level physics sequences are also acceptable. The 1400-level sequence is recommended for students who plan to take three terms of physics.

### **Mathematics**

Two semesters of calculus or honors mathematics are required. Students may substitute one semester of statistics (STAT UN1101 or STAT UN1201) for one semester of calculus. For students with AP credit, completion of MATH UN1102 CALCULUS II, MATH UN1201 CALCULUS III, or MATH UN1207 HONORS MATHEMATICS A is sufficient. However, students with AP credit are encouraged to take additional courses in mathematics or statistics at Columbia.

For more details on the biology major requirements, visit <http://biology.columbia.edu/pages/biology-major-requirements>.

---

## **Major in Biochemistry**

The required basic courses for the biochemistry major are chemistry through organic, including laboratory, and one year each of physical chemistry, physics, calculus, biology, and biochemistry/molecular biology. The required additional courses are three lecture courses chosen from mathematics, chemistry, and biology, and two upper-level laboratory courses.

Questions regarding the major in general and chemistry requirements should be addressed to the chemistry adviser and questions regarding biology requirements should be addressed to the biology adviser.

For more details, see the [Chemistry](#) section in this Bulletin. For additional information visit the Department of Biological Sciences website: <http://biology.columbia.edu/pages/biochemistry-major-requirements>.

---

## Major in Biophysics

The requirements for the biophysics major are as follows:

### BIOLOGY COURSES

One year of introductory biology:

BIOL UN2005      INTRO BIO I:  
& BIOL UN2006      BIOCHEM,GEN,MOLEC  
and INTRO BIO II:CELL  
BIO,DEV/PHYS

Select at least one of the following laboratory courses:

BIOL UN3052      PROJECT LAB-MOLECULAR  
GENETICS  
or BIOL UN3058      PROJECT LAB IN MICROBIOLOGY  
or BIOL UN3500      INDEP BIOLOGICAL RESEARCH  
or RSRH C0001      FULL-TIME SUMMER RESEARCH  
PROG

One course in biochemistry or molecular biology:

BIOL GU4501      Biochemistry  
or BIOL UN3300      Biochemistry  
or BIOL GU4512      Molecular Biology

Select one of the following core courses:

BIOL GU4002      Macromolecular Structure #  
Interactions  
or BIOL GU4075      BIOLOGY AT PHYSICAL EXTREMES  
or BIOL GU4323      BIOPHYSICAL CHEMISTRY I  
or CHEM GU4324      BIOPHYSICAL CHEMISTRY II  
or BIOL GU4551      A Structural View of Biology

### PHYSICS COURSES

Select one of the following sequences to be completed at the end of sophomore year:

PHYS UN1401      INTRO TO MECHANICS #  
& PHYS UN1402      THERMO  
& PHYS UN1403      and INTRO ELEC/MAGNETISM  
& PHYS UN1494      # OPTCS  
and INTRO-CLASSCL #  
QUANTUM WAVES  
and INTRO TO  
EXPERIMENTAL PHYS-LAB

PHYS UN1601      PHYSICS I:MECHANICS/  
& PHYS UN1602      RELATIVITY  
& PHYS UN2601      and PHYSICS II: THERMO,  
& PHYS UN1494      ELEC # MAG  
and PHYSICS III:CLASS/  
QUANTUM WAVE  
and INTRO TO  
EXPERIMENTAL PHYS-LAB

PHYS UN2801      ACCELERATED PHYSICS I  
& PHYS UN2802      and ACCELERATED PHYSICS  
& PHYS UN3081      II  
and INTERMEDIATE  
LABORATORY WORK

Select any two physics courses at the 3000-level or above, chosen in consultation with the adviser.

### MATH COURSES

Calculus I-IV or Ordinary Differential Equations:

MATH UN1101      CALCULUS I  
& MATH UN1102      and CALCULUS II  
& MATH UN1201      and CALCULUS III  
& MATH UN1202      and CALCULUS IV  
or MATH UN3027      Ordinary Differential Equations

### CHEMISTRY COURSES

CHEM UN1403      GENERAL CHEMISTRY I-  
& CHEM UN1404      LECTURES  
and GENERAL CHEMISTRY II-  
LECTURES

### BIOLOGY/PHYSICS ELECTIVE COURSE

Select one additional course at the 3000- or 4000-level, in either physics or biology. The following are some suggested courses:

BIOL UN3004      NEUROBIO I:CELLULAR #  
MOLECLR  
or BIOL UN3005      NEUROBIO II: DEVPT # SYSTEMS  
or BIOL UN3022      DEVELOPMENTAL BIOLOGY  
or BIOL UN3031      GENETICS

For more details, see the *Physics* section in this Bulletin or visit the Department of Biological Sciences website: <http://biology.columbia.edu/pages/biophysics-major-requirements>.

## Major in Neuroscience and Behavior

In addition to one year of college general chemistry, eleven courses are required to complete the major in neuroscience and behavior—six in biology and five in psychology.

NOTE: For students entering in Fall 2024 or later, two biology elective courses will be required. For students entering prior to Fall 2024, one biology elective course will be required.

For the five courses required in Psychology, see the *Psychology* (p. 887) section in this Bulletin or visit <http://biology.columbia.edu/pages/neuroscience-and-behavior-major-requirements>.

### CHEMISTRY COURSES

One year of college chemistry is required prior to taking Introductory Biology.

### BIOLOGY COURSES

One year of introductory biology.

BIOL UN2005      INTRO BIO I:  
& BIOL UN2006      BIOCHEM,GEN,MOLEC  
and INTRO BIO II:CELL  
BIO,DEV/PHYS

One year of Neurobiology

BIOL UN3004      NEUROBIO I:CELLULAR #  
& BIOL UN3005      MOLECLR  
and NEUROBIO II: DEVPT #  
SYSTEMS

Two additional 3000 or 4000 level biology lecture courses from the list of Upper Level Electives under the Biology Major.

**AN ADDITIONAL 5 COURSES IN PSYCHOLOGY ARE REQUIRED FOR THE MAJOR**

Please see the Psychology Bulletin linked above.

**Major in Computational Biology**

The Computational Biology major program combines a strong foundation in computer science/data science and basic biology with advanced courses in a variety of subfields. Particular emphasis is placed on laboratory and computational techniques, including genomics, network modeling, and bioinformatics.

Alternative sequences to the above may be arranged in special circumstances with the permission of the departmental adviser or director of undergraduate studies obtained in advance. All exceptions granted by computer science or biology advisers should be forwarded to Ellie Siddens ([mes2314@columbia.edu](mailto:mes2314@columbia.edu)) in biological sciences.

Questions regarding biology requirements should be addressed to the biology adviser and questions regarding computer science or math requirements should be addressed to the computer science advisers.

The required courses are listed below. For details about the Major in Computational Biology, see here: <https://biology.columbia.edu/content/undergraduate-major-requirements>

**Mathematics foundations (4 classes, 12-17 credits)**

The following calculus courses are required:

MATH UN1101	CALCULUS I <small>can be placed out of with AP/IB credit</small>
MATH UN1102	CALCULUS II <small>Calculus III does NOT depend on Calculus II.</small>
or MATH UN1201	CALCULUS III

All students must complete computer-science-directed mathematical foundations classes.

MATH UN2010	LINEAR ALGEBRA
or APMA E3101	APPLIED MATH I: LINEAR ALGEBRA
or APMA E2101	INTRO TO APPLIED MATHEMATICS
or COMS W3251	COMPUTATIONAL LINEAR ALGEBRA

and

STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS
or STAT UN1201	CALC-BASED INTRO TO STATISTICS

**Chemistry Foundations (2 classes, 8 credits)**

Option 1: General Chemistry

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES
---------------------------	--

Option 2: For students who qualify for intensive general chemistry

**CHEM UN1604 2ND TERM GEN CHEM (INTENSIVE)****Introductory Computer Sciences (3 classes, 9-11 credits)**

All students must complete sequentially three courses in computer science:

COMS W1002	COMPUTING IN CONTEXT (with Biology Context)
or ENGI E1006	INTRO TO COMP FOR ENG/APP SCI
or COMS W1004	Introduction to Computer Science and Programming in Java
COMS W3132	Intermediate Computing in Python
or COMS W3136	ESSENTIAL DATA STRUCTURES
or COMS W3134	Data Structures in Java
or COMS W3137	HONORS DATA STRUCTURES # ALGOL

Note: COMS 3134 and 3137 should be taken after COMS 1004 or with previous knowledge of Java

COMS W3157	ADVANCED PROGRAMMING
or COMS W3107	Clean Object-Oriented Design
or COMS W4111	INTRODUCTION TO DATABASES

**Biology (3 classes, 11-12 credits)**

All students must take the two introductory biology courses:

BIOL UN2005 & BIOL UN2006	INTRO BIO I: BIOCHEM, GEN, MOLEC and INTRO BIO II: CELL BIO, DEV/PHYS
---------------------------	---

Students must take one course from this list of core biology courses

BIOL UN3031	GENETICS
or BIOL UN3041	CELL BIOLOGY
or BIOL UN3022	DEVELOPMENTAL BIOLOGY
or BIOL GU4501	Biochemistry
or BIOL UN3300	Biochemistry
or BIOL GU4512	Molecular Biology
or BIOL UN3005	NEUROBIO II: DEVPT # SYSTEMS

**Lab/research (1 class, 4 credits)**

All students must fulfill a laboratory/research experience. This can only be done after completing Intro Bio (BIOL UN2005 + BIOL UN2006). A research report must be submitted to either the course instructor or the lab research mentor at the end of each semester, and they must in turn confirm to the compbio major advisor that the report was satisfactory. Each project must require the student to (i) formulate a computational strategy to solve a particular biological question, (ii) develop dedicated software code or adapt existing code, (iii) use this code to analyze a suitable data set, and (iv) interpret the results from both a statistical and biological perspective. One option is to perform a research project as part of one these courses:

COMS W4995	TOPICS IN COMPUTER SCIENCE (LAB COMPUTATIONAL BIOLOGY))
or COMS W3998	UNDERGRAD PROJECTS IN COMPUTER SCIENCE
or COMS W4901	Projects in Computer Science

The other option is to perform lab research for credit using one of these courses:

BIOL UN3500	INDEP BIOLOGICAL RESEARCH
or RSRH C0001	FULL-TIME SUMMER RESEARCH PROG

BIOL UN3500 Independent Biological Research (must be taken for four credits) in a pre-approved lab RSRH 0001 Summer Undergraduate research fellowship (SURF) in a pre-approved lab

Pre-approved labs include Peter Andolfatto, Elham Azizi, Andrew Blumberg, Harmen Bussemaker, Bianca Dumitrascu, Jellert Gaublomme, David Knowles, Itsik Pe'er, Molly Przeworski, Guy Sella, Simon Tavaré, Saeed Tavazoie. Other labs may be allowable if the project satisfies the conditions above, but only with prior approval from the compbio major advisor.

#### Advanced Electives (2 classes, 6-8 credits)

A biology course at the 3000 or 4000 level from the list of biology major approved core and elective courses.

One of the following computational biology courses:

COMS W4762	Machine Learning for Functional Genomics
or CBMF W4761	COMPUTATIONAL GENOMICS
or BMEN E4480	Statistical machine learning for genomics
or COMS W4995	- computational biology section

## Minor in Biology

Students who wish to minor in biology must design their programs in advance with the director of undergraduate studies or a departmental adviser.

The minor would require 7 courses (25 credits), at least 2 are general chemistry [8 credits] and at least 5 biology [17 credits].

The requirements for the minor in biology are as follows:

### CHEMISTRY COURSES

CHEM UN1403 & CHEM UN1404	GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES
---------------------------	--

### BIOLOGY COURSES

BIOL UN2005 & BIOL UN2006	INTRO BIO I: BIOCHEM, GEN, MOLEC and INTRO BIO II: CELL BIO, DEV/PHYS
---------------------------	---

Select at least one of the following core courses:

BIOL UN3022	DEVELOPMENTAL BIOLOGY
BIOL UN3031	GENETICS
BIOL UN3041	CELL BIOLOGY

BIOL GU4501	Biochemistry
or BIOL UN3300	Biochemistry

BIOL GU4512	Molecular Biology
BIOL GU4560	EVOL IN THE AGE OF GENOMICS

Two additional 3000 or 4000 level biology lecture courses from the list of Upper Level Electives under the Biology Major.

No lab is required for the biology minor. However, only one biology lab can count towards the 5 biology course requirements. The biology lab options consists of the following:

BIOL UN2501	CONTEMPORARY BIOLOGY LAB
or BIOL UN3040	LAB IN MOLECULAR BIOLOGY
or BIOL UN3058	PROJECT LAB IN MICROBIOLOGY
or BIOL UN3052	PROJECT LAB-MOLECULAR GENETICS
or BIOL UN3500	INDEP BIOLOGICAL RESEARCH
or RSRH C0001	FULL-TIME SUMMER RESEARCH PROG

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Biology

The concentration in Biology is only available for students who entered CU in or before the 23-24 academic year.

Students who wish to concentrate in biology must design their programs in advance with a departmental adviser or the director of undergraduate studies.

The requirement for the concentration is 22 points in biology or biochemistry, with at least five courses chosen from the courses listed in the Biological Sciences section of the Bulletin. Additional courses in physics, chemistry, and mathematics are required as detailed below.

Students may not use transfer credits, Barnard courses or courses taken abroad for the biology minor biology course requirements. Please contact Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu)) regarding using either transfer credits or courses taken while studying abroad to substitute for the general chemistry course requirements.

The requirements for the concentration in biology are as follows:

BIOL UN2005	INTRO BIO I: BIOCHEM, GEN, MOLEC
BIOL UN2006	INTRO BIO II: CELL BIO, DEV/PHYS

Select at least one of the following core courses:

BIOL UN3022	DEVELOPMENTAL BIOLOGY
BIOL UN3031	GENETICS
BIOL UN3041	CELL BIOLOGY

BIOL GU4501	Biochemistry
or BIOL UN3300	Biochemistry

BIOL GU4512	Molecular Biology
-------------	-------------------

Plus additional biology elective courses (see electives listed under biology major) to reach a total of 22 points in biology courses.

No biology lab is required for the concentration. Of the 22 points, a maximum of 5 of the points can come from lab courses. SURF counts as 5 points of lab credit.

Chemistry through organic including labs; see biology major for options

One year of physics, including laboratory; see biology major for options

One year of college-level mathematics (ordinarily this should be calculus); see biology major for options

## FALL 2024

BIOL UN1360	Science and Society
BIOL UN1908	First Year Seminar in Biology
BIOL UN2005	INTRO BIO I: BIOCHEM, GEN, MOLEC
BIOL UN2300	Interpreting Scientific Evidence
BIOL UN2401	CONTEMPORARY BIOLOGY I
BIOL UN2501	CONTEMPORARY BIOLOGY LAB
BIOL UN3004	NEUROBIO I: CELLULAR # MOLECULAR
BIOL UN3005	NEUROBIO II: DEVPT # SYSTEMS
BIOL UN3022	DEVELOPMENTAL BIOLOGY
BIOL UN3025	NEUROGENETICS
BIOL UN3040	LAB IN MOLECULAR BIOLOGY (Lab in Molecular Biology)
BIOL UN3041	CELL BIOLOGY
BIOL UN3073	CELLULAR/MOLECULAR IMMUNOLOGY
BIOL UN3300	Biochemistry
BIOL UN3320	Regulation of Behaviors for Survival
BIOL UN3404	The Global Threat of Antimicrobial Resistance
BIOL UN3500	INDEP BIOLOGICAL RESEARCH
BIOL GU4034	BIOTECHNOLOGY
BIOL GU4260	PROTEOMICS LABORATORY
BIOL GU4300	DRUGS AND DISEASE
BIOC GU4323	Biophysical Chemistry I
BIOL GU4501	Biochemistry
BIOL GU4560	EVOL IN THE AGE OF GENOMICS

## SPRING 2025

BIOL UN1004	Foundations of Biology
BIOL UN2006	INTRO BIO II: CELL BIO, DEV/ PHYS
BIOL UN2402	CONTMP BIO II: CELL BIO, DEV, PHYS

BIOL UN2501	CONTEMPORARY BIOLOGY LAB
BIOL UN3005	NEUROBIO II: DEVPT # SYSTEMS
BIOL UN3006	PHYSIOLOGY
BIOL UN3031	GENETICS
BIOL UN3052	PROJECT LAB-MOLECULAR GENETICS
BIOL UN3058	PROJECT LAB IN MICROBIOLOGY
BIOL UN3300	Biochemistry
BIOL UN3500	INDEP BIOLOGICAL RESEARCH
BIOL UN3995	TOPICS IN BIOLOGY
BIOL GU4001	ADVANCED GENETIC ANALYSIS
BIOL GU4080	ANCIENT AND MODERN RNA WORLDS
BIOL GU4290	BIOLOGICAL MICROSCOPY
BIOL GU4305	SEMINAR IN BIOTECHNOLOGY
BIOL GU4310	Virology
CHEM GU4324	BIOPHYSICAL CHEMISTRY II
BIOL GU4510	Genomics of Gene Regulation
BIOL GU4512	Molecular Biology
BIOL GU4551	A Structural View of Biology
BIOL GU4799	MOLECULAR BIOLOGY OF CANCER

## ALL COURSES

### **BIOL UN1002 Theory and Practice of Science: Biology. 4 points.**

CC/GS: Partial Fulfillment of Science Requirement

Lecture and recitation. By analysis and example from the primary literature of evolution and genetics, examines how scientific theories are invented and how they come to be accepted, verified, and in some cases rejected. Papers begin with Darwin and Mendel and end with Watson. Ordinarily does not fulfill biology major or concentration requirements. Normally may not be taken for credit by any student who has previously completed any biology course numbered 2000 or above. BIOL UN1015 should be taken first then BIOL UN1002 for nonscience majors.

### **BIOL UN1004 Foundations of Biology. 2.00 points.**

General Chemistry I is a pre-requisite; General Chemistry II is a pre/co-requisite. In this course, we will introduce basic terminology, important concepts, and basic problem-solving skills in order to prepare biology and pre-health students for the challenging Biology courses they will take at Columbia. We will do a deep dive into a small number of topics and use these as access points to teaching skills that will aid students in future STEM courses. Classes will include time for problem solving. Recitations will involve problem solving and student presentations of solutions to problems

**Spring 2025: BIOL UN1004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 1004	001/13282	M W 4:10pm - 5:25pm 601 Fairchild Life Sciences Bldg	Mary Ann Price	2.00	42/60

**BIOL UN1130 GENES AND DEVELOPMENT. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of high school or college biology.

Prerequisites: one year of high school or college biology. This course covers selected topics in genetics and developmental biology, with special emphasis on issues that are relevant to contemporary society. Lectures and readings will cover the basic principles of genetics, how genes are expressed and regulated, the role of genes in normal development, and how alterations in genes lead to abnormal development and disease. We will also examine how genes can be manipulated in the laboratory, and look at the contributions of these manipulations to basic science and medicine, as well as some practical applications of these technologies. Interspersed student-run workshops will allow students to research and discuss the ethical and societal impacts of specific topics (e.g. in vitro fertilization, uses and misuses of genetic information, genetically modified organisms, steroid use, and cloning). SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

**BIOL UN1201 Engineered Mouse Models and Identifying Phenotypes In Vivo. 1.50 point.**

This undergraduate lecture course will introduce how transgenic and mutant mouse models are generated and their utility in defining the functional roles of genes in vivo. Classically, the function of a gene is tested in vivo by either overexpressing or inactivating its expression, leading to a gain-of-function or loss-of-function phenotype from which is inferred a gene's normal role in homeostasis. Here we will explore the classic strategies for the generation of transgenic and knockout mice, comparing and contrasting their individual strengths and weaknesses, while exploring the phenotypes that have resulted from these changes in gene expression. Using a subset of primary papers, students will be introduced to research analysis to become more versed in the layers of experimental design needed to identify a gene's function in vivo. The theoretical timing and the strategy needed to design such experiments with these transgenic and mutant mouse models, and the power of stem cell experiments will be discussed. In addition, to develop critical and additional analytical skills, students will become versed in basic tissue histology and immunohistochemistry, using processed paraffin-embedded mouse tissues from wild-type and engineered mutant mouse lines. Students will learn how to recognize numerous,

normal adult tissues with light microscopy and to identify proliferative zones vs. fully differentiated layers within each. In addition, they will analyze the development of mid-to-late gestational embryos in serial sections, to underscore the coordinated transformation of tissues required for normal embryonic development. Finally, serial sections from well-defined mutant mouse models will be used to identify and characterize abnormal phenotypes resulting from the knock-out of genes encoding cell cycle regulators or tumor suppressors. Live animal handling or experimentation is not a component of this course

**BIOL UN1360 Science and Society. 3.00 points.**

This course, which has been given at another institution for the past five years, uses a seminar discussion format to examine the relationship between science and society from numerous perspectives, using examples from many fields of science, mostly biology and medicine, including the Covid-19 pandemic. We welcome undergraduates from all classes who are concentrating in any field of sciences, humanities, or the arts; there are no prerequisites, other than an interest in how the scientific enterprise works. The course addresses a wide array of topics: why do people choose a scientific career; why do governments and other funders support scientific work; how does science fail; why is there widespread skepticism about science; how is it represented in the arts; how are results disseminated, evaluated, and legally protected; and many other subjects. Assignments-- mainly short articles (from newspapers and journals) and book chapters, but also a few films and novels --will be provided for each class, and every student will undertake a term project of their own choosing, after consultations with the instructor

**Fall 2024: BIOL UN1360**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 1360	001/11049	W 4:10pm - 6:40pm 1000 Fairchild Life Sciences Bldg	Ellie Siddens, Harold Varmus	3.00	15/20

**BIOL UN1440 DNA Diversity and You. 3.00 points.**

This seminar focuses on the biochemistry, biology, and sociology of DNA and its use and potential for misuse. Even before the discovery of the human genome, the DNA that is the lattice of each human being has been thought to be static and determinative. More recently, with advances in sequencing that DNA, the emerging picture is much more complex. Even so, deeply held beliefs about being solely "my DNA" have persisted affecting our entire species. Students in this seminar are expected to critically discuss and examine the ethical and societal impacts of several topics related to DNA (e.g., artificial reproductive techniques, eugenics, bodily autonomy, definitions and treatment of diseases, neuroscience, epigenetics and the microbiome), as well as the underlying biology and biochemistry of DNA. Human identity and its relationship to DNA is examined using an interdisciplinary framework of perspectives, including those originating from biology, genetics, medicine, public health, psychiatry, religion, and the

law. Students are expected to draw from their own experiences as an individual in reflection through the readings to complete the written coursework and participate each week in class discussion. This seminar also allows for expression in other modalities (e.g., visual or aural), in a two-part final class project consisting of a media component in addition to a final written assignment

### **BIOL UN1908 First Year Seminar in Biology. 1.00 point.**

If you are interested in biology, come hear Columbia University professors discuss their biology-related research. Find out how the body works, the latest therapies for disease and maybe even find a lab to do research in. <http://www.columbia.edu/cu/biology/courses/UN1908/index.htm>

#### **Fall 2024: BIOL UN1908**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 1908	001/10323	Th 3:00pm - 3:55pm 601 Fairchild Life Sciences Bldg	Alice Hecklen	1.00	66/70

### **BIOL UN2005 INTRO BIO I: BIOCHEM,GEN,MOLEC. 4.00 points.**

Prerequisites: one year of college chemistry, or a strong high school chemistry background.

Prerequisites: one year of college chemistry is required.

Lecture and recitation. Recommended as the introductory biology course for biology and related majors, and for premedical students. Fundamental principles of biochemistry, molecular biology, and genetics. SPS, Barnard, and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### **Fall 2024: BIOL UN2005**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2005	001/10393	T Th 10:10am - 11:25am 417 International Affairs Bldg	Michelle Attner, Marko Jovanovic	4.00	184/400
BIOL 2005	002/10394	T Th 4:10pm - 5:25pm 309 Havemeyer Hall	Marko Jovanovic, Michelle Attner	4.00	123/400

### **BIOL UN2006 INTRO BIO II:CELL BIO,DEV/PHYS. 4.00 points.**

Prerequisites: *EEEB W2001* or *BIOL C2005*, or the instructor's permission.

Prerequisites: BIOL UN2005, or the instructors permission.

Lecture and recitation. Recommended second term of biology for majors in biology and related majors, and for premedical students. Cellular biology and development; physiology of cells and organisms. SPS, Barnard, and TC students may register for this course, but they must first obtain the written permission of

the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>. Students must register for a recitation section BIOL UN2016

#### **Spring 2025: BIOL UN2006**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2006	001/11652	T Th 10:10am - 11:25am 417 International Affairs Bldg	Alice Hecklen, Mary Ann Price, Jellert Gaubblomme	4.00	148/400
BIOL 2006	002/11653	T Th 4:10pm - 5:25pm 417 International Affairs Bldg	Alice Hecklen, Mary Ann Price, Jellert Gaubblomme	4.00	116/400

### **BIOL UN2015 INTRO BIO I: BIOCHEM,GEN,MOLEC. 0.00 points.**

Lecture and recitation. Recommended as the introductory biology course for biology and related majors, and for premedical students. Fundamental principles of biochemistry, molecular biology, and genetics. SPS, Barnard, and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

### **BIOL UN2016 INTRO BIO II:CELL BIO,DEV/PHYS. 0.00 points.**

Corequisites: BIOL UN2006

Prerequisites: Prerequisites: Course does not fulfill Biology major requirements or premedical requirements. Enrollment in laboratory limited to 16 students per section. Corequisites: BIOL UN2006 Prerequisites: Course does not fulfill Biology major requirements or premedical requirements. Enrollment in laboratory limited to 16 students per section. Exploration of the major discoveries and ideas that have revolutionized the way we view organisms and understand life. The basic concepts of cell biology, anatomy and physiology, genetics, evolution, and ecology will be traced from seminal discoveries to the modern era. The laboratory will develop these concepts and analyze biological diversity through a combined experimental and observational approach

Spring 2025: BIOL UN2016

### **BIOL UN2300 Interpreting Scientific Evidence. 3.00 points.**

This class focuses on how we gather reliable scientific evidence about human biology and public health. The aim is to help students better interpret and evaluate the scientific evidence that they will encounter throughout their lifetime, in primary papers but also as presented in news, advertisement, and politics. To these ends, students will be introduced to basic definitions and concepts in statistics and epidemiology, including point estimates and measures of uncertainty, p-values, error rates, association and causation, different study designs, and selection bias. Readings will draw from a textbook as well as the primary literature. The second half of the course will turn to dissecting the representation and misrepresentation of scientific evidence presented in different venues. It will draw primarily from the textbook "Calling Bullshit" and include discussions of timely examples from the news

Fall 2024: BIOL UN2300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2300 001/11053		W 2:10pm - 4:00pm	Molly Przeworski	3.00	24/30
		825 Seeley W. Mudd Building			

### **BIOL UN2401 CONTEMPORARY BIOLOGY I. 3.00 points.**

Prerequisites: a course in college chemistry or the written permission of either the instructor or the premedical adviser. Prerequisites: one year of college chemistry or the written permission of either the instructor or the premedical adviser is required. Recommended as the introductory biology course for science majors who have completed a year of college chemistry and premedical students. The fundamental principles of biochemistry, molecular biology, and genetics. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar.

<http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### Fall 2024: BIOL UN2401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2401	001/10395	T Th 10:10am - 11:25am 417 International Affairs Bldg	Michelle Attner, Marko Jovanovic	3.00	28/200
BIOL 2401	002/10396	T Th 4:10pm - 5:25pm 309 Havemeyer Hall	Michelle Attner, Marko Jovanovic	3.00	33/200

#### BIOL UN2402 CONTMP BIO II:CELL BIO,DEV,PHYS.

##### 3.00 points.

Prerequisites: a course in college chemistry and *BIOL C2005* or *F2401*, or the written permission of either the instructor or the premedical adviser.

Prerequisites: a course in college chemistry and BIOL UN2005 or BIOL UN2401, or the written permission of either the instructor or the premedical adviser. Cellular biology and development; physiology of cells and organisms. Same lectures as BIOL UN2006, but recitation is optional. For a detailed description of the differences between the two courses, see the course web site or <http://www.columbia.edu/cu/biology/ug/advice/faqs/gs.html>. SPS, Barnard, and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### Spring 2025: BIOL UN2402

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2402	001/11654	T Th 10:10am - 11:25am 417 International Affairs Bldg	Alice Heicklen, Mary Ann Price, Jellert Gaublomme	3.00	35/400
BIOL 2402	002/11655	T Th 4:10pm - 5:25pm 417 International Affairs Bldg	Alice Heicklen, Mary Ann Price, Jellert Gaublomme	3.00	23/400

#### BIOL UN2501 CONTEMPORARY BIOLOGY LAB. 3.00 points.

Enrollment per section limited to 28. Lab Fee: \$150.  
Fee: Lab Fee - 150.00

Prerequisite or corequisite: BIOL UN2005 or BIOL UN2401. Contemporary Biology Lab is designed to provide students with hands-on exploration of fundamental and contemporary biological tools and concepts. Activities include in depth study of mammalian anatomy and physiology through dissection and histology, as well as a series of experiments in genetics

and molecular biology, with emphasis on data analysis and experimental technique

#### Fall 2024: BIOL UN2501

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2501	001/10715	M 1:10pm - 5:00pm 922 Schermerhorn Hall	Ava Brent	3.00	27/30
BIOL 2501	002/10716	T 1:10pm - 5:00pm 922 Schermerhorn Hall	Joshua Abrams	3.00	23/30
BIOL 2501	003/10717	W 1:10pm - 5:00pm 922 Schermerhorn Hall	Ava Brent	3.00	23/30

BIOL 2501	003/11637	W 1:10pm - 5:00pm 922 Schermerhorn Hall	Ava Brent	3.00	13/30
BIOL 2501	004/11638	Th 5:40pm - 9:30pm 922 Schermerhorn Hall	Joshua Abrams	3.00	17/30

#### BIOL UN2502 Foundations for Lab Biology. 3.00 points.

Due to COVID-19 related restrictions on in-person laboratory work, this course acts as a replacement for BIOL UN2501.

This course will act as a virtual introduction to the practice of contemporary biology, with an emphasis on common laboratory methods, online tools, statistical analysis, styles of scientific reasoning, and science communication. Students will be expected to watch a weekly lecture, either in-person or via recording. Lab activities are designed to be highly interactive and collaborative to reflect the realities of biological research. Small groups of students will work together on in-class activities, as well as on a long-term student-designed biological research project

#### BIOL UN2700 Past and future of the human genome. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

We can now determine the genetic makeup of any person in a matter of days and at a cost already within reach for many millions of people. For the past few years a movement has emerged to provide detailed genetic information directly to

ordinary people, in some cases with the explicit aim of helping prospective parents to “eliminate preventable genetic disease” or, as one newspaper put it, to promote “genetically flawless babies.”

But our technical capacity to both interrogate and manipulate the human genome has raced far ahead of serious consideration of the societal implications of doing so. This course will provide students with the background necessary to understand what has and will be done with the human genome and ultimately to help society formulate appropriate policies for wise stewardship of the human genome.

To help illustrate the information available in the human genome and how it may influence individuals' lives, the instructors' will share and discuss their own and other public genomes in ways both molecular and personal.

#### **BIOL UN3004 NEUROBIO I: CELLULAR & MOLECULAR. 4.00 points.**

Prerequisites: one year of biology; a course in physics is highly recommended. Lecture and recitation. This is an advanced course intended for majors providing an in depth survey of the cellular and molecular aspects of nerve cell function. Topics include: the cell biology and biochemistry of neurons, ionic and molecular basis of electrical signals, synaptic transmission and its modulation, function of sensory receptors. Although not required, it is intended to be followed by Neurobiology II (see below). The recitation meets once per week in smaller groups and emphasizes readings from the primary literature

##### **Fall 2024: BIOL UN3004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3004	001/10503	M W 1:10pm - 2:25pm 142 Uris Hall	Ishmail Abdus-Saboor	4.00	101/100
BIOL 3004	002/15967	T Th 10:10am - 11:25am 601 Fairchild Life Sciences Bldg	Rafael Yuste	4.00	13/70

#### **BIOL UN3005 NEUROBIO II: DEVPT & SYSTEMS. 4.00 points.**

Prerequisites: *BIOL W3004*, one year of biology, or the instructor's permission.

Prerequisites: One year of biology, BIOL UN3004 or instructors permission in case the student hasn't take it. This course is the capstone course for the Neurobiology and Behavior undergraduate major at Columbia University. It is designed for advanced undergraduate and graduate students. Knowledge of Cellular Neuroscience (how an action potential is generated and how a synapse works) will be assumed. It is recommended that students take BIOL UN3004 Neurobiology I: Molecular and Cellular Neuroscience, or a similar course, or obtain instructors permission. Website for BIOL UN3005: <https://blogs.cuit.columbia.edu/rmy5/files/2022/01/syllabus.UN3005.2022.v4-lab.pdf>

##### **Spring 2025: BIOL UN3005**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3005	001/11796	T Th 10:10am - 11:25am 207 Mathematics Building	Darcy Kelley	4.00	96/150

#### **BIOL UN3006 PHYSIOLOGY. 3.00 points.**

Prerequisites: (BIOL UN2005 and BIOL UN2006) or (BIOL UN2401 and BIOL UN2402) *BIOL C2005 & BIOL C2006* or *BIOL F2401 & BIOL F2402*, or the instructor's permission. In this primarily human physiology course, we will discuss how the major organ systems function, with an emphasis on cellular, molecular, and physical mechanisms. Organ systems covered include musculoskeletal, cardiovascular, respiratory, urinary, and digestive systems. Traditional lectures focus primarily on the normal functioning of organ systems, while pathophysiology is introduced through five case studies during the semester. After this course, students should be able to 1) describe the basic functioning of the major organ systems and how they contribute to homeostasis and health, 2) apply key concepts in physics and chemistry, such as flow, pressure/volume relationships, and mass action, to physiological systems, 3) use key concepts in molecular and cell biology to gain a mechanistic understanding of physiological processes, explain how organ systems work in an integrated way to achieve homeostasis and health, and 4) predict changes in organ function upon drug treatment, genetic mutation, or disease conditions

##### **Spring 2025: BIOL UN3006**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3006	001/11657	T Th 1:10pm - 2:25pm 601 Fairchild Life Sciences Bldg	Ava Brent	3.00	50/60

#### **BIOL UN3008 The Cellular Physiology of Disease. 3 points.**

This course will present a quantitative description of the cellular physiology of excitable cells (mostly nerve and muscle). While the course will focus on examining basic mechanisms in cell physiology, there will be a thread of discussion of disease mechanisms throughout. The end of each lecture will include a discussion of the molecular mechanisms of selected diseases that relate to the topics covered in the lecture. The course will consist of two lectures per week. This course will be of interest to advanced (3000-4000 level) undergraduates that aim to pursue careers in medicine as well as those that will pursue careers in biomedical research. This course will also be of interest to graduate students desiring an introduction to the cellular physiology of nerve and muscle.

#### **BIOL UN3014 Neurobiology I Recitation. 0.00 points.**

Discussion/recitation section for BIOL UN3004 Neurobiology I

##### **Fall 2024: BIOL UN3014**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**BIOL UN3019 Brain Evolution. 3.00 points.**

If an engineer were to build “the brain”, they would not be able to reproduce any of the brains that exist on Earth. Our brains were not designed to be perfect, but are a result of millions of years of evolution and adaptation. The goal of this course is to provide an overview of brain evolution, ranging from the evolution of the first neurons to the origin of the human brain. Specifically, the course will focus on recent insights emerging from studies of development, gene expression, and neural circuit architecture. The evolutionary perspective on commonly used terms, such as “neuron” and “brain”, and general principles of brain organization and function emerging from comparative studies will be discussed

**BIOL UN3022 DEVELOPMENTAL BIOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: BIOL UN2005 and BIOL UN2006 *BIOL C2005-C2006* or equivalent.

Prerequisites: BIOL UN2005 and BIOL UN2006 or equivalent. Come discover how the union of egg and sperm triggers the complex cellular interactions that specify the diverse variety of cells present in multicellular organisms. Cellular and molecular aspects of sex determination, gametogenesis, genomic imprinting, X-chromosome inactivation, telomerase as the biological clock, stem cells, cloning, the pill and cell interactions will be explored, with an emphasis on humans. Original research articles will be discussed to further examine current research in developmental biology. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

**Fall 2024: BIOL UN3022**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3022	001/10324	T Th 1:10pm - 2:25pm 601 Fairchild Life Sciences Bldg	Alice Hecklen	3.00	31/60

**BIOL UN3025 NEUROGENETICS. 3.00 points.**

Prerequisites: (BIOL UN2005 and BIOL UN2006)

Prerequisites: (BIOL UN2005 and BIOL UN2006) This course provides an introduction to Neurogenetics, which studies the role of genetics in the development and function of the nervous system (<https://en.wikipedia.org/wiki/Neurogenetics>). The course will be focused on teaching classic and contemporary concepts in genetics and neuroscience, rather than cataloguing mere facts. The course will emphasize the discovery processes, historical figures involved in these processes and methodologies of discovery. Primary research papers will be discussed in detail. A central organizational theme of the course is the presence of a common thread and narrative throughout the course. The common thread is an invertebrate model system, the roundworm *Caenorhabditis elegans*, which serves as a paradigm to show how simple genetic model systems have informed our view on the genetics of nervous system development and function. The ultimate goal of this course is to gain an understanding of the underlying principles of how the nervous system of one specific animal species forms, from beginning to end. The course is intended for neuroscience-inclined students (e.g. neuroscience majors) who want to learn about how genetic approaches have informed our understanding of brain development and function and, vice versa, for students with an interest in molecular biology and genetics, who want to learn about key problems in neuroscience and how genetic approaches can address them

**Fall 2024: BIOL UN3025**

Sciences Bldg

### **BIOL UN3031 GENETICS. 3.00 points.**

Students may receive credit for *BIOL W3031* or *BIOL C3032*, but not both due to overlap in course content.

Prerequisites: BIOL UN2005 and BIOL UN2006 or *BIOL C2005-C2006* or the equivalent.

Prerequisites: BIOL UN2005 and BIOL UN2006. General genetics course focused on basic principles of transmission genetics and the application of genetic approaches to the study of biological function. Principles will be illustrated using classical and contemporary examples from prokaryote and eukaryote organisms, and the experimental discoveries at their foundation will be featured. Applications will include genetic approaches to studying animal development and human diseases. SPS and TC students must obtain the written permission from the instructor, by filling out a Registration Adjustment Form (Add/Drop form). <https://www.registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### **Spring 2025: BIOL UN3031**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3031	001/11666	T Th 10:10am - 11:25am 601 Fairchild Life Sciences Bldg	Iva Greenwald, Michelle Attner	3.00	54/70

### **BIOL UN3034 Biotechnology. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement  
For upper-level undergraduates.

Prerequisites: genetics or molecular biology.

The course covers techniques currently used to explore and manipulate gene function and their applications in medicine and the environment. Part I covers key laboratory manipulations, including DNA cloning, gene characterization, association of genes with disease, and methods for studying gene regulation and activities of gene products. Part II also covers commercial applications, and includes animal cell culture, production of recombinant proteins, novel diagnostics, high throughput screening, and environmental biosensors. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

### **BIOL UN3040 LAB IN MOLECULAR BIOLOGY. 3.00 points.**

Enrollment limited to 12. Lab fee: \$150.

Prerequisites: one year of biology (*C2005-C2006*) and Contemporary Biology Laboratory (*C250I*).

Prerequisites: one year of biology (BIOL UN2005 and BIOL UN2006) and Contemporary Biology Laboratory (BIOL

UN2501). Prerequisites: one year of biology (UN2005-UN2006) and Contemporary Biology Laboratory (UN2501). This lab will explore various molecular biology techniques frequently utilized in modern molecular biology laboratories. The lab will consist of four modules: 1) Molecular verification of genetically modified organisms (GMOs); 2) Site-directed mutagenesis; 3) gDNA extraction, PCR amplification, sequencing and GenBank analysis of the COI genes from diverse fish species and 4) protein gel analysis of fish muscle components. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at: <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### **Fall 2024: BIOL UN3040**

### **BIOL UN3041 CELL BIOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of biology, normally *BIOL C2005-C2006*, or the equivalent.

Prerequisites: one year of biology, normally BIOL UN2005-BIOL UN2006, or the equivalent. Cell Biology 3041/4041 is an upper-division course that covers in depth all organelles of cells, how they make up tissues, secrete substances important for the organism, generate and adapt to their working environment in the body, move throughout development, and signal to each other. Because these topics were introduced in the Intro Course (taught by Mowshowitz and Chasin), this course or its equivalent is a pre-requisite for W3041/4041. Students for whom this course is useful include biology, biochem or biomedical engineering majors, those preparing to apply for medical school or graduate school, and those doing or planning to start doing research in a biology or biomedical lab. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### **Fall 2024: BIOL UN3041**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **BIOL UN3050 Project Laboratory In Protein Biochemistry. 5 points.**

This course provides an intensive introduction to professional biomedical laboratory research. Students conduct a portion of an ongoing biochemical research project and write-up their results in a format suitable for publication in a peer-reviewed scientific research journal. Techniques in molecular biology and protein biochemistry are used to address a problem in mechanistic biochemistry or molecular pharmacology. Students are exposed to the full spectrum of techniques used in contemporary protein biochemistry, including molecular sequence analysis of genomic databases, molecular cloning and manipulation of recombinant DNA, protein expression in *E. coli*, protein purification, and biophysical characterization (typically including crystallization for x-ray structure determination). The course emphasizes the use of critical thinking skills in scientific research while giving students the opportunity to apply the basic knowledge learned in a wide variety of biology and chemistry lecture courses to a real research project. Examples of past projects can be found on the course website: <https://www1.columbia.edu/sec/cu/biology/courses/w3050/class/index.html> (cunix account required to login).

### **BIOL UN3052 PROJECT LAB-MOLECULAR GENETICS. 5.00 points.**

Enrollment limited to approximately 12. Fee: \$150.

Prerequisites: one year of introductory biology and the instructor's permission.

Multicellular animals contain a diverse array of cell types, yet start from a single cell. How do cells decide what kind of cell to be? In this lab course, we will use the tools of molecular biology and genetics to explore this fascinating question. We will use the nematode *Caenorhabditis elegans*, a powerful model organism used in hundreds of research labs. The course will be divided into three modules: *C. elegans* genetics, molecular cloning, and genetic screening. Laboratory techniques will include PCR, gel electrophoresis, restriction digest, ligation, transformation, RNAi, and *C. elegans* maintenance. Students will pursue original projects; emphasis will be placed on scientific thinking and scientific communication. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). Prerequisites: UN2005/UN2401 and UN2006/UN2402, or the equivalent at a different institution

Spring 2025: BIOL UN3052

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3052	001/11704	M W 12:10pm - 4:00pm 743 Seeley W. Mudd Building	Michelle Attner	5.00	11/12

### **BIOL UN3058 PROJECT LAB IN MICROBIOLOGY. 5.00 points.**

Lab fee: \$150.

Prerequisites: one year of Intro Bio. An introductory biology or chemistry lab is recommended.

Prerequisites: one year of Intro Bio. An introductory biology or chemistry lab is recommended. Bacteria are not just unicellular germs. This lab course will broaden your awareness of the amazing world of microbiology and the diverse capabilities of microbes. The focus will be on bacterial multicellularity, pigment production, and intercellular signaling. Pigment-producing bacteria will be isolated from the wild (i.e. Morningside Campus or your skin), and characterized using standard genetic tools (PCR, DNA gel electrophoresis, transformation, screen) and microbiology techniques (isolation of bacteria and growth of bacterial colonies, media preparation, enrichment techniques for pigments). These techniques will also be applied in the study of bacterial multicellularity and signaling in the standard lab strain *Pseudomonas aeruginosa*. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2025: BIOL UN3058

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3058	001/11660	T Th 1:10pm - 5:00pm 601c Fairchild Life Sciences Bldg	Lars Dietrich	5.00	13/12

### **BIOL UN3073 CELLULAR/MOLECULAR IMMUNOLOGY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: two semesters of a rigorous, molecularly-oriented introductory biology course (such as C2005 and C2006), or the instructor's permission.

Prerequisites: two semesters of a rigorous, molecularly-oriented introductory biology course (such as UN2005 and UN2006), or the instructors permission. This course will cover the basic concepts underlying the mechanisms of innate and adaptive immunity, as well as key experimental methods currently used in the field. To keep it real, the course will include clinical correlates in such areas as infectious diseases, autoimmune diseases, cancer immunotherapy and transplantation. Taking this course won't turn you into an immunologist, but it may make you want to become one, as was the case for several students last year. After taking the course, you should be able to read the literature intelligently in this rapidly advancing field. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the

URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### Fall 2024: BIOL UN3073

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3073	001/11819	M W 1:10pm - 2:25pm 413 Kent Hall	Christian Schindler	3.00	35/60

#### **BIOL UN3190 STEM CELLS: BIOL,ETHICS,APPLIC. 3.00 points.**

#### **BIOL UN3193 STEM CELL BIOL # APPLICATIONS. 3.00 points.**

Prerequisites: three semesters of Biology or the instructors permission. The course examines current knowledge and potential medical applications of pluripotent stem cells (embryonic stem cells and induced pluripotent stem cells), direct conversions between cell types and adult, tissue-specific stem cells (concentrating mainly on hematopoietic and gut stem cells as leading paradigms). A basic lecture format will be supplemented by presentations and discussions of research papers. Recent reviews and research papers, together with extensive instructor notes, will be used in place of a textbook. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### **BIOL UN3208 Introduction to Evolutionary Biology. 3 points.**

Introduction to principles of general evolutionary theory, both nomological and historical; causes and processes of evolution; phylogenetic evolution; species concept and speciation; adaptation and macroevolution; concepts of phylogeny and classification.

#### **BIOL UN3300 Biochemistry. 3.00 points.**

Prerequisites: 1 year of Introductory Biology, 1 year General Chemistry, and 1st semester Organic Chemistry. Biochemistry is the study of the chemical processes within organisms that give rise to the immense complexity of life. This complexity emerges from a highly regulated and coordinated flow of chemical energy from one biomolecule to another. This course serves to familiarize students with the spectrum of biomolecules (carbohydrates, lipids, amino acids, nucleic acids, etc.) as well as the fundamental chemical processes (glycolysis, citric acid cycle, fatty acid metabolism, etc.) that allow life to happen. The course will end with a discussion of diseases that have biochemical etiologies. In particular, this course will employ active learning techniques and critical thinking problem-solving to engage students in answering the question: how is the complexity of life possible? NOTE: While only the 1st semester of Organic Chemistry is listed as a pre-requisite, it is

highly recommended that you take all of Organic Chemistry beforehand

#### Fall 2024: BIOL UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3300	001/11060	T 7:00pm - 9:30pm 330 Uris Hall	Danny Ho	3.00	54/60

#### Spring 2025: BIOL UN3300

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3300	001/11744	T 7:00pm - 9:30pm 602 Hamilton Hall	Danny Ho	3.00	76/80

#### **BIOL UN3310 Virology. 3 points.**

Prerequisites: two semesters of a rigorous, molecularly-oriented introductory biology course (such as C2005), or the instructor's permission.

The course will emphasize the common reactions that must be completed by all viruses for successful reproduction within a host cell and survival and spread within a host population. The molecular basis of alternative reproductive cycles, the interactions of viruses with host organisms, and how these lead to disease are presented with examples drawn from a set of representative animal and human viruses.

#### **BIOL UN3320 Regulation of Behaviors for Survival. 4.00 points.**

To maximize their survival animals must regulate their behavior in response to external environmental cues and their own internal state. A fundamental goal of neuroscience is to understand how neural circuits in the brain function to influence behavior. The aim of this course is to highlight the neural basis of neuropeptide regulation of innate behaviors that are critical for survival and discuss modern approaches to study the neuronal control of classically studied aspects of behavior. We will explore motor control (escape responses), sensory systems (vision, taste, and olfaction), and survival behaviors (feeding, drinking, mating, and aggression). Focus will be on recent and current research, the diversity of approaches for studying it, and how this knowledge can be applied to solve scientific questions. Students will read primary scientific literature and a significant portion of the course will be presentation and discussion-based

#### Fall 2024: BIOL UN3320

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3320	001/10322	W 10:10am - 12:00pm 516 Hamilton Hall	Laura Duvall	4.00	16/18

#### **BIOL UN3387 BIOLOGY TEST. 3 points.** ABCDE

#### **BIOL UN3404 The Global Threat of Antimicrobial Resistance. 3.00 points.**

Prerequisites: (biol un2005 and biol un2006) or (biol un2401 and biol un2402)

Antimicrobial resistant bacterial infections were estimated to account for 1.27 million deaths worldwide in 2019. The goal of the seminar is to provide an in-depth analysis of this ongoing threat. Discussions will include the molecular mechanisms,

epidemiology of transmission and the consequences of antimicrobial resistant infections. It will also cover current efforts to reduce the spread and emergence of these difficult to treat pathogens, both in the community and the healthcare setting

#### Fall 2024: BIOL UN3404

#### BIOL UN3560 EVOL IN THE AGE OF GENOMICS. 4.00 points.

Prerequisites: introductory genetics or the instructor's permission.

Prerequisites: Introductory Biology I and II, or the instructors permission. This course introduces basic concepts in evolutionary biology, from speciation to natural selection. While the lectures incorporate a historical perspective, the main goal of the class is to familiarize students with topics and tools of evolutionary genetics as practiced today, in the era of genomics. Thus, the focus will be on evidence from molecular evolution and genetics and exercises will assume a basic background in genetics. Examples will be drawn from across the tree of life, but with a primary focus on humans

#### BIOL UN3700 INDEPENDENT CLINICAL RESEARCH. 2.00-4.00 points.

Prerequisites: concurrent with registering for this course, a student must register with the department, provide a written invitation from a mentor, and submit a research proposal. Prerequisites: concurrent with registering for this course, a student must register with the department, provide a written invitation from a mentor, and submit a research proposal. BIOL 3700 will provide an opportunity for students interested in independent research work in a hospital or hospice setting. In these settings, where patients and their needs are paramount, and where IRB rules and basic medical ethics make "wet-lab biology research" inappropriate, undergraduates may well find a way nevertheless, to assist and participate in ongoing clinical research. Such students, once they have identified a mentor willing to provide support, participation, and advising, may apply to the faculty member in charge of the course for 2-4 points/semester in BIOL W3700. This course will closely follow procedures already in place for BIOL 3500, but will ask potential mentors to provide evidence that students will gain hands-on experience in a clinical setting, while participating in a hospital- or hospice-based research agenda. A paper

summarizing results of the work is required by the last day of finals for a letter grade; no late papers will be accepted

**BIOL UN3799 MOLECULAR BIOLOGY OF CANCER. 3.00 points.**

Prerequisites: three terms of biology (genetics and cell biology recommended).

Prerequisites: three terms of biology (genetics and cell biology recommended). Cancer is one of the most dreaded common diseases. Yet it is also one of the great intellectual challenges in biology today. How does a cell become cancerous? What are the agents that cause this to occur? How do current findings about genes, cells, and organisms ranging from yeast cells to humans inform us about cancer? How do findings about cancer teach us new biological concepts? Over the past few years there have been great inroads into answering these questions which have led to new ways to diagnose and treat cancer. This course will discuss cancer from the point of view of basic biological research. We will cover topics in genetics, molecular and cell biology that are relevant to understanding the differences between normal and cancer cells. These will include tumor viruses, oncogenes, tumor suppressor genes, cell cycle regulation, programmed cell death and cell senescence. We will also study some current physiological concepts related to cancer including angiogenesis, tumor immunology, cancer stem cells, metastasis and new approaches to treatment that are built on recent discoveries in cancer biology. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

**BIOL UN3995 (Section 1) Topics in Biology: Crossroads in Bioethics. 1-2 points.**

Prerequisites: at least one introductory course in biology or chemistry.

This two credit multidisciplinary and interactive course will focus on contemporary issues in bioethics. Each topic will cover both the underlying science of new biotechnologies and the subsequent bioethical issues that emerge from these technologies. Classroom time will be devoted to student discussions, case presentations, and role playing. Topics include human trafficking, stem cell research, human reproductive cloning, neuroethics, genetic screening, human-animal chimeras, synthetic biology, bioterrorism, and neuroimaging.

**BIOL UN3995 TOPICS IN BIOLOGY. 2.00 points.**

Enrollment limited to 18.

Topics in Biology: Crossroads in Bioethics. This two credit multidisciplinary and interactive course will focus on contemporary issues in bioethics and medical ethics. Each topic will cover both the underlying science of new biotechnologies and the subsequent bioethical issues that emerge from these technologies. Each topic will introduce a bioethical

principle that will be explored using case studies. Students are expected to prepare for each class based on the assignment so that classroom time will be devoted to discussion, case presentations, and role playing rather than merely lectures. Topics include stem cell research, human reproductive cloning, bioterrorism, neuroethics, genetic screening, medical stem cell tourism, patents and science, forensic science and the interface of science and culture/religion

**Spring 2025: BIOL UN3995**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3995	001/11812	T 1:10pm - 2:25pm 644 Seeley W. Mudd Building	John Loike	2.00	30/40

**BIOL GU4001 ADVANCED GENETIC ANALYSIS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Enrollment limited to 25.

Prerequisites: for undergraduates: Introductory Genetics (W3031) and the instructor's permission.

Prerequisites: for undergraduates: Introductory Genetics (W3031) and the instructors permission. This seminar course provides a detailed presentation of areas in classical and molecular genetics for advanced undergraduates and beginning graduate students. Topics include transmission genetics, gain and loss of function mutations, genetic redundancy, suppressors, enhancers, epistasis, expression patterns, using transposons, and genome analysis. The course is a mixture of lectures, student presentations, seminar discussions, and readings from the original literature

**Spring 2025: BIOL GU4001**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4001	001/11639	M 1:10pm - 4:00pm 1000 Fairchild Life Sciences Bldg	Martin Chalfie	3.00	14/25

**BIOL GU4002 Macromolecular Structure # Interactions. 4.00 points.**

Open to PhD candidates in the biomedical and chemical sciences, and to other qualified graduate, undergraduate, and continuing education students with the instructor's permission.

This course has three interrelated goals: (i) to develop an intuitive understanding of the thermodynamic forces that control the structure of biological macromolecules and the evolution of life, (ii) to learn how to apply that understanding to experimental analyses of macromolecular interactions, and (iii) to master the use of molecular graphics software for understanding and interpreting macromolecular structures and interactions. The lectures develop the essential thermodynamic theory from the ground up, starting from a review of the relevant physical forces (Newton's and Coulomb's Laws) and culminating with an intuitive explanation of how complex biological organisms can evolve spontaneously, in a universe in which all natural processes are driven by increasing randomness or entropy, as specified by the 2nd

Law of Thermodynamics. Subsequent lectures elaborate how these thermodynamic principles govern the formation and interaction of macromolecular structures, which represent the physical foundation for the evolution of life, and how the same principles are applied to analyze related experimental data. The problem sets for the course focus on practical applications of these principles to the analysis of data from common experiments used by molecular biologists to characterize macromolecular interactions. Extensive use is made of molecular graphics software throughout the semester, including in the problem sets, based on instruction provided in both the lectures and recitation sections. The course is designed to develop a deep understanding of the physical mechanisms controlling macromolecular interactions while simultaneously empowering students to critically read related literature and rigorously design and analyze related experiments themselves

**BIOL GU4004 NEUROBIO I:CELLULAR # MOLECU**  
**4.00 points.**

Prerequisites: one year of biology; a course in physics is highly recommended. Lecture and recitation. This is an advanced course intended for majors providing an in depth survey of the cellular and molecular aspects of nerve cell function. Topics include the cell biology and biochemistry of neurons, ionic and molecular basis of electrical signals, synaptic transmission and its modulation, function of sensory receptors. Although not required, it is intended to be followed by Neurobiology II (see below). The recitation meets once per week in smaller groups and emphasizes readings from the primary literature

**BIOL GU4008 The Cellular Physiology of Disease. 3 points.**

Prerequisites: one 3000-level course in Cell Biology or Biochemistry or the instructor's permission.

Corequisites: BIOL GU4009

This course will present a quantitative description of the cellular physiology of excitable cells (mostly nerve and muscle). While the course will focus on examining basic mechanisms in cell physiology, there will be a thread of discussion of disease mechanisms throughout. The end of each lecture will include a discussion of the molecular mechanisms of selected diseases that relate to the topics covered in the lecture. The course will consist of two lectures per week. This course will be of interest to advanced (3000-4000 level) undergraduates that aim to pursue careers in medicine as well as those that will pursue careers in biomedical research. This course will also be of interest to graduate students desiring an introduction to the cellular physiology of nerve and muscle.

**BIOL GU4009 Cellular Physiology of Diseases Laboratory.**  
**1 point.**

See department for details

**BIOL GU4013 ADV SEMINAR IN NEUROBIOLOGY.**  
**3.00 points.**

**BIOL GU4022 DEVELOPMENTAL BIOLOGY. 3.00 points.**

Prerequisites: BIOL C2005-C2006 or equivalent. Come discover how the union of egg and sperm triggers the complex

cellular interactions that specify the diverse variety of cells present in multicellular organisms. Cellular and molecular aspects of sex determination, gametogenesis, genomic imprinting, X-chromosome inactivation, telomerase as the biological clock, stem cells, cloning, the pill and cell interactions will be explored, with an emphasis on humans. Original research articles will be discussed to further examine current research in developmental biology. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

**BIOL GU4031 Genetics. 3 points.**

Open to Biotech M.A. students and other graduate students.

Prerequisites: *BIOL C2005-C2006* or the equivalent.

Corequisites: Recommended: one term of organic chemistry.

Prerequisites: BIOL UN2005 and BIOL UN2006 or the equivalent. General genetics course focused on basic principles of transmission genetics and the application of genetic approaches to the study of biological function. Principles will be illustrated using classical and contemporary examples from prokaryote and eukaryote organisms, and the experimental discoveries at their foundation will be featured. Applications will include genetic approaches to studying animal development and human diseases. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

**BIOL GU4034 BIOTECHNOLOGY. 3.00 points.**

Prerequisites: genetics or molecular biology. The course covers techniques currently used to explore and manipulate gene function and their applications in medicine and the environment. Part I covers key laboratory manipulations, including DNA cloning, gene characterization, association of genes with disease, and methods for studying gene regulation and activities of gene products. Part II also covers commercial applications, and includes animal cell culture, production of recombinant proteins, novel diagnostics, high throughput screening, and environmental biosensors

Fall 2024: BIOL GU4034

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4034	001/10321	M W 4:10pm - 5:25pm 601 Fairchild Life Sciences Bldg	Songtao Jia, Daniel Kalderon	3.00	33/50

**BIOL GU4035 SEMINAR IN EPIGENETICS. 3.00 points.**

Prerequisites: Genetics (3032/4032) or Molecular Biology (3512/4512), and the instructor's permission.

This is a combined lecture/seminar course designed for advanced undergraduates and graduate students. The focus is on understanding the mechanisms underlying epigenetic phenomena: the heritable inheritance of genetic states without change in DNA sequence. Epigenetic mechanisms play important roles during normal animal development and oncogenesis. It is an area under intensive scientific investigation and the course will focus on recent advances in understanding these phenomena. In each class, students will present and discuss in detail recent papers and background material concerning each individual topic, followed by an introductory lecture on the following week's topic. This course will emphasize critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally.

**BIOL GU4036 Transformative Concepts in Systems Biology. 3.00 points.**

Systems biology approaches are rapidly transforming the technological and conceptual foundations of research across diverse areas of biomedicine. In this course we will discuss the fundamental developments in systems biology with a focus on two important dimensions: (1) the unique conceptual frameworks that have emerged to study systems-level phenomena and (2) how these approaches are revealing fundamentally new principles that govern the organization and behavior of cellular systems. Although there will be much discussion of technologies and computational approaches, the course will emphasize the conceptual contributions of the field and the big questions that lie ahead. Lectures and discussions of primary literature will enable students to scrutinize research in the field and to internalize systems biology thinking in their own research. To make this a concrete endeavor, the students will develop mini-NIH-style grant proposals that aims to study a fundamental problem/question using systems biology approaches. The students will then convene an in-class NIH-style review panel that will assess the strengths and weaknesses of these proposals. In addition, the students will have the opportunity to defend their proposals in a live presentation to the class. The course is open to graduate students in Biological Sciences. Advanced undergraduates in biological sciences, and other graduate students with background in biology from other disciplines, including physics, chemistry, computer science, and engineering may also attend after consulting with the instructor

**BIOL GU4041 Cell Biology. 3 points.**

Prerequisites: one year of biology, normally *BIOL C2005-C2006*, or the equivalent.

Cell Biology 3041/4041 is an upper-division course that covers in depth all organelles of cells, how they make up tissues, secrete substances important for the organism, generate and adapt to their working environment in the body, move throughout development, and signal to each other. Because these topics were introduced in the Intro Course (taught by

Mowshowitz and Chasin), this course or its equivalent is a prerequisite for W3041/4041. Students for whom this course is useful include biology, biochem or biomedical engineering majors, those preparing to apply for medical school or graduate school, and those doing or planning to start doing research in a biology or biomedical lab. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

**BIOL GU4065 Molecular Biology of Disease. 3 points.**

Enrollment limited to 30.

Molecular and cellular basis of infectious diseases and inherited propensities. Mechanisms of disease examined in discussions based on current research papers. Lectures, discussions, and student presentations. Essay required in lieu of final examination.

**BIOL GU4070 The Biology and Physics of Single Molecules. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: calculus, chemistry, physics, one year of biology, or the instructor's permission.

This course will examine the fundamental mechanisms underlying the behavior of biological molecules, at the single molecule level. The course will cover the methods used to track single molecules: optical tweezers, single molecule AFM, Magnetic tweezers, Optical techniques and Fluorescence energy transfer (FRET) probes. The course will cover the mechanism of action of mechanical motors, such as myosin dynein, kinesin. It will cover the action of DNA binding enzymes such as topoisomerases, helicases, etc. We will also discuss the function of large motors such as the ATP Synthase and the bacterial AAA ATPases. We will discuss the mechanical properties of DNA, RNA, and proteins. The course will consist mainly of reviewing classical experiments in each category, and developing the background physical theories to promote a deep understanding of biological mechanisms at the mesoscopic level.

**BIOL GU4075 BIOLOGY AT PHYSICAL EXTREMES. 3.00 points.**

Prerequisites: one year each of biology and physics, or the instructor's permission.

Prerequisites: one year each of biology and physics, or the instructor's permission. This is a combined lecture/seminar course designed for graduate students and advanced undergraduates. The course will cover a series of cases where biological systems take advantage of physical phenomena in counter intuitive and surprising ways to accomplish their functions. In each of these cases, we will discuss different physical mechanisms at work. We will limit our discussions to simple, qualitative arguments. We will also discuss

experimental methods enabling the study of these biological systems. Overall, the course will expose students to a wide range of physical concepts involved in biological processes

**BIOL GU4080 ANCIENT AND MODERN RNA WORLDS. 3.00 points.**

Prerequisites: BIOC UN3512

RNA has recently taken center stage with the discovery that RNA molecules sculpt the landscape and information contained within our genomes. Furthermore, some ancient RNA molecules combine the roles of both genotype and phenotype into a single molecule. These multi-tasking RNAs offering a possible solution to the paradox of which came first: DNA or proteins. This seminar explores the link between modern RNA, metabolism, and insights into a prebiotic RNA world that existed some 3.8 billion years ago. Topics include the origin of life, replication, and the origin of the genetic code; conventional, new, and bizarre forms of RNA processing; structure, function and evolution of key RNA molecules, including the ribosome, and RNA therapeutics including vaccines. The format will be weekly seminar discussions with presentations. Readings will be taken from the primary literature, emphasizing seminal and recent literature. Requirements will be student presentations, class participation, and a final paper

Spring 2025: BIOL GU4080

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4080	001/11640	W 10:10am - 12:00pm 1000 Fairchild Life Sciences Bldg	Laura Landweber	3.00	21/24

**BIOL GU4082 Theoretical Foundations and Applications of Biophysical Methods. 4 points.**

Rigorous introduction to the theory underlying biophysical methods, which are illustrated by practical applications to biomedical research. Emphasizes the approach used by physical chemists to understand and analyze the behavior of molecules, while also preparing students to apply these methods in their own research. Course modules cover: (i) statistical analysis of data; (ii) solution thermodynamics; (iii) hydrodynamic methods; (iv) light-scattering methods; and (v) spectroscopic methods, especially fluorescence. Recitations focus on curve-fitting analyses of experimental data.

**BIOL GU4088 Seminar in Neurobiochemistry and Neurological Diseases. 3.00 points.**

Students will read and discuss classical as well as contemporary research papers on the molecular and cellular mechanisms of membrane excitability, synaptic transmission and sensory transduction, and the pathogenic mechanisms and therapeutics of certain neurological diseases related to these processes. Focus will be on intellectual creativity, conceptual breakthroughs, and technical advances. A key goal of the course is to help students become a critical reader and thinker. Graduate students in all disciplines are welcome. Advanced undergraduate students can enroll with instructor's permission.

For PhD students in the Biological Sciences Program, this is a tier 3 course

**BIOL GU4193 Stem Cell Biology and Applications. 3 points.**

The course examines current knowledge and potential medical applications of pluripotent stem cells (embryonic stem cells and induced pluripotent stem cells), direct conversions between cell types and adult, tissue-specific stem cells (concentrating mainly on hematopoietic and gut stem cells as leading paradigms). A basic lecture format will be supplemented by presentations and discussions of research papers. Recent reviews and research papers together with extensive instructor notes will be used in place of a textbook.

**BIOL GU4260 PROTEOMICS LABORATORY. 3.00 points.**

Lab Fee: \$150.

This course deals with the proteome: the expressed protein complement of a cell, organelle, matrix, tissue, organ or organism. The study of the proteome (proteomics) is broadly applicable to life sciences research, and is increasingly important in academic, government and industrial research through extension of the impact of advances in genomics. These techniques are being applied to basic research, exploratory studies of cancer and other diseases, drug discovery and many other topics. Emphasis will be on mastery of practical techniques of sample preparation, liquid chromatography/mass spectrometry (LC/MS) with electrospray ionization, and Matrix-Assisted Laser Desorption and Ionization (MALDI-TOF) mass spectrometry. Database searching and interpretation for identification of proteins will be intensively studied, and practiced supported by background tutorials and exercises covering other techniques used in proteomics. Open to students in M.A. in Biotechnology Program (points can be counted against laboratory requirement for that program), Ph.D. and advanced undergraduate students with background in genetics or molecular biology. Students should be comfortable with basic biotechnology laboratory techniques as well as being interested in doing computational work in a Windows environment

Fall 2024: BIOL GU4260

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4260	001/11036	Th 12:30pm - 3:30pm 900 Fairchild Life Sciences Bldg	Lewis Brown	3.00	10/12

**BIOL GU4290 BIOLOGICAL MICROSCOPY. 3.00 points.**

Prerequisites: (biol un2005 or biol un2401) or Prerequisites: (biol un2005 or biol un2401) or BIOL UN2005 or BIOL UN2401 or equivalent This is an advanced microscopy course aimed at graduates and advanced undergraduate students, who are interested in learning about the foundational principles of microscopy approaches and their applications in life sciences. The course will introduce the fundamentals of optics, light-matter interaction and in-depth view of most commonly used advanced microscopy methods, explore

important practical imaging parameters, and also introduce digital images and their analysis

**Spring 2025: BIOL GU4290**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4290	001/11701	T Th 11:40am - 12:55pm 601 Fairchild Life Sciences Bldg	Raju Tomer	3.00	29/36

**BIOL GU4300 DRUGS AND DISEASE. 3.00 points.**

Prerequisites: four semesters of biology with a firm foundation in molecular and cellular biology.

Prerequisites: four semesters of biology with a firm foundation in molecular and cellular biology. Introduces students to the current understanding of human diseases, novel therapeutic approaches and drug development process. Selected topics will be covered in order to give students a feeling of the field of biotechnology in health science. This course also aims to strengthen students' skills in literature comprehension and critical thinking

**Fall 2024: BIOL GU4300**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4300	001/11038	M W 2:40pm - 3:55pm 601 Fairchild Life Sciences Bldg	Lili Yamasaki	3.00	45/55

**BIOL GU4305 SEMINAR IN BIOTECHNOLOGY. 3.00 points.**

Prerequisites: BIOL W4300 or the instructors permission. A weekly seminar and discussion course focusing on the most recent development in biotechnology. Professionals of the pharmaceutical, biotechnology, and related industries will be invited to present and lead discussions

**Spring 2025: BIOL GU4305**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4305	001/11651	W 2:10pm - 4:00pm 601 Fairchild Life Sciences Bldg	Lili Yamasaki	3.00	31/40

**BIOL GU4310 Virology. 3 points.**

The basic thesis of the course is that all viruses adopt a common strategy. The strategy is simple: 1. Viral genomes are contained in metastable particles. 2. Genomes encode gene products that promote an infectious cycle (mechanisms for genomes to enter cells, replicate, and exit in particles). 3. Infection patterns range from benign to lethal; infections can overcome or co-exist with host defenses. Despite the apparent simplicity, the tactics evolved by particular virus families to survive and prosper are remarkable. This rich set of solutions to common problems in host/parasite interactions provides significant insight and powerful research tools. Virology has enabled a more detailed understanding of the structure and function of molecules, cells and organisms and has provided fundamental understanding of disease and virus evolution. The course will emphasize the common reactions that must be completed by all viruses

for successful reproduction within a host cell and survival and spread within a host population. The molecular basis of alternative reproductive cycles, the interactions of viruses with host organisms, and how these lead to disease are presented with examples drawn from a set of representative animal and human viruses, although selected bacterial viruses will be discussed.

**Spring 2025: BIOL GU4310**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4310	001/11647	M W 4:10pm - 5:25pm 209 Havemeyer Hall	Vincent Racaniello	3	108/110

**BIOL GU4323 BIOPHYSICAL CHEMISTRY I. 4.00 points.**

This course provides a rigorous introduction to the theory underlying widely used biophysical methods, which will be illustrated by practical applications to contemporary biomedical research problems. The course has two equally important goals. The first goal is to explain the fundamental approaches used by physical chemists to understand the behavior of molecules and to develop related analytical tools. The second goal is to prepare students to apply these methods themselves to their own molecular biology research projects. The course will be divided into seven modules: (i) solution thermodynamics with an emphasis on application to analysis of protein structure, folding, and binding interactions; (ii) hydrodynamic methods; (iii) statistical analysis of experimental data; (iv) molecular dynamics calculations; (v) optical spectroscopy with an emphasis on fluorescence; (vi) nuclear magnetic resonance spectroscopy; and (vii) light-scattering and diffraction methods including an overview of cryogenic electron microscopy reconstruction methods. In each module, the underlying physical theories and models will be presented and used to derive the mathematical equations applied to the analysis of experimental data. Weekly recitations will emphasize the analysis of real experimental data and understanding the applications of biophysical experimentation in published research papers. The problem sets emphasize use of PyMOL for analysis of macromolecular structures and use of standard curve-fitting software for analysis of protein binding data; detailed tutorials on the related methods are provided in the recitation sections. The first three modules will be covered in Biophysical Chemistry I during the fall term, while the final three will be covered in Biophysical Chemistry II during the spring term, and treatment of molecular dynamics calculations will be divided between the two terms

**Fall 2024: BIOL GU4323**

### **BIOL GU4402 Biological Image Computing. 3.00 points.**

We will aim for practical understanding of the fundamentals of Python programming, image visualization # rendering tools and common image processing tasks, including image segmentation, measurements of features and registration

### **BIOL GU4501 Biochemistry. 3.00 points.**

In this course, we will explore the basic biochemistry of living systems and how this knowledge can be harnessed to create new medicines. We will learn how living systems convert environmental resources into energy through metabolism, and how they use this energy and these materials to build the molecules required for the diverse functions of life. We will discuss the applications of this biochemical knowledge to mechanisms of disease and to drug discovery. We will look at examples of drug discovery related to neurodegeneration, cancer, and the SARS-CoV-2 COVID19 pandemic. This course satisfies the requirement of most medical schools for introductory biochemistry, and is suitable for advanced undergraduates, and beginning graduate students. This course is equivalent to and replaces the prior course named UN3501, and is equivalent to the course offered in the summer.

#### **Fall 2024: BIOL GU4501**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4501	001/10529	T Th 2:40pm - 3:55pm Cin Alfred Lerner Hall	Mary Ann Price	3.00	83/200

### **BIOL GU4505 Biochemistry I Recitation in VR: Leveraging Virtual Reality. 0.00 points.**

In this course, we will use virtual reality to explore the basic biochemistry of living systems and how this knowledge can be harnessed to create new medicines. We will learn how living systems convert environmental resources into energy through metabolism, and how they use this energy and these materials to build the molecules required for the diverse functions of life. We will discuss the applications of this biochemical knowledge to mechanisms of disease and to drug discovery. We will look at examples of drug discovery related to neurodegeneration, cancer, and the SARS-CoV-2 COVID19 pandemic. This course satisfies the requirement of most medical schools for introductory biochemistry, and is suitable for advanced undergraduates, and beginning graduate students. This course is equivalent to and replaces the prior course named UN3501, and is equivalent to the course offered in the Fall semester. This course is a co-requisite to GU4501. We will meet twice each week in Zoom (Tuesday and Thursday 2:30-5:15, GU4501) to discuss the course material. We will then meet Friday 9:30-10:30 each week in virtual reality, using the Spatial.io platform and an Oculus Quest headset. In VR, we will examine the 3D spatial concepts relevant to biochemistry, where you will be able to examine molecular structures in an immersive format

### **BIOL GU4506 Biochemistry I in XR: Mixed Reality. 1.00 point.**

In this course, we will use mixed reality to explore the basic 3D aspects of biochemistry of living systems and how this knowledge can be harnessed to create new medicines. Students may register for this course alongside of GU4501 or independent of GU4501. Professor Stockwell will meet each week with a group of 4 students to discuss protein structures using Oculus Quest Pro Mixed Reality headsets in the XR app Nanome. Students will rotate through in person meetings but can join all weekly sessions using a virtual live stream. We will examine 3D spatial concepts relevant to biochemistry, where you will be able to examine molecular structures in an immersive format in real time with other students and with the instructor

### **BIOL GU4510 Genomics of Gene Regulation. 4 points.**

Prerequisites: one year of Biology, Chemistry, and Physics. Courses taken at CU are recommended, but AP courses may be sufficient with the instructor's permission.

This course will provide students with a quantitative understanding of the ways in which molecular interactions between nucleotides and proteins give rise to the behavior of gene regulatory networks. The key high-throughput genomics technologies for probing the cell at different levels using microarrays and next-generation sequencing will be discussed. Strategies for interpreting and integrating these data using statistics, biophysics, and genetics will be introduced. In computer exercises, student will learn the basics of the R language, and use it to perform analyses of genomics data sets. No prior computer programming experience is assumed. This highly interdisciplinary course is intended for advanced undergraduates as well as beginning graduate students in Biology, Chemistry, Physics, Engineering, and Computer Science. Offered in previous years as CHBC W4510.

#### **Spring 2025: BIOL GU4510**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4510	001/11752	M W 2:40pm - 3:55pm 328 Uris Hall	Harmen Bussemaker	4	15/25

### **BIOL GU4511 Biochemistry I recitation: Structure and Metabolism. 0.00 points.**

This is the recitation for GU4501. How does life work on a molecular level? Why do we succumb to disease, and how can we create new cures? This course will explore the biochemistry of life and how this knowledge can be harnessed to create new medicines. You will learn how cells convert environmental resources into energy through metabolism, how cellular molecules function, and how to use this biochemical knowledge for drug discovery related to neurodegeneration, cancer, and the current SARS-CoV-2 COVID19 pandemic. At the conclusion of the course, you will be able to diagram the major metabolic pathways and compare how these pathways are dysregulated in normal tissues in and in disease states. In addition, you will know what techniques are used to uncover biochemical knowledge and how to interpret relevant experiments. You

will be capable of collaborating with other people in the analysis and interpretation of biochemical data, and be able to communicate, defend and refute interpretations of data. Having completed one year of college-level biology and one year of organic chemistry will be helpful to maximally benefit from this course. This course satisfies the requirement of most medical schools for introductory biochemistry, and is suitable for advanced undergraduates, and beginning graduate students; this replaces the previous UN3511 course

### **BIOL GU4512 Molecular Biology. 3.00 points.**

Prerequisites: one year of biology. This is a lecture course designed for advanced undergraduates and graduate students. The focus is on understanding at the molecular/biochemical level how genetic information is stored within the cell, how it is replicated and expressed, and how it is regulated. Topics covered include genome organization, DNA replication and repair, transcription, RNA processing, and translation. This course will also emphasize the critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

#### **Spring 2025: BIOL GU4512**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **BIOL GU4551 A Structural View of Biology. 3.00 points.**

The course covers a general introduction to the theory and experimental techniques of structural biology (protein expression and purification, protein crystallography, cryo-electron microscopy, nuclear magnetic resonance) and then how to use the structural information to understand biochemical and biological processes. The first part of the course will cover the general introduction to structural biology. The second part of the course will involve discussions and explorations of various structures, led by the instructor but with substantial participation from the students, to understand the molecular mechanisms of selected biochemical and biological processes. In the final part of the course, each student will select and lead discussions on a primary structural biology paper. The overall goal of the course is to increase the understanding of how protein structures are determined, what protein structures look like, and how to use the structures to understand biology

### **BIOL GU4560 EVOL IN THE AGE OF GENOMICS. 4.00 points.**

Prerequisites: introductory genetics or the instructor's permission.

This course introduces basic concepts in evolutionary biology, from speciation to natural selection. While the lectures incorporate a historical perspective, the main goal of the class is to familiarize students with topics and tools of evolutionary genetics as practiced today, in the era of genomics. Thus, the focus will be on evidence from molecular evolution and genetics and exercises will assume a basic background in genetics. Examples will be drawn from across the tree of life, but with a primary focus on humans.

#### **Fall 2024: BIOL GU4560**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **BIOL GU4600 CELL SIGNALING. 3.00 points.**

Prerequisites: A strong background in molecular and cellular biology. Generally students with four or more courses are accepted. Cell Signaling is a graduate course for Ph.D. students open to advanced undergraduate and masters students. The basic molecular mechanism of signal transduction pathways will be discussed related to cell growth and stress systems. There will be an emphasis on specific categories of signaling components. Students will read the literature and give presentations. Topics include the pathways by which cells respond to extracellular signals such as growth factors and the mechanisms by which extracellular signals are translated into alterations in the cell cycle, morphology, differentiation state, and motility of the responding cells. For stress pathways we will discuss how cells respond to survive the stress or induce their own death. In many cases these pathways will be related to human diseases

### **BIOL GU4777 From Curiosity to Cure – Case Studies in Cool Biochemistry. 4.00 points.**

Course overview: The goal of this course is to engage upper-level undergraduates and beginning graduate students in an immersive intellectual experience at the intersection of rigorous scientific inquiry and the history of innovation in molecular biology. The central theme will be curiosity and critical thinking as the twin drivers of both technological innovation and scientific discovery. The course will be divided into a series of modules focused on analysis and presentation of original research papers related to one important

breakthrough in molecular biology that occurred during the past century. A prominent theme of the course will be the persistently unpredictable trajectory linking technical research and methodological developments to breakthrough science. Approximately six-to-eight original research papers will be covered in each module, spanning topics from the development of the methods that made the breakthrough possible through practical application of the resulting knowledge. Three or four of the following breakthroughs will likely be covered in 2023: Discovery and clinical application of insulin by Banting # Best. Development of the Trikafta triple drug treatment for cystic fibrosis. Development of CRISPR for human genetic engineering. Genetics and pharmacological treatment of human hyperlipidemia. Development of the Gleevec tyrosine kinase inhibitor to cure Ph leukemias. Development of “next-generation” nucleic acid sequencing methods

### **BIOL GU4799 MOLECULAR BIOLOGY OF CANCER. 3.00 points.**

Tracing the discovery of the role of DNA tumor viruses in cancerous transformation. Oncogenes and tumor suppressors are analyzed with respect to their function in normal cell cycle, growth control, and human cancers. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Spring 2025: BIOL GU4799

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 4799	001/11827	T Th 2:40pm - 3:55pm 601 Fairchild Life Sciences Bldg	Carol Prives, Ron Prywes	3.00	30/50

### **BIOT GU4160 BIOTECHNOLOGY LAW. 3.00 points.**

Prerequisites: at least 4 college-level biology or biotechnology courses. This course will introduce students to the interrelated fields of patent law, regulatory law, and contract law that are vital to the biotech and biopharmaceutical sectors. The course will present core concepts in a way that permits students to use them throughout their corporate, academic, and government careers. SCE and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

Fall 2024: BIOT GU4160

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOT 4160	001/11042	Th 6:10pm - 8:00pm 330 Uris Hall	Alan Morrison	3.00	13/30

### **BIOT GU4161 ETHICS IN BIOPHARM PAT/REG LAW. 3.00 points.**

Prerequisites: BIOT GU4160 BIOTECHNOLOGY LAW (BIOT W4160)

This course – the first of its kind at Columbia – introduces students to a vital subfield of ethics focusing on patent and regulatory law in the biotech and pharmaceutical sectors. The course combines lectures, structured debate, and research to best present this fascinating and nuanced subject. Properly exploring this branch of bioethics requires an in-depth understanding of biotech and pharmaceutical patent and regulatory law. Students can gain this understanding by first completing Biotechnology Law (BIOT GU4160), formerly the prerequisite for this course. Now, they can also gain it by reading the appropriate chapters of Biotechnology Law: A Primer for Scientists (the textbook for BIOT GU4160 published earlier this year) prior to each class. A number of students in the biotechnology fields (such as those in biotechnology, biomedical engineering, and bioethics programs) have shown a keen interest over the years in taking this course, yet were unable to do so because they hadn't taken BIOT GU4160. Given the recent publication of Biotechnology Law and the desirability of making BIOT GU4161 accessible to more students having the appropriate science background, BIOT GU4160 has been removed as a prerequisite

### **BIOT GU4180 ENTREPRENEURSHIP IN BIOTECH. 3.00 points.**

Prerequisites: the instructors permission. The course examines the entrepreneurial process in biotechnology from idea generation through economic viability. Biotechnology companies are unique in that they need a years-to-decades long period of incubation prior to becoming self-sustaining. Students will be introduced to the steps needed to start and nurture a company, and gain an ability to assess the health of potential collaborators, partners or employers. Topics include an overview of the global biotechnology industry, idea generation, business plan formulation, intellectual property protection, funding, personnel management including board composition, regulatory body interaction, and company exits. Course website: <http://biot4180.weebly.com/>

### **BIOT GU4200 BIOPHARMACEUTICAL DEV # REG. 3.00 points.**

The program aims to provide current life sciences students with an understanding of what drives the regulatory strategies that surround the development decision making process, and how the regulatory professional may best contribute to the goals of product development and approval. To effect this, we will examine operational, strategic, and commercial aspects of the regulatory approval process for new drug, biologic, and biotechnology products both in the United States and worldwide. The topics are designed to provide a chronological review of the requirements needed to obtain marketing approval. Regulatory strategic, operational, and marketing considerations will be addressed throughout the course. We will examine and analyze the regulatory process as a product candidates are advanced from Research and Development,

through pre-clinical and clinical testing, to marketing approval, product launch and the post-marketing phase. The goal of this course is to introduce and familiarize students with the terminology, timelines, and actual steps followed by Regulatory Affairs professionals employed in the pharmaceutical or biotechnology industry. Worked examples will be explored to illustrate complex topics and illustrate interpretation of regulations

#### Fall 2024: BIOT GU4200

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOT 4200	001/11137	Th 4:10pm - 6:00pm	Ron Guido	3.00	154/155

402 Chandler

#### BIOT GU4201 SEM-BIOTECH DEVPT # REGULATION. 3.00 points.

Prerequisites: BIOT W4200 (OK without prerequisite). This course will provide a practical definition of the current role of the Regulatory Professional in pharmaceutical development, approval and post-approval actions. This will be illustrated by exploration, and interactive discussion of regulatory history, its evolution, current standards, and associated processes. The course will seek to clarify the role of Regulatory in development and lifecycle opportunities, demonstrating the value Regulatory adds by participation on research, development and commercial teams. The course will utilize weekly case studies and guest lecturers to provide color to current topical events related to the areas

## BUSINESS

### THE MENDELSON CENTER:

Department website: [The Mendelson Center](#)

Faculty Director: Amir Ziv

Program Manager: Jocelyn McArthur-Chouloute

email contact address: [MendelsonCenter@gsb.columbia.edu](mailto:MendelsonCenter@gsb.columbia.edu)

The collaboration between the faculty of Arts and Sciences and Columbia Business School offers students access to the ideas and expertise of the faculty of a top-ranked professional school recognized for its excellence in graduate business education through a series of elective courses. These courses, designed by Business School faculty specifically for undergraduates, build upon the strong liberal arts education at Columbia. Students learn how finance is directly connected to the fundamental principles of economics; that marketing utilizes concepts from psychology; and how management depends upon principles developed in psychology and sociology.

Students can take advantage of the opportunity to enhance their experience by participating in co-curricular activities, such as Business School faculty lecture series, industry panels, informal mentoring/networking activities with MBA students and alumni, in addition to research opportunities with Business School faculty.

This curricular and co-curricular programming capitalizes on the Business School's ability to connect academic theory with real-world practice, providing students with the opportunity to develop key leadership skills, an entrepreneurial mindset, and the ability to innovate.

### Eligibility:

- To be eligible to earn a Special Program in Business Management, students must apply to the program in the spring semester of their sophomore or junior years, and they must be accepted through a process governed by the Columbia Business School. Beginning with the Special Program cohort of 2017-2018 (i.e., students accepted via the application process of Spring 2017), the program will accept

up to 45 qualified candidates each year. The size of the program may be reviewed from time to time by Columbia College and Columbia Business School and adjusted, if desired by both schools.

- For students who entered Columbia College or General Studies in, or before, Fall 2016: Students who have not been accepted into the Special Concentration program may have the option to “shadow” the Special Concentration in Business Management by taking the required courses if space is available in those courses. Students who “shadow” the program will not be given priority registration in any courses that count toward the Special Concentration. If a student is able to take all of the courses and earns a 3.0 or higher grade-point average in the prerequisite, core, and elective courses, she or he will be allowed to declare retroactively the Special Concentration and have the program noted on their transcript.
- The shadowing option is no longer available for students who entered Columbia College or General Studies in, or after, Fall 2017.

## APPLICATION REQUIREMENTS

To apply for the special concentration in business management, students must meet these three requirements:

1. Sophomore or junior standing;
2. Have a cumulative GPA of 3.4 or higher;
3. Have received a B+ or better in at least one, but preferably two, of the following three prerequisite courses, i.e. in statistics, economics, and psychology. Students who completed only one prerequisite at the time of application must be currently enrolled in at least one other; acceptance is conditional on achieving a grade of B+ or higher in the second course.

### Statistics Prerequisite

Select one of the following:

STAT UN1001	INTRO TO STATISTICAL REASONING
STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS
PSYC UN1610	STATISTICS-BEHAVIORAL SCIENTISTS
SOCI UN3020	Social Statistics

### Economics Prerequisite

ECON UN1105	PRINCIPLES OF ECONOMICS
-------------	-------------------------

### Psychology/Sociology Prerequisite

Select one of the following:

PSYC UN1001	THE SCIENCE OF PSYCHOLOGY
PSYC UN1010	Mind, Brain and Behavior
SOCI UN1000	THE SOCIAL WORLD

## Application Components

1. Application form
2. Current class schedule, including a brief description of how all concentration requirements will be completed
3. Official transcript
4. Resume

## Benefits for Admitted Students

The following benefits are available to students admitted through the application process:

1. Guaranteed enrollment in popular undergraduate business courses (must reserve in advance through program manager);
2. Access to special guest speaker presentations at the Business School, including business leader or faculty presentations exclusively for admitted students;
3. Formal and informal networking opportunities with Business School students, faculty, and alumni.

## CURRENT FACULTY

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

#### Eligibility

To apply for the Special Program in Business Management, students must meet three requirements:

- Be of sophomore or junior standing
- Have a cumulative GPA of 3.4 or higher
- Have received a B+ or better in at least one, but preferably two, prerequisite program courses in the following three required areas: statistics, economics, and psychology. Students who have completed only one prerequisite at the time of application must be currently enrolled in at least one other; acceptance is conditional on achieving a grade of B+ or higher in the second course.

## GUIDELINES FOR ALL BUSINESS MANAGEMENT SPECIAL PROGRAM PARTICIPANTS

The business management special program is not a stand-alone program: it is intended to complement the disciplinary specialization and methodological training inherent in a major. In addition to the special program requirements, students must complete a major.

Students who matriculated at Columbia in Fall 2012 and beyond must earn a minimum GPA of 3.0 in prerequisite, core,

and elective courses. Students who matriculated before Fall 2012 must either adhere to the above requirement or previous requirement of B+ or better in at least two of the prerequisites and a minimum GPA of 3.0 in core and elective classes.

Students who do not meet course prerequisites or who do not receive a passing grade do not receive credit for that course towards the special program. All courses must be taken for a letter grade. Only prerequisites may be double counted for other majors or programs. The core classes **cannot** be double counted. Electives may be double counted if a student's major allows double counting.

For information about this special concentration, including the application process, visit [Undergraduate Concentration | Columbia Business School Academics](#)

## SPECIAL PROGRAM IN BUSINESS MANAGEMENT

Please read *Guidelines for all Business Management Special Program participants* above.

The requirements for the special program in business management are as follows:

### Prerequisites

Select one of the following Statistics courses:

STAT UN1001 INTRO TO STATISTICAL REASONING

STAT UN1101 INTRODUCTION TO STATISTICS

STAT UN1201 CALC-BASED INTRO TO STATISTICS

PSYC UN1610 STATISTICS-BEHAVIORAL SCIENTISTS

SOCI UN3020 Social Statistics

Select the following Economics course:

ECON UN1105 PRINCIPLES OF ECONOMICS

Select one of the following Psychology/Sociology courses:

PSYC UN1001 THE SCIENCE OF PSYCHOLOGY

PSYC UN1010 Mind, Brain and Behavior

SOCI UN1000 THE SOCIAL WORLD

### Core

Select one of the following Financial Core courses:

ECON GU4280 CORPORATE FINANCE

BUSI UN3013 FINANCIAL ACCOUNTING

Select two of the following Managerial Core courses:

BUSI UN3701 STRATEGY FORMULATION

BUSI UN3021 MARKETING MANAGEMENT

BUSI UN3703 LEADERSHIP IN ORGANIZATION

### Electives

Select two of the following courses:

BUSI UN3702 VENTURING TO CHANGE THE WORLD

BUSI UN3704 Making History Through Venturing

ECON UN2257 THE GLOBAL ECONOMY

ECON UN3025 FINANCIAL ECONOMICS

ECON UN3265 MONEY AND BANKING

ECON GU4415 GAME THEORY

ECON BC2010 The Economics of Gender

ECON BC3013 Economic History of the United States

POLS V3615 Globalization and International Politics

PSYC UN2235 THINKING AND DECISION MAKING

PSYC UN2630 SOCIAL PSYCHOLOGY

PSYC UN2640 INTRO TO SOCIAL COGNITION

PSYC UN2650 INTRO TO CULTURAL PSYCHOLOGY

PSYC BC1136 Social Psychology

PSYC BC1138 Social Psychology

PSYC BC2151 ORGANIZATIONAL PSYCHOLOGY

SOCI UN2240 ECONOMY & SOCIETY

SOCI UN3000 SOCIAL THEORY

SOCI UN3265 SOCIOLOGY OF WORK & GENDER

SOCI UN3490 MISTAKE, MISCONDUCT, DISASTER

SOCI W3670 Culture, Markets, and Consumption

SOCI UN3677 The Organization of Diversity

SOCI S3675Q Organizing Innovation

SOCI G4032 Sociology of Labor Markets

BIOT GU4201 SEM-BIOTECH DEVPT & REGULATION

HIST BC2101 HISTORY OF CAPITALISM

MATH UN3050 DISCRETE TIME MODELS IN FINANC

SDEV UN2320 ECON & FIN MTHDS FOR SDEV

URBS UN3550 Community Building and Economic Development

NOTE: Students may not receive credit for two or more of PSYC BC1136 Social Psychology, PSYC BC1138 Social Psychology, and PSYC UN2630 SOCIAL PSYCHOLOGY.

### **BUSI UN3013 FINANCIAL ACCOUNTING. 3.00 points.**

Enables students to become informed users of financial information by understanding the language of accounting and financial reporting. Focuses on the three major financial statements that companies prepare for use of management and external parties--the balance sheet, the income statement, and the statement of cash flows. Examines the underlying concepts

that go into the preparation of these financial statements as well as specific accounting rules that apply when preparing financial statements. Also looks at approaches to analyze the financial strength and operations of an entity. Uses actual financial statements to understand how financial information is presented and to apply analysis techniques

**Fall 2024: BUSI UN3013**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3013	001/11057	T 1:10pm - 3:40pm 390 Geffen Hall	Wei Cai	3.00	65/74

**Spring 2025: BUSI UN3013**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3013	001/10756	T 1:10pm - 3:40pm 390 Geffen Hall	Edward Li	3.00	66/74

**BUSI UN3021 MARKETING MANAGEMENT. 3.00 points.**

Designed to provide students with an understanding of the fundamental marketing concepts and their application by business and non-business organizations. The goal is to expose students to these concepts as they are used in a wide variety of settings, including consumer goods firms, manufacturing and service industries, and small and large businesses. The course gives an overview of marketing strategy issues, elements of a market (company, customers, and competition), as well as the fundamental elements of the marketing mix (product, price, placement/distribution, and promotion)

**Fall 2024: BUSI UN3021**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3021	001/11058	W 4:10pm - 6:40pm 390 Geffen Hall	Thomas K Hafen	3.00	73/74

**Spring 2025: BUSI UN3021**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3021	001/10757	W 4:10pm - 6:40pm 390 Geffen Hall	Jenny Fernandez	3.00	70/74

**BUSI UN3701 STRATEGY FORMULATION. 3.00 points.**

This class is an introduction to strategic management and the decisions that firms make in their historical context. We look at the growth of the large multi-product firm in almost all countries in the world and the process by which they internationalized their activities and, very often, were also forced to retreat from their international positions. We treat strategies as relation to two broad goals of the class: to understand why some companies are financially much more successful than others; and to analyze how managers can devise a set of actions (the strategy) and design processes and structures that allow their company to obtain a competitive advantage. You will learn the analytical tools developed in universities, in consulting and industrial firms, and even in the military. These tools include what companies do to outperform their rivals; to analyze the competitive moves of rival firms by game-theoretic concepts; and when it makes sense for companies to diversify and globalize their business.

Applications will be to Walmart and Apple, European firms and to Asian firms, and developing country firms

**Spring 2025: BUSI UN3701**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3701	001/10758	Th 10:25am - 12:55pm 390 Geffen Hall	Len Sherman	3.00	74/74

**BUSI UN3702 VENTURING TO CHANGE THE WORLD.**

**3.00 points.**

How do founders and their new ventures change the world? Changes in technology and society are increasing the power of small teams to impact everything. Startups, large corporations, social groups and governments are increasingly focused on the power of innovation to solve the world's hardest problems. The ideas and patterns driving this recent form of change-making build on frameworks defining the development of modern civilizations since the Renaissance. Venturing to Change the World introduces the intellectual foundations and practical aspects of founding a new venture. We explore the entrepreneurial mindset, team formation, idea selection, how ideas become products with markets, and the key steps in building a venture. Our scope is commercial as well as social ventures, and the course is appropriate not only for prospective founders but anyone who will operate in a society increasingly animated by entrepreneurial activity

**BUSI UN3703 LEADERSHIP IN ORGANIZATION. 3.00 points.**

Initially, the emphasis is on understanding the challenges confronting leaders and developing skills to effectively deal with these obstacles. Beyond intelligence and technical know-how, what separates effective leaders from other team members is a set of social skills (e.g. impression management, self-awareness). This course identifies these critical leadership skills and provides ideas and tools for improving them. Then, the course considers how social intelligence skills fit the needs of managers at different stages of their careers. In early stages, managers need to achieve a good person-job fit, find mentors, and build an effective social network. At the mid-career stage, managers need to lead an effective unit with increasing complexity and responsibilities. Finally, the course examines challenges managers face at later career stages as they become partners, CFOs, CEOs, etc

**Fall 2024: BUSI UN3703**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BUSI 3703	001/11059	W 1:10pm - 4:00pm 390 Geffen Hall	Rachel McDonald	3.00	72/74

**BUSI UN3704 Making History Through Venturing. 3 points.**

Prerequisites: BUSI UN3702 BUSI UN3702 or equivalent  
This course is about making history. Advanced topics in creating successful organizations. In the age of accelerating change, innovation is moving from an accidental, artisanal process to a large-scale societal machinery. Building on

Venturing to Change the World's overview, this course delves into the philosophy, economics, history, sociology, engineering, finance and management topics that animate powerful commercial and social ventures. Technology trends: Deep consideration of two major forces in technology for the next decade (synthetic biology, artificial intelligence). Management strategies for building and leading, as well as personal productivity and conduct. Accessing and managing financial markets and resources. Product creation: Conceptualizing and delivering innovation and products through design and engineering teams. Finance and fundraising: Designing the business model, understanding the economics, and the social science of the financing markets. Keywords: science, technology, innovation, management, finance, fundraising, operations research, organizational behavior, ethics, social impact, leadership, philosophy.

#### **ECON GU4280 CORPORATE FINANCE. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, ECON W3213 and STAT 1201.*

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 An introduction to the economics principles underlying the financial decisions of firms. The topics covered include bond and stock valuations, capital budgeting, dividend policy, market efficiency, risk valuation, and risk management. For information regarding REGISTRATION for this course, go to: <http://econ.columbia.edu/registration-information>

#### **Fall 2024: ECON GU4280**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4280	001/10867	T Th 11:40am - 12:55pm 390 Geffen Hall	Haran Segram	3.00	80/74
ECON 4280	002/10930	T Th 4:10pm - 5:25pm 310 Fayerweather	Tri Vi Dang	3.00	91/96

#### **Spring 2025: ECON GU4280**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

ECON 4280	002/13563	T Th 4:10pm - 5:25pm 207 Mathematics Building	Tri Vi Dang	3.00	59/90

## CHEMISTRY

### THE CHEMISTRY DEPARTMENT

Department website: <https://www.chem.columbia.edu/>

Office location: 340 Havemeyer Hall

Office contact: 212-854-6177

Interim Director of Undergraduate Studies: Dr. Vesna Gasperov, 319 Uris; 212-854-2017; [vg2231@columbia.edu](mailto:vg2231@columbia.edu)

## THE STUDY OF CHEMISTRY

Chemistry, the study of molecules, is a central science interesting for its own sake but also necessary as an intellectual link to the other sciences of biology, physics, and environmental science. Faculty find the various disciplines of chemistry fascinating because they establish intellectual bridges between the macroscopic or human-scale world that we see, smell, and touch, and the microscopic world that affects every aspect of our lives. The study of chemistry begins on the microscopic scale and extends to engage a variety of different macroscopic contexts.

Chemistry is currently making its largest impact on society at the nexus between chemistry and biology and the nexus between chemistry and engineering, particularly where new materials are being developed. A typical chemistry laboratory now has more computers than test tubes and no longer smells of rotten eggs.

The chemistry department majors are designed to help students focus on these new developments and to understand the factors influencing the nature of the discipline. Because the science is constantly changing, courses change as well, and while organic and physical chemistry remain the bedrock courses, they too differ greatly from the same courses 40 years ago. Many consider biochemistry to be a foundation course as well. Although different paths within the chemistry major take different trajectories, there is a core that provides the essential foundation students need regardless of the path they choose. Students should consider majoring in chemistry if they share or can develop a fascination with the explanatory power that comes with an advanced understanding of the nature and influence of the microscopic world of molecules.

Students who choose to major in chemistry may elect to continue graduate study in this field and obtain a Ph.D. which is a solid basis for a career in research, either in the industry or in a university. A major in chemistry also provides students with an astonishing range of career choices such as working in the chemical or pharmaceutical industries or in many other businesses where a technical background is highly desirable. Other options include becoming a financial analyst for a technical company, a science writer, a high school chemistry teacher, a patent attorney, an environmental consultant, or a hospital laboratory manager, among others. The choices are both numerous and various as well as intellectually exciting and personally fulfilling.

## STUDENT ADVISING

### Consulting Advisers

Dr. Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu))

### Enrolling in Classes

Dr. Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu))

## Preparing for Graduate Study

Dr. Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu))

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The department grants advanced placement (AP) credit for a score of 4 or 5 or the equivalent. The amount of credit granted is based on the results of the department assessment exam and completion of the requisite course. Students who register for CHEM UN1604 (2ND TERM GEN CHEM, INTENSIVE) are granted 3 points of credit; students who register for CHEM UN2045 (INTENSIVE ORGANIC CHEMISTRY I-CHEM UN2046 INTENSIVE ORGANIC CHEM II) are granted 6 points of credit. In either case, credit is granted only upon completion of the course with a grade of C or better. Students must complete a department assessment exam prior to registering for either of these courses.

### Transfer Courses

Students who are transferring to Columbia should contact Dr. Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu)) to have any chemistry courses assessed for equivalency. Please email a detailed syllabus and transcript.

### Study Abroad Courses

Chemistry department majors who are planning to study abroad should contact Dr. Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu)) if they wish to study any chemistry abroad.

## UNDERGRADUATE RESEARCH

### Undergraduate Research in Courses

Students can get academic credit for undergraduate research by registering for CHEM UN3098 Supervised Independent Research. Generally, students register for 4 credits as this will fulfill one of the requirements of the Chemistry major. You will be expected to commit the same number of hours to research as you would for any other 4 credit class, around 12-16 hours per week throughout the entire semester. You need to obtain permission from your faculty sponsor and Dr. Gasperov to register for UN3098. At the end of the semester, you will be required to present a poster of your research results at a poster session for all UN3098 students.

### Undergraduate Research Outside of Courses

Students often ask, why should I do research? Research is exciting! You will design experiments, discover phenomena and make new molecules that no one has ever seen before. Furthermore, there are several practical reasons why you should consider research as an undergraduate student.

Research is a great way to learn more about chemistry. The concepts you learn in the classroom will come to light

when you do research. You will also learn more about instrumentation, data analysis, and gain experience in writing reports, preparing posters, and discussing science with your research group members.

Research is a great career builder! Whether you are considering graduate school, professional school, or joining the workforce after graduation, research as an undergraduate will be an invaluable experience that will sharpen your critical thinking and provide you with the unique opportunity to work alongside world-leading faculty, graduate students and post-doctoral fellows.

The faculty in the Department of Chemistry carry out fundamental and applied research at both the core and frontiers of this scientific discipline. There are many opportunities for research during the academic year and in the summer with faculty in the department.

If you are interested in working in a research laboratory, you should take the following steps:

Investigate faculty research projects by using the department's website,

<http://chem.columbia.edu/research/>, or by speaking directly with faculty members.

Decide which faculty research project interests you.

Contact that faculty member directly to inquire about research opportunities within his/her laboratory.

The Program Manager for Undergraduate Studies, Dr. Vesna Gasperov, can assist you with this process.

Qualified students can take the First Year Seminar in Chemical Research course (CHEM UN2408) during the Spring semester in which you will have the opportunity to learn about research conducted within the chemistry department and other science departments in the university. This can help to identify areas of interest that you may not have considered.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Departmental honors are awarded to 10 percent of the graduating majors each year.

To be considered for department honors, students must have a grade point average of at least 3.6 in major courses and have participated in research on a project of high quality.

Biochemistry majors may be considered for Honors in either Chemistry or Biological Sciences.

### Academic Prizes

THE THOMAS J. KATZ PRIZE

Established in 2009 by friends and colleagues of Professor Katz, this prize may be awarded to the Columbia College, General Studies, or SEAS student majoring in the chemical sciences who is deemed by the faculty to have demonstrated outstanding achievement as a scholar and as a researcher.

#### THE RICHARD BERSOHN PRIZE

Established in 2009 by Professor Louis Brus, who was a student of Professor Bersohn, this prize may be awarded to the Columbia College, General Studies, or SEAS student majoring in the chemical sciences who is deemed by the faculty to have demonstrated outstanding achievement as a scholar and as a researcher.

## OTHER IMPORTANT INFORMATION

### Track Information

In the first year, Track 1 students with one year of high school chemistry take a one-year course in general chemistry, and the one-term laboratory course that accompanies it. In the second year, students study organic chemistry, and take organic chemistry laboratory.

Students who qualify by prior assessment during orientation week can place into the advanced tracks. There are two options. Track 2 students take, in the fall term, a special one-term intensive course in general chemistry in place of the one-year course. In the second year, students study organic chemistry and take organic chemistry laboratory. Track 3 students take a one-term intensive general chemistry laboratory course in the fall followed by a one-year course in organic chemistry for first-year students. The organic chemistry lecture sequence is taken spring-fall. In the second year, students may enroll in physical chemistry and the organic chemistry laboratory course.

Additional information on the tracks can be found in the *Requirements* section.

### Additional Courses

First-year students may also elect to take CHEM UN2408. This seminar focuses on topics in modern chemistry, and is offered to all students who have taken at least one semester of college chemistry and have an interest in chemical research.

Biochemistry (BIOC GU4501, BIOC GU4512) is recommended for students interested in the biomedical sciences.

Physical chemistry (CHEM UN3079-CHEM UN3080), a one-year program, requires prior preparation in mathematics and physics. The accompanying laboratory is CHEM UN3085-CHEM UN3086.

Also offered are a senior seminar (CHEM UN3920); advanced courses in biochemistry, inorganic, organic, and physical chemistry; and an introduction to research (CHEM UN3098).

## Sample Programs

Some *typical* programs are shown below. Programs are crafted by the student and the Director of Undergraduate Studies and Program Manager to meet individual needs and interests.

### Track 1

#### First Year

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
CHEM UN1404	GENERAL CHEMISTRY II-LECTURES
CHEM UN1500	GENERAL CHEMISTRY LABORATORY
CHEM UN2408	1ST YEAR SEM IN CHEMICAL RES

Calculus and physics as required.

#### Second Year

CHEM UN2443	ORGANIC CHEMISTRY I-LECTURES
CHEM UN2444	ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493	ORGANIC CHEM. LAB I TECHNIQUES
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

Calculus and physics as required.

#### Third Year

CHEM UN3079	PHYSICAL CHEMISTRY I-LECTURES
CHEM UN3080	PHYSICAL CHEMISTRY II-LECTURES
BIOC GU4501	BIOCHEM I-STRUCTURE/METABOLISM
CHEM UN3546	ADVANCED ORGANIC CHEMISTRY LAB
CHEM UN3098	SUPERVISED INDEPENDENT RES

#### Fourth Year

CHEM UN3085	PHYSICL-ANALYTICL LABORATORY I
CHEM UN3086	PHYSICL-ANALYTCL LABORATORY II
CHEM UN3920	SENIOR SEMINAR
CHEM GU4071	INORGANIC CHEMISTRY
Advanced courses (4000-level or higher)	

### Track 2

#### First Year

CHEM UN1507	INTENSVE GENERAL CHEMISTRY-LAB
-------------	--------------------------------

CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN2408	1ST YEAR SEM IN CHEMICAL RES

Calculus and physics as required.

### Second Year

CHEM UN2443	ORGANIC CHEMISTRY I- LECTURES
CHEM UN2444	ORGANIC CHEMISTRY II- LECTURES
CHEM UN2493	ORGANIC CHEM. LAB I TECHNIQUES
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

Calculus and physics as required.

### Third Year

CHEM UN3079	PHYSICAL CHEMISTRY I- LECTURES
CHEM UN3080	PHYSICAL CHEMISTRY II- LECTURES
BIOC GU4501	BIOCHEM I-STRUCTURE/ METABOLISM
CHEM UN3546	ADVANCED ORGANIC CHEMISTRY LAB
CHEM UN3098	SUPERVISED INDEPENDENT RES

### Fourth Year

CHEM UN3085	PHYSICL-ANALYTICL LABORATORY I
CHEM UN3086	PHYSICL-ANALYTCL LABORATORY II
CHEM UN3920	SENIOR SEMINAR
CHEM GU4071	INORGANIC CHEMISTRY

Advanced courses (4000- level or higher)

## Track 3

### First Year

CHEM UN1507	INTENSVE GENERAL CHEMISTRY-LAB
CHEM UN2045	INTENSVE ORGANIC CHEMISTRY
CHEM UN2408	1ST YEAR SEM IN CHEMICAL RES

Calculus and Physics as required.

### Second Year

CHEM UN2046	INTENSVE ORG CHEM-FOR 1ST YEAR
CHEM UN3079	PHYSICAL CHEMISTRY I- LECTURES

CHEM UN3080	PHYSICAL CHEMISTRY II- LECTURES
CHEM UN2545	INTENSIVE ORGANIC CHEM LAB
CHEM UN3546	ADVANCED ORGANIC CHEMISTRY LAB

Calculus and physics as required.

### Third Year

BIOC GU4501	BIOCHEM I-STRUCTURE/ METABOLISM
CHEM UN3085	PHYSICL-ANALYTICL LABORATORY I
CHEM UN3086	PHYSICL-ANALYTCL LABORATORY II
CHEM UN3098	SUPERVISED INDEPENDENT RES
CHEM GU4071	INORGANIC CHEMISTRY

### Fourth Year

CHEM UN3920	SENIOR SEMINAR
-------------	----------------

Advanced courses (4000-level or higher)

## PROFESSORS

 Joseph Ulichny

## LECTURERS

Robert Beer  
 John Decatur  
 Charles E. Doubleday  
 Christopher Eckdahl  
 Ruben Savizky  
 Talha Siddiqui

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

The Department of Chemistry offers four distinct academic major programs for undergraduates interested in professional-level training and education in the chemical sciences: chemistry, chemical physics, biochemistry and environmental chemistry. For students interested in a program of less extensive study and coursework, the department offers a concentration in chemistry.

In the first year, Track 1 students with one year of high school chemistry take a one-year course in general chemistry, and the one-term laboratory course that accompanies it. In the second year, students study organic chemistry, and take organic chemistry laboratory.

Students who qualify by prior assessment during orientation week can place into the advanced tracks. There are two options. Track 2 students take, in the fall term, a special one-term intensive course in general chemistry in place of the one-year course. In the second year, students study organic chemistry and take organic chemistry laboratory. Track 3 students take a one-year course in organic chemistry for first-year students and the one-term intensive general chemistry laboratory course. In the second year, students may enroll in physical chemistry and the organic chemistry laboratory course.

The results of the department assessment exam are used to advise students which track to pursue. The Department of Chemistry offers three different tracks. Students who wish to take Track 2 or 3 classes must take the department assessment exam. Students who wish to pursue Track 1 classes do not need to take the assessment exam.

Additional information on the tracks can be found in the Requirements section.

### Guidance for Transfer Students

Students who are transferring to Columbia should contact Dr. Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu)) to have any chemistry courses assessed for equivalency. Please email a detailed syllabus and transcript.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

Students majoring in chemistry or in one of the interdepartmental majors in chemistry should go to the director of undergraduate studies or the undergraduate program manager in the Department of Chemistry to discuss their program of study. Chemistry majors and interdepartmental majors usually postpone part of the Core Curriculum beyond the sophomore year.

#### Chemistry Tracks

All students who wish to start with Track 2 or 3 courses must take an assessment during orientation week ahead of fall semester. The results of the assessment are used to advise students which track to pursue. Unless otherwise specified below, all students must complete one of the following tracks:

#### Track 1

CHEM UN1403	GENERAL CHEMISTRY I-LECTURES
CHEM UN1404	GENERAL CHEMISTRY II-LECTURES
CHEM UN1500	GENERAL CHEMISTRY LABORATORY
CHEM UN2443	ORGANIC CHEMISTRY I-LECTURES
CHEM UN2444	ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493	ORGANIC CHEM. LAB I TECHNIQUES
CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS

#### Track 2

CHEM UN1500	GENERAL CHEMISTRY LABORATORY
or CHEM UN1507	INTENSIVE GENERAL CHEMISTRY-LAB
CHEM UN1604	2ND TERM GEN CHEM (INTENSIVE)
CHEM UN2443	ORGANIC CHEMISTRY I-LECTURES
CHEM UN2444	ORGANIC CHEMISTRY II-LECTURES
CHEM UN2493	ORGANIC CHEM. LAB I TECHNIQUES

CHEM UN2494	ORGANIC CHEM. LAB II SYNTHESIS
-------------	-----------------------------------

PHYS UN3081	INTERMEDIATE LABORATORY WORK
-------------	---------------------------------

### Track 3

CHEM UN1507	INTENSVE GENERAL CHEMISTRY-LAB
-------------	-----------------------------------

CHEM UN2045	INTENSVE ORGANIC CHEMISTRY
-------------	-------------------------------

CHEM UN2046	INTENSVE ORG CHEM-FOR 1ST YEAR
-------------	-----------------------------------

CHEM UN2545	INTENSIVE ORGANIC CHEM LAB
-------------	-------------------------------

### Physics Sequences

Unless otherwise specified below, all students must complete one of the following sequences:

#### Sequence A

For students with limited background in high school physics:

PHYS UN1401	INTRO TO MECHANICS # THERMO
-------------	--------------------------------

PHYS UN1402	INTRO ELEC/MAGNETISM # OPTCS
-------------	---------------------------------

PHYS UN1403	INTRO-CLASSCL # QUANTUM WAVES
-------------	----------------------------------

For chemistry majors, the following laboratory courses are recommended, NOT required. For chemical physics majors, ONE of the following laboratory courses are required:

PHYS UN1494	INTRO TO EXPERIMENTAL PHYS-LAB
-------------	-----------------------------------

PHYS UN3081	INTERMEDIATE LABORATORY WORK
-------------	---------------------------------

#### Sequence B

PHYS UN1601	PHYSICS I:MECHANICS/ RELATIVITY
-------------	------------------------------------

PHYS UN1602	PHYSICS II: THERMO, ELEC # MAG
-------------	-----------------------------------

PHYS UN2601	PHYSICS III:CLASS/ QUANTUM WAVE
-------------	------------------------------------

For chemistry majors, the following laboratory course is recommended NOT required. For chemical physics majors, the following laboratory course is required:

PHYS UN3081	INTERMEDIATE LABORATORY WORK
-------------	---------------------------------

#### Sequence C

For students with advanced preparation in physics and mathematics:

PHYS UN2801 & PHYS UN2802	ACCELERATED PHYSICS I and ACCELERATED PHYSICS II
------------------------------	--

For chemistry majors, the following laboratory course is recommended NOT required. For chemical physics majors, the following laboratory course is required:

## Major in Chemistry

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

### Chemistry

Select one of the chemistry tracks outlined above.

CHEM UN2408	1ST YEAR SEM IN CHEMICAL RES (Recommended NOT required)
-------------	---

CHEM UN3079	PHYSICAL CHEMISTRY I- LECTURES
-------------	-----------------------------------

CHEM UN3080	PHYSICAL CHEMISTRY II- LECTURES
-------------	------------------------------------

CHEM UN3085	PHYSICL-ANALYTICL LABORATORY I
-------------	-----------------------------------

CHEM UN3086	PHYSICL-ANALYTCL LABORATORY II
-------------	-----------------------------------

CHEM UN3546	ADVANCED ORGANIC CHEMISTRY LAB
-------------	-----------------------------------

CHEM UN3920	SENIOR SEMINAR
-------------	----------------

CHEM GU4071	INORGANIC CHEMISTRY
-------------	---------------------

Select one course from the following:

CHEM UN3098	SUPERVISED INDEPENDENT RES
-------------	-------------------------------

OR Chemistry courses numbered CHEM GU4000 or above for 2 credit points or more

### Physics

Select one of the physics sequences outlined above in the Guidelines section.

### Mathematics

Select one of the following sequences:

Four semesters of calculus:

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN1202	CALCULUS I and CALCULUS II and CALCULUS III and CALCULUS IV
--	--

Two semesters of honors mathematics:

MATH UN1207 & MATH UN1208	HONORS MATHEMATICS A and HONORS MATHEMATICS B
------------------------------	---

## Major in Biochemistry

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

### Chemistry

Select one of the chemistry tracks outlined above.

CHEM UN2408 1ST YEAR SEM IN CHEMICAL RES (Recommended NOT required)

CHEM UN3079 PHYSICAL CHEMISTRY I-LECTURES

CHEM UN3080 PHYSICAL CHEMISTRY II-LECTURES

### Biology

BIOL UN1908 First Year Seminar in Biology (Recommended NOT required)

BIOL UN2005 INTRO BIO I: BIOCHEM, GEN, MOLEC

BIOL UN2006 INTRO BIO II: CELL BIO, DEV/PHYS

BIOC GU4501 BIOCHEM I-STRUCTURE/METABOLISM

or BIOC UN3300 BIOCHEMISTRY

BIOC GU4512 MOLECULAR BIOLOGY

### Physics

Select one of the following physics sequences:

#### Sequence A:

PHYS UN1201 & PHYS UN1202 GENERAL PHYSICS I and GENERAL PHYSICS II

#### Sequence B:

PHYS UN1401 & PHYS UN1402 & PHYS UN1403 INTRO TO MECHANICS # THERMO and INTRO ELEC/MAGNETISM # OPTICS and INTRO-CLASSICAL # QUANTUM WAVES (PHYS UN1403 is recommended NOT required)

#### Sequence C:

PHYS UN1601 & PHYS UN1602 & PHYS UN2601 PHYSICS I: MECHANICS/RELATIVITY and PHYSICS II: THERMO, ELEC # MAG and PHYSICS III: CLASSICAL/QUANTUM WAVE (PHYS UN2601 is recommended but not required)

#### Sequence D:

PHYS UN2801 & PHYS UN2802 ACCELERATED PHYSICS I and ACCELERATED PHYSICS II

### Mathematics

Select one of the following sequences:

#### Two semesters of calculus:

MATH UN1101 & MATH UN1102 & MATH UN1201 & MATH UN1202 CALCULUS I and CALCULUS II and CALCULUS III and CALCULUS IV

#### Two semesters of honors mathematics:

MATH UN1207 & MATH UN1208 HONORS MATHEMATICS A and HONORS MATHEMATICS B

AP credit and one term of calculus (Calculus II or higher)

### Additional Courses

Select two of the following upper level laboratory courses (one must be a Biology lab):

BIOL UN2501 & BIOL UN3040 CONTEMPORARY BIOLOGY LAB and LAB IN MOLECULAR BIOLOGY (A 3 pt. Barnard lab course, with permission from Bio advisor)

BIOL UN3052 PROJECT LAB-MOLECULAR GENETICS

BIOL UN3058 PROJECT LAB IN MICROBIOLOGY

BIOL UN3500 INDEP BIOLOGICAL RESEARCH

CHEM UN3085 PHYSICAL-ANALYTICAL LABORATORY I

CHEM UN3086 PHYSICAL-ANALYTICAL LABORATORY II

CHEM UN3098 SUPERVISED INDEPENDENT RES

CHEM UN3546 ADVANCED ORGANIC CHEMISTRY LAB

Select any three courses from the following:

CHEM GU4071 INORGANIC CHEMISTRY

CHEM GU4102 CHEMISTRY FOR THE BRAIN

CHEM GU4103 ORGANOMETALLIC CHEMISTRY

CHEM GU4147 ADVANCED ORGANIC CHEMISTRY I

CHEM GU4312 CHEMICAL BIOLOGY

CHEM GU4313 Peptide and Protein Chemistry

BIOC GU4323 Biophysical Chemistry I

BIOC GU4324 Biophysical Chemistry II

MATH UN3027 or MATH UN2030 Ordinary Differential Equations ORDINARY DIFFERENTIAL EQUATIONS

One additional semester of calculus

One additional semester of honors math:

MATH UN1207 or MATH UN1208 HONORS MATHEMATICS A and HONORS MATHEMATICS B

Any biology course at the 3000/4000 level for 3 or more points. The following are recommended:

BIOL UN3004 NEUROBIO I: CELLULAR # MOLECULAR

or BIOL UN3005 NEUROBIO II: DEVPT # SYSTEMS

BIOL UN3008 The Cellular Physiology of Disease

BIOL UN3022 DEVELOPMENTAL BIOLOGY

BIOL UN3034 Biotechnology

BIOL UN3041 CELL BIOLOGY

BIOL UN3073 CELLULAR/MOLECULAR IMMUNOLOGY

BIOL GU4065 Molecular Biology of Disease

BIOL GU4300 DRUGS AND DISEASE

## Major in Chemical Physics

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

### Chemistry

Select one of the chemistry tracks outlined above.

CHEM UN3079 PHYSICAL CHEMISTRY I-LECTURES

CHEM UN3080 PHYSICAL CHEMISTRY II-LECTURES

CHEM UN3085 PHYSICL-ANALYTICL LABORATORY I

CHEM UN3086 PHYSICL-ANALYTICL LABORATORY II

CHEM UN3920 SENIOR SEMINAR

CHEM GU4221 QUANTUM CHEMISTRY I  
or PHYS GU4021 QUANTUM MECHANICS I

### Physics

Select one of the physics sequences outlined above in *Guidelines for all Chemistry Majors, Concentrators and Interdepartmental Majors*. For the chemical physics major, one lab **MUST** be completed for the sequence chosen.

Complete the following lectures:

PHYS UN3003 MECHANICS

PHYS UN3007 ELECTRICITY-MAGNETISM

PHYS UN3008 ELECTROMAGNETIC WAVES  
# OPTICS

### Mathematics

Select one of the following sequences:

Four semesters of calculus:

MATH UN1101 CALCULUS I  
& MATH UN1102 and CALCULUS II  
& MATH UN1201 and CALCULUS III  
& MATH UN1202 and CALCULUS IV

Two semesters of honors mathematics:

MATH UN1207 HONORS MATHEMATICS A  
& MATH UN1208 and HONORS MATHEMATICS  
& MATH UN3027 B  
and Ordinary Differential  
Equations

Two semesters of advanced calculus:

MATH UN1202 CALCULUS IV  
& MATH UN3027 and Ordinary Differential  
Equations

## Major in Environmental Chemistry

Select one of the tracks outlined above in *Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors* and complete the following lectures and labs.

### Chemistry

Select one of the chemistry tracks outlined above. A second semester of Organic Chemistry lecture is recommended NOT required.

CHEM UN3079 PHYSICAL CHEMISTRY I-LECTURES

CHEM GU4071 INORGANIC CHEMISTRY

The following courses are recommended NOT required:

CHEM UN2408 1ST YEAR SEM IN CHEMICAL RES

CHEM UN3920 SENIOR SEMINAR

### Earth and Environmental Science

Select two of the following three courses:

EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST

EESC UN2200 EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH

EESC UN2300 EARTH'S ENVIRO SYST: LIFE SYST

Additional course required:

EESC UN3101 Geochemistry for a Habitable Planet

Select one of the following labs:

EESC BC3016 ENVIRONMENTAL MEASUREMENTS

CHEM UN3085 PHYSICL-ANALYTICL LABORATORY I

Select one option for Independent Research in Environmental Chemistry:

EESC BC3800 ENVIR SCIENCE SENIOR SEMINAR  
& EESC BC3801 and ENVIR SCIENCE SENIOR SEM II

CHEM UN3098 SUPERVISED INDEPENDENT RES (It is strongly recommended to take CHEM UN3920 if taking CHEM UN3098)

### Physics

Select one of the following physics sequences:

Sequence A:

PHYS UN1201 GENERAL PHYSICS I  
& PHYS UN1202 and GENERAL PHYSICS II

Sequence B:

PHYS UN1401 INTRO TO MECHANICS #  
& PHYS UN1402 THERMO  
& PHYS UN1403 and INTRO ELEC/MAGNETISM  
# OPTICS  
and INTRO-CLASSCL  
# QUANTUM WAVES  
(Recommended NOT required)

Sequence C:

PHYS UN1601  
& PHYS UN1602  
& PHYS UN2601

PHYSICS I:MECHANICS/  
RELATIVITY  
and PHYSICS II: THERMO,  
ELEC # MAG  
and PHYSICS III:CLASS/  
QUANTUM WAVE  
(Recommended, not required)

Sequence D:

PHYS UN2801  
& PHYS UN2802

ACCELERATED PHYSICS I  
and ACCELERATED PHYSICS  
II

#### Mathematics

Two semesters of calculus:

MATH UN1101      CALCULUS I  
MATH UN1102      CALCULUS II  
MATH UN1201      CALCULUS III  
MATH UN1202      CALCULUS IV

#### Additional Courses

Select any two of the following:

##### Chemistry:

CHEM UN3080      PHYSICAL CHEMISTRY II-  
LECTURES  
CHEM GU4103      ORGANOMETALLIC  
CHEMISTRY  
CHEM GU4147      ADVANCED ORGANIC  
CHEMISTRY I

##### Earth and Environmental Science:

EESC BC3017      ENVIRONMENTAL DATA  
ANALYSIS  
EESC BC3025      HYDROLOGY  
EESC GU4008      Introduction to Atmospheric  
Science  
EESC GU4009      CHEMICAL GEOLOGY  
EESC GU4040      CLIM THERMODYN/ENERGY  
TRANSFER  
EESC GU4050      GLOBAL ASSMT-REMOTE  
SENSING  
EESC GU4600      EARTH RESOURCES #  
SUSTAIN DEV  
EESC GU4835      Wetlands and Climate Change  
EESC GU4885      CHEMISTRY OF CONTINENTL  
WATERS  
EESC GU4888      Stable Isotope Geochemistry  
EESC GU4924      INTRO TO ATMOSPHERIC  
CHEMISTRY  
EESC GU4925      INTRO TO PHYSICAL  
OCEANOGRAPHY  
EESC GU4926      INTRO TO CHEMICAL  
OCEANOGRAPHY

##### Earth and Environmental Engineering:

EAEE E4001      INDUST ECOLOGY-EARTH  
RESOURCES  
EAEE E4003      AQUATIC CHEMISTRY

##### Mathematics:

One additional semester of calculus

## Minor in Chemistry

Students should select one of the following tracks:

### Track 1

CHEM UN1403      GENERAL CHEMISTRY I-  
LECTURES  
CHEM UN1404      GENERAL CHEMISTRY II-  
LECTURES  
CHEM UN1500      GENERAL CHEMISTRY  
LABORATORY  
CHEM UN2443      ORGANIC CHEMISTRY I-  
LECTURES

### Track 2

CHEM UN1500      GENERAL CHEMISTRY  
LABORATORY  
or CHEM UN1507      INTENSVE GENERAL CHEMISTRY-  
LAB  
CHEM UN1604      2ND TERM GEN CHEM  
(INTENSIVE)  
CHEM UN2443      ORGANIC CHEMISTRY I-  
LECTURES

### Track 3

CHEM UN1507      INTENSVE GENERAL  
CHEMISTRY-LAB  
CHEM UN2045      INTENSVE ORGANIC  
CHEMISTRY  
CHEM UN2046      INTENSVE ORG CHEM-FOR  
1ST YEAR

Select an additional two classes from the following options:

CHEM UN2444      ORGANIC CHEMISTRY II-  
LECTURES  
CHEM UN3079      PHYSICAL CHEMISTRY I-  
LECTURES  
CHEM UN3080      PHYSICAL CHEMISTRY II-  
LECTURES  
CHEM GU4071      INORGANIC CHEMISTRY  
BIOC GU4501      BIOCHEM I-STRUCTURE/  
METABOLISM

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Chemistry

No more than four points of CHEM UN3098 SUPERVISED  
INDEPENDENT RES may be counted toward the  
concentration.

Select one of the three chemistry tracks listed below.

PHYS UN1201      GENERAL PHYSICS I  
& PHYS UN1202      and GENERAL PHYSICS II

Two semesters of calculus

### **Chemistry Tracks**

#### **Track 1**

CHEM UN1403      GENERAL CHEMISTRY I-  
LECTURES

CHEM UN1404      GENERAL CHEMISTRY II-  
LECTURES

CHEM UN1500      GENERAL CHEMISTRY  
LABORATORY

Select 22 points of chemistry at the 2000-level or higher  
(excluding CHEM UN2408).

#### **Track 2**

CHEM UN1500      GENERAL CHEMISTRY  
LABORATORY

or CHEM UN1507      INTENSVE GENERAL CHEMISTRY-  
LAB

CHEM UN1604      2ND TERM GEN CHEM  
(INTENSIVE)

Select 22 points of chemistry at the 2000-level or higher  
(excluding CHEM UN2408).

#### **Track 3**

CHEM UN1507      INTENSVE GENERAL  
CHEMISTRY-LAB

CHEM UN2045      INTENSVE ORGANIC  
CHEMISTRY

CHEM UN2046      INTENSVE ORG CHEM-FOR  
1ST YEAR

Select 18 points of chemistry at the 2000-level or higher  
(excluding CHEM UN2408).

## **FALL 2024**

Please note that some lab fees have increased. You may consult the [Directory of Classes](#) for the most up to date fees.

### **CHEM UN1403 GENERAL CHEMISTRY I-LECTURES. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Corequisites: MATH UN1101

Corequisites: MATH UN1101 Preparation equivalent to one year of high school chemistry is assumed. Students lacking such preparation should plan independent study of chemistry over the summer or take CHEM UN0001 before taking CHEM UN1403. Topics include stoichiometry, states of matter, nuclear properties, electronic structures of atoms, periodic properties, chemical bonding, molecular geometry, introduction to quantum mechanics and atomic theory, introduction to organic and biological chemistry, solid state and materials science, polymer science and macromolecular structures and coordination chemistry. Although CHEM UN1403 and CHEM

UN1404 are separate courses, students are expected to take both terms sequentially. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure they register for the recitation that corresponds to the lecture section. When registering, please add your name to the wait list for the recitation corresponding to the lecture section (1405 for lecture sec 001; 1407 for lecture sec 002; 1409 for lecture sec 003; 1411 for lecture sec 004). Information about recitation registration will be sent out before classes begin. **DO NOT EMAIL THE INSTRUCTOR.** Please check the Directory of Classes for details

#### **Fall 2024: CHEM UN1403**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1403	001/11207	M W 10:10am - 11:25am 309 Havemeyer Hall	Gerard Parkin	4.00	240/250
CHEM 1403	002/11450	T Th 10:10am - 11:25am 309 Havemeyer Hall	Xavier Roy	4.00	243/240
CHEM 1403	003/11140	T Th 6:10pm - 7:25pm 309 Havemeyer Hall	Ruben Savizky	4.00	174/190
CHEM 1403	004/11141	M W 6:10pm - 7:25pm 312 Mathematics Building	Robert Beer	4.00	34/120
CHEM 1403	AU3/18836	T Th 6:10pm - 7:25pm Othr Other	Ruben Savizky	4.00	6/10
CHEM 1403	AU4/18837	M W 6:10pm - 7:25pm Othr Other	Robert Beer	4.00	6/10

#### **Spring 2025: CHEM UN1403**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1403	001/11152	T Th 6:10pm - 7:25pm 309 Havemeyer Hall	Ruben Savizky	4.00	110/130
CHEM 1403	AU1/18501	T Th 6:10pm - 7:25pm Othr Other	Ruben Savizky	4.00	7/10

### **CHEM UN1404 GENERAL CHEMISTRY II-LECTURES. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: CHEM UN1403 *CHEM W1403*.

Prerequisites: CHEM UN1403 Although CHEM UN1403 and CHEM UN 1404 are separate courses, students are expected to take both terms sequentially. Topics include gases, kinetic theory of gases, states of matter: liquids and solids, chemical equilibria, applications of equilibria, acids and bases, chemical thermodynamics, energy, enthalpy, entropy, free energy, periodic properties, chemical kinetics, and electrochemistry. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure

they register for the recitation that corresponds to the lecture section. Please check the Directory of Classes for details

#### Fall 2024: CHEM UN1404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1404	001/11139	T Th 10:10am - 11:25am 401 Chandler	Christopher Eckdahl	4.00	40/50
CHEM 1404	AU1/18838	T Th 10:10am - 11:25am Othr Other	Christopher Eckdahl	4.00	2/10

#### Spring 2025: CHEM UN1404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1404	001/11160	T Th 10:10am - 11:25am 309 Havemeyer Hall	Christopher Eckdahl	4.00	195/185
CHEM 1404	002/11336	M W 8:40am - 9:55am 309 Havemeyer Hall	Milan Delor	4.00	138/170
CHEM 1404	003/11194	M W 6:10pm - 7:25pm 209 Havemeyer Hall	Robert Beer	4.00	34/60
CHEM 1404	AU3/18502	M W 6:10pm - 7:25pm Othr Other	Robert Beer	4.00	3/10

### CHEM UN1500 GENERAL CHEMISTRY LABORATORY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Lab Fee: \$140.

Corequisites: CHEM UN1403, CHEM UN1404

Corequisites: CHEM UN1403, CHEM UN1404 An introduction to basic lab techniques of modern experimental chemistry, including quantitative procedures and chemical analysis. Students must register for a Lab Lecture section for this course (CHEM UN1501). Please check the Directory of Classes for details. Please note that CHEM UN1500 is offered in the fall and spring semesters. Mandatory lab check-in will be held during the first week of classes in both the fall and spring semesters. You may be asked to serve as research subjects in studies under direction of the faculty while enrolled in this course (CHEM UN1500 Sec 1, 2, 4, 6 and CHEM UN1501 Sec 1). Participation in voluntary

#### Fall 2024: CHEM UN1500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1500	001/11157	T 1:10pm - 4:50pm 302 Havemeyer Hall	Sarah Hansen	3.00	18/46
CHEM 1500	002/11158	T 6:10pm - 9:50pm 302 Havemeyer Hall	Joseph Ulichny	3.00	46/48
CHEM 1500	003/11159	W 1:10pm - 4:50pm 302 Havemeyer Hall	Joseph Ulichny	3.00	44/48
CHEM 1500	004/11160	Th 1:10pm - 4:50pm	Sarah Hansen	3.00	9/46

302 Havemeyer Hall

#### Spring 2025: CHEM UN1500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1500	001/11161	M 2:10pm - 5:50pm 302 Havemeyer Hall	Sarah Hansen	3.00	26/24
CHEM 1500	002/11162	T 1:10pm - 4:50pm 302 Havemeyer Hall	Sarah Hansen	3.00	42/46
CHEM 1500	003/11163	T 6:10pm - 9:50pm 302 Havemeyer Hall	Joseph Ulichny	3.00	52/48
CHEM 1500	004/11164	W 8:40am - 12:25pm 302 Havemeyer Hall	Sarah Hansen	3.00	45/46
CHEM 1500	005/11165	W 1:10pm - 4:50pm 302 Havemeyer Hall	Joseph Ulichny	3.00	49/48
CHEM 1500	006/11166	Th 1:10pm - 4:50pm 302 Havemeyer Hall	Sarah Hansen	3.00	32/46
CHEM 1500	007/11167	Th 6:10pm - 9:50pm 302 Havemeyer Hall	Joseph Ulichny	3.00	51/48
CHEM 1500	008/11168	F 1:10pm - 4:50pm 302 Havemeyer Hall	Joseph Ulichny	3.00	30/27

### CHEM UN1507 INTENSIVE GENERAL CHEMISTRY-LAB. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Lab Fee: \$140.

Prerequisites: CHEM UN1604 or CHEM UN2045 *CHEM W1604* or *CHEM W2045*.

Corequisites: CHEM UN2045

Prerequisites: CHEM UN1604 or CHEM UN2045

Corequisites: CHEM UN2045 A student-centered experimental course intended for students who are taking or have completed CHEM UN1604 (Second Semester General Chemistry Intensive Lecture offered in Fall), CHEM UN2045 (Intensive Organic Chemistry offered in Fall), or CHEM UN2046 (Intensive Organic Chemistry Lecture offered in Spring). The course will provide an introduction to theory and practice of modern experimental chemistry in a contextual, student-centered collaborative learning environment. This course differs from CHEM UN1500 in its pedagogy and its emphasis on instrumentation and methods. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details. Please note that CHEM UN1507 is offered in the fall and spring semesters

#### Fall 2024: CHEM UN1507

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1507	001/11223	M 1:00pm - 6:00pm	Luis Avila	3.00	16/18

		302 Havemeyer Hall			
CHEM 1507	002/11166	F 1:00pm - 6:00pm	Luis Avila	3.00	15/18
		302 Havemeyer Hall			

**Spring 2025: CHEM UN1507**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1507	001/11171	M 1:00pm - 6:00pm	Luis Avila	3.00	16/20

		302 Havemeyer Hall			
CHEM 1507	002/11172	F 1:00pm - 6:00pm	Luis Avila	3.00	19/20
		302 Havemeyer Hall			

**CHEM UN1604 2ND TERM GEN CHEM (INTENSIVE). 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a grade of "B" or better in *CHEM W1403* OR acceptable performance on the Department placement exam.

Corequisites: MATH UN1102

Prerequisites: Acceptable performance on the Department placement exam during orientation week AND either a grade of "B" or better in CHEM UN1403 or AP chemistry or the equivalent. Please contact Vesna Gasperov (vg2231@columbia.edu) or your academic advisor at CSA for further information. Corequisites: MATH UN1102 Topics include chemical kinetics, thermodynamics and chemical bonding. Students must register simultaneously for a corresponding recitation section. Please check Courseworks or contact the instructor or departmental adviser for additional details. When registering, be sure to add your name to the wait list for the recitation corresponding to the lecture section (CHEM UN1606). Information about registration for the required recitation will be sent out before classes begin. Please expect to also be available for review sessions on Fridays from 8:10am-9:55am

**Fall 2024: CHEM UN1604**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1604	001/11225	T Th 11:40am - 12:55pm	Wei Min	4.00	75/120
		209 Havemeyer Hall			

**CHEM UN2046 INTENSIVE ORG CHEM-FOR 1ST YEAR. 4.00 points.**

Prerequisites: CHEM UN2045 *CHEM W2045*

Prerequisites: CHEM UN2045 Premedical students may take CHEM UN2045, CHEM UN2046, and CHEM UN2545 to meet the minimum requirements for admission to medical school. This course covers the same material as CHEM UN2443 - CHEM UN2444, but is intended for students who have learned the principles of general chemistry in high school OR have completed CHEM UN1604 in their first year at Columbia. First year students enrolled in CHEM UN2045 - CHEM UN2046 are expected to enroll concurrently in CHEM UN1507. Although CHEM UN2045 and CHEM UN2046 are separate courses, students are expected to take both terms sequentially. A

recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course

**Fall 2024: CHEM UN2046**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2046	001/11484	T Th 11:40am - 12:55pm	Colin Nuckolls	4.00	22/30
		401 Chandler			

**CHEM UN2443 ORGANIC CHEMISTRY I-LECTURES. 4.00 points.**

Prerequisites: (CHEM UN1403 and CHEM UN1404) or CHEM UN1604 *CHEM W1404* or *CHEM W1604* and *CHEM W1500*

Prerequisites: (CHEM UN1403 and CHEM UN1404) or CHEM UN1604 The principles of organic chemistry. The structure and reactivity of organic molecules are examined from the standpoint of modern theories of chemistry. Topics include stereochemistry, reactions of organic molecules, mechanisms of organic reactions, syntheses and degradations of organic molecules, and spectroscopic techniques of structure determination. Although CHEM UN2443 and CHEM UN2444 are separate courses, students are expected to take both terms sequentially. Students must ensure they register for the recitation which corresponds to the lecture section. Please check the Directory of Classes for details

**Fall 2024: CHEM UN2443**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2443	001/12538	M W 11:40am - 12:55pm	James Leighton	4.00	147/150
		309 Havemeyer Hall			
CHEM 2443	002/11239	T Th 1:10pm - 2:25pm	Neel Shah	4.00	84/120
		309 Havemeyer Hall			
CHEM 2443	003/11168	M W 6:10pm - 7:25pm	Charles Doubleday	4.00	85/120
		309 Havemeyer Hall

**CHEM UN2493 ORGANIC CHEM. LAB I TECHNIQUES. 0.00 points.**

Lab Fee: \$63.00

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) and (CHEM UN1500 or CHEM UN1507) *CHEM W2443*.

Corequisites: CHEM UN2443

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) and (CHEM UN1500 or CHEM UN1507) Corequisites: CHEM UN2443 Techniques of experimental organic chemistry, with emphasis on understanding fundamental principles underlying the experiments in methodology of solving laboratory problems involving organic molecules. Attendance at the first lab lecture and laboratory session is mandatory. Please note that CHEM UN2493 is the first part of a full year organic chemistry

laboratory course. Students must register for the lab lecture section (CHEM UN2495) which corresponds to their lab section. Students must attend ONE lab lecture and ONE lab section every other week. Please contact your advisers for further information

**Fall 2024: CHEM UN2493**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2493	001/11169	M 1:10pm - 4:50pm 202a Havemeyer Hall	Talha Siddiqui	0.00	21/24
CHEM 2493	002/11170	T 12:10pm - 3:50pm 202a Havemeyer Hall	Talha Siddiqui	0.00	20/24

**CHEM UN2545 INTENSIVE ORGANIC CHEM LAB. 3.00 points.**

Lab Fee: \$125.

Prerequisites: (CHEM UN2045 and CHEM UN2046) and CHEM UN1507 *CHEM W2045* and *CHEM W2046* and *CHEM W1507*.

Prerequisites: (CHEM UN2045 and CHEM UN2046) and CHEM UN1507 The lab is intended for students who have taken Intensive Organic Chemistry, CHEM UN2045 - CHEM UN2046 and who intend to major in Chemistry, Biochemistry, Chemical Physics, or Environmental Chemistry

**Fall 2024: CHEM UN2545**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2545	001/11197	M 1:00pm - 6:00pm 202b Havemeyer Hall	Fay Ng	3.00	11/11
CHEM 2545	002/11485	T 1:00pm - 6:00pm 202b Havemeyer Hall	Fay Ng	3.00	7/10

**CHEM UN3079 PHYSICAL CHEMISTRY I-LECTURES.**  
**4.00 points.**

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046) and (MATH UN1101 and MATH UN1102) or (MATH UN1207 and MATH UN1208) and (PHYS UN1401 and PHYS UN1402) *CHEM W1403* and *CHEM W1404*, or *CHEM W1604*, or *CHEM W3045* and *CHEM W3046*; *MATH V1101-V1102* or *V1207-V1208*; *PHYS V1201-V1202* is acceptable, *PHYS C1401-C1402* or the equivalent is recommended.

Corequisites: CHEM UN3085

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046) and (MATH UN1101 and MATH UN1102) or (MATH UN1207 and MATH UN1208) and (PHYS UN1401 and PHYS UN1402) PHYS UN1201 - PHYS UN1202 is acceptable; PHYS UN1401 - PHYS UN1402 or the equivalent is HIGHLY recommended. Corequisites: CHEM UN3085 Elementary, but comprehensive, treatment of the fundamental laws governing the behavior of individual atoms and molecules and collections of them. CHEM UN3079 covers the thermodynamics of chemical systems at equilibrium and the chemical kinetics of

nonequilibrium systems. Although CHEM UN3079 and CHEM UN3080 are separate courses, students are expected to take both terms sequentially. A recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course

**Fall 2024: CHEM UN3079**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3079	001/11488	M W 10:10am - 11:25am 401 Chandler	Xiaoyang Zhu	4.00	22/60

**CHEM UN3085 PHYSICL-ANALYTICL LABORATORY I. 4.00 points.**

Lab Fee: \$125 per term.

Corequisites: CHEM UN3079

Corequisites: CHEM UN3079 A student-centered experimental course intended for students who are co-registered or have completed CHEM UN3079 and CHEM UN3080. The course emphasizes techniques of experimental physical chemistry and instrumental analysis, including vibrational, electronic, and laser spectroscopy; electroanalytical methods; calorimetry; reaction kinetics; hydrodynamic methods; scanning probe microscopy; applications of computers to reduce experimental data; and computational chemistry. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details

**Fall 2024: CHEM UN3085**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3085	001/11198	T 12:00pm - 6:00pm 222 Havemeyer Hall	Luis Avila	4.00	14/15

**CHEM UN3098 SUPERVISED INDEPENDENT RES. 4.00 points.**

Lab Fee: \$105 per term.

Prerequisites: the instructor's permission for entrance, and the departmental representative's permission for aggregate points in excess of 12 or less than 4.

Prerequisites: the instructors permission for entrance, and the departmental representatives permission for aggregate points in excess of 12 or less than 4. This course may be repeated for credit (see major and concentration requirements). Individual research under the supervision of a member of the staff.

Research areas include organic, physical, inorganic, analytical, and biological chemistry. Please note that CHEM UN3098 is offered in the fall and spring semesters

**Fall 2024: CHEM UN3098**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3098	001/11199		Vesna Gasperov	4.00	9/25
CHEM 3098	002/21165		Vesna Gasperov	4.00	1/1
CHEM 3098	003/21354		Vesna Gasperov	4.00	1/1

**Spring 2025: CHEM UN3098**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3098	001/11155		Vesna Gasperov	4.00	8/25
CHEM 3098	002/20749		Vesna Gasperov	4.00	0/1

**CHEM UN3920 SENIOR SEMINAR. 2.00 points.**

Pass/Fail credit only.

Open to senior chemistry, biochemistry, environmental chemistry, and chemical physics majors; senior chemistry concentrators; and students who have taken or are currently enrolled in CHEM UN3098. Senior seminar provides direct access to modern chemical research through selected studies by the students from active fields of chemical research. Topics to be presented and discussed draw from the current scientific literature and/or UN3098 research

**Fall 2024: CHEM UN3920**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3920	001/11200	F 2:10pm - 4:00pm 717 Havemeyer Hall	Milan Delor	2.00	13/40

**BCHM UN3300 BIOCHEMISTRY. 3.00 points.**

Prerequisites: one year each of Introductory Biology and General Chemistry. Corequisites: Organic Chemistry. Biochemistry is the study of the chemical processes within organisms that give rise to the immense complexity of life. This complexity emerges from a highly regulated and coordinated flow of chemical energy from one biomolecule to another. This course serves to familiarize students with the spectrum of biomolecules (carbohydrates, lipids, amino acids, nucleic acids, etc.) as well as the fundamental chemical processes (glycolysis, citric acid cycle, fatty acid metabolism, etc.) that allow life to happen. In particular, this course will employ active learning techniques and critical thinking problem-solving to engage students in answering the question: how is the complexity of life possible? NOTE: While Organic Chemistry is listed as a corequisite, it is highly recommended that you take Organic Chemistry beforehand

**CHEM GU4071 INORGANIC CHEMISTRY. 4.50 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046) Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046) , or the equivalent. Principles governing the structure and reactivity of inorganic compounds surveyed from experimental and theoretical viewpoints. Topics include inorganic solids, aqueous and nonaqueous solutions, the chemistry of selected main group elements, transition metal chemistry, metal clusters, metal carbonyls, and organometallic chemistry, bonding and resonance, symmetry and molecular orbitals, and spectroscopy

**Fall 2024: CHEM GU4071**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

CHEM 4071	001/11201	T Th 8:40am - 9:55am 320 Havemeyer Hall	Jonathan Owen	4.50	15/42
--------------	-----------	--	------------------	------	-------

**BIOC GU4501 BIOCHEM I-STRUCTURE/  
METABOLISM. 4.00 points.**

Undergraduates should register for *BIOC UN3501*.

Prerequisites: BIOL UN2005 and BIOL UN2006 and CHEM UN2443 and CHEM UN2444 one year of *BIOL C2005* and *BIOL C2006* and one year of organic chemistry.

In this course, we will study the chemistry of living systems. We will discuss how living systems convert environmental resources into energy, and how they use this energy and these materials to build the molecules required for the diverse functions of life. Finally, we will discuss the applications of such biochemical knowledge to mechanisms of disease and to drug discovery. At a high level, we expect that at the conclusion of the course, you should be able to explain the basic mechanisms by which living systems harness energy from their environment, how living systems construct the molecules necessary for the functions of life, how these processes go awry in a variety of disease, including cancer, and how drugs can be discovered to treat such diseases. Using this knowledge, you will be able to diagram the major metabolic pathways and compare how these pathways are dysregulated in normal tissues in and disease states. In addition, you will learn which techniques are used to uncover this knowledge and how to design and interpret experiments that will address these questions. You will also collaborate with other students in the analysis and interpretation of biochemical data, and be able to communicate, defend and refute interpretations of data. In this course, we assume familiarity with basic concepts of modern biology, so having completed one year of college-level biology is required. In addition, we explore the reaction mechanisms governing a variety of transformations in metabolism. You must have completed one year of organic chemistry prior to taking this course.

**CHEM GU4147 ADVANCED ORGANIC CHEMISTRY I. 4.50 points.**

Prerequisites: elementary organic and physical chemistry. Prerequisites: elementary organic and physical chemistry. The mechanisms of organic reactions, structure of organic molecules, and theories of reactivity. How reactive intermediates are recognized and mechanisms are deduced using kinetics, stereochemistry, isotopes, and physical measurements

Fall 2024: CHEM GU4147

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4147	001/11202	T Th 10:10am - 11:25am 320 Havemeyer Hall	Tomislav Rovis	4.50	18/42

**CHEM GU4148 SYNTHETIC METHODS-ORGANIC CHEM. 4.50 points.**

This course is intended for graduate students and advanced undergraduate students. The main purpose of the course is to introduce students to modern synthetic chemistry via the selected series of topics (synthetic planning and the logic of organic assembly, classical and new reactions/methods and their use in complex target synthesis). Mechanistic underpinning of the discussed reaction processes will also be briefly discussed. For each module (see the content below), specific examples of syntheses of natural products and/or synthetic materials will be provided. In addition to lectures by Prof. Sames, students will select and present relevant papers in the class (the number of student symposia will depend on the final enrollment in this course). The basic knowledge of transition metal chemistry is recommended for the cross-coupling reactions (i.e. structure, electron counting, and elemental reaction types of transition metals)

Fall 2024: CHEM GU4148

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4148	001/11203	M W 10:10am - 11:25am 320 Havemeyer Hall	Makeda Tekle-Smith	4.50	20/42

**CHEM GU4221 QUANTUM CHEMISTRY I. 4.50 points.**

Prerequisites: elementary physical chemistry. Basic quantum mechanics: the Schrodinger equation and its interpretation, exact solutions in simple cases, methods or approximations including time-independent and time-dependent perturbation theory, spin and orbital angular momentum, spin-spin interactions, and an introduction to atomic and molecular structure

Fall 2024: CHEM GU4221

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4221	001/11248	M W 11:40am - 12:55pm 320 Havemeyer Hall	Timothy Berkelbach	4.50	19/42

**CHEM GU4230 STATISTICAL THERMODYNAMICS. 4.50 points.**

Prerequisites: elementary physical chemistry. Corequisites: CHEM G4221. Topics include the classical and quantum statistical mechanics of gases, liquids, and solids

Fall 2024: CHEM GU4230

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4230	001/11204	T Th 11:40am - 12:55pm 320 Havemeyer Hall	David Reichman	4.50	14/42

**CHEM GU4312 CHEMICAL BIOLOGY. 4.00 points.**

Prerequisites: (CHEM UN2443 and CHEM UN2444) and (CHEM UN3079 and CHEM UN3080) and (BIOC UN3501) elementary organic chemistry *CHEM W3443-CHEM W3444*.

Recommended preparation: elementary physical chemistry *CHEM W3079-CHEM W3080* and biochemistry *BIOC C3501*. Prerequisites: (CHEM UN2443 and CHEM UN2444) and (CHEM UN3079 and CHEM UN3080) and (BIOC UN3501) , or the equivalent. Development and application of chemical methods for understanding the molecular mechanisms of cellular processes. Review of the biosynthesis, chemical synthesis, and structure and function of proteins and nucleic acids. Application of chemical methods--including structural biology, enzymology, chemical genetics, and the synthesis of modified biological molecules--to the study of cellular processes--including transcription, translation, and signal transduction

**Fall 2024: CHEM GU4312**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4312	001/11256	M W 1:10pm - 2:25pm 320 Havemeyer Hall	Virginia Cornish	4.00	14/42

**BIOC GU4323 Biophysical Chemistry I. 4 points.**

This course provides a rigorous introduction to the theory underlying widely used biophysical methods, which will be illustrated by practical applications to contemporary biomedical research problems. The course has two equally important goals. The first goal is to explicate the fundamental approaches used by physical chemists to understand the behavior of molecules and to develop related analytical tools. The second goal is to prepare students to apply these methods themselves to their own research projects. The course will be divided into seven modules: (i) solution thermodynamics; (ii) hydrodynamic methods; (iii) statistical analysis of experimental data; (iv) basic quantum mechanics; (v) optical spectroscopy with an emphasis on fluorescence; (vi) nuclear magnetic resonance spectroscopy; and (vii) light-scattering and diffraction methods.

The first three modules will be covered during the fall term. In each module, the underlying physical theories and models with be presented and used to derive the mathematical equations applied to the analysis of experimental data. Weekly recitations will emphasize the analysis of real experimental data and understanding the applications of biophysical experimentation in published research papers.

**CHEM GR6168 MATERIALS CHEMISTRY IIA. 2.50 points.**

Prerequisites: CHEM UN2443 *CHEM C3443* (or equivalent). Prerequisites: CHEM UN2443 , or the equivalent. This is an introductory course to the emerging field macromolecular materials chemistry. The general topics will be based on the chemistry, self-assembly, and performance of block copolymers and conjugated polymers. Particular emphasis will be devoted to the demands required to drive materials from scientific curiosity to commercialization. At the fundamental level, the course will cover topics on polymerization techniques, electronic structure of organic semiconductors, characterization strategies, nanostructures and self-assembly

## SPRING 2025

Please note that some lab fees have increased. You may consult the [Directory of Classes](#) for the most up to date fees.

**CHEM UN1403 GENERAL CHEMISTRY I-LECTURES. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Corequisites: MATH UN1101

Corequisites: MATH UN1101 Preparation equivalent to one year of high school chemistry is assumed. Students lacking such preparation should plan independent study of chemistry over the summer or take CHEM UN0001 before taking CHEM UN1403. Topics include stoichiometry, states of matter, nuclear properties, electronic structures of atoms, periodic properties, chemical bonding, molecular geometry, introduction to quantum mechanics and atomic theory, introduction to organic and biological chemistry, solid state and materials science, polymer science and macromolecular structures and coordination chemistry. Although CHEM UN1403 and CHEM UN1404 are separate courses, students are expected to take both terms sequentially. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure they register for the recitation that corresponds to the lecture section. When registering, please add your name to the wait list for the recitation corresponding to the lecture section (1405 for lecture sec 001; 1407 for lecture sec 002; 1409 for lecture sec 003; 1411 for lecture sec 004). Information about recitation registration will be sent out before classes begin. DO NOT EMAIL THE INSTRUCTOR. Please check the Directory of Classes for details

### CHEM UN1404 GENERAL CHEMISTRY II-LECTURES. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: CHEM UN1403 *CHEM W1403*.

Prerequisites: CHEM UN1403 Although CHEM UN1403 and CHEM UN 1404 are separate courses, students are expected to take both terms sequentially. Topics include gases, kinetic theory of gases, states of matter: liquids and solids, chemical equilibria, applications of equilibria, acids and bases, chemical thermodynamics, energy, enthalpy, entropy, free energy, periodic properties, chemical kinetics, and electrochemistry. The order of presentation of topics may differ from the order presented here, and from year to year. Students must ensure they register for the recitation that corresponds to the lecture section. Please check the Directory of Classes for details

#### Fall 2024: CHEM UN1404

### CHEM UN1500 GENERAL CHEMISTRY LABORATORY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Lab Fee: \$140.

Corequisites: CHEM UN1403, CHEM UN1404

Corequisites: CHEM UN1403, CHEM UN1404 An introduction to basic lab techniques of modern experimental chemistry, including quantitative procedures and chemical analysis. Students must register for a Lab Lecture section for this course (CHEM UN1501). Please check the Directory of Classes for details. Please note that CHEM UN1500 is offered in the fall and spring semesters. Mandatory lab check-in will be

held during the first week of classes in both the fall and spring semesters. You may be asked to serve as research subjects in studies under direction of the faculty while enrolled in this course (CHEM UN1500 Sec 1, 2, 4, 6 and CHEM UN1501 Sec 1). Participation in voluntary

### CHEM UN1507 INTENSVE GENERAL CHEMISTRY- LAB. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Lab Fee: \$140.

Prerequisites: CHEM UN1604 or CHEM UN2045 *CHEM W1604* or *CHEM W2045*.

Corequisites: CHEM UN2045

Prerequisites: CHEM UN1604 or CHEM UN2045

Corequisites: CHEM UN2045 A student-centered experimental

course intended for students who are taking or have completed CHEM UN1604 (Second Semester General Chemistry Intensive Lecture offered in Fall), CHEM UN2045 (Intensive Organic Chemistry offered in Fall), or CHEM UN2046 (Intensive Organic Chemistry Lecture offered in Spring). The course will provide an introduction to theory and practice of modern experimental chemistry in a contextual, student-centered collaborative learning environment. This course differs from CHEM UN1500 in its pedagogy and its emphasis on instrumentation and methods. Students must also attend the compulsory Mentoring Session. Please check the Directory of Classes for details. Please note that CHEM UN1507 is offered in the fall and spring semesters

#### Fall 2024: CHEM UN1507

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1507	001/11223	M 1:00pm - 6:00pm	Luis Avila	3.00	16/18
		302 Havemeyer Hall			
CHEM 1507	002/11166	F 1:00pm - 6:00pm	Luis Avila	3.00	15/18
		302 Havemeyer Hall			

#### Spring 2025: CHEM UN1507

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 1507	001/11171	M 1:00pm - 6:00pm	Luis Avila	3.00	16/20
		302 Havemeyer Hall			
CHEM 1507	002/11172	F 1:00pm - 6:00pm	Luis Avila	3.00	19/20
		302 Havemeyer Hall			

### CHEM UN2045 INTENSIVE ORGANIC CHEMISTRY.

#### 4.00 points.

Prerequisites: A grade of 5 on the Chemistry Advanced Placement exam and an acceptable grade on the Department placement exam or an acceptable grade in *CHEM W1604*.

Corequisites: CHEM UN1507

Prerequisites: A grade of 5 on the Chemistry Advanced Placement exam and an acceptable grade on the Department placement exam. Corequisites: CHEM UN1507 Premedical students may take CHEM UN2045, CHEM UN2046, CHEM UN1507 and CHEM UN2545 to meet the minimum requirements for admission to medical school. This course covers the same material as CHEM UN2443-CHEM UN2444, but is intended for students who have learned the principles of general chemistry in high school OR have completed CHEM UN1604 in their first year at Columbia. First year students enrolled in CHEM UN2045-CHEM UN2046 are expected to enroll concurrently in CHEM UN1507. Although CHEM UN2045 and CHEM UN2046 are separate courses, students are expected to take both terms sequentially. A recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course

#### Spring 2025: CHEM UN2045

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

CHEM 2045	001/11156	T Th 1:10pm - 2:25pm 209 Havemeyer Hall	Luis Campos	4.00	36/60
-----------	-----------	--	-------------	------	-------

### CHEM UN2408 1ST YEAR SEM IN CHEMICAL RES.

#### 1.00 point.

Prerequisites: CHEM UN1403 or CHEM UN1604 or CHEM UN2045 *CHEM W1403*, *CHEM W1604*, *CHEM W3045*, or the instructor's permission.

Prerequisites: CHEM UN1403 or CHEM UN1604 or CHEM UN2045 or the instructors permission. A one-hour weekly lecture, discussion, and critical analysis of topics that reflect problems in modern chemistry, with emphasis on current areas of active chemical research

#### Spring 2025: CHEM UN2408

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2408	001/11154	F 12:00pm - 12:50pm 209 Havemeyer Hall	Vesna Gasperov	1.00	21/80

### CHEM UN2444 ORGANIC CHEMISTRY II-LECTURES.

#### 4.00 points.

Prerequisites: CHEM UN1404 or CHEM UN1604 and CHEM UN1500 and CHEM UN2443 *CHEM W1404* or *CHEM W1604* and *CHEM W1500*.

Prerequisites: CHEM UN1404 or CHEM UN1604, CHEM UN1500 and CHEMUN2443. The principles of organic chemistry. The structure and reactivity of organic molecules are examined from the standpoint of modern theories of chemistry. Topics include stereochemistry, reactions of organic molecules, mechanisms of organic reactions, syntheses and degradations of organic molecules, and spectroscopic techniques of structure determination. Although CHEM UN2443 and CHEM UN2444 are separate courses, students are expected to take both terms sequentially. Students must ensure they register for the recitation which corresponds to the lecture section. Please check the Directory of Classes for details

#### Spring 2025: CHEM UN2444

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2444	001/11173	M W 11:40am - 12:55pm 309 Havemeyer Hall	Christopher Eckdahl	4.00	128/150
CHEM 2444	002/11174	T Th 11:40am - 12:55pm 309 Havemeyer Hall	James Leighton	4.00	107/110
CHEM 2444	003/11175	M W 6:10pm - 7:25pm 309 Havemeyer Hall	Charles Doubleday	4.00	50/65
CHEM 2444	AU3/18503	M W 6:10pm - 7:25pm Othr Other	Charles Doubleday	4.00	4/10

**CHEM UN2494 ORGANIC CHEM. LAB II SYNTHESIS.****0.00 points.**

Lab Fee: \$62.00

Prerequisites: (CHEM UN1403 and CHEM UN1404) and CHEM UN1500 and CHEM UN2493 *CHEM W1403-CHEM W1404; CHEM W1500; CHEM W2493.*

Corequisites: CHEM UN2444

Prerequisites: CHEM W1403-CHEM W1404; CHEM W1500; CHEM W2493. Corequisites: CHEM W2444. Please note that you must complete CHEM W2493 before you register for CHEM W2494. This lab introduces students to experimental design and trains students in the execution and evaluation of scientific data. The technique experiments in the first half of the course (CHEM W2493) teach students to develop and master the required experimental skills to perform the challenging synthesis experiments in the second semester. The learning outcomes for this lab are the knowledge and experimental skills associated with the most important synthetic routes widely used in industrial and research environments. Attendance at the first lab lecture and laboratory session is mandatory. Please note that CHEM W2494 is the second part of a full year organic chemistry laboratory course. Students must register for the lab lecture section (CHEM W2496) which corresponds to their lab section. Students must attend ONE lab lecture and ONE lab section every other week. Please contact your advisors for further information

**Spring 2025: CHEM UN2494**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2494	001/11240	M 1:10pm - 4:50pm 202a Havemeyer Hall	Talha Siddiqui	0.00	19/24

**CHEM UN2496 ORGANIC CHEM. LABORATORY II.****1.50 point.**

Corequisites: CHEM UN2494

The course is the lab lecture which accompanies the Organic Chemistry Laboratory II (Synthesis) course.

**Spring 2025: CHEM UN2496**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 2496	001/11247	W 4:10pm - 5:25pm 309 Havemeyer Hall	Talha Siddiqui	1.50	53/110
CHEM 2496	002/11248	M 4:10pm - 5:25pm 309 Havemeyer Hall	Anna Ghurbanyan	1.50	78/140
CHEM 2496	003/11249	W 4:10pm - 5:25pm 309 Havemeyer Hall	Talha Siddiqui	1.50	64/110
CHEM 2496	004/11250		Anna Ghurbanyan	1.50	49/140

**CHEM UN3080 PHYSICAL CHEMISTRY II-LECTURES.****4.00 points.**Prerequisites: CHEM UN3079 *CHEM W3079*

Corequisites: CHEM UN3086

Prerequisites: CHEM UN3079 Corequisites: CHEM UN3086  
CHEM UN3080 covers the quantum mechanics of atoms and molecules, the quantum statistical mechanics of chemical systems, and the connection of statistical mechanics to thermodynamics. Although CHEM UN3079 and CHEM UN3080 are separate courses, students are expected to take both terms sequentially. A recitation section is required. Please check the Directory of Classes for details and also speak with the TA for the course

**Spring 2025: CHEM UN3080**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3080	001/11251	M W 10:10am - 11:25am 209 Havemeyer Hall	Xiaoyang Zhu	4.00	29/60

**CHEM UN3086 PHYSICL-ANALYTCL LABORATORY II. 4.00 points.**

Lab Fee: \$125 per term.

Prerequisites: CHEM UN3085 *CHEM W3085*

Prerequisites: CHEM UN3085 , CHEM UN3080 is acceptable corequisite for CHEM UN3086. A student-centered experimental course intended for students who are co-registered or have complete CHEM UN3079 and CHEM UN3080.

The course emphasizes techniques of experimental physical chemistry and instrumental analysis, including vibrational, electronic, and laser spectroscopy; electroanalytical methods; calorimetry; reaction kinetics; hydrodynamic methods; scanning probe microscopy; applications of computers to reduce experimental data; and computational chemistry.

Students must also attend the compulsory Mentoring Session.

Please check the Directory of Classes for details

**Spring 2025: CHEM UN3086**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3086	001/11279	T 12:00pm - 6:00pm 222 Havemeyer Hall	Luis Avila	4.00	9/15

**CHEM UN3098 SUPERVISED INDEPENDENT RES. 4.00 points.**

Lab Fee: \$105 per term.

Prerequisites: the instructor's permission for entrance, and the departmental representative's permission for aggregate points in excess of 12 or less than 4.

Prerequisites: the instructors permission for entrance, and the departmental representatives permission for aggregate points in excess of 12 or less than 4. This course may be repeated for credit (see major and concentration requirements). Individual research under the supervision of a member of the staff.

Research areas include organic, physical, inorganic, analytical, and biological chemistry. Please note that CHEM UN3098 is offered in the fall and spring semesters

**Fall 2024: CHEM UN3098**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3098	001/11199		Vesna Gasperov	4.00	9/25
CHEM 3098	002/21165		Vesna Gasperov	4.00	1/1
CHEM 3098	003/21354		Vesna Gasperov	4.00	1/1

CHEM 3098	001/11155		Vesna Gasperov	4.00	8/25
CHEM 3098	002/20749		Vesna Gasperov	4.00	0/1

**CHEM UN3546 ADVANCED ORGANIC CHEMISTRY LAB. 3.00 points.**

Laboratory Fee: \$125.

Prerequisites: CHEM UN2493 and CHEM UN2494 *CHEM W3543* or *CHEM W3545*.

Prerequisites: CHEM UN2493 and CHEM UN2494 , or the equivalent. A project laboratory with emphasis on complex

synthesis and advanced techniques including qualitative organic analysis and instrumentation

**Spring 2025: CHEM UN3546**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3546	001/11176	M 1:00pm - 6:00pm 202b Havemeyer Hall	Fay Ng	3.00	5/10
CHEM 3546	002/11177	T 1:00pm - 6:00pm 202b Havemeyer Hall	Fay Ng	3.00	3/10

**CHEM GU4102 CHEMISTRY FOR THE BRAIN. 4.50 points.**

This course was upgraded from 2.5 to 4.5 and assigned a new number.

Prerequisites: organic chemistry and biology courses, neuroscience or neurobiology recommended, but not required. Prerequisites: Organic chemistry and biology courses, neuroscience or neurobiology recommended, but not required. The study of the brain is one of the most exciting frontiers in science and medicine today. Although neuroscience is by nature a multi-disciplinary effort, chemistry has played many critical roles in the development of modern neuroscience, neuropharmacology, and brain imaging. Chemistry, and the chemical probes it generates, such as molecular modulators, therapeutics, imaging agents, sensors, or actuators, will continue to impact neuroscience on both preclinical and clinical levels. In this course, two major themes will be discussed. In the first one, titled Imaging brain function with chemical tools, we will discuss molecular designs and functional parameters of widely used fluorescent sensors in neuroscience (calcium, voltage, and neurotransmitter sensors), their impact on neuroscience, pros and cons of genetically encoded sensors versus chemical probes, and translatability of these approaches to the human brain. In the second major theme, titled Perturbation of the brain function with chemical tools, we will examine psychoactive substances, the basics of medicinal chemistry, brain receptor activation mechanisms and coupled signaling pathways, and their effects on circuit and brain function. We will also discuss recent approaches, failures and successes in the treatment of neurodegenerative and psychiatric disorders. Recent advances in precise brain function perturbation by light (optogenetics and photopharmacology) will also be introduced. In the context of both themes we will discuss the current and future possibilities for the design of novel materials, drawing on the wide molecular structural space (small molecules, proteins, polymers, nanomaterials), aimed at monitoring, modulating, and repairing human brain function. This course is intended for students (undergraduate and graduate) from the science, engineering and medical departments

### **CHEM GU4103 ORGANOMETALLIC CHEMISTRY. 4.50 points.**

Prerequisites: (CHEM UN2443 and CHEM UN2444) elementary organic chemistry. (Some background in inorganic and physical chemistry is helpful but not required.)

Main group and transition metal organometallic chemistry: bonding, structure, reactions, kinetics, and mechanisms.

#### **Spring 2025: CHEM GU4103**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4103	001/15717	T Th 11:40am - 12:55pm 320 Havemeyer Hall	Jack Norton	4.50	8/42

### **CHEM GU4104 STRUCTURAL METHODS IN INORGANIC CHEMISTR. 2.50 points.**

The determination of structures by diffraction methods, focusing on single crystal X-ray diffraction, is described. Emphasis is placed on a critical evaluation of published data.

#### **Spring 2025: CHEM GU4104**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4104	001/15719	M W 8:40am - 9:55am 320 Havemeyer Hall	Gerard Parkin	2.50	13/42

### **CHEM GU4145 NMR SPECTROSCOPY. 1.00 point.**

Prerequisites: elementary organic chemistry.

Prerequisites: elementary organic chemistry. Introduction to theory and practice of NMR spectroscopy. Instrumental aspects, basic NMR theory, NOE, and a survey of 2D methods are covered

#### **Spring 2025: CHEM GU4145**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4145	001/15720	F 11:00am - 11:50am 320 Havemeyer Hall	John Decatur	1.00	19/42

### **CHEM GU4232 INTRO TO MOLECULAR MODELING. 4.50 points.**

Molecular modeling has become an integral part of research in many areas of chemistry, and in industry in drug discovery and materials design. Many experimental papers in the literature are routinely complemented by molecular modeling calculations. Experimental scientists working in industry have a significant advantage if they know how to optimally use modeling software. The course would consist of a normal lecture part plus a lab session every week in which the students learn to use modeling software by working on projects.

#### **Spring 2025: CHEM GU4232**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

### **BIOC GU4512 MOLECULAR BIOLOGY. 3.00 points.**

Prerequisites: one year of biology. Recommended but not required: *BIOC C3501*.

Prerequisites: one year of biology. This is a lecture course designed for advanced undergraduates and graduate students. The focus is on understanding at the molecular level how genetic information is stored within the cell and how it is regulated. Topics covered include genome organization, DNA replication, transcription, RNA processing, and translation. This course will also emphasize the critical analysis of the scientific literature and help students understand how to identify important biological problems and how to address them experimentally. SPS and TC students may register for this course, but they must first obtain the written permission of the instructor, by filling out a paper Registration Adjustment Form (Add/Drop form). The form can be downloaded at the URL below, but must be signed by the instructor and returned to the office of the registrar. <http://registrar.columbia.edu/sites/default/files/content/reg-adjustment.pdf>

### **CHEM GR6169 MATERIALS CHEMISTRY IIB. 2.50 points.**

Prerequisites: CHEM UN2443 *CHEM C3443* (or equivalent). Prerequisites: CHEM UN2443, or the equivalent

### **CHEM GR6222 QUANTUM CHEMISTRY II. 2.50 points.**

Prerequisites: CHEM GU4221 Quantum Chemistry G4221. Prerequisites: CHEM GU4221 Atomic and molecular quantum mechanics: fundamentals of electronic structure, many-body wave functions and operators, Hartree-Fock and density functional theory, the Dirac equation

### **CHEM GR8223 QUANTUM CHEMISTRY III. 2.5 points.**

Prerequisites: *CHEM G6222*.

Nonlinear spectroscopy: second harmonic and vibrational sum frequency generation; applications to surface and colloidal nano-microparticle interfaces; nonradiative molecular processes.

### **CHEM GR8300 BIOPHOTONICS. 2.50 points.**

## **COURSES OFFERED IN ALTERNATE YEARS**

Please contact the Undergraduate Program Manager, Vesna Gasperov ([vg2231@columbia.edu](mailto:vg2231@columbia.edu)), for further information.

### **CHEM GU4103 ORGANOMETALLIC CHEMISTRY. 4.50 points.**

Prerequisites: (CHEM UN2443 and CHEM UN2444) elementary organic chemistry. (Some background in inorganic and physical chemistry is helpful but not required.)

Main group and transition metal organometallic chemistry: bonding, structure, reactions, kinetics, and mechanisms.

**Spring 2025: CHEM GU4103**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4103	001/15717	T Th 11:40am - 12:55pm 320 Havemeyer Hall	Jack Norton	4.50	8/42

**CHEM GU4104 STRUCTURAL METHODS IN INORGANIC CHEMISTR. 2.50 points.**

The determination of structures by diffraction methods, focusing on single crystal X-ray diffraction, is described. Emphasis is placed on a critical evaluation of published data.

**Spring 2025: CHEM GU4104**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4104	001/15719	M W 8:40am - 9:55am 320 Havemeyer Hall	Gerard Parkin	2.50	13/42

**CHEM GU4111 APPLICATIONS OF NMR SPECTROSCOPY TO INOR. 2.50 points.**

The use of multinuclear NMR spectroscopy in the determination of the structures of inorganic molecules and the use of dynamic NMR spectroscopy (variable temperature NMR and magnetization transfer techniques) to provide information concerned with reaction mechanisms

**CHEM GU4154 Chemical Characterization for Synthetic Chemists. 3 points.**

This course will teach synthetic chemists to use mass spectrometry, analytical chromatography, and single-crystal X-ray diffraction as tools for research in synthetic chemistry. The teaching approach will be practical with an emphasis on hands-on experience. Students will gain: (1) A user-level understanding of the theory of these analytical methods. (2) Hands-on proficiency with a variety of instruments available at Columbia. (3) An introduction to advanced instrument capabilities and an awareness of their applications. (4) Proficiency in processing and interpreting data.

**CHEM GU4210 Writing Workshop for Chemists. 1 point.**

Prerequisites: recommended for undergraduate students to have taken at least one semester of independent research.

This course offers undergraduate and graduate students an introduction to scientific writing and provides an opportunity for them to become more familiar with the skill and craft of communicating complex scientific research. This course will provide students with the basic grammatical, stylistic and practical skills required to write effective academic journal articles, theses, or research proposals. In addition, through an innovative partnership with Columbia University Libraries' Digital Science Center, students will learn how to apply these basic skills to their writing through the use of state-of-the-art software and on-line resources. Regular opportunities to write, peer edit and revise throughout the semester will allow students to put what they are learning into immediate practice. It is recommended that undergraduates have taken at least

one semester of research for credit before taking this course.

Undergraduates should plan to take this course after taking the required Core course University Writing.

**CHEM GR6168 MATERIALS CHEMISTRY IIA. 2.50 points.**

Prerequisites: CHEM UN2443 *CHEM C3443* (or equivalent).

Prerequisites: CHEM UN2443, or the equivalent. This is an introductory course to the emerging field macromolecular materials chemistry. The general topics will be based on the chemistry, self-assembly, and performance of block copolymers and conjugated polymers. Particular emphasis will be devoted to the demands required to drive materials from scientific curiosity to commercialization. At the fundamental level, the course will cover topics on polymerization techniques, electronic structure of organic semiconductors, characterization strategies, nanostructures and self-assembly

**CHEM GR6169 MATERIALS CHEMISTRY IIB. 2.50 points.**

Prerequisites: CHEM UN2443 *CHEM C3443* (or equivalent).

Prerequisites: CHEM UN2443, or the equivalent

**CHEM GR6222 QUANTUM CHEMISTRY II. 2.50 points.**

Prerequisites: CHEM GU4221 Quantum Chemistry G4221.

Prerequisites: CHEM GU4221 Atomic and molecular quantum mechanics: fundamentals of electronic structure, many-body wave functions and operators, Hartree-Fock and density functional theory, the Dirac equation

**CHEM GR6231 INTERMEDIATE STATISTICAL MECH. 2.50 points.**

Prerequisites: CHEM GU4221 and CHEM GU4230 *CHEM G4221* and *CHEM G4230*.

Phase transitions and critical phenomena; renormalization group methods; classical theory of fluids.

**CHEM GR8106 KINETICS. 2.5 points.**

Kinetics and mechanisms of inorganic reactions.

**CHEM GR8120 Polymers in Nanotechnology. 2.5 points.**

Polymeric materials have long been ubiquitous items and played important roles in revolutionizing the way we live. Due to the advent of modern polymerization fabrication strategies, polymers are rapidly gaining interest for the development of next generation devices and medical treatment. This course will focus on the chemistry polymers and their use as nanostructured materials created by self-assembly and top-down fabrication techniques. Specifically, the class will be divided into two sections describing the uses of organic nanostructures on a) surfaces and b) as particles. Patterned surfaces will be described in terms of photo-, imprint-, and block copolymer lithography. The preparation of nanoparticles through polymer synthesis, dendrimers, and mechanical manipulation will be the second part.

**CHEM GR8223 QUANTUM CHEMISTRY III. 2.5 points.**

Prerequisites: *CHEM G6222*.

Nonlinear spectroscopy: second harmonic and vibrational sum frequency generation; applications to surface and

colloidal nano-microparticle interfaces; nonradiative molecular processes.

### **CHEM GR8232 ADV STATISTICAL MECHANICS. 2.50 points.**

Prerequisites: CHEM GU4221 and CHEM GU4230 *CHEM G4221* and *CHEM G4230*, or their equivalents.

Stochastic processes; Brownian motion; Langevin equations and fluctuation-dissipation theorems; reaction rate theory; time correlation functions and linear response theory.

### **CHEM GR8349 Research Ethics & Philosophy. 2.5 points.**

This lecture course aims to address philosophical and ethical questions in scientific research. What are the most important traits of successful scientists whose discoveries have greatly benefited humanity (and led to Nobel Prizes)? What distinguishes great science from mediocre or pathological "science"? What are the ethical standards of scientific research? How do we identify scientific misconduct or fraud?

Why are ethical standards so critical to the integrity of the research enterprise? The course requires extensive participation of students in the form of discussions and debates. Grades will be based on participation, writing assignments, and one oral presentation.

## CLASSICS

### THE DEPARTMENT OF CLASSICS

Department website: <https://classics.columbia.edu/>

Office location: 617 Hamilton Hall

Office contact: 212-854-3902, [classics@columbia.edu](mailto:classics@columbia.edu)  
([videogameugrad@columbia.edu](mailto:videogameugrad@columbia.edu))

Director of Undergraduate Studies: Professor Nikolas Kakkoufa, [Nk2776@columbia.edu](mailto:Nk2776@columbia.edu)

Department Administrator (DAAF): Jared Stickley, [js5074@columbia.edu](mailto:js5074@columbia.edu)

### THE STUDY OF CLASSICS

Classics is the study of the civilizations of ancient Greece and Rome (c. 900 BCE to 500 CE): their languages, literature, history, philosophy, art, and ways of life. The Department of Classics offers a wide variety of courses, geared at students with different interests and at all levels of preparation. These include courses on ancient civilization in all its diversity, classes on ancient literature in translation, and numerous courses in ancient Greek and Latin, from elementary language classes to advanced literature courses. We also offer courses

on ancient Egypt as well as the Near East, Medieval Latin, and Modern Greek.

## STUDENT ADVISING

### Consulting Advisers

Director of Undergraduate Studies: Professor Nikolas Kakkoufa, [Nk2776@columbia.edu](mailto:Nk2776@columbia.edu)

Students should consult with the DUS who will direct them to the appropriate faculty advisor for their research interest area.

### Enrolling in Classes

Students starting in the Major should start with the language placement exam to determine the appropriate language level for their prior knowledge. Exams are administered in late August by the Department of Classics. Students who cannot take the exam should contact the Director of Undergraduate Studies to make arrangements.

For those students who are starting the major without prior knowledge of the ancient languages please start at the beginning of the sequence (1000 level) in one of the ancient languages and speak to the Director of Undergraduate Studies to determine your best course of study.

### Preparing for Graduate Study

<https://classics.columbia.edu/preparation-for-graduate-study>

Students who are considering graduate work in Classics should be aware that because our Classics major is not a pre-professional degree, simply fulfilling the normal major requirements will not guarantee admission to a graduate program. By far the most important element in preparation for graduate school admission is a good command of both the Latin and the Greek languages, so students who wish to go to graduate school should attempt to reach the advanced level in both languages. The two courses at the intermediate level required in the secondary language for the Classics major are not enough for admission to most graduate programs, and the language requirements of both Classical Studies and Ancient Studies are well below the level normally necessary for graduate school admission. The importance of languages holds not only for students wishing to study ancient literature, but also for those interested primarily in other aspects of the ancient world (history, art, philosophy, religion, etc.), because it is not possible to pursue advanced research successfully unless one can make use of the primary sources. Students who have not done the requisite amount of language work and wish to go to graduate school can enroll in a post-baccalaureate program (either at Columbia or at another institution) to do one or two years of intensive language work before starting graduate school.

While knowledge of Latin and Greek is the most important factor in graduate school admission, it is by no means the only one. Students considering graduate work are also advised to

write a senior thesis (and not to substitute the thesis for any of the other advanced courses). If possible, it is a good idea to use some of your summers (especially the one between junior and senior year) on a relevant activity such as archaeological fieldwork experience, travel and/or study in Greece or Italy, learning French or German, improving your Latin or Greek, or working as a research assistant for a Classicist. It is also useful to get high scores on the GRE test, and these are best achieved by obtaining and studying information on the types of questions asked on the test and taking practice tests.

The department does offer a combined BA/MA program in Classics allowing them to complete the MA in Classics within one year of receiving their BA.

The array of graduate degrees on offer in the US and abroad can be bewildering—including master's and doctoral programs in Classics and a variety of related subjects—and the character and quality of graduate programs differs widely. It is therefore important to gather information and seek advice.

If you are considering graduate work, you should discuss your plans with the Director of Undergraduate Studies and other faculty members no later than the beginning of the fall semester before you hope to apply (i.e., typically the fall of your senior year).

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The department grants 3 credits for a score of 5 on the Latin AP exam, which also satisfies the foreign language requirement, upon successful completion (with a grade of B or higher) of a Latin class at the 3000-level or higher.

### Barnard College Courses

The Department of Classics at Columbia and the Department of Classics and Ancient Studies at Barnard College work closely together. Students may take courses at Barnard to count towards the Major or Minor. Students at Barnard should speak to their advisor at Barnard regarding Columbia courses as the departments are distinct and the requirements for their respective majors are different.

### Transfer Courses

Students transferring to Columbia should contact the Director of Undergraduate Studies to discuss equivalencies and what level of courses they wish to take.

### Study Abroad Courses

Seeing the ancient sites and monuments is an important part of the study of antiquity, and there are a number of ways to acquire some familiarity with the physical remains of Greek and Roman civilization. [The Intercollegiate Center for Classical Studies in Rome](#) offers in each term an excellent one-semester program, usually taken in the junior year, and the [College](#)

[Year in Athens](#) offers a wide variety of courses ranging from language and literature to history, art, and archaeology. During the summer there are more options, including the outstanding [Summer Sessions of the American School for Classical Studies in Athens](#). A listing of fieldwork opportunities is published annually by the Archaeological Institute of America.

### Summer Courses

Courses are offered over the summer by the department providing opportunities to study the ancient languages over the summer.

Courses are also offered in Classical Civilization including Worlds of Alexander and Classical Mythology.

## CORE CURRICULUM CONNECTIONS

Faulty and Graduate Instructors from the Department of Classics Teach in the Core, usually Literature Humanities and Contemporary Civilization.

Some Classics courses can be used to count toward the Global Core requirement as noted in the course information.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

Students should consult with the Director of Undergraduate Studies, Professor Nikolas Kakkoufa at [nk2776@columbia.edu](mailto:nk2776@columbia.edu). Students can register for Directed readings with a faculty member.

### Senior Thesis Coursework and Requirements

Students are required to take the Major Seminar UN3996 as part of the program. The course focuses on the preparation for the Senior Thesis and methods in the field of Classics. Currently students have the option to participate in a trip abroad to sites in the ancient world.

### Undergraduate Research Outside of Courses

Students are encouraged to participate in the [Ancient Play](#) put on yearly by the Barnard Columbia Ancient Drama Group.

The Department is able to support a limited number of students to study ancient languages over the summer through the Comager Fund and the Undergraduate Latin fund. Interested students should contact the Director of Undergraduate Studies.

Undergraduate students can apply to the SNFPHI Summer Research Internship in Public Humanities and Hellenic Studies. This six week internship invites undergraduate students to explore public humanities, gain hands-on experience with its objectives, methods, and outcomes, and pursue a group project that connects research on Greece with a broad public audience. The internship is structured around: (1) a seminar in Hellenic Studies in which students explore aspects of modern Greek history and culture relevant to their internship research,

(2) a workshop in which students are trained in the methods and tools of public-facing research, and (3) a group project in which students work closely with Columbia faculty and public humanities partners in Greece.

Columbia runs its own archeological summer program at Hadrian's Villa in Tivoli. Contact Professor Francesco de Angelis.

Students wanting Columbia or Barnard credit for work done abroad should discuss their plans with the director of undergraduate studies at an early date to enable them to incorporate experience abroad most practically into their programs here.

## DEPARTMENT HONORS AND PRIZES

### Department Honors

Departmental Honors are awarded for overall outstanding performance in the Classics.

### Academic Prizes

The department offers two prize competitions yearly (Earle and Romaine) in sight translation of Greek and Latin. These prizes are awarded on the basis of examinations given each spring.

Two prizes are given to graduating Columbia College seniors:

- The Caverly Prize is awarded annually for outstanding performance by a graduating Columbia College major.
- The Stadler Prize is awarded annually to a graduating senior of Columbia College who is judged by the faculty to have demonstrated academic excellence through course work and the writing of a senior essay on some aspect of the history or culture of the classical world.

## OTHER IMPORTANT INFORMATION

Students interested in majoring in Classics should reach out to the Department early in their academic career. Students should contact the Director of Undergraduate Studies with any questions.

Students participating in dual degree programs should contact the Director of Undergraduate Studies.

## PROGRAM IN HELLENIC STUDIES

Department website: [hellenic.columbia.edu](http://hellenic.columbia.edu)

Office location: 618 Hamilton Hall

Office contact: 212-851-0297, [hellenic@columbia.edu](mailto:hellenic@columbia.edu)  
([videogameugrad@columbia.edu](mailto:videogameugrad@columbia.edu))

Director of Undergraduate Studies: Prof. Nikolas Kakkoufa; 212-854-3902; [nk2776@columbia.edu](mailto:nk2776@columbia.edu)

Undergraduate Administrator: Eleni Gizas; 212-851-0297; [eag2191@columbia.edu](mailto:eag2191@columbia.edu)

## THE STUDY OF MODERN GREEK

The Program offers students the opportunity to study Greece through a modern lens and prepares them for professional work or further academic study in the humanities and social sciences, international studies, fine arts or, more recently, more interdepartmental endeavors. At the heart of the curriculum is a series of courses that investigate the relation between language and culture in the Greek-speaking world (including the diaspora) throughout its modern history. The aim has been to build a strong linguistic base on which to construct a greater knowledge of Modern Greek literary, political, social, and cultural currents and attitudes, and also to offer students a theoretical framework for analyzing cultural differences more generally. Since then, Balkan and Mediterranean Studies, but also Classical Reception Studies outside the strict Classics world, have become part of the Hellenic Studies curriculum, especially insofar as they contribute to Global Core, Global Humanities, and interdisciplinary initiatives.

The Core Faculty of the PHS are Dimitris Antoniou, Chrysanthi Filippardos, Stathis Gourgouris, Nikolas P. Kakkoufa, Paraskevi Martzavou, and Karen Van Dyck. A number of affiliated faculty (but also the HLS faculty that is housed in Classics – Gourgouris, Van Dyck, Kakkoufa) teach and conduct their research in relation with other departments, institutes, and initiatives – notably, the Institute for Comparative Literature and Society (ICLS), the Institute for the Study of Sexuality and Gender (ISSG), the Institute for the Study of Human Rights, the Harriman Institute, and the Stavros Niarchos Foundation Public Humanities Initiative (SNFPHI). Its affiliated faculty members include, among others, John Ma in Classics, Mark Mazower in History, Ioannis Mylonopoulos in Art History and Archaeology, Neni Panourgia in the Justice in Education Program, Elsa Stamatopoulou in Human Rights, Nadia Urbinati in Political Science, and Konstantina Zanou in Italian.

The PHS organizes and co-sponsors the University Seminar in Modern Greek, a Lecture Series with the Greek Consulate in New York and a number of Hellenic Studies Workshops, Film Screenings, and occasional colloquia that provide a forum of discussion of research in progress on all aspects of Greek Civilization of which our students frequently take advantage. It also maintains a strong collaboration with the Stavros Niarchos Foundation Public Humanities Initiative and the newly established Columbia Global Center in Athens.

## **STUDENT ADVISING**

### **Consulting Advisers**

The Director of Undergraduate Studies (DUS) of the Program in Hellenic Studies in the Department of Classics is responsible for approving courses, overseeing enrollment, advising prospective and current minors, and certifying minors for graduation both in the Minor in Modern Greek Language, Literature, and Culture and the Minor in Hellenic Studies. Students should consult with the Director of Undergraduate Studies, Prof. Nikolas P. Kakkoufa at [nk2776@columbia.edu](mailto:nk2776@columbia.edu)

### **Enrolling in Classes**

Students are encouraged to consult with the Director of Undergraduate Studies to review course options and requirements.

### **Preparing for Graduate Study**

The Program in Hellenic Studies does not offer a graduate path of study but it has prepared students for further study in a number of disciplines with a focus on Modern Greece.

## **COURSEWORK TAKEN OUTSIDE OF COLUMBIA**

### **Advanced Placement**

The Program in Hellenic Studies offers a language placement test the week before the first day of classes in the fall. The test consists of both written and oral parts. Students who wish to schedule the test before the start of the fall semester, or to take a Modern Greek placement test at any other time in the year, or who have particular questions about placing, should contact the Director of Undergraduate Studies.

### **Barnard College Courses**

The Program in Hellenic Studies offers a Minor in Modern Greek at Barnard College. The Minor requires five courses beyond the Elementary Level. The Minor in Modern Greek is administered through the Department of Classics and Ancient Studies at Barnard College. Students wishing to minor in Modern Greek should consult with the Director of Undergraduate Studies.

### **Transfer Courses**

Students transferring to Columbia should contact the Director of Undergraduate Studies to discuss equivalencies and what level of courses they wish to take.

### **Study Abroad Courses**

Students may wish to enroll in the [College Year in Athens](#) Program for a semester-long or summer session. The [College Year in Athens](#) offers a wide variety of courses ranging from language and literature to history, art, and archaeology. Students wanting credit for work done abroad should discuss their plans with the Director of Undergraduate Studies at an

early date to enable them to incorporate experience abroad most practically into their programs here.

### **Summer Courses**

Students can enroll in the Travel Seminar, “Mediterranean Humanities in Athens”, organized in partnership with Columbia Global, the Aikaterini Laskaridis Foundation, and the Center for Undergraduate Global Engagement. Students participating in this seminar take Athens, Greece, as a vantage point to explore the multiple ways this body of water has been imagined by the people who lived or traveled across its shores. In this one-week seminar, students immerse themselves in the history and culture of Athens and its environs through a combination of lectures, guided museum visits, educational walks, field trips, and hands-on workshops.

## **CORE CURRICULUM CONNECTIONS**

Modern Greek language courses count towards the Core requirements. The following classes count towards the Global Core Requirement:

GRKM UN3935 Hellenism and the Topographical Imagination

CLGM GU4600 Multilingual Worlds: Translation, Gender and the Greek Diaspora

CSGM UN3567 Thessaloniki Down the Ages

CLGM UN3920 The World Responds to the Greeks: Modernity, Postcoloniality, Globality

CLGM UN3110 The Ottoman Past in the Greek Present

## **UNDERGRADUATE RESEARCH AND SENIOR THESIS**

### **Undergraduate Research in Courses**

Students should consult with the Director of Undergraduate Studies, Prof. Nikolas P. Kakkoufa at [nk2776@columbia.edu](mailto:nk2776@columbia.edu). Students can register for Directed readings (3997), a Senior Research Seminar (3998) or Supervised Independent Research (4460).

Senior Thesis Coursework and Requirements [drop-down]  
Though a Senior Thesis is not required for graduation it enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the junior year. Interested students should identify a potential faculty advisor and discuss their plans with the DUS.

### **Undergraduate Research Outside of Courses**

Undergraduate students can apply to the SNFPHI Summer Research Internship in Public Humanities and Hellenic Studies. This six week internship invites undergraduate students to explore public humanities, gain hands-on experience with its objectives, methods, and outcomes, and pursue a group

project that connects research on Greece with a broad public audience. The internship is structured around: (1) a seminar in Hellenic Studies in which students explore aspects of modern Greek history and culture relevant to their internship research, (2) a workshop in which students are trained in the methods and tools of public-facing research, and (3) a group project in which students work closely with Columbia faculty and public humanities partners in Greece.

## **DEPARTMENT HONORS AND PRIZES**

### **Department Honors**

Departmental Honors are awarded for overall outstanding performance.

## **PROFESSORS**

Kathy Eden  
Carmela V. Franklin  
Stathis Gourgouris  
John Ma (Chair)  
Kristina Milnor (Barnard, Chair)  
Seth R. Schwartz  
Deborah T. Steiner  
Karen Van Dyck  
Katharina Volk  
Gareth D. Williams  
Nancy Worman (Barnard)

Marcus Folch  
Joseph Howley  
Elizabeth Irwin  
Ellen Morris (Barnard)

## **SENIOR LECTURER**

Elizabeth Scharffenberger

## **LECTURERS**

Dimitrios Antoniou  
Lien Van Geel  
Hanna Golab  
Nikolas Kakkoufa  
Darcy Krasne

## **GUIDANCE FOR UNDERGRADUATE STUDENTS IN CLASSICS**

### **Program Planning for all Students**

The department offers a major in classics and a major track in classical studies. The major in classics involves the intensive study of both Greek and Latin, as well as their cultural matrix;

the track in classical studies offers a more interdisciplinary approach. The major in classics is recommended for students planning to continue the study of classics in graduate school. The department also participates in the interdepartmental ancient studies program and offers a concentration in classics; these are all described below.

The major in classics and the track in classical studies are designed in part to build on the experience of the ancient world that undergraduates have acquired at Columbia in the Core Curriculum (especially in Literature Humanities). The major in classics is structured on the principle of gradual and closely monitored linguistic progress from the elementary (1100-level) to the advanced (3000- and 4000-levels) and ultimately to the literature survey courses (GU4105-GU4106) in Greek and/or Latin.

Those majors intending to embark on graduate study in classics are especially encouraged to undertake, in their senior year, an independent research project (UN3998). This option is designed to allow students to personalize their experience in the major by conducting advanced study in a specialized area under the guidance of the specializing faculty member of their choice.

UN3998 is required in the classical studies track. Otherwise, students in classical studies are not required to take advanced courses beyond UN3996 The Major Seminar, but are expected to follow a coherent plan of study by taking a sequence of cognate courses in different but related departments (e.g., art history and archaeology, history, etc.).

### **Course Numbering Structure**

In both Greek and Latin prerequisites are the course with the number before in the sequence. Students can test out of the prerequisite with a placement test or through the Director of Undergraduate Studies.

In both languages the sequence is as follows:

1101: Elementary I

1102: Elementary II

1121: Intensive Elementary

2101: Intermediate I

2102: Intermediate II

For 2101 Either 1102 or 1121 is required as a prerequisite or a placement test.

The course numbers below are used for both Greek and Latin, except as noted. Please consult the Columbia and Barnard catalogs for full descriptions of all courses.

1101-2: Introductory language course in TWO semesters. This is the normal course taken by those beginning a language not previously studied; it covers all the basic grammar and gives some practice reading easy texts.

1121: This one-semester course is the equivalent of both 1101 and 1102; it covers all the basic grammar in one semester and enables the participants to take courses at the 2100 level the following semester. This is an intensive course, so you should be prepared to make a substantial time commitment.

2101-2: This sequence provides intermediate language training in both prose and poetry. The completion of 2102 satisfies the language requirement.

3012 (Latin only): This is the fifth-semester Latin course and the beginning of the Latin literature sequence. It is highly recommended for incoming first-year students who have had enough Latin to place out of 2101-2 or for those who have completed the intermediate sequence here.

3013 (Latin only): This new course is designed as a sequel or alternative to 3012 and aims to sharpen translation skills by concentrating on classical Latin prose.

3309, 3310, 4009, 4010: These advanced literature courses are offered annually with changes in subject matter so that students will have a chance to read as many representative authors as possible. Courses at the 4000 level are not necessarily more difficult than those at the 3000 level when taken by undergraduates; the significance of the designation is that graduate students as well as undergraduates may take 4000 level courses, but in many cases undergraduates and graduates will not be given the same workload in these courses. Students who are in doubt about the level of a specific class should consult the instructor.

3033, 4152 (Latin only): These courses constitute the sequence in medieval Latin; in most years both will be offered.

3996: The Major Seminar is intended for senior majors in Classics, Classical Studies, and Ancient Studies but is also open to juniors. The course considers a different topic each year, analyzing it across time periods, genres, and both languages. It focuses on honing skills that are useful for working on the senior thesis, such as how to frame a discussion topic, how to analyze a text philologically and thematically, and how to develop a bibliography. The course also provides upper-level students in Classics, Classical Studies, and Ancient Studies with an opportunity to get to know each other in a congenial and interactive environment.

4105-6: The literature surveys are designed to give advanced Classics undergraduates and entering graduate students a grasp of the broader picture of Greek or Latin literature, as opposed to the more focused topics offered in other advanced courses.

5139: This course focuses on enabling students to write, as well as read, Greek and Latin. It consists largely of an intensive review of grammar and syntax at an advanced level, with the translation of sentences or short paragraphs into the ancient languages. Note: This is technically a graduate course, but undergraduates are welcome to enroll with the instructor's

permission. 5139 replaces the old 4139; the content of the course remains the same.

## **CLASSICAL CIVILIZATION AND LITERATURE IN TRANSLATION**

These courses are designed for both majors and non-majors and are ideal for students with no prior background in the ancient world, though they may also be of interest to more advanced students. Some, such as Classical Myth (3132), are normally offered every year; others are offered in rotation or once only.

## **Guidance for First-Year Students**

The director of undergraduate studies is responsible for overseeing the path of study followed by each student in classics or classical studies. Through close interaction with the director of undergraduate studies, as well as with other faculty members where appropriate, each major is strongly encouraged to debate the strengths and weaknesses of his or her own trajectory of study even as the requirements for the major are being completed.

Students should contact the director of undergraduate studies with any questions about the classics majors and course offerings. The director of undergraduate studies can provide students with a worksheet to help in planning their progress toward major requirements.

## **Guidance for Transfer Students**

Students should contact the director of undergraduate studies with any questions about the classics majors and course offerings. The director of undergraduate studies can provide students with a worksheet to help in planning their progress toward major requirements.

## **UNDERGRADUATE PROGRAMS OF STUDY: CLASSICS**

### **Required Coursework for all Programs**

The major is offered with two tracks, Classics and Classical Studies. The former, which is recommended for students considering graduate work in Classics, concentrates heavily on the ancient languages and literature; the latter can be earned with only one of the ancient languages and includes more courses on other aspects of the ancient world. The Classics department also participates in the interdepartmental Ancient Studies major, which is designed for students whose interests encompass the ancient Mediterranean as a whole rather than the Greco-Roman world in particular. The Classics Concentration/Minor is earned in either Latin or Greek; there is also a Greek/Latin Minor for students of the School of Engineering and Applied Science.

## Major in Classics

11 courses, minimum 34 credits

In the primary language:

- Four courses at or above the 2100-level
- Major seminar 3996
- Two courses from the Advanced Menu of four (4105, 4106, 5139, 3998; any others may count toward the four upper level requirement)

In the secondary language:

- Two courses at or above the 2100 level

Two ancient culture courses, including:

- One in the culture of the primary language
- One in any aspect of ancient history or culture (HIST, AHIS, PHIL, CLLT, CLCV...)

A student must write a thesis (UN3998) to be considered for Departmental Honors and prizes.

## Major in Classical Studies

11 courses, minimum 35 credits

- Five courses, at or above 1102, in either or both Latin and Greek
- Major Seminar 3996
- Four classes in ancient history, art, philosophy, religion, civilization
- Senior thesis 3998

## Major in Ancient Studies

Students interested in a major in ancient studies should see the *Ancient Studies* section in this Bulletin.

## The Minors in the Department of Classics

There are five tracks towards obtaining a **Minor in Classics**.

- The track in Classics is designed for students who wish to study both Greek and Latin language, literature, and culture. This track envisages advanced competence in one ancient language and elementary knowledge of the other.
- The tracks in Greek or Latin allow students to develop significant knowledge of the language, literature, and culture of either ancient Greece or Rome. These tracks envisage advanced competence in one ancient language, Greek or Latin, and sustained study of one ancient civilization.

- The track in Classical and Ancient Civilizations allows students to receive recognition for coursework in the study of ancient societies while not mandating the study of an ancient language. Language work, however, is encouraged and, at and above the intermediate level, may be counted toward this track.

- The track in Classical Reception and the Classical Tradition allows students to focus on the cultural legacy of ancient Greek and Roman societies. Although not required, language work is encouraged and, at and above the intermediate level, may be counted toward this track.

### Minor tracks in detail

**I. CLASSICS.** 5 courses. A minimum of 15 credits. (Students without prior knowledge of Greek and Latin may be required to take as many as 22 credits in the primary language (elementary 1102 & 1102, intermediate 2101 & 2102, and advanced 3009 & 3010), 8 credits in the secondary language (elementary 1101 & 1102), and 6 credits for the Cultural and Historical Breadth requirement.)

- **Primary Language:** Three courses in the primary language at or above the 2100-level.

- **Secondary Language:** One course in the secondary language at or above the 1102-level.

- **Cultural and Historical Breadth:** One course on any aspect of any aspect of the culture (including archaeology, art history, history, literature, philosophy, and post-Classical reception) of the primary language.

**II & III. GREEK OR LATIN** A minimum of 15 credits. (Students without knowledge of Greek or Latin may be required to take as many as 19 credits in one language (elementary 1102 & 1102, intermediate 2101 & 2102, and advanced 3009), as well as 6 credits for the Cultural and Historical Concentration.

- **Language Concentration:** Three courses in Greek or Latin at or above the 2100-level; The minor—Greek or Latin—is determined by the language chosen for the Language Core.

- **Cultural and Historical Concentration:** Two courses on any aspect of any aspect of the literature, culture, and/or history (including archaeology, art history, history, literature, philosophy, and post-Classical reception) of the student's chosen language. Language courses at or above the 3000-level may count toward this requirement; it is thus possible for students to begin studying an ancient language at the elementary level in the freshman year and to complete the requirements for the minor by the senior year by taking coursework in that language.

**IV. CLASSICAL AND ANCIENT CIVILIZATIONS** A minimum of 15 credit points. (Language study is not required for this track. However, for students who wish to use language courses to count toward minor requirements, this track may take

more coursework and credit points; how many will depend on the student's familiarity with the language.)

- **Fundamental Breadth:** Five courses on any aspect of the ancient Greco-Roman Mediterranean and neighboring societies.

- **Advanced Studies:** Three of the five courses above must be taken at the advanced (usually UN3000 or above) level. One Greek or Latin course at or above the 2102-level may count toward the Advanced Studies requirement.

**V. CLASSICAL RECEPTION AND THE CLASSICAL TRADITION.** A minimum of 15 credit points. (Language study is not required for this track. However, for students who wish to use language courses to count toward minor requirements, this track may take more coursework and credit points; how many will depend on the student's familiarity with the language.)

- **Foundational Breadth 1—*Ancient Civilizations:*** Two courses on any aspect of the ancient Greco-Roman Mediterranean and neighboring societies.

- **Foundational Breadth 2—*Classical Reception and the Classical Tradition:*** Three courses on classical reception, the classical tradition, and/or comparative approaches to the study of the ancient world. Coursework for this requirement may focus on Medieval and Renaissance Studies, Hellenic Studies, English, Comparative Literature, and related disciplines.

- **Advanced Studies:** Three of the five courses taken for this minor must be taken at the advanced level (UN3000 or above). One Greek or Latin course at or above the 2102 level may count toward the Advanced Studies requirement.

- No fewer than four courses counted toward this track must be taught by Columbia and Barnard Classics and Ancient Studies faculty.

Please visit the following website for details -- [Minor in Classics — Columbia University Department of Classics](#)

For further information, please contact the Director of Undergraduate Studies.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration (Columbia College and General Studies) in Classics

7 courses, minimum 21 credits

Six courses in one classical language (Latin or Greek), of which

- Five courses above the 1100 level, three of which must be 3/4000 level

- One from the following three advanced options: 4105, 4106, 5139

One course in ancient history or classical civilization

## PROGRAM IN HELLENIC STUDIES

Department website: [hellenic.columbia.edu](http://hellenic.columbia.edu)

Office location: 618 Hamilton Hall

Office contact: 212-851-0297, [hellenic@columbia.edu](mailto:hellenic@columbia.edu)  
([videogameugrad@columbia.edu](mailto:videogameugrad@columbia.edu))

Director of Undergraduate Studies: Prof. Nikolas Kakkoufa;  
212-854-3902; [nk2776@columbia.edu](mailto:nk2776@columbia.edu)

Undergraduate Administrator: Eleni Gizas,  
[eag2191@columbia.edu](mailto:eag2191@columbia.edu)

Guidance for Undergraduate Students

### Program Planning for all Students

The Program in Hellenic Studies offers 1) a Minor in Modern Greek Language, Literature, and Culture, 2) a Minor in Hellenic Studies, 3) a Special Concentration in Modern Greek (for students enrolled prior to Fall 2024), and 4) a Minor in Modern Greek at Barnard College.

The Minor in Modern Greek Language, Literature, and Culture is designed to offer students an advanced understanding of contemporary Greece with a specialization in the field of Modern Greek Language, Literature, and Culture that is representative of the intellectual breadth of our core Faculty.

The Minor in Hellenic Studies functions as a cluster of courses that will introduce students to the diachronic study of Greece and could complement the majors in Classics, Classical Studies, Art History and Archaeology, History, etc.

The Special Concentration is structured around course offerings in Modern Greek Language & Culture Courses and in Modern Greek Studies Interdepartmental courses.

Students should [visit the website](#) for more information or contact the Director of Undergraduate Studies, Prof. Nikolas P. Kakkoufa.

### Course Numbering Structure

1101: Elementary I

1102: Elementary II

2101: Intermediate I

2102: Intermediate II

3000+: Other courses

3997: Directed readings

3998: Senior Research Seminar

4460: Supervised Independent Research

GRKM: Greek Modern

CLGM: Comparative Literature Greek Modern

CSGM: Classics Greek Modern

HLNS: Hellenic Studies

## Guidance for First-Year Students

The Director of Undergraduate Studies is responsible for overseeing the path of study followed by each student. Students should contact the DUS with any questions about the minors, course offerings, and language placement exam.

## Guidance for Transfer Students

Transfer students should contact the Director of Undergraduate Studies, Prof. Nikolas P. Kakkoufa at [nk2776@columbia.edu](mailto:nk2776@columbia.edu).

## UNDERGRADUATE PROGRAMS OF STUDY

### Minor in Modern Greek Language, Literature, and Culture

The Minor in Modern Greek Language, Literature, and Culture (MGLLC) consists of 5 (15-18 credits) courses on top of the successful completion of the Elementary Modern Greek Sequence (8 credits). Students may double count the Intermediate Sequence both for the Language Requirement and for the MGLLC. The focus of the minor is the study of the language, literature, and Culture of Modern Greece. The minor is open to Columbia College and General Studies students.

The general learning goals of this minor are 1) to provide the training necessary to speak, comprehend, read and write Modern Greek, which would allow students to participate not only in basic everyday communications but also to academically interact with primary material in Modern Greek, 2) to offer an awareness of the diverse populations and cultures in which Modern Greek is spoken (Greece, Cyprus, the Diasporas) and of the sociolinguistic aspect of their language/dialects; a deeper understanding of what language is and does, 3) to function as an introduction to the professional abilities and skills needed to undertake graduate training as scholars in the humanities, translators, and interpreters, 4) to develop proficiency in the literary and cultural accomplishments of Modern Greek, 5) to acquire and hone skills in the methodologies of close reading of texts and critical thinking, 6) to engage in diverse methods of inquiry

about texts, visual material, and cultural material more broadly, 7) to raise Global awareness and respect for other cultures, and 8) to develop abilities in articulation of ideas and precision in oral/written presentation. These goals are also enriched by the specific learning goals and methods that our faculty set in their individual syllabi.

#### • PREREQUISITE

- Students should have satisfied the Elementary Sequence (GRKM1101, GRKM1102) or demonstrated equal proficiency through a placement test administered by the Program in Hellenic Studies

#### • DECLARING

- There is no formal application to the Minor. Interested students should contact the Program's Director of Undergraduate Studies, Prof. Nikolas P. Kakkoufa.

#### • REQUIREMENTS

- Five (15-18 credits) courses on top of the successful completion of the Elementary Modern Greek Sequence (8 credits). Any appropriate course taught in the area of Modern Greek Studies in departments other than Classics must be approved by the DUS. Typically, no more than two courses will be allowed to double-count with a student's major or the college's Core Requirements.
- GRKM 2101 Intermediate Modern Greek I
- GRKM 2102 Intermediate Modern Greek II
- Students who place out of the Intermediate Sequence will have to replace those two courses with the lectures and seminars offered and cross listed by the Program in Hellenic Studies. Students are also strongly encouraged but not required to complete GRKM 3003 prior to enrolling in other classes.
- Three additional courses at the 2000 level or above from at least two of the following three categories:
  - Any course listed by the Program in Hellenic Studies (GRKM, CLGM, CSGM).
  - Any course cross-listed by the Program in Hellenic Studies with the code GM (courses that contribute to an understanding of some aspect of Modern Greece within larger analytical concepts).
  - Directed Readings and Independent Study.
- Though a Senior Thesis is not required for graduation it enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the junior year. Interested students should

identify a potential faculty advisor and discuss their plans with the DUS.

## Minor in Hellenic Studies

The Minor in Hellenic Studies consists of 5 courses (15-20 credits). Although there are no prerequisites, the study of either ancient or modern Greek is highly recommended. To ensure this truly interdisciplinary course of study the required classes are based on selecting classes from the following – broadly conceived – distribution requirements: 1) Period, 2) Discipline, 3) Geography.

The general learning goals of the Minor in Hellenic Studies are: 1) to introduce students to Hellenic studies as a diverse and interdisciplinary field and to interdisciplinary research at Columbia more broadly; 2) to familiarize students not only with Greece as a space at the crossroads of East and West but also with the ways in which different disciplines have considered space across geography and time; 3) to acquire a global perspective on the reception of Hellenic material and to give students vital tools needed to engage in diverse methods of inquiry about texts, visual material, and cultural material more broadly; 4) to offer students first-hand exposure to objects of material and visual culture through the Hellenic Collection in our Library (which has, for example, the biggest collection of zines outside of Greece) but also the Museums with Hellenic Collections across the city of New York and, hopefully, with the further development of the Global Center in Athens, to research collections and archaeological and historical sites in Greece with study abroad classes; 5) to critically think about and problematize the narratives of nations, traditions, and claims to continuity as it affects today's world through a deep historical and broad geographical study 5) to acquire and hone skills in close reading of texts and critical thinking and to develop abilities in articulation of complex ideas and precision in oral/written presentation. It also aims to enrich the students' undergraduate experience by encouraging them to take part in the diverse activities and programming of the Program in Hellenic Studies and the Stavros Niarchos Initiative for Public Humanities. The minor is open to Columbia College and general Studies students.

### • PREREQUISITE

- There are no prerequisites for the Hellenic Studies Minor. The study of either ancient or modern Greek is strongly encouraged.

### • DECLARING

- There is no formal application to the Minor. Interested students should contact the Program's Director of Undergraduate Studies, Dr. Nikolas P. Kakkoufa.

### • REQUIREMENTS

- 5 courses (15-20 credits) at the 2000 level or above from at least two of the following three categories:

- Any course listed by the Program in Hellenic Studies (GRKM, CLGM, CSGM).
- Any course cross-listed by the Program in Hellenic Studies with the code HLNS (courses that contribute to an understanding of some aspect of Hellenic studies in different periods, different disciplinary focus, different geographical contexts).
- Directed Readings and Independent Study

- Students will need to complete courses in all three distribution areas: 1) Periods (e.g. Ancient, etc.), 2) Disciplines (Comparative Literature, Queer Studies, Anthropology, Translation, History, Archaeology, etc.) 3) Geography (Mediterranean Studies, etc.) .
- Any appropriate course taught in the area of Hellenic Studies in departments other than Classics, must be approved by the DUS. Typically, no more than two courses will be allowed to double-count with a student's major or the college's Core Requirements.
- Though a Senior Thesis is not required for graduation it enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the student's junior year. Interested students should identify a potential faculty advisor and discuss their plans with the DUS.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Special Concentration in Modern Greek

The minimum credit requirement for the Hellenic Studies Concentration is 21 credits and includes:

1. Modern Greek language and culture courses (Elementary, Intermediate, Advanced, Cultural Dictionary I & II, Readings in Modern Greek; minimum 8 credits). Students will work with the undergraduate advisor to determine their level of the language.
2. Modern Greek Studies interdepartmental courses (CLGM, CSGM, HSGM; minimum 12 credits). The program of study should be planned as early as possible with the Director of Undergraduate Studies. Students meet with the Director of Undergraduate Studies each semester in order to obtain program approval. Opportunities exist for study abroad in Greece, Cyprus and Turkey for the summer or an academic term for credit. Students work closely with the concentration

advisor on the selection of the foreign schools and the transfer of credit.

Students may also wish to write a Senior Thesis which will substitute one Modern Greek Studies interdepartmental seminar. While not required for graduation, the thesis enables a student to be considered for departmental honors. It is advisable to begin planning for the thesis during the student's junior year. Interested students should identify a potential faculty advisor.

## LATIN

### **LATN UN1101 ELEMENTARY LATIN I. 4.00 points.**

For students who have never studied Latin. An intensive study of grammar with reading of simple prose and poetry

#### **Fall 2024: LATN UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 1101	001/11327	T Th F 10:10am - 11:25am 316 Hamilton Hall	Marissa Swan	4.00	15/15
LATN 1101	002/11328	M W 6:10pm - 8:00pm 616 Hamilton Hall	Olivier Bordeleau-Lavoie	4.00	12/15

#### **Spring 2025: LATN UN1101**

### **LATN UN3012 AUGUSTAN POETRY. 3.00 points.**

Prerequisites: *LATN V1202* or the equivalent.

Prerequisites: LATN UN2102 or the equivalent. Selections from Vergil and Horace. Combines literary analysis with work in grammar and metrics

#### **Fall 2024: LATN UN3012**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3012	001/11334	M W 2:40pm - 3:55pm 318 Hamilton Hall	Gareth Williams	3.00	17/20
LATN 3012	AU1/20983	M W 2:40pm - 3:55pm Othr Other	Gareth Williams	3.00	4/5

**LATN UN3013 CLASSICAL LATIN PROSE. 3.00 points.**

Prerequisites: LATN W2202 or equivalent This course is intended to complement Latin V3012: Augustan Poetry in providing students a transition between the elementary, grammatical study of Latin texts to a more fluent understanding of complex literary style. Latin V3013 will largely concentrate on different styles of writing, particularly narrative, invective, and argument. Text will be drawn primarily from Cicero's orations, with some readings from his rhetorical works

Spring 2025: LATN UN3013

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3013	001/14792	T Th 11:40am - 12:55pm 618 Hamilton Hall	Lien Van Geel	3.00	3/25

**LATN UN3033 MEDIEVAL LANGUAGE & LITERATURE. 3.00 points.**

Prerequisites: four semesters of college Latin or the instructor's permission.

Prerequisites: four semesters of college Latin or the instructor's permission. This course offers an introduction to medieval Latin literature in conversation with its two most important traditions, classical literature and early Christian culture. Illustrative passages from the principal authors and genres of the Latin Middle Ages will be read, including Augustine and biblical exegesis; Ambrose and poetry; Bede and history and hagiography; Abelard and Heloise and the 12th century Renaissance. The course is suitable both for students of Latin and of the Middle Ages

Fall 2024: LATN UN3033

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3033	001/11335	T Th 2:40pm - 3:55pm 613 Hamilton Hall	Carmela Franklin	3.00	4/15

**LATN UN3035 Poetry as Neurosis: Lucan's Bellum Civile. 3 points.**

This course is an intensive study of Lucan's revolutionary and enigmatic *Bellum Civile*, the epic masterpiece of the Neronian age, which was admired and imitated all through the history of Western culture by authors such as Dante, Montaigne, Milton, Voltaire, Goethe, Shelley, and Baudelaire among others. The course will examine major controversies concerning the form and meaning of the poem, with special emphasis on the poetic tension created by the narrator's neurotic personality. The narration of the 49 BCE civil war between Caesar and Pompey is for Lucan the pretext for an original and intensely personal reflection on themes such as political oppression, the role of the individual in society, nihilism, self-destructiveness, mental disorder, and artistic creation. The poem will be analyzed from various critical perspectives that include rhetoric, intertextuality, deconstruction, reception theory, and psychoanalysis; no previous knowledge of any of these methodologies is required. Although an acceptable knowledge of Latin (intermediate or above) is assumed, the primary focus of this course is literary and sociological interpretation rather than linguistic competence. In addition

to the Latin reading assignments, the poem will also be read entirely in English translation, allowing students to comprehend the whole while they engage with particular sections in the original language. The assignment for each class will include: (1) approximately five hundred lines to be read in English translation; (2) translation of short Latin passages, whose size may be adapted to the level of the class/student; (3) secondary readings.

**LATN UN3309 LATIN LITERATURE SELECTIONS. 3.00 points.**

Prerequisites: LATN V1202 or the equivalent.

Prerequisites: LATN UN2102 or the equivalent. Since the content of this course changes from year to year, it may be repeated for credit

Fall 2024: LATN UN3309

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3309	001/00346	M W 10:10am - 11:25am 318 Milbank Hall	Kristina Milnor	3.00	7/15

**LATN UN3310 LATIN LITERATURE SELECTIONS. 3.00 points.**

Prerequisites: LATN V1202 or the equivalent.

Prerequisites: LATN UN2102 or the equivalent. Since the content of this course changes from year to year, it may be repeated for credit

Spring 2025: LATN UN3310

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3310	001/14793	M W 10:10am - 11:25am 618 Hamilton Hall	Lien Van Geel	3.00	6/25

**LATN UN3320 Intensive Reading Course. 3 points.**

This course is limited to students in the Postbaccalaureate program. The intensive reading of a series of Latin texts, both prose and verse, with special emphasis on detailed stylistic and grammatical analysis of the language.

**LATN UN3980 POST-BACCALAUREATE SEMINAR. 3.00 points.**

This seminar aims to provide students in the post-baccalaureate certificate program with opportunities 1) to (re-)familiarize themselves with a selection of major texts from classical antiquity, which will be read in English, 2) to become acquainted with scholarship on these texts and with scholarly writing in general, 3) to write analytically about these texts and the interpretations posed about them in contemporary scholarship, and 4) to read in the original language selected passages of one of the texts in small tutorial groups, which will meet every week for an additional hour with members of the faculty

Fall 2024: LATN UN3980

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LATN 3980	001/17418	F 2:40pm - 4:40pm 607 Hamilton Hall	Darcy Krasne	3.00	2/15

**LATN UN3996 THE MAJOR SEMINAR. 3.00 points.**

Prerequisites: junior standing. Required for all majors in Classics and Classical Studies. The topic changes from year to year but is always broad enough to accommodate students in the languages as well as those in the interdisciplinary major. Past topics include: love, dining, slavery, space, power

**Fall 2024: LATN UN3996**

**GREK UN3016 Readings from the Greek New Testament. 3.00 points.**

The New Testament introduces us to a register, or rather registers, of Greek radically unlike those of the high canon of classical texts. In broad terms, all the texts in the collection possess features that link them to the documentary Greek used in early imperial papyri and inscriptions, for example, the obsolescence of the optative, the infrequency of certain particles, and the relative simplicity of the syntax. But there is remarkable variety within these broad constraints: Matthew straightforwardly imitates the language of the Greek Old Testament, Markan prose is pared down to the point of being gnomic, Luke/Acts has some generic markers of historiography without any meaningful indication that the classical historians served the author as a model, and the lively paraenetic/argumentative/hysterical style of the authentic Pauline Epistles resists facile classification. The existence of such texts reminds us of the need to break out of the Atticistic canon if we want to get a full picture of Imperial Greek. We need to determine who in socio-economic terms the writers and readers of such texts may have been and whether there may not have been many more like them. In this way we can complicate the facile view that draws an excessively close connection between the eastern Empire, Greekness and the Greek city, and the Second Sophistic. Not all Greek writing was a vehicle for the dissemination of an exclusivistic Greekness. It will also not be ignored that these texts are important not only for literary scholars and Roman social historians, but also for historians of Christianity and Judaism, for reasons too obvious to require explication. But no texts analyze themselves: students will be introduced to the central problems raised by the texts and the main methodological and theoretical approaches used to solve them

**Spring 2025: GREK UN3016**

**GREK GU4030 Philo of Alexandria: Life of Moses, On the Contemplative Life. 3 points.**

We will read in the original language selections from three treatises -- *In Flaccum*, *Legatio ad Gaium*, and *De Vita Contemplativa* -- of Philo of Alexandria; aside from their importance as Imperial Greek texts, these essays provide essential and very rare evidence for the environment (early Imperial Alexandria) and thought of their author.

**GREK GU4100 Survey of Greek Literature. 4.00 points.**

This course provides a survey of Greek literature. It aims to improve students' reading skills, familiarize them with some of the most canonical works of Greek literature, afford them a sense of Greek literary history, and introduce them to modern methodological approaches. Readings are drawn from the Classics Ph.D. reading list

**Spring 2025: GREK GU4100**

GREK 4100	001/14776	M W 4:10pm - 6:00pm 613 Hamilton Hall	Elizabeth Scharffenberger	4.00	7/15

**GREK GU4105 HISTORY OF GREEK LITERATURE I. 4.00 points.**

Prerequisites: at least two terms of Greek at the 3000-level or higher. Readings in Greek literature from Homer to the 4th century B.C

**GREK GU4106 HISTORY OF GREEK LITERATURE II. 4.00 points.**

Prerequisites: at least two terms of Greek at the 3000-level or higher.

Prerequisites: at least two terms of Greek at the 3000-level or higher. Greek literature of the 4th century B.C. and of the Hellenistic and Imperial Ages

**CLASSICAL CIVILIZATION****CLCV UN1001 Introduction to Greek Mythology. 3.00 points.**

The stories of the Greek and Roman gods and heroes are at the root of countless works of art, philosophy, literature, and film, from antiquity to the present. Many familiar phrases from the English language also derive from myth: an Achilles heel (and Achilles tendon!), a Trojan horse, Pandora's box, and so forth. This course will introduce you to the broad range of tales that make up the complex and interconnected network of Greek and Roman mythology

**CLCV UN2441 EGYPT IN CLASSICAL WORLD. 4.00 points.**

This class tracks Egypt's entanglement in the Greco-Roman world from the country's initial welcoming of Greek merchants and mercenaries to the point at which Justinian shuttered its last remaining temple. In examining archaeological, textual, and artistic evidence, we'll pay close attention to the flashpoints that divided society along ethnic lines (viz. Egyptian, Nubian, Levantine, Greek, and Roman inhabitants) and according to religious belief (among polytheists of Egyptian and Greek heritage, Jewish Egyptians, and Christians) as well as to syncretism, mixed marriages, and other integrative aspects of society

**CLCV UN3009 Ancient Greek # Roman Medicine. 3.00 points.**

This course aims to identify, analyze, and discuss ancient Greek and Roman medical theories, observations, methodologies for diagnosis and treatment, and the philosophical and professional disputes that arose around them. This course is arranged thematically and focuses on common methodologies, such as reasoning from first causes, in contrast to epistemic observation and experience. Other broad themes include the relationship between medicine and natural history, and the connection between medical treatments and the rise of herbals as ostensibly reliable sources of information. By focusing on such general themes and methodologies, and by reading the original Greek and Latin texts in translation, this course will aim to provide an answer to the following questions: in what exactly did ancient Greek and Roman medicine consist and how did the field's practitioners and theorists perform medical work, in their own words? There are no prerequisites for this course, nor does it require knowledge of Greek or Latin. It is equally suited to premed students, individuals with an interest in medical humanities, and Classics students

**CLCV UN3059 WORLDS OF ALEXANDER THE GREAT. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This seminar looks at the narrative and the historical context for an extraordinary event: the conquest of the Persian empire by Alexander III of Macedonia, conventionally known as "Alexander the Great". We will explore the different worlds Alexander grew out of, confronted, and affected: the old Greek world, the Persian empire, the ancient near-east (Egypt, Levant, Babylonia, Iran), and the worlds beyond, namely pre-Islamic (and pre-Silk Road) Central Asia, the Afghan borderlands, and the Indus valley. The first part of the course will establish context, before laying out a narrative framework; the second part of the course will explore a series of themes, especially the tension between military conquest, political negotiation, and social interactions. Overall, the course will serve as an exercise in historical methodology (with particular attention to ancient sources and to interpretation), an introduction to the geography and the history of the ancient world (classical and near-eastern), and the exploration of a complex testcase located at the contact point between several worlds, and at a watershed of world history

**CLCV UN3060 Worlds of Alexander the Great Discussion. 0 points.**

Corequisites: CLCV UN3059

Discussion section to accompany CLCV 3059, "The Worlds of Alexander the Great": examination of sources, interpretation and historiography; broad discussion as well as close reading of texts.

**CLCV UN3101 The Archaeology of Ancient Egypt and Nubia. 3 points.**

Thanks to the pyramids of Giza, the treasure of Tutankhamun, and other remains of royal activity, pharaonic Egypt is justly famous for its monuments and material culture. Equally fascinating, if less well known, however, are the towns, fortresses, cultic centers, domestic spaces, and non-elite cemeteries that have been excavated over the past 200 years or so. The archaeology of Nubia is also little known but fascinating on many levels. This course will focus on what archaeology can reveal about life as it was experienced by individuals of all social classes. Through a combination of broad surveys and case studies of some of Egypt and Nubia's most culturally indicative and intriguing sites, we will explore issues such as the origins of inequality, state formation and its effects, the uneasy mix of state-planned settlements and village life, urbanism, domestic and community worship, gendered spaces, ethnicity and colonialism, religious revolution and evolution, bureaucracy, private enterprise, and the effects of governmental collapse on life and death in ancient Egypt and Nubia.

**CLCV UN3111 PLATO&CONFUCIUS: COMP ANC PHIL. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: completion of first semester of CC recommended. Although separated by a distance of nearly 5,000 miles, Classical Greece and China witnessed the near-simultaneous emergence of complex, centralized city-states, intensive agricultural cultivation, urbanization, the growth of imperial administrations, and scientific and technological revolutions. Each also witnessed the emergence of competing schools of philosophy. This course surveys principal works of Classical Greek and Chinese philosophy (where possible in their totality). Our goals are both contextualist and comparativist. Alternating between philosophical traditions, we shall read, discuss, and analyze several works of ancient Greek philosophy and Classical Chinese philosophy within their unique historical contexts and in comparison to one another.

**CLCV UN3220 War, reality and truth in Thucydides. 4 points.**

Between 431 and 404 BCE, a world war pitted the sea empire of democratic Athens against the land-based hegemony of Sparta, the culmination of decades of cold war, uneasy coexistence and open conflict between the two powers. The first twenty years of this major event in ancient history are painstakingly recorded in a monumental work, the *War of the Peloponnesians and Athenians* by the Athenian Thucydides, a participant in the conflict. This remarkable and highly crafted text combines a hyperreal narrative season by season, analyses of causality, character and motivation,

and competing ethical and practical interpretations. We will approach Thucydides' *War* in four different ways: as a piece of historiography; as set of political or social scientifically oriented demonstrations; as a philosophical meditation on justice and power in the world; and as a historical document for a richly interesting period. Are these four approaches mutually compatible and reinforcing? The close reading of the text (for reasons of time, we will look at Books 1-5, 8 will be completed by engagement with secondary literature (four monographs and articles) and with contemporary documents (inscriptions), the latter offering a fragmentary counterpoint to Thucydidean narrative. After reading the text, we will spend time on thematic debates involving the narrative and contextual material. The aim of this close work is to produce a Thucydides beyond the clichés of contemporary punditry ("the Thucydides trap"), closely fitting within Columbia undergraduate training (where Thucydides has vanished from the Core), and bridging the gap between contextualizing and modernizing readings.

**CLCV UN3321 War, reality and truth in Thucydides - Discussion. 0 points.**

Between 431 and 404 BCE, a world war pitted the sea empire of democratic Athens against the land-based hegemony of Sparta, the culmination of decades of cold war, uneasy coexistence and open conflict between the two powers. The first twenty years of this major event in ancient history are painstakingly recorded in a monumental work, the *War of the Peloponnesians and Athenians* by the Athenian Thucydides, a participant in the conflict. This remarkable and highly crafted text combines a hyperreal narrative season by season, analyses of causality, character and motivation, and competing ethical and practical interpretations. We will approach Thucydides' *War* in four different ways: as a piece of historiography; as set of political or social scientifically oriented demonstrations; as a philosophical meditation on justice and power in the world; and as a historical document for a richly interesting period. Are these four approaches mutually compatible and reinforcing? The close reading of the text (for reasons of time, we will look at Books 1-5, 8 will be completed by engagement with secondary literature (four monographs and articles) and with contemporary documents (inscriptions), the latter offering a fragmentary counterpoint to Thucydidean narrative. After reading the text, we will spend time on thematic debates involving the narrative and contextual material. The aim of this close work is to produce a Thucydides beyond the clichés of contemporary punditry ("the Thucydides trap"), closely fitting within Columbia undergraduate training (where Thucydides has vanished from the Core), and bridging the gap between contextualizing and modernizing readings.

**CLCV V3230 Classics and Film. 3 points.**

Considers cinematic representations of the ancient Mediterranean world, from early silent films to movies from the present day. Explores films that purport to represent historical events (such as *Gladiator*) and cinematic versions of ancient

texts (Pasolini's *Medea*). Readings include ancient literature and modern criticism.

**CLCV GU4106 Religions of the Roman World. 3.00 points.**

The goal of this course is to convey an important amount of knowledge on the religious history of the Roman empire focusing both on paganism, Christianity and Judaism and their interaction. We will study the religious space, the agents of cults and religions, rituals and networks and dynamics of power. The course will also face the challenge to reconsider the points of view from which to think the religious history of the Roman Empire and therefore it will be an invitation to revise our intellectual tools and questions towards an awareness to what is at stake when an object of religious debate emerges

**CLCV GU4110 Gender and Sexuality In Ancient Greece. 3 points.**

Prerequisites: sophomore standing or the instructor's permission.

Examination of the ways in which gender and sexuality are constructed in ancient Greek society and represented in literature and art, with attention to scientific theory, ritual practice, and philosophical speculation. Topics include conceptions of the body, erotic and homoerotic literature and practice, legal constraints, pornography, rape, and prostitution.

**CLCV UN3008 The Age of Augustus. 3.00 points.**

The reign of the first Roman emperor, Augustus (27bce-14ce), has been seen as a Roman revolution, both political and cultural. Rome had for centuries been governed as a Republic, but a series of increasingly divisive civil wars allowed Augustus to create a new political system in which he exercised sole rule as the 'first citizen' within a 'Restored Republic'. Augustus' reign lasted more than 40 years, and established a model of autocratic rule that would last for four centuries. During this time there were profound changes in the political, social, and cultural structures of Rome. In this course, you will examine the nature of these changes, Augustus' political strategies, military activities, and religious initiatives through his own writing, the accounts of (often hostile) historians and a range of literary and archaeological sources, including Roman poetry. Ultimately, we will address the question: how did Augustus achieve the seemingly paradoxical feat of becoming a monarch within a republican system?

**CLCV UN3070 Polis: the Biography of the Ancient Greek City-State 650 BCE-350 CE. 4.00 points.**

This course explores the history of the Greek city-state, first as a long narrative story from the obscure leap to stately forms in the Aegean basin during the early seventh century BCE, to the end of municipal forms in the late Roman empire in the fourth century CE. Is there a single polis form that develops and endures during this century? This is the concern of the first half of the course. The second half explores implications of the polis as a social and political organism: as ideas, ideology and institutions; as self-interest; and as a site and a tool of domination. The possible consequences for the politics of

living together will be examined throughout the course, which balances between history and political philosophy

**CLCV UN3069 Society and Power in the Hellenistic Age. 3.00 points.**

This course explore the Hellenistic world (not to be confused with the "Hellenic world")— the spaces and communities in the Mediterranean, Africa and Western Asia, in the centuries following the destruction of the Achaimenid empire. The themes studied include the formation of large tributary empires, and their strategies for implementing control; local political agency; cultural interaction, within frameworks of imperial power, between Greek and non-Greek; social relations; economic history; and more. This world seems created by a historical accident, but might equally be described as the result of deep structural features (the convergence of polis institutions, the rise of a connected economy, the spread of Greek cultural forms). The interpretation of this extraordinary period has been influenced by a number of factors, some intrinsic to the field (the availability of rich documentary evidence), some extrinsic (the rise and fall of European colonialism); it also has been characterised by paradigm shifts (from decline to vitality to diversities). This course will offer the occasion to test paradigms of "globalization" across many ancient contexts. It will do so by close reading of courses, broader surveys, and constant engagement with historical problems. Its main focus will be on the third and early second centuries BCE ("high Hellenistic period"), with some attention paid to the following century. The historian Polybios (ca. 200 BCE-after 118 BCE) will serve as a guide for both periods, especially his narrative of the year 217 BCE which culminates in the narrative of the battle of Raphia (as well as the arrival of the Roman Republic on the political scene of the Eastern Mediterranean). The course aims to achieve the following goals. First, to impart familiarity with events in a crucial period of ancient history. Second, to impart with the physical, historical, and human geographies of the area covered by the "Hellenistic world"— in the *longue durée*. This means spaces and regions from Spain to Central Asia: ancient Afro-Eurasia. Thirdly, to learn how to read fragmentary or indirect sources, often documentary, and in conjunction with material and visual evidence. Fourthly, to read historical studies by modern scholars, evaluate academic argument (notably in the deployment of evidence but also of theoretical models), and to produce historical argument in exams and paper. Fifthly, to evaluate the history of the Hellenistic age from a number of angles: power and politics; pre-modern economic history; forms of "globalization" and "glocalization"; contacts between cultures under conditions shaped by political power and material forces

**CLCV UN3071 Discussion - Polis: the Biography of the Ancient Greek City-State 650 BCE-350 CE. 0.00 points.**

This course explores the history of the Greek city-state, first as a long narrative story from the obscure leap to stately forms in the Aegean basin during the early seventh century BCE, to the end of municipal forms in the late Roman empire in the fourth century CE. Is there a single polis form that develops and endures during this century? This is the concern of the first half of the course. The second half explores implications of the polis as a social and political organism: as ideas, ideology and institutions; as self-interest; and as a site and a tool of domination. The possible consequences for the politics of living together will be examined throughout the course, which balances between history and political philosophy

**CLCV UN3090 Isiac cults in contexts; Egyptian cults in the Graeco-Roman world. 3.00 points.**

This course looks at the long history of the “Egyptian” cults (cults of Isis, Osiris, Anubis, Sarapis, and Harpocrates) mainly outside of Egypt and in periods much later than the Pharaonic heyday of Ancient Egypt, that is, the Hellenistic and the Roman empire. By looking at and closely reading primary documents in translation, visual evidence, and archaeological remains, we aim to explore critical issues in the study of ancient polytheism, such as sacred space, the role of priests, religious sociology problems, forms of religious, ritual dynamics, construction of emotions religious and the sense of self and community. An issue of particular interest is the relationship between religious ethos and economic life and the relationship with various forms of power. Questions of gender will be central to the problematic. In addition to the seminar, there will be frequent visits to the Met, individually or as a group

Spring 2025: CLCV UN3090

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLCV 3090	001/17315	W 4:10pm - 6:00pm 609 Hamilton Hall	Paraskevi Martzavou	3.00	8/16

**CLCV UN3015 Race and Ethnicity in the Greco-Roman World - Discussion. 0 points.**

This course provides an introduction to ancient attitudes towards race and ethnicity. Students will be challenged to consider how categories of race and ethnicity are presented in the literature and artistic works of Greece and Rome, and how ancient thinking remains current and influential today. We will consider texts from antiquity including epic, history, medical texts, ethnographies, dramas, and novels, as well as material evidence intended to represent ‘foreignness’. Our case studies pay particular attention to concepts including notions of racial formation and racial origins, ancient theories of ethnic superiority, and linguistic, religious and cultural differentiation as a basis for ethnic differentiation. We will also examine ancient racism through the prism of a variety of social processes in antiquity, such as slavery, trade and colonization, migrations, imperialism, assimilation, native revolts, and genocide. By the end of the course, students will have gained a richer understanding of the intellectual and cultural history of

the ancient world, and will be able to engage in discussions of identity construction in a comparative manner.

**CLCV BC3601 Priestess, Queen, Goddess: The Divine Feminine in the Kingdom of Kush. 4.00 points.**

The prominence of powerful goddesses (Hathor, Mut, and Isis), the reverence awarded to the queen mothers of Kush, and a series of sole-ruling queens (one of whom led her army in battle against the invading Romans), highlight the unusually high status of women in this ancient African society and serve as a fitting focus for the study of female power in the ancient world. This course will examine more closely the queens, priestesses, and mothers who formed an essential societal component in ancient Nubia and its complex systems of goddess worship, sacred sexualities, and family lineages, both royal and non-royal. Examining the rich funerary traditions and goods found in royal burials, and temple and tomb imagery, we will explore how ancient Africans of the Nile Valley understood female power and presence to be an essential enlivening element in maintaining Maat, the balance of male and female energies, in order to cultivate “divine right order” in the world and in the cosmos. In this six-week immersive seminar, we’ll examine the history of Kushite queens who served as powerful complements to their husband the king, as the central figure in the coronation ceremonies for their son as he assumed the kingship, and as rulers in their own right during a time when this level of power was unavailable to women anywhere else in the world. After surveying the earlier phases of the ancient African kingdom of Kush: Kerma (2600-1500 BCE) and Napata (900-300 BCE), we will focus on the last phase of the Kingdom of Kush – Meroe (300 BCE – 300 CE) where women truly came into their power

**CLCV GU4190 PHILOSOPHY IN CLASSICAL ROME. 3.00 points.**

**CLCV GU4160 Reading Rome in the Middle Ages and Beyond. 3.00 points.**

This course will examine the ways Rome has been described and imagined from late antiquity through the Middle Ages, when the imperial city was transformed into a Christian capital, renowned for its monuments and its complex historical significance. The city became the goal of pilgrims, visitors, artists and scholars, but also the subject of criticisms and satire, and continued to be so into the modern age. The great German poet Goethe wrote at length in his Italian Journey (1786-1787) about his enchantment with the monuments of “the First City of the world [sic]” (Johann Wolfgang von Goethe, Italian Journey (1786-1788), trans. W. H. Auden and Elizabeth Mayer [1962], p. 115), while at the same time he described the living contemporary city and its inhabitants through stereotypical and ethnic preconceptions. His near-contemporary Edward Gibbon declared that he was inspired to write his great work The Decline and Fall of the Roman Empire as he contrasted the city’s classical ruins and the Christian Church of the Ara Coeli, once a pagan temple: “It was at Rome, on the fifteenth of October, 1764, as I sat musing amidst the ruins of the Capitol, while the barefoot friars were singing vespers in the Temple of Jupiter, that the idea of writing the decline and fall of the

city first started to my mind.” *Memoirs of My Life* (1796). This course is not meant to be a history of post-classical Rome. Rather, we will consider and discuss a selection of interdisciplinary texts, written, visual and material (buildings, artistic works in various forms, including films, and other physical evidence) that present the transformation of old Rome into new Rome, but which also shaped the varied images of Rome in the Middle Ages, and beyond, even in modern times, as illustrated by the films included in the syllabus

**CLCV GU4180 Friendship from Antiquity to the Present. 3.00 points.**

At all times and in all places, human beings have established and cherished friendships, that is, affectionate bonds with individuals to whom they were not linked by blood relationship or erotic love. But what is friendship? This and related questions are asked in some of our earliest literature and remain relevant today. What is a friend? Can I really trust my friend? How many friends can or should a person have? And is it ever necessary to sever a friendship or "unfriend" a person? In this course, we will examine how philosophical writers of Greco-Roman antiquity—notably, Plato, Aristotle, and Cicero—address these issues and how their discourse on friendship resonates through western thought, including in such writers as Aquinas, Montaigne, Bacon, Kant, and Emerson. We will put these theoretical approaches in dialogue with depictions of and reflections on friendship in letters, poetry, novels, plays, children's literature, and film, ranging from the second millennium BCE Epic of Gilgamesh to Elena Ferrante's 2012 bestseller *My Brilliant Friend*. These sometimes complementary and sometimes jarring juxtapositions will lead us to consider friendship both in its historically and culturally conditioned and in its universal aspects, and will, with any luck, inspire a new appreciation of this profoundly human experience

## CLASSICAL LITERATURE

**CLLT UN3125 Book Histories and the Classics. 3 points.**

Prerequisites: HUMA CC1001 or HUMA GS1001COCI CC1101

This seminar will introduce students of classical literature to the history of the Western book, and to the relationship between book history and the transmission and reception history of the literature of ancient Greece and Rome. Students will also learn how to make use of rare books materials including manuscripts and early printed books.....

**CLLT UN3126 Queer Classics: Desire, Embodiment, Backward Glances. 3.00 points.**

While the word 'homosexual' didn't appear in print until 1891, Ancient Greece and Rome were full of queers, people whose sexual behavior, desires, gender, and/or other characteristics were at odds with dominant norms. This course traces ancient queerness across three modules. First, we discuss primary evidence and scholarly attitudes towards homoeroticism and gender variance in antiquity. Second, we explore the reception of ancient homoeroticism at the turn of the 20th century, a period that witnessed an explosion of engagement with ancient

queer icons. Third, we trace the transformations of ancient queer myths and imagery in contemporary popular culture, engaging with film, novels, Zines, and social media. No prerequisites

**CLLT UN3127 Hercules: Hero, Murderer, Philosopher, Buffoon. 3 points.**

Hercules is one of the most ancient, widespread, and enduring figures to emerge from the ancient Mediterranean. He is a figure of multiples: myriad labors, multiple wives, multiple fathers, and multiple identities. Together we will discover a broad range of literature on this hero and-like ancient writers and thinkers—we will use Hercules to explore mortality, divinity, masculinity, madness, and contradiction. We will read Hercules in different ancient genres, with a particular emphasis on Tragedy, Comedy, and Philosophy. The final units of our course will explore contemporary "heros," including the Hulk, "The Rock," and Disney's Hercules.

**CLLT UN3128 THE ARTIST AND THE DICTATOR: ROMAN WRITERS UNDER NERO. 3 points.**

This course aims at highlighting both the most important general features and the most important peculiarities of the literary masterpieces produced in the age of Nero. The basic question we will be addressing in class is what it means to be a literary artist under the rule of a despot. In order to fulfill Nero's megalomaniac need for exaltation, cope with his absolute power and, at the same time, maintain their personal identity and ethical values as writers, Seneca, Petronius and Lucan strove to balance in their works the emperor's expectations and their own artistic designs. These artists were not free to write what they wanted to write for present and future generations, but they tried to write it nevertheless. In this course, we will examine the extent of freedom of expression under Nero; the rhetorical techniques Neronian writers resorted to in order to express tactful modes of oblique commentary and criticism; the difficulties of the individual's liberty in a climate of dictatorial oppression; the ways in which literature helps us discover more about the society of a given time; and, ultimately, the universal and eternal desire for artists to be themselves and express their own views in spite of mortal dangers. Such issues are all the more pertinent in the present day: in 1989, the novelist Salman Rushdie was sentenced to death by the ayatollah Khomeini after the publication of *The Satanic Verses* and fled to the United Kingdom; in 2011, the visual artist Ai Weiwei, whose most recent installation is currently exhibited in New York City, at Washington Square Park, served 81 days in a Chinese prison because of his artwork against dictatorial regimes. He eventually left China and settled in Berlin. No knowledge of Latin is required, as the focus of this course is literary, historical and sociological interpretation rather than linguistic competence.

**CLLT UN3129 An Odyssey of Odysseys: Reception of Homer's Odyssey from Antiquity to the 21st Century. 3.00 points.**

Homer's Odyssey, likely composed around the 9th or 8th century BCE, has had an enduring legacy. Our journey this semester will bring us into contact with a varied selection of artistic endeavors, spanning different cultures, times, and media, that draw on the Odyssey for material or inspiration. A guiding set of broadly-formulated questions will steer our course: Can we find in the Odyssey some of the same meaning, today, that it held for its original audience and that it held, subsequently, for later Greeks? Do receptions of the Odyssey try to recapture it, reframe it, refashion it, or become something independent? (Are these mutually exclusive options?) How do we read these works in light of the Odyssey, and also how do we re-visit and re-read the Odyssey in light of its receptions? It is no secret that the present bears the enduring weight of the past, but is the past changed as a result?

**CLLT UN3132 Classical Myth. 3 points.**

Survey of major myths from the ancient Near East to the advent of Christianity, with emphasis upon the content and treatment of myths in classical authors (Homer, Hesiod, Aeschylus, Euripides, Sophocles, Vergil, Livy, Ovid).

## MODERN GREEK

**GRKM UN1101 ELEMENTARY MODERN GREEK I. 4.00 points.**

This is the first semester of a year-long course designed for students wishing to learn Greek as it is written and spoken in Greece today. As well as learning the skills necessary to read texts of moderate difficulty and converse on a wide range of topics, students explore Modern Greece's cultural landscape from *para* to poetry to politics. Special attention will be paid to Greek New York. How do our, American, Greek-American definitions of language and culture differ from their, Greek ones?

**Fall 2024: GRKM UN1101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GRKM 1101	001/10651	M W 12:10pm - 2:00pm 609 Hamilton Hall	Nikolas Kakkoufa	4.00	13/15

**GRKM UN1102 ELEMENT. MODERN GREEK II. 4.00 points.**

Prerequisites: GRKM UN1101 *GRKM V1101* or the equivalent.

Prerequisites: GRKM UN1101 or the equivalent. Continuation of GRKM UN1101. Introduction to modern Greek language and culture. Emphasis on speaking, writing, basic grammar, syntax, and cross-cultural analysis

**Spring 2025: GRKM UN1102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GRKM 1102	001/14778	M W 12:10pm - 2:00pm 609 Hamilton Hall	Nikolas Kakkoufa	4.00	11/15

**GRKM UN2101 INTERMEDIATE MODERN GREEK I. 4.00 points.**

Prerequisites: GRKM UN1101 and GRKM UN1102 *GRKM V1101-V1102* or the equivalent.

Corequisites: GRKM UN2111

Prerequisites: GRKM UN1101 and GRKM UN1102 or the equivalent. Corequisites: GRKM UN2111 This course is designed for students who are already familiar with the basic grammar and syntax of modern Greek language and can communicate at an elementary level. Using films, newspapers, and popular songs, students engage the finer points of Greek grammar and syntax and enrich their vocabulary. Emphasis is given to writing, whether in the form of film and book reviews or essays on particular topics taken from a selection of second year textbooks

**Fall 2024: GRKM UN2101**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GRKM 2101	001/10652	M W 6:10pm - 8:00pm 406 Hamilton Hall	Chrysanthé Filippardos	4.00	10/15

**GRKM UN2102 INTERMEDIATE MODERN GREEK II. 4.00 points.**

Prerequisites: *GRKM V2101* or the equivalent.

Prerequisites: GRKM UN2101 or the equivalent. Continuation of GRKM UN2101. Students complete their knowledge of the fundamentals of Greek grammar and syntax while continuing to enrich their vocabulary

**Spring 2025: GRKM UN2102**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GRKM 2102	001/14779	M W 6:10pm - 8:00pm 507 Hamilton Hall	Chrysanthé Filippardos	4.00	11/12

**GRKM UN3001 Advanced Modern Greek I. 3 points.**

Prerequisites: *GRKM V2101* or the equivalent.

This semester we will continue to build language skills but with particular attention to speaking and writing Greek at the university level. We will focus on such topics as diaspora, history, politics, and identity. We will use materials from literature, critical essays, historiography, film, and mass media as a way to advance knowledge in Modern Greek literature and culture. In addition we will explore the diversity of Greek language as it is spoken in different regions and gain understanding of its evolution through time. Materials include: essays (Seferis, Theotokas); newspaper articles; television interviews (Flessa and Papanikolaou); advertisement; stand-up-comedy (Lazopoulos); music (art-song, *rebetika*, hip-hop); theatre (Demetriades); literature (Roides, Papadiamantis, Kazantzakis, Lymberaki, Karapanou, Galanaki, Charalambides, Chatzopoulos, Chouliaras).

**GRKM UN3003 GREECE TODAY: LANG, LIT. 3.00 points.**

Prerequisites: GRKM un2102

Prerequisites: GRKM un2102 This course builds on the elements of the language acquired in GRKM1101 through

2102, but new students may place into it, after special arrangement with the instructor. It introduces the students to a number of authentic multimodal materials drawn from a range of sources which include films, literary texts, media, music etc. in order to better understand Greece's current cultural, socio-economic, and political landscape. In doing so, it aims to foster transcultural understanding and intercultural competence, while further developing the four language skills: listening, speaking, reading and writing. Topics of discussion include language, gender equality, youth unemployment, education, queer identities, refugees, and the multilayered aspects of the crisis. Pre-requisite for this class: GRKM 2102 or placement test. Instructor's permission required if the students have not taken GRKM2102 or equivalent

**GRKM UN3935 Hellenism and the Topographical Imagination. 3 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines the way particular spaces—cultural, urban, literary—serve as sites for the production and reproduction of cultural and political imaginaries. It places particular emphasis on the themes of the polis, the city, and the nation-state as well as on spatial representations of and responses to notions of the Hellenic across time. Students will consider a wide range of texts as spaces—complex sites constituted and complicated by a multiplicity of languages—and ask: To what extent is meaning and cultural identity, sitespecific? How central is the classical past in Western imagination? How have great metropolises such as Paris, Istanbul, and New York fashioned themselves in response to the allure of the classical and the advent of modern Greece? How has Greece as a specific site shaped the study of the Cold War, dictatorships, and crisis?

**Fall 2024: GRKM UN3935**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GRKM 3935	001/14271	Th 12:10pm - 2:00pm 613 Hamilton Hall	Dimitris Antoniou	3	14/15

**GRKM UN3996 Readings in Modern Greek. 1 point.**

The course allows students in Topics through Greek Film (GU4135) with an intermediate to advanced level of Greek to supplement their study of that course's theme through materials in Greek. Each week we will be reading short texts (excerpts from novels and essays, blogs, newspaper articles) on a theme discussed that week in GU4135.

**GRKM UN3997 DIRECTED READINGS. 1.00-4.00 points.**

Designed for undergraduates who want to do directed reading in a period or on a topic not covered in the curriculum

**Fall 2024: GRKM UN3997**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
GRKM 3997	001/10654		Nikolas Kakkoufa	1.00-4.00/5

GRKM 3998	001/14780		Nikolas Kakkoufa	1.00-4.00/5	

**GRKM GU4135 Topics Through Greek Film. 4.00 points.**

Optional 1-point bilingual guided reading.

This course explores issues of memory and trauma, public history and testimony, colonialism and biopolitics, neoliberalism and governmentality, and crisis and kinship, all through the medium of Greek film. It brings the Greek cinema canon (Angelopoulos, Cacoyannis, Gavras, Koundouros, et al.) into conversation with the work of contemporary artists, ethnographers, documentary filmmakers, and the recent "weird wave" and asks: what kind of lens does film offer onto the study of a society's history and contemporary predicament? The viewing and discussion of films is facilitated through a consideration of a wide range of materials, including travelogues, criticism, archival footage, and interviews with directors. The course does not assume any background knowledge and all films will have English subtitles. An additional 1-credit bilingual option (meeting once per week at a time TBD) is offered for students who wish to read, view, and discuss materials in Greek

**GRKM GU4460 SUPERVISED INDEPENDENT RESEARCH. 3.00 points.**

All supervisors will be Columbia faculty who hold a PhD. Students are responsible for identifying their own supervisor and it is at the discretion of faculty whether they accept to supervise independent research. Projects must be focused on

Hellenic Studies and can be approached from any disciplinary background. Students are expected to develop their own reading list in consultation with their supervisor. In addition to completing assigned readings, the student must also write a Hellenic studies paper of 20 pages. Projects other than a research paper will be considered on a case-by-case basis. Hellenic Studies is an interdisciplinary field that revolves around two main axes: space and time. Its teaching and research are focused on the study of post-classical Greece in various fields: Language, Literature, History, Politics, Anthropology, Art, Archaeology, and in various periods: Late Antique, Medieval, Byzantine, Modern Greek etc. Therefore, the range of topics that are acceptable as a Hellenic Studies seminar paper is broad. It is upon each supervisor to discuss the specific topic with the student. The work submitted for this independent study course must be different from the work a student submits in other courses, including the Hellenic Studies Senior Research Seminar

**Fall 2024: GRKM GU4460**

**GRKM W4821 The Greek Revolution of 1821. 3.00 points.**

2021 marks the bicentenary of the Greek uprising against the Ottoman Empire—an event that captured European and American popular imagination and led to the founding of the Greek nation. The Greek Revolution became a site for enduring discussion of much larger questions about the international order, democracy, empire, nationalism, collective rights, slavery, monumentality, and the contemporary place of classical Hellas. In this seminar Hellenic Studies faculty and guest speakers take 1821 and its enduring legacies as a vantage point to examine the use of primary sources (including texts, songs, paintings, and films) across different disciplines (history, anthropology, comparative literature, architecture, political science, and queer studies), and reflect on the nature of evidence and how it features in public discourse and

contemporary cultural politics. Lectures by Dimitris Antoniou, Stathis Gourgouris, Nikolas P. Kakkoufa, Paraskevi Martzavou, Mark Mazower, Neni Panourgia, Karen Van Dyck, Konstantina Zanou, and others

## COMPARATIVE LITERATURE-GREEK MODERN

**CLGM UN3005 DICTATORSHIPS#THEIR AFTERLIVES. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

What does the investigation of a dictatorship entail and what are the challenges in such an endeavor? Why (and when) do particular societies turn to an examination of their non-democratic pasts? What does it mean for those who never experienced an authoritarian regime first-hand to remember it through television footage, popular culture, and family stories? This seminar examines dictatorships and the ways in which they are remembered, discussed, examined, and give rise to conflicting narratives in post-dictatorial environments. It takes as its point of departure the Greek military regime of 1967-1974, which is considered in relation to other dictatorships in South America, Asia, Africa, and Europe. We will be drawing on primary materials including Amnesty International reports, film, performance art, and architectural drawings as well as the works of Hannah Arendt and Günter Grass to engage in an interdisciplinary examination of the ways in which military dictatorships live on as ghosts, traumatic memories, urban warfare, litigation, and debates on the politics of comparison and the ethics of contemporary art

**CLGM UN3110 THE OTTOMAN PAST IN THE GREEK PRESENT. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Almost a century after the dissolution of the Ottoman Empire, the Ottoman past lives on in contemporary Greece, often in unexpected sites. In the built environment it appears as mosques, baths, covered markets, and fountains adorned with Arabic inscriptions. It also manifests itself in music, food, and language. Yet Ottoman legacies also shape the European present in less obvious ways and generate vehement debates about identity, nation-building, human rights, and interstate relations. In this course, we will be drawing on history, politics, anthropology, and comparative literature as well as a broad range of primary materials to view the Ottoman past through the lens of the Greek present. What understandings of nation-building emerge as more Ottoman archives became accessible to scholars? How does Islamic Family Law—still in effect in Greece—confront the European legal system? How are Ottoman administrative structures re-assessed in the context of acute socio-economic crisis and migration?

**CLGM UN3650 Mental health in Literature from antiquity to futurity. 3.00 points.**

This seminar explores the relationship between literature, culture, and mental health. It pays particular emphasis to the poetics of emotions structuring them around the five stages of grief: denial, anger, bargaining, depression, acceptance and the concept of hope. During the course of the semester, we will discuss a variety of content that explores issues of race, socioeconomic status, political beliefs, abilities/disabilities, gender expressions, sexualities, and stages of life as they are connected to mental illness and healing. Emotions are anchored in the physical body through the way in which our bodily sensors help us understand the reality that we live in. By feeling backwards and thinking forwards, we will ask a number of important questions relating to literature and mental health, and will trace how human experiences are first made into language, then into science, and finally into action. The course surveys texts from Homer, Ovid, Aeschylus and Sophocles to Virginia Woolf, Sylvia Plath, C.P. Cavafy, Dinos Christianopoulos, Margarita Karapanou, Katerina Anghelaki-Rooke, Katerina Gogou etc., and the work of artists such as Toshio Matsumoto, Yorgos Lanthimos, and Anohni

Fall 2024: CLGM UN3650

**CLGM UN3800 WRITING RESISTANCE. 3.00 points.**

Set within a transnational and transdisciplinary feminist framework, Writing Resistance will unfold and examine the ways traumatic, lived experiences of gender and structural violence, systematic oppression and precarity, incarceration, racism, and colonialism, have been silenced or submerged in canonical writing and official history making. As an antidote, we will attempt a “queering” of this patriarchal and “colonial archive” (Stoler), by shedding light and focusing on diverse forms of writing, autobiographies and biomythographies, poetry and fiction, and theoretical readings that are either produced by or centered on the lived experiences, psyches and bodies, of women, people of color, dissidents and incarcerated people, queer, transgender, and non-binary individuals, refugees and other historically and systematically marginalized voices and identities. Within the context of what has often been approached as “minor literature” (Deleuze and Guattari), the fragmented truths, interrupted stories, and the “descent to the everyday” (Das), will reveal not only traumas, suffering, and alienation, but also what Veena Das approaches as “poisonous knowledge,” where the gendered, queer, racialized, and political body, solidarity, and silence, return as resistance, reclaiming voices, visibility, and authorship

**CLGM UN3920 WORLD RESPONDS TO THE GREEKS. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines various literary, artistic, and cultural traditions that respond to some of the most recognizable Greek motifs in myth, theater, and politics, with the aim of understanding both what these motifs might be offering specifically to these traditions in particular social-historical contexts and, at the same time, what these traditions in turn bring to our conventional understanding of these motifs, how they reconceptualize them and how they alter them. The overall impetus is framed by a prismatic inquiry of how conditions of modernity, postcoloniality, and globality fashion themselves in engagement with certain persistent imaginaries of antiquity

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLGM 3920	003/18272	T 2:10pm - 4:00pm Sat Alfred Lerner Hall	Stathis Gourgouris	3.00	21/22

**CLGM UN3921 The World Responds to the Greeks – Modernity, Postcoloniality, Globality- Discussion. 0 points.**

This course examines various literary, artistic, and cultural traditions that respond to some of the most recognizable Greek motifs in myth, theater, and politics, with the aim of understanding both what these motifs might be offering specifically to these traditions in particular social-historical contexts and, at the same time, what these traditions in turn bring to our conventional understanding of these motifs, how they reconceptualize them and how they alter them. The overall impetus is framed by a prismatic inquiry of how conditions of modernity, postcoloniality, and globality fashion themselves in engagement with certain persistent imaginaries of antiquity.

**CPLS GU4095 Mobility and Enclosure, Statelessness and Democracy. 4.00 points.**

The volume and intensity of human mobility from the Middle East and North Africa to Europe remains dramatically increased nowadays, despite the overall restrictions in mobility imposed by the pandemic conditions worldwide. During the last decade refugee statelessness has evolved into as a quasi-permanent liminal condition of being within the political body of western societies, especially in so called border countries of the European periphery. The continuous expansion and multiplication of camps and hot-spots in countries such as Turkey, Greece, Italy, Spain, etc. has created different states of existence within the national territories, raising a wide range of issues that concern statehood, political rights, the right to equal treatment and access to public goods (i.e., health, education, safety, representation etc.), which concern the core social and political demands of a democratic polity. However, the antinomies and aporias related to refugee statelessness within the nation state are nowadays further aggravated by the pandemic conditions of the last two years. The pandemic has opened up a new space of unprecedented state intervention in the public and private lives of citizens, while reconfiguring the meaning of globalization. Questions of democracy, statehood and statelessness, mobility, access, restriction and enclosure are now re-conditioned under the two-fold historical contingency

of refugee life and citizen life in a pandemic. In this course we address these emerging issues through theoretical, literary, legal, historical texts that highlight how long established social and political problems, imbedded in existing structures since the late 20th century, are currently intrinsically re-conditioned. Our intention is to serve a pedagogy that is alert to how the present time affects the social and intellectual life of people across borders and cultures, while retaining deep historical learning that establishes connections between radical new occurrences (such as the Covid pandemic or the refugee problem in the Mediterranean) and long term hard structural patterns

**CLGM GU4150 C.P. Cavafy and the poetics of desire. 4 points.**

This course takes C. P. Cavafy's oeuvre as a departure point in order to discuss desire and the ways it is tied with a variety of topics. We will employ a number of methodological tools to examine key topics in Cavafy's work such as eros, power, history, and gender. How can we define desire and how is desire staged, thematized, or transmitted through poetry? How does a gay poet write about desired bodies at the beginning of the previous century? What is Cavafy's contribution to the formation of gay identities in the twentieth century? How do we understand the poet's desire for an *archive*? How important is the city for activating desire? How do we trace a poet's afterlife and how does the desire poetry transmits to readers transform through time? How does literature of the past address present concerns? These are some of the questions that we will examine during this course.

**CLGM GU4300 Retranslation: Worlding C. P. Cavafy. 4.00 points.**

Focusing on a canonical author is an immensely productive way to explore translation research and practice. The works of Sappho, Dante, Rilke, Césaire or Cavafy raise the question of reception in relation to many different critical approaches and illustrate many different strategies of translation and adaptation. The very issue of intertextuality that challenged the validity of author-centered courses after Roland Barthes's proclamation of the death of the author reinstates it if we are willing to engage the oeuvre as an on-going interpretive project. By examining the poetry of the Greek Diaspora poet C. P. Cavafy in all its permutations (as criticism, translation, adaptation), the Cavafy case becomes an experimental ground for thinking about how a canonical author can open up our theories and practices of translation. For the final project students will choose a work by an author with a considerable body of critical work and translations and, following the example of Cavafy and his translators, come up with their own retranslations. Among the materials considered are commentary by E. M. Forster, C. M. Bowra, and Roman Jakobson, translations by Edmund Keeley and Philip Sherrard, James Merrill, Marguerite Yourcenar, and Daniel Mendelsohn, poems by W.H. Auden, Lawrence Durrell, and Joseph Brodsky, and visual art by David Hockney, and Duane Michals

**Fall 2024: CLGM GU4300**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CLGM W3450 How to do things with Queer Bodies. 3.00 points.**

Homosexuality, as a term, might be a relatively recent invention in Western culture (1891) but bodies that acted and appeared queer(ly) existed long before that. This course will focus on acts, and not identities, in tracing the evolution of writing the queer body from antiquity until today. In doing so it will explore a number of multimodal materials – texts, vases, sculptures, paintings, photographs, movies etc. – in an effort to understand the evolution of the ways in which language (written, spoken or visual) registers these bodies in literature and culture. When we bring the dimension of the body into the way we view the past, we find that new questions and new ways of approaching old questions emerge. What did the ancient actually write about the male/female/trans\* (homo)sexual body? Did they actually create gender non-binary statues? Can we find biographies of the lives of saints in drag in Byzantium? How did the Victorians change the way in which we read Antiquity? How is the queer body registered in Contemporary Literature and Culture? Can one write the history of homosexuality as a history of bodies? How are queer bodies constructed and erased by scholars? How can we disturb national archives by globalizing the queer canon of bodies through translation? These are some of the questions that we will examine during the semester. The course surveys texts from Homer, Sappho, Aeschylus, Euripides, Plato, Theocritus, Ovid, Dio Chrysostom, Lucian, Walt Whitman, Oscar Wilde, Arthur Symonds, Dinos Christianopoulos, Audre Lorde, Larry Kramer, Tony Kushner etc., the work of artists such as Yiannis Tsarouchis, Robert Mapplethorpe, Dimitris Papaioannou, Cassils, movies such as 120 battements par minute, and popular TV shows such as Pose

**CLGM GU4450 How to do things with Homosexual Bodies. 4.00 points.**

Homosexuality, as a term, might be a relatively recent invention in Western culture but bodies that acted and appeared 'differently' existed long before that. This course will focus on acts, and not identities, in tracing the evolution of writing the homosexual body from antiquity until today. In doing so it will explore a number of multimodal materials – texts, vases, sculptures, paintings, movies etc. – in an effort to understand the evolution of the ways in which language (written, spoken or visual) registers the homosexual body in literature and culture. When we bring the dimension of the body into the way we view the past, we find that new questions and new ways of approaching old questions emerge. What did the ancient actually write about the homosexual body? Did they actually create gender non-binary statues? Can we find biographies of the lives of saints in drag in Byzantium? How did the Victorians change the way in which we understand homosexual

writing in Antiquity? How is the queer body registered in Modern Greek Literature and Culture? Can one write the history of homosexuality as a history of bodies? These are some of the questions that we will examine during the semester

**CLGM GU4600 Multilingual America: Translation, Migration, Gender. 4.00 points.**

This course introduces students to the rich tradition of literature about and by Greeks in America over the past two centuries exploring questions of multilingualism, translation, migration and gender with particular attention to the look and sound of different alphabets and foreign accents – “It’s all Greek to me!” To what extent can migration be understood as translation and vice versa? How might debates in Diaspora and Translation Studies inform each other and how might both, in turn, elucidate the writing of and about Greeks and other ethnic minorities, especially women? Authors include Olga Broumas, Elia Kazan, Alexandros Papadiamantis, Irini Spanidou, Ellery Queen, Eleni Sikelianos and Thanasis Valtinos as well as performance artists such as Diamanda Galas. Theoretical and comparative texts include works by Walter Benjamin, Rey Chow, Jacques Derrida, Xiaolu Guo, Eva Hoffman, Franz Kafka, Toni Morrison, Vicente Rafael, and Lawrence Venuti, as well as films such as *The Immigrant* and *The Wizard of Oz*. No knowledge of Greek is necessary, although an extra-credit directed reading is open to those wishing to read texts in Greek

Spring 2025: CLGM GU4600

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLGM 4600	001/14766	M 12:10pm - 2:00pm 613 Hamilton Hall	Karen Van Dyck	4.00	12/15

**CLGM UN3700 Politics of Violence: Conflict, Borders, and the Carceral State. 3.00 points.**

Politics of Violence offers an analysis of the role of the state, its mechanisms, and its structures in perpetuating, legitimizing, and facilitating political, racial and gender based violence worldwide. We will explore the connections and effects of nationalism, militarism, and heteropatriarchy (as structural and ideological elements of the state) as well as neoliberal assaults and practices in the normalization of violence against dissidents, incarcerated populations, refugees, workers, and indigenous communities. We will engage in a theoretical discussion on the salience of particular ideational and material experiences of race, ethnicity, indigeneity, gender and queer identities, political affiliation, in rendering state sponsored, political violence, and torture thinkable. The course aims to shed light on the power structures within militaristic and hypermasculinized state frameworks, and on biopolitical practices that legitimize structural violence against particular communities based on their political, class, gender, ethnic identities or precarious immigration status. In this seminar, we will examine violence, persecution, and dispossession as inherent phenomena of the sovereign nation state, in their continuities and ruptures, during war and conflict, but also in migratory, democratic, and transitional contexts. Students will examine historical and contemporary cases of state sponsored

and political violence, systematic violations of human rights in the context of genocide, gendercide, racist violence, colonial terrorism, carceral regimes, and the securitization of forced migration. Lectures and readings provide a comparative, transnational perspective but focus on regional case studies, through a transdisciplinary lens, drawing on international relations, anthropology, gender studies, political theory, and history

**CLGM UN3937 THE CULTURE OF DEMOCRACY. 3.00 points.**

The point is to examine democracy not as a political system, but as a historical phenomenon characterized by a specific culture: a body of ideas and values, stories and myths. This culture is not homogenous; it has a variety of historical manifestations through the ages but remains nonetheless cohesive. The objective is twofold: 1) to determine which elements in democratic culture remain fundamental, no matter what form they take in various historical instances; 2) to understand that the culture of democracy is indeed not abstract and transcendental but historical, with its central impetus being the interrogation and transformation of society. Special emphasis will be placed on the crisis of democratic institutions in the era of globalization and, as specific case-study in point, the democratic failure in the Mediterranean region in light of the challenges of the assembly movements (Spain, Greece, Arab Spring) and the current migrant/refugee crisis

## CLASSICS-GREEK MODERN

**CSGM UN3567 THESSALONIKI DOWN THE AGES. 3.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course will explore the fascinatingly layered and multicultural history of Thessaloniki, the great city of Northern Greece and the Balkans. We will examine texts, archaeological evidence, literature, songs, and movies and in general the materialities of the city. We will examine this material from the 6th century BCE down to the 21st cent. CE. We will notably think about the problems of history, identity, and cultural interaction in reaction to recent work such as Mark Mazower’s well know *Salonica, City of Ghosts* [2004]

Fall 2024: CSGM UN3567

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSGM 3567	001/10650	W 4:10pm - 6:00pm 613 Hamilton Hall	Paraskevi Martzavou	3.00	17/18

## HISTORY-CLASSICS

**HSCL UN3000 The Persian Empire . 4 points.**

This seminar studies the ancient Persian (Achaemenid) Empire which ruled the entire Middle East from the late 6<sup>th</sup> to the late 4<sup>th</sup> centuries BCE and was the first multi-ethnic empire in western Asian and Mediterranean history. We will investigate the empire using diverse sources, both textual and material, from the various constituent parts of the empire and study the different ways in which it interacted with its subject

populations. This course is a seminar and students will be asked to submit a research paper at the end of the semester. Moreover, in each class meeting one student will present part of the readings.

**Grading:** participation (25%), class presentation (25%), paper (50%).

## COMPARATIVE LITERATURE-ENGLISH

**CLEN UN3720 Plato the Rhetorician. 4 points.**

Prerequisites: Instructor's permission

(Seminar). Although Socrates takes a notoriously dim view of persuasion and the art that produces it, the Platonic dialogues featuring him both theorize and practice a range of rhetorical strategies that become the nuts and bolts of persuasive argumentation. This seminar will read a number of these dialogues, including *Apology*, *Protagoras*, *Ion*, *Gorgias*, *Phaedrus*, *Menexenus* and *Republic*, followed by Aristotle's *Rhetoric*, the rhetorical manual of Plato's student that provides our earliest full treatment of the art. Application instructions: E-mail Prof. Eden (khe1@columbia.edu) with your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available.

## COGNITIVE SCIENCE

**Adviser for Columbia College and School of General Studies students:**

**Phone Number:** 212-854-4689

**Department Email Address:** [cogsci@barnard.edu](mailto:cogsci@barnard.edu)

Cognitive Science is the cross-disciplinary study of how the mind works, with a focus on perception, reasoning, memory, attention, language, decision-making, motor control, and problem solving. Cognitive scientists often compare minds to computers. In particular, they describe mental processes as computational operations on internal representations. For instance, perception is seen as a representation of the external world that results from sensory stimulation; learning is analyzed as the addition of new representations through interactions with the environment; reasoning is treated as the addition of new representations through operations on existing representations.

Cognitive Science is an interdisciplinary field: it draws on tools and ideas from psychology, neuroscience, linguistics, economics, computer science, and philosophy, with affiliated faculty in each of these disciplines. Psychologists study the computational operations that we use to solve specific tasks; neuroscientists study the implementation of those operations in the brain; linguists study the representations involved in communication; economists study the representations involved in decisions involving uncertainty and reward; computer scientists consider how the processes involved in human cognition fit into a more general theory of computations and a larger space of tasks; and philosophers ask fundamental questions about the nature of representation and computation.

## STUDENT LEARNING OUTCOMES

Cognitive Science majors will gain fluency in computational methods; a capacity for rigorous and careful thought; a broad understanding of the affiliated disciplines; and a deep understanding of cognition.

**Barnard Director:** Professor Ann Senghas

**Columbia Director:** Professor Brendan Fleig-Goldstein

Cognitive science is the cross-disciplinary study of how the mind works, with a focus on perception, reasoning, memory, attention, language, decision-making, motor control, and problem solving. It draws on tools and ideas from psychology, neuroscience, linguistics, economics, computer science, and philosophy. The major requirements are designed to provide breadth in the affiliated disciplines and depth in the student's chosen area of specialization.

A major in Cognitive Science consists of seven required courses and four electives in a chosen area of specialization culminating in the senior capstone. The minimum number of courses is 13 and the minimum number of points is 39.

## MAJOR REQUIREMENTS:

### 1. Required courses (7 classes)

- COGS UN1001 Introduction to Cognitive Science  
Introduction to Cognitive Science
- One cognition-focused course in each of four areas: psychology, neuroscience, philosophy, and linguistics. *Courses must be chosen from the approved list in each area; please see the approved lists below.*
- Two courses in a fifth area: mathematical and computational methods. *Courses must be chosen from the approved list and not be redundant; please see the approved lists below.*

### 2. Area of Specialization and Electives (four classes)

Students must choose an area of specialization and four electives to build expertise in that area.

- Sample specializations: aesthetics, cognitive development, cognitive linguistics, cognitive neuroscience, cognitive psychology, consciousness, decision science, human-computer interaction, intelligence, learning, memory, natural language processing, neuroeconomics, perception, and social cognition. Please see below for lists of possible electives for these specializations.
- The choice of specialization is flexible; the sample specializations are just examples. This is an opportunity for students to be creative; a student who has ideas about a new specialization that they would like to pursue may do so with the approval of the program director.

- There must be at least one faculty member affiliated with the program who has expertise in the student's chosen area so that they can ensure that the student's electives will provide sufficient preparation for the senior project.

### 3. Senior Capstone

Students may fulfill the Senior Capstone requirement in two ways: with a year-long senior project, or by taking two additional advanced courses.

- The senior project is a year-long project in a student's area of specialization under the supervision of a chosen advisor. The project could be an experiment or a paper. Please note that a student who wishes to do a senior project is responsible for finding an advisor for the project, though the program director may be able to suggest faculty members whom the student might contact.
  - Students who do senior projects must register for both COGS UN3903 Senior Project (3 points) and COGS UN3901 Senior Project Seminar (1 point) in the fall and COGS UN3904 Senior Project (3 points) and COGS UN3902 Senior Project Seminar (1 point) in the spring (8 points total).
  - The Senior Project Seminar is an opportunity for students to present their projects to each other.
- While a year-long project is recommended, students may also satisfy the senior capstone requirement by taking two advanced courses, at least one of which must include a significant paper or project. The courses must be chosen in consultation with the program director and must be related to the student's area of specialization. Both courses should be at the 3000-level or above.

**The area of specialization, electives, and capstone must form a coherent course of study and must be approved by the program director.**

Please note:

- Courses taken pass/fail may not count towards Cognitive Science major requirements.
- While some courses listed under the sample specializations are also on the lists of courses approved to count for area requirements, no course may be double counted: if a student is counting a course for an area requirement, then that course may not be counted as an elective.

## COURSES APPROVED TO COUNT IN EACH AREA:

### Psychology

PSYC BC2107	PSYCHOLOGY OF LEARNING - LEC
PSYC BC2110	PERCEPTION-LECTURE

PSYC BC2115	COGNITIVE PSYCHOLOGY - LEC
PSYC BC2129	DEVELOPMENTAL PSYCHOLOGY-LEC
PSYC UN2210	COGNITION: BASIC PROCESSES
PSYC UN2220	COGNITION: MEMORY AND STRESS
PSYC UN2270	Perception and Cognition in Social Life
PSYC UN2280	Developmental Psychology
PSYC UN2430	COGNITIVE NEUROSCIENCE
PSYC BC3394	METACOGNITION

*Please note that PSYC UN2430 Cognitive Neuroscience may be used to fulfill either the Neuroscience requirement or the Psychology requirement, but not both.*

## Neuroscience

NSBV BC1001	INTRODUCTION TO NEUROSCIENCE
NSBV BC2008	ADAPTIVE OR ARRESTED DEVELOPMENT OF THE ADOLESCENT BRAIN
PSYC UN2430	COGNITIVE NEUROSCIENCE
PSYC UN2435	Social Neuroscience
PSYC UN2450	BEHAVIORAL NEUROSCIENCE
PSYC UN2481	Developmental Cognitive Neuroscience
NSBV BC3381	Visual Neuroscience: From the Eyeball to the Mind's Eye

*Please note that PSYC UN2430 Cognitive Neuroscience may be used to fulfill either the Neuroscience requirement or the Psychology requirement, but not both.*

## Philosophy

PHIL UN2655	COGNITIVE SCIENCE AND PHILOSOPHY
PHIL UN3252	Philosophy of Language and Mind
PHIL UN3651	PHILOSOPHY OF MIND
PHIL UN3655	TOPICS IN COGNITIVE SCIENCE AND PHILOSOPHY
COGS UN3952	Philosophy of Computing

*Please note that only the "Perception" section of PHIL UN3912 counts.*

## Linguistics

LING UN3101	INTRODUCTION TO LINGUISTICS
-------------	-----------------------------

## Mathematical and Computational Methods

Logic and Decision Theory:

ECON GU4850	COGNITIVE MECH # ECON BEHAVIOR
PHIL UN1401	INTRODUCTION TO LOGIC
PHIL UN3411	SYMBOLIC LOGIC
PHIL GU4561	PROBABILITY # DECISION THEORY
PSYC UN2235	THINKING AND DECISION MAKING

Statistics:

ECON BC1007	MATH METHODS FOR ECONOMICS
ECON BC2411	STATISTICS FOR ECONOMICS
PSYC BC1101	STATISTICS LECTURE AND RECITATION
PSYC UN1610	STATISTICS-BEHAVIORAL SCIENTISTS
STAT UN1001	INTRO TO STATISTICAL REASONING
STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS

Computer Science:

COMS BC1016	Introduction to Computational Thinking and Data Science
COMS W1001	Introduction to Information Science
COMS W1002	COMPUTING IN CONTEXT
COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1007	
COMS W3134	Data Structures in Java
COMS W3136	ESSENTIAL DATA STRUCTURES
COMS W3137	HONORS DATA STRUCTURES # ALGOL
ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI
STEM BC2223	PROGRAMMING BEHAV SCIENCES

## SAMPLE SPECIALIZATIONS

*Please note that while a few of the courses listed below are on the lists of courses approved to count for area requirements, no course may be double counted: if a student uses a course to fulfill an area requirement then that course may not be counted as an elective.*

### Aesthetics

4 of the following:

MUSI UN2320	Introduction to Music Cognition
SOAR AV4000	SOUND:Music, Math, and Mind
PHIL GU4055	
PSYC GU4239	COG NEURO NARRATIVE FILM
MUSI GU4325	Topics in Music Cognition
CLEN GU4728	Literature in the Age of AI

### Cognitive Development

4 of the following:

PSYC BC2115	COGNITIVE PSYCHOLOGY - LEC
PSYC BC2129	DEVELOPMENTAL PSYCHOLOGY-LEC
PSYC UN2481	Developmental Cognitive Neuroscience
PSYC BC3369	LANGUAGE DEVELOPMENT
PSYC GU4202	Theories of Change in Human Development
PSYC GU4222	The Cognitive Neuroscience of Aging (Seminar)
PSYC GU4498	BEHAVIORAL EPIGENETICS

### Cognitive Linguistics

4 of the following:

ANTH UN1009	INTRO TO LANGUAGE # CULTURE
PSYC BC3164	PERCEPTION AND LANGUAGE
PHIL UN3252	Philosophy of Language and Mind
PSYC BC3369	LANGUAGE DEVELOPMENT
LING GU4202	COGNITIVE LINGUISTICS
LING GU4206	ADV GRAMMAR AND GRAMMARS
PSYC GU4244	LANGUAGE AND MIND
LING GU4376	PHONETICS # PHONOLOGY

### Cognitive Neuroscience

4 of the following:

PSYC UN2481	Developmental Cognitive Neuroscience
NSBV BC3405	NEUROSCIENCE OF TRAUMA
PSYC GU4225	CONSCIOUSNESS # ATTENTION
PSYC GU4239	COG NEURO NARRATIVE FILM
PSYC GU4415	METHODS/ISSU-COGNITIV NEU
PSYC GU4498	BEHAVIORAL EPIGENETICS

### Cognitive Psychology

4 of the following:

PSYC BC2115	COGNITIVE PSYCHOLOGY - LEC
PSYC BC2129	DEVELOPMENTAL PSYCHOLOGY-LEC
PSYC UN2220	COGNITION: MEMORY AND STRESS
PSYC BC3164	PERCEPTION AND LANGUAGE
PSYC BC3394	METACOGNITION
PSYC GU4225	CONSCIOUSNESS # ATTENTION
PSYC GU4672	MORAL PSYCHOLOGY

### Consciousness

4 of the following:

PSYC UN2210	COGNITION: BASIC PROCESSES
PHIL UN3651	PHILOSOPHY OF MIND
PSYC GU4225	CONSCIOUSNESS # ATTENTION
PSYC GU4244	LANGUAGE AND MIND

### Decision Science

4 of the following:

PSYC BC2178	FORENSIC PSYCHOLOGY
PSYC UN2235	THINKING AND DECISION MAKING
PSYC UN2620	ABNORMAL BEHAVIOR

PSYC GU4202	Theories of Change in Human Development
PSYC GU4241	Mentalizing: How we read people
PSYC GU4430	Learning and the Brain (Seminar)
COGS GU4800	Resource-Constrained Decision Making

## Human-Computer Interaction

4 of the following:

PSYC UN3270	COMPUT APPROACHES-HUMAN VISION
PSYC BC3399	HUMAN AND MACHINES
COMS W4170	USER INTERFACE DESIGN
IEME E4200	HUMAN-CENTERED DESIGN AND INNOVATION
PSYC GU4236	Machine Intelligence
COMS E6178	Human-Computer Interaction

## Intelligence

4 of the following:

PSYC GU4236	Machine Intelligence
COMS W4701	ARTIFICIAL INTELLIGENCE
COMS W4705	NATURAL LANGUAGE PROCESSING
COMS W4771	MACHINE LEARNING
PSYC GR6080	Introduction to Neural Networks and Deep Learning

## Learning

4 of the following:

PSYC BC2107	PSYCHOLOGY OF LEARNING - LEC
COMS W4705	NATURAL LANGUAGE PROCESSING
COMS W4771	MACHINE LEARNING
PSYC GR6080	Introduction to Neural Networks and Deep Learning

## Memory

4 of the following:

PSYC BC2107	PSYCHOLOGY OF LEARNING - LEC
PSYC UN2220	COGNITION: MEMORY AND STRESS

PSYC UN3445	THE BRAIN AND MEMORY
PSYC UN3455	Neurobiology of Working Memory

## Natural Language Processing

4 of the following:

LING UN3103	Language, Brain and Mind
PHIL UN3252	Philosophy of Language and Mind
PSYC GU4236	Machine Intelligence
PSYC GU4242	Evolution of Language (seminar)
COMS W4705	NATURAL LANGUAGE PROCESSING

## Neuroeconomics

1. Either:

ECON BC3035	INTERMEDIATE MICROECONOMICS
-------------	-----------------------------

Or:

ECON UN3211	INTERMEDIATE MICROECONOMICS
-------------	-----------------------------

2. Either:

ECON GU4020	ECON OF UNCERTAINTY # INFORMTN
-------------	--------------------------------

Or:

ECON GU4415	GAME THEORY
-------------	-------------

3. Two from the following list:

PSYC UN2235	THINKING AND DECISION MAKING
ECON BC3048	Introduction to Behavioral Economics
PSYC GU4287	DECISION ARCHITECTURE
ECON GU4840	BEHAVIORAL ECONOMICS
ECON GU4860	BEHAVIORAL FINANCE (4.)
ECON GU4850	COGNITIVE MECH # ECON BEHAVIOR

4.

PSYC GU4289	THE GAMES PEOPLE PLAY:PSYCH OF STRAT DEC
-------------	--

## Perception

4 of the following:

PSYC BC2110	PERCEPTION-LECTURE
PSYC BC3164	PERCEPTION AND LANGUAGE
NSBV BC3381	Visual Neuroscience: From the Eyeball to the Mind's Eye

NSBV BC3389	Hallucinations, illusions, dreaming and imagination
PSYC GU4225	CONSCIOUSNESS # ATTENTION
PSYC GU4280	CORE KNOWLEDGE

## Social Cognition

4 of the following:

ANTH UN2004	INTRO TO SOC # CULTURAL THEORY
PSYC UN2435	Social Neuroscience
PSYC UN2630	SOCIAL PSYCHOLOGY
PSYC UN2640	INTRO TO SOCIAL COGNITION

## REQUIRED COURSES

### Required for all Cognitive Science majors:

#### COGS UN1001 Introduction to Cognitive Science. 3 points.

##### Fall 2024: COGS UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COGS 1001	001/00017	M W 2:40pm - 3:55pm 304 Barnard Hall	Christopher Baldassano, John Morrison	3	187/260

##### Spring 2025: COGS UN1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COGS 1001	001/00156	T Th 11:40am - 12:55pm 304 Barnard Hall	Brendan Fleig-Goldstein, Randy Gallistel	3	101/242

### Required for Cognitive Science majors doing senior projects:

#### COGS UN3901 Senior Project Seminar. 1.00 point.

Discussion of senior research projects during the fall and spring terms that culminate in written and oral senior theses. Each project must be supervised by a cognitive scientist working at Barnard or Columbia

##### Fall 2024: COGS UN3901

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COGS 3901	001/00225	W 4:10pm - 6:00pm 111 Milstein Center	John Morrison	1.00	15/20

#### COGS UN3902 Senior Project Seminar. 1.00 point.

Discussion of senior research projects during the fall and spring terms that culminate in written and oral senior theses. Each project must be supervised by a cognitive scientist working at Barnard or Columbia

#### Spring 2025: COGS UN3902

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COGS 3902	001/00157	M 4:10pm - 6:00pm 111 Milstein Center	John Morrison	1.00	15/15

#### COGS UN3903 Senior Project. 3.00 points.

##### Senior Project in Cognitive Science

##### Fall 2024: COGS UN3903

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COGS 3903	001/00906		John Morrison	3.00	1/1
COGS 3903	002/00907		Ann Senghas	3.00	0/1
COGS 3903	003/20985		Brendan Fleig-Goldstein	3.00	0/1
COGS 3903	004/00908		BJ Casey	3.00	0/1
COGS 3903	005/00909		Luca Iemi	3.00	1/2
COGS 3903	006/20986		Christopher Baldassano	3.00	3/3
COGS 3903	007/20987		Vickie Morwitz	3.00	1/1
COGS 3903	008/21310		John Wilcox	3.00	1/1
COGS 3903	009/00928		Karen Lewis	3.00	0/1
COGS 3903	010/21311		Nora Isacoff	3.00	1/1
COGS 3903	011/21313		Lydia Chilton	3.00	1/1
COGS 3903	012/21426		Janet Metcalfe	3.00	1/1
COGS 3903	013/21430		Trenton Jerde	3.00	1/1
COGS 3903	014/21448		Kristen Lane	3.00	1/1
COGS 3903	015/21460		Kimberly Noble	3.00	1/1
COGS 3903	016/21488		Brian Smith	3.00	1/1

#### COGS UN3904 Senior Project. 3.00 points.

##### Senior Project in Cognitive Science

##### Spring 2025: COGS UN3904

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COGS 3904	001/00866		John Morrison	3.00	1/1
COGS 3904	002/00867		Ann Senghas	3.00	0/1
COGS 3904	003/16856		Brendan Fleig-Goldstein	3.00	0/1
COGS 3904	004/00868		BJ Casey	3.00	0/1
COGS 3904	005/00869		Luca Iemi	3.00	1/1
COGS 3904	006/16857		Christopher Baldassano	3.00	3/3

COGS 3904	007/16858	Vickie Morwitz	3.00	1/1

## Psychology:

### PSYC BC2107 PSYCHOLOGY OF LEARNING - LEC. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering the basic methods, results, and theory in the study of how experience affects behavior. The roles of early exposure, habitation, sensitization, conditioning, imitation, and memory in the acquisition and performance of behavior are studied. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1440 Experimental: Learning and Motivation

#### Fall 2024: PSYC BC2107

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2107	001/00069	T Th 10:10am - 11:25am 304 Barnard Hall	Ken Light	3.00	86/100

### PSYC BC2110 PERCEPTION-LECTURE. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering an introduction to problems, methods, and research in perception. Discussion of psychological studies of seeing, hearing, touching, tasting, and smelling. Note that this lecture can be taken without its affiliated lab, PSYC BC2109, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1480 Perception and Attention; and PSYC UN2230 Perception and Sensory Processes

#### Fall 2024: PSYC BC2110

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2110	001/00070	M W 10:10am - 11:25am 323 Milbank Hall	Robert Remez	3.00	58/55

### PSYC BC2115 COGNITIVE PSYCHOLOGY - LEC. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture covering selected topics illustrating the methods, findings, and theories of contemporary cognitive psychology. Topics include attention, memory, categorization, perception, and decision making. Special topics include neuropsychology and cognitive neuroscience. Note that this lecture can be taken without its affiliated lab, PSYC BC2114, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University courses are considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN2220 Cognition: Memory and Stress; and PSYC UN2210 Cognition: Basic Processes

#### Spring 2025: PSYC BC2115

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2115	001/00330	M W 10:10am - 11:25am 408 Zankel	Lisa Son	3.00	86/100

### PSYC BC2129 DEVELOPMENTAL PSYCHOLOGY-LEC. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering cognitive, linguistic, perceptual, motor, social, affective, and personality development from infancy to adolescence. Note that this lecture can be taken without its affiliated lab, PSYC BC2128, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN2280 Introduction to Developmental Psychology

#### Fall 2024: PSYC BC2129

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2129	001/00072	M W 2:40pm - 3:55pm 405 Milbank Hall	Koleen McCrink	3.00	95/100

#### Spring 2025: PSYC BC2129

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2129	001/00571	T Th 10:10am - 11:25am L1002 Milstein Center	Ann Senghas	3.00	68/98

**PSYC UN2210 COGNITION: BASIC PROCESSES. 3.00 points.****Spring 2025: PSYC UN2210**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2210	001/11824	M W 1:10pm - 2:25pm 209 Havemeyer Hall	Nora Isacoff	3.00	68/65

**PSYC UN2220 COGNITION: MEMORY AND STRESS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Attendance at the first class is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructors permission. Memory, attention, and stress in human cognition

**Fall 2024: PSYC UN2220**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2220	001/10668	M W 1:10pm - 2:25pm 602 Hamilton Hall	Janet Metcalfe	3.00	49/75

**PSYC UN2270 Perception and Cognition in Social Life. 3.00 points.**

This course focuses on perception and cognition in social life. We start by addressing the core social motivations we experience in everyday life (e.g., our desire to feel like we belong to a group). Next, we examine how these motivations shape our basic sensory experiences—for example why we can't help but anthropomorphize inanimate objects or enjoy holding hands with our partner. We then examine the mental strategies we use to meet our social needs, such as how we figure out other people's thoughts and feelings, as well as our own. Finally, we wrap up by examining how these motivations, perceptions, and cognitions play out not just within one mind – but also between minds in everyday social interaction. This course will not only teach you the fundamental science behind the social mind. It will also let you see your own social life through a whole new lens

**Spring 2025: PSYC UN2270**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2270	001/12981	M W 2:40pm - 3:55pm 330 Uris Hall	Meghan Meyer	3.00	55/60

**PSYC UN2280 Developmental Psychology. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Enrollment may be limited. Attendance at the first two classes is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the equivalent.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the equivalent. Introduction to the scientific study of human

development, with an emphasis on psychobiological processes underlying perceptual, cognitive, and emotional development

**Fall 2024: PSYC UN2280**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2280	001/10695	T Th 4:10pm - 5:25pm 501 Schermerhorn Hall	Nim Tottenham	3.00	135/150

**PSYC UN2430 COGNITIVE NEUROSCIENCE. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology This course provides an in-depth survey of data and models of a wide variety of human cognitive functions. Drawing on behavioral, neuropsychological, and neuroimaging research, the course explores the neural mechanisms underlying complex cognitive processes, such as perception, memory, and decision making. Importantly, the course examines the logic and assumptions that permit us to interpret brain activity in psychological terms

**Fall 2024: PSYC UN2430**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2430	001/10671	M W 2:40pm - 3:55pm 501 Schermerhorn Hall	Alfredo Spagna	3.00	104/130

**Spring 2025: PSYC UN2430**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2430	001/13711	T Th 1:10pm - 2:25pm 614 Schermerhorn Hall	Lila Davachi	3.00	97/120

**PSYC BC3394 METACOGNITION. 4.00 points.**

Prerequisites: BC1001, and one psychology laboratory course; final enrollment determined on the first day of class Metacognition is one of the latest psychological buzzwords, but what exactly is metacognition? Metacognition enables us to be successful learners, problem solvers, and decision makers, and as often been used synonymously with words such as language, awareness, and consciousness. In this seminar, we will examine various components of metacognition, including its role in learning and memory, and its existence in various non-human populations. In addition, we will explore the fragility of metacognition, including illusions of confidence and harmful control strategies that people use. Readings will include classic and important recent papers in the field, looking at metacognition as a higher-level cognitive process, and as knowledge individuals use to guide behavior

**Fall 2024: PSYC BC3394**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

*Please note that PSYC UN2430 Cognitive Neuroscience may be used to fulfill either the Neuroscience requirement or the Psychology requirement, but not both.*

## Neuroscience

### NSBV BC1001 INTRODUCTION TO NEUROSCIENCE. 3.00 points.

This course is required for all the other courses offered in Neuroscience and Behavior. The course introduces students to the anatomy and physiology of the nervous system. The topics include the biological structure of the nervous system and its different cell types, the basis of the action potential, principles of neurotransmission, neuronal basis of behavior, sleep/wake cycles, and basic aspects of clinical neuroscience

#### Fall 2024: NSBV BC1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
NSBV 1001	001/00057	T Th 8:40am - 9:55am 304 Barnard Hall	BJ Casey	3.00	140/200

#### Spring 2025: NSBV BC1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
NSBV 1001	001/00036	T Th 8:40am - 9:55am 304 Barnard Hall	BJ Casey	3.00	141/180

### NSBV BC2008 ADAPTIVE OR ARRESTED DEVELOPMENT OF THE ADOLESCENT BRAIN. 3.00 points.

The teen brain has received a lot of media coverage with advances in brain imaging techniques that provide a voyeuristic opportunity for us to look under the hood of the behaving adolescent brain. This course will cover empirical and theoretical accounts of adolescent-specific changes in brain and behavior that relate to the development of self control. These accounts of adolescent brain and behavior will then be discussed in the context of relevant legal, social and health policy issues. Lectures and discussion will address: Under what circumstances self control appears to be diminished in adolescents. How do dynamic changes in neural circuitry help to explain changes in self control across development? When does the capacity for self control fully mature? Are these changes observed in other species? How might these changes be evolutionarily adaptive and when are they maladaptive? How might understanding adolescent brain and behavioral development inform interventions and treatments for maladaptive behavior or inform policy for changing the environment to protect youth?

### PSYC UN2430 COGNITIVE NEUROSCIENCE. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology This course provides an in-depth survey of data and models of a wide variety of human cognitive functions. Drawing on behavioral, neuropsychological, and neuroimaging research, the course explores the neural mechanisms underlying complex cognitive processes, such as perception, memory, and decision making. Importantly, the course examines the logic and assumptions that permit us to interpret brain activity in psychological terms

#### Fall 2024: PSYC UN2430

### PSYC UN2435 Social Neuroscience. 3.00 points.

This course will provide a broad overview of the field of social neuroscience. We will consider how social processes are implemented at the neural level, but also how neural mechanisms help give rise to social phenomena and cultural experiences. Many believe that the large expansion of the human brain evolved due to the complex demands of dealing with social others—competing or cooperating with them, deceiving or empathizing with them, understanding or misjudging them. What kind of “social brain” has this evolutionary past left us with? In this course, we will review core principles, theories, and methods guiding social neuroscience, as well as research examining the brain basis of processes such as theory of mind, emotion, stereotyping, social group identity, empathy, judging faces and bodies, morality, decision-making, the impact of culture and development, among others. Overall, this course will introduce students to the field of social neuroscience and its multi-level approach to understanding the brain in its social context

#### Fall 2024: PSYC UN2435

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2435	001/10672	M W 2:40pm - 3:55pm 614 Schermerhorn Hall	Jon Freeman	3.00	79/110

#### Spring 2025: PSYC UN2435

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2435	001/11828	M W 2:40pm - 3:55pm 501 Schermerhorn Hall	Jon Freeman	3.00	112/130

**PSYC UN2450 BEHAVIORAL NEUROSCIENCE. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructors permission. Examines the principles governing neuronal activity, the role of neurotransmitter systems in memory and motivational processes, the presumed brain dysfunctions that give rise to schizophrenia and depression, and philosophical issues regarding the relationship between brain activity and subjective experience

**Spring 2025: PSYC UN2450**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2450	001/11829	M W 10:10am - 11:25am 614 Schermerhorn Hall	Sarah DeMoya	3.00	72/72

**PSYC UN2481 Developmental Cognitive Neuroscience. 3.00 points.**

The course will be an introduction to the science of structural and functional brain development beginning in the prenatal period. We will cover major domains in both cognitive and social development. This is a flipped course, where students will watch lectures online (three 55 minute lectures each week) and participate in classroom discussions and exercises (1 hour 50 minutes twice a week) with the Professor and each other when in person

**NSBV BC3381 Visual Neuroscience: From the Eyeball to the Mind's Eye. 4.00 points.**

By absorbing electromagnetic radiation through their eyes, people are able to catch frisbees, recognize faces, and judge the beauty of art. For most of us, seeing feels effortless. That feeling is misleading. Seeing requires not only precise optics to focus images on the retina, but also the concerted action of millions of nerve cells in the brain. This intricate circuitry infers the likely causes of incoming patterns of light and transforms that information into feelings, thoughts, and actions. In this course we will study how light evokes electrical activity in a hierarchy of specialized neural networks that accomplish many unique aspects of seeing. Students will have the opportunity to focus their study on particular aspects, such as color, motion, object recognition, learning, attention, awareness, and how sight can be lost and recovered. Throughout the course we will discuss principles of neural information coding (e.g., receptive field tuning, adaptation, normalization, etc.) that are relevant to other areas of neuroscience, as well as medicine, engineering, art and design

*Please note that PSYC UN2430 Cognitive Neuroscience may be used to fulfill either the Neuroscience requirement or the Psychology requirement, but not both.*

**Philosophy:****PHIL UN2655 COGNITIVE SCIENCE AND PHILOSOPHY. 3.00 points.**

This course will survey a number of topics at the intersection of cognitive science and philosophy. Potential topics include free will, consciousness, embodied cognition, artificial intelligence, neural networks, and the language of thought

**Fall 2024: PHIL UN2655**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 2655	001/18942	T Th 11:40am - 12:55pm 313 Fayerweather	Brendan Fleig-Goldstein	3.00	73/90

**PHIL UN3252 Philosophy of Language and Mind. 3 points.**

This course will provide an introduction to meaning, reference, understanding, and content in language, thought, and perception. A central concern will be the question of the relation of meaning to truth-conditions, and what is involved in language and thought successfully latching on to reality. If you have not already taken an elementary course in first order logic, you will need to catch up in that area to understand some crucial parts of the course. All the same, the primary concerns of the course will be philosophical, rather than technical.

**PHIL UN3651 PHILOSOPHY OF MIND. 3.00 points.****PHIL UN3655 TOPICS IN COGNITIVE SCIENCE AND PHILOSOPHY. 3.00 points.**

This course will focus on one topic at the intersection of cognitive science and philosophy. Potential topics include free will, consciousness, modularity, mental representation, probabilistic inference, the language of thought, and the computational theory of mind

**Spring 2025: PHIL UN3655**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3655	001/17700	T Th 1:10pm - 2:25pm 303 Uris Hall	Brendan Fleig-Goldstein	3.00	63/60

**COGS UN3952 Philosophy of Computing. 4.00 points.**

Advances in artificial intelligence carry potential for both social good and ethical danger. The purpose of this course is to explore both foundational and applied debates in the philosophy of computing, with a focus on machine learning technologies. Drawing from works in philosophy, computer science, literature, and policy, this course will comprehensively examine the conceptual and normative challenges artificial intelligence presents. The course analyzes present-day challenges through the prism of specific technologies and tools, namely predictive analytics, computer vision, and large language models, and also investigates moral and social questions on the horizon, with an eye to how advancements in computing will impact responsibility, moral status, and relationships

**Spring 2025: COGS UN3952**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

COGS 001/00723 T 6:10pm - 8:00pm Beba 4.00 18/20  
3952 214 Milbank Hall Cibralic

(Please note that only the "Perception" section of the PHIL UN3912 Seminar counts towards the Cognitive Science major; that section is not offered every year.)

## Linguistics

### LING UN3101 INTRODUCTION TO LINGUISTICS. 3.00 points.

An introduction to the study of language from a scientific perspective. The course is divided into three units: language as a system (sounds, morphology, syntax, and semantics), language in context (in space, time, and community), and language of the individual (psycholinguistics, errors, aphasia, neurology of language, and acquisition). Workload: lecture, weekly homework, and final examination

#### Fall 2024: LING UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3101	001/11717	M W 11:40am - 12:55pm 417 International Affairs Bldg	William Foley	3.00	207/300

#### Spring 2025: LING UN3101

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3101	001/00885	T Th 5:40pm - 6:55pm 323 Milbank Hall	Maya Barzilai	3.00	28/30

## Mathematical and Computational Methods

### Logic and Decision Theory

### ECON GU4850 COGNITIVE MECH # ECON BEHAVIOR. 4.00 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213; STAT 1201.*

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Standard economic theory seeks to explain human behavior (especially in economic settings, such as markets) in terms of rational choice, which means that the choices that are made can be predicted on the basis of what would best serve some coherent objective, under an objectively correct understanding of the predictable consequences of alternative actions. Observed behavior often seems difficult to reconcile with a strong form of this theory, even if incentives clearly have some influence on behavior; and the course will discuss empirical evidence (both from laboratory experiments and observations in the field) for some well-established anomalies. But beyond simply cataloguing anomalies for the standard theory, the course will consider the extent to which departures from a strong version of rational choice theory can be understood as reflecting cognitive processes that are also evident in other domains such as sensory perception; examples from visual perception will receive particular attention. And in

addition to describing what is known about how the underlying mechanisms work (something that is understood in more detail in sensory contexts than in the case of value-based decision making), the course will consider the extent to which such mechanisms --- while suboptimal from a normative standpoint that treats perfect knowledge of one's situation as costless and automatic --- might actually represent efficient uses of the limited information and bounded information-processing resources available to actual people (or other organisms). Thus the course will consider both ways in which the realism of economic analysis may be improved by taking into account cognitive processes, and ways in which understanding of cognitive processes might be advanced by considering the economic problem of efficient use of limited (cognitive) resources

### PHIL UN1401 INTRODUCTION TO LOGIC. 3.00 points.

Explicit criteria for recognizing valid and fallacious arguments, together with various methods for schematizing discourse for the purpose of logical analysis. Illustrative material taken from science and everyday life

#### Spring 2025: PHIL UN1401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 1401	001/00207	T Th 11:40am - 12:55pm 408 Zankel	Christopher Prodoehl	3.00	60/80

### PHIL UN3411 SYMBOLIC LOGIC. 4.00 points.

Corequisites: PHILV3413 Required Discussion Section (0 points). Advanced introduction to classical sentential and predicate logic. No previous acquaintance with logic is required; nonetheless a willingness to master technicalities and to work at a certain level of abstraction is desirable

#### Fall 2024: PHIL UN3411

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**PSYC UN2235 THINKING AND DECISION MAKING.  
3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: an introductory course in psychology.

Prerequisites: an introductory course in psychology. Models of judgment and decision making in both certain and uncertain or risky situations, illustrating the interplay of top-down (theory-driven) and bottom-up (data-driven) processes in creating knowledge. Focuses on how individuals do and should make decisions, with some extensions to group decision making and social dilemmas

**Spring 2025: PSYC UN2235**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2235	001/11826	T Th 11:40am - 12:55pm 501 Schermerhorn Hall	Katherine Fox-Glassman	3.00	117/120

Statistics

**ECON BC1007 MATH METHODS FOR ECONOMICS.  
4.00 points.**

Covers basic mathematical methods required for intermediate theory courses and upper level electives in economics, with a strong emphasis on applications. Topics include simultaneous equations, functions, partial differentiation, optimization of functions of more than one variable, constrained optimization, and financial mathematics. This course satisfies the Calculus requirement for the Barnard Economics major. NOTE: students who have previously taken Intermediate Micro Theory (ECON BC3035 or the equivalent) are \*not\* allowed to take Math Methods for Economics

**Fall 2024: ECON BC1007**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### STAT UN1201 CALC-BASED INTRO TO STATISTICS. 3.00 points.

Prerequisites: one semester of calculus. Designed for students who desire a strong grounding in statistical concepts with a greater degree of mathematical rigor than in STAT W1111. Random variables, probability distributions, pdf, cdf, mean, variance, correlation, conditional distribution, conditional mean and conditional variance, law of iterated expectations, normal, chi-square, F and t distributions, law of large numbers, central limit theorem, parameter estimation, unbiasedness, consistency, efficiency, hypothesis testing, p-value, confidence intervals, maximum likelihood estimation. Serves as the pre-requisite for ECON W3412

#### Fall 2024: STAT UN1201

**Computer Science****COMS BC1016 Introduction to Computational Thinking and Data Science. 3.00 points.**

This course and its co-requisite lab course will introduce students to the methods and tools used in data science to obtain insights from data. Students will learn how to analyze data arising from real-world phenomena while mastering critical concepts and skills in computer programming and statistical inference. The course will involve hands-on analysis of real-world datasets, including economic data, document collections, geographical data, and social networks. The course is ideal for students looking to increase their digital literacy and expand their use and understanding of computation and data analysis across disciplines. No prior programming or college-level math background is required

**Fall 2024: COMS BC1016**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1016	001/00123	T Th 6:10pm - 7:25pm 328 Milbank Hall	Lisa Soros	3.00	21/42
COMS 1016	002/00124	T Th 2:40pm - 3:55pm 328 Milbank Hall	Lisa Soros	3.00	35/42

**COMS W1001 Introduction to Information Science. 3 points.**

Lect: 3.

Basic introduction to concepts and skills in Information Sciences: human-computer interfaces, representing information digitally, organizing and searching information on the internet, principles of algorithmic problem solving, introduction to database concepts, and introduction to programming in Python.

**COMS W1002 COMPUTING IN CONTEXT. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Introduction to elementary computing concepts and Python programming with domain-specific applications. Shared CS concepts and Python programming lectures with track-specific sections. Track themes will vary but may include computing for the social sciences, computing for economics and finance, digital humanities, and more. Intended for nonmajors. Students may only receive credit for one of ENGI E1006 or COMS W1002

**Fall 2024: COMS W1002**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1002	001/11915	T Th 1:10pm - 2:25pm 417 International Affairs Bldg	Adam Cannon	4.00	51/160
COMS 1002	002/11916	T Th 1:10pm - 2:25pm 330 Uris Hall	Adam Cannon, Eugenia Antic	4.00	14/60
COMS 1002	003/11917	T Th 2:40pm - 3:55pm 417 International Affairs Bldg	Adam Cannon	4.00	129/300
COMS 1002	004/11918	T Th 2:40pm - 3:55pm 415 Schapiro Cepser	Philippe Chlenski, Adam Cannon	4.00	27/40

**COMS W1004 Introduction to Computer Science and Programming in Java. 3 points.**

Lect: 3.

A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: *1004* or *1005*.

**Fall 2024: COMS W1004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1004	001/11919	M W 2:40pm - 3:55pm 309 Havemeyer Hall	Paul Blaer	3	252/320
COMS 1004	002/11920	M W 5:40pm - 6:55pm 417 International Affairs Bldg	Paul Blaer	3	165/320

**Spring 2025: COMS W1004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1004	001/11948	T Th 11:40am - 12:55pm 417 International Affairs Bldg	Adam Cannon	3	111/398
COMS 1004	002/11949	T Th 1:10pm - 2:25pm 417 International Affairs Bldg	Adam Cannon	3	87/398

### COMS W3134 Data Structures in Java. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W1004) or COMS W1004; Knowledge of Java

Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: *COMS W3134*, *COMS W3136*, *COMS W3137*.

#### Fall 2024: COMS W3134

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3134	001/11932	M W 4:10pm - 5:25pm 301 Uris Hall	Brian Borowski	3	208/250
COMS 3134	002/11933	M W 5:40pm - 6:55pm 301 Uris Hall	Brian Borowski	3	119/250

#### Spring 2025: COMS W3134

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3134	001/11962	M W 2:40pm - 3:55pm 309 Havemeyer Hall	Paul Blaer	3	225/320
COMS 3134	002/11963	M W 5:40pm - 6:55pm 501 Northwest Corner	Paul Blaer	3	167/164

### COMS W3136 ESSENTIAL DATA STRUCTURES. 4.00 points.

Prerequisites: (COMS W1004) or (COMS W1005) or (COMS W1007) or (ENGI E1006) COMS W1005 OR COMS W1007 OR ENGI E1006 OR COMS W1004

A second programming course intended for nonmajors with at least one semester of introductory programming experience. Basic elements of programming in C and C , arraybased data structures, heaps, linked lists, C programming in UNIX environment, object-oriented programming in C , trees, graphs, generic programming, hash tables. Due to significant overlap, students may only receive credit for either COMS W3134, W3136, or W3137

#### Fall 2024: COMS W3136

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS 3136	001/15424	T Th 5:40pm - 6:55pm 141 Uris Hall	Timothy Paine	4.00	30/65
-----------	-----------	---------------------------------------	---------------	------	-------

### COMS W3137 HONORS DATA STRUCTURES #

**ALGOL. 4.00 points.**

Prerequisites: (COMS W1004) or (COMS W1007) COMS W1004 OR COMS W1007

Corequisites: COMS W3203

An honors introduction to data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Design and analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, W3136, or W3137

### ENGI E1006 INTRO TO COMP FOR ENG/APP SCI. 3.00 points.

An interdisciplinary course in computing intended for first year SEAS students. Introduces computational thinking, algorithmic problem solving and Python programming with applications in science and engineering. Assumes no prior programming background

#### Fall 2024: ENGI E1006

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGI 1006	001/11994	M W 2:40pm - 3:55pm 301 Uris Hall	Daniel Bauer	3.00	213/266

#### Spring 2025: ENGI E1006

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ENGI 1006	001/12014	T Th 5:40pm - 6:55pm 417 International Affairs Bldg	Timothy Paine	3.00	196/250

### STEM BC2223 PROGRAMMING BEHAV SCIENCES. 4.00 points.

## SPECIALIZATIONS

### Aesthetics

#### MUSI UN2320 Introduction to Music Cognition. 3.00 points.

The aim of music cognition is to understand the musical mind.

This course is an introduction to a variety of key topics in this field, including human development, evolution, neural processing, embodied knowledge, memory and anticipation, cross-cultural perspectives, and emotions. The course explores recent research on these topics, as well as ways in which this research can be applied to music scholarship. Readings are drawn from fields as diverse as music theory, psychology, biology, anthropology, and neuroscience, and include general works in cognitive science, theoretical work focused on specific musical issues, and reports of empirical research

**SOAR AV4000 SOUND:Music, Math, and Mind. 3.00 points.**

This course is a detailed and hands-on (ears-on) exploration of the fundamental physical, physiological, and psychological aspects of sound. Topics covered include sound waves and their physical nature, the propagation and speed of sound in different mediums, geological and other non-living sound sources, animal and insect sound generating strategies, sound perception mechanisms and abilities in different species, the physiology of human hearing and the structure of the human ear, psycho-acoustics and human sound perception, sonic illusions and tricks of the ear. In-class experiments and research make up the majority of the class. Each student will design and lead at least one experiment/demo session. Students also respond to creative weekly prompts about sound topics on courseworks. We also have visits with a number of special guests during the term

**Fall 2024: SOAR AV4000**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
SOAR 4000	001/11632	Th 6:10pm - 8:00pm 320h Prentiss Hall	David Sulzer	3.00	12/15

**PSYC GU4239 COG NEURO NARRATIVE FILM. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010 or

Prerequisites: (PSYC UN1010 or Equivalent introductory course in neuroscience or cognitive psychology This seminar will provide a broad survey of how narrative stories, films, and performances have been used as tools to study cognition in psychology and neuroscience

**MUSI GU4325 Topics in Music Cognition. 3.00 points.**

This advanced seminar builds on the Introduction to Music Cognition (MUSIC UN2320) with an in-depth inquiry into selected key topics in the field of Music Cognition. Specific topics vary each year, depending on interest and availability of instructors, and include human development; evolution; communication and music's relation to language; embodied knowledge; first-person awareness; metaphor; ineffability; neuroscience; mental representations; memory and anticipation; cross-cultural studies; emotions; musical aesthetics; artificial intelligence; agency; creativity; and music's relation to other art forms. Each semester the course delves into recent research on 3-4 of these topics, focusing in particular on how this research can be applied to questions of musical knowledge. Advanced readings are drawn from fields as diverse as music theory, psychology, biology, anthropology, philosophy, and neuroscience. They include general works in cognitive science, theoretical work focused on specific musical issues, and reports of empirical research

**CLEN GU4728 Literature in the Age of AI. 3.00 points.**

In this course we will consider the long history of literature composed with, for, and by machines. Our reading list will start with Ramon Llull, the thirteenth-century combinatorial mystic, and continue with readings from Gottfried Leibniz, Francis

Bacon, Jonathan Swift, and Samuel Butler. We will read "Plot Robots" instrumental to the writing of Hollywood scripts and pulp fiction of the 1920s, the avant-garde poetry of Dada and OULIPO, computer-generated love letters written by Alan Turing, and novels created by the first generation of artificial intelligence researchers in the 1950s and 60s. The course will conclude at the present moment, with an exploration of machine learning techniques of the sort used by Siri, Alexa, and other contemporary chat bots

**Cognitive Development****PSYC BC2115 COGNITIVE PSYCHOLOGY - LEC. 3.00 points.**

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture covering selected topics illustrating the methods, findings, and theories of contemporary cognitive psychology. Topics include attention, memory, categorization, perception, and decision making. Special topics include neuropsychology and cognitive neuroscience. Note that this lecture can be taken without its affiliated lab, PSYC BC2114, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University courses are considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN2220 Cognition: Memory and Stress; and PSYC UN2210 Cognition: Basic Processes

**Spring 2025: PSYC BC2115**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2115	001/00330	M W 10:10am - 11:25am 408 Zankel	Lisa Son	3.00	86/100

**PSYC BC2129 DEVELOPMENTAL PSYCHOLOGY-LEC. 3.00 points.**

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering cognitive, linguistic, perceptual, motor, social, affective, and personality development from infancy to adolescence. Note that this lecture can be taken without its affiliated lab, PSYC BC2128, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN2280 Introduction to Developmental Psychology

**Fall 2024: PSYC BC2129**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2129	001/00072	M W 2:40pm - 3:55pm 405 Milbank Hall	Koleen McCrink	3.00	95/100

**Spring 2025: PSYC BC2129**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 2129 001/00571	T Th 10:10am - 11:25am LI002 Milstein Center	Ann Senghas	3.00	68/98
---------------------	---	-------------	------	-------

**PSYC UN2481 Developmental Cognitive Neuroscience. 3.00 points.**

The course will be an introduction to the science of structural and functional brain development beginning in the prenatal period. We will cover major domains in both cognitive and social development. This is a flipped course, where students will watch lectures online (three 55 minute lectures each week) and participate in classroom discussions and exercises (1 hour 50 minutes twice a week) with the Professor and each other when in person

**PSYC BC3369 LANGUAGE DEVELOPMENT. 4.00 points.**  
**Not offered during 2023-2024 academic year.**

Prerequisites: BC1001, one Psychology laboratory course, one of the following: PSYC W2240, BC1128/1129, BC1129, or LIN BC V1101, and permission of the instructor. Enrollment limited to 15 students.

Prerequisites: PSYC BC1001 and one of the following: PSYC W2240, PSYC BC1129, or LING UN1101. Enrollment limited to 15 students. Examines the acquisition of a first language by children, from babbling and first words to complex sentence structure and wider communicative competence. Signed and spoken languages, cross-linguistic variation and universalities, language genesis and change, and acquisition by atypical populations will be discussed

**Fall 2024: PSYC BC3369**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3369	001/00767	Th 10:10am - 12:00pm 501 Diana Center	Mollie Hamilton	4.00	10/15

**PSYC GU4202 Theories of Change in Human Development. 4.00 points.**

What are the agents of developmental change in human childhood? How has the scientific community graduated from nature versus nurture, to nature and nurture? This course offers students an in-depth analysis of the fundamental theories in the study of cognitive and social development

**Fall 2024: PSYC GU4202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202	001/10699	W 10:10am - 12:00pm 405 Schermerhorn Hall	Dima Amso	4.00	14/15

**Spring 2025: PSYC GU4202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202	001/11848	W 10:10am - 12:00pm 405 Schermerhorn Hall	Dima Amso	4.00	15/15

**PSYC GU4222 The Cognitive Neuroscience of Aging (Seminar). 4 points.**

Prerequisites: courses in introductory psychology and cognitive psychology; and the instructor's permission.

Comprehensive overview of various conceptual and methodologic approaches to studying the cognitive neuroscience of aging. The course will emphasize the importance of combining information from cognitive experimental designs, epidemiologic studies, neuroimaging, and clinical neuropsychological approaches to understand individual differences in both healthy and pathological aging.

**PSYC GU4498 BEHAVIORAL EPIGENETICS. 4.00 points.**

Prerequisites: basic background in neurobiology (for instance PSYC W1010, W2450, W2460, W2480, and G4499) and the instructor's permission.

Prerequisites: basic background in neurobiology (for instance PSYC UN1010, UN2450, UN2460, UN2480, and GU4499) and the instructors permission. This course will provide an overview of the field of epigenetics, with an emphasis on epigenetic phenomena related to neurodevelopment, behavior and mental disorders. We will explore how epigenetic mechanisms can be mediators of environmental exposures and, as such, contribute to psychopathology throughout the life course. We will also discuss the implications of behavioral epigenetic research for the development of substantially novel pharmacotherapeutic approaches and preventive measures in psychiatry

**Fall 2024: PSYC GU4498**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4498	001/10665	F 2:10pm - 4:00pm 200c Schermerhorn Hall	Jennifer Blaze	4.00	12/15

## Cognitive Linguistics

**ANTH UN1009 INTRO TO LANGUAGE # CULTURE. 3.00 points.**

This is an introduction to the study of the production, interpretation, and reproduction of social meanings as expressed through language. In exploring language in relation to culture and society, it focuses on how communication informs and transforms the sociocultural environment

**Spring 2025: ANTH UN1009**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 1009	001/00645	M W 10:10am - 11:25am LI003 Barnard Hall	Elizabeth Green	3.00	40/90

**PSYC BC3164 PERCEPTION AND LANGUAGE. 4.00 points.**

Prerequisites: BC 1001 and one of the following: BC1106/1107, BC1109/1110, BC1118/1119, BC1128/1129, or permission of the instructor. Enrollment limited to 20 students

Psychological investigations of spoken communication from a listener's perspective. Topics include perception and sounds of speech and the apprehension of meaning from words and utterances; the perceptual basis for rhyme and rhythm in speech; and the natural history of vocal communication.

**Spring 2025: PSYC BC3164**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3164	001/00263	W 6:10pm - 8:00pm 306 Milbank Hall	Robert Remez	4.00	11/16

**PHIL UN3252 Philosophy of Language and Mind. 3.00 points.**

This course will provide an introduction to meaning, reference, understanding, and content in language, thought, and perception. A central concern will be the question of the relation of meaning to truth-conditions, and what is involved in language and thought successfully latching on to reality. If you have not already taken an elementary course in first order logic, you will need to catch up in that area to understand some crucial parts of the course. All the same, the primary concerns of the course will be philosophical, rather than technical.

**PSYC BC3369 LANGUAGE DEVELOPMENT. 4.00 points.**  
**Not offered during 2023-2024 academic year.**

Prerequisites: BC1001, one Psychology laboratory course, one of the following: PSYC W2240, BC1128/1129, BC1129, or LIN BC V1101, and permission of the instructor. Enrollment limited to 15 students.

Prerequisites: PSYC BC1001 and one of the following: PSYC W2240, PSYC BC1129, or LING UN1101. Enrollment limited to 15 students. Examines the acquisition of a first language by children, from babbling and first words to complex sentence structure and wider communicative competence. Signed and spoken languages, cross-linguistic variation and universalities, language genesis and change, and acquisition by atypical populations will be discussed

**Fall 2024: PSYC BC3369**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3369	001/00767	Th 10:10am - 12:00pm 501 Diana Center	Mollie Hamilton	4.00	10/15

**LING GU4202 COGNITIVE LINGUISTICS. 3.00 points.**

Prerequisites: LING UN3101

Reading and discussion of scholarly literature on the cognitive approach to language, including: usage-oriented approaches to language, frame semantics, construction grammar, theories of conceptual metaphor and mental spaces; alongside of experimental research on language acquisition, language memory, prototypical and analogous thinking, and the role of visual imagery in language processing

**LING GU4206 ADV GRAMMAR AND GRAMMARS. 3.00 points.**

Prerequisites: LING UN3101 *LING W3101*.

An investigation of the possible types of grammatical phenomena (argument structure, tense/aspect/mood, relative clauses, classifiers, and deixis). This typological approach is enriched by the reading of actual grammars of languages from Asia, Africa, Australia, and the Americas in which grammatical descriptions are read with an eye to important notional concepts of grammar: reference and categorization, case and role of arguments with predicates (ergativity), tense/aspect/mood. Discussion of meaning is combined with attention to expression (that is, morphology), which yanks our attention towards language change (grammaticalization)

**PSYC GU4244 LANGUAGE AND MIND. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 and

Prerequisites: PSYC UN1001 and Preferably, an additional course in psychology, focusing on cognition, development, or research methods. Instructor permission required. This seminar explores the relationship between language and thought by investigating how language is mentally represented and processed; how various aspects of language interact with each other; and how language interacts with other aspects of cognition including perception, concepts, world knowledge, and memory. Students will examine how empirical data at the linguistic, psychological, and neuroscientific levels can bear on some of the biggest questions in the philosophy of mind and language and in psychology

**Fall 2024: PSYC GU4244**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4244	001/10703	W 2:10pm - 4:00pm 200c Schermerhorn Hall	Nora Isacoff	4.00	14/15

**LING GU4376 PHONETICS # PHONOLOGY. 3.00 points.**

Prerequisites: LING UN3101 *LING W3101*.

Prerequisites: LING UN3101 An investigation of the sounds of human language, from the perspective of phonetics (articulation and acoustics, including computer-aided acoustic analysis) and phonology (the distribution and function of sounds in individual languages)

**Fall 2024: LING GU4376**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 4376	001/11715	T Th 11:40am - 12:55pm 330 Uris Hall	Meredith Landman	3.00	33/60

## Cognitive Neuroscience

**PSYC UN2481 Developmental Cognitive Neuroscience. 3.00 points.**

The course will be an introduction to the science of structural and functional brain development beginning in the prenatal period. We will cover major domains in both cognitive and social development. This is a flipped course, where students

will watch lectures online (three 55 minute lectures each week) and participate in classroom discussions and exercises (1 hour 50 minutes twice a week) with the Professor and each other when in person

**NSBV BC3405 NEUROSCIENCE OF TRAUMA. 4.00 points.**

Prerequisites: PSYBC1119

This course provides a comprehensive overview of theoretical models and research relevant to the neurobiology, neurophysiology, neuroanatomy and neurodevelopmental processes underlying psychological trauma. Cognitive, emotional and behavioral symptoms associated with post traumatic experience are examined from a neuroscience perspective. Neurotherapeutic treatment interventions are reviewed and critiqued as models of applied clinical neuroscience

Spring 2025: NSBV BC3405

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
NSBV 3405	001/00105	T Th 2:40pm - 3:55pm 328 Milbank Hall	E'mett McCaskill	4.00	55/50

**PSYC GU4225 CONSCIOUSNESS # ATTENTION. 4.00 points.**

Prerequisites: the instructor's permission; some basic knowledge of cognitive science and neuroanatomy is desirable, but not necessary.

Modern theories attempt to characterize the human mind in terms of information processing. But machines that process information do not seem to feel anything; a computer may for instance receive inputs from a video camera, yet it would be hard to imagine that it sees or experiences the vividness of colors like we do. Nobody has yet provided a convincing theory as to how to explain the subjective nature of our mental lives in objective physical terms. This is called the problem of consciousness, and is generally considered to be one of the last unsolved puzzles in science. Philosophers even debate whether there could be a solution to this problem at all. Students in this course may be recruited for participation in a voluntary research study. Students who choose not to participate in the study will complete the same course requirements as those who do, and an individual's choice will not affect their grade or status as a student in the course

**PSYC GU4239 COG NEURO NARRATIVE FILM. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN1010 or

Prerequisites: (PSYC UN1010 or Equivalent introductory course in neuroscience or cognitive psychology This seminar will provide a broad survey of how narrative stories, films, and performances have been used as tools to study cognition in psychology and neuroscience

**PSYC GU4415 METHODS/ISSU-COGNITIV NEU. 3 points.**

Please contact the Psychology department for more information.

**PSYC GU4498 BEHAVIORAL EPIGENETICS. 4.00 points.**

Prerequisites: basic background in neurobiology (for instance PSYC W1010, W2450, W2460, W2480, and G4499) and the instructor's permission.

Prerequisites: basic background in neurobiology (for instance PSYC UN1010, UN2450, UN2460, UN2480, and GU4499) and the instructors permission. This course will provide an overview of the field of epigenetics, with an emphasis on epigenetic phenomena related to neurodevelopment, behavior and mental disorders. We will explore how epigenetic mechanisms can be mediators of environmental exposures and, as such, contribute to psychopathology throughout the life course. We will also discuss the implications of behavioral epigenetic research for the development of substantially novel pharmacotherapeutic approaches and preventive measures in psychiatry

Fall 2024: PSYC GU4498

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4498	001/10665	F 2:10pm - 4:00pm 200c Schermerhorn Hall	Jennifer Blaze	4.00	12/15

## Cognitive Psychology

**PSYC BC2115 COGNITIVE PSYCHOLOGY - LEC. 3.00 points.**

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture covering selected topics illustrating the methods, findings, and theories of contemporary cognitive psychology. Topics include attention, memory, categorization, perception, and decision making. Special topics include neuropsychology and cognitive neuroscience. Note that this lecture can be taken without its affiliated lab, PSYC BC2114, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University courses are considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN2220 Cognition: Memory and Stress; and PSYC UN2210 Cognition: Basic Processes

Spring 2025: PSYC BC2115

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2115	001/00330	M W 10:10am - 11:25am 408 Zankel	Lisa Son	3.00	86/100

**PSYC BC2129 DEVELOPMENTAL PSYCHOLOGY-LEC. 3.00 points.**

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering cognitive, linguistic, perceptual, motor, social, affective, and personality development from infancy to adolescence. Note that this lecture can be taken without its affiliated lab, PSYC BC2128, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN2280 Introduction to Developmental Psychology

**Fall 2024: PSYC BC2129**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2129	001/00072	M W 2:40pm - 3:55pm 405 Milbank Hall	Koleen McCrink	3.00	95/100

**Spring 2025: PSYC BC2129**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2129	001/00571	T Th 10:10am - 11:25am LI002 Milstein Center	Ann Senghas	3.00	68/98

**PSYC UN2220 COGNITION: MEMORY AND STRESS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Attendance at the first class is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructors permission. Memory, attention, and stress in human cognition

**Fall 2024: PSYC UN2220**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2220	001/10668	M W 1:10pm - 2:25pm 602 Hamilton Hall	Janet Metcalfe	3.00	49/75

**PSYC BC3164 PERCEPTION AND LANGUAGE. 4.00 points.**

Prerequisites: BC 1001 and one of the following: BC1106/1107, BC1109/1110, BC1118/1119, BC1128/1129, or permission of the instructor. Enrollment limited to 20 students  
Psychological investigations of spoken communication from a listener's perspective. Topics include perception and sounds of speech and the apprehension of meaning from words and utterances; the perceptual basis for rhyme and rhythm in speech; and the natural history of vocal communication.

**Spring 2025: PSYC BC3164**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

PSYC 3164 001/00263	W 6:10pm - 8:00pm	Robert Remez	4.00	11/16
306 Milbank Hall				

**PSYC BC3394 METACOGNITION. 4.00 points.**

Prerequisites: BC1001, and one psychology laboratory course; final enrollment determined on the first day of class  
Metacognition is one of the latest psychological buzzwords, but what exactly is metacognition? Metacognition enables us to be successful learners, problem solvers, and decision makers, and as often been used synonymously with words such as language, awareness, and consciousness. In this seminar, we will examine various components of metacognition, including its role in learning and memory, and its existence in various non-human populations. In addition, we will explore the fragility of metacognition, including illusions of confidence and harmful control strategies that people use. Readings will include classic and important recent papers in the field, looking at metacognition as a higher-level cognitive process, and as knowledge individuals use to guide behavior

**Fall 2024: PSYC BC3394**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3394 001/00736	W 10:10am - 12:00pm	119 Milstein Center	Lisa Son	4.00	20/22

**PSYC GU4225 CONSCIOUSNESS # ATTENTION. 4.00 points.**

Prerequisites: the instructor's permission; some basic knowledge of cognitive science and neuroanatomy is desirable, but not necessary.

Modern theories attempt to characterize the human mind in terms of information processing. But machines that process information do not seem to feel anything; a computer may for instance receive inputs from a video camera, yet it would be hard to imagine that it sees or experiences the vividness of colors like we do. Nobody has yet provided a convincing theory as to how to explain the subjective nature of our mental lives in objective physical terms. This is called the problem of consciousness, and is generally considered to be one of the last unsolved puzzles in science. Philosophers even debate whether there could be a solution to this problem at all. Students in this course may be recruited for participation in a voluntary research study. Students who choose not to participate in the study will complete the same course requirements as those who do, and an individual's choice will not affect their grade or status as a student in the course

**PSYC GU4672 MORAL PSYCHOLOGY. 4.00 points.**

Prerequisites: Two courses in psychology, including at least one course with a focus on social and/or developmental psychology, and permission of the instructor.

Prerequisites: Two courses in psychology, including at least one course with a focus on social and/or developmental psychology, and permission of the instructor. Review of theories and current research on moral cognition and behavior. Topics include definitions of morality, the development of moral cognition, the role that other aspects of human experience

(e.g. emotion, intentions) play in moral judgments, and the relationship between moral psychology and other areas of study (e.g. religious cognition, prejudice and stereotyping, the criminal justice system)

## Consciousness

### PSYC UN2210 COGNITION: BASIC PROCESSES. 3.00 points.

Spring 2025: PSYC UN2210

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2210	001/11824	M W 1:10pm - 2:25pm 209 Havemeyer Hall	Nora Isacoff	3.00	68/65

### PHIL UN3651 PHILOSOPHY OF MIND. 3.00 points.

### PSYC GU4225 CONSCIOUSNESS # ATTENTION. 4.00 points.

Prerequisites: the instructor's permission; some basic knowledge of cognitive science and neuroanatomy is desirable, but not necessary.

Modern theories attempt to characterize the human mind in terms of information processing. But machines that process information do not seem to feel anything; a computer may for instance receive inputs from a video camera, yet it would be hard to imagine that it sees or experiences the vividness of colors like we do. Nobody has yet provided a convincing theory as to how to explain the subjective nature of our mental lives in objective physical terms. This is called the problem of consciousness, and is generally considered to be one of the last unsolved puzzles in science. Philosophers even debate whether there could be a solution to this problem at all. Students in this course may be recruited for participation in a voluntary research study. Students who choose not to participate in the study will complete the same course requirements as those who do, and an individual's choice will not affect their grade or status as a student in the course

### PSYC GU4244 LANGUAGE AND MIND. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 and

Prerequisites: PSYC UN1001 and Preferably, an additional course in psychology, focusing on cognition, development, or research methods. Instructor permission required. This seminar explores the relationship between language and thought by investigating how language is mentally represented and processed; how various aspects of language interact with each other; and how language interacts with other aspects of cognition including perception, concepts, world knowledge, and memory. Students will examine how empirical data at the linguistic, psychological, and neuroscientific levels can bear on some of the biggest questions in the philosophy of mind and language and in psychology

Fall 2024: PSYC GU4244

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4244	001/10703	W 2:10pm - 4:00pm 200c Schermerhorn Hall	Nora Isacoff	4.00	14/15

## Decision Science

### PSYC BC2178 FORENSIC PSYCHOLOGY. 3.00 points.

Prerequisites: PSYC BC1001

Every day there are thousands of individuals interacting with the legal system. Are they mentally competent to stand trial? How can a judge decide if it is in the best interests of a child to live with one, or both (or neither) parent(s)? What is the risk of a violent offender repeating the offense? What kinds of information influence juries? Does mediation work to solve disputes? Forensic psychologists apply their knowledge of psychology specifically in legal matters. This semester will focus on the broad area of forensic psychology, exploring important legal cases relevant to forensic psychology, police psychology, what constitutes expert testimony, how assessments are conducted, and working as a psychologist in the correctional system

Fall 2024: PSYC BC2178

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2178	001/00074	T Th 8:40am - 9:55am 408 Zankel	Kathleen Taylor	3.00	105/150

### PSYC UN2235 THINKING AND DECISION MAKING. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: an introductory course in psychology.

Prerequisites: an introductory course in psychology. Models of judgment and decision making in both certain and uncertain or risky situations, illustrating the interplay of top-down (theory-driven) and bottom-up (data-driven) processes in creating knowledge. Focuses on how individuals do and should make decisions, with some extensions to group decision making and social dilemmas

Spring 2025: PSYC UN2235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2235	001/11826	T Th 11:40am - 12:55pm 501 Schermerhorn Hall	Katherine Fox-Glassman	3.00	117/120

### PSYC UN2620 ABNORMAL BEHAVIOR. 3.00 points.

Prerequisites: An introductory psychology course. Examines definitions, theories, and treatments of abnormal behavior

Fall 2024: PSYC UN2620

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2620	001/10697	T Th 4:10pm - 5:25pm	E'mett McCaskill	3.00	198/210

301 Uris Hall

**Spring 2025: PSYC UN2620**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2620	001/11831	F 1:10pm - 3:40pm 329 Pupin Laboratories	Jeffrey Cohen	3.00	76/100

**PSYC GU4202 Theories of Change in Human Development. 4.00 points.**

What are the agents of developmental change in human childhood? How has the scientific community graduated from nature versus nurture, to nature and nurture? This course offers students an in-depth analysis of the fundamental theories in the study of cognitive and social development

**Fall 2024: PSYC GU4202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202	001/10699	W 10:10am - 12:00pm 405 Schermerhorn Hall	Dima Amso	4.00	14/15

**Spring 2025: PSYC GU4202**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4202	001/11848	W 10:10am - 12:00pm 405 Schermerhorn Hall	Dima Amso	4.00	15/15

**PSYC GU4241 Mentalizing: How we read people. 4.00 points.**

Success in a social world requires understanding other people's thoughts and feelings, a process typically referred to as mentalizing. Yet, other people's mental states are not directly observable: you cannot see a thought or touch a feeling. Nonetheless, humans are quite proficient in inferring these invisible states of mind. How do we accomplish these mentalizing feats? In this course, we will answer this question from multiple angles, relying heavily on neuroscience and psychology research. The seminar will discuss recent and classic studies that reveal how humans effectively interpret the people around them, as well as when and why they make mistakes

**Fall 2024: PSYC GU4241**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 4241	001/10738	T 10:10am - 12:00pm 200c Schermerhorn Hall	Meghan Meyer	4.00	15/19
PSYC 4241	002/10740	T 2:10pm - 4:00pm 200c Schermerhorn Hall	Meghan Meyer	4.00	16/19

**PSYC GU4430 Learning and the Brain (Seminar). 4 points.**

Prerequisites: courses in introductory psychology and/or neuroscience, and the instructor's permission.

What are the neural mechanisms that support learning, memory, and choices? We will review current theories in the cognitive neuroscience of human learning, discuss how learning and decision making interact, and consider the strengths and

weaknesses of two influential methods in the study of human brain and behavior--functional imaging and patient studies.

**COGS GU4800 Resource-Constrained Decision Making. 4.00 points.**

There is a fundamental puzzle about human intelligence: How are we incredibly smart and stupid at the same time? Humans deal successfully with the world in a way that no machine can (for now), yet we routinely behave in ways that seem grossly inconsistent with normative canons of rational inference and rational choice. This course will seek to resolve the paradox by exploring the idea that while we make many mistakes, these mistakes are not haphazard; instead, they reflect a brain that is highly efficient at inference and decision making within the information, time, and energy constraints imposed by the finite resources available to it. In other words, our brains may be "resource-rational" even if they fail to conform to ideal canons of rationality. We will explore this idea by considering the structure of errors, biases and illusions in the context of perceptual judgments, more abstract cognitive judgments (perceptions of numerical magnitudes or probabilities), and economic decisions; we will see that there are many analogies between the kinds of characteristic errors that people make in all of these contexts. A potential explanatory framework, which can be applied across contexts, considers what optimal decisions should be like in the case of a decision unit that has only imprecise information about its situation. Hence statistical modeling and statistical inference are key elements in the computational models of human decision making that we wish to discuss

---

**Human-Computer Interaction****PSYC UN3270 COMPUT APPROACHES-HUMAN VISION. 3.00 points.**

This course will be offered in Fall 2016.

Prerequisites: some background in psychology and/or neurophysiology (e.g., PSYC W1001, PSYC W1010, PSYC W2230, PSYC W2450; BIOL W3004 or BIOL W3005) is desirable. See instructor if you have questions about your background. Some background in mathematics and computer science (e.g., calculus or linear algebra, a programming language) is highly recommended.

Prerequisites: some background in psychology and/or neurophysiology (e.g. PSYC UN1001, PSYC UN1010, PSYC UN2230, PSYC UN2450; BIOL UN3004 or BIOL UN3005) is desirable. See instructor if you have questions about your background. Some background in mathematics and computer science (e.g. calculus or linear algebra, a programming language) is highly recommended. Study of human vision--both behavioral and physiological data--within a framework of computational and mathematical descriptions. Please contact Prof. Graham by e-mail (nvg1@columbia.edu) if you are interested in this course

**PSYC BC3399 HUMAN AND MACHINES. 4.00 points.**

Prerequisites: (PSYC BC1001) and

Prerequisites: (PSYC BC1001) and Instructor approval This course will examine the social psychology of Human-Machine interactions, exploring the idea that well-established social psychological processes play critical roles in interactions with non-social objects. The first half of the seminar will examine the social psychology of perception across distinct sensory modalities (shape, motion, voice, touch), whereas the second half will focus on social psychological processes between humans and non-human entities (objects, computers, robots)

**COMS W4170 USER INTERFACE DESIGN. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) COMS W3134 OR COMS W3136 OR COMS W3137

Introduction to the theory and practice of computer user interface design, emphasizing the software design of graphical user interfaces. Topics include basic interaction devices and techniques, human factors, interaction styles, dialogue design, and software infrastructure. Design and programming projects are required

**Fall 2024: COMS W4170**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4170	001/11946	T Th 1:10pm - 2:25pm 833 Seeley W. Mudd Building	Brian Smith	3.00	119/120
COMS 4170	V01/17523		Brian Smith	3.00	6/99

**Spring 2025: COMS W4170**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4170	001/11975	M W 1:10pm - 2:25pm 417 International Affairs Bldg	Lydia Chilton	3.00	413/398
COMS 4170	002/18894	M 7:00pm - 9:30pm 428 Pupin Laboratories	Lydia Chilton	3.00	150/147
COMS 4170	V01/18066		Lydia Chilton	3.00	15/20

**IEME E4200 HUMAN-CENTERED DESIGN AND INNOVATION. 3.00 points.**

Prerequisites: Instructor's permission.

Open to SEAS graduate and advanced undergraduate students, Business School, and GSAPP. Students from other schools may apply. Fast-paced introduction to human-centered design. Students learn the vocabulary of design methods, understanding of design process. Small group projects to create prototypes. Design of simple product, more complex systems of products and services, and design of business

**Fall 2024: IEME E4200**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
IEME 4200	001/14537	T 4:10pm - 5:25pm 420 Pupin Laboratories	Harry West	3.00	54/50

IEME 4200	001/14537	T 5:25pm - 6:40pm 430 River Side Church	Harry West	3.00	54/50
-----------	-----------	--	------------	------	-------

**Spring 2025: IEME E4200**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

		None None			

**PSYC GU4236 Machine Intelligence. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course will survey historical and modern developments in machine intelligence from fields such as psychology, neuroscience, and computer science, and from intellectual movements such as cybernetics, artificial intelligence, neural networks, connectionism, machine learning, and deep learning. The emphasis is on the conceptual understanding of topics. The course does not include, nor require background in, computer programming and statistics. A crucial aspect of the seminar is for students to become informed consumers of applications of artificial intelligence

**COMS E6178 Human-Computer Interaction. 3.00 points.**

Prerequisites: COMS W4170

Human-computer interaction (HCI) studies (1) what computers are used for, (2) how people interact with computers, and (3) how either of those should change in the future. Topics include ubiquitous computing, mobile health, interaction techniques, social computing, mixed reality, accessibility, and ethics. Activities include readings, presentations, and discussions of research papers. Substantial HCI research project required

**Spring 2025: COMS E6178**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 6178	001/11992	W 1:10pm - 3:40pm 524 Seeley W. Mudd Building	Brian Smith	3.00	32/31
COMS 6178	V01/18012		Brian Smith	3.00	9/99

---

**Intelligence****PSYC GU4236 Machine Intelligence. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course will survey historical and modern developments in machine intelligence from fields such as psychology, neuroscience, and computer science, and from intellectual movements such as cybernetics, artificial intelligence, neural

networks, connectionism, machine learning, and deep learning. The emphasis is on the conceptual understanding of topics. The course does not include, nor require background in, computer programming and statistics. A crucial aspect of the seminar is for students to become informed consumers of applications of artificial intelligence

**COMS W4701 ARTIFICIAL INTELLIGENCE. 3.00 points.**  
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and COMS W3134 OR COMS W3136 OR COMS W3137; Any course on probability

Prior knowledge of Python is recommended. Provides a broad understanding of the basic techniques for building intelligent computer systems. Topics include state-space problem representations, problem reduction and and-or graphs, game playing and heuristic search, predicate calculus, and resolution theorem proving, AI systems and languages for knowledge representation, machine learning and concept formation and other topics such as natural language processing may be included as time permits

**Fall 2024: COMS W4701**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4701	001/11951	T Th 10:10am - 11:25am 501 Schermerhorn Hall	Ansaf Salleb-Aouissi	3.00	183/180
COMS 4701	002/11952	T Th 11:40am - 12:55pm 501 Schermerhorn Hall	Ansaf Salleb-Aouissi	3.00	199/180

COMS 4701	001/13152	M W 4:10pm - 5:25pm 301 Pupin Laboratories	Tony Dear	3.00	207/250
COMS 4701	V01/18072		Tony Dear	3.00	8/99

**COMS W4705 NATURAL LANGUAGE PROCESSING. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134 OR COMS W3136 OR COMS W3137; Or instructor's permission

Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas

**Fall 2024: COMS W4705**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4705	001/11953	F 10:10am - 12:40pm 417 International Affairs Bldg	Daniel Bauer	3.00	253/275
COMS 4705	002/11954	M W 4:10pm - 5:25pm 451 Computer Science Bldg	Zhou Yu	3.00	75/100
COMS 4705	V01/17525		Daniel Bauer	3.00	18/99

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4705	001/11981	M W 10:10am - 11:25am 501 Schermerhorn Hall	Daniel Bauer	3.00	165/189
COMS 4705	V01/18074		Daniel Bauer	3.00	16/99

**COMS W4771 MACHINE LEARNING. 3.00 points.**  
Lect: 3.

Prerequisites: COMS W4701; Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence.

Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov models. Algorithms implemented in MATLAB

**Fall 2024: COMS W4771**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4771	001/11957	T Th 2:40pm - 3:55pm 451 Computer Science Bldg	Nakul Verma	3.00	84/110

COMS 4771	002/11983	T Th 2:40pm - 3:55pm 451 Computer Science Bldg	Nakul Verma	3.00	54/110
COMS 4771	V01/18077		Nakul Verma	3.00	2/99

### PSYC GR6080 Introduction to Neural Networks and Deep Learning. 3.00 points.

This seminar will introduce both the concepts and practical implementation in PyTorch of neural networks and deep learning, with a focus on general principles and examples from vision

## Learning

### PSYC BC2107 PSYCHOLOGY OF LEARNING - LEC. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering the basic methods, results, and theory in the study of how experience affects behavior. The roles of early exposure, habitation, sensitization, conditioning, imitation, and memory in the acquisition and performance of behavior are studied. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1440 Experimental: Learning and Motivation

#### Fall 2024: PSYC BC2107

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2107	001/00069	T Th 10:10am - 11:25am 304 Barnard Hall	Ken Light	3.00	86/100

### COMS W4705 NATURAL LANGUAGE PROCESSING. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134 OR COMS W3136 OR COMS W3137; Or instructor's permission

Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas

#### Fall 2024: COMS W4705

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4705	001/11953	F 10:10am - 12:40pm 417 International Affairs Bldg	Daniel Bauer	3.00	253/275
COMS 4705	002/11954	M W 4:10pm - 5:25pm 451 Computer Science Bldg	Zhou Yu	3.00	75/100
COMS 4705	V01/17525		Daniel Bauer	3.00	18/99

#### Spring 2025: COMS W4705

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

COMS 4705	V01/18074		Daniel Bauer	3.00	16/99

### COMS W4771 MACHINE LEARNING. 3.00 points.

Lect: 3.

Prerequisites: COMS W4701; Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence.

Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov models. Algorithms implemented in MATLAB

#### Fall 2024: COMS W4771

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4771	001/11957	T Th 2:40pm - 3:55pm 451 Computer Science Bldg	Nakul Verma	3.00	84/110
COMS 4771	V01/17526		Nakul Verma	3.00	5/99

COMS 4771	002/11983	T Th 2:40pm - 3:55pm 451 Computer Science Bldg	Nakul Verma	3.00	54/110
COMS 4771	V01/18077		Nakul Verma	3.00	2/99

### PSYC GR6080 Introduction to Neural Networks and Deep Learning. 3.00 points.

This seminar will introduce both the concepts and practical implementation in PyTorch of neural networks and deep learning, with a focus on general principles and examples from vision

## Memory

### PSYC BC2107 PSYCHOLOGY OF LEARNING - LEC. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or

permission of the instructor. Lecture course covering the basic methods, results, and theory in the study of how experience affects behavior. The roles of early exposure, habituation, sensitization, conditioning, imitation, and memory in the acquisition and performance of behavior are studied. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1440 Experimental: Learning and Motivation

Fall 2024: PSYC BC2107

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2107	001/00069	T Th 10:10am - 11:25am 304 Barnard Hall	Ken Light	3.00	86/100

### **PSYC UN2220 COGNITION: MEMORY AND STRESS. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement  
Attendance at the first class is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 *PSYC W1001* or *PSYC W1010*, or the instructor's permission.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructors permission. Memory, attention, and stress in human cognition

Fall 2024: PSYC UN2220

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2220	001/10668	M W 1:10pm - 2:25pm 602 Hamilton Hall	Janet Metcalfe	3.00	49/75

### **PSYC UN3445 THE BRAIN AND MEMORY. 4.00 points.**

Prerequisites: (PSYC UN1010) or

Prerequisites: (PSYC UN1010) or Equivalent introductory course in neuroscience or cognitive psychology and the instructors permission This seminar will give a comprehensive overview of episodic memory research: what neuroimaging studies, patient studies, and animal models have taught us about how the brain creates, stores, and retrieves memories

### **PSYC UN3455 Neurobiology of Working Memory. 4.00 points.**

Working memory is our ability to retain information in mind in the absence of sensory stimuli. In this course we will gain a more thorough understanding of what working memory is and how the brain supports it

Fall 2024: PSYC UN3455

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3455	001/10675	Th 10:10am - 12:00pm 405 Schermerhorn Hall	Sarah DeMoya	4.00	15/15

## **Natural Language Processing**

### **LING UN3103 Language, Brain and Mind. 3.00 points.**

The ability to speak distinguishes humans from all other animals, including our closest relatives, the chimpanzees. Why is this so? What makes this possible? This course seeks to answer these questions. We will look at the neurological and psychological foundations of the human faculty of language. How did our brains change to allow language to evolve? Where in our brains are the components of language found? Are our minds specialized for learning language or is it part of our general cognitive abilities to learn? How are words and sentences produced and their meanings recognized? The structure of languages around the world varies greatly; does this have psychological effects for their speakers?

Fall 2024: LING UN3103

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
LING 3103	001/11718	M W 2:40pm - 3:55pm 140 Uris Hall	William Foley	3.00	37/52

### **PHIL UN3252 Philosophy of Language and Mind. 3 points.**

This course will provide an introduction to meaning, reference, understanding, and content in language, thought, and perception. A central concern will be the question of the relation of meaning to truth-conditions, and what is involved in language and thought successfully latching on to reality. If you have not already taken an elementary course in first order logic, you will need to catch up in that area to understand some crucial parts of the course. All the same, the primary concerns of the course will be philosophical, rather than technical.

### **PSYC GU4236 Machine Intelligence. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course will survey historical and modern developments in machine intelligence from fields such as psychology, neuroscience, and computer science, and from intellectual movements such as cybernetics, artificial intelligence, neural networks, connectionism, machine learning, and deep learning. The emphasis is on the conceptual understanding of topics. The course does not include, nor require background in, computer programming and statistics. A crucial aspect of the seminar is for students to become informed consumers of applications of artificial intelligence

### **PSYC GU4242 Evolution of Language (seminar). 3.00 points.**

Prerequisites: PSYC UN1001 or

This seminar will consider the evolution of language at the levels of the word and grammar, in each instance, phylogenetically and ontogenetically. Since humans are the only species that use language, attention will be paid to how language differs from animal communication.

### **COMS W4705 NATURAL LANGUAGE PROCESSING. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134 OR COMS W3136 OR COMS W3137; Or instructor's permission

Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas

## Neuroeconomics

### PSYC UN2235 THINKING AND DECISION MAKING. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: an introductory course in psychology.

Prerequisites: an introductory course in psychology. Models of judgment and decision making in both certain and uncertain or risky situations, illustrating the interplay of top-down (theory-driven) and bottom-up (data-driven) processes in creating knowledge. Focuses on how individuals do and should make decisions, with some extensions to group decision making and social dilemmas

#### Spring 2025: PSYC UN2235

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2235	001/11826	T Th 11:40am - 12:55pm 501 Schermerhorn Hall	Katherine Fox-Glassman	3.00	117/120

### ECON BC3035 INTERMEDIATE MICROECONOMICS. 4.00 points.

Prerequisites: An introductory course in microeconomics or a combined macro/micro principles course (ECON BC1003

or ECON W1105, or the equivalent) and one semester of calculus or ECON BC1007, or permission of the instructor. Preferences and demand; production, cost, and supply; behavior of markets in partial equilibrium; resource allocation in general equilibrium; pricing of goods and services under alternative market structures; implications of individual decision-making for labor supply; income distribution, welfare, and public policy. Emphasis on problem solving

#### Fall 2024: ECON BC3035

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3035	001/00481	M W 11:40am - 12:55pm 152 Horace Mann Hall	Elizabeth Ananat	4.00	52/60
ECON 3035	002/00482	T Th 1:10pm - 2:25pm 323 Milbank Hall	Lalith Munasinghe	4.00	32/60

**ECON GU4020 ECON OF UNCERTAINTY # INFORMTN. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213* and *STAT 1201*.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Topics include behavior uncertainty, expected utility hypothesis, insurance, portfolio choice, principle agent problems, screening and signaling, and information theories of financial intermediation

**Spring 2025: ECON GU4020**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4020	001/17549	M W 4:10pm - 5:25pm 516 Hamilton Hall	Ingmar Nyman	3.00	26/50

**PSYC GU4287 DECISION ARCHITECTURE. 4.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN2235) or

Prerequisites: (PSYC UN2235) or an equivalent course on judgment and decision making ,AND the instructors permission This course reviews current research in the domain of decision architecture: the application of research in cognitive and social psychology to real-world situations with the aim of influencing behavior. This seminar will discuss recent and classic studies, both of decision theory and of applied decision research, to explore the effectiveness—as well as the limitations—of a selection of these behavioral “nudges.”

**PSYC GU4289 THE GAMES PEOPLE PLAY:PSYCH OF STRAT DEC. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (PSYC UN2235) or

Prerequisites: (PSYC UN2235) or equivalent course on judgment and decision-making A seminar course exploring strategic decision making (also known as behavioral game theory). This course examines the psychology underlying situations in which outcomes are determined by choices made by multiple decision makers. The prime objective will be to

examine the use of experimental games to test psychological theories

**ECON GU4415 GAME THEORY. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 *ECON W3211* and *W3213*.

Prerequisites: ECON UN3211 and ECON UN3213

Introduction to the systematic treatment of game theory and its applications in economic analysis

**Fall 2024: ECON GU4415**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4415	001/11021	T Th 11:40am - 12:55pm 310 Fayerweather	Murat Yilmaz	3.00	68/96

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4415	001/13676	T Th 1:10pm - 2:25pm 142 Uris Hall	Babak Somekh	3.00	80/96

**ECON GU4840 BEHAVIORAL ECONOMICS. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213 Within economics, the standard model of behavior is that of a perfectly rational, self interested utility maximizer with unlimited cognitive resources. In many cases, this provides a good approximation to the types of behavior that economists are interested in. However, over the past 30 years, experimental and behavioral economists have documented ways in which the standard model is not just wrong, but is wrong in ways that are important for economic outcomes. Understanding these behaviors, and their implications, is one of the most exciting areas of current economic inquiry. The aim of this course is to provide a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality and choice under risk and uncertainty. For each area we will study three things: 1. The evidence that indicates that the standard economic model is missing some important behavior 2. The models that have been developed to capture these behaviors 3. Applications of these models to (for example) finance, labor and development economics As well as the standard lectures, homework assignments, exams and so on, you will be asked to participate in economic experiments, the data from which will be used to illustrate some of the principals in the course. There will also be a certain small degree of classroom ‘flipping’, with a portion of many lectures given over to group problem solving. Finally, an integral part of the course will be a research proposal that you must complete by the end of the course, outlining a novel piece of research that you would be interested in doing

**Spring 2025: ECON GU4840**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 4840	001/13576	M W 11:40am - 12:55pm 142 Uris Hall	Mark Dean	3.00	60/96

**ECON GU4850 COGNITIVE MECH # ECON BEHAVIOR. 4.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 *ECON W3211, W3213; STAT 1201.*

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Standard economic theory seeks to explain human behavior (especially in economic settings, such as markets) in terms of rational choice, which means that the choices that are made can be predicted on the basis of what would best serve some coherent objective, under an objectively correct understanding of the predictable consequences of alternative actions. Observed behavior often seems difficult to reconcile with a strong form of this theory, even if incentives clearly have some influence on behavior; and the course will discuss empirical evidence (both from laboratory experiments and observations in the field) for some well-established anomalies. But beyond simply cataloguing anomalies for the standard theory, the course will consider the extent to which departures from a strong version of rational choice theory can be understood as reflecting cognitive processes that are also evident in other domains such as sensory perception; examples from visual perception will receive particular attention. And in addition to describing what is known about how the underlying mechanisms work (something that is understood in more detail in sensory contexts than in the case of value-based decision making), the course will consider the extent to which such mechanisms --- while suboptimal from a normative standpoint that treats perfect knowledge of one's situation as costless and automatic --- might actually represent efficient uses of the limited information and bounded information-processing resources available to actual people (or other organisms). Thus the course will consider both ways in which the realism of economic analysis may be improved by taking into account cognitive processes, and ways in which understanding of cognitive processes might be advanced by considering the economic problem of efficient use of limited (cognitive) resources

**ECON GU4860 BEHAVIORAL FINANCE. 3.00 points.**

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 Neoclassical finance theory seeks to explain financial market valuations and fluctuations in terms of investors having rational expectations and being able to trade without costs. Under these assumptions, markets are efficient in that stocks and other assets are always priced just right. The efficient markets hypothesis (EMH) has had an enormous influence over the past 50 years on the financial industry, from pricing to financial innovations, and on policy makers, from how markets are regulated to how monetary policy is set. But there was very little in prevailing EMH models to suggest the instabilities associated with the Financial Crisis of 2008 and indeed with earlier crises in financial market history. This course seeks to develop a set of tools to build a more robust model of financial markets that can account for a wider range of outcomes. It is based on an ongoing research agenda loosely

dubbed “Behavioral Finance”, which seeks to incorporate more realistic assumptions concerning human rationality and market imperfections into finance models. Broadly, we show in this course that limitations of human rationality can lead to bubbles and busts such as the Internet Bubble of the mid-1990s and the Housing Bubble of the mid-2000s; that imperfections of markets — such as the difficulty of short-selling assets — can cause financial markets to undergo sudden and unpredictable crashes; and that agency problems or the problems of institutions can create instabilities in the financial system as recently occurred during the 2008 Financial Crisis. These instabilities in turn can have feedback effects to the performance of the real economy in the form of corporate investments

**Spring 2025: ECON GU4860**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**Perception****PSYC BC2110 PERCEPTION-LECTURE. 3.00 points.**

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering an introduction to problems, methods, and research in perception. Discussion of psychological studies of seeing, hearing, touching, tasting, and smelling. Note that this lecture can be taken without its affiliated lab, PSYC BC2109, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1480 Perception and Attention; and PSYC UN2230 Perception and Sensory Processes

**Fall 2024: PSYC BC2110**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 2110	001/00070	M W 10:10am - 11:25am 323 Milbank Hall	Robert Remez	3.00	58/55

**PSYC BC3164 PERCEPTION AND LANGUAGE. 4.00 points.**

Prerequisites: BC 1001 and one of the following: BC1106/1107, BC1109/1110, BC1118/1119, BC1128/1129, or permission of the instructor. Enrollment limited to 20 students Psychological investigations of spoken communication from a listener's perspective. Topics include perception and sounds of speech and the apprehension of meaning from words and utterances; the perceptual basis for rhyme and rhythm in speech; and the natural history of vocal communication.

**Spring 2025: PSYC BC3164**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

twentieth-century Appalachia and the haunted remains of coal-mining country--with its depictions of an uncanny otherness within dominant American narratives

**Fall 2024: ANTH UN2004**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 2004	001/10726	M W 10:10am - 11:25am 633 Seeley W. Mudd Building	John Pemberton	3.00	34/60

Prerequisite: An introductory psychology course. An introduction to basic concepts in social cognition, an approach to understanding social judgment and behavior by investigating the underlying mental processes. Topics include attitudes, identity, and prejudice, among others

**PSYC UN2435 Social Neuroscience. 3.00 points.**

This course will provide a broad overview of the field of social neuroscience. We will consider how social processes are implemented at the neural level, but also how neural mechanisms help give rise to social phenomena and cultural experiences. Many believe that the large expansion of the human brain evolved due to the complex demands of dealing with social others—competing or cooperating with them, deceiving or empathizing with them, understanding or misjudging them. What kind of “social brain” has this evolutionary past left us with? In this course, we will review core principles, theories, and methods guiding social neuroscience, as well as research examining the brain basis of processes such as theory of mind, emotion, stereotyping, social group identity, empathy, judging faces and bodies, morality, decision-making, the impact of culture and development, among others. Overall, this course will introduce students to the field of social neuroscience and its multi-level approach to understanding the brain in its social context

**Fall 2024: PSYC UN2435**

Prerequisites: an introductory course in psychology or the instructor's permission.

# COLLOQUIA, INTERDEPARTMENTAL SEMINARS, AND PROFESSIONAL SCHOOL OFFERINGS

Occasionally, and for a variety of reasons, faculty offer courses outside of the existing structure of Arts and Sciences academic departments. Such courses may be colloquia: team-taught interdisciplinary courses; interdepartmental seminars explicitly offered by two or more academic departments; or undergraduate-specific courses offered by faculty outside of the Arts and Sciences. All of these courses may be counted toward the undergraduate degree, but it is for the faculty of each department or program to determine whether or not they can count toward a major or concentration.

## INTERDEPARTMENTAL SEMINARS

### **CNNS UN3900 INDEPENDENT RESEARCH NUCLEAR NONPROLIFERATION. 1.00-4.00 points.**

Prerequisites: The written permission of the faculty member is required. Points: 1-4 The opportunity to conduct an independent research project in nuclear nonproliferation studies is open to all majors. A product and detailed report is presented by the student when the project is completed. Section 1: Emlyn Hughes Section 2: Ivana N. Hughes Section 3: Monica Rouco-Molina

### **INSM UN3920 NOBILITY/CIVILITY: EAST/WEST I. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: one semester of Contemporary Civilization or Literature Humanities, or an equivalent course, and the instructor's permission.

This interdisciplinary colloquium is designed to provide a comparative examination of core human concerns and values across cultures from the ancient to early modern period. This is a discussion-driven course that depends on a close reading of several key literary, philosophical, political, and religious texts from Asia, Africa, and Europe. Prerequisites: one semester of Contemporary Civilization or Literature Humanities, or an equivalent course. A team-taught multicultural, interdisciplinary course examining traditions of leadership and citizenship as they appear in the key texts of early Indian, Islamic, Far Eastern, and Western civilizations. One goal is to identify and examine common human values and issues evident in these texts while also recognizing key cultural differences

### **INSM UN3921 Nobility and Civility II. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: one semester of Contemporary Civilization or Literature Humanities, or an equivalent course, and the instructor's permission.

A team-taught multicultural, interdisciplinary course examining traditions of leadership and citizenship as they appear in the key texts of early Indian, Islamic, Far Eastern, and Western civilizations. One goal is to identify and examine common human values and issues evident in these texts while also recognizing key cultural differences

### **INSM W3950 Friendship in Asian and Western Civilization. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement Enrollment limited to 22.

The colloquium studies ideals and practices of friendship in East Asia and the West. How have two great civilizations understood exemplary friendship in changing historical settings? Literary, historical, and social science approaches. Students are expected to participate actively and to write a substantial paper, working closely with one or both instructors.

### **INSM C3940 Science Across Cultures. 4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement Enrollment limited. Open to seniors and some qualified juniors. Priority given to seniors. **Not offered during 2023-2024 academic year.**

Development of scientific thought from various cultures and from antiquity till the time of the European Renaissance. Provides examples of the process by which scientific thinking has developed and illustrates that, although science may not have always developed in a linear fashion, the problems science was called upon to solve exhibited a continuity that crossed cultural, linguistic, and religious borders.

### **FSEB UN1020 Food and the Body. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

This course will use an evolutionary perspective to focus on what humans need to eat for survival and health. We will examine how and why sufficient and optimal diets can be obtained through a range of dietary patterns, and how those patterns were rooted in different geographic and cultural regions. We will also compare current patterns with those of humans from 200,000, 12,000 and 100 years ago, and where it is instructive, we will compare the food intake and food system of other animals. Throughout the course, the environmental impact of a given dietary pattern will be considered, and where possible, the economic determinants of individual food intake will be reviewed. We will incorporate a lifespan perspective throughout the course.

### **FSPH UN1100 FOOD, PUBLIC HEALTH & PUBLIC POLICY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

The course will provide an introduction to the science, policy, politics, and economics related to food as a critical element

of public health. The course will have a primary focus on the US, but will include a global perspective. Students will learn and apply the fundamentals of public health scientific research methods and theoretical approaches to assessing the food landscape through a public health lens. In addition, the course will cover how nutrition – at first glance a matter of individual choice – is determined by an interconnected system of socio-economic-environmental influences, and is influenced by a multitude of stakeholders engaged in policymaking processes. The course will be structured into four “themes”: 1) Why food is a public health priority, 2) Evidence, causal inference and measurement and its role in understanding and designing public health research on food, 3) The food environment, and 4) Change agents and levers: individuals, policy, and politics in food and public health. The course will use a systems thinking approach and systems thinking tools to examine and understand the interconnectedness of the social, economic, environmental, political and economic influences and consequences that affect food and public health. This course partially fulfills the Science Requirement as a science course for non-science majors

**CGTH UN3401 Seminar in Global Thought: Inquiries into an Interconnected World. 4 points.**

This course on global thought will consider the ways in which we think about, debate, and give meaning to the interconnected world in which we live. In thematically focused collaborative teams, students will examine how the flows of people, things and ideas across national borders both connect our world and create uneven consequences within and among communities.

We will locate ourselves in these processes, suggesting we need go no further than our closets, tables, and street corners to consider the meanings of globalization and our roles in the world today. This course has been approved to partially satisfy the Global Core requirement.

**Fall 2024: CGTH UN3401**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CGTH 3401	001/11808	T 12:10pm - 2:00pm 607 Hamilton Hall	Laura Neitzel	4	20/20

**CGTH UN3402 YOUTH-INTERCONNECTED WRLD. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

What does it mean to be 20 years old in our rapidly changing, interconnected world? There are more youth (aged 15-25) in the world today than at any other time in history, with the majority living in the developing world. They approach adulthood as the world confronts seismic shifts in the geopolitical order, in the nature and future of work, and in the ways we connect with each other, express identity, engage politically, and create communities of meaning. What unique challenges and opportunities confront young people after decades of neoliberal globalization? What issues are most pressing in developing nations experiencing a “youth bulge” and how do they compare to developed nations with rapidly aging populations? How do young people envision their futures and the future of the

world they are inheriting? This course will examine recent scholarship while engaging the young people in the class to define the agenda and questions of the course, and to conduct their own research. This course is part of the Global Core curriculum. “Global 20” complements a new research project of the Committee on Global Thought, “Youth in a Changing World,” which investigates from the perspective of diverse participants and of young people themselves, the most pressing issues confronting young people in the changing world today. The course will serve as an undergraduate “lab” for the project, and among other involvements, students in the course will help conceive, plan, and take part in a NYC-wide “Youth Think-In” sponsored by the CGT during the Spring 2018 semester. Within the course, students will become “regional experts” and examine the primary themes of the class through the prism of specific areas or nations of their choosing. A final class project includes a “design session” that will consider how universities might better train and empower youth to confront the challenges and embrace the opportunities of our interconnected world of the 21st century

## PROFESSIONAL SCHOOL OFFERINGS

**PUBH UN3100 FUNDAMENTALS OF GLOBAL HEALTH. 3.00 points.**

Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences, and humanities, students will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. The first unit of the class will focus on establishing the foundations for a public health approach to understanding the challenges of global health. This will involve exploration of the factors shaping the global distribution of disease and their connection with issues of social, economic, and political development, as reflected in the Millennium Development Goals. The second unit will explore in further detail a number of major health priorities. A significant goal of the class will be to identify common sources of vulnerability and challenge across health risks, and the consequent need for a systemic approach to their being addressed. The third and final unit builds upon this analysis to demonstrate the multi-disciplinary, multi-level approach required to effectively address global health priorities, and the political and organizational cooperation required to achieve this. The class concludes with an analysis of the major challenges and threats to global coordination regarding such threats as pandemic influenza and emerging health threats related to climate change. Offered in the spring

### **PUBH UN3200 INTRODUCTION TO PUBLIC HEALTH. 3.00 points.**

An introduction to and overview of public health. Through a series of sessions with leading public health experts, this course views the multifaceted nature of public health through a prismic lens addressing key concepts, approaches, and issues of historical and contemporary import: What is public health and how has public health evolved over time? What are the core methods of public health? What are the approaches to understanding and addressing both infectious and chronic, non-communicable diseases? What role do micro- and macro-level determinants (i.e. biology and social context) play in public health? What are the global trends in population health? How does the individual life course bear on population health? How do systems, policy, and population health mutually shape each other? How are public health programs designed and evaluated? What are the limits of public health?

**Fall 2024: PUBH UN3200**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **PUBH UN3400 Data Science and Health Equity in New York City. 3.00 points.**

This course, which has no pre-requisites, teaches students about data science and public health. Students will create and answer public health research questions related to health equity in NYC. The course will use publicly available NYC health data to learn the seven steps of data science: 1) writing a research question; 2) obtaining data to address the question; 3) data cleaning; 4) data exploration; (5) analysis; 6) replication and validity evaluation; and (7) presentation and summary. The course will introduce students to R

**Fall 2024: PUBH UN3400**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### **PUBH GU4100 (Y)OUR LONGER LIFE. 3.00 points.**

People are living 30 years longer than we did 100 years ago. We have created a whole new stage of life. How do we prepare to benefit from our longer lives? What can you do in your own life? This course explores the personal, population, community,

and societal dimensions of our now-longer lives, of aging itself, and the role of health and societal design in the experience of aging. The course examines the meaning of aging and the attendant expectations, myths, fears, and realities. The course examines an aging society as a public health success, the potential for building health futures, the health plan you want to be healthy in old age, and the potential for longer lives and how we unlock it. It addresses the roles public health currently plays and can play in shaping a society for an aging population. The course explores how a public health system—indeed, a society—optimized for an aging population stands to benefit all. The course also examines the physical, cognitive, and psychological aspects of aging, the exposures across our lives that affect these, the attributes and challenges of aging, keys to successful aging, and aging around the globe. The culminating project will design elements of our society that are needed to support the opportunity of having longer lives. This course comprises lectures, class discussions, individual assignments, in-class case activities, and a group project in which students shall take an active role. You will be responsible for regular preparatory assignments, writing assignments, one group project, and attending course sessions. Please note: GSAS students must receive permission from their department before registering for this course

**Spring 2025: PUBH GU4100**

PUBH 4100	001/13110	T Th 4:10pm - 5:25pm Cin Alfred Lerner Hall	Dana March	3.00	83/100

### **PUBH GU4200 Environment, Health, and Justice: Concepts and Practice. 3.00 points.**

Please note: this class was designed as part of the Special Concentration in Public Health. It is open to undergraduates, as well as students in Public Health, and will be taught on the Morningside campus. This course introduces key concepts on environmental health sciences and environmental justice and their application to address environmental health disparities affecting communities in New York City, across the United States and globally. The course will present theory and methods needed to characterize, understand and intervene on environmental health problems with a focus on methods that are particularly appropriate for environmental justice research and interventions. We will describe environmental health disciplines such as exposure sciences, environmental epidemiology, environmental biosciences and toxicology, as well as methods to assess expected environmental health impacts

# COMPARATIVE LITERATURE AND SOCIETY

## THE INSTITUTE FOR COMPARATIVE LITERATURE AND SOCIETY:

Department website: <https://icls.columbia.edu/>

Office location: B101 Heyman Center

Office contact: 212-854-8850, [icls@columbia.edu](mailto:icls@columbia.edu)

Director of Undergraduate Studies: Tadas Bugnevičius,  
[tb2333@columbia.edu](mailto:tb2333@columbia.edu)

Director of Medical Humanities: Rishi K. Goyal,  
[rkg6@cumc.columbia.edu](mailto:rkg6@cumc.columbia.edu)

Undergraduate Administrator: Tomi Haxhi,  
[th2666@columbia.edu](mailto:th2666@columbia.edu)

## COMPARATIVE LITERATURE AND SOCIETY AND MEDICAL HUMANITIES MAJORS

The major in Comparative Literature and Society (CLS) allows qualified students to study literature, culture, and society with reference to material from several national traditions, or in combination of literary study with comparative study in other disciplines in the humanities and social sciences. The program is designed for students whose interest and expertise in languages other than English permit them to work comparatively in several national or regional cultures. The course of study differs from that of traditional comparative literature programs, both in its cross-disciplinary nature and in its expanded geographic range, including not just European, but also Asian, Middle Eastern, African, and Latin American cultures. Students will thus explore a variety of methodological and disciplinary approaches to cultural and literary artifacts in the broadest sense. The cross-disciplinary range of the program includes visual and media studies; the law and the humanities; and studies of space, cities, and architecture.

ICLS also offers a major in Medical Humanities (MedHum). At the level of the individual patient, medicine and medical systems diagnose and treat disease to prolong life and to diminish the suffering that accompanies illness. But in many societies, the reach of modern biomedicine far exceeds the intimate zone of patient and caregiver encompassed by this model. From climate change and food activism to city planning and public housing, from family planning and surrogacy to gendered and racial identities, the biomedical model of health

now underwrites national and supra-state policies, corporate ventures, targets of social and political activism and modes of individual engagement. Students enrolled in the Medical Humanities major work at the intersection of these different forces and discourses, examining the many factors, from the biological to the social, economic, political and aesthetic, that influence health and shape our perceptions of physical and psychological well-being.

Both majors require an application. Please see the admissions details on [our website](#).

## STUDENT ADVISING

Director of Undergraduate Studies: Tadas Bugnevičius,  
[tb2333@columbia.edu](mailto:tb2333@columbia.edu)

Director of Medical Humanities: Rishi K. Goyal,  
[rkg6@cumc.columbia.edu](mailto:rkg6@cumc.columbia.edu)

Undergraduate Administrator: Tomi Haxhi,  
[th2666@columbia.edu](mailto:th2666@columbia.edu)

## Consulting Advisers

Students intending to seek admission to the Comparative Literature and Society major are encouraged to speak as soon as possible to the Director of Undergraduate Studies (DUS), Tadas Bugnevičius ([tb3111@columbia.edu](mailto:tb3111@columbia.edu)). Students intending to seek admission to the Medical Humanities major are encouraged to speak as soon as possible to the Director of Medical Humanities, Rishi Goyal, ([rkg6@cumc.columbia.edu](mailto:rkg6@cumc.columbia.edu)) and the Director of Undergraduate Studies, Tadas Bugnevičius ([tb3111@columbia.edu](mailto:tb3111@columbia.edu)).

Students enroll in either major at the beginning of the spring semester of the sophomore year by completing the admissions form that can be found on [our website](#) and submitting the completed form along with a transcript and one-page statement of academic interests.

In the fall semester, students are invited to attend a Meet-n-Greet, an informal discussion with current and prospective majors, our DUS and our Director of Medical Humanities.

## Enrolling in Classes

The ICLS majors require that you take the Intro course (CPLS V3900) in the spring semester of your sophomore year, and the Senior Seminar (CPLS V3991) in the fall semester of your senior year. Enrollment in the Intro course requires that you have already applied to the major or concentration. When it comes time to register, add the course to your waitlist and you will be admitted by a member of the ICLS team.

## Preparing for Graduate Study

CLS majors often apply to PhD programs and occasionally to MA programs in Humanities and Social Sciences. All students should meet with the Director of Undergraduate Studies, Tadas

Bugnevicus, to discuss their plans for graduate studies as early as they can.

Medical Humanities majors often pursue graduate studies. Students apply to medical school, master's programs in public health and PhD programs in the Sciences, Humanities and Social Sciences. Premedical students should meet with their pre-medical advisor. All students should meet with the Director of Medical Humanities, Rishi Goyal, to discuss their plans for graduate studies as early as they can.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

Coursework in fulfillment of a major or minor must be taken at Columbia University unless explicitly noted here and/or expressly permitted by the Director of Undergraduate Studies of the program. Exceptions or substitutions permitted by the Director of Undergraduate Studies should be confirmed in writing by email to the student.

### Advanced Placement

ICLS does not accept any advanced placement credit toward courses in our curriculum.

### Barnard College Courses

Barnard courses 3000-level and above are considered for this major with the exception of the Barnard Introduction to Comparative Literature. That course cannot be substituted for our required Introduction to Comparative Literature and Society. Students should consult with the DUS on their course schedule to ensure the courses they choose will meet their course requirements.

### Transfer Courses

When students transfer to Columbia from other institutions, their coursework at their previous institution must first be considered by their school in order to be evaluated for degree credit (e.g., to confirm that the courses will count toward the 124 points of credit that every student is required to complete for the B.A. degree). Only after that degree credit is confirmed, departments may consider whether those courses can also be used to fulfill specific degree requirements toward a major at ICLS.

### Study Abroad Courses

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Undergraduate Global Engagement and taught by Columbia instructors) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus. If they are not explicitly listed by ICLS as fulfilling requirements in the major, the DUS will need to confirm that they can be used toward requirements in the major.

Classes taken abroad through other institutions and programs are treated as transfer credit to Columbia and are subject to the

same policies as other transfer courses. There will be a limit on the number of courses taken abroad that can be applied to the major, and they must be approved by the DUS.

### Summer Courses

Summer courses at Columbia are offered through the School of Professional Studies. Courses taken in a Summer Term may be used toward requirements for the major only as articulated in department/institute/center guidelines or by permission of the Director(s) of Undergraduate Studies. More general policies about summer coursework can be found in the Academic Regulations section of this Bulletin.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

The ICLS majors teach students critical theory and interdisciplinary thinking that are applicable to many areas of knowledge. The required Intro course (CPLS V3900) introduces students to theoretical and interdisciplinary methods. The required Senior Seminar (CPLS V3991) introduces students to contemporary theoretical debates and is based on current research interests of ICLS faculty. Students are also given an opportunity to develop an independent research project. The optional Senior Thesis workshop (CPLS 3995) is fully dedicated to advanced independent research.

### Senior Thesis Coursework and Requirements

The senior thesis is optional. If you want to be considered for departmental honors, it is required. It is a piece of scholarly research, the model for which is an academic journal article. A translation or a piece of creative work, such as a piece of creative writing, can be submitted with the prior approval of the DUS, and must be accompanied by an explanatory introduction or foreword of no less than 5000 words in length.

Students interested in writing a senior thesis will submit a thesis proposal in the spring semester of their junior year. Students who decide to write a thesis will enroll in a year-long course (CPLS3995) starting in the fall of their senior year. Detailed information can be found on [our website](#).

## DEPARTMENT HONORS AND PRIZES

### Department Honors

To be eligible for departmental honors students must have a minimum grade point average of 3.6 for courses in the major. Departmental honors will be conferred only on students who have submitted a superior senior thesis that clearly demonstrates originality and excellent scholarship. Please note that the senior thesis is not required for the major. Please keep in mind that, according to Columbia College rules, no more

than 10% of the majors graduating in a department or program in a given year may be awarded Departmental Honors.

## Academic Prizes

Each year, ICLS presents one to two seniors with the Catherine Medalia Johannet Memorial Prize in Comparative Literature and Society. These prizes were created by family and friends in memory of Catherine Medalia Johannet, a Medicine, Literature and Society major, CC'15, consistent with Catherine's interest in literature and its use in effecting change in society.

One to two prizes will be awarded annually to a Comparative Literature & Society or Medical Humanities major who has written a distinguished senior thesis that demonstrates the highest academic rigor, creativity and engagement with ethical questions. The winner will be chosen by a faculty committee consisting of the Director of Undergraduate Studies, the Director of the Medical Humanities major and two other faculty members associated with ICLS.

CLS majors in the School of General Studies for the John Angus Burrell Memorial Prize for distinction in English and Comparative Literature.

## OTHER IMPORTANT INFORMATION

**CLS Foreign Language Requirement:** Since students are expected to be able to conduct basic research in a foreign language they must, by the time they apply, meet the following foreign language requirement:

Foreign Language #1: you must have taken or be taking in the spring semester of your sophomore year, at least one advanced course in a foreign language. The course should be taken at Columbia, Barnard or a peer institution. 'Advanced' signifies a course at the 3000- or 4000- level that is not a conversation course. The course does not have to be conducted in the target language but most of the readings must be in the language.

Foreign language #2: you must have completed or be completing in the spring semester of your sophomore year, the equivalent of least 4 semesters of a foreign language. This can be satisfied by either 4 semesters in one language or 2 semesters each in 2 different languages. These four semesters may be taken at Columbia or reflected in AP scores, summer program credits, etc. Native and heritage speakers must take a placement test to confirm their level unless they have completed high school in the foreign language.

**MedHum Foreign Language Requirement:** Students must have taken at Columbia or be taking during the spring semester of the sophomore year at least one advanced course in a foreign language. 'Advanced' signifies a course at the 3000- or 4000- level that is not primarily a language training course. Note that the course does not have to be conducted in the language but

most of the readings must be in the language. An additional advanced language course will be required as part of your major course requirements.

**Executive Committee of ICLS** Nadia Abu El-Haj (Anthropology, Center for Palestine Studies) Tadas Bugnevicius (French and ICLS) Bruno Bosteels (Latin American and Iberian Cultures) Claudia Breger (Germanic Languages) Souleymane Bachir Diagne (French and Romance Philology) Madeleine Dobie (French and Romance Philology) Brent Hayes Edwards (English and Comparative Literature, Jazz) Matthew Engelke (Religion) Kevin A. Fellezs (Music) Stathis Gourgouris (Classics, English and Comparative Literature) Rishi Kumar Goyal (Emergency Medicine) Seth Kimmel (Latin American and Iberian Cultures) Adam Leeds (Slavic Languages) Lydia H. Liu (East Asian Languages and Cultures) David B. Lurie (East Asian Languages and Cultures) Anupama P Rao (History, Barnard) Pamela Smith (History and Center for Science and Society) Gayatri Chakravorty Spivak (University Professor of the Humanities) Dennis Tenen (English and Comparative Literature)

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

Students who entered Columbia (as first-year students or as transfer students) in or after Fall 2024 may select from a curriculum of majors and minors. The requirements for the Bachelor of Arts degree, and role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students who entered Columbia in or before Fall 2023 may select from a curriculum of majors and minors and concentrations. The requirements for the Bachelor of Arts degree, and the role of majors and minors in those requirements, can be found in the Academic Requirements section of the Bulletin dated the academic year when the student matriculated at Columbia and the Bulletin dated the academic year when the student was a sophomore and declared programs of study.

Students should consult the Admissions information on the Institute for Comparative Literature and Society website for details on the application requirements. Students are also encouraged to attend the annual Undergraduate Meet-n-Greet held in October. Consult the events page of our website or contact [icls@columbia.edu](mailto:icls@columbia.edu) for details on this meeting which is open to all prospective majors.

## Course Numbering Structure

Courses at the Institute for Comparative Literature and Society have the subject code CPLS - Comparative Literature and Society, or CLPS - Comparative Literature and Psychoanalytic Study. Additionally, the Institute cross-lists courses from our affiliated faculty each semester. These courses can be found on the Directory of Classes under our departmental page. For our majors, all coursework should be 3000-level or above. Lectures at the 2000-level are only accepted within coursework with special permission from the DUS. All coursework in these interdisciplinary majors should be approved by the DUS prior to the end of the change period.

## Guidance for First-Year Students

Prospective majors should focus their efforts on meeting the language requirements for our major.

For Comparative Literature and Society Majors:

Foreign Language #1: you must have taken or be taking in the spring semester of your sophomore year, at least one advanced course in a foreign language. The course should be taken at Columbia, Barnard or a peer institution. 'Advanced' signifies a course at the 3000- or 4000- level that is not a conversation course. The course does not have to be conducted in the target language but most of the readings must be in the language.

Foreign language #2: you must have completed or be completing in the spring semester of your sophomore year, the equivalent of at least 4 semesters of a foreign language. This can be satisfied by either 4 semesters in one language or 2 semesters each in 2 different languages. These four semesters may be taken at Columbia or reflected in AP scores, summer program credits, etc. Native and heritage speakers must take a placement test to confirm their level unless they have completed high school in the foreign language.

### For Medical Humanities Majors:

Foreign Language Requirement: Students must have taken at Columbia or be taking during the spring semester of the sophomore year at least one advanced course in a foreign language. 'Advanced' signifies a course at the 3000- or 4000-level that is not primarily a language training course. Note that the course does not have to be conducted in the language but most of the readings must be in the language. An additional advanced language course will be required as part of your major course requirements.

For less commonly taught languages, students should consult with the DUS to determine how to meet the advanced language course requirement.

## Guidance for Transfer Students

Transfer students should consult with the DUS upon arrival at Columbia University to prepare their application for the major. They should not wait until the usual application period. The

Introduction to Comparative Literature and Society course (CPLS UN3900) should be taken during their first spring term at Columbia University.

## UNDERGRADUATE PROGRAMS OF STUDY

### Required Coursework for all Programs

The ICLS majors require that you take the Intro course (CPLS UN3900) in the spring semester of your sophomore year, and the Senior Seminar (CPLS UN3991) in the fall semester of your senior year. Enrollment in the Intro course requires that you have already applied to the major or concentration. When it comes time to register, add the course to your waitlist and you will be admitted by a member of the ICLS team.

### Major in Comparative Literature and Society

The major in Comparative Literature and Society consists of a minimum of 33 points or 11 courses, distributed as follows. Courses taken to fulfill the application requirements do not count toward the major. Courses fulfilling major requirements must be advanced, discussion-based seminars. Language courses in the Beginner I to Intermediate II stream cannot be counted to fulfill any major requirement. With the exception of courses taken to satisfy the global core requirement, double counting of courses to the CPLS major and another program or university requirement must be pre-approved by the DUS.

1. Introduction to ICLS (CPLS UN3900), taken in the spring of the sophomore year (3 points)
2. Two courses with a CPLS designator. CLXX courses, i.e. courses cross-listed between ICLS and other departments, may also be counted toward this requirement (6-8 points)
3. Two seminars in a humanities or social science discipline other than literature (e.g. Architecture, Anthropology, Art History, Economics, Gender & Sexuality Studies, History, Law, Linguistics, Music, Political Science, Race & Ethnicity Studies, Sociology...). The two courses must be grounded in the same disciplinary approach but don't have to be offered by the same department or program (6-8 points)
4. Two courses requiring readings in a language other than English. (The two courses cannot be taken in the same foreign language) (6-8 points)
5. Two courses focusing on a specific national or regional literature or culture, chosen from any discipline (The two courses may focus on the same nation/region) (6-8 points)
6. One elective course reflecting the student's intellectual interests. Additional foreign language study may also be counted with DUS approval (3-4 points)

## 7. Senior Seminar in Comparative Literature and Society (CPLS UN3991).

The senior seminar is taken in the fall semester of the senior year. Students explore three areas of contemporary reflection in the field of comparative literature and society. Topics change yearly and are aligned with current ICLS research projects.

Recent examples include Global Racisms, Literary Cultures, Digital Humanities, and Medical Humanities.

### 1. (Optional) Senior Thesis (CPLS 3995) (3 points)

Students who decide to write a thesis will submit a proposal in the spring term of their junior year and enroll in a year-long course (CPLS UN3995) starting in the fall of their senior year. This year-long, 3-credit course (1 credit in Fall, 2 credits in Spring) will allow students to receive academic credits for their thesis, and to count the thesis towards completion of their major requirement when necessary (Requirement #10 of the CLS Course Chart).

Students should consult frequently with the DUS to ensure that their program of study develops in consonance with the intellectual project described in the focus statement that was presented as part of the admissions process. The faculty understands that this statement is itself a work in progress, but also that it serves as a useful guide to the student's academic pursuits and course selection.

Comparative Literature and Society majors should also consider the Barnard College course offerings in Comparative Literature. They are also strongly encouraged to avail themselves of the opportunity to study abroad.

## Major in Medical Humanities

The major in Medical Humanities consists of a minimum of 33 points or 11 courses, distributed as follows.

### 1. Introduction to Comparative Literature & Society (CPLS UN3900): 3 points

This course introduces important methodologies and areas of disciplinary reflection in contemporary comparative literature. It is taken jointly with comparative literature and society majors taken in the spring semester of a student's sophomore year. In addition to units on narrative, authorship and the history and practice of comparative and world literature it includes units relating to science, health and medicine, race, gender and sexuality that are directly relevant to MedHum majors.

### 1. 1 course with a CPLS or CL- course identifier: 3-4 points

Students choose from among the wide range of courses sponsored by the Institute for Comparative Literature and Society or cross-listed between ICLS and other departments. These offerings change every semester and are listed on the ICLS website.

### 2. 1 course with readings in a language other than English: 3-4 points

Students may either take a course that is taught wholly or partially in a foreign language, or a course taught in English for which they have received approval to do most of the reading in a foreign language.

### 3. 3 courses that form the disciplinary/methodological nexus of the student's interests: 9-12 points

Students will develop an individualized course of study at the nexus of health, society and the humanities in discussion with the DUS (Some example of prior constellations include but are not limited to: Literature and Medicine; Narrative Medicine; Medical Anthropology; History of Medicine; Comparative Public Health; Disability studies; Neuroscience; Biopolitics; Bioethics.)

### 4. 2 required core courses in Medical Humanities: 6 points

The core courses in medical humanities are designated as any course taught by faculty on the medical humanities advisory board that emphasizes the content, methods, theories, and approaches of the medical humanities. Please confirm with the Director of Medical Humanities if you have any questions

### 5. 2 classes in the biological or biochemical sciences: 6-8 points

Students in the MedHum major should be versed in contemporary and classical debates and knowledge in the biological sciences. Students may take any two biology or biochemistry classes that relate to fundamental concepts in human biology.

### 6. Senior Seminar at ICLS: 3 points

The senior seminar is taken in the fall semester of the senior year. Students explore three areas of contemporary reflection in the field of comparative literature and society. Topics change yearly and are aligned with current ICLS research projects. Recent examples include Global Racisms, Literary Cultures, Digital Humanities, and Medical Humanities.

### 7. Senior Thesis (optional): 3 pts

Students who decide to write a thesis will submit a proposal in the spring semester of their junior year and enroll in a year-long course (CPLS UN3995) starting in the fall of their senior year. This year-long, 3-credit course (1 credit in Fall, 2 credits in Spring) will allow students to receive academic credits for their thesis, and to count the thesis towards completion of their major requirement when necessary.

The specific course of study must be approved by the DUS.

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Comparative Literature and Society

PLEASE NOTE: this information is for students already in the program. The concentration is no longer accepting new students as of Fall 2024.

The concentration in Comparative Literature and Society consists of a minimum of 27 points or 9 courses, distributed as follows. Please note that courses taken to fulfill the application requirements do not count toward the major. Courses fulfilling concentration requirements must be advanced, discussion-based seminars. Language courses in the Beginner I to Intermediate II stream cannot be counted to fulfill any concentration requirement. With the exception of courses taken to satisfy the global core requirement, any double counting of courses to the CPLS concentration and another program or university requirement must be approved by the DUS.

1. Introduction to ICLS (CPLS UN3900), taken in the spring of the sophomore year (3 points).
2. Two courses with a CPLS designator. CL– courses, i.e. courses cross-listed between ICLS and other departments, may also be counted toward this requirement (6-8 points)
3. Two seminars in a humanities or social science discipline other than literature (e.g. Architecture, Anthropology, Art History, Economics, Gender & Sexuality Studies, History, Law, Linguistics, Music, Political Science, Race & Ethnicity Studies, Sociology...). The two courses must be grounded in the same disciplinary approach but don't have to be offered by the same department or program (6-8 points)
4. Two courses requiring readings in a language other than English (the two courses cannot be taken in the same foreign language) (6-8 points)
5. One course focusing on a specific national or regional literature or culture, chosen from any discipline (3-4 points)
6. Senior Seminar in Comparative Literature and Society (CPLS UN3991)

The senior seminar is taken in the fall semester of the senior year. Students explore three areas of contemporary reflection in the field of comparative literature and society. Topics change yearly and are aligned with current ICLS research projects. Recent examples include Global Racisms, Literary Cultures, Digital Humanities, and Medical Humanities.

7. (Optional) Senior Thesis (CPLS UN3995) (3 points)

Students who decide to write a thesis must submit a proposal spring semester of their junior year and enroll in a year-long course (CPLS3995) starting in the fall semester of their senior year. This year-long, 3-credit course (1 credit in Fall, 2 credits in Spring) will allow students to receive academic credits for their thesis, and to count the thesis towards completion of their requirements when necessary.

Students should consult frequently with the DUS to ensure that their program of study develops in consonance with the intellectual project described in the focus statement that was presented as part of the admissions process. The faculty understands that this statement is itself a work in progress, but also that it serves as a useful guide to the student's academic pursuits and course selection.

Comparative Literature and Society concentration students should also consider the Barnard College course offerings in Comparative Literature. They are also strongly encouraged to avail themselves of the opportunity to study abroad.

## SPRING 2025 COURSES

### CPLS UN3900 INTRO TO COMP LIT # SOCIETY. 3.00 points.

Introduction to concepts and methods of comparative literature in cross-disciplinary and global context. Topics may include: oral, print, and visual culture; epic, novel, and nation; literature of travel, exile, and diaspora; sex and gender transformation; the human/inhuman; writing trauma; urban imaginaries; world literature; medical humanities. Open only to students who have applied for and declared a major in Comparative Literature and Society or Medical Humanities

#### Spring 2025: CPLS UN3900

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CPLS 3900	001/13847	M 12:10pm - 2:00pm 401 Hamilton Hall	Tadas Bugnevicius	3.00	17/20
CPLS 3900	002/13848	T 12:10pm - 2:00pm 301m Fayerweather	Rishi Goyal	3.00	12/20

### CPLS UN3931 Life at the End of Life: Palliative Care and Service. 4.00 points.

Life at the End of Life (LATEOL) is a seminar designed to provide opportunities for readings and reflections on the experience of volunteer service work. Students will learn how to critically reflect on their experiences working with patients in the context of questions raised in the texts read in the seminar. Students will develop the skills necessary to critically reflect on the significance of emotional care as a medical practitioner, as well as form a deeper understanding of the role of palliative care and comfort care in a life cycle of care. The fieldwork component of the course is met by the student's continued direct service work during the course itself. Students participating in the seminar will volunteer weekly at Terence Cardinal Cooke Health Care Center. Through this, students will provide emotional support and assistance, and serve as a

consistent presence for someone experiencing chronic illness, disability, or the end of life. At the core of this framework is the patient; however, it is important to consider the impact this volunteer service will have on the student and Columbia. Therefore, the following specific goals and objectives are outlined to benefit each individual and group involved in this service relationship

**CPLS UN3951 Narratives for Living: Planetary. 3.00 points.**

Is it possible to read literature in such a way as to be coherent with the requirements for the environmental disaster that seems to be upon us? This course will attempt to answer this question through 4 novels dealing with planetary and climate change. This is a restricted course by interview only. ICLS students will read the Bengali and/or French texts in the original. Students are required to write a 1 page response to the text to be read the next day by midnight the previous day. Class discussions will be constructed on these responses. There will be a colloquium at the end of the semester, requiring oral presentation of a research paper that will engage the entire class

**CPLS GU4162 Transnational Feminisms-China and Beyond. 3.00 points.**

This is an interdisciplinary seminar for graduate students and advanced undergraduates to explore transnational feminisms, gender politics in China, and the movement of feminist (and anti-feminist) ideas across borders. We will read some translations of primary works by Chinese writers, as well as feminist scholarship in English to gain insight into the following areas: social movements; gender, race, ethnicity and class; global capitalism and inequalities; sexualities; identities; digital activism; nationalisms; marriage and families; and the politics of reproduction. Although the course has no formal prerequisites, it assumes some basic knowledge about Chinese history and intersectional approaches to gender. If you have never taken a course on China before, please ask me for guidance on whether or not the course is suitable for you

**Spring 2025: CPLS GU4162**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**CPLS GU4356 Critical Cartographies. 3.00 points.**

“Los cuatro puntos cardinales son tres: el norte y el sur,” the Chilean poet Vicente Huidobro wrote with sharp humor in *Altazor o el viaje en paracaídas* (*Altazor or the Voyage in a Parachute*): “The four cardinal points are three: North and South.” The North/South division is not the only marker of spatial, geopolitical, economic, or ideological inequalities; several other divides compete with it as the axis around which our global order is structured: West/the rest, center/periphery, urban/rural, public/private, land/sea, common/enclosed, developed/developing, colonial/postcolonial, without forgetting the old ideological divisions of First, Second, Third, and Fourth Worlds. In response to such spatial divides, this course will explore a range of critical attempts in art, literature, the social sciences and the theoretical humanities to map out the unequal organization of the current world order. Studying concepts of so-called “primitive” or “originary” accumulation, land appropriation, dispossession, uneven development, real abstraction, and neo-extractivism with a particular focus on Latin America, we will circle back to the question of how to imagine a cartography that might be critical of the current hegemonies without increasing the worldwide zones of invisibility and inequality that sustain them

**Spring 2025: CPLS GU4356**

**CPLS GU4375 The Poetics of Social Forms: The Legacy of Fredric Jameson. 3.00 points.**

Fredric Jameson was the foremost Marxist thinker of the United States in the post-War period. His dialectical presentation of European thought set the terms of reception and debate of many of the European figures, ideas, and approaches that instigated a tumultuous rethinking of the humanities in U.S. academia from the 70s to the 90s. Amid that reception, he developed his own enormously influential approach to criticize the modern and postmodern cultural logics of capitalism and late capitalism. Although his oeuvre sprawls, it spirals through a series of themes: ideology and mass culture, narrative and History, the triad of realism, modernism, and postmodernism, periodization and cultural revolution, temporality and Utopia. This seminar charts one path through his prodigious theorizing

**CPLS GU4545 Wittgenstein in the Machine. 4.00 points.**

This seminar explores the intersections between Ludwig Wittgenstein's philosophy and key developments in artificial intelligence. We will examine how Wittgenstein's later philosophy challenges contemporary debates about the capabilities and limitations of machine intelligence. We will also learn how AI practitioners actively engage with Wittgenstein's ideas, developing innovative methods in machine translation, semantic networks, or natural language processing (NLP) in general

**CPLS GU4565 Motherhood and Technology: From Conception to Birth. 3.00 points.**

This seminar will explore how technological innovations have radically transformed the experience of biological motherhood, from (pre-)conception to pregnancy and birth. The twenty-first century has seen rapid advances in genomic and reproductive care, the circulation of new family and kinship structures, the entrenchment of existing global networks of power and privilege, and the politics of contested bodily sites. But while technology might seem to be the main driver of these changes, the revolution in motherhood is as much a product of transformation in other domains: ethics, social structures, aesthetics, and experience. Together, we will work to understand how medical technologies have changed—and have been changed by—the experience of biological motherhood in a global context. We will encounter technologies for regulating and shaping biological motherhood: for instance, contraceptive devices, pregnancy tests, genetic editing tools, egg freezing and cryogenic storage for embryos, prenatal tests and scans,

gestational surrogacy and its global commercial markets, and new frontiers of technology which enable novel forms of biological parentage (e.g. gestational parenthood for trans men; babies with the DNA of two fathers). At every turn, we will consider not only the positive and liberating affordances of such technologies, but also the (sometimes unexamined) burdens that trail their imbrication in the lives of mothers and parents. The seminar will particularly suit students who are interested in the medical humanities, in pre-medical studies, in literary memoir, and in bioethics and critical theory

**CPLS GU4876 1001 Nights, Then and Now. 4.00 points.**

This course explores the origins, performance, reception, adaptation, and translation of *The Thousand and One Nights*, one of the most beloved and influential story collections in world literature. An authorless collage built up over centuries, it is an “ocean” of narratives that has much to teach us about how stories work, whether they must come to an end, and our apparently bottomless desire to hear them. In addition to reading the tales themselves and studying their themes and devices, we will delve into the very real history of this curious work and its eccentric interpreters, translators, and readers. Finally, we will consider how the *Nights* puts pressure on ideas of authorship and originality and enlarges our notion of what a book is – and might be

**CPLS GU4201 BASIC CONCEPTS-POST-FREUD THGT. 4.00 points.**

This course examines psychoanalytic movements that are viewed either as post-Freudian in theory or as emerging after Freud's time. The course begins by considering the ways Freud's cultural and historical surround, as well as the wartime diaspora of the European psychoanalytic community, shaped Freudian and post-Freudian thought. It then focuses on

significant schools and theories of psychoanalysis that were developed from the mid 20th century to the present. Through readings of key texts and selected case studies, it explores theorists' challenges to classical thought and technique, and their reconfigurations, modernizations, and total rejections of central Freudian ideas. The course concludes by looking at contemporary theorists' moves to integrate notions of culture, concepts of trauma, and findings from neuroscience and attachment research into the psychoanalytic frame

**Spring 2025: CLPS GU4201**

**CLPS GU4420 The Creative Self: Autofiction, Psychoanalysis, Neuroscience. 4 points.**

Fictional autobiography, or autofiction, forces us to question our assumptions about the links between creativity, truth, and authenticity. Can one invent, or create, one's own story? It is possible to write the truth of our selves, by creating it? Intriguingly, a process much like autofictional writing is at the heart of modern psychoanalytic technique — and research in neuroscience increasingly suggests that the human brain's potential to morph and adapt might be instrumental to human mentation as we know it. Might it be possible, then, to invent our way to a healthier narrative, to a different life of the mind, or even, perhaps, to a different neural life? This course explores creativity and self-alteration broadly in three parallel but distinct domains: autofiction, object-relations psychoanalysis and neuroscience. At one level, this is a course about the theories of creativity revealed and implied by the peculiar art-form of autofictional writing, by contemporary psychotherapeutic techniques, and by discoveries pertaining to neural plasticity. At another level, this is a course about interdisciplinary itself. We will seek to understand when and how these three disciplines can be used together to create a rich and multilayered understanding of the problem of human creativity, without resorting to simplistic mergers and crude forms of reductionism. Literary readings to include Wilfred Bion, Christine Brooke-Rose, Marguerite Duras, Chris Kraus, Maggie Nelson, Luisa Passerini and others.

## FALL 2024 COURSES

**CLPS GU4275 TRAUMA AND PLEASURE. 4.00 points.**

Can the words "trauma" and "pleasure" be put in the same sentence? If trauma epitomizes suffering and pleasure represents enjoyment, is there any relation between these experiences? And yet, how else to explain that people seem endlessly addicted to negative experiences, or that traumatized

people often try to recreate the damage they endured? We are living in an age of endless trauma, and everywhere we go, we hear that trauma is destructive, anathema to pleasure, that it destroys our sense of self, our security, our stability, and identity. We are taught to avoid trauma at all costs because it is harmful and inimical to flourishing. New statistics routinely confirm that we are living through a trauma epidemic in which ordinary people experience symptoms of extreme distress, flashbacks, intrusive thoughts, nightmares, and difficulty sleeping. Every year, new memoirs are published in which protagonists detail their endless battles with traumatic adversity and most television shows, across a variety of genres, include trauma as a subplot to character development (Ted Lasso, Euphoria, True Detective, to name a few). Referring to its growing pervasiveness, the New Yorker critic Parul Sehgal wrote a controversial essay, "The Case Against the Trauma Plot" (2021) in which she criticizes our culture's overreliance on trauma as a primary trope of character development, forcing us to ask: is trauma really as widespread as we think? how did trauma become such a popular 'identity'? what work is trauma doing for us, as individuals and as a culture? Is it possible to recognize the ubiquity of trauma while also acknowledging that we often seek situations which are harmful, even traumatizing, that we might be attracted to suffering for reasons we don't yet understand? This course examines the complex relationship between trauma and pleasure by familiarizing students with the clinical and theoretical concepts at the core of contemporary trauma and critical theory. We will focus specifically on the topics of: sexuality, perversion, trauma, identity, relationality, narcissism, gender and attachment in order to explore how these concepts work today. Delving into theoretical writing by Foucault, Bersani, Edelman, Berlant, Butler, Dean and Preciado, as well as clinical writing by major psychoanalysts, Freud, Laplanche, Loewald, Lacan, Laplanche and Winnicott, we will redefine contemporary debates by exploring their clinical meaning. In addition to offering a comprehensive outline of how psychoanalysis and critical theory relate, this course will expose students to a wide range of contemporary clinical thinking in order to facilitate a deeper engagement with the practical, lived dimension of psychoanalysis

**CPLS UN3454 STAGING THE EARLY MOD MEDITERR. 4.00 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines, in sixteenth and seventeenth century Spain and England (1580-1640), how the two countries staged the conflict between them, and with the Ottoman Empire; that is, how both countries represent national and imperial clashes, and the concepts of being "Spanish," "English," or "Turk," as well as the dynamic and fluid identities of North Africa, often played out on the high seas of the Mediterranean with Islam

and the Ottoman Empire. We will consider how the Ottoman Empire depicted itself artistically through miniatures and court poetry. The course will include travel and captivity narratives from Spain, England, and the Ottoman Empire

**CPLS UN3965 Precision Medicine: Science, Ethics, and Culture. 3.00 points.**

This seminar will cover the scientific foundations of precision medicine and its social and ethical dimensions, alongside fundamental humanistic questions and challenges raised by this discipline. It is designed as an introduction to precision medicine accessible to the non-scientist student, but will also explore issues relevant to students who are planning a career in science or medicine

**CPLS UN3991 SENIOR SEM-COMP LIT # SOCIETY. 3.00 points.**

Prerequisites: CPLS UN3900

Prerequisites: CPLS UN3900 The senior seminar is a capstone course required of all CLS/MedHum majors and CLS concentrations. Only ICLS students may register. The seminar provides students the opportunity to discuss selected topics in comparative literature and society and medical humanities in a cross-disciplinary, multilingual, and global perspective. Students undertake individual research projects while participating in directed readings and critical dialogues about theory and research methodologies, which may culminate in the senior thesis. Students review work in progress and share results through weekly oral reports and written reports

**CPLS GU4740 The Narratology of “Modernity”. 3.00 points.**

We have a consciousness of ourselves as placed specially in history, in an epoch which is essentially different from all that has come before: the modern. In respect of having such a discourse about ourselves, minimally, it may be true. Since at least the seventeenth century, intellectuals have been elaborating histories of modernity’s origin and theories of its distinction. This course does not attempt to adjudicate what is the true or best theory of the modern, but rather inquires into the discursive and historical conditions for telling narratives about modernity’s advent and constructing theories of its nature, and their aporiai. Topics will vary but may include the advent of “history” as a genre and non-Western “historical” genres; providential time, the saeculum, and prophecy; the dialectic of break and period; the delimiting of non-modernities, such as the primitive/traditional, the feudal, and the postmodern; the search for narrative agents, such as the nation, the state, and the class; schemes of the ontological disunity of modernity; modernism, the avant-garde, and the aesthetic forms of historicity; capitalism, socialism, and revolution; philosophy’s claim to historical diagnosis and the therapeutic refusal thereof; the desire for and attempts to construct anti-historical forms of narration and their limits

**Fall 2024: CPLS GU4740**

**CLEN GU4575 Source Texts of Postcolonial Vision. 4.00 points.**

We will read texts by Memmi, Du Bois, Marguerite Duras and North African feminists to create a gendered and class-sensitive sense of the origins of postcolonial thinking. We will draw a definition of postcolonial hope before the actual emergence of postcolonial nation-states. A 1-page response to the text to be read will be required the previous day. No midterm paper. The final paper will be an oral presentation in a colloquium. ICLS students will be expected to read Memmi in French. No incompletes. Admission by interview. 20# participation, 20# papers, 60# presentation. Seminar Instructions: Interviews will

be in August. Email Deeva Gupta dg3242@columbia.edu, Gayatri Chakravorty Spivak gcs4@columbia.edu and Tomi Haxhi th2666@columbia.edu with the subject heading "Source Texts of Postcolonial Vision." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course

**CLGM GU4300 Retranslation: Worliding C. P. Cavafy. 4.00 points.**

Focusing on a canonical author is an immensely productive way to explore translation research and practice. The works of Sappho, Dante, Rilke, Césaire or Cavafy raise the question of reception in relation to many different critical approaches and illustrate many different strategies of translation and adaptation. The very issue of intertextuality that challenged the validity of author-centered courses after Roland Barthes's proclamation of the death of the author reinstates it if we are willing to engage the oeuvre as an on-going interpretive project. By examining the poetry of the Greek Diaspora poet C. P. Cavafy in all its permutations (as criticism, translation, adaptation), the Cavafy case becomes an experimental ground for thinking about how a canonical author can open up our theories and practices of translation. For the final project students will choose a work by an author with a considerable body of critical work and translations and, following the example of Cavafy and his translators, come up with their own retranslations. Among the materials considered are commentary by E. M. Forster, C. M. Bowra, and Roman Jakobson, translations by Edmund Keeley and Philip Sherrard, James Merrill, Marguerite Yourcenar, and Daniel Mendelsohn, poems by W.H. Auden, Lawrence Durrell, and Joseph Brodsky, and visual art by David Hockney, and Duane Michals

**Fall 2024: CLGM GU4300**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLGM 4300	001/10649	M 12:10pm - 2:00pm 613 Hamilton Hall	Karen Van Dyck	4.00	5/15

**CLIA UN3024 Nationalism in Theory and History. 3.00 points.**

Were nations always there? Are they real or imagined? Do they come before or after nationalism and the state? How did we pass from a world of empires, duchies, and city-states to a world of nation-states? Where does legitimacy reside if not in God and his endowed kings? Is the modern world really 'disenchanted'? How did we come to understand time, space, language, religion, gender, race, and even our very selves in the era of nations? Are we done with this era, living already in postnational times? This course will combine older theories of nationalism (Gellner, Anderson, Hobsbawm, Smith) with

recent approaches of the phenomenon after the 'Imperial/Global/Transnational Turn' and late studies in Gender, Race, Culture and Nationalism, in order to offer new answers to old questions. We will talk about many places around the world, but the main stage where we will try out our questions is Italy and the Mediterranean

**Fall 2024: CLIA UN3024**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CLIA 3024	001/14529	M 10:10am - 12:00pm 613 Hamilton Hall	Konstantia Zanou	3.00	14/15

**FREN GU4022 How to Love: Medieval French and Arabic. 3.00 points.**

How did people conceive of and talk about love on either side of the Pyrenees? This course will explore the many faces of desire in medieval French, Occitan, Arabic, Hebrew and Romance (proto-Spanish) literature to ask a broader question: what would be our understanding of lyric poetry, often taken to originate with the troubadours, if we incorporated the poems and songs of Al-Andalus? After anchoring ourselves in history, we will survey the major events and trends that attended the emergence of new poetic and musical forms both in Andalusia and in France between the 8th and the 14th centuries. We will study how these works were composed, read, performed, and transmitted. Weekly readings will combine scholarship with primary texts exploring the many facets of erotic experience: from sexual contact to love from afar, love as madness, love mediated by birds, rejection of marriage, gender fluidity and queerness. We will also think about the literary forms in which these themes are expressed, including dawn songs, bilingual love poems, treatises on achieving female orgasm, conduct manuals, and hybrid texts combining prose and verse. Translations will be provided for most material, but reading knowledge of modern French is required

**Fall 2024: FREN GU4022**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
FREN 4022	001/10744	W 10:10am - 12:00pm 507 Philosophy Hall	Eliza Zingesser, Yasmine Seale	3.00	13/15

**HIST GU4962 Making and Knowing in Early Modern Europe: Hands-On History. 4.00 points.**

This course introduces undergraduate and graduate students to the materials, techniques, contexts, and meanings of skilled craft and artistic practices in early modern Europe (1350-1750), in order to reflect upon a series of topics, including craft knowledge and artisanal epistemology; the intersections between craft and science; and questions of historical methodology in reconstructing the material world of the past. The course will be run as a "Laboratory Seminar," with discussions of primary and secondary materials, as well as hands-on work in a laboratory. The first semester long course to use the published Edition of Fr. 640 as its focus, it will test the use of the Edition in a higher education classroom to inform the development of the Companion. This course is associated with

the Making and Knowing Project of the Center for Science and Society at Columbia University. The first semester-long course to use the published Edition of Fr. 640 as its focus, it will test the use of the Edition in a higher education classroom to inform the development of Phase II of the Making and Knowing Project - a Research and Teaching Companion. Students' final projects (exploratory and experimental work in the form of digital/textual analysis of Ms. Fr. 640, reconstruction insight reports, videos for the Companion, or a combination) will be published as part of the Companion or the Sandbox depending on content and long-term maintenance considerations

**Fall 2024: HIST GU4962**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
HIST 4962	001/10344	W 10:10am - 12:00pm 513 Fayerweather	Pamela Smith	4.00	16/20

**RELI UN2670 MAGIC AND MODERNITY. 3.00 points.**

This course introduces students to the cultural history of magic: as an idea, as a practice, and as a tool with which wield power and induce wonder. Magic, as we will explore, is a modern concept, the contours of which have been shaped by its relations with religion and science, always against larger backdrops—of the Enlightenment, Romanticism, (post) colonialism, and (post) secularism. Readings are drawn from philosophy, anthropology, religious studies, sociology, drama, literature, history, history of science, and political theory. Cases and readings focus on everything from medieval England to post-socialist Mozambique. Throughout the term, a recurring theme will be whether, and to what extent, magic is incompatible with modernity—or, actually, integral to its constitution. By the end of this course, students should be familiar with a variety of ways in which magic has been understood since the early modern era, in a wide range of settings and cultural contexts. By tracing understandings of magic, students should also come away with an appreciation of how the authority of being “modern” is constructed (and contested) in relation to contemporary valuations of reason, science, enchantment, and the imagination

**Fall 2024: RELI UN2670**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
RELI 2670	001/10194	T Th 10:10am - 11:25am 307 Uris Hall	Matthew Engelke	3.00	23/40

## COMPUTER SCIENCE

### THE COMPUTER SCIENCE DEPARTMENT:

Department website: <https://www.cs.columbia.edu>

Office location: 450 Mudd

Office contact: [ug-advising@cs.columbia.edu](mailto:ug-advising@cs.columbia.edu)

Director of Undergraduate Studies: Dr. Jae Woo Lee, 715 CEPSR; 212-939-7066; [jae@cs.columbia.edu](mailto:jae@cs.columbia.edu)

Undergraduate Administrator: CS Advising, [ug-advising@cs.columbia.edu](mailto:ug-advising@cs.columbia.edu)

## THE COMPUTER SCIENCE MAJOR

Students study a common core of fundamental topics, supplemented by a program of six electives that provides a high degree of flexibility. Three of the electives are chosen from a list of upper-level courses that represent area foundations within computer science. The remaining electives are selected from the complete list of upper-level computer science courses. Students are encouraged to work with their faculty advisor to create a plan tailored to fit their goals and interests. The department webpage provides several example programs for students interested in a variety of specific areas in computer science.

Our website is always the most current in terms of information and has many FAQs for students. Please view this here: [cs.columbia.edu](https://cs.columbia.edu) and contact [ug-advising@cs.columbia.edu](mailto:ug-advising@cs.columbia.edu) with any questions.

## STUDENT ADVISING

### Consulting Advisers

Undergraduate students will be assigned a CS Faculty Advisor from the list on the CS website - <https://www.cs.columbia.edu/education/undergraduate/advisors/>. Students will typically have the same advisor throughout their time in the program. However, students are encouraged to check this list at the start of every term to ensure their advisor remains the same. To reach out to your CS Faculty Advisor, please email first or visit during office hours.

### Enrolling in Classes

Computer Science Department courses are needed by many student populations and are in high demand. To facilitate all COMS students getting the courses they need and distribute seats fairly, please refer to our policy - <https://www.cs.columbia.edu/cs-course-registration-policy/>

### Preparing for Graduate Study

The department offers a number of options at the graduate level, including the MS Express. Please refer to our FAQs - <https://www.cs.columbia.edu/education/admissions8/> - or email [ms-admissions@cs.columbia.edu](mailto:ms-admissions@cs.columbia.edu) with any questions.

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

The department grants 3 points for a score of 4 or 5 on the AP Computer Science A exam, along with an exemption from [COMS W1004](#) Introduction to Computer Science and

Programming in Java. However, we recommend that you take COMS W1004 before taking COMS W3134/W3137 Data Structures if you received a score of 4 or have not programmed in Java recently.

## Barnard College Courses

Any course offered by the Computer Science @Barnard department can count towards degree requirements. Please refer to the major and minor program information pages for specific information.

## Transfer Courses

Up to four transfer courses are accepted toward the major. Up to two transfer courses are accepted toward the minor. Calculus, linear algebra, and probability/statistics courses can be transferred in addition to the four/two-course limits. Each course must be approved as equivalent by the faculty who teaches it at Columbia. Please refer to the guide here - <https://www.cs.columbia.edu/education/undergraduate/#sec8>

## Study Abroad Courses

If you are considering studying abroad, please consult with the CS Advisor as soon as possible. Each course for potential incorporation into your CS major or minor must be approved as equivalent by the faculty who teaches it at Columbia.

## Summer Courses

Any Computer Science or approved cognate course offered during the summer session will count towards the degree, with the exception of online-only courses, which do not count towards degree requirements.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Undergraduate Research in Courses

#### COMS W3998 UNDERGRAD PROJECTS IN COMPUTER SCIENCE. 1.00-3.00 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit. Consult the department for section assignment.

#### COMS W4901 Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

## Senior Thesis Coursework and Requirements

A thesis is not a requirement for the major or minor.

### COMS W3902 UNDERGRADUATE THESIS. 0.00-6.00 points.

Prerequisites: Agreement by a faculty member to serve as thesis adviser.

An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment

## Undergraduate Research Outside of Courses

### Laboratory Facilities

The department has well-equipped lab areas for research in computer graphics, computer-aided digital design, computer vision, databases and digital libraries, data mining and knowledge discovery, distributed systems, mobile and wearable computing, natural language processing, networking, operating systems, programming systems, robotics, user interfaces, and real-time multimedia.

Research labs contain several large Linux and Solaris clusters; Puma 500 and IBM robotic arms; a UTAH-MIT dexterous hand; an Adept-1 robot; three mobile research robots; a real-time defocus range sensor; interactive 3-D graphics workstations with 3-D position and orientation trackers; prototype wearable computers, wall-sized stereo projection systems; see-through head-mounted displays; a networking testbed with three Cisco 7500 backbone routers, traffic generators; an IDS testbed with secured LAN, Cisco routers, EMC storage, and Linux servers; and a simulation testbed with several Sun servers and Cisco Catalyst routers. The department uses a SIP IP phone system. The protocol was developed in the department.

The department's computers are connected via a switched 1Gb/s Ethernet network, which has direct connectivity to the campus OC-3 Internet and internet 2 gateways. The campus has 802.11b/g wireless LAN coverage.

The research facility is supported by a full-time staff of professional system administrators and programmers.

### Participating in Research Projects

Students can reach out to professors whose research areas are of interest to them. Professors will typically require that students have completed the relevant coursework covering the background knowledge and skills.

Once a faculty member agrees to supervise the student's research work, the student will register for the professor's section of COMS W3998 or W4901.

### **COMS W3998 UNDERGRAD PROJECTS IN COMPUTER SCIENCE. 1.00-3.00 points.**

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit. Consult the department for section assignment

### **COMS W4901 Projects in Computer Science. 1-3 points.**

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

## **DEPARTMENT HONORS AND PRIZES**

### **Department Honors**

The Computer Science Department does not award departmental honors.

### **Academic Prizes**

**Jonathan L. Gross Award for Academic Excellence:** This award was established in 2017 in honor of the much loved Professor Emeritus Jonathan Gross. Each year a cash gift is awarded to one graduating masters student and to one graduating senior from each of the four undergraduate schools served by the Department of Computer Science.

**Theodore R. Bashkow Award:** Presented to a computer science senior who has excelled in independent projects. This is awarded in honor of Professor Theodore R. Bashkow, whose contributions as a researcher, teacher, and consultant have significantly advanced the state of the art of computer science.

**Andrew P. Kosoresow Memorial Award for Excellence in Teaching and Service:** Awarded for outstanding contributions to teaching in the Department of Computer Science and exemplary service to the Department and its mission.

**Computer Science Scholarship Award:** A cash prize awarded to two B.A. and two B.S. degree candidates for outstanding academic achievement in computer science.

**Russell C. Mills Award:** This annual award, established by the computer science department in 1992 in memory of Russell C. Mills, is a cash prize given to a computer science major who has exhibited excellence in the area of computer science.

## **OTHER IMPORTANT INFORMATION**

See the Requirements section for the policies on double counting and D grades.

## GUIDANCE FOR UNDERGRADUATE STUDENTS IN THE DEPARTMENT

### Program Planning for all Students

The following requirements are new as of the academic year 2023-2024. Students who declared a CS major in the academic year 2022-2023 or earlier have the option to follow the old requirements. The old requirements are noted on [the Undergraduate Programs pages](https://www.cs.columbia.edu/education/undergraduate/) of the Computer Science Department website (<https://www.cs.columbia.edu/education/undergraduate/>).

Please note that the information on the department website is more up-to-date than the information in the archived Bulletins. Students with questions about which requirements to follow are advised to talk with [ug-advising@cs.columbia.edu](mailto:ug-advising@cs.columbia.edu).

### Restrictions on overlapping courses

Students may receive credit for only one of the following two courses:

- [COMS W1004](#) Introduction to Computer Science and Programming in Java
- [COMS W1005](#) Introduction to Computer Science and Programming in MATLAB.

Students may receive credit for only one of the following three courses:

- [COMS W3134](#) Data Structures in Java
- [COMS W3136](#) ESSENTIAL DATA STRUCTURES
- [COMS W3137](#) HONORS DATA STRUCTURES # ALGOL

COMS W1005 and COMS W3136 cannot be counted towards the Computer Science major, minor, and concentration.

No more than 6 points of project/thesis courses (COMS W3902, W3998, W4901) can count toward the major. COMS W3999 Fieldwork cannot be used as a CS Elective.

No more than one course from each set below may be applied towards the computer science major:

- IEOR E3658, STAT UN1201, MATH UN2015
- MATH UN2015, MATH UN2010, APAM E3101, COMS W3251
- COMS W4771, COMS W4721

## Double Counting

Double-counting policies are to be construed within the larger double-counting policy of the student's home school. Double-counting policies are detailed on each School's Bulletin and/or Catalog.

The CS department allows the following courses in the CS Core and Mathematics requirement to be double-counted with another major, minor, or concentration. No other courses can be double-counted with another program.

- COMS W1004
- Any calculus courses (including Honors Math A and B)
- One Linear Algebra course
- One Probability/Statistics course

## Grading

A maximum of one course worth no more than 4 points passed with a grade of D may be counted toward the major or minor.

## Course Numbering Structure

The first digit indicates the level of the course, as follows:

- 0 Course that cannot be credited toward any degree
- 1 Undergraduate course
- 2 Undergraduate course, intermediate
- 3 Undergraduate course, advanced
- 4 Graduate course that is open to qualified undergraduates
- 6 Graduate course
- 8 Graduate course, advanced
- 9 Graduate research course or seminar

## Guidance for First-Year Students

### Pre-Introductory Courses

COMS W1004 is the first course in the Computer Science major curriculum, and it does not require any previous computing experience. Before taking COMS W1004, however, students have an option to start with one of the pre-introductory courses: ENGI E1006 or COMS W1002.

ENGI E1006 Introduction to Computing for Engineers and Applied Scientists is a general introduction to computing for STEM students. ENGI E1006 is in fact a required course for

all engineering students. COMS W1002 Computing in Context is a course primarily intended for humanities majors, but it also serves as a pre-introductory course for CS majors. ENGI E1006 and COMS W1002 do not count towards Computer Science major.

## Guidance for Transfer Students

Up to four transfer courses are accepted toward the major. Up to two transfer courses are accepted toward the minor or concentration. Calculus, linear algebra, and probability/statistics courses can be transferred in addition to the four/two-course limits.

## UNDERGRADUATE PROGRAMS OF STUDY

### Major in Computer Science

All majors should confer with their program adviser each term to plan their programs of study. Students considering a major in computer science are encouraged to talk to a program adviser during their first or second year. The Computer Science major is composed of four basic components: The Mathematics Requirement, the Computer Science Core, the Area Foundation Courses, and the Computer Science Electives.

### Mathematics Requirement (6-11 points)

**Calculus Requirement: Select one of the following courses:**

MATH UN1201	CALCULUS III
MATH UN1205	ACCELERATED MULTIVARIABLE CALC
APMA E2000	MULTV. CALC. FOR ENGI # APP SCI

Note that MATH UN1201 (Calculus III) requires Calculus I as a prerequisite but does NOT require Calculus II. MATH UN1205 and APMA E2000, however, require both Calculus I and Calculus II as prerequisites.

**Linear Algebra Requirement: Select one of the following courses:**

COMS W3251	COMPUTATIONAL LINEAR ALGEBRA (recommended)
MATH UN2010	LINEAR ALGEBRA
MATH UN2015	Linear Algebra and Probability
MATH UN2020	Honors Linear Algebra
APMA E2101	INTRO TO APPLIED MATHEMATICS
APMA E3101	APPLIED MATH I: LINEAR ALGEBRA

**Probability / Statistics Requirement: Select one of the following courses:**

MATH UN2015	Linear Algebra and Probability
IEOR E3658	PROBABILITY FOR ENGINEERS

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS

NOTE: Math 2015 Linear Algebra and Probability may simultaneously satisfy both linear algebra and probability requirements without the need to take additional classes thus reducing the total number of points required.

### Pre-intro course (Optional, 3-4 points)

ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI (recommended but not required)
or COMS W1002	COMPUTING IN CONTEXT

### Computer Science Core (20-21 points):

#### First Year

COMS W1004	Introduction to Computer Science and Programming in Java
or COMS W1007	

#### Sophomore Year

COMS W3134	Data Structures in Java
or COMS W3137	HONORS DATA STRUCTURES # ALGOL

COMS W3157	ADVANCED PROGRAMMING
------------	----------------------

COMS W3203	DISCRETE MATHEMATICS
------------	----------------------

#### Junior and Senior Year

Complete the remaining required core courses:

COMS W3261	COMPUTER SCIENCE THEORY
------------	-------------------------

CSEE W3827	FUNDAMENTALS OF COMPUTER SYSTS
------------	--------------------------------

### Area Foundation Courses (9 to 12 points):

Select three from the following list:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4113	FUND-LARGE-SCALE DIST SYSTEMS
COMS W4115	PROGRAMMING LANG # TRANSLATORS
COMS W4118	OPERATING SYSTEMS I
COMS W4119	COMPUTER NETWORKS
COMS W4152	Engineering Software-as-a-Service
COMS W4156	ADVANCED SOFTWARE ENGINEERING
COMS W4160	COMPUTER GRAPHICS
COMS W4167	COMPUTER ANIMATION
COMS W4170	USER INTERFACE DESIGN
COMS W4181	SECURITY I
CSOR E4231	ANALYSIS OF ALGORITHMS I
COMS W4236	INTRO-COMPUTATIONAL COMPLEXITY

COMS W4701	ARTIFICIAL INTELLIGENCE
------------	-------------------------

COMS W4705	NATURAL LANGUAGE PROCESSING
------------	-----------------------------

COMS W4731	Computer Vision I: First Principles
------------	-------------------------------------

COMS W4733	COMPUTATIONAL ASPECTS OF ROBOTICS
------------	-----------------------------------

CBMF W4761	COMPUTATIONAL GENOMICS
------------	------------------------

COMS W4771	MACHINE LEARNING
------------	------------------

CSEE W4824	COMPUTER ARCHITECTURE
------------	-----------------------

CSEE W4868	SYSTEM-ON-CHIP PLATFORMS
------------	--------------------------

### Computer Science Electives (9 to 12 points)

Any three COMS courses or jointly offered computer science courses such as CSXX or XXCS course that are worth at least 3 points and are at the 3000 level or above. This includes 3000-level courses offered by Barnard CS.

### Restrictions

No more than 6 points of project/thesis courses (COMS W3902, W3998, W4901) can count toward the major. COMS W3999 Fieldwork cannot be used as a CS Elective.

No more than one course from each set below may be applied towards the computer science major:

- IEOR E3658, STAT UN1201, MATH UN2015
- MATH UN2015, MATH UN2010, APAM E3101, COMS W3251
- COMS W4771, COMS W4721

---

## Major in Computational Biology

For a description of the joint major in computer science—Biology, see the [Biological Sciences](#) section in this bulletin.

## Major in Computer Science - Mathematics

For a description of the joint major in computer science—mathematics, see the *Mathematics* section in this bulletin.

---

## Major in Information Science

The major in information science requires a minimum of 33 points, including a core requirement of five courses. Adjustments were made to the course lists below in March 2022.

The elective courses must be chosen with a faculty adviser to focus on the modeling and use of information within the context of a disciplinary theme. After discussing potential selections, students prepare a proposal of study that must be approved by

the faculty adviser. In all cases, the six courses must be at the 3000 level or above, with at least three courses chosen from computer science. Following are some example programs. For more examples or templates for the program proposal, see a faculty adviser.

Note: In most cases, additional courses will be necessary as prerequisites in order to take some of the elective courses. This will depend on the student's proposed program of study.

COMS W1001	Introduction to Information Science
or COMS W1002 Computing in Context	
COMS W1004	Introduction to Computer Science and Programming in Java
COMS W3107	Clean Object-Oriented Design
COMS W3134	Data Structures in Java
STAT GU4001	INTRODUCTION TO PROBABILITY AND STATISTICS

Following are some suggested programs of instruction:

### Information Science and Contemporary Society

Students may focus on how humans use technology and how technology has changed society.

The requirements include:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4170	USER INTERFACE DESIGN
COMS W4701	ARTIFICIAL INTELLIGENCE
COMS W3410	COMPUTERS AND SOCIETY
SOCI UN3010	METHODS FOR SOCIAL RESEARCH
SOCI UN3960	SEMINAR - PROBLEMS OF LAW # SOCIETY

### Information Science and the Economy

Students may focus on understanding information modeling together with existing and emerging needs in economics and finance as well as algorithms and systems to address those needs.

The requirements include:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4701	ARTIFICIAL INTELLIGENCE
COMS W4771	MACHINE LEARNING
ECON UN3412	INTRODUCTION TO ECONOMETRICS
ECON UN3025	FINANCIAL ECONOMICS
ECON UN3265	MONEY AND BANKING

### Information Science and Health Sciences

Students may focus on understanding information modeling together with existing and emerging needs in health sciences, as well as algorithms and systems to address those needs.

The requirements include:

COMS W4111	INTRODUCTION TO DATABASES
COMS W4170	USER INTERFACE DESIGN
COMS W4701	ARTIFICIAL INTELLIGENCE
BINF G4001	
BIOL W4037	Bioinformatics of Gene Expression
ECBM E3060/E4060	

### Major in Data Science

In response to the ever-growing importance of "big data" in scientific and policy endeavors, the last few years have seen explosive growth in theory, methods, and applications at the interface between computer science and statistics. The statistics and computer science departments have responded with a joint major that emphasizes the interface between the disciplines.

#### Prerequisites (15 points)

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN2010	LINEAR ALGEBRA
This introductory Statistics course:	
STAT UN1201	CALC-BASED INTRO TO STATISTICS

#### Statistics (12 points)

STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4241	STATISTICAL MACHINE LEARNING
or COMS W4771 Machine Learning	

#### Computer Science (12 points)

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
COMS W1007	
ENGI E1006	INTRO TO COMP FOR ENG/ APP SCI

Select one of the following courses:

COMS W3134	Data Structures in Java
COMS W3136	ESSENTIAL DATA STRUCTURES

COMS W3137	HONORS DATA STRUCTURES # ALGOL
------------	-----------------------------------

Two required courses:

COMS W3203	DISCRETE MATHEMATICS
CSOR W4231	ANALYSIS OF ALGORITHMS I

#### Electives (15 points)

Select two of the following courses:

STAT UN3106	APPLIED MACHINE LEARNING
STAT GU4206	STAT COMP # INTRO DATA SCIENCE
STAT GU4224	BAYESIAN STATISTICS
STAT GU4243	APPLIED DATA SCIENCE
STAT Q4242	Advanced Machine Learning

Select three of the following courses:

COMS W3261	COMPUTER SCIENCE THEORY
COMS W4111	INTRODUCTION TO DATABASES

COMS W4130

COMS W4236	INTRO-COMPUTATIONAL COMPLEXITY
------------	-----------------------------------

COMS W4252	INTRO-COMPUTATIONAL LEARN THRY
------------	-----------------------------------

Any COMS W47xx course EXCEPT W4771

## Minor in Computer Science

Students who pass the Computer Science Advanced Placement Exam A with a 4 or 5 will receive 3 points and an exemption from COMS W1004.

The Computer Science Minor consists of 6 courses as follows:

1. COMS W1004: Intro to computer science and programming in Java (3) or COMS W1007: Honors intro to comp sci (3)
2. COMS W3134: Data structures in Java (3) or COMS W3137: Honors data structures and algorithms (4)
3. COMS W3203: Discrete mathematics (4)
4. One course of the following:

COMS W3157: Advanced programming (4)

COMS W3261: Comp science theory (3)

CSEE W3827: Fundamentals of computer systems (3)

5. Any 3000-level or 4000-level COMS/CSXX/XXCS course of at least 3 points

6. Any 3000-level or 4000-level COMS/CSXX/XXCS course of at least 3 points OR one linear algebra or probability/statistics course from the following: APMA E3101, APMA E2101, MATH UN2010, MATH UN2015, IEOR E3658, STAT UN1201, STAT GU4001 or STAT GU4203.

## Restrictions

No more than 6 points of project/thesis courses (COMS W3902, W3998, W4901) can count toward the major. COMS W3999 Fieldwork cannot be used as a CS Elective.

No more than one course from each set below may be applied towards the computer science major:

- IEOR E3658, STAT UN1201, MATH UN2015
- MATH UN2015, MATH UN2010, APAM E3101, COMS W3251
- COMS W4771, COMS W4721

## FOR STUDENTS WHO ENTERED COLUMBIA IN OR BEFORE THE 2023-24 ACADEMIC YEAR

### Concentration in Computer Science

The concentration in computer science requires a minimum of 22-24 points, as follows:

COMS W1004	Introduction to Computer Science and Programming in Java
------------	---

or COMS W1007

COMS W3134 or COMS W3137	Data Structures in Java HONORS DATA STRUCTURES # ALGOL
-----------------------------	--

COMS W3157	ADVANCED PROGRAMMING
------------	----------------------

COMS W3203	DISCRETE MATHEMATICS
------------	----------------------

COMS W3261	COMPUTER SCIENCE THEORY
------------	----------------------------

CSEE W3827	FUNDAMENTALS OF COMPUTER SYSTS (or any 3 point 4000-level computer science course)
------------	---

Select one of the following courses:

COMS W3251	COMPUTATIONAL LINEAR ALGEBRA
------------	---------------------------------

MATH UN2010	LINEAR ALGEBRA
-------------	----------------

MATH UN2015	Linear Algebra and Probability
-------------	--------------------------------

MATH V2020	Honors Linear Algebra
------------	-----------------------

APMA E2101	INTRO TO APPLIED MATHEMATICS
------------	---------------------------------

APMA E3101	APPLIED MATH I: LINEAR ALGEBRA
------------	-----------------------------------

IEOR E3658	PROBABILITY FOR ENGINEERS
------------	------------------------------

STAT UN1201	CALC-BASED INTRO TO STATISTICS
-------------	-----------------------------------

STAT GU4001 INTRODUCTION TO  
PROBABILITY AND  
STATISTICS

## COMPUTER SCIENCE

### COMS W1001 Introduction to Information Science. 3

*points.*

Lect: 3.

Basic introduction to concepts and skills in Information Sciences: human-computer interfaces, representing information digitally, organizing and searching information on the internet, principles of algorithmic problem solving, introduction to database concepts, and introduction to programming in Python.

### COMS W1002 COMPUTING IN CONTEXT. 4.00 *points.*

CC/GS: Partial Fulfillment of Science Requirement

Introduction to elementary computing concepts and Python programming with domain-specific applications. Shared CS concepts and Python programming lectures with track-specific sections. Track themes will vary but may include computing for the social sciences, computing for economics and finance, digital humanities, and more. Intended for nonmajors. Students may only receive credit for one of ENGI E1006 or COMS W1002

#### Fall 2024: COMS W1002

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1002	001/11915	T Th 1:10pm - 2:25pm 417 International Affairs Bldg	Adam Cannon	4.00	51/160
COMS 1002	002/11916	T Th 1:10pm - 2:25pm 330 Uris Hall	Adam Cannon, Eugenia Antic	4.00	14/60
COMS 1002	003/11917	T Th 2:40pm - 3:55pm 417 International Affairs Bldg	Adam Cannon	4.00	129/300
COMS 1002	004/11918	T Th 2:40pm - 3:55pm 415 Schapiro Cepser	Philippe Chlenski, Adam Cannon	4.00	27/40

### COMS W1003 INTRO-COMPUT SCI/PROGRAM IN C. 3.00 *points.*

### COMS W1004 Introduction to Computer Science and Programming in Java. 3 *points.*

Lect: 3.

A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: 1004 or 1005.

#### Fall 2024: COMS W1004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1004	001/11919	M W 2:40pm - 3:55pm 309 Havemeyer Hall	Paul Blaer	3	252/320
COMS 1004	002/11920	M W 5:40pm - 6:55pm 417 International Affairs Bldg	Paul Blaer	3	165/320

#### Spring 2025: COMS W1004

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1004	001/11948	T Th 11:40am - 12:55pm 417 International Affairs Bldg	Adam Cannon	3	111/398
COMS 1004	002/11949	T Th 1:10pm - 2:25pm 417 International Affairs Bldg	Adam Cannon	3	87/398

### COMS W1005 Introduction to Computer Science and Programming in MATLAB. 3 *points.*

CC/GS: Partial Fulfillment of Science Requirement

A general introduction to computer science concepts, algorithmic problem-solving capabilities, and programming skills in MATLAB. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: W1004 or W1005.

### COMS W1011 INTERMED COMPUTER PROGRAMMING. 3.00 *points.*

### COMS W1012 COMPUTING IN CONTEXT REC. 0.00 *points.*

#### Fall 2024: COMS W1012

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1012	001/11921	Th 7:10pm - 8:00pm 227 Seeley W. Mudd Building	Adam Cannon	0.00	34/40
COMS 1012	002/11922	Th 7:10pm - 8:00pm 644 Seeley W. Mudd Building	Adam Cannon	0.00	31/40
COMS 1012	003/11923	F 10:10am - 11:00am 307 Uris Hall	Adam Cannon	0.00	40/40
COMS 1012	004/11924	F 2:00pm - 2:50pm 307 Uris Hall	Adam Cannon	0.00	26/40
COMS 1012	005/11925	Th 7:10pm - 8:00pm 415 Schapiro Cepser	Adam Cannon	0.00	14/40

COMS 1012	010/11930	Th 7:10pm - 8:00pm 233 Seeley W. Mudd Building	Adam Cannon	0.00	18/30
COMS 1012	011/11931	F 11:00am - 11:50am 307 Uris Hall	Adam Cannon	0.00	9/30

**COMS W1103 HONORS INTRO COMPUTER SCIENCE.****3.00 points.****COMS W1404 EMERGING SCHOLARS PROG SEMINAR. 1.00 point.**

Pass/Fail only.

Prerequisites: Instructor's permission

Corequisites: COMS W1004, COMS W1007, COMS W1002

Peer-led weekly seminar intended for first and second year undergraduates considering a major in Computer Science. Pass/fail only. May not be used towards satisfying the major or SEAS credit requirements

**Fall 2024: COMS W1404**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 1404	001/11996	F 8:40am - 9:55am 253 Engineering Terrace	Adam Cannon	1.00	7/16

**COMS W2132 Intermediate Computing in Python. 4.00 points.**

Prerequisites: (ENGI E1006) or (COMS W1002) or equivalent prior programming background in Python.

Essential data structures and algorithms in Python with practical software development skills, applications in a variety of areas including biology, natural language processing, data science and others.

**COMS W2702 AI in Context. 3.00 points.**

Prerequisites: STAT UN1201 or equivalent is strongly recommended.

An interdisciplinary introduction to the history, development and modern application of artificial intelligence in a variety of contexts. Context subjects and teaching staff will vary by semester.

**Fall 2024: COMS W2702**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

Wiggins

### **COMS W3011 INTERMED COMPUTER PROGRAMMING. 3.00 points.**

### **COMS W3101 PROGRAMMING LANGUAGES. 1.00 point.**

Lect: 1.

Prerequisites: Fluency in at least one programming language. Introduction to a programming language. Each section is devoted to a specific language. Intended only for those who are already fluent in at least one programming language. Sections may meet for one hour per week for the whole term, for three hours per week for the first third of the term, or for two hours per week for the first six weeks. May be repeated for credit if different languages are involved

### **COMS W3102 DEVELOPMENT TECHNOLOGY.**

**1.00-2.00 points.**

Lect: 2. Lab: 0-2.

Prerequisites: Fluency in at least one programming language. Introduction to software development tools and environments. Each section devoted to a specific tool or environment. One-point sections meet for two hours each week for half a semester, and two point sections include an additional two-hour lab

### **COMS W3107 Clean Object-Oriented Design. 3.00 points.**

Prerequisites: Intro to Computer Science/Programming in Java (COMS W1004) or instructor's permission. May not take for credit if already received credit for COMS W1007.

Prerequisites: see notes re: points COMS W1004; COMS W1004 or permission of instructor. May not take for credit if already received credit for COMS W1007

A course in designing, documenting, coding, and testing robust computer software, according to object-oriented design patterns and clean coding practices. Taught in Java. Object-oriented design principles include: use cases; CRC; UML; javadoc; patterns (adapter, builder, command, composite, decorator, facade, factory, iterator, lazy evaluation, observer, singleton, strategy, template, visitor); design by contract; loop invariants; interfaces and inheritance hierarchies; anonymous classes and null objects; graphical widgets; events and listeners; Java's Object class; generic types; reflection; timers, threads, and locks

### **COMS W3123 ASSEMBLY LANG AND COMPUT LOGIC. 3.00 points.**

### **COMS W3132 Intermediate Computing in Python. 4.00 points.**

Prerequisites: ENGI E1006 OR COMS W1002; or equivalent Python programming experience. Intermediate interdisciplinary course in computing intended for non-CS majors. Essential data structures and algorithms in Python with practical software development skills, applications in a variety of areas including biology, natural language processing, data science and others

### **COMS W3134 Data Structures in Java. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W1004) or COMS W1004; Knowledge of Java

Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: *COMS W3134*, *COMS W3136*, *COMS W3137*.

#### **Fall 2024: COMS W3134**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3134	001/11932	M W 4:10pm - 5:25pm 301 Uris Hall	Brian Borowski	3	208/250
COMS 3134	002/11933	M W 5:40pm - 6:55pm 301 Uris Hall	Brian Borowski	3	119/250

#### **Spring 2025: COMS W3134**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3134	001/11962	M W 2:40pm - 3:55pm 309 Havemeyer Hall	Paul Blaer	3	225/320
COMS 3134	002/11963	M W 5:40pm - 6:55pm 501 Northwest Corner	Paul Blaer	3	167/164

### **COMS W3136 ESSENTIAL DATA STRUCTURES. 4.00 points.**

Prerequisites: (COMS W1004) or (COMS W1005) or (COMS W1007) or (ENGI E1006) COMS W1005 OR COMS W1007 OR ENGI E1006 OR COMS W1004

A second programming course intended for nonmajors with at least one semester of introductory programming experience. Basic elements of programming in C and C , arraybased data structures, heaps, linked lists, C programming in UNIX environment, object-oriented programming in C , trees, graphs, generic programming, hash tables. Due to significant overlap, students may only receive credit for either COMS W3134, W3136, or W3137

#### **Fall 2024: COMS W3136**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3136	001/15424	T Th 5:40pm - 6:55pm 141 Uris Hall	Timothy Paine	4.00	30/65

### **COMS W3137 HONORS DATA STRUCTURES # ALGOL. 4.00 points.**

Prerequisites: (COMS W1004) or (COMS W1007) COMS W1004 OR COMS W1007

Corequisites: COMS W3203

An honors introduction to data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Design and analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, W3136, or W3137

**COMS W3157 ADVANCED PROGRAMMING. 4.00 points.**

Lect: 4.

Prerequisites: (COMS W3134) or (COMS W3137) COMS W3134 OR COMS W3137

C programming language and Unix systems programming. Also covers Git, Make, TCP/IP networking basics, C fundamentals

**Fall 2024: COMS W3157**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3157	001/11934	T Th 4:10pm - 5:25pm 417 International Affairs Bldg	Jae Lee	4.00	299/398
COMS 3157	002/21191	F 12:10pm - 2:00pm 326 Uris Hall	Jae Lee	4.00	27/50

**Spring 2025: COMS W3157**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3157	001/11964	M W 4:10pm - 5:25pm 301 Uris Hall	Brian Borowski	4.00	155/175
COMS 3157	002/11965	M W 5:40pm - 6:55pm 301 Uris Hall	Brian Borowski	4.00	111/175

**COMS W3202 FINITE MATHEMATICS. 3.00 points.**

**COMS W3203 DISCRETE MATHEMATICS. 4.00 points.**

Lect: 3.

Prerequisites: Any introductory course in computer programming.

Logic and formal proofs, sequences and summation, mathematical induction, binomial coefficients, elements of finite probability, recurrence relations, equivalence relations and partial orderings, and topics in graph theory (including isomorphism, traversability, planarity, and colorings)

**Fall 2024: COMS W3203**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3203	001/11935	M W 4:10pm - 5:25pm 301 Pupin Laboratories	Tony Dear	4.00	190/270

**Spring 2025: COMS W3203**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3203	001/13386	M W 2:40pm - 3:55pm	Tony Dear	4.00	145/164

501 Northwest  
Corner

**COMS W3210 Scientific Computation. 3 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: two terms of calculus.

Introduction to computation on digital computers. Design and analysis of numerical algorithms. Numerical solution of equations, integration, recurrences, chaos, differential equations. Introduction to Monte Carlo methods. Properties of floating point arithmetic. Applications to weather prediction, computational finance, computational science, and computational engineering.

**COMS W3251 COMPUTATIONAL LINEAR ALGEBRA. 4.00 points.**

**COMS W3261 COMPUTER SCIENCE THEORY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3203) COMS W3203; COMS W3134 AND COMS W3137 AND COMS W3136

Corequisites: COMS W3134, COMS W3136, COMS W3137

Regular languages: deterministic and non-deterministic finite automata, regular expressions. Context-free languages: context-free grammars, push-down automata. Turing machines, the Chomsky hierarchy, and the Church-Turing thesis. Introduction to Complexity Theory and NP-Completeness

**Fall 2024: COMS W3261**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3261	001/11936	T Th 8:40am - 9:55am 451 Computer Science Bldg	Tal Malkin	3.00	107/110
COMS 3261	002/11937	T Th 10:10am - 11:25am 451 Computer Science Bldg	Tal Malkin	3.00	97/110

**Spring 2025: COMS W3261**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 3261	001/11966	T Th 1:10pm - 2:25pm 833 Seeley W. Mudd Building	Josh Alman	3.00	114/120
COMS 3261	002/11967	T Th 2:40pm - 3:55pm 833 Seeley W. Mudd Building	Josh Alman	3.00	115/120

**COMS W3410 COMPUTERS AND SOCIETY. 3.00 points.**

Lect: 3.

Broader impact of computers. Social networks and privacy. Employment, intellectual property, and the media. Science and engineering ethics. Suitable for nonmajors

**Fall 2024: COMS W3410**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS 001/11938 W 4:10pm - 6:40pm Ronald 3.00 56/67  
3410 Baecker  
303 Uris Hall

**COMS W3770 Mathematics for Machine Learning. 3.00 points.**

Mathematical foundations of machine learning: Linear algebra, multivariable calculus, and probability and statistics. Comprehensive review and additional treatment of relevant topics used in the analysis and design of machine learning models. Preliminary exposure to core algorithms such as linear regression, gradient descent, principal component analysis, low-rank approximations, and kernel methods

**COMS E3899 Research Training. 0.00 points.**

Research training course. Recommended in preparation for laboratory related research

**COMS W3902 UNDERGRADUATE THESIS. 0.00-6.00 points.**

Prerequisites: Agreement by a faculty member to serve as thesis adviser.

An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment

**COMS W3995 Special Topics in Computer Science. 3 points.**

Lect: 3.

Prerequisites: the instructor's permission.

Consult the department for section assignment. Special topics arranged as the need and availability arise. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit.

**COMS W3998 UNDERGRAD PROJECTS IN COMPUTER SCIENCE. 1.00-3.00 points.**

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit. Consult the department for section assignment

**COMS W3999 FIELDWORK. 1.00-2.00 points.**

Prerequisites: Obtained internship and approval from faculty advisor

May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off campus work experience as part of their approved program of study. Final report and letter of evaluation may be required. May not be used as a technical or nontechnical elective or as a GTE (general technical elective). May not be taken for pass/fail credit or audited.

**COMS E3999 Fieldwork. 1 point.**

May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off-campus work experience as part of their approved program of study. Final report and letter of evaluation required. May not be used as a technical or non-technical elective. May not be taken for pass/fail credit or audited.

**COMS W4111 INTRODUCTION TO DATABASES. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: COMS W3134, COMS W3136, or COMS W3137; or the instructor's permission.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137) or COMS W3134 AND COMS W3136 AND COMS W3137; COMS W3134, COMS W3136, or COMS W3136; or instructor's permission

The fundamentals of database design and application development using databases: entity-relationship modeling, logical design of relational databases, relational data definition and manipulation languages, SQL, XML, query processing, physical database tuning, transaction processing, security. Programming projects are required

**Fall 2024: COMS W4111**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4111	001/11939	T Th 10:10am - 11:25am 207 Mathematics Building	Luis Gravano	3.00	156/150
COMS 4111	002/11940	T Th 8:40am - 9:55am 301 Uris Hall	Eugene Wu	3.00	93/175
COMS 4111	003/11941	F 10:10am - 12:40pm 309 Havemeyer Hall	Donald Ferguson	3.00	257/250
COMS 4111	V03/18703		Donald Ferguson	3.00	18/99

**Spring 2025: COMS W4111**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4111	001/11968	M W 2:40pm - 3:55pm 301 Uris Hall	Kenneth Ross	3.00	181/266
COMS 4111	002/11969	F 10:10am - 12:40pm 207 Mathematics Building	Donald Ferguson	3.00	102/125
COMS 4111	V01/20241		Kenneth Ross	3.00	7/99

**COMS W4112 DATABASE SYSTEM IMPLEMENTATION. 3.00 points.**

Lect: 2.5.

Prerequisites: (COMS W4111) and COMS W4111; fluency in Java or C++. CSEE W3827 is recommended.

The principles and practice of building large-scale database management systems. Storage methods and indexing, query

processing and optimization, materialized views, transaction processing and recovery, object-relational databases, parallel and distributed databases, performance considerations. Programming projects are required

### **COMS W4113 FUND-LARGE-SCALE DIST SYSTEMS. 3.00 points.**

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119) *COMS W3134, W3136, or W3137. COMS W3157* or good working knowledge of C and C++. *COMS W4118* or *CSEE W4119*.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119) Design and implementation of large-scale distributed and cloud systems. Teaches abstractions, design and implementation techniques that enable the building of fast, scalable, fault-tolerant distributed systems. Topics include distributed communication models (e.g. sockets, remote procedure calls, distributed shared memory), distributed synchronization (clock synchronization, logical clocks, distributed mutex), distributed file systems, replication, consistency models, fault tolerance, distributed transactions, agreement and commitment, Paxos-based consensus, MapReduce infrastructures, scalable distributed databases. Combines concepts and algorithms with descriptions of real-world implementations at Google, Facebook, Yahoo, Microsoft, LinkedIn, etc

#### **Fall 2024: COMS W4113**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4113	001/11942	F 10:10am - 12:40pm 451 Computer Science Bldg	Roxana Geambasu	3.00	93/110
COMS 4113	V01/17521		Roxana Geambasu	3.00	8/99

### **COMS E4115 PROGRAMMING LANG # TRANSL. 3.00 points.**

#### **COMS W4115 PROGRAMMING LANG # TRANSLATORS. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3261) and (CSEE W3827) or COMS W3134 OR COMS W3136 OR COMS W3137 OR CSEE W3827 AND COMS W3261; Or the instructor's permission Modern programming languages and compiler design. Imperative, object-oriented, declarative, functional, and scripting languages. Language syntax, control structures, data types, procedures and parameters, binding, scope, run-time organization, and exception handling. Implementation of language translation tools including compilers and interpreters. Lexical, syntactic and semantic analysis; code generation; introduction to code optimization. Teams implement a language and its compiler

#### **Fall 2024: COMS W4115**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4115	001/11943	T Th 11:40am - 12:55pm 451 Computer Science Bldg	Baishakhi Ray	3.00	77/100
COMS 4115	V01/18705		Baishakhi Ray	3.00	5/99

#### **Spring 2025: COMS W4115**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4115	001/11970	M W 4:10pm - 5:25pm 833 Seeley W. Mudd Building	Ronghui Gu	3.00	70/120
COMS 4115	V01/18062		Ronghui Gu	3.00	11/99

### **COMS W4118 OPERATING SYSTEMS I. 3.00 points.**

Lect: 3.

Prerequisites: (CSEE W3827) and CSEE W3827; Knowledge of C and programming tools as covered in COMS COMS W3136, COMS W3157, or COMS W3101, or the instructor's permission.

Design and implementation of operating systems. Topics include process management, process synchronization and interprocess communication, memory management, virtual memory, interrupt handling, processor scheduling, device management, I/O, and file systems. Case study of the UNIX operating system. A programming project is required

#### **Fall 2024: COMS W4118**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4118	001/11944	T Th 4:10pm - 5:25pm 501 Northwest Corner	Jason Nieh	3.00	74/160
COMS 4118	V01/17522		Jason Nieh	3.00	7/99

#### **Spring 2025: COMS W4118**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4118	001/11971	T Th 4:10pm - 5:25pm 309 Havemeyer Hall	Kostis Kaffes	3.00	101/160
COMS 4118	V01/18065		Kostis Kaffes	3.00	2/99

### **COMS W4119 COMPUTER NETWORKS. 3.00 points.**

Prerequisites: Comfort with basic probability and programming fluency in Python, C++, Java, or Ruby.

Introduction to computer networks and the technical foundations of the internet, including applications, protocols, local area networks, algorithms for routing and congestion control, security, elementary performance evaluation. Several written and programming assignments required

**COMS W4121 COMPUTER SYSTEMS FOR DATA SCIENCE. 3.00 points.**

Prerequisites: CSOR W4246 OR STAT W4203; or equivalent as approved by faculty advisor. background in Computer System Organization and good working knowledge of C/C++  
Corequisites: CSOR W4246, STAT GU4203

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers

**COMS W4137 From Algorithmic Thinking to Development. 3.00 points.**

Algorithmic problem-solving and coding skills needed to devise solutions to interview questions for software engineering positions. Solutions are implemented in Python, Java, C, and C . Approaches include brute-force, hashing, sorting, transform-and-conquer, greedy, and dynamic programming. Focus on experimentation and team work

**COMS W4152 Engineering Software-as-a-Service. 3.00 points.**

Prerequisites: COMS W3134 AND COMS W3157 AND CSEE W3827

Modern software engineering concepts and practices including topics such as Software-as-a-Service, Service-oriented Architecture, Agile Development, Behavior-driven Development, Ruby on Rails, and Dev/ops

**COMS W4153 Cloud Computing. 3.00 points.**

Prerequisites: COMS W4111

Software engineering skills necessary for developing cloud computing and software-as-a-service applications, covering topics such as service-oriented architectures, message-driven applications, and platform integration. Includes theoretical study, practical application, and collaborative project work

Fall 2024: COMS W4153

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4153	001/14010	F 1:10pm - 3:40pm 309 Havemeyer Hall	Donald Ferguson	3.00	304/310
COMS 4153	V01/18778		Donald Ferguson	3.00	17/99

**COMS W4156 ADVANCED SOFTWARE ENGINEERING. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W3157) or Software lifecycle using frameworks, libraries and services. Major emphasis on software testing. Centers on a team project  
Fall 2024: COMS W4156

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS 4156	001/11945	T Th 10:10am - 11:25am 833 Seeley W. Mudd Building	Gail Kaiser	3.00	118/120
COMS 4156	V01/17608		Gail Kaiser	3.00	7/99

**COMS W4160 COMPUTER GRAPHICS. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137) COMS W3134 OR COMS W3136 OR COMS W3137; Strong programming background and some mathematical familiarity including linear algebra is required.

Introduction to computer graphics. Topics include 3D viewing and projections, geometric modeling using spline curves, graphics systems such as OpenGL, lighting and shading, and global illumination. Significant implementation is required: the final project involves writing an interactive 3D video game in OpenGL

Spring 2025: COMS W4160

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4160	001/11972	T Th 6:40pm - 7:55pm 313 Fayerweather	Hadi Fadaifard	3.00	65/75
COMS 4160	V01/20390		Hadi Fadaifard	3.00	3/99

**COMS W4162 Advanced Computer Graphics. 3 points.**

Lect: 3.

Prerequisites: (COMS W4160) or COMS W4160

A second course in computer graphics covering more advanced topics including image and signal processing, geometric modeling with meshes, advanced image synthesis including ray tracing and global illumination, and other topics as time permits. Emphasis will be placed both on implementation of systems and important mathematical and geometric concepts such as Fourier analysis, mesh algorithms and subdivision, and Monte Carlo sampling for rendering. Note: Course will be taught every two years.

**COMS W4165 COMPUT TECHNIQUES-PIXEL PROCSS. 3.00 points.**

Prerequisites: COMS W3137, COMS W3251 recommended, and a good working knowledge of UNIX and C. Intended for graduate students and advanced undergraduates.

An intensive introduction to image processing - digital filtering theory, image enhancement, image reconstruction, antialiasing, warping, and the state of the art in special effects. Topics from the basis of high-quality rendering in computer graphics and of low-level processing for computer vision, remote sensing, and medical imaging. Emphasizes computational techniques for implementing useful image-processing functions

**COMS W4167 COMPUTER ANIMATION. 3.00 points.**

Lect: 3.

Prerequisites: multivariable calculus, linear algebra, C++ programming proficiency. COMS W4156 recommended.

Theory and practice of physics-based animation algorithms, including animated clothing, hair, smoke, water, collisions, impact, and kitchen sinks. Topics covered: Integration of ordinary differential equations, formulation of physical models, treatment of discontinuities including collisions/contact, animation control, constrained Lagrangian Mechanics, friction/dissipation, continuum mechanics, finite elements, rigid bodies, thin shells, discretization of Navier-Stokes equations. General education requirement: quantitative and deductive reasoning (QUA).

#### Spring 2025: COMS W4167

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4167	001/11973	T Th 4:10pm - 5:25pm 451 Computer Science Bldg	Changxi Zheng	3.00	26/75

#### COMS W4170 USER INTERFACE DESIGN. 3.00 points. CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) COMS W3134 OR COMS W3136 OR COMS W3137  
Introduction to the theory and practice of computer user interface design, emphasizing the software design of graphical user interfaces. Topics include basic interaction devices and techniques, human factors, interaction styles, dialogue design, and software infrastructure. Design and programming projects are required

#### Fall 2024: COMS W4170

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4170	001/11946	T Th 1:10pm - 2:25pm 833 Seeley W. Mudd Building	Brian Smith	3.00	119/120

COMS 4170	V01/17523		Brian Smith	3.00	6/99
-----------	-----------	--	-------------	------	------

#### Spring 2025: COMS W4170

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4170	001/11975	M W 1:10pm - 2:25pm 417 International Affairs Bldg	Lydia Chilton	3.00	413/398
COMS 4170	002/18894	M 7:00pm - 9:30pm 428 Pupin Laboratories	Lydia Chilton	3.00	150/147
COMS 4170	V01/18066		Lydia Chilton	3.00	15/20

#### COMS W4172 3D UI AND AUGMENTED REALITY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W4160) or (COMS W4170) or COMS W4160 OR COMS W4170; Or instructor's permission  
Design, development, and evaluation of 3D user interfaces. Interaction techniques and metaphors, from desktop to immersive. Selection and manipulation. Travel and navigation.

Symbolic, menu, gestural, and multimodal interaction. Dialogue design. 3D software support. 3D interaction devices and displays. Virtual and augmented reality. Tangible user interfaces. Review of relevant 3D math

#### Spring 2025: COMS W4172

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4172	001/11976	T Th 1:10pm - 2:25pm 227 Seeley W. Mudd Building	Steven Feiner	3.00	37/45

#### COMS W4181 SECURITY I. 3.00 points. Not offered during 2023-2024 academic year.

Prerequisites: COMS W3157; or equivalent.  
Introduction to security. Threat models. Operating system security features. Vulnerabilities and tools. Firewalls, virtual private networks, viruses. Mobile and app security. Usable security. Note: May not earn credit for both W4181 and W4180 or W4187

#### Fall 2024: COMS W4181

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4181	001/11947	M W 1:10pm - 2:25pm 1127 Seeley W. Mudd Building	Suman Jana	3.00	41/65
COMS 4181	V01/17631		Suman Jana	3.00	4/5

#### COMS W4182 SECURITY II. 3.00 points. Not offered during 2023-2024 academic year.

Prerequisites: COMS W4118 AND COMS W4181 AND CSEE W4119

Advanced security. Centralized, distributed, and cloud system security. Cryptographic protocol design choices. Hardware and software security techniques. Security testing and fuzzing. Blockchain. Human security issues. Note: May not earn credit for both W4182 and W4180 or W4187

#### Spring 2025: COMS W4182

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4182	001/11977	F 1:10pm - 3:40pm 1024 Seeley W. Mudd Building	John Koh	3.00	19/40
COMS 4182	V01/18068		John Koh	3.00	0/99

#### COMS W4186 MALWARE ANALYSIS#REVERSE ENGINEERING. 3.00 points.

Not offered during 2023-2024 academic year.

Prerequisites: COMS W3157 AND CSEE W3827; or equivalent.

Hands-on analysis of malware. How hackers package and hide malware and viruses to evade analysis. Disassemblers, debuggers, and other tools for reverse engineering. Deep study of Windows Internals and x86 assembly.

\$100 Lab Fee.

#### Fall 2024: COMS W4186

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4186	001/12324	Th 4:10pm - 6:40pm 545 Seeley W. Mudd Building	Michael Sikorski	3.00	38/40
COMS 4186	V01/18706		Michael Sikorski	3.00	8/99

#### COMS W4203 Graph Theory. 3 points.

Lect: 3.

Prerequisites: (COMS W3203) COMS W3203

General introduction to graph theory. Isomorphism testing, algebraic specification, symmetries, spanning trees, traversability, planarity, drawings on higher-order surfaces, colorings, extremal graphs, random graphs, graphical measurement, directed graphs, Burnside-Polya counting, voltage graph theory.

#### COMS W4205 Combinatorial Theory. 3 points.

Lect: 3. **Not offered during 2023-2024 academic year.**

Prerequisites: (COMS W3203) and course in calculus.

Sequences and recursions, calculus of finite differences and sums, elementary number theory, permutation group structures, binomial coefficients, Stirling numbers, harmonic numbers, generating functions.

#### COMS W4223 Networks, Crowds, and the Web. 3.00 points.

Prerequisites: Familiarity with elementary concepts of probability and data structures or experience programming with data

Introduces fundamental ideas and algorithms on networks of information collected by online services. It covers properties pervasive in large networks, dynamics of individuals that lead to large collective phenomena, mechanisms underlying the web economy, and results and tools informing societal impact of algorithms on privacy, polarization and discrimination

#### Spring 2025: COMS W4223

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4223	001/14256	T Th 4:10pm - 5:25pm 313 Fayerweather	Augustin Chaintreau	3.00	68/78
COMS 4223	V01/18841		Augustin Chaintreau	3.00	32/99

#### COMS W4231 ANALYSIS OF ALGORITHMS I. 3.00 points.

#### COMS W4232 Advanced Algorithms. 3.00 points.

Prerequisite: Analysis of Algorithms (COMS W4231).

Prerequisites: see notes re: points COMS W4231

Introduces classic and modern algorithmic ideas that are central to many areas of Computer Science. The focus is on most powerful paradigms and techniques of how to design algorithms, and how to measure their efficiency. The intent is to

be broad, covering a diversity of algorithmic techniques, rather than be deep. The covered topics have all been implemented and are widely used in industry. Topics include: hashing, sketching/streaming, nearest neighbor search, graph algorithms, spectral graph theory, linear programming, models for large-scale computation, and other related topics

#### Spring 2025: COMS W4232

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4232	001/11978	T Th 2:40pm - 4:00pm 702 Hamilton Hall	Alexandr Andoni	3.00	35/80
COMS 4232	V01/18070		Alexandr Andoni	3.00	1/99

#### COMS W4236 INTRO-COMPUTATIONAL COMPLEXITY. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3261) COMS W3261

Develops a quantitative theory of the computational difficulty of problems in terms of the resources (e.g. time, space) needed to solve them. Classification of problems into complexity classes, reductions, and completeness. Power and limitations of different modes of computation such as nondeterminism, randomization, interaction, and parallelism

#### Fall 2024: COMS W4236

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4236	001/11948	M W 8:40am - 9:55am 451 Computer Science Bldg	Xi Chen	3.00	33/70
COMS 4236	V01/17552		Xi Chen	3.00	4/99

#### COMS W4241 Numerical Algorithms and Complexity. 3 points.

Lect: 3.

Prerequisites: knowledge of a programming language. Some knowledge of scientific computation is desirable.

Modern theory and practice of computation on digital computers. Introduction to concepts of computational complexity. Design and analysis of numerical algorithms. Applications to computational finance, computational science, and computational engineering.

#### COMS W4242 NUMRCL ALGORITHMS-COMPLEXITY II. 3.00 points.

#### COMS W4252 INTRO-COMPUTATIONAL LEARNING THEORY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CSOR W4231) or (COMS W4236) or CSOR W4231 OR COMS W4236 OR COMS W3203 OR COMS W3261

Possibilities and limitations of performing learning by computational agents. Topics include computational models of learning, polynomial time learnability, learning from examples

and learning from queries to oracles. Computational and statistical limitations of learning. Applications to Boolean functions, geometric functions, automata.

**COMS W4261 INTRO TO CRYPTOGRAPHY. 3.00 points.**  
Lect: 2.5.

Prerequisites: COMS W3261 OR CSOR W4231; Comfort with basic discrete math and probability. Recommended: COMS W3261 or CSOR W4231.

An introduction to modern cryptography, focusing on the complexity-theoretic foundations of secure computation and communication in adversarial environments; a rigorous approach, based on precise definitions and provably secure protocols. Topics include private and public key encryption schemes, digital signatures, authentication, pseudorandom generators and functions, one-way functions, trapdoor functions, number theory and computational hardness, identification and zero knowledge protocols

**Spring 2025: COMS W4261**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4261	001/13820	M 7:00pm - 9:30pm 451 Computer Science Bldg	Allison Bishop	3.00	89/110

**COMS W4281 INTRO TO QUANTUM COMPUTING. 3.00 points.**  
Lect: 3.

Prerequisites: knowledge of linear algebra. Prior knowledge of quantum mechanics is not required, although it is helpful. Introduction to quantum computing. Shor's factoring algorithm, Grover's database search algorithm, the quantum summation algorithm. Relationship between classical and quantum computing. Potential power of quantum computers.

**Fall 2024: COMS W4281**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4281	001/11949	M W 10:10am - 11:25am 209 Havemeyer Hall	Henry Yuen	3.00	108/110

**COMS W4295 Topics in Theoretical Computer Science. 3.00 points.**

Selected topics in theoretical computer science. Content and prerequisites vary between sections and semesters. May be repeated for credit. Check "topics courses" webpage on the department website for more information on each section

**COMS W4419 INTERNET TECHNOLOGY, ECONOMICS, AND POLICY. 3.00 points.**  
Not offered during 2023-2024 academic year.

Technology, economic and policy aspects of the Internet. Summarizes how the Internet works technically, including protocols, standards, radio spectrum, global infrastructure and interconnection. Micro-economics with a focus on media and

telecommunication economic concerns, including competition and monopolies, platforms, and behavioral economics. US constitution, freedom of speech, administrative procedures act and regulatory process, universal service, role of FCC. Not a substitute for CSEE4119. Suitable for non-majors. May not be used as a track elective for the computer science major.

**Spring 2025: COMS W4419**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4419	001/11979	M W 4:10pm - 5:25pm 829 Seeley W. Mudd Building	Henning Schulzrinne	3.00	33/40

**COMS W4444 PROGRAMMING # PROBLEM SOLVING. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (CSEE W3827) COMS W3134 AND COMS W3136 OR COMS W3137 AND CSEE W3827

Hands-on introduction to solving open-ended computational problems. Emphasis on creativity, cooperation, and collaboration. Projects spanning a variety of areas within computer science, typically requiring the development of computer programs. Generalization of solutions to broader problems, and specialization of complex problems to make them manageable. Team-oriented projects, student presentations, and in-class participation required

**Fall 2024: COMS W4444**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4444	001/11950	M W 1:10pm - 2:25pm 337 Seeley W. Mudd Building	Kenneth Ross	3.00	32/31

**COMS W4460 PRIN-INNOVATN/ ENTREPRENEURSHIP. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134 OR COMS W3136 OR COMS W3137; Or instructor's permission

Team project centered course focused on principles of planning, creating, and growing a technology venture. Topics include: identifying and analyzing opportunities created by technology paradigm shifts, designing innovative products, protecting intellectual property, engineering innovative business models

**Fall 2024: COMS W4460**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4460	001/13626	F 10:10am - 12:40pm 829 Seeley W. Mudd Building	William Reinisch	3.00	39/40

### COMS W4701 ARTIFICIAL INTELLIGENCE. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and COMS W3134 OR COMS W3136 OR COMS W3137; Any course on probability

Prior knowledge of Python is recommended. Provides a broad understanding of the basic techniques for building intelligent computer systems. Topics include state-space problem representations, problem reduction and and-or graphs, game playing and heuristic search, predicate calculus, and resolution theorem proving, AI systems and languages for knowledge representation, machine learning and concept formation and other topics such as natural language processing may be included as time permits

#### Fall 2024: COMS W4701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4701	001/11951	T Th 10:10am - 11:25am 501 Schermerhorn Hall	Ansaf Salleb-Aouissi	3.00	183/180
COMS 4701	002/11952	T Th 11:40am - 12:55pm 501 Schermerhorn Hall	Ansaf Salleb-Aouissi	3.00	199/180
COMS 4701	V01/17524		Ansaf Salleb-Aouissi	3.00	17/99

#### Spring 2025: COMS W4701

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4701	001/13152	M W 4:10pm - 5:25pm 301 Pupin Laboratories	Tony Dear	3.00	207/250
COMS 4701	V01/18072		Tony Dear	3.00	8/99

### COMS W4705 NATURAL LANGUAGE PROCESSING. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134 OR COMS W3136 OR COMS W3137; Or instructor's permission

Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas

#### Fall 2024: COMS W4705

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

COMS 001/11953 F 10:10am - Daniel 3.00 253/275  
4705 12:40pm Bauer  
417 International  
Affairs Bldg

COMS 002/11954 M W 4:10pm - Zhou Yu 3.00 75/100  
4705 5:25pm  
451 Computer  
Science Bldg

COMS V01/17525 Daniel 3.00 18/99  
4705 Bauer

#### Spring 2025: COMS W4705

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4705	001/11981	M W 10:10am - 11:25am 501 Schermerhorn Hall	Daniel Bauer	3.00	165/189
COMS 4705	V01/18074		Daniel Bauer	3.00	16/99

### COMS W4706 Spoken Language Processing. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134, W3136, or W3137; or the instructor's permission.

Computational approaches to speech generation and understanding. Topics include speech recognition and understanding, speech analysis for computational linguistics research, and speech synthesis. Speech applications including dialogue systems, data mining, summarization, and translation. Exercises involve data analysis and building a small text-to-speech system.

### COMS W4721 MACHINE LEARNING FOR DATA SCI. 3.00 points.

#### Spring 2025: COMS W4721

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4721	001/15963	M W 2:40pm - 3:55pm 417 International Affairs Bldg	John Paisley	3.00	129/170

### COMS W4725 Knowledge representation and reasoning. 3 points.

Lect: 3. Not offered during 2023-2024 academic year.

Prerequisites: (COMS W4701)

General aspects of knowledge representation (KR). The two fundamental paradigms (semantic networks and frames) and illustrative systems. Topics include hybrid systems, time, action/plans, defaults, abduction, and case-based reasoning. Throughout the course particular attention is paid to design trade-offs between language expressiveness and reasoning complexity, and issues relating to the use of KR systems in larger applications.

### COMS W4731 Computer Vision I: First Principles. 3.00 points.

Lect: 3.

Prerequisites: Fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.

Introductory course in computer vision. Topics include image formation and optics, image sensing, binary images, image processing and filtering, edge extraction and boundary detection, region growing and segmentation, pattern classification methods, brightness and reflectance, shape from shading and photometric stereo, texture, binocular stereo, optical flow and motion, 2D and 3D object representation, object recognition, vision systems and applications

#### Fall 2024: COMS W4731

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4731	001/11955	M W 10:10am - 11:25am 451 Computer Science Bldg	Shree Nayar	3.00	79/95

#### COMS W4732 Computer Vision II: Learning. 3.00 points.

Prerequisites: COMS W4731; Fundamentals of calculus, linear algebra, and Python programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.

Advanced course in computer vision. Topics include convolutional networks and back-propagation, object and action recognition, self-supervised and few-shot learning, image synthesis and generative models, object tracking, vision and language, vision and audio, 3D representations, interpretability, and bias, ethics, and media deception

#### Spring 2025: COMS W4732

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4732	001/13738	T Th 10:10am - 11:25am 451 Computer Science Bldg	Carl Vondrick	3.00	106/100
COMS 4732	V01/18075		Carl Vondrick	3.00	31/99

#### COMS W4733 COMPUTATIONAL ASPECTS OF ROBOTICS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 COMS W3137) COMS W3134 OR COMS W3136 OR COMS W3137 AND COMS W3251 OR MATH UN2010 OR APMA E2101 OR APMA E3101 OR MATH UN2015 AND STAT GU4001 OR IEOR E3658 OR STAT UN1201 OR MATH UN2015 Proficiency in Python or a similar programming language. Introduction to fundamental problems and algorithms in robotics. Topics include configuration spaces, motion and sensor models, search and sampling-based planning, state estimation, localization and mapping, perception, and learning

#### COMS W4735 VISUAL INTERFACES TO COMPUTERS. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) COMS W3134 OR COMS W3136 OR COMS W3137

Visual input as data and for control of computer systems.

Survey and analysis of architecture, algorithms, and underlying assumptions of commercial and research systems that recognize and interpret human gestures, analyze imagery such as fingerprint or iris patterns, generate natural language descriptions of medical or map imagery. Explores foundations in human psychophysics, cognitive science, and artificial intelligence

#### COMS W4737 Biometrics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a background at the sophomore level in computer science, engineering, or like discipline.

In this course. we will explore the latest advances in biometrics as well as the machine learning techniques behind them.

Students will learn how these technologies work and how they are sometimes defeated. Grading will be based on homework assignments and a final project. There will be no midterm or final exam. This course shares lectures with *COMS E6737*. Students taking *COMS E6737* are required to complete additional homework problems and undertake a more rigorous final project. Students will only be allowed to earn credit for *COMS W4737* or *COMS E6737* and not both.

#### COMS W4762 Machine Learning for Functional Genomics. 3 points.

Prerequisites: Proficiency in a high-level programming language (Python/R/Julia). An introductory machine learning class (such as COMS 4771 Machine Learning) will be helpful but is not required.

Prerequisites: see notes re: points Proficiency in a high level programming language Python/R/Julia. An introductory machine learning class such as COMS W4771 Machine Learning will be helpful but is not required.

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA (“chromatin”) are active (“open”) or bound by specific proteins.

#### COMS E4762 Machine Learning for Functional Genomics. 3.00 points.

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA (“chromatin”) are active (“open”) or bound by specific proteins

#### Fall 2024: COMS E4762

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4762	001/11956	F 1:10pm - 3:40pm 451 Computer Science Bldg	David Knowles	3.00	112/120

**COMS W4771 MACHINE LEARNING. 3.00 points.**

Lect: 3.

Prerequisites: COMS W4701; Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence.

Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov models. Algorithms implemented in MATLAB

**Fall 2024: COMS W4771**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4771	001/11957	T Th 2:40pm - 3:55pm 451 Computer Science Bldg	Nakul Verma	3.00	84/110
COMS 4771	V01/17526		Nakul Verma	3.00	5/99

**Spring 2025: COMS W4771**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4771	001/11982	T Th 1:10pm - 2:25pm 451 Computer Science Bldg	Nakul Verma	3.00	70/110
COMS 4771	002/11983	T Th 2:40pm - 3:55pm 451 Computer Science Bldg	Nakul Verma	3.00	54/110
COMS 4771	V01/18077		Nakul Verma	3.00	2/99

**COMS W4772 ADVANCED MACHINE LEARNING. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W4771) or COMS W4771; Instructor's permission; knowledge of linear algebra & introductory probability or statistics is required.

An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally?

Topics include appearance-based models, principal and independent components analysis, dimensionality reduction, kernel methods, manifold learning, latent models, regression, classification, Bayesian methods, maximum entropy methods, real-time tracking, extended Kalman filters, time series prediction, hidden Markov models, factorial HMMs, input-output HMMs, Markov random fields, variational methods, dynamic Bayesian networks, and Gaussian/Dirichlet processes. Links to cognitive science

**COMS W4773 Machine Learning Theory. 3 points.**

Prerequisites: Machine Learning (COMS W4771). Background in probability and statistics, linear algebra, and multivariate

calculus. Ability to program in a high-level language, and familiarity with basic algorithm design and coding principles.

Prerequisites: see notes re: points COMS W4771

Core topics from unsupervised learning such as clustering, dimensionality reduction and density estimation will be studied in detail. Topics in clustering: k-means clustering, hierarchical clustering, spectral clustering, clustering with various forms of feedback, good initialization techniques and convergence analysis of various clustering procedures. Topics in dimensionality reduction: linear techniques such as PCA, ICA, Factor Analysis, Random Projections, non-linear techniques such as LLE, IsoMap, Laplacian Eigenmaps, tSNE, and study of embeddings of general metric spaces, what sorts of theoretical guarantees can one provide about such techniques. Miscellaneous topics: design and analysis of data structures for fast Nearest Neighbor search such as Cover Trees and LSH. Algorithms will be implemented in either Matlab or Python.

**COMS E4773 Machine Learning Theory. 3.00 points.**

Theoretical study of algorithms for machine learning and high-dimensional data analysis. Topics include high-dimensional probability, theory of generalization and statistical learning, online learning and optimization, spectral analysis

**COMS W4774 Unsupervised Learning. 3.00 points.**

Prerequisites: Solid background in multivariate calculus, linear algebra, basic probability, and algorithms.

Prerequisites: see notes re: points COMS W4771; Background in probability and statistics, linear algebra, and multivariate calculus. Ability to program in a high-level language, and familiarity with basic algorithm design and coding principles. Core topics from unsupervised learning such as clustering, dimensionality reduction and density estimation will be studied in detail. Topics in clustering: k-means clustering, hierarchical clustering, spectral clustering, clustering with various forms of feedback, good initialization techniques and convergence analysis of various clustering procedures. Topics in dimensionality reduction: linear techniques such as PCA, ICA, Factor Analysis, Random Projections, non-linear techniques such as LLE, IsoMap, Laplacian Eigenmaps, tSNE, and study of embeddings of general metric spaces, what sorts of theoretical guarantees can one provide about such techniques. Miscellaneous topics: design and analysis of data structures for fast Nearest Neighbor search such as Cover Trees and LSH. Algorithms will be implemented in either Matlab or Python

**Fall 2024: COMS W4774**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4774	001/11958	T Th 1:10pm - 2:25pm 451 Computer Science Bldg	Nakul Verma	3.00	41/50

**COMS W4775 Causal Inference. 3.00 points.**

Prerequisites: Discrete Math, Calculus, Statistics (basic probability, modeling, experimental design), some programming experience.

Prerequisites: see notes re: points COMS W4771; Discrete Math, Calculus, Statistics basic probability, modeling, experimental design, Some programming experience Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML

#### Fall 2024: COMS W4775

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4775	001/11959	M W 4:10pm - 5:25pm 750 Schapiro Cepser	Elias Bareinboim	3.00	52/60

#### COMS E4775 Causal Inference. 3 points.

Prerequisites: (COMS4711W) and Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML.

#### COMS W4776 Machine Learning for Data Science. 3 points.

Lect.: 3

Prerequisites: (STAT GU4001 or IEOR E4150) and SIEO W3600 or W4150 or equivalent.

Introduction to machine learning, emphasis on data science. Topics include least square methods, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models, hidden Markov models, support vector machines kernel methods. Emphasizes methods and problems relevant to big data. Students may not receive credit for both COMS W4771 and W4776.

#### COMS W4824 COMPUTER ARCHITECTURE. 3.00 points.

#### COMS W4835 COMPUTER ORGANIZATION II. 3.00 points.

#### COMS E4899 Research Training. 0.00 points.

Research training course. Recommended in preparation for laboratory related research

#### COMS W4901 Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

#### Fall 2024: COMS W4901

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
COMS 4901	024/12683		Julia Hirschberg	1-3	8/45

#### COMS W4910 CURRICULAR PRACTICAL TRAINING.

1.00 point.

#### COMS E4995 COMPUTER ARTS/VIDEO GAMES. 3.00 points.

Special topics arranged as the need and availability arises. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit. Consult the department for section assignment

#### COMS W4995 TOPICS IN COMPUTER SCIENCE. 3.00 points.

Lect: 3.

Selected topics in computer science. Content and prerequisites vary between sections and semesters. May be repeated for credit. Check "topics course" webpage on the department website for more information on each section

#### Fall 2024: COMS W4995

**COMS W4996 Special topics in computer science, II. 3 points.**Lect: 3. **Not offered during 2023-2024 academic year.**

Prerequisites: Instructor's permission.

A continuation of COMS W4995 when the special topic extends over two terms.

**COMPUTER SCIENCE - ELECTRICAL ENGINEERING****CSEE W3826 FUNDAMENTALS OF COMPUTER ORG. 3.00 points.****CSEE W3827 FUNDAMENTALS OF COMPUTER SYSTS. 3.00 points.**

Lect: 3.

Prerequisites: An introductory programming course.

Fundamentals of computer organization and digital logic.

Boolean algebra, Karnaugh maps, basic gates and components, flipflops and latches, counters and state machines, basics of combinational and sequential digital design. Assembly language, instruction sets, ALU's, single-cycle and multi-cycle processor design, introduction to pipelined processors, caches, and virtual memory

**Fall 2024: CSEE W3827**

### CSEE W4119 COMPUTER NETWORKS. 3.00 points.

Prerequisites: Comfort with basic probability. Programming fluency in Python, C++, Java, or Ruby please see section course page for specific language requirements.

Introduction to computer networks and the technical foundations of the Internet, including applications, protocols, local area networks, algorithms for routing and congestion control, security, elementary performance evaluation. Several written and programming assignments required

#### Fall 2024: CSEE W4119

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

### CSEE W4121 COMPUTER SYSTEMS FOR DATA SCIENCE. 3.00 points.

Prerequisites: Background in Computer System Organization and good working knowledge of C/C++. CSOR W4246 Algorithms for Data Science, STAT W4203 Probability Theory, or equivalent as approved by faculty advisor.

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers

#### Spring 2025: CSEE W4121

### CSEE W4140 NETWORKING LABORATORY. 3.00 points.

Lect: 3.

Prerequisites: (CSEE W4119) or CSEE W4119; or equivalent.

In this course, students will learn how to put principles into practice, in a hands-on-networking lab course. The course will cover the technologies and protocols of the Internet using equipment currently available to large internet service providers such as CISCO routers and end systems. A set of laboratory experiments will provide hands-on experience with engineering wide-area networks and will familiarize students with the Internet Protocol (IP), Address Resolution Protocol (ARP), Internet Control Message Protocol (ICMP), User Datagram Protocol (UDP) and Transmission Control Protocol (TCP), the Domain Name System (DNS), routing protocols (RIP, OSPF, BGP), network management protocols (SNMP, and application-level protocols (FTP, TELNET, SMTP)

### CSEE W4823 Advanced Logic Design. 3 points.

Lect: 3.

Prerequisites: (CSEE W3827) or CSEE W3827; Or a half semester introduction to digital logic, or the equivalent.

An introduction to modern digital system design. Advanced topics in digital logic: controller synthesis (Mealy and Moore machines); adders and multipliers; structured logic blocks (PLDs, PALs, ROMs); iterative circuits. Modern design methodology: register transfer level modelling (RTL); algorithmic state machines (ASMs); introduction to hardware description languages (VHDL or Verilog); system-level modelling and simulation; design examples.

#### Fall 2024: CSEE W4823

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSEE 4823	001/11307	T Th 2:40pm - 3:55pm 203 Mathematics Building	Mingoo Seok	3	103/110

### CSEE W4824 COMPUTER ARCHITECTURE. 3.00 points.

Lect: 3.

Prerequisites: (CSEE W3827) or CSEE W3827

Focuses on advanced topics in computer architecture, illustrated by case studies from classic and modern processors. Fundamentals of quantitative analysis. Pipelining. Memory hierarchy design. Instruction-level and thread-level parallelism. Data-level parallelism and graphics processing units. Multiprocessors. Cache coherence. Interconnection networks. Multi-core processors and systems-on-chip. Platform architectures for embedded, mobile, and cloud computing

#### Fall 2024: CSEE W4824

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

CSEE 4824 001/11987 M W 10:10am - 11:25am 3.00 58/86  
717 Hamilton Hall

**CSEE W4840 EMBEDDED SYSTEMS. 3.00 points.**

Lect: 3.

Prerequisites: (CSEE W4823) CSEE W4823

Embedded system design and implementation combining hardware and software. I/O, interfacing, and peripherals. Weekly laboratory sessions and term project on design of a microprocessor-based embedded system including at least one custom peripheral. Knowledge of C programming and digital logic required

**Spring 2025: CSEE W4840**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSEE 4840	001/12009	M W 1:10pm - 2:25pm 451 Computer Science Bldg	Stephen Edwards	3.00	98/110

**CSEE W4868 SYSTEM-ON-CHIP PLATFORMS. 3.00 points.**

Prerequisites: (COMS W3157) and (CSEE W3827) COMS W3157 AND CSEE W3827

Design and programming of System-on-Chip (SoC) platforms. Topics include: overview of technology and economic trends, methodologies and supporting CAD tools for system-level design, models of computation, the SystemC language, transaction-level modeling, software simulation and virtual platforms, hardware-software partitioning, high-level synthesis, system programming and device drivers, on-chip communication, memory organization, power management and optimization, integration of programmable processor cores and specialized accelerators. Case studies of modern SoC platforms for various classes of applications

**Fall 2024: CSEE W4868**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CSEE 4868	001/11988	T Th 11:40am - 12:55pm 141 Uris Hall	Luca Carloni	3.00	47/60

## COMPUTER SCIENCE - BIOMEDICAL ENGINEERING

**CBMF W4761 COMPUTATIONAL GENOMICS. 3.00 points.**

Lect: 3.

Prerequisites: Working knowledge of at least one programming language, and some background in probability and statistics. Computational techniques for analyzing genomic data including DNA, RNA, protein and gene expression data. Basic

concepts in molecular biology relevant to these analyses. Emphasis on techniques from artificial intelligence and machine learning. String-matching algorithms, dynamic programming, hidden Markov models, expectation-maximization, neural networks, clustering algorithms, support vector machines. Students with life sciences backgrounds who satisfy the prerequisites are encouraged to enroll

**Spring 2025: CBMF W4761**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

The Creative Writing Program in The School of the Arts combines intensive writing workshops with seminars that study literature from a writer's perspective. Students develop and hone their literary technique in workshops. The seminars (which explore literary technique and history)

broaden their sense of possibility by exposing them to various ways that language has been used to make art. Related courses are drawn from departments such as English, comparative literature and society, philosophy, history, and anthropology, among others.

Students consult with faculty advisers to determine the related courses that best inform their creative work. For details on the major, see the Creative Writing website: <http://arts.columbia.edu/writing/undergraduate>.

## LECTURER IN THE DISCIPLINE OF WRITING

Latif A. Ba

Peter M. Rafel

Ronald L. Robertson Jr.

## MAJOR IN CREATIVE WRITING

The major in creative writing requires a minimum of 36 points: five workshops, four seminars, and three related courses.

### Workshop Curriculum (15 points)

Students in the workshops produce original works of fiction, poetry, or nonfiction, and submit them to their classmates and instructor for a close critical analysis. Workshop critiques (which include detailed written reports and thorough line-edits) assess the mechanics and merits of the writing pieces. Individual instructor conferences distill the critiques into a direct plan of action to improve the work. Student writers develop by practicing the craft under the diligent critical attention of their peers and instructor, which guides them toward new levels of creative endeavor.

Creative writing majors select 15 points within the division in the following courses. One workshop must be in a genre other than the primary focus. For instance, a fiction writer might take four fiction workshops and one poetry workshop.

#### Beginning Workshop

Designed for students who have little or no previous experience writing literary texts in a particular genre.

WRIT UN1100	BEGINNING FICTION WORKSHOP
WRIT UN1200	BEGINNING NONFICTION WORKSHOP
WRIT UN1300	BEGINNING POETRY WORKSHOP

#### Intermediate Workshop

Permission required. Admission by writing sample. Enrollment limited to 15. Course may be repeated in fulfillment of the major.

WRIT UN2100	INTERMEDIATE FICTION WORKSHOP
WRIT UN2200	INTERMEDIATE NONFICTION WRKSH
WRIT UN2300	INTERMEDIATE POETRY WORKSHOP
<b>Advanced Workshop</b>	
Permission required. Admission by writing sample. Enrollment limited to 15. Course may be repeated in fulfillment of the major.	
WRIT UN3100	ADVANCED FICTION WORKSHOP
WRIT UN3200	ADVANCED NONFICTION WORKSHOP
WRIT UN3300	ADVANCED POETRY WORKSHOP
<b>Senior Creative Writing Workshop</b>	
Seniors who are creative writing majors are given priority. Enrollment limited to 12, by instructor's permission. The senior workshop offers students the opportunity to work exclusively with classmates who are at the same high level of accomplishment in the major. This course is only offered by graduate faculty professors.	
WRIT UN3101	SENIOR FICTION WORKSHOP, Senior Fiction Workshop
WRIT UN3201	SENIOR NONFICTION WORKSHOP
WRIT UN3301	SENIOR POETRY WORKSHOP

## Seminar Curriculum (12 points)

The creative writing seminars form the intellectual ballast of our program. Our seminars offer a close examination of literary techniques such as plot, point of view, tone, and voice.

They seek to inform and inspire students by exposing them to a wide variety of approaches in their chosen genre. Our curriculum, via these seminars, actively responds not only to historical literary concerns, but to contemporary ones as well.

Extensive readings are required, along with short critical papers and/or creative exercises. By closely analyzing diverse works of literature and participating in roundtable discussions, writers build the resources necessary to produce their own accomplished creative work.

Creative writing majors select 12 points within the division. Any 4 seminars will fulfill the requirement, no matter the student's chosen genre concentration. Below is a sampling of our seminars. The list of seminars currently being offered can be found in the "Courses" section.

These seminars offer close examination of literary techniques such as plot, point of view, tone, suspense, and narrative voice. Extensive readings are required, along with creative exercises.

### FICTION

WRIT UN3121	HOW TO BUILD A PERSON
WRIT UN3117	Fiction Seminar: The Here & Now

WRIT UN3122	FIRST NOVELS: HOW THEY WORK
WRIT UN3120	THE CRAFT OF WRITING DIALOGUE
<b>NONFICTION</b>	
WRIT UN3213	Nonfiction Seminar: The Literary Reporter
WRIT UN3215	ART WRITING FOR WRITERS
WRIT UN3216	TRUTH # FACTS
WRIT UN3217	SCIENCE AND SENSIBILITY
<b>POETRY</b>	
WRIT UN2311	TRADITIONS IN POETRY
WRIT UN3313	Poetry Seminar: The Crisis of the I
WRIT UN3314	Poetry Seminar: 21st Century American Poetry and Its Concerns
WRIT GU4310	DOCUMENTARY POETICS
<b>CROSS GENRE</b>	
WRIT GU4011	Cross Genre Seminar: Imagining Berlin
WRIT GU4012	Cross Genre Seminar: Diva Voice, Diva Style, Diva Lyrics
WRIT UN3016	WALKING
WRIT UN3013	Cross-Genre Seminar: Process Writing & Writing Process

## Related Courses (9 points)

Drawn from various departments, these courses provide concentrated intellectual and creative stimulation, as well as exposure to ideas that enrich students' artistic instincts. Courses may be different for each student writer. Students should consult with faculty advisers to determine the related courses that best inform their creative work.

## FICTION WORKSHOPS

### WRIT UN1100 BEGINNING FICTION WORKSHOP. 3.00 points.

Prerequisites: No prerequisites. Department approval NOT required. The beginning workshop in fiction is designed for students with little or no experience writing literary texts in fiction. Students are introduced to a range of technical and imaginative concerns through exercises and discussions, and they eventually produce their own writing for the critical analysis of the class. The focus of the course is on the rudiments of voice, character, setting, point of view, plot, and lyrical use of language. Students will begin to develop the critical skills that will allow them to read like writers and understand, on a technical level, how accomplished creative writing is produced. Outside readings of a wide range of fiction supplement and inform the exercises and longer written projects

**WRIT UN2100 INTERMEDIATE FICTION WORKSHOP. 3.00 points.**

Intermediate workshops are for students with some experience with creative writing, and whose prior work merits admission to the class (as judged by the professor). Intermediate workshops present a higher creative standard than beginning workshops, and increased expectations to produce finished work. By the end of the semester, each student will have produced at least seventy pages of original fiction. Students are additionally expected to write extensive critiques of the work of their peers. Please visit <https://arts.columbia.edu/writing/undergraduate> for information about registration procedures

**Fall 2024: WRIT UN2100**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**WRIT UN3100 ADVANCED FICTION WORKSHOP. 3.00 points.**

Prerequisites: The department's permission required through writing sample. Please go to 609 Kent for submission schedule and registration guidelines or see <http://www.arts.columbia.edu/writing/undergraduate>.

Building on the work of the Intermediate Workshop, Advanced Workshops are reserved for the most accomplished creative writing students. A significant body of writing must be produced and revised. Particular attention will be paid to the components of fiction: voice, perspective, characterization, and form. Students will be expected to finish several short stories, executing a total artistic vision on a piece of writing. The critical focus of the class will include an examination of endings and formal wholeness, sustaining narrative arcs, compelling a reader's interest for the duration of the text, and generating a sense of urgency and drama in the work. Please visit <https://arts.columbia.edu/writing/undergraduate> for information about registration procedures

## FICTION SEMINARS

### WRIT UN2110 APPROACHES TO THE SHORT STORY. 3.00 points.

Prerequisites: No prerequisites. Department approval NOT required.

The modern short story has gone through many transformations, and the innovations of its practitioners have often pointed the way for prose fiction as a whole. The short story has been seized upon and refreshed by diverse cultures and aesthetic affiliations, so that perhaps the only stable definition of the form remains the famous one advanced by Poe, one of its early masters, as a work of fiction that can be read in one sitting. Still, common elements of the form have emerged over the last century and this course will study them, including Point of View, Plot, Character, Setting and Theme. John Hawkes once famously called these last four elements the "enemies of the novel," and many short story writers have seen them as hindrances as well. Hawkes later recanted, though some writers would still agree with his earlier assessment, and this course will examine the successful strategies of great writers across the spectrum of short story practice, from traditional approaches to more radical solutions, keeping in mind how one period's revolution - Hemingway, for example - becomes a later era's mainstream or "commonsense" storytelling mode. By reading the work of major writers from a writer's perspective, we will examine the myriad techniques employed for what is finally a common goal: to make readers feel. Short writing exercises will help us explore the exhilarating subtleties of these elements and how the effects created by their manipulation or even outright absence power our most compelling fictions

### WRIT UN3128 How to Write Funny. 3.00 points.

"Tragedy is when I cut my finger. Comedy is when you fall into an open sewer and die." --Mel Brooks "Comedy has to be based on truth. You take the truth and you put a little curlicue at the End." --Sid Caesar "Analyzing humor is like dissecting a frog. Few people are interested and the frog dies of it." --E.B. White "What is comedy? Comedy is the art of making people laugh without making them puke." --Steve Martin "Patty Marx is the best teacher at Columbia University." --Patty Marx One of the above quotations is false. Find out which one in this humor-writing workshop, where you will read, listen to, and watch comedic samples from well-known and lesser-known humorists. How could you not have fun in a class where we watch and critique the sketches of Monty Python, Nichols and May, Mr. Show, Mitchell # Webb, Key and Peele, French and Saunders, Derrick Comedy, Beyond the Fringe, Dave Chappelle, Bob and Ray, Mel Brooks, Amy Schumer, and SNL, to name just a few? The crux of our time, though, will be devoted to writing. Students will be expected to complete weekly writing assignments; additionally, there will be in-class assignments geared to strategies for crafting surprise (the kind that results in a laugh as opposed to, say, a heart attack or divorce). Toward this end, we will study the use of irony, irreverence, hyperbole, misdirection, subtext, wordplay, formulas such as the rule of three and paraprosochians (look it up), and repetition, and repetition

### WRIT UN3125 APOCALYPSES NOW. 3.00 points.

From ancient myths of the world's destruction to cinematic works that envision a post-apocalyptic reality, zealots of all kinds have sought an understanding of "the end of the world as we know it." But while apocalyptic predictions have, so far, failed to deliver a real glimpse of that end, in fiction they abound. In this course, we will explore the narrative mechanisms by which post-apocalyptic works create projections of our own world that are believably imperiled, realistically degraded, and designed to move us to feel differently and act differently within the world we inhabit. We will consider ways in which which authors craft immersive storylines that maintain a vital allegorical relationship to the problems of the present, and discuss recent trends in contemporary post-apocalyptic fiction. How has the genre responded to our changing conception of peril? Is literary apocalyptic fiction effective as a vehicle for persuasion and for showing threats in a new light? Ultimately, we will inquire into the possibility of thinking beyond our present moment and, by doing so, altering our fate.

**Fall 2024: WRIT UN3125**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3125	001/13553	W 4:10pm - 6:00pm 511 Kent Hall	Molly McGhee	3.00	14/15

**WRIT UN3121 HOW TO BUILD A PERSON. 3.00 points.**

Prerequisites: No prerequisites. Departmental approval NOT required. Character is something that good fiction supposedly cannot do without. But what is a character, and what constitutes a supposedly good or believable one? Should characters be like people we know, and if so, how exactly do we create written versions of people? This class will examine characters in all sorts of writing, historical and contemporary, with an eye toward understanding just how characters are created in fiction, and how they come to seem real to us. We'll read stories and novels; we may also look at essays and biographical writing to analyze where the traces of personhood reside. We'll also explore the way in which these same techniques of writing allow us to personify entities that lack traditional personhood, such as animals, computers, and other nonhuman characters. Does personhood precede narrative, or is it something we bestow on others by allowing them to tell their story or by telling a story of our own creation on their behalf? Weekly critical and creative exercises will intersect with and expand on the readings and discussions.

WRIT 3121	001/13554	W 2:10pm - 4:00pm 511 Kent Hall	Mina Seckin	3.00	14/15

**WRIT UN3132 THE ECSTASY OF INFLUENCE. 3.00 points.**

What does it mean to be original? How do we differentiate plagiarism from pastiche, appropriation from homage? And how do we build on pre-existing traditions while simultaneously creating work that reflects our own unique experiences of the world? In a 2007 essay for Harper's magazine, Jonathan Lethem countered critic Harold Bloom's theory of "the anxiety of influence" by proposing, instead, an "ecstasy of influence"; Lethem suggested that writers embrace rather than reject the unavoidable imprints of their literary forbearers. Beginning with Lethem's essay—which, itself, is composed entirely of borrowed (or "sampled") text—this class will consider the nature of literary influence, and its role in the development of voice. Each week, students will read from pairings of older stories and novel excerpts with contemporary work that falls within the same artistic lineage. In doing so, we'll track the movement of stylistic, structural, and thematic approaches to fiction across time, and think about the different ways that stories and novels can converse with one another. We will also consider the influence of other artistic mediums—music, visual art, film and television—on various texts. Students will then write their own original short pieces modeled after the readings. Just as musicians cover songs, we will "cover" texts, adding our own interpretive imprints.

**Fall 2024: WRIT UN3132**

**NONFICTION WORKSHOPS****WRIT UN1200 BEGINNING NONFICTION WORKSHOP. 3.00 points.**

Prerequisites: No prerequisites. Department approval NOT required. The beginning workshop in nonfiction is designed for students with little or no experience in writing literary nonfiction. Students are introduced to a range of technical and imaginative concerns through exercises and discussions, and they eventually submit their own writing for the critical analysis of the class. Outside readings supplement and inform the exercises and longer written projects.

**Fall 2024: WRIT UN1200**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**WRIT UN2200 INTERMEDIATE NONFICTION WRKSH. 3.00 points.**

The intermediate workshop in nonfiction is designed for students with some experience in writing literary nonfiction. Intermediate workshops present a higher creative standard than beginning workshops and an expectation that students will produce finished work. Outside readings supplement and inform the exercises and longer written projects. By the end of the semester, students will have produced thirty to forty pages of original work in at least two traditions of literary nonfiction. Please visit <https://arts.columbia.edu/writing/undergraduate> for information about registration procedures.

### **WRIT UN3200 ADVANCED NONFICTION WORKSHOP. 3.00 points.**

Advanced Nonfiction Workshop is for students with significant narrative and/or critical experience. Students will produce original literary nonfiction for the workshop. This workshop is reserved for accomplished nonfiction writers and maintains the highest level of creative and critical expectations. Among the many forms that creative nonfiction might assume, students may work in the following nonfiction genres: memoir, personal essay, journalism, travel writing, science writing, and/or others. In addition, students may be asked to consider the following: ethical considerations in nonfiction writing, social and cultural awareness, narrative structure, detail and description, point of view, voice, and editing and revision among other aspects of praxis. A portfolio of nonfiction will be written and revised with the critical input of the instructor and the workshop. Please visit <https://arts.columbia.edu/writing/undergraduate> for information about registration procedures

## **NONFICTION SEMINARS**

### **WRIT UN2211 TRADITIONS IN NONFICTION. 3.00 points.**

Prerequisites: No prerequisites. Department approval NOT required. The seminar provides exposure to the varieties of nonfiction with readings in its principal genres: reportage, criticism and commentary, biography and history, and memoir and the personal essay. A highly plastic medium, nonfiction allows authors to portray real events and experiences through narrative, analysis, polemic or any combination thereof. Free to invent everything but the facts, great practitioners of nonfiction are faithful to reality while writing with a voice and a vision distinctively their own. To show how nonfiction is conceived and constructed, class discussions will emphasize the relationship of content to form and style, techniques for creating plot and character under the factual constraints imposed by nonfiction, the defining characteristics of each authors voice, the authors subjectivity and presence, the role of imagination and emotion, the uses of humor, and the importance of speculation and attitude. Written assignments will be opportunities to experiment in several nonfiction genres and styles

### **WRIT UN3214 HYBRID NONFICTION FORMS. 3.00 points.**

Prerequisites: No prerequisites. Department approval NOT required. Creative nonfiction is a frustratingly vague term. How do we give it real literary meaning; examine its compositional aims and techniques, its achievements and especially its aspirations? This course will focus on works that we might call visionary - works that combine art forms, genres and styles in striking ways. Works in which image and text combine to create a third interactive language for the reader. Works still termed fiction history or journalism that join fact and fiction to interrogate their uses and implications. Certain memoirs that are deliberately anti-autobiographical, turning from personal narrative to the sounds, sight, impressions and ideas of the writers milieu. Certain essays that join personal reflection to arts and cultural criticism, drawing on research and imagination, the vernacular and the formal, even prose and poetry. The assemblage or collage that, created from notebook entries, lists, quotations, footnotes and indexes achieves its coherence through fragments and associations, found and original texts

WRIT 3214	001/13557	T 12:10pm - 2:00pm 511 Kent Hall	Margo Jefferson	3.00	12/15

### **WRIT UN3215 ART WRITING FOR WRITERS. 3.00 points.**

Prerequisites: No prerequisites. Department approval NOT required.

Prerequisites: No prerequisites. Department approval NOT required. In this course, we will look at some of the most dynamic examples of "visual writing." To begin, we will look at writers writing about art, from the Romantic period through the present. The modes of this art writing we will consider include: the practice of ekphrasis (poems which address or derive their inspiration from a work of art); writers such as Ralph Ellison, Amiri Baraka, John Ashbery, and Eileen Myles, who for periods of their lives worked as art critics; writers such as Etel Adnan and Alexander Kulge, who have produced literature and works of art in equal measure; as well as numerous collaborations between writers and visual artists. We will also look at artists who have written essays and poetry throughout their careers, like artists Robert Smithson, Glenn Ligon, David

Wojnarowicz, Moyra Davey, Paul Chan, and Hannah Black, as well as professional critics whose work has been elevated to the status of literature, such as Hilton Als, Janet Malcolm, and Susan Sontag. Lastly, we will consider what it means to write through a “milieu” of sonic and visual artists, such as those associated with Dada, the Harlem Renaissance, the New York School, and Moscow Conceptualism. Throughout the course, students will also be prompted to write with and about current art exhibitions and events throughout the city. They will produce original works in various of the modes described above and complete a final writing project that incorporates what they have learned

#### Fall 2024: WRIT UN3215

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3215	001/13558	W 12:10pm - 2:00pm 317 Hamilton Hall	Eliza Callahan	3.00	14/15

#### WRIT UN3217 SCIENCE AND SENSIBILITY. 3.00 points.

Prerequisites: No prerequisites. Department approval NOT required.

Writing about the natural world is one of the world's oldest literary traditions and the site of some of today's most daring literary experiments. Known loosely as “science writing” this tradition can be traced through texts in myriad and overlapping genres, including poetry, explorer's notebooks, essays, memoirs, art books, and science journalism. Taken together, these diverse texts reveal a rich literary tradition in which the writer's sensibility and worldview are paramount to an investigation of the known and unknown. In this course, we will consider a wide range of texts in order to map this tradition. We will question what it means to use science as metaphor, explore how to write about science with rigor and commitment to scientific truth, and interrogate the fiction of objectivity.

#### Fall 2024: WRIT UN3217

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3217	001/13559		Meehan Crist	3.00	5/15

#### WRIT UN3224 Writing the Sixties. 3.00 points.

In this seminar, we will target nonfiction from the 1960s—the decade that saw an avalanche of new forms, new awareness, new freedoms, and new conflicts, as well as the beginnings of social movements and cultural preoccupations that continue to frame our lives, as writers and as citizens, in the 21st century: civil rights, feminism, environmentalism, LGBTQ rights, pop culture, and the rise of mass media. We will look back more than a half century to examine the development of modern criticism, memoir, reporting, and profile-writing, and the ways they entwine. Along the way, we will ask questions about these classic nonfiction forms: How do reporters, essayists, and critics make sense of the new? How do they create work as rich as the best novels and short stories? Can criticism rise to the level of art? What roles do voice, point-of-view, character, dialogue, and plot—the traditional elements of fiction—play?

As we go, we will witness the unfolding of arguably the most transitional decade in American history—with such events as the Kennedy assassination, the Watts Riots, the Human Be In, and the Vietnam War, along with the rise of Pop art, rock ‘n’ roll, and a new era of moviemaking—as it was documented in real time by writers at *The New Yorker*, *New Journalists* at *Esquire*, and critics at *Partisan Review* and *Harper’s*, among other publications. Some writers we will consider: James Baldwin, Joan Didion, Susan Sontag, Rachel Carson, Dwight Macdonald, Gay Talese, Tom Wolfe, Truman Capote, Pauline Kael, Nik Cohn, Joseph Mitchell, Lillian Ross, Gore Vidal, Norman Mailer, Thomas Pynchon, John Updike, Michael Herr, Martha Gellhorn, John McPhee, and Betty Friedan. We will be joined by guest speakers

#### WRIT UN3225 LIFE STORIES. 3.00 points.

In this seminar, we will target nonfiction that tells stories about lives: profiles, memoirs, and biographies. We will examine how the practice of this kind of nonfiction, and ideas about it, have evolved over the past 150 years. Along the way, we will ask questions about these nonfiction forms: How do reporters, memoirists, biographers, and critics make sense of their subjects? How do they create work as rich as the best novels and short stories? Can criticism explicate the inner life of a human subject? What roles do voice, point-of-view, character, dialogue, and plot—the traditional elements of fiction—play? Along the way, we’ll engage in issues of identity and race, memory and self, real persons and invented characters and we’ll get glimpses of such key publications as *The Atlantic Monthly*, *The New Yorker*, *Esquire*, *Harper’s*, and *The New York Review of Books*. Some writers we will consider: Frederick Douglass, Louisa May Alcott, Walt Whitman, Henry Adams, Joseph Mitchell, Lillian Ross, James Agee, John Hersey, Edmund Wilson, Gore Vidal, Gay Talese, James Baldwin, Vladimir Nabokov, Janet Malcolm, Robert Caro, Joyce Carol Oates, Toni Morrison, Joan Didion, and Henry Louis Gates Jr. The course regularly welcomes guest speakers

#### WRIT UN3226 NONFICTION-ISH. 3.00 points.

This cross-genre craft seminar aims to uncover daring and unusual approaches to literature informed by nonfiction (and nonfiction-adjacent) practices. In this course we will closely read and analyze a diverse set of works, including Svetlana Alexievich’s oral history of women and war, Lydia Davis’s “found” microfictions, Theresa Hak Cha’s genre-exploding “auto-ethnography,” Alejandro Zambra’s unabashedly literary narratives, Sigrid Nunez’s memoir “of” Susan Sontag, Emmanuel Carrère’s “nonfiction novel,” John Keene’s bold counternarratives, W. G. Sebald’s saturnine essay-portraits, Saidiya Hartman’s melding of history and literary imagination, Annie Ernaux’s collective autobiography, Sheila Heti’s alphabetized diary, Ben Mauk’s oral history about Xinjiang

detention camps, and Edward St. Aubyn's autobiographical novel about the British aristocracy and childhood trauma, among other texts. We will also examine Sharon Mashihi's one-woman autofiction podcasts about Iranian Jewish American family. What we learn in this course we will apply to our own work, which will consist of two creative writing responses and a creative final project. Students will also learn to keep a daily writing journal

## POETRY WORKSHOPS

### WRIT UN1300 BEGINNING POETRY WORKSHOP. 3.00 points.

Prerequisites: No prerequisites. Department approval NOT required. The beginning poetry workshop is designed for students who have a serious interest in poetry writing but who lack a significant background in the rudiments of the craft and/or have had little or no previous poetry workshop experience. Students will be assigned weekly writing exercises emphasizing such aspects of verse composition as the poetic line, the image, rhyme and other sound devices, verse forms, repetition, tone, irony, and others. Students will also read an extensive variety of exemplary work in verse, submit brief critical analyses of poems, and critique each others original work

### WRIT UN2300 INTERMEDIATE POETRY WORKSHOP. 3.00 points.

Intermediate poetry workshops are for students with some prior instruction in the rudiments of poetry writing and prior poetry workshop experience. Intermediate poetry workshops pose greater challenges to students and maintain higher critical standards than beginning workshops. Students will be instructed in more complex aspects of the craft, including the poetic persona, the prose poem, the collage, open-field composition, and others. They will also be assigned more challenging verse forms such as the villanelle and also non-European verse forms such as the pantoum. They will read extensively, submit brief critical analyses, and put their instruction into regular practice by composing original work that will be critiqued by their peers. By the end of the semester each student will have assembled a substantial portfolio of finished work. Please visit

<https://arts.columbia.edu/writing/undergraduate> for information about registration procedures

### WRIT UN3300 ADVANCED POETRY WORKSHOP. 3.00 points.

This poetry workshop is reserved for accomplished poetry writers and maintains the highest level of creative and critical expectations. Students will be encouraged to develop their strengths and to cultivate a distinctive poetic vision and voice but must also demonstrate a willingness to broaden their range and experiment with new forms and notions of the poem. A portfolio of poetry will be written and revised with the critical input of the instructor and the workshop. Please visit <https://arts.columbia.edu/writing/undergraduate> for information about registration procedures

### WRIT UN3301 SENIOR POETRY WORKSHOP. 4.00 points.

Prerequisites: The department's permission required through writing sample. Please go to 609 Kent for submission schedule and registration guidelines or see <http://www.arts.columbia.edu/writing/undergraduate>.

Seniors who are majors in creative writing are given priority for this course. Enrollment is limited, and is by permission of the professor. The senior workshop offers students the opportunity to work exclusively with classmates who are at the same high level of accomplishment in the major. Students in the senior workshops will produce and revise a new and substantial body of work. In-class critiques and conferences with the professor will be tailored to needs of each student. Please visit <https://arts.columbia.edu/writing/undergraduate> for information about registration procedures

## POETRY SEMINARS

### **WRIT UN2311 TRADITIONS IN POETRY. 3.00 points.**

Prerequisites: No prerequisites. Department approval NOT required.

Prerequisites: No prerequisites. Department approval NOT required. “For those, in dark, who find their own way by the light of others’ eyes.” —Lucie Brock-Broido The avenues of poetic tradition open to today’s poets are more numerous, more invigorating, and perhaps even more baffling than ever before. The routes we chose for our writing lead to destinations of our own making, and we take them at our own risk—necessarily so, as the pursuit of poetry asks each of us to light a pilgrim’s candle and follow it into the moors and lowlands, through wastes and prairies, crossing waters as we go. Go after the marshlights, the will-o-wisps who call to you in a voice you’ve longed for your whole life. These routes have been forged by those who came before you, but for that reason, none of them can hope to keep you on it entirely. You must take your steps away, brick by brick, heading confidently into the hinterland of your own distinct achievement. For the purpose of this class, we will walk these roads together, examining the works of classic and contemporary exemplars of the craft. By companioning poets from a large spread of time, we will be able to more diversely immerse ourselves in what a poetic “tradition” truly means. We will read works by Edmund Spencer, Dante, and Goethe, the Romantics—especially Keats—Dickinson, who is mother to us all, Modernists, and the great sweep of contemporary poetry that is too vast to individuate. While it is the imperative of this class to equip you with the knowledge necessary to advance in the field of poetry, this task shall be done in a Columbian manner. Consider this class an initiation, of sorts, into the vocabulary which distinguishes the writers who work under our flag, each of us bound by this language that must be passed on, and therefore changed, to you who inherit it. As I have learned the words, I have changed them, and I give them now to you so that you may pave your own way into your own ways, inspired with the first breath that brought you here, which may excite and—hopefully—frighten you. You must be troubled. This is essential

### **WRIT UN3319 POETICS OF PLACE:AMERICAN LANDSCAPES, VO. 3.00 points.**

When the American Poet Larry Levis left his home in California’s San Joaquin Valley, “all [he] needed to do,” he wrote, “was to describe [home] exactly as it had been. That [he] could not do, for that [is] impossible. And that is where poetry

might begin. This course will consider how place shapes a poet’s self and work. Together we will consider a diverse range of poets and the places they write out of and into: from Philip Levine’s Detroit to Whitman’s Manhattan, from Robert Lowell’s New England to James Wright’s Ohio, from the Kentucky of Joe Bolton and Crystal Wilkinson to the California of Robin Blaser and Allen Ginsberg, from the Ozarks of Frank Stanford to the New Jersey of Amiri Baraka, from the Pacific Northwest of Robinson Jeffers to the Alaska of Mary Tallmountain. We will consider the debate between T. S. Eliot and William Carlos Williams about global versus local approaches to the poem, and together we will ask complex questions: Why is it, for example, that Jack Gilbert finds his Pittsburgh when he leaves it, while Gerald Stern finds his Pittsburgh when he keeps it close? Does something sing because you leave it or because you hold it close? Do you come to a place to find where you belong in it? Do you leave a place to find where it belongs in you? As Carolyn Kizer writes in *Running Away from Home*, Its never over, old church of our claustrophobia! And of course home can give us the first freedom of wanting to leave, the first prison and freedom of want. In our reflections on each “place,” we will reflect on its varied histories, its native peoples, and its inheritance of violent conquest. Our syllabus will consist, in addition to poems, of manifestos and prose writings about place, from Richard Hugo’s *Triggering Town* to Sandra Beasley’s *Prioritizing Place*. You will be encouraged to think about everything from dialect to economics, from collectivism to individualism in poems that root themselves in particular places, and you will be encouraged to consider how those poems “transcend” their origins. You will write response papers, analytical papers, and creative pieces, and you will complete a final project that reflects on your own relationship to place

### **WRIT UN3322 WASTE. 3.00 points.**

What if we think of writing as waste management? “To find a form that accommodates the mess, that is the task of the artist now,” said Samuel Beckett then, famously, but: What does this mean? In this course, we will explore the many ways in which artists and writers have tried to answer this question, not only with waste as a figure for thought but as the concrete and recalcitrant reality of our being. Students will be asked to keep a notebook, with the instruction to keep everything that is for them a signature of thought. In this way, a pinecone or a piece of garbage is as much “writing” as anything else. Together, we will create an archive for the semester, of everything that is produced and/or consumed under this aegis of making. This class is designed to pose questions about form and the activity of writing and, in turn, the modes and methods of production not only as writers, but as persons. In addition to our weekly readings, we will be taking field trips throughout the city, convening with Freegan.info for a trash tour and meeting with the artist in residence at the Department of Sanitation, as well as hosting visitors for additional conversations over Zoom

### **WRIT UN3324 SENSORY POETICS. 3.00 points.**

“A writer should have the precision of a poet and the imagination of a scientist” —Vladimir Nabokov “Every

word was once an animal.” —Ralph Waldo Emerson How do writers use words to bring whole worlds to life in the senses? Sensory Poetics is a semester-long exploration of how this formal question has propelled the last 150 years of formally innovative poetry, manifestos and essays on craft. Here, we will read by critically and creatively responding to these texts with a single goal in mind: Borrow their methods to compose a dossier of writing that brings just one thing to life in the senses—any one thing—of your individual choosing. To that end, the semester is divided into 3 Labs that each isolate a different register of sensemaking: Sound, Image, and Line. For example, in the Sound Lab unit, you’ll respond to poems and essays by acoustic-centered poets like John Cage, Kamau Brathwaite and Gertrude Stein, transcribing the sound of your one thing, and writing a metered sonnet based on models from different periods and artistic contexts. To capture the look and logic of your one thing, further in you’ll read Surrealists like Aimé and Suzanne Césaire (for Image Lab), Kathy Acker’s cut-ups, and the psychedelic prose poems of Georges Perec and Yoko Ono (for Line Lab). Throughout, we’ll also read Raymond Queneau’s *Exercises in Style*, a book that is similarly a dossier of one thing written a hundred different ways. Class time focuses on close-reading and analyzing poems together. At the end of each of the three Labs, you’ll submit a portfolio which showcases and reflects on your favorite creative/critical writing generated during the unit. So, no matter how boring or inflexible your one thing may appear to you at any point, your only limits beyond this constraint—make a dossier on one thing—will merely be the finite plasticity of your own imagination, which luckily, readings in this course are curated to expand. This is a place to encounter, practice and experiment with new and exciting forms that broaden your repertoire for articulating your obsessions in ways that bring them to life in the ears, eyes and minds of your audience. Writers of all majors and levels welcome

### **WRIT UN3365 21STC AM POETRY # ITS CONCERNS. 3.00 points.**

The lyric has often been conceived of as timeless in its content and inwardly-directed in its mode of address, yet so many poems with lasting claim on our attention point unmistakably outward, addressing the particulars of their times. This course will examine the ways in which an array of 21st poets have embraced, indicted, and anatomized their cultural and historical contexts, diagnosing society’s ailments, indulging in its obsessions, and sharing its concerns. Engaging with such topics as race, class, war, death, trauma, feminism, pop culture and sexuality, how do poets adapt poetic form to provide meaningful and relevant insights without losing them to beauty, ambiguity, and music? How is pop star Rihanna a vehicle for discussing feminism and isolation? What does it mean to write about Black masculinity after Ferguson? In a time when poetry’s cultural relevancy is continually debated in academia and in the media, how can today’s poets use their art to hold a mirror to modern living? This class will explore how writers address present-day topics in light of their own subjectivity, how their works reflect larger cultural trends and currents,

and how critics as well as poets themselves have reflected on poetry’s, and the poet’s, changing social role. In studying how these writers complicate traditional notions of what poetry should and shouldn’t do, both in terms of content and of form, students will investigate their own writing practices, fortify their poetic voices, and create new works that engage directly and confidently with the world in which they are written

#### **Fall 2024: WRIT UN3365**

### **WRIT UN3321 Ecopoetics. 3.00 points.**

“There are things / We live among ‘and to see them / Is to know ourselves.’” George Oppen, “Of Being Numerous” In this class we will read poetry like writers that inhabit an imperiled planet, understanding our poems as being in direct conversation both with the environment as well as writers past and present with similar concerns and techniques. Given the imminent ecological crises we are facing, the poems we read will center themes of place, ecology, interspecies dependence, the role of humans in the destruction of the planet, and the “necropastoral” (to borrow a term from Joyelle McSweeney), among others. We will read works by poets and writers such as (but not limited to) John Ashbery, Harryette Mullen, Asiya Wadud, Wendy Xu, Ross Gay, Simone Kearney, Kim Hyesoon, Marcella Durand, Arthur Rimbaud, Geoffrey G. O’Brien, Muriel Rukeyser, George Oppen, Terrance Hayes, Juliana Spahr, and W.S. Merwin—reading several full collections as well as individual poems and essays by scholars in the field. Through close readings, in-class exercises, discussions, and creative/critical writings, we will invest in and investigate facets of the dynamic lyric that is aware of its environs (sound, image, line), while also exploring traditional poetic forms like the Haibun, ode, prose poem, and elegy. Additionally, we will seek inspiration in outside mediums such as film, visual art, and music, as well as, of course, the natural world. As a class, we will explore the highly individual nature of writing processes and talk about building writing practices that are generative as well as sustainable

## **CROSS GENRE SEMINARS**

### **WRIT UN3010 SHORT PROSE FORMS. 3.00 points.**

Note: This seminar has a workshop component.

Prerequisites: No Prerequisites. Department approval NOT required.

Prerequisites: No Prerequisites. Department approval NOT required. Flash fiction, micro-narratives and the short-short have become exciting areas of exploration for contemporary writers. This course will examine how these literary fragments

have captured the imagination of writers internationally and at home. The larger question the class seeks to answer, both on a collective and individual level, is: How can we craft a working definition of those elements endemic to short prose as a genre? Does the form exceed classification? What aspects of both crafts -- prose and poetry -- does this genre inhabit, expand upon, reinvent, reject, subvert? Short Prose Forms incorporates aspects of both literary seminar and the creative workshop. Class-time will be devoted alternately to examinations of published pieces and modified discussions of student work. Our reading chart the course from the genres emergence, examining the prose poem in 19th-century France through the works of Mallarme, Baudelaire, Max Jacob and Rimbaud. We'll examine aspects of poetry -- the attention to the lyrical, the use of compression, musicality, sonic resonances and wit -- and attempt to understand how these writers took, as Russell Edson describes, experience [and] made it into an artifact with the logic of a dream. The class will conclude with a portfolio at the end of the term, in which students will submit a compendium of final drafts of three of four short prose pieces, samples of several exercises, selected responses to readings, and a short personal manifesto on the short prose form

#### Spring 2025: WRIT UN3010

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3010	001/14723	Th 4:10pm - 6:00pm	Alan Ziegler	3.00	16/15
		327 Uris Hall			

#### WRIT UN3011 TRANSLATION SEMINAR. 3.00 points.

Prerequisites: No prerequisites. Students do not need to demonstrate bilingual ability to take this course. Department approval NOT needed.

Corequisites: This course is open to undergraduate & graduate students.

Prerequisites: No prerequisites. Students do not need to demonstrate bilingual ability to take this course. Department approval NOT needed. Corequisites: This course is open to undergraduate & graduate students. This course will explore broad-ranging questions pertaining to the historical, cultural, and political significance of translation while analyzing the various challenges confronted by the arts foremost practitioners. We will read and discuss texts by writers and theorists such as Benjamin, Derrida, Borges, Steiner, Dryden, Nabokov, Schleiermacher, Goethe, Spivak, Jakobson, and Venuti. As readers and practitioners of translation, we will train our ears to detect the visibility of invisibility of the translators craft; through short writing experiments, we will discover how to identify and capture the nuances that traverse literary styles, historical periods and cultures. The course will culminate in a final project that may either be a critical analysis or an original translation accompanied by a translators note of introduction

#### WRIT UN3214 HYBRID NONFICTION FORMS. 3.00 points.

Prerequisites: No prerequisites. Department approval NOT required. Creative nonfiction is a frustratingly vague term. How do we give it real literary meaning; examine its compositional

aims and techniques, its achievements and especially its aspirations? This course will focus on works that we might call visionary - works that combine art forms, genres and styles in striking ways. Works in which image and text combine to create a third interactive language for the reader. Works still termed fiction history or journalism that join fact and fiction to interrogate their uses and implications. Certain memoirs that are deliberately anti-autobiographical, turning from personal narrative to the sounds, sight, impressions and ideas of the writers milieu. Certain essays that join personal reflection to arts and cultural criticism, drawing on research and imagination, the vernacular and the formal, even prose and poetry. The assemblage or collage that, created from notebook entries, lists, quotations, footnotes and indexes achieves its coherence through fragments and associations, found and original texts

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
WRIT 3214	001/13557	T 12:10pm - 2:00pm	Margo Jefferson	3.00	12/15
		511 Kent Hall			

#### WRIT UN3018 Inhabiting Form: Writing the Body. 3.00 points.

The body is our most immediate encounter with the world, the vessel through which we experience our entire lives: pleasure, pain, beauty, horror, limitation, freedom, fragility and empowerment. In this course, we will pursue critical and creative inquiries into invocations and manifestations of the body in multiple genres of literature and in several capacities. We will look at how writers make space for—or take up space with—bodies in their work. The etymology of the word “text” is from the Latin *textus*, meaning “tissue.” Along these lines, we will consider the text itself as a body. Discussions around body politics, race, gender, ability, illness, death, metamorphosis, monstrosity and pleasure will be parallel to the consideration of how a text might function itself as a body in space and time. We will consider such questions as: What is the connective tissue of a story or a poem? What is the nervous system of a lyric essay? How is formal constraint similar to societal ideals about beauty and acceptability of certain bodies? How do words and language function at the cellular level to build the body of a text? How can we make room to honor, in our writing, bodies that have otherwise been marginalized? We will also consider non-human bodies (animals & organisms) and embodiments of the supernatural (ghosts, gods & specters) in our inquiries. Students will process and explore these ideas in both creative and analytical writings throughout the semester, deepening their understanding of embodiment both on and off the page

#### Spring 2025: WRIT UN3018

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

		511 Kent Hall			

**WRIT UN3031 INTRO TO AUDIO STORYTELLING. 3.00 points.**

It's one thing to tell a story with the pen. It's another to transfix your audience with your voice. In this class, we will explore principles of audio narrative. Oral storytellers arguably understand suspense, humor and showmanship in ways only a live performer can. Even if you are a diehard writer of visually-consumed text, you may find, once the class is over, that you have learned techniques that can translate across borders: your written work may benefit. Alternatively, you may discover that audio is the medium for you. We will consider sound from the ground up – from folkloric oral traditions, to raw, naturally captured sound stories, to seemingly straightforward radio news segments, to highly polished narrative podcasts. While this class involves a fair amount of reading, much of what we will be studying and discussing is audio material. Some is as lo-fi as can be, and some is operatic in scope, benefitting from large production budgets and teams of artists. At the same time that we study these works, each student will also complete small audio production exercises of their own; as a final project, students will be expected to produce a trailer, or “sizzle” for a hypothetical multi-episode show. This class is meant for beginners to the audio tradition. There are some tech requirements: a recording device (most phones will suffice), workable set of headphones, and computer. You'll also need to download the free audio editing software Audacity

**WRIT UN3036 THE AESTHETIC EXPERIENCE. 3.00 points.**

What is an aesthetic experience and what does it tell us about art or about ourselves? An aesthetic experience might be best initially defined as a subjective and often profound encounter with an object, artwork, or phenomenon that elicits a heightened sense of beauty, appreciation, or emotional response. It involves a deep engagement with the sensory, emotional, and intellectual aspects of the object of appreciation. Aesthetic experiences typically involve a sense of pleasure, contemplation, or emotional resonance, and they often transcend practical or utilitarian considerations. These experiences can encompass a wide range of phenomena, literature, natural landscapes, and even everyday objects when perceived with a heightened sense of awareness and appreciation. Aesthetic experiences are highly personal and can vary from person to person based on individual preferences, cultural backgrounds, and emotional responses. For me, an aesthetic experience is both mysterious and confounding—I'm impacted physically as much as it might mentally or emotionally. In the throes of an aesthetic experience, I might feel the small hairs on my arms or on the back of my neck stand up. I might feel nearly ill from a racing heart or my stomach turning. I might feel energized by new thoughts prompted by the experience or feel my heart swell in appreciation and awe. I might also feel a deep sense of recognition—one that connects me to the art object and its maker in a way that transcends time and place. But why do I feel this? Where does this feeling come from? What is really happening?? In this class, we'll study this question on two levels: 1. A 'theoretical' level. Theorists,

critics, and philosophers have long tried to understand what it means to have an aesthetic experience. Plato likened this experience to madness, Kant to the sublime; Tolstoy argued the aesthetic experience was a form of communication only accessible through engagement in art. Historians place aesthetic experience within the context of time and culture. We'll study and discuss theories that have tried to define this mysterious phenomenon. 2. A 'practical' level. We'll also read the work of writers who have puzzled through this question of the aesthetic experience by writing about their connection to a work or body of work by another artist. Often this involves a search to understand the self via the work of another artist. Books: Required books available at Book Culture on 112th Street and Broadway or in course reserves at Butler Library. Several readings will be available for free via our courseworks page. They are indicated on the syllabus as (CW)

## DANCE

**The department of Dance is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

Office Location: 310 Barnard Hall

Office Phone: 212-854-2995

Email: [dance@barnard.edu](mailto:dance@barnard.edu)

Director of Undergraduate Studies: Paul Scolieri,  
[pscolieri@barnard.edu](mailto:pscolieri@barnard.edu)

Department Assistant: Diane Roe, [droe@barnard.edu](mailto:droe@barnard.edu),  
212-854-2995

## THE DEPARTMENT OF DANCE MISSION

The Barnard College Department of Dance, located in a world dance capital, offers an interdisciplinary program that integrates the study of dance within a liberal arts setting of intellectual and creative exploration. The major builds upon studio courses, the Department's productions at Miller Theater, New York Live Arts, and other venues, as well as a rich array of dance studies courses, allowing students' creative work to develop in dialogue with critical inquiry into the history, culture, theory and forms of western and non-western performance, typically enhanced by study in other disciplines. Students work with accomplished artists whose work enriches contemporary American dance; they also study with outstanding research scholars.

Making, thinking about, and writing about art are an essential part of the liberal arts education. For this reason, the Department of Dance offers technique courses for students of all levels of expertise, while opening its other courses to majors and non-majors alike, who may also audition for its productions. The Department partners with cultural institutions

in New York City to connect students with the professional world.

## STUDENT LEARNING OUTCOMES

Students graduating with a major in Dance should be able to attain the following outcomes:

- Apply critical thinking, reading, and writing skills to dance-related texts and choreography.
- Develop the knowledge and research skills to explore the dance past in writing, orally, and in performance.
- Present interpretations of dance-related texts orally, in writing, and in performance.
- Apply library, archival, and internet research skills to dance scholarship and choreography.
- Demonstrate improved efficiency and expressivity in dance technique.
- Demonstrate growing technical understanding and fluency in dance technique.
- Create original dances, dance/theater works or dance-based, mixed media works.
- Collaborate with an artist in the creation of original dance works.
- Participate in the creative process through the creation and interpretation of choreography.
- Apply interdisciplinary research methods to dance scholarship and choreography.
- Apply historical research methods to dance scholarship and choreography.
- Demonstrate conceptual and methodological approaches for studying world dance forms through research and writing.
- Demonstrate the ability to understand cultural and historical texts in relation to dance forms.
- Apply anatomical knowledge to movement and movement concepts.
- Evaluate the theoretical and artistic work of peers.
- Communicate with an audience in oral presentations and dance performance.
- Understand and interpret the language and form of an artist's choreography.
- Solve technical problems in dance movement.
- Apply musical knowledge to movement and choreography.
- Design choreographic movement and structures.

## PROGRAMS OF STUDY

### Major

### Minor

### Concentration (only for students who entered Columbia College in or before the 2023-2024 academic year)

## STUDENT ADVISING

### Advising Resources

- Newly declared or prospective dance majors and minors should consult with the Dance Department Chair.
- Sign up for the Dance Department Listserv by contacting [dance@barnard.edu](mailto:dance@barnard.edu)
- The Dance Department holds 2 program planning meetings a year (one in the fall and one in the spring).

### Enrolling in Courses

Technique class levels are confirmed during the shopping period. You must attend the first 2 classes.

Rehearsal and Performance DNCE BC 3601- DNCE BC 3607 requires an audition usually scheduled for the first week of classes.

### Transfer Credit

- When students wish to transfer credit to Barnard from other institutions, their coursework is first evaluated for college elective credit by the Registrar's Office. If they are approved, departments can consider these courses for credit toward the major or minor.
- Transfer students should send their transcripts to the Dance Department Chair for credit evaluation.

### Study Abroad Credit

- Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Global Engagement) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus.
- Classes taken abroad through other institutions or programs are treated as transfer credit and are subject to the same policies as other transfer courses. Accordingly, there will be a limit on the number of study abroad courses taken at other institutions that can be counted toward the major or minor.
- To receive credit toward the major or minor for a study abroad course (whether taken through a Columbia program or another institution/program), students must submit a Study Abroad Approval form through Slate and obtain the approval of the Chair or departmental representative.

### Summer Credit

- Summer courses at Barnard are equivalent to those taken during the academic year. Courses that have been approved

for the fulfillment of departmental requirements will automatically count toward your major.

- Courses taken at other institutions (including Columbia) are considered transfer credit and are subject to the same governing other transfer courses. To receive major or minor credit for a summer course taken at another institution, students must submit a Summer Course form through Slate and have it approved by both the Registrar's Office and the Chair or departmental representative.

## SENIOR CAPSTONE PROJECT

**Senior Seminar (DNCE BC3591)** is the capstone experience of your years of study as a dance major. It is probably the most challenging course you will take in the Department, because for so much of the time you will be working on your own, and because the thesis is probably the longest and most complex piece of analytical writing that you will undertake in college. No matter what your area of interest, you need to come up with a topic, create a bibliography, develop an original thesis, conduct in-depth research, and build a convincing argument in support of your claims. This is not a project that you can do overnight. By the same token, it is one that will stand you in good stead even if you never write another word about your topic. The process of conceptualizing, researching, writing, and revising a thesis – and the skills all this entails – will carry over into realms of activity very far from dance.

**Senior Project: Repertory for Dance (DNCE BC 3593)** is the culminating experience of your major work and is based on research, investigation, interpretation, and the creative synthesis of movement. As with Senior Seminar, there will be a good amount of time in which you are working on your own, whether it is creating the movement language and managing your rehearsal schedule (including studio space requests to the Technical Director), attending to the music-sound needs of your work with the Music Director, exploring multi-media possibilities, or creating/recreating/staging choreography or designing/resourcing costumes for your work. Students will work on their own creative project as well as offering support for each other's work throughout the semester.

**The department of Dance is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

**Chair:** Colleen Thomas-Young (Professor of Professional Practice in Dance)

**Professor:** Paul A. Scolieri

**Assistant Professor:** Seth Williams

**Associate Professors of Professional Practice in Dance:**

Gabri Christa, Marjorie Folkman

**Senior Associate:** Katie Glasner

**Term Associate:** Vincent McCloskey

**Adjunct Professor:** Uttara Coorlawala

**Adjunct Lecturers:** Cynthia Anderson, Jennifer Archibald, Ehizoje Azeke, Rebecca Bliss, Lisa Boudreau, Candace Brown, Siobhan Burke, Maguette Camara, Antonio Carmena, Uttara Coorlawala, Francessa Dominguez, Dormeshia, Nicole Duffy, Allison Easter, Lisa Fagan, Caroline Fermin, Tamisha Guy, Chisa Hidaka, Jodi Melnick, Bo Park, Juan Rodriguez, Carol Teitelbaum, Nelida Tirado, Caitlin Trainor, Ashley Tuttle

**The department of Dance is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

## MAJOR IN DANCE

Majors must complete eleven academic courses (six required, five elective) and a minimum of eight 2-point technique courses (minimum 50 credits). All majors write a senior thesis as part of their coursework.

The required courses for the major in dance are distributed as follows:

### Dance History

The following two courses in Dance History must be completed before the fall of the senior year:

DNCE BC2565	WORLD DANCE HISTORY
DNCE BC3001	HISTORY OF THEATRICAL DANCING

### Movement Science

Select one or more of the following:

DNCE BC2562	MOVEMENT ANALYSIS
ANAT BC2573	HUMAN ANATOMY AND MOVEMENT
DNCE BC3144	Coding Choreography

### Composition

One course in Composition must be completed before the fall of the senior year.

DNCE BC2563	DANCE COMPOSITION: FORM
DNCE BC2564	DANCE COMPOSITION: CONTENT
DNCE BC3560	SCREENDANCE: COMPOSITION
DNCE BC3565	Composition: Collaboration and the Creative Process
DNCE BC3566	Composition: Site Specific and Experimental Methods

### Senior Work

Seniors planning to write a combined thesis must request approval from both departments and notify the Registrar. All majors must complete two semesters of senior work. The following course, which culminates in a 25-30-page written thesis and an oral presentation to the Department at the end of the semester, is required of all seniors:

DNCE BC3591	SENIOR SEMINAR
-------------	----------------

In addition, all majors must take one of the following two courses, depending on whether the senior requirement is completed with a creative project or a two-semester written thesis: 3-4

DNCE BC3592	Senior Project: Research for Dance
DNCE BC3593	SR PROJECT:REPERTORY FOR DANCE

Students who are double majors may request permission to write a two-semester combined thesis.

#### Electives

Five additional 3- or 4-point courses, chosen in consultation with the major advisor, are required. Electives may be chosen from among the departmental offerings listed above or below, including additional coursework in Composition, Movement Science, and/or Senior Work beyond the major requirement. 15-20

#### History/Criticism:

DNCE BC2570	DANCE IN NEW YORK CITY
DNCE BC3000	From Page to Stage: Interactions of Literature and Choreography
DNCE BC3002	Choreographing Race in America
DNCE BC3200	DANCE IN FILM
DNCE BC3240	SEEING THE BODY
DNCE BC3550	Dance in Africa
DNCE BC3567	DANCES OF INDIA
DNCE BC3576	DANCE CRITICISM
DNCE BC3585	DEVisING IMMERSIVE PERFORMANCE
DNCE BC3800	Dismantling Racism/Decolonizing Dance
DNCE BC3984	Digital Performance

#### Studio/Performance:

DNCE BC2567	MUSIC FOR DANCE
DNCE BC3340	Dance/Music Improvisation: Critical Practices in Negotiation, Embodiment, and Freedom
DNCE BC3601 & DNCE BC3604	REHEARSAL # PERFRMNCE IN DANCE and REHEARSAL# PERFRMNCE IN DANCE

### Overview of Major Requirements (11 total, plus 8 technique courses)

- 1 Movement Science
- 1 Composition
- 2 History
- 1 Senior Seminar
- 1 Senior Project (Research in Dance or Repertory for Dance)
- 5 Electives
- 8 Technique Courses

### Senior Work

All dance majors must complete two semesters of senior work. DNCE BC3591 SENIOR SEMINAR given in the fall semesters, requires a 25-30 page written thesis and an oral presentation to the Department at the end of the semester. The second semester is usually a performance project for which the student registers in DNCE BC3593 SR PROJECT:REPERTORY FOR DANCE. Students may also choose to do a two-semester thesis, registering in DNCE BC3592 Senior Project: Research for Dance. Students who are double majors may request permission to do a two-semester combined thesis.

### BARNARD COLLEGE MINOR IN DANCE

Six courses constitute a minor in dance. Normally, three history/criticism and three credit-bearing performance/choreography courses are taken. (Note: 2-point technique courses do NOT count toward the Dance minor.) Courses are to be selected on the basis of consultation with full-time members of the department.

### COLUMBIA COLLEGE MINOR IN DANCE

Five courses

- 1 Dance Studies (either World Dance or History of Theatrical Dancing)
- 1 Composition (either Form or Content)
- 3 Electives (Choose any 3- and 4 -point courses from among offerings in Dance Studies, Composition, Movement Science, and Rehearsal & Performance)

### CONCENTRATION IN DANCE

Note: Only for students who entered Columbia College on or before the 2023-2024 academic year)

The concentration in dance is identical to the major except that only two electives are required.

For the major requirements, please see above.

### Overview of Concentration Requirements (8 total, plus 8 technique classes)

- 1 Movement Science
- 1 Composition
- 2 History
- 1 Senior Seminar
- 1 Senior Project (Research in Dance or Repertory for Dance)
- 2 Electives
- 8 Technique Classes

## SCHOOL OF ENGINEERING AND APPLIED SCIENCES MINOR IN DANCE

The SEAS Dance Minor consists of five 3-point courses. Please note that no performance/choreography courses below count toward the non-tech requirement for SEAS students:

1. Two of the following history/criticism courses:

DNCE BC2565	WORLD DANCE HISTORY
DNCE BC2570	DANCE IN NEW YORK CITY
DNCE BC3000	From Page to Stage: Interactions of Literature and Choreography
DNCE BC3001	HISTORY OF THEATRICAL DANCING
DNCE BC3002	Choreographing Race in America
DNCE BC3200	DANCE IN FILM
DNCE BC3240	SEEING THE BODY
DNCE BC3550	Dance in Africa
DNCE BC3567	DANCES OF INDIA
DNCE BC3576	DANCE CRITICISM
DNCE BC3585	DEVISING IMMERSIVE PERFORMANCE
DNCE BC3800	Dismantling Racism/Decolonizing Dance
DNCE BC3984	Digital Performance

2. Two of the following performance/choreography courses:

DNCE BC2563	DANCE COMPOSITION: FORM
DNCE BC2564	DANCE COMPOSITION: CONTENT
DNCE BC2567	MUSIC FOR DANCE
DNCE BC3340	Dance/Music Improvisation: Critical Practices in Negotiation, Embodiment, and Freedom
DNCE BC3601	REHEARSAL # PERFRMNCE IN DANCE
DNCE BC3602	Rehearsal and Performance in Dance
DNCE BC3603	Rehearsal and Performance in Dance
DNCE BC3604	REHEARSAL#PERFRMNCE IN DANCE
DNCE BC3605	REHEARSAL#PERFRMNCE IN DANCE
DNCE BC3607	Rehearsal and Performance in Dance

3. One elective (Choose any 3- or 4-point course from offerings in Dance Studies, Composition, Movement Science, and Rehearsal & Performance)

The department of Dance is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.

## DANCE COURSES

### DNCE BC1135 BALLET I. 2.00 points.

This course is designed for the absolute beginner or the student returning to ballet class after a lengthy hiatus and is intended to familiarize the student with the classical ballet terminology, to foster independence in this particular vocabulary, to introduce the historical context of the Western art form and conventions of a ballet class. Learning the physical practice of this centuries-old craft will give the student basic classical ballet terminology as well as gaining an anatomical understanding of the body

#### Fall 2024: DNCE BC1135

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1135	001/00731	M W 9:00am - 10:00am LI013 Barnard Hall	Kate Glasner	2.00	34/34
DNCE 1135	002/00732	M W 10:10am - 11:25am 110 Barnard Hall	Vincent McCloskey	2.00	22/20

### DNCE BC1136 BALLET I. 2.00 points.

This course is designed for the absolute beginner or the student returning to ballet class after a lengthy hiatus and is intended to familiarize the student with the classical ballet terminology, to foster independence in this particular vocabulary, to introduce the historical context of the Western art form and conventions of a ballet class. Learning the physical practice of this centuries-old craft will give the student basic classical ballet terminology as well as gaining an anatomical understanding of the body

#### Spring 2025: DNCE BC1136

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1136	001/00265	M W 10:10am - 11:25am LI013 Barnard Hall	Vincent McCloskey	2.00	28/30
DNCE 1136	002/00267	T Th 9:00am - 10:00am 305 Barnard Hall	Marjorie Folkman	2.00	47/50
DNCE 1136	003/00268	F 9:00am - 10:50am LI013 Barnard Hall	Vincent McCloskey	2.00	28/30

### DNCE BC1137 BALLET II. 2.00 points.

#### Ballet II

#### Fall 2024: DNCE BC1137

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1137	001/00655	M W 10:10am - 11:25am LI013 Barnard Hall	Kate Glasner	2.00	19/30

DNCE 002/00656 T Th 2:40pm - Nicole 2.00 23/30  
1137 3:55pm Robertson  
LI013 Barnard Hall

### **DNCE BC1138 BALLET II. 2.00 points.**

This course is designed for the student with prior beginning ballet study, knowledge of the basic ballet vocabulary and the ability to process a combination with relative proficiency. During this semester you will be introduced to an expanded vocabulary, with focused attention will increase your technical ability, work with dynamics and speed, may work with a partner to analyze a movement combination or may be asked to produce and present a combination in class

#### **Spring 2025: DNCE BC1138**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1138	001/00269	T Th 10:10am - 11:25am LI013 Barnard Hall	Kate Glasner	2.00	26/33
DNCE 1138	002/00270	F 1:00pm - 2:50pm 306 Barnard Hall	Juan Rodriguez	2.00	16/15

### **DNCE BC1250 HIP HOP DANCE # CULTURE I. 2.00 points.**

This course introduces students to urban dance styles, focusing on the foundations and origins of hip-hop dance, street dance culture, and the physical vocabularies of hip-hop and freestyle dance. Classes are geared to condition the body for the rigors of hip-hop technique by developing strength, coordination, flexibility, stamina, and rhythmic awareness while developing an appreciation of choreographic movement and structures. Compositional elements of hip-hop will be introduced and students may compose brief movement sequences

#### **Fall 2024: DNCE BC1250**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1250	001/00657	M W 11:40am - 12:55pm 305 Barnard Hall	Jennifer Archibald	2.00	25/40

#### **Spring 2025: DNCE BC1250**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1250	001/00272	M W 11:40am - 12:50pm 305 Barnard Hall	Jennifer Archibald	2.00	23/40

### **DNCE BC1330 MODERN I. 2.00 points.**

This course is designed for movers with little or no experience with dance, or who are unfamiliar with modern dance styles. It is intended to introduce modern dance techniques, terminology, and historical context, as well as improve anatomical and spatial awareness, and foster physical confidence moving to music. Students of this course will also cultivate comfort with watching, interpreting, and discussing modern dance. Love of dance is not a prerequisite, but is definitely a goal

#### **Fall 2024: DNCE BC1330**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1330	001/00729	M W 11:40am - 12:55pm LI013 Barnard Hall	Caitlin Trainor	2.00	27/29

DNCE 002/00730 F 11:00am - Vincent 2.00 23/25  
1330 12:50pm McCloskey  
LI013 Barnard Hall

### **DNCE BC1331 MODERN I. 2.00 points.**

This course is designed for movers with little or no experience with dance, or who are unfamiliar with modern dance styles. It is intended to introduce modern dance techniques, terminology, and historical context, as well as improve anatomical and spatial awareness, and foster physical confidence moving to music. Students of this course will also cultivate comfort with watching, interpreting, and discussing modern dance

#### **Spring 2025: DNCE BC1331**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1331	001/00281	M W 9:00am - 10:00am 305 Barnard Hall	Caroline Fermin	2.00	31/40
DNCE 1331	002/00283	F 11:00am - 12:50pm LI013 Barnard Hall	Vincent McCloskey	2.00	30/30

### **DNCE BC1332 MODERN II. 2.00 points.**

This course is designed for movers with some experience with dance, or who are unfamiliar with modern dance styles. It is intended to introduce modern dance techniques, terminology, and historical context, as well as improve anatomical and spatial awareness, and foster physical confidence moving to music. Students of this course will also cultivate comfort with watching, interpreting, and discussing modern dance. Love of dance is not a prerequisite, but is definitely a goal

#### **Fall 2024: DNCE BC1332**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 1332	001/00658	M W 1:10pm - 2:25pm LI013 Barnard Hall	Caitlin Trainor	2.00	28/30
DNCE 1332	002/00659	M W 9:00am - 10:00am 305 Barnard Hall	Caroline Fermin	2.00	33/40

### **DNCE BC1333 MODERN II. 2.00 points.**

This course is designed for movers with some experience with dance, or who are unfamiliar with modern dance styles. It is intended to introduce modern dance techniques, terminology, and historical context, as well as improve anatomical and spatial awareness, and foster physical confidence moving to music. Students of this course will also cultivate comfort with watching, interpreting, and discussing modern dance

**DNCE BC2252 AFRICAN DANCE I. 2.00 points.**

In West Africa, dance is part of daily life. It is used to mark occasions such a birth, death, harvest, and marriage. It is also used to unite the community in times of crisis. West African dance is not as much a strict technique as it is a movement coming from the spirit and the rhythm of the drum and the energy of the people. While there are certain steps that go with specific rhythms, it leaves space for the individual interpretation and improvisations which is an important element. Dancing is more about the communication between dancer and drummer. The movement of West African dance tends to be energetic and big. It is very expressive, and the energy is outward. Some African dance steps are taken directly from daily activities such as planting or hunting. Most, however, are an expression of joy or release of the spirit.

Dancing is done by communicating with a drummer to create positive energy. It is a way to enjoy oneself and each other. In African dance, the name of the dance is the same as the name of the rhythm played by the drummer. The individual steps that make up the dance do not have names. In this course, we are going to be learning various West African dances such as Sikko, Socco, Kuku, Mandiany, Farakorroba, Sunu, Soli, Lamba, Mandjo, Diambadong, Doundounba, Kaolask, Thieboudjeune, Niarry---gorong, Ekongkong, Wolossodong, Zaouly, Ngorong, Niakka, Maraka, Djansa and Lengeng/Kutiro

**DNCE BC2254 INDIAN DANCE: BHARATANATYAM. 2.00 points.**

Bharatanatyam is typically studied as a theater dance form, and as a spiritual practice. In this class, traditional and contemporary teaching approaches are combined to introduce the participant to an overview of technical and performative aspects of the form. An example of the adjusted structure of the classes is that we begin each class with hatha yoga

based stretches and dance warm ups that specifically target the kind of joint articulation that the form presupposes. We focus on the basic stance, the ardha-mandi, along with the technique of stamping as exemplified in the series of adavu, (basic combinations of hand, foot and rhythmic movement.) Following the progressive difficulty of the adavu system itself, more challenging combinations of hand and footwork will be introduced. Head and eye techniques will be introduced first in isolation then in combination. The last stage of this class involves learning a short abstract dance to music especially pre-recorded for a particular version of a dance genre and adjusted for difficulty level. This is in order to experience how the parts of the technique are integrated and to experience the state of performing. Students will be invited to perform at informal showings

**Fall 2024: DNCE BC2254**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**DNCE BC2255 AFRO-CUBAN DANCE. 2.00 points.**

This course introduces students to the African-based dances of Cuba, including dances for the Orisha, Rumba, and the immensely joyful “Rueda de Casino” style of Salsa. In addition to learning rhythms, songs, and dances, we will have an ongoing, informal discussion about the historical and contemporary significance of Afro-Cuban dance performance, making connections to personal experience through practice and ongoing reflection. We engage Afro-Cuban music and dance as a living and evolving tradition, where culture, artistry, and history are intimately bound

**DNCE BC2256 Advanced Explorations in AfroCuban Dance. 2.00 points.**

An upper-level exploration of Afro-Cuban Dance focused on performance. Building on the foundation of Afro-Cuban Dance: Orisha, Rumba, Salsa, this course is a deeper dive into aesthetic principles, cultural themes, and improvisation as performance in the African dance context. Students explore multiple distinct dances and learn to engage the storytelling and cultural significance of each dance through improvisation with the drums. The course culminates with final, in-class presentations. Open to experienced movers and students who have completed Afro-Cuban Dance: Orisha, Rumba, Salsa. Permission of instructor required

**DNCE BC2340 Contemporary Caribbean Dance. 2.00 points.**

Course Description: This intermediate Contemporary Caribbean Dance class draws from different Caribbean dance styles. This Caribbean fusion class explains different cultural dances, focusing on African Diaspora principles and practices such as syncopation in body and in music. Based on many of the

dance of the Caribbean Islands, students learn to identify dances and rhythms that draw from traditions, such as Arara, Palo, Salsa, Rumba, Tambu, Tumba, Merengue, Reaggaton, Cha Cha Cha, Zouk and Afro Dance, as well as more contemporary styles such as "Technica Cubana" and learn to apply them in contemporary combinations. The course is designed for students who have some dance training and are looking to widen their understanding of different dances and learn to use different body parts that are not traditionally used in modern dance but are recognizable in Jazz, hip hop and current offerings in popular

**DNCE BC2452 PILATES FOR DANCERS. 2.00 points.**

Pilates for Dancers is a full-body, low impact exercise class based on the work of Joseph Pilates, including movement concepts from Rudolf von Laban and Irmgard Bartenieff. We'll work on a yoga or Pilates mat doing exercises and movement sequences that build strength, flexibility, coordination and clarity in the body. The class is suitable for dancers, athletes and movement enthusiasts. A Pilates ring is highly recommended. A limited number of Pilates rings will be available in class. This course may not be appropriate for those with spine, neck, and shoulder injuries. If you have any of these types of injuries, kindly present a doctor's note clearing you for participation in the class

**DNCE BC2567 MUSIC FOR DANCE. 3.00 points.**

Prerequisites: Previous dance experience is necessary, a comp course in the dpt is preferred, permission of instructor This course covers basic music theory, ear training, and literature, incorporating practical exercises in which students apply musical understanding to compositional and performative modalities of movement. Students will investigate the elements of music that drive dance, the expressive influence dance can have on music, and the vital reciprocity between both activities. Emphasis will be placed on an historical survey and analysis of western musical forms from the Middle Ages to the present as well as influential music from other cultures, expanding students' awareness of the aural characteristics of a variety of musical styles while giving historical context and critical perspective on contemporary popular styles. In addition to lectures and reading requirements, the course involves listening assignments and in-class exercises structured to develop basic musical literacy and skills. Students will be introduced to multiple approaches to listening and to creating music through a combination of studio practice, theoretical study and analysis. Exploration of musicality as perceived by performer and audience will be covered, as well as learning conventional music terminology

**Fall 2024: DNCE BC2567**

DNCE 2567	001/00254	T Th 2:40pm - 3:55pm 306 Barnard Hall	Colleen Thomas, Robert Boston	3.00	8/15

### **ANAT BC2573 HUMAN ANATOMY AND MOVEMENT. 3.00 points.**

Corequisites: ANAT BC2574

Corequisites: ANAT BC2574 Dancers and other movers will acquire concrete, scientific information about anatomy and integrate this knowledge into their sensed experience of movement. Through readings, lecture/discussions and movement practice, students will explore: (1) structure and function of bones and joints, (2) muscles, neuromuscular function and coordination, (3) motor cognition and learning

Fall 2024: ANAT BC2573

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANAT 2573	001/00251	M W 10:10am - 11:25am LI020 Milstein Center	Chisa Hidaka	3.00	21/22

### **DNCE BC3001 HISTORY OF THEATRICAL DANCING. 3.00 points.**

Focuses on the history of theatre dance forms originating in Europe and America from the Renaissance to the present. Includes reading, writing, viewing, and discussion of sources such as film, text, original documentation, demonstration, and performance

Fall 2024: DNCE BC3001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3001	001/00257	T Th 1:10pm - 2:25pm 409 Barnard Hall	Seth Williams	3.00	21/25

### **DNCE BC3138 BALLETT V. 2.00 points.**

This course is for the intermediate advanced dancer. Material presented will focus on healthy anatomical alignment in barre work, extended combinations in the center, fostering personal artistic expression, and integrating improvisation in combinations with the ballet vocabulary. Clarification, analysis and repetition are fundamental elements for a sound technique of any dancer and are the foundation of this course. Center work will include attention to shaping adagio work, multiple turns in the large poses, batterie, and extended grand allegro. You may be assigned the construction and presentation of exercises, which will be explained in detail further into the semester

Fall 2024: DNCE BC3138

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3138	001/00682	M W 4:10pm - 5:25pm 305 Barnard Hall	Cynthia Anderson	2.00	19/40
DNCE 3138	002/00683	T Th 4:10pm - 5:25pm 110 Barnard Hall	Nicole Robertson	2.00	20/24

### **DNCE BC3139 BALLETT V. 2.00 points.**

This course is for the intermediate advanced dancer. Material presented will focus on healthy anatomical alignment in barre work, extended combinations in the center, fostering personal artistic expression, and integrating improvisation in

combinations with the ballet vocabulary. Clarification, analysis and repetition are fundamental elements for a sound technique of any dancer and are the foundation of this course. Center work will include attention to shaping adagio work, multiple turns in the large poses, batterie, and extended grand allegro

Spring 2025: DNCE BC3139

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3139	001/00335	M W 4:10pm - 5:25pm LI013 Barnard Hall	Cynthia Anderson	2.00	15/30
DNCE 3139	002/00336	T Th 8:40am - 9:55am LI013 Barnard Hall	Kate Glasner	2.00	16/30

### **DNCE BC3140 BALLETT VI. 2.00 points.**

This course is for the intermediate advanced dancer. Material presented will focus on healthy anatomical alignment in barre work, extended combinations in the center, fostering personal artistic expression, and integrating improvisation in combinations with the ballet vocabulary. Clarification, analysis and repetition are fundamental elements for a sound technique of any dancer and are the foundation of this course. Center work will include attention to shaping adagio work, multiple turns in the large poses, batterie, and extended grand allegro. You may be assigned the construction and presentation of exercises, which will be explained in detail further into the semester. You will be assigned a grading exercise at the end of the shopping period and will get written observations from me

Fall 2024: DNCE BC3140

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3140	001/00686	T Th 8:40am - 9:55am 305 Barnard Hall	Antonio Carmena	2.00	21/40
DNCE 3140	002/00687	F 9:00am - 10:50am 305 Barnard Hall	Ashley Tuttle	2.00	23/40

### **DNCE BC3141 BALLETT VI. 2.00 points.**

This course is for the advanced dancer. Material presented will focus on healthy anatomical alignment in barre work, extended combinations in the center, fostering personal artistic expression, and integrating improvisation in combinations with the ballet vocabulary. Clarification, analysis and repetition are fundamental elements for a sound technique of any dancer and are the foundation of this course. Center work will include attention to shaping adagio work, multiple turns in the large poses, batterie, and extended grand allegro

Spring 2025: DNCE BC3141

**DNCE BC3143 CLASSIC VARIATIONS. 2.00 points.**

Variations class is a course for the intermediate to advanced dancer. As in all other ballet classes, there will be a focus on correct physical alignment, proper technique and musicality. The added challenges in this course will be the pointe shoe technique, creative choreographic choices, and musical phrasing. The class will include variations based on works ranging from Petipa to Balanchine to today's choreographers. Dancers will explore personalizing already known works, pushing the boundaries of the pointe shoe, examining how choreography has evolved and developing the stamina required to execute a full variation. Learning material rapidly while paying attention to the stylistic demands of each choreographer's works and being able to shift from one stylistic choice to another is simply expected

**Fall 2024: DNCE BC3143**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3143	001/00688	M W 5:40pm - 6:55pm 110 Barnard Hall	Ashley Tuttle	2.00	10/24

**DNCE BC3248 JAZZ DANCE III. 2.00 points.**

This class explores Advanced contemporary jazz movement using music from both American and Diasporic pop culture

**Fall 2024: DNCE BC3248**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3248	001/00689	M W 2:40pm - 3:55pm 306 Barnard Hall	Ehizoje Azeke	2.00	25/25

**DNCE BC3250 FLAMENCO. 2.00 points.**

Prerequisites: DNCE BC1137x, BC1138y, BC1332x, BC1333y, or Permission of instructor. Intermediate level in modern or ballet technique is required.

The study of contemporary flamenco dance technique with special emphasis on improvisation and performance. Through video and reading assignments and attendance at live performances, students will also develop a context for understanding flamenco art, pedagogy, and culture

**Fall 2024: DNCE BC3250**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3250	001/00690	F 11:00am - 12:50pm 110 Barnard Hall	Nelida Tirado	2.00	14/24

**DNCE BC3332 MODERN V. 2.00 points.**

Note: This is a variable-point course (0-1 pts).

This contemporary technique class invites students into an embodied practice focusing on a daily physical experimentation and challenge. Emphasis will be placed on corporeal ways to explore questions around propelling, listening, connecting,

healing, and action. This course offers a chance for students to use their sensorial experience to reflect on individual pathways/ desires for expression while, challenging the body to take risks and practice as their movement knowledge expands. Emphasis on sensation, initiation, and weight will be introduced in a floor or standing warm-up that will expand to a standing exploration of the transition between form and space. A focus will be to continue our development of a strong-grounded technique with healthy placement that moves with ease in and out of the floor. We will continue to develop our true embodied relationship to environment, people, and time

**Fall 2024: DNCE BC3332**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3332	001/00691	M W 1:10pm - 2:25pm 305 Barnard Hall	Francesca Dominguez	2.00	15/40

### **DNCE BC3560 SCREENDANCE:COMPOSITION. 3.00 points.**

Prerequisites: Must have taken a Dance Department Composition course, have some dance training. This experiential, hands-on course requires all students to choreograph, dance, and film. Focusing on single-shot film-making, the duet of the camera and the dance will create an understanding of the interaction between the two, enabling students to create a final short film

#### **Fall 2024: DNCE BC3560**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3560	001/00260	T Th 10:10am - 12:00pm LI020 Milstein Center	Gabri Christa	3.00	10/14

### **DNCE BC3567 DANCES OF INDIA. 3.00 points.**

A range of dance genres, from the traditional to the innovative, co-exist as representations of Indianness in India, and beyond. Identities onstage and in films, morph as colonial, national, and global contexts change. This course zooms from micro to macro views of twentieth century staged dances as culturally inflected discourse. We review how Indian classical dance aligns with the oldest of performance texts, and with lively discourses (rasa as a performance aesthetic, Orientalism, nationalism, global recirculations) through the ages, not only in India but also in Europe, Britain and America. Throughout the course, we ask:- How is culture embodied? How do historical texts configure dance today? How might they affect our thinking on mind-body, practice-theory, and traditional-contemporary divides? How does bodily patterning influence the ways that we experience our surroundings and vice versa? Can cultural imaginaries instigate action? How is gender is performed? What are dance discourses?

#### **Fall 2024: DNCE BC3567**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3567	001/00261	M W 11:40am - 12:55pm 207 Milbank Hall	Uttara Coorlawala	3.00	17/20

**DNCE BC3576 DANCE CRITICISM. 3.00 points.**

This course offers intensive practice in writing on dance and explores a range of approaches to dance criticism from the 1940s through today. Starting from the premise that criticism can be an art form in itself, we ask: What are the roles and responsibilities of a critic? How do our own identities and experiences inform how we see and write? With the proliferation of dance in digital spaces, what new possibilities arise for dance criticism? Class meetings include discussion, writing exercises, and peer workshops. Assignments involve viewing performances outside of class

**Fall 2024: DNCE BC3576**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3576	001/00262	T Th 2:40pm - 3:55pm 306 Milbank Hall	Siobhan Burke	3.00	14/15

**DNCE BC3591 SENIOR SEMINAR. 4.00 points.**

Research and scholarly writing in chosen topics relating to dance. Methods of investigation are drawn from prominent archival collections and personal interviews, as well as other resources. Papers are formally presented to the Dance Department upon completion

**Fall 2024: DNCE BC3591**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
DNCE 3591	001/00263	W 10:10am - 12:00pm 406 Barnard Hall	Paul Scolieri	4.00	6/10

Studies students (the Columbia major is designated "Drama and Theatre Arts"). The major program engages the disciplines of drama, theatre, and performance studies as a distinctive mode of intellectual and artistic inquiry. While Barnard and Columbia students fulfill the overall graduation requirements at their respective institutions (the Core at Columbia, Foundations at Barnard), major requirements are the same for all majors, who take foundational coursework in the literary, cultural, and embodied traditions of western and non-Western performance as well as courses in the practices of acting, directing, design, dramaturgy, playwriting, and management and technical theatre. All majors then specialize in a specific area and undertake advanced thesis work, leading either to a formal essay of original research, or to an artistic project (in acting, design, directing, dramaturgy, playwriting, solo performance, or stage and production management) that combines the practices of research and artistic creation. Barnard and Columbia students receive their degrees from their respective colleges of Columbia University.

The Barnard College Department of Theatre mounts a full season of productions in the Minor Latham Playhouse and the Glicker-Milstein Theatre, a crucible of investigation that is a credit-bearing element of the curriculum, and open to all undergraduate students for audition. A collaboration between students and professional theatre artists, the Department of Theatre productions are both a learning process and a scene of encounter, where perceptions are shaped for the attention and creative reflection of a larger public.

Barnard students may declare the major at any time; Columbia students have a major-selection period in the second year, but all students must declare the major by the spring semester of the sophomore year. The major requirements are spelled out below, and the process for choosing a thesis area as well: all Theatre/Drama and Theatre Arts majors complete a thesis as a capstone to their work in the degree. For more information about the major, please contact the Theatre Department office.

All majors must submit the online Theatre Major Declaration Form, available on the Department of Theatre website (theatre.barnard.edu); Barnard majors must also submit the Barnard Major Declaration Form via Slate. Prior to declaring the major, students should make an appointment with the Department Chair or their undergraduate advisor. All majors should introduce themselves to the Theatre Administrator in 333C Milbank Hall; she will add names to the departmental listserv, and help students to keep up to date in important information about studying in the Department.

## MISSION

**Mission:** To engage imaginatively with the inheritance of the past, the questions of the present, and the possibilities of the future through embodied and intellectual inquiry into theatre and performance.

### **What do we value?**

## THE STUDY OF THEATRE

The undergraduate theatre major is housed in the Barnard College Department of Theatre, and is offered to all undergraduate Barnard College, Columbia College, and General

In the Department of Theatre, faculty, staff, and students understand drama, theatre, and performance as artistic and social practices, and as means and objects of study that model the investigation and production, the making, of a sustainable, equitable, livable future. We pursue theatre and performance within the purpose of the university: to learn, explore, and fashion disciplines of inquiry, new ways of knowing and so new structures of knowledge. Theatre is a site of public encounter, and we undertake its many forms of collaboration in order to speak with the campus and the community, to perform an imaginative, ethical engagement of possibility: of critical dialogue among the arts, humanities, and sciences; of social and climate justice; of equity and inclusion; of the manifold joys of creative work across the regenerative interdisciplines of theatre and performance.

### What do we do?

In the Department of Theatre, faculty, staff, and students

**practice:** inquiry across a range of platforms of scholarly and artistic production that define and enlarge one another, participating in learning modes of embodiment, of spatial array, of visual and sonic design, of written expression, and of cultural interpretation across a range of forms

**create:** make art and make scholarship, in the understanding that theatre provides a process and a means for making oneself, and making a livable world

**learn:** the historical, cultural, social, political, and aesthetic contexts of drama, theatre and performance, and the contemporary practices of performance as means of seeing theatre today as an instrument of critical invention and ethical performative intervention

**collaborate:** with others with different skills effectively, productively, creatively, ethically, and equitably

**reflect:** on the process and the product of making, on the political and ideological work of aesthetics, on the interplay between creative work and equity, justice, and citizenship

### Who are we?

The Department of Theatre are

faculty and staff specialized in a wide range of disciplines, professional artists and scholars who engage in critical creation across a range of platforms

students majoring in Theatre, or taking courses as non-majors, pursuing a variety of paths toward their future. Among other avenues, our students have gone on to pursue further study in MFA and PhD programs in various fields, leading to professional careers in theatre, as well as to academic careers in the humanities, theatre, and performance studies. Many find the writing, performance, and collaborative skills developed in the study and practice of theatre essential in their future work in a variety of professional settings.

### Where are we?

The Department of Theatre

is in and of New York, the nation's theatrical capital, sustained by an unrivaled range of performance from Broadway to off-Broadway to off-off Broadway, and extending across the city's five boroughs

is part of the vibrant, diverse civic community of Morningside Heights and Harlem

is part of an energetic and distinguished academic community, making theatre, learning theatre, understanding the theoretical, social, cultural, ideological the work of theatre in conversation with the interrogative work of research across an academic campus

is engaged with the city, with a wide range of artists and scholars, and with our sustaining communities.

acknowledges its location in Lenapehoking, the territory of the Lenape people, as a step towards recognizing the traditional and enduring stewards of this land and disrupting the invisibility and ongoing erasure of Indigenous Peoples

*Department of Theatre, Barnard College*

## STUDENT LEARNING OUTCOMES

Upon completion of the major, successful students will be able to attain the following objectives:

- Critically assess the artistic ambitions and theoretical implications involved in the interpretation of historical and contemporary drama and theatrical performance,
- Create with proficiency in at least one area of creative work in the field: critical/research writing, acting, design, directing, dramaturgy, playwriting, solo performance, stage and production management

## PROGRAMS OF STUDY

Major in Theatre/Drama & Theatre Arts

Minor in Theatre/Drama & Theatre Arts

Options within the major:

### Drama and Theatre Studies Student Learning Outcomes

Students successfully completing drama studies, theatre studies, and performance studies coursework, or pursuing a Senior Thesis in Research, should be able to attain the following objectives:

1. Write clearly about dramatic literature, and about performance, including where applicable film performance;
2. Synthesize and evaluate contemporary criticism and research scholarship in writing;

3. Know specific authors, movements, periods, styles, and ideological structures in the history of drama, theatre, and performance (i.e., Shakespeare, American drama, Performative Cultures of the Third Reich, Black Theatre);
4. Use critical, theoretical, and historical concepts in the analysis of drama and performance.

### Acting Student Learning Outcomes

Students successfully completing coursework in acting or pursuing a Senior Thesis in Performance: Acting should be able to attain the following objectives:

1. Analyze dramatic texts and apply the analysis to developing a performable role/character;
2. Synthesize external elements with external elements (social mores, environment, historical context, status relationship to others) and internal elements (center of gravity, personal rhythm, speed, tempo) toward the expression of a character's physicality and emotionality;
3. Recognize and apply the fundamental concepts of character development: objectives, obstacles, actions, given circumstances;
4. Develop vocal, physical and emotional awareness and imagination, and explore techniques available to aid the actor in applying these elements in a conscious way during rehearsal and performance.

### Design Student Learning Outcomes

Students successfully completing coursework design or pursuing a Senior Thesis in Performance: Design should be able to attain the following objectives:

1. Analyze dramatic texts and translate that analysis into documents used in the production process (breakdowns, plots, etc.);
2. Collect images and texts that provide insight into the developing design idea, and accurately communicate historical and stylistic choices;
3. Demonstrate fluency with the craft of a design field – e.g. sketching, model making, drafting, sound and lighting plots, and associated software;
4. Perform collaboratively, adapting and informing their designs with ideas generated through conversation with colleagues, classmates, and advisors.

### Directing Student Learning Outcomes

Students successfully completing coursework in directing or pursuing a Senior Thesis in Performance: Directing should be able to attain the following objectives:

1. Recognize the different demands of different configurations of stage space;
2. Apply compositional tools;
3. Define production style and its influence on performance choices;

4. Communicate effectively with actors;
5. Analyze the historical, social, and aesthetic elements of a dramatic text as the basis for a directorial conception.

### Dramaturgy Student Learning Outcomes

Students successfully completing coursework dramaturgy or pursuing a Senior Thesis in Performance: Dramaturgy should be able to attain the following objectives:

1. Apply important critical and theoretical concepts to the analysis of dramatic writing and theatrical performance;
2. Synthesize and evaluate contemporary research scholarship and apply it to a specific production, including biographical, historical, and interpretive information;
3. Write clearly and effectively about the goals of a production, its critical contexts and purposes;
4. Communicate the critical stakes of a performance to a director and cast; to be able to work with a director in fashioning those stakes;
5. Edit dramatic scripts for production.

### Playwriting Student Learning Outcomes

Students successfully completing coursework in playwriting or pursuing a Senior Thesis in Performance: Playwriting should be able to attain the following objectives:

1. Create an individual theatrical voice in writing;
2. Construct dramatic and theatrical events onstage;
3. Communicate supportive critique to fellow writers;
4. Interpret plot and story, and to employ language and spectacle creatively;
5. Recognize dramatic structures, and be able to shape and hold an audience's attention.

### Stage and Production Management Student Learning Outcomes

Students successfully completing coursework in stage and production management or pursuing a Senior Thesis in Performance: Stage and Production Management should be able to attain the following objectives:

1. Read and analyze a performance text from stage and production management perspectives;
2. Communicate with and coordinate the needs of all members of the production effectively;
3. Organize and manage the rehearsal process
4. Develop and update the production budget

## STUDENT ADVISING

### Advising Resources

For specific advising questions, we recommend you make an appointment with one of our academic advisers. All full-

time faculty members in the Department of Theatre serve as advisers:

- Professor and Chair, W. B. Worthen
- Assistant Professor Yizhou Huang
- Professor of Professional Practice Alice Reagan
- Professor of Professional Practice Sandra Goldmark
- Senior Lecturer Shayoni Mitra
- Lecturer Gisela Cardenas

Students can email [theatre@barnard.edu](mailto:theatre@barnard.edu) to sign up for the department list-serv.

On our student billboards outside the theatre office at 336 and 333 Milbank there are flyers and information on the major, minor, and how to get involved in the department. Please visit this page on our website for the most up-to-date forms for the major: <https://theatre.barnard.edu/major-requirements>, and here for the minor: <https://theatre.barnard.edu/minor-requirements>.

There are semesterly open house/course planning events that students can attend to learn more about the upcoming semester. These are typically held in early November for information about the Spring semester, and early April for information about the Fall semester. Join the theatre listserv to stay up to date on these and other departmental events.

## Guidance for First-Year Students

Students interested in majoring in Theatre should consider taking three or four of the required classes in their first two years of study: the Critical Histories of Drama, Theatre, and Performance lectures (1 and 2), another lecture or seminar course in the field of drama, theatre, and performance “studies,” and/or a theatre praxis “studio” course.

### General Rule: Attend the First Day of Class

Students are required to attend the first day of class; students who do not attend the first day who are registered for the course will be dropped. Students in acting classes who have been admitted to the course who do not attend the first class meeting will be dropped. Some courses determine enrollment on the first day of class. If the course is over-enrolled, the instructor will determine a method for deciding which students get priority, and only those students present on the first day will be considered.

For more information on enrolling in Theatre Department courses as a first-year student, please see here: <https://theatre.barnard.edu/courses-first-year-students>

## Enrolling in Courses

The Barnard College Department of Theatre is open to any and all Columbia University undergraduates. While our productions require auditions, the program generally is open for enrollment, meaning interested students in or outside of the major may participate in courses as they choose.

## Acting Pre-Requisites:

All students wishing to take Acting courses in the Theatre Department must first complete an Acting I class before moving on to the Acting II series. (Transfer students, please discuss transfer credit equivalencies with the Theatre Department office.)

Please see [here](#) for an up-to-date listing of our Acting course descriptions. Please note that Acting II: Acting Sondheim and Acting II: Contemporary Musical Theatre requires all interested students to submit a video singing audition as well as other information, detailed both on our website and in the course catalogue.

Finally, students majoring in theatre are required to apply for the concentration field in which they will complete a senior thesis. The application for senior thesis fields (acting, design, directing, dramaturgy, playwriting, solo performance, research) is due in January of the junior year (after 5th semester; 3 semesters remaining); students must be declared majors, and have taken formal coursework in the department in the potential field(s) of the senior thesis. Please see [here](#) for more information about the senior thesis: <https://theatre.barnard.edu/senior-thesis-0>

## PREPARATION FOR GRADUATE STUDY

Students interested in PhD studies in the field of literature, theatre, or performance studies should consult Profs. W. B. Worthen, Shayoni Mitra, and/or Yizhou Huang; students interested in MFA in design should consult Prof. Sandra Goldmark; in directing should consult Prof. Alice Reagan; in acting should consult Prof. Gisela Cardenas. All faculty are generally willing to be consulted on your next steps.

## COURSEWORK TAKEN OUTSIDE OF BARNARD

### Advanced Placement Credit

We do not count AP courses toward the major or the minor.

### Columbia College Courses

Several lecture/seminar courses at Columbia University may be counted toward the lecture/seminar requirement in the major or minor. Majors may count up to two courses not taken in the Department of Theatre toward the major; minors may count one. A list of such courses (typically Shakespeare, drama courses offered in the English department, and so on) is developed for each semester. Columbia English (ENTA) and Barnard English (ENTH) courses are typically counted; other courses should be approved by the Theatre Department office.

### Transfer Credit

When students wish to transfer credit to Barnard from other institutions, their coursework is first evaluated for college

elective credit by the Registrar's Office. If they are approved, departments can consider these courses for credit toward the major or minor.

Students are allowed to count up to 2 courses taken elsewhere toward the Theatre major, provided they are similar in duration, number of meetings, and content to courses that fulfill the major offered in the department. Courses are evaluated by the Theatre Department office. Students must take all courses counting toward the minor at Barnard/Columbia. The THTR UN3150 and THTR UN3151 Critical Histories of Drama, Theatre, and Performance cannot be substituted for coursework elsewhere.

## Study Abroad Credit

Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Global Engagement) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus.

Classes taken abroad through other institutions or programs are treated as transfer credit and are subject to the same policies as other transfer courses. Accordingly, there will be a limit on the number of study abroad courses taken at other institutions that can be counted toward the major or minor.

To receive credit toward the major or minor for a study abroad course (whether taken through a Columbia program or another institution/program), students must submit a Study Abroad Approval form through Slate and obtain the approval of the Theatre Department office.

Students planning to study abroad should consult with the Theatre Department office regarding coursework taken abroad. Students studying in conservatory programs in London (RADA, BADA, etc.) typically take the equivalent of 9 credits of acting (3 studio courses) and, if they take two "studies" courses, are awarded one "lecture/seminar" course for that work. They may count ONE course toward the studio requirement and ONE toward the lecture/seminar requirement.

## Summer Credit

Summer courses at Barnard are equivalent to those taken during the academic year. Courses that have been approved for the fulfillment of departmental requirements will automatically count toward the major/minor.

Courses taken at other institutions (including Columbia) are considered transfer credit and are subject to the same policies governing other transfer courses. To receive major or minor credit for a summer course taken at another institution, students must submit a Summer Course form through Slate and have it approved by both the Registrar's Office and the Theatre Department office.

## SENIOR CAPSTONE PROJECT

Barnard College has a long-standing commitment to preparing students in the major so that they may undertake a capstone project. All Barnard seniors are required to complete a senior project or thesis, an opportunity the Theatre/Drama & Theatre Arts major extends to all majors, whether from Barnard, Columbia College, or Columbia General Studies. The senior thesis project allows students to develop records of individual research that include theoretical engagement in the major discipline, the development of creative projects or research, and original empirical and interpretive analysis. The thesis review will be conducted by the full-time faculty of the department (Cardenas, Goldmark, Huang, Mitra, Reagan, H. Worthen, W.B. Worthen), in consultation with faculty in specific thesis fields.

Please see here for more detail on thesis options by concentration, and for information regarding the application: <https://theatre.barnard.edu/senior-thesis-0>

## DEPARTMENTAL HONORS AND PRIZES

### Departmental Honors

Departmental honors are awarded by the department largely based on overall GPA; Columbia and Barnard set a percentage of graduating majors eligible for this award. The Department also offers several other awards, the Kenneth Janes Award (Barnard student), Austin Quigley Award (Columbia College student), the Joseph Milton Fee award in playwriting, and the Dasha Amsterdam Epstein Awards (in acting, directing, design, dramaturgy, playwriting, and research). The Janes and Quigley awards are selected by the faculty; protocols for the Fee and Epstein awards are listed on the departmental website.

### Academic Prizes

Please see here for a comprehensive list of prizes, requirements, deadlines: <https://theatre.barnard.edu/prizes>

**Kenneth Janes Award** (Barnard student, no student self-nomination.)

**Austin E. Quigley Award** (Columbia student, no student self-nomination.)

#### a. The Dasha Amsterdam Epstein Awards in Honor of Patricia Denison

**Acting:** \$1000 for achievement in acting, including acting solo performance and senior thesis festival; awarded to a graduating senior based on body of work in Theatre Department productions. Nominated and selected by Theatre Department faculty. (No student self-nomination.)

**Design and Production:** \$1000 for achievement in design and production, awarded to a graduating senior based on body of work at Barnard/Columbia. Students may self-

nominate, and must have taken a class in design in the Department of Theatre to be eligible.

**Directing:** \$1000 for achievement in directing, awarded to a graduating senior based on body of work at Barnard/Columbia. Students may self-nominate, and must have taken a class in directing in the Department of Theatre to be eligible.

**Dramaturgy:** \$1000 for achievement in dramaturgy, awarded to a graduating senior based on body of work. Students may self-nominate, and must have taken a class in dramaturgy in the Department of Theatre to be eligible.

**Theory, Criticism, Research:** \$1000 for the best undergraduate essay written in a Theatre department class or other class such as English/Theatre (ENTH) class, Comparative Literature/Theatre (CPLT) or English/Theatre Arts (ENTA) class that fulfills Theatre major requirements; essays written as the Theatre major Senior Thesis in Research may be considered as well. (No student self-nomination.)

**Playwriting:** \$1000 for achievement in playwriting, for a new play on contemporary experience. Students may self-nominate, and must have taken a class in playwriting at Barnard or Columbia to be eligible.

#### b. Joseph Milton Fee, Jr. Award in Playwriting.

The Prize will be in the amount of \$500, and may be awarded to two undergraduate students (\$500 each) for an original play written in English "on any aspect of the American experience." Applicants are expected to have formally studied playwriting at Barnard or Columbia. Students may self-nominate.

**The department of Theatre is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

#### Faculty:

**Chair:** W.B. Worthen (Alice Brady Pels Professor in the Arts)

**Associate Professor:** Hana Worthen (primary appointment Associate Professor, Comparative Literature)

**Assistant Professor:** YIzhou Huang

**Professor of Professional Practice, Theatre, School of the Arts:** Steven Chaikelson

**Professors of Professional Practice:** Sandra Goldmark (also Climate School, Columbia University); Alice Reagan (Director of Undergraduate Studies)

**Senior Lecturers:** Shayoni Mitra

**Lecturers:** Gisela Cardenas

**Adjunct Lecturers:** Mana Allen, Daniel Baker, Andy Bragen, Autum Casey, Kyle deCamp, Crystal Finn, Sharon Fogarty, Tina Mitchell, Shannon Sindelar, David Skeist, Elena Zucker

#### Affiliated Faculty:

Associate Professors: Maja Horn (Spanish and Latin American Cultures, Barnard)

Senior Lecturers: Pam Cobrin (English, Barnard), Patricia Denison (English, Barnard)

#### Other officers of the University offering courses listed below:

Professors: Julie Stone Peters (English, Columbia), Austin Quigley (English, Columbia)

Assistant Professors: Rebecca Kastleman (English, Columbia)

**Department Administrator:** Kate Purdum

**Technical Director:** Greg Winkler

**Director of Production:** Michael Banta

**Costume Shop Manager:** Kara Feely

**Senior Faculty Department Assistant:** Valerie Coates

**The department of Theatre is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

## REQUIREMENTS FOR THE MAJOR

[Download the Theatre major self-audit form](#)

A minimum of 44 credits is required to fulfill the requirements for the major. Students intending to major in Theatre should consult with the Department Chair in their sophomore year or earlier to plan a program. Twelve courses and one senior thesis (in Performance or in Research) are required as follows:

## REQUIREMENTS FOR THE MAJOR FOUR COURSES

**Two lecture "studies" courses (must be taken at Barnard):**

THTR UN3150	CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE I
THTR UN3151	CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 2

## Two theatre studio "praxis" courses, each in a different discipline:

THTR UN3004	ACTING I
THTR UN3200	DIRECTING I
THTR UN3203	COLLABORATION:DIRECTNG/ DESIGN
THTR UN3300	PLAYWRITING WORKSHOP
THTR UN3301	PLAYWRITING LAB
THTR UN3401	SOUND DESIGN
THTR UN3412	TECHNICAL PRODUCTION
THTR UN3413	STAGE MANAGEMENT
THTR UN3402	COSTUME DESIGN
THTR UN3403	LIGHTING DESIGN
THTR UN3404	SCENE DESIGN
THTR UN3405	PROBLEMS IN DESIGN
THTR UN3210	DRAMATURGY
THTR UN3201	DIRECTING II
THTR UN3202	ADVANCED DIRECTING

## EIGHT ADDITIONAL COURSES: LECTURE/SEMINAR AND PRAXIS

Maximum 5 3-4 point courses in drama studies, theatre studies, performance studies (lecture/seminar) **OR**

Maximum 5 3-4 point courses in praxis(studio) fields: 5 studies/3 praxis; 4 studies/ 4 praxis; 3 studies/5 praxis

- praxis courses may be taken a single discipline or combination of disciplines: acting, design, directing, dramaturgy, playwriting, solo performance
- one praxis course may be taken in another department, if relevant to thesis, with prior approval of the Chair (i.e., figure drawing)
- drama studies, theatre studies, and performance studies lectures/seminars are taken in the Theatre THTR UN 3100 series; 1-2 ENTA, ENTH, CPLS, and/or Shakespeare (literature) courses are typically approved for "studies" requirement; other courses require prior approval of Chair
- at least 3 courses in the field of the senior thesis (3 acting classes for acting; solo performance and 2 acting for solo performance thesis; 3 directing classes; 3 design classes; 3 playwriting classes; 1 stage management and 2 design/technical theatre for stage and production management; dramaturgy class and either 2 research classes or 1 research and 1 playwriting for dramaturgy; 3 research classes for research thesis.

## ONE SENIOR THESIS

*Acting, Design, Directing, Dramaturgy, Playwriting, Solo Performance, Stage and Production Management, Research*

THTR UN3997 SENIOR THESIS IN PERFORMANCE (acting, design, directing, dramaturgy,

playwriting, solo performance) OR THTR UN3998 SENIOR THESIS IN RESEARCH. **Students apply for thesis field in January of the junior year;** at least 3 courses in the field of the thesis, in addition to the thesis course, required at the time of graduation.

## ONE TO TWO PRODUCTION CREW ASSIGNMENTS

Two 1-2 credit courses (THTR UN2422 PRACTICUM SCENIC PAINT, THTR UN2423 PRACTICUM LIGHTS # SOUND, THTR UN2424 PRACTICUM WARDROBE # RUN CREW, THTR UN2426 PRACTICUM DESIGN THESIS FESTIVAL, THTR UN2427 PRACTICUM DESIGN # PRODUCTION ASSISTANT), one pre-production and one backstage; OR One 3-credit assignment as stage manager (THTR UN2425 PRACTICUM STAGE MANAGEMENT).

## GRADUATE COURSES

Only under special circumstances, and with the permission of the instructor, can undergraduates take graduate classes.

## REQUIREMENTS FOR THE MINOR

The Minor in Theatre provides the opportunity to engage in the range of opportunities offered by the Theatre department:

students who minor in Theatre take a mix of lecture and seminar courses in drama, theatre, and performance studies, as well as courses in a selected area or selected areas of performance practice (acting, design, directing, dramaturgy, stage and production management, playwriting). See here for the [Minor Audit Form](#).

Please note:

**Only courses that would fulfill the major requirements can be used to fulfill minor requirements.**

**For Barnard students: the minor can be "declared" only in the semester that all requirements for the minor will be completed, typically in the first or second semester of the senior year.**

**For students in Columbia College and General Studies: please contact your advising center to declare the minor.**

The minor in Theatre consists of six (6) courses; only courses that fulfill major requirements may be taken to fulfill minor requirements. Students minoring in Theatre may take one (1) relevant course from another department as part of the "elective" series, as approved by the minor advisor or the department chair.

Six courses, to include three 3- or 4-credit lecture/seminar courses, and three 3-credit studio courses, as follows:

- One (1) Theatre lecture course (THTR UN3149 PERFORMANCE IN/OF SOUTH # SOUTHEAST ASIA, THTR UN3150 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE I,

### THTR UN3151 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 2, THTR UN3154 THEATRE TRAD GLOBAL CONTEXT )

- One (1) additional lecture course from the list above or seminar course offered at the 3000 level in the Theatre department
- One (1) course offered in the Theatre department in any of the following fields: acting, design, directing, dramaturgy, playwriting.
- Three (3) additional courses as follows:
  - One (1) 3000 level lecture/seminar course in drama, theatre, and performance studies offered in the Theatre department
  - Two (2) studio courses, chosen from acting, design, directing, dramaturgy, or playwriting.

One (1) relevant course from another department may be included with prior approval of the department chair, including ENTA courses offered through Columbia English, or relevant courses offered in other departments.

No more than three (3) courses may be in a single format: three (3) lecture or seminar and three (3) studio courses. All three studio courses may be in a single discipline (for example, three courses in acting; two design courses and one approved course in figure drawing; three playwriting courses, including one approved course taken in Barnard English).

## COLUMBIA CORE REQUIREMENTS IN THE THEATRE MAJOR

The Global Core requirement in the Core Curriculum (for CC/GS students) can be fulfilled by the Theatre course THTR UN3154: Theatre Traditions in a Global Context.

**The department of Theatre is housed at Barnard College, and all information on these Bulletin pages feeds from the information on the Barnard Course Catalogue.**

### THTR UN2005 Acting Workshop. 3 points.

When offered in Fall semester, open only to first-year students. **Not offered during 2023-2024 academic year.**

Prerequisites: Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions).

Course develops the processes and tools an actor needs to approach the text of a play. Students develop their physical,

vocal, and imaginative range and skills through voice and speech exercises, work on non-verbal behavior, improvisation, and character development. **IN THE FALL SEMESTER OPEN ONLY TO FIRST-YEAR STUDENTS.** Course encouraged for prospective BC Theatre and CU Drama and Theatre Arts majors.

### THTR UN2022 PRACTICUM PERFORMANCE SHOW 1. 3.00 points.

Course can be taken for 1-3 points.

May be retaken for full credit. Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a departmental stage production register for this course; course emphasizes the collaborative nature of production, and appropriate research and reading required in addition to artistic assignments. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions)

#### Fall 2024: THTR UN2022

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2022	001/00304	M T W Th F 6:00pm - 11:00pm	Dara Malina	3.00	7/20

325 Milbank Hall					

## THTR UN2025 PRACTICUM PERFORMANCE THESIS

### 2. 3.00 points.

May be retaken for full credit. Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a Senior Thesis in Directing register for this course. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions)

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2025	001/00388	M T W Th F 7:00pm - 11:00pm	Michael Banta	3.00	6/20
207 Milbank Hall					

## THTR UN2026 PRACTICUM PERFORMANCE THESIS

### 3. 3.00 points.

May be retaken for full credit. Prerequisites: Open to all Barnard and Columbia undergraduates. Permission of Department through audition required. Students cast as actors in a Senior Thesis in Directing register for this course. Auditions for each semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions)

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2026	001/00389	M T W Th F 7:00pm - 11:00pm	Michael Banta	3.00	8/20
202 Milbank Hall					

## THTR UN2027 Practicum Performance Dramaturgy. 3 points.

Prerequisites: Student dramaturgs are selected as part of the production team; students interested in dramaturging a faculty-directed production should have taken the Dramaturgy course (THTR UN3167) and consult with the instructor. Students interested in dramaturging a senior thesis in directing should be listed by the thesis director as part of the production proposal and register for this course in the semester of the production. Students doing a senior thesis in dramaturgy do not register for

this course, but register for THTR UN 3997: Senior Thesis in Performance: Dramaturgy.

## THTR UN2201 ACTING ENSEMBLE DIRECTING II.

### 1.00 point.

Students may participate as actors in Directing II as a 1-credit course; these students will comprise the Acting Ensemble. Actors will be cast in all four student-directed scenes and will participate in the feedback process following the showings. Actors must be available for both days of the week the course meets, but are only required to attend when they are performing; they are welcome to attend additional classes that may be of interest. Actors will be graded on their in-class performances (moment-to-moment work, collaboration with on-stage partners, memorization) and ability to respond and adjust to notes. Actors who are responsible and collaborative will succeed as part of the Acting Ensemble. Grading is Pass/Fail

#### Spring 2025: THTR UN2201

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2201	001/00390	M W 4:10pm - 6:00pm 229 Milbank Hall	Alice Reagan, Jessi Hill	1.00	5/30

## THTR UN2210 Theatre Workshop. 1 point.

Various topics presented by visiting theatre scholars, artists, and practitioners in a lecture/seminar/workshop series that will meet for at least four sessions during each semester. Topics, times, and visiting instructors will be announced by the department. Students must attend all classes to receive credit for the course.

## THTR UN2422 PRACTICUM SCENIC PAINT. 1.00 point.

May be taken for 1-3 points.

May be retaken for full credit. Prerequisites: permission of Theatre Department Production Manager, Michael Banta ([mbanta@barnard.edu](mailto:mbanta@barnard.edu)). Training and practical props and/or scenic painting work on Departmental mainstage productions

#### Fall 2024: THTR UN2422

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 2422	001/00306		Michael Banta	1.00	2/20

**THTR UN3004 ACTING I. 3.00 points.**

Prerequisites: Enrollment in each section limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Prerequisite: Open to all Barnard and Columbia undergraduates. Permission of Instructor required; students admitted from Waiting List. Course develops physical, vocal, and imaginative range and skills needed to approach the text of a play: text analysis, speech exercises, non-verbal behavior, improvisation designed to enhance embodiment, movement, and projection. Gateway course to advanced courses; transfer students who have previous college-level course may be exempted with approval of Chair. May be retaken for full credit

**Fall 2024: THTR UN3004**

### THTR UN3005 ACTING II. 3.00 points.

Prerequisites: Enrollment in each section limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions)

Prerequisite: Open to all Barnard and Columbia undergraduates. Permission of Instructor required; students admitted from Waiting List. Students must have taken Acting I or equivalent to be eligible for Acting II sections. Acting II will offer several different sections, focusing on a specific range of conceptual, embodiment, and physical acting skills. Please check with the Theatre Department website for specific offerings and audition information. May be retaken for full credit. All sections of Acting II fulfill the "Arts and Humanities" Foundations requirement at Barnard College

### THTR UN3006 ADVANCED ACTING. 3.00 points.

Not offered during 2023-2024 academic year.

Prerequisites: Preference given to juniors and seniors; THTRV 3004 or 3005 prerequisite. Enrollment limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes

begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions)

Prerequisites: Preference given to juniors and seniors; THTR UN 3004 or 3005 prerequisite. Enrollment limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semesters stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult Auditions on the Barnard Theatre Department website in advance: [theatre.barnard.edu/auditions](http://theatre.barnard.edu/auditions) Special problems of performance. In-class scene work, extensive outside research, rehearsals, and reading. Fulfills additional coursework in Acting for Theatre/Drama and Theatre Arts majors. May be retaken for full credit

### THTR UN3007 Scene Lab. 3 points.

Not offered during 2023-2024 academic year.

Provides an overview of the creative process of acting: text analysis, circumstance, establishment of place, pursuit of intention in coordination with exercises and improvisation designed to enhance concentration, imagination, resonance, movement, and projection. Rehearsal 2 hours per week outside class, participation in discussion of plays, playwrights, and performances required. Fulfills one course in Acting for Theatre/Drama Theatre Arts majors.

### THTR UN3008 PERFORMING GREEK TRAGEDY ON THE MODERN STAGE. 3.00 points.

This course aims to explore performing Greek tragedy on the modern stage. It will include an introduction to original performance practices in ancient Greece (space, masking, choral performance, costume, acting techniques) and an examination of how artists from different contemporary theatrical traditions have adapted ancient texts in modern performances and new versions of the plays. The bulk of the course will be focused on the problems of acting, interpreting, and reinterpreting parts of three plays on the stage, Sophocles' Antigone, Euripides' Medea, and Sophocles' Ajax along with a new version by Ellen McLaughlin, who teaches playwriting at Barnard, Ajax in Iraq. Students will view all or parts of particularly interesting recent productions from various theatrical traditions, which will help them to tackle challenging issues such as choral performance and choral rhythms, masking, character work, dialogues and presenting formal political debates. For contemporary actors training in Greek tragedy offers a unique opportunity to improve their performance on stage through ensemble work and representing character through speech. It enhances dramaturgical capacities that a contemporary theater practitioner must exercise in exploring theory in practice and vice versa. This class is directed to students particularly interested in dramaturgy, directing, designing, translation, and Greek tragedy as well as acting

### **THTR UN3127 ZORA NEALE HURSTON # BLACK PERFORMANCE. 4.00 points.**

This course begins with focused attention on select plays of Zora Neale Hurston and her critical writing on performance, then takes ZNH's aesthetics, politics, and provocations as a lens to study Black performance, broadly defined. We will consider the contexts in which Hurston pursued a career as playwright and theatremaker, and the influences that found their way into her plays including spiritual narratives and voodoo. We will turn our attention to key writers of the Harlem Renaissance to learn where ZNH first made her mark, and the milieu to which she ultimately turned her back. Each week's reading/viewing will include primary sources (ZNH's plays and dramaturgical statements) as well as scholarly criticism of those works or genre. The final weeks of the course will take up Black performance in the realms of dance and song from the early 20th century, and finish with more recent plays and visual art. In addition to short weekly response papers, students will complete a long-form research paper that may, if they choose, include a creative element

Fall 2024: THTR UN3127

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3127 001/00318		Th 2:10pm - 4:00pm	Alice Reagan	4.00	11/12

### **THTR UN3140 PERFORMING WOMEN. 4.00 points.**

Prerequisites: Enrollment limited to 16 students.

Prerequisites: Enrollment limited to 16 students. This course examines the category of "woman" as it is mobilized in performance, considering both a variety of contemporary performances chosen from a wide range of genres and a diversity of critical/theoretical perspectives. Course fulfills lecture/seminar "studies" requirement for Theatre/Drama and Theatre Arts major

Fall 2024: THTR UN3140

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3140 001/00319		W 12:10pm - 2:00pm	Shayoni Mitra	4.00	15/16
		L1105 Diana Center			

### **THTR UN3141 Socialism/Communism in Performance. 4 points.**

Not offered during 2023-2024 academic year.

Prerequisites: Sophomore standing. Enrollment limited to 16 students.

Analyzes dramatic texts and performances under the Communist regimes behind the Iron Curtain before 1989. Principal focus is on Czech, Polish, and East German

playwrights and their productions; we will consider their work in both legal and illegal contexts. In order to gain a wider understanding of the diversity of underground performative cultures, works from Hungary, Romania, and Slovenia will be considered as well. The seminar also attends to dissident performative activities in the framework of the 1980s revolutions, and reflects on works by western authors and emigrant/diasporic writers produced on stages behind the Iron Curtain. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

### **THTR UN3142 BERTOLT BRECHT: MAKING OF THTR. 4.00 points.**

Prerequisites: Enrollment limited to 16; permission of instructor given at first class meeting. Course is conducted in English and readings are in English; German majors and German-speaking students may do readings and papers in German. This class provides a comprehensive overview of the drama, theatre, and theory of Bertolt Brecht, the most influential European playwright and theorist of the twentieth century, in the context of their original historical contexts and subsequent legacies. Course fulfills lecture/seminar "studies" requirement for Theatre/Drama and Theatre Arts major

### **THTR UN3144 Ecologies of Transmedia Performance. 4.00 points.**

Exploring transmedia performance as both a medial interaction in the physical space of theatre and a multiplatform environment expanding and extending beyond it, Ecologies of Transmedia Performance engages the NYPL for the Performing Arts archive to create an environmentally and socially self-aware, virtual transmedia performance/experience. To strengthen academic and digital competencies, the course consists of a seminar (meets on Tuesday) and a lab (meets on Wednesday), integrating several activities: experiencing and studying transmedia performances; conceptualizing transmediality; conducting archival research into transmedia theatre; and designing a transmedia performance (the digital tools we will work with include Google Sites, Google Scripts, and Google Cloud AI). Course enrollment is limited to 12; permission of instructor given after first class meeting. Fulfills one of the two required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major

### **THTR UN3145 AFRICAN AMERICAN WOMEN PLAYWRIGHTS. 4.00 points.**

African American women have been writing plays at least since the Harlem Renaissance and the American Little Theatre Movement (1910s-1920s). Initially many of their plays portrayed the plight of poor Black women either in the American South or in New York City's Harlem, in each case showing a struggle for dignity in the midst of an unfair, dismissive, racist situation in which lynchings of Black men were a common enough occurrence and citizen rights were doubly denied these (generally educated) writers—both as Blacks and as women. Even plays depicting middle-class

Black families or working women showed how just holding one's head up and keeping food on the table (much less seeking fulfillment or advancement) was exhausting and often demeaning. Plays written with Black audiences in mind often sought to provide "uplift" and encouragement. Those anticipating white or mixed audiences frequently wanted to show Blacks as equal to whites in intellect, cleanliness, childrearing, honor, patriotism, and citizenship. Over the course of a century, Black playwrights have addressed racism, African American history, urban blight, a changing workplace, and Black American womanhood in a variety of styles ranging from so-called kitchen sink realism to comedy, fantasy, and abstraction. The readings in the course do not exhaust the possibilities for study but they will get you attuned to a rich trove of varied, important writing. In this seminar, students will read and discuss several plays/meetings, make both formal and informal class presentations, and write a final essay. Course fulfills lecture/seminar in drama studies, theatre studies, performance studies requirement for Theatre major

**THTR UN3146 American Drama in the 1990s. 4 points.**  
**Not offered during 2023-2024 academic year.**

Examines American drama in the period between the fall of the Berlin Wall in 1989 and the attack on the World Trade Center in New York in 2001, considering a range of aesthetic (epic theatre, performance art), social (AIDS), and political (Reaganomics) issues of the period. Fulfills one (of two) required courses dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

**THTR UN3149 PERFORMANCE IN/OF SOUTH # SOUTHEAST ASIA. 3.00 points.**

This course actively interrogates the region of Southeast Asia as it is mobilized in performance. It will investigate performance as a theoretical lens, artistic medium, and everyday practice across Southeast Asia. Research and writing will draw upon theatre, dance, performance art, and ritual, focusing on the construction of national and personal identity through performance. The course examines themes of gender, sexuality, imperialism, and globalization. Through discussion, viewing, and weekly writing assignments, students hone their critical thinking skills and learn to formulate research questions and arguments that will culminate in one critical essay and two in-class exams. Course may fill either the Global Theatre requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

**THTR UN3150 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE I. 4.00 points.**

This course undertakes a dialectical approach to reading and thinking about the history of dramatic theatre, interrogating the ways writing inflects, and is inflected by, the material dynamics of performance. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative performance in "classical" theatres globally;

course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Topics include the sociology of theatre, the impact of print on conceptions of performance, representing gender and race, the politics of intercultural performance, and the dynamics of court performance. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) lecture requirements for Theatre/Drama and Theatre Arts majors

**Fall 2024: THTR UN3150**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3150	001/00321	M W 10:10am - 11:25am 324 Milbank Hall	William Worthen	4.00	24/40

**THTR UN3151 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 2. 4.00 points.**

This course undertakes a dialectical approach to reading and thinking about the history of dramatic theatre, interrogating the ways writing inflects, and is inflected by, the material dynamics of performance in the modern era. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative performances in theatres globally; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Topics include the sociology of theatre, the impact of print on conceptions of performance, representing gender and race, the politics of intercultural performance, and the dynamics of emerging forms and critical practices of performance analysis. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) lecture requirements for Theatre/Drama and Theatre Arts majors

**Spring 2025: THTR UN3151**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**THTR UN3154 THEATRE TRAD GLOBAL CONTEXT. 4.00 points.**

Prerequisites: Enrollment limited to 50 students. Provides a broad introduction to several traditions of nonwestern drama and theatrical practice, often placing recent and contemporary writing in relation to established conventions. Taking up plays and performance traditions from Asia, South Asia, and various African traditions, it may also consider the relation between elite and popular culture (adaptations of Shakespeare, for example), and between drama, theatre, and film. Course fulfills lecture/seminar "studies" requirement for Theatre/Drama and Theatre Arts major

**Fall 2024: THTR UN3154**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
---------------	---------------------	----------------	------------	--------	------------

LI200 Diana Center

**THTR UN3155 TRADITIONAL INDIAN PERFORMANCE. 4.00 points.**

Course provides a perspective on traditional forms of Indian performance from classical theory to contemporary traditional practices. Course covers Sanskrit drama, Kathakali, Ramlila, and Chhau; extensive video of performances and guest practitioners. Course fulfills lecture/seminar "studies" course requirement for Theatre/Drama and Theatre Arts major

**THTR UN3156 MODERN ASIAN PERFORMANCE. 4.00 points.**

This course studies contemporary Asian performance with a focus on modernity, covering most nations on the Asian continent. We will examine a variety of performance, ranging from dance to revolutionary theatre, from postdramatic staging to translated as well as made-in-Asia musicals. Theoretical questions under discussion include modernity, national/ethnic/gender identity, art and ideology, the Sinophone, global Asias, among others. Fulfills lecture/seminar requirement in Theatre/Drama and Theatre Arts major and minor programs

Fall 2024: THTR UN3156

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3156 001/00702		W 2:10pm - 4:00pm LI105 Diana Center	Yizhou Huang	4.00	10/12

**THTR UN3157 POSTCOLONIAL DRAMA:THE CANON # ITS OTHER. 4.00 points.**

This class is a close reading of postcolonial plays, both as they form a recognizable canon, and as counters to it. Through a grounding in postcolonial theory, students will explore how the colonial encounter leaves a lasting impact on language and performance. How do these playwrights tackle questions of authenticity, influence, inspiration and agency? What stories do they adapt, translate or reimagine? Also, we read in equal measure male and female playwrights, attending to the ways in which power and authority are negotiated by them. This class looks both at plays that are seminal to postcolonial writing and also newer ones that unsettle the position of the greats. Do we then understand postcolonialism as a historically bound literary trend or an ongoing process of exploration? Fundamentally we ask, in our efforts to decolonize the theatre, how do we find new ways or reading? Course fulfills lecture/seminar in drama studies, theatre studies, performance studies requirement for Theatre major

Spring 2025: THTR UN3157

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3157 001/00412		W 12:10pm - 2:00pm 111 Milstein Center	Shayoni Mitra	4.00	10/16

**THTR UN3160 Queer Performance. 4 points.**

This course surveys key theoretical and historical writings in the field of Queer Performance, both within and without

Theatre and Performance Studies, as well as significant dramatic and performance works in the field. Beginning with an introduction to queer theory and questions surrounding gender and sexuality in performance, the course then moves into contemporary theories to examine works that use embodiment to question constructions of gender and sexuality onstage. Performances are regarded as provocations: what constitutes queer performance? Is sexuality all we mean by queer? What are the historical, aesthetic, and political aspects of queer performance? We will also pursue questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funding? Is queer performance inherently or even necessarily radical? The course explores crosscultural performances, as well as performances spanning from theatrical stages to ritual to everyday performance. Course may fill either the Theory requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both.

**THTR UN3165 THEORIES OF PERFORMANCE STUDIES. 4.00 points.**

Prerequisites: Enrollment limited to 16 students.

Prerequisites: Enrollment limited to 16 students. Course surveys the wide range of genres and categories addressed by the practice of modern "performance studies"; it introduces a number of performance practices, as well as relevant interdisciplinary methodologies. Students consider live performances as well as a number of mediated works, learning to think critically and creatively about the relation between text, technology, and the body. Course may fill either the Theory requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

Spring 2025: THTR UN3165

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3165 001/00413		T 12:10pm - 2:00pm 214 Milbank Hall	Shayoni Mitra	4.00	10/16

**THTR UN3166 Drama, Theatre, and Theory. 4 points. Not offered during 2023-2024 academic year.**

Intensive immersion in fundamental principles and practices of world drama, theatre, and performance, past and present. Close readings of performances, plays, video, film, and digital media.

Assignments include presentations, performance projects, and critical writing. Fulfills one course in Drama, Theatre, and Theory requirement for Theatre/Drama and Theatre Arts majors.

**THTR UN3200 DIRECTING I. 3.00 points.**

Prerequisites: Permission of instructor given at first class meeting.

Prerequisites: Permission of instructor given at first class meeting. Exploration of the evolution of the director's role in Europe and the US, including the study of important figures. Emphasis on text analysis, and varied schools of acting in

relation to directing practice. Students gain a foundation in composing stage pictures and using stage movement to tell a story. All students will direct at least one fully-realized scene

**Fall 2024: THTR UN3200**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment

**THTR UN3201 DIRECTING II. 4.00 points.**

Prerequisites: Students required to have taken THTRV 3200 Directing I, THTRV 3203 Collaboration: Directing and Design, or equivalent. Enrollment limited to 14 students. Permission of instructor given at first class meeting.

Prerequisites: Students required to have taken THTR UN3200 Directing I or THTR UN3203 Collaboration: Directing and Design, or equivalent. Enrollment limited to 14 students. Permission of instructor given at first class meeting. Course focuses on developing an individual directorial style, placing emphasis on visual research, and the use of different staging environments: end-stage, in the round, environmental. Class is structured around scene-work and critique, and each student will direct at least three fully-realized scenes. Material typically drawn from European avant-garde

**Spring 2025: THTR UN3201**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3201 001/00415		M W 4:10pm - 6:00pm 229 Milbank Hall	Jessi Hill	4.00	13/16

**THTR UN3202 ADVANCED DIRECTING. 4.00 points.**

Prerequisites: Open to students who have taken at least one course in directing. Required for students approved for Directing thesis, but open to all qualified students. Permission of instructor given at first class meeting.

Prerequisites: Open to students who have taken at least one course in directing. Required for students approved for Directing thesis, but open to all qualified students. Permission of instructor given at first class meeting. This course requires students to draw on all previous theatre training, synthesizing scholarship and research toward dynamic fully-realized scene work. Emphasis is on the director-actor relationship; students will direct at least three fully-realized scenes, typically drawn from Shakespeare, Chekhov, or other playwrights. Students may have the opportunity to make devised work, and will collaborate with students in the Advanced Acting class. Required for, but not limited to, students undertaking a senior thesis in directing

**Fall 2024: THTR UN3202**

		LI200 Diana Center		

**THTR UN3203 COLLABORATION:DIRECTNG/DESIGN. 3.00 points.**

Prerequisites: Permission of instructors given at first meeting; enrollment limited to 24. Course focuses on developing both technical and collaborative skills of directors and designers. Students are assigned to different roles in creative teams working on a series of at least three fully realized and designed scenes. Introduction to various design disciplines and directing practice

**THTR UN3210 DRAMATURGY. 4.00 points.**

Prerequisites: Permission of instructor, given at first class meeting; enrollment limited to 12. This course teaches the research skills and practices a production dramaturg develops as part of the conceptual work of theatrical production. Course is focused on a series of activities: analyzing dramatic text, comparing different versions of script, conducting archival and cultural research, and presenting it to the production team. Fulfills as a "studio" or "praxis" course toward the Theatre/Drama and Theatre Arts major. Does not fulfill a "seminar or lecture" requirement. Required for students undertaking a senior thesis in directing prior to the thesis year

**THTR UN3211 Performance Lab. 4 points.**

**Not offered during 2023-2024 academic year.**

Prerequisites: Enrollment limited to 12 students. Course typically involves visiting critics/scholars/artists in developing experimental theatrical work.

**THTR UN3300 PLAYWRITING WORKSHOP. 3.00 points.**

Prerequisites: Permission of the instructor given at first class meeting.

Prerequisites: Permission of the instructor given at first class meeting. Students will create and workshop plays, with a focus on learning new approaches to language and structure. Recommended for students undertaking a senior thesis in playwriting

**Fall 2024: THTR UN3300**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3300 001/00325		M 4:10pm - 6:00pm LI105 Diana Center	Andrew Bragen	3.00	11/12

**THTR UN3301 PLAYWRITING LAB. 3.00 points.**

Prerequisites: Permission of the instructor and writing sample required.

Students will develop original dramatic scripts. Students will also read drafts of writers currently produced on New York stages to understand why changes and rewrites were made. Recommended for students undertaking a senior thesis in playwriting

**Spring 2025: THTR UN3301**

### THTR UN3303 UNUSUAL STORIES: CLUBBED THUMB PLAYWRITING. 3.00 points.

Clubbed Thumb commissions, develops and produces funny, strange and provocative new plays by living American writers. Clubbed Thumb's plays vary in style and content, but are always 90 minutes or under. They feature substantial and challenging roles for all genders, are questioning, formally inventive, theatrical, and exhibit a sense of humor. Since its founding in 1996, the company has presented over 100 productions, and has been awarded 5 Obies, including the Ross Wetzsteon award for sustained excellence. This playwriting course will use Clubbed Thumb's work and aesthetic as a launching point. The students will see all three of the plays in the 2023 Summerworks Festival, and will read several published scripts from previous Clubbed Thumb festivals. We will look at the stylistic and aesthetic choices of these plays, and students will engage in a series of writing assignment inspired by Clubbed Thumb's work, culminating in a "Clubbed Thumb bakeoff" (a longer play written in a short period of time). The students will have the opportunity to engage with Clubbed Thumb artists, including the artistic leadership of Clubbed Thumb: Maria Striar and Michael Bulger

### THTR UN3401 SOUND DESIGN. 3.00 points.

Prerequisites: Permission of instructor given at first class meeting. Studies the art and practice of designing sound and scoring music for dramatic performance. Students study the relationship between concert and incidental music, and read plays toward the production of a score for live theatre. Students also read broadly in the fields of sound, music, acoustics, and the cultural analysis of sound as a component of performance. Background in music or composition not essential.

#### Fall 2024: THTR UN3401

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3401 001/00326		M 1:10pm - 4:00pm	Daniel Baker	3.00	11/12
		L1105 Diana Center			

### THTR UN3402 COSTUME DESIGN. 3.00 points.

Studio course exploring designing costumes for the stage. Students become familiar with textual and character analysis, research, sketching and rendering, swatching and introductory costume history. Application Instructions for full semester fall and spring courses: E-mail the instructor with the title of the course in the subject line. In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will admit them as spaces become available. For summer courses: Application not required. Register directly for the course

#### Spring 2025: THTR UN3402

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3402 001/00417		F 11:00am - 1:50pm	Soule Golden	3.00	12/12
		230 Milbank Hall			

### THTR UN3403 LIGHTING DESIGN. 3.00 points.

Prerequisites: Enrollment limited to 12 students. Focuses on both the technical and creative aspects of theatrical lighting design. Students will learn the role of lighting within the larger design and performance collaboration through individual and group projects, readings, hands-on workshops, and critique of actual designs. Application Instructions: E-mail the instructor (acasey@barnard.edu) with the title of the course in the subject line. In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will admit them as spaces become available

#### Spring 2025: THTR UN3403

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3403 001/00418		T 9:35am - 11:50am	Autum Casey	3.00	11/12
		229 Milbank Hall			

### THTR UN3404 SCENE DESIGN. 3.00 points.

Prerequisites: Enrollment limited to 12 students. Permission of instructor given at first class meeting. Introduction to designing for the theatre. The course will focus on set design, developing skills in script analysis, sketching, model making, storyboarding and design presentation. Some investigation into theatre architecture, scenic techniques and materials, and costume and lighting design

#### Fall 2024: THTR UN3404

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3404 001/00327		F 11:00am - 1:50pm	Sandra Goldmark	3.00	11/12
		230 Milbank Hall			

### THTR UN3405 PROBLEMS IN DESIGN. 3.00 points.

Prerequisites: Some design experience is helpful, though not required. Enrollment limited to 12 students. Studio-based course explores the main elements of theatrical design: sets, costumes, lighting, and sound through objects, materials, theatrical and non-theatrical environments. Students examine these design elements as both individual and interrelated components within a performance. Fulfills one course in Design requirement for Theatre/Drama and Theatre Arts majors. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design

#### Fall 2024: THTR UN3405

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3405 001/00328		W 1:00pm - 3:50pm	Kara Feely	3.00	5/12
		229 Milbank Hall			

### THTR UN3406 Media & Production Design. 3 points.

Uses analysis and design to explore how media and projections can be used to construct narrative in theatre and support non-narrative forms of performance. Digital and analog media are explored for their potentials and limitations. Students learn how the media is produced and transmitted will be discussed as part of creating a video design. Students will produce projection projects using different kinds of media during the course requiring work outside of class time. Fulfills one of three courses in performance fields for Theatre/Drama and Theatre Arts majors: design.

### THTR UN3413 STAGE MANAGEMENT. 3.00 points.

Prerequisites: Permission of the instructor, given at first class meeting. This course explores the role of the stage manager and production manager in theatrical production. Students undertake hands-on exercises to develop the practical and collaborative skills essential to working both as a stage manager and production manager--script analysis; production timeline and rehearsal management; technical rehearsal; budgeting; working with directors and designers; working with unions; health and safety codes; house management; box office

### THTR UN3997 SENIOR THESIS IN PERFORMANCE. 4.00 points.

Prerequisites: Appropriate coursework and substantial production experience, including a major crew assignment in the junior year. Enrollment limited to senior Theatre majors. Combined and special majors may be considered under exceptional circumstances. Permission of the instructor required.

Prerequisites: Appropriate coursework and substantial production experience, including a major crew assignment in the junior year. Enrollment limited to senior Theatre majors. Combined and special majors may be considered under exceptional circumstances. Permission of the instructor required. Students register for this course to pursue approved theses in acting, design, directing, dramaturgy, solo performance, or stage and production management. Students will act in, direct, design, stage manage or dramaturg a play in the Barnard Department of Theatre season, or write a short play or solo performance piece that will be produced (according to departmental guidelines) in the Senior Thesis Festival. Collaboration is expected and students will meet weekly with faculty and other seniors. A written proposal must be submitted in the spring of the junior year and be approved. In addition to the performance, an extensive written Casebook is required: see departmental guidelines

#### Fall 2024: THTR UN3997

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3997 001/00329		M 12:10pm - 2:00pm 229 Milbank Hall	Crystal Finn	4.00	3/20
THTR 3997 002/00330		F 2:10pm - 5:00pm 230 Milbank Hall	Shayoni Mitra	4.00	1/20
THTR 3997 003/00331		F 2:10pm - 5:00pm 230 Milbank Hall	Michael Banta	4.00	0/20

#### Spring 2025: THTR UN3997

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3997 001/00419		M 11:00am - 12:50pm 229 Milbank Hall	Crystal Finn	4.00	2/20
THTR 3997 002/00420		F 2:10pm - 5:00pm 230 Milbank Hall	Sandra Goldmark	4.00	1/20
THTR 3997 003/00421		F 2:10pm - 5:00pm 230 Milbank Hall	Michael Banta	4.00	1/20
THTR 3997 004/00422		F 2:10pm - 5:00pm 230 Milbank Hall	Shannon Sindelar	4.00	3/20
THTR 3997 005/00423		M 2:10pm - 4:00pm L1105 Diana Center	Andrew Bragen	4.00	7/20
THTR 3997 006/00424		T Th 2:10pm - 4:00pm 229 Milbank Hall	Kyle deCamp	4.00	5/20
THTR 3997 007/00425		F 2:10pm - 5:00pm 230 Milbank Hall	Alice Reagan	4.00	1/20

### THTR UN3998 SENIOR THESIS IN RESEARCH. 4.00 points.

Prerequisites: Enrollment limited to senior Theatre majors. Combined and special majors may be considered under exceptional circumstances. Permission of the instructor required.

Prerequisites: Enrollment limited to senior Theatre majors. Combined and special majors may be considered under exceptional circumstances. Permission of the instructor required. In-depth research project culminating in a substantial written thesis on any aspect of drama, performance, or theatre research

#### Fall 2024: THTR UN3998

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3998 001/00332			William Worthen	4.00	1/3

#### Spring 2025: THTR UN3998

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3998 001/00426			William Worthen	4.00	0/20

### ENTA GU4625 SHAKESPEARE PERFORMANCE STUDIES. 4.00 points.

This course will work across three general approaches to Shakespearean drama and performance. First, we'll consider the historical forms of performance that have used Shakespearean drama as the material for theatrical endeavor. Second, we'll consider theoretical paradigms for performance that resituate an understanding that privileges either the "theatrical" or the "literary" identity of Shakespeare's plays. And, finally, we'll consider how we might consider the plays as themselves theoretical instruments for thinking about performance. Throughout the semester we will consider stage, film, and online productions, and the ways they articulate a sense of both "Shakespeare" and "performance." This course is a seminar, and while there is no formal prerequisite, students who have had a previous Shakespeare course will find the reading more manageable: we will rarely be doing the kind of "overview" of a play, but will be incisively considering specific elements of

performance. Application Instructions: E-mail the instructor [wworthen@barnard.edu](mailto:wworthen@barnard.edu) with the title of the course in the subject line. In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will admit them as spaces become available

**THTR UN3999 INDEPENDENT STUDY. 1.00-4.00 points.**

Prerequisites: Permission of the instructor and the chair required.

Prerequisites: Permission of the instructor and the chair required. Students submit, before the semester begins, a detailed proposal for independent research to a faculty sponsor

**Fall 2024: THTR UN3999**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3999	001/00796		William Worthen	1.00-4.00/5	
THTR 3999	002/00956		Hana Worthen	1.00-4.00/1	

**Spring 2025: THTR UN3999**

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
THTR 3999	001/00926		William Worthen	1.00-4.00/1	

## EARTH AND ENVIRONMENTAL SCIENCES

### THE DEPARTMENT OF EARTH AND ENVIRONMENTAL SCIENCES:

Department website: <https://eesc.columbia.edu/>

Morningside Office Location: 556-7 Schermerhorn Hall Extension

Office Contact: 212-854-3614

Lamont-Doherty Earth Observatory Office Location: 106 Geoscience

Office Contact: 845-365-8550

**Co-Directors of Undergraduate Studies:**

Terry Plank and Joerg Schaefer  
[dees-dus@columbia.edu](mailto:dees-dus@columbia.edu)

**Director of Academic Administration and Finance:** Kaleigh Matthews,  
[kaleighm@ldeo.columbia.edu](mailto:kaleighm@ldeo.columbia.edu)

**Undergraduate Program Manager:** Julianna Russo,  
[jr4432@columbia.edu](mailto:jr4432@columbia.edu)

## THE STUDY OF EARTH AND ENVIRONMENTAL SCIENCES:

The undergraduate programs in the Department of Earth and Environmental Sciences provide an understanding of the natural functioning of our planet and considers the consequences of human interactions with it. Our program for majors aims to convey an understanding of how the complex Earth system works at a level that encourages students to think creatively about the Earth system processes and how to address multidisciplinary environmental problems. The breadth of material covered provides an excellent background for those planning to enter the professions of law, business, diplomacy, public policy, teaching, journalism, etc. At the same time, the program provides sufficient depth so that our graduates are prepared for graduate school in one of the Earth sciences. The program can be adjusted to accommodate students with particular career goals in mind.

All majors, minors, and concentrators, when planning their programs of study, should regularly consult the directors of undergraduate studies and make themselves aware of the requirements for their particular program.

## STUDENT ADVISING

Earth Science and Environmental Science Majors, Minors, and Concentrators:

DUS: Terry Plank, [dees-dus@columbia.edu](mailto:dees-dus@columbia.edu)

Climate System Science and Climate and Sustainability Majors and Minors:

DUS: Joerg Schaefer, [dees-dus@columbia.edu](mailto:dees-dus@columbia.edu)

All Programs:

Undergraduate Program Manager: Julianna Russo,  
[jr4432@columbia.edu](mailto:jr4432@columbia.edu)

## COURSEWORK TAKEN OUTSIDE OF COLUMBIA

### Advanced Placement

To check if AP credits will fulfill program requirements, specifically the Supporting Courses requirement, please contact the DUS.

AP Environmental Science does not fulfill any DEES major, minor, or concentration requirements.

## Barnard College Courses

Courses taken at Barnard College can count towards the Breadth requirement if they are science-based and 2000 level or above. Barnard courses with STEM prerequisites can count towards the Depth requirement. To check if Barnard College courses will fulfill program requirements, please contact the DUS with the course number, name, and syllabus.

## Transfer Courses

Fulfillment of program requirements by earth, environmental, and/or climate-related transfer courses will be determined by the DUS. Please send your transcript and the course name and syllabi to [dees-dus@columbia.edu](mailto:dees-dus@columbia.edu) for evaluation.

For DEES majors, at least 50% of upper-level courses must be taken at Columbia:

**Climate System Science Majors:** Students must take at least 3 Climate System Core courses, and at least 1 Climate Solutions, Justice, Policy, Communications course at Columbia, from their designated lists seen in the bulletin.

**Earth Science and Environmental Science Majors:** At least 3 Depth/Breadth courses must be taught by a DEES Instructor.

**Trinity College Dublin Dual Degree:** Please send your Trinity College transcripts to [dees-dus@columbia.edu](mailto:dees-dus@columbia.edu) to check which courses will fulfill the Earth Science Major requirements. At least 3 Depth courses and 1 Breadth course, as well as the capstone sequence, must be taken at Columbia.

## Study Abroad Courses

Courses taken abroad must be approved by the DUS ahead of time in order to count towards the major. If you are interested in studying abroad, please consult with the DUS to plan your major requirements accordingly. Typically, students can count supporting courses taken abroad, and any earth, environmental, and/or climate-related courses must be evaluated by the DUS. To check if Study Abroad courses will fulfill program requirements, please contact the DUS with the course syllabus.

## UNDERGRADUATE RESEARCH AND SENIOR THESIS

### Senior Thesis Coursework and Requirements

All students majoring in DEES are required to complete the capstone requirement during their senior year. Depending

on your major, you may have more than one option to fulfill this requirement - EESC UN3901 Senior Seminar, EESC U3904 Independent Research in Climate System Science, or an approved Field Course. Please refer to the Requirements page and the DEES website to learn more about the capstone options for each major. Only students who complete the senior thesis may be considered for departmental honors.

## Undergraduate Research Outside of Courses

The department's close affiliations with the Lamont-Doherty Earth Observatory, the American Museum of Natural History (AMNH), NASA's Goddard Institute for Space Studies (GISS), the Earth Institute at Columbia (EI), and several departments within the Fu Foundation School of Engineering and Applied Sciences afford opportunities for student participation in a wide variety of current research programs. Summer employment, research, and additional educational opportunities are available at Lamont and GISS. The department encourages majors to become involved in a research project by their junior year.

## DEPARTMENT HONORS AND PRIZES

The Department of Earth and Environmental Science awards departmental honors to the major or majors in DEES judged to have the best overall academic record. The award is accorded to no more than 10% of the graduating class, or one student in the case of a class smaller than 10. A grade point average of at least 3.6 in the major and a senior thesis or equivalent research of high quality are required. All students meeting these requirements are automatically considered for departmental honors.

## GUIDELINES FOR ALL EARTH SCIENCE, ENVIRONMENTAL SCIENCE, CLIMATE SYSTEM SCIENCE, AND CLIMATE AND SUSTAINABILITY MAJORS, MINORS, CONCENTRATORS, AND SPECIAL CONCENTRATORS

### Advising

All majors, minors, and concentrators, when planning their programs of study, should regularly consult the directors of undergraduate studies, who can be contacted through the department office on the fifth floor of Schermerhorn. The requirements are different for each major, minor, and concentration and must be met in conjunction with the general requirements for the bachelor's degree. Declaration of the major must be approved by the department and filed in the departmental office.

### Substitutions and Exceptions

1. Higher-level courses may be used to satisfy supporting mathematics and science requirements for students with Advanced Placement preparation with the permission of the major adviser.
2. In addition to the courses listed for the depth, and breadth and related courses requirements, several graduate-level courses offered in the department as well as several advanced courses offered at Barnard may be substituted with the permission of the major adviser.
3. 1000-level courses in the Earth and Environmental Sciences Department **cannot** be used toward meeting the requirements of the Earth Science major and Environmental Science major, concentrations, or special concentrations.  
**Please note:** 1000-level courses can be used towards meeting the requirements of the Climate System Science major and Climate and Sustainability major, and some Earth and Environmental Science minors.
4. Double counting is not permitted for minors.
5. EESC UN2330 does not fulfill the Breadth requirement.
6. EESC GU4600 does not fulfill the Depth requirement, this course would only fulfill the Breadth requirement.

### Grading

A grade of C- or better must be obtained for a course to count toward the majors, concentrations, or special concentrations. The grade of P is not acceptable, but a course taken Pass/D/Fail may be counted if and only if the P is uncovered by the Registrar's deadline.

## MAJOR IN EARTH SCIENCE

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators](#) (p. 457) above.

The major in Earth Science requires a minimum of 45.5 points, distributed as follows:

### Foundation Courses

EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
-------------	--

Select one of the following:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
-------------	--------------------------------

EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST
-------------	--------------------------------

Students who wish to take both EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST and EESC UN2300 EARTH'S ENVIRO SYST: LIFE SYST can include one of these under breadth and related fields below.

### Supporting Mathematics and Science Courses

One semester of Calculus at the level of Calculus I or higher (3 credits)

MATH UN1101	CALCULUS I
-------------	------------

Select one of the following three-course sequences:

CHEM UN1403 & CHEM UN1404 & PHYS UN1201	GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES and GENERAL PHYSICS I
---	--

CHEM UN1403 & PHYS UN1201 & PHYS UN1202	GENERAL CHEMISTRY I-LECTURES and GENERAL PHYSICS I and GENERAL PHYSICS II
---	---

### Capstone Experience

Select one of the following:

EESC BC3800 & EESC UN3901	ENVIR SCIENCE SENIOR SEMINAR and SENIOR SEMINAR
EESC BC3801 & EESC UN3901	ENVIR SCIENCE SENIOR SEM II and SENIOR SEMINAR

A six to eight week summer geology field course

### Breadth and Related Fields Requirement

A minimum of 6 points (two courses) chosen with the major adviser are required.

Breadth and related field courses are science courses relevant for an Earth science major that do not require an Earth science background. Several such courses are offered at the 2000-,

3000- and 4000-level in the department and at Barnard. Examples include:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
-------------	--------------------------------

EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST
-------------	--------------------------------

EESC UN3010	FIELD GEOLOGY
-------------	---------------

EESC BC3017	ENVIRONMENTAL DATA ANALYSIS
-------------	-----------------------------

EESC GU4050	GLOBAL ASSMT-REMOTE SENSING
-------------	-----------------------------

EESC GU4600	EARTH RESOURCES # SUSTAIN DEV
-------------	-------------------------------

EESC GU4917	THE EARTH/HUMAN INTERACTIONS
-------------	------------------------------

EAGE E2002	
------------	--

Also included among breadth and related fields courses are science, mathematics, statistics, and engineering courses offered by other departments that count toward fulfilling degree requirements in those departments.

Please note that EESC UN2330 SCIENCE FOR SUSTAINABLE DEVPT does not fulfill the Breadth requirement.

### Depth Requirement

A minimum of 12 points (four courses) chosen with the major adviser to provide depth in the field of Earth science.

These courses build on the foundation and supporting courses listed above and provide a coherent focus in some area of Earth science. Depth courses are 3000- and 4000- level courses that carry EESC or supporting science pre-requisites. Students must include at least one of the following in their course of study:

EESC UN3101	Geochemistry for a Habitable Planet
or EESC UN3201	SOLID EARTH DYNAMICS

Please note that EESC GU4600 EARTH RESOURCES # SUSTAIN DEV does not fulfill the Depth requirement, this course would only fulfill the Breadth requirement.

### Areas of Focus

The following areas of focus include one of the courses listed above and three or more additional courses. Students are not required to specialize in a focus area, but examples are given below for those who choose to do so.

#### Geological Science

EESC GU4090	INTRO TO GEOCHRONOLGY
-------------	-----------------------

EESC GU4113	Mineralogy and Mineral Resources
-------------	----------------------------------

EESC GU4223	SEDIMENTARY GEOLOGY
-------------	---------------------

EESC GU4230	CRUSTAL DEFORMATION
-------------	---------------------

EESC GU4701	Introduction to Igneous Petrology
-------------	-----------------------------------

EESC GU4887	ISOTOPE GEOLOGY I
EESC GU4947	PLATE TECTONICS AND CLIMATE

It is strongly recommended that students focusing in geological science take the summer geology field course as their capstone experience.

#### Geochemistry

EESC UN3015	The Earth's Carbon Cycle
EESC BC3016	ENVIRONMENTAL MEASUREMENTS
EESC BC3200	Ecotoxicology
EESC GU4090	INTRO TO GEOCHRONOLOGY
EESC GU4113	Mineralogy and Mineral Resources
EESC GU4701	Introduction to Igneous Petrology
EESC GU4885	CHEMISTRY OF CONTINENTAL WATERS
EESC GU4887	ISOTOPE GEOLOGY I
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY

It is recommended that students focusing in geochemistry take CHEM UN1403-CHEM UN1404 General Chemistry I and II, and PHYS UN1201 General Physics I as their supporting science sequence.

#### Atmosphere and Ocean Science

EESC GU4008	Introduction to Atmospheric Science
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4924	INTRO TO ATMOSPHERIC CHEMISTRY
EESC GU4925	INTRO TO PHYSICAL OCEANOGRAPHY
EESC GU4926	INTRO TO CHEMICAL OCEANOGRAPHY

It is recommended that students focusing on atmosphere and ocean science also take a course in fluid dynamics and a course in differential equations.

#### Solid Earth Geophysics

EESC GU4230	CRUSTAL DEFORMATION
EESC GU4300	THE EARTH'S DEEP INTERIOR
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY
EESC GU4947	PLATE TECTONICS AND CLIMATE
EESC GU4949	Introduction to Seismology

It is recommended that students focusing in solid Earth geophysics take PHYS UN1201-PHYS UN1202 General Physics I and II, and CHEM UN1403 General Chemistry I as their supporting science sequence and also take MATH UN1201 Calculus II.

#### Climate

EESC UN3015	The Earth's Carbon Cycle
EESC BC3025	HYDROLOGY
EESC GU4008	Introduction to Atmospheric Science

EESC GU4330	INTRO-TERRESTRIAL PALEOCLIMATE
EESC GU4835	Wetlands and Climate Change
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4924	INTRO TO ATMOSPHERIC CHEMISTRY
EESC GU4925	INTRO TO PHYSICAL OCEANOGRAPHY
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY
<b>Paleontology</b>	
EESC GU4223	SEDIMENTARY GEOLOGY
EESC GU4550	Plant Ecophysiology
EESC GU4920	PALEOCEANOGRAPHY
EESC GU4924	INTRO TO ATMOSPHERIC CHEMISTRY
EESC GU4937	CENOZOIC PALEOCEANOGRAPHY

It is recommended that students focusing in paleontology take EESC UN2300 Earth's Environmental Systems: The Life System, as one of their foundation courses.

## MAJOR IN ENVIRONMENTAL SCIENCE

Please read [Guidelines for all Earth Science, Environmental Science, Climate System Science, and Climate and Sustainability Majors, Minors, Concentrators, and Special Concentrators](#) (p. 457) above.

The major in Environmental Science requires a minimum of 47 points, distributed as follows:

### Foundation Courses

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST

### Supporting Mathematics and Science Courses

One semester of Calculus at the level of Calculus I or higher (3 credits)

MATH UN1101	CALCULUS I
Select one of the following three-course sequences:	
CHEM UN1403 & CHEM UN1404 & PHYS UN1201	GENERAL CHEMISTRY I-LECTURES and GENERAL CHEMISTRY II-LECTURES and GENERAL PHYSICS I
CHEM UN1403 & PHYS UN1201 & PHYS UN1202	GENERAL CHEMISTRY I-LECTURES and GENERAL PHYSICS I and GENERAL PHYSICS II

CHEM UN1403 & EEEB UN2001 & PHYS UN1201	GENERAL CHEMISTRY I- LECTURES and ENVIRONMENTAL BIOLOGY I and GENERAL PHYSICS I
---	---

## Capstone Experience

EESC BC3800	ENVIR SCIENCE SENIOR SEMINAR
or EESC BC3801	ENVIR SCIENCE SENIOR SEM II
EESC UN3901	SENIOR SEMINAR

## Breadth and Related Fields Requirement

A minimum of 6 points (two courses) chosen with the major adviser are required.

Breadth and related field courses are science courses relevant for an environmental science major that do not require an environmental science background. Several such courses are offered at the 2000-, 3000- and 4000-level in the department and at Barnard. Examples include:

EESC BC3017	ENVIRONMENTAL DATA ANALYSIS
EESC GU4050	GLOBAL ASSMT-REMOTE SENSING
EESC GU4600	EARTH RESOURCES # SUSTAIN DEV
EESC GU4917	THE EARTH/HUMAN INTERACTIONS
EESC UN3010	FIELD GEOLOGY

Also included among breadth and related fields courses are science, mathematics, statistics, and engineering courses offered by other departments that count toward fulfilling degree requirements in those departments.

Please note that EESC UN2330 SCIENCE FOR SUSTAINABLE DEVPT does not fulfill the Breadth requirement.

## Depth Requirement
